*Charges against surplus deducted.

Depreciation is at the rate of 5% for buildings, 15% for machinery, and 20% for equipment.

Dividends: paid 1% per share monthly from July 20, 1916, to Oct 20, 1918. Dividends suspended 1919 until copper market and cost conditions improve.

Property: 157 claims (about 3,245 acres), 23 of which, or about 475 acres, are patented. Also 990 acres of ranch lands acquired for tailings and timber. Part is leased at an annual rental of \$2,700. The claims consist of groups—Engels and Superior, 2½ miles apart. The elevation is 5,263'. The property is 22 miles from Paxton on the Western Pacific R., Plumas county.

Geology: the copper belt is 1,800' wide on the Engels group, runs N. E. S. W., with a westerly dip, and has been developed for over 3,000' and is well adapted for development by tunnels. Orebodies consist of large lenses in porphyry, alongside of diorite dikes. Ore contains bornite, with some chalcocite and chalcopyrite, and averages 2¾% copper. A carbonate capping overlies a portion of the orebody, with sulphide ore at shallow depth. The geology has been the cause of considerable discussion.

Development: at Engels mine, amounts to five miles of drifts, crosscuts, and raises. One tunnel is 4,000' long, attaining a vertical depth of 700'.

The Superior mine, opened in the summer of 1916, has a 1,400' main tunnel, crosscutting the general strike of the ore zone. About 5,000' of tunnels has been driven. Orebody averages 2% copper, with large lenses of ore running from 15 to 20%.

New work totaled 8,823' in 1920; in 1919, it amounted to 4,310' of drifts, etc., 3,791' of drilling in the Engels mine, and 2,833' and 1,037', respectively, in the Superior mine. The 2 mines produced 206,440 and 78,672 tons respectively in 1919 and 149,583 and 90,029 in 1920.

Three-compartment shafts have been sunk at both Engels and Superior mines, to reach orebodies at lower levels already proved by drilling. A 7-600' adit is being driven 500' below present workings; this will concentrate operations and do away with pumping.

Ore Reserves: Dec. 31, 1920, were 2,271,290 tons, including 382,483 tons of broken ore in stopes and 1,438,807 tons blocked out above the stopes between levels, plus 450,000 tons of probable ore. This does not include ore, indicated by diamond-drill work beyond the present stope areas.

The manager states, "The Engels copper mine to-day has enough high-grade ore in one solid block, actually proven above the sixth level in the Superior mine, to more than pay for, at the present market price, all the company's stock now in the hands of the public. In spite of the labor shortage which has been acute, we have added 500,000 tons to our proven ore reserves, since Jan. 1, 1920 and should operating conditions not become worse, we confidently expect to add another 1,000,000 tons to our blocked out reserves before the end of the year."

Equipment: includes 1,000-ton Minerals Separation oil-flotation plant at the Superior mine (the Engels mill has been dismantled), 2½ miles of aerial tramways; 400 h. p. hydro-electric plant; 6 air-compressors with total capacity of 6,000' per minute; two large double-drum hoists; trolley and storage battery locomotive; sawmills, complete shops; 2 up-to-date stores; recreation hall; fifty-two 5 room and eight 3-room houses rented to families at \$6 to \$10 per month; two-men rooms in the bunk-houses, hotel, etc. Board is supplied at both camps for 300 men at \$1 per day, although it costs the company \$1.60 per man. In Dec., 1920, the estimated efficiency was 80% of the pre-war standard. The company has spent \$2,379,269 on its property.

Company controls 22 miles of standard-gauge railroad running from the mines to Paxton on main line of the Western Pacific, in Feather River canyon. This cost about \$400,000, is well equipped, and is clear of bonded and other indebtedness.

Power used is hydro-electric, partly from company's own plant, but mainly from the Great Western Power Co.'s Las Plumas plant, from which transmission line costing \$200,000 was built to the Engels property in 1917

Production and costs:

The monthly demand is 1,000,000 k. w. hr., at a cost of \$14,600. The new rate is 0.7 cents per k. w. hr. for over 500,000 k. w. hr. per month.

Year	Ore Milled, tons	Copper, %	Recovery %	Copper, lb.	Silver, oz.	Gold, lb.	Cost per lb. cents
1920.....	239,612	2.21	8,571,569	119,165	1,218

1916.....	138,712	2.28	71.63	4,312,408	14.84
1915.....	59,714	2,893,133

From 450 to 500 men are employed.

ENTERPRISE GOLD MINING CO.

CALIFORNIA

Probably defunct.

Property: the Enterprise mine, 160 acres, in East Fork district, 7½ miles north of North Fork, in the Trinity Forest Reserve, Trinity county.

See Vol. XIV. of this manual.

ESTABROOK GOLD DREDGING CO.

CALIFORNIA

Address: L. E. Richards, Trinity Center, Trinity county, Calif. F. W. Estabrook, treas., Nashua, N. H.

Inc. 1917, in Maine. Cap. \$20,000.

Property: a dredging area on North Fork of the Trinity river, 28 miles from Delta, on the S. P. R. R.

Equipment: electric power totaling 1,590 h. p. and the largest capacity gold mining dredge in the world, a Bucyrus, which started work in May, 1920. The boat was designed to dig 45' below water-level, which may be extended to 55'. Its normal capacity is 400,000 yd. per month. The boat weighs over 1,200 tons. The gold-saving tables have an area of 4,400 sq. ft. Handled 1,502,860 cu. yds. of stream gravel in 1919, and a large production is reported for 1920.

ESTELLE MINING CO.

CALIFORNIA

Office: 803 H. W. Hellman Bldg., Los Angeles, Calif. Roy S. Troeger, supt.

Officers: R. C. Troeger, pres.-gen.-mgr.; Alfred H. McAdoo, sec., Adolph Ramish, treas.

Inc. 1902, in California. Cap. \$100,000, \$1 par; 98,013 shares issued.

Property: 41 claims, over 700 acres, including the Morning Star, Rochelle, Shamrock and Southern Cross groups in the Cerro Gordo district, Inyo county, 4 miles E. of Keeler. Property adjoins, and is the S. extension of the Cerro Gordo mine.

Ore: occurs in fissure veins and replacements in limestone, carrying silver and lead, also gold, copper and zinc.

Development: by a 520' shaft and the 7,300' Troeger tunnel, 2,200' below the Morning Star adit. Seven veins are reported to have been cut, carrying both shipping and concentrating ore. Veins have stoping backs in virgin ground of 3,500' above the Troeger tunnel. In August, 1920, a drift from the 100' winze below the Morning Glory adit had opened 75' of ore. The shoot is from 9 to 16' wide, averaging \$45 per ton in gold, silver, and lead.

Equipment: electric power, etc., and 7,100' aerial tram from Morning Star adit to bins on the railroad at Keeler.

Production: normally about 20 tons daily, but operations curtailed 1920, owing to high costs, being as follows: gold, 231.65 oz.; silver, 49,975 oz.; copper, 36, 398 lb.; lead, 162,157 lb. Ore goes to Utah smelters.

EUREKA (OR HETTY GREEN) MINE

CALIFORNIA

Sutter Creek, Amador Co., Calif.

Reopened 1920-21, after many years idleness, and \$1,000,000 spent in extensive development and diamond drilling.

Nothing of value was found and the enterprise was abandoned

FAIRVIEW MINING CO.

CALIFORNIA

Reorganized in 1914 as **Calumet & California Mining Co.**, which see.

FEATHER RIVER COPPER CO.

CALIFORNIA

Address: Geo. W. Long, Heard Bldg., Phoenix, Arizona. H. E. Bush, supt.-v. p.; Fred J. Elliott, sec.-treas.

Inc. 1919, in Arizona. Cap. \$1,000,000; par \$1; 312,500 shares issued for property. New York interests carrying development cost.

Property: 19 claims, includes the Snowstorm mine, adjoining the Engels Copper Mng. Co. claims.

Development: by 2,000' tunnel, to reach orebody 1,000' below surface when about 2,500' long. At 500', a leached zone was entered, assaying 1% copper and \$1.50 per ton in gold and silver. At 600', chalcovrite was exposed. High grade bornite and copper pyrite ore was cut 1921, in diamond drill work.

Equipment: electric power from Great Western Power Co., transformers, 300 cu. ft. Sullivan compressor, machine-drills, etc.

The owners are not booming the work, but are quietly spending \$100,000.

FIRST NATIONAL COPPER CO.

CALIFORNIA

See Balaklala Cons. C. Co.

Office: 111 Broadway, New York. **Mine nad works office:** Coram, Shasta county, Cal.

Officers: Thos. W. Lawson, pres.; Wm. A. Kerr, v. p. and treas.; A. R. Buchanan, sec.; preceding, with H. W. Hoops, E. H. Whiting, John A. Young, and E. M. Buchanan, directors. S. A. Holman, gen. mgr.

Inc. Jan. 20, 1908, in Nevada. **Cap.** \$3,000,000; \$5 par; assessable; paid in \$3.75; 600,000 shares outstanding. Cash, bills and accounts receivable Dec. 31, 1919, were \$217,405, compared with \$170,849, June 30, 1918. Liabilities, \$4,017.

Is said to have 4,000 shareholders, including American Smelters Securities Co., owning 80,000 shares. Stock is listed on the New York and Boston curbs. Empire Trust Co., New York and State Street Trust Co., Boston, registrars; Registrar & Transfer Co., New York, and International Trust Co., Boston, transfer agent. Annual meeting last Thursday in October, at Carson City, Nev.

Is a holding company, owning the entire capital stock of the Balaklala Consolidated Copper Co., which in turn owns the entire capital stock of the Coram Water Co., and other subsidiaries, and a third interest in the Balaklala Central Mining & Smelter Co.

Dividends: 25cts., Aug., 1916; 40cts. Aug., 1917; 30cts. in 1918; 15cts. Feb. 15 and Aug. 25, 1918, and Feb. 25, 1919.

The mining property and smelter are described under the above titles. The Balaklala Consolidated Copper Co. had a bond issue of \$1,500,000, which was paid by the First National, in 4 annual installments of \$375,000 each. The First National authorized, 1909, a \$1,000,000 bond issue, flotation of which was a failure, but pledged some of these bonds for a loan of \$375,000, which loan presumably was paid by the proceeds of the last assessment. Property fully described under **Balaklala Consolidated Copper Co**

FIVE BEARS MINING CO.

CALIFORNIA

Office: 838 National Life Bldg., Chicago, Ill. **Mine office:** Genesee, Plumas county, Cal.

Officers: F. A. Meidinger, pres.; A. Vermaas, sec.; J. D. Meidinger, treas.; preceding, with G. H. Goodhue, directors.

Inc. April 10, 1903, in South Dakota. **Cap.** \$2,500,000; shares \$1 par, issued, \$2,428,174.

Property: 10 claims, 9 patented, 204 acres, well timbered, in Plumas county, 3 miles S. E. of Genesee and 18 miles from Keddie on the W. P. R. R. Ore contains chalcopryite and chalcocite. The main vein is from 9 to 13' wide, assaying from 5.5 to 2.3% copper. From 1876 to 1893 the gossan was worked for gold.

Development: by 2 tunnels, 380' and 1,540' long. Mine has about 4,000' of workings, estimated to show 80,000 tons of ore, with 9,500 tons blocked out for stoping.

Equipment: includes a 50-h. p. water plant, a 2-drill air compressor, ten 700-lb. stamps, tables, and electric light plant. There are 11 buildings. Operated under a bond and lease with 25 to 30 men employed in 1917. Idle since.

FIVE PINES MINING CO.

CALIFORNIA

Address: Five Pines, Trinity County, Calif. H. J. Van Ness, pres.; L. Van Ness, mgr.

Property: located in 1896, is on the N. E. side of Van Ness creek, about 1½ miles above its mouth and 2 miles N. W. of Minersville, Trinity county. Mine is said to have produced to 1915 almost \$300,000, and to be the best producer of the district.

Ore: free milling gold quartz with calcite, occurs in a series of pockets in a contact vein between meta-andesite and overlying slate and sandstone. **Development:** 225' incline shaft with a level at 125'.

Equipment: includes a small hoist and 2-stamp mill. Coarse gold and 80% of total value is recovered in hand mortar. Water power is used.

Employs 4 men. See U. S. G. S. Bull. 540, p. 73, and Mines & Min. Res. of Trinity Co.

FORKS OF SALMON RIVER MINING CO. CALIFORNIA

Address: 544 Market St., San Francisco, Calif., or J. D. Hubbard, supt., Sawyers Bar, Siskeyou Co., Cal.

Officers: B. M. Newcomb, pres.; A. C. Aiken, sec.

Inc. Nov. 1, 1909, in California. **Cap.** \$200,000; \$1 par; all issued.

Property: two mines, one a hydraulic mine, located on the North Fork of the Salmon river, 14 miles from Sawyer's Bar, Siskiyou county, and the other an old quartz mine near Sierra City, Sierra county.

Development: at the quartz mine is by 3 tunnels 1,700', 1,300', and 2,500' long, one with a back of 1,500'. Ore occurs in a shoot 6' wide and 600' long, that averaged nearly \$20.

The placer mine is the largest in America, operating all the year. It comprises 520 acres of old placer locations, which were rich diggings in early days, with control of 4 miles of old channels and bars along the north fork of Salmon river. Bedrock is schist, covered by 20 to 60' of gravel. Three No. 5 giants with 6" nozzles, under 235' head handle 30,000 cu. ft. a month. The main flume carries 3,000 miner's inches of water, and the lower flume 2,000 inches. Equipped also with an 18" elevator and a water-power derrick handles rocks up to 7 tons.

Production: \$250,000 in 1921.

FOSTER GOLD MINING CO. CALIFORNIA

Office: 112 Steward St., San Francisco. **Mine office:** Carrville, Trinity county, Cal.

Officers: C. T. Foster, pres.; E. E. Tway, v. p.; F. N. Harmon, sec-treas. **Directors:** above with D. W. Rason, A. E. Gillespie, O. A. Kish, supt.

Inc. Nov., 1912. **Cap.** not stated. Is a close corporation with four principal stockholders. No bonded debt or chattel mortgage.

Property: 147 claims in Trinity Center district, Trinity county, as follows: 116 mining claims, 28 mill sites, and 3 placer claims. The mining claims comprise two groups, the Bonanza King, and the Bonanza Queen; they show a vein in gabbro, with course N. 53° W., and dip 60° N. E., which carries free gold. Length of vein within property stated to be 24,000'. High-grade ore occurs where the vein is crossed by a basic dike now serpentinized.

Development: entirely by tunnels, giving backs of 1,200'.

Equipment: includes 100 h. p. compressor and a 20-stamp mill. Through a subsidiary, the company owns an hydro-electric power plant of 1,000 h. p., concrete dam, flume, ditches, etc.

Production: company reports that ore worth \$600,000 has been taken out of No. 2 tunnel and states that ore reserves blocked out aggregate 92,300 tons.

No 1920 information.

FRANCES COPPER MINING CO. OF CALIFORNIA CALIF.

Address: Thos. Allison, pres., 1117 Trust & Saving Bldg., Los Angeles, California.

Inc. Nov., 1915, in California. **Cap.** \$100,000; 10c par; assessable; all outstanding.

Property: 2 claims in Kelso district, San Bernardino county.

Company does not reply to requests for information.

FRANCO-CONTENTION MINING CO. CALIFORNIA

Office: Casper, Wyo. **Mine address:** Stent, Cal.

Officers: W. D. Waltman, pres.; B. O. Lummis, sec., Casper, Wyo.

Inc. 1914, in Wyoming **Cap.** \$200,000; \$20 par.

Property: a gold mine, 180 acres, on Knight creek, Tuolumne county, closed down for duration of the war, and no later returns.

FREMONT CONSOLIDATED MINING CO. CALIFORNIAOperated under lease by **Metals Exploration Co.****Officers:** 24 Market St., San Francisco, and Amador City, Amador Co., Cal.**Officers:** C. M. Gooddall, pres.; G. N. Nash, sec.**Inc.** 1899, in California. **Cap.** \$500,000; shares \$2.50 par. Reported to have paid \$316,000 in dividends.**Property:** 4 claims, 4,200' on the Mother Lode, at Drytown, Amador county, 1½ miles north of Amador City, shows gold ore occurring in contact of black slate on the west, and metadiabase on the east. Vein strikes N. 25° W., dip 50° E., and has an average width of 6'. West of the main vein ore has been developed in schist. Orebodies occur as lenses, the ore being in the form of quartz stringers, cutting the schist. The rock is highly mineralized with pyrite.**Development:** by the Fremont shaft, 2,950' deep, sunk on a 51° incline, and the 1,500' Gover incline north of the Fremont shaft. There are several miles of underground workings.**Equipment:** includes a steam hoist at each shaft and a 40-stamp mill. Oil is used as fuel.

Mine was closed down in winter of 1918 due to high cost of gold mining, but was unwatered late 1920, machinery overhauled, and in 1921 development and exploration at greater depth started in the Fremont shaft.

FRIDAY COPPER MINES CO. CALIFORNIA**Address:** 4479 Trias St., San Diego, Calif., also Friday Copper Mine, Julian, San Diego Co., Calif.**Officers:** W. E. Sterne, pres.; L. A. Ellis, sec.**Inc.** 1914, in Calif. **Cap.** \$10,000; \$1 par; all issued.**Property:** 4 miles S. of Julian and 64 miles from San Diego. Ore is closely similar to that of Sudbury, Ontario, and carries 6% nickel, with but 1% copper. Ore is 35% sulphide. Described in U. S. G. S. Bull. 640, p. 77.**Development:** by 250' shaft and tunnel. Developing.**FRIDAY-LOWDEN COPPER CO. CALIFORNIA**

Dead. See description in Vol. XIII.

GARDELLA DREDGING CO. CALIFORNIA**Address:** Lawrence Gardella, owner, Oroville, Calif.

Operates 2 dredges. Active in 1920. On Clear creek, near Redding, Shasta county.

GASTON GOLD MINING CO. CALIFORNIA**Address:** E. J. McCutcheon, pres., 1107 Merchants Exchange Bldg., San Francisco. G. W. Star, mng. dir., Grass Valley, Calif. W. H. Williamson, supt.**Property:** 26 claims, 1200 acres, 6 miles N. E. of Washington, Nevada county. Of the 8 known veins, 2 are worked, the Gaston and Gambirinus. The former occurs at contact of slate and granite, and is 2 to 10' wide; the Gambirinus 4 to 6' wide.**Development:** by a 2,600' adit and 4,876' drain tunnel, 800' below the adit, both connected by a winze. The drain tunnel cut the Gaston vein at a depth of 800' below the adit, but it was barren. In 1914, a short crosscut opened 6' of ore showing free gold. This tunnel failed to open any ore in the Gambirinus vein. Reserves are given as 100,000 tons, averaging \$4 per ton.**Equipment:** costing over \$200,000 includes a 120 k. w. hydro-electric power-plant, and 75 k. w. steam electric auxiliary, water-driven compressor, 10-stamps. Hardinge mill, plates, tables, shops and dwellings.**Production:** about \$1,000,000 from 174,000 tons of ore during 1899-1907. From 1908 to 1914 operations were suspended, and again from 1918 to 1921.**GENESEE VALLEY COPPER CO. CALIFORNIA****Address:** Melvin Smith, pres., Sioux City, Iowa.

Inc. Nov. 1, 1909, in Nevada. **Cap.** \$2,000,000; shares \$1 par, non-assessable; issued \$1,000,000. Annual meeting, August 1. Properties have been transferred to Mel. J. Smith, trustee, to satisfy creditors' demands.

Property: 12 claims, 240 acres, in 3 groups, and a 120-acre mill site. The country rock is meta-andesite and sandstone, showing small amounts of bornite, disseminated in a porphyry dike.

Company also owns the Native Son mine, 5 claims, adjoining the Gruss mine, 3 miles E. of Genesee, Plumas county, and 18 miles from Keddie, on the W. P. R. R.

Development: by 200' tunnel and 45' shaft opening a quartz vein in slate and altered andesite, carrying chalcocopyrite.

GEORGIA SLIDE MINING CO.

CALIFORNIA

Address: I. B. Brown, Georgetown, Calif.

Property 1½ miles N. of Georgetown, Eldorado county. The Bebee, Milvey Point, Eureka, and Pacific mines were taken over. Considerable exploration has been done. A zone of schist and slate traverses a porphyry belt, and is intersected by numerous gold-bearing quartz seams. Possibilities fair. Idle.

GHOST MINE

CALIFORNIA

Railroad Flat, Calaveras Co. Reopened, 1921.

GIANT LEDGE GOLD & COPPER CO.

CALIFORNIA

Idle for 9 years. Probably defunct. See Vol. XII and XIV. Mail unclaimed.

GIBRALTAR CONSOLIDATED GOLD MINING CO.

CALIFORNIA

Address: Jacob Kieffer, pres.; W. I. Redding, sec., both of Downieville Sierra county, Calif.

Inc. 1881, in California, reincorporated in 1893. **Cap.** \$250,000 50¢ par; 350,000 shares issued.

Property: 1,120 acres, covering 2 miles of an ancient channel, which lies on slate and has an overburden of andesite.

Development: by 3 tunnels, raises, and 310' shaft to bedrock. August, 1920, shaft had been unwatered and prospecting resumed.

GLOBE CONSOLIDATED LEASE, INC.

CALIFORNIA

Out of business. See Vol. XIV.

GLOBE CONSOLIDATED MINING CO.

CALIFORNIA

Out of business.

GLOBE GOLD MINING CO.

CALIFORNIA

Address: 519 Beacon St., San Pedro, Calif.

Officers: E. A. Mills, pres.; W. B. Duncan, sec.

Inc. 1910, in Calif. **Cap.** \$100,000; 10¢ par. Annual meeting, June.

Property: 6 claims, near Kelso, San Bernardino county, developed by tunnel, connecting with shaft.

GLOBE MINE

CALIFORNIA

Mine acquired in 1919 by Metals Exploration Co., and sold late in 1920 to J. N. Kilner of New York, and Chas. Farmer of Hayfork. Property in Trinity county is credited with total output to date of \$750,000.

GOLD BAR MINING CO.

CALIFORNIA

Office: 255 California St., San Francisco, Calif.

Officers: J. J. McIntire, pres. and gen. mgr.; W. N. Lamb, v. p.; H. Easom, sec.; with W. P. Madill and Floyd Seger, directors.

Inc. Aug. 31, 1915, in California. **Cap.** \$75,000; \$1 par; 41,020 shares issued.

Property: 393 acres, patented, and 234 unpatented, in Railroad Flat, 30 miles from Valley Springs, Calaveras county. Proposed to develop a lava-capped drift-gravel channel, and wash gravel by improved method, the drop system. A sketch in prospectus indicates great optimism. No record of operations.

GOLD BASIN MINING CO.**CALIFORNIA****Address:** P. O. Box 713, El Centro, Calif.**Officers:** George J. Shank, prés., A. A. Gibson, v. p.; Frank Birkbouser, sec., Brawley, Calif.; South Trust & Commerce Bank, treas. J. L. Taecker and S. T. McClintock, directors, all of Brawley.**Inc.** Dec. 20, 1918, in Calif. **Cap.** \$250,000; \$1 par; 150,000 issued. Is a close corporation.**Property:** 6 claims in mountains east of Glamis, covers a gold-copper quartz vein in granite, opened by 1,500' of workings.**GOLD DOLLAR MINE****CALIFORNIA****Address:** Zimmerman & Anderson, Box 143, Redding, Calif.**Property:** 14 claims, at Shasta, Shasta county, showing 5' of ore, averaging \$21.60 per ton; 20,000 tons, shipped by former owners to Keswick. Employs 2 men, working in 3,000' tunnel.**GOLD DRIFT MINING & MILLING CO.****CALIFORNIA****Address:** L. C. Brickhouse, 936—8th St., Oakland, Calif., or I. O. O. F. Bldg., Reno, Nevada.**Mine address:** Chas. Haas, supt., Quincy, Calif.**Officers:** L. C. Brickhouse, pres.; Chas. Haas, sec. with Joe Mattos and Gurney Newl, Berkeley, Calif., directors.**Inc.** Oct. 1, 1913, in Nevada. **Cap.** \$1,000,000; \$1 par; 50,000 issued.**Property:** 20 claims, 5 patented, 125 acres, at Nelson Point, Plumas county, on middle Feather River, shows a quartz vein, 30' wide in places, averaging \$18 per ton in gold, silver and copper values.**Development:** by several short tunnels. Has small Gibson concentrator, handling 18 tons daily, but the total output was but 250 tons in 1920.**GOLDEN CENTER MINING CO.****CALIFORNIA****Officers:** care White, Howard & McCormick, 607 J St., Sacramento; and Grass Valley, Calif.**Officers:** Rodney McCormick, pres.; J. W. Howard, sec.; with Albert Bellana and G. H. Alltucker, directors. E. R. Abadie, Jr., supt.**Inc.** 1913, in Calif. **Cap.** \$300,000; \$1 par; 285,000 issued.**Property:** 150-acres, including ground under the town of Grass Valley, Nevada county.**Development:** by over 6,000' of workings, with 1,860' main shaft. The flow of water is 340 g. p. m. The main shoot has been stoped from the 500' to the 900' levels, inclusive, N. of shaft.**Equipment:** includes pumps, hoist, compressor, 20-stamp mill, etc. Cyanide plant to be erected.**Production:** good yields were made for a time, enabling a dividend to be paid and many improvements to be made; but in 1918 the \$5.80 ore being mined did not pay operating expenses and assessments were levied to pay for further development. In May, 1919, work was confined to upper levels on account of insufficient pumping facilities to keep lower workings unwatered. In August, it was decided to suspend operations until financial arrangements could be made for putting in an adequate pumping system. Property in good hands.**GOLDEN GATE EXPLORATION CO.****CALIFORNIA****Dead.** Fully described in Volume XIV. Operated the Sheep Ranch mine in Calaveras county at a loss of \$77,090 in 1919, selling only \$10,434 worth of bullion. Option on property and all assets acquired first by The California Syndicate, and later, July, 1920, by the **Montacali Mines Syndicate**, which see. Reported that Golden Gate shareholders were to receive their pro rata of 35,000 fully paid shares of California Syndicate stock.**GOLDEN STREAK CONSOLIDATED GOLD MNG. CO.****CALIFORNIA****Address:** Henry Labner, pres., or F. H. Schulze, sec., Colfax, Calif.**Inc.** 1916, in Calif. **Cap.** \$100,000; \$1 par; issued 6,650.**Property:** 240 acres, 150 patented, in the Iowa Hill district, Mono county.

GOLDEN WEST TUNNEL MINING & MILLING CO. CALIFORNIA

Address: P. A. Coady, 709 Haas Bldg., Los Angeles, Calif. **Mine address:** Needles, Calif. **Officers:** Chas. P. Blanton, pres., Oatman, Ariz.; A. Rossiter, gen. mgr., sec.-treas.; Jos. Onetta, supt. Company issued 100,000 shares each to T. A. Dumont and H. C. Adams for claims and sold 50,000 shares at 50¢ for development and plant.

Property: 17 patented claims, in the Ibex district, San Bernardino, at north end of Manchester Mt., 26 miles from Needles.

GOLD EXPLORATION CO., THE CALIFORNIA

Address: F. O. Richardson, mgr., Downieville, Sierra county, Calif.

Inc. 1919, in Utah. **Cap.** \$150,000.

Property: the Alhambra, Comet and Sovereign groups, 14 claims, in Ladies Canyon, in the Sierra City district. The Alhambra has a quartz vein in a serpentine-slate contact, containing gold, pyrite and galena; the Sovereign shows a fissure vein cutting across the slate, carrying free gold, 3% pyrite, and galena.

Development: by about 2,500' of workings. In 1920, new work exposed a 30' vein for a distance of 200', with shoots of rich ore.

Equipment: water-power, air-compressor, 3 rolling mills, and other machinery.

GOLD MOUNTAIN HYDRAULIC & DREDGING CO. CALIFORNIA

Address: G. W. Fagg, 203 Grant Bldg., Los Angeles, Calif.

Officers: S. D. Graves, pres.; J. B. Tibbot, sec.

Inc. 1908, in Calif. **Cap.** \$1,000,000; \$1 par.

Property: 440 acres in the Edmonton district, 23 miles S. of Quincy, Plumas county, at elevation of 5,400'. Deposit consists of gold bearing gravel on slate and schist bedrock. Two giants with water under a 120' head, are used for sluicing. Daily capacity is 1,000 cu. yd. Production is small.

GOLD POINT CONSOLIDATED MINES, INC. CALIFORNIA

Company disincorporated and property taken over by Idaho Maryland Mines Co.

GOLD QUEEN MINING CO. CALIFORNIA

Address: 54 Broad St., Bangor, Maine.

Officers: Lester R. Wiley, pres.; Groveland, Calif.; Jas. A. Dunning, sec.

Inc. 1905, in Maine. **Cap.** \$4,000; \$100 par.

Property: near Sonora, Tuolumne county.

GOLD REEF CONS. MINES CO. CALIFORNIA

Address: A. G. Allen, 399 Savin Bldg., Pasadena, Calif.

Officers: S. S. Wold, pres.; C. W. Post, v. p.; E. S. Harwood, sec.; E. P. Kepner, supt.

Inc. 1919. **Cap.** \$200,000. The Tom Reed M. Co. has a \$29,574 investment in company including a \$4,000 assessment paid in 1920-21.

Property: the Clipper Mountain and Gold Reef mines, at Danby, San Bernardino county.

Reported early in 1920, that company was reopening the Clipper Mtn. (n. v.) mine.

GOLD STAR MINING CO. CALIFORNIA

Property acquired by Mugwump M. Co., which see.

GOLD STATE MINING CO. CALIFORNIA

Address: P. O. Box 595, Bakersfield, Calif.

Not incorporated. Organized in 1918. F. G. Brassell, D. Bordagaray and C. P. de Sastlemolino, trustees. G. D. Aldrich, sec.; M. J. Errecart, mgr., Tehachapi, Cal.

Property: 5 unpatented claims in Green Mountain district, Kern county, showing gold ore in vein with granite walls.

Development: 545' of tunnelling. Plans to build 3-stamp mill.

GOLDSTONE MINING CO. CALIFORNIA

Mail returned from former address: Goldstone, San Bernardino county, Calif. Probably dead.

Officers: F. A. Shorey, v. p.; G. M. Leonard, sec.; W. S. Hubbard, treas.; all of Springfield, Mass. A. E. Turner, cons. engr.

Cap. \$2,000,000; shares \$1 par.

Property: 14 claims in new Goldstone district, 35 miles from Barstow, developed by shafts and pits. Ore occurs at limestone-diorite contact.

Company well known at Springfield, Mass., on account of queer share dealings by certain firms.

GOLINSKY COPPER CO. CALIFORNIA

Dead. Formerly Golinsky Mng. Co., which once owned 14 claims, adjoining the Mammoth mine on the east and 4 miles west of Kennett, Shasta county, said to show an ore shoot, 20' wide carrying low-grade copper ore with gold.

GOLINSKY MINING CO. CALIFORNIA

Dead. See Vol. XIV.

GOOD WILL MINING CO. CALIFORNIA

Address: J. A. Peterson, pres., Paso Robles, Cal.; Geo. F. Root, v. p.; C. A. Iversen, sec.-treas.; B. F. Mason, supt., and J. A. Peterson, directors.

Inc. Jan., 1918, in Cal. **Cap.** \$250,000; \$5 par; outstanding 30,000 shares assessable.

Property: a manganese mine, with copper ore, 500 acres in Los Osos valley, San Luis Obispo county, 10 miles N. W. of San Luis Obispo. Copper ore said to average 3%.

Development: by 200' shaft and 625' of tunneling, with total of 1,450' underground workings. There is a 4"x6" compressor on the property.

Management gives receipts from ore sales as \$15,050 for 1918, and ore reserves at 125,000 tons of 3½% ore.

GRASS VALLEY BOUNDARY CO. CALIFORNIA

Address: M. H. Brock, mgr., Grass Valley, Calif.

Inc. 1916, in Calif. **Cap.** \$300,000.

Property: at Grass Valley, Nevada county, on western edge of camp.

Development: by 200' shaft, opening 2 veins of gold ore. Dump ore, in part waste, run through new 5-stamp mill, returned about \$8.50 per ton.

GRASS VALLEY BULLION EXPLORATION CO. CALIFORNIA

Address: G. E. Mainhart, Grass Valley, Calif.

Inc. 1919, in California. **Cap.** \$1,000,000; \$1 par.

Property: the Bullion group of 4 claims, 2 miles S. of Grass Valley, Nevada county, said to have yielded gold worth \$1,000,000; was shut down for 13 years. Company also owns the Diamond mine, ½ mile N. W. of the Bullion.

Geology: a quartz vein, 1-5' wide, in granodiorite to a depth of 200', below which it passes into diabase. Ore carries free gold, galena and 4% pyrite.

Development: by 1,500' inclined shaft and a total of nearly 5,000' of workings. Stopping revealed ore shoots up to 150' long. At 1,700' there is said to be a good block of ore. Mine was unwatered in 1919.

Equipment: steam and electric power, Cornish pump, and 10-stamp mill erected prior to 1906.

GRASS VALLEY CONS. GOLD MINES CO. CALIFORNIA

Mine office: 6017 J. St., Sacramento, Calif.

Officers: Rodney McCormick, pres.; Scott Ennis, v. p.; J. W. Howard, sec.-treas., with F. H. Buck, A. E. Nelson, P. Huth, H. Kleinsorge, and S. Jones, directors.

Inc. 1916 in Calif. **Cap.** \$900,000; \$1 par; 615,709 issued.

Property: 120 acres, including the Allison Ranch mine, 2½ miles W. of Grass Valley, Nevada county which produced gold worth \$2,300,000 from 46,000 tons of ore, and paid \$1,200,000 in dividends from 1854 to 1866. In July, 1917, the adjoining Benoit tract of 168 acres was bought.

Geology: the vein occurs in an area of granodiorite, and is one of a series of parallel veins, dipping 45° W. Down to 600' the vein was 18' wide, and

averages 2' below it. The quartz gangue carries free gold and 2 to 5% of sulphides. New ore opened 1921 on 600' level.

Development: by 1,675' incline and 11 levels, total workings aggregating about 2 miles. The flow of water is heavy, up to 1,000 gal. per minute. In June, 1920, a vein was reported cut by a raise above No. 10 level. A S. W. crosscut from the 600' level to explore the Croesus and Keystone claims opened ore in January, 1921. A cross-cut on the 1,200' level into Hartery ground failed to open any shoots. Altogether, over 2,600' of prospecting drifts were driven in 1920, and some ore milled.

Equipment: 100' head-frame hoist of 2-ton capacity from the depth of 2,500', 1,500 cu. ft. and 500 cu. ft. compressors, boilers, crusher, 20 heavy stamps, 5 Frue vanners, and 100-ton cyanide plant.

Recent production figures not available. Company has spent about \$800,000 on reopening this property.

GRAY EAGLE COPPER CO.

CALIFORNIA

Office: 14 Wall St., New York.

Officers: Frank W. Holmes, pres.; Henry E. Dodge, sec.

Inc. 1916, in Maine. **Cap.** \$1,000,000; \$10 par; all issued. Entire stock issue owned by **Mason Valley Mines Co.** and property described thereunder.

GREAT EASTERN QUICKSILVER MINING CO.

CALIFORNIA

Address: Guerneville, Calif.

Officers: George Roeth, pres., 450 Mountain Ave., Oakland, Calif.; Geo. Roeth, Jr., sec.

Inc. in Calif. **Cap.** \$100,000; par \$1.

Property: a quicksilver mine near Guerneville, Sonoma county, operated since 1875. Credited with production of 42,092 flasks to end of 1917. Inactive since March, 1919.

GREENBACK COPPER CO.

CALIFORNIA

Dead. See Vol. XIV. Once worked same mine as Weringer Mines Co., at Woody, Calif.

GREENBLOWER MINING CO.

CALIFORNIA

Address: H. J. Greenblower, Meadow Valley, Plumas county, Calif.

Property: a placer mine near Mt. Ararat, 23 miles from Quincy, Plumas county. Gravel available for hydraulicking is estimated at 500,000 yards. A concrete restraining dam, ditch, pipe-line, and wagon-road were planned at last account.

GREEN HORN MOUNTAIN COPPER CO.

CALIFORNIA

Property acquired by **Atascadero Copper Co.**, which see.

GRIT GOLD MINING CO.

CALIFORNIA

Address: Box 436, Sacramento, Calif.

Officers: Walter P. King, pres.; Chas. E. Swezy, sec.; Walter King, supt.

Inc. 1920, in Calif. **Cap.** \$150,000; 10¢ par; 687,500 shares issued.

Property: in Spanish Diggings district, El Dorado county, 14 miles E. of Auburn, said to show 7-8' veins of high-grade gold ore.

In 1921, a 5-stamp mill was erected. Production of \$10,000 in bullion up to September reported.

GRIZZLY FLATS GOLD MINING CO.

CALIFORNIA

Mail returned from former address: 638 Sacramento St., San Francisco, Calif.

Officers: F. C. Van Schaick, pres.; F. M. Hall, v. p.; W. H. Blanchard, sec.; R. H. Wilson, treas.

Inc. May 22, 1916, in Nev. **Cap.** \$250,000; \$1 par; \$106,064 issued. Registrar & Transfer Co., New York, transfer agent and registrar.

Property: gold gravel claims at Grizzly Flats, Eldorado county.

Company attained much notoriety through the stock-selling campaign of R. W. Jov, who in March, 1920, re-joined I. L. Donohue, a promoter, under the guise of A. E. Manning & Co., New York. The New York Curb has given much publicity to these fly-by-night promoters.

GRIZZLY MINING CO. CALIFORNIA

Address: Oakland, Calif.

Manager: O. F. Heizer, Tuolumne, Calif.

Inc. 1918, in California. **Cap.** \$150,000; all issued; par \$1.

Property: 8 claims Tuolumne county. Quartz vein in slate, reported to be 8' wide, carrying free milling gold, assaying \$8 per ton.

Development: by 3,000' tunnel with 20,000' of workings.

Equipment: includes 20 stamps, 2 Hardinge mills and a 100-ton cyanide Operated throughout 1920, with a small production.

plant.

GROSS STREET MINING CO. CALIFORNIA

Address: 1014 Mills Bldg. San Francisco, Calif.

Officers: E. B. Cushman, pres.; R. W. Bender, v. p.; H. B. Gee, sec.

Inc. 1919, in Calif. **Cap.** \$200,000; 20¢ par.

Property: 40 acres, in Tuolumne county, Calif.

Development: by 300' shaft, tunnel and winze.

GROUSE CREEK MINING CO. CALIFORNIA

Address: 1014 Mills Bldg. San Francisco, Calif.

Officers: B. C. Brown, pres.; J. W. McCaughey, sec.

Inc. 1906. **Cap.** \$50,000; par \$1.

Property: an hydraulic gold mine in Klamath river watershed, Siskiyou county.

GRUSS MINING CO. CALIFORNIA

Office: 381 Bush St., San Francisco.

Officers: G. Gruss, pres.; W. J. Gruss, v. p.-mgr; with G. E. Hunt, J. L. Moore, and C. H. Snyder, directors. C. E. Hudson, fiscal agent.

Inc. in California. **Cap.** \$250,000; 25¢ par. Security Transfer & Registrar Co., New York, and Registration Surety Co., San Francisco, transfer agents and registrars.

Stock manipulated on the San Francisco Stock Exchange to a high of \$2.75 in 1920. Quoted at 35c. in 1921.

Property: 5 claims, 98 acres, 2 miles S. W. of Genesee, and 22 miles E. of Keddie on W. P. R. R., Plumas county, located in 1856, and held by the Gruss family since 1881. Examined by H. W. Turner, J. M. Nichol, Errol MacBovle, and Mr. Miller of the State Corporation Commission (1920).

Geology: the deposit consists of shear-zones of crushed and brecciated slates and schists, near the contact of meta-andesite, with parallel stringers of quartz and calcite. Gold occurs in narrow seams and pockets containing limonite and manganese oxide; copper occurs as bornite, tetrahedrite and chalcopryite, following calcite seams in altered schists, below 200' depth.

Development: by 400' shaft and tunnels, with a total of over 6,000' of workings. Most of the new work has been on the 200' level. At 350' N., the E.-W. vein had been entered for 30', without reaching the hanging-wall, and assayed 20.1% copper, \$14.47 gold, and \$10.70 silver per ton, equal to a total of \$89 per ton. According to H. W. Turner in Sept., 1920, 400 sacks of mill feed from the raise above 200' level assayed 2.96% copper, 0.05 gold and 2.85 oz. silver.

Equipment: a 15-stamp mill, electric power, hoist, compressor, shops. The mill has tube mill, Hendy ball mill, Dorr duplex classifier, and cost \$78,000. Treatment of 25 tons daily started by mid-September, 1920, and concentrate was reported to assay 37.1% copper, 3.2 oz. gold and 32.8 oz. silver, worth \$232.50 per ton.

GUILDFORD GOLD MINING CO. CALIFORNIA

Address: Placerville, El Dorado Co., Calif.

Officers: A. Baring Gould, pres.; E. W. Witmer, sec.

Inc. 1912, in Calif. **Cap.** \$100,000; \$10 par.

Property: 500 acres, near Placerville, Eldorado county, developed by tunnels.

Has been idle since loss of mill by fire in 1919.

GWIN MINE & DEVELOPMENT CO.**CALIFORNIA****Address:** F. B. Moors, 128 Sutter St., San Francisco, Calif.**Officers:** Ansel M. Easton, pres.; J. J. Hachman, sec.

Property: the well-known Gwin gold mine, near Mokelumne Hill, Calaveras county, which, up to the time of closing, 10 years ago, had paid large dividends. Shut down on account of power conditions and want of modern machinery.

Development: reported (see M. & S. Press, July 5, 1919), that there was more developed ore, of better grade, and the mine looked more promising than it had for many years previous to closing down. According to Moors, the bottom of the 2,400' vertical shaft and 450' winze below that level show ore-shoots of a combined length of over 450 ft., averaging \$10 per ton; also hundreds of feet of \$5 ore. These orebodies are practically intact.

Production: about 1,000,000 tons of ore yielding \$5,000,000 in gold.

HAMILTON MINING & SMELTING CO.**CALIFORNIA**

Mail returned from company's former office: 119 Golden Gate Ave., San Francisco.

Officers: A. J. Clapham, pres.; H. H. Vail, v. p.; H. W. Royal, sec.-treas., with G. A. Metcalf and J. E. Ramey, directors.

Inc. 1920, in Delaware. **Cap.** \$1,650,000; \$1 par. National Surety Co., San Francisco, registrar and transfer agent. Campbell, Graham & Co., 128 Water St., New York, fiscal agents.

Property: the Amina group of 14 claims, 280 acres, in the Amalie and Hamilton districts, Kern county. The district shows syenite and slate cut by trachytic dikes and quartz-porphvry cut by diorite dikes. Company's prospectus states 30 surface samples assayed \$3.43 to \$568.52 per ton; only 6 yielded below \$10.

Development: by several hundred feet of tunneling and drifts. Three months' ore supply was reported in July, 1920.

The prospectus, put out by a New York brokerage house, states a car-load of concentrate is expected each month, and dividends of 20% on capital probable.

Property may be good, but the company seems to be practically out of business.

HARDENBERG MINING SYNDICATE**CALIFORNIA**

Out of busines. See Vol. XIV.

HARVARD MINE**CALIFORNIA**

Address: J. W. Ferguson, owner, 2718 Hillegass St., Berkeley, Calif.

Property: about 11 claims, and mill sites, on the S. E. slope of Whiskey Hill, one mile S. W. of Jamestown, Tuolumne county, covering 5,000' along the strike of the veins. The claims were sold to the above in Nov., 1920, for \$5,000.

Geology: 3 veins,—the east, central and west—with strike N, 37° W., dip 60° N. E. and average width 10', have been explored. Central vein consists of solid quartz 6' to 12' wide, but values are, as a rule, too low to mine. The east and west veins consist of a mass of quartz stringers cutting the schist and containing free gold. Main footwall is serpentine with hanging-wall of Calaveras slates. Ore occurs W. of the central vein. There are 7 distinct ore-shoots developed on the property, average length 200', width 6'. Veins are faulted on S. end of orebody between the 1,200 and 1,400' levels, and on the N. end between the 1,100' and 1,200' levels; they are faulted 8' to 25' to the S. W.

Development: 3-compartment shaft (5 by 5' each), 1,650' deep, vertical to 700' then an incline of 58°, with levels at 200', 500' 700', 800' and below this at 150' intervals; lowest level is at 1,400'. Total underground workings about 4 miles. Ore pockets, 100 to 200 tons capacity, are in hanging wall of shaft.

HARVARD MINE, INC.**CALIFORNIA**

Property sold in Nov., 1920, to John Ferguson of Berkeley, Calif. See under **Harvard mine.**

HAZEL GOLD MINING CO.**CALIFORNIA**

Address: Box 27, Chico, or French Gulch, Calif. J. O. Jillson, pres.; J. W. Roper, sec.; Hamilton Eddie, supt.

Inc. 1896, in Calif. **Cap.** \$900,000; \$1 par.

Property: the Gladstone mine, the largest gold quartz producer in Shasta county, 178 acres patented, and 485 acres, unpatented, at 2,300' elevation, on N. side of Cline Gulch, 5 miles N. E. of French Gulch.

Ore: free milling gold. Two fissure veins with E. W. strike and dip of 60° S. have been mined to 7th level; average width 2½' to 3'; walls are slate. Ore shoot is 300' long. Milling ore averages about \$10 per ton.

Development: the upper 1,000' of vein has been mined by tunnels, while lower portion is worked from a winze on the main adit (Ohio) level. On the lowest or 1,300' level, a 700' crosscut opened the vein in Nov., 1915. Mine makes about 70 gal. water per minute.

Equipment: includes a 375-h. p. double-drum electric hoist, compressor plant, electric haulage from mine to mill, 9 miles of power and 5 miles of telephone lines. An electrically driven 30-stamp mill is equipped with concentrating tables and electroplating plant. Stamps weigh 1,050lbs., drop 106 times per min., from height of 6"; capacity, 100 tons in 24 hours, through a 40-mesh screen; 92% extraction. Power-house destroyed by fire in 1918; loss \$30,000.

Production: precious to 1901, said to be \$85,000; 1901-1914 said to be \$3,000,000; yearly production was about \$360,000.

Mine shut down 1916.

HERNANDEZ QUICKSILVER CO.**CALIFORNIA**

Address: L. B. Ulrey, mgr., King City, Calif.

Officers: M. G. Ramires, pres.; P. Morasci, v. p.; A. E. Ruqualdo, sec.; First Nat'l Bank, King City, treas.

Inc. Dec., 1912, in California. **Cap.** \$500,000; \$1 par; outstanding \$247,421.

Property: 6 claims in New Idria district, San Benito county, at an elevation of 4,500'. For 4 years prior to 1916, a small yearly production was made from ore mined from the outcrop.

Development: by an old 3,000' tunnel, which opened little ore, and by two 50' and one 160' inclines. A shoot about 100' long on the strike and 3' thick was being mined in 1915, but no metal has been produced since 1916. Equipment consists of a fine-ore furnace of 4 tons capacity.

HESS GOLD MINES CO.**CALIFORNIA**

Address: Alturas, Calif.

Officers: F. M. Jamison, pres.; A. K. Wylie, sec.-treas.; with I. W. Gibbons and S. H. McCartney, directors.

Cap. 1,000,000 shares; \$1 par; 40,000 shares offered for sale at 12½¢ each in Nov., 1919.

Property: at Alturas in the Winters district, Modoc county.

Geology: vein is a replacement of the andesite hanging wall, and is from 3 to 10' wide, carrying silver and gold in about equal proportion. The foot wall is diorite.

Development: by 300' and 120' shafts. All ore above 150' and some down to 200' has been extracted. The ore is said to have assayed \$15.40 per ton on the 150' level, \$12 on the 200', \$20 at 250', and rich ore is shown at bottom of main shaft. The 120' shaft is to be sunk deeper and connected with the old workings. The vein has been stoned to the surface.

Equipment: includes steam power, hoist, compressor, stamp-mill and cyanide plant.

C. N. Miller & Co., sponsored the company but this firm is unknown to P. O. carriers at former address, 617 Pacific Bldg., San Francisco.

HETTY GREEN MINE**CALIFORNIA**

See Eureka Mine.

HIDDEN TREASURE GRAVEL MINING CO.**CALIFORNIA**

Address: Harold T. Power, pres.-mgr., 3301 College Ave., Berkeley, Calif. **Mine address:** Bullion, Placer Co., Calif.

Officers: James Nicholson, v. p.; Grace G. Power, sec.
Inc. July 3, 1914, in Calif. **Cap.** \$360,000; \$10 par. **Dividends:** \$525,000.
Property: 1634.5 acres of gold-bearing gravel, 5 miles N. of Michigan Bluff in Damascus district, Placer county.

Development: by 830' shaft, with 11,000' of workings opening 5' of pay gravel on bed rock, said to average \$1.50 per ton.

Equipment: 200 h. p. electric plant, hoist, pumps, etc. Daily capacity, 400 tons.

Production: \$120,000 to \$160,000 yearly when operating, and total of \$3,251,633 for Hidden Treasure and \$750,000 for Mountain Gate. Idle several years.

HILDA GOLD MINING CO. CALIFORNIA

Address: Sierra City, Calif. Samuel H. Dolbear, cons. engr., 625 Market St. San Francisco.

Officers: C. P. Doelger, pres.; L. J. Baumer, v. p.; R. B. Ayres, sec.-treas.

Inc. Oct. 20, 1919, in Delaware. **Cap.** \$1,000,000; \$1 par; 500,000 issued.

Property: 11 claims, including a section of the Tertiary river channel, 4 miles from Sierra City, Sierra county. The mine has been worked in a desultory fashion by lessees since 1869. It has been explored by 2 hydraulic pits, 100' surface tunnel and 520' bedrock tunnel in slate, with 2 raises and drifts in the gravel-channel.

Extensive work during 1919-20 exposed no gravel of persistent value, and by October, 1920, all work was suspended.

HILDA GRAVEL MINING CO. CALIFORNIA

Address: 948 Market St., San Francisco, Calif.

Officers: Richard O'Connor, pres.; J. T. Hurley, sec.

Inc. March 31, 1896, in Calif. **Cap.** \$100,000; par \$1.

Property: 628.5 acres of placer claims, near Nevada City, Sierra county. Only limited development, and no production.

HINES GILBERT GOLD MINES CO. CALIFORNIA

Address: Greenwood, Calif.

Inc. July 13, 1918, in Calif. **Cap.** \$1,000,000.

Property: 9 claims, on middle fork of American river, near Greenwood, Eldorado county, developed by tunnels opening veins of \$10 sulphide ore; also a quartz vein, discovered 1920, showing high grade gold ore.

Equipment: 10-stamp mill, erected 1920.

HOPE MINES DEVELOPMENT CO. CALIFORNIA

Address: P. O. Box 154, Salt Lake City, Utah. **Mine address:** Sonora, Tuolumne county, Cal.

Officers: T. W. Whiteley, pres.; M. Reedal, v. p.; T. L. Mitchell, v. p.; C. W. Johnson, treas.; F. O. Horn, sec.; Geo. Weston, mgr.; preceding with G. M. Stenhouse, L. A. Jeffs and G. O. Quackenbush, directors.

Inc. 1913, in Utah. **Cap.** \$500,000; \$1 par; issued 370,000 shares; assessable.

Gross earnings for 1918 were \$10,626, with operating expenses of \$13,379. **Property:** an old one, is on the Bonanza lead, ½-mile E. of Sonora, and is said to show free milling gold ore. Vein strikes N. 85° E. with dip of 23° W. and has 2' average width; walls are mica schist foot and porphyry hanging.

Development: by 1,200' main tunnel.

Equipment: includes a 25-h. p. gasoline engine and a 5-stamp mill.

Production: Average returns, normally amount to \$1,500 gross per month. Operated as a pocket mine in 1920.

HORNITOS GOLD MINE CO. CALIFORNIA

Office: Hornitos, Mariposa county, Cal. H. W. Morris, pres.

Property: the Ruth Pierce gold mine, 2 claims, 4 miles from Hornitos, acquired in 1913. Vein averages 3' in width; developed by a 550' shaft, part vertical and part incline, with about 2,500' of workings.

Equipment: includes a hoist, driven by 105-h. p. motor, 4-drum compressor, a 10-stamp mill and 2 Frue vanners. Was operating and producing in 1919 and 1920.

HORSE MOUNTAIN COPPER CO.

CALIFORNIA

Address: M. Fulton, sec., 7th & D Sts., Eureka, Humboldt county, Cal.

Officers: B. C. Schnoor, pres.; David Wilson, mgr., Eureka, Cal; D. W. Stapp, supt.

Inc. Nov., 1910; reincorporated, February, 1914. Cap. \$1,000,000; \$1 par; 815, 199 shares issued.

Property: 70 claims, near the Humboldt Copper Co., with which this corporation apparently is connected in ownership and management. Owns the Ruby copper mine on Horse mountain in the Hoopa range, Horse River district, on the watershed between Redwood creek and Trinity river, in T. 6 N. R. 1 E. For miles copper occurs along a serpentine-gabbro contact; claims show native copper in a vein 30' thick having 2" of high-grade ore.

Development: by 6 tunnels, No. 6 of 900', another of 450', 3,000' in all.

Equipment: includes engines, boilers, 35 buildings and a \$12,000, 50-ton concentrator with Huntington mill, installed in 1912. Concentrates shipped to the Tacoma smelters, averaging 20% copper and \$4 gold per ton.

In 1918 company shipped 350 tons of chrome ore. In May, 1919, property was under option to Pittsburgh people. No later information.

HOWLAND FLAT MINES CO.

CALIFORNIA

Address: W. W. Whitton, sec. 603 Union Savings Bank Bldg., Oakland, Calif. Edwin L. Oliver, pres., Cunard Bldg., San Francisco.

Inc. 1914, in Calif. Cap. \$50,000.

Property: 6 claims, 155 acres, including the Miner's Home Gold gravel mine, in the Poker Flat district, 65 miles E. of Oroville, Sierra county. Ground covers over 3,000' along an ancient channel at the base of Table Rock, in a region that has yielded \$14,000,000.

Development: by 3,170' tunnel, raises, and drifts. When work was suspended, gravel was yielding \$7.75 per 18 cu. ft. car.

Equipment: gravel cars, water power, shops, sluices, etc.

HUDSON CONS. MINING CO.

CALIFORNIA

Address: C. Dorr, Jr., pres.-mgr., Syracuse, N. Y. at last report.

Property: the Owasco mine, near Oroville, Butte county, said to show several well-defined mineralized ledges. No record of operations.

HUMBOLDT COPPER MINING CO.

CALIFORNIA

Address: Eureka, Humboldt Co., Cal. T. L. Loofbourrow, pres.; W. L. Perrott, sec.

Property: 24 claims, well watered and timbered in Secs. 28-29, 32-33, T. 6 N., R. 4 E., said to show strong veins with a good showing of copper ore, also some gold.

Development: by 1,750' of drifts, 210' raise, 30' winze, and 700' of diamond drilling.

Equipment: consists of 3 surface buildings only. Shipped chrome ore in 1918.

IDAHO-MARYLAND MINES CO.

CALIFORNIA

Subsidiary of Metals Exploration Co.

Office: 1213 Hobart Bldg., San Francisco. **Mine office:** Grass Valley, Nevada county, Cal.

Officers: Bulkeley Wells, pres.; Roy H. Elliot, v. p.; A. D. Snodgrass, sec.-treas.; with Errol MacBovle, F. W. McNear, Rufus Thayer and C. G. Bockus, directors, John A. Fulton, mgr., Grass Valley.

Inc. in Nev., 1919. Cap. \$3,000,000; par \$1. Bonds: authorized, \$1,000,000; outstanding \$413,000.

Property: 675 acres in Nevada county, includes the holdings of the Gold Point Cons. Mines, Inc., and the Union Hill Mines, which have been discontinued.

Late in 1920, the 600' level was reopened.

Equipment: one 20-stamp mill.

IMPERIAL LODE MNG. & RED. CO.**CALIFORNIA**

Address: 548 Equitable Bldg., Baltimore, Md.; 2127 Land Title Bldg., Philadelphia, Pa.; or Lavic, San Diego Co., Calif.

Officers: James Clendenin, pres.; W. I. Dickerman, v. p.; J. W. Bowen, sec.; C. E. Krebs, treas., with Fred Crabtree, G. T. Ladd, W. G. Moore, O. O. Robinson, C. E. Stubbs, B. F. Bond, and D. F. Rice, directors.

Inc. 1917, in Arizona. **Cap.** \$2,500,000; \$5 par; \$230,000 reported paid in to May, 1920.

Property: 14 claims, 7 miles S. E. of Lavic, San Diego county. From 1884 to 1890, the mine is said to have yielded \$200,000 from surface ore averaging \$75 per ton.

Development: by tunnel and other workings to a depth of 450'. The imposing estimate of ore reserves gives a value of approximately \$15,000,000 and an annual profit of \$350,000, or 20% is expected. This is a very marked case of ore estimation run wild

INDIAN FALLS DEVELOPMENT CO.**CALIFORNIA**

Address: C. A. Darmer, pres., 754 St. Helena Ave., Tacoma, Washington, G. H. Goodhue, supt.

Property: 21 claims, 577 acres, including 148 acres of agricultural land, in Plumas county, 5½ miles N. of Keddie, on W. P. R. R. There are 5 quartz veins in slate and greenstone. Veins No. 1 and 2 carry a little gold and pyrite; No. 3 carries gold and copper, an 18" streak assaying \$1 gold. 6.2% copper and 2 oz. silver. All vein outcrops show workable width and length. Short tunnels have been driven. There is little equipment, but good water-power is available.

INDIAN SPRINGS MINE**CALIFORNIA**

Address: J. Woodruff, Magalia, Butte county, Calif.

Property: an old drift-gravel mine in the Magalia district north of Oroville, which has produced \$4,000,000 of gold. The adjoining Hupp mine has also been acquired, and both mines will be operated from the Indian Springs tunnel, 4,000' long. Los Angeles capital is interested.

INTEGRAL QUICKSILVER MNG. CO.**CALIFORNIA**

Mine address: Frank A. Mahon, mgr., Castella, Calif. Wm. J. Simpson, pres., 91 Park Row, New York.

Property: 46 claims and timber land in Trinity county, near the Altoona mine and 16 miles N. W. of Castella. Cinnabar ore occurs in lenses in a serpentine-porphry contact. Chromite also is found on the property.

Development: by 180' shaft and 2,760' tunnel with a 300' back. **Equipment:** includes a 24-ton furnace.

INYO COPPER MINES CORPORATION**CALIFORNIA**

Probably out of business.. See Vol. XIV.

INYO GOLD MINING CO.**CALIFORNIA**

Probably defunct. See Vol. XIV.

IRON MOUNTAIN COPPER CO.**CALIFORNIA**

Office: 301 First National Bank Bldg., Riverside, Cal. Mine near Blythe City, Riverside county, Cal.

Officers: Harwood Robbins, pres.; E. W. Tucker, v. p.; Holton Webb, sec.-treas.

Inc. about July, 1911, in California. **Cap.** \$10,000; shares \$1 par; issued, 5,000 shares.

Property: the Crescent group, 35 claims, about 700 acres, in Ironwood district, Riverside county, 26 miles S. of Blythe Junction on the Parker cut-off of the Santa Fe railroad. Claims show fissure veins in granite and porphyry, the main ledge being traceable 2 miles.

Development: by 120' shaft with a level at 100' depth that is 70' long and shows high-grade copper ore containing visible gold. Ore shipments by former owners averaged \$100 per ton.

ISABELLA COPPER MINING CO.**CALIFORNIA**

Probably dead. Mail addressed to directors, unclaimed.

Inc. 1911. Cap. \$500,000. Property in the Etna Mills district, Siskiyou county. A 100' tunnel was being driven when last heard from.

ISLAND COPPER CO.

CALIFORNIA

Office: 710 Easton Bldg., Oakland, Cal. **Mine P. O.:** Island Mountain, Trinity Co., Calif.

Officers: Frank A. Leach, pres.; C. H. Wilcox, v. p.; F. A. Leach, Jr., sec. E. R. Leach, mgr.

Inc. 1915, in Calif. Cap. \$24,000; \$1 par; all issued.

Property: 4 patented claims and other property aggregating 265 acres, in the S. W. corner of Trinity county, within 500 yards of the Northwestern Pacific R. R., operating from San Francisco to Humboldt bay.

Geology: a lenticular body of copper-iron sulphide occurs in metamorphosed sedimentary rocks, outcropping at several places. Development is said to indicate that these various outcrops are part of one mass, whose estimated dimensions are 90' to 100' in width, 450' in length and a proven depth of from 60 to 145'. Ores carry 3½% copper 1½ oz. silver, and \$2 in gold per ton.

Development: by over 2,500' of workings, opening 275,000 tons of ore. Up to Jan. 1, 1919, 30,000 tons had been shipped. Mine idle since then.

JAMESTOWN EXPLORATION CO.

CALIFORNIA

Probably dead. Described in Vol. XIII.

JAMISON MINING CO.

CALIFORNIA

Address: F. B. Peterson, pres., 249 First St., San Francisco.

Property: 2 patented placer claims, 1 placer location, 9 patented quartz claims, a total of 581 acres, at Johnsville, Plumas county 7 miles S. W. of Blairsden on W. P. R. R.

Geology: 2 fissure veins, 10' wide, encased in gabbro, carry free gold and pyrite. Vein No. 1 shows a pay-shoot 600' long; in No. 2, four shoots have been worked for 800'.

Development: by 1,800' tunnel and 225' shaft, which are connected; also extensive drifts, one of which is 1,500 long, and another 1,150'.

Equipment: hoist, compressor, 20-stamp mill, buildings, etc.

Production: total gold output to Nov., 1913, was \$1,430,000, including concentrates. In 1915, the monthly output was 1,900 tons of \$3 to \$4 ore.

Small shipments made by company in 1919 and by lessees in 1920.

JESSIE BELLE M., M. & SM. CO.

CALIFORNIA

Dead. See Vol. XIII, Mines Handbook. Mine now owned by **Madera County Mng. Co.**

JOE CREEK COPPER CO.

CALIFORNIA

Probably dead. See Vol. XIV.

JUMPER CALIFORNIAN GOLD MINES CO.

CALIFORNIA

Address: P. E. de Caplane, 5 Rue Blanche, Paris, France. Lester S. Grant, mgr., Stent, Calif.

Inc. 1910, in Maine. Cap. \$1,000,000; \$1 par.

Property: 120 acres at Stent, Tuolumne county, 4 miles from Jamestown, on the Mother Lode. Ore occurs in a dike in amphibolite schist and in small veins cutting the schist. Rich pockets of gold have been found on the W. side of a diorite dike following the vein.

Development: by 200, 500, and 1,400' shafts; with an 800' winze below the second and one of 400' below the third.

Equipment: electric power, hoists, compressor and 40-stamp mill.

Operated for nearly 3 years by lessees. Annual yield about \$100,000. Company receives 25% royalty and charges \$1 per ton for treating ore extracted.

Property optioned April, 1920, to G. L. Holmes, agent, for \$100,000, payable before July 8, 1924, 20% royalty on gross output to apply on purchase price.

JUNIPER MINING CO.

CALIFORNIA

Addresses: G. W. Gilman, supt., Bieber, Calif. and Redding, Calif.

Officers: M. A. Maher, pres.-mgr.; W. H. Paulk, sec., Adin, Calif.; with C. L. Joslyn, directors. Wm. Sharp, cons. engr., Reno, Nev.

Inc. 1920. Cap. \$1,000,000.

Property: one patented claim, near Hayden Hill, 60 miles N. of Susanville, Lassen county, developed by 2 shafts, one 300' deep, shows 5' vein of gold ore in rhyolite breccia, with 65,000 tons reported blocked out between 100 and 250' levels. Work continued to the point of crossing with a second vein. Reported to have produced \$600,000 to 1917.

Equipment: includes 10-stamp mill; the treatment method has certain unusual features, and 60% of ore sent to mill, assaying \$25 per ton, is rejected before reaching stamps. Operating in 1921.

Company has an option on adjoining holdings of Lassen Mng. Co.

KATE HARDY MINING CO.

CALIFORNIA

Address: Knox Bldg., San Jose, Calif. Benj. F. Ballard, pres., Santa Rosa, Calif.

Inc. 1918, in Calif. Cap. \$1,000,000; \$1 par; 300,000 shares issued.

Property: 240 acres, including the Kate Hardy mine and mill, 2 miles S. W. of Forest, Sierra county, has been operated intermittently since 1860 and is credited with a production of over \$225,000 in gold. The main vein in serpentine, is 10 to 30' wide, and runs N. 20° W. and dips about 80° W. Pay-ore is quartz, carrying free gold and auriferous arsenopyrite.

Development: by 300' and 650' tunnels, with raises between and other workings. Six ore-shoots have been opened. In 1921, a 200' shaft was sunk in ore below one of the tunnels.

Equipment: electric power, 700 cu. ft. compressor, new 10-stamp mill, concentrator, and buildings.

KELLY MINING CORPORATION

CALIFORNIA

Address: H. H. Kelley, 115 S. Birch St., Santa Ana, Calif.

Officers and directors: H. H. Kelly, pres.; L. M. Kelly, v. p.; W. I. Stewart, sec.-treas.-supt.

Inc. July 19, 1917, Calif. Cap. \$200,000; par \$1; outstanding 159,150.

Property: 9 claims near Quincy, Plumas county, shows a quartz vein in serpentine.

Development: by 200' and 460' tunnels, with 350 lateral workings. Company claims to have about 20,000 tons gold ore averaging \$8 per ton.

Not producing. Putting up a 50-ton concentrator, and 500' tramway.

See the **Rose Quartz Mining Co.**, which is operating the Kelly property of 9 claims in this district.

KELLY SILVER MINE

CALIFORNIA

See under **California Rand Mines Co.**

KENNEDY MINING & MILLING CO.

CALIFORNIA

Office: E. C. Hutchinson, pres., 409 Montgomery St., San Francisco, Cal., James Spiers, supt.

Cap. \$100,000; \$100 par. Shares quoted at \$2.25 in Jan., 1921.

Dividends: a large sum has been paid, but no figures are obtainable.

Property: 9 claims, covering 3,100' on the Mother Lode, includes the Kennedy mine adjoining the Argonaut, 1 mile North of Jackson, Amador county. Company purchased the Zeila mine and 40-stamp mill at Jackson, about 1½ miles S. of the Kennedy, in 1915, for \$35,000. The Zeila is worked out down to the 450' level, but new ore bodies averaging \$4 per ton are said to have been disclosed below the old workings.

Geology: the Kennedy vein, one of three veins in the Lode, outcrops in andesite passing downward into Mariposa slate, following roughly the contact between the two rocks. The vein dips 57° E. and the payshoots rake to the north. The best ore occurs near the footwall over a black gouge 1 to 2' thick.

Development: by 3 shafts; the vertical south shaft, 2,300' deep, north shaft, 2,500' deep and the 3-compartment east shaft sunk to vertical depth of 4,200' with crosscuts and drifts, run N. and S. on the veins. Shaft being

sunk with the object of reaching junction of two orebodies. Ore in the lower levels is generally of better grade than above.

Equipment: includes air-drills, 15"x30" and 25"x30" compressors, nine 80-h. p. boilers, oil-fired steam power, and 800-h. p. double-drum hoist.

The 100-stamp mill makes an extraction of 83%. Monthly capacity is 15,000 tons. Concentrates assay \$100 per ton and tailings run about 60c. per ton. Concentrates are treated at the mine in a 10-ton chlorination plant with 2 roasting furnaces.

No production since 1918. Company ignores requests for data. When fire broke out in the adjoining Argonaut in 1920, it necessitated the flooding of both mines; which were not pumped out until late in the year. The Kennedy mill did not resume crushing of ore until October, 1921.

KENNETT COPPER SMELTER

CALIFORNIA

Works address: O. J. Egleston, mgr., Kennett, Calif. A custom smelter owned by **U. S. Smelting, Refining & Mining Co.**, which see for detailed description.

KEYSTONE MINING CO.

CALIFORNIA

Address: Carlton R. Downs, mgr., Amador City, Calif.

There are 468,005 shares issued. Two 10c. assessments were levied during 1920.

Property: the Keystone mine at Amador City, Amador County, covering 4,000' along the Mother Lode, has been operated continuously since its discovery in 1851.

The Keystone is a quartz vein, 12 to 200' wide, occurring on the contact between black clay slate footwall and meta-andesite hanging-wall. Two other veins, the Spring Hill and east veins, have been developed; the latter is now furnishing the ore. The contact vein was mined above the 900' level. See "mines of Amador County" State Mineralogist's Report, p. 34-36.

Development: by 3-compartment Patton shaft, 2,680' deep and 1,118' south shaft on 60° incline, with crosscuts and drifts E. and N. on the 100', 900', 1,000', 1,200' and 1,400' levels. Development work now being done on the 1,800'. Most of the 1916 output came from the 900', 1,000', 1,200' and 1,400' levels.

Equipment: includes 40-stamp amalgamation and concentration mill, making an extraction of 90%; electric hoist, 300-h. p. motor, air compressor and drills. Concentrates run \$50 per ton; the tailing 30c per ton. About 80 men employed.

Production: for last 6 months of 1918 was 44,322 tons of \$2.52 gold ore, producing \$4,652 in bullion and \$106,860 in concentrates; the total was reduced to \$85,516 by freight and smelter charges.

In July, 1920, the mill stopped and the mine was allowed to fill with water.

KING SOLOMON CONSOLIDATED MINES CO.

CALIFORNIA

Now **Shipsey Mng. Co.**, which see.

KING SOLOMON GOLD MINING CO

CALIFORNIA

Office: 814 Central Bldg., Los Angeles, Calif.

Officers: Benj. W. Hohn, pres.; John C. Stick, sec.

Inc. 1901, in Calif. **Cap.** \$350,000; \$1 par.

Property: the Pleasant View group, 100 acres, in Clear Creek district, Kern county, 4 miles E. of Havilah, shows a 3' vein with granite walls. The pay shoot, 300' long, contains free-milling gold ore.

Development: by 300' shaft and 3 levels.

Equipment: includes steam hoist, two h. p. boilers, assay office and other buildings; and a 5-stamp mill.

Production: 1912-1915, \$40,000.

KING SOLOMON MINE

CALIFORNIA

Owned by C. B. Cottrell, Westerly, R. I. W. H. Young, supt., Cecilville, Siskiyou county, Cal.

Property: 40 acres in Secs. 6 and 7, T. 38 N., R. 11 W., 12 miles S. E. of Sawyers Bar, Liberty district, Siskiyou county, shows a 5' vein of free milling ore, with quartz porphyry foot and slate hanging-wall. The vein runs N. S. and dips 60° E. Developed by 460' tunnel, 130' shaft and drifts.

Equipment: includes an 8-stamp mill, hoist, boiler and buildings.

Mine has been a good producer and said to have fair ore reserves.

KINGS QUICKSILVER MINING CO., LTD. CALIFORNIA
Address: C. C. Jones, mgr., or Harry Cribb, asst. mgr., Parkfield, Monterey Co., Calif.

Property: a group of claims, in Sec. 20, T. 23 S., R. 16 E., Kings county, 14 miles E. of Parkfield.

Geology: the ore carries native mercury, cinnabar, and calcite, lying in a crushed zone, 35' wide, running S. E. with dip 45° S. W. Country rock is serpentine shale, and metamorphic sandstone.

Development: to depth of 200' by 700' upper and 850' lower tunnels, with raises and winze.

Equipment: includes 10-ton Scott fine-ore furnace with brick condensers and 25-h. p. oil engine. Mine worked intermittently since 1902.

In Dec., 1919, Patriquin Bros., previous lessees, sold their interest to a new Canadian company.

KIRKPATRICK MINING & MILLING CO. CALIFORNIA
Address: c/o Schloss, Ackerman & Bradley, Mills Bldg., San Francisco
Mine Address: Thos. Brannigan, supt., Downieville, Calif.
Inc. 1919. Cap. \$500,000.

Property: a high-grade gravel deposit, in Sierra county, equipped with a gravel mill, of new rotary type, operating efficiently, Sept., 1921.

KLEINSORGE MINE CALIFORNIA

Address: W. E. Kleinsorge, Sacramento, Cal.

Property: an extensive area 30 miles by road S. W. of Red Bluff, Tehama county, on the S. P. R. R., in rough and bare country.

Geology: the hills, which are steep, consist mainly of serpentine, in places much shattered. In this rock, chromite occurs as veins, pockets and disseminations. The last type of deposit covers a considerable area, and will only be commercial by concentrating.

Equipment: 7-mile road, two camps, 3 aerial trams, 10-stamp mill, loading bins, etc.

Production: started about mid-year, 1917, and amounted to several car-loads monthly of ore assaying 45% Cr₂O₃ and low in silica.

Mine is closed on account of the unsettled market for chromite.

KROROMICK MINING CO. CALIFORNIA

Address: Coarsegold, Calif.

Property: the old Texas Flat mines at Coarsegold, Madera county, equipped with 20-stamp amalgamation and concentration mill. Some gold was produced in 1920.

LA GRANGE GOLD DREDGING CO. CALIFORNIA

Address: La Grange, Stanislaus county, Calif.

Inc. 1907. Cap. \$300,000.

Property: 200 acres of dredging ground along the Tuolumne river. Gravel is 35' deep, and lies on a soft bedrock.

Equipment: electric power and a 7-cu. ft. dredge, which was operating both in 1919 and 1920.

LA GRANGE MINING CO. CALIFORNIA

Address: c/o Amor F. Keene, 233 Broadway, New York City.

A subsidiary of **Gold Fields Am. Dev. Co.**, which see. Operations were stopped during 1918, and part of the equipment sold. Mine is in charge of caretaker. See Vol. XIII.

LASSEN MINING CO. CALIFORNIA

Address: L. C. Green, sec., Room 1001, 310 Sansome St., San Francisco. Property under option to the Juniper Mng. Co.

Property: the Golden Eagle mine, 4 claims and mill site, in part patented, adjoining the Juniper on E. on S. W. slope of Hayden Hill, Lassen county. Mine shows 2 veins in rhyolite breccia, with rhyolite intrusions. Ore carries free gold. Golden Eagle vein, 1 to 25' wide, has been developed by 835' shaft with levels at 150, 200, 300, 400 and 500'. Much of ground developed has been exhausted. Equipped with 150-ton mill and cyanide plant. Reported that the fines only of ore as mined carry values and crushing not needed; ore is simply dried and sized before treatment. Said to have produced \$1,250,000 to 1917.

LE DUC GOLD MINING CO.

CALIFORNIA

Address: B. A. Penhall, gen. mgr., Grass Valley, Calif.

Officers: C. F. White pres., San Francisco., W. G. Thomas, sec., Grass Valley, Calif., with John P. Jones, San Francisco. directors.

Property: 122 acres, 2 miles S. W. of Grass Valley, Nevada county, bonded from A. Le Duc, shows a lava-capped gravel channel under half the acreage, and on the other half 5 quartz veins.

Development: by 3, 400' of tunnels and drifts on 2 veins without disclosing any pay-ore. About \$40,000 has been spent; work was resumed early in 1921, the 13th year of development under same management, without revenue from the property during that time.

LEVIATHAN COPPER MINE

CALIFORNIA

Address: John L. Henry, 744 — 12th Ave., San Francisco, Calif.

Property: 3 claims, 60 acres, 8 miles E. of Markleeville, in the Mogul district of Alpine county. The Leviathan claim was first located in 1863. Examined by W. H. Weed in 1918, also by J. L. Henry, F. L. Sizer, W. T. Rickard, Waldemar Lindgren, and F. W. Guernsey.

Geology: ore occurs in andesite tuffs, the beds dipping 30° E. and pitching N. W. - S. E. Copper occurs as carbonate and oxide. Some ore is found in "chambers" and carries up to 30%, but the faces now exposed are not over 7%, as shown by samples cut by the writer and the faces are not all ore.

Development: by an upper, 650' tunnel and a lower, 928' tunnel, reaching a depth of 300'. Total workings are 2,200'.

Production: is given as \$30,000. In the early days, 500 tons of 30% ore was shipped.

Litigation has been the principal cause of the idleness of this property. On Sept. 20, 1920, the Superior Court of California awarded title to Sarita N. Henry. Assessment work was done in 1920, and active exploration is expected to be resumed in 1922.

LIBERTY PLACER GOLD MINES CO.

CALIFORNIA

Office: Hobart Bldg., San Francisco.

Inc. 1920, in Calif. **Cap.** \$150,000; \$1 par.

Officers: Claude Doak, pres.; Bruce Griffith, v. p.; with John Hanley and W. C. Doak, directors.

Property: 20 acres of gold placer ground, 4 miles E. of Roseville, Placer county. The gravel lies under 50' of lava overburden and is mined by shallow shafts. About 15,000 tons of cemented gravel is worth from \$5 to \$45 per ton. A 75-ton, motor-driven mill was erected in 1920.

LIGHTNER GOLD MINING CO.

CALIFORNIA

Office: 1327 No. San Joaquin St., Stockton, Calif. **Mine address:** Alex. Chalmers, mgr., Angels Camp, Calif.

Officers: C. M. Jackson, pres.; B. F. Wellington, Jr., sec.

Inc. Oct. 26, 1896, in Cal. **Cap.** \$125,000; par \$1; assessable; 62,287 shares outstanding. **Dividends:** \$550,000 to date. Assets, Feb., 1916, ere \$255,-281 and liabilities, \$85,186. Annual meeting last Thursday in Oct.

Property: 1 patented claim, 4½ acres, in Angels Camp, Calaveras county, between the Utica and Angels quartz mines, shows a quartz fissure vein said to be 80' running N. W.-S. E., with dip of 70° and assaying \$5 per ton. The mine is credited with a total production to date of \$2,000,000.

Property was closed down in 1910, owing to caving of the old shaft sunk on the orebody, but operated hydro-electric plant and sold power.

Equipment: includes hoist, drills, compressor and 60-stamp amalgamation and concentration mill.

Management estimated ore reserves at 200,000 tons above the 300 level, Feb., 1916. The mine was unwatered in 1920; work ceased in September, but is to be resumed.

LINCOLN CONSOLIDATED CALIFORNIA

Property: sold to Lincoln Gold Mining Co., which see.

LINCOLN GOLD MINING CO. CALIFORNIA

Successor to Lincoln Consolidated.

Address: Gordon R. Campbell, Calumet, Mich.

Inc. 1916. **Cap.** \$250,000.

Property: at Sutter Creek, Amador county.

LITTLE BULLY HILL MINING & SMELTING CALIFORNIA

Probably dead. See description in Vol. XIII.

LITTLE BUTTE MINING & MILLING CO. CALIFORNIA

Address: 612 Security Bldg., Los Angeles, Calif.

Officers: W. J. Clark, pres.; J. W. Oakley, sec.

Inc. 1897. **Cap.** \$500,000; \$1 par; issued 445,956. Annual meeting in April.

Property: a group of gold bearing claims near Randsburg, Kern county. Idle.

LITTLE NELLIE MINING CO. CALIFORNIA

Address: Redding, Shasta county, Cal.

Operations resumed Oct., 1917, after two years' shut-down, during which time 30 diamond-drill holes were put down to an average depth of 800', defining lenses of 2 to 7% copper ore. Fifteen stamps were crushing gold ore; copper ore to be shipped to Mammoth. No news since.

LITTLE WONDER MINES, INC. CALIFORNIA

Address: 427 Chronicle Bldg., San Francisco, Calif.

Officers: T. C. West, pres.; Andrew Taylor, sec.

Inc. 1920, in Calif. **Cap.** \$300,000; \$1 par.

Property: near Mariposa, Mariposa county, reported under development.

LOCKWOOD CONS. GOLD MNG. CO. CALIFORNIA

Address: 1408 Turk St., San Francisco, Calif.

Officers: C. M. Bufford, pres.; A. P. Wagner, sec.

Inc. in Calif. **Cap.** \$20,000; 14,314 issued. Annual meeting 3rd Monday in April. Last dividend, April, 1917.

Property: near West Point, Calaveras county, idle at last report.

LORETTO COPPER MINING CO. CALIFORNIA

Main office: Tonopah, Nev. **Mine office:** Big Pine, Inyo County, Calif.

John G. Kirchen, mgr.; John Cole, supt. Is controlled through stock ownership by Chas. M. Schwab, and the Gail Borden estate.

Property: about 750 acres, east of Bishop, Inyo county, has a 40' vein, carrying ore said to average 4% copper, and about \$3 gold per ton.

Development: by 1,700' main shaft, said to be in commercial ore, and 2 crosscut tunnels to the N. E. one of 90' length said to have cut a 74' vein. Improvements include a smithy and several small mine buildings.

Operations temporary discontinued.

LOS PRIETOS QUICKSILVER MINES CO. CALIFORNIA

Address: 915 Higgins Bldg., Los Angeles, Calif.

Officers: F. M. Townsend, pres.; H. W. Waller, sec.

Inc. 1919, in Calif. **Cap.** \$1,500,000; \$10 par.

Property: 3,000 acres of quicksilver bearing land, near Montecito, Santa Barbara county. Was developing in 1919; no news since.

LOUISIANA DEVELOPMENT CO. CALIFORNIA

Letters returned. Probably dead. See description in Vol. XIII.

- LUCILE GOLD & COPPER MINING CO.** CALIFORNIA
Letters returned, 1919-20. Probably dead. Mine near Kelso, San Bernardino county, Calif.
- LUKENS GOLD MINING CO.** CALIFORNIA
Address: G. E. Lukens, pres.; or J. E. Lukens, sec., East Auburn, Calif. Cap. \$25,000; par 25c.; issued 70,000 shares. Annual meeting in May.
Property: 2 claims, at Pilot Hill, Eldorado county, showing auriferous copper ore, developed by shafts and drifts.
- MADERA COUNTY MINING CO.** CALIFORNIA
Property: Jessie Bell & Daulton mines, near Madera, Madera county. Small shipments of copper ore reported made in 1919.
- MADERA ENTERPRISE MINES & LAND CO.** CALIFORNIA
Probably dead. See Vol. XIV.
- MADERA GOLD MINING CO.** CALIFORNIA
Out of business. Described in Vol. XIII.
- MAD MULE MINING CO.** CALIFORNIA
Defunct. See Vol. XIV.
- MAJOR GOLD MINING CO.** CALIFORNIA
Idle. Address: 410 Santa Monica Blvd., Santa Monica, Calif. J. B. Proctor, pres.; E. De Los Magee, sec.
Inc. 1913, in Calif.
Property: at Nevada City, Nevada county.
- MAMMOTH CONS. MINING CO.** CALIFORNIA
Probably dead. Described in Volume XIV.
- MAMMOTH COPPER MINING CO. OF MAINE** CALIFORNIA
Formerly a subsidiary of U. S. Smelting, Ref. & Mng., stopped doing business Dec. 31, 1917; company has discontinued and its property taken over on Jan. 1, 1918, by the U. S. S. R. & M. Co., which see.
- MAMMOTH MOUNTAIN MINING CO.** CALIFORNIA
Address: H. M. Russell, pres., Los Angeles; and A. G. Keating, mgr., Isabella, Kern Co., Calif.
Inc. 1912. Cap. \$100,000.
Property: 100 acres, in Keyes district, 5 miles S. of Isabella, Kern county, Sequoia Forest Reserve.
The mine has been worked for over 60 years. Has a 2' vein between slate and granite.
Development: by 700' tunnel and several thousand feet of workings. The ore is free milling, and is crushed in a 10-stamp mill.
- MARIPOSA COMMERCIAL & MINING CO.** CALIFORNIA
Office: 311 Balboa Bldg., San Francisco, Calif.
Officers: Edward H. Benjamin, pres.; Joseph H. Mooser, v. p.; Howard G. Stevenson, sec.-treas., with Charles W. Slack and Frank T. Maguire, directors.
Is a close corporation, owned by Hennen Jennings estate and the Hobart Estate Co.
Property: over 44,000 acres, patented, comprising the original Mariposa Grant, in center of Mariposa county, south of the Merced river. This covers 12 miles of the Mother Lode and 65 mines and prospects, that have produced upwards of \$20,000,000. All the mines have been idle in recent years, owing to excessive cost of labor, etc.
Equipment: costing \$500,000 includes a 500 k. w. electric power plant, supplying numerous towns on the property.
- MARYSVILLE DREDGING CO.** CALIFORNIA
Address: T. E. Sherwin, sec.-treas., 14 Ashburton Place, Boston, Mass.
Officers: R. L. Agassiz, pres.; Bulkeley Wells, mng. director; Thos D. Harris, mgr.
Inc. July 1, 1907, in Mass. Cap. \$2,000,000; \$100 par; 11,069 shares outstanding. Annual meeting, fourth Tuesday in January.
Property: 1,300 acres of placer ground at Marigold, Yuba county.

Equipment includes two 16 cu. ft. all-steel dredges. A third boat was destroyed by fire, May, 1919.

Two dredges were operated on the Yuba river in 1919 and one in 1920.

MAXINE MINING CO.**CALIFORNIA**

Address: R. C. Kingdon, supt., La Porte, Plumas Co., Calif.

Property: a gravel mine, near Quincy, Plumas county. Operating 1921.

MAYFLOWER MINES CONSOLIDATED**CALIFORNIA**

Mine address: Charles Dow, supt., Nevada City, Calif.

Office: 124 Chronicle Bldg., San Francisco. G. L. Duffey, pres.; J. L. Levin, sec.

Inc. Dec., 1918 in Calif. Cap. \$1,200,000; par \$20. Is an Omaha, Neb. concern.

Property: the Greenman mine on Canada Hill, 149 acres, including the Mayflower placer mine, Nevada City district, Nevada county, shows 8 quartz veins, two of them faulted by three others. The Beckman and Grant veins have been worked. The Grant vein crosses a contact of slate and granodiorite, and carries free gold and 3% of sulphides.

Development: by 300' incline on the Grant vein; by an 800' adit with 1,500' of drifts, and a 700' shaft with 1,000' of drifts on the Beckman.

Equipment: electric power, hoist, compressor, pumps, etc.

MAZOURKA COPPER CO.**CALIFORNIA**

General office: 112 West Adams St., Chicago, Ill. **Mine address:** Kearsarge, Inyo Co., Calif.

Inc. 1919. Cap. \$2,000,000.

Property: 12 claims, including the Copper King group, and millsite, 247 acres, 5½ miles from Kearsarge, Inyo county. Sulphide ore shown in several open cuts, tunnels, and shafts, is reported to carry from 1 to 2% copper, \$3 silver and \$2.50 gold.

MCALPINE MINES CO.**CALIFORNIA**

Address: Coulterville, Mariposa county, Calif.

Officers: Frank R. Whitcomb, pres, and gen. mgr.; C. L. La Rue, and F. S. Ewer, v. p.; Fannie W. McLean, sec.-treas.; with M. C. Hassett, directors. W. A. Irwin, supt.

Cap. \$1,500,000; shares \$1 par; fully paid and non-assessable.

Company was formed by California people to reopen the old McAlpine mine on the Mother Lode, Tuolumne county, near the line between Tuolumne and Mariposa counties. The mine was a well-known producer in the 60's.

Property: 120 acres, covers 2,100' on the strike of the Mother Lode, including the water rights of Moccasin Creek.

Development: a 650' shaft with 2,000' underground workings, is said to block out 350,000 tons of \$7 ore.

Equipment: includes a 5-drill air compressor. A 200-ton mill will be erected, as soon as price conditions permit.

MELONES MINING CO.**CALIFORNIA**

Address: Melones, Calif. Fully described in Vol. XIV.

Property leased for 21 years to the Carson Hill Gold Mines, which see.

MENDOCINO MINING & MILLING CO.**CALIFORNIA**

Address: Napa, Calif.

Officers: J. M. Sullivan, pres.; Wallace Rutherford, sec., Napa, Calif.

Inc. May 9, 1919, in Calif. Cap. \$75,000, increased to \$300,000; \$1 par; issued 105,000.

Is negotiating for new property, 1920, as the tract under lease and bond proved unsatisfactory.

MERCED RIVER MINES CO.**CALIFORNIA**

Address: c/o F. J. Salinsky, Call Bldg., San Francisco.

Officers: James Burns, pres.; Henry Murphy, sec.

Inc. 1908, in Calif. Cap. \$75,000; par \$10; 5,353 shares issued.

Property: 240 acres, 20 patented, of gold and quicksilver ground, near Coulterville, Mariposa county, developed by tunnels and shafts.

MERCHANTS FINANCE CO. (Western Metals Co.) CALIFORNIA

Out of mining business for the present. See Vol. XIV.

METALS EXPLORATION CO. CALIFORNIA

Office: 120 Broadway, New York; 201 14th St., Denver Colo., and Hobart Bldg., San Francisco. Is a close corporation.

Officers: Harry Payne Whitney, pres.; Bulkeley Wells, v. p.-mng. dir.; F. N. Watriss, v. p.-gen. counsel; Thos. J. Regan, sec.-treas.; F. G. Farish, gen. mgr.; R. H. Elliott, asst. mgr.

Purchasing department: John L. McMenamin, mgr., Denver, office; Hy. T. Neal, asst. mgr., San Francisco office.

This company examines and purchases mining properties. Its present interests are the Idaho-Maryland, Valdor Dredging, Yuba Development and Fremont Mines in California; the Gold Canyon Dredging and United Comstock in Nevada; the Anna Beaver Mining Co. in Oklahoma; the Radium Co. of Colorado, Humboldt Mines Co., and Colorado-Superior Mng. Co., in Colorado; and the Cache Creek Dredging of Alaska; all of which are separately described.

Company bonded Blue Nose mine 1921 at Johnsville, Calif., and is also opening the Bunker Hill mine, Calif.

METALS MINING CORPORATION CALIFORNIA

Address: 304 - 12th St., Oakland, Calif.

Inc. 1921, in Calif. **Cap.** \$75,000; \$1 par.

Property: in Trinity and Siskiyou counties, said to contain gold, silver and copper. Developing.

MEXICAN SMELTING & REFINING CO. CALIFORNIA

Office: 82 Beaver St., New York. A subsidiary of the Compania Metalurgica Mexicana, and holds title to the **Blue Ledge mine** in Siskiyou county, Cal., which see.

MINARETS MINING CO. CALIFORNIA

Address: 303 Sherman Way, Van Nuys, Calif.

Officers: F. J. Eddy, pres.; O. R. Harris, sec.

Inc. 1916, in Calif. **Cap.** \$1,000,000 \$1 par; issued 400,000 shares.

Property: 485 acres, in Minarets district, Madera county, 90 miles N. E. of Friant on the S. P. R. R., contains veins of base silver, lead, zinc ores. Developed by main working tunnel.

MODOC MINES CO. CALIFORNIA

Address N. E. Guyot, v. p.-mgr., Kingman, Ariz., and Highgrade, Modoc Co., Cal.

Officers: Wm. Wrigley, Jr., pres.; Jas. C. Cox, sec.-treas., Kesner Bldg., Chicago.

Inc. May 1, 1909, in Arizona. **Cap.** \$1,000,000; all outstanding; shares \$1 par. Annual meeting July 1. Is a close corporation.

Property: 259 acres, patented, in High Grade district, in the extreme N. E. corner of Modoc county.

Ore: gold, in a vertical quartz vein in rhyolite, with average width of 10", and proved for 150' in length downward to the 200' level. The ore in 25-ton lots returned \$23 per ton gross.

Development: by 210 vertical shaft, with 1,800' of workings.

Equipment: includes 6x10" hoist. Steam power is used. In 1915 about 100 tons of \$23 ore was shipped. Working conditions are bad, due to the heavy snowfall and opposition of ranchers and others. District has merit, but will doubtless remain undeveloped until better feeling prevails at New Pine Creek, Oregon, the railroad station for the district, according to officials of the Modoc company.

For geology of the district, see U. S. G. S. Bull 594, pp. 38-48.

MOHAVE UNITED MINING & MILLING CO. CALIFORNIA
Letters unclaimed at last address. Phoenix, Ariz., in April, 1920.
Probably out of business. See Vol. XIV.

MOJAVE ANNEX TUNGSTEN MINING CO. CALIFORNIA
Office: 411-12 I. W. Hellman Bldg., Los Angeles, Cal.
Officers: J. B. Evans, pres.; H. G. Parsons, sec.-treas.; with C. M. Dunwoody, directors. P. H. O'Connor, supt.
Inc. Sept. 26, 1916, in Nevada. **Cap.** \$250,000; shares \$1 par.

Property: about 140 acres in the Clark Mountain district, San Bernardino county, Calif., 12 miles from Roach, Nev., on the Salt Lake Route. Claims are adjacent to the Mojave Tungsten Co. Wolfram veins said to carry 5% tungstic trioxide (WO₃).

Equipment: includes 20-ton mill.

MOJAVE TUNGSTEN CO. CALIFORNIA
Office 74 Broadway, New York.

Officers: G. F. Stringer, pres.; J. P. Smith, v. p.; M. A. Fitch, sec.; J. T. Anyon, treas., with W. W. Cohen, and A. H. Carlisle, No. 1 W. 34th St., New York, directors. F. S. Naething, supt., in California; N. H. Brown, supt. in Colorado.

Inc. Nov. 23, 1915, in Del. **Cap.** \$1,000,000; par value \$2; all outstanding. Traded on New York and Boston curbs. Transfer offices; The Corporation Trust Co., Jersey City, American Trust Co., Boston. Registrars; Empire Trust Co., New York; State Street Trust Co., Boston.

Statement issued Aug. 31, 1916, showed a profit of \$34,888 for 8 months.

Property: (California) 32 claims in the Clark district, San Bernardino county, 20 miles from Jean, Nev., the shipping point. Tungsten occurs chiefly as wolframite in a quartz vein in gneissoid granite. The vein is practically vertical with N. W.-S. E. course.

Development: by 2 main and 5 prospecting shafts, disclosing numerous small bodies of high grade wolframite ore. The longest oreshoot so far encountered was about 125' long on the 100' level in No. 1 shaft.

Colorado Property: the Bracken group of 6 patented claims, at Boulder Falls, Boulder county, showing the well-known Good Friday vein with the usual ferberite ore.

Development: by 3 shafts, Burdette main shaft 350' deep, connecting with No 1 tunnel. There are 3 tunnels in the face of the mountain. Ore in No. 2 has been continuous for a distance of nearly 1,000'. On January 1, 1917, the consulting engineer estimated ore containing 330,000 lbs. of tungstic acid opened up.

Equipment: includes a small mill on the California property. At the Colorado property the Degge-Clarke mill was acquired in May, 1917; this was the leading custom mill of the district with a capacity of 1,000 tons of tungsten ore monthly.

The Colorado property of its subsidiary the Mohave Boulder Tungsten Mining Co., was sold at public auction, June 28, 1918.

MONARCH MINING CO. CALIFORNIA

Address: Vallicita, Calaveras Co., Calif.

Officers: Joseph Francis, pres.; Geo. Morrice, sec.

Inc. 1914, in Calif. **Cap.** \$250,000; par \$1; all issued.

Property: 100 acres of placer ground, near Vallicita, Calaveras county.

MONTACALI MINES SYNDICATE CALIFORNIA

Successor to the California Syndicate and Golden Gate Exploration Co.

Office: 61 Broadway, New York, and 1408 Hobart Bldg., San Francisco. **Mine address:** Sheepranch, via Murphys, Calaveras Co., Calif.

Officers: Percy Bullard and John F. Alvord, syndicate mgrs.; H. R. Plate, Western representative and mine mgr.

Montacali syndicate formed July, 1920, to take over option on Sheepranch mine; all payments to Jan. 1, 1922, have been met. No information

available as to the arrangement made with stockholders of predecessor companies.

Property: an option on the Sheep Ranch mine, about 132 acres, extending 9,000' along the strike of the Sheep Ranch vein, on the east belt of the Mother Lode, 17 miles N. E. of Angels, at an elevation of 2,200'; also not far from Murphys.

Ore: free gold occurs in a well defined fissure vein, the pay ore having width of 5' and a 72° dip. The hanging wall is gray schist and slate forms the foot-wall.

Development: by 1,700' incline and 4,700' of drifts. Work in 1920, confined to 1,400, 1,500' and 1,700' levels. Reserves in May, 1920, were estimated to be 107,000 tons of ore worth \$12 per ton. Cost were given as \$6 per ton.

Equipment: pump, hoist, and an old 20-stamp mill which was remodeled in to an 100-ton cyanide plant completed December, 1920. Power is purchased from the Utica Mining Co., whose hydro-electric plant is near Murphys. A total of 50-55 men employed.

Production: \$10,434 in gold during 1919. New mill treating about 50 tons of \$10-\$20 ore per day with a recovery of 92-96%, and mine is said to be on a self supporting basis.

MONTEZUMA MINING CO.

CALIFORNIA

Address: Algernon Del Mar, supt., Big Pine, Inyo Co., Calif.

Property: a group of lead-silver claims, 10 miles S. E. of Big Pine. Country rock is much faulted limestone and slate. Ore is mainly lead carbonate, with iron oxide and decomposed lime; also some galena.

Development: by tunnels, said to have opened large bodies of lead-silver ore. Shipments were made in 1920.

Equipment: includes a flotation mill erected in 1919.

MONTEZUMA MINING & REDUCTION CORP.

CALIFORNIA

Company defunct. No assets. See description etc., in Vol. XIV. Mines Handbook.

MORINGTON MINING CO.

CALIFORNIA

Address: C. N. Miller, fiscal agent, 617 Pacific Bldg., San Francisco.

Inc. 1920, in Nevada **Cap.** \$1,000,000; \$1 par; all issued. Listed on San Francisco Stock Exchange. Said to have been spent \$40,000 to April, 1920; \$40,000 in the treasury at that time.

Property: 3 claims near Hartman's Bar, on Middle Fork of the Feather River, Plumas county, acquired from the Marble Cone M. Co. The project involves a dam 35' high on the river, from which a 6 x 9' flume of 500 second-foot capacity, 2,000' long, will carry river past the pools containing the gold. A half yard of gravel from one pool yielded C. N. Miller \$12.20 gold.

MORNING GLORY GOLD MINING CO.

CALIFORNIA

Address: A. A. Codd, pres.-mgr., Reno, Nev.

Property: a bond on an old high-grade gold mine, reopened 1918; situated 1,500' from the Tightner mine, near Alleghany, Sierra county.

Development: by shaft to depth of 325', with levels at 150', 225 and 300', showing rich gold ore.

Equipped with 10-stamp mill operated by electric power and full mining plant.

MORNING STAR & TRENTON MNG. & MLG. CO.

CALIFORNIA

Idle Address: 406 First Natl. Bank Bldg., Oakland, Calif.

Officers: Sarah J. Robinson, pres.; E. C. Robinson, sec.

Inc. 1893, in Calif. **Cap.** \$50,000; par \$1.

Property: 250 acres of gold-silver ground, in Plumas county, developed by 300' shaft, 1,700' tunnels and equipped with stamp mill, power plant, etc.

MOUNT GAINES GOLD MINING CO.

CALIFORNIA

Address: Hornitos, Mariposa county, Cal. Said to be financed by Los Angeles and Chicago capital.

Officers: Wm. B. Davidson, pres.; A. L. Irish, v. p.; D. J. Hoge, sec.-treas.; with A. E. Rutherford and P. B. Ellis, directors. W. J. McCray, mgr. **Cap.** \$150,000; shares 10c, par. The new company took over control in 1916 and paid for the mine partly in stock and gave a first mortgage trust deed for \$66,000.

Property. 200 acres patented and 300 acres unpatented land in sec. 35. T. 4 S., R. 16 E., Mariposa county, 4½ miles E. of Hornitos, on the west vein of the Mother Lode, said to show gold ore.

Development: by 1,350' incline with 11 levels and about 8,000' of workings. The mine is full of water, but old records show a 5' vein assaying \$7 per ton.

Equipment: includes electric hoist, air compressor and 20-stamp mill with amalgamation and concentration tables. Electric power is obtained from the San Joaquin Power & Light Co. Idle.

MOUNTAIN COPPER CO., LTD.

CALIFORNIA

Secretary's address: 3 Lombard St., London, E. C., England. **Operating office:** 332 Pine St., San Francisco, Calif. **Mine office.** Matheson, Shasta county, Calif. **Works office:** Martinez, Contra Costa county, Calif.

Directors: Major F. B. Lawson, chairman; Henry J. Wenham, J. T. Middleton, E. T. McCarthy and A. N. Frewer. Wm. F. Kott, gen. mgr.; M. J. Murphy, mine supt.; T. B. Swift, smelter supt.; Jardine, Matheson & Co., Ltd., 25 Madison Ave., New York, American sales agents.

Inc. Dec. 1, 1896, in Great Britain, and reorganized May 10, 1902. **Cap.** £250,000; shares £1 par. In 1899 the company changed its capitalization to £250,000 in shares and £1,000,000 in 6% debenture stock; shares £4 par, on which a first payment of £1 per share was made Jan. 16, 1905, leaving £750,000 of stock outstanding. The change in 1899 was practically a complete amortization. A further refund of 10s per share was made in 1918, leaving the outstanding, as at Jan. 1, 1919, £625,000. Payment of debenture interest was suspended in November, 1919, and on Dec. 16, 1920 the issuance of £250,000, £1 shares, to redeem debentures to same amount was deferred to January, 1926.

Dividends: before reconstruction, 1897-1901, aggregated 58½%. No more are to be paid until debentures are paid off.

Profits were, £150,255 in 1907; £28,115 in 1908; £24,557 in 1909; a deficit of £3,042 in 1910; profit of £55,069 in 1911; £81,686 in 1912; £53,456 in 1913; £35,562 in 1914; £106,365 in 1915; £232,106 in 1916; £114,674 in 1917; £36,124 in 1918; £6,861 in 1919; £16,600 in 1920.

Property: the Hornet mine, 10 miles N. W. of Redding. The Iron Mountain mine was closed down in 1921.

The Hornet mine, lying to the north of the Iron Mountain, developed about 5,000,000 tons of pyrite ore, averaging 1% in copper tenor, with patches up to 2.5% copper, and carrying 47 to 50% sulphur. Gold and silver content are very small, but the ore is valuable for the manufacture of sulphuric acid, saving the copper and precious metals as by-products. A description of the crushing and screening plant that prepares the pyrite for market will be found in the Mining and Scientific Press of Nov. 1, 1919, by L. C. White. The works were enlarged to 600 tons daily in 1920.

In 1921, company's office, equipment, etc. were moved to the Hornet mine and a 2½ mile aerial tram built to carry ore to the S. P. R. R., 1½ miles south of Motion station. The Iron Mountain R. R. is to be abandoned.

The 350-ton Mococo smelter, at Martinez, has extensive acid works built at a cost of approximately \$1,250,000. The Hornet ores, low in copper but rich in sulphur, are burned, the sulphur fumes collected in lead-lined chambers and transformed into sulphuric acid by the Meyer chamber process, the cinder remaining after the roasting is leached for its copper content, a 150-ton leaching plant being added in 1917 for this purpose. The acid is sold crude and also is used as the basis of commercial fertilizers for which there is a considerable demand in the rich fruit and agricultural districts of California and the other Pacific coast states. The works also do

a general custom business and are fully equipped with steam, electric and pneumatic power.

The fertilizer plant was operated to full capacity in 1920 and a gas purifier, bluestone and pigments made.

Production: 129,448 tons of ore from Hornet mine in 1920. At one time, only a decade ago, this company was among the largest copper producers of the world, but has since greatly declined in output, production having been 29,727,040 lb. fine copper in 1901; 19,116,160 lb. in 1903; 6,814,000 lb. in 1907; 3,638,619 lb. in 1908; 2,775,197 lb. in 1909; 2,987,815 lb. in 1910; 5,400,000 lb. in 1911; 5,614,000 lb. in 1912; 6,890,000 lb. in 1913; 5,454,000 lb. in 1914; 7,280,712 lb. in 1915; 9,172,390 lb. in 1916; 8,122,325 lb. in 1917, and 6,802,612 lb. in 1918, 2,250,468 lb. in 1919. In Aug., 1919, the company stood at the head of Shasta county copper producers as the result of increased output and idleness of the Kennett smelter of the Mammoth Copper Co., but mines and works were closed in 1919 from April, and during large part of 1920.

Company has been managed with great prudence and marked success, both financially and technically, and has been able to solve the problem of the treatment of low-grade pyrite ores, with the manufacture of acid.

MOUNTAINEER MINES CONSOLIDATED CALIFORNIA

See Volume XIV.

MOUNTAIN KING MINING CO. CALIFORNIA

Office: 316 Kohl Bldg., Calif. & Montgomery Sts., San Francisco. Arthur Hillier, supt., Mountain King, Mariposa county, Cal.

Officers: Anthony McMillan, pres. and managing director; A. T. Dunbar, v. p.; J. C. Fitzsimmons, v. p.; G. A. Urquhart, sec.-treas.; with H. T. Harper and Geo. E. Hart, directors. B. C. Austin, mng. engr.

Inc. 1913, in Calif. **Cap.** \$600,000; \$1 par; assessable; 405,437 issued.

Assessments 5 and 6 were levied in 1920, 7 and 8 in 1921; the latter, 5c. per share, was payable on Nov. 17. Annual report for year ending March 31, 1921, shows total receipts of \$87,775 of which amount \$87,282 was from sale of bullion and concentrate. Disbursements were \$129,581, leaving a deficit of \$41,805. Balance March 31, 1921, \$1,276, as compared with \$43,462 in 1920. Initial dividend of \$18,950 paid May 31, 1916, equal to 3c. per share.

Property: 19 claims, patented, on the north fork of Merced river on the Yosemite Valley R. R., in Coulterville, Mariposa county.

Geology: the Mountain King quartz vein is in slate and greenstone, and carries gold and silver in iron pyrite and tetrahedrite.

Development: by 2,150' shaft sunk at 55° incline; also by a 2,645' tunnel on the 1,000' level. In 1920-21 mining operations were mainly on the 1,000, 1,850 and 2,000', levels; most of the ore coming from the two lower levels. On the 2,000', an average width of 46" of ore is exposed, which for a length of 200' average \$9 per ton. On Nov. 1, 1921, a crosscut was started to reach No. 2 ore shoot, which was cut at 2,000'.

Since 1913, company has done 9,822' of drifting, 3,000' of raising, 2,980' of crosscutting and 1,398' of sinking. Extensions in 1920 were 1,164'. Expenses have been 15% for plant and equipment, 4% for overhead, 81% for development, mining and milling.

For each dollar paid in by stockholders, approximately \$3 worth of bullion and concentrate were taken from mine.

Equipment: includes air-compressor, hydro-electric plant, built in 1915, and a 30-ton stamp mill with concentrator. Power plant has one 350-kva. 3-phase, 4,000-volt generator direct connected to a turbine running at 600 r. p. m. Underground haulage is by electric trolley locomotive.

Production: years ending March 31:

	Tons Ore		Recovered			Cost per Op't'g.	Ton M'g.
	Value	per ton	Amal.	Conc.	Total		
1920 (11 mos.)	12,655	\$7.46	69.3%	23.1%	92.4%	\$6.784	\$0.562
1919.....	23,648	5.63	78.9	13.1	92.0	5.168	0.488

1918.....	15,940	4.59	64.5	26.6	91.1	5.538	0.462
1917.....	13,186	3.09	53.2	35.1	83.3	3.646	0.331

Total mining costs for 1920, were \$8.281 per ton, or \$10.534 when depletion, depreciation and taxes, etc., are included.

Company is operating a mine with good equipment and capable management.

MOUNTAIN LION CONS. MINING CO. CALIFORNIA

Address: Exchange Natl. Bank Bldg., Santa Rosa, Calif.

Officers: N. McNeill, pres.; Geo. E. Remmel, sec.

Inc. Aug. 5, 1914, in Calif. Cap. \$250,000; \$1 par; 47,043 shares issued.

Property: 60 acres near Minersville, Trinity county, said to contain gold and silver. Is a prospect. Idle.

MOUNTAIN MONARCH GOLD MINING CO. CALIFORNIA

Probably dead. A Shasta county promotion. See Vol. XII.

MUGWUMP MINES CO. CALIFORNIA

Address: A. D. Foote, Grass Valley, Calif.

Inc. 1917. Cap. \$1,000,000.

Property: about 1,000 acres, includes the Gold Star lode, 2 miles S. W. of Alleghany, and Young America lode, 1 mile S. of Forest City, both in Sierra county. Ground covers an ancient channel, 1,000' of which on the Gold Star yielded about \$1,000,000. It is up to 200' wide and 10' deep, covered with lava; 4,000' of channel is said to be unworked. Samples give from \$3 to \$7 per ton. In the Young America mine, the channel yielded from \$5 to \$10 per mine car. Several quartz veins have been uncovered in serpentine.

Development: by 1,200' ventilating tunnel and 1,800' mam tunnel, with long drifts into the gravel.

Equipment: water power, gravel cars, shop, buildings, and flumes for washing.

Was producing in 1919, but apparently not in 1920.

MURCHIE MINES CO. CALIFORNIA

Defunct. Property bought at sheriff's sale for \$2,490 by C. F. Humphreys, Merchants National Bank Bldg., San Francisco, Calif.

Property. Murchie mine, 2 miles E. of Nevada City, Nevada county, under water since 1910. The mine has a steep vein in granodiorite, with stipes 4-23' wide, of \$8 ore.

Development: by 1,150' shaft. Total production reported to be \$1,300,000. Examined in 1909 by J. Nelson Nevius.

MURRAY CREEK MINING CO. (REORG.) CALIFORNIA

Idle. Address: 302-26th Ct., Oakland, Calif.

Officers: P. H. Hansen, pres.; J. P. Rohrbach, sec.

Inc. 1896, in Calif. Cap. \$100,000; \$1 par.

Property: 67 patented acres at Cave City, developed by shaft and tunnels.

NAPOLEON MINING CO. CALIFORNIA

Address: 220 Battery St., San Francisco. **Works:** near Copperopolis, Calif. L. D. Adams, Milton, Calaveras county, Cal. D. E. Coughanour, supt.

Property: the Napoleon copper mine in Calaveras county, 10 miles S. W. of Copperopolis, held under 10-year lease. The ore is mainly chalcopryrite, occurring in lens shaped masses up to 20' in width.

Development. by 500' shaft which is only unwatered to 200'.

Equipment: in 1918 a new hoist was added, also 2 Diesel engines to drive a ball-mill, and a flotation unit, planned to treat 90 tons ore daily.

The mine was operated as early as 1881, and is credited with a past production of \$1,200,000 in copper and gold.

Operated intermittently in 1919 with some production; idle during 1920.

NASSAU COPPER CO. CALIFORNIA

Address: Room 301, 381 Bush St., San Francisco. **Mine address:** Alta-ville (Nassau mine), via Angels, Cal.

Property: 2 patented claims, 40 acres, and 1,560 acres of agricultural lands, 4 miles north of Copperopolis, Calaveras county, covering a length of 15,840' on the lode. Ore occurs in lenses and streaks as copper sulphides, pyrite, gold, silver and zinc, in a 10' vein running N. 35° W. and dipping 65° N. E.

Development: by 280' shaft with 1,000' of drifting N. and S. on the 95' level, and 1,100' of drifting N. and S. on the 200' level. Mine worked under lease 1918-19. Shipments averaged 17.90% zinc, 5.22% copper, 4.60 oz silver, 0.20 oz. gold, 11.90% iron, 39% silica. J. A. Vigeant was reported negotiating for control, Jan., 1921.

NATIONAL GOLD MINES CO.

CALIFORNIA

Address: 315 Exchange Bldg., Los Angeles, Calif.

Officers: Dr. S. I. Kistler, pres.; A. C. Mahan, sec.

Inc. 1919, in South Dakota. **Cap.** \$100,000; par 10c.

Property: 100 acres of gold quartz ground, in Sonoma county. Developed by 420' of tunnel work and equipped with air-compressor, etc.

NATIVE COPPER MINING CO.

CALIFORNIA

Inc. in 1911, to develop the Copper King, Native Copper and other claims on Table mountain, Monterey county. W. H. Kerr, Coalinga, Calif., pres., at last report.

NATOMAS COMPANY OF CALIFORNIA

CALIFORNIA

Office: 605 Alaska Commercial Bldg., San Francisco, Calif.

Officers: Frank B. Anderson, pres.; Herbert Fleishhacker, Frank W. Griffin, Fred W. Kiesel, W. Mayo Newhall, Louis Sloss, Louis Sloss, Jr., Geo. E. Weber, John D. McKee, v. p.'s; with Hy E. Bothin, directors, P. C. Knapp, sec.-treas.; Emery Oliver, gen. mgr.; L. D. Hopfield, supt. of dredging at Natoma, Calif.

Inc. December 24, 1914, in California, to take over all the properties of Natomas Consolidated of California.

Natomas Company of California is engaged in a number of enterprises, principally the development and sale of approximately 60,000 acres of land in Reclamation Districts 1000 and 1001; development and sale of the American River Lands; operations of gold dredges and rock crushing plants, and, through ownership of the stock of Natomas Water Company, the operation of a water utility and other minor projects. Annual meeting 3rd Tuesday in March.

Cap. preferred 6% non-cumulative \$100; authorized, \$7,250,000; outstanding, \$6,823,200; common, \$100; authorized, \$9,250,000; outstanding, \$9,249,500.

Bonds: \$450,000 Natoma Land & Mining 20 year 6% 1st mortgage, dated Jan. 1, 1907; \$146,000 outstanding, March 1, 1922; callable by consecutive numbers on interest dates at par. Redemption clause provides for the annual retirement of \$20,000 on July 1, 1913 to 1917; \$25,000, 1918-1922; \$40,000, 1923-1925 and on Jan. 1, 1927.

General and refunding mortgage 6% 20-year gold, dated Jan. 1, 1915; \$16,500,000 authorized; \$10,095,200 outstanding, Jan. 1, 1922; 80% of all land-sales are applied to sinking fund.

Company pays 2% income tax of both issues. Mercantile Trust Co., San Francisco, is trustee of first and pays interest on both issues. Interest on 2nd issue paid also by U. S. Mortgage & Trust Co., New York, or Swiss Bank Corp., London.

Earnings—Year Ended December 31:

	Net Profit Less Exp. Taxes, etc.	Cash Interest	Scrip Interest	Depre- ciation	Exhaustion of Mineral Area	Balance
1915	\$1,570,799	\$194,770	\$542,262	\$345,171	\$486,421	\$ 2,175
1916	1,246,589	219,476	577,338	364,697	464,695	379,617 *
1917	1,546,670	222,786	585,725	328,678	795,566	386,085 *

1918	1,220,777	126,301	644,350	308,827	642,660	501,361 *
1919	986,592	404,704	399,375	280,300	554,616	652,403 *
1920	822,803	707,763	10,797	283,243	598,404	777,404 *
1921	667,675	783,440	3,759	231,466	544,475	895,465 *
	*Deficit					

Property: over 15,000 acres of mining lands, near Folsom, Sacramento county, and near Oroville, Butte county; and about 70,000 acres of farm lands in Sacramento county.

Equipment: includes 10 large, modern, electrically-driven dredges, and 2 large rock crushing plants. Improvements in machinery and gold-saving apparatus and in methods to insure leaving the dredged ground suitable for agriculture, are being made continually.

Production: during 1919 the boats dug 20,485,530 cu. yd. recovering gold worth \$1,775,124, of which \$461,484 was profit. In 1920 material dredged amounted to 20,459,001 cu. yd., yielding \$1,680,675 gross and \$318,826, net.

In 1921 material dredged amounted to 16,369,703 cu. yd. on company land and 4,883,585 cu. yd. on other lands, yielding \$1,694,121 gross, and \$292,529 net.

In 1915, it was estimated that there was 216,000,000 cu. yd. of pay-gravel, but additions have been made, so that after 164,369,703 yd. of the original area have been dredged, there are 125,600,000 yd. still available, plus 40,000,000 yd. if pre-war costs should again prevail. The apparatus placed on the boats to save fine gold has recovered \$107,000 net, most of which would have been lost under previous methods.

Rock Crushing: in 6 years to end of 1919, the plant at Fair Oaks produced 2,206,944 tons of crushed rock, 240,944 tons of washed gravel, and 275,724 tons of screened gravel; and the plant at Oroville 517,364 tons of crushed rock, and 508,016 tons of screened gravel. The crushed products and field gravel are sold throughout the State. Plants were leased 1920 and 1921

Land Department: reclamation work has cost \$4,801,322 to date, inclusive of accrued interest, etc. To the end of 1920, 30,294 acres were sold for \$4,964,626, of which \$4,203,214 is still due. All of these properties are being irrigated, provided with roads, and generally prepared for sale. In addition to lands under sales contracts there are 43,000 acres awaiting development.

If Natomas were operating its dredges alone, good dividends could be paid; but until the land project is self-sustaining there can be no distribution of profits.

NEEDLES LEAD AND ZINC CONCENTRATOR CALIFORNIA

Address. D. L. Muir, mgr., Goldroad, Ariz. Is a custom mill, at Needles, San Bernardino county, owned by U. S. S. R. & M. Co., which see for details.

NEOCENE PLACER MINING CO. CALIFORNIA

Address: J. V. Akev, pres., 624 I. W. Hellman Bldg., Los Angeles, Calif.

Inc. 1909. Cap. \$250,000.

Property: 10 claims, 897 acres, of hydraulic placer ground, near Scales, Sierra county. About 600' of the channel has been worked. Most of the hydrauliclicking has been 30' above bedrock (volcanic ash and gravel on slate). The yield averages 50c. a yard.

NEVADA-CALIFORNIA SILVER MNG. CO. CALIFORNIA

Officers: Joseph B. Evans, pres.; C. C. Boak, and W. J. Douglass; all of Tonopah, Nev.

Property. the Carbonate mine, in Providence range, New York Mountain district, near Ivanpah, San Bernardino county, shows 5' to 35' vein, opened to depth of 750', which has blocked out \$100 ore.

Equipment: 20-ton mill, 3-drill compressor, etc.

NEVADA PACIFIC EXPLORATION CO. CALIFORNIA

Address: J. G. Kirchen, Tonopah, Nevada; and H. M. Thompson, mgr., Forest Hill, Calif.

Officers: N. K. Cooper, pres.; H. M. Thompson, v. p.-mgr.; B. M. Aikens, sec., with John G. Kirchen and P. T. Prather, directors.

Inc. 1920. Cap. \$100,000.

Property: the Snowbird mine, near Forest Hill, Placer county, and the Joseph mine near Volcanoville, Eldorado county. Veins occur in serpentine, slate, and amphibolite, capped with andesite.

Development: by 177' shaft and over 1,000' of workings. On the 75' level an ore shoot was followed for 500'.

Equipment: includes a 50-ton mill, comprising stamps, ball mill, Aitkens classifier, Wilfley tables, cyanide plant and filter.

The Snow bird made a small gold output in 1920.

NEW ALMADEN CO., INC. CALIFORNIA

Controlled by New Almaden Quicksilver Mines Corp., which see. G. H. Sexton, pres.; C. A. Frank, sec., New Almaden, Calif.

NEW ALMADEN QUICKSILVER MINES CORP. CALIFORNIA

Address: 210 California St., San Francisco.

Property: company owns all of the stock of the New Almaden Co., Inc., which holds a lease for 25 years, from Feb. 4, 1915, on 7,200 acres of mineral and agricultural land at Almaden, Santa Clara county. The old mine was first operated by Mexicans in 1824. To the end of 1917 the total output was 1,021,183 flasks of quicksilver. This has been exceeded only by the Almaden in Spain, the Idria in Austria, and Santa Barbara in Peru. The New Almaden mine is now practically exhausted, and operations are confined to El Senador mine, 4 miles distant. The Enriquita mine is not being operated. The mines and works are fully described in 'Quicksilver Resources of California', Bull. 78, State Mining Bureau, San Francisco.

Geology: the ores are composed of cinnabar, with some mercury, in a gangue of quartz pyrite, calcite, and dolomite. The latter is more prevalent than in most quicksilver areas. The rocks associated with the cinnabar include every variety of the metamorphic series. Where it is permeable sandstone, impregnations have resulted. Elsewhere the ore seems to occur exclusively in crevices in the rock, and close to evidences of faulting. The orebodies are stockworks, arranged along definite fissures and the deposits as a whole have a vein-like character, with clay hanging and serpentine footwall. Ore carries from 0.2 to 1% mercury.

Development: at the old mine, by 18 shafts, the deepest being 2,450', and 100 miles of workings scattered over 2½ square miles of ground. At El Senador, adjoining the New Guadalupe, which see, there is a 1,300' tunnel, with winzes sunk at 1,150' and 1,300'. Levels have been driven from these winzes. Normally 60 men are employed underground.

Equipment: at El Senador; electric power, crushing plant, and reduction works consisting of a 50-ton Herreshoff multiple-hearth furnace, a 90-ton Scott furnace, Cottrell dust precipitator, and condensers. Six men attend to this plant. The plant was destroyed by fire in 1919 but has been replaced.

Production: in 1918, amounted to over 2,000 flasks from all sources, including cleaning up the old works.

NEW BLUE JAY MINING CO. CALIFORNIA

Address: J. H. Jordan, sec., 205 Brower Bldg., Bakersfield, Calif.

Inc. 1905, in Calif. Cap. \$500,000; \$1 par; 121,000 shares issued.

Property: 173 acres, patented, with gold-copper showings, in Trinity county. Developed by tunnels and equipped with hydraulic plant.

NEW GUADALUPE MINING CO. CALIFORNIA

Address: Motor Route A, Los Gatos, Calif.

Officers: H. C. Davey, pres.; J. B. McCauley, v. p.; F. A. Luedeman, sec.

Inc. Dec. 1907, in Arizona. Cap. \$1,000,000; \$1 par.

Property: 2,500 acres including the Guadalupe quicksilver mine, in Santa Clara county, 10 miles S. of San Jose, was discovered in the early 50's. Operated at one time under name of Century Mining Co.

See Quicksilver Resources of California, Bull. 78, p. 158, published by Cal. State Mng. Bureau.

Development: 700' incline shaft, tunnels, and many miles of workings. A concrete flume, 740' long, 55' wide, 9' high was built in 1917 to carry the stream over old mine beneath, so that the old 625' vertical shaft could be unwatered. A 12' vein of rich ore was reported cut early in 1920.

Equipment: includes electric hoists, air-compressors, and a reduction plant with two 18-ton coarse-ore furnaces, and two 30-ton fine-ore furnaces, also a 50-ton concentrating plant to handle material from old mine dumps. In 1917 company employed 75 men.

Production: total recorded output to 1919 about 106,772 flasks of quicksilver; in 1918 the yield was close to 1,000, but in 1919 only 200 flasks.

NEW IDRIA QUICKSILVER MINING CO. CALIFORNIA

Office: 70 Kilby St., Boston, Mass., and Merchants & Exchange Bldg., San Francisco.

Officers: Andrew Adie, pres.; H. C. Buckminster, sec.-treas., and gen. mgr.; with R. B. Sterns, F. Rothschild, Sydney Harwood, C. B. Wiggins, J. E. Simpson, and Jas D. Colt, directors. H. W. Gould, mgr., N. J. Martin, min. engr.

Inc. 1896, in Wyoming. **Cap.** \$500,000; shares \$5 par; all issued. Stock listed on Boston Stock Exchange. State Street Trust Co., Boston, transfer agent, American Trust Co., Boston, registrar. Annual meeting, third Wednesday in January, at Cheyenne, Wyo.

8,750 shares sold for 35 cents each at public auction in Boston on Dec. 30, 1920.

Dividends: paid since 1897, with total disbursements to date of \$2,705,000; \$3 in 1917; \$2 in 1918; 25c. in 1919.

Comparative Balance Sheet:

	Assets.				Profit & Loss
	Real Estate & Plant	Cash	Quicksilver		
1920	\$4,066,579	\$ 13,976	\$163,908	\$299,363

1915	234,979	24,448	98,850	-----	
1914	258,170	6,823	73,200	-----	

Liabilities

	Capital Stock	Accts. & Notes Pay.	Profit & Loss	Tax Reserve	Deprec. Reserve	Total
1920.....	\$500,000	\$225,511	\$	\$	\$3,818,315	\$4,543,826
1919.....	500,000	240,948	1,051	3,818,315	4,560,314
1918.....	500,000	157,203	60,991	3,930,755	4,729,460
1917.....	500,000	237,713	99,481	3,823,814	4,580,499
1916.....	500,000	37,284	118,128	754,501
1915.....	500,000	33,078	98,892	631,970
1914.....	500,000	89,863	589,863

Property: 12 claims, 240 acres, and other patented land, including the Idria and San Carlos mines, 40 miles S. W. of Mendota and 58 miles S. E. of Tres Pinos, San Benito county. Fully described in 'Quicksilver Resources of California', Bull. 78 (1918), State Mining Bureau. Property has yielded 324,575 flasks of mercury to the end of 1919. It is the largest quicksilver producer in America.

Geology: the ore zone in this property is roughly elliptical and varies up to 235' in width and 800' in length on No. 5 level, and is 120' wide and 1,200' long on No. 10 level. The ore occurrence is not regular, comprising veins, cross-veins, stockworks, and impregnations, but the main orebody is a stockwork in sandstone and shale.

Development: totals about 20 miles comprising 10 tunnels, the lowest being a mile long, with a vertical depth of 1,500'. The San Carlos mine is opened by tunnels and a large open-cut, the ore averaging 0.7% mercury. As much as 12,300' of new work is done in a year.

Equipment: is complete, embracing water and electric power, semi-Diesel engines, compressors, gasoline hoists, storage-battery locomotive underground, gasoline motor on surface, aerial trams, one 2 miles long, sawmill, complete shops, and the most modern reduction plant known on any quicksilver property. The works employ 5 rotary-kiln furnaces, capable of calcining up to 500 tons of ore daily, fitted with Cottrell dust precipitators and wooden condensers. In June, 1920, fire destroyed surface equipment valued at \$100,000, which has since been re-built.

Operating results:

	Flasks Quicksilver	Net Earnings	Cost per Flask	Average Price
1919.. .. .	7,400	\$ 1,050	\$ 81.00**	\$ 92.15
1918.. .. .	10,700	167,540	103.00**	123.47
1917.. .. .	11,000	207,762	73.00**	†105.00
1916.. .. .	10,828	419,236	47.50*	89.57

1909.. .. .	8,900	109,639	27.50	46.30
1908.. .. .	9,600	147,289	25.50	44.84
1907.. .. .	7,675	89,650	25.50	41.50

* Includes cost of erecting new mill and aerial-tram, \$70,000, or about \$6.40 per flask. †On government requisitions; average price in open market was about \$125. **Approximately.

Mine and plant shut down Nov. 1, 1920, awaiting a better market.

Owing to the heavy cost of re-building the plant, coupled with a lack of income during reconstruction and company's inability to produce mercury at a profit in competition with Italy and Japan, it was decided Dec., 1920 to appoint Jas. D. Colt, of Boston as receiver.

Reported late in 1921 that company had purchased the Sulphur Bank mine, which see.

NEW PROVIDENCE GOLD MINING CO.

CALIFORNIA

Former office: 2041 Emerson St., Berkeley, Cal. John D. Hammond, sec.

Property: 5 claims, 90 acres, including the Providence and Consuelo about 2½ miles S. E. of Tuolumne, Tuolumne county, said to show 2 parallel veins, 5' wide, in black Calaveras slate, running N. 8° E., with dip 45° E. Ore is gold with galena and 2% pyrite.

Development: by 1,300' shaft with levels every 100'.

Equipment: includes 10-stamp mill. No recent returns.

NOBLE ELECTRIC STEEL CO.

CALIFORNIA

Office: 995 Market St., San Francisco.

Property: 2 patented claims in Shasta county and other property, acquired from the Tehama Cons. Chrome Co. in 1915, in Tehama county,

shows chromite orebodies. In 1918, company operated under lease both chromite and manganese deposits in some 13 different counties of the State.

Equipment: at Nigger Hill, El Dorado county, a 50-ton concentrator, and at Heroult, Shasta county, 2 electric furnaces for the production of ferro-manganese and ferro-silicon. A second concentrator has been installed at the Pilliken mine in El Dorado county, held under lease.

NORAMBAGUA CONSOLIDATED, INC. CALIFORNIA

Address: Theodore Roosevelt Pell, sec., 542 Fifth Ave., New York.

Company consolidated with Central Cons. Mines Co., to form **Banner Consolidated Mines Co.**, which see.

NORTH BANNER CONS. TUNNEL CO. CALIFORNIA

Address: I. N. Rosecrans, sec., 525 Crocker Bldg., San Francisco.

Property: 3 patented quartz claims, 55 acres, 2 miles E. of Nevada City, Nevada county, idle since 1904. Production amounts to about \$200,000, mostly from 1889 to 1892. The main vein has been developed by a 1,000' adit and 500' shaft below it. No equipment.

NORTH FORK MINING CO. CALIFORNIA

Office: Room 803, 57 Post St., San Francisco. **Mine office:** Forest, Sierra Co., Calif.

Officers: Lewis Tasheira, pres.; W. C. Wallace, sec.; Geo. F. Stone, supt.

Inc. 1909, in Calif. **Cap.** \$300,000; par \$1; assessable; 211,000 shares issued. Assessment No. 29, of 2c. per share, was due on Oct. 9, 1920.

Property: the North Fork mine and adjoining properties, 320 acres, in the Forest district, Sierra county, shows a quartz vein 4' to 20' wide in diorite and schist, with occasional lenses of ore containing arsenical sulphides and free gold.

Development: by 500' incline, a 2,000' tunnel and drift work.

NORTH STAR MINES CO. CALIFORNIA

Office: 22 William St., New York; 15 Exchange Place, Jersey City, N. J.

Mine address: A. B. Foote, gen. supt., Grass Valley, Calif.

Officers: Geo. B. Agnew, pres.; Walter Douglas, v. p.; with C. E. Dodge, J. B. Pine, and Ernest Howe, directors. W. D. Pagan, sec.-treas.

Inc. April 10, 1899, in New Jersey. **Cap.** \$5,000,000; shares \$10 par; 250,000 outstanding. Stock is listed on Boston Exchange. New York office and Old Colony Trust Co., Boston, transfer agents. Central Trust Co., New York, registrar. Annual meeting, 2nd Wednesday in April.

In 1920, total production was \$821,129, expense \$744,995, operating profit, \$76,134, but deducting interest, dividends, depletion, etc., net deficit was \$51,415.

Total revenue from May, 1884, to 1919, inclusive, was \$22,961,380, of which, \$7,130,197 was profit.

Balance Sheet, December 31, 1920:

	Assets	
Mining Property	\$3,482,153.45	
Less amount written off for Depletion	2,903,481.45	\$578,672.00
	<hr/>	
Homes Purchase		5,022.38
Plant and Equipment	1,329,367.15	
Less net amount received for equipment salvaged at Champion Mines	10,534.25	
	<hr/>	
	1,318,832.90	

Assets (con't)		
Less amount written off for Depreciation	998,947.14	319,885.76

		<u>75,000.00</u>
Dividends (Distribution of Capital Assets)		75,000.00
		<u>\$835,732.84</u>

Dividends: 2% in 1899; 5% in 1903; 6% in 1904; 8% in 1905; 10% in 1906 and 1907; 15% in 1908; 23% in 1909 and 1910; 17% in 1911; 12% in 1912 and 1913; 18% in 1914; 10% in 1915; 12% in 1916; 10% in 1917; 4% in 1918; 4% in 1919; 3 cents, Jan., 1921. The grand total is \$5,569,540.

Property: 1,200 acres, including the North Star mine, $1\frac{1}{2}$ miles S. of Grass Valley, and 440 acres, including the Champion mine, $1\frac{1}{4}$ miles W. of Nevada City, Nevada county. See 'Mines of Nevada County' (1919), State Mining Bureau, San Francisco.

The North Star, the main producer of the group, was discovered 1851 and operated continuously to date, with exception of 10 years, 1874-1884, first by the original locators and later by the North Star Quartz, the North Star Gold Mining Co., and the North Star Mining Co. It is the second largest deep mine gold producer in the State, the fourth of all producers in the State and the thirteenth in America.

The Defender and Lone Star mines, 2 miles from Nevada City, were acquired in Sept., 1920. The latter is also known as the Murchie. It consists of 432 acres of patented placer and agricultural land. Four veins have been developed by a 1,150' incline and numerous workings. Orebodies are similar to others of the district, but the ore was richer and carried more silver. The output to 1910 was \$1,150,000.

Geology: the North Star and associated veins outcrop in diabase-porphyrite, but at 3,700 to 4,000' on the dip the main vein passes into granodiorite. The system varies from a simple fracture to a complex of inter-linked veins. They strike E. and dip N. The main vein is from 2 to 4' wide, and dips 24° . Ore consists of quartz and altered wall rock, carrying fine and coarse gold, also auriferous sulphides, amounting to 2% of the ore. To the 150' level some ore yielded up to \$100 per ton; from 150 to 3,000' the average was \$20; and below 3,000', \$11.87. About 35% of the ground opened has been profitable.

Development: by a 2,400' incline shaft; and the Central shaft, 4,000' vertical and incline below it, making an incline depth of 6,300, equal to 2,500' vertical. Levels have been driven E. and W. of this shaft from the 4,400, 4,700, 5,000, 5,600, 6,000 and 6,300' stations. One foot of development yields 20 or 25 tons of ore.

On the 6,300' level (2,500' vertical) the North Star vein meets the 'X' vein, coming from the E. at an angle of 40° . The 'X' persists strongly, dipping W. and shows a good deal of milling ore scattered in a wide lode.

Development in 1920, 7,285' at North Star and 304' at Champion.

The Champion and Providence mines were closed, June, 1920, for good. In Sept., 1920, the company was re-opening the old Massachusetts Hill and New York Hill shafts. The former is 1,800' deep, and was closed in 1901. The orebody has yielded over \$5,000,000 from 193,000 tons, the last 68,222 tons returning \$1,078,075. The New York Hill mine has not been worked since 1885. Up to that time, 35,000 tons yielded about \$500,000. Barren zones were encountered in both of these mines, but new shoots may be found.

Equipment: is complete to handle 400 tons per day. It includes a 100' steel head-frame, duplex air hoist capable of hauling 4 tons from a depth of 7,300' (incline), 3 compressors with total of about 4,000 cu. ft. capacity, electric power, water-power, sorting tables which reject 25%, 2 Wheeling crushers, electric locomotive and $2\frac{1}{2}$ -ton cars, 1,000-ton capacity concrete mill-bins, sixty 1,500-lb. stamps, each 10 driven by a 35-h. p. back-gear motor, 20-mesh screens, Richard pulsator classifiers and cones, Deister tables, and 350-ton cyanide plant for sand, slime and concentrate, employing Dorr thickeners, Devereaux agitators, Oliver filters, and Merrill precipitators. Residue is stacked by means of a clam-shell bucket-excavator.

Production: the North Star yielded 1,600,000 tons of \$11.35 ore from 1850 to the end of 1919, a total of \$18,000,000. Records of the Champion from 1851 to 1893 are not complete, but from 1893 to 1913, the total was \$2,864,528 from 508,910 tons of ore. Recent outputs, of the North Star are as under:

Year	Tons	Value per ton	Gold Extracted	Cost per ton	Profit per ton
1920.....	79,026	\$ 8.62	\$ 821,129	\$...	\$...
1919.....	102,800	8.95	919,800	7.81	1.14
1918.....	99,550	7.79	775,688	7.29	0.50
1917.....	100,500	11.43	1,148,685	6.65	4.78
1916.....	111,330	10.42	1,160,007	6.26	4.16
1915.....	109,860	9.92	1,089,751	5.73	4.19

The whole group of claims owned by the North Star has yielded over \$30,000,000.

NYMAN CONSOLIDATED MINES CO. CALIFORNIA

Office: 502 Humboldt Bank Bldg., San Francisco, Cal. Mine office: Stent, Tuolumne county, Calif.

Officers: A. L. Trowbridge, pres.; R. W. Barrett, v. p.; F. G. Mudgett, sec., Fay Chadbourne, supt.

Inc. March 19, 1915, in California. Cap. \$200,000; \$1 par; assessable; 161,586 shares issued.

Gross earnings from July, 1915, to March, 1917, were \$51,086, and cost of operation and maintenance, \$53,614. Cash assets at end of April, 1917, were \$8,791.

Property: 5 patented claims, 240 acres, patented on the Mother Lode between Quartz and Stent, 2 miles S. of Jamestown, adjoining the Dutch App on north and Cloudman-Jumper group on the south.

Geology: a contact zone between amphibolite schist and greenstone. Shows West or App vein 20 to 90' wide, at N. end of Nyman claim; the Heslop or Middle vein is 50' long, with \$5 to \$10 ore across 7'; the Knox & Boyle shows 2' to 8' of high grade ore on the 700' and 800' levels. The Mascot vein shows shoots of high grade ore in Calaveras slate hanging wall.

Development: by 15,000' of underground workings, consisting of 700' tunnel, 850' vertical shaft and 2 incline shafts, one 825' and the other 810' deep, both dipping 60° E., with levels 100' and 200' apart. Drifts have been started on \$6 ore N. and S. of old crosscuts that apparently had not been sampled years ago.

Equipment: includes 200-ton 40-stamp mill, with Frue vanners for 20 stamps and 22 buildings, 2,000' double-drum hoist, 750 cu. ft. air compressor, pumps, electric power.

Production: in 20 months ended March 31, 1917, 8,550 tons yielded \$51,000 of gold. Mill recovery was 85 to 90% by amalgamation and concentration. Output to date is \$2,000,000. Costs with full equipment are estimated at between \$2.50 and \$3 per ton.

Completely described in Vol. XIV. Mine in hands of lessees, but apparently little, or no, production in 1919 and 1920.

OCEANIC QUICKSILVER MINE CALIFORNIA

Address: Murray Innes, owner, 217 Kohl Bldg., San Francisco, Cal. E. W. Carson, mgr., Cambria, San Luis Obispo county, Calif.; Thos. Knowles, supt.

Property: 3 patented claims, 500 acres, about 5 miles E. of Cambria, shows a contact deposit 800'x650'x20' in width running N. W., with nearly vertical dip, in serpentine and sandstone formation. The ore contains cinnabar and iron sulphide, assaying 0.4% quicksilver.

Development: to depth of 650' by 300' vertical winze and 1,500' tunnel. Underground workings total 5,000'. Mining is by caving and sublevel slicing.

Ore reserves: estimated by owner at 300,000 tons with 150,000 tons blocked out, July 1, 1917.

Equipment: includes 25 h. p. hoist, compressor, pump, ½-mile wire tramway, and two 50-ton Scott furnaces. A 300-ton concentrator was built by lessees during 1916 but is not now operated.

Recent production: 1920, 1286 flasks; 1919 (10 months), 1177 flasks; 1918, 1650 flasks. Total to end of 1920, 26, 664 flasks. Shut down Nov. 1, 1920, due to slump in price resulting from dumping of foreign metal.

OLD COWBOY MINING CO.**CALIFORNIA**

Address: A. E. Bryson, owner, 808 Citizens Natl. Bank Bldg., Los Angeles. Theodore Martin, sec., Security Bldg., Los Angeles Calif

Inc. June 1, 1905. **Cap.** \$1,000,000. Company is a close corporation.

Property: the Cowboy mine at Loraine, Kern county, 14 miles N. E. of Caliente. There is said to be a considerable tonnage of 20 oz. silver ore, one pay shoot being 230' long and 12' wide.

Development: by a 520' tunnel and drifts. Lessees have abstracted over \$60,000. Equipped with a 20-ton cyanide plant.

Mine worked 1919 under bond and lease by Walter X. Osborne, employing 6 men; work continued until October, 1920, when operations ceased.

OLD EUREKA MINING CO.**CALIFORNIA**

Office: 25 Broadway, New York. Mine at Sutter Creek, Amador county; Calif.

Officers: Wm. D. Thornton, New York, pres.; G. E. Tener, Pittsburgh, v. p.; J. D. Clarke, sec.-treas.; T. C. Gorrie, gen. mgr.

Inc. 1916, in Delaware. **Cap.** \$30,000,000; \$10 par; 138,628 issued. Bonds authorized, \$116,000, 8%. Mechanics & Metals Natl. Bank, New York, registrar.

Property originally owned by Hetty Green, was purchased in 1916 from the Amador Cons. Mng. Co. Is credited with past production of \$30,000,000. For history of the property, see Mining and Scientific Press, Vol. 112, No. 26.

Property: covers 3,200' along the mineralized belt of the Mother Lode. Recent exploration on the old Eureka main vein shows the absence of workable orebodies; further development is to be carried on in the Railroad vein and in the greenstone area, to disclose the zone of commercial ore which on neighboring properties occurs below an horizon of impoverishment.

Property was unwatered in 1917, after a shut-down of over 40 years. The shaft was enlarged from a one to 3-compartment shaft below the 1,600' level, and sunk to 3,550' by mid-1920. Large quantities of ore have been found on the 1,200, 1,600, and 2,100' levels; while an 8' vein was opened at 3,000' and good ore at 3,500'. Lateral extensions in 1920 were 2,000'.

Work planned for 1921-22, includes extension of 21st level and exploration on main vein south on 35th level.

Equipment: modern sinking pumps, 300-h. p. electric hoist, compressor, and necessary buildings.

OMEGA PLACER MINING CO.**CALIFORNIA**

Property: in the Washington district of Nevada county, at an elevation of 4,000', has been hydraulicked for many years, the 1,300,000 yards removed averaging 13½c. per yard. About 40,000,000 yd. remain to be washed. The gravel which is up to 175' deep lies on slate.

Although operating in 1919, company was apparently inactive in 1920.

ORD COPPER MINE**CALIFORNIA**

Property: once called the Osborn mine, is in San Bernardino county, 12 miles S. of Daggett. It shows a series of wide veins, said to be traceable 3 miles across country, with widths in places of 50' of 2 to 3% copper ore and good gold value. Gangue is heavy in barite, making gravity concentration impossible. New York capital said to have taken over the property on a development basis, no payments for a year, but doing 300 shifts of work per month in 1919.

ORIENTAL GOLD MINING CO.**CALIFORNIA**

Defunct. See Vol. XIV.

ORIGINAL AMADOR CONSOLIDATED MINES CO. CALIFORNIA

Company dissolved; described in Vol. XIII. See also Amador Mines Company.

ORIGINAL MINING & MILLING CO.**CALIFORNIA**

Office: Merced, Merced county, Calif.

Officers: C. E. Kocher, pres.; S. B. Hart, sec.

Inc. 1911, in Calif. Cap. \$200,000; par \$1; issued 169,666.

Dividends: total \$39,023.

Property: the Original Quartz mine, 3 claims, at Clearinghouse, Mariposa county, and near Coulterville, is said to cover a 2' vein, with slate walls.

Development: by 700' winze, and 4,000' of workings.

Equipment: includes compressor, electric hoist, machine-drills, stamp mill and several buildings. Employs 40 men.

Production: to date \$300,000.

Operating throughout 1919 and 1920; in latter year doing 600' new work and making largest output in Mariposa county. In 1921, started work on 3,100' conduit for a 500 h. p. power plant.

ORIGINAL SIXTEEN TO ONE MINE, INC.**CALIFORNIA**

Address: 607 Monadnock Bldg., San Francisco. M. C. Sullivan, supt.

Officers: H. U. Maxfield, pres.; Walter C. Beatie, sec.-treas.; M. C. Sullivan, supt.

Inc. Oct. 9, 1911, in California. Cap. \$200,000; \$1 par; 164,030 shares issued. Annual meeting 3rd Tues. in April.

Dividends: to date \$90,292; last, 10c. per share, July 1, 1921.

Property: 6 claims, including 4 acquired from the Twenty-One M. Co. in 1920, $\frac{1}{4}$ mile S. W. of Alleghany, Sierra county, at an elevation of 3,500 to 4,400'. As the result of litigation between the Sixteen to One and Twenty-One companies, by which the former was awarded \$93,000 in Oct., 1919, the Twenty-One claims were acquired for \$60,000, thus partly defraying the judgment.

Geology: the Sixteen to One vein is in amphibolite, the pay ore occurring in a shoot, 80' long and going down 100' on the dip. In the Twenty-One group a quartz vein in talcose schist carries free gold with arsenopyrite. The Tightner, a second vein has walls of schist pinching at times and showing quartz with secondary pyrite.

Development: in the Sixteen to One-by 2 tunnels, one 1,025' long, below which is a winze sunk 325' on dip of vein. Tunnels are connected by 3 raises.

In the Twenty-One-by an old 165' shaft, and 2,000' crosscut and tunnel on the Tightner vein, gaining 900' of backs. Three shoots were opened, namely (1), 120' long, 2' wide, and \$7 per ton; (2) 240' by 3 $\frac{1}{2}$ ' and \$10; and (3) 300' by 4' and \$11.

Extensions in 1920, totaled 1,100'.

Equipment: electric power, 2 compressors, hoist, shops, store, dwellings, crusher and pan-amalgamator on the Sixteen to One, and 10 stamps, Lane mill, and vanners at the Twenty-One.

Production: no official figures obtainable, but estimated to be from \$150,000 to \$300,000 from the Sixteen to One, and over \$100,000 from the Twenty-One.

Company was operating and producing during both 1919 and 1920.

ORO BELLE CONS. MINES CO.**CALIFORNIA**

Address: W. B. Andrews, 506 Texas State Bank Bldg., Fort Worth, Texas.

Officers: W. B. Andrews, pres.-treas.-mgr.; C. Wilson, sec.; with Thos. A. Merritt and Stella Andrews, directors.

Inc. 1916, in Nevada. Cap. \$1,250,000; \$1 par; 625,000 issued; 500,000 reported to have been given for the property. 1,000 shares issued to di-

rectors and incorporators and balance under option until Oct., 1918, to John Hays Hammond and associates, of New York.

Property: the Oro Belle mine and millsite, in Hart district, San Bernardino county, about 14 miles W. of Searchlight, Nev. **Ore:** mainly gold, occurs in two veins. On the 700' level the vein is said to be 6' wide and to show 4' of ore averaging \$8 per ton. The Woodward lode was cut on the 100' level, showing a width of 125' and giving assays of from \$5 to \$20.

Development: by 814' vertical main working shaft with levels at every 100' and a total of 2,700' of lateral work.

In 1915, the Oro Belle was under lease to the Tonopah Belmont Development Co., but option was relinquished within the year; mine idle at present.

ORO BELLE MINES CO. CALIFORNIA

Reorganized, 1917, as **Oro Belle Cons. Mines Co.**, which see. Stock exchanged on basis of 2 old shares for 1 of the new.

ORO FINO MINING CO. CALIFORNIA

Address Haines Gridley, East Auburn, Cal.

Officers: Allen Mason, pres.; Geo. H. Hyde, v. p.; Haines Gridley, sec.-treas.-mgr.

Inc. Aug. 29, 1913, in California. **Cap.** \$200,000; shares \$1 par; 196,865 outstanding. Annual meeting, 2nd Monday in March.

Dividends: started Dec. 20, 1916. Paid to 1917, \$11,722.

Property: the Bellevue and Bullion mines, 11 patented claims, 95 acres, in Ophir district, Placer county, 4 miles W. of Auburn. Shows a fissure vein, 1'-4' wide, running E.-W., with dip of 75°, between schist hanging-wall and granodiorite foot-wall. Ore is quartz with some sulphides, assaying \$7-\$10 per ton in gold and silver.

Development: by 800' vertical shaft, with a total of 10,800' underground workings. Management estimated 40,000 tons of ore blocked out, Jan., 1920.

Equipment: includes 50 h. p. electric hoist, compressor, 3 electric pumps, and 10-stamp mill, with concentrators. Mill started operating in Oct., 1915.

Production: gross to 1921, \$406,322.

OROVILLE DREDGING, LTD. CALIFORNIA

In liquidation. Property exhausted. See Vol. XIV for description.

For Colombian holdings acquired by Oroville Dredging Co. Ltd, a British corporation, see under Colombia, S. A.

PACIFIC CHANNEL CO. CALIFORNIA

Address: owner, J. E. Sexton, Palisade, Nev. **Mine address:** T. G. Patton, mgr., Pacific, via Placerville, Cal.

Property: 980 acres, in Eldorado county, opened by 700' tunnel and 150' drift on \$1 gravel. Was worked in 1920.

PACIFIC COAST GOLD MINES CORP. CALIFORNIA

Address: care W. J. Loring, 614 Crocker Bldg., San Francisco.

Mine address: Quartz, Tuolumne county, Calif.

Officers: W. J. Loring, pres. and mgr.; John F. Davis, v. p.; C. H. Beesley, sec.-treas., with M. E. Loring and J. S. Wallace, directors. Phil. Huber, supt.

Inc. Dec. 5, 1917, in California. **Cap.** \$1,500,000; par \$1.

Property: the Dutch mine, formerly owned by the Dutch Cons. Gold Mining Co. and Dutch Sweeney Mining Co., 70 acres, and the App, Heslep and Hitchcock groups. Claims are on the Mother Lode and carry gold values. On the Dutch claim the vein splits into 2 veins about 75' apart; the east vein is irregular, breaking up into stringers running in all directions, while the west vein is more regular. General course of veins is N. 35° W., with dip of 65° N. E. Both walls are of Calaveras slate.

Development: by inclined shafts. Main 2,250' working shaft is sunk on 65° incline, with levels to the 1,200' level at 100' intervals, remaining levels

at 150' intervals. On the 1,650' level the orebody has an average width of 16'. Raises and drifts total 30,000'.

Equipment: includes 150 h. p. double-drum electric hoist, one 450 cu. ft. and one 1,000 cu. ft. duplex air-compressor. Water is pumped from 1,000', level by a triplex pump. A 300-ton reduction plant, comprises gyratory crusher, ball mills and plate amalgamation, with concentration by flotation and tables.

Operated throughout 1919 and for 3 months in 1920.

PACIFIC GOLD DREDGING CO. CALIFORNIA

Operating company in this state for **Yukon Gold Co.**, which see.

PACIFIC GOLD MINING & MILLING CO. CALIFORNIA

Office: R. 535 Title Insurance Bldg., Los Angeles, Cal. **Mine office:** Mokelumne Hill, Calaveras Co., Calif.

Officers: Max Muller, pres.; P. O. Bin U. Nogales Ariz. W. H. Rocholl, v. p.; Walter Wessels, sec.-treas.; A. M. Howat, mgr.

Inc. August, 1917, in California. **Cap.** \$1,000,000; issued 995,000 shares. **Par** \$1; assessable. Annual meeting, February.

Property: 420 acres, 1 mile E. of Mokelumne Hill, Calaveras county, shows a quartz vein in diorite with a 315' shaft, 300' tunnel and 4,000' underground workings. Shoots vary from 6' to 20' wide 60' to 150' long, and average 0.30 oz. gold, trace silver, 5% iron pyrite. Mining is by square sets and shrinkage stopes. Ore reserves reported to be 30,000 tons. Concentrate is stated to assay 3½ ozs. gold per ton, extraction averaging 86.7%.

Equipment: includes 100-ton ball mill and concentrator, 30 h. p. hoist, electric compressor, etc. In 1918, company received \$40,908.40 from sale of concentrate. Ore treated 1917, 10,000 tons; 1918, 11,100 tons.

Idle during 1920.

PACIFIC MINES CORPORATION CALIFORNIA

Offices: 120 Broadway, New York. **Mine office:** Stagg, San Bernardino county, Calif.

Officers: J. N. Beckley, pres.; David I. Walsh, v. p.; J. H. Hobbs, sec.-treas.; Josiah Anstice, asst. sec. asst. treas.; with Jas. M. Curley, Col. Sir Henry Mill Pellatt and D. C. Mac Donald, directors.

Inc. 1910, in New York. **Cap.** \$1,000,000; shates \$5 par; reincorporated May 2, 1916, in Maine **Cap.**, \$1,000,000; shares \$1 par; 642,000 shares issued; 300,000 shares treasury stock offered to the public, 1916.

International Trust Co., Boston, and U. S. Corporation Co., New York, transfer agents; Federal Trust Co., Boston, and U. S. Corporation Co., New York, registrars. Company is a consolidation of the Bagdad Chase Gold Mining Co. and the Roosevelt Mining & Milling Co.

Dividends: to end of 1912, \$205,440. Last payment of 2% paid July, 1916.

Property: 15 claims, patented, about 300 acres, in Bullion Mountain district, 9 miles from Ludlow. Country rock is trachyte porphyry and quartz monzonite. Orebodies occur in a silicified breccia along an E.-W. fault line, and have an average dip of about 35° N. Ores carry malachite and oxide with a little chalcocite and average 1.5% copper, 1.56 oz. silver and 0.36 oz. gold per ton.

Development: by about 8,000' of workings, including three shafts, deepest 300' and several tunnels. **Ore reserves:** estimated at 100,000 tons of \$10 ore and 200,000 tons of \$5 ore, according to report of F. W. Royer.

Equipment: includes an 85 h. p. Union gas engine, 3 hoists and a 10-drill compressor. Company also owns the Ludlow and Southern 9-mile standard-gauge railroad, with 2 locomotives. A concentrator was finished in 1918.

Production: to end of 1915 is estimated at \$3,000,000. Production in 1914, 1915, and 1916 was about 100 tons a day. No production reported since. Probably idle.

PADDY PRIDE SILVER MINING CO.**CALIFORNIA****Address:** Bank Bldg., Tonopah, Nev. Mine at Shoshone, Inyo Co., Calif.**Officers:** E. Marks, pres.; Patrick Miles, v. p.; John T. Overbury, sec.-gen. mgr., Tonopah, Nev.**Inc.** 1920 in Nev. **Cap.** \$300,000; shares 20c. par; 750,000 issued; non-assessable.**Property:** the Oversight group of 5 claims, at Shoshone, Inyo county, 9 miles from Zabriskie, on the Tonopah & Tidewater R. R. Ore is reported to carry \$12 gold, 44 oz. silver and 50% lead.**Development:** by 2 tunnels, raises, winzes and drifts, said to have cut the veins at 300' depth.

Shipping late in 1921.

PATRIQUIN MINING CO.**CALIFORNIA****Address:** Louis and A. G. Patriquin, Parkfield, Calif.**Property:** Dawson quicksilver mine, near the King Quicksilver property, in Kings county, 14 miles E. of Parkfield. Under development since 1919. Ore is treated in 10-ton Scott furnace of the King company. The Patriquin mine in Monterey county has been idle several years. See description Vol. XIV.**PATTERSON MINING CO.****CALIFORNIA****Address:** 310 Sapsome St., San Francisco, Calif.**Officers:** H. L. Huston, pres.; R. F. Lewis, sec.**Inc.** 1920, in Calif. **Cap.** \$100,000; \$1 par.**Property:** 102 acres, 75 patented, in Tuttle town district, Tuolumne county.**Development:** by 502' tunnel and two shafts, 600 and 700' deep.**PENN-CALIFORNIA MINING CO.****CALIFORNIA****Address:** A. W. Hoge, gen. mgr., Nevada City, Calif.**Officers:** Chas. Walther, pres.; A. W. Hoge, v. p. W. H. Ketchum, 2nd v. p.**Property:** gold gravel mines, about 15 claims, 1,000 acres, including 2 miles of drift-gravel extensively worked from 1892 to 1900, when a large area was mined.**Development:** a 1,000' tunnel in granite was being driven early in 1920. Equipped with a 15-stamp mill.**PENN MINING CO.****CALIFORNIA****Offices:** 1713 Harris Trust Bldg., Chicago, Ill.; 727 Foster Bldg., Denver, Colo. **Mine office:** A. P. Busey, Jr., mgr., Campo Seco, Calaveras Co., California.**Officers:** Chas. Loughridge, pres.; Wm. D. McIlvaine, sec.-treas.; D. C. Smith, supt.**Inc.** June 1, 1910, in Wyoming, as successor of Penn Chemical Works. **Cap.** \$250,000; shares \$1 par. Is operated as a close corporation.**Property:** 4 patented claims and 2,200 acres patented agricultural land, giving 5,280' on lode, 4½ miles N. W. of Valley Springs terminus of S. P. R. R.**Geology:** veins run N. W. with 65° N. E. dip and consist of quartz, talcose schist and clay containing copper pyrite, with pyrite and a little gold, silver and zinc. The ore as smelted averages 5% copper, 23% iron, 5% zinc, and \$2.30 in gold and silver. Two veins 300' apart are worked, the easternmost 50' wide, with a 900' ore shoot 15' thick, the west vein with orebody 1,000' long averaging 25' wide.**Development:** by No. 3 shaft, 2,900' deep at 74° incline, with 11 levels, 150' apart; and No. 2 shaft, 750' deep. Total development 29,045'. In 1919 new work amounted to 5,395'.**Equipment:** includes 2 electric hoists with 1,500' and 2,500' capacity drums. The smelter has a 400-h. p. steam and electric plant, ice plant, pumping plant and air compressor, capacity 1,400 cu. ft., to supply the

mine and smelter. Crude petroleum is used and 43 gallons per ton of ore smelted is consumed.

Smelter: of 300-ton capacity, a quarter of a mile from the mine, has one converter, 8 McDougall roasters, two oil-fired 150-ton reverberatory furnaces, and 100-ton blast furnace. Some cement copper is produced from mine water.

The company experimented on the Thiogen process for elimination of sulphur, mainly on account of fume litigation. The smelter was in continuous operation for over 16 years, but was closed April 1920, for extensive repairs.

Production:

	Tons Ore Treated	Lbs. Refined Copper
1918.....	36,097	3,076,858
1917.....	35,653	3,235,286
1916.....	43,210	3,973,111
1915.....	42,365	3,152,071
1914.....	42,928	4,007,149
1913.....	50,427	4,467,982
1912.....	51,163	5,175,875

PHILADELPHIA EXPLORATION CO. CALIFORNIA

Office: Albert Burch, mgr., Crocker Bldg., San Francisco, Cal.

Officers: Harold Boericke, pres.; Gideon Boericke, v. p.; John Boericke, sec., C. A. Joy, supt.

Inc. Oct., 1916, in Delaware. Cap. \$100,000; increased to \$200,000; assessable. Is a close corporation with only 5 shareholders.

Property: 14 claims, 3 patented, 140 acres, including the Green Mountain mine, near Crescent Mills, Plumas county, and 11 miles N. of Keddie on the W. P. R. R. Mines have not produced since 1886. **Ore:** gold-bearing quartz veins in meta-andesite and rhyolite.

Development: by 600' shaft and 6,000' tunnel. Workings were unwatered and reopened, 1917, closed down in August, 1918, and reopened again in May, 1919.

Equipment: includes 50 h. p. electric hoist, compressor, 5 centrifugal pumps.

Probably inactive in 1920.

PHOENIX CONSOLIDATED MINES CO. CALIFORNIA

Probably defunct. See Volume XIV.

PINE CREEK TUNGSTEN MNG. CO. CALIFORNIA

Property: twenty miles from Bishop, Inyo county, at an altitude of 11,000'; operated by Cooper Shapley, James Seager, Fred Close, and associates. Said to have 200,000 tons of ore that will average 1.34% tungstic oxide.

In 1918 a 200-ton mill was built, also a 2,200' gravity tramway between the mine and mill. Closed down since 1919 to await better market.

PIONEER CHIEF GOLD MINING CO. CALIFORNIA

Company defunct. Fully described in Vol. XIV. **Address:** J. E. King, Box 64, San Andreas, Calif.

Property: Pioneer mine, 2 miles south of San Andreas, Calaveras county, is owned by Jos. Tilden and wife, and is under bond to J. E. King.

PITTSBURGH & MOUNT SHASTA GOLD M. & M. CO. CALIF.

Office: 516 Federal St., Pittsburgh, Pa. **Mine office:** Emil Jonson, mgr., Keswick, Shasta Co., Cal.; also D. A. McCormick, supt., Black Hawk mine, Randsburg, Calif.

Officers: J. J. Schneider, pres., Buffalo, N. Y.; R. Schmitt, v. p.; T. V. Scott, sec.-treas.; with E. G. Lang, J. S. Phillips, H. B. Haffner, R. W. Medick, G. E. Meyer, Frederick Reineke, J. P. Jayne, G. H. Clapp and H. C. Steul, directors.

Inc. 1903, in West Virginia. **Cap.** \$2,500,000; increased 1921 to \$5,000,000; \$1 par; 4,528,450 shares issued. Bonded debt; \$200,000 authorized 6% first mortgage notes, due May 23, 1923; \$109,150 outstanding. Interest payable semi-annually. A 25% stock dividend was distributed May 25, 1921. Real Estate Sav. & Tr. Co., Pittsburgh, transfer agent; Dollar Sav. & Tr. Co., Pittsburgh, registrar.

Property: (A) the Bennington group, 10 patented claims, 175 acres, in Flat Creek district, Shasta county, N. of Redding, said to have been bought for \$18,000 cash and \$60,000 shares, also 20 patented claims, 1 mile from the Bennington, known as the Alleghany group. (B) the Black Hawk mine, 130 acres, in Rand district, Kern county, 2½ miles S. W. of Johannesburg, purchased in 1921.

Development: several thousand feet of underground work. A 4,400' main tunnel and 2 other tunnels show a vein of gold and silver-bearing copper ore of varying tenor. A new double compartment shaft was down 521' by January, 1921. On the Black Hawk, diamond drilling was in progress, fall of 1921.

Equipment: includes 15-stamp mill, boarding house, etc., with electric power. At Black Hawk, the 10-stamp mill of the Baltic mine is under lease, pending remodelling of own mill.

PITTSBURG GOLD FLAT MINES

CALIFORNIA

Address: Bert Schlesinger, 1225—1st Natl. Bank Bldg., San Francisco.
Inc. 1912. **Cap.** \$1,000,000.

Property: 4 claims, 106 acres, in Nevada county, located in 1851, 1½ miles S. of Nevada City, has a production record of over \$1,500,000 in gold. The vein which is in diabase is much faulted, and has irregular pay shoots 15" wide, averaging \$8.

Development: by 1,625' shaft and several thousand feet of drifts, including one of 1,500' on 1,300' level. The Gold Flat-Potosi vein, 1,000' W. of the Pittsburg, has been developed by 300' and 400' shafts.

Equipment: hoist of 2,500' capacity, 850 cu. ft. compressor, Cornish pump, complete 20-stamp mill, etc. Idle.

PITTSBURG LIBERTY MINE

CALIFORNIA

Address: A. G. Cook, Masonic, Mono county, Cal.

Property: purchased at receivers' sale in 1914 for \$20,000 by the Stall Bros., was formerly owned by the Pittsburg Liberty Mining Co. In April, 1920, A. G. Cook acquired the property from P. J. Conway of Reno, Nevada for \$32,500. The mine, near Masonic was located in 1902 and started shipping to Selby smelter in 1907, it was operated until 1910 with a reported production of \$600,000; idle until 1915 when work was resumed.

Geology: ore, which carries gold, is found in 5 veins occurring in metamorphic schist, quartzite, slate and intrusive granite. Veins strike N. 25° W. and dip to the east.

Development: by 172' shaft and 2 adits, cutting the vein at 271' and 413' depth.

Equipment: includes 100-h. p. gasoline engine, and the 60-ton Pittsburg-Liberty mill which was remodeled and equipped with cyanide plant and tubemill in 1915.

Reported, November, 1921, that mine had been leased to H. C. Barnes et al.

PITTSBURG-SILVER PEAK GOLD MINING CO.

CALIFORNIA

Out of business. See Vol. XIV.

PIUTE MINE

CALIFORNIA

Controlled by R. W. Crampton, mgr., Santa Monica, Cal.; Geo Z. Smith, and F. A. Crampton, supt., Santa Monica.

Property: 13 claims, 260 acres, in Bullion district, near Cima, San Bernardino county, shows lead-silver-gold-platinum ore in limestone-granite contact deposits. Assays said to run 26% lead, 3.2 oz. silver, .05 oz. gold and 0.6 oz. platinum.

Development: 200' shaft, 800' of tunneling, with 1,000' of workings.

Equipment: includes a hoist and compressor.

Production: in 1917, 1,000 lb. copper, and 306,000 lb. lead; none in 1918; developing in 1919.

Management planned developing to 400' level and building a mill, in 1919.

PLACER CHROME CO.

CALIFORNIA

Address: R. H. Farmer, gen. mgr., Newcastle, Calif. W. P. Netherton, treas. (Santa Cruz, Calif.), and Stanley Swanton are interested.

Property: 950 acres in fee and about 6,200 acres under lease in Eldorado county,, 8 miles S. E of Newcastle. Chrome ore occurs as lenticular bodies in serpentine, developed by small tunnels, shafts, etc., ore averaging 35% chromic acid is shipped direct, all other going to mill.

Equipment: includes a 1,890' gravity tram and 100-ton concentrating plant. Was producing in 1920.

PLUMAS COPPER KING MINES CO.

CALIFORNIA

Address: 206 Mills Bldg., San Franciscoc. M. H. McKelvey, supt., Engelmine, Calif.

Inc. 1920. **Cap.** \$1,000,000.

Property: 19 claims, adjoining the Superior mine of the Engels company on the south, in Plumas county. Grab samples from the outcrop said to have assayed 1% copper, 3.9 oz. silver and \$2.06 gold per ton. The deposit is a gossan capped quartz vein in granite, 3,000' long on surface. A tunnel is being driven to cut the vein at a depth of 1,000'.

PLUMAS EUREKA CORPORATION

CALIFORNIA

Office: 53 State St., Boston, Mass.

Mine address: Johnsville, Plumas Co., Calif.

Inc. 1916, in Mass. **Cap.** \$50,000; \$100 par.

Property: the Plumas Eureka mine, 2,500 acres, at an elevation of 5,500', in Johnsville district, Plumas county, 8 miles W. of Blairsden. Mine operated since 1857, is credited with disbursement of over \$17,000,000 in dividends, under former ownership. Originally worked by Sierra Buttes Co., property was acquired in 1897 by Johnson Graham M. Co. and in 1909 by Plumas Eureka M. Co. This company filed a voluntary petition in bankruptcy, August, 1915 and was reorganized in 1916 as Plumas Eureka Corporation. Company was producing in 1919 and remained active to March 1, 1920. The property was to be reopened in 1921 by new interests.

PLUMAS GOLD MINING CO.

CALIFORNIA

Address: R. N. Costar, Seneca, Plumas Co., Calif., or c/o Karl Singer Ames Bldg., Boston, Mass.

Development: by 800' tunnel and 40' raise into gravel.

Property: 160 acres, patented, covering $\frac{3}{4}$ mile along a lava capped gravel channel on W. bank of N. fork of Feather river, 3 miles S. of Seneca, Plumas county.

Production: about \$170,000 to end of 1914. A few men are employed in exploration.

PLYMOUTH CONSOLIDATED GOLD MINES, LTD. CALIFORNIA

Offices: 614 Crocker Bldg., San Francisco, Calif.; 20 Cophall Ave., London, E. C., Eng. **Mine office:** Plymouth, Amador county, Cal. Gen. mgr., Bewick, Moreing & Co., 62 London Wall, London, E. C., Eng.

Officers: C. Wanklyn, chairman; C. A. Moreing, W. J. Loring, John Barry, J. P. and David Richards, directors. F. A. Crew, sec.

Inc. Jan. 15, 1914, in England. **Cap.** £240,000; £1 par; all issued. 127,000 shares are owned by the California Exploration Co., Ltd.

In 1919, the revenue was £148,666, of which £24,426 was profit, plus £41,594, brought forward. Dividends amounted to £13,157. In 1920, the revenue was £124,740, of which £2,358 was profit. Dividends amounted to £12,000.

Dividends: 15% in 1915 and 1916; 10% in 1917, 1918, 1919 and 1920.

Property: the Plymouth Consolidated group of 13 patented claims and a tract of agricultural land, about 500 acres, at Plymouth, Amador county. Up to 1911, when reopened by the California Exploration company, the mine had been closed for 24 years. Unwatering was completed in 1914, and a little work exposed 110,000 tons of \$6.35 ore.

Geology: the holdings cover 4,800' along the Mother Lode, showing 3 fissure veins in Mariposa slate. The veins run N. S., and dip 65° E. Ore contains free gold and iron pyrite in shoots that are 6' to 30' wide and from 150' to 300' long. It averages 0.30 oz. gold and 0.14 oz. silver per ton. Owing to these shoots, the workings cut poor areas underlain by shoots of enriched quartz. At 1,600' in depth the vein was poor, but payable downward to 2,450', then again poor and unpayable from 2,450' to 3,050', where 10' of \$10 ore was cut. This widened to 12' of \$20 ore in a distance of 103'.

Examined by Albert Burch, W. J. Loring, Malcolm MacLaren, O. H. Hershey, and F. C. Merritt.

Development: by shaft, vertical to 1,600', after which on 55° incline to a total depth of 3,225', with a winze below bottom level. The shaft is to be sunk to 3,650'. New work in 1920 amounted to 6,723', including 300' of shaft-work.

Equipment: includes 500 h. p. electric hoist, 1,800 cu. ft., and 900 cu. ft. compressors, a 40-stamp 400-ton mill for amalgamation and concentration of ores, which makes a 90% extraction. The mill is equipped with No. 5 Gates gyratory crusher, 2 Hardinge mills, classifiers, tables and 42 vanners. A regrinding plant for the tailings recovered 25¢. per ton at an added operating cost of 7cts. per ton. The concentrates average \$130 per ton, and the tailings average 70 cts. per ton.

Production:

Year	Tons	Gold, oz.	Silver, oz.	Value	Cost per ton
1920.....	91,350	28,294	6,556	\$487,106	\$4.90
1919.....	119,200	34,527	7,940	713,000	4.41
1918.....	125,300	33,382	8,530	698,315	3.75
1917.....	127,750	675,360	3.83
1916.....	125,000	32,693	8,016	681,150
1915.....	129,500	31,193	8,652	646,490
1914.....	44,775	11,132

The property is an old mine, dormant for 24 years, but made into a successful producer through the able judgment and operating ability shown by W. J. Loring.

POCAHONTAS MINING CO.

CALIFORNIA

Probably idle. See Vol. XIV.

POKER FLAT GOLD GRAVEL MINING CO.

CALIFORNIA

Address: Geo. Gray, sec., 110 Market St., San Francisco.

Property: 120 acres, in Poker Flat district, Sierra county, covering 2,000' of a Neocene channel, capped with lava, opened by a 505' shaft and 300' incline below it.

PRUDENTIAL GOLD MINING CO.

CALIFORNIA

Address: G. W. Root, 2239 Atherton St., Berkeley, Calif.

Property: patented land, 4 miles S. of Grass Valley, Nevada county, worked intermittently for many years.

QUAKER HILL MINES CO.

CALIFORNIA

Defunct. Address: 42 Broadway, New York City.

Inc. Oct. 10, 1918, in Delaware. Cap. \$4,000,000. Bonds, \$150,000 6%.

Property: 12 miles E. of Nevada City, Calif., sold to satisfy mortgage on property.

- QUEEN MINE** **CALIFORNIA**
Address: G. H. Hamstadt, owner, 453 S. Rugby St., Huntington Park, Los Angeles, Calif. W. W. Wishon, engr., Searchlight, Nev.
- Property:** 9 claims, 150 acres, in New York mountains, near Barnwall, San Bernardino county, said to show gold-silver ores in fissure veins in monzonite at or near limestone contact.
- Development:** by 1,250' of workings. Recent work in No. 3, or lower, tunnel shows ore carrying 3% copper with one ounce silver per ton across the entire face of the drift. Assessment work only since 1917.
- QUICKSILVER INVESTMENT CO. INC. (THE)** **CALIFORNIA**
 See **New Almaden Quicksilver Mines Corp.** and Vol. XIV.
- QUICKSILVER MINING CO.** **CALIFORNIA**
 See **New Almaden Quicksilver Mines Corp.**, and Vol. XIV.
- QUINBY MINING CO.** **CALIFORNIA**
 Idle for years. Probably out of business. See Vol. XIV.
- RAND DIVIDE MINING CO.** **CALIFORNIA**
 Now the **California Rand Silver Mines**, which see.
- RAND MINERALS CO.** **CALIFORNIA**
 Probably idle, if not dead. See Vol. XIII.
- RANDBURG SILVER MINING CO.** **CALIFORNIA**
 Randsburg, Kern county, California.
Property: the Coyote claim, adjoins the Kelly bonanza mine in San Bernardino county, and was bought for 255,000 shares from J. W. Kelly, John C. Wray, Harry Alderson and E. L. Blanck.
- REDWOOD COPPER QUEEN MINING CO.** **CALIFORNIA**
 Idle. **Last address:** Room 525 No. 519 California St., San Francisco.
 E. R. Leach, pres.; Thos Mellersh, sec.-treas., at last accounts.
- Property:** 840 acres, patented in Mendocino county, 25 miles from Cloverdale, the nearest rail point. Veins much broken by faults prominent on surface, have a 2' to 4' gossan capping, are traceable for a mile. Country rocks are brecciated porphyry and sandstone. Ores contain cuprite, melaconite, malachite, azurite, chalcopyrite, and tetrahedrite.
- Mineralized zone is 300' long, 10 to 40' wide, 125' deep, carrying kidneys and lenses of sulphide ore with as much as 8-9% copper and small gold-silver values. High sulphur content and absence of arsenic said to make ore desirable for manufacture of sulphuric acid. No recent information obtainable.
- REINMILLER COPPER MINES CO.** **CALIFORNIA**
Address: John Reinmiller, Engelmine, Calif. C. N. Miller, fiscal agent.
 617 Pacific Bldg., San Francisco.
Officers: John Reinmiller, pres.; N. H. Wright, v. p.; M. E. Bannon, sec.-treas., with J. F. Cowan and N. Cooper, directors.
 Inc. 1920, in California. **Cap.** \$2,000,000.
- Property:** 56 claims adjoining the Engels mine in Plumas county. The main vein is said to be 11' wide on the surface, assaying 4½% copper, \$1.50 silver, and \$1 gold per ton. A 65' shaft opened 6% ore and diamond drill work has developed four orebodies.
- Development:** by shallow shafts and tunnels. A 5½ by 7' tunnel is being driven to cut the vein at a depth of 400' below the 65' shaft.
- Equipment:** steam power, compressor, dwellings, etc.
- REWARD GOLD MINES CO.** **CALIFORNIA**
Address: Manzanar, Inyo Co., Calif.
 Described in Vol. XIII. Property now owned by **Crown-Reserve Mng. Co.**, of Ontario.
- RICHARDS KLONDIKE MINING CO.** **CALIFORNIA**
Address: 56 Bacon Bldg., Oakland, California.
Officers: O. E. Bozio, pres.; Howard J. Pensol, sec.

Inc. 1920, in California. Cap. \$25,000; 25c. par.

Property: 120 acres in Plumas county. A prospect.

RISING SUN CONSOLIDATED MINES CO. CALIFORNIA

Address: E. C. Klinker, supt., Colfax, Calif., or c/o Meredith & Landis, Auburn, Calif.

Inc. 1920, in Calif. Cap. \$250,000.

Property: 40 acres, including the Rising Sun mine, 1 mile N. W. of Colfax, in Placer county. Mine has produced over \$1,000,000 in gold from a gold quartz vein in diabase, 6 to 36" wide.

Development: by a 900' 3 compartment shaft with 4' of ore reported cut on No. 6, 7, 8 and 9 levels.

Equipment: 10-stamp mill, hoist, compressor, etc., installed in 1920. Twenty men employed. The mill was operated only during 5 months in 1920, as ore on upper levels became exhausted.

ROCKY POINT CONS. MINES CO. CALIFORNIA

See Bishop Creek Milling Co., also Vol. XIII and XIV.

ROSE QUARTZ MINING CO. CALIFORNIA

Property: 9 claims, 180 acres, including the Kelly mine, 1½ miles E. of Eclipse, and 24 miles N. W. of Quincy, Plumas county. Two quartz veins that accompany a porphyry dike in slate, carry free gold and auriferous arsenopyrite. No. 1 averages \$9, and No. 2, where 15' wide, \$4.80 per ton.

Equipment: includes 5-stamp mill, and a 1,500' aerial tram, being built to connect the tunnel and mill.

ROUND LAKE MINING CO. CALIFORNIA

Address: F. J. Mott, sec., Insurance Exchange Bldg., San Francisco.

Property: 2 claims, 40 acres, 12 miles S. of Blairsden on W. P. R. R., Plumas county, at elevation of 6,500'. Quartz vein carries free gold and 1% pyrite, but no ore has been mined, though a 300' shaft has been sunk on the vein, and two 50' shoots opened. A 5-stamp mill was erected in 1915.

ROUND VALLEY TUNGSTEN CO. CALIFORNIA

Address: H. C. Miller, supt., Round Valley, via Bishop, Inyo Co., Calif. D. S. Pancoast, treas., Pitman, N. J.

Inc. 1917, in Delaware. Cap. \$100,000.

Property: tungsten claims near Round Valley. The main orebody reported to be 90' long and from 25 to 35' thick, averaging 1% WO₃.

Development: by two main adits and shaft. Mining is by shrinkage stoping and glory-holing.

Equipment: the mill consists of crusher, shaking screen, Marcy mill, Callow cones. Overstrom and Deister-Overstrom tables. Concentrates are dried, sacked, and shipped East.

No production figures are available.

ROXBURY GOLD MINES, INC. CALIFORNIA

Office: 84 Savin St., Boston, Mass. Mine address: Scott Bar, Siskiyou county, Cal.

Inc. 1919, in Delaware. Cap. \$750,000.

Property: placer claims near Scott Bar. In Aug., 1919, company applied to State Water Commission for permission to divert water from Canyon and Kelsey creeks for hydaulicking. The present supply is only enough for two giants for about 4 months each year.

ROYAL GOLD MINES CO. CALIFORNIA

Acquired by Stockholders' Mining Co., which see.

RUBY COPPER CO. CALIFORNIA

Office: 717 Kohl Bldg., San Francisco, Calif. Mine address: J. L. Williams, supt., Engelmene, Plumas Co., Calif.

Officers: Thos. J. Barbour, pres.; Andrew Falconer, sec.

Inc. 1919, in Calif. Cap. \$600,000; \$1 par.

Property: 19 claims. 2 miles S. W. of the Engels mine and 1 mile from the Indian Valley Railroad, said to show 60' of 4% ore. A rich streak, 3

to 12" wide, has been opened during the past year, by a 500' tunnel. In Oct., 1920, the 15-ton mill was producing daily about 1,000 lb. of 44% copper concentrate, high in precious metals.

RUBY COPPER MINING CO.**CALIFORNIA**

Probably idle. See Vol. XIV.

RUBY KING COPPER CO.**CALIFORNIA**

Property: 6 patented claims, near Ladoga, Colusa county, developed by 1,200' shaft and 1,000' tunnel. Ore is iron oxide containing a small percentage of cinnabar. Although generally known as a copper mine, no copper ore has as yet been discovered and property is operated as a red ochre mine, by the Ruby King Mineral Paint Co., 1027 Eighth St. Sacramento, California.

Production: 500 tons in 1914. No recent returns.**RUBY SILVER MINING CO.****CALIFORNIA****Address:** C. C. Waring, Santa Monica, Cal.

Officers: F. A. Crampton, pres.-mgr.; C. C. Waring, sec.-treas.; J. R. Comerford, v. p.-supt. Company is a close corporation.

Property: 3 groups of claims near Cima, San Bernardino county, the Ruby Silver, 1 claim, Navajo group, 6 claims, 123 acres; Ruth mine, 7 claims, 132 acres; covering contact deposits 2 to 10' wide in limestone and granite. Examined by J. Nelson Nevius, A. H. Black, O. B. Suhr, and A. W. Clark.

Development: Ruby Silver mine has 250' tunnel and 500' workings, from which 40 tons lead-silver ore were shipped in 1917; Navajo group, 800' of workings, produced 120 tons copper ore up to 1918; Ruth mine, 210' shaft, and 2,000' of workings, produced 560 tons of lead ore to 1918, and is said to have 1,800 tons blocked out of 32% lead ore with some platinum.

Idle since 1918 due to the war, but management stated that development work would be done in 1922 and a mill erected.

SACRAMENTO VALLEY COPPER CO.**CALIFORNIA**

Probably dead. Letters returned in Dec., 1920. See Vol. XIV.

SAGAMORE MINES CO.**CALIFORNIA**

Probably defunct, like its two predecessors of similar name. See Vol. XIV.

SAINT JOHNS MINES CO.**CALIFORNIA**

Address: Clifford G. Dennis, c/o F. W. Bradley, 1022 Crocker Bldg., San Francisco. **Mine address:** Vallejo, California.

Inc. May, 1914, in California. **Cap.** \$150,000; \$1 par; outstanding \$90,000. **Transfer office:** 1022 Crocker Bldg., San Francisco. **Annual meeting,** first Monday in February.

Condensed balance sheet for 1918 shows; assets, \$102,131. Liabilities include: capital stock, \$90,000; surplus, \$10,293; other liabilities, \$1,838. Gross earnings, in 1918 were \$57,125, with operating expenses of \$57,198.

Property: 713 acres on Soscol ranch, 6 miles N. E. of Vallejo, Solano county is said to show cinnabar ore occurring in bunches in sandstone and shale over a width of 2' to 30'. Examined 1916 by O. H. Hershey.

Development: by 320' shaft and tunnels; greatest depth of workings, 320'. Management reports 12,000 tons ore blocked out, average assay 0.27% quicksilver.

Equipment: includes a 25-h. p. gasoline hoist, two 7½-ton Neate and one 15-ton Scott furnace, capacity 30 tons daily and a 25 h. p. oil engine with 15 k. w. generator.

Production: 1920, 151 flasks at cost of \$123 compared with 228 in 1919, at \$112 per flask, 513 in 1918 at \$102, 495 in 1917 at \$88 and 675 in 1916 at \$62.11 per flask.

SALT LAKE-CALIFORNIA COPPER CO.**CALIFORNIA**

Inactive. See Vol. XIII.

SANTA ROSA MINING CO.**CALIFORNIA****Mine address:** Lee, Inyo Co., California.**Address:** 2200 Broadway, Santa Rosa, California.**Officers:** H. C. Brougher, pres.; B. F. Edwards, sec.

Inc. 1914, in Calif. Cap. \$1,500,000; par \$1.

Subsidiary of West End Cons. Mining Co. of Nevada, which is reported to own 350,000 shares.

Property: the Santa Rosa lead-silver mine, 378 acres, in the Lee district, Inyo county, E. of Serro Gordo and 26 miles from Keeler, said to show ore in veins along the contacts of limestone intruded by porphyry dikes. There are two systems of veins whose average width is 4'. The fine outcrops would indicate a high degree of mineralization, but the orebodies are apparently superficial.

Development: shallow shafts and tunnels said to show that rich ore was in all cases found close to the surface. The mine was reopened in 1916 after having been idle for several years. Was operated in 1920 in a small way by company and lessees.

Production: to 1920, \$500,000 of silver, lead, copper ore.

SARITA MINES CO.

CALIFORNIA

Probably idle. No recent returns.

Address: F. W. and G. E. Stall, mgr.; Masonic, Mono county, Cal. Not a share corporation.

Property: mine near Masonic, said to show a quartz vein in porphyry, dipping 45° W. and pitching W. Orebody is from 4' to 20' wide and shoots are from 50' to 200' long. Ore said to contain gold and silver, worth \$20 per ton.

Development: by 700' tunnel to 200' depth.

Equipment: electric power, aerial tram, and 75-ton cyanide plant. Concentrate assayed \$500 per ton; extraction was 90%.

SELBY SMELTING & LEAD CO.

CALIFORNIA

See Selby Smelting Works.

SELBY SMELTING WORKS

CALIFORNIA

Formerly Selby Smelting & Lead Co., described in Vol. XIII. In 1918 American Smelters Securities Co. assumed all assets and liabilities of that company and property is now known as Selby Smelting Works.

Office: Merchants' Exchange Bldg., San Francisco, Cal. **Works office:** Selby, Contra Costa county, Calif. F. S. Holbrook, asst. mgr.

Officers: Eugene B. Braden, gen. mgr.; C. A. Thomas, mgr.

The smelter at Selby, on San Pablo Bay, near Carquinez Strait, receives ore by rail and water, from all the Pacific states, principally from Idaho and Nevada. The works include a 400-ton smelter having lead stacks, a refinery for parting gold and silver, a plant for the manufacture of bluestone, a shot tower and sheet lead rolls. At San Francisco a plant is operated for the manufacture of pipe, lead traps and mixed metals.

Equipment: includes steam, electric and air power. The plant includes a bag house, and also a special chamber having the Cottrell process for precipitating solids from fumes, before passing to the main stacks.

SENECA CONSOLIDATED GOLD MINING CO.

CALIFORNIA

Address: J. J. Reilly, mgr., Seneca, Plumas Co., Calif.

Officers: J. J. Reilly, pres.; Edward R. Salinsky, sec.

Inc. in Ariz. Cap. \$1,000,000; \$1 par.

Property: 110 acres, including the White Lily mine, ½ mile above Seneca on North Fork Feather River, shows a quartz vein in schist and slate, near its contact with altered meta-andesite and diorite.

Development: by tunnel. **Equipment:** a 10-stamp mill and water power. Gold output to 1918 is \$225,000.

Was a good producer in 1920. Prospects are considered good.

SHASTA BELMONT MINING CO.

CALIFORNIA

Office: Carson City, Nev. **Mine office:** Winthrop, Shasta county, Cal.

Officers: Will E. Casson, pres.; W. Brougner, v. p.; Jas T. Davis, sec-treas., with S. L. Lee, and W. H. Cavell, directors.

Cap. \$1,000,000; shares \$1 par; 730,000 issued, and 50,000 offered at 25c each in Dec., 1916.

Property: the Graham group, 7 claims, 120 acres, in the Copper City district and in the west central part of the Shasta copper belt. The group is about 3 miles east of the Bully Hill mine and smelter, and 8 miles from the Mammoth mine. The property is said to have a surface outcrop resembling that of the Bully Hill mine.

Development: by a 75' shaft, 4 short tunnels and several opencuts, all showing streaks and bunches of high-grade copper ore. Company made one small shipment of ore to the Mammoth smelter, which ran 7.21% copper and about 4 oz. silver. No report since 1917.

SHASTA COPPER EXPLORATION CO. CALIFORNIA

Address: 433 Holbrook Bldg., San Francisco, Calif., or Redding, Shasta Co., Cal. M. E. Dittmar, mgr.; Chas. Wheelock, supt.

Officers: O. Scribner, pres.; M. B. Downing, sec.

Inc. 1907, in Calif. Cap. \$100,000; par \$1.

Property: about 650 acres, lying between the Balaklala and Iron Mountain mines, near Kennett, is developed by 8 tunnels, of about 3,000' aggregate length. No. 7 tunnel cut 3 small stringers of copper ore. Company did a large amount of exploration and development work, 1915.

Company involved in litigation with the U. S. S. R. & M. Co. (Mammoth) concerning ownership of mining claims.

SHASTA-KENNETT COPPER MINING CO. CALIFORNIA

Head office: 604 Mills Bldg., San Francisco, Calif.

Address: Kennett, Shasta Co., Calif.

Officers: Frank J. Blake, pres.; Kingsley W. Cannon, sec.-treas., 54 Sutter St., San Francisco, with H. B. Ward, M. B. Lindley and Carl Henrich, directors.

Inc. 1903, in Arizona. Cap. \$1,500,000; \$5 par.

Property: 80 acres, patented, adjoining the well-known Mammoth mine, in Shasta county, near Kennett.

Development: 1,200' of tunnel work, said to show medium grade copper ore.

SHASTA MAY BLOSSOM COPPER MNG. & SM. CO. CALIFORNIA

Office: 604 Mills Bldg., San Francisco, Cal. **Mine office:** Winthrop, Shasta Co., Cal.

Officers: C. M. Bradley, pres.; J. W. Marshall, v. p.; E. Seaberg, sec.; A. L. Scanlon, treas.; with F. M. Ayer, director.

Inc. 1903, in Arizona. as a reconstruction of the Shasta May Blossom M. & S. Co. Cap. \$3,000,000; \$1 par. Alphonse Sutter, transfer agent, Nevada Bank Bldg., San Francisco.

Property: the Keith group, 22 claims, about 300 acres, ½ mile N. of De La Mar, in the Pittsburgh or Copper City district, shows several deposits between granite porphyry and slate. The East outcrop said to be 30' wide and traceable for about 1,500', shows copper ore with gold and silver. The middle vein, 5' to 40' wide, traceable 1,900', and opened by tunnels with about 1,500' of workings, is said to show a considerable tonnage of chalcocyprite ore. The West vein, reported to be upwards of 100' in width, has a 100' shaft and 780' tunnel, showing ore assays 2 to 7% copper and \$2 to \$2,000 per ton in combined gold and silver. The mine as a whole, is reported to have about 4,000' of workings.

About \$60,000 spent on property in 1921, extending the lower tunnel and erecting new buildings.

Equipment: includes a hoist, air compressor, electric light and power station, and machine-shop.

SHASTA MONARCH MINING CO. CALIFORNIA

Last address: M. P. Fries & Co., 1635 Broadway, New York. **Mine office:** Kennett, California.

Property: 80 acres at Stella (Whiskeytown). Shasta county, has been worked for many years; credited with a production of \$127,000 from 1870-1912. There are 4 parallel veins, strike N. 50° W., dip 50° N., in alaskite-porphry near the contact with meta-andesite; pay shoot averages 18" in

width; ore is free milling. For geology, see U. S. G. S. Bull. 540, pp. 38, 39, 50, 51.

Development: by tunnels.

Equipment: includes a 10-stamp mill erected 1914. at which time 10 men were employed. No recent data.

SHASTA NATIONAL COPPER CO.

CALIFORNIA

Address: M. P. Fries & Co., 1635 Broadway, New York. **Mine office:** Kennett, Calif.

Officers: W. H. McEwen, pres.; M. P. Fries, v. p. and gen. mgr; Horatio Alling, sec.-treas., with S. S. Norton and A. Kennedy, directors.

Inc. in 1917. **Cap.** \$5,000,000; shares \$1 par. Company was organized to develop 1,000 acres of copper bearing land adjoining property of Mammoth Copper Co., Shasta Co. Reported in 1918 that the company had made final payment of \$40,000 on some of its claims. Mine shut down in December, 1919.

SHASTA ZINC & COPPER CO.

CALIFORNIA

Address: Walter Einstein, pres., 306 Hobart Bldg., San Francisco, Calif. J. C. Kinnear, gen. supt., Redding, Calif. J. C. Kinnear, cons. engr.; J. H. Ross, smelter supt.; D. C. Jackling, mng., director.

Inc. 1920, in Delaware. **Cap.** 200,000 shares. Bonds, \$600,000, 8%, 4 years, issued July, 1921. Equitable Trust Co., New York, transfer agent. Butte and Superior Mng. Co., a Jackling enterprise, owns 36,000 shares.

Property: the Bully Hill mine, reported bought in 1920 by D. C. Jackling and Hayden Stone & Co. for \$750,000 from the Bully Hill Mines, Inc. It comprises 450 acres 320 patented near De La Mar, Shasta county, including the Bully Hill, Rising Star, Rising Sun, and old Winthrop and Baxter groups, all in the eastern end of the copper belt. Owns 14-mile railway (Sacramento & Eastern), connecting with S. P. R. R. at Pitt station. Mine examined by A. H. Rogers.

Geology: ore occurs in nearly vertical N. E.-S. W. shear zones, or veins, in meta-rhyolite, varying from 4' to 400' and averaging 30'. Definite walls, if present, are post-mineral gouges; basalt forms the east wall. The ore forms irregular lenticular bodies that average 45' by 200' and are connected by narrow seams of ore. Ore is a complex mixture of sulphides carrying chalcopyrite with zinc and antimony and low gold-silver values.

Development: several tunnels, lowest No. 3 crosscutting the vein at 1,100' and 600' below the outcrop. A 950' shaft was sunk at this point with levels 100' apart, and all necessary connections for work and air. Work since 1918 by the Bully Hill company has been confined to the Rising Star mine.

The 400-ton smelter, idle since 1910, has been dismantled and moved to Winthrop. Some part was salvaged for use in erecting a 175-ton mill for the treatment of copper-zinc ore which carries gold and silver. Company has also constructed a 200-ton zinc oxide plant.

SHENANDOAH MINES CO.

CALIFORNIA

Probably dead. See Vol. XIII. and XIV.

SHIPSEY MINING CO.

CALIFORNIA

Formerly King Solomon Cons. Mines Co.

Office: 786 Pacific Electric Bldg., Los Angeles, Calif. **Mine address:** John Shipsey, Randsburg, Kern Co., Cal.

Inc. 1914, in Calif. **Cap.** \$500,000.

Property: King Solomon group of 7 claims, in the Rand district, Kern county, $\frac{3}{4}$ mile W. of Johannesburg, said to have yielded gold worth about \$2,000,000 in past 20 years, from depth of 520', with levels at 50' intervals. The vein is 3' wide with granite foot and porphyry hanging wall. Free-milling pay ore occurs in a 1,400' shoot. Equipped with 5-stamp concentration-amalgamation mill, and 20 h. p. hoist. Operated to end of 1919 by lessees, and by owners during 1920.

SIERRA ALASKA MINING CO. CALIFORNIA

Idle. Address: W. S. Schuyler, pres.-mgr., Pike City, Calif. Oliver Crook, sec.

Inc. Jan. 22, 1912, in California. Cap. \$2,000,000; \$1 par; changed in 1918 to \$200,000; \$1 par; all issued.

Property: 8 claims, 4 patented, and 2 patented homesteads, 480 acres, ½ mile N. of Pike, Sierra county. The mine was located in 1863, and bought by present owners in 1904.

Geology: the Alaska vein consists of calcite and quartz lenses, up to 16' across, in a wide lode in serpentine.

Development: by 900' three compartment shaft, with about 8,000' of workings, including a 1,300' drain tunnel at 120' depth.

Equipment: pumps, hoist of 1,500' capacity, 850 cu. ft. compressor, 40 stamps, Wilfley and Deister tables, etc.

Production: about \$1,000,000 from 100,000 tons of ore to 1918. No recent figures obtainable.

SIERRA BUTTES MINE CALIFORNIA

Address: E. A. and J. O. Hayes, owners, San Jose, Calif.

Property: the Sierra Buttes mine, 15 claims, 660 acres, with timber land, near Sierra City, Sierra county. When operated by the English company (which controlled the Plumas Eureka) from 1870 to 1905, the gold output was \$17,000,000.

Geology: the gold quartz veins lie between greenstone or serpentine, and quartz-porphry. The Ariel vein is from 6 to 20' wide, the Mammoth 300' long and 15 to 20' wide.

Development: by several miles of workings, No. 9 tunnel on the Sierra City road being 7,200' long.

Equipment: 40-stamp mill and cyanide plant, 10-drill compressor, and aerial tram.

Mine and mill were idle 1919 and 1920, but limited operations were in progress in 1921.

SIERRA GIBALTAR MINING CO. CALIFORNIA

Address: 347 Mills Bldg., San Francisco, Calif.

Officers: A. J. Schmidt, pres.; J. P. O'Brien, v. p.; H. C. Houghton, sec.

Inc. 1921, in Calif. Cap. \$250,000; 50c. par; all issued.

Property: a group of 7 patented placer claims in Sierra county.

SIERRA RANGE COPPER CO. CALIFORNIA

Address: A. L. Beardsley, pres., Sioux City, Iowa. Mine office: Genesee, Plumas Co., Calif.

Property: the Mountain Lion group of 4 claims, 80 acres, adjoining Gruss and Five Bears mines, 2 miles S. of Genesee, and 18 miles from Keddie on the W. P. R. R. There is one 5' vein, in meta-andesite, traceable for 1,100' on the surface. Ore is quartz carrying bornite, tetrahedrite, gold, and silver.

Development: by 750' tunnel. Assessment work only done for years.

SIERRA STANDARD MINING CO. CALIFORNIA

Address: J. S. Frye, pres., Downieville, Calif.

Property: 2 claims and fractions, 80 acres, 3 miles N. of Downieville, Sierra county, acquired in 1910, shows a 4' gold quartz vein near a serpentine-porphry contact. A cross-vein, stoped for 40' by 120', contains gold and arsenopyrite.

Development: by 1,000' of work in 6 short tunnels.

Equipment: water power under 125' head, compressor, and buildings.

SISKIYOU SYNDICATE CALIFORNIA

Address: I. J. Luce, pres., 618—2nd Ave., Seattle, Wash. Mine at Etna Mills, Calif.

Officers: I. M. Tetherow, v. p.; Alex. Parker, sec.; Jos. Stephens, treas.

Inc. 1909, in Washington. Cap. \$750,000; 25¢ par; \$700,000 outstanding.

Property: 3 groups of claims in southern section of Siskiyou county, said to show veins up to 3' in width. Developed by several tunnels, none over 300' in length.

SIXTEEN TO ONE MINE**CALIFORNIA**Described in Vol. XIV. See **Original Sixteen to One Mine, Inc.****SKIDOO MINES CO.****CALIFORNIA**

Company liquidated. Described in Vol. XIII.

SLATE RANGE MINERALS CO.**CALIFORNIA****Address:** L. D. Hirschfeld, mgr., P. O. Box 246, Bakersfield, Cal. T. A. Wells, pres.**Inc.** 1916, in Calif. **Cap.** \$50,000; \$1 par; all issued. Annual meeting in May.**Dividends:** Nineteen disbursements made to date; last dividend of 10% paid in 1918.**Property:** the Copper Queen group, 60 acres, patented, in Inyo county, 8 miles N. E. of Trona, shows lead carbonate ore. In 1920, high grade galena ore, carrying silver was reported opened on the lower level.**Equipment:** includes a 50-ton plant employing crusher, ball-mills, Overstrom concentrators, and K. & K flotation machines.**Production:** in 1918, 1,331,440 lb of lead, 1,786 oz. gold, 64,389 oz. silver, and 90,124 lb. copper, with gross receipts of \$142,822.

Active 1919 and 1920, and was second largest producer in the county in latter year.

SOUTHERN CALIFORNIA GOLD DREDGING CO. **CALIFORNIA**

A "frost", now defunct. For lurid statements, contained in prospectus of company, see Vol. XIV.

SOUTHERN EUREKA MINING CO.**CALIFORNIA****Address:** 411 Hyde Bldg., Spokane, Wash. or J. F. Wardlow, Greenville, Plumas Co., Calif.**Inc.** in Washington by George D. Needy, E. F. Yeager, M. A. DeHoff, Hal. J. Cole and H. R. Van Dreathen, all of Spokane, **Cap.** \$2,000,000.**Property:** the South Eureka, Hibernia, McClellan and Wardlaw mines, 12 claims, 450 acres, traversed by half a mile of the Crescent-Indian Valley and other lodes. 1½ miles S. of Greenville, thence 15 miles S. to Keddie on the W. P. R. R.**Development:** by 3 tunnels 160', 585', and 800' long, with drifts and stopping on a quartz vein, in a contact fissure between meta-rhyolite and diorite. In one tunnel the vein is 3' wide, assaying \$12.50 per ton.

Idle for a number of years.

SOUTH EUREKA MINING CO.**CALIFORNIA****Address:** 354 Pine St., San Francisco, Calif.**Officers:** H. Malloch, pres.; Edw. Fox, sec.**Inc.** in Calif. **Cap.** \$1,800,000; par \$5.

Company paid \$100,000 for Oneida mine, in Amador county, near Martell station on S. P., as good ore was discovered at north end of the property in 1920. Mine closed down for 15 years, except for short intervals. The Central Eureka keeps the mine unwatered. Described in Vol. XIII.

SOUTH FORK GOLD MINING CO.**CALIFORNIA****Idle. Address:** 530 Bradbury Bldg., Los Angeles, Calif.**Officers:** A. E. Pomeroy, pres.; E. E. Gardner, v. p.; Jas. H. Hurin, sec-treas., with E. S. Field, directors.**Inc.** 1873, in Calif. **Cap.** \$1,000,000; \$1 par; 727,738 issued, assessable. Annual meeting, June.**Property:** 10 claims, 700 acres, within the town of Forest, Sierra county, at elevation of 5,500', acquired in 1910, and bonded December, 1915, to Thomas Wilson of Manhattan, Nevada. Ground covers an ancient lava-capped channel, 1,100' wide, carrying gold.**Development:** by 5,500' of tunnel, raises and drifts. Work has not yet cut the old gravel channel, but did cross five quartz veins. Rich ore found

in shallow surface cuts on veins at each end of property. Property has electric power and full equipment.

SOUTH KEYSTONE CONS. MNG. CO. CALIFORNIA

Address: 408 Clunie Bldg., San Francisco, Calif.

Officers: William Virges, pres.; Frank F. Wood, sec.

Inc. 1916, in Calif. **Cap.** \$1,000,000; \$1 par; 213,000 shares issued.

Property: 4 patented gold claims between Amador City and Sutter Creek, Amador county.

Development: by 1,000' shaft, unwatered March, 1917, and exploration started in North Star claim. This is one of the old Californian mines being reopened under modern conditions.

SOUTH STAR GOLD MINES CO. CALIFORNIA

Address: Room 414, 57 Post St., San Francisco, Calif.

Mine address: M. A. Thorson, Grass Valley, Calif.

Officers: A. W. Johnson, pres.; Wm. Sewart Scott, sec.

Inc. 1919, in Calif. **Cap.** \$125,000; 25¢ par; 25,000 shares issued.

Property: 4 claims, 60 acres in the Rough and Ready district, Nevada county, 3 miles W. of Grass Valley. The main veins have been traced for 2,500' on the surface.

Development: by 100' shaft with 70' drift. Exploration resumed late in 1920. A 3' vein cut in 1920 at 105' depth shows free gold for 60'. Working 1921.

SOUTH YUBA MINING & DEVELOPMENT CO. CALIFORNIA

Address: c/o Kass-Hopkins Co., 1215 Hearst Bldg., San Francisco.

Inc. 1902, **Cap.** \$500,000.

A property with favorable indications, but idle for several years. Described in Vol. XIII.

SPENCE MINERAL CO. CALIFORNIA

Idle. Office: 528 Mills Bldg., San Francisco, Cal. Mine near Spenceville, Nevada Co., Calif.

Property: 2 patented claims and 2 mill sites in the Spenceville district, located in 1862. A deposit with chalcopryite and pyrite in a fissured zone, 50' wide, in altered diabase near contact with grano-diorite. Fifty feet of solid sulphide occurs in places. In 1900, 15 tons of pyrite were shipped daily.

Development: by 180' shaft and 3 levels. The mine was idle from 1906 to 1914. In 1915 the whole plant was burned. Lessees did some work in 1917.

STANDARD AMALGAMATED EXPLOR'N CORP. CALIFORNIA

Idle. Office: Gahm Bldg., Boston, Mass. Mine near Esmeralda, Calaveras county, Calif.

Officers: Frank E. Bramhall, pres.; W. F. Dwyer, v. p.; A. E. Reidel, sec.; H. H. Brown, treas., with Alfred Grover, E. Koessler, E. F. Curtis, Geo. Clark and J. L. Whitten, directors. Louis Robin, mgr.; Chas. Cuneo, supt., Esmeralda, Cal.

Inc. Jan. 2, 1909, in Nevada. **Cap.** \$1,587,000; shares, \$1 par; outstanding April 23, 1916, 1,264,223 shares.

Bonds: authorized and outstanding, \$40,000. Company is successor of a corporation of same name, but greater capitalization.

Property: the Economic mine, 2 patented claims, 36 acres, near Esmeralda, is said to have a steeply dipping 6' quartz vein in slate.

Development: by a 700' tunnel, with total workings of 5,000'.

Equipment: includes a 20-stamp mill, 100 h. p. compressor and electric power. Planned to build a cyanide plant in 1918, but nothing new reported.

STANDARD TUNGSTEN CO. CALIFORNIA

Address: H. W. Hellman Bldg., Los Angeles, Calif.

Ore reserves exhausted and property closed down, Nov., 1918. Plant has been dismantled and sold. Property was described in Vol. XIII.

STARR KING MINE, INC. CALIFORNIA

Idle. Office: 58 Sutter St., San Francisco, Cal.

Officers: R. C. Kennedy, pres.; M. J. Lindsay, v. p.; W. H. Young, sec.-treas.; John Watt and George I. Pressley, directors, George S. Dean, supt. Inc. Sept. 26, 1917, in California. Cap. \$150,000; \$1 par; 90,000 issued to Ronald C. Kennedy.

Property: Starr King and Sherman patented claims; American Gold 75 acres, includes claim, and two mill sites, situated in Sec. 15, Twp. 1 N. R. 16 E. M. D. M., also certain water-rights; all in Tuolumne county. Orebodies are said to average 3' in width of \$12 free-milling gold ore.

Development: consists of a 565' incline, with 5 levels; a total of 2,800' of work.

Equipment: electric hoist, compressor plant, 5-stamp mill and Wilfley table, electric transmission line, office and boarding-house.

Production: from 1886 to 1900 the mine was worked at irregular intervals by various owners, producing \$300,000. See Vol. XIV.

STEIFER MINING CO., P. B.

CALIFORNIA

Address: Oroville, Butte Co., Calif.

Operations resumed on property in 1921, but whether by company or not is not known. A power line was built and miners working to reach Mammoth gravel channel in Magalia ridge.

STOCKHOLDERS MINING CO.

CALIFORNIA

Probably out of business, as mail was returned unclaimed in May, 1920. See Vol. XIV.

STOCKWELL GOLD MINING SYNDICATE

CALIFORNIA

Address: E. E. Nichols, 246 Title Ins. Bldg., Los Angeles.

Officers: C. L. Mullholand, v. p., El Monte, Cal.; V. E. Stockwell, sec.; Harris Trenholm, supt., Trona, Cal.

Inc. Jan. 1920. Cap. \$1,000,000.

Property: 4 claims, in Inyo county, 8 miles N. E. of Trona, said to show a quartz vein in granite and porphyry. Ore contains gold and silver, assaying about \$15 per ton.

Development: by tunnels; total workings about 1,000'.

Equipment: includes a 25 h. p. hoist and a 35-ton cyanide mill.

Company was active in 1920.

SULPHUR BANK ASSOCIATION

CALIFORNIA

Address: 6 Beacon St., Boston, or 817 Crocker Bldg., San Francisco. H. W. Gould, gen. supt.; N. J. Martin, mine supt. Geo. T. Ruddock, owner, 433 California St., San Francisco. The Association is a copartnership.

Property: a lease and bond on the old Sulphur Bank mine on E. shore of Clear lake in Lake county, 10 miles N. of Lower Lake City. This notable mine, first worked for sulphur in 1865, is credited with an output of 92,400 flasks of quicksilver from 1873 to 1906, largely in first 10 years. The region was one of great volcanic activity. Cinnabar occurs in seams and impregnations, associated with silica, in decomposed and broken basalt.

Development: by numerous shafts and open cuts. In 1917, several hundred thousand tons of ore were at the surface. Heat and gases make underground work difficult.

Equipment: includes a concentrator, roasting furnace and two 12-pipe retort-blocks.

Property reported sold to New Idria Mng. Co. in October, 1921.

SULTANA GOLD MINING CO.

CALIFORNIA

Address: G. A. Nichols, 508 Crocker Bldg., San Francisco. Albert Chase, supt., Grass Valley, Calif.

Officers: J. E. Green, pres.; G. A. Nicholls, sec.

Inc. 1904, in Calif. Cap. \$1,000,000; \$1 par; issued 729,000. Annual meeting, January.

Dividends: \$3.602 in Aug., 1907. Total, \$14,409.

Property: the Bovee mine, 235 acres, 27 claims and fractions, 185 acres patented, 1½ miles S. E. of Grass Valley, adjoins the Empire on the S., and covers a number of veins of the Empire complex, a linked-vein system, all in diabase-porphry, save on the 1,750' level where one shaft entered grano-

diorite. The mines have yielded over \$1,500,000; the value since 1903 being \$750,000.

Development: by shafts 600', 965' and 1,750' deep, with winzes 1,100' and 1,250', respectively, below the first two, and several miles of workings. The mine was active throughout 1920, but no production figures are available.

Equipment: included 20-stamp mill, hoist and power house, destroyed by fire, July, 1921.

SUNNYSIDE COPPER CO.

CALIFORNIA

Idle and probably dead.

Mail returned from former address: Clyde Wardlow, Taylorsville, Plumas county, Cal.

Property: near the Engels mines. Development has been carried on for several years and machinery and buildings were erected in October, 1919.

SUTTER CREEK MINING CO.

CALIFORNIA

Probably dead. See Vol. XIII.

TABLE ROCK MINING CO.

CALIFORNIA

Address: 625 Market St., San Francisco. **Mine address:** Table Rock, Sierra county, Calif.

Officers: J. H. Hartley, pres. mgr., 2432 Webster St., Berkeley, Cal.; T. S. Elston, v. p.; W. W. Whitton, sec.-treas. with E. L. Oliver and Eula Sandow, directors. At last report.

Inc. Sept., 1915, in Nevada, Cap. \$500,000; \$1 par; issued 307,899 shares,

Property: 12 claims at Table Rock, Sierra county 14 miles from La Porte, Plumas county. An old gravel channel is being explored and developed. Management states that \$26,000 was spent on development in 1918 and \$1,500 monthly in 1919. Gravel is said to assay \$2 and over in gold per ton. Property is claimed to have produced \$3,000,000. In Oct. 1920, 20 men were employed, and coarse gold was being saved.

TECOPA CONSOLIDATED MINING CO.

CALIFORNIA

Address: L. D. Godshall, Tecopa, Calif.

Officers: Nelson Z. Graves, pres., 22 S. 3rd St., Philadelphia; L. D. Goodshall, v. p.; J. S. Sullivan, sec.

Inc. in No. Dakota, Cap. \$3,000,000; \$1 par.

Property: the Gunsite, Noonday, Columbia and War Eagle mines, 17 patented claims at Tecopa, Inyo county, has veins carrying lead, silver and gold, average assays being 12% lead, 9 oz. silver and 0.1 oz. gold per ton, and a little copper.

Development: by shafts, 300' to 400' deep, and by 2 tunnels, 1,500' and 4,000' long, cutting the vein at 1,000' depth.

Equipment: includes 100-ton concentrator.

Management states that ore sales in 1918 were \$232,426, and that dividends of \$30,000 were paid.

In 1920, shipments were 1,200 tons of ore monthly to the Murray smelter, until Dec. 1, when mine was closed to await better lead prices. The mill operated but a few months.

The Tecopa was the largest lead-silver producer in California, 1917-20.

TEDOC MINING CO.

CALIFORNIA

Address: 268 Market St., San Francisco, Cal. or W. A. T. Agard, supt., Red Bluff, Tehama county, Calif.

Owns chrome mines on Tedoc Mountain, 51 miles from Red Bluff, on Eureka road.

Closed on account of the chrome market.

THREE BUTTES & CONSUMNES COPPER MINES. CALIFORNIA

Address: S. L. Watkins and associates, owners, Grizzly Flats, Cal.

Property: 30 sq. miles in Eldorado county, Cal., said to be heavily mineralized, carrying gold, silver, copper, molybdenum, etc.

No news in several years.

THREE SEVENS MINING CO.

CALIFORNIA

Address: T. R. Pell, 524-5th Ave., New York, N. Y. John Mulsly Grass Valley, Calif.

Property: the Norambagua gold mine, 70 acres, 1¼ miles S. of the Allison Ranch mine, and 4 miles S. of Grass Valley, Nevada county. Mine produced \$1,000,000, prior to closing down 1868 to 1892, when it was reopened and worked intermittently by tributers until 1909. Present company reopened mine 1916-18, when work was stopped.

The vein is in granodiorite, and dips E. with quartz, averaging 5" in width, carrying fine gold and pyrite. The value varies between \$40 and \$100 per ton.

Development: by an old 567' incline, and by a crosscut adit with 250' shaft below it. South drift from bottom level exposed rich ore.

Company reported succeeded in 1919, by **Norambagua Consolidated.**

TIGHTNER MINES CO. CALIFORNIA

Address: Chas. Taylor, Main & Church Sts., Grass Valley, Calif.

Mine operated by Fred Searls, Jr., for Alleghany Mining Co.

Officers: J. M. O'Brien, pres.; Dr. C. P. Jones, v. p.; Chas. Taylor, sec.-treas.

Property: the Tightner mine, at an elevation of 4,000', under the town of Alleghany, Sierra county, 31 miles N. E. of Nevada City.

Geology: ore occurs in a fissure vein in much altered schist. Faulting is frequent, and shoots irregular. The average width is 3 to 5'. The strike is 45° N. and dip 30 to 55° E. Specimen ore found in poorly defined shoots supplies the main supply of gold. Arsenopyrite also carries free gold. Galena concentrate assayed \$100 per ton, and pyrite \$40 per ton.

Development: by 6,500' main tunnel. This tunnel cut rich ore, but a fault cut off the vein 413' below it. The vein is opened by a second tunnel for 200' in length, at 800' depth. A 340' winze was sunk below the main tunnel. Most of the rich ore came from 2 points, one S. of the winze and one 700' N. of it. In 1920, the Red Star vein was cut in the main tunnel, and rich ore was reported, and 2,600' of extensions made.

Equipment: complete with 20-stamp mill, having a monthly capacity of 2,700 tons. Up to 100 men are employed when in full working order.

Production: about \$2,000,000 to end of 1917. Small output since, until May, 1920, when mill started turning over.

TITANIC COPPER MOUNTAIN MNG. CO. CALIFORNIA

Fully described in Volume XIV. Presumably succeeded by Copper Mountain Mng. Co., which see.

TOLL GATE MINING CO. CALIFORNIA

Property: Port Arthur group, W. of Altaville, Calaveras county, developed by 100' shaft.

TRAIL CREEK MINING CO. CALIFORNIA

Idle. **Address:** Callahan, Calif., G. A. Foster, pres.-supt.; G. Hart, sec.

Property: 100 acres in Trail Creek, Siskiyou county, reached by trail from Callahan. A fissure vein occurring between schist walls, with dip 60° N. and course N. 40° W., is said to carry an ore shoot 300' long and 2' wide. Workings consist of 850' tunnel, drifts and a stope 200' long.

Equipment: includes two Huntington mills, run by water power, and several buildings. Owners claim 3,000 tons ore reserves. Production to July, 1915, \$40,000. No later report.

TRASK & COFFER MINING CO. CALIFORNIA

Address: L. L. Coffey, Taylorsville, Calif. Gerald P. Roman, supt. Inc. July 22, 1918, in Calif. Cap. \$100,000; \$1 par.

Property: the Beetle and Moonlight mines, 2 miles from the Engels mine and 1 mile from the Indian Valley R. R., in Plumas county.

Development: by 1,000' tunnel and drifts, said to have opened 4,000 or 5,000 tons of ore, containing 4% copper, 16 oz. silver and \$2 gold per ton. Another tunnel and a 100' shaft are to be opened.

Equipment: includes a 5-stamp concentrating mill, with tables and vanners; compressor, and electric power.

Concentrate was shipped to the Garfield smelter in 1920.

TREASURE MINING CO.**CALIFORNIA**

Office: 576 Mills Bldg., San Francisco. **Mine office:** Amador City, Cal.
Officers: W. Rothchild, pres.; E. J. McCutcheon, v. p.; E. S. McCurdy, sec.-treas., with H. G. Stevenson and G. W. McEnerney, directors. O. H. Rohlf, supt.

Inc. 1878. **Cap.** \$500,000.

Property: one claim, near Amador City, Amador county, said to show a gold quartz vein in schist with dip 45° to 55° and N. W. strike.

Development: by 1,600' incline and 800' winze, with levels at 1,800', 2,000', 2,160 and 2,300'. In 1918, reported good ore in lower levels.

Equipment: includes 150-ton ball mill for amalgamation and concentration.

Active 1919 and 1920; concentrate is shipped to smelter.

TRINITY COPPER CO.**CALIFORNIA**

Out of business. Property sold on Jan. 19, 1920, to G. A. Haskell of Boston for \$210,000, who immediately sold it to the Trinity Copper Corporation for \$1. See Vol. XIV for tangled history.

TRINITY COPPER CORPORATION.**CALIFORNIA**

Successor to Trinity Copper Co.

Allen Arnold, 85 Devonshire St., Boston, is said to be interested, "Legal residence", Richmond, Va.

Officers: Thos. W. Lawson, pres.; A. P. French, v. p.; Allen Arnold, treas.; John N. Reynolds, sec. and asst. treas., all of Boston.

Inc. Feb., 1920, in Virginia, as successor to New Jersey corporation of almost same name. **Cap.** \$5,000,000; \$5 par; 291,829 issued; 240,000 for use in exchange for stock of the Trinity Copper Co., 20,000 for services; and 31,829 were subscribed for by shareholders at \$2 each. An offering of 208,171 additional shares at \$2, was made in January 1921. Stockholders to May 1, 1921. On Dec. 31, 1919, the old company had \$79 in cash. Notes of Trinity Copper Co. had privilege of exchanging share for share up payable were \$206,078; and other items, \$58,187.

Exchange Trust Co., Boston, transfer agent; Federal Trust Co., Boston, registrar. Listed on Boston Stock exchange.

Property: consists of 1,200 acres of mining land, at Kimberly, Shasta county, including the Shasta King, Lost Desert and King Copper groups.

The Shasta King group, 12 claims, 4 miles E. of Iron Mountain, is on the south fork of Squaw Creek, adjoining the Balaklala mine.

Development: by tunnels, the main tunnel being 7 x 8' and 1,145' long, with double tram tracks, and a 7x 8' double track tunnel driven 175' lower. This development has opened a low grade pyritic orebody containing disseminated chalcopryite; ore probably averages 2½ copper, 1 oz. silver per ton and small gold values. The mine has over 15,000 ft. of workings and about 400,000 tons of ore in sight.

The King Copper group, 23 claims, about 2½ miles S. of the Shasta King, has about 1,000' of development work, but no ore as yet. The Trinity Corp. has no smelter of its own. See Mines Handbook, Vol. XIV. for further particulars.

TRINITY GOLD MINING & REDUCTION CO.**CALIFORNIA**

Address: c/o. D. W. Shanks, Mer. Natl. Bank Bldg., San Francisco, Calif.

Formerly operated the Headlight mine; inactive for many years. See Vol. XIII.

TROPICO MINING & MILLING CO.**..CALIFORNIA**

Address: 448 Wilcox Bldg. Los Angeles, Calif.

Officers: O. S. Richardson, pres.; S. E. Brown, sec.

Inc. 1909, in California. **Cap.** \$300,000; par \$1; 204,169 shares issued
Property: the Antelope valley, Tiger Head and other mines, 200 patented acres, at Rosamond, Kern county, equipped with 10-stamp amalgamation mill and 30-ton cyanide plant.

In both 1919 and 1920 development was continuous, mill being run part of time only.

TUNGSTEN MINES CO. CALIFORNIA

General office: 301 Holbrook Bldg., San Francisco, Cal. **Mine office:** Bishop, Inyo county, Cal.

Officers: F. M. Townsend, pres; F. W. Griffin, v. p.; M. E. Griffin, sec., with R. A. Kinzie, V. Klinker, H. T. Thompson, and J. C. McKinstry, directors.

Inc. 1916, in Calif. **Cap.** \$3,000,000; shares \$10 par

Property: a group of claims, purchased 1915 from A. J. Clark, situated in a narrow gulch known as Deep Canyon, 7 miles west of Bishop. Scheelite bearing garnet rock occurs in granite. (U. S. Geological Survey Bulletin 640-L, by Adolph Knopf, describes the district.)

Development: by 2 tunnels, one on each side of the new mill and connected therewith by 700' tram line.

Equipment: 300-ton mill, built 1916, has rolls, trommels and tables.

Production: in 1918, about 100,000 tons of ore, averaging 0.5% WO₃ (tungstic acid).

Idle on account of the tungsten market.

TUOLUMNE GIANT GOLD MINES CO. CALIFORNIA

Office: 828 Story Bldg., Los Angeles, Calif.

Officers: J. E. Nelson, pres.; W. A. Newcomer, v. p.; Harold Larson, sec.-treas.

Cap. \$1,000,000; \$1 par; 645,000 shares in treasury, March, 1921.

Property: the Tarantula and Gold Ridge quartz mines, or Jones properties in Tuolumne county, which adjoin Eagle Shawmut on the north. The Tarantula group has 7 claims and mill-site; Gold Ridge has 3 claims and 4/8 section of patented land; total area about 300 acres.

Development: at the Tarantula, by 1,200' tunnel and 700' winze; at the Gold Ridge, by 120' shaft and 70' drift, which is said to show free gold for its entire length.

Equipment: twenty 1,250 lbs. stamps on the Tarantula, and 10 stamps on the Gold Ridge, with hoists, compressors, crushers, etc.

The property was worked continuously during 1920. In 1921, the 1,200' tunnel was extended, cutting all the veins on both properties, at a depth of 700'. A new shaft will be sunk in the rich values of the Jones vein. The property has been examined by Frank W. Royer, Thomas A. Wetzel, Charles Early and E. A. Adams.

TWENTY-ONE MINING CO. CALIFORNIA

Property sold to Sixteen to One Company, which see. See also Vol. XIV.

TYSON MINING CO. CALIFORNIA

Address: W. H. Pleasants, Tyson Estate, Baltimore, Md.

Property: the Low Divide and French Hill mines in Del Norte county, 15-18 miles easterly of Crescent City, show chromite orebodies in a serpentine-diorite contact. In the 80's shipments were made to Baltimore, then the centre of the chromite industry. In 1918, mines were operated under lease by American Exploration & Contracting Co.

Company also owns chromite properties in Maryland including the old Soldier's Delight mine, 12 miles N. W. of Baltimore, which was operated by Maryland Chrome Corp. (q. v.), in 1918-19.

UBEHEBE COPPER MINES & SMELTER CO. CALIFORNIA

Probably defunct. See Vol. XIV.

UNION CHROME CO. CALIFORNIA

Address: 180 Sutter St., San Francisco. E. A. Wiltsee, pres.-mgr.

Property: the Forest Queen and Gray Eagle Chrome mines on Boulder creek, Shasta county. Irregularly shaped chromite orebodies in peridotite are developed by inclines and tunnels. In 1918, company held chromite-bearing properties under lease in a number of other counties and was operating also in Josephine county, Oregon.

UNION DEVELOPMENT CO.**CALIFORNIA**

Mail returned from former address: 713 Iowa Loan & Trust Bldg., Des Moines, Iowa.

Property: the Blazing Star mine $\frac{1}{2}$ mile E. of West Point, Calaveras county. A 2' quartz vein is developed by a 400' shaft.

Probably defunct.

UNION HILL MINES**CALIFORNIA**

Company discontinued and property taken over by Idaho-Maryland Mines Co., which see.

UNITED AMERICAN MINING CO.**CALIFORNIA**

Address: Grass Valley, Calif.

Officers: C. C. Van Eaton, pres.; J. T. Hennessy, sec.

Inc. 1920, in Calif. **Cap.** \$500,000; \$1 par.

Property: in Rough and Ready district, Nevada county, 4 miles S. W. of Grass Valley, developed by 380' shaft and 1,000' of drifting. Ore contains gold, silver and copper.

Production: reported to total \$50,000.

UNITED GREENWATER COPPER CO.**CALIFORNIA**

Office: Tonopah, Nev. **Mine office:** Dale, via Amboy, San Bernardino county, Calif.

Property: company was operating the Supply mine in 1915 and owned the O. K. mine. The former is developed by shafts of 800' and 1,100'. Had a 50-ton cyanide plant which treated 60 tons of ore daily in 1915, averaging \$14 per ton. No returns since.

UNITED STATES EXPLORATION CO.**CALIFORNIA**

Address: 617 Pacific Bldg., San Francisco.

Property: the Robinson mine, 35 miles N. E. of Oroville, in the Granite Basin district, Plumas county, held under lease. In 1916, the shaft was deepened, and rotary mills with capacity equal to 40 stamps were erected. Closed late in 1918 on account of unfavorable results of work.

UNITED TUNGSTEN COPPER MINES**CALIFORNIA**

Address: 401 Bradbury Bldg., Los Angeles, Cal.

Officers: Frank F. Peard, pres.-mgr., Hotel Maryland, Pasadena, Cal.; Dr. C. H. White, v. p.; Wm. K. Weaver, sec.-treas. Jos. Zanini, supt., Victorville, Calif.

Inc. 1916, in Arizona. **Cap.** \$2,000,000; \$1 par; issued, 1,527,201.

Property: 18 claims, 360 acres, in Morongo district, San Bernardino Mtn., 45 miles S. E. of Victorville, San Bernardino county, under development by tunnels for past 3 years. Contact-metamorphic scheelite deposits carry a little bismuth.

Management reports large ore reserves and that machinery for a 25 to 50-ton mill is on the property.

United Tungsten-Copper Mines was in 1921 in process of consolidation, with the **Union Metals Corporation** and the **Kaibab Smelting Co.**, as **Kaibab Cons. Smelting Co.**

UTACALA EXPLORATION CO.**CALIFORNIA**

Address: Morris P. Kirk, pres. mgr., Salt Lake City. Geo. H. Ryan, supt.

Property: the Towser zinc mine 9 miles from Darwin, Inyo county, and 34 miles from Keeler, the nearest railroad point, said to have the largest known deposit of hydrozincite, averaging over 40% zinc and 12% moisture. The greatest thickness of ore so far disclosed is over 25'. A small calcining plant, 10 to 12 tons daily capacity, reduces the moisture to $1\frac{1}{2}\%$ thus making a saving in truck and railroad freights. Rate of shrinkage in calcining averages 22%.

During 1920, zinc ore was shipped to Empire Zinc Co., etc., until December.

UTICA GOLD MINING CO.**CALIFORNIA**

Utica mine closed permanently in 1918; see Vol. XIII for full description. The Gold Cliff at Angels, Calaveras county, developed to depth of 1,900, was closed down permanently, April 30, 1920.

VALDOR DREDGING CO.**CALIFORNIA**

A subsidiary of Metals Exploration Co.

Office: 58 Sutter St., San Francisco. **Mine office:** Junction City, Cal. Gerald H. Hulton, mgr., 1213 Hobart Bldg., San Francisco.**Officers:** Bulkeley Wells, pres.; Roy H. Elliott, v. p.; A. D. Snodgrass, sec.-treas., with T. D. Harris and Jafet Lindeberg, directors.**Inc.** March, 1916 in California. **Cap.** \$200,000; shares \$100 par; all issued. Annual meeting, third Tuesday in February.**Property:** placer claims, near Junction City, Trinity county. Gravel contains gold, and metals of the platinum group.**Equipment:** one 7 cu. ft. electric driven dredge.**Production:** 1917, 1,494,860 cu. yd. at cost of 5.01 cents per yd.; 1918, 1,602,255 yd. at cost of 5.89 cents per yd.; 1919,—1,154,898 yds at cost of 8.38c. per yd.; 1920.—1,479,846 yd. at cost of 6.81c. per yd.

Dredging started late in 1916. Costs are low.

VICTOR LAND & MINERAL CO.**CALIFORNIA****Address:** 512 Commercial Bldg., St. Louis, Mo.; or Angels Camp, Calaveras Co., Cal.**Officers:** E. H. Ehler, pres.; J. A. Montreville, sec.**Inc.** 1914, in Calif. **Cap.** \$1,000,000; par \$1; issued 439,700 shares. Company received a permit from California State Corp. Commission to sell 200,000 shares at 50¢ per share.**Property:** 460 acres of gravel ground on Bald hill, near Angeles, Camp Calaveras county.

The mine was unwatered late in 1920 and in June, 1921, company was mining rim gravel and drifting for west channel.

VICTOR POWER & MINING CO.**CALIFORNIA****Address:** J. H. Sharpe, 1025 Hearst Bldg., San Francisco. **Mine office:** Knob, Calif.**Officers:** J. H. Sharpe, pres.; A. Bonick, v. p.; A. A. Barber, sec.-treas.; with H. L. White, directors.**Inc.** Oct. 1907, in California. **Cap.** \$500,000; shares \$1 par. 335,647 shares issued. Annual meeting in October.**Property:** the Midas mine, 3,400 acres, in Harrison Gulch, Shasta county, including also the Gold Hill, Bonanza, Bull Moose, and other mines. The first-named is credited with a gold yield of \$4,000,000.**Geology:** quartz vein in diabase and slate, dipping 74° and pitching N. W. The orebody is 12' wide and 200' long, ore averaging \$22 per ton.**Development:** by 1,200' vertical shaft, and tunnels. Workings total 45,000'.**Equipment:** includes 250-h. p. Diesel engine, 70-h. p. electric hoist, 90-h. p. compressors, three 20 h. p. pumps, and reduction plant using 4 Gibson mills and concentrators, with daily capacity of 100 tons of ore.

Considerable amount of development done in 1920. For past history see Vol. XIV.

VIRGINIA-BELMONT MINING CO.**CALIFORNIA****Office:** 314 Kohl Bldg., San Francisco, Calif. Jack Wilson, supt., Bagby, via Coulterville, Calif.**Officers:** J. F. Soule, pres., B. C. Austin, sec.**Inc.** 1920, in Nevada. **Cap.** \$1,000,000; \$1 par; 500,000 shares issued.**Property:** the Virginia mine, at Coulterville, Mariposa county, formerly owned by the White Gulch M. Co.**Development:** by 900' shaft and 10,000' of drifting. The mine is credited with total production of \$1,000,000 in gold.**Equipment:** includes 10-stamps, Hardinge mill and 2 concentrators.

Operated both mine and mill during 1919 and 1920.

WALKER CONS. MINING CO.**CALIFORNIA****Address:** J. R. Walker, pres., Salt Lake City.

Property: paralleling that of the Walker Mining Co., in Plumas county, said to have extensive orebodies shown by an 800' tunnel and numerous surface workings. Diamond-drill work is used to explore the ground.

WALKER MINING CO.**CALIFORNIA**

Subsidiary of the Anaconda Copper Mining Co.

Office: 618 Kearns Bldg., Salt Lake City, Utah. **Mine address:** V. A. Hart, mgr., Portola, Plumas county, Calif.

Officers: J. R. Walker, pres.; O. M. Kucks, v. p.; J. B. Whitehill, sec.-treas., with C. A. Walker and B. R. Howell, directors.

Inc. 1913, in Arizona. **Cap.** \$1,250,000; \$1 par; all issued. Also 100,000 \$1 pfd. shares issued. Stock listed on the Salt Lake Exchange. In 1918, the Anaconda company, through its subsidiary, the International Smelting Co. exercised its option on control of the company. As reported, the deal called for 630,000 shares at \$1 per share.

Property: 38 patented lode claims, and 2 placer claims, heavily timbered, elevation, 7,000', in an unorganized district, at Spring Garden, 22 miles N. W. of Portola, on the Western Pacific Railroad.

Geology: the claims show diorite largely overlain by volcanic tuff; the diorite showing fissuring and alteration for length of several claims. The vein 6' to 8' wide, occurs in an altered zone impregnated with sulphides containing copper, silver, and gold. The strike is N. W., and dip 65° N. E. This ore zone also contains several other parallel veins, 10 to 60' wide. The combined length of the 3 ore shoots is 2,500'.

Development: the property was explored to a depth of 346' by 2 shafts, and drifts from these shafts opened an orebody 800' long, average width 16' and averaging 4% copper. Diamond-drill holes indicate an additional length of vein of 900'. The 4,900' main tunnel connects with the main incline shaft and develops the vein to a depth of 1,000'. The blind vein cut by this tunnel "doubles the ore reserves". A 450' raise connects the tunnel and No. 4 level. New work in 1919 amounted to 1,819', and in 1920, considerable drifting was done.

Equipment: electric power, hoist, compressors, etc. An aerial tram, 8.2 miles long, carries supplies from, and concentrates to the railroad. Auto-trucks are also used. Haulage in tunnel is done with electric locomotives.

The mill capacity was doubled in 1917, and now treats 200 tons daily. It employs ball-mills and flotation machines. Recovery is well over 90%.

Production: year ended Dec. 31:

Year	Ore treated, tons	Conc., tons	Conc. smelted, lb.	Copper, lb.	Gold, oz.	Silver, oz.
1919	38,785	5,983	4,270	1,597,430	678	29,078

There were 8,500 tons of concentrates on hand in Nov., 1920.

Production: ceased, Oct. 25, 1920, but development and construction continue. Gradually this has become the second most important copper mine of California.

WERINGER MINES CO.**CALIFORNIA**

Dead and stock valueless. See Vol. XIV. The Weringer Copper-Silver mine, is owned by Gus Schamblin, Woodv. Calif.

WEST END CHEMICAL CO.**CALIFORNIA**

Office: Syndicate Bldg., Oakland, Calif. **Mine office:** Westend, Calif.

Officers: F. M. Smith, pres.-treas.; J. F. Carleton, v. p.; Geo C. Ellis, sec., with L. W. Bennett, Rufus P. Jennings, C. P. Murdock and R. L. Oliver, directors. J. W. Sherwin, gen. mgr.

Inc. 1920. **Cap.** \$3,000,000; shares \$1 par.

Property: 2,200 acres leased from the Federal Government and 680 acres patented, on Searles Lake, San Bernardino county. Townsite is known as Westend, on the Trona railroad. Contains colemanite, a borax-yielding mineral.

This property, formerly a part of holdings of the West End Cons. Mrg. Co., was taken over by the newly incorporated West End Chemical

Co., in spring of 1920. Stockholders received stock on a share for share basis; total 1,788,486 shares. In June, 1920, 600,000 shares were offered at par to raise funds for completing plant. Including funds expended by West End Cons., the enterprise cost \$442,915 to March, 1920.

WESTERN MERCURY CO., INC. CALIFORNIA

Address: 68 Post St., San Francisco and Cloverdale, Cal.

Officers: Andrew Rocca, Jr., pres.-treas.-supt., Cloverdale; I. G. De Forest, v. p.; L. B. O'Farrell, sec., with C. A. Shurtleff, H. L. Johnston, E. C. Miles and Jos. Schorr, directors. Annual meeting second Monday in May.

Inc. April, 1916, in Cal. **Cap.** \$300,000; \$1 par; assessable; outstanding 231,538.

Property: 13 claims, one patented, 260 acres, in Macaymas district, 12 miles E. of Cloverdale, Sonoma county. The orebody is characterized by ledges of thinly stratified chert, inclosed by sandstone. Chert strata vary from $\frac{1}{2}$ to 3" in thickness; ore averages $\frac{1}{2}\%$ mercury.

Development: tunnels with 2,000' of workings. Ore reserves reported to be 30,000 tons, with 20,000' of this blocked out. Remained active throughout 1919.

Equipment: includes gravity tram from mine to mill, and a furnace with daily capacity of 85 tons.

Production: in 1918 amounted to 1,267 flasks of mercury. Total to date is about 9,000 flasks.

See p. 183, Quicksilver Resources of Cal., Bull. 78 of Calif. State Mng. Bureau.

WESTERN MINES CORPORATION CALIFORNIA

Dead. See Vol. XIV.

WESTERN PRECIOUS METALS CORPORATION CALIFORNIA

W. A. Simpkins, mgr.; J. H. Harris, supt., Grass Valley, Calif. W. E. Hatch, sec., 629 E. 115th St., Cleveland, Ohio.

Inc. 1920, in Nevada. **Cap.** \$1,000,000.

Property: the Mitchell group of claims in the Grass Valley district, Nevada county, developed by 60' and 40' shafts. The latter is to be sunk to 500' on the incline, following a vein in which rich ore is said to have been cut. Company also owns 3 unworked groups in Tule canyon, Esmeralda county, Nevada.

WESTON JUDKINS CO. CALIFORNIA

Address: Mariposa, Cal. P. W. Judkins, C. H. Weston and I. L. Dearborn, owners.

Property: a gold mine in the Colorado district, near Mariposa. Mine is being worked under lease. Ore is said to average \$8 per ton. Developed by 250' shaft. Equipment includes a 10-stamp mill.

WEST POINT & CALIFORNIA MINES CO. CALIFORNIA

Idle. Former address: K. C. Dunn, 1154 O'Farrell St., San Francisco. **Inc.** 1915, in Calif.

Property: 2 claims, 25 acres, $3\frac{1}{2}$ miles W. of Grass Valley, Nevada county. Mine has been operated in a desultory manner since 1875, producing a little gold. All equipment was burned in June, 1915.

WHITE BEAR MINING CO. CALIFORNIA

Office: 349 Mills Bldg., San Francisco, Calif. **Mine address:** John Costa, lessee, Downieville, Calif.

Officers: A. S. Macdonald, pres.; Richard Belcher, sec.

Inc. 1902, in Calif. **Cap.** \$100,000; \$1 par.

Property: 8 claims, 100 acres, covering $\frac{1}{2}$ miles along an ancient gravel channel, 6 miles N. of Downieville, Sierra county, at an elevation of 5,500'. The gravel consists of white quartz, lying on slate and serpentine and capped with lava; 1,200' of channel yielded \$200,000.

Development: by a 2,200' tunnel and 1,000' of raises; also a 2,000' tunnel, 400' of raises and 200' of drifts, all in bedrock.

Production: no record of gold output, but in 1918, 250 tons of ore containing 40-45% chromite were extracted.

WHITE GULCH MINING CO.

CALIFORNIA

Described in Volume XIV.

Formerly worked the Virginia mine now owned by the **Virginia-Belmont Mng. Co.**, which see.

Address: Coulterville, Calif. **Officers:** John F. Soule, pres.; Walter V. Wilson, sec.

Inc. 1912, in Calif. **Cap.** \$100,000; par \$1.

Dividends: to 1920, \$29,700, last of 5%, June 2, 1918.

WHITE KNOB COPPER & DEV. CO., LTD.

CALIFORNIA

Address: 224 West 57th St., New York.

Officers: John T. Smith, pres.; A. H. Carlisle, v. p.; Arthur Kennedy, sec.-treas., with F. A. Gaynor and Benoni Lockwood, directors.

Cap. \$4,000,000 com. and \$2,000,000 7% cumulative pfd stock; par \$10. Preferred stock has precedence both as to assets and dividends and is convertible at par into common. Transfer agent and registrar, Security Registrar & Transfer Co., New York. Is a holding company owning \$1,200,000 of the capital stock of the **Argonaut Cons. Mining Co.**, which controls the **Argonaut Mining Co.**, at Jackson, Amador county, Calif., which see. Annual meeting, 2nd Tuesday of July.

Dividends: were begun on pfd. in 1914, with payments of 25c. per share in November; 10c. in 1915; 10c. in 1916; 25c. in 1917; 20c. in 1919; 5c. in 1920.

WILLOW VALLEY MINING CO.

CALIFORNIA

Address: A. W. Hogue, owner, Nevada City, Calif.

Inc. May 18, 1915, in Calif. **Cap.** \$1,000,000; \$1 par. Annual meeting in May.

Property: 3 claims, 32 acres, 2½ miles E. of Nevada City, Nevada county, has several veins, showing gold and silver ore, in granodiorite and slate.

Development: by 830' incline and 527' drain tunnel, with extensive workings. Shaft is to be sunk to 1,200'.

Equipment: 500 gal. p. m. pump, electric hoist capable of 2,000' depth, compressor, crusher, 5-stamp mill, concentrator, etc.

Production: \$310,000 from 13,000 tons of ore.

Idle several years.

WILSHIRE BISHOP CREEK CO.

CALIFORNIA

Now The Cons. **Wilshire Mining Co.**, which see.

WILSHIRE CONSOLIDATED MINING CO., THE

CALIFORNIA

Supposedly succeeded by **Bishop Creek Mining & Milling Co.**

Office: H. B. Kearns, sec., 200 William St., New York; **Mine address:** Bishop, Calif. J. V. Richards, mgr.; Stuart Elliot, asst. mgr.; Jack Albers, supt.; Roscoe Eadyvean, mill supt.

Officers: Gaylord Wilshire, pres.; H. B. Kearns, sec.

In 1920-21, Mr. Wilshire is said to have raised \$80,000 to remodel the 150-ton mill, etc.

Property: the Wilshire property on Bishop creek, Inyo county.

Development: by shaft opening a large body of gold bearing iron pyrite, with small copper and silver values. On the 300' level a stope, 100' long and 40' wide, has been opened and an orebody, 420' long and 15' wide, is reported to average \$11 per ton in gold.

The remodelled mill of 75 tons daily capacity, with ball mill and flotation machines, has been in operation since July 27, 1921, on ore averaging \$7.50 per ton, making a \$200 concentrate shipped to the U. S. Mng. & Sm. Co. at Midvale, Utah.

For past history of company, see Vol. XIV.

WISCONSIN MINING CO.

CALIFORNIA

Property: gravel deposits, in Forest district, Sierra county.

WISCONSIN NORTH FORK GRAVEL MINES CALIFORNIA**Address:** 116 Natoma St., San Francisco, Calif.**Officers:** G. D. Clark, pres.; D. E. Hayden, sec.**Inc.** 1912, in Calif.-**Cap.** \$250,000; \$1 par; 213,188 shares issued; assessable. Assessment No. 44, of 2c. per share levied Aug. 3, 1920.**Property:** at Forest. Sierra countv.**YANKEE GOLD DREDGING CO. CALIFORNIA****Address:** E. R. Healy, pres., Oakdale, Calif. C. R. Harris, engr.; S. G. Bent, supt.

Company declared bankrupt, July 14, 1921.

Property: several miles of dredging ground in Stanislaus county, near Knights Ferry. A dredge, with daily capacity of 3,000 cu. yd. was started late in Nov., 1920, but was lost in a flood, being swept several miles down stream and probably only valuable as junk.**YANKEE JOHN DEVELOPMENT CO. CALIFORNIA****Address:** 501 Peoples Bank Bldg., Pittsburg, Pa.**Officers:** W. L. Clark, pres.; G. B. Preston, v. p.; W. T. Drill, sec.-treas., with A. H. Bowman, A. M. Hast and H. T. Morris, directors.**Inc.** 1913, in Delaware. **Cap.** \$1,000,000; \$1 par. Listed on New York Curb.**Property:** 6 claims, 6 miles W. of Redding, Shasta county, said to show quartz veins in andesite and rhyolite.**Development:** by 2 shafts, 50' and 300 deep, with 1,500' of workings.**Equipment:** includes a gasoline hoist, compressor, and a 40-ton mill. Management gave ore reserves as 6,300 tons of \$20 ore.

Mill closed June 1, 1920, all operation ceasing in September.

YELLOW ASTER MINING & MILLING CO. CALIFORNIA**Office:** Dr. Rose L. Burcham, sec., 839 Citizens Bank Bldg., Los Angeles. **Mine office:** Randsburg, Kern county, Cal.**Officers:** Albert Ancker, pres.; Arthur Asher, v. p.; Rose L. Burcham, sec.; V. H. Rossetti, treas.; H. L. Bennett, asst. sec., with R. H. Raphael and E. L. Kenny, directors.**Inc.** Nov. 16, 1896, in Nevada. **Cap.** \$1,500,000; \$1 par; 1,079,999 issued. Annual meeting, May 16.

From 1898 to October 31, 1917, revenue totaled \$8,725,588, of which \$1,245,789 was distributed.

Dividends: have been irregular for many years. Paid \$38,000 in 1916; last was \$35,000, October, 1917.**Property:** 47 patented and 6 unpatented claims, water rights and placer areas, totaling 796 acres, mostly at Randsburg, Kern county, and one mile from Johannesburg on the Santa Fe Railroad.**Geology:** vein occurs in granite, schist, and porphyry. Main orebody is from 30' to 40' wide, with schist hanging-wall. Ore is low grade, averaging \$3.21 per ton during 20 years. Gold is easily extracted.**Development:** is extensive, aggregating about 27 miles of tunnels, stopes, open cuts and other workings to depth of 750'. Open cut work has produced most of the ore in the past. Reserves estimated in December, 1916, by W. W. Hegeman, at 6,278,529 tons of \$1.77 ore.**Equipment:** 150-h. p. and smaller hoists, 150-h. p. compressor, machine drills, steam shovels, pumping stations and several miles of water pipelines, 250-ton (per hour) screening plant, 100-stamp mill (back to back design, each 50 stamps driven by 150-h. p. motor), copper plates, steam boilers and engines, 3 oil-burning locos., sixty 3-ton side-dump steel cars, machine shops, assay office and the Rand Mercantile store. Recent additions are costing \$250,000. A cyanide plant may be erected to treat 1,000,000 tons of tailing stored. Power is supplied by the Southern Sierra Power Co. So far, \$747,972 has been spent in plant on the property.**Production:** from 1898 to October 31, 1917, there was mined 2,713,384 tons, yielding \$8,725,588, equal to \$3.21 per ton. The cost was \$2.44 per ton.

Production: years ending February 28:

Year	Tons	Value per ton	Cost p. t.
1918	100,948
1917*	98,105	\$2.84	\$1.80
1916	152,827	3.31	2.08
1915	166,446	3.14	1.83
1914	147,793	3.02	1.86
1913	131,481	3.03	2.22
1912	151,746	3.53	2.00
1911	162,683	2.52	1.71
1910	186,370	2.50	1.57

* 10 months.

Some development was done in 1919, but in 1920 operations practically stopped.

YOSEMITE DREDGING & MINING CO. CALIFORNIA

Address: J. W. Neill, Snelling, Cal.; or 159 Pierpont St., Salt Lake City, Utah.

Property: 400 acres along the Merced river, near Snelling, Merced county. Gravel is up to 20' deep, and is easily dug.

Equipment: a dredge with 3¼-cu. ft. buckets, screen, Hungarian riffles, 10 Neill jigs, and tailing elevator. Electric power is used throughout. A feature on this boat is the recovery of platinum.

Production: gravel is reported to have yielded 6.74¢ per yard, against an estimate of 4.44c. According to J. W. Neill in 22½ months the boat dug 1,534,750 cu. yd. Besides the gold, there was recovered 41 oz. of platinum and nearly 1 oz. of osmiridium, valued at \$3,438 and \$25, respectively.

Property is in the hands of a capable manager.

YOU BET MINING CO. CALIFORNIA

Address: W. L. McGuire, sec., Crocker Bldg., San Francisco. Mine address: P. O. Box 290, Nevada City, Calif.

Property: gravel claims, including the Jerry Goodwin mine, in Nevada county, said to have yielded \$3,000,000 from 50,000,000 yd. up to 1913. About 100,000,000 vd. are available. New work was started in 1913, and profitable hydraulicking done, but the debris dam did not settle the muddy water, and operations were suspended in 1918. The California Placer M. Co. leased the ground and attempted to mine cemented gravel. There is a full equipment of ditches, piping, and giants for sluicing. The California company spent about \$150,000, which was practically a dead loss, owing to unreasonable government restrictions on the debris dams.

YOUNG AMERICA MINING CO. CALIFORNIA

Property acquired by **Mugwump M. Co.**, which see.

YUBA CONSOLIDATED GOLDFIELDS CALIFORNIA

Offices: 50 Congress St., Boston, Mass.; Chas. W. Gardner, eng., Insurance Exchange, California St., San Francisco, and Hammonton, Yuba Co., Calif.

Company is controlled by the **Gold Fields American Development Co.** itself a subsidiary of the **Consolidated Gold Fields of South Africa.**

Officers: Geo. L. Huntress, pres.; R. E. Paine sec.-treas

Inc. 1905, in Maine. **Cap.** \$2,500,000; \$1 par; 2,400,000 shares issued.

Property: extensive dredging areas on the Yuba river.

The company's huge dredges dig 80' below water level, and wash enormous quantities of gravel. 5 of them each handling 300,000 cu. yd. monthly. Recoveries have checked engineers estimates very closely as a whole, though varying widely in individual tracts.

Recent returns are as under:

Year	Yardage	Average Cents	Total Yield	Cost Cents	Profit
1919-20.....	23,523,000	13.66	\$3,213,213	6.99	\$1,645,548
1918-19.....	15,996,000	19.49	3,117,791	7.22	1,962,426
1917-18.....	15,460,000	18.42	2,849,220	4.90	2,090,691
1916-17.....	18,490,000	14.86	2,748,197	3.99	2,009,500
1915-16.....	17,750,000	12.02	2,133,528	4.27	1,374,868

From Feb. 28 to June 30, 1920, the ground yielded 11.22c. per yard, costing 6.16¢., and showing a profit of \$416,713. Throughout the year 8 dredges were operating in Yuba county, on stream gravel and tailings at Ham-monton.

Company maintains a large machine-shop, wherein its dredges are made and repaired, and also makes them for other companies. The engineering concern is known as Yuba Manufacturing Co., with works near Marysville, Calif. Yuba Consolidated, the largest gold producer in California, is a pioneer in big dredging practice.

YUBA CONSOLIDATED GOLD MINING CO. CALIFORNIA

Out of business. See Dinero M. Co.

YUBA DEVELOPMENT CO. CALIFORNIA

Subsidiary of Metals Exploration Co.

Address: 1213 Hobart Bldg., San Francisco, Calif. Thos. D. Harris, mgr., Brandy City, Sierra Co., Calif.

Officers: Bulkeley Wells, pres.; R. H. Elliott, v. p.; Karl Brachine, v. p.; A. D. Snodgrass, sec.-treas., with Rufus Thayer, Thos. D. Harris and Lloyd Ackerman, directors.

Principal business of company is the construction of dams on the Yuba river, California, to provide impounding space for tailings from hydraulic placer operations. But, in 1920, it was operating an hydraulic mine at Brandy City.

ZENDA MINING CO. CALIFORNIA

Address: C. H. Clausen, Caliente, Kern county, Calif.

Property: 180 acres, including the old Zenda gold mine, 12 miles N. E. of Caliente. The vein has a granite footwall and quartz-porphry hanging wall. It is 30' wide, and has a 300' ore shoot. There is said to be a large tonnage of medium-grade gold-silver ore developed by open-cuts and tunnels.

Equipment: includes an aerial tram, oil engines, and 10-stamp mill, with cyanide plant.

Mine was reopened in 1919, but closed down in June, 1920, on account of high cost of labor and supplies.

COLORADO

In 1921, Colorado produced \$6,790,000 in gold; 5,400,000 oz. silver; 20,600,000 lbs. lead; 3,700,000 lb copper and 2,400,000 lb zinc. The decline in output was due to the closing down of the Leadville and Durango smelters during part of the year. The U. S. Zinc Co.'s Blende zinc oxide plant was closed down on June 3rd., as was the Pueblo plant. The Canyon Zinc oxide plants of the Ohio Zinc Co. and Empire Zinc Co. were idle throughout 1921.

The mineral production of the State for 1920 was \$7,650,000 gold, 5,200,000 oz. silver, 43,000,000 lb. lead, 42,000,000 lb. zinc, with a total value of \$29,833,499, which is a marked decrease from the 1919 output of \$8,876,925 gold, 5,639,516 oz. silver, 35,859,090 lb. lead, 3,310,675 lb. copper, 51,445,429 lb. zinc, all of a total value of \$22,427,893, which is \$11,732,279 less than the value of metals produced in 1918.

ACACIA GOLD MINING CO.**COLORADO**

Office: 205 Burns Bldg., Colorado Springs, Colo., **Mine office:** Cripple Creek, Colo. K. Mackenzie, pres.; J. Yeomans, sec.-treas.

Cap. \$75,000; 5¢ par; outstanding, Jan. 1, 1921, 1,438,989 shares. Gross production to Jan. 1, 1921, \$1,509,827. Cash and securities on hand \$2,934, in 1921. No liabilities. Annual meeting in January.

Dividends: to January, 1921, \$136,703; last dividend, December, 1912, \$14,389.

Property: the South Burns and Morning Star claims, patented, 20 acres, on Bull hill, Cripple Creek, Teller county.

Development: by 1,575' main shaft, and 3 shafts, 825', 425', and 330' deep, with 7,000' or drifting and crosscutting a rich ore shoot was opened on 1,300' level at the junction of the Eagle and Wilson claims, and good shipping ore on the 1,500'. Operations have been restricted on account of high cost of supplies. The mine is operated under lease by Le Brun Leasing Co., Mt. Marie Gold Mng. & Leasing Co. and Patterson-Bradley Leasing Co.

ACAPULCO MINE**COLORADO**

Dr. W. W. Rowan, owner, Ouray, Ouray county, Colo.

Leased 1920, by W. E. Van Valkenburg, Ouray, and H. Monell, and crosscut driven. Property in Bear Creek section.

ACCORD MINING & MILLING CO.**COLORADO**

Idle. No returns secured from Georgetown, Colo., for 5 years. See Vol. XIV.

ADELAIDE MINE**COLORADO**

Operated part of 1920 by Oscar Karppinen and Co., Box 833, Leadville, Lake county, Colo. The mine is in the Iron Hill district.

AJAX GOLD MINING CO.**COLORADO**

See Colburn-Ajax Mining Co.

AJAX MINE LEASING CO.**COLORADO**

Address: E. A. Colburn, Denver, Colo.

Officers: William D. Waltman, E. M., pres.-mgr.; Dr. Lester S. Grant, cons. engr.; Herbert G. Colburn, supt. Governor O. H. Shoup, R. D. Brooks, Rodney J. Bardwell and P. E. Caplone of Paris, complete the directorate.

Inc. 1921, in Colo.

Property: a 5 year lease on entire Ajax mine, 28 acres, adjoining the Portland mine, at Cripple Creek, Teller county. This mine was formerly owned by Ajax Gold Mng. Co. and later bonded to the Colburn Ajax Co.

Shipping ore steadily in 1921 to the Independence mill of the Portland company at Victor. Property has a production record, from former operations, of \$5,000,000.

AKNEY COPPER MINING CO.**COLORADO**

Address: 207 Colorado Bldg., Fort Collins, Larimer Co., Colo. Operated in 1920.

AKRON MINES CO.**COLORADO**

Office: Jas. E. Dick, mgr., Whitepine, Colo.

Property: owns May, May Mazeppa, Ensign and North Star mines, drained by Akron 3,000' tunnel. Group totals 30 claims, 29 patented, 250 acres, in Tomichi district, Gunnison county, 11 miles north of Sargent. There are three fault fissure veins about 4' wide in limestone and granite, course N.-S., dip 45° E., containing ore reported to average 7 oz. silver, 14% lead and 14% zinc.

Development: by 360' shaft, and 4,200' of tunnels, etc., totaling 8,000' of workings.

Equipment: includes compressor, hoist, electric power, and new 80-ton concentrator.

ALAMOSA MINING & LEASING CO. COLORADO

Address: 533 17th St., Denver, Colo.

Operated Refugee silver-lead mine, near Idaho Springs, Clear Creek county, in 1920.

ALBERT BEACON GOLD MINING CO. COLORADO

Office: Cripple Creek, Colo.

Officers: at last accounts, Frank Vetter, pres.-treas.-gen. mgr.; F. W. Revoice, v. p.; John R. Dunn, sec., with Wm. Y. Seaman, D. W. Kilpatrick and A. M. McVicar, directors.

Inc. May, 1916, in Colorado. **Cap.** \$250,000; 10 cts. par; 1,602,825 shares in treasury, Jan. 20, 1917. Annual report for 9 months, ending Jan. 1917, showed net receipts from ore shipments and stock sales, \$11,596; expenditures for the same period amounted to \$10,577.

Property: a 3-year bond and lease on the Prince Albert. Beacon and Eureka claims, 26.42 acres, patented, on Beacon hill, Cripple Creek, Teller county, credited with a past production of \$1,000,000. Company's literature closely resembled that of a stock-jobbing scheme. Reported merged, May, 1917, with the Victory Gold Mining Co., which see, but no details of merger obtainable.

Shipments from the Prince Albert were reported for 1918.

ALBRO EXTENSION MINING & MILLING CO. COLORADO

Office: E. B. Dingle, lessee, operating as Albro Leasing Co.

Property: the Heliotrope mine, on Albro mountain, near Dumont, Clear Creek county.

Development: workings said to show an 8 to 12" band of smelting ore and a large body of auriferous copper ore which was mined and shipped to local mills in 1918, together with several carloads of direct smelting ore. A crosscut tunnel was driven 260' to drain the old workings. Drifting had progressed 500' at last accounts, and an aerial tram was to be erected to connect the mine with the Colorado & Southern Railroad.

ALCO MINING & MILLING CO. COLORADO

Address: Georgetown, Ohio.

Inc. 1910, with same officials as Accord Mining Co. described in Vol. XIV.

Property: group of lode claims on Saxon Mountain, near Idaho Springs, Clear Creek county.

Equipment: included hoisting plant.

Idle.

ALICE GOLD MILLS CORPORATION COLORADO

Dead. See Vol. XIV.

ALICE MINE COLORADO

Operated 1920 by Mohr & Markt, of Jamestown, Boulder county, Colo.

ALLARD MINING CO. COLORADO

Address: Mancos, Colo.

Property: the Allard gold mine at La Plata, La Plata county. Operated part of 1919, but made no shipments.

ALLERTON MINING & MILLING CO. COLORADO

Address: Silverton, Colo.

Property: a lease on the Joe and John mine at Red Mountain, near Silverton, San Juan county. Idle, 1920.

ALLGROVE MINING & MILLING CO. COLORADO

Probably dead. See Vol. XIV. for description.

ALLIED GOLD MINING CO. COLORADO

Office: 1216 Pearl St., Boulder, Colo.

Officers: H. F. Corfield, pres.-gen. mgr.; W. H. Jones, v. p.; H. C. Meade, sec.-treas.

Cap. \$100,000; shares 25¢ par.

Property: the Congo Chief mine, 3 claims, on Idaho mountain, N. E. of Caribou, Boulder county. Company also developing the Buenaventura,

a gold mine, in the Salina district, consisting of 4 patented and 2 unpatented claims.

Operations started on the Congo in 1917. The property is said to be an extension of the No Name lode and carries galena, native silver and chlorides in a fissure vein, 3 to 8' wide. Ore at depth of 10' said to assay \$225 to \$400 in silver and lead, and shipments to have returned 36 to 490 oz. silver, 18% lead and 1.12% copper.

Development: by 370' shaft and some drifting.

Equipment: includes 35-h. p. electric hoist and 3-drill compressor. Company reported having money enough to last until May, 1920, and operations were continued for part of the year on the Congo Chief.

ALMADEN MINES CO.

COLORADO

Dead. See Vol. XIV.

ALOHA GOLD MINING CO.

COLORADO

Property: the Coriolanus mine on Battle mountain. Cripple Creek, Teller Co., adjoins Colburn-Ajax Mining Co. on the north.

Ore: gold occurs in footwall of intrusive dike, phonolitic in character. See Colburn-Ajax Mining Co.

ALPHA & OMEGA LEASING CO.

COLORADO

Harry Search, supt., 222 McPhee Bldg., Denver, Colo.

Is a syndicate of stockholders of **Dig Gold Mng. Co.**, which has 5-year lease on, and is operating, the Alpha & Omega mine in the western part of Cripple Creek district, Teller county; see Dig Gold Co. A shoot of \$80 ore was found on 400' level, Sept., 1921

ALPHA MINES CO.

COLORADO

Address: Portland, Me. **Mine address:** care Geo. Robinson, mgr., Breckenridge, Colo. Company owns control of **Warrior's Mark Mng. Co.**, which see

Officers: Hamilton P. Burney, pres., New York City; C. S. Flanders, v. p.; J. W. Hanly, treas.; Edw. H. Parry, sec., 342 Madison Ave., N. Y. City.

Inc. Jan. 7, 1921 in Maine. **Cap.** \$2,000,000; \$1 par; issued, \$1,650,000, non-assessable. No bonds. Metropolitan Trust Co., Boston, registrar and transfer agent. Annual meeting, 3rd. Tuesday in Jan.

Property: 19 claims, 16 patented, about 400 acres, 7½ miles S. of Breckenridge, in the McBarnes mining district, on the Colorado & Southern R. R. Claims reported to show monzonite and quartz porphyry cut by fissure veins carrying silver-lead-copper ores in streaks 10" to 24" wide. See **Warrior's Mark Mng. Co.** for further description.

Company also owns outright the Alpha mine, 2 patented claims, formerly a producing property, ½ mile from railroad. Mine contains 18" vein of silver-lead ore.

Property examined by W. L. Shaffer and J. D. Galloway.

ALPINE MINING & MILLING CO.

COLORADO

Address: Red Cliff, Colo.

Property: the Alpine gold-silver-copper mine near Red Cliff, Eagle county.

Mine and mill operated 1919 and 1920, and ore shipped.

ALTA MINES CO.

COLORADO

Dead. See Belmont-Wagner Co.

ALTEZUMA GOLD M. & M. CO.

COLORADO

A. L. Miller, mgr., Central Savings Bank Bldg., Denver, Colo.

Inc. in Arizona. **Cap.** \$5,000,000; \$1 par; 2,500,000 shares in treasury.

Property: 4 claims, 2½ miles from Montezuma, Summit county.

Ore: lead-silver.

Development: 4 tunnels, longest 190', known as the Franco tunnel. Plans included the re-financing of company and driving the Franco tunnel an additional 200', but have not been carried out. Idle for several years.

AMERICAN DREDGING CO.**COLORADO****Address:** S. L. Bright, Breckenridge Summit county, Colo.

Company has acquired several properties in the Breckenridge district, and was doing preparatory work in August, 1919. No news since.

AMERICAN GOLD & PLATINUM CO.**COLORADO****Address:** 637 Symes Bldg., Denver, Colo. **Mine address:** Wm. A. Hooton, supt., Ward, Colo.**Officers:** John Ogden, pres.-mgr.; W. F. Bell, v. p.; F. S. Ogden, sec.-treas., all of Denver.**Inc.** April 1, 1920, in Colo. **Cap.** \$1,000,000; par \$1; 500,000 issued.**Property:** the Telegraph mine, 3 claims, 19 acres, and millsite, at Ward, Boulder county.**Geology:** gold platinum ores occur as sulphide and arsenide deposit on contact between granite and schist. Ore said to average one ounce platinum and $\frac{1}{2}$ oz. gold per ton.**Development:** by 150' shaft and 240' tunnel, with 700' of workings, all said to block out 40,000 tons of ore.**Equipment:** a 30-ton mill, operated by electric power. Ore is handled by Ogden electro-amalgamation process.**AMERICAN METALS PRODUCING CO.****COLORADO****Office:** Central City, Colo. E. S. Moulton, pres.-mgr.; G. Whitney Adams, supt.-treas.**Cap.** \$100,000 in 30,000 preferred and 70,000 common shares; \$1 par.

At last accounts operated a reduction plant at Blackhawk, Gilpin county, equipped with Moulton-Adams system to handle low-grade refractory ores. Plant treated custom ores. No recent information, and State reports do not mention plant, 1920.

AMERICAN MINES CO.**COLORADO**

Probably dead. Formerly operated mine and mill at Gold Hill, near Boulder, Colo. See Vol. XIV.

AMERICAN MINES CO.**COLORADO****Idle. Address:** American Nettie Mine, Ouray, Colo.**Property:** American Nettie mine, 14 claims, near Ouray, Ouray county.**Ore:** gold in broad, flat shoots, in quartzite, about 7' thick and proved for 700' in length. These orebodies are believed to be the northerly continuation or downward faults of the Wanakah orebodies, which intersect the great monzonite porphyry dike running due east through the Nettie ground.**Development:** by 700' tunnel and upraise.**Equipment:** compressor, drills, machinery and amalgamation-concentration mill.**Production:** in gold since 1889, \$1,500,000.

Operated by leasers, 1919.

AMERICAN MINES DEVELOPMENT CO.**COLORADO****Address:** 726 Majestic Bldg., Denver, Colo.

Operates the Rialto gold-silver mine, at Central City, Gilpin county.

AMERICAN MINING & POWER CO.**COLORADO**Name changed to Martin M. & P. C., succeeded by **Treasure Mtn. Mines, Inc.**, which see in this volume.**AMERICAN RARE METALS CO.****COLORADO****Address:** Chas. D. Heaton, supt., Egnar, Colo.**AMERICAN SISTERS MINE****COLORADO****Office:** care T. B. Burbridge, American Bank & Trust Bldg., Denver, Colo. Mine at Lawson, Clear Creek Co. Idle 1919, 1920.**Property:** 27 claims, 13 patented, closed since 1904 on account of litigation. Credited with a total production of about \$1,000,000, in lead-silver ore.**AMETHYST LEASING CO.****COLORADO****Address:** Creede, Colo.**Property:** the Amethyst mine, near Creede, Mineral county. Ore carries gold, silver, and lead.

Operated part of 1919 and 1920, and shipped ore.

AMHERST MINING CO.**COLORADO**

Office: 517 Cooper Bldg., Denver Colo. **Mine address:** Russell Gulch, near Central City, Gilpin county, Colo. S. G. Hamlin, mgr., Idaho Springs, Colo.

Inc. in Colorado. **Cap.** \$50,000; \$1 par. The widow of W. H. Chittenden, organizer and moving spirit of the company, is practically the owner.

Property: the Hampton mine, 4 claims patented, very close to the War Dance gold mine, and believed to carry an extension of the ore-shoot of that mine. The ore carries bornite, tetrahedrite, pyrrargyrite, pyrite and marcasite, said to assay 2.7 to 35% copper, 6 to 35 oz. silver and 0.16 to 8.4 oz. gold per ton, lead 20-40%.

Development: by tunnels, shafts, and over 3,000' of workings. In August, 1919, good ore was opened on the 600' level, with shipments from that and the 400' level. A 10" streak had been opened on the 600' level for 300', in 1920; ore assayed 9 oz. gold, 20 oz. silver and 4% copper.

Equipment: includes electric pumps, electric hoist, compressor, and 10 drills. Property operated and shipped ore 1919-20. Believed to have merit.

ANACONDA MINING CO.**COLORADO**

Iola, Gunnison Co., Colo.

Operated the Anaconda Copper mine at Iola, 1920.

ANCHORIA-LELAND M. & M. CO.**COLORADO**

Address: Colorado Springs, Colo.

Inc. about 23 years ago. **Cap.** \$600,000; \$1 par. Irving Howbert, principal stockholder; Chas. Howbert, mgr.

Property: Anchoria mine on Gold hill, Cripple Creek, Teller county, is one of the old-time producers and dividend payers. In 1914 the company had a debt of \$30,000, due to attempts made to open up new orebodies. The mine had been worked down to the barren zone, reaching from a depth of 500' to 1,000', the lowest development.

Operated during 1919, but made no production. Idle, 1920.

ANNA C. MINE**COLORADO**

Mine address: Central City, Gilpin Co. Operated by C. F. House & Co., 216 18th St., Omaha, Nebr., in 1920.

ANNIE MINE**COLORADO**

Operated in 1920 by J. B. Putnam, Rosita, Custer Co., Colo.

ANTORO MINES CO.**COLORADO**

Address: Bonanza, Saguache county, Colo. Operated the Antoro silver-lead-copper mine, in 1920.

ANVIL LEASING CO.**COLORADO**

Address: Silverton, San Juan Co., Colo.

Company is operating the Diamond, Topaz and Sapphire mines, producing copper ores with gold-silver values, in 1920.

APEX COPPER CO.**COLORADO**

Office: 915 Colorado Ave., Colorado Springs, Colo.

Officers: I. J. Driscoll, pres.; Cab Johns, v. p.; A. T. Driscoll, sec.; J. O. Tufts, treas., with Dr. J. L. Lewis, directors.

Inc. in Colorado. **Cap.** \$2,000,000; \$1 par; issued \$1,200,000. Annual meeting, April 19. Transfer office, that of company.

Property: 8 claims, 6 patented, 80 acres at Hayman, Park county.

Geology: fissure vein in granite. Ore carries gold and silver, and copper sulphides in ore-shoots 25' long.

Development: by 250' vertical shaft and 800' of tunnels.

Equipment: steam hoist and 3-drill compressor. Building a 50-ton flotation plant, at last accounts.

No work done during 1919, or 1920.

APRIL FOOL LEASING CO.**COLORADO**

Address: Creede, Mineral Co., Colo.

Operated the April Fool silver mine, at Creede, in 1920.

ARAPAHOE MINE**COLORADO**

Operated in 1920 by Ross & Thulin of Ward, Boulder Co., Colo.

ARAPAHOE MINING & MILLING CO.**COLORADO**

Defunct. Was a promotion of an alleged fraudulent character, in which Arapahoe stock was given for that of La Anozia Gold Mng. Co. and operations were carried on for a few weeks in 1915 by a Thos. B. Everett, who also gave Digger Chief Mng. & Mlg. stock for La Anozia, and who fathered the Minureka Mineral Milling Co. in 1919—N. G.

ARCUBELL GOLD MINE CO.**COLORADO**

Address: Box 127, Georgetown, Colo. No recent returns.

Officers: J. J. Culley, pres.-treas.; J. S. Armstrong, v. p.; W. G. Bell, sec.

Property: 20 claims, about 215 acres, in Clear Creek county; ore reported to carry gold and silver in a fissure vein, in granite, with dip of 30°, and N. E.-S. W. course. Company reports assays between \$10 and \$30 per ton. No work done in 1919.

ARGO MINE**COLORADO**

Address: Evans & Co., Jamestown, Boulder Co., Colo.

ARGO MINING & TUNNEL CO.**COLORADO**

Address: L. S. Stewart, Idaho Springs, Colo., who operated property in 1920.

Office: 79 Milk St., Boston, Mass.

Officers: F. A. Schirmer, pres.; Chas. C. Parsons, v. p.; Chas. G. Schirmer, sec.-treas., with F. Hargreaves, C. P. Woodbury, J. A. Caldwell and H. W. Davis, directors. R. E. Schirmer, mgr.

Inc. 1909, in Delaware. Cap. \$1,250,000; \$5 par; issued, \$952,325. Debentures, \$150,000 authorized; \$135,000 issued. Company succeeded Argo Transportation & Tunnel Co., Ltd., which succeeded Argo Tunnel & Mining Co., Ltd., successor to Newhouse Tunnel Co., Ltd. Owns the entire stock issue of Argo Mining, Drainage, Transportation & Tunnel Co., which holds direct title to the tunnel.

Property: the Argo, more commonly called the Newhouse tunnel, 21,968' long, with nearly 20 miles of workings, is perhaps the most celebrated mining tunnel in existence. It starts at Idaho Springs and passes under Russell gulch and Quartz hill, with terminus in the Gunnell vein. The tunnel has double tracks, of 18" gauge, laid with 30-lb. rails. For the first 12,000' the tunnel is 9' high and 10' wide, balance being 8' high and 6' wide. Grade is 5" per 100'. The tunnel was begun January, 1894, and completed November 18, 1910, and provides drainage, transportation, ventilation and air service for drilling operations.

The mines under which this tunnel passes are estimated to have produced about \$75,000,000 in metallic values, and the tunnel cuts sundry veins of ore carrying gold, silver, lead and copper, and several laterals have opened various orebodies of greater or less promise. The tunnel connects with the Concrete, Tremont, Prize, Burroughs, Kansas, Golden Edge, Gem, Sun & Moon, Old Town, Pozo, Saratoga and Gunnell shafts at depth of 1,600'.

Equipment: includes 5 locomotives, handling 153 one-ton cars each. Transportation charge for waste work through the tunnel is 17c. per ton, and on ores from 40¢ to \$1.25, according to value.

During 1918 company was reported to have handled 19,700 tons of crude ore, paying producers \$328,347, but later was forced to close down owing to the increased cost of power and mine supplies.

ARGO MG. DRAINAGE TRANSP. & TUNNEL CO.**COLORADO**

Office: 79 Milk St., Boston, Mass. Mine office: Idaho Springs, Clear Creek county, Colo.

Officers: Chas. C. Parsons, pres.; H. W. Robinson, sec.; R. E. Schirmer, treas.-gen. mgr.; L. S. Stewart, supt.

Inc. 1893, in Colorado. Cap. \$100,000. Is controlled through ownership of entire stock issue, by Argo Mining & Tunnel Co., Ltd., and property described thereunder.

Balance sheet for fiscal year ending August 31, 1916, showed an operating loss of \$2,151, compared with a net profit of \$1,112 in 1915, the decrease being due to inactivity of several properties and subsequent slackening of transportation business. Property practically closed in 1920-21.

ARGO REDUCTION & ORE PURCHASING CO. COLORADO
Property acquired in November, 1920, by the **Gem Mining Co.**, which see.

ARIADNE MINES CORPORATION COLORADO
Address: Alfred B. Iles, Silverton, Colo.
Inc. 1920, in Colorado. **Cap.** \$1,100,000; \$100 par; \$50,000 cash on hand at end of 1920.

Property: the Ariadne mine in the Cement district, 5 miles from Silverton, San Juan county. Ore carries silver, lead, and copper.

Development: by 650' tunnel and other workings. Late in 1920, a 2' vein of rich galena ore was cut at a depth of 550'. Under continuous development 1919-1920.

Equipment: an aerial tram is to be erected to connect the mine with rail.

ARIZONA MINE COLORADO
Operated part of 1920, by Anna G. Stewart of Idaho Springs, Clear Creek Co., Colo. Mine at Russell Gulch, Gilpin county, produces complex silver-gold-lead-copper ore.

ARKANSAS VALLEY LEAD SMELTER COLORADO
Subsidiary of **American Smelting & Refining Co.**

Office: 120 Broadway, New York. **Operating address:** F. C. Gilbert, mgr., Denver, Colo. **Works address:** Edw. P. Chapman, supt., Leadville, Colo.

Has an annual capacity of 510,000 tons. Early in 1921, operations were placed on a 50% basis.

ASPEN CONTACT MNG. CO. COLORADO
Address: Aspen, Colo.

Operated the Lenado mine, at Woody, Pitkin county, developing silver-lead-zinc ore in 1920.

ASPEN MINE CO. COLORADO

Property: the old Aspen mine at Silverton, San Juan Co., Colo. Controlled by **American Smelting & Refining Co.** Operated by lessees who made small but steady shipments to the Silver Lake mill in 1917. Apparently inactive in 1919 and since.

ASPEN SAMPLING CO. COLORADO
Company operated an ore sampler at Aspen, Pitkin county, Colo.

ASPEN SILVER-LEAD MINES CO. COLORADO
Office: J. J. Yeckle, pres.-gen. mgr., Aspen, Colo.

Property: 8 claims, about 150 acres, at Aspen and Alma, Park county. The Alma property, known as the Border Ruffian mine, is located near Mt. Bross and adjoins the Dolly Varden mines. Samples taken from old workings were reported to give a silver content of 50-to 100 oz. and 50 to 70% lead.

Development: by the 850' Deane tunnel on Porphyry mountain and 200' N. drift. In August, 1921, the company was putting high grade silver-lead ore in the stock pile.

ATLAS MINING & MILLING CO. COLORADO

Mine address: R. H. Cabell, Jr., supt., Sneffels, Colo.

Officers: C. H. Austin, pres.; Fred Carroll, v. p.-gen. mgr.; C. C. Carson, sec.; A. B. Shipman, treas., with Wm. Story, Jr., directors.

Inc. February, 1904, in Colorado. **Cap.** \$2,000,000; \$1 par; 1,921,000 outstanding. Authorized bond issue, \$200,000. Annual meeting in August.

Property: 28 claims, patented, 204 acres, in Mt. Sneffels district, Ouray county, includes the Atlas and Klondike mines. Ore, which occurs in 3' fissure vein in andesite, is a complex sulphide, carrying grey copper, gold, silver and lead. Average assays are reported to run 9 oz. silver and 0.05 oz. gold per ton.

Development: by a 2-mile tunnel to depth of 1,500', with a total of 20,000' of workings.

Equipment: includes electric power, air compressor, tramway and 150-ton 20-stamp mill with table and flotation concentration, giving a 92-95% recovery. Management expects to solve further treatment of complex ores and increase average recovery. Employs 75 men.

Production: 30,000 tons in 1913, 35,000 tons in 1914, 40,000 tons in 1915, and 36,734 in 1916. Management estimates 50,000 tons of ore blocked out. In November, 1917, it was reported that the operating profit for the previous year was \$50,477, the largest in its history.

Monthly profit reported to be \$6,000. Mine was the principal producer of this county during 1919.

AUGUSTA METAL MINING CO.

COLORADO

Out of business. Mine described in Vol. XIV, has been idle since 1908, except as operated by A. P. McCarver, Box 193, Ouray, Colo., during part of 1919, when work ceased again.

A. V. MINE

COLORADO

Operated 1920, by Buchanan & Curtis of 206 W. 8th St., Leadville, Colo., for manganese ore.

A. Y. & MINNIE MINING & MILLING CO.

COLORADO

Company has ceased doing business. The mines are operated on short time leases by individual lessees.

Address: John A. Ewing, agent, Leadville, Colo.

Property: the A. Y. and Minnie mine, lower California gulch, Leadville, Lake county, sold in 1879 to the Guggenheims, now the A. S. & R. Co. The mines have been prolific producers. At present they are leased to two syndicates, namely, the Bartell and L. and M. In November, 1920, the Bartell was shipping one car of silver-lead ore, netting \$1,000 per car, each week. The L. and M. was shipping regularly. Wickland and Peterson were leasing in 1920.

AZTEC MINES CO.

COLORADO

Property: the O. K. mine at Central City, Colo. A. H. Frost, pres., and J. R. Hastings, sec., Winona, Ont., Canada. Operated in a small way, by Henry R. Eilmann, lessee, in 1915-16. Mine showed narrow fissure vein, carrying gold and copper. No recent information. No work in 1919.

BACA MINING CO.

COLORADO

B. T. Tipton, mgr., Crestone, Saguache county, Colorado. Property known as the Baca Land grant, originally belonged to Senor Don Luis Mana Baca as a gift from a King of Spain. The present owners opened the land to prospectors in July, 1914.

Property: 35,000 acres of mineral land, extending for 12 miles along the westerly slope of the Sangre de Cristo mountains, including 23 partly prospected mines near Crestone, on the D. & R. G. R. R. The largest mines of the group are the Eastern Star, Sunset, Julia D., Queen Esther, Von Moltke, Great Western and Independence, the latter being the only one developed by the company.

Geology: ore occurs in a well-defined contact vein 15-20' wide, traceable 3 miles, and as fissure veins, pockets and shoots; country rock is altered granite and schistose gneiss, cut by intrusive dikes of porphyry, phonolite and iron-stained quartz, containing gold, silver, lead, copper and zinc. Smelter assays ran \$18 gold, 500 oz. silver and 8% zinc.

Development: considerable amount of old workings, shafts and crosscuts. There is an unlimited water supply. Shipments made to the Pueblo smelter. Property has been worked for years by prospectors and lessees under 2 to 5 year leases. Miners receive free timber, water and assay services and pay 10-15% royalty on ore extracted. Reported October, 1920, to be leased to James Allen of Monte Vista, Colo., who will erect 3 mills to use flotation.

BACHELOR KHEDIVE MINES CO.

COLORADO

Address: J. F. Kelcher, lessee, Ouray, Colo.

Property: 11 claims, patented, 83 acres, at Ouray, is a silver producer. Ore sales 1916, totaled \$9,365, with net receipts of \$3,200, and in 1918 were

\$27,735 with net receipts of \$5,281. Operated during 1919 and 1920, but no shipments.

BACHELOR MINE**COLORADO**

Creede, Mineral county, Colo. Operated 1920 by Norman G. Corson of Creede.

BACKBONE MINE**COLORADO**

Operated 1920 by M. Rosenburg of Silver Plume, Clear Creek county, Colo.

BACKOFF LEASING CO.**COLORADO**

See *Keystone Cons. Mines Co.* Described in Vol. XIV.

BALD EAGLE MINING & MILLING CO.**COLORADO**

Probably dead. Mail returned from former address: 307 Guardian Trust Co., Denver, Colo. Fully described in Vol. XIV of *The Mines Handbook*.

BALD MOUNTAIN MINES CO.**COLORADO**

Probably defunct. Mail returned from former office: Breckenridge, Summit Co., Colo. Fully described in Vol. XIV.

BANKOK-CORA BELL MINING CO.**COLORADO**

Probably defunct. See Vol. XIV. for full description.

BANNER GOLD MINING CO.**COLORADO**

Address: 317 Exchange National Bank Bldg., Colorado Springs, Colo.

Officers: J. T. Hawkins, pres.; J. R. McKinnie, v. p.; E. C. Sharer, sec.-treas.; A. D. Aitken, asst. sec.-asst. treas.

Cap. \$2,000,000; \$1 par. Treasurer's statement, Jan 1, 1916, showed 11,000 shares in treasury, and \$185 cash on hand. At last accounts taxes paid to 1915; liabilities, \$490. Last stockholders' meeting June, 1903. Listed on Denver and Colorado Springs exchanges.

Property: 7 claims, patented, 68 acres, on Beacon hill, Cripple Creek, Teller county, shows 3' fissure vein, containing gold and silver, and the C. K. & N. vein, 3' wide where cut.

Development: by 90' 110' and 400' shafts, with prospecting on 3 levels. Worked through the 700' level of the Henry Adney shaft on adjoining property.

No recent information.

BANNER STATE GOLD, SILVER & COPPER M. CO.**COLORADO**

Office: 367 Fulton St., Brooklyn, New York. A. G. Sullivan, pres.

Inc. 1908, in Colorado. Cap. \$500,000; \$1 par; none outstanding.

Property: one patented claim in Bobtail Hill, Lake district, Gilpin county. Not operating, but has 300' vertical shaft. Idle, 1919-'21.

BARON MINE**COLORADO**

Operated 1920 by Charles Garfield of 205 South La Salle St., Chicago, Ill. Mine is at Salina, Boulder county.

BARSTOW LEASING CO.**COLORADO**

Address: Lundberg & Johnson, Ouray, Ouray Co., Colo. Works at Iron-ton, Ouray Co., Colo. J. H. Fennessy, trustee. Property formerly owned by the Barstow Mining & Milling Co., is held under bond and lease by C. R. Wilfley and subleased to Lundberg & Johnson.

Property: 27 claims, patented, 199 acres, with 5-acre mill site, in **Red Mountain district**, Ouray county, 11 miles from D. & G. R. R. The Silverton R. R., operating in the summer, is 1 mile away. Ore. found in fissure vein in andesite with N. W. strike and dipping 75°. is reported as 8' wide and carrying 0.75% copper, 2.5% lead, 4% zinc.

Developed: by 2 shafts, 425' and 145' deep, and 2 tunnels, 3,200' and 3,300' long. Total length of workings, 10,300', reported to have developed 17,000 tons of ore with 8,000 tons in sight. High-grade gold ore was found.

Equipped: with 2 hoists, electric compressor, 6-drill compressor, and mill comprising 2 Blake crushers, 9x15", 40 stamps, 20 Wilfley tables, 2 slime tables and buddles.

The spar vein of this property was leased September, 1916, to Engineers Corporation, of Boulder, Colo., who work it for fluorspar. This vein, carrying

3' of fluor spar, cuts across the Barstow vein. The deposit was struck at 1,100' in depth and was reported to widen out to nearly 10' of almost pure grade.

The mine and mill were operated during 1919 and 1920. In December, 1920, the Lundberg-Wilfley lease had opened a good body of gold-bearing quartz, also some sulphide ore, and shipments in 1921 exceeded 15 cars of \$8,000 each, or better.

BASSICK MINING & REDUCTION CO. COLORADO
Fully described in Volume XIV. Property leased to Querida Gold Mines Co., which see.

BATES LEASING CO. COLORADO
Company dissolved. Described in Vol. XIV.

BEACON MINES CO. COLORADO
Address: J. S. Anderson, supt., Cripple Creek, Colo.

Property: company has a lease on part of the El Paso Extension ground, Gold Hill, Teller county, and in August, 1919, found a rich shoot of gold ore on the 400' level. The deposit was opened for 300', and shipments realized \$200 per ton. No news since.

BECKY SHARP MINE COLORADO
See Old Town M., M. & Transportation Co.

BELL BOY GOLD MINING & MILLING CO. COLORADO
Address: Chas. L. Tilton, pres.-treas., 332 Kittredge Bldg., Denver, Colo. Mines at Apex, Gilpin Co., Colo.

Officers: C. L. Tilton, pres.; Harland L. Percy, v. p.; I. V. Shell, sec., with P. R. Anderson, all of Denver and M. B. Wolfe of Loma, Colo., directors. Inc. 1920, in Colo. Cap. \$99,000; 20¢ par; 300,000 shares in treasury; shares offered at 50¢ in 1921.

Property: the Mackey mine, 17 claims, 5 patented, in Pine district, Gilpin county.

Geology: fissure veins, 4'-6' wide, in granitic gneiss near monzonite mass, carry pay streaks ½'-2' wide, of bornite, chalcopyrite, covellite and pyrite with copper and precious metals. Eighty-three samples cut throughout workings averaged \$14.54 per ton; 15 cars of ore shipped averaged \$23.73 per ton. Three ore shoots aggregating 250' along vein, carry 10,000 tons of \$20 ore according to report. Orebody blocked out on 4 sides is said to contain \$100,000. Shipments, 1920, averaged \$34.11 per ton, largely in gold.

Development: by 300' shaft with 4 levels at 30, 140, 180 and 220' on Mackey vein. Other veins also show ore, especially the Cronje, but lack deep development. Mine unwatered 1921, after several years idleness.

Equipment: complete and includes 30-ton concentration mill, hoist, compressor, tramway, etc.

BELLEVIEW-CHAMPION MINING & POWER CO. COLORADO
Office: 517 Cooper Bldg., Denver, Colo.

Property: the Champion-Trio mine in upper Clear Creek county. Ore carries gold, silver, lead and copper.

Early in 1919, it was reported that the production during the previous year averaged \$2,500 a month. Three groups of lessees are mining silver ores that average \$100 per ton. Main tunnel is 1,200' long. Mine was operated part of 1919.

BELLEVIEW-HUDSON MINING & TUNNEL CO. COLORADO
Address: 402 Mining Exchange Bldg., Denver, Colo.

Property: the Belleview silver-lead-zinc mine, at Empire, Clear Creek county.

Operated during 1919, but produced no ore.

BELL MINE COLORADO
Address: George H. Short, 1424 Emerson Ave., Salt Lake City, Utah, Mine at Montezuma, Colo.

Property: the Bell silver mine, 5 claims, 9 miles from Keystone on the Colo. Southern R., in Summit county. Mine idle for 20 years, was re-opened 1921. The vein in granite, averages 3' in width, with stopes 15' wide.

Development: by 6 tunnels and several thousand feet of workings. Little ore above No. 5 level, but 4,000 tons of \$90 ore estimated above No. 6, or 300' below the surface.

Production: over \$200,000. The last 16 carloads of ore assayed 37% lead and 116 oz. silver per ton.

BELMAN MINE**COLORADO**

Address: W. R. Houghton, Idaho Springs, Clear Creek county, Colo., who operated this gold-silver mine in 1920.

BELMONT WAGNER MINING CO.**COLORADO**

Offices: 500 Bullitt Bldg., Philadelphia, Pa. **Mine address:** John M. Warner, mgr., Telluride, Colo.

Officers: Clyde A. Heller, pres.; Wm. M. Potts and S. D. Sinkler, v. p.'s; with M. B. Cutter, J. C. Fraley, T. W. Synnot, C. B. Taylor, G. F. Tyler, and J. M. Wagner, directors J. K. Kitto, sec.-treas.; R. G. Wilson, asst. sec.-asst. treas.; C. Ducheneau, comptroller; Frederick Bradshaw, gen. mgr.; J. M. Fox, supt.; H. F. Hillard, mill supt.; W. E. Howard, auditor.

Inc. Sept., 1917, in Delaware. **Cap.** \$1,000,000; \$1 par. Annual meeting first Tuesday in May, at Philadelphia. Transfer office: 500 Bullitt Bldg., Philadelphia. Subsidiary of **Tonopah Belmont Development Co.**, of Nevada.

During 1919 there was a loss of \$107,494. Losses in mill residue, costs and losses in marketing concentrates, and operating costs, were excessively high.

Property: consists of 81 claims, 26 of which are patented, including the Alta mine and the Crown Jewel claim, 2,000 acres, located in Gold King and Turkey Creek basins, San Miguel county.

Geology: a fissure vein, mineralized as a whole, running S. E.-N. W. at 60°, surrounded by San Juan tuff and breccia, and containing silver, lead, gold and copper.

Development: of mine is extensive. In 1920, 2,456' of exploratory work was done. The mill-level tunnel, 7 by 7', was being extended in 1921. Overhand stoping and waste fill methods used.

Equipment: electric power, compressor, underground locomotive, 3 aerial trams, crushing plant, 300-ton mill employing 7 Minerals Separation flotation units, bunkhouses, cottages, shops, and pumping plant.

Production: labor conditions caused a close down in 1918. Re-opened in 1919; seven months work yielded 27,338 tons, assaying 0.098 oz. gold and 6.10 oz. silver per ton, 1.02% lead, and 0.085% copper, a total value of \$11.21 per ton. Operations were again suspended, November, 1920.

BELZORA-BASSICK MINING CO.**COLORADO**

Address: care L. W. Fales, Lansing, Mich. Mine at Pitkin, Colo.

Officers: Geo. D. Wilcox, pres.; John T. Hall, v. p.; L. W. Toles, sec., with E. A. Richards, A. A. Stoddard and Mr. Morgan, directors.

Inc. in Colorado. **Cap.** \$1,500,000; \$1 par.

Property: about 235 acres in the Gold Brick district (Ohio City), Gunnison county. There are two ore deposits, one averaging 170' by 3' by 470', the other 35' by 2' by 400', both of which consist of sulphide ore containing lead and zinc. Mine is developed by tunnels almost 4,000' long. Operations ceased in 1920.

BENACK MINING CO.**COLORADO**

Dead. Described in Vol. XIV.

BESSIE-CORA MINING CO.**COLORADO**

Defunct. See Vol. XIV.

BETHEL MINING & LEASING CO.**COLORADO**

Address: 207 W. 31st St. Los Angeles, Calif

Officers: T. L. Roberts, pres.; J. D. Anderson, sec.

Inc. February, 1920, in Calif. **Cap.** \$20,000; \$100 par; all issued.

Property: a gold-silver mine at Creede, Mineral county, held under lease and bond.

BEZANT GOLD MINING CO.**COLORADO****Address:** O. J. Duffield, pres.-mgr., Central City, Colo.**Officers:** G. H. Putman, v. p.; L. A. Duffield, sec.; C. C. Hendrie, treas., directors.**Inc.** August, 1908, in Colorado. **Cap.** \$500,000; shares \$1 par; 435,000 outstanding. Dividends to date 50c. per share.**Property:** 3 claims, one patented, 14 acres, has a quartz fissure vein in granite and porphyry.**Development:** by a 500' shaft and about 6000' of drifts and crosscuts, said to have cut 3 veins, all carrying gold, silver and copper.**Equipment:** includes complete electrical plant, 50-h. p. electric hoist, etc. Plans building a mill. Management claims a large tonnage of pitchblende (uranium) ore blocked out.

In 1920, a new 50' shaft was sunk at junction of gold and pitchblende veins, and drifts opened \$32 gold ore 12" wide. Developing only in 1921.

BIG FIVE MINING CO.**COLORADO****Office:** 326 Century Bldg., Denver, Colo.**Officers:** H. G. Sanderson, pres.; M. C. Daniels, v. p.; Wm. H. Smith, sec.-treas.**Inc.** in Wyoming, June 1, 1912, as a reorganization of the old Big Five Tunnel Ore Reduction & Trans. Co. **Cap.** \$750,000; \$1 par; issued 400,579. Bonds outstanding, Dec. 31, 1918, \$207,000. Cash on hand, Dec. 31, 1918, \$5,786.**Property:** the Edgar mine opened by the Central tunnel, over 9,000' long, at Idaho Springs. Clear Creek county. Ore carries gold, silver, lead, and copper. The Edgar vein showed up better than the others under development; receipts from Edgar ore during 1917-1918 were \$342,797. Also owns 1,500 acres in San Juan and Clear Creek counties, and the Frances property, now idle, in Boulder county.**Equipment:** includes storage battery locomotives capable of hauling 40 cars 2½ tons capacity from the mine to the mill, a distance of 4 miles.

Property was operated by lessees during 1919 and 1920.

BIG THREE MINING & MILLING CO.**COLORADO****Address:** 301 Central Block, Denver, Colo.**Property:** the Big Three gold-silver mine near Rico, Dolores county. Operated in 1919 and 1920, but shipped no ore.**BIG TOAD MINING & MILLING CO.****COLORADO**

In debt and out of funds 1919, assets and liabilities taken over by Dante M. & M. Co., which see.

BIRD CREEK MINING CO.**COLORADO****Address:** Creede, Mineral Co., Colo. Operated the Spar, or Bird Creek silver-lead-zinc mine during 1920, and in 1921 continued development of ore reserves preparatory to erection of a concentrating mill.**BIRMINGHAM MINING CO.****COLORADO**

Mail returned, marked unknown, from former mine office: Empire, Clear Creek county, Colo.

See Vol. XIV.

BISMARCK MINING & DEVELOPMENT CO.**COLORADO****Address:** Sunset, Boulder Co., Colo. Operated the Bismark mine, producing gold-silver ore in 1920.**BLACK BEAR MINING CO.****COLORADO**

Subsidiary of the Colorado-Superior M. Co. and controlled by Bulkeley Wells, et. al.

Address: care Colo.-Superior Mng. Co., Telluride, Colo.**Inc.** about 1894. Ike Navala, supt.**Property:** 30 claims, includes Black Bear mine, in Ingraham basin. Telluride, San Miguel county. Ore carries gold, silver, lead, and zinc in

an 8' quartz vein. Mill returns average about \$5.50 per ton, gold recovered being 30% of total. Developed by shafts, and equipped with electric plant and aerial tramway, connecting with the Smuggler mill at Pandora. Early in 1920, the shaft was down 300' below No. 5 level.

Production: averaged 170 tons daily in 1916. Mining and milling costs totaled \$2.50 per ton. Daily output in 1918 was 180 tons.

BLACK CLOUD MINING CO.

COLORADO

Address: R. H. B. Little, lessee, Salina, Colo.

Property: Black Cloud mine and mill at Salina, Boulder county. Vein contains gold-bearing quartz, developed by shaft and several levels. Equipment includes air compressor, electric power and a 20-stamp mill. No work done during 1919.

BLACK FRIDAY MINE

COLORADO

Address: Preston, Harriet and Beaman, Silver Cliff, Custer Co., Colo. Operated, but no shipments made in 1920.

BLACK GIRL MINE

COLORADO

Address: Fred H. Herzinger, Ouray, Colo. Operated in 1920. shipping silver ore.

BLACK METAL REDUCTION CO.

COLORADO

Office: 2009 13th St., Boulder, Colo. Is a private partnership, consisting of Ira M. DeLong, pres.; W. B. Stoddard, mgr., and John B. Ekeley.

Property: a plant for the production of pure tungstic acid from the 60% tungsten concentrates of the district. Reported in 1917, to have \$35,000 invested in plant; \$25,000 in merchandise and stocks, and \$9,100 cash. No later figures.

BLACK METALS MINES CO.

COLORADO

Mine office: Rollinsville, Gilpin county, Colo. Nelson Franklin, mgr.

Property: the Tip Top mine, and a custom mill at Rollinsville; also reported to have operated other properties. During 1917, company produced 1,223 tons of tungsten concentrate and paid a 20% royalty to the owners.

Developed by a 150' shaft. Produced a considerable amount of tungsten ore in 1918. Idle 1919-20.

BLACK PRINCE MINING CO.

COLORADO

Address: James B. Wheeler, mgr. Mine at Cardinal, Colo.

Property: the Black Prince big manganese vein in the Hiland-Stampede district of Boulder county.

In 1921, work showed the ore to carry 15 oz. silver per ton, with 3.5% lead and excess of iron-manganese content.

BLACK ROSE MINING & MILLING CO.

COLORADO

Address: 435 E. 13th Ave., Denver, Colo.

Property: the Black Rose gold-silver mine at Jamestown, Boulder county. Operated, 1920.

BLAIN MINE

COLORADO

Address: Cortellini & Madsen, 329 West 8th St., Leadville, Lake county. Operated in 1920-21.

BLENDE SMELTER

COLORADO

Owned by the **United States Zinc Co.** (q. v.), a subsidiary of the American Smelting & Refining Co.

Offices: 120 Broadway, New York. Operating office: F. C. Gilbert, mgr., Denver, Colo. Works office: J. D. Thomas, gen. supt., Pueblo, Colo.

Is a zinc smelter with 2,320 retort capacity. See Pueblo Lead smelter.

BLISTERED HORN MINE

COLORADO

Owned by C. J. Carpenter and John Waldron, Tin Cup, Gunnison county, Colo.

Property: shows several veins of gold-silver-lead ore developed by 2,900' tunnel, drifts and raises. The veins are from 2-12' wide and ore is of good milling grade. Was reported under development in 1919 and 1920.

BLUE BIRD GOLD MINING & MILLING CO. COLORADO

A close corporation; E. S. Johnson, pres., Colorado Springs, Colo.

Property: 13 acres, on Raven Hill, Cripple Creek district, Teller county, adjoining the Cresson, has 1,865' shaft and shipped 50 tons a day during 1917-18. Leased on 20% royalty until Dec., 1922, to Franklin Leasing Co.

BLUE FLAG GOLD MINING CO. COLORADO

Fully described in Volume XIV. Succeeded by **Blue Flag-Silverton Gold Mines Co.**, which see.

BLUE FLAG-SILVERTON GOLD MINES CO., THE COLORADO

Office: 703 Exchange Bldg., Denver, Colo.

Officers: J. F. Erisman, pres. and gen. mgr.; Jos S. Pigall, v. p.; W. B. Warren, sec.-treas.; with A. R. Ulrich, D. A. Schaffnit, J. M. Burkhart, R. S. Burns, and J. A. Dingwall, directors. Company is a close corporation. Succeeded the Blue Flag Gold Mining Co., which see in Vol. XIV. ..

Inc. in 1921, in Colo. **Cap.** \$3,000,000; par \$1.

Properties: the Blue Flag mine on Raven hill, Cripple Creek, Teller county; the Laurium group at Breckenridge, Summit county; also holdings in the Harshaw district, Santa Cruz county, Ariz.; the Yellow Jacket placer in Idaho, and at Ballarat, Calif. Reported in May, 1919, that company had purchased the Bertha B and the Rattler lodes, comprising about 12 acres, on Raven hill, Cripple Creek.

Cripple Creek property: development at the Blue Flag includes the 1,420' main shaft, and a connection with the Moffat tunnel at depth of 1,150' where a drift was continued to the Scott shaft of the War Eagle Cons., which controls the tunnel. This has improved ventilation and gives a public transportation tunnel.

The equipment of the Blue Flag includes complete mining plant and 150-ton mill, including a flotation unit.

Breckenridge property is developed by tunnels at the Laurium, one over 1,800' long. Ore carries gold, silver, lead, and zinc. Exploration continued during 1920.

BLUE MOUNTAIN MINING CO. COLORADO

Address: c/o W. L. Peterson, Craig, Colo

Operated a silver-zinc mine at Youghal, Moffat county, 1920.

BLUE RIDGE MINES CO. COLORADO

Address: 213 Charles Bldg., Denver, Colo. **Mine address:** Walter R. Stewart, supt., Dumont, Colo.

Property: the Hiawatha tunnel, also the Blue Ridge group of 7 claims, a silver-lead mine at Dumont, Clear Creek county. Also owns and operates Happy Thought groups, 10 claims, in Morris and Fownieville district, and Albro group of 9 claims, all under development by the Hiawatha tunnel, 1,400' long in mid-1921.

Operated and produced high grade silver-lead ore, during 1920-21.

BLUE RIVER DREDGING CO. COLORADO

Now the **Blue River Placer Mining Co.**, which see.

BLUE RIVER PLACER MINING CO. COLORADO

Successor to Blue River Dredging Co.

Address: 1718 California St., Denver, Colo. T. B. Thomas, supt., at Breckenridge, Colo.

Inc. Jan., 1921, in Colorado.

Property: placer claims in the Breckenridge district of Summit county. The boat of the Powder River Gold Dredging Co. was purchased in Oct., 1919, and is now in operation.

BOB LEE CONSOLIDATED MINING CO. COLORADO

Dead. See Vol. XII.

BOLIVAR MINE COLORADO

Address: H. F. Bargar, Breckenridge, Colo. Mine at Montezuma, Summit county, operated, 1920.

- BONANZA DEVELOPMENT CO.** COLORADO
See **Bonanza Mines Corporation.**
- BONANZA MINES CORPORATION** COLORADO
Company address: Independence, Kansas. Mine address: Idaho Springs, Colo.
- Officials:** A. E. Gees, pres.; with C. L. Jaynes, supt.; B. D. Arbuckle, Frank Heilig, v. p.-mgr.; C. E. Angell, sec.-treas., Independence, Kans.; W. E. Caney, and W. J. Briggs, directors.
- Inc. 1918. Cap. \$250,000.**
- Property:** the Chicago Belle and Bonanza groups, 21 claims, 6 patented, in Morris district, Clear Creek county. Developed by 1,800' Pioneer tunnel, to drain 100' and 200' levels of shaft and cutting Chicago Belle vein, exposing high grade ore. Spent \$30,000 on development in 1920.
- Equipment:** includes oil engines, compressor, machine-drills, etc.
- BOND SYNDICATE LEASING CO.** COLORADO
Address: Ward, Colo.
- Property:** the Puzzler mine and Strong mill in the Ward district, Boulder county. Company started operations in Dec., 1920.
- BOREAS GOLD MINING CO.** COLORADO
Address: L. A. Jackson, Boreas, Summit county, Colo.
- Inc. in Colorado, Sept., 1918. Cap. \$50,000.** A close corporation.
- Property:** at Boreas, in Summit county, 160 miles from Denver, on the C. & S. railroad. The mine is reported to contain gold-bearing sulphides in quartz.
- No work done in 1919-20.
- BOREN GULCH GOLD MINING CO.** COLORADO
Office: 625 Denham Bldg., Denver, Colo. **Mine address:** W. A. Becker, mgr., La Plata, Colo.
- Officers:** Dr. Geo. H. Holoran, pres.; E. M. Becker, sec.; S. N. Francis, v. p.-gen. mgr.
- Cap. \$1,000,000; \$1 par; in treasury 300,000 shares. No debts.**
- Property:** 23 claims, including the Cornell, Mt. Edna, and Taylor Tunnel mines, operated through 3 tunnels, longest over 815'. Mine contains a large surface blanket vein, 4 to 6' wide, crossing entire property, with gold, silver, and copper. Some milling ore was opened, but none was shipped, 1920.
- BOREN GULCH MINING CO.** COLORADO
Reorganized, 1916, as **Boren Gulch Gold Mng Co.**
- BOSS MINE** COLORADO
Address: Berryman & Co., Blackhawk, Gilpin county, Colo., who operated the mine in 1920.
- BOSTON MINE LEASING CO.** COLORADO
Mail returned marked unknown from former office: 60 Congress St., Boston, Mass. See full description in Vol. XIV.
- BOSTON-SIERRA MADRE MINE INDUSTRY CO.** COLORADO
Property sold for taxes in 1914 to L. E. Armstrong. Fully described, Vol. XI, Copper Handbook.
- BOULDER CANON TUNGSTEN CO.** COLORADO
Defunct, following Armistice. See Vol. XIV.
- BOULDER COUNTY MINES & TUNNEL CO.** COLORADO
Address: J. G. Clark, Boulder, Boulder Co., Colo.
- Inc. October, 1919, in Colorado.**
- Development:** by 2,700' tunnel connecting Caribou hill and Idaho mountain with Boulder County mountain to develop known orebodies. Of the distance driven, 1,200' is said to be in ore. Reserves said to equal 2 years' mill capacity.
- Equipment:** includes a 100-ton flotation mill, started in August 1920.
- BOULDER ORE SAMPLING CO.** COLORADO
See **Chamberlain Ore Sampling Co.**

BOULDER TUNGSTEN PRODUCTION CO. COLORADO

Office: Boulder, Colo.

Officers: J. G. Clark, pres.; N. H. Brown, v. p.; Fred N. Totman, sec-treas.; R. L. Alexander, supt.

Inc. Dec., 1911, in Colorado. Cap. \$1,500,000; \$1 par. Commenced operations Jan. 1 1912. During 1916, company sold \$400,000 worth of tungsten. March, 1918, a bond issue of \$500,000 was reported authorized, presumably for development and the purchase of crude tungsten ores to meet market demand.

Property: 37 claims, 165 acres, in the Grand Island district, 2 miles from Nederland, Boulder county, said to show 4 to 10% tungsten ore in veins a few inches wide.

Development: by 1,400' main tunnel, 400' below upper workings.

Equipment: 40-ton concentrating mill. In 1917, a refinery for the treatment of tungsten ores was erected, said to be the largest and most complete of its kind in the United States. Mine closed since 1919 on account of low price of tungsten.

BRADFORD MINES CO. COLORADO

Address: Central City, Colo.

Property: the St. Johns gold-silver mine at Blackhawk, Gilpin county. Operated during 1919-20, but shipped no ore.

BRANT INDEPENDENT MINING CO. COLORADO

Dead. Described in Vol. XIV. Property sold in 1919 at foreclosure sale to Senator Geo. Hetherington as trustee and transferred to **Roosevelt Mines and Electric Co., q. v.**

BRECKENRIDGE MINING & CYANIDE CO. COLORADO

Address: 806 Railroad Bldg., Denver, Colo. Operated Fox Lake silver-copper-iron mine, at Breckenridge, Summit county, in 1920.

BREECE MINING CO. COLORADO

Umce: 665 5th Ave., New York. **Mine office:** Breece Hill, Leadville, Colorado.

Officers: E. B. Schley, pres.; C. G. Raynor, v. p.; W. J. Walworth, sec.; Emil Richter, treas., with T. W. Wagner, H. P. Chilton and R. J. Spettel, directors.

Inc. in New York. Cap. \$5,000,000; par \$25; all outstanding. Listed on Boston Stock Exchange. Transfer office: 665 Fifth Ave., N. Y. Registrar, American Exchange National Bank, New York. Annual meeting, second Wednesday after first Monday in October.

Property: a gold-silver mine on Breece hill, Leadville, Lake county, leased and royalties cover all company expenses.

Operated and producing during 1919-20. Inactive 1921.

BRIDGEWATER MINE COLORADO

Address: W. H. Potts, Tolland, Gilpin Co., Colo., who operated this gold-silver mine in 1920.

BRIGHT DIAMOND MINING & MILLING CO. COLORADO

Defunct. See Volume XIV. Property bought in at tax sale by Ouray Union Mining & Milling Co. and leased in 1921 to Welch-Worland Mines Syndicate, which see.

BRODERICK MINING & MILLING CO. COLORADO

Address: Idaho Springs, Colo.

Inc. 1916, in Colorado.

Property: the Lamartine gold-silver-lead mine and Oneida-Stag mill at Freeland, Clear Creek county. Old dump said to contain 50,000 tons mill ore.

Former shipments ran very high in gold and silver, and mill ore reported to be \$8 per ton.

Operated during 1920-21. and ore shipped. In 1921, was crosscutting on 10th. or tunnel level to undercut orebody mined on 7th level.

BROOKS-SNYDER LEASE**COLORADO**

Address: G. W. Morgan, 2920 S. Elati St., Englewood, Colo., who operated the Brooks Snyder mine at Breckenridge, Summit county, in 1919-1920, and shipped very high grade ore in 1921.

BROWN MOUNTAIN SMELTING CO.**COLORADO**

Reorganized, 1916, as the **Ouray Smelting & Refining Co.**, which see.

BROWN REIN DEER MINING CO.**COLORADO**

Address: Silver Plume, Clear Creek Co., Colo. Operated a lead-copper mine of the same name in 1920, but did not ship ore.

BUCKEYE MINES & MILLING CO.**COLORADO**

Address: Box 468, Colorado Springs, Colo.

Officers: E. S. Johnson, W. J. Shinn, R. C. Argo, of Colorado Springs. Inc. in Colorado. Cap. \$50,000

Property: a lease on the Blue Bird Gold Mining & Milling Co., mine, on Bull hill, Cripple Creek, Teller county, developed by the Blue Bird shaft, down 1,875'. Worked part of 1919, and shipped some ore. In October, 1920, lessees were opening rich gold-silver ore.

BUFFALO CHIP MINE**COLORADO**

Address: Duffield & Fraiser, Central City, Gilpin county, Colo., who operated mine in 1920.

BUFFALO HUNTER MNG., MLG. & DEVEL. CO.**COLORADO**

Address: Silver Cliff, Colorado.

Property: the Buffalo Hunter silver mine at Silver Cliff, Custer county. Operated and produced during 1919.

BULL DOMINGO DEVELOPMENT & MINING CO.**COLORADO**

Address: Westcliffe, Custer county, Colo. Company was reorganized in 1918. It has equipment from the old Geyser mine, capable of working to a depth of 3,000'. The Bull Domingo mine worked in 1920, was a big producer years ago. Ore carries silver, lead and zinc. Reported to have leased the Bull Domingo mill from the *Passiflora* company.

BULLION MINE**COLORADO**

Address: Thos. R. Cudahy, Central City, Gilpin county, Colo., who operated mine during part of 1920.

BULL RAVEN MINING & DEVELOPMENT CO.**COLORADO**

Address: Cripple Creek, Colorado.

Officers: L. J. Slowthower, pres.; W. P. Price, v. p.; J. F. Underwood, sec.; all of Colorado Springs; H. D. MacDonald, treas.; E. P. Arthur, E. M., cons. engr., both of Cripple Creek.

Inc. September, 1921, in Colorado. Cap. \$100,000; par \$1.

Property: the Mary Ann mine on Raven Hill and the Maude Helena on Blue Hill, both at Cripple Creek, Teller county.

BURKE GROUP**COLORADO**

Address: J. W. Burke & Co., Montezuma, Summit county, Colo., who operated mine in 1920-21.

BURLINGTON-BOULDER MINING CO.**COLORADO**

Address: Warren Bros., Jamestown, Boulder Co., Colo.

Officers: W. K. Farmer, pres.; A. D. Bly, v. p.; E. L. Lilleberger, sec., Ottawa, Ia. C. E. Seal, treas.; also directors.

Property: the Burlington fluorspar mine in Boulder county; reported under development in 1920.

BYRON MINING & LEASING CO.**COLORADO**

Address: Idaho Springs, Colorado.

Property: the Lord Byron gold-silver-lead mine at Freeland, Clear Creek county.

Operated part of 1919, and shipped some ore. Idle 1920.

CADIZ MINING CO.**COLORADO**

Probably defunct. No returns obtainable and mines not operated 1920. See Vol. XIV for description.

CALEDONIA MINING & MILLING CO.

COLORADO

Office: Silverton, San Juan county, Colo. G. A. MacKenzie, mgr.

Property: early in 1918, company commenced operations on the Peerless-San Juan silver-lead mine, in Minnie Gulch, Silverton, Ouray county, This property had been inactive for many years due to litigation.

Equipment: consists of 75-ton mill, crusher, triplex rolls, ball-mill, flotation machine, and four Wilfley tables.

Mill operated part of 1919, but idle since.

CALHOUN CONSOLIDATED MINES CO.

COLORADO

Probably defunct. See Vol. XII. Mine at Central City, Gilpin county. ✓

CALLIOPE CONSOLIDATED MINING CO.

COLORADO

Office: 753 Klamath St., Denver, Colo. S. W. H. Schroder, pres.; C. A. Larson, sec. in 1921.

Inc. Feb. 9, 1914, in Colorado. Cap. \$100,000; par \$1; outstanding 49,525 shares. No bonds. Annual meeting, February 9. On Feb. 9, 1920, it was proposed to increase the capital to \$1,000,000; \$1 par.

Property: 10 patented claims in the Bachelor district of Ouray county. Developed by 2,800' tunnel. The ore deposit is a quartz vein carrying gold silver, lead, copper and zinc.

Equipment: includes a compressor, 75-h. p. transformer, and rock-drills. A mill is contemplated.

No work reported for 1919, but late in 1920 it was stated that the mine had been acquired by a syndicate headed by Max Grossman of Chicago, Illinois.

CAMP BIRD, LTD.

COLORADO

Office: No. 1 London Wall Bldgs., London, E. C. 2; also Colorado Natl. Bank Bldg., Denver, Colo. J. B. Glasser, company's agt. in the U. S. Mine address: Ouray, Colo.

Directors: F. W. Baker, chairman; J. A. Agnew, L. Clerc, F. A. Govett, F. H. Hamilton, A. S. Elmore, and O. de Rivaud. A. A. Kelsey, sec; C. L. Johnson, asst. sec.

Inc. Sept. 8, 1900, in England. Cap. £1,100,000, increased to £1,350,000 in Dec., 1909, and in July, 1911 to £2,100,000, consisting of 750,000 7% cumulative participating preference shares of £1 each, 649,625 issued, and 1,350,000 ordinary shares of £1 each, 1,100,051 issued.

Dividends: on pref. shares were paid semi-annually to June 30, 1920. On ordinary shares the first dividend paid in 1902-03 was 20%, last one paid Nov. 30, 1915, 5%; total 210%.

Financial statement: years ended June 30:

Year	Oper. Rev.	Oper. Profit	Other Rev.	Brought forward	Total Rev.	Adm. Exp.	Pfd. Divi.	Carried forward
1918.....	£4 295	*£4,869	£71,473	£21,487	£88,091	£73,346	£ 45,474	£29,272
1919.....	7,371	*9,827	87,864	29,272	107,309	8,373	45,474	53,462
1920.....	1,530	*31,128	118,628	53,462	140,962	22,782	45,474	**37,440
1921.....	109	*16,989	17,576	37,440	38,027	18,122	19,905

*Deficit. **After £35,266 written off from Tunnel company advances.

Balance sheet, June 30, 1921, shows assets of £1,187,102 as investments; war bonds, £7,800; cash, £4,368, with mining properties carried at £744,454. Profit and loss was £19,905; and total liabilities were £374,358, excluding £1,749,676 capital stock.

Company owns a 54% interest in Santa Gertrudis Co., Ltd., Mexico, and controls the Camp Bird Tunnel, Mining & Transportation Co., which see below. It owns also 29,944 shares of Messina (Transvaal) Development Co. stock out of a total of 727,154 issued of which Santa Gertrudis owns 33,500 shares; 100,000 shares of the National Mining Corp.; 263,250 shares and £60,000 in notes of the Mexican Corporation; and 24,998 shares of Am. Chem. & Met. Corporation.

Property: the company was formed in 1900 by F. W. Baker and John Hays Hammond to acquire from Thos. F. Walsh the Camp Bird gold mine, near Telluride, Colo. Purchase price was \$5,000,000. This property returned handsome profits for 10 years, when the lower levels showed signs of impoverishment. Other properties were then sought with the idea of making the company a mines-investment organization. The Santa Gertrudis silver mine was floated in this way and holdings acquired in the Messina.

Geology: the Camp Bird mine is at an altitude of 11,000' and 8 miles from rail, which necessitated hauling supplies and concentrates over a mountain road, making operating costs comparatively high. The Camp Bird orebodies occur in a fissure vein in andesite. The ore has for its base hematite, which is associated with iron, zinc and lead sulphides; it occurs in streaks, being less persistent and narrower with depth, and less regular in its relation to the walls. Stopping width was 5 to 8'. The mine was exhausted by mid-1916, and milling was suspended until exploration work should open more ore. See Vol. XIII for other details.

Production: from April 30, 1903, to June 30, 1916, was 820,730 tons treated, yielding £4,778,591, at an expenditure of £1,798,227, leaving a profit of £2,980,363. No production 1917 to 1921.

Until something is found in the mine Camp Bird will have to depend upon dividends from Santa Gertrudis for future revenue, also from The Mexican Corporation, Ltd., and other interests. Investors wishing to study the financial results of the Camp Bird-Santa Gertrudis connection should read "A Post-Mortem," in the "Mining and Scientific Press" of Feb. 6 and May 24, 1919.

Camp Bird Tunnel, Mining & Transportation Co.
(Subsidiary of Camp Bird, Ltd.)

Operating officials: W. J. Cox, pres.; T. H. Woods, supt.; J. B. Glasser, purchasing agent and accountant.

Up to June 30, 1921, Camp Bird, Ltd., had invested in and advanced to this company the sum of £81,462, excluding £35,266 written off. Its business is the further development of the mine. It owns 4 claims. According to agreement, Camp Bird, Ltd., is responsible for maintenance of property.

Work in the Camp Bird in 1920 and 1921 on the main level, 3,000' below the surface, showed that the vein is strong, 4-5' wide, carries values in places of 10 oz. silver and one ounce gold per ton, but the 5,758' of work done during the year failed to develop commercial orebodies and the mine was shut down indefinitely Nov. 30, 1920.

CAMP BIRD MINING, LEASING & POWER CO. COLORADO

Probably defunct, as letters addressed to former office, Pitkin, Gunnison county, Colo., are returned unclaimed. See Vol. XIV.

CAMP CREEK MINING & MILLING CO. COLORADO

Address: 2719 W. Bijou St., Colorado Springs, Colo.

Property: the Camp Creek gold-silver mine at Camp Creek, El Paso county. Operated part of 1919, but shipped no ore.

CAPITAL MINING & TUNNEL CO. COLORADO

Address: E. C. Baumon, supt., Georgetown, Clear Creek Co., Colo.

Property: the Aetna mine, developed by 16,000' of tunnels, said to show specimen ore running up to 2,300 oz. gold, 2,150 oz. silver, 72% lead and 31% copper.

Equipment: includes electric as well as steam power, compressor, and 200-ton concentrator.

During 1917, extensive development was reported on the Aetna vein, the W. drift being 8,450' long. In the Davenport mine, the vein is reported cut at 375' in the W. upper level.

During past 3 years mine has been kept open and retimbered, but no new work done. Part of mine is leased to miners.

CARBONATE GROUP**COLORADO**

Described in Vol. XIV. Idle 1920. Geo. E. Moon owner, Breckenridge, Summit county.

CARBONERO MINE**COLORADO**

Address: Ruuttila-Brown Leasing Co., Ophir, via Ames, Colo.

Property: 8 patented and 10 unpatented claims, including the Carbonero gold-silver-lead mine at Ophir, San Miguel county.

Development: by the Shoofly tunnel, being extended in 1921. A large quantity of ore is said to be available.

Production: in 1921, up to 100 tons daily from development work. Some high grade ore has been shipped.

CARIBOU METALS CO.**COLORADO**

Address: J. G. Clark, Boulder, Colo. Mine address: Cardinal, Colo.

A reorganization, 1918, of the **Degge-Clark Mining, Milling & Refining Co.**, Boulder, Boulder county, Colo. Cap. \$2,000,000.

Property: 1,500 acres, including the Caribou silver mine, (formerly worked by the **Caribou Mines & Mills Co.**), at Caribou, 4½ miles N. W. of Nederland, Boulder county, said to have produced \$7,000,000. Due to the interlacing cross veins, with consequent inability to determine extra lateral rights, the No. Name, Sherman, Columbia, Kalamazoo, Federal, Socorro and Spencer claims have been combined to make the Caribou Metals group. Company is also said to hold title to 1,000 acres of patented timber and mineral lands north of Caribou Park, carrying tungsten ore.

Geology: ore occurs in a fissure vein, varying from 3-12' in width, with pay-ore 6 to 36" wide, showing argenteriferous galena and silver glance. This vein dips to north and crosses veins to the northwest. The main cross vein is the No Name lode, intersecting the Caribou on angle of 42°.

Development: in original claim by 7 shafts, along the main lode, main shaft being 1,040' deep; also by a 700' tunnel.

In 1920, ten sets of lessees were said to be shipping high-grade silver-lead ore from the Caribou group.

CARIBOU MINES & MILLS CO.**COLORADO**

Office: Boulder, Colo. Mine at Cardinal, Colo.

Inc. in 1916. Cap. \$200,000. Company purchased from the trustee in bankruptcy the holdings of the **Cariman Mining & Milling Co.**, in the Cardinal district of Boulder county.

Property: the Caribou and Poorman groups of claims, and the Boulder County tunnel a great development, drainage and transportation tunnel from Cardinal toward the Caribou workings. The tunnel was 6,000' long, 1921, with 7,000' more to be driven to reach the Caribou vein system. Lessees are reported to have made several moderate fortunes in 1917-1920. In the 80's the Caribou mine is said to have been considered the best silver producer in Colorado.

Equipment: at last reports included the 100-ton Caribou mill, the 100-ton Cardinal mill and a cyanide plant.

CARNOTITE PRODUCTS CO.**COLORADO**

See Radium Company of Colorado.

CARNOTITE TRUST CO.**COLORADO**

Address: care Clarence A. Wood, Denver, Colo. Mine address: Bay State Mine, Naturita, Montrose Co., Colo.

Property: carnotite-bearing claims. Ore was shipped, and a reduction plant erected in 1920.

CAROLINA MINING CO.**COLORADO**

Address: E. M. Rabb, supt., Cripple Creek, Colo.

A Boston corporation operating under bond and lease the Colburn-Ajax property on Bull hill, Cripple Creek, Teller county.

Development: by 2,000' shaft. Orebodies are 250' long and 4 to 8' wide, with ore reported to average better than \$20 per ton.

Idle 1919-20.

CARRIBEAN TRUST CO.**COLORADO**

Mine address: Ophir, San Miguel county, Colo. Geo. L. Bingham, mgr., at last report. A high copper concentrate is reported produced by treating the ore in a flotation plant. The Ruuttila-Brown Leasing Co., was the only operator in Ophir in 1920.

CARTER MINING CO.**COLORADO**

Address: Carroll M. Carter, mgr., Ohio City, Gunnison Co., Colo.

Officers: C. M. Carter, pres.; O. M. Carter, v. p.; B. H. Carter, sec-treas., with W. O. Murdic, directors.

Inc. 1918, in Colorado. **Cap.** \$250,000; par \$1; 100,000 in treasury.

Property: 79 claims, 750 acres, near Ohio, Gunnison county. Mine yields gold and silver ore from fissure veins in granite and porphyry. Pay shoots $\frac{1}{2}$ -10' wide, 100-900' long. Ore varies from \$2 to \$500 per ton; average \$70.

Development: by 8,000' of tunnels and 1,400' shaft, with 3 miles of mine levels, etc. No ore actually blocked out, but much nearly so.

Equipment: 3 Pelton wheels driving compressor, dynamo, and 20 stamps.

Operated part of 1920 with earnings of \$30,000 and expenses of \$40,000. Total production to date, \$1,000,000.

CASHIER GOLD MINING & REDUCTION CO.**COLORADO**

Address: P. O. Drawer 46, Warren, Pa. **Mine office:** Central City, Gilpin county, Colo.

Officers: Wm. Muir, pres.; F. M. Lockwood, sec.; E. E. Allen, treas.-mgr.; with H. P. Stone, M. A. Bliss, J. T. Meals, E. J. Lesser, W. P. Volgamore and F. L. Bensinger, directors. Wm. Auger, supt.

Cap. \$1,000,000; \$1 par; 733,614 issued.

Property: the Pittsburgh Mecker and Brooklyn mines, carrying chalcopyrite and tetrahedrite, principal value being silver, running up to 700 oz. per ton. The Pittsburgh is developed to depth of 1,000', by shaft, drifts and upraises. Average assays run 3.64 oz. gold, 7 oz. silver and 6.10% copper. Equipped with boiler, pump, hoist and drills.

A 50-ton mill was erected and operated in 1918.

Plan sinking shaft to the 1,200' level for which purpose \$30,000 was voted at directors' meeting in May, 1918. Has been a small but steady producer for years.

CASHIER MINING & MILLING CO.**COLORADO**

Property sold in 1920 to the **Royal Tiger M. Co.**, which see.

CATASTROPHE MINE**COLORADO**

Idle. Mail returned from former mine office: Boulder Falls, Boulder, Colo. In 1918, mine was operated under bond and lease by I. N. Blair, G. M. Newmeyer, and L. K. Guiler, producing ferberite ore assaying 25% tungstic oxide.

CATHERINE GOLD MINING CO.**COLORADO**

Out of business. See Vol. XIV, and Modoc Cons. Mines Co.

CENTRAL CONS. TUNNEL MINING & MILLING CO. COLORADO

Probably defunct. Mail returned 1921 from former office: 511 Exchange Bldg., Denver, Colo. See Vol. XIV, this book.

CHAMPAIGN MINE**COLORADO**

Address: R. H. Baxter & Co., Alma, Park county, Colo. who operated mine 1920.

CHAMPION MINE**COLORADO**

Address: Geo. S. Hewes, Blackhawk, Gilpin county, Colo. who operated and shipped ore in 1920.

CHAMPION MINING CO.**COLORADO**

Probably dead. See Vol. XIV.

CHASFIELD MINING & MILLING CO.**COLORADO**

Address: Silver Plume, Colo. Operates the Gold Belt tunnel at Silver

Plume. Clear Creek county. Property reported under lease and bond to Silver Gem Mng. Co., October 1921.

CHICAGO TUNNEL**COLORADO**

Address: care Handberg, Miller & McIntosh, Gunnison, Colo., who did work in this tunnel at Pitkin, Gunnison county, in 1920.

CHIEF MOUNTAIN MINING CO., THE**COLORADO**

Office: 810 Majestic Bldg., Denver Colo. F. G. Dinsmore, pres.; S. H. Alexander, sec.

Inc. Jan. 1, 1918, in Colorado. Cap. \$5,000,000; par 1 cent.

Property: the Old Square Deal group of 73 claims, on Chief Mountain, near Frisco, Summit county. Gold, silver, copper, lead, zinc are found in a quartz fissure vein occurring in granite.

Development: by 850' shaft and 2,300' tunnel. Until recently property reported in litigation. Idle since 1919.

CHIPETA MINING., MILLING & SMELTING CO.**COLORADO**

Address: Ouray, Colorado.

Officers: Thos. P. Mitchell, pres., Ouray, Colo.; Matt Karcich, v. p., Trinidad, Colo; J. J. McCarthy, sec., Ouray; Jos. Dalass, treas., Trinidad.

Inc. June, 1918, in Colorado. Fully financed by September, 1919.

Property: the H. A. C. property, or Romeo-Juliet gold-silver mine, 53 claims, 547 acres, in the Bachelor district, near Ouray, Ouray county.

Operated during 1920, but no ore shipped, though a 20' vein of mill ore was cut on the 750' level.

Equipment: includes electric power line and compressor. Company's stock sold largely to coal miners of eastern Colorado.

CHRISTMAS GOLD MINING CO.**COLORADO**

See Vindicator Consolidated Gold Mining Co.

CHRYSOLITE MINE**COLORADO**

Address: M. L. Buchanan & Co., Leadville, Colo.

Property: claims on Fryer hill, Leadville district, Lake county. Ore carrying 11 oz. silver per ton and 40% lead was being mined in 1920.

CIMARRON MINE**COLORADO**

Address: John M. Wagner, Telluride, San Miguel county, Colo. Mine and mill operated in 1920.

C. K. & N. MINING CO.**COLORADO**

Probably dead. Described in Vol. XIV of this book.

CLARE MARIE MINING CO.**COLORADO**

Address: Central City, Gilpin county, Colo. Mine operated during 1920; ore is silver-lead, but none was shipped.

CLEAR GRIT MINE**COLORADO**

Address: Peck & Peterson Lease, 314 E. 3rd St., Leadville, Lake Co., Colo.

CLIMAX MOLYBDENUM CO.**COLORADO**

Associated with the American Metal Co., Ltd.

Office: 61 Broadway, New York. Mine office: Climax, Colo.

Officers: B. F. Philipson, pres.; J. Loeb and Hy. Bruere, v. p.'s; J. B. Beaty, sec.-treas.

Property: about 600 acres, on Bartlett Mountain, about 16 miles N. E. of Leadville on South Park Branch of Colorado & Southern R. R. Also, the adjoining property, at Buffehrs, acquired in 1918 from the Molybdenum Products Co.; is equipped with 2-mile aerial tramway and 250-ton mill, in which a secret process for treatment of molybdenite is said to be used.

Geology: lode formation is thickly foliated quartz-porphry and decomposed granite or alaskite granite, with disseminated stringers of molybdenite and a little iron pyrite. Molybdenite, the yellow oxide, appears in considerable amount where oxidation has occurred.

Development: construction started July, 1917, and first shipment was reported Feb., 1918. Mining is done through two tunnels, the upper one 12,100' above sea-level is 830' long. Near the portal crosscuts are driven at

right angles for 400' both ways. Another adit, 300' lower down, is to be lengthened to 2,200'. In the lower one the E. W. contact dips 70° to the S. E. Mining is done by parallel shrinkage stopes 800' by 25' with pillars of the same width between. It is planned to carry stopes to surface and break down the intervening pillars. Company has developed 25 acres of patented ground. Purchase of property, development and erection of plant, called for expenditure of \$600,000 to October, 1918.

Equipment: includes 4,700' tramway and mill of 1,000 tons daily capacity. Employs Minerals Separation process.

Production: \$500,000 worth of 70% molybdenite up to May, 1918.

The Climax is the largest molybdenite mine in the world, and is admirably managed, its output being about 60% of the total production of molybdenum ore.

The mine has been closed since April, 1919 on account of the low price of molybdenum.

C. M. S. MINES CO. COLORADO

Address: Creede, Colo.

Property: the Solomon silver mine near Creede, Mineral county. Not operated since 1919.

COBB MINE COLORADO

Address: H. S. Victory, Jamestown, Boulder Co., Colo., who operated mine 1920.

COBURG MINING CO. COLORADO

Address: Lake City, Colo.

Property: the Coburg mine at Lake City, Hinsdale county. Ore carries gold, silver, lead, and copper. Operated, but shipped no ore, during 1919-20.

COCHRAN BROTHERS COLORADO

Address: 2024 Spruce St., Boulder, Colo. Operated the No Name mine at Wall Street, Boulder county, in 1920.

COCOMONGO MINES CO. COLORADO

Address: 552 Ohio Bldg., Toledo, Ohio.

Property: the Cocomongo silver-lead mine at Bonanza, Saguache county. Mine and mill both operated and shipments made in 1920-21.

C. O. D. CONS. GOLD MINING & DEVELOPMENT CO. COLORADO

Letters returned from former address: Cripple Creek, Colo.

Officers: L. A. Van Tilborg, pres.; Claude Sachs, sec.-treas. E. J. Evans, supt.

Inc. 1915. Cap. \$200,000; shares 10¢ par.

Property: the C. O. D. mine in Poverty Gulch, Cripple Creek district, Teller county, which was one of the old-time producers, credited with an output of \$1,000,000 in gold. The main 3-compartment working shaft was bot-tomed at 800', with the 10th level the lowest. Drained by Roosevelt tunnel.

Equipment: includes a 65-h. p. air compressor, hoist, etc.

No production reported since 1919.

COLBURN-AJAX GOLD MINING CO. COLORADO

Address: 416 E. 10th Ave., Denver, Colo. **Mine address:** Victor, Colo.

Reported Dec., 1916, to have bought the **Ajax Gold Mining Co.** for \$480,400.

Officers: E. A. Colburn, pres.; Wm. Lennox, v. p.; B. L. Gorich, sec.-treas., with E. A. Colburn, Jr., and C. H. Dudley, directors.

Cap. \$500,000; \$1 par; none outstanding.

Property: 11 claims patented, 33 acres, on southwest slope of Battle Mountain, Cripple Creek district, Teller county, shows quartz fissure veins in granite, phonolite, and basalt. Veins dip 72° S. W. with strike of N. 32° W. Lessees found good gold ore in the Ajax mine from the 400' to the 2,000' levels. The veins are from 2 to 4' wide, and the ore is probably the extension of ore-shoots previously worked. Average grade of ore shipped in 1917 was \$18.64 per ton.

Development: is by means of the 2,000' Ajax shaft, with over 20 miles of underground workings.

Equipment: includes a steam hoist and 40-drill air-compressor. Out-put to date said to total \$5,000,000. Property operated by lessees.

The Ajax mine, formerly held under bond and lease, was relinquished in 1920. See **Ajax Leasing Co.**

The Mexican Metals Co., has a 5-year lease on the mine, from 1917, and the **Carolina Mining Co.** was also reported working in the mine.

COLD SPRING MINING CO. COLORADO

Address: Boulder, Colo.

Owens the King No. 1 and No. 2 at Crisman, Boulder county, worked during 1920.

COLDWATER COPPER MINING CO. COLORADO

Out of business. See Vol. XIV. The Wolverine mine, formerly owned by this company, is at Cowdrey, Jackson county, and is operated by Burr Lobdell.

COLE MINING CO. COLORADO

Succeeded by **Silver Plume Mines Co.**, which see.

COLLOM MINE COLORADO

Address: Tuck & Co., Idaho Springs, Clear Creek Co., Colo., who operated this gold-silver mine in 1920, but shipped no ore.

COLOMA MINING CO. COLORADO

Mail returned from former address: Central City, Gilpin county, Colo.

See Vol. XIV. for litigation, etc.

COLONEL SELLERS MINE COLORADO

Controlled by **Empire Zinc Co.**, which see.

COLORADO-ARIZONA MINES CO. COLORADO

Address: Garfield, Colo.

Property: the Madonna gold-silver-lead-zinc mine at Garfield, Chaffee county. Operated and shipped ore, 1919. No shipments 1920-21.

COLORADO BLUE BELL MINING CO. COLORADO

A promotion of W. M. Sheridan & Co., indicted by Federal authorities for many fake promotions in July, 1919.

COLORADO-CARR MINING CO. COLORADO

Mail returned 1921 from former mine office: Central City, Gilpin county, Colo. Harry L. Elman, mgr. Operated in 1916, after many years of idleness, and \$2,000 shipments reported in 1917.

COLORADO CENTRAL MINES CO. COLORADO

Office: 412 Boston Bldg., Denver, Colo.

Succeeded to all assets of Colorado Central Mining Co. in 1918. Company operated both mine and mill in 1919 and 1920, but on June 23, 1920 was declared bankrupt and its affairs placed in hands of a trustee. See Vol. XIV for description of property.

COLORADO CENTRAL MINING CO. COLORADO

Described in Vol. XIV. Succeeded by **Colorado Central Mines Co.**

COLORADO CONCENTRATING CO. COLORADO

Controlled by **Silver Mining & Reduction Co.**, which see.

COLORADO & CONNECTICUT GOLD MINING CO. COLORADO

Property reported turned over to **National Finance and Holding Co.**, Toledo, Ohio., which see.

Mail returned from former address: Lake City, Hinsdale county, Colo.

COLORADO CONSOLIDATED MINES & POWER CO. COLORADO

Address: Major French, Sherman, Colo., or Lake City, Hinsdale Co., Colo.

Property: the Black Wonder mine at Lake City, Hinsdale county. A power plant and mill were erected 1921. Company cleaned out old mine workings, built dam and pipe line for power plant, and altered mill, built 25 years ago, changing from chlorination to flotation.

COLORADO CO-OPERATIVE MINING CO. COLORADO

Address: William G. Griffin, mgr., La Plata, via Durango, Colo.

Property: 18 miles N. W. of Durango, in La Plata mountains, shows 5 veins running to a common center, opened by 20 tunnels and open cuts.

COLORADO FUEL & IRON CO.**COLORADO****General office:** Fred Farrar, sec., Boston Bldg., Denver, Colo.

Inc. Oct. 21, 1892, in Colorado. **Cap.** \$44,200,000 com., and \$2,000,000 pfd.; of which \$34,235,500 and \$2,000,000 are issued. Funded debt outstanding Dec. 31, 1918, \$5,835,000, general mortgage 50-year, \$1,000 gold 5s., due Feb. 1, 1943; general mortgage 6s, \$40,000; Grand River Coal and Coke, 1st mortgage, 6s. \$846,000; Colo. Ind. Co. 1st mortgage 5s, \$37,630,000. Total funded debt, \$44,351,000.

Property: besides steel works at Pueblo, Colo., and coal mines, company has iron mines in Colorado, New Mexico, and Wyoming.

Production: from the iron mines: 813,728 tons in 1912; 853,878 in 1913; 614,039 in 1914; 441,026 in 1915; 709,601 tons in 1916; 886,909 in 1917; 809,491 in 1918; 715,145 in 1919; 756,682 in 1920; 398,313 in 1921.

The iron mines of this company warrant its inclusion in the Handbook but details of revenue from coal, coke, iron and steel are omitted.

Company is practically the only metal mine operator in Wyoming, mining iron ore at Sunrise. In 1921, company took lease on large iron deposit on Apache Indian reservation near Winslow, Ariz. It is a large well managed progressive company.

COLORADO GILPIN GOLD & RADIUM MINING CO. COLORADO**Office:** 517 Drexel Bldg., Philadelphia, Pa.

Officers: Wm. Wright, pres.-gen. mgr.; Hon. Edw. Hart, v. p.; R. R. Grumer, sec.-treas., at last accounts.

Property: the German, German Annex, German No. 2 and the Belcher Mines, at Central City, Gilpin county, developed to depth of 350' and reported to carry a vein, from 18" to 2' thick, containing gold and pitchblende.

Equipment: included power plant, compressor, etc. A notable shipment of 112 tons of ore, valued at \$85,000 and estimated to contain 715 milligrams of radium, was sent to the Colorado School of Mines for the U. S. Bureau of Mines in 1916. Is a close corporation which refuses information concerning its operations.

COLORADO GOLD DREDGING CO.**COLORADO**

Dead. Was controlled by General Development Co. and owned placer claims near Breckenridge, Summit county. Dissolved and liquidated in 1918.

COLORADO GOLD KING MINING & EXPL'N. CO.**COLORADO****Address:** 1646 Grant St., Denver, Colo.

Operated a gold-silver mine at Tolland, Gilpin county, during 1920, but shipped no ore.

COLORADO MANGANESE MINING & SMELTING CO. COLORADOIdle and probably defunct. **Former address:** Denver, Colo.

Property: Black Diamond mine, 5 claims in western part of San Miguel county, 50 miles by road from Placerville, on the D. & R. G. R. R. Formerly shipped ore to rail by burros.

Development: comprises 250' of tunneling.**COLORADO METAL MINING ASSOCIATION****COLORADO****Office:** 324 Tabor Opera House Block, Denver, Colo.

Officers: G. M. Taylor, pres.; Jesse F. McDonald, R. M. Henderson and Bulkeley Wells, v. p.'s A. M. Collins, treas.; M. B. Tomblin, sec. G. E. Collins is governor, and J. F. Welborn, C. A. Chase, and G. A. Stahl are vice-governors.

Connected with the American Mining Congress. Is an organization formed to protect the mining industry and to foster an interest in mining.

COLORADO METALS & CHEMICAL CO.**COLORADO**

Controls the Fourth of July Group in Boulder county, Colo., jointly with the **Cons. Copper M. M. & Sm. Co.**, and property is described under latter title.

COLORADO MINE**COLORADO**

Address: Walter & Pughe, Gold Hill, via Salina, Boulder Co., Colo. Mine at Summerville, shipped gold-silver ore in 1920.

COLORADO MINERAL SEPARATION CO. COLORADO

E. R. Winn, former secretary, reports company dissolved and assets distributed. See Vol. XIV for account of corporation and holdings.

COLORADO MINING AND DEVELOPMENT CO. COLORADO

W. S. Leebrick, pres., Idaho Springs, Colo.

Property: Little Mattie mine, Idaho Springs. Reported sold to John B. Fowler and M. G. Hansom for \$41,000, but sale contested in District Court. Company said to have successfully operated the mine for 40 years, prior to 1918.

COLORADO MINING LAND & INVESTMENT CO. COLORADO

Idle. No recent returns. **Office:** Walsenberg, Colo. Mine near Hillside, Fremont county, Colo. E. L. Neely, pres. and mgr.

Inc. 1911, in Colorado. **Cap.** \$750,000; shares \$1 par.

Property: 110 acres, owned partly in fee and partly leased, said to show gold, silver, copper and lead which assayed to \$30 per ton.

COLORADO PAYROCK SILVER MINES CO. COLORADO

At last accounts address was: E. C. Bennett, sec.-treas., Kenmark Hotel, Denver, Colo. Ernest Le Neve Foster, supt.

Cap. \$250,000; 50¢ par.

Property: the Pavrock mine at Silver Plume, Clear Creek county,—an old mine "that has produced millions."

Shares advertised at 20¢ in 1917; no later sales reported.

COLORADO PITCHBLENDÉ CO. COLORADO

Dead and property now owned by the J. Gillingham Hibbs Ore Co., which see, Vol. XIV for history of old company.

COLORADO SILVER MINES CO. COLORADO

Address: D. E. Brown, fiscal agent, 210 Kittredge Bldg., Denver, Colo.

Officers: Admiral G. H. Barber, U. S. N., pres.; G. C. Felton, v. p.; Frank Hunt, sec.-treas.; Theo. D. Benjovsky, E. M., gen. mgr.; with M. R. Foley, E. O. Phlegar, J. R. Riedy, and A. V. Dickson, supt., directors.

Inc. 1920, in Colorado. **Cap.** \$1,000,000; \$1 par.

Property: the Alie Bell gold silver mine at Romley, Chaffee county, developing in 1919 and 1920.

Development: by tunnels. A raise between No. 3 and 4 levels is said to have opened a continuous shoot 400' long. In May, 1920, reserves were estimated to be 18,000 tons. Shipments to Salida averaged \$12.13 for mill ore and \$24.40 per ton for sorted ore.

Equipment: over \$75,000 has been spent, and it includes steam power, compressor, shops, ore-house, and dwellings. In stock selling campaign 1920, company advertised extensively. Stock being offered at par.

COLORADO-SUPERIOR MINING CO. COLORADO

Subsidiary of the **Metals Exploration Co.**

H. G. Polsgrove, mgr.; Isaac Partanen, supt., Telluride, Colo. Company owns the Black Bear Mining Co.

Officers: Bulkeley Wells, pres.; O. J. Larson, v. p.; Aylmer Reeves, sec.; A. D. Snodgrass, asst. sec.; Edwin Hendrickson, treas., with E. B. Adams and Harry Johnson, directors.

Cap. \$1,000,000; shares \$1 par; 561,635 outstanding. Bonds authorized \$250,000 (8%); issued, \$156,100.

Property: the Black Bear mine, 322 acres, patented, at Telluride, San Miguel county, at an altitude of 12,500'.

Ore: sulphides of lead and zinc containing gold and silver in a vein averaging 10' in width and supposed to be a continuation of the Argentine vein in the neighboring Tomboy mine.

Development: to depth of 1,100' by shaft, 500' from N. W. end of property, and crosscuts totaling 5,100' of workings.

Ore is treated at the Smuggler Mng. Co.'s mill.

Ore reserves were estimated at 100,000 tons, which averaged better than \$5 per ton, with 75,000 reported blocked out, July 31, 1917.

Equipment: included electric hoist, 2 compressors and a 250-ton flotation unit.

Production: for 1916, 7,055 oz. gold, 68,306 oz. silver, 2,354.459lb lead, 2,233.536lb zinc and 15,509lb copper.

Lead concentrates averaged 1.81 oz. gold, 18.47 oz. silver, 48.88% lead, 4.90% zinc, 1% copper; zinc concentrates: 0.27 oz. gold, 6.95 oz. silver, 6% lead, 23.96% zinc. Recovery ran from 40% for zinc to 75% for lead. About 6,548 tons of concentrates were produced. Concentration ratio was 7.4 to 1.

See **Radium Co. of America.**

COLORADO TUNGSTEN GOLD & SILVER CO. COLORADO

Out of business. Formerly controlled by Morton & Co., 15 State St., Boston.

COLORADO-UNITED MINES CO. COLORADO

Address: Citizens Natl. Bank Bldg., Boulder, Colo. Mines at Wall Street, Boulder Co., Colo. Arthur J. Hoskin, geologist.

Inc. 1920, in Colo. Cap. \$150,000.

Property: the Concord, Great Britain, Forest and lesser groups, near Wall Street. A large force of men was employed 1920, developing Concord, Ogalala, Walters and Forest mines.

Equipment: a 100-ton mill was erected 1920.

COLORADO UTAH MINES HOLDING COMPANY COLORADO

Office: 411 Bonfils Bldg., Kansas City, Mo.

Officers: Charles E. Havener, pres.; Guy A. Swallow, v. p.; V. R. Alexander, sec.-treas. Trustees: Charles E. Havener, chrm., Kansas City; Guy A. Swallow, Topeka, Kansas; John W. Phares, Wakeeney, Kansas. Alfred Bell, cons. eng.; Victor Blanc, Denver, Colo., analytical chemist and assayer; Judge Chas. L. Kagey, Beloit, Kans., couns.; and William S. McClintock, Kansas City, Mo., attorney.

Organized under Trust Estate Laws of Missouri, August, 1921. Cap. \$50,000,000; par \$100; 37,500,000 common and 12,500,000 preferred.

Properties: (1) all the holdings of the Utah-Colorado M. & M. Co. of Denver, Colo. (listed elsewhere in this Handbook.) (2) the personal properties of Charles E. Havener, comprising: 320 acres near Willard, Utah, covering "Willard Iron Mountain;" 120 acres smelter site, adjoining the city limits of Denver, at Manchester Heights and Mississippi Sts.; the Hartman patented claim: 13 patented claims formerly owned by the Baby Eddie Mining Co., 5 patented claims of the Crazy Girl group; all located in Clear Creek county, Colo. Company also has other properties under contract of purchase. All these properties are now controlled by this company.

Development: (see Utah-Colo., M. & M. Co.) comprises the 200' Hartman tunnel in valuable chemical ores; 180' Baby Eddie tunnel, cutting several fissure veins of silver-lead ore carrying Bismuth and Uranium of high value; 980' Crazy Girl tunnel, which adjoins the Baby Eddie, 250' farther up the mountain. These two tunnels cut the same veins, and drifting and stoping was done on them in 1921. At the Willard Iron Mountain, a large tonnage of surface iron is shown and proven by a number of shafts, one of which is 140' deep. About 10,000 tons of this ore has already been shipped. The 140' shaft proves that underneath the iron, the schist carries silver, gold and copper values. This entire property is said to be a blasting and steam shovel proposition.

Ore values: shipments from the Crazy Girl show values said to run from \$50.00 per ton up. The Willard Utah Iron is the best grade obtainable and commands the highest market price.

COLORADO-UTAH MINES OPERATING CO. COLORADO

Dead, but details unobtainable. See Vol. XIV. of this book, for description.

COLORADO VANADIUM CO. COLORADO

Company bankrupt, 1921; John L. Stivers, Montrose, Colo., receiver. Company said to owe \$400,000, and about 50 suits are pending.

Address: Sawpit, San Miguel, Co., Colo.

Officers: F. G. Carpenter, pres.; and Frank Gardner, mgr., Sawpit, Colo. Inc. 1917. **Cap.** \$3,000,000.

Property: the Bear Creek and Dragon mine and the Sawpit mill, near Fall Creek station, Telluride, San Miguel county; also claims on the Bear Creek side of the San Miguel river. Late in 1920, vanadium ore had been discovered in the White Cliffs near Telluride.

Equipment: includes a compressor, 2,300' aerial tram and a concentrating plant.

Operations discontinued 1920, owing to bankruptcy of company.

COLTUCK DEVELOPMENT CO. COLORADO
Address: 948 Gas & Electric Bldg., Denver, Colo. **Mine address:** P. McDonough, mgr., Empire, Colo.

Inc. Oct. 2, 1919, in Colorado, as a Declaration of Trust Co.; Wm. G. Kroepe, trustee. **Cap.** \$150,000; par \$100; \$143,900 in treasury.

Corporation is a leasing company operating for 2 years past in only two mines at Empire, Clear Creek county, mainly on the Mint mine, developing low grade orebodies and looking for shipping ore. No shipments to date, 1921.

COLUMBIAN MOUNTAIN MINING & LEASING CO. COLORADO
Address: 934 17th St., Denver, Colo.

Property: a silver-lead-copper mine at Empire, Clear Creek county, on which the company is driving a new tunnel, in the canyon below Georgetown. A promising vein system is to be cut.

Equipment: includes a 7-drill compressor and various buildings, etc.

COLUMBIA SILVER & GOLD MINING CO. COLORADO
Mail returned from former office: Tabor Block, Denver, Colo.

Officers: S. B. Brigham, pres.; with L. S. Ordway, P. L. Hanson, C. R. Braiser, and C. B. Demarest, directors.

Inc. 1919, in Colo.

Cap. \$25,000; \$1 par.

Property: 25 acres, in Jackson district, Clear Creek county, adjoining Little Mattie, Newton, and Black Eagle mines. In Sept., 1919 the Star tunnel was being driven to cut the Columbia vein. No ore was shipped during that year.

COLUMBUS MINES CO. COLORADO

Probably idle. Does not reply to letters.

Office: 905 First Nat'l Bank Bldg., Denver, Colo. Jas. Doyle, pres.

Inc. in Colorado. **Cap.** \$50,000.

Property: 3 claims in California district, La Plata county. Development work was started in 1916; in 1918, work on crosscut tunnel was being prosecuted.

COMBINATION MINING & MILLING CO. COLORADO

Office: 524 Quincy Bldg., Denver, Colo. Frank Straub, sec.

Cap. \$100,000; 1 cent par.

Property: A silver-lead-zinc mine at Sulphur Springs, in Grand county, operated but not shipping in 1920. Company also owns 147 acres in La Plata district, Grand county, which is developed by a 700' tunnel. Ore carries gold, silver, copper, and zinc. The company also had over 3,000 acres of oil lands under lease in Wyoming.

COMMODORE LEASE COLORADO

Address: 828 Equitable Bldg., Denver, Colo.

Operated the mine of this name at Creede, Mineral county, in 1920.

COMMONWEALTH MINING CO. COLORADO

Office: 925 Foster Bldg., Denver, Colo.

Property: the Magnolia gold-silver mine and Eddy mill at Montgomery, six miles north of Alma, Park county. Also reported in control of the Lee Goss, Peru Extension, Populist, Prospect, Palmetto, Columbia, Logansport, and Chicago mines.

Geology: Archean granite is overlain by successive beds of Cambrian quartzite, Silurian white limestone, and Carboniferous or blue limestone.

Quartzite is divided by an intrusive flow of white porphyry. Orebodies occur as veins and masses, cutting all these rocks.

In the **Magnolia**, a shoot 8' thick, 12' high, and running \$30 per ton was opened. Company has aerial tramway, 3,800' long and a 500-ton cyanide mill.

Operated part of 1920, but shipped no ore.

COMMONWEALTH SILVER MINES, INC. COLORADO

Address: care I. F. Cleaveland, 149 Broadway, New York.

Is a consolidation of the **Gem Mining Co. and Gem Tunnel** company, the latter controlling the **Newhouse or Argo** tunnel.

Officers and directors: J. F. Cleaveland, pres.; I. Bennett Southard, 217 Broadway, New York, John A. Forney and A. L. Kenyon, v. p.'s.

Property: includes the Little Mattie mine of the Golden Edge Co., also includes all that of the Gem Mining Co. and includes control of the **Newhouse (Argo)** drainage tunnel, 4½ miles long, undercutting 1,100 veins of Seaton mountain at 2,000' below surface.

Equipment: a modern hydro-electric plant, two concentration mills, etc.

Appears to be a large and meritorious enterprise, but promoters have been deaf to requests for information.

COMMONWEALTH TUNGSTEN GOLD & SILVER CO. COLORADO

Out of business. See Vol. XIV

COMSTOCK MIN. MILLING & EXPLORATION CO. COLORADO

Address Central City, Colo.

Operated the Comstock silver mine near Central City, Gilpin county, part of 1920. No ore shipped.

COMSTOCK TEDDY BEAR MINE COLORADO

Address: B. Ross, Trustee, 516-18th St., Denver, Colo. Mine is at Lawson, Clear Creek county. Operations were suspended in 1920.

CONGRESS COPPER MINE CO. COLORADO

Address: care Frank L. Ross, Gas & Electric Bldg., Denver, Colo. Company controlled by Mr. Ross and F. B. Goudy.

Directors: J. B. Ross, pres.; Guy W. Mallon, v. p.; Frank L. Ross, sec-treas.,-mgr.

Inc. April 16, 1908, in Colorado. Cap. \$500,000; shares \$10 par. Bonds, \$100,000 authorized, at 6%; all issued.

Property: the Guston silver mine near Red Mountain, in district of that name, Ouray county. This mine, idle except for leasors work for 25 years past, is said to have produced \$7,000,000 in silver with ¾ of the vein unexplored. For eight years shipments of crude ore averaged \$91 per ton and for one year \$363 per ton.

The Congress mine, is also under personal control of Mr. Ross, 3 claims, 20 acres, the Congress, Arlington and Midway lodes in the Red Mountain district, Ouray county, 12 miles S. of Ouray and 12 miles N. of Silverton.

The Congress is a famous old mine worked 1884-93, said to have produced about \$400,000 worth of ore, averaging 18% copper and 11oz. silver per ton, with small gold value. Also owns the Guston mine, in same district.

Development: by 400' shaft with about 1,500' of workings, showing chalcocite, reported by company to average about 5 to 10% copper, 10 oz. silver, and ½ oz. gold per ton. Mine has electric equipment, including hoist and compressor plant.

In May, 1919, operations were suspended, but company expects to resume when the price of copper reaches a profitable figure.

CONGRESS GOLD & COPPER MINING CO. COLORADO

Out of business. Described in Volume XIV. Property now owned by

Congress Copper Mine Co.

CONQUEROR MINING REDUCTION & POWER CO. COLORADO

Company out of business for 5 or 6 years, but not yet dissolved. Property transferred to **Golden Empire Mining Co.** and, when legal matters are settled, the Conqueror Co. will be dissolved. In the reorganization, old shares were exchanged for new.

CONSOLATION MINE**COLORADO**

Address: J. O. Evans, Jamestown, Boulder Co., Colo. Mine operated for fluorspar part of 1920.

CONSOLIDATED COPPER M., M. & SM. CO.**COLORADO**

Probably dead. Mail returned from former address: Eldora, Boulder county, Colo. See Vol. XIV.

CONSOLIDATED FRANKLIN MINES CO.**COLORADO**

Mail returned from former address: Equitable Bldg., Denver, Colo.

Property: the East and West Franklin gold-silver-lead mines at Idaho Springs, Clear Creek county. Shipments made, 1919, but idle 1920-21.

CONSOLIDATED LEASING CO.**COLORADO**

Address: care Dr. C. E. Kahler, 998 Franklin Ave., Columbus, Ohio. Mine address W. T. Harpel, supt.-asst. mgr., Eldora, Colo.

Officers: Dr. Kahler, pres., E. L. Rexford, v. p.; Wm. G. Groezinger, sec.-treas., 105 Gates St., Columbus, Ohio.

Property: a lease on the Gold Dust mine of the Swarthmore Cons. Mng. Co. (which see), near Eldora, Boulder county. A 25-ton mill was erected in 1920, and was operating in August.

CONSOLIDATED MINES DEVELOPMENT CO.**COLORADO**

Idle 1919 and 1921. No recent returns.

Office: 717 Majestic Bldg., Oklahoma City, Okla. **Mine** at Alice, Colo.

Officers: L. T. Samuelson, pres.; J. A. Best, v. p.; W. C. Bickford, sec.-treas., with W. G. Harper and W. G. Luckenga, directors. W. G. Harper, mgr.

Inc. in Colorado. **Cap.** \$1,500,000; \$1 par; 850,000 outstanding. Annual meeting, second Monday in October.

Property: 10 claims, 2 patented, 102 acres, in Upper Clear Creek and Argentine districts, Clear Creek county, said to show a quartz vein in granite, 6' wide, running N. E.-S. W. and to assay \$18 in gold, silver, and copper.

Development: by tunnels, 1,100' and 400' long, said to prove 200,000 tons of ore.

Equipment: 7-drill compressor, electric power and a flotation unit.

A 100-ton mill was planned.

CONSOLIDATED MINES & REDUCTION CO.**COLORADO**

Dormant, if not dead. Mail returned from former office: 433 Century Bldg., Denver, Colo. **Mine office:** 412 E. Bennett Ave., Cripple Creek, Colo. Fully described in Vol. XIV.

CONSOLIDATED REALTY & INVESTMENT CO.**COLORADO**

No returns from former address: Boulder, Colo. See Vol. XIV. for description.

CONSOLIDATED SPECIE PAYMENT MINING CO.**COLORADO**

Address: Idaho Springs, Colo. **Inc.** in 1917.

Property: the Two Brothers gold-silver claims near Idaho Springs, Clear Creek county. Veins contain gold-silver-copper ore, developed by 2,800' tunnel. The vein was intersected 2,800' from the portal of the tunnel and 1,000' of drifting has been done to the west. Average grade of ore said to be around \$100 per ton. Regular shipments were being made in October, 1919.

Equipment: includes electrically-driven air-compressor and a 20-stamp mill. Worked by lessees.

CONTACT MINE**COLORADO**

Address: Peter Peterson, Rollinsville, Gilpin Co., Colo. This gold-silver mine was worked but shipped no ore, in 1920-21.

CONTINENTAL MINES DEVELOPMENT CO.**COLORADO**

Address: 307 Mining Exchange Bldg., Denver, Colo. Company operated the Idaho Pride mine at Idaho Springs, Clear Creek county, part of 1920, shipping some ore.

CONTINENTAL MINES, POWER & REDUCTION CO.**COLORADO**

Office: 935 Equitable Bldg., Denver, Colo. **Mine office:** Lombard, Clear Creek county, Colo.

Officers: Henry I. Seemann, pres.-gen. mgr.; Cyrus Locker, v. p.; Wm. H. Warinner, 2nd v. p.; A. W. Craig, sec.-treas.

Inc. Nov. 7, 1905, in Colorado. **Cap.** \$5,000,000; \$1 par; issued \$4,370,761. Annual meeting, first Wednesday in November.

Property: 182 claims, 70 patented, 2,000 acres, in the Lincoln district, Clear Creek county, said to show 75 fissure veins and contact deposits, ranging in width from 2' to 75'. Country rock is gneiss, schist and granite, with porphyry dikes. Veins proved to depth of 1,000' and traceable 4 miles. Ores are sulphides, reported to carry 1 to 7% copper, 1 to 35% lead, from a trace to 6% zinc, 1 to 200 oz. silver and \$5 to \$500 gold per ton.

Development: by approximately 4 miles of workings including shafts of 135', 150' and 200' and various tunnels, one about 4,000' long. The mine is estimated by management to show 300,000 tons of ore.

Equipment: includes electric power, 150-h. p. at mine and 150-h. p. at mill, 25-h. p. hoist and 7-drill air-compressor. There are about 20 buildings.

The mill has 20 stamps, one 8x12' crusher, 3 Card tables, 3 Wilfley tables and 2 sizers, capacity 100 tons per day. Company planned continuous development and was to add an oil flotation plant to the mill, increasing its capacity to 200 tons per day, and selling commercial current. At last accounts the president reported that nothing was being done because of lack of money.

CONTINENTAL MINING CO.

COLORADO

Office: Silverton, Colo.

Officers: J. B. Allen, pres.; Silverton, Colo. J. H. Slattery, v. p.; W. A. Way, sec., with M. J. Heller, supt. and J. H. Slattery, directors.

Inc. in Colorado. **Cap.** \$1,500,000; \$1 par; 23,000 shares in treasury. Transfer office: Silverton. Annual meeting in December.

Property: 18 claims, about 150 acres, including the Buffalo Boy mine, in the Eureka district, San Juan county, said to show quartz vein in fissure carrying gold and silver. Company spent \$8,000 on development work in 1916.

Development: by vertical shaft and tunnels. Tunnels are 3,000' long with 4,000' of development, having a depth of 500'. Ore-shoot said to be 1,500' by 350', and 200,000 tons blocked out. Average assays were reported to be \$18.

Equipment: electric hoist and electric pump.

Operated part of 1919, but shipped no ore. Litigation among the stockholders settled 1920.

CO-OPERATIVE METAL MINES CO.

COLORADO

Address: 309 Charles Bldg., Denver, Colo.

Operated the W. I. M. Tunnel at Empire, Grand county, in 1920, developing but not shipping gold-silver-lead ore.

CO-OPERATIVE MINING & LEASING CO.

COLORADO

Address: 936 West Colorado Ave., Colorado Springs, Colo.

Property: a lease on Block 8, School Section 16, adjoining the Isabella mine at Cripple Creek, Teller county.

Development: by 1,500' of drifting on upper levels and 875' shaft with levels at every 135'. In the lower levels a stope 600' long 5' to 8' wide and 125' high, was reported to average \$12 to \$14 a ton, but could not be mined owing to water. Company had 200,000 tons of tailings said to run \$3 per ton.

Operated part of 1919.

COPPER & SILVER KING MINING & DEVELOPMENT CO. COLO.

Address: 512-515 Exchange Bldg., Denver, Colo.

Operated in 1920, the Bartlett & Copper King gold-silver mines at Fort Collins, Larimer county, but shipped no ore.

COPPER CREEK MINING CO.

COLORADO

Corporation dissolved Oct. 20, 1919. See Vol. XIV.

COPPER KING MINES PRODUCTS CO.**COLORADO**

Dead. See Vol. XIV for description and record.

CORNUCOPIA LEASING MINING & MILLING CO. COLORADO

Address: $\frac{c/o}$ H. E. Biggle, 1054 Adams St., Denver, Colo. John E. Havens, pres., 1131 York St., Denver, Colo. **Mine address:** Silver Creek, Central City, Colo.

Company actively developing an extension of the Cornucopia gold mine and 2 veins of Perigo system, in Gilpin county, connecting workings with Reform mine. Company operated mine and mill during 1920.

CORPORATION OF AMERICAN MINES COLORADO

Address: 77 Broad St., New York. **Mine address:** M. T. Gilchrist, supt., Dumont, Colo.

Officers: A. R. Specht, pres.; E. L. Keiser, Milton, Pa., v. p.; John So-wall, sec.-treas., with Geo. L. Robinson, J. S. Malone, C. W. Barnekov and G. E. Scofield, directors.

Inc. April, 20, 1917, in Ariz. **Cap.** \$3,000,00; par \$1; issued 1,693,738. Registrar & Transfer Co., 120 Broadway, New York.

Property: the Specht, or Clear Creek and Gilpin tunnel, 90 claims, 6 patented, 5,562 acres, at Dumont, Clear Creek county. Mine produces gold and silver ore.

This is an ambitious project to drain and work the company mines 1,000' below existing workings and to collect toll from mines owned by others. The project is sound, and if the orebodies of the various mines continue downward and to the tunnel level, the company's operations here may prove as profitable as those of the Newhouse and other long tunnels (see Gem Mining Co.) Property examined and endorsed by E. LeNeve Foster and various other engineers.

CORRY CITY MINES**COLORADO**

Mail returned from former address: Silver Plume, Clear Creek county, Colo. William Copper, mgr.

Early in 1919, it was reported that operations would be started driving the Desch tunnel 100' and operating the Neshotah mill. No later news obtainable.

CORTELLINI, JOHN**COLORADO****Address:** Leadville, Colo.

Property: the above leases the Dolomite and Garbutt gold-silver mines, the P. O. S. silver-lead mine, and the Small Hopes zinc mine, in the Leadville district, Lake county.

The Dolomite and Small Hopes operated part of 1919, but only the latter made shipments, the Garbutt was worked all the year, but operations ceased at the P. O. S.

COTTON TAIL MINING CO.**COLORADO****Address:** Cripple Creek, Colo.**Property:** the Red Bird gold mine at Cripple Creek, Teller county.

Operated part of 1919, but shipped no ore. Idle 1920.

COTTONWOOD GULCH MINING CO.**COLORADO**

Address: Canon City. **Mine address:** Eureka Mtn. mine, Buena Vista, Chaffee Co., Colo.

Operated this silver-lead mine part time in 1920, but shipped no ore.

CRAMER & CO.**COLORADO****Address:** 121 S. Toledo Ave., Leadville, Colo.

Operated the Crescent, Catalpa and Star 5 mines at Leadville. Lake county, for manganese ores in 1920.

CRAWFORD MINING CO.**COLORADO**

Probably dead. Warren Prosser, c/o Mary Murphy Mining Co., 307 Boston Bldg., Denver Colo., was supt. in 1918.

Property: the Genessee mine, and mill formerly leased by James M. Hyde of Stanford University, California. The mine was operated 1917-18 and large bodies of silver-lead and copper ore opened up. No recent re-

turns. Mine idle 1920, but worked in 1919 by the Red Mtn. Mines Co., which see.

CREEDE CONTACT MINING CO. COLORADO

Address: Creede, Colorado.

Property: the Acanthus silver mine at Creede, Mineral county. Operated part of 1919, but shipped no ore. Idle 1921.

CREEDE EXPLORATION CO. COLORADO

Out of business. See Vol. XIV.

CREEDE UNITED CO. COLORADO

Dead. No operations since 1918. See Vol. XIV.

CRESSON CONSOLIDATED GOLD M. & M. CO. COLORADO

General office: 800 Exchange Natl. Bank Bldg., Colorado Springs, Colo. Mine office: Cripple Creek, Colo.

Officers: A. E. Carlton, pres.; C. K. Boettcher, v. p.; A. F. Zang, sec., E. P. Shove, treas., with Spencer Penrose, T. B. Burbridge, C. M. MacNeill, L. G. Carlton, I. T. Snyder, directors. A. L. Blomfield, gen. mgr.

Inc. Sept. 21, 1894, in Colorado. Cap. \$1,250,000; par \$1; \$1,220,000 issued; no funded debt. Transfer agent, Columbia Trust Co., New York and company office. Registrar, Bank of America, New York and Colorado Title & Trust Co., Colorado Springs, Colo. Listed on New York Curb and Colorado Springs Mining Exchange. Annual meeting 1st Tuesday after 1st Monday in September.

Financial statement for year ended Aug. 31, 1921, shows net receipts from ore sales, \$825,687; other revenue, \$5,641; Total expenses deducted, \$400,084, leaving net profit, \$431,244. Reserves for depreciation \$103,484; for depletion, \$842,812. Surplus for year, \$637,029. Net profits for 4 months to Jan. 1, 1922, were \$257,480.

Dividends: 8% in 1908; 12% in 1909 and 1910; 19% in 1911; 20% in 1912; 25% in 1913; 30% in 1914; 145% in 1915; 85% in 1916; 120% in 1917 and 1918; 100% in 1919; 20% in 1920; 10%, Jan. 10, 1922. Total to that date \$8,735,163. From Sept., 1916, to Sept., 1919, inclusive, distributions were 10¢ per month, but payments now are only made as profits warrant. Total dividends nearly \$9,000,000 to end of 1921.

Property: Cresson and the Trilby mines, about 49 acres on Raven hill, Cripple Creek, Teller county, was considered of little value, until 1914, when a sensational discovery was made in a cavern, or vug 14' by 33' by 36' found on the 1,200' level, whose walls were coated and lined with rich telluride of gold. One shipment returned \$468,637. The former owners divided \$1,200,000 in first half of 1915, and in July, 1916, sold property to the present company for over \$4,000,000.

Development: extensive by 1,935' shaft with intermediate levels at 100' intervals. For the year to August 31, 1920, drifts, crosscuts, etc., totaled 3,588', together with 907' of diamond-drilling. Workings connect with Roosevelt drainage tunnel on 1,600' level.

Ore reserves: in May, 1920, Louis R. Noble reported net value of fully developed reserves as \$1,623,987, against \$2,537,889 in Feb., 1919. This amount does not, however, include a rich strike reported on the 10th level, estimated to be 60' by 8½', and assaying \$40 per ton. Late in 1921 it was reported that the largest orebody of district had been cut between the 1,100 and 1,200' levels, which should net \$1,500,000 or \$1 per share and that ore had been found on the 1,600 and 1,700' levels. Ore production about 200 tons per day.

Productions: years ending Aug. 31: 1920, 106,626 tons; \$1,471,307 gross value, or \$14.79 per ton; \$935,853 net value, or \$8.77 per ton. The tonnage in 1919 was 94,920, and in 1918, 89,730.

In Jan., 1921, the output was 8,000 tons of ore. There were 130 men employed.

CRESTED BUTTE MINING CO. COLORADO

Address: Crested Butte, Colo.

Property: the Forest Queen silver mine at Irwin, Gunnison County. Operated during 1919, but shipped no ore. Idle 1920.

CRIPPLE CREEK DRAINAGE & TUNNEL CO. COLORADO

Address: A. E. Carlton, Colorado Springs, Colo. Is a drainage company, doing no mining.

Officers: A. E. Carlton, pres., with Irving T. Snyder, R. Roelofs, Irving Howbert, executive committee; Colo. Title & Trust Co., treas.; W. R. Waterton, sec.; T. R. Countryman, engr.; C. H. Fuller, supt.

Cap. \$1,000,000; \$1 par.

Company drove and controls a drainage tunnel through properties of Cripple Creek, Teller county, producers, from western slope of Grouse Mtn. toward the Golden Cycle and Vindicator mines at the N. E. end.

The tunnel as originally driven had a length of about 14,300'. In sections it is 9' wide, 7' high, with a ditch on one side, 2' deep and 4' wide. Grade is 0.3%. Average cost per foot of tunnel was \$27.27. the cost being defrayed by the larger companies of the district. An extension financed in the same manner was completed during 1918, giving the tunnel a total length of 22,000'. This extension, 7,700' long, passes under the Elkton and Rose Nicol mines, and laterals have been driven to connect with the Portland shaft at 1,950' and Cresson shaft at 1,800' depth. Early in 1921, the flow of water was about 1,000 gallons per minute.

CRIPPLE CREEK GENERAL MNG. & EXPL'N CO. COLORADO

Dead. See Vol. XIV.

CRIPPLE CREEK GOLD MINING CO. COLORADO

Address: Victor, Teller county, Colo. Company is a close corporation. Geo. Harris, mgr.; B. J. Corbett, supt.

Property: the Fortuna mine at Victor, first worked about 16 years ago, operated unsuccessfully for a time, closed down and again reopened in 1914.

The mine shows veins 18" to 24" wide, in contact between black schist dike and granite.

Development: by 220' shaft and drifts on the Strong vein, which traverses the property. Shaft was to be sunk an additional 300'. Two levels said to show large bodies of fair grade ore, and a few shipments reported to have assayed \$15 per ton.

Equipment: hoist, air compressor, electric compressor, and 80-h. p. boiler.

Operated during 1919, but shipped no ore. Idle 1921.

CRIST MINE COLORADO

Address: Charles E. Thompson, Livermore, Colo. This gold-silver mine at Fort Collis, Larimer county, was operated part of 1920, but no ore shipped.

CROWN POINT MINE COLORADO

Address: Schoellkopf & Stroehle Leasing Co., Idaho Springs, Colo.

Property: at Idaho Springs, Clear Creek county, operated during part of 1920. The Virginia mine is worked by same lessees.

CROWN PRINCE CONSOLIDATED MINING CO. COLORADO

Office: 948 Gas & Electric Bldg., Denver Colo. **Mine office:** Empire, Clear Creek county, Colo.

Officers: Wm. G. Krape, pres.-mgr.; J. E. Rinehart, v. p.; D. Erickson, sec.; with Daniel Erickson, directors.

Inc. June 9, 1910, in Arizona. **Cap.** \$3,500,000; shares \$1 par; outstanding, 3,433,014.

Property: the Mint and Hecla mines, 17 claims, 85 acres, near Empire. Gold-silver ore occurs in veins and is low grade.

Development: by 75' shaft and tunnels, longest 1.025', with total underground workings of 7,000'. Equipment includes electric hoist.

Production claimed to have been \$200,000 in the past. Operations in 1920 reported to consist of drifts on veins in which only low values were found as levels had not yet reached ore-shoot.

CUMBRE MINING CO.**COLORADO**

Company dissolved. See Vol. XIV.

DANA MINING CO.**COLORADO**

Office: Boulder, Colo.

Officers: Jas. B. Simpson, Boston, pres.; A. S. Coan, Boulder, v. p.; M. McClure, sec.-treas.

Property: the Hoosier group of mines at Summerville, Boulder county, worked slightly in the past. Has a 600' tunnel at roadside level, and drove a 90' crosscut, 300' from portal, disclosing silver and gold ore, in 1918.

DANIEL PETERS MINE**COLORADO**

Address: Walter E. Burlingame, Box 628, Denver, Colo. Mine at Silver Plume, Clear Creek county, contains silver-lead ore. Operated, but not shipping, 1920.

DANTE GOLD MINING CO.**COLORADO**

See Dante M. & M. Co.; also Big Toad M. & M. Co.

DANTE MINING & MILLING CO.**COLORADO**

Office: 224 Temple Court Bldg., Denver, Colo.

Officers: L. K. Aitken, pres.; W. Arthur Perkins, v. p.; A. D. Aitken, sec.; R. A. Schwab, treas.; E. P. Arthur, Jr., supt.

Inc. 1895, in Colorado. Cap. \$1,250,000; \$1 par; all issued. Company has no liabilities, and had \$17,555 cash and \$1,575 securities in the treasury, Jan. 1, 1919. Stock listed on the Colorado Springs Mining Exchange. Charter renewed Nov. 25, 1915, for 20 years.

Cripple Creek Group.

Property: Dante mine, about 10 acres, patented, in Sec. 20 on Bull Hill, Cripple Creek, Teller county. Said to show gold ore averaging \$20 per ton. Late in 1920 a strike of ore assaying \$25 per ton was reported cut on the 600' level by a sub-lessee.

Development: by 1,200' shaft with 7,000' of crosscuts and drifts, and 520' shaft with 3,800' of crosscuts and drifts.

Equipment: 75-h. p. hoist, air compressor, complete machinery plant, 1,000' of cable and surface buildings. During 1918 a cyanide plant with a daily capacity of 50 to 75 tons was installed to treat low-grade ores.

Production: (gross) to Jan. 1, 1919, \$1,213,136; in 1918, \$87,758.

Operations 1919-20 did not prove remunerative and early in 1920 an arrangement was made to take over property and liabilities of the Big Toad M. & M. Co.

Big Toad Group.

Property: 17 claims, 300 acres near Alma, Park county, held under 5 year bond and lease. Purchase price, \$50,000, to be paid at the rate of \$10,000 yearly; first payment was due Sept., 1917. Claims are on the Eastern slope of Mt. Bross, and are said to show 2 veins on the surface carrying gold, silver and lead.

Development: consists of 250' tunnel to be driven 500', and an old shaft.

Equipment: includes a 100-ton mill and 4,200' aerial tram.

In December 1920, the Edna Forest M. & M. Co., which see, was given a lease on part of the Dante mine.

DARNELL LEASING CO.**COLORADO**

Address: Del Norte, Saguache Co., Colo.

Operated the Esperanza gold-silver-manganese mine at Center, Saguache county, throughout 1920, shipping ore.

DAY STAR MINES CO.**COLORADO**

Idle 1920. No recent returns.

Main office: Marion, Ind. Mine office: Pitkin, Gunnison county, Colo. Inc. 1906, in Colorado. Cap. \$1,000,000; \$1 par; 700,000 shares outstanding. Annual meeting in August.

Officers: Isaac R. Wagoner, pres.; Edwin Caldwell, sec.; J. H. Deakin, treas.; John E. Clark, gen. mgr., all of Marion, Ind.

Property: 19 lode mining claims, 40 acres of placer ground and a mill-site in Quartz Creek, a total of 198 acres, about 9 miles from Pitkin, Gunnison county.

Development: in 1918, three tunnels, 650', 140' and 180' long respectively, had been driven on a vein showing some ore said to run 92 oz. silver, 4.35% copper, \$40 gold, 20% lead, and 20% zinc.

DEADWOOD LEASING CO.

COLORADO

Dead. See Vol. XIV. Mail returned from former address: Victor, Colo.

DEEP SHAFT MINING CO.

COLORADO

Address: Breckenridge, Colo.

Property: the Deep Shaft mine on Shock hill, near Breckenridge, Summit county. After 15 years suspension, due to litigation, mine was re-opened in 1920.

Development: by 700' shaft, deepest in district save the Brooks Snyder of Wellington Mines Co.

Equipment: electric power (Colorado Power Co.), operating hoist, compressor, and dwellings.

DENBIGH MINING CORPORATION

COLORADO

Address: 85 Devonshire St., Boston, Mass.; or Silver Plume, Colo. Temple H. Fay & Co. of Boston is interested.

Officers: W. Roch, pres.; J. F. Lindel, v. p.; G. A. Haskell, treas.; J. N. Reynolds, sec., all of Boston, Mass., with H. F. Wells and J. E. Berry, of Boston, J. J. Mendell of Manchester, Mass., and W. H. Perry of Beverly, Mass., directors. H. S. Bushnelle, mgr.

Inc. in 1916, in Colorado. **Cap.** \$1,000,000; \$1 par; all issued. Listed on Boston Curb. **Indebtedness,** \$20,000.

Property: a lease and bond for \$250,000 on the Terrible mine and other properties of the Whiting Mining & Milling Co., and of the Terrible—Dunderberg Mining & Power Co. These mines are one mile from Silver Plume, Clear Creek county. Properties have been worked for 40 years and comprise 43 patented claims, about 300 acres. The company controls a number of old-time producing mines, and the dump from the Seven-Thirty, Mammoth, Brown and Dunderberg workings, known as the "Big Slide in Brown gulch."

Ore: carrying silver, lead and zinc occurs in a fissure vein in granite and schist. Vein dips 70° N. and strikes N. E. The sulphide pay ore in each mine occurs in shoots, each over 250' long, and streaks of varying size.

Development: by a working tunnel with 7 levels above it and 7 below it, reached by a 70° shaft, 600' deep. Method of working is by shrinkage stoping. Total extent of workings is about 5 miles. A winze 70' below deepest workings is in \$50 ore for the entire depth.

Equipment: includes hoist, pump, and 100-h. p. compressor. Both water power and electricity are used. The 75-ton mill contains crushers, rolls, jigs, and tables, and can, it is said, treat the ore at the very low cost of \$1 per ton. The manager estimated 1919 that \$39,000 was needed to complete the new shaft, repair mill, and do other work.

The Big Slide property is believed to have possibilities in depth and in virgin ground, provided that funds are sufficient for the plans outlined.

The 1917-18 market campaign of Thos. W. Lawson of "Frenzied Finance" fame, sent the stock to \$2¼ with a gradual decline to 20c. in May, 1919, after the "campaign" had ended. In October, 1919, Mr. Lawson issued a statement claiming that he dropped the stock because 400,000 shares that had been tied-up in a Trust Co. pool, were being unloaded in the form of receipts, and claimed the company was on the verge of bankruptcy, with \$25,000 in debts. His reorganization committee formed the Denbigh Mining Corporation to take over the property, old stock exchangeable for new on payment of 10c. a share. This was, it is said, approved by the stockholders, but a meeting was called by Henry F. Wells, for December 3, 1919, to con-

Operated and produced during 1919-1920. Operations in 1921 were in the Terrible mine, where new work on the 13th level showed smelting ore a foot or more thick for 130' in length, averaging 100 oz. silver and \$10 gold per ton. The death of Mr. Fay in Nov., 1921, deprived the company of its chief financial backer.

DENVER-BOULDER TUNGSTEN PROD. & DEV. CO. COLORADO

Idle.

Address: 514 Mining Exchange Bldg., Denver, Colo.

Officers: D. S. Young, pres. and supt.; G. P. Howard, v. p. and treas.; F. E. Wire, sec.

Inc. in Colorado. Cap. \$100,000; par 10c.

Property: 10 claims on Lee Hill, Boulder county, showing tungsten ore with gold value. The company has closed down to await relief by tariff legislation. Management reported that it had lots of ore, but no market for it.

DENVER CITY CONSOLIDATED SILVER MNG. CO. COLORADO

Address: 1343 High St., Denver Colo.

Property: the Denver City zinc mine at Leadville, Lake county. Operated, and shipments made, part of 1919 and 1920.

DENVER LEADVILLE MINING & TUNNEL CO. COLORADO

Address: E. M. Tressler, sec., 241 Coronado Bldg., Denver, Colo.

On Oct. 19th, 1921, the stockholders are said to have approved the transfer of company's property to a new corporation.

DENVER MINE COLORADO

Address: Hatton & Todd, Montezuma, Summit Co., Colo.

Development: work only was done at this silver-gold mine during 1920.

DENVER MINING & MILLING CO. COLORADO

See **Denver City Cons. Silver Mines Co.**, which apparently succeeded this company. At last report officers were Hinsdale Smith, Springfield, Mass., pres.; D. A. Roller, Equitable Bldg., Denver, Colo., sec.

Inc. in Colorado. Cap. \$100,000; par 10c.

Property: 100 acres, patented, at Wortman, Lake county; held under long-term lease and option.

Reported that a mill has been erected and is turning out lead and zinc concentrates. Company claims to have \$200,000 worth of ore blocked out.

DENVER MINING POOL CO. COLORADO

Office: 319 Guardian Trust Bldg., Denver, Colo.

Inc. 1920, in Colorado.

Property: the Atlantic silver-lead mine, 3 claims, at Blackhawk, Gilpin county. Mine lies between the Alaska and Hard Money mines. Quartz porphyry contact.

Development: by 150' shaft with levels on contact at 80' and 150'. Operated part of 1920-21, but made no shipment.

DERRY MINING & LAND CO. COLORADO

Address: R. F. Lafferty, gen. mgr.

Inc. March, 1915, in Colorado. Cap. \$100,000.

Owns placer land near Leadville, on which Derry Ranch Gold Dredging Co. (which see) operates a dredge.

DERRY RANCH GOLD DREDGING CO. COLORADO

Office: New York Engineering Co. 2 Rector St., New York. **Operating office:** Robert F. Lafferty, mgr., Leadville, Colo.

Officers: A. C. Ludlum, pres.; R. F. Lafferty, v. p.; George Sommer, sec.-treas., with John Nisbet and N. D. Wanless, directors.

Inc. in Colorado. Cap. \$100,000; \$100 par; all issued.

Dividends: 75% in 1916; 25% in 1917; 35% in 1918; 14% in 1919; 51% in 1920, a total of 200%.

Property: 1,800 acres of placer ground near Leadville, owned by the Derry Mining & Land Co., and under lease to the Dredging company.

Development: drilling proved an average depth of 30', containing 25c per yard.

Equipment: modern 5½ cu. ft. dredge, digging 75,000 yards per month using electric power. No work is done during the winter.

Production:

Year	Yardage	Av. per yd.	Total gold
1920.....	324,132	43¢	\$140,150
1919.....	487,931	19	82,626
1918.....	453,000	20	93,000
1917.....	518,000	21	112,000
1916.....	499,000	24	120,000
1915.....(2 months)	142,900	44	62,291

This is a profitable dredging enterprise, owned largely by Mr. Ludlum.

DES MOINES MINE **COLORADO**

Address: George Walker, Jamestown, Colo.

Property: at Jamestown, Boulder county, was operated in 1920 for the fluorspar in the veins.

DETROIT & COLORADO MINING CO. **COLORADO**

Mortgage on property foreclosed by its bondholders, 1918. Has been idle 10 years because of litigation and has now lost its property. See Vol. XIII. The Detroit-Colorado and Coming Wonder mines, in San Juan county, were being worked by lessees in 1920.

DEVIL'S HEAD COPPER MNG. & DEV. CO. **COLORADO**

Mail returned 1921 from former office: 700 Commonwealth Bldg., Denver, Colo: See Vol. XIV.

DEXTER GOLD MINING CO. **COLORADO**

Address: Anderson & Benkleman, 802 Paul St., Denver, Colo.

A close corporation controlled by Eastern capital.

Property: the Dexter mine, on Bull hill, Cripple Creek, Teller county, under lease to C. W. Benkleman, of Denver, and Anderson Bros., of Victor. Gold ore occurs in veins, 4' wide and proved for 175'.

Development: by 1,300' shaft, crosscuts and tunnel. Mine was a steady producer for several years. Average output amounted to 600 tons monthly, showing values from \$10 to \$30 per ton.

Equipment: compressor, power plant and surface buildings.

Operated 1920-21.

DIAMOND CONSOLIDATED MINING CO. **COLORADO**

Mail returned from former address: Silver Plume, Clear Creek county, Colo. See Vol. XIV.

DIG-GOLD MINING CO. **COLORADO**

Address: 222 McPhee Bldg., Denver, Colo., or Victor, Colo.

Inc. 1915. Cap. \$150,000.

Property: the Alpha and Omega mines, at Cripple Creek, Teller county. Ore occurs in a vein, 5' wide on 200' level. Surface work said to show a number of veins containing low-grade ore.

Development: by 270' shaft on line between the two claims. Mine is drained to 200' level by the Roosevelt tunnel. Work in 1921 was on West vein, driving north to junction with Keystone.

Equipment: includes hoist and air compressor.

Property operated 1921, by a syndicate of company stockholders, under 5-year lease.

DIGMORE MINING & MILLING CO. **COLORADO**

Address: Malmo, Nebraska. The Digmores mine at Ward, Boulder county, Colo. was operated 1920, by J. F. Logan of Rowena, Colo.

Property: the Sans Souci gold-silver mine at Ward, Boulder county Operated part of 1919, but made no shipments.

DIME LEASING CO. COLORADO

Address: Boulder, Colo.

Did development work only in 1920 on the Dime gold mine at Crisman, Boulder county.

DINERO MINING & TUNNEL CO. COLORADO

Address: Jones Lease, 1343 High St., Denver, Colo. Mine at Leadville, Colo.

Property: the Dinero gold-silver mine at Leadville, Lake county.

Operated by Jones Lease and produced during 1919 and 1920.

DIVES LEASING CO. COLORADO

Address: care D. MacLean, Durango, Colo.

Property: the Dives and Trilby mines at Howardsville, San Juan county. Ore carries gold, silver and lead.

Operated and produced during 1920.

DIVES-PELICAN AND SEVEN THIRTY MINES COLORADO

Address: J. H. Robeson, Georgetown, Colo., or G. L. Cole, Springfield, Mo.

Property: 81 patented claims in the Silver Plume district of Clear Creek county, reported sold to New York interests early in 1920. The mines have yielded several millions worth of silver-lead ores. Dumps are estimated to contain 600,000 tons of \$6 to \$9 ore. In 1920, Burleigh tunnel was reopened and the mine opened 400' deeper from the Colorado Central ground.

Equipment: includes a 200-ton concentrating plant, to be improved and enlarged.

D. L. & W. MINING & REDUCTION CO. (THE) COLORADO

Former office: 629 Davidson Bldg., Sioux City, Iowa.

Company dissolved. See Vol. XIV for former holdings, etc.

D. M. & CHANCE MINING CO. COLORADO

Address: Creede, Colo.

Property: the Last Chance, New York, and Del Monte mines in the Creede district of Mineral county. Ore carries gold, silver, and lead.

Operated and produced during 1919 and 1920.

DOCTOR JACK POT MINING CO. COLORADO

Office: State Bank Bldg., Cripple Creek, Colo.

Officers: A. E. Carlton, pres.; V. H. Mann, sec.-treas.; L. G. Carlton, mgr., with H. L. Shepherd, Ira Harris, and A. M. Stephenson, directors.

Inc. Aug. 31, 1905, in Wyoming. **Cap.** \$75,000; shares 2½c. par; \$71,160 outstanding. Colorado Title & Trust Co., Colorado Springs, transfer agents. Annual meeting second Wednesday in June. Listed in Colorado Springs and Denver.

Dividends: to Jan. 1, 1919, \$143,264; last dividend, \$30,000, paid Dec., 1916.

Property: 15 claims, 99.3 acres, patented, on Raven hill, Cripple Creek, Teller county, said to show gold ore in fissure veins. Three fractional claims were purchased at a cost of about \$5,000, in 1916.

Development: by tunnels and vertical shafts, amounting to several miles of workings with deepest at 900'. The Raven tunnel is over 3,000' long. A total of 577' of work was done in 1916 without developing any ore.

Equipment: includes a 52 h. p. electric hoist and air compressor. Electric power is used. A tramway was erected in 1918 to the Ingham dump.

Production: in 1918, lessees produced 524 dry tons of ore with gross value of \$6,025, netting company \$1,129. In 1916 the output was 15,216 tons of \$7.47 ore. The total output of this mine, 1903-1919, is about \$2,850,000.

The Ingham mine of this company was worked under lease 1920 and 1921, producing mill ore.

DOLD MINING CO. COLORADO

Address: C. J. Dold, Leadville, Colo.

Property: the old Northern mine of 8 acres, in Downtown section of Leadville district, Lake county, adjoining the Coronado on the north, held under a 10-year lease from the Leadville Basin Mines Co., which see. Ore carries silver, lead, and manganese.

Development: by two 640' shafts. There are three ore horizons at as many contacts, which are porphyry and limestone. Newell shaft was reported re-opened, 1918, when production was 25 tons of manganese ore daily. Rich lead carbonate ore, high in silver, was opened at 640' in 1919, and shipments made.

DOLLY B. MINE**COLORADO**

Address: Harvey & Co., 431 Harrison Ave., Leadville, Colo. Mine at Leadville, Lake county, was operated, and silver-lead ore mined and shipped, 1920.

DOLLY VARDEN MINES**COLORADO**

Owned by the Louisiana-Colorado Mining Co., which see.

DOLORES SILVER MINES, INC.**COLORADO**

Address: Sterling, Colo.

Operated the Emma mine and mill at Rico, Dolores county, in 1920.

DORA CONSOLIDATED MINING CO.**COLORADO**

Address: Silverton, Colo.

Officers: E. P. Ricker, pres. and gen. mgr.; with Joseph Boyce, resident, director.

Property: 26 claims and 8 millsites, patented, 300 acres, near Silverton, San Juan county, formerly known as the Hercules Consolidated. Total output since the late seventies is said to be over \$10,000,000.

Geology: claims show fissure veins traversing a complex area of schists, quartzite and granites, overlying San Juan tuffs, in turn overlain by andesite and sedimentaries. These are traversed by dikes of diorite, etc. A large amount of smelting ore said to be exposed.

Development: by 6 crosscut tunnels, one 2,400' long, giving a depth of 1,500'. Workings total 30,000'. Shipping in 1918 and 1919; idle 1920.

DOTY MANGANESE CO, THE**COLORADO**

Dead. See Vol. XIV.

DOUGLAS MOUNTAIN COPPER CO.**COLORADO**

Idle 1920-21.

Office: 209 Chamber of Commerce Bldg., Denver Colo.

Officers: R. J. Morris, pres.; Robert Pherson, v. p.-gen. mgr.; V. C. Walters, sec.-treas.

Inc. in Colorado. **Cap.** \$1,000,000; \$1 par; 640,000 shares in treasury.

Property: 31 claims, 600 acres, together with lease and bond on Bromide mine, 4 claims, 40 acres, located 70 miles from Craig, Moffat county; and within 10 miles of Utah, in the Escalante hills. Ore contains chalcocite and bornite. Vein is reported to show 20" to 6' of ore that will average 25% copper.

Development: on Sutton group, by 700' of tunnels. Company reports 8,000 tons of ore blocked out averaging 12% copper. Bromide mine, by 249' shaft and 3 levels, 1,300'.

Equipment: hoist, compressor; a 20-ton reverberatory smelter planned at the Sutton mine, also an ammonia leaching plant.

DOWN TOWN MINES CO.**COLORADO**

Office: 129 West 8th St., Leadville, Colo.

Officers: J. C. Waldeck, pres.; H. W. Mann, v. p.; C. J. Walker, sec.-treas.; Jesse F. McDonald, mgr., with W. T. Nardin, directors.

Inc. March, 1914, in Colorado. **Cap.** \$600,000; \$10 par. Stock entirely owned by Western Development Co., which see. Company has 20-year leases on several of the Down Town mines at Leadville.

Income 1920, from ore shipped, \$325,000, at net loss of \$15,000 for years operations, but completion of new plant of Western Zinc Oxide Co. will furnish market for 18,000 tons yearly of company's zinc ore.

Property: 400 acres, includes 15 old mines which have produced several millions of dollars. These mines had been idle for many years, and it was thought that all the valuable ore had been extracted, but in former mining no zinc ore was taken out.

Development: by shafts 400' to 875' deep, and 158,400' of underground workings. Reserves 200,000 tons.

Production: for the year ended June 30, 1918, was 60,934 tons of ore valued at \$755,000. Operating expenses were \$350,000. Company planned in 1918 to reopen the Coronado shaft.

Equipment: compressor, 175-h. p. electric hoist, electrically-driven pump.

Company is the largest producer of Leadville. Shipments for 1920, mainly iron-silver ore from the Penrose, ran about 2 cars daily, and totaled 45,364 tons yielding \$357,803 gross.

DOYLE CONSOLIDATED MINES CO.

COLORADO

Mail returned 1921 from former address: 1426 U. St., Washington D. C.

Mine office: Mancos, Montezuma county, Colo.

Officers: Hon. Jas. Doyle, pres.; Earl P. Hopkins, v. p.; E. R. Marden, sec., D. T. Thompson, treas., with Wm. W. Fry and J. J. Butler, directors. R. J. Doyle, mine supt.; R. C. Morrison, mill supt.; C. F. Doyle, engr.

Inc. Oct. 21, 1907, in Arizona, as consolidation of the Mancos Mining & Development Co., the Cliff Dwellers Gold Mining Co. and the White Quail Copper Co. **Cap.** \$10,000,000; \$1 par; issued about 3,000,000.

Property: 31 claims, in 3 groups of about 300 acres in Rush basin, part of the California mining district, Montezuma and La Plata counties, in southeastern Colorado. Claims are in a high part of the Sierra La Plata, 3½ miles from La Plata city and 4 miles from the Colorado Southern railroad. The White Quail property contains a copper-bearing "dike" of monzonite-porphry, said to be 150' across and to average 2½% copper and \$4 gold for this entire width. Other claims cover about a mile of the apex of the Sundown (or North Star) vein, a flat dipping fissure in red quartzite, carrying milling ore with gold and silver values. Company developed properties for several years, through Columbus tunnel. Had 10-stamp mill in 1910 and erected a new 150-ton mill, operated July, 1912. Company advertised for lessees in 1914.

Property has thus far failed to fulfill the extravagant claims and promises of the White Quail promoters or their successors. More recent information not obtainable. The stock selling campaign appears to have been more successful than the mining and milling operations. Presumably dead and stock valueless.

DRECKSHAGE MINING & TUNNEL CO.

COLORADO

Address: Crested Butte, Colo.

Property: the Dreckshage-silver mine at Gothic. Gunnison county. Operated during 1919 and 1920, but shipped no ore.

DROPNER MILLING, MINING & TRANS'N CO.

COLORADO

Mail returned May, 1920 from former office: Georgetown, Colo.

Officers: H. E. Crist, pres.; E. Larson, v. p.; Thos. Rendahl, sec.-treas. and supt.

Cap. \$3,000,000; \$1 par; 200,000 shares in treasury.

Property: 23 claims, 300 acres, at Dropner, Clear Creek county. Has a contact vein between porphyry and granite, showing gold, silver, copper, and traces of platinum and molybdenum.

Development: by 3 tunnels, 650', 100' and 100' long. No shipments reported. Mine was worked part of 1919. Idle 1920.

DRUID GOLD MINING CO.

COLORADO

Office: 307 Boston Bldg., Denver, Colo.

Officers: W. N. Vaile, v. p.; C. A. Chisholm, sec.-treas.; Geo. E. Collins, E. M. mgr., with H. N. Berry, directors.

Inc. in Colorado. **Cap.** \$1,000,000; \$1 par; all issued.

Property: 11 claims, 95 acres, near Central City, Gilpin county. Ground has a complex system of fissure veins, carrying gold, silver, lead and copper in Archean schist. Developed by 1¼ miles of workings, including 1,200' tunnel and several shafts, deepest 650'. Equipped with steam hoists.

Production: property operated continuously from 1904 until 1919 with total production of \$388,649.31. Closed down June, 1919. Total production since location, about \$750,000. Ore shipped averaged about 1.30 oz. gold and 16 oz. silver per ton, with some lead and copper.

DRUMMOND MINING & MILLING CO. COLORADO

Address: 226 Temple Court, Denver, Colo.

Operated the Tom Moore mine at Lawson, Clear Creek county, part of 1920, but shipped no ore.

DUBUQUE MINING & TUNNEL CO. COLORADO

Out of existence several years. Described, Vol. XIII.

DUMONT MINING & MILLING CO. COLORADO

Address: Dumont, Colo.

Officers: George Wight, pres.; Ernest Wight, v. p., both of Denver; C. W. Lerchen, sec. and mgr., Dumont; Sijmon Batterman, treas., and Robbie B. Sercher, director.

Inc. Jan. 27, 1917, in Colorado. Cap. \$100,000; \$1 par; 51,000 issued.

Property: 6 patented claims, 30 acres, known as the Syndicate property; also the Kokomo Pioneer mill at Dumont and the Pioneer Gold mining property and mill at Empire, all in Clear Creek county.

Ore: lead-bearing fissure veins in granite schist. Vein is 4' to 14' thick, runs E.-W. and dips at 15° to 45°. Ore has an average value of \$7.45 per ton.

Development: by McClelland and other tunnels. 100' to 900' long, with total of 4,500' of work and a depth of 1,000' said to block out 30,000 tons of ore.

Reported 1921 that company was working on the complex ore problem preliminary to resumption of milling operations. Idle 1919 and 1920.

DUNKIN MINING CO. COLORADO

Address: 1343 High St., Leadville, Colo.

Property: the Dunkin silver mine at Leadville, Lake county. Operated and produced during 1919 and 1920.

DUNKIN MINING CO. COLORADO

Address: care Forman & Robinson, Breckenridge, Summit county, Colo. Boston Safe Deposit & Trust Co., Boston, transfer agent.

Property: the Dunkin mine, on Nigger Hill, 1½ miles from Breckenridge, Summit county, worked under long time lease by O. K. Gaymon, Theo. H. Knorr and W. W. Wharton of Breckenridge, and J. A. Summer of Salt Lake City. Claims show lead-sulphide ore carrying good value in gold. Several rich pockets of ore were reported found in 1914-15 and to have netted the lessees \$15,000, \$30,000 and \$35,000. The Wolfstone vein, under development, is said to carry lead-carbonate ore, valued at \$40-\$50 per ton at a depth of 500'.

Development: by 600' shaft, tunnel and crosscuts. During 1920, development was continued, but no ore shipped.

DURANGO LEAD AND COPPER SMELTER COLORADO

Owned by the American Smelting & Refining Co.

Office: 120 Broadway, New York. **Operating address:** F. C. Gilbert, mgr., Denver, Colo. **Works Address:** R. P. Reynolds, supt., Durango, Colo.

Has an annual capacity of 210,000 tons.

EAGLE MINE COLORADO

Address: Bonanza, Saguache Co., Colo., or C. M. Glasgow, St. Louis, Mo.

Property of Saguache Eagle Mng. Co., which see.

EAGLE MINING & MILLING CO. COLORADO

Property sold to Empire Zinc Co., of Colorado, which see.

- EAGLE ORE CO.,** COLORADO
 Out of business. The plant sold Dec. 31, 1920, to **Eagle Samplers, Inc.**, which see.
- EAGLE PASS MINING & MILLING CO.** COLORADO
 Address: M. S. MacCarthy, mgr., 627 First National Bank Bldg., Denver, Colo.
 Inc. May, 6, 1913, in Colorado. Cap. \$250,000; shares \$1 par.
 Property: 3 claims (the Eagle Pass, Bodie, and Roosevelt), 1 patented, 30 acres, at May Day, La Plata county, showing ore carrying gold, silver and lead in fissure veins in limestone and porphyry. Developed by 1,000' tunnel. Only assessment work done for years. In October, 1919, the upper levels were leased for a year. A prospect.
- EAGLE ROCK TUNGSTEN PRODUCTION CO.** COLORADO
 Dead. See Vol. XIV.
- EAGLE SAMPLERS, INC.** COLORADO
 Address: A. W. Oliver, mgr., Victor, Cripple Creek, Colo.
 On Jan 1, 1921, company took over the sampling plant of the Eagle Ore Co. at Victor, which is in active operation.
- EARLY BIRD MINING & MILLING CO.** COLORADO
 Address 409 Central Block, Pueblo, Colo. C. B. Blitzkie, owner.
 Property: the Early Bird gold-silver-lead mine near Silverton, San Juan county. Mill ore will be treated in the Bagley mill acquired 1920 by Blitzkie.
 Operated part of 1919 by lessees, who shipped rich gold-silver ore. Idle 1920.
- EAST ARGENTINE MNG., MLG., POWER & TRANSP. CO.,** COLO.
 Address: Georgetown, Clear Creek Co., Colo. Did development on the Sydney tunnel in 1920.
- EASTERN STAR MINE** COLORADO
 Address: G. H. Bibb, Silverton, San Juan Co., Colo.
 Development only done in 1920.
- EAST LAKE MINING & MILLING CO.** COLORADO
 Address: W. M. Elwell, sec., Wedgewood Bldg., Toledo, Ohio. Mine address: N. Nelson, mgr., Edwards, Eagle Co., Colo.
 Officers: C. N. Harps, pres., Findlay, Ohio.; J. T. Montgomery, v. p.; W. M. Elwell, sec.-treas., with Wm. Stilt, E. L. Grove, G. M. Book and C. R. Campbell, directors.
 Inc. Dec., 1904, in Colo. Cap. \$750,000; par \$1; 600,000 issued. Bond issue \$50,000; \$35,000 issued. Affiliated with Packard Power & Mining Co.
 Property: 150 acres, patented, near Edwards, Eagle county, is again under development (1921) after 3 years' idleness. A 3,000' tunnel is being driven and drifts run on several veins containing streaks of shipping ore 4 to 5" thick. A 50-ton shipment in 1914, ran \$70 per ton. Lessees formerly worked mine through Big Five tunnel.
- EAST NOTAWAY MINE** COLORADO
 Address: Petter Lentz & Co., Central City, Gilpin Co., Colo. Thos. Martin, supt.
 Operations resumed in 1920 and 1921 and new work done on 600' level, or 150' above water level in shaft.
- ECLIPSE LEASING CO.** COLORADO
 Address: F. R. Marsh, pres, 402 Bennett Bldg., Colorado Springs, Colo.
 Inc. 1917, to operate a five-year lease on the Io Dandy mine, Raven hill, Cripple Creek, Teller county. Operated and shipped ore during 1919-20.
- ECLIPSE MINE (ASPEN)** COLORADO
 Address: F. R. Leaver & Co., Aspen, Pitkin Co., Colo., which operated mine in 1920.
- ECLIPSE MINE (NUCLA)** COLORADO
 Address: Sullivan Bros. & Clark Akers, Nucla, Montrose countv. Colo.
- EDGAR MINE** COLORADO
 Address: Alfred Friedman & Co., Idaho Springs, Clear Creek Co., Colo.

This mine, whose ore carries gold, silver, and lead, was operated and shipments made during 1920.

Is an old mine worked since 1914 by Friedman & Carnahan.

EDNA FOREST MINING & MILLING CO. COLORADO

Address: T. W. Meers, c/o Gold Sovereign M. & T. Co., 223 Burns Bldg., Colorado Springs, Colo.

Inc. 1920, in Colorado.

Property: leases secured in December, 1920, on the lower levels of the Dante and Gold Sovereign mines, on the S. slope of Bull hill, Cripple Creek, Teller county.

Development: at the Dante by a main 1,200' shaft with 7,000' of workings; at the Gold Sovereign by a 1,350' shaft. Working in 1921.

EDNA MINING CO. COLORADO

Dead. See Vol. XIV.

EGYPTIAN MINING CORP. COLORADO

Mail returned 1921 from former address: Sunshine, via Boulder, Colo.

Cap. \$50,000.

Property: 6 claims, at Sunshine, Boulder county, 8 miles from Boulder.

Development: by 100' shaft, also a 150' tunnel with crosscuts to parallel veins.

Operated part of 1919, but made no production. See Vol. XIV.

ELECTRO COPPER CO. COLORADO

Address: William R. Rathburn, Denver, Colo. **Mine address:** Camp Rathburn, Mile Post 155, Denver S. L. R. R., Eagle Co., Colo.

Officers: W. R. Rathburn, pres.-mgr. G. H. Newkirk, v. p.; Edwin Park, sec.; F. E. McAllister, treas.; C. W. Doolittle, registrar. Wm. Kelly, J. N. Wyman, E. E. Lloyd, and B. C. Johnson, trustees.

Property: 163 acres in the Yarmony Creek district, including the Baily copper mine at Copper Spur, near McCoy on the Moffat railroad, in Eagle and Routt counties. Ore is malachite in granular sandstone. The deposit is said to be of "blanket" formation.

Development: by tunnels and shafts. The main adit is 750' long, with 1,500' of laterals, and a shaft is down 300'. All workings are said to be in the blanket deposit of ore, which carries 4% copper or more, with low gold and silver contents.

Equipment: complete camp, steam boilers, hoist, and a 500-ton electrolytic leaching plant, on which construction was started early 1921.

ELK MINING & MILLING CO. COLORADO

Address: Silverton, Colo. J. J. Cusick, v. p.-mgr.

Property: the Elk mine, 325 acres on Red Mountain, near Silverton, San Juan county, said to show several veins in andesite from 2' to 7' wide, carrying gold, and silver ore.

Development: by tunnel driven at a depth of 1,200'. Management installed new machinery in 1917 and expected to drive tunnel 1,000'; also planned to erect a concentrating mill. Some work done 1919, but no ore shipped. Idle 1920.

ELK MOUNTAIN MINING & MILLING CO. COLORADO

Address: Kokomo, Colo.

Property: the Wilfley mine and mill in the Kokomo-Robinson district, Summit county, N. of Leadville.

Ore occurs as replacements in limestone and carries silver, gold, lead and zinc. In summer of 1917 it was reported that a vein 4' to 10' wide had been opened, assaying as high as 1,000 oz. silver per ton. No recent information obtainable, save that the mill operated during 1919.

ELK PARK MINING CO. COLORADO

Address: 200 Enterprise Bldg., Denver, Colo. **Mine Address:** care C. A. McNeil, mgr., Apex, Gilpin Co., Colo.

Property: the Anne H. mine at Apex, Gilpin county. In July, 1920, ore assaying 2 oz. gold, 16% copper and 3 oz. silver was opened on the

200' level; also 30" of \$11 milling ore. The stamp-mill was to be improved by adding a flotation plant.

ELKTON CONSOLIDATED MNG. & MLG. CO. COLORADO

Address: P. O. Box 138. Colorado Springs, or Cripple Creek, Colo.

Officers: George Bernard, pres.; A. E. Carlton, v. p., with M. F. Stark, C. G. Kingsbury, C. B. Ferrin, D. C. Goddard, and E. P. Shove, directors. H. M. Ragle, sec.-treas.; R. P. Windsor, supt., at last accounts.

Inc. 1892, in Colorado; extending 1912 for 20 years. **Cap.** \$3,000,000; \$1 par; 368,116 shares in treasury. Annual meeting in February. Listed on Colorado Springs Exchange. Company is one of the oldest in the Cripple Creek district.

Balance sheet as of Dec. 31, 1920, shows; assets, \$3,680,193, which includes mining property, \$3,141,484 and plant, etc., \$68,022; treasury stock, \$368,116; Cripple Creek Drainage & Tunnel Co., \$98,400; cash, \$2,706; accounts receivable, \$1,909. Current liabilities were \$16,122.

Earnings in 1920 from ore sales amounted to \$154,117; miscellaneous earnings, \$572. Expenses were \$151,538, making profit, before depletion charge, of \$3,052.

Dividends: to Jan. 1, 1919, were \$3,579,460; the last dividend paid May 24, 1915, was \$50,000; previous to this date the rate had been 2c. a share quarterly.

Property: the Elkton group, 93½ acres, patented, on Raven hill, in Cripple Creek district, Teller county, includes Appie Ellen, Thompson, Raven, Tornado Gregory and Ida May mines. The Ida May group of claims was purchased in 1911. Ore is a sulpho-telluride in fissure veins in breccia and granite.

Development: by shafts, with many miles of workings. The main shaft, 1,636' deep, has 18 levels, and is connected with the Roosevelt tunnel by a raise from the tunnel-level. Since October, 1916, only lessees have operated on the property.

The 16th, 17th and 18th levels showed a decrease in value in 1916. The management believed they were in the so-called lean zone, but expected an enrichment when deeper developments were possible. No new developments up to 1920.

Production: (from the Elkton mine)

	Tons Ore	Value p. Ton	Cost p. Ton(a)	Freight & Treatment
1920..(by lessees)	27,089	\$5.69	(includes 23,300 tons dump ore)	
1919..(by lessees)	8,884	9.84	(Includes 5,372 tons dump ore)	
1918.....	3,284	11.40	\$....	\$7.04
1917.....	24,854	6.22	2.79
1916.....	36,036	8.09	4.17
1915.....	16,510	18.42	3.30	5.63
1914.....	29,509	18.37	2.62	5.34
1913.....	28,814	18.88	2.40	5.95
1912.....	29,163	19.01	2.22	5.85

(a) Total cost of ore shipped includes underground labor and sorting, sampling and loading, but not development.

Total production to 1921, about \$13,000,000. Present production under leasing system, mainly from ore sorted out of old mine dump. Underground production for 1920 was 3,789 tons of an assay value of \$38,667 and net mill return of \$21,203, compared with 3,511 tons in 1919 of gross value of \$53,888, and net mill return of \$35,498. The Raven Hill property was leased for 5 years, from 1921, to the Elkton Leasing Co.

ELKTON LEASING CO. COLORADO

Address: George Bernard, mgr., Cripple Creek, Colo.

Organized 1921, to operate the Elkton mine under a 5-year lease from the Elkton Cons. Company, which see.

EL MAHDI MINE**COLORADO**

Address: Alex Martin & Co., Ouray, Ouray Co., Colo., who operated the mine in 1920.

EL PASO CONSOLIDATED GOLD MINING CO.**COLORADO**

Office: 800 Exchange National Bank Bldg., Colorado Springs, Colo. Also, 20 Broad St., New York; and Cripple Creek, Colo.

Officers: Fred W. Bailey, v. p.; Daniel Thatcher, sec-treas., with J. K. Corbiere, W. C. Sherwood, Geo. W. Gano, R. M. Rankin, A. E. Carlton, A. J. Stybr and G. N. Miller, directors, F. R. Crawford, mgr.

Inc. Feb. 27, 1893, in Colorado. Cap. \$2,500,000; par \$5; outstanding 490,000 shares. No bonded debt. Stock transferred at office of secretary, Colorado Springs. Colorado Title & Trust Co., Colorado Springs, and Registrar & Transfer Co., New York, registrars. Annual meeting, 2nd Monday in April. Fiscal year ends March 31. Listed on Colorado Springs Exchange and New York Curb.

Dividends: (on old stock of \$1 par) 1903, 2½c.; 1904, 13½ c.; 1905, 23c.; 1906, 7c.; 1907 and 1908, 2c. each; 1909, 1c.; 1910, 2c.; 1911, 2½c.; 1012, 5c.: (on stock of \$5 par): March 31, 1913, 12½c.; Feb. 25, 1914, 10c.; none since. Total dividends, \$1,707,545.

Revenue in 1920 was \$1,639 from royalties. After paying all charges there was a loss of \$6,257.

In 1919, the income was \$10,879 with a loss of \$38.61. Current assets at end of 1920 were: cash in bank, \$13,489; stocks and bonds, \$11,554, with practically no liabilities.

Property: 70½ acres in the Cripple Creek district, Teller county, including Elkton and Tornado mines developed by three shafts to a depth of 1,350'. Has been a prominent operator for a great many years. For geology of the Cripple Creek district, see 16th Ann. Rept. of Colo.; also U. S. G. S. Bull, 260, 1915, pp. 85-98. Orebodies occur at vein intersections in vicinity of phonolite dikes.

Development: by 3 shafts. In 1917, management stated that the prospects of finding pay ore below the 1,000' level did not warrant further exploration work, and therefore, company has confined itself strictly to leasing.

Production: in 1920 was 1,807 tons of \$7.12 ore of gross value of \$12, 871, with royalty to company of \$1,639; in 1919 was 2,951 tons of a gross value of \$16 per ton, or \$48,832, from which company derived \$10,076 royalty.

Ore shipments and discoveries in 1919 and 1920 were disappointing. For statement of 1917-1919 litigation and dissensions, see Vol. XIV.

EL PASO EXTENSION GOLD MNG. CORP'N**COLORADO**

Address: C. W. Hays, gen. mgr., Parkersburg, W. Va. Mine address: J. S. Anderson, supt., Cripple Creek, Teller Co., Colo.

Inc. in West Virginia

Property: the Rocky Mountain and North Slope claims, 9.55 acres, on Beacon Hill. First named claim has old 250' shaft.

Also, a 5-year bond and lease on the Index mine, formerly operated by the Index Mining Co. The mine, situated on the southwestern slope of Gold Hill, was idle for about 7 years. In 12 months' operations the shaft was sunk 200' to the 1,150' level, and company and sublessees have shipped regularly about 7 cars of ore a month, averaging better than \$30 per ton. Work has shown a promising quartz vein, 665' from surface, and a highly mineralized dike of basalt containing sylvanite, reported to average \$80 per ton.

In August, 1919, company acquired control of the Lexington Gold Mining Co.'s 13 acres on Gold hill and the Laura D mine. In 1920, an electric hoist was erected at the Rittenhouse shaft, where low-grade ore has been opened and 3,000' of development done.

Production: about 2 to 8 cars, or 400 tons a month of \$100 ore, throughout 1920 and 1921.

Reported 1921 to have acquired holdings of **Moonlight Gold Mining Co.**, 23 acres, on Gold hill.

EL PASO GOLD KING MINE**COLORADO**

Address: Owen Roberts, lessee, Cripple Creek, Colo., Sam McDonald, mgr.

Property: owned by the Gold King Mining Co. in Poverty Gulch, Cripple Creek district, Teller county, is developed by 1,007' shaft, which is to be deepened. Lessees were reported to be making shipments in 1918. In Dec., 1920, the above named lessee had resumed work after a 2-year shut-down. A strong vein of \$20 ore was discovered on the surface Aug., 1921, and shipments were reported made.

EMANCIPATION MINE CO.**COLORADO**

Address: Boulder, Colo.

Property: a gold-silver mine at Gold Hill, Boulder county, Operated part of 1919, but shipped no ore. Idle 1920.

EMBORIUM MINE**COLORADO**

Address: Hoffman & Boyd, Silverton, Colo.

Property: at Red Mountain, San Juan county, shows gold-silver-lead bearing ore. Operated during part of 1920.

EMPIRE CONSOLIDATED MINES CO.**COLORADO**

Address: Empire Clear Creek Co., Colo.

Operating North Empire mine and Empress tunnel, 1920.

EMPIRE STATE MINES & RED. CO.**COLORADO**

Probably dead. No returns securable. See Vol. XIV.

EMPIRE ZINC CO., THE**COLORADO**

Subsidiary of the New Jersey Zinc Co., 160 Front St., New York.

Office: Canon City, Colo.

Officers: Edgar Palmer, pres.; A. P. Cobb and J. E. Hayes, v. p.'s; A. B. Schultz, sec.; H. S. Wardner, treas.; G. F. Wolff, comptroller.

Owens or controls the following **properties:**

Small Hopes Mine, Leadville, Colo. Formerly owned by Small Hopes-Boreel Mng. Co. Is opened by the Robert Emmet, 800' and McCormick, 500', shafts. Produced zinc, lead and iron sulphides; also some zinc carbonate in 1920.

Eagle Mines, Gilman, Colo. Two mines in Battle Mountain district, Eagle county, formerly owned by Eagle M. & M. Co. Ore is mainly zinc-iron sulphide and is treated by a roasting and magnetic separation process. Formation is considered similar to that at Leadville. By new mine connections, mining costs will be reduced. Reserves are estimated at 2,000,000 tons of 15% zinc ore, carrying lead and iron. Operated 1920.

Empire Zinc Mill and Oxide plant, Canon City, Colo. This is a combined magnetic and wet mill designed to treat complex sulphide ores. Ores for this mill are purchased from outside producers. A complete ore-testing plant is also maintained. The treatment works operated steadily in 1919-1920.

Hanover Mines, Hanover, New Mexico. Equipment consists of mill of 250 tons daily capacity using raw magnetic separation and 800-h. p. power plant equipped with Diesel type of crude oil engines. Ore is principally zinc sulphide associated with hornblende, serpentine and other metamorphic minerals, occurring as irregular-shaped masses in limestone near igneous contacts.

Republic Mine, Hanover, New Mexico. Bought from Republic Mng. & Mlg. Co., January, 1920, for \$500,000, includes the Welch group of 90 acres, in Central district, Grant county, adjoining Hanover mine. Zinc and iron ores are opened by 3 shafts and 1,586' total workings. Reserves estimated to be 50,000 tons of 20% zinc ore and indications of a large tonnage of ore carrying 50-60% iron.

San Xavier mine, 20 miles south of Tucson, Ariz. Is idle, though

camp and plant are kept in order. The oxidized zone has produced a considerable tonnage of copper, lead and zinc carbonates. The sulphide zone shows a large tonnage of low grade zinc ore of a very complex nature.

The **Colonel Sellers mine**, in California Gulch, near Leadville, Lake county, Colo., is worked out, and operations were discontinued in 1917. No production figures are available.

The **Kelly mine**, including former Tri-Bullion holdings, in Magdalena district, Socorro county, and **Cleveland mine** in Pinos Altos district, Grant county, New Mexico, have been exhausted and closed, as is the case also with the **Potosi mine** in Yellow Pine district, Clark county, Nevada. See Vol. XIV for description of these 3 mines. The Small Hopes mine is closed down, and the Empire mill was not operating during 1921.

In Mexico, company controls **El Batamote mine** in Alamos district, Sonora; **La Penascosa mine** in Monclova district, Coahuila; and **La Bufa group** in Venado district, S. L. P. All are zinc properties, the two latter being active at last account.

EQUITY CREEDE MINING CO.

COLORADO

Company declared bankrupt January, 1920. See Vol. XIV for particulars about corporation.

ERMA LEASING CO.

COLORADO

Address: care Iowa Tiger mill, Southwestern Mng. Co., Silverton, Colo.

Property: a lease on the Silver Lake mine, near Silverton, San Juan county, from which shipping ore was sent to the Durango smelter and concentrating ore to the I. T. mill, in 1921.

EURADES MINING CO.

COLORADO

Address: W. E. Cuthbert, Ouray, Ouray Co., Colo.

Property: the Des Ouray and Benach mines, in Uncompahgre canyon, near Ouray, re-opened in 1920. Veins are in andesite. Exploration is by crosscut tunnels. Operated for 18 months and early in 1921 cut the big Blanchard vein showing 5' to 8' of gold-silver ore, some of it high grade. A complete mining plant is at work. Work suspended August 1921, owing to a bank failure in Chicago.

EVANS GROUP SYNDICATE

COLORADO

Address: H. W. Nicholls, Salina, Colo.

Property: the Evans mine, at Summerville, Boulder county, on which a lead-zinc vein was exposed by dredging operations. The syndicate was sinking a shaft to develop this vein. Operated 1920.

EVERGREEN GOLD & COPPER MINES CO.

COLORADO

Reorganized as the **Evergreen Mines Co.**, which see.

EVERGREEN MINES CO.

COLORADO

Office: 408 Empire Bldg., Denver, Colo. **Mine office:** Apex Gilpin county, Colo.

Officers: J. L. Tapp, pres.; Geo. E. Bell, v. p.; Wm. C. Hollister, sec-treas.; preceding with W. J. Tapp, E. F. Krewinghaus, M. C. Shaffer, Edwin Ettinger, J. C. West and A. M. Roth, directors. Etienne A. Ritter, cons. engr.; Shad Reid, supt.

Inc. Sept. 17, 1914, in Colorado. **Cap.** \$2,000,000; \$1 par; outstanding a little over 1,000,000 shares. Notes authorized and outstanding, \$75,000. Annual meeting, third Tuesday in August.

Company is a reorganization of the **Evergreen Gold & Copper Mines Co.**

Property: the Evergreen mine with 11 claims, 3 patented, 70 acres, in the Pine mining district.

Geology: the property shows Archaean gneiss and crystalline schists, cut by pegmatite, with an eruptive rock called "evergreenite." This dike is 3 to 12' in width, bounded on either side by ore-bearing contact zones of about 50 to 80' width. The ore deposit is unusual, carrying secondary bor-nite disseminated irregularly through monzonite.

Development: by tunnel and 850' shaft. Two ore shoots were found on the 100' level, 1 on the 200' and a new one south of this on the 350' level. Main orebody is 15 to 18' thick. There are 4 known ore shoots, carrying chalcopyrite bornite and covellite, estimated by management to average 3.5% copper, 2 to 8 oz. silver and 50c to \$4 gold per ton. The upper workings show some malachite and tetrahedrite. Underground work amounts to over 4,000'. A shoot of bornite ore 5' thick was cut on 200' level in 1919; and late in 1920 another rich shoot was opened.

Equipment: includes electric power with a 45-h. p. hoist and 4-drill air compressor. A 100-ton mill has one No. 4 Telsmith gyratory crusher, Marcy mill, Dorr classifier, and 2 Card tables. Flotation plant installed and began operations August, 1916. Concentrates gave average value of \$110 a ton from \$5 crude ore.

No production figures are available. Operated during 1919 and 1920, but shipped no ore.

EXCELSIOR MINING, MILLING & ELECTRIC CO. COLORADO

Office: 401 Interstate Trust Bldg., Denver, Colo.

Officers: F. B. Wiborg, pres.-treas.; W. F. Robinson, sec.; E. Flood, supt.

Cap. \$250,000; \$1 par, fully issued.

Property: the Excelsior mine at Frisco, Summit county, shows lead-copper ore with gold and silver. Developed by 2,600' tunnel and 120' shaft. In 1917, the mill was remodeled to a 50-ton capacity, and a flotation unit added.

Also a lease and bond from the Stratton Cripple Creek Mng. & Dev. Co. on the Longfellow mine, consisting of 2 claims adjoining the Golden Cycle and Vindicator mines, at Victor, in Cripple Creek district, Teller county. And also has a lease on the Polar Star group at Georgetown, Clear Creek county.

Operating and producing during 1919 and 1920.

EXPRESS HEADLIGHT MINING & DEVEL. CO. COLORADO

Address: Villa Grove, Saguache Co., Colo.

Operated the Express and Headlight gold-silver mines in 1920, but shipped no ore.

FAIRFIELD MINE COLORADO

Address: J. F. C. Webb, Russell Gulch, Colo. The mine near Central City, Gilpin county, was operated and ore shipped throughout 1920.

FANNIE B. MINING CO. COLORADO

Office: 213 Coronado Bldg., Denver, Colo.

Property: the Fannie gold-silver mine at Blackhawk, Gilpin county. Operated in 1919 and 1920, but shipped no ore.

FANNY BARRETT MINING & LEASING CO. COLORADO

Address: 317 Exchange Natl. Bank Bldg., Colorado Springs, Colo.

Property: the Fanny Barrett manganese mine at Alma, Park county. Operated part of 1919, and shipped ore.

FANNY FERN MINING CO. COLORADO

Address: J. C. Foster, lessee, Lake City, Hinsdale Co., Colo.

Property: a lease on the Fanny Fern gold-silver-lead-copper mine at Lake City, Hinsdale county. A shoot 10 to 36" wide and 400' long was reported developed in 1920.

Shipments have been made during the past 5 years. Values in 1920 were reported to run from \$60 to \$350 per ton.

FANNY RAWLINGS MINING CO. COLORADO

Office: 6 N. Nevada Ave., Colorado Springs, Colo. **Mine address:** A. M. Belcher, Box 457, Leadville, Colo.

Officers: John A. Himebaugh, pres.; Charles D. Hayt, v. p.; Walter C. Frost, sec.-treas.; W. R. McConihay, mgr.

Cap. \$1,000,000; par \$1; cash in treasury, Jan., 1920, \$13,307. Has \$5,700 loaned at 5½% and secured by lien on first-class improved real

estate; U. S. savings stamps, \$1,000; stock, 5,551 shares. Last stockholders' meeting held June 29, 1912. Listed on Colorado Springs Exchange.

Dividends: to date, \$55,000; last of \$5,000, paid Feb. 16, 1920, the first since Dec., 1908. All taxes paid and company has no debts.

Property: the Fanny Rawlings claim, about 10 acres, on Breece Hill, Lake county, near Leadville. Leased to Charlestown, W. Va., parties, who are operating on the 600' level. The Fanny Rawlings company receives 20% to 35% royalty on all shipments made by the lessees.

Development: on south half of claim said to have cost \$255,000.

Shipments in 1918 said to run 4.25% copper 15 oz. silver, and a little gold. In December, 1920, sub-lessees on No. 3 and 4 levels shipped 50 tons of \$50 silver ore per week; and zinc carbonate ore was sent to the Western Zinc Oxide Plant. Production steady from 200 and 400' levels throughout 1921.

FARNCOMB HILL GOLD DREDGING CO **COLORADO**

See Tonopah Placers Co., which operates company's ground, also Vol. XIV.

Former address: Breckenridge, Colo.

FARWELL MOUNTAIN COPPER CO. **COLORADO**

Probably dead. Described in Vol. XII. Mine in Routt county, Colo.

FAUNTLEROY GOLD MINING CO. **COLORADO**

Office: 317 Exchange National Bank Bldg., Colorado Springs, Colo.

Officers: Verner Z. Reed, pres.; L. L. Aitken, v. p.; A. D. Aitken, sec.-treas.

Cap. 1,250,000 shares; \$1 par. In treasury Jan. 1, 1919, \$29.69; no stock. All taxes paid. Liabilities \$3,563. Last stockholders' meeting, April 18, 1911. Listed on Colorado Springs Exchange.

Property: 5 claims, 20.3 acres, patented, on Gold hill and Mineral hill, Cripple Creek, Teller county.

Development: on the Little Fauntleroy, consists of 900' of work done from the Ophelia tunnel, 278' below surface. Shaft from surface also connects with tunnel. The Garfield claim has an 80' shaft with 100' of drifting.

Gross production to date, \$8,311. Mine idle 1919 and 1920.

FERRO-ALLOY CO. **COLORADO**

Subsidiary of The Vindicator Gold Mng. Co.

Office: 603 Symes Bldg., Denver, Colo.

Officers: Nelson Franklin, v. p.-mgr.; S. B. Tyler, supt.

Operated a ferro-alloy plant at Iron Mtn., Utah Junction, Adams county, in 1920. See same title under Wyoming.

FIDELITY GOLD MINING CO. **COLORADO**

Address: Twin Lakes, Lake Co., Colo.

Controlled by Chas. J. Fox., 3316 N. 17th St., Philadelphia, Pa.

Property: 12 patented claims in the Lackawanna gulch section 6 miles from Twin Lakes, near Leadville, developed by several tunnels. A 4' vein of smelting ore was opened up on the 1,200', or lowest tunnel level, reported to assay \$200 per ton in gold, with silver and copper values. In September, 1919, new work opened ore running 3 to 7 oz. gold and 100 oz. silver in an old tunnel. The two streaks of high-grade ore were 6 to 10" wide in a vein of 48 to 60".

Development: by tunnels, with main adit at 12,100' elevation.

Operated part of 1919 and shipped ore. Apparently idle in 1920, but late in 1921, very rich copper-silver ore was cut in a vein 3 to 5" wide.

FIFTY GOLD MINES CORPORATION **COLORADO**

In bankruptcy since 1910. In July, 1919, a deed was recorded at Gilpin, conveying from G. A. Bierbaum to the **Gilpin Giant Mines**, all the holdings of the Fifty corporation. This included the mill and all equipment.

FINDLEY MINES CO. **COLORADO**

Address: Cripple Creek, Colo.

Officers: L. G. Carlton, pres.; A. E. Carlton, v. p.; V. H. Mann, sec.-treas.

Inc. Jan. 1, 1912, in Wyoming. **Cap.** 2,000,000 shares; par value 2½c. In treasury, Jan. 1, 1921, 750,000 shares.

Dividends: total \$337,500; last dividend, \$12,500, paid September, 1906, by original company. Colorado Title & Trust Co., Colorado Springs, transfer office. Annual meeting 2nd Wednesday in June. Last meeting, June, 1913. Stock listed on Colorado Springs Exchange. Liabilities, \$22,700 demand notes.

Property: 5 claims, patented, 12.5 acres, on south slope of Bull hill, Cripple Creek, Teller county.

Ore: carries gold and occurs in fissure veins. Workings are extensive, aggregating about 6 miles. Property fully equipped with machinery.

Litigation: Stratton C. C. M. & D. Co. vs. Findley, re extra-lateral rights to the Basket and Luce vein. The vein is being worked by lessees and royalties are being deposited in escrow pending settlement.

Production: gross to date is \$1,651,183.

Operated and produced ore during 1919. Idle 1921. See Strattons. **Cripple Creek Mng. & Dev. Co.**

FIRST NATIONAL MINING CO. COLORADO

Address: Creede, Colo. Operated the Molly S. mine at Creede, Mineral county, during part of 1920, and shipped some ore.

FLAT TOP CAMP MINE COLORADO

See Radium Co. of Colorado.

FLORA BELL MINING CO. COLORADO

Address: 712 Interstate Trust Bldg., Denver, Colo. **Mine address:** St. Elmo, Colo.

Property: the Flora Bell mine at St. Elmo, Chaffee county. Ore carries gold, silver, lead and zinc.

Operated and produced during 1919 and 1920.

FLOWER OF THE WEST GOLD MINING CO. COLORADO

Probably dead. See Vol. XIV for description.

FLUORSPAR PRODUCTION CO. COLORADO

Address: Jamestown, Colo. Operated a concentration mill at Jamestown, Boulder county, in 1920.

FOREST QUEEN MINES CO. COLORADO

Address: 612 E. & C. Bldg., Denver, Colo.

Officers: R. A. Sullivan, pres.; Edwin Gaylord, v. p.-gen.-mgr.; J. H. Redding, sec.-treas.

Property a 5-year lease from May, 1917, on the Forest Queen mine on E. slope of Ironclad hill. Cripple Creek, Teller county. Ore said to average \$15 per ton. Main shaft 1,000' deep, worked 1920 and 1921.

Regular shipments were made to the Golden Cycle mill in 1919.

FOUR-MOST MINING & MILLING CO. COLORADO

Office: 509 Pennsylvania St., Denver, Colo.

Property: the Four-Most mine at Frisco, Summit county. Ore carries gold, silver, and lead.

Operated part of 1919, and shipped ore. Idle 1920.

FOWLER MINING & DEVELOPMENT CO. COLORADO

Address: Fowler, Colo.

Property: the Silver Real silver mine at Rosita, Custer county.

Operated part of 1919, but shipped no ore. Idle 1920.

FRACTION LEASING CO. COLORADO

Address: Idaho Springs, Colo.

Operated the Fraction mine at Idaho Springs, Clear Creek county, in 1920.

FRANK HOUGH MINING CO. COLORADO

Office: 830 Equitable Bldg., Denver, Colo. **Mine:** Lake City, Hinsdale county, Colo. **Inc.** 1907, in Colorado.

Property: on Engineer mountain, has a 2,500' tunnel developing a large body of copper sulphides, including bornite, with assays up to 27% copper, 47 oz. silver and \$5 gold per ton. Mine shipped several hundred tons of high-grade silver-copper ore, under former ownership.

Equipment: includes 800-ton shipping bins.

Production: estimated at 250,000 lb. fine copper in 1909, and 600,000 lb. in 1910. Property considered promising, but was closed down in 1912 because of destruction by fire of its surface equipment. Idle, 1916-'20.

FRANK ZARTZ LEASING CO. COLORADO

Address: 514 W. Chesnut St., Leadville Colo.

Operated the Robert E. Lee and Little Silver mines at Leadville, Lake county, in 1920.

FREE COINAGE CONSOLIDATED MINES CO. COLORADO

Address: Killen, Reinert & Downey, 717 Cooper Bldg., Denver, Colo.

Mine office: Independence, Colo.

Officers: J. B. Neville, pres.-sec.; C. W. Maleham, v. p.-treas.; with A. V. Hunter, directors.

Inc. 1917, in Colorado. **Cap.** 1,500,000 shares; one mill per share par; 395,710 outstanding. Company is successor of Free Coinage Mng. Co.

Property: the Pinto mine and Free Coinage group, 5 patented claims, 40 acres, in Cripple Creek district, Teller county, said to carry the Pinto, Wilson, Black Dick and Pueblo veins. The Delmonico, adjoining them, was acquired for \$500,000 in April, 1917.

Development: will be through the 1,125' Delmonico shaft, into Pinto and Wilson ground, two mines that have a \$2,000,000 production. Mines are being operated by lessees, S. Cox and others. L. F. LeBrun, who had a lease on the Wilson claim, secured a three-year extension; he also obtained additional ground. The lease now covers 1,300'. An important discovery of rich surface ore was made September, 1921.

Production: over \$2,000,000 in gold from above the 750' level.

FREEDOM MINING & MILLING CO. COLORADO

Probably dead. See Vol. XIV for description.

FREELAND DEVELOPMENT & TUNNEL CO. COLORADO

W. L. Shaffer, gen. supt., Idaho Springs, Clear Creek Co., Colo.

Property: a lease on the old Freeland group, of the Freeland Dev. & Trans. Co. fully described in Vol. X. Ore contains gold, silver, lead and copper. Operations reported resumed in 1920.

FRENCH FLAG MINING & MILLING CO. COLORADO

Address: Chas. S. Ripley, P. O. Box 366, Idaho Springs, Colo.

Property: French Flag mine, at Idaho Springs, Clear Creek county. Ore contains gold-silver-copper-lead.

Development: by shaft and crosscuts. The Wyoming Valley tunnel in Gibson gulch drains the property at 1,000' depth. The mine was unwatered early in 1921.

FRENCH GULCH DREDGING CO. COLORADO

Address: Box 1038, Colorado Springs, Colo.

Company has a dredge operating in French gulch, about 2 miles east of Breckenridge, Summit county. The machine is working on a channel 400 to 500' wide and digging 38' deep. Said to produce \$1,000 gold per day during the season. Operating steadily.

FRONTENAC LEASING CO. COLORADO

Address: Russell Gulch, Colo.

Property: the Frontenac mine at Russell Gulch, Gilpin county. Ore carries gold, silver and copper.

Operated and shipped during 1919 and in 1920.

FULLER, MACCULLOCH CO. COLORADO

See Vol. XIV. Failed in business in 1919.

GALENA MT. GOLD & SILVER CO. COLORADO

Address: Silverton, Colo.

Officers: Harry Lazarus, pres.; Delta, Colo.; A. S. Popper, v. p.; N. S. Lazarus, sec.-treas.

Inc. 1907, in Colorado. Cap. 120,000 shares; 111,000 outstanding.

Property: the Anti-Periodic group of 7 claims, 6 patented, about 45 acres, Galena Mountain, San Juan county. Has six fissure veins in porphyry and trachyte showing sulphide ore assaying \$8 to \$1,000 per ton in gold, with some copper. One vein, 27' wide, reported to assay \$12 in gold and silver for the entire width.

Development: by about 1,800' of underground workings, including 500' crosscut tunnel being driven to cut big vein at 300' depth. Company has produced \$18,000 worth of ore. No work done during 1919-21.

GALLIC-VULCAN GROUP

COLORADO

Address: Lake City, Colo.

Property: 2 patented claims and 2 mill sites on North Henson creek, 11 miles from Lake City, Hinsdale county. Elevation is 10,000'. Ore carries lead, copper, silver, and gold.

Development: by tunnels and a total of 4,000' of workings. Near the breast of main adit are said to be veins from 6' to 4' wide, carrying ore of good grade. There is a mill on the property.

GAMBETTA MINE

COLORADO

Address: W. E. Bowden, 431 W. 1st St., Leadville, Lake Co., Colo. Operated throughout 1920.

GARBUTT LEASING CO.

COLORADO

Address: 329 W. 8th St., Leadville, Colo. John Cortellini, mgr. Company is a close partnership and does not divulge results of its operations.

Property: the Garbutt, Negro Infant, King Solomon and Ontario mines, at Leadville, Lake county. Company operates through a 1,200' shaft.

Equipment: includes a steam hoist and 15-drill compressor.

Operated during part of 1920 and 1921.

GARFIELD MINING CO.

COLORADO

Offices: Garfield, Colo., and 503 K. of P. Bldg., Indianapolis, Ind.

Officers: C. O. Patten, pres.; Walter Johnson, v. p.; Fletcher Johnson sec.-treas., with C. A. Chambers, C. W. Means, E. J. Chambers, and John Harcourt, directors. E. W. Fisher, mgr.

Inc. April 1, 1918, in Colorado. Cap. \$10,000; 1 cent par; 775,000 issued.

Property: 19 claims, 17 patented, in Chaffee county. Mine has a 10' vein, dipping at 70°, said to be in limestone and to carry 20% zinc. Some ore-bodies carry gold, silver, lead and copper. Reserves are given as 1,000,000 tons.

Development: by tunnels, 1,000' and 2,000' long, and 6,000' of workings. Greatest depth is 1,600'.

Company has expended \$20,000 on development, and received \$10,000 from sale of ore. Plan installing a 50-ton concentrator and flotation mill. A shaft to connect upper and lower tunnels was being sunk at last reports.

Production: total output 900 tons, average grade \$20 per ton. Prior to present company's purchase, the property was idle for 12 years. Management is developing property, shipping only easily mined ore.

Operated and produced during 1919, but idle 1921.

GAUNTLET GOLD MINING CO.

COLORADO

Office: 512 Boston Bldg., Denver, Colo.

Property: the Gauntlet gold-silver mine at Central City, Gilpin county.

Operated but made no shipments during 1919 and 1920.

GEM CONSOLIDATED MINES CO.

COLORADO

Out of business. See *Gem Mng. Co.*, also Vol. XIV.

GEM MINING CO.

COLORADO

Office: 711 Symes Bldg., Denver, Colo. **Mine address:** Idaho Springs, Colo.

Officers: J. Foster Symes, pres.-treas.; Hon. W. E. Renshaw, v. p.-gen. mgr.; Sir H. M. Pellett, chairman of board; Ivor O. Wingren, sec.; Louis

S. Noble, advisory engr.; R. B. Lamb, cons. engr.; B. W. W. McDougall, gen. supt.; G. C. Cochrane, mine supt.

Inc. July, 1920, in Colorado. Is a consolidation of the Idaho Mining, Reduction & Trans. Co., the holdings of the Consolidated Franklin Mines Co. the Newhouse, or Argo tunnel, and the Gem Consolidated.

Property: the Gem group, the Freighters Friend group, including Amy C and Washington mines, and the Franklin and Silver Age mine. Also the Newhouse, or Argo Tunnel and the Newton mill. All in Idaho Springs district, Clear Creek county. Owns all holdings of Argo Red. & Ore Purch. Co. The Gem and Silver Age mines were held by Willard Elliott, trustee.

Development: by several shafts and extensive openings from tunnels. In December, 1920, a drift on 600' level of the Freighters Friend, to connect with the Silver Age, had opened 5' of good ore. Proposed to sink a 3-compartment shaft 1,000' from the Freighter to the Argo tunnel, and get under this new shoot.

Equipment: includes the Argo 100-ton custom mill at the portal of the Newhouse, or Argo tunnel. It employs stamps, tables, tube-mills, and flotation machines. At the Idaho property: includes 650 h. p. hydroelectric power plant, 500 h. p. steam-electric plant hoist, compressor, and the Newton 20-stamp mill and flotation plant. Newton mill operated 3 shifts continuously.

Operated and produced during 1920-21 mill treating 50 tons daily, yielding 6 cars of concentrate per month. In winter of 1920-21 company spent \$130,000 in new equipment and mine development, employing 80, taking out ore from three mines and connecting up all mines with the Newhouse tunnel. Mill remodelled 1921 to handle 200 tons daily; a reduction plant and smelter are to be erected.

During year 1921, management recovered the Mazda oreshoot beyond the fault. The new company will greatly stimulate and benefit mining at and near Idaho Springs.

GENERAL CHEMICAL CO.

COLORADO

Address: Denver Reduction Works, Osage & West Bayaud St., Denver, Colo. **New York office:** 25 Broad St.

Works acquired in December, 1919, from the Western Chemical Mfg. Co. General Chemical is probably the most important factor in the chemical industry of the United States. It specializes in the manufacture of acids, and in this connection owns or controls pyrite mines to supply the raw material for the making of sulphuric acid.

GENERAL MINES CO.

COLORADO

Office: 515 Jacobson Bldg., Denver, Colo.

Property: the Jason manganese mine at Leadville, Lake county. Work was suspended during 1919. Idle 1921.

GEORGETOWN TUNNEL TRANSPORTATION CO.

COLORADO

Office: Transportation Bldg., 608 South Dearborn St., Chicago, Ill. **Operating office:** Georgetown, Clear Creek Co., Colo.

Officers: E. H. Pratt, chrm.-v. p., Chicago; C. G. Breitenbach, pres.-treas.-gen. mgr.; C. A. Basse, sec.; J. H. Robeson, cons. engr., Denver, with M. B. Dittenhoefer, L. F. Shane and C. G. Earnest, directors.

Inc. 1910, in Colorado. **Cap.** \$5,000,000; divided into \$3,000,000 common; \$2,000,000 6% cum. pfd., of which \$543,470 is issued; par \$5; fully paid. Annual meeting 2nd Thursday in August.

General balance sheet July 31, 1920, shows assets: property, and equipment, \$5,262,401; supplies, \$3,000; ore and concentrate in transit, \$2,656; deferred debits, \$10,155. Liabilities include: cash overdraft, \$22,466; accounts payable, \$1,670; current, \$382; preferred stock, \$543,470; common, \$3,000,000. Earned surplus was \$1,511.

Company has under construction a deep tunnel providing drainage and ore transportation to 76 mining companies for period of 30 years and will own all hitherto undiscovered veins.

Property: company owns the following properties free from debt or mortgages and all patented: Georgetown tunnel, right-of-way, 3,000' wide and

16,000' long; Bard Creek, U. S. water rights; Century Pipe-Line & Power Plant; Royal Tunnel mill site; Royal mining claims; Georgetown tunnel sites No. 1, 2, and 3; Hildebrand mill site; the Chicago, Mayfield and Clara B., lode mining claims; one-sixth interest in the Cliff mining claim; and 76 thirty-year contracts with mining companies, switching yards, etc.

Development: on Jan. 1, 1921, tunnel was 3,000' long, and will, when completed, be 16,000' long.

Equipment: power-plant, 4-drill air compressor, and 50-ton mill erected early in 1920.

No ore was produced in 1919, but new mill was operating 1920.

GERMANIA MINE

COLORADO

Address: Ralph David, of Murphy, Vaughn & David, Breckenridge, Colo.

Property: the Germania silver-gold mine on Little mountain, near Breckenridge, Summit county. Operated by lessees in 1920, who shipped ore to the smelter at Leadville.

GIANT-ECLIPSE CONSOLIDATED MINES CO.

COLORADO

Address: P. O. Box 488, Salida, Chaffee county, Colo. Clyde H. Jay, pres. and gen. mgr.; F. L. Ream, sec.-treas.

Inc. Sept. 21, 1909, in Colorado. **Cap.** \$800,000; \$10 par; 72,000 issued. Annual meeting third Friday in January.

Property: 11 claims, in Monarch district, Chaffee county, near Garfield, shows contact deposits of lead-iron, copper, and zinc between granite, limestone and quartzite. Deposit runs N.-S. and dips at 45°. Orebody developed for 50 to 150' width, 1,400' length and 1,400' depth, claimed to carry 12 to 35% zinc, 3 to 25% lead, 1 to 3 oz. silver and 80¢ to several dollars per ton in gold. Zinc occurs in ore and as clean zinc carbonate. Mine has tunnels aggregating several thousand feet. Company claims to have developed 10,000 tons of low grade zinc ore and a large body of limestone.

Equipment: includes electric hoist, new compressor, etc. Installed also, 1920, two trams, one aerial for ore, the other, 800' long, for lime rock, to carry from mine direct to railroad cars.

Production: \$1,000,000 production since 1878; 1500 tons zinc carbonate carrying \$20 to \$40 per ton, shipped from July, 1916, to March, 1920. Company made large shipments of limestone to sugar mills and ore smelters in 1920.

GIBSON HILL MINING CO.

COLORADO

Dead. See Vol. XIV.

GILPADO MINING CO.

COLORADO

Office: 512 Equitable Bldg., Denver, Colo. **Mine address:** Harry T. Willis, supt., Central City, Gilpin county, Colo.

Officers: Forbes Rickard, pres.; Armory Eliot, v. p.; S. May, Jr., sec. treas., with H. Coonley, and A. N. Burbank, directors.

Inc. 1909, in Colorado. **Cap.** originally \$250,000, increased to \$500,000; \$1 par; all outstanding.

Property: the Powers-Chase mine, 5 patented claims, about 20 acres, in Central City district, said to show a fissure vein in granitoid gneiss. Ore is a silver-bearing copper sulphide, with some gold occurring in shoots 18" to 24" thick, and said to assay 1½ to 4 oz. gold and 13 oz. silver per ton.

Development: by a 570' shaft and about 5,000' of workings.

Equipment: includes a compressor and steam hoist.

In October, 1916, company resumed work, unwatering the Running lode mine below Blackhawk. In 1918, \$15,000 was spent on development. Mine was operated and produced during 1919 and part of 1920.

GILPIN-EUREKA MINES CO.

COLORADO

Address: Mr. Athanson, mgr., Central City, Gilpin Co., Colo. Is a re-organization of the Gilpin-Eureka Mining & Milling Co. E. L. Clark, gen. mgr., and N. E. Isbell, cons. metallurgist.

Property: claims in Prosser gulch, Gilpin county, considered to be well situated. Ore carries gold, silver, and lead.

Development: by main shaft 720' deep sunk 1921 to 1,000' to connect with

the Newhouse tunnel. This will drain the workings and allow ore to be hauled out that way. The bottom level is said to be in ore all the way.

Equipment: includes mill with concentrators, motor driven. Mill moved to Eureka gulch, 1921 and increased to 40 stamps, ore hauled by aerial tram. Electric pumps installed 1921.

GILPIN GIANT MINES**COLORADO**

Address: G. A. Bierbaum, Gilpin, Colo.

Property: the 55 claims, mill, and all other equipment of the bankrupt Fifty Gold Mines Corporation in Gilpin county. Mines include the Gregory and Bobtail, near Black Hawk, which were to be unwatered and the mill overhauled in 1919. Apparently, however, no work was done in that or the following year.

GILPIN MILLING & REDUCTION CO**COLORADO**

Mail returned 1921 from former address: Central City, Gilpin county, Colo.

Officers: V. R. Jones, pres.; E. E. Jones, sec.; L. H. Guthrie, treas.

Inc. Nov., 1919, in Colorado.

Property: 5-acre millsite, water-right on North creek, and the 100-ton remodeled Hidden Treasure mill at Black Hawk. A patented process of the American Continuous Retort Co., claimed to extract all metals, no matter how refractory the ore, was to be used.

GILPIN MINES & REDUCTION CO.**COLORADO**

Dormant. See Vol. XIV.

GILPIN-ORION GOLD MINING CO.**COLORADO**

Dead. See Combination M. & M. Co.

GILPIN TUNGSTEN PRODUCTION CO.**COLORADO**

Mail unclaimed in April, 1920 at former address: 1712 Champa St., Denver. C. M. Kittredge, mgr.

Cap. 1,000,000 shares, 800,000 unissued.

Property: the Empress claims in Idaho Springs district, Clear Creek county, and Sternberger tract in Gilpin county.

The Empress is opened by a 500' tunnel to depth of 300', showing good gold-silver-copper ore. Near the Sternberger the company has claims that contain silver and tungsten ore.

No recent information. No work done at either mine during 1919.

GILT EDGE MINES & SMELTING CO.**COLORADO**

Office: 935 Equitable Bldg., Denver, Colo.

Officers: Henry I. Seemann, pres.-gen. mgr., Box 1375, Denver, Colo.; Wm. H. Warinner, v. p.; A. W. Craig, sec.-treas., with E. M. Kirton, directors.

Inc. July 24, 1913, in Colorado. Cap. \$1,500,000, to be increased later to \$2,500,000; \$1 par; outstanding, March 15, 1919, 1,011,253 shares. Annual meeting, fourth Thursday in July.

Property: 46 claims, about 300 acres, mostly patented, in Lincoln mining district, Clear Creek county.

Ore: gold-silver-copper in fissure veins in schist and porphyry, said to assay from \$9 to \$200 per ton. The Gilt Edge mine is said to have produced some rich gold ore.

Development: the Aurora tunnel driven at a depth of 1,000'; 500' long in Dec., 1918. Total underground workings, 2,000'.

Output said to assay over \$200 per ton. Not operated during 1920.

GLACIER MINE**COLORADO**

Address: C. S. Barnes & Co., Monte Vista, Colo.

Mine at Platoro, Conejos county, was under development in 1920.

GLADSTONE MINES CO.**COLORADO**

Address: Box 128, Buena Vista, Colo.

Property: the Gladstone gold-silver mine near Buena Vista, Chaffee county. Operated during 1920.

GLOBE SMELTER**COLORADO**

Property acquired by the American Smelting & Refining Co. From the Globe Smelting & Refining Co.

Office: 120 Broadway, New York. **Operating address:** F. C. Gilbert, mgr., Denver, Colo. **Works address:** W. F. de Groot, supt., Globe Plant, Denver, Colo. The old lead smelter has been dismantled, but company operates an arsenic refinery. Cadmium also is produced.

GLOBE SMELTING & REFINING CO.

COLORADO

Presumably dead. See **Globe Smelter and A. S. & R. Co.**

GNOME MINE

COLORADO

Address: Izard Lease, Box 606, Leadville, Lake Co., Colo.

Operated during 1920.

GNOME MINING CO.

COLORADO

Address: Arthur W. Johnston, mgr., Eureka, Colo.

Property: the Columbus gold-silver mine at Animas Forks, near Silverton, San Juan county.

Development: by a 1,500' crosscut tunnel, intersecting the vein at depth of 700'. In one place vein was 30' wide, assaying \$20 per ton. Rich ore was being opened during 1920.

GOLCONDA MINES CONSOLIDATED, INC.

COLORADO

Address: 403 Merchants Bank Bldg., Indianapolis, Ind. **Mine address:** B. C. Essig, mgr., Lake City, Colo.

Property: the Golconda gold-silver mine at Lake City, Hinsdale county, containing the Dewey Ingersoll and Goldman veins.

Development: by 1,500' tunnel, under Gravel mountain, cutting the main vein at 1,000' from portal. Ore runs over \$100 in gold and silver.

Equipment: includes buildings, compressor, ore-bins, etc. A mill is to be built 1921-22. Is the leading producer of Lake City district.

GOLD ANCHOR MINING & MILLING CO.

COLORADO

Address: 527 E. & C. Bldg., Denver, Colo.

Property: the Johnny Bull gold-silver-copper mine near Rico, Dolores county.

Idle 1920 but operated and shipped ore 1919.

GOLD BELT MINING CO.

COLORADO

Out of business. A. B. Scott, sec., 427 Ernest & Cranmer Bldg., Denver, Colo. See Vol. XIV.

GOLD BOND CONSOLIDATED MINES CO.

COLORADO

Office: 226 Temple Court Bldg., Denver, Colo.

Officers: G. A. Hummer, pres.; S. R. Herber, v. p.; C. R. Slusser, sec.-treas., with I. W. Herber and Dr. Geo. L. Dewey, directors.

Inc. 1900, in Colorado. **Cap.** \$1,350,000; shares \$1 par; outstanding, 1,255,000 shares.

Gross production to 1919 said to be \$110,000. Company office transfers stock. Listed on Colorado Springs Exchange. Last shareholders' meeting held in 1900. No sale of stock since 1916.

Property: 4 patented claims, 18 acres, on S. W. slope of Gold hill, Cripple creek, Teller county.

Ore: gold in fissure veins in granite, said to average \$5 to \$32.50 per ton, with 1918 shipments of \$18 ore.

Development: 400' vertical shaft with over 2,500' workings. Worked by Mollie O'Bryan, 1921 shipping \$19.60 ore.

GOLD BOND EXPLORATION CO.

COLORADO

Dead. See Vol. XIV.

GOLD CAMP SYNDICATE

COLORADO

Mail returned 1921 from former address: W. Y. Seaman, 1842 Stout St., Denver, Colo.

Property: 16 acres, said to be favorably situated at Cripple Creek, Teller county, but the method of raising money by boom literature, memberships (\$35 per membership, three for \$100), and shares of an adjoining property, were not conducive of confidence. In July, 1917 property was transferred to a trustee, then to a new company, the **Victory Gold Mining Co.**, which see.

GOLD COIN MINING & LEASING CO.**COLORADO****Office:** Colorado Springs, Colo.**Officers:** H. E. Woods, pres.; F. M. Woods, secretary.**Cap.** \$1,000,000; \$1 par.

Property: 280 acres in Greelev district, Weld county, through exchange for Gold Coin property at Victor, Teller county. Company also reported to own 66,667 shares in the California Southern Oil Fields Co., which owns fields in Wyoming, Arizona, and California; 80% of stock of Crown Point Gold Mng. Co.; and a large number of shares in Lexington Arizona Mining Co.

The Crown Point Gold Mining Co. was operating a lease on the 1,000' level of the Gold Coin shaft, but shut-down in Dec., 1920.

GOLD CROWN MINING CO.**COLORADO**

Address: I. C. Ingersoll, mgr., Ouray, Colo. B. G. Brinkman, owner of mine, Lafayette Bank, St. Louis, Mo.

Property: 45 claims, 40 patented, 450 acres, at Ouray, Ouray county, being worked under option.

Ore: is a mixture of quartz, calcite and ferro-manganese silicates, carrying iron pyrite with gold and copper, mainly as chalcopyrite.

Development: by 1,400' shaft with 4,000' of workings.

Equipment: company's 300-ton mill was burned down June 21, 1921.

GOLD CUP MINING CO.**COLORADO**

Described in Vol. XIV. Succeeded by **Little Kingdom Mines & Land Co.**, which see.

GOLD DOLLAR CONSOLIDATED MINING CO.**COLORADO**

Stockholders voted to dissolve, in April, 1919, their interests to be conserved by surrender of old stock for shares in the **New Gold Dollar Mining Co.**, on payment of one cent a share.

Dividends: paid to 1919, \$1,000,000; last dividend, \$12,500, paid Dec. 1, 1912. Company's indebtedness in 1919 was \$16,310.

GOLDEN AGE MINING & RED. CO.**COLORADO**

Probably dead. No news since 1918, when company was sending ore to the Standard mill at Springdale, Colo.

GOLDEN CALF MINING CO.**COLORADO**

Address: Room 24, State Capital, Denver, Colo.

Property: the Golden Calf gold-silver mine at Twin Lakes, Chaffee county.

Operated and produced ore during 1919 and 1920.

GOLDEN CONSOLIDATED MINES CO.**COLORADO**

Address: 1816 California St., Denver, Colo.

Officers: R. R. Moodie, pres.-treas.; C. L. Carter, v. p.; N. M. Abbott, sec.; G. N. Green, asst. sec.; with G. W. Mitchell, directors.

Inc. in Colorado. **Cap.** \$75,000; 1¢ par.

Property: the former holdings of the Allerton Mining Co. in Gladstone district, a 75% interest in the Emerson, and full ownership of the Bohemian Girl, Taft, King George, Commonwealth No. 1 Tornado, Commander and West Point claims in Boulder county; also a 50% interest in 5 claims and ownership of about 20' claims and tunnel-sites in the Empire, or Iowa district of Clear Creek county, 3 miles W. of Idaho Springs. Several claims were patented in 1919. Work was resumed during 1921 and new silver-lead orebody cut on Joe and John group.

GOLDEN CRESCENT MINE**COLORADO**

Address: Frank L. Branham, Blackhawk, Gilpin Co., Colo., who operated the mine near Central City, in 1920.

GOLDEN CYCLE MINING & REDUCTION CO.**COLORADO**

Office: Colorado City, El Paso county, Colo.

Officers: A. E. Carlton, pres.; E. P. Shove, v. p.; Bulkeley Wells, sec.; L. G. Carlton, treas.; with Spencer Penrose, Richard Roelofs, and H. McGarry, directors.

Inc. 1909, in West Virginia. **Cap.** \$1,500,000; \$1 par; all issued. No

bonded indebtedness or preferred stock. Listed on Colorado Springs Exchange.

Balance sheet for year ended Dec. 31, 1920, shows; current assets, \$645,249 and accounts payable \$158,724, compared with \$905,484 assets and \$271,221 liabilities in 1919.

Dividends: to January, 1921, total, \$9,513,330. The rate was 36% per annum, but was reduced to 24% or 8c. per share in 1921.

Property: 1,515,000 shares, or 1/3 interest, of United Gold Mines Co. and entire stock of Pikes Peak Cons. Fuel Co., operating coal mine with 15 million tons of coal, near Colorado Springs. Also reduction works at Colorado City in which all the high grade ores of the Cripple Creek district, Teller county, are treated. Plant includes rolls, roasting furnaces and cyanide equipment. An attempt was made to treat ore from Leadville, but was unsuccessful.

Golden Cycle mine was sold to the Vindicator Cons. Gold Mining Co. for \$1,300,000.

Net earnings of mill have been as follows: \$571,108 in 1909; \$687,689 in 1910; \$571,047 in 1911; \$670,333 in 1912; \$583,292 in 1913; \$672,191 in 1914; \$682,990 in 1915; \$643,004 in 1916; \$576,440 in 1917; \$504,277 in 1918.

The coal mines bring in an additional \$100,000 per annum.

GOLDEN EAGLE MINING ASSOC'N.

COLORADO

Address: 814 Central Savings Bldg., Denver, Colorado.

Property: the Rose Hardy and Cameron mines at Cripple Creek, Teller county, operated during 1920.

GOLDEN EDGE MINES SYNDICATE

COLORADO

Office: 436 First National Bank Bldg., Denver, Colo. **Mine address:** Idaho Springs, Colo.

Property: the Golden Edge silver mine at Idaho Springs, Clear Creek county, opened by a 900' tunnel. Operated part of 1919, but shipped no ore.

GOLDEN EMPIRE MINING CO.

COLORADO

Address: Empire, Colo.

Officers: B. F. Richards, pres.; G. W. Kinsey, v. p.; E. D. Payne, sec.-treas.-gen. mgr.; with W. W. Kinsey and J. W. Thayer, directors. Is a reorganization of an Arizona corporation, with Colorado holding company.

Cap. \$3,000,000; \$1 par; changed 1921 from \$300,000; 10¢ par. **Transfer office:** Empire, Colo. Annual meeting, first Thursday in October.

Report for year 1920 shows: balance forward, \$826; receipts from stock sales, \$18,255; loans, \$4,000; ore sold, \$117; total \$23,299. Expenses were \$23,160.

Property: the Harrison, Denver City group, Denver City and Tennessee units, 31 claims, in 6 groups, in the Upper Union district, Clear Creek county. Also 3 millsites and waterrights.

Company has a 10-year lease on the mine of the Tennessee M. & M. Co., with an additional 10-year privilege, and was planning in 1919 to secure the Marshall-Russell Tunnel group.

Mines produce principally copper-iron sulphides, but the Denver City group yielded lead, silver, gold, and zinc ore in 1919.

Development: by the 3,000' Arvada tunnel, the Marshall-Russell 7,400' crosscut, and various shorter tunnels. One in the Harrison is 300'; in the Denver City, 4, totaling 1,250'; in the Tennessee, 4, totaling 3,000'; in the Union, one of 400'; in the Conqueror, one of 800'. All are said to be in ore. **Workings** aggregate over 4 miles.

Ore reserves were estimated to be 20,000 tons.

Equipment: includes a compressor, with electric and gasoline power and 3 mills.

Property large and company's plans ambitious; ore is good, but company needs capital to operate on larger and more economical scale.

GOLDEN FLEECE MINING & MILLING CO. COLORADO
Office: 601 Foster Bldg., Denver, Colo. Mine address: Lake City, Colo.

Property: the Golden Fleece gold-silver mine at Lake City, Hinsdale county.

Operated mine and mill during 1919 and part of 1920.

GOLDEN MINE ORE CHANNEL CO. COLORADO
Address: Boulder, Colo.

Reported operating at South end of Boulder Belt and that Diamond drill had cut 6' of \$12.80 ore.

GOLDEN TRIANGLE MINING CO. COLORADO
Dead. See Vol. XIV.

GOLD GLEN MINING, MILLING & TUNNEL CO. COLORADO
Address: Idaho Springs, Colo.

Property: the Gold Glen gold-silver mine near Idaho Springs, Clear Creek county.

Idle 1920, but operated part of 1919.

GOLD HILL MINING CO. COLORADO
Office: Boulder, Colo.

Officers: W. A. Jackson, pres.; U. S. De Moulin, v. p.; J. M. Page, sec.; W. W. Pollock, treas., with A. W. Glessener, G. W. Meser, C. A. Neal and W. H. Pruy, directors.

Inc. in Colorado. Cap., \$2,000,000; \$1 par; 1,000,000 issued Bonds authorized, \$150,000; outstanding in 1917, \$83,000.

Property: 74 claims, 43 patented, in Gold Hill and Central districts. Boulder county, said to show gold-silver ore in a fissure vein in granite. Reported 4,000 tons ore reserves.

Development: by 4,660' of tunnels and total of 25,000' underground work to depth of 875'.

Equipment: includes 100-ton cyanide mill and 7 drill compressor.

Mine and mill idle for several years.

GOLD HILL UNITED MINES CO. COLORADO
Dead, or dormant, mail sent to Bailey Bldg., 1218 Chestnut St., Philadelphia, Pa. is not answered.

Inc. June 1, 1910, in Delaware, Cap. \$2,000,000; shares \$1 par. Registrar & Transfer Co., New York, transfer agent. Listed on New York Curb.

Property: in the Kerber Creek, Manitou and Hull districts, Saguache county. Doing assessment work only, at last accounts.

GOLD KING EXTENSION MINES CO. COLORADO
Offices: Silverton, Colo.; and 504 Bank Block, Denver, Colo. Is a reorganization of New Gold King Mines.

Officers: John M. Kelly, pres.; J. N. Nicholson and R. G. Gentry, v. p.'s.; G. W. Kinney treas. G. T. Hoffman, sec.; W. Z. Kinney, mgr.

Cap. 2,500,000 shares, changed Aug., 1921 from 1,250,000 shares. Bonds authorized, \$250,000.

Property: Gold King group at Gladstone, San Juan county, about 150 acres, and six other claims, totaling 55 acres, between the Gold King group and Sunnyside mine. Company also purchased the Gold King mill and tramway.

Geology: fissure veins in andesite carrying irregular stringers of lead-copper ore with gold and silver values. Gold occurs free in white quartz associated with iron pyrite, galena, or blende.

Development: by 700' shaft and 3,060' tunnel. In July, 1920, the West vein was reported to be 75' wide, and was being opened on the 700' level.

Equipment: compressor, tramway, 80-stamp and flotation mill. The Gladstone-Silverton railroad was purchased in 1920.

Production: mine credited with \$6,081,279 net from 1895 to 1919, of which \$1,750,000 was paid in dividends. Mill operated 1919 and 1920, ship-

ping concentrates to Leadville. Mine formerly leased (1920) to Southwestern Leasing Co.

GOLD KING MINING CO.**COLORADO**

Mine leased. See **El Paso Gold King** mine.

Company inactive. Fully described in Vol. XII.

In December, 1920, H. S. Hadley of the University of Colorado started suit against the company for \$30,000, alleging failure to pay him 15,000 shares for legal services.

GOLD QUEEN MINING CO.**COLORADO**

Idle. Considered a wild cat of the worst type. Claims on Barren mountain (so called for good cause), Chaffee county. For further information, see Vol. XII.

GOLD SOVEREIGN MINING & TUNNEL CO.**COLORADO**

Mine operated by Evan J. Williams, Cripple Creek, in 1920. **Offices:** 223 Burns Bldg., Colorado Springs, and Cripple Creek, Colo.

Officers: Jas. F. Burns, pres.-treas.; John T. Hawkins, v. p.-sec., with Daniel Thatcher, and A. Feringher, directors. C. G. Jackson, supt.

Charter renewed Oct. 31, 1915. **Cap.** \$2,000,000; \$1 par; in treasury Jan. 1, 1917, 195,228 shares; cash, \$8,471. Listed on Colorado Springs Exchange.

Dividends: \$32,559, last dividend of \$5,000 paid in 1912.

Property: Gold Sovereign and J. G. Blaine claims, 7.2 acres, patented, on Bull hill (Sec 20), Cripple Creek district, Teller county, adjoining the Cresson. Management believes that rich Cresson veins extend into Gold Sovereign ground. Shoots reported as 3' wide and assaying \$50 per ton in gold said to be disclosed on the 15th level.

Development: by 1,350' shaft, to be sunk an additional 200'.

Mine was operated during 1919 and 1920. In December, 1920, the **Edna Forest M. & M. Co.**, which see, had secured a lease on part of the Gold Sovereign mine, below the 10th (1,000') level.

GOLD WAVE MINE**COLORADO**

Address: A. E. Chapman, who operated the mine at Alma, Park county, in 1920.

GOOD HOPE MINING & REDUCTION CO.**COLORADO**

Address: Dr. Louis Weiss, Iola, Gunnison county, Colo. **Mine address:** Vulcan, Colo. J. M. McDougal, secretary.

Inc. in Wyoming. **Cap.** \$50,000; par \$1.

Property the Good Hope gold-silver mine, 4 claims, 70 acres, at Vulcan, Gunnison county.

Development: 700' shaft blocking out 100,000 tons of pyritic ore, containing low copper and gold values. This ore is treated in matting furnace.

Production: to date., \$200,000 smelter returns. Operated part of 1919 and shipped ore. Idle 1921.

GOOD MORNING GOLD MINING & INVEST. CO.**COLORADO**

Presumably dead. See Vol. XIV.

GOVERNOR MINE**COLORADO**

Address: Boyce Bros., Breckenridge, Colo.

Property: about 7 miles south of Breckenridge, Summit county. Mine is said to have produced rich silver ore in the 80's. A winze sunk from main tunnel shows a vein of sulphide ore carrying gold, silver and zinc.

Operated part of 1919, but shipped no ore.

GRAND COUNTY MINE**COLORADO**

Address: Donald Syndicate, E. & C. Bldg., Denver, Colo., which operated this mine at Caribou, Boulder county, in 1920.

GRAND UNION MINE**COLORADO**

Address: S. R. Turney & Co., Lamar, Colo. Mine at Rollinsville, Gilpin county, was worked in 1920.

GRANITE GOLD MINING CO.**COLORADO**

Address: Box 22, Colorado Springs, or Cripple Creek, Colo.

Officers: C. M. MacNeill, pres.; C. C. Hamlin, v. p.-treas.-gen mgr.; Spencer Penrose, sec.; with Michael Finnerty, E. P. Shove, and C. L. Tutt, directors. M. A. McLeod, supt.; C. B. Garnett, asst. sec.

Inc. 1905, in Wyoming. **Cap.** \$1,750,000; \$1 par; outstanding, \$1,650,000; stock transferred at company's office. Colorado Title & Trust Co., Colorado Springs, registrar. Annual meeting, 4th Monday in April, at Cheyenne, Wyo. Stock has been very closely held, but was listed in Colorado Springs Exchange in July, 1915.

Owens all the stock, excepting 3 shares, of the Little Montana Mining Co. Those portions of the Granite Gold property lying within the City of Victor were incorporated as a separate company, the Little Montana Mining Co. Stock of the Mohican G. Mng. Co. was purchased in 1916 for \$22,580.

The 1920 report of the company shows a loss of \$24,674 incurred by 1919 operations, but income from ore sales, etc., was \$56,187 and mine expense, \$28,123, with general expenses of \$16,760 and depreciation charges of \$35,977.

Financial Statement—Years ending Dec. 31:

Assets.

Year	Property	Invests.	Little Mont.			Total
			a/c	Current	Deficit	
1920.....	\$1,267,124	\$152,117	\$52,814	\$91,396	\$94,703	\$1,658,154
1919.....	\$1,292,314	154,237	48,962	71,471	92,285	1,659,269
1918.....	1,328,458	149,997	44,948	46,872	71,625	1,658,260

Current Liabilities for 1919 were \$9,269, compared with \$8,260 in 1918

Income Account

Year	Total	Expenses	Oper. Profit	Dividends	Depreciation
1920.....	\$40,880	\$32,282	\$8,598	\$14,870
1919.....	\$56,187	40,870	15,317	35,977
1918.....	227,332	178,882	48,450	33,000	94,433
1917.....	411,253	284,875	126,378	49,500	129,999

Dividends: 26% to end of 1918; none since, with total of \$369,000. Paid capital distribution of 3 cents per share (\$9,500) on Feb. 10, 1921, after which cash and Liberty bonds amounted to \$40,000.

Property: the Dillon mine, 11 claims, 40.5 acres, patented, in the Cripple Creek district Teller county. In 1914, to avoid apex litigation, the Dead Pine claim owned by the Ravnor Gold Mining Co., was bought for \$87,500. The main production is now from this company's ground. Granite Gold also operates the Bonanza fraction of the United Gold Mines Co., through the Dillon shaft. (For geology of the Cripple Creek district, see U. S. G. S. Prof. Paper 54).

Development: by shafts with several miles of workings. The Dillon or main working shaft is 1,750' deep, the Gold Coin shaft, 1,300' deep (worked out and dismantled in 1920). The Roosevelt tunnel drains the Granite Gold ground and deeper development will be possible. A new vein known as the Campbell was developed from the Coin shaft and opened up on Coin levels 10, 11, 12 and 13; company reports fair ore. There is about 550' of unprospected ground between the bottom of the Dillon shaft and the Roosevelt tunnel level. Upper levels of the various properties are operated under lease (15 sets of lessees in 1920); lower levels are worked by company.

Equipment: mines are well equipped; an electric hoisting plant good for 2,000' is installed at the Dillon shaft.

Production: total up to 1918 about \$15,182,989. Ore production was 34,427 tons in 1916; 43,204 in 1917; 30,211 in 1918; 12,410 in 1919. In part of 1920, the monthly output was 1,000 tons of \$10 to \$60 ore by lessees, and 100

tons of \$40 to \$60 ore by company from the Bonanza mine. In 1921 about 1,000 tons a month was mined from the 5, 14, 16 and 17 levels.

GRANITE HILL MINING & MILLING CO. COLORADO

Out of business and in hands of receiver. Address: Wm. Lloyd, sec., Box 178, Colorado Springs, Colo.

Property: the Granite Hill mine in the Cripple Creek district, Teller county.

GRANITE TUNNEL CO. COLORADO

Dead. See Vol. XIV.

GREAT WESTERN MINE COLORADO

Armstrong and Vanetta lessees. Mine near Lake George, Park county, Colorado.

Property: shows vein with gold-copper ore, developed by 218' vertical shaft, 800' of crosscuts and drifts. Equipped with steam power and air-compressor. Small shipments of sulphide ore have been made in past. Nothing done in 1918-1921.

GREAT WEST MINES SYNDICATE COLORADO

Address: Ward, Colo.

Property: the Kansas City gold-silver mine at Ward, Boulder county.

Company contemplated erecting a custom mill, using flotation, in 1919. Operated part of 1919, but shipped no ore.

GREENBACK MINING CO. COLORADO

Dead. Property owned by Western Chemical Co., which does no mining.

Address: 700 Franklin St., Denver, but mine shut down 1921.

GREEN RIVER MINING CO. COLORADO

Address: C. E. Jurv, mgr., Green River, Wvoming.

Officers: C. E. Ellison, pres.; A. J. Davis, sec.; Thos. Cook, treas.

Inc. in Wvoming. Cap. \$50,000; par \$1; \$20,000 issued.

Property: the Wvoming gold-silver mine, 4 claims, 34 acres, at Empire, Clear Creek county, shows 8' quartz vein with streaks of very high grade gold-silver ore.

Development: by 800' crosscut tunnel to cut vein at 1,000' with back of 500'.

Operated part of 1919, but shipped no ore.

GRIFFIN MINING CO. COLORADO

Address: Box 910, Leadville, Lake Co., Colo. Operated the Griffin mine at Leadville, 1920.

GROUND HOG T. & M. CO. COLORADO

Address: California Bldg., Denver, Colo. Mine operated 1920 by G. E. Olmstead of Redcliff, Colo.

Property: the Ground Hog gold-silver mine near Redcliff, Eagle county.

GUADALOUPE MINING CO. COLORADO

Address: T. I. York, Ouray, Ouray Co., Colo.

Property: the Guadalupe mine at Iron-ton, near Ouray, said to show high grade gold-copper ore. Developed by tunnel and equipped with compressor. Worked and shipments made in 1919 and 1920.

GUNNISON COPPER CO. COLORADO

Address: Gunnison, Colo. John Robinson, mgr.

Property: at Whitepine, near Gunnison. Reported to have cut low-grade copper ore in new work in crosscut tunnel. Worked in 1919-20, but shipped no ore.

GUNNISON MINE COLORADO

Address: Fred H. Brown, Gunnison, Colo., who did development work at mine in 1920.

GUSTON MINE COLORADO

Owned by Congress Copper Mines Co., which see.

H. A. C. TUNNEL & MINING CO. COLORADO

Address: Ouray, Colo.

Property: the H. A. C. gold-silver mine at Ouray, Ouray county. Operated part of 1919, but shipped no ore.

HAHNEWALD LEASING CO.**COLORADO****Address:** care Gold Sovereign mine, Cripple Creek, Colo.

In 1918, reported to have operating lease on the Gold Sovereign mine, of Gold Sovereign Mine & Tunnel Co., Bull hill, Cripple Creek, Teller county.

HAHN'S PEAK GOLD MINING & MILLING CO.**COLORADO****Office:** Room 3, Algoma Bldg., Oshkosh, Wis. Mine at Columbine Hahn's Peak P. O., Routt Co., Colo.**Officers:** H. O. Granberg, pres.; C. A. Spencer, v. p.; Chas. Olsen, supt.; E. E. Meeleus, sec.-treas., with Dr. H. A. Wolter, M. A. Rasmussen, and W. E. Brown, directors.**Inc.** Jan. 29, 1905, in Colorado. **Cap.** \$1,250,000 increased from \$1,000,000; \$1 par; assessable; on Aug. 19, 1919, 996,257 shares outstanding.

Receipts for year ended December 31, 1918, were \$1,559, compared with \$17,000 in 1917.

Property: the Royal Flush mine, 25 claims, 248 acres, patented. **Development:** by 406' incline shaft and 950' tunnel on Royal Flush claim, said to cut 5 veins; also the 2,100' Conundrum tunnel 430' lower, cutting 12 veins, whose values are in gold and silver. Underground workings total 15,000'. Vein is in porphyry and has a 70° dip.

Reported on by Arthur Lakes, Etienne Ritter, H. C. Beeler and others.

Equipment: includes gasoline engines, compressor, air drills, blower and 400-ton concentrating mill. Experiments with oil flotation process said to be favorable. About \$20,000 spent in 1920 on development work in mine and plant. Plan to connect mill and mine by rail, the locomotive to run into the mine for 1,540'. Ore shipped averages \$61 per ton.**HAMLET MINING & MILLING CO.****COLORADO****Address:** Al Kolz, Silverton, Colo**Officers:** J. S. Tucker, pres.; H. W. Fox, cons. engr.**Bonds:** \$150,000 issued in 1911.**Property:** 19 claims, about 200 acres, known as the Hamlet mine, 8 miles from Silverton, in the Howardsville district, San Juan county.**Development:** by tunnels, longest known as Mill tunnel, 500' below 5th level of old mine workings, connected by raises with tunnel.**Ore:** a complex mixture of copper-lead and zinc sulphides carrying good gold and some silver.**Equipment:** includes steam power plant, compressor and conical mill with flotation unit, rebuilt 1917.

Company operations suspended, but mine and mill operated by Al Kolz during part of 1920.

HAMPTON CONSOLIDATED MINES CO.**COLORADO**

Either dead or dormant. Property operated by the Amherst Mining Co., which see in this volume.

HANNA MINING & MILLING CO.**COLORADO**

Dead.; see Vol. XIV.

HARPER-LARSON DEVELOPMENT CO.**COLORADO**

Name changed, 1917, to Calliope Cons. M. Co., which see.

HARRISON DUMP MINE**COLORADO****Address:** Mark Papovich & Co., 414 W. Elm St., Leadville, Lake Co., Colo., which operated this property in 1920.**HEADLIGHT GOLD MINING & MILLING CO.****COLORADO****Office:** 2019 Elm St., Cincinnati, Ohio.**Property:** the Headlight mine at Iola, near Spencer, Gunnison county. Ore carries gold, silver and copper.

Operated and produced during 1919 and 1920.

HECK GOLD MINING & LEASING CO.**COLORADO****Mine address:** C. B. Heckler, Cripple Creek, Colo.**Officers:** Alfred Steele, pres.; with S. A. Gaston, Francis P. Haynes and Walter C. Cockran, directors.**Inc.** 1921, in Colo. **Cap.** \$300,000.

Property: a lease on the Empire State property. Developing on third and bottom levels to prospect Maloney vein.

HENRIETTA COPPER MINING CO. COLORADO

Address: 1816 California St., Denver, Colo. Mine address: E. W. Walter, mgr., Silverton, Colo.

Officers: E. R. Moodie, pres.; N. M. Abbott, sec.-treas.

Inc. April, 1916. **Cap.** \$3,000,000; \$1 par. Last annual meeting held May 23, 1921. Stock sold at 15¢, 1920.

Company took over the holdings of the Henrietta M. & M. Co., formerly owned by the San Juan S. & R.

Property: about 6 miles N. of Silverton, in Prospect Gulch, Red Mountain, San Juan county.

Development: by over 6,250' of workings. The main, or No. 7 tunnel is 2,200' long, and shows auriferous and argentiferous copper ore. Work started May, 1917. Reserves said to be 300,000 tons above No. 7 level.

First shipments were made in October, 1918. Operated and shipped ore carrying 16½% copper, 10 oz silver and a little gold in 1919 and 1920.

HENRIETTA MINING & MILLING CO. COLORADO

Dead. See *Henrietta Copper Mining Co.*, and Vol. X.

HENRIETTA OR MAID MINE COLORADO

Address: Cramer & Co., 121 S. Toledo Ave., Leadville, Lake Co., Colo., who operated mine in 1920.

HENRY ADNEY GOLD MINING CO. COLORADO

A close corporation operating the Henry Adney mine, Cripple Creek.

HIBBS ORE CO., J. GILLINGHAM COLORADO

Office: Central Savings Bank Bldg., Denver, Colo.

Property: the Argo, Emmet, and Good Friday fluorspar mines at Sugar Loaf, and the Golden Age and Lehman mills at Jamestown, Boulder county, formerly worked by the Colorado Pitchblende M. Co.

HIDDEN TREASURE GROUP (LAKE CITY) COLORADO

See *McCarthy Hidden Treasure Mng. Corp.*, in this book.

HIDDEN TREASURE MINING CO. COLORADO

Address: Benedict Crowell, pres., Cleveland, Ohio. Mine address: E. R. Bauer, mgr., Ouray, Colo.

Inc. 1920, in Colorado.

Property: the Hidden Treasure mine near the Camp Bird in Ouray county. Ore carries lead, silver and zinc. At the end of 1920 the tunnel was to be extended 3,000' Machinery from the Silver Mountain mine at Ironton was purchased and installed 1921 and a contract let for 1,000' of tunnel work. A mill was erected in the autumn of 1921 containing jigs, Huntington mill, tables and flotation plant. Property formerly owned by Thos. F. Walsh of Camp Bird fame.

HIGHLAND MARY LEASING CO. COLORADO

Address: Silverton, Colo.

Property: the Highland Mary mine near Silverton, San Juan county. Ore carries gold, silver, and lead.

Operated 1919 and 1920 and ore shipped.

HIGHLAND MARY MINES CO. COLORADO

Dead. Succeeded by Silver Canyon Mining Co., and succeeded in turn by *Highland Mary Leasing Co.*

HIGHLAND MINING & MILLING CO. COLORADO

Address: Leadville, Colo.

Property: the Burns shaft and gold-silver mine in Leadville district, Lake county.

Operated but shipped no ore. 1919. Idle in 1920-21.

HILL TOP SILVER MINING CO. COLORADO

Office: 1229 Foster Bldg., Denver, Colo. Mine address: S. P. Doran, supt., Fairplay, Colo.

Officers: Geo. C. Manly, pres.; G. L. Felt, v. p.-treas.-gen. mgr.; Geo. L. Nve, sec., with W. H. Coolidge and Francis E. Young, of Boston, directors.

Inc. Feb. 17, 1917, in Colo. **Cap.** \$1,000,000; par \$1; 900,000 issued. No bonds.

Property: a lease and bond on the Hill Top mine of the Sun-Moon Leasing Co., 36 patented claims, 302 acres, near Fairplay, Alma district, Park county. Replacement deposits along fissure in limestone show ore that assays 12 oz. silver per ton and 19.5% lead. Company formerly operated 60 acres on Seaton mountain, Clear Creek and Gilpin counties.

Development: by 500' shaft and over 4,000' of underground workings. Reserves are estimated at 240,000 tons, valued at \$30 per ton net. One ore-body is 300' long, 12' wide, and over 50' high on the 540' level.

Equipment: steam hoist and 2½ mile tram, etc.

Production: to date, \$5,000,000. Shipments made during 1920 were from 10 to 25 tons daily.

Mine shut down November, 1921.

HINSDALE TUNNEL & REDUCTION CO. COLORADO

Dead; see Vol. XIV.

HIREEN MINING & LEASING CO. COLORADO

Address: 720 Majestic Bldg., Denver, Colo. **Mine address:** Lake mine, Idaho Springs, Colo.

Property: the Lake mine and No. 2 Tunnel gold-silver-lead-copper claims near Idaho Springs, Clear Creek county.

Operating and producing 1919, 1920, and 1921, ore going to Hudson mill.

HOCK HOCKING MINING CO. COLORADO

Office: 509 Exchange Bldg., Denver, Colo.

Property: the Hock Hocking mine at Alma, Park county. Ore carries gold, silver and lead.

Operated and shipped ore in 1919 and 1920.

HOCKMAROOKUS MINING CO. COLORADO

Address: Breckenridge, Summit Co., Colo., or Denver, Colo.

Took over the Bethune group, including the Blind Tom and Baltimore mines and the Mineral Point tunnel in 1921. The tunnel on the main Dillon-Montezuma highway, is to drain and undercut the rich silver-lead orebodies of the above named mines.

HOLLINGSWORTH MINING CO. COLORADO

Address: 1220 Hippee Bldg., Des Moines, Iowa.

Property: the Smuggler silver-lead-zinc mine at Silver Plume, Clear Creek county.

Operated and shipped ore, 1919.

HOME INVESTMENT CO. COLORADO

Address: care E. F. Mull, Lawrence, Kans. Operated the Cleveland mine at Lake City, Hinsdale county in 1920.

HONDO GOLD MINING & MILLING CO. COLORADO

Dead. Shares of Hondo Oil & Gas Co. offered stockholders October, 1917. Company dissolved Jan., 1918. Formerly operated under bond and lease mine of Keystone Gold Mng. Co.

HONEST DOLLAR MINING & MILLING CO. COLORADO

Mail returned 1921 from former mine office: Gibson Hill, Breckenridge, Colo. See Vol. XIV.

HOOSAC TUNNEL & MINING CO. COLORADO

Reorganized, 1916, as **New Life Tunnel & Mining Co.**, which see. Company was in hands of receivers for years.

HOPE MINING, MILLING & LEASING CO. COLORADO

Address: Aspen, Colo.

Officers: Chas. O'Kane, pres.; J. W. Hetherly, v. p.; H. W. Clark, sec.; J. B. Stitzer, treas.

Inc. 1910, in Colo. Capital increased from 100,000 to 150,000 shares in 1917.

Property: the Hope tunnel and 400 acres, including the Little Annie mine, in the Roaring Fork district, Pitkin county. Galena ore carries silver and zinc, with considerable barite.

Several of the company's claims have been leased to others on a royalty basis. Examined by Geo. W. Tower, Jr., and Fred W. Foote.

Development: by the 1½ mile Hope tunnel, driven through limestone and quartzite to reach the Little Annie porphyry-lime contact. Nine years have been devoted to the advancement of this adit. It is to connect with the Last Dollar incline.

In December, 1920, a narrow streak was cut that widened to several feet, assaying 71 oz. silver and 29% lead and early 1921, six inches of nearly pure native silver was cut in the tunnel at 2,500' below the surface. The vein is 12" to 24" wide and averages 174 oz. silver for 6" and 1,047 oz. for 12 inches across. A carload of ore shipped in August, netted \$1,288.

Equipment: includes electric power and complete mining plant for extensive operations.

HOPEWELL MINE

COLORADO

Address: McGruder and Hunter, Crested Butte, Colo., who continued development of this gold-silver mine near Crested Butte, Gunnison county, in 1920, but made no shipments.

HORSE MOUNTAIN MINING & MILLING CORP. COLORADO

Address: J. O. Kempf, pres., Eagle, Eagle county, Colo.

Inc. in May, 1919.

Property: the Lady Bell group of 22 claims in the Fulford district, 7 miles from Eagle, on which silver ore was discovered in 1913, and from which about 175 cars of ore were shipped up to 1916. A mill was to be erected.

Operated and shipments made in 1919 and 1920.

HORSFAL MINE

COLORADO

Address: Chas. Gustafson, Boulder, Colo. Walter McCaslin, Longmont, Colo., owner. Chas. P. Oliver, supt.

Mine was a big producer from 1859-87, and was reopened in 1917. Late in 1918 shaft was sunk from 300' to 550'. Ore reported to carry gold, with a little silver and some lead. 10 men employed at last report.

Equipment: includes electric hoist. A flotation mill is planned.

Operated in 1920.

H. S. M. I. MINING CO.

COLORADO

Address: Crested Butte, Colo.

Property: a gold-silver mine at Crested Butte, Gunnison county. Operated, but made no shipments during 1919.

HUBERT MINING & LEASING CO.

COLORADO

Address: Box 1799, Denver, Colo.

Property: the Hubert mine on Bald mountain, Gilpin county. Ore carries gold, silver, lead and zinc.

Operated and produced during 1919.

HUDSON MILLING CO.

COLORADO

Office: 204 Mack Bldg., Denver, Colo. Mill address: Jas. A. Townsend, mgr., Idaho Springs, Colo.

Officers: M. A. Rowen, pres., Longmont, Calif.; A. H. Roller, v. p., 438 Equitable Bldg., Denver, Colo.; F. M. McCartney, sec.-treas.

Inc. in Colo. Cap. \$75,000; par \$1; issued \$66,000.

Operates a 125-ton custom milling plant at Idaho Springs, Clear Creek county, including 3 unit Brown flotation mill.

HUGHES CONSOLIDATED MINING CO.

COLORADO

Address: Russell Gulch, Gilpin county. Owns the Lillian gold-silver-copper mine at Russell Gulch, under development, but not producing in 1920. See **Frontenac Leasing** and **Old Town** companies, operating in same district.

HUMBOLDT MINES CO.

COLORADO

Subsidiary of Metals Exploration Co., which see.

Address: Telluride, Colo.

Officers: Bulkeley Wells, pres.-gen. mgr.; Thos. J. Regan, sec.-treas., 120 Broadway, New York, H. G. Palsgrove, supt.

Inc. 1915, in Colorado. **Cap.** \$500,000; \$100 par; outstanding, \$382,000.

Property: 25 patented claims, 180 acres, in Mt. Sneffels mining district, Ouray county.

Ore: gold, silver, lead and iron, in a 2' quartz fissure vein in andesite with N. W.-S. E. strike and dip of 76°.

Development: by 680' vertical Humboldt shaft with 7 levels and the mile-long Sheridan tunnel connecting with lowest level of the Humboldt shaft. Greatest depth of workings, 840'.

Equipment: includes a 50-h. p. electric hoist, compressor and a tramway.

Production: started January 1, 1916. In 1916, 47,900 tons; 1917, 47,060 tons; 1918, 36,300 tons. Ore is milled by Smuggler Union Mining Co.

HUMBOLDT MINING & MILLING CO., THE COLORADO

Address: 324 S. Union Ave., Pueblo, Colo. **Mine address:** Ward, Colo.

Officers: C. J. Walter, pres.; Austin G. Marsh, v. p., Pueblo; E. R. Fisher, sec.-treas., Pueblo, with J. H. Harrison and Wheeler Dan, directors.

Inc. 1919, in Colo. **Cap.** \$250,000; \$1 par; 100,000 treasury shares.

Property: 6 patented claims in Ward district, Boulder county, includes the Texas claim owned outright, and 5 claims held under 8-year bond for \$25,000, expiring 1925. Main workings are E. of Grand View mine.

Development: by 350' inclined shaft on vein with 700' drift west on 100' level, and at 250' depth a west level 450' long north of vein. East of shaft the ore shoot has been mined out to surface.

A vein running N. 65° W. is traceable 6,000' through four claims. This vein, in granite, varies from a few inches to 3' thick, and carries gold-silver tellurides in a quartz, pyrite and chalcopyrite vein filling. Vein dips 70° N. and shows banded ore in shoots. On 100' level a shoot 43' long averaging 18" thick assayed \$4 gold, \$1 silver and a little copper. Four shoots, with a total length of 141' average 1.73' thick. East shoot 30' long and 18" thick averages \$20.25, balance \$6 to \$9 per ton. West shoot 118' long, not sampled, but first 15' said to average \$54.14. If ore extends 100' up and 50' down there is 3,375 tons in mine.

Operated 1919 by Humboldt Leasing Co., and during 1920 by the company itself.

HUNTER CREEK LEASING CO. COLORADO

Address: Aspen, Colo.

Operated the Hunter Creek mill at Aspen, Pitkin county, during 1920.

HURON GOLD ORES CO. COLORADO

Address: 404 Cooper Bldg., Denver, Colo. Operated the Huron gold mine at Eldora, Boulder county, during 1920.

HURRICANE LEASING CO. COLORADO

Address: R. O. Meyers, mgr., Aspen, Colo.

Officers: A. G. Prev, chrm.; J. L. Adams, sec.-treas., with R. O. Meyers, directors.

Inc. 1920, in Colorado as a partnership, monthly assessments covering current expenditures.

Gross earnings for 1920 were \$1,930, including \$1,665 from ore sales. Operations cost \$11,000.

Property: 20 claims, 18 patented, 200 acres, in the Highland district, Pitkin county, near Aspen. Ore occurs in a fault fissure in limestone and shale, dipping 65° N. W., and pitching N. 30° W. Ore found in kidneys consists of sulphides with silver, copper and lead.

Development: by 560' tunnel, reaching a depth of 280' and 2,000' of workings. A crosscut tunnel is to be driven 150' below the present workings.

Production: in 1920 was 14 tons of \$170 per ton ore, from a flat orebody in the Etcetera mine on Castle creek.

HURRICANE MINING & MILLING CO. COLORADO

Address: A. G. Prev, mgr., Denver, Colo.

Officers: above with J. L. Adams, sec.-treas. and R. O. Meyers, directors.

Inc. 1916, in Colo. Cap. \$1,000,000; par \$1; 600,000 issued; no bonds. Earnings for 1920 were \$2,750 from ores sold; expenses, \$1,000.

Property: under lease to, and operated by, Hurricane Leasing Co., which see, consists of 13 claims, 10 patented, 110 acres, 4 miles S. of Aspen. Operated continuously since 1916.

IBEX MINE LEASES

COLORADO

The following leasers and leasing companies were operating at the Ibex mine in 1920. Kyle Lease No. 1, C. & G. Lease, both at 329 W. 8th St., Leadville; Burton & Co., 509 E. 5th St., Leadville.

IBEX MINING CO.

COLORADO

Office: 929 Equitable Bldg., Denver. **Mine office:** Leadville, Colo.

Officers: A. V. Hunter, pres.-treas.; John A. Ewing, v. p.; Chas. Caven-der, sec.; J. F. Campion, mgr., with Gerald Huges, F. L. Smith, J. C. Mitchell and J. J. Brown, directors. Geo. Becker, supt.

Inc. March, 1891, in Colorado. Cap. \$100,000; \$1 par; all issued. Annual meeting, first Monday in June. Company is operated as a close corporation.

Property: the Ibex mine, 10 claims, patented, 52 acres, on Breece hill, Leadville, Lake county, includes the Little Johnny claim, which has produced about \$25,000,000 worth of ore. Ore occurs in blanket deposits carrying silver, lead, copper and zinc. Bodies of contact metamorphic ore encountered at depth were low-grade and not valuable. Vein structure is very complicated, owing to faulting.

Development: by 4 vertical shafts to depth of 1,250'. On the 900' level an ore-shoot, opened for 2,000', is reported to be 70' wide and 55' high and to run from 0.80 to 1.30 oz. gold per ton. Reported to have a zinc content of 23%. In 1918, a body of zinc carbonate ore was discovered on the fourth level. A 4" streak of extraordinarily rich gold ore was cut in the No. 7 Ibex shaft in 1920.

Equipment: includes 18 machine-drills, breaking about 350 tons of ore per dav. Mine is worked by lessees, employing 100 men jointly. Operations were normal in 1918, and presumably so throughout 1919. No production figures are available.

IDAHO BRIDE MINING & MILLING CO.

COLORADO

Inactive and probably dead. Fully described in Vol. XIV. of this book.

IDAHO MINING, REDUCTION & TRANS. CO.

COLORADO

Property acquired in November, 1920, by the **Gem Mining Co.**, which see.

IMOGENE MINE

COLORADO

Address: Lundberg & Wilflev Lease, Ouray, Colo. Mine operated 1920.

IMPERIAL CONSOLIDATED MINING CO.

COLORADO

Mail returned 1921 from former office: 725 Colorado Bldg., Denver, Colo.

Mine office: Georgetown, Clear Creek county, Colo. Edw. J. Wilcox, pres.-mgr.; Henry Butler, supt.

Inc. as a reconstruction of the Waldorf Cons. Mining Co. Is a Law-sonized corporation.

Property: 600 acres, patented, including the Waldorf and Tobin mines, in the East Argentine district, shows the Commonwealth fissure vein with 3' paystreak of goldbearing copper ore.

Development: includes the Tobin and Wilcox tunnels, with 7 miles of workings. A 3' vein of high-grade copper was intersected, April, 1915, at depth of 500'.

Equipment: includes a 125-ton mill at the portal of the Wilcox tunnel. After an idleness of several years, operations were resumed in 1915. Reported in 1918, that the mill capacity was to be doubled.

A 42-ton trial shipment said to have averaged 10% copper, 8% lead, 1.53 oz. gold and 66 oz. silver per ton. No reports obtainable direct from company.

In Sept., 1919, Thomas W. Lawson, of Boston, Mass., was boosting this property, which is reputed to have yielded millions of dollars when silver was 50 cents an ounce. A one-mile drainage tunnel was driven, opening some of the deposits at a depth of 1,000'. The main deposits are said to

have been hardly scratched, which seems strange, if true, because mine is said to have had an output of several millions before it shut down. In the profuse literature put out, about this company, capitalization, officers, detail of mine development and sampling, are omitted—preventing an estimate of the "Moral risk" in buying shares.

INDEX MINE

Address: Lamphere & Schneider, lessees, Cripple Creek, Teller Co., Colo., who mined ore in 1920.

INDIANA-COLORADO MINING & MILLING CO.**COLORADO**

Address: Lake City, Colo.

Property: Golconda mine, in Henson Creek district, Hinsdale county, 3 miles from Lake City. Ore contains gold and silver, and a new orebody carrying \$200 to \$600 ore was cut 1920.

A 200-ton mill was in process of erection, 1921.

INGALLS LEASING CO.**COLORADO**

Defunct. See Vol. XIV.

INTERSTATE METALS CO.**COLORADO**

Address: 514 Denham Bldg., Denver, Colo.

Property: the Richmond gold-silver mine at Salina, Boulder county. Operated during 1919, but made no shipments.

IOWA TIGER MINING CO.**COLORADO**

Name changed in Nov., 1919, to **Southwestern Mining Co.**, which see.

IRON KING MINE**COLORADO**

Address: Carlson Bros., Empire, Clear Creek Co., Colo., who operated this mine in 1920.

IRON MASK MINE**COLORADO**

Address: Ostrum & Tillet, lessees, Breckenridge, Colo.

Property: on Shock hill, near Breckenridge, Summit county, developed by tunnel opening lead-carbonate ore.

IRON SILVER MINING CO.**COLORADO**

Offices: 11 Waverly Place, New York City; 615 Stevens Bldg., Detroit, Mich. **Mine address:** Leadville, Lake Co., Colo.

Officers: W. R. Cobb, pres.; Henry G. Stevens, v. p.; Homer A. Hoit, sec.; Fremont Woodruff, treas.; with Bruce G. Broad, R. H. Webber, Isaac J. Meyer, Eber W. Cottrell, H. C. DuVal, and Chas. E. Hilton, trustees. Geo. O. Argall, gen. mgr.; Philip Argall & Sons, cons. engrs.

Inc. March, 1880, in New York. **Cap.** \$2,500,000; \$5 par; reduced from \$10,000,000 at \$20 par in March, 1919. Stock listed on N. Y. Stock Exchange and the Detroit Exchange. Farmers Loan & Trust Co., New York, registrar. Company transfers its own shares. Annual meeting 3rd Tuesday in March.

Net earnings were \$267,034 in 1904; \$515,127 in 1906; \$65,366 in 1907; \$6,960 in 1908; \$183,121 in 1909; \$138,308 in 1910; \$187,639 in 1911; \$274,322 in 1912; \$123,927 in 1913; \$174,629 in 1914; \$184,199 in 1915; \$210,595 in 1916; \$41,574 in 1917, and \$186,143 in 1918.

In 1919 there was a loss of \$8,933, after allowing for depreciation, and in 1920, a deficit of \$7,243. Current assets (cash) at end of 1919 were \$303,364; and liabilities, \$100; in 1920, cash amounted to \$293,013.

Dividends: \$400,000 in 1906; \$300,000 in 1907; none in 1908; \$50,000 in 1909; \$200,000 in 1910; \$100,000 in 1911; \$200,000 in 1912; \$200,000 in 1913; \$100,000 in 1914, 1915, 1916 and 1917; \$50,000 in 1918; \$50,000 in 1919, on account of reduction in capital. The grand total is \$5,500,000.

Property: about 650 acres, including the Moyer and Tucson (worked out) and Blind Tom mines, on Iron hill, about 2 miles E. of Leadville. Also controls through stock ownership the **Nisi Prius Cons. Mining Co.** (q. v.); also a 5/8 interest in the **Proserpine** and **Cumberland Lode** mining claims, which secured for the Iron Silver 9.9 acres, adjoining the company's property on the N. W. During 1917, company took a 5-year lease on the Alleghany group, consisting of about 19 acres, adjoining property on N. and located on trend of Mikado fault.

To drain and develop an old area in the Graham Park basin of Leadville

the company erected in 1916 a plant costing \$500,000 at the Mikado shaft. This shaft was widened and sunk to 1,135' in 1917. Two 1,000-gal. per minute pumps were installed.

Development: in all mines, 6,380' in 1915; 6,830' in 1916; 7,626' in 1917; 6,381' in 1918; 2,660' in 1919; 1,056' in 1920. No discoveries of ore were made in 1920.

In 1918, company reopened the old Pyrenees shaft on the Pyrenees claim, southwest of the Mikado, in which it owns an interest, besides having a long-term lease on the property. The Pyrenees shaft has been enlarged to 3 compartments, and re-timbered to 1,200' and will hereafter be the main shaft. When finished, the levels will connect with the Marian workings. This project was taken up owing to difficulty and expense of keeping the Mikado, and also to develop the southern end of property.

In 1920 lessees mined 20,067 tons of ore netting \$117,953 from which company received \$16,249, compared with 26,567 tons of ore in 1919.

The varied character of the ores of this property is shown by the 1920 production (by lessees), amounting to 11,985 tons of iron pyrite, 2,073 tons of iron oxide, 755 tons of zinc carbonate, 60 tons of lead carbonate, 2,844 tons of zinc sulphide, and 2,320 tons of zinc-lead sulphide ore. In former years, the mines yielded these same ores together with manganese ore, a varied product whose total metal content is shown below:—

Recent production: of the mines as a whole:

	Copper lb	Gold oz.	Silver oz.	Lead lb	Zinc lb	Iron lb
1918.....	902	402.04	163,809	2,661,131	21,847,947	6,446,825
1917.....	26,914	689.25	163,493	1,893,020	13,342,256	5,956,671
1916.....	1,420,713	134.5	336,277	2,401,089	12,994,318	5,597,605
1915.....	33,694	575.	136,674	4,205,616	16,674,848	2,957,235
1914.....	12,751	923.1	327,976	10,608,734	17,396,362	5,247,433
1913.....	7,230	509.	391,603	12,105,921	25,658,913	2,745,511
1912.....	58,543	323.92	470,403	12,874,099	21,601,428	2,816,079

Property is well equipped and well managed.

Owing to the low price of zinc coupled with a flooding of the mines, the company closed down its mines in April, 1919, and the only recent work has been done by lessees.

ISABELLA LEASING CO.

COLORADO

Address: R. M. Carson, pres.; Henry Christensen, supt., Independence, Teller Co., Colo.

Inc. in Oct. 1919. **Cap.** \$25,000; \$1 par; to be subscribed for by shareholders of the Isabella Mines Co. The money will be used to develop the Isabella Mines Co.'s Bull hill estate under a 5-year lease, with a 3-year extension privilege. Royalties will be on a sliding-scale from 8 to 30%.

Property: a lease on the Isabella mine below the 1,100' level. Company sank Empire shaft 230' (to 1,335') and opened level and crosscuts to tap downward extension of the Fackereel-Canon and Maloney ore shoots. Sub-lessees mined shipping ore throughout 1920. Work was to be started on the 15th level to cut several producing veins at depth. In December, 1919, this level had been unwatered and crosscutting started.

By May, 1920, the Larson vein had been cut midway between the Lee and Empire shafts. Work is now through the latter opening. Extensive work under way in 1921.

ISABELLA MINES CO.

COLORADO

Office: Box 1404, Cripple Creek, Colo. R. J. Huff, sec.-treas. **Mine office:** Independence, Colo.

Officers: E. E. Quentin, pres.; R. M. Carson, v. p.; C. G. Mitchell, mgr., with H. S. Lunt and J. H. Nicholls, directors. Frank K. Gunn, supt.

Inc. 1903, in Wyoming. **Cap.** \$3,000,000; \$1 par; 2,528,331 outstanding.

Stock listed on Colorado Springs Exchange. Colorado Title & Trust Co., registrar. Annual meeting 1st Monday in February, at Cheyenne, Wyo. In Oct., 1919, a controlling interest was taken in the **Isabella Leasing Co.**, which see.

An initial dividend, 1%, or \$25,283, was paid in 1916. Deficit in 1917 amounted to \$20,303.

Property: 116 claims, patented, about 118 acres, in N. E. ¼ of Sec. 20 and N. W. ¼ of Sec. 21 on Bull hill, Cripple Creek district Teller county. Lands show typical Cripple Creek veins in breccia, carrying ore with gold and some silver.

Development: by 2 vertical shafts, the Lee, 1,274' destroyed by fire in 1920, and the Empire, 1,500'. During 1917, 10,169' of development work was done, compared with 18,587' in 1916. The Buena Vista vein was cut in December, 1917, on No. 16 level. The winze sunk below the 1,250' level of the Lee shaft is 250' deep, and drifts have been run on the East Victor vein.

Equipment: Includes a 100-ton concentrating mill, entirely remodeled in 1915, to use the cyanide process with sand leaching pump, furnace, boiler, etc. This plant recovers 76% from \$3 ore.

Recent production has been as follows:

	Tons Mine ore	Tons Dump ore	Total tonnage	Gross Value
1917.....	9,151	658	9,809	\$192,924
1916.....	18,752	625	19,377	412,962
1915.....	23,861	837	24,698	507,791
1914.....	15,706	2,040	17,746	345,819
1913.....	11,385	6,903	18,288	243,251

Of the 1917 cutput, 15 sets of lessees mined 8,334 tons, worth \$144,129. Late in 1918, lessees Beebe & Nelson reported opening a rich vein of rusty gold and sylvanite near the surface. In 1919, lessees were mining upwards of 400 tons monthly. There were 10 lots of lessees in 1920.

Total production to date estimated at \$8,812,000. Company is one of the oldest in the Cripple Creek district, and is operated successfully along conservative lines.

JAPAN-FLORA MINES & TUNNEL CO. COLORADO

Property bought in by bondholders at sheriff's sale on Nov. 22, 1919, for \$251,200, the amount of the outstanding bonds. See Vol. XIV for further details of previous operations. Stock worthless.

JASON MINE COLORADO

Address: W. J. Davis, Leadville, Colo.

Property: 4 claims, 40 acres, on Poverty Flats in N. E. part of Leadville, Lake county. Is a manganese mine, reopened 1920.

In 1918, lessees shipped \$10,000 worth of ore from a 14' vein on 180' level to the Colorado Fuel & Iron Co., Pueblo, Colo., to be used as flux. Ore is reported to have assayed 3 oz. silver, 26% iron, 30% manganese. There are two deposits of manganese ore under development on the 250' level; one 22 by 17', and the other 16' by 11', said to carry 34% manganese and 5% silica.

JEAN MINE COLORADO

Address: G. H. Hagar & Co., 1224 Hancock St., Denver, Colo. This mine, at Empire, Clear Creek county, was operated in 1920, but none of its gold-silver-lead ore was shipped.

JENNIE SAMPLE CONSOLIDATED MINING CO. COLORADO

Idle. **Office:** 800 Exchange Natl. Bank Bldg., Colorado Springs, Colo. **Officers:** Daniel Thatcher, pres.; J. F. Underwood, sec.-treas.; L. G. Carlton, gen. mgr.

Inc. in Wyoming. Cap. \$25,000: 1c par; 1,668,885 shares issued. Stock listed on the Colorado Springs Stock Exchange. Company has no debts, all

taxes have been paid, and a small reserve was reported in treasury, May, 1919.

Property: 5 patented claims, 31 acres, on S. slope of Raven hill, in Cripple Creek district, shows fissure veins with streaks of gold. Developed by shafts and drifts to depth of 1,100'. Equipped with hoist, drills and steam power. Mine worked by lessees.

JERRY JOHNSON GOLD MINING CO. COLORADO

Addresses: 822 E. & C. Bldg., Denver, Colo.; and F. H. Denman, mgr., Cripple Creek, Colo.

Inc. 1902, in Wyoming. **Cap.** \$250,000; 10c par; all issued; has paid \$187,500 in dividends to date. Last payment of \$5 per 1,000 shares in Nov., 1914. Stock listed on the Colorado Springs Exchange. Company derives income from royalties on leasing operations.

Property: 35 claims patented, in Cripple Creek district, Teller county, shows gold-silver ore in contact veins. Developed by 975' vertical shaft to depth of 850'. The mine is being worked from surface to the 650' level by Frank Caley, and below the 650' level by F. H. Denman, former superintendent of Cripple Creek Deep Leasing Co., which had operated under this lease 1915 to 1918. In 1920, F. G. Horn, lessee, opened 8 oz. ore on No. 6 level and in 1921 shipments continued to Golden Cycle mill.

Equipment: includes steam power, 8 drills, concentrator and 75-ton cyanide mill, erected in 1915 by Frank Caley. Total output to 1917, \$1,-783.126. During 1918, lessees found ore averaging \$30 per ton.

JESSIE MINE COLORADO

Address: G. F. Roth, mgr., Gold Run, Breckenridge, Summit county, Colo. J. C. Warnecke, supt.

Property: mine was said to be a big producer of gold in former years. Is operated under bond and lease. Equipment includes a 40-stamp amalgamation mill.

Operated during 1920, shipping zinc and lead concentrate from the mill connected with the mine.

JEWELL MINES & RED. CO. COLORADO

Dead. Described in Vol. XIV. Succeeded by Pandora M. & M. Co., which see.

JOE DANDY LEASING CO. COLORADO

Dead. See Vol. XIV. Property operated by Eclipse Leasing Co., which see.

JOHN DOYLE MINING & MILLING CO. COLORADO

Address: Rico, Dolores county, Colo.

Inc. 1919, in Colorado.

Property: the Iron copper-silver mine near Rico. Development is by tunnels, and in 1920, some rich ore was being mined. Operated in 1921 also

JOHNSTON MINE COLORADO

Address: O'Neill, Bull & Martin, Redvale, Montrose Co., Colo., who operated this carnotite (uranium, vanadium) deposit in 1920.

JONATHAN MINE COLORADO

Address: John Donald, Ouray, Colo., who operated this gold-silver mine, but shipped no ore during 1920.

JO REYNOLDS MNG., MLG., DEV., TUN. & TRANS. CO. COLO.

Address: Idaho Springs, Colo.

Property: the Jo Reynolds gold-silver-lead-zinc mine at Lawson, Clear Creek county.

Operated 1919 and shipped some ore. Idle 1921.

JOSEPHINE MINE COLORADO

Address: Stella M. Stephens, Georgetown, Colo. Link Stephens, supt.

Property: the Josephine mine, in Grizzly gulch, near Silver Plume, Clear Creek county. Ore is said to carry gold, silver, lead, copper and zinc.

Development: by shaft and tunnel. Work was under way in Dec., 1920.

JULIA MINING CO.**COLORADO**

Probably dead. Last address: Clarence Jarbeau, mgr., Leadville, Colo.

Property: the Home Extension and Cloud City mines in the Down Town area of Leadville. Daily shipments in 1917 averaged 75 tons of manganese-iron-silver ore. No recent report received.**JULY BIRD MINE****COLORADO****Address:** L. H. Dodson, Boulder, Colo. Mine is a gold-silver property near Salina, Boulder county; was operated in 1919, but shut down in 1920.**JUMBO MINING CO.****COLORADO****Address:** Mayday, via Durango, Colo.**Property:** several claims, including the Jumbo silver mine in the California district of La Plata county, near Mayday.**Development:** by tunnel being extended 500' in 1920. A 12 to 24" vein has been opened, and a raise shows 800 oz. ore. Seventy oz. silver ore was shipped, 1919-20, and shipments began again in March, 1921.**JUNE BUG MINE****COLORADO****Address:** Boyce Bros., Breckenridge, Summit Co., Colo. Operated under lease and option since 1918. Mine produced several small shipments of rich silver-lead ore, during 1919, 1920 and 1921, returns varying between 100 and 300 oz. silver and 15 to 30% lead.**KANAWHA GOLD MINING CO.****COLORADO****Address:** Leadville, Colo.**Property:** the Kanawha mine in Leadville district, Lake county. Ore carries gold, silver and copper.

Operated part of 1919 and shipped ore.

K AND K METAL MINING CO.**COLORADO****Address:** 136 E. 7th St., Leadville, Lake Co., Colo. Operated the K and K tunnel at Leadville in 1920-21.**KAPEGI LEASING CO.****COLORADO**

Probably dead. See Vol. XIV.

KAPI MINING & MILLING CO.**COLORADO**

Probably dead. Mail returned 1921 from former office: Bonanza, Saguache county, Colo. See Vol. XIV.

KATINKA GOLD MINING CO.**COLORADO**

Out of business. See Vol. XIV.

KATINKA MINING CO.**COLORADO****Address:** Georgetown, Clear Creek Co., Colo.**Property:** the Katinka gold-silver mine at Georgetown. Operated part of 1919, but shipped no ore. Idle 1920.**KAVERGNE MINING & MILLING CO.****COLORADO****Address:** Idaho Springs, Colo.**Property:** the Kavergne gold mine on Albro mountain, near Idaho Springs, Clear Creek county.**Development:** by 2 tunnels, the upper being over 800' long, cutting the Golden Cycle vein at a depth of 600'. Connection was made with a 325' shaft for better ventilation. The lower tunnel was to be extended 235' in 1920. Milling ore assays \$15 per ton.**Equipment:** includes water power and a flotation mill.**KENNEBEC MINE****COLORADO****Address:** Kennebec Lease, Leadville, Colo., which was operative in 1920.**KENNEDY GOLD MINING & MILLING CO.****COLORADO****Address:** Georgetown, Clear Creek county, Colo. David Kennedy, mgr., at last accounts.**Property:** the Centennial mine, 640 acres, shows cupriferous gold and silver ores in 30" paystreak, assaying up to 24% copper, 5 to 50 oz. silver and 3 to 5 oz. gold per ton. Probably idle.**KEYSTONE CONS. MINES CO.****COLORADO****Address:** 1444 Goodfellow Ave., St. Louis, Mo.**Officers:** J. F. Doepke, pres.-treas.; A. T. Latta, sec.

Inc. October, 1919, in Wyoming. Succeeds Backoff Leasing Co.

Property: lease and bond on the Bonanza King mine of the Midget Cons. Gold Mining Co. at Cripple Creek. Operated 1920 and 1921.

KEYSTONE CONSOLIDATED M. & M. CO. COLORADO
 Company dead; but Keystone mine and mill, using flotation, operated 1920. See Vol. XIV for former operations.

KEYSTONE METALS CO. COLORADO
Address: H. M. Armstrong, mgr., Polar Mesa, via Grand Junction, Colo.

Property: a carnotite, uranium mine.

KING SOLOMON MINING CO. COLORADO
Address: 256 Mining Exch. Bldg., Denver, Colo. Mine office: Frisco, Summit, Co., Colo.

Officers: F. C. Dinsmore, pres.-gen. mgr.; S. H. Alexander, v. p.; C. W. Rowe, sec.-treas., with Q. A. Kelley, H. J. Theobald, J. R. Anders, and C. J. O'Connor, directors.

Inc. September, 1920, in South Dakota. **Cap.** \$500,000; \$1 par.

Property: 64 quartz claims about 250 acres of placer claims, in the Ten-Mile district, Frisco, Summit county, shows fissure veins in granite, carrying auriferous and argentiferous copper and lead ores.

Development: by a 5,200' tunnel with 5,000' of drifts. Company is working the Eleven vein, 3,700' from portal of the tunnel, said to carry gold, silver, and lead. Steady shipments were made from this vein. Company suspended operations in Fall of 1918 owing to labor conditions, but planned extending tunnel to No. 12 vein in 1919. In 1920, a lessee opened rich ore on No. 11 vein and, in extending a tunnel, cut 18 to 30" of rich silver-copper ore. Mine reopened by company May, 1921, and 4' of silver-lead ore was uncovered on the Wheel of Fortune, besides an 18' body of manganese ore on another claim.

Equipment: includes a 160-h. p. steam and 115-h. p. electric plant, with an 8-drill compressor. Management plans to erect a mill when development warrants. Colorado & Southern R. R. runs by the property.

KISHMAN LEASING CO. COLORADO
 Out of business in May, 1916. Fully described, Vol. XII.

KITTIE LANE GOLD MINING CO., THE COLORADO
Address: Transfer office, 507 Exchange Bank Bldg., Colorado Springs, Colo.

Officers: Marx Lorig, pres.; B. F. Webster, v. p.; Arthur Cornforth, sec.-treas.

Inc. in 1912. **Cap.** 2,000,000 shares; par 1c; 265,000 shares in treasury. On Jan. 1, 1919, company had \$240 in cash, a certificate of deposit for \$1,000, and bills receivable, \$516. Stock listed on Colorado Springs Exchange.

Property: about 30 acres on Raven hill, adjoining the Elkton, at Cripple Creek, includes the Nil Desperandum, Rhinoceros, Kittie Lane, and Sitting Bull No. 1 and 2 claims. The Kittie Lane has been leased. Company inactive.

KITTIMAC MINES CO. COLORADO
Address: Herbert E. Curran, receiver of company, Room 44, Capital Bldg., Denver, Colo. Company went bankrupt 1917. See Vol. XIV.

Mine in Minnie Gulch, San Juan county, reopened 1921, under H. G. Brient, superintendent, financed by Pittsburg capital.

KOKOMO MINING CO. COLORADO
Address: Stilwell Connor, lessee, Kokomo, Colo.

Property: the Pearl group on Chalk mountain, near Buffers, Summit county, owned by the Pearl Cons. M. Co. Ore carries silver, gold, and lead. **Development:** by tunnel. Nine feet of ore had been opened late in 1920, some of it rich in silver. A mill is contemplated.

KOKOMO-RECEN MINING & DREDGING CORPN. COLORADO
Address: 5205 West Lake St., Chicago, Ill.

Mine address: Paul Mauver, Kokomo, Colo.

Officers: Harold Pillinger, pres., Herman Frank, v. p.; Louis G. Kohler, sec.; J. C. Hollister, treas., all of Chicago; with Henry A. Recen of Kokomo, directors.

Inc. 1920, in Delaware. **Cap.** \$2,500,000; par \$1. Kohler & Co., 5205 West Lake St., Chicago, fiscal agents, offered stock at 50c. in March, 1921.

Company is a consolidation of the National Molybdenum Co. and National Mining & Development Co., and is to pay off \$40,000 bond issue of the National Molybdenum Co.

Property: 42 lode and 5 placer claims, 5 groups: (1) Molybdenum claims, 206 acres, near Winfield, Chaffee county; (2) Big Chicago group, Iowa gulch, near Leadville, Lake county, (3) McNulty gulch placer, Ten mile, Summit county; (4) a 5-year lease on the Silver Queen group of the Mutual Co-operative M. Co., near Kokomo, Summit county; (5) Herculean Bar placer at Kokomo.

The Molybdenite mine has an 186' tunnel and ore is said to be "fully one-half mile wide and a mile long." which is interesting if true. The Big Chicago tunnel, 1,175' long, must go 275' more to cut vein 625' below surface.

The Silver Queen and Hyman mines were producing in 1921.

KOMAT MINING CO.

COLORADO

Dead or dormant. **Address:** Cripple Creek, Colo. Math Korf, gen. mgr.

Was reported to be operating the Victor mine under lease from the Smith and Moffat Mines Co., owners. Property developed by shaft, 1,000' deep. Shipped \$14 ore in 1918. and produced 400 tons averaging \$12 in January, 1919.

LACKAWANNA MINING & REDUCTION CO.

COLORADO

Dead. Succeeded by D. L. & W. Mng. & Red. Co., also dead. See Vol. XIV.

LAKE GEORGE DEVELOPMENT CO.

COLORADO

Dead. Former office: 22 E. Columbia St., Colorado Springs, Colo. A. J. Kiser, sec.-treas. Property sold in 1917 and company in receiver's hands. Fully described, Vol. XII.

LAKE SUPERIOR OPHIR MINING CO.

COLORADO

Dead. See Vol. XIV.

LAMAR MINE

COLORADO

Address: W. J. Sullivan, Eldora, Boulder county, Colo., who operated this gold-silver-tungsten property in 1920.

LA PLAISANCE MINING & MILLING CO.

COLORADO

Dead. See Vol. XIV for description.

LA PLATA MINE

COLORADO

Address: Nord Lease, 192 S. Toledo Ave., Leadville, Colo. This silver-lead property at Leadville was operated, and ore shipped in 1920.

LARIMORE MINING & MILLING CO.

COLORADO

Address: 1547 Clarkson St., Denver, Colo. Operated the Bonanza mine at Eldora, Boulder county, Colo., throughout 1920, but made no shipments.

LA SAL COPPER-SILVER MINING CO.

COLORADO

Succeeded by Michigan-Colorado Mining Co.; bankrupt, but described herein.

LAST DOLLAR GOLD MINING CO.

COLORADO

Dead. Described in Volume XIV. Mine operated by the Modoc Cons. M. Co., which see.

LAST QUARTER MINING CO.

COLORADO

Address: Silver Cliff, Colo.

Property: the Last Quarter silver mine at Silver Cliff, Coster county. Operated part of 1919 and shipped ore.

LAURA DUNMORE MINING & MILLING CO.

COLORADO

Address: Ourav, or Red Mountain, Colo.

Property: the Laura Dunmore mine, adjoining the Yankee Girl, in Red

Mountain district, near Ouray. Is an old mine reopened in 1920, and equipped with machinery. 1921. Early in 1921 a new chimney, 30' across, containing very high grade tetrahedrite ore was opened.

LAURA LEE MINING & MILLING CO. COLORADO

Out of business in 1918. See Volume XIII for a sample of advertising literature.

LEADVILLE & MOSQUITO RANGE MNG. & MLG. CO. COLO.

Office: Geo. J. Ermlich, pres., 1727 Champa St., Denver, Colo.

Inc. in Arizona. Cap. \$5,000,000; \$1 par. Owns all stock of Colorado company of same name capitalized at \$50,000.

Property: the Walter Scott property, located 1½ miles from Wortmans, and 11 miles N. E. of Leadville, on west side of Mosquito range, Lake county.

Development: by long crosscut tunnel, on which work has been prosecuted for several years. Some work was done in 1920.

LEADVILLE BASIN MINES CO. COLORADO

Dead. See Vol. XIV.

LEADVILLE LEASING CORPORATION COLORADO

Address: Albert R. Bailey, Leadville, Colo.

Inc. February, 1920, in Colorado.

Property: 4 claims on Breece, Carbonate, and Idaho Park hills, Leadville district, Lake county, includes the O'Donovan-Rossa, once a silver-lead producer, but closed since 1907. Some of the claims can be worked through the Yak tunnel.

LEADVILLE MINE DEVELOPMENT CO. COLORADO

Address: John Cortellini, mgr., Leadville, Colo.

Directors: Jesse F. McDonald, John Cortellini, E. D. Dickerman, W. M. Harvey and J. W. Clark.

Inc. 1920, in Colo. Cap. \$150,000; par \$10.

Company is a reorganization of the Prospect Mountain M. & E. Co. and is backed by influential Leadville residents and the Chamber of Commerce. It was organized to drive a 7,000' tunnel through Canterbury hill, towards Big Evans gulch, to crosscut veins and dikes believed to extend from Fryer hill.

Property: consists of 465 acres on the west and south slopes of Prospect mountain (which will eventually be served) and of Canterbury hill. The first objective of the tunnel is the Roseville shaft, reached at depth of 225'; followed by the Minneapolis shaft, 508'; Canterbury hill, 1,100'; Canterbury shaft, 700' and Big Evans gulch, 600'. The "basins" beyond are drained by the Yak tunnel, but could also be reached by the new tunnel. 200' deeper. Although organized in 1919, the previous company in addition to financial difficulties, had trouble in getting a dumping site, but has secured one from the Leadville Land & Water Co. This also includes a tunnel right-of-way.

This is another project, the fourth in the past 6 years, to revive Leadville by draining a large area of old workings, and to prospect virgin ground. Work was started early in 1921.

LEADVILLE ZINC CO. COLORADO

Consolidated with Western Zinc Conc. Co. to form **Western Zinc Oxide Co.**, which see.

LE BRUN LEASING SYNDICATE COLORADO

Address: L. F. Le Brun, Cripple Creek, Colo.

Property: a lease till November, 1924, on the South Burns mine of the **Acacia Gold M. Co.** and a lease till October, 1924, on the adjoining **Pharmacist mine**, on Bull Hill, Cripple Creek district, Teller county, owned by the **Pharmacist Gold Mng. Co.** The properties are described under those titles. Operations 1920 and 1921 successful, good ore being mined and shipped.

LEGAL TENDER EXPLORATION MINES CO. COLORADO

Address: Ouray, Colo.

Property: the Legal Tender gold-silver mine at Ouray, Ouray county. Operated in 1920, but shipped no ore.

LELAND MINING & DEVELOPING CO. COLORADO

Dead. See Vol. XIV.

LEWIS MINE CO. COLORADO

Property at Telluride, San Miguel county. Under lease to Lewis Mng. & Leasing Co., which see.

LEWIS MINING & LEASING CO. COLORADO

Address: Telluride, San Miguel county, Colo. H. G. McClain, gen. supt.

Property: a long-term lease on the Lewis mine, Bridal Veil basin, Telluride, idle since 1912. Mine has fissure veins with shoots of complex lead-zinc-copper ores.

Development: by 500' shaft, and equipped with flotation mill. Pumps installed and mine unwatered in 1918. Idle 1919-21.

LEWIS MOUNTAIN MINING & MILLING CO. COLORADO

Office: 223 Symes Bldg., Denver Colo.

Officers: H. Perini, pres.; J. Orocchi, v. p.; T. R. Lilyard, sec.; C. M. Berkey, treas.; R. McCausland, mgr.

Inc. 1916, in Colo. Cap. \$1,000,000; \$1 par; 600,000 shares outstanding.

Property: 18 claims, 7 patented, in Lewis mountain, 3 miles north of La Plata, La Plata county, includes the Parole, Ten Broeck, Highland and Sylvan mines, showing gold and silver telluride in quartz vein in diorite and limestone, averaging \$27 per ton.

Development: by 400' and new 4,000' tunnel. Has over 5,000' of workings, greatest depth being 1,700'. Company has driven its crosscut tunnel 4,000'.

Equipment: includes compressor and drills. An aerial tram and 50-ton mill are planned for 1922.

Production: to early 1919, 800 tons averaging about \$60 per ton, and operations continued since. By November, 1920 5' of \$12 to \$25 gold-silver ore had been opened on the same orebody shown in upper tunnel 800' above.

LEXINGTON GOLD MINING CORPORATION COLORADO

Dead, and property sold August, 1919, to El Paso Extension Corporation, which see.

LIBERTY BELL GOLD MINING CO. COLORADO

In liquidation.

Office: 131 State St., Boston, Mass. Mine office: A. J. Weinig, supt., Telluride, San Miguel Co., Colo.

Officers: Arthur Winslow, pres.; J. J. Cairnes, v. p.; Henry L. Rand, sec.-treas., with Herbert Kean, and Geo. R. Fearing, Jr., directors. Charles A. Chase, mgr.; H. G. McClain, supt.

Inc. in Missouri. Cap. \$700,000; \$5 par; \$667,800 outstanding.

Dividends: in 1915 amounted to 16%; in 1916, 28%; 1917, 34%; 1918, 58%; 1919, 18%; 1920, 8%; totaling \$2,767,803

Property: the Liberty Bell mine at Telluride, shows gold and silver-bearing quartz in a fissure vein averaging 3' to 4' in width. The main orebody runs N. W.-S. E. and dips 57° W. For geology of the district, see U. S. G. S. Geologic Folio No. 57.

Development: by 2,600' tunnel and 1,000' raise from tunnel level to abandoned upper workings. Ore is mined by open stopes on stulls or by shrinkage stoping. All openings amount to about 16 miles.

Equipment: includes hoist of 50 tons hourly capacity, electric power, duplex compressor, Imperial compressor, 1.5 miles tram, a 500-ton concentrator and cyanide mill with flotation units.

Extraction averaged 96%, and total cost per ton amounted to \$8.97 in 1918.

Production:

	Tons Ore Treated	Oz. Silver Produced	Oz. Gold Produced
1920.....	56,100	140,375	18,303
1919.....	110,700	131,067	39,298
1918.....	90,700	198,591	46,861
1917.....	143,100	261,294	31,170
1916.....	165,300	256,711	30,580
1915.....	173,700	314,432	24,054
1914.....	173,840	315,919	33,150
1913.....	179,216	288,602	36,693
1912.....	175,340	313,845	48,993

Ore extracted from mine amounts to about 2,311,412 tons. Reserves are estimated at 100,000 tons. Total production since 1899 said to be \$15,585,109.

Company closed down for good in August, 1921 and mine equipment offered for sale.

LIBERTY GOLD MINING & MILLING CO. COLORADO

Mail returned from former address: 508 Mining Exchange Bldg., Denver, Colo.

Property: the Brittle Silver gold-silver mine at Sherrrod, Gunnison county. Operated part of 1919, but made no shipments.

LIBERTY LEASING & MILLING CO. COLORADO

Absorbed by **Monte Cristo Mines Co.**, which see.

Address: Frank Peabody, gen. supt., Breckenridge, Colo.

LIBERTY MINE COLORADO

Address: J. M. Dismant, Redcliff, Colo. This gold-silver mine near Red cliff, Eagle county, was under development, but no ore shipped in 1920.

LIBERTY MINE (BONANZA) COLORADO

Address: Bulkeley Wells, agent, 201-14th St., Denver, Colo. **Mine:** at Bonanza. Saguache county, a silver-lead-zinc property that was producing ore in 1920.

LIBERTY MINING CO. COLORADO

Address: 418 Barclay Block, 18th and Larimore Sts., Denver, Colo.

Operated the Monarch silver-lead mine near Empire, Clear Creek county, but made no shipments in 1920.

LIBERTY MINING & REDUCTON CO. COLORADO

Address: 202 Masonic Bldg., Denver, Colo. **Mine address:** Montezuma, Colo. Controlled by The Dorr Co., of Denver. Owen Johnson, mgr.

Property: the Pennsylvania and Liberty mines, at Montezuma, Summit county. Output is a silver-lead ore which yields 20 tons concentrate daily. Operated and produced steadily in 1921.

Company has a concentrator with flotation equipment, operating 3 shifts daily, the concentrate being hauled to Keystone for shipment to the A. V. smelter at Leadville.

LIDA MINE COLORADO

Address: Henry Schuch & Co., 700 Harrison Ave., Leadville, Colo.

Property: the Lida silver-lead mine near Leadville, Lake county. Operated 1919 and 1920, but shipped no ore.

LILLIAN MINING CO. COLORADO

Address: Timothy Riley, or Riley & Murcay, lessors, Leadville, Colo.

Officers: J. Clarence Hersey, mgr.

Property: on Printer Boy Hill, between Iowa Gulch and head of Cali-

fornia Gulch, Lake county, developed by a tunnel, ½ mile long and much drifting. Ore carries gold, silver, lead and zinc.

At the end of 1920, a raise from the 500' point of the Nellie S tunnel revealed a large body of carbonate ore, averaging 35% zinc. At 700' in, another raise opened ore.

LINCOLN GROUP MINES CO.

COLORADO

Offices: 505-509 Denham Bldg., Denver, Colo.; and Idaho Springs, Colo.

Officers: H. A. Wimbush, pres.; Peyton Hugh, v. p.; H. G. Wimbush, treas.; R. R. Moodie sec., with Harry J. Newton, directors.

Inc. 1914, in Arizona.

Property: the Lincoln mine, 10 claims, at Idaho Springs, Clear Creek county, said to carry streaks of ore assaying 7.8 oz. gold and 8.1 oz. silver per ton. Development by tunnels, crosscuts and drifts. Rumored in 1919 that control was sold to a syndicate headed by B. F. Zalinger of New York and B. F. Francis.

Operated and shipments made in 1920.

LINCOLN MINES & REDUCTION CO.

COLORADO

Address: F. G. Gasche, mgr., Cripple Creek, Colo. Thos. Cavanaugh, supt. **Office:** 10 S. La Salle St., Chicago, Ill.

Officers: Jos. Ballin, pres.; F. A. Altmeyer, v. p.; C. A. Grieb, sec-treas.

Inc. in Colorado. **Cap.** \$1,000,000. A close corporation. Operates under a lease from **Rex Gold Mining & Milling Co.**

Property: a lease and bond on 35 acres including the Lincoln No. 2, Ironclad, and Magma Charta claims, in Cripple Creek district, Teller county. Ore carries 54% manganese.

Equipment: includes 30-drill compressor, 1,500 k. w. electric power, machine shops and cyanide plant. A 100-ton mill was erected in 1919, using the Gasche process, and is reported operating at full capacity (March, 1921).

Is a successful mining venture.

LINCOLN SILVER MINES CO.

COLORADO

Address: V. C. Alderson, Colo. School of Mines, Golden, Colo.

Inc. 1920. **Cap.** \$2,000,000.

Property: the Victoria silver mine near Salina, Boulder county. In May, 1920, a tunnel was to be driven to drain the mine to a depth of 400', also to sink the shaft a further 200'.

LITTLE FOUR LEASING CO.

COLORADO

Address: care **Gem Mining Co.**, Idaho Springs, Clear Creek Co., Colo. Has lease on part of Gem mine.

LITTLE GIANT GOLD MINING & MILLING CO. COLORADO

Address: Lawson, Colo.

Officers: F. L. Collom, pres.; F. F. Chady, v. p.; H. E. Minier, sec-treas.-mgr.; F. P. Koontz, supt., with R. L. Dear, F. S. Armstrong and D. J. Donnelly, directors.

Inc. in Colorado. **Cap.** \$500,000; \$2 par.

Property: 58 patented claims, 350 acres, in Downieville mining district, Clear Creek county, shows gold-silver-lead ores in quartz veins, running E. W. with dip 60°. Country rock is granite.

Development: to depth of 900' by 2 tunnels, 3,500' and 1,000' long.

Equipment: includes steam hoist, compressor, drills and concentration mill, with ball and tube mills, 3 tables and six cell flotation plant.

The Little Giant is credited with a past production of \$4,000,000.

Company leased the Tabor property in 1921 to John Smith, who drove crosscut to tap St. James vein.

LITTLE JONNIE MINE

COLORADO

Address: C. & C. Lease, Leadville, Colo.

Property: a famous gold-silver mine near Leadville, Lake county. Some

very rich ore is frequently extracted. Mining is done through shafts and work is done by lessees. High grade gold ore was cut at 750' depth in 1920.

LITTLE JONNIE MINING & MILLING CO. COLORADO

Address: Salina, Colo. Company owns the Little Jonnie gold-silver mine and mill at Salina, Boulder county. Operated but made no shipments in 1920.

LITTLE KINGDOM LAND & MINES CO. COLORADO

Office: 50 Congress St., Boston, Mass. **Mine address:** H. J. Stahl, supt., Central City, Colorado.

Officers: H. L. Winchester, pres.; W. D. Drake, v. p.; H. K. Dean, sec.-treas., with Gardner Bates, L. M. Forbes, and Seth Martin, directors.

Inc. December, 1916, in Colorado. **Cap.** \$500,000; \$1 par; \$490,000 outstanding. No funded debt. Transfer agent, Commonwealth Trust Co., Boston; registrar, Equitable Trust Co., Boston. Listed on Boston Curb. Annual meeting, 3rd Tuesday in December.

Property: the Gold Cup and adjacent mines, 15 claims, 7 patented, 150 acres, in Quartz Valley district, Gilpin county, one mile from Central City. Mine shows several fissure veins in porphyry, with N. dip and E.-W. course. Ore occurs in shoots, 2 to 6' thick, averaging 2 oz. gold per ton with lead and copper, giving a total value of \$76 per ton.

Development: includes main working shaft, 300' deep, with three 100' shafts and 4,000' of drifts, with excellent ore showings.

Equipment: steam hoist, electric compressor and air drills, ore house and electric power throughout.

Property still in development stage and with nominal output.

LITTLE KINGDOM MINING CO. COLORADO

Probably dead. See Vol. XIV for description.

LITTLE MONTANA MINING CO. COLORADO

Office: Colorado Springs Colo.

Officers: C. M. MacNeil, pres.; C. C. Hamlin, v. p.; C. B. Garnett, sec.

Inc. 1912, in Wyoming. **Cap.** \$150,000; \$1 par.

All stock owned by Granite Gold Mng. Co., which company operated mine. No production since 1917.

LITTLE NATION MINING CO. COLORADO

Office: 423 Reserve Bank Bldg., Kansas City, Mo. **Mine Address:** C. N. Holman, supt., Howardsville, Colo.

Officers: E. A. McNeer, pres.; R. B. Crandall, v. p.; Hugh R. Ennis, sec.-treas., with F. G. Crandall and F. B. Platt, directors.

Inc. May 9, 1918, in Missouri. **Cap.** \$400,000; par \$1; issued 120,000; no bonds. Annual meeting, second Tuesday in May. Income in 1920, \$2,006.30, including \$1,779 from ore sold.

Property: Little National mine, 10 claims, 4 patented, 129 acres at Howardsville, San Juan county. A quartz vein in latite running S. 40° E. carries sulphide ore containing lead and copper with silver and gold values. Orebody 3' x 12' x 100'-150' is opened by 2,320' of work in 3 tunnels. Deest with 650' back.

Company developing mine, only ore extracted being incidental to work. Eleven carloads of \$48 ore shipped, mostly silver-lead ore, copper being sorted out. Reserves stated to be 253,000 tons.

Equipment: includes Gardner 250 cu. ft. electric driven compressor, etc. Operated and shipped ore during 1919 and 1920. Plans mill. Company also developing adjacent Royal Charter group.

LITTLE RIECHE MINE COLORADO

Address: M. J. Brady, lessee, Box 685, Leadville, Lake Co., Colo., who did development work, but shipped no ore from this mine in 1920.

LITTLE VINNIE MINE COLORADO

Address: George Peschel, Box 52, Leadville, Lake Co., Colo. Mine at Leadville operated and auriferous silver-lead ore shipped under lease during 1920.

LIZARD HEAD MINING CO.**COLORADO**

Address: Telluride, San Miguel Co., Colo. Operated a mine at Telluride, during 1920, but shipped no ore.

LOGAN METALS CO.**COLORADO**

Address: Box 333, Boulder, Colo. **Mine Address:** Crisman, Colo.

Officers: J. R. Wolff, pres.; S. H. Blakesley, v. p.; W. T. McGinnis, sec.; F. W. Kohler, treas.

Inc. 1918, in Colorado. **Cap.** \$200,000, shares \$1 par; outstanding 140,000 shares. A close corporation.

Property: the Logan mine, 12 patented claims, about 50 acres at Crisman, Boulder county, has gold, silver, and tungsten in fissure veins in granite. Main course is N.-S., with 25° dip N. E.

Development: by 4 tunnels totaling two miles. Greatest depth is 700'.

Equipment: includes hoist, compressor, pump, and electric power. Mine worked mainly by lessees. Active during 1919.

LONDON GOLD MINES CO.**COLORADO**

Office: Mining Exchange Bldg., Colorado Springs, Colo. **Mine address:** Alma, Colo.

Inc. 1921, in Colo. **Cap.** \$100,000; par \$10. Company takes over holdings of London Mines & Milling Co., controlled by the Story, Jewett and Packard estates.

Property: The London mine on London Mtn., 7 miles W. of Alma and about the same distance from Leadville, opened in 1875, is an old-time producer.

Mine has fissure veins in gray and white porphyry. The main London vein averages 18" thick, runs N. 37° W., with dip of 65° W., while the McDonald, a parallel fissure is 16" thick. Assays reported to average 4 oz. gold, 4 oz. silver, 8% lead. The London vein has been the principal producer in the past.

Development: by 2 adits, one 300' below the other, opening the London vein for 2,980', with backs of 150' to 650'. Company is driving a tunnel to cut vein system, 780' below present workings, giving new stoping ground, 780' high and 2 miles long. Machine-drills are used. Company planning a 200 ton mill.

Company was the largest producer in Park county during 1919 and 1920.

LONE TREE GOLD MINES CORP.**COLORADO**

Address: 950 Logan St., Denver Colo.

Operated and shipped silver-zinc-lead ore in 1920 from the Lone Tree mine at Idaho Springs, Clear Creek county.

LORD BYRON MINING & MILLING CO.**COLORADO**

Address: Idaho Springs, Colo.

Operated and shipped argentiferous zinc-lead ore in 1920 from the Lord Byron mine near Idaho Springs, Clear Creek county.

LOST DUTCHMAN MINING & MILLING CO.**COLORADO**

Address: Rowena, Colo.

Company did development work only during 1920 on its property, the Lost Dutchman gold-silver mine near Rowena, Boulder county.

LOUISIANA-COLORADO MINING CO.**COLORADO**

Office: 521 Denham Bldg., Denver, Colo. **Mine address:** Alma, Park Co., Colo. A. E. Moynahan, supt.

Officers: A. J. Trone, pres.; E. A. Ritter, v. p.; A. J. Brand, sec.-treas., with Eugene Constantin, J. W. Lepine, W. H. Price, and Dr. T. Stark, directors.

Property: the Dolly Varden mine, about 18 claims, 150 acres, on Mt. Bross, Alma; also reported to have purchased the Moose properties adjoining the Dolly Varden on the N., from estate of Ludlow Patton, N. Y., consisting of 19 claims, 300 acres. The rocks are lime and porphyry; veins are 20 to 40" wide, and contain galena and antimonial silver. The first carloads

of concentrates were said to have returned 0.02 gold, 177 oz. silver, and 4½% lead.

Development: by tunnel and drifts, 2,000' long.

Equipment: includes an 8,000' aerial tramway, taking ore from mine to its flotation mill on Platte river, 1½ miles N. of Alma. In September, 1919, the mill was treating 150 tons of dump ore daily, producing 200 oz. silver and 40% lead concentrate. There were 40 men employed. Late in 1920 some rich silver ore had been opened. Reported shipping ore and concentrate in October, 1921.

LOYAL MINING & MILLING CO.

COLORADO

Address: T. P. Mitchell, Ouray, Colo. E. G. Holden, supt. Inc. 1920 in Colorado.

Property: the Mickey Breen mine in Poughkeepsie gulch, Ouray county, near Ouray.

Company financed in 1920; a power line ordered and new mill to be erected.

LUCKY BOY MINING CO.

COLORADO

Dead. Mail returned from former office: Jamestown, Colo. See description in Vol. XIV.

LUCKY GIRL MINES CO. OF COLORADO.

COLORADO

Probably dead. Last address: 1214 Elizabeth St., Denver, Colo. See Vol. XIV for description.

LUCKY TWENTY MINING CO.

COLORADO

Address: James Lannon, mgr., Ouray, Colo.

Property: a lease and bond on the Guadalupe silver-gold mine at Ironton, Ouray county. Operations resumed October, 1921. Company to drive a 1,600' crosscut tunnel to get 600' below the old workings.

LUEMA MINING CO.

COLORADO

Dead. No news since 1917. Described in Vol. XIV. of this book. Former address: Leadville, Colo. Warren F. Page, mgr.

MAGNOLIA CONSOLIDATED GOLD MINES CO.

COLORADO

Address: I. F. Baxter, sec., Room 650, Omaha Natl. Bank Bldg., Omaha, Nebraska.

Inc. in Nebraska. Cap. \$1,000,000; \$1 par; 850,000 issued.

Property: 6 patented claims and a millsite on Magnolia mountain, Boulder county. A prospect, idle several years.

MALLISA MINE

COLORADO

Chas. Campbell, lessee, Creede, Colo.

Property: at Creede, Mineral county, operated during part of 1920.

MAMMOTH DEVELOPMENT CO.

COLORADO

Address: 1216 - 17th St., Denver, Colo.

Property: Illinois mine at Tolland, Gilpin county. Ore contains gold and silver. Operated part of 1920.

MAMMOTH MINING & DEVELOPMENT CO.

COLORADO

Address: Room 111, 519 Main St., Cincinnati, Ohio.

Property: the Homestake silver mine at Creede, Mineral county. Operated part of 1919, but shipped no ore.

MANITOBA LEASING CO.

COLORADO

Address: Creede, Colo.

Property: the Manitoba silver mine at Creede, Mineral county. Operated and produced during 1919-1920.

MARIE MINING CO.

COLORADO

Idle and probably dead. See Vol. XIV.

MARION MINES & MILLS CO.

COLORADO

Office: 850 Equitable Bldg., Denver, Colo. **Mine office:** Rye, Colo.

Officers: Henry E. McElwain, pres.; with John H. McElwain, S. McElwain, Frank Bulkley and Clarence A. Brandenburg, Denver, directors. Jos. Giedlartz, sec.-treas.

Cap. \$300,000, increased from \$200,000, fully paid by \$100,000 cash,

balance in property. Outstanding debts, Feb., 1917, \$118,389. No financial information received since.

Property: the Greenhorn group, 19 claims, 6 patented, together with one millsite, total 65 acres; also 120 acres held by location, making 185 acres mineral land in the Hardscrabble district, Custer county.

Development: by tunnel showing a vein of zinciferous copper and lead ore with small gold and silver values. Has water power, compressor and 100-ton concentrating mill. Erected a 100-ton flotation plant to treat tailings in 1915.

Idle several years.

MARLIN MNG., MLG. & POWER CO. COLORADO

Address: J. W. Thomas, supt., Montezuma, Colo.

Property: the Marlin gold-silver mine at Montezuma, Summit county.

Operated during part of 1919, and work reported resumed late in 1921.

MARMATITE MINING & LEASING CO. COLORADO

Address: H. M. Fields, pres., Rico, Colo. E. H. Snyder, mgr.

Property: a lease on the Blackhawk mine, owned by the Rico-Argentine Co., also on the Pro Patria mine of the Syndicate M. & M. Co., and the Silver Swan mine. The Enterprise vein of the Silver Swan is being opened. Ore contains gold, lead, zinc, and silver. Reported shipping at rate of two cars per day in 1919, to the Durango smelter. Operations were curtailed during 1920 on account of the apex suit started by the Rico Cons. M. Co. This was settled in Jan., 1921, Marmatite paying \$7,346 and Rico Argentine, \$29,946, representing net value of 5,000 tons of ore extracted from Rico Cons. ground.

Company controls the Marmatite M. Co., which operates the Emma gold-silver mine at Dunton.

MARSHALL & RUSSELL GOLD M. M. & T. CO. COLORADO

Out of Business. See Vol. XII.

MARTIN MINING AND POWER CO. COLORADO

Fully described in Volume XIV. Holdings acquired, October, 1920, by *Treasure Mountain Mines, Inc.*, which see.

MARYANA MINING & LEASING CO. COLORADO

Mail returned unclaimed, July, 1919, from former address, Cripple Creek, Colo. Probably dead.

Inc. in 1914. Company had a lease on the Mary McKinney mine from the 8th level down.

MARY FLORENCE MNG., MLG. & LEASING CO. COLORADO

Address: 758 Corona St. Denver, Colo.

Property: gold-silver claims at Parshall, Grand county. Operated during 1919, but made no shipments.

MARYLAND MINES & RED. CO. COLORADO

Address: 1143 Larimer St., Denver, Colo. Mine address: Rollinsville, Colo.

Officers: W. N. MacPhail, pres.; J. Miller, v. p.; H. F. Christensen, sec.-treas.

Property: Maryland group of 22 acres in South Boulder district, Gilpin county. Ore reported to average \$12 per ton in gold and copper.

MARY MCKINNEY MINING CO. COLORADO

Address: Colorado Springs, or Box 1346, Cripple Creek, Colo.

Officers: Chas. Castello pres., gen. mgr.; Daniel Thatcher, v. p.; John L. Nichols, sec.-treas.; with J. H. Nichols, and W. H. Spurgeon, directors.

Inc. March 30, 1892, in Colorado; renewed March, 1912. Cap. \$1,500,000; shares \$1 par; outstanding June, 1918, \$1,409,252. Transfer office: Colorado Title & Trust Co., Colorado Springs. Annual meeting, 2nd Monday in February. Listed on Colorado Springs Exchange.

Income Account—years ended December 31:

	Ore Sales	Oper., etc. Expenses	Net Earnings	Other Income	Paid Lessees	Taxes (a)	Balance for year
1920.....	\$51,546	\$27,059	\$24,487	\$3,532	\$25,358	\$3,846	*\$1,185
1919.....	80,601	44,202	36,399	2,639	38,242	1,856	1,060
1918.....	98,307	61,728	36,579	4,444	42,362	2,892	*4,231
1917.....	107,151	109,805	(loss) 2,654	1,528	32,525	8,166	*41,817
1916.....	228,346	173,333	55,013	4,698	50,689	8,147	875

* Deficit. (a) legal expenses.

Dividends: to 1919, \$1,182,398; last paid Oct. 26, 1916, \$13,093.

Property: 22 patented claims on W. slope of Raven Hill, at Cripple Creek, Teller county. First claim was located in 1891. In 1906, the property of the Anaconda Gold Mining Co. was purchased.

Ore: gold in LeClair and Mary McKinney quartz veins in phonolite. Ores carry tellurides in fluorite, quartz and altered wall rock. (For geology of the Cripple Creek district, see U. S. G. S., Prof. Paper No. 54.)

Development: by shafts to the 1,300' level. Total underground workings, about 17 miles. In 1919, 3,636' of new work was done, compared with 6,713' in 1918 and 6,488' in 1917..

Mine was examined Dec., 1916,¹ by J. T. Milliken and L. S. Noble, who recommended that No. 9 and 10 levels be extended N. to the West vein, until they reach its intersection with No. 5 vein. The latter vein and others are then to be explored. Junctions in upper levels showed good shoots. Lessees opened 5' of 4 oz. ore on No. 9 level in 1920.

Equipment: includes two plants, with 100-h. p. electric hoist, 200-h. p. electric compressor, boiler-plant, machine-shop, etc.

Property is well managed, and a policy of extensive exploration will be commenced as soon as mine supplies drop to a reasonable price. Management reported 18 sets of lessees at work in July, 1921, all shipping ore.

Production: total to end of 1919 was \$9,247,900.

Year	Co. ore, tons	Value	Lease ore, tons	Value
1920.....		\$	3,433	\$51,546
1919.....	298	2,153	5,148	76,002
1918.....	1,086	10,294	6,549	88,012
1917.....	2,962	40,560	4,960	66,591

MARY MURPHY GOLD MINING CO.**COLORADO**

Offices: 414 Boston Bldg., Denver, and Romeley, Chaffee county, Colo.

Officers: Geo. E. Collins, pres.-gen. mgr.; Louis F. Eppich, v. p.; H. W. Robinson, sec.; M. Nelson, treas., with Arthur Ponsford, directors. W. F. de Camp, mine supt., H. L. King, mill supt., at last accounts.

Inc. May 20, 1909, in Colorado. Cap. \$1,850,000; \$5 par; 1,838,100 outstanding January 1, 1920. Bonds authorized, \$350,000, 6%; \$169,000 outstanding in Jan., 1920. Majority of stock and bonds are said to be held in England. Stock transferred at company's office. Continental Trust Co., Denver, registrar. Annual meeting second Monday in March.

During 1919 there was a loss of \$45,379, thus increasing the debit balance to \$118,794. At beginning of 1920, current assets were \$105,754, and liabilities, \$82,289. Reserves were \$128,765. No printed reports were issued for 1919 or 1920. Company received \$10,135 as royalty from lessees in 1920. No dividends since 1916, when 1½% was paid.

Property: 42 claims, mostly patented, 350 acres in Chalk Creek district, Chaffee county.

The Yankee Girl, Genesee-Vanderbilt and Robinson mines in the Red Mountain district, Ouray county were acquired in 1917, and a 50-ton mill built at the Genesee. The mines contain complex silver ores in vertical

chimney deposits. Development is in progress by the Red Mountain Mines Co., a subsidiary, which see.

Ore: contains gold, zinc, lead, silver and copper, in order of value, in a complex network of nearly vertical fissure veins in quartz-monzonite; the Mary Murphy is the main vein. Veins vary in width from 6" to 12", and contain shoots and irregular lenses of ore. average assay of milling ore: 0.2 oz. gold; 2.7 oz. silver; 4.4% lead; 7.9% zinc; 0.5% copper.

Development: by tunnels with a shaft connecting the tunnel levels: length of principal tunnels, No. 7, 750'; No. 14, 1,500'; Golf, 4,350'. Total workings over 9 miles with greatest depth, 1,975'.

Equipment: includes small hoist, 3 air-compressors, 2 aerial tramways and 175-ton concentrating mill, with flotation units and a 25-ton electrostatic separation plant for the zinc-iron middlings.

Recent production; largely by lessees:

	Crude & Concts., tons	Total gross Value	Cost Smelt	Cost Freight	Umpire Charges	Net Yield
1919.....	2,308	100,213	\$11,576	\$11,676	\$77.75	\$76,882
1920.....	2,294	71,632	22,295	9,296	144.00	38,896

The Mary Murphy mine has seen its best days. At the beginning of 1917 available ore was estimated as 8,000 tons, and 6,000 tons in the Iron Chest mine. Much of the ground being then mined would not pay under normal metal prices. See Vol. XIV of this book for early history, etc.

Company suspended operations during 1919. Ore is being extracted by tributaries in the upper levels and shipped to the A. S. & R. Co. at Leadville.

Bulkeley Wells and associates have a lease and, option on the property and did some developing work in the lower levels in 1920.

MARY NEVIN GOLD MINING CO. COLORADO

Mail returned unclaimed. April 15, 1919, from Cripple Creek, Colo.

Officers: H. J. Gehm, Pres.-treas.; R. S. Ellison, v. p. and sec.

Cap. \$1,500,000; \$1 par. In treasury. Jan. 1, 1916, 38,000 shares. Listed on Colorado Springs Stock Exchange.

Property: the Mary Nevin and Hibernia patented claims, 10 acres, on Rosebud hill.

Development: by a 385' shaft on the Hibernia claim, a 200' shaft on the Mary Nevin claim and some drifting. Property was operated through the Henry Adney shaft. Probably idle.

MASCOTTE TUNNEL & MINING CO. COLORADO

Address: W. F. Kendrick, mgr., Coronado Bldg., Denver, Colo. Carl A. Mohr, supt., Alma, Colo.

Officers: W. F. Kendrick, pres.-treas.; S. T. Kendrick, v. p.; E. M. Tressler, sec., with Robt. Hutchinson, directors.

Inc. November, 1921, in Colo. **Cap.** 5,000,000 shares; no par value; 3,400,000 shares issued.

Property: 32 claims, 11 patented, 600 acres, at Alma, Park county. Ore occurs in contact deposits and fissure veins, containing gold, copper, silver and lead.

Development: by 1,400' tunnel, which is being extended. Equipped with electric power. A concentrating mill is planned.

MASTER KEY MINING CO. COLORADO

Office: 1460 Fillmore St., Denver Colo. **Mine Office:** Columbine, Colo.

Officers: J. A. Leslie, pres.-gen. mgr.; H. S. Holcomb, sec.-treas.

Inc. January, 1919, in Colorado **Cap.** \$250,000; \$1 par.

Property: 26 claims and mill site, about 560 acres, in Columbia basin, Hahn's Peak district, Routt county, 32 miles N. of Steamboat Springs. Ground contains contact and cross fissure veins in limestone and quartzite, yielding gold, silver, and lead. The average value is \$15 to \$21 per ton, mainly in precious metals.

Development: by two shafts, 70' and 110' deep, tunnels and underground workings, 380'. Planned exploratory drilling in 1921.

MATCHLESS MINING CO. COLORADO

Address: C. L. Gaskins, Box 46, Leadville, Colo.

Property: the Matchless, on Fryer hill, near Leadville, Lake county. In 1917 the old shaft was re-timbered throughout its 246' depth, and deepened through quartzite and porphyry. A diamond-drill was used for exploration, as it was believed that white limestone exists under the porphyry, forming the sulphide zone. A vigorous development policy is being pursued. High-grade gold-silver ore was reported opened in 1919, also early in 1920.

MATRIX MINES CO. COLORADO

Address: Lawson, Colo.

Property: 16 claims, including the Prince Albert, on Columbia mountain, opposite Lawson. An 18' vein of rich silver ore was mined in 1919, but work ceased during that year.

MATTERHORN MINING & MILLING CO. COLORADO

Address: Park J. Dills, mgr., Ames, Colo.

Officers Frank J. Weber, pres.; Leo R. Grinnell, v. p.; Park J. Dills, sec.-treas.-mgr., with A. W. Strehlow, R. G. Schuffenhauer, Henry Popper and Wm. C. Walrath, directors.

Inc. 1910, in Colorado, **Cap.** \$1,250,000; \$1 par; \$1,000,000 shares outstanding. Operating expenses for 1920 were \$39,000, leaving a balance of \$2,354.

Property: the Matterhorn mine 19 claims, 9 patented, 250 acres, in Trout Lake and Iron Springs districts, near Ames, San Miguel county. Ore occurs in a fissure vein in diorite-monzonite, averaging \$14 per ton in gold, silver, lead and copper.

Development: by tunnels to depth of 1,200' with 15,840' of workings. Reserves estimated to be 10,000 tons blocked out. Shipping ore said to average 128 oz. silver per ton and 2.35% copper. Development only being done.

Equipment: includes compressor, electric and water power, 40-ton mill and 6 flotation units being installed.

MATTIE B. MINING CO. COLORADO

Inc. in Colorado. **Cap.** \$100,000; \$1 par. Stock offered at 50c in 1917.

Property: Bob Cat group, 20 acres in Cleora mining district east of Salida, Chaffee county. Reported to have cut copper ore 300' from portal of tunnel, said to be 18 to 30' thick.

MAXINE ELLIOTT MINE COLORADO

Address: H. H. McFann, 637 Mayo Bldg., Tulsa, Okla.

Property: a silver mine at Westcliffe, Custer county. Operated during part of 1920.

MAY DAY MINE COLORADO

Address: C. W. Leschen, Dumont, Colo.

Property: near Dumont, Clear Creek county. Ore contains gold and silver. Operated during part of 1920.

MAYFLOWER LEASING CO. COLORADO

Ceased work in 1919. See Vol. XIV.

McCARTHY-HIDDEN TREASURE MINING CORP. COLORADO

Address: T. A. O'Brien, supt., Lake City, Colo.

Property: the Oriental mine, formerly known as the Hidden Treasure, in Gunnison county. Developed by 3,700' crosscut tunnel and several thousand feet of workings on seven levels. The vein is 30" wide. Concentrates said to assay \$90 in silver, lead, and gold.

Equipment: aerial tram 3,800' long, mill and flotation unit, water and steam power with combined capacity of 1,000 h. p., and compressor.

McINTYRE MINING CO. COLORADO

Address: John W. Prout, mgr., 300 Sugar Bdg., Denver, Colo.

Property: the Puzzle mine at Rico, Dolores county credited with past production of silver ore worth \$300,000.

Development: by 135' shaft with 2,637' of workings. Present owners have not shipped any ore, but have been looking for a vein lost 30 years ago. This was found, 4½ to 5' wide, but after driving 400' no commercial ore was developed.

In 1918-1919, company raised 132' on the vein, then drove a 190' adit from the surface to connect with top of the raise and to find the lost orebody. Diamond-drilling was to be done in 1920.

MEDITERRANEAN MINE**COLORADO**

Address: Robt. L. Pellet, Rico, Colo.

Property: near Rico, Dolores county. Ore contains gold and silver. Was operated during part of 1920.

MELVILLE LEASING CO.**COLORADO**

Address: Silverton, Colo.

Property: the Iowa mine at Silverton, San Juan county. Ore carries gold, silver and lead.

Operated and produced during 1919.

MELVINA MINE**COLORADO**

Address: J. H. Holmes & Co., 2031-12th St., Boulder, Colo.

Property: between Wall St. and Gold Run gulch at Salina, Boulder county. The mine, idle since 1907, was unwatered late in 1917. Equipment includes a 50 h. p. electric hoist. Ore carries gold and is high-grade. Presumably developing.

MEMPHIS & IDAHO SPRINGS GOLD M. & M. CO.**COLORADO**

Idle. Mine near Idaho Springs. Clear Creek Co., Colo. J. J. Williams, pres.; Wm. M. Slack, sec.-treas.; at last accounts.

Inc. in Colorado. **Cap.** \$1,500,000; \$1 par; non-assessable.

Property: 14 claims, patented, shows veins with lead, copper and zinc sulphides. Mine developed by shafts of 125', 250' and 460' and tapped at depth of 2,350' by the Newhouse tunnel.

Equipment: includes 22-h. p. electric hoist and air compressor. Was leased to John Kuykendall of Denver, in 1915. No recent returns.

METALS EXPLORATION CO., THE**COLORADO**

See under this title in U. S. section of this book.

METALS MINING & LEASING CO.**COLORADO**

W. J. Baker, mgr., Idaho Springs, Colo.

Inc. 1916, in Colo. **Cap.** \$25,000.

Property: Jenny Lind group, near Idaho Springs, Clear Creek county. The Big Five tunnel cuts the claim at depth of 2,000'. Was operating, 1920, but no shipments made.

METALS TUNNEL CO., THE**COLORADO**

Office: 2555 West 37th Ave., Denver Colo.

Officers: F. E. Holmes, pres.; J. J. Brown, v. p.; H. G. Fowler, sec.-treas. and mgr., with R. A. Haynes, directors.

Inc. April, 1915, in Arizona. **Cap.** \$150,000; 10c par; 970,000 outstanding in 1921. Annual meeting, first Tuesday after first Monday in June, at Phoenix, Ariz. A vigorous share-selling campaign was under way in May, 1920 and continued throughout 1921. Stock offered at 75c.

Property: 71 claims, 160 acres, and a mill-site, aggregating 525 acres, situated about 7 miles S. W. of Idaho Springs, Clear Creek county; also 20 lode claims and a 200 acre tunnel site, 4 miles from Georgetown.

Development: by Tunnel and numerous prospect workings. Company is driving a crosscut tunnel to cut several known veins. Tunnel can be used for transportation, and was being advanced on contract. The main tunnel is in 3,080' and the Denver tunnel, 1,800'.

Equipment: includes power-plant, and compressor with 6 drills.

The secretary states "in regard to the formation, everything continues favorable, the dip and pitch are right, there is a good amount of moisture, and I know we are justified in looking for important developments. . . ." Operated part of 1919, but shipped no ore.

MICHIGAN-COLORADO COPPER CO.**COLORADO****Office:** 1312 Penobscot Bldg., Detroit, Mich.

Company is in U. S. Court in Denver, Colo. as bankruptcy proceedings were begun 1920 by original owners.

Officers. A. C. Carton, pres.; E. V. Laud, sec.-treas.; with G. F. Gallo-way, C. Holmes, H. Behrendt, P. W. Klintworth, and G. N. McBride, directors. Jesse F. Boyd, mgr.**Cap.** \$3,000,000; \$1 par; 1,000,000 shares are treasury stock.**Property:** 12 claims and 3 mill-sites, patented, 150 acres, at Cashin, Montrose county. Company, in 1918, bought out the La Sal Copper-Silver Mining Co., which was a reorganization of the Consolidated La Sal Mining & Smelting Co., which succeeded the La Sal Copper Mining Co. Property includes the Cashin mine, which had been idle for many years, but was being developed during 1919. In August, 1919, company acquired an interest in the LockerBrewer copper mine, near Monticello.**Geology:** there are three fault-fissures at the Cashin, the Red Chief, Horseshoe, and Maude veins—varying from a few inches to 12', composed of sandstone or fault breccia showing copper carbonates, sulphides, and native copper, with silver as sulphides and native silver. Assays average 6% copper and 1.7 oz. silver per ton.**Development:** by tunnel 1,540' long. Early in 1920 it was planned to erect a power plant and 100-ton mill. Mine shut down 1921.

On Oct., 29, 1920, shareholders petitioned for receivership, alleging that company was insolvent and that they had bought shares through misrepresentation. This was a scandalous promotion put out by a broker, who is said to have sold 1,000,000 shares at \$1.50 per share, his salesman getting 75¢ a share as commission, the balance was to pay for property and its development. State Securities Commission ordered half the capital stock put in escrow, but 2,000,000 out of 3,000,000 shares is said to have been put where it would do the most good.

MICHIGAN MINE**COLORADO****Address:** W. E. Bowden, 431 W. 4th St., Leadville, Colo.**Property:** a group of 11 claims, near Kokomo, Summit county, formerly operated by Michigan M. & M. Co., reopened and under development in 1921.**MICHIGAN MINING & MILLING CO.****COLORADO**

Bankrupt. Assets sold at receiver's sale, and bought in by Edward Moir, the previous president.

Office: Foster Bldg., Denver, Colo. See Vol. XIII, also Michigan Mine, in this volume.**MID-COLORADO MINES CO.****COLORADO****Address:** Georgetown, Colo.**Officers:** Abraham Plank, pres., Wooster, Ohio; O. H. Kniffen, v. p.; L. A. Lang, sec., Denver; I. E. O'Hail, treas., Wooster, with Geo. B. McFadden, directors.**Inc.** March, 1915, in Colorado. **Cap.** \$600,000; \$1 par; 400,000 outstanding. Annual meeting, second Tuesday in July.**Property:** 13 claims, 11 patented, on Republican mountain, ½ mile W. of Georgetown, Clear Creek county, including the Mineral Chief mine, was purchased in 1915.**Ore:** gold, silver, lead, zinc in fissure vein in porphyry, said to assay .09 oz. gold, 16 oz. silver, 18% lead, 7% zinc.**Development:** by 7 shafts ranging in depth from 140' to 1,100', with total workings of 1½ miles.**Ore reserves:** said to be 50,000 tons.**Equipment:** includes electric power 50-ton mill equipped with crusher, rolls, jigs, tables and flotation plant.**Production:** previous to 1915 said to be 190,000 tons. No recent information received.

MIDGET CONSOLIDATED GOLD MINING CO. COLORADO

Office: Cripple Creek, Colo.

Officers: J. F. Doepke, pres.-mgr.; J. H. Heckemey, v. p.; A. T. Labba, sec.-treas.

Cap.: \$1,000,000; \$1 par.

Property: about 27 acres on Gold hill, Cripple Creek, Teller county. Leases property to other operators, the Bonanza King being leased to the Keystone Development Co.

Development: by 800' shaft. Reserves said to be 150,000 tons low-grade ore on dump and 100,000 tons of low-grade ore exposed by mine development.

MIDLAND CHIEF MINES CO. COLORADO

Mail returned from last address: F. J. Woodward, gen. mgr., Colorado Bldg., Denver, Colo.

Inc. in Massachusetts. Cap. \$250,000; \$5 par; 12,000 shares in treasury.

Property: 11 claims, 50 acres, on Democrat Mountain, Georgetown, Clear Creek county.; also a 50-ton mill. Two ore-shoots have been opened, one 125' long and 4' wide, with 400' back; the second on No. 6 level, is 4' wide and 450' long.

Production: in 1917 was 700 tons returning about \$5,000.

MIDNIGHT MINING CO. COLORADO

Address: Aspen, Colo.

Property: the Midnight mine at Aspen, Pitkin county. Ore carries silver, lead, and copper. Examined in 1920 by Stuart Croasdale of Pittsburgh, Pa.

Operated part of 1919, but shipped no ore. In 1920, company was driving a tunnel jointly with the Contact M. Co.

MIDWEST METAL MINING & HOLDING CO. COLORADO

Presumably out of existence. Described in Volume XIV.

MIDWEST MINING & MILLING CO. COLORADO

Address: 2354 Elm St., Denver, Colo. Mine address: Blackhawk, Colo.

Officers: Nels G. Olsen, pres.; Jas. Westman, v. p.; Robt. E. Wolt, sec.-treas.

Cap. \$500,000; \$1 par; 225,000 shares issued.

Dividends: No. 4 and 5 were paid early in 1921.

Property: 28 claims, includes the Alaska, Cyclops, and Peru, near Blackhawk, Gilpin county, and the Iron City mill at Blackhawk. Ore contains gold, silver, lead.

Development: by tunnels and shaft. In December, 1920, a 300' cross-cut tunnel was started at the Cyclops to meet the Silent Friend shaft at a depth of 400'. The crosscut will also drain the mine.

Equipment: includes hoist, compressor and the Iron City 75-ton mill employing flotation. Concentrates reported to average \$125-150 per ton.

MILLASIER MINES CORPORATION COLORADO

Owns and operates the Clyde mine on Battle mountain, Cripple Creek, Teller county. Chas. Fish, supt.

Is a close corporation composed of Michigan men. Developed by shaft to 1,400' level.

MILLER GOLD MINING & MILLING CO. COLORADO

Address: Mrs. M. Miller, mgr., Twin Lakes, Lake county, Colo. J. G. Buehler, pres.

Development: by 1,200' tunnel. Company has a 100-ton mill and was to erect a compressor plant at last accounts. The plants and upper workings of the mine were leased to the Mt. Champion Company in September, 1919. Developing in 1920.

MILL GULCH MINING CO. COLORADO

Address: C. F. Flon, sec., 1018 E. Boulder St., Colorado Springs, Colo.

Inc. 1910, in Colorado. Cap. \$1,000,000; \$1 par.

Property: on 31-Mile Mountain, 5 miles S. of Guffey, Park county.

Development: work has been done intermittently since organization. A 220' shaft was deepened to 320' in 1919, opening ore that assays 8½% copper, 13 oz. silver, and some gold.

Equipment: steam power, pump, hoist, smithy, and all necessaries.

Operated part of 1920, but no shipments in 1919 or 1920.

MINERAL PARK MILLING & REDUCTION CO. COLORADO

Address: 618 Kittredge Bldg., Denver, Colo.

Property: Silver Siding group, at Ward, Boulder county. Ore contains gold and silver. Developing.

MINERAL POINT TUNNEL & MINING CO. COLORADO

Address: 1451 Court Place, Denver, Colo.

Stock offered at \$1 per share, April, 1921.

Property: 6 claims, 2 mill sites and a tunnel site, in Beaver Dam district, Summit county, 6 miles E. of Dillon. Ore contains silver, lead and some gold.

Development: by long adit being driven at depth of 600' to drain mine and facilitate transportation of ore.

MINERALS CORPORATION COLORADO

Address: Montezuma, Colo.

Property: Morning Star silver-lead mine at Montezuma, Summit county. Developing.

MINERALS RECOVERY CO. COLORADO

Office: Denver, Colo.

Officers: W. A. J. Bell, pres.; Chas. R. Enos, sec.

Company purchased plant of the National Radium Institute at Denver, in 1919.

MINING DEVELOPMENT CO. COLORADO

Office: 2030 Land Title Bldg., Philadelphia, Pa.

Officers: L. H. Taylor, Jr., pres.; F. M. Kurie, v. p.; P. W. Meyers, sec.-treas. with Percival Chrystie and John F. Anderson, directors.

Inc. Jan., 1915, in Delaware Cap. \$100,000; \$10 par; 6,000 shares outstanding. Annual meeting third Tuesday in January. Is a close corporation.

Property: consists of leases on certain blocks of the Stratton Cripple Creek Mining and Development Co. (Stratton Estate), on Bull Hill, Cripple Creek, Teller county. The ground carries the Eagle vein and the Basket & Luce vein with other parallel N.-S. veins, also the Eagle cross vein running N. E.-S. W.

Equipment: includes complete hoisting plant. Operations are conducted through the Star of Bethlehem shaft, 300' deep and also through the main Eagles shaft 1,500' deep. In the Eagles shaft the Stratton Company operates the hoist.

Operations were begun March, 1919. The ore, shipped to the Eagle Ore Co., at Victor, averaged \$30 per ton.

MINNEHAHA MINING & MILLING CO. COLORADO

Address: George Bibb, mgr. Silverton, Colo.

Officers: J. J. McFeely, pres.-treas.; A. V. Dawson, v. p.; C. L. Beard, sec.

Inc. in 1918, in New York with capital of \$100,000, to operate the Minnehaha group, at Ross Basin, Gladstone, San Juan county. The claims have never been worked to any extent.

MISER GOLD MINING & MILLING CO. COLORADO

Address: 909 Equitable Bldg., Denver, Colo.

Property: the Miser gold-silver mine at Platoro, Rio Grande county.

Operated part of 1919, but shipped no ore.

MISSOURI LEASING CO. COLORADO

Address: Breckenridge, Colo.

Property: Missouri silver-lead mine, at Breckenridge, Summit county. Operating, but no details available.

MISSOURI MINE

Address: C. M. Snyder, Cassello, Colo.

Property: at Cassello, Park county. Ore contains silver and copper.

M. & M. MINE

Address: T. E. Ryan Co., St. Charles, Ill.

Property: a gold-silver-lead mine at Idaho Springs, Clear Creek county, operated during early part of 1920.

MODOC CONSOLIDATED MINES CO.

Office: 837 Symes Bldg., Denver, Colo.

Officers: E. D. Avery, pres.; A. H. Frankenberg, v. p.-mgr.; M. A. Skinner, sec.; Thomas Annear, treas.; with T. F. Daly, and A. S. Rundall, directors.

Annual report for fiscal year ending May 31, 1921 shows gross receipts from ore sales, \$257,886; net operating earnings, \$19,882. Stock offered at 18-25c. in 1921.

Property: a group of 4 claims including the Last Dollar in Cripple Creek district, Teller county, credited with past production of about \$2,000,000 since 1892. Bought by T. M. Pettigrew and others of Denver, late in 1916.

Development: by 1,500' main shaft and extensive openings on the 900, 1,000, 1,100, 1,200, 1,300, 1,400 and 1,500' levels. During 1920, the total new work was 2,200'.

Equipment: complete with 250-h. p. electric hoist, erected in December, 1920.

Production: at the rate of 150 tons per day in 1921.

MODOC MINING & MILLING CO.

Property operated by **Modoc Cons. Mines Co.**, which see.

MOFFAT TUNNEL & TRANSPORTATION CO.

Address: care War Eagle Consolidated Mines Co., Cripple Creek, Colo.

Property: the Moffat or Ophelia tunnel which is to serve as a public transportation outlet from Raven Hill properties at Cripple Creek, Teller county, owners of which have deeded right-of-way through them. A drift driven from the Blue Flag Company's 1,150' level connects with the tunnel to perfect ventilation.

MOJAVE TUNGSTEN CO.

Address: N. H. Brown, supt., Boulder Falls, Boulder county, Colo. Company and holdings described under same title in California.

MOLLIE GROVES MINING & MILLING CO.

Property: near Parshall, Grand county, was not regarded favorably by the late Horace J. Stevens, owing to company's alleged preposterous claims. Letters neither answered nor returned. Fully described Vol. XI, Copper Handbook.

MOLLY B. MINING & MILLING CO.

Mine address: Breckenridge, Colo.

Property: in Yuba Dam Flats, ½ mile north of Breckenridge, Summit county, includes Fox Lake, Como, and Breckenridge veins. Company reported driving three headings into a blanket formation of copper ore containing gold, silver, and bismuth.

Equipment: includes compressor. Operated during part of 1919 and 1920.

MOLYBDENUM PRODUCTS CORP.

Address: Climax, Summit Co., Colo.

Company assets taken over in 1919 by the **Climax-Molybdenum Co.**, which see.

Property: located on Bartlett mountain, Buffers Spur, a mile south of Climax, Lake county, adjoins property of Climax Molybdenum Co. Company built a 250-ton mill.

A foreclosure of mortgage was made Dec., 1921 in favor of E. I. Long-year for \$87,686 due, and the Court ordered the sale of company's prop-

COLORADO**COLORADO****COLORADO****COLORADO****COLORADO****COLORADO****COLORADO****COLORADO****COLORADO**

erty, viz, the Lake Placer and Denver No. 2 Lode claim and all buildings, improvements and tram line, also the Dow Placer and Wolf lode claim and the entire mill and plant. This sale was advertised for Dec., 6, 1921.

MONO MINES CO.**COLORADO**

Address: 404-1st Natl. Bank Bldg., Denver, Colo.

Property: Griffith gold-silver-lead mine at Georgetown, Clear Creek county. Operated during early part of 1920.

MONON MINING CO.**COLORADO**

Office: Creede, Colo.

Officers: G. C. Manley, pres.; A. Drumm, v. p.; T. H. Thomas, sec.-treas.

Property: the Monon group, 3 miles north of Creede, Mineral county. Was first worked in 1891, but has been idle many years. In 1919, was operated by lessees who shipped 100 cars of silver bearing ore, reported to have returned \$173,440.

MONTE CRISTO MINES CO.**COLORADO**

Successor to Liberty Leasing & Milling Co.

Frank Peabody, gen. supt., Breckenridge, Colo.

Inc. in Colorado.

Property: Monte Cristo and Fredonia groups in the upper Blue River region, near Breckenridge, Summit county. Ore, containing silver and lead, occurs in a vein, 4-6' wide. Contemplates erecting a new mill and extensive development work.

MONTEZUMA CONSOLIDATED SILVER MINES CO. COLORADO

Office: 801 Magee Bldg., Pittsburgh, Pa.

Directors: Joseph Giediartz, F. C. Ewing, C. A. Brandenburg, J. F. Haggerty, V. C. Miller, M. Winter, and W. F. Galbraith. H. T. Porter, sec.-treas.; T. R. Hunt, supt.

Inc. July, 1919, in Colorado. **Cap.** \$2,000,000; \$1 par; 700,000 outstanding. Annual meeting, second Tuesday in February.

Property: 77 claims, 10 patented, including the St. Johns, Morework, and Philadelphia mines, at Montezuma, Summit county. A fissure vein lies in granite and porphyry. Orebody is 400 to 700' long and in places 13' wide. Its course is N. E.-S. W., and dip 40 to 72°. Ore is a sulphide, averaging 11 oz. silver, 9% lead, and 15% zinc.

Development: about 900' of workings. Mine is entered through tunnels of adjoining properties.

Equipment: includes 3-drill compressor and lease on a 100-ton mill, which is equipped with a flotation unit.

Company started operations late in 1919, and no production figures are as yet available. In 1920, the **Morework Mine** (q. v.) was reported under lease.

MONTEZUMA MINES & MILLS CO.**COLORADO**

Office: I. A. West, sec., 621 Equitable Bldg., Denver, Colo.

Officers: H. H. McCulloch, pres.-treas.; H. F. Baker, v. p.

Inc. in Colo. **Cap.** \$1,000,000; \$1 par.

Property: 22 claims, 12 patented, and 29 patented mill-sites, covering 215 acres, in Snake River district, Summit county. Operations suspended in 1917, due to lack of funds. Company's indebtedness was reported as \$51,409. Late in 1918 a mortgage was foreclosed and by July, 1919, property had passed out of company's hands. The sale did not pay all debts, preventing dissolution of corporation.

MONTEZUMA SILVER-LEAD MINES, LTD.**COLORADO**

Sec St. Johns Mines (Colorado), Ltd.

Address: Equitable Bldg., Denver, Colo. **Office:** 38 Broad St. House, London, E. C. 2, England.

Directors: G. A. Williamson, Chairman; H. Weld-Blundell; M. M. Dewar, G. O. Shepherd.

Inc. May, 1917. **Cap.** £75,000, divided into 34,500 shares of 10% cumulative preferred at £1 par, and 170,000 shares of ordinary at 5s. par. Out-

standing, 22,500 preferred shares and 142,000 ordinary shares, both fully paid.

Property: the St. Johns group of silver-lead mines, 1½ miles south of Montezuma, Summit county. This property was purchased from the St. Johns mines, Ltd. for £55,000. The bulk of the ore is of milling grade, averaging about £5 per ton in value.

Property now operated by **Montezuma Cons. Silver Mines Co.**, which see.

MOONLIGHT-GOLD MINING CO. COLORADO

Address: Hildreth Frost, Cripple Creek, Colo.

Inc. 1920, in Colorado.

Property: 23 acres, viz: the International, Clara D., Lexington, and Rittenhouse claims on Gold Hill, Cripple Creek district, Teller county, said to show good gold ore, and to have a large tonnage of low-grade ore exposed.

Development: by 750' Rittenhouse shaft.

Equipment: electric hoist, compressor, etc., erected late in 1920.

Reported to have transferred its property to the **El Paso Ex. Gold Mng. Corp.** in Jan., 1921.

MOORE MINING & MILLING CO. COLORADO

Described in Volume XIV.

MOOSE GOLD MINING CO. COLORADO

Address: Apt. 24, No. 1221 Sherman St., Denver, Colo.

Property: a gold mine at Cripple Creek, Teller county.

MOOSE MINES COLORADO

Reported owned by **Louisiana-Colorado Mining Co.**, which see.

Property: at Alma, Park county, was sold in 1909 by the Patton estate, to H. W. Scott, who formed a company, which failed.

MOREWORK MINE COLORADO

Address: c/o Lawver & Fiedler, East Canton, Ohio.

Property: silver-zinc group at Montezuma, Summit county, reported to be part of holdings of **Montezuma Cons. S. M. Co.**, which see. Was operated during early part of 1920, but shipped no ore.

MORNING GLORY MINE COLORADO

Address: c/o Barth & Ritchey, Sawpit, Colo.

Property: in San Miguel county, near Redvale. Ore contains carnotite. Operated during part of 1920, but shipped no ore.

MORNING GLORY MINE COLORADO

Address: Jas. and A. B. Harbaugh, owners, Pitkin, Teller county, Colo.

Property: 12 claims, 120 acres, at the head of North fork of Quartz Creek, said to show a number of veins from 4' to 35' in width, developed by tunnels.

Operated by lessees at last reports.

MORNING STAR MINE COLORADO

Address: W. W. Gunter, Eldora, Colo.

Property: a gold-silver group at Eldora, Boulder county. Operated during part of 1920.

MOSQUITO GULCH SILVER MINES CO. COLORADO

Presumably out of business. Fully described in Volume XIV.

MOUNTAIN FLOWER GOLD M., MLLG. & P. CO. COLORADO

Office: 502 Corby-Forssee Bldg., St. Joseph, Mo.

Officers: C. J. Griswold, pres.; J. R. Jennings, v. p.; T. G. Sörter, sec-treas.

Inc. 1907, in Arizona. **Cap.** \$2,000,000; \$1 par; \$1,384,000 outstanding, March, 1919.

Property: Mountain Flower group, 6 claims; Delta group, 10 claims; 2 mill sites and Delta tunnel site, 200 acres, at Deep creek, upper San Miguel district, San Miguel county, said to show a quartz vein in diorite and porphyry. Ore contains gold, silver, zinc, and lead.

Development: by 1,133' tunnel. Company reports 3 veins in Delta group and four in the Mountain Flower group.

.. No record of recent development work or production.

MOUNTAIN KING MINING CO.

COLORADO

Address: 8 S. 40th St., Philadelphia Pa.

Property: the Mountain King gold-silver mine at Ironton, Ouray county. Operated part of 1919, but shipped no ore.

MOUNTAIN STATES POWER & MINING CO.

COLORADO

Address: D. A. Knight, mgr., Idaho Springs, Colo.

Inc. in Colorado. Cap. \$5,000,000; \$1 par. Security Transfer & Registrar Co., transfer agent. Listed on N. Y. Curb in April, 1920.

Property: the Mattie gold-silver mine. 2½ miles W. of Idaho Springs, Clear Creek county, also the silver King claims near Georgetown, worked 17 years ago for gold, silver and copper.

Development: by tunnels. Reserves estimated to be 200,000 tons of \$10. ore.

Equipment: water power, compressor and mill.

Operated part of year, but no shipments reported.

MOUNTAIN TOP MINING CO.

COLORADO

Address: Ouray, Colo.

Officers: Windsor Morris, pres.-treas.; G. H. Beebe, v. p.-gen. mgr.; W. E. Hopton, sec., with E. C. L. Bartow, Carl Larger, I. N. Beeler and Harry J. Hamlin, directors.

Inc. Aug. 11, 1911, in Colorado. Cap. \$750,000; \$1 par; \$500,000 issued. Bonds authorized, \$250,000; \$146,000 issued.

Property: 13 claims, 10 patented, in Mt. Sneffels district, Ouray county, 6 claims covering 9,000' along the N. extension of the Smuggler-Union vein.

Geology: fissure-vein in andesite, showing ore with galena and gray copper, and carrying gold, silver, lead, and copper. Shoot is from 6 to 36" wide and 500' long. Mill ore reported to assay \$30, and shipping ore over \$200 net per ton.

Development: by crosscut tunnel 2,500' long, with total of over 9,000' of workings, to depth of 1,000'. A faulted vein, containing high grade silver-lead ore, was picked up again in 1920.

Ore reserves: given as 30,000 tons.

Equipment: includes compressor, 2,300' tram and 50-ton mill employing 2 pneumatic flotation units. Plant is unique in that ore-treatment is all done underground in order to prevent snow-slides damaging mill. Extraction is 89%. All machinery is motor-driven. This plant was described by W. F. Wilcox in the "Scientific American" of December 13, 1919.

Mine was the principal producer of the county in 1919, and shipped regularly during 1920 and 1921. Fifty men employed by company and by lessees.

MT. CHAMPION MINING CO.

COLORADO

Address: 55 Congress St., Boston, Mass., or Box 910 Leadville, Colo.

Officers: C. Q. Adams, pres.; W. E. McKee, sec.; H. A. Wentworth, treas.; all of Boston. **Mine address:** Lucien W. Smith, mgr., Littleton, Colo. Company is a close corporation, incorporated in Maine, 1910.

Property: 12 patented, several unpatented claims, in Lakawanna and Half Moon gulches, near Leadville, Lake county, and 2 miles from Malta, the railway and loading station. The Colorado Power Co's transmission-line connects with mine and mill. The Ozark mine is under lease to company and possibilities are considered good.

Geology: ore zone is a granite intrusion in gneiss, accompanied by an alaskite dike with several branches passing through the granite, the latter being mineralized and faulted. Ore contains gold, a little silver, and an occasional shoot carrying some copper and lead. About 30% of the gold is amenable to amalgamation. Values are mainly in the sulphides, which assay up to \$200 per ton. Mill ore averages \$8.42, other ore, \$75.25. Concentrates, after amalgamation, said to run \$80 to \$125 per ton.

Development: by tunnels, mostly in ore. Total workings, 10,000'

Equipment: 1,000 cu. ft. compressor, 6,600' aerial tram, and 75-ton mill, using breaker, Hardinge and tube-mills, and concentrators.

On account of abnormal conditions mine was closed in 1918. Company plans a new mill employing cyanidation, meanwhile leasing the mill, tram, and upper workings of the Miller Mining Co.

MT. HAYDEN MINING & MILLING CO. COLORADO

Address: Ouray, Colo.

Property: the Thistledown mine in the Ouray district. Ore carries gold, silver, and lead.

Operated part of year, but shipped no ore.

MT. KELSO MINING CO. COLORADO

Office: 703 E. & C. Bldg., Denver, Colo. **Mine address:** c/o Jeffrey & Decker, lessees, Silver Plume, Colo. J. A. Marsh, pres.

Cap.: \$600,000; shares \$1 par.

Property: 5 claims on Kelso mountain, Clear Creek county, and a one-fourth interest in the Tiger and Grafton claims. Ore contains gold, silver, lead. Operated part of year only.

MT. MARIE GOLD MINING & LEASING CO. COLORADO

Address: Cripple Creek, Teller Co., Colo.

Property: a lease on part of the South Burns gold mine at Cripple Creek, owned by Acacia Gold Mng. Co. Operated during part of 1920.

MT. PLEASANT MINING CO. COLORADO

Address: c/o Fillius, Fillius & Winters, E. & C. Bldg., Denver, Colo.

Property: a gold-silver mine at Dunton, Dolores county.

Exploration underway in 1920 and 1921, but no production reported.

MUDSILL GOLD-SILVER MINES CO. COLORADO

Mine office: R. G. Mullen, pres., Alma, Colo.

Inc. in Colorado. Cap.: \$400,000; 25c par; 1,000,000 in treasury.

Property: Mudsill group of 260 acres, in Sacramento district, near Alma, Park county, on London fault, which traverses the ground.

Up to 1893, property had produced in excess of \$2,000,000. Adjoins the London mine with \$20,000,000 production.

Company operating early in 1919. No recent information.

MUTUAL CO-OPERATIVE MINING CO. COLORADO

Offices: 206 Masonic Temple, Denver, Colo., and 507 First National Bank Bldg., Cheyenne, Wyoming.

Officers: H. R. Steele, pres.; Hammond Matthews, v. p.; G. P. Howard, sec.-treas.; with H. F. Fisher and J. H. Edwards, directors.

Inc. 1912, in Wyoming. Cap.: \$2,500,000; \$1 par; in treasury, March 1, 1921, 215,390 shares.

Property: 10 claims in Gold Hill district, Boulder county, including the Hoodoo claim, 2½ miles from Salina; also owns a 5/6 interest in the Silver Queen group, 5 patented claims, 4 location lode claims and a mill site, at Kokomo, Summit county.

Development: at the Silver Queen, by 415' tunnel, 300' winze and drifts. The property in Boulder county has been idle since 1918.

Production: smelter shipments from Silver Queen amounted to 129,000 oz. of silver up to Nov. 1, 1920. Mine leased to Kokomo-Recen M. & D. Co. to November, 1925 on a 15-20% royalty basis.

The new management has paid off all obligations of the former Frank E. Wire regime.

NATIONAL FINANCE AND HOLDING CO. COLORADO

Address: G. E. Bolander, supt., Blackhawk, Colo.

Inc. in Ohio.

Property: reported to have taken over the Hinsdale county holdings of the Colorado & Connecticut Gold Mining Co., which see; also the Coeur d'Alene mine. The latter is said to have produced \$150,000, years ago. It has a 400' shaft, which was being repaired in December, 1920.

NATIONAL MINING & DEVELOPMENT CO. COLORADO

Address: Paul Maurer, mgr., Kokomo, Colo.

Property: Golden Queen group and Hercules placer at Kokomo, Summit county, also several claims held under lease and bond, near Leadville, Lake county.

Development: by tunnels. The Kokomo holdings were reported under development early in 1921.

NATIONAL RADIUM INSTITUTE COLORADO

Out of business. Property sold in 1919, to the Minerals Recovery Co., which see.

NATIONAL RADIUM PRODUCTS CO. COLORADO

Out of business. Taken over by Uranium Chemical Co., which see.

NATIONAL VANADIUM PRODUCTS CO. COLORADO

Address: R. W. Russell, sec., Pittsburgh, Pa.

Is a holding company, owning all the stock of the Pittsburgh Radium Co., which see.

NATURE PRODUCTS REFINING CO. COLORADO

Address: Cotopaxi, Colo.

Property: Cotopaxi mine and mill at Cotopaxi, Fremont county. Ore contains silver, lead, copper and zinc.

NEATH MINE COLORADO

Address: Nathan Shapiro & Co., Idaho Springs, Colo.

Property: at Empire, Clear Creek county. Ore contains gold, silver, copper. Operated during part of 1920.

NEDERLAND-BEAVER TUNGSTEN MINING CO. COLORADO

Probably defunct. See Vol. XIV.

NEKON LEASING & DEVELOPMENT CO. COLORADO

Address: Empire, Colo.

Property: Bay State Tunnel mine on Silver Mountain, near Empire, Clear Creek county. Ore contains gold, silver and copper.

NEODESHA MINE COLORADO

Address: Sam Fellin & Co., Ouray, Colo.

Property: a silver mine near Ouray, Ouray county.

NEW ENGLAND EXPLORATION CO. (THE) COLORADO

Office: 14 Ashburton Place, Boston Mass. Controls the Smuggler Union Mining Co., Colo., which see.

Officers: Bulkeley Wells, pres.; T. E. Sherwin, sec.-treas.

Inc. 1898, in Maine. Cap \$2,000,000; shares \$100 par; outstanding \$1,875,700. Annual meeting first Wednesday in June, at Portland, Me.

Stock transferred at company's office.

NEW ERA MINES COLORADO

Office: 31 State St., Boston, Mass. **Mine Office:** Idaho Springs, Clear Creek county, Colo.

Officers: Beni. A. Howland, pres.; E. M. Sanger, sec.; Robt. H. McLaughlin, treas.; W. A. Gilman, mgr.

Inc. Nov. 8, 1915, in Maine. Cap. \$500,000; \$1 par; 100,000 shares held in trust for treasury. Stock listed on Boston Curb. Paul Revere Trust Co., Boston, transfer agent. Annual meeting, second Monday in January.

Property: 15 claims, 3 patented, about 75 acres, and a mill site, 5½ miles from Idaho Springs, formerly owned by the Trail Mining Co., and worked during 1913-14 by the Calumet-Corbin Mining Co.

Ore: consists of a mixture of course galena, chalcopyrite and pyrite, containing gold and silver, with a quartz gangue and much siderite. Gray copper is abundant, while zinc blende is occasionally found. Five veins have been developed, with main workings on the Great Western and New Era veins. Selected smelting ore averaged from \$50 to \$60 per ton, mainly in gold and lead.

Mine is said to have the extension of the Lamartine and Oneida veins, and is credited with a lead and gold-silver production of 2,361,000 lb. and \$650,000 respectively.

Developed by over 4,000' of tunnels, crosscuts and shafts and equipped with concentrating mill. Operated by lessees in recent years.

Property reported on by Forbes Rickard.

NEW GOLD DOLLAR MINING CO. COLORADO

Mine office: Cripple Creek, Colo.

Directors: A. E. Carlton, Colorado Springs, R. J. Gaffney, and E. E. Quentin, Denver.

Inc. in 1919 Cap. \$150,000; 5¢ par. Is a reorganization of Gold Dollar Consolidated Mining Co.

Property: 62 acres, patented, being part of the Arequa townsite, on eastern slope of Beacon hill, Cripple Creek district, Teller county. Gold ore occurs in vein 2 to 4' wide, said to average \$20 per ton. Property was purchased at Sheriff's sale in 1919 by the judgment creditor, First National Bank of Cripple Creek, and deeded by the Bank to present company.

Development: 1,050' Mabel M. and Union shafts, from which considerable drifting and crosscutting has been done.

NEW GOLD KING MINES COLORADO

See Gold King Extension Mines Co.

NEWHOUSE TUNNEL CO. COLORADO

See Argo Mining and Tunnel Co.

NEW LIFE TUNNEL & MINING CO. COLORADO

Address: Idaho Springs, Colo.

Officers: William Darroch, pres.; E. D. Quigley, v. p.; H. A. Reinhart, sec.-treas.

Inc. in 1916 as a reorganization of the Hoosac Tunnel & Mng. Co., which company was in receiver's hands for many years. Cap. 1,000,000 shares; 425,000 issued; assessable; two assessments levied to date.

Property: the Hoosac mine, 1 unpatented and 4 patented claims, 20 acres, in Spanish Bar district, Clear Creek county, about 1½ miles west of Idaho Springs.

Ore: is quartz impregnated with iron and copper pyrite, and also some lead and zinc. It requires milling and concentration, as the gold and silver are closely associated with the pyrite. Veins vary from 6" to 4' in width, about ¼ being of high-grade material, the balance milling ore.

Development: by 200' incline said to show a vein carrying \$10-\$14 ore. Main working is the Hoosac tunnel which has been driven 1,015' on the Rising Sun vein. There are a few stopes, crosscuts and a 60' winze all said to show ore.

Equipment: includes compressor, drills, 10-stamp mill, classifier, and 3 Wilfley tables, flotation, regrind and ball mills.

Company is also developing the Smuggler mine at Rollinsville, Gilpin county.

Management seems to be earnestly trying to rehabilitate company, but appears to need more capital to put mine on a paying basis. No work has been done since Feb., 1921, on this account.

NEWMAN-LOOMIS CONC. MINES MNG'T CO. COLORADO

Address: Redcliff, Colorado.

Operates the Pine Martin concentrating mill at Redcliff, Eagle county.

NEWMAN MINING MILLING & LEASING CO. COLORADO

Office: Aspen, Pitkin county, Colo.

Officers: H. G. Koch, pres.; W. K. Hanson, sec.-treas.; H. C. Watson, gen. mgr.

Reported early in 1919 to have paid a dividend of \$12,500, or 25% on the \$50,000 capital originally invested.

Property: the Newman silver-lead mine at Aspen, Pitkin county.

Development: by 5,500' main tunnel from which 3 inclined raises, 150, 200, and 900', have been driven to cut the ore.

Producing in 1919 and 1920.

NEW MARIAN CONSOLIDATED MINING CO. COLORADO

Company dissolved and property taken over by Iron Silver Mining Co. of Leadville, Colo. See Vol XII for description of mine.

NEW MONARCH MINING CO. COLORADO

Address: Henry Schuck, lessee, Leadville, Colo. Edw. G. Kelly, supt.

Property: the New Monarch mine on Breece hill, Leadville, Lake county, carrying lead and zinc sulphides. Developed by shafts and crosscuts. A crosscut to the N. E. has been driven in virgin ground from the bottom of the Monarch shaft.

Equipment: includes hoists, pumps, electric power compressor, etc. Operated by lessees since 1914 and producing 500 tons of ore per month.

The Cleveland and twelve additional claims were reported sold in August, 1921, at sheriff's sale to satisfy a judgment held by the First Trust & Sav. Co., and bought in by the plaintiff for \$72,396.

NEWSBOY MINING & MILLING CO. COLORADO

Address: Ridgway, Colo. Mine operated by Nick Hutter & Co., Ouray, Colo., in 1920.

Property: the Newsboy Mine near Ouray, Ouray county, shows gold, silver and zinc.

NEW YORK MINE COLORADO

Address: Morgan & Sloan, lessees, Creede, Mineral Co., Colo.

Property: at Creede, shows gold-silver-lead ore. Developing.

NIL DESPERANDUM MINES CO. COLORADO

Office: 15 Citizens National Bank Bldg., Boulder, Colo. A. B. Kamp & Co., successors to the C. W. Savery Securities Co. of Denham Bldg., Denver, is fiscal agent.

Officers: M. S. Brandt, pres.-mgr.; B. S. Sim, sec.-treas.; with T. F. Sotham, directors.

Inc. 1916, in Colorado. **Cap.** \$300,000; 10c par; increased Nov., 1919 to \$500,000; \$1 par. A combination offer of 200 Nil Desperandum shares with 2,500 shares of 3 oil companies, for \$15 a month for 10 months, was made by the fiscal agent in December, 1920. Stock offered at 30c. a share in 1921.

Property: the Interocean, Monongahela, Osceola, White Crow, and American claims at Sunshine, Boulder county. Company reports vein to be 5 to 15' wide, about 4 miles long, averaging \$42 gold, 1 to 5 oz. silver, with some vanadium.

Development: 350' Nil Desperandum shaft, and 600' Interocean shaft; workings total over 5 miles.

Company has been reopening these old mines which will be operated through the American shaft, 525' deep. The Interocean group is credited with production of \$2,000,000; the Nil Desperandum with over \$100,000. The Interocean is being developed by the Inter Ocean Leasing Co., on a royalty basis.

In December, 1920, the manager estimated that there was enough ore to supply a 100-ton mill for about 10 years; also that the milling ore already broken, on dumps or in stopes, has a net value greater than the entire capitalization at par. Reserves are given as 200,000 tons in the mines and 200,000 tons on dumps.

NIMROD MINE. COLORADO

Address: Freund & Hunter, Cassells, Colo.

Property: a gold-silver mine at Grant, Clear Creek county, operated during part of 1920, but no shipments reported.

NISI PRIUS CONSOLIDATED MINING CO. COLORADO

Controlled through stock ownership by Iron Silver Mining Co.

Address: 615 Stevens Bldg., Detroit, Mich., or 11 Waverly Place, New York.

Officers: J. B. Grant, pres.; J. A. Ewing, v. p.; Fremont Woodruff, sec.; G. O. Argall, treas.

Cash surplus at end of 1919 was \$5,600.

Property: at Leadville, Lake county, worked by two sets of lessees in 1916, 1917, and 1918 and one set in 1919.

During 1918, a new body of lead-silver ore was opened that was 8' wide by 15' long, the ore assaying 15% lead and 11 oz. silver per ton. During 1919 an old shaft was deepened 125', and was being sunk further in 1920.

Production: in 1918, was 1,569 tons of manganese ore, 169 tons iron and 117 tons lead carbonate ore, with a total value of \$15,029 compared with 3,202 tons, 952 tons, and 24 tons, \$21,999, respectively, in 1917.

NORTH BOULDER CREEK MINING CO. COLORADO

Address: Nederland, Boulder Co., Colo. J. A. F. Duricher-Stone, mgr.; J. W. Pherson, supt.

Property: the Blue Bird at Nederland. Developing a vein said to contain high grade silver-lead ore.

Equipment: includes 50-ton flotation mill.

NORTH PARK MINING & MILLING CO. COLORADO

Address: Walden, Colo.

Property: the North Park gold-silver mine at Walden, Jackson county. Operated part of 1919, but shipped no ore.

OAKLAND MINING, MILLING & LEASING CO. COLORADO

Address: Aspen, Colo.

Property: the Oakland silver-lead mine at Aspen, Pitkin county. Operated part of 1919, but shipped no ore.

OCEAN WAVE MINING CO. COLORADO

Address: Matt. Edwards, supt., Victor, Teller Co., Colo. C. H. Hurst, pres., Springfield, Ill.

Cap. \$100,000. Controlled by Eastern parties.

Operating under long-term lease the Ocean Wave and Little Mary claims on Battle mountain, Cripple Creek, owned by Portland Gold Mining Co.

Development: by 400' shaft. Mine said to have vein 4' wide seamed with streaks of gold-bearing quartz. The ground has been sub-leased, but company operations were resumed late in 1919. Two oz. gold ore was shipped during 1920.

OCEAN WAVE MINING & REDUCTION CO. COLORADO

Office: 830 Equitable Bldg., Denver, Colo.

Property: the Ocean Wave gold-silver mine at Lake City, Hinsdale county.

Operated part of 1919, but made no production.

OHIO AND COLORADO SMELTING & REFINING CO. COLO.

Dead; see Vol. XIV for description. Was a subsidiary of Am. Metal Co. Company dissolved and plant sold. See **Salida Smelter** under Colorado.

OHIO ZINC CO. COLORADO

Address: Canon City, Colo.

Company operates a zinc oxide plant at Canon City, Fremont county.

OLD HUNDRED MINING CO. COLORADO

Property inactive for several years prior to 1918; enquiries through various channels have been fruitless. Company probably defunct. See Vol. XIII.

OLD TOWN M. M. & TRANSPORTATION CO. COLORADO

Address: Idaho Springs, Colo.

Officers: Wm. L. Bush, pres.; Geo. K. Kimball, sec.-treas.-mgr., with J. M. Freeman, J. Ramsey Speer and J. B. Phillips, directors.

Inc. 1911 in Colorado. **Cap.** \$1,000,000; \$1 par; 738,302 outstanding. Annual meeting, first Monday in February. Company succeeded the Old Town Cons. Mining Co., which itself was successor of the Old Town Mining & Milling Co., both defunct. Property bought in at sheriff's sale for \$60,000 in 1910 and reorganized under present name. Dividends since 1911 amount to \$59,826.

Property: 22 patented claims in Russell gulch district, Gilpin county, including the Becky Sharp mine. Ground contains the Old Town vein, showing a paysteak of 4' average width, with gold and silver-bearing copper ore.

Development: by 2,205' incline shaft with 4,326' tunnel; over 5 miles of workings.

Equipment: includes hoist, pump, steam and electric power and air compressor.

Production: total to September, 1920, \$328,514.

In December, 1919, the mine was taken over by A. R. Clark and others of Colorado Springs under bond and lease; G. K. Kimball in charge. Production in 1920 amounted to \$9,497.

OLLIE REED NO. 2 MINE

COLORADO

Address Frank E. Barry & Co., 704 E. 6th St., Leadville, Colo.

Property: at Leadville, Lake county. Ore contains gold, silver, lead and zinc. Production figures are not available.

ONEIDA-STAGG MINING & MILLING CO.

COLORADO

Address: H. T. Rogers, mgr., Idaho Springs, Colo.

Inc. 1914, as a consolidation of the Oneida and Stagg Mining companies. Mine at Freeland, 5 miles from Idaho Springs, Clear Creek county.

No recent returns. See Volume XIV.

ONONDAGA MINES CO.

COLORADO

Office: 717 Onondaga Bank Bldg., Syracuse, N. Y. Edward S. Wiard, agent, 409 Boston Bldg., Denver, Colo.

Property: two groups of claims, about 700 acres, 130 patented, on Griffith mountain, near Georgetown, Clear Creek county. The main group covers the N. E. end of the Comet-Retna vein and the other group the approach to the Comet vein, known as the Doric tunnel. Ore is galena, free from zinc, with copper pyrites and some gray copper. The veins vary from 5-20' in width, with solid streaks up to 36" in width, said to run from \$40-\$125 per ton.

Development: the mine has been opened to a depth ranging from 1,800-3,000', with three levels above the Capital tunnel level.

Equipment: includes compressor, hoist and power plant. Mine has been closed down since 1919, owing to high cost of development work.

ONTARIO MINE

COLORADO

Address: Lively, Stewart & Young, Empire, Colo.

Property: a gold-silver group at Empire, Clear Creek county. Operated during part of 1920.

ONTARIO TIGER & GREEN MTN. LEASING CO.

COLORADO

Presumably defunct, See Vol. XIV.

OPHIR CONSOLIDATED CO.

COLORADO

Frank E. Trumble, supt.

John M. Whitehead, Janesville, Wis., chairman bondholders' committee; other committeemen are: John R. Evans, Oshkosh, Wis.; Wm. Smith, La Crosse, and Wm. Voss, Watertown, Wis.

Property: 50 odd claims, including the Ophir gold mine, near Telluride, San Miguel county, adjoining the Carribean mine on the east, and the Butterfly mine on the west. The Ophir was first opened about 20 years ago, but was idle 10 years, until present holders started operations.

Development: includes a 2,500' tunnel and considerable work on several levels. Near the tunnel end an 800' raise connects with the 6th level of the old workings. Recent work has opened up considerable milling ore.

OPHIR GOLD MINES, MILLING & POWER CO.

COLORADO

Succeeded Oct., 1915, by Ophir Range Gold Mining Co., which see.

OPHIR GOLD MINES & REDUCTION CO.

COLORADO

Address: J. M. Belisle, mgr., Ophir, Colo.

Inc. Aug., 1916, in Colorado. **Cap.** \$250,000; 10c par. One million shares paid for property.

Property: the New Dominion and April Fool mine at Ames, San Miguel county, said to show ore in upper workings carrying gold and silver, with lead, copper, and zinc at depth.

Development: by 985' tunnel and 1,100' crosscut tunnel. By Sept., 1919,

after doing 2,500' of driving, a shoot of milling ore had been developed. Over \$30,000 has been spent in development work. Management planned to erect a flotation plant.

Operated part of 1919, but shipped no ore.

OPHIR LOOP MINES CO. COLORADO

Address: Ames, Colo.

Property: Silver Bell mine at Ames, San Miguel county. Ore contains gold, silver, lead and copper.

Development: by 1,800' main crosscut.

OPHIR RANGE GOLD MINING CO. COLORADO

Letter returned in 1917, from Ophir, San Miguel county, Colo., and mine probably closed down.

Company acquired the holdings of the Ophir Gold Mines, Milling & Power Co., Oct., 1915. See Volume XIV.

OPPORTUNITY CONS. GOLD MINING CO. COLORADO

Presumably out of business. See Volume XIV.

ORANGE COUNTY INVESTMENT CO. COLORADO

Office: First Natl. Bank Bldg., Denver, Colo.

Property: the White Cloud gold-silver mine at Ironton, Ouray county. Operated part of 1919, but shipped no ore.

O'REILLY GOLD MINING CO. COLORADO

Reorganized as the Marie Mining Co., which is idle.

ORE PRODUCTS CORPORATION COLORADO

Successor to Chemical Products Co.

Address: 126 State St., Albany, N. Y.

Operates a carnotite reduction plant at Denver, Colo.

ORIENT MINE COLORADO

Address: J. Gilligan, Mineral Hot Springs, Saguache Co., Colo.

Property: an iron mine at Mineral Hot Springs, operated during part of 1920.

ORIENT SILVER-LEAD MINE COLORADO

Address: Nelson & Combs, Lawson, Clear Creek Co., Colo. Operated during part of 1920.

ORIZABA MINES CO. COLORADO

Address: 312 - 17th St., Denver, Colo.

Property: at Parshall, Grand county. Ore contains gold and copper. Under development.

ORPHAN BOY MINE COLORADO

Address: E. P. Young & Co., Alma, Colo.

Property: at Alma, Park county, contains gold, silver, copper and zinc values. Operated during part of 1920.

O. S. LEASING CO. COLORADO

Address: Durango, Colo.

Property: the Shenandoah gold-silver mine at Howardsville, San Juan county.

Operated and shipped ore in 1919.

OSTON LEASING CO. COLORADO

Frank Crawford, supt. Company has leased the Howard dump of the Mary McKinney Mining Co., and is reported shipping ore.

OURAY CONS. MINING & REDUCTION CO. COLORADO

See Vol. XIV. Declared bankrupt, August, 1921. K. Macdermid, pres., Colorado Springs, Colo., at last account.

OURAY SMELTING & REFINING CO. COLORADO

Office: Hayden Bldg., Ouray, Colo. Thos. Grieve, pres.; C. H. Newbury, v. p.; Thos. B. Crawford, treas.

Inc. in Colorado. Cap. \$1,500,000, increased from \$750,000; \$1 par; divided into \$1,000,000 com. and 500,000 pfd. shares. Company is a reorganization of the Brown Mountain Smelting Co.

t **Property:** 435 acres, patented, on the Uncompahgre river, 4 miles from Ouray, Ouray county.

Development: by 250' shaft and over 3,500' of tunnel and drift work. The company being without funds in 1914, the mine was closed down, but was reopened in 1917-18. No work done since 1919. The 450-ton smelter at Ouray, is idle, and in need of financial assistance. A Federal road is building between Ouray and Silverton, making the smelter accessible to the Red Mtn. district.

OURAY UNION MINING & MILLING CO. COLORADO

Address: C. M. Doty, mgr.-sec., York, Neb.

C. R. Wilfley, supt., Ouray, Colo.

Inc. in Colorado.

Property: Bright Diamond mine, under 9-year lease and bond to Welch-Worland Mines Syndicate, which see.

PACKARD POWER & MINING CO. COLORADO

Address: N. Nelson, mgr., Edwards, Colo.; or W. M. Elwell, Wedgewood Bldg., Toledo, Ohio.

Officers: C. M. Harpst, pres.; E. C. Showman, v. p.; W. M. Elwell, sec.-treas., with F. B. Conkle, S. Conkle, Wm. Vail, O. Davis and C. R. Campbell, directors.

Inc. in Colo. **Cap.** \$500,000; \$1 par; 400,000 shares outstanding.

Property: the Packard group, 6 claims, 1 patented, 12 miles from Edwards, Eagle county. Ore occurs in an almost perpendicular fissure vein, containing gold, lead and silver.

Development: by tunnel, 1,000' long, July, 1921.

Controlled by same interests as **East Lake M. & M. Co.**

PALISADE COPPER CO. COLORADO

Geo. Leece, mgr., East Argentine, via Georgetown, Clear Creek Co., Colo.

Astley Atkins, pres., 31 State St., Boston, Mass.

Property: a group of claims near East Argentine, said to contain a 12" vein of high grade gold-silver bearing ore. Developing.

PANDORA MINING & MILLING CO. COLORADO

Address: 737 First Natl. Bank Bldg., Denver, Colo.

Succeeded the Jewell Mines & Reduction Co.

Property: the Francis and Pandora mines and mill site, 7 miles E. of Pitkin, in Monach (Garfield) district, Gunnison county, said to carry 8 fissure veins.

Development: by 1,800' tunnel.

Equipment: included air-compressor, machine-drills, water power. Oxidized silver-lead ore shipped 1918.

Operated the Francis mine in 1920.

PARAGON MINING CO. COLORADO

Address: Henry C. Demming, gen. mgr., 15 N 3rd St., Harrisburg, Pa. Is successor of Tirbircio Gold Mining Co.

Property: 400 acres of lode and placer claims near La Plata, La Plata county, is developed by 1, 500' of adits.

Equipment: includes rock crusher, electrical plant, a 50-stamp and a 10-stamp mill. Company has been inactive since 1917.

PARKER GROUP OF MINES COLORADO

Address: John H. Meager, owner, Silverton, San Juan county, Colo.

Property: 5 claims, about 2 miles N. E. of Silverton, said to show a fissure vein in andesite-lime-porphry formation, traceable at surface for several thousand feet. The ore is a sulphide, containing copper, silver, gold, iron, and molybdenum.

Development: by several tunnels and crosscuts. A prospect.

PARK TUNNEL MINING & MILLING CO. COLORADO

Address: John Cortellini, Aspen, Colo.

Officers: Robert Shaw, pres.; John Cortellini, v. p.; F. M. Yates, sec.-

treas., with W. H. Cornwall, Ed. Turner, W. R. Fantz, and H. O. Halléck, directors.

Inc. 1917, in Colorado. **Cap.** \$150,000; \$1 par.

Property: 21 claims patented, about 180 acres, in Tourtelotte Park, 2 miles south of Aspen, Pitkin county, partly owned and partly held under lease. Although the properties were worked for many years but little mining has been done in this particular section for nearly 25 years. The Camp Bird, Iowa Chief, Edison, and Best Friend claims, on which the company has leases, are reported to have produced \$645,000.

Workings are on fault-contact and recent workings are in brown limestone lying E. of porphyry and W. of the dolomite-blue limestone contact.

Development: by the main or Park tunnel, 3,000' long, and the Jenny Lind tunnel, 2,000' long and 200' above the former. The heading of the Park is in the Celeste claim, and is at a vertical depth of 700'. The Jenny Lind ore-body is 10' wide, with a 4 to 10' streak assaying 90 to 150 oz. silver per ton. Prospects are considered bright.

PASSIFLORA MINING & MILLING CO. COLORADO

Address: Westcliffe, Custer county, Colo.

Property: in White Hills district, produces iron-copper-lead sulphide, and is developed by 330' shaft.

Six sets of lessees are at work, and company reports shipments of about 100 tons per week during part of the year.

PATTERSON-BRADLEY LEASING CO. COLORADO

Address: H. MacDonald, mgr., c/o State Bank, Cripple Creek, Colo.

Property: a lease on part of the South Burns gold mine of the Acacia Gold Mng. Co., at Cripple Creek, Colo.

PAYMASTER MINES CO. COLORADO

Office: 417 Cooper Bldg., Denver, Colo. **Mine address:** J. B. Fowler, Ouray, Colo.

Property: a lease on the Paymaster silver-lead mine near Ouray, Ouray county. Development is by tunnel and shaft. A good ore shoot was opened in 1920.

PAY ROCK SILVER MINES CO. COLORADO

Address: Silver Plume, Clear Creek county, Colo. E. L. N. Foster, mgr.

Mine idle since 1892; was discovered 1872 and is reported to have produced \$2,000,000 worth of silver-lead and zinc ore.

Development: by a series of tunnels, connected by a 700' winze.

Present company working since Sept., 1917, principally cleaning and retrimbering the old workings. A small production reported in 1918-19.

PEARL CONSOLIDATED MINING CO. COLORADO

Mine is operated by the Kokomo M. Co., which see.

PEERLESS CONSOLIDATED COPPER CO. COLORADO

Offices: 804 Symes Bldg., Denver, Colo.

Officers: W. B. Thomas, pres.; Chas. McFadden, v. p.; F. B. Tiffany, sec.-treas.

Inc. 1917, in Colorado. **Cap.** \$50,000; 1c par.

Property: the Peerless copper mine, 60 acres and tunnel-site, totaling 205 acres, in Spruce Creek district, near Hillside, Custer county.

Development: by 2,800' tunnel; deepest workings are 1,000'.

Equipment: includes compressor, blacksmith shop, etc. Company has expended over \$40,000 on development work.

PEERLESS MINING & MILLING CO. COLORADO

Address: Salida, Chaffee county, Colo. H. F. Schnelker, pres.-gen.-mgr.; I. W. Haight, sec.-treas., at last accounts.

Inc. Nov., 1904, in Colorado. **Cap.** \$500,000; \$1 par.

Property: the North Pole group, 6 claims, 70 acres, with 10 acres timbered, on Cyclone mountain, in the Monarch district, 16 miles west of Salida,

showing several fissure veins in granite. Veins have auriferous and argenti-ferous lead and copper sulphides, with lead predominating.

Development: by 1,600' crosscut tunnel and a 65' shaft sunk on the vein. Presumably idle.

PELICAN MINING & MILLING CORPORATION COLORADO

Presumably defunct. See Vol. XIV.

PEMBROKE MINING & MILLING CO. COLORADO

Last address: C. G. Seamans, sec.-treas., 34 Seneca St., Hornell, New York. Mail returned marked "moved, left no address."

Inc. in Colorado. Shares are \$1 par; 100,000 were offered at 20 cents each in 1920.

Property: the Gold King group of 4 lode claims and 1 placer claim, 72 acres of "choice mineral land" on the N. W. slope of Lincoln mountain, Grand Island district, Boulder county, on the main line of the C. & W. R. R. Ore carries gold, silver, lead and copper. Examined by T. H. Kane and E. C. Lindeman of Denver.

Development: by 300' tunnel and 134' double-compartment shaft.

Equipment: includes steam power, hoist, compressor, shops, etc. Was presumably a "stock jobbing" proposition.

PENNSYLVANIA MNG., POWER & REDUCTION CO. COLORADO

G. L. Levi, Philadelphia, Pa., v. p.-sec.; Leopold Sternberger, mgr., Lyndhurst Apts. D., 16th & Green Sts., Philadelphia, Pa.

Inc. 1910 in Colorado. Cap. \$2,500,000; 600,000 shares in the treasury. Is a close corporation, owned by Leopold Sternberger and Estate of Samuel Sternberger. Owns entire stock issue of the Fall River Hydro Electric Power Co.; also the Lotus group of mines and property formerly held by Lucania Tunnels & Mines Co.

Property: lies between Fall river and Central City, Clear Creek and Gilpin counties and includes the Pennsylvania group, 374 patented claims, including several mill sites and placers, covering about 2,500 acres. Shows fissure veins with complex lead-zinc-copper ore, containing silver and gold, also uranium, molybdenum and tungsten.

Development: by shafts and adits, about 8 miles in all; including the 6,400' Lucania tunnel.

Equipment: includes steam and water-power plants, air compressors. Several of the mines have been good producers in the past.

PENNSYLVANIA MOLYBDENUM MINES CO. COLORADO

Address: Pitkin, Colo.

Officers: M. Dembinski, pres.; G. A. Farmer, v. p.; J. A. Sloan, sec.; S. G. Fetherman, mgr.

Inc. 1916, in Colorado. Cap. \$100,000; 10c. par; all outstanding.

Property: 14 claims 150 acres, including the Bon Ton mine in Quartz Creek district, near Gold Hill, 9 miles N. of Pitkin, Gunnison county. Ground shows fissure vein 5 to 6' wide, producing gold, silver, copper, and molybdenum, assaying \$25 molybdenum and \$5 gold, silver, and copper per ton.

Development: by 1,500' tunnel, and total of 2,800' of workings.

Equipment: compressor, 50-ton concentrator, and steam power. Company started operations in March, 1919, and has since opened some high-grade gold-silver ore. Shipments were made during that year.

PERIGO MINES COLORADO

See Volume XIV.

PERSHING GROUP COLORADO

Address: John McKenzie, Villa Grove, Colo.

Property: a zinc mine at Villa Grove, Saguache county.

PERSISTENT M.L.G., LEASING & MNG. CO. COLORADO

Address: 1331 Lawrence St., Denver, Colo.

Property: the Morgan mine at Montezuma, Summit county. Ore carries gold, silver and lead.

Operated and produced during 1919 and 1920.

PHARMACIST GOLD MINING CO.**COLORADO**

Address: L. G. Carlton, Cripple Creek, Colo. Property leased for 5 years from October, 1920, to the **Le Brun Leasing Syndicate**, which see.

Officers: L. G. Carlton, pres.; Thos. J. Ward, v. p.; V. H. Mann, sec-treas.

Inc. Jan. 3, 1912, in Wyoming. **Cap.** \$15,000; shares 1c par. In treasury Jan. 1, 1917, 55,000 shares and \$437 cash. Stock listed on Colorado Springs Exchange. Exchange Registry & Guarantee Co., Colorado Springs, Colo., transfer office. Paid dividends to Feb., 1910, \$7,500; none since.

Property: 10 patented claims on Bull Hill, Cripple Creek district, Teller county, is one of the oldest mines of the district.

PHILADELPHIA MINES CO.**COLORADO**

Letters returned in 1920 marked "Defunct". See Volume XIV for description of company and holdings.

PHILADELPHIA MINES LEASING CO.**COLORADO**

Operated the property of the Philadelphia Mines Co., now defunct.

PILGRIM GOLD, SILVER & COPPER M. & M. CO.**COLORADO**

Address: O. L. Gage, mgr.

Cap. \$350,000, par \$1. Listed on Boston Curb. Old South Trust Co., Boston, registrar.

Reported to have bought the Two Forty group, in Russell district, near Central City, Gilpin county.

Development: by 1,000' tunnel and 320' shaft.

Equipment: includes a 10-stamp mill with flotation unit. A compressor was to be added.

PILOT MINE**COLORADO**

Address: Robb, O'Brien & Thomson, lessees, Kokomo, Coló.

Property: a silver mine at Kokomo, Summit county..

PINE MARTIN MINING CO.**COLORADO**

Office: 948 Gas and Electric Bldg., Denver, Colo.

Officers: A. C. McCall, pres.-supt.; B. F. Bachman, v.-p.; Wm. G. Krape, sec.-treas.-mgr. with John Eversen, directors

Inc. March 27, 1915, in South Dakota. **Cap.** \$250,000; 10c par; 2,223,325 shares issued. Annual meeting, first Wednesday in March. From Dec. 1, 1917, to Nov. 1, 1918, receipts were \$1,953; expenses, \$1,823.

Property: 10 patented claims, about 50 acres, held under bond and lease, at Red Cliff, Eagle county, said to show a blanket quartz vein in porphyry-granite formation, carrying gold and silver. The orebody strikes N. and is almost flat.

Development: by 8,000' of old workings, mainly tunnels. Management estimated 300,000 tons of ore developed and on dumps. Company built 100-ton amalgamation-concentration and flotation mill in 1916; also a dam with 2,000' pipe-line supplying mill with its own power. Started operations August, 1917.

During 1918 company acquired the Ground Hog dump, reputed the largest and richest in the district, and this is now going to the mill.

PINGREY MINES & ORE REDUCTION CO.**COLORADO**

Address: 322 Century Bldg., Denver, Colo.

Property: 3 separate groups of claims, including the Rare Metal on Bartlett mountain, near Climax, Lake county. Three prospect tunnels develop molybdenite ore averaging 1% MoO₃, which experiments show will make 1 ton of 95% concentrate from 100 tons of ore.

Company was to put up a 500-ton mill near Climax, but its erection is said to have been held up by litigation.

Operated part of 1919, but shipped no ore.

PIONEER CONSOLIDATED MINES CO.**COLORADO**

Address: Georgetown, Colo.

Property: the Waldorf gold-silver-lead-copper mine, near Georgetown, Clear Creek county.

Operated part of 1919 and shipped ore.

PIONEER MNG., MILLING, POWER & TUNNEL CO. COLORADO

Presumably defunct. See Volume XIV. for description of company and its holdings.

POCAHONTAS-HUMBOLDT MINES CO. COLORADO

H. M. Williamson, mgr., Rosita, Colo.

Property: in Rosita district, Custer county, developed by 480' shaft. Is an old-time producer being reopened in 1921.

POLONIA LEASING CO. COLORADO

Address: Rosita, Colorado.

Property: the Polonia silver mine at Rosita, Custer county. Operated part of 1919 and 1920, but shipped no ore.

PONSARDIN MINE COLORADO

Address: W E. Bowden, mgr., Leadville, Colo.

Property on Yankee Hill near Leadville, Lake county. Ore contains zinc, lead and silver.

Surface equipment was burned in Aug., 1920, but was to be rebuilt and shipments started.

PONY EXPRESS MINING CO. COLORADO

Address: Ouray, Colo.

Property: Pony Express mine, Ouray, Ouray county. Ore contains gold, silver and lead. Company also operates the Gold Crown flotation mill, at Ouray.

POORMAN MINE COLORADO

Address: Wm. Laffea, Star Route, Boulder, Colo.

Property: a gold-silver mine at Boulder, operated during part of 1920.

POOR MAN MINING CO. COLORADO

Presumably idle since 1918. See Volume XIV for further information.

PORTLAND GOLD MINING CO. COLORADO

Office: 310 Mining Exchange Bldg., Colorado Springs, Colo. **Mine address:** Victor, Colo.

Officers: Irving Howbert, chairman; Frank G. Peck, pres.; Dr. D. H. Rice, v. p.; Thos. F. Burns, sec.-treas.- purch. agent, with Jos. W. Ady, directors. Geo. M. Taylor, gen. mgr.; Fred Jones, mine supt.; Thos. B. Crowe, mill supt. at Victor; Perry G. Harrison, cons. engr.

Inc. originally in 1894, in Iowa, but re-incorporated Dec., 1905, in Wyoming. **Cap.** \$3,000,000; \$1 par; all issued. Colorado Title & Trust Co., registrar. Stock transferred at company's office. Listed on Colorado Springs Exchange. Annual meeting, third Monday in February, at Cheyenne, Wyo.

(a) Net loss to surplus, \$171,132. (b) Net loss to surplus, \$442,094.

Dividends: 16% per year, paid quarterly, from Jan. 15, 1907, to and including January 15, 1909; April 15, 1909, 3%; July 15 and October 15, 1909; 2% each; 1910, 1911, 1912, 8% each; 1913, 10%; 1914, 12%; 1915, 12%; 1916, 14%; 1917, 12½%; 1918, 10%; 1919, 8%; 1920, 6½%. Total dividends to Dec. 31, 1920 were \$11,692,080. In December, dividends were discontinued until conditions improve.

Property: the Portland and Independence mines, 253 acres, in Cripple Creek district, Teller county, carrying gold ore in quartz veins. The Independence mine and mill, comprising 110 acres on Battle Mountain, were purchased from the Stratton-Independence, Ltd., a British corporation, in July, 1915, for \$325,000. The Independence mine has over 17 miles of workings and is credited with a gross production to July, 1915, of \$23,621,728. The Portland has over 64 miles of workings. For geology of the district, see U. S. G. S. Prof. Paper, No. 54; also Vindicator Cons. G. M. Co.

Development: the Portland mine has been continuously worked for 27 years. New work in 1920 was 4,880', compared with 5,990' in 1919.

Mine has 2 shafts, No. 2 shaft being 2,477' deep. The Roosevelt tunnel drains the mine, and a branch from the Roosevelt tunnel connects with Portland shaft No. 2. Company's share of cost of the Roosevelt tunnel and the lateral to its own shaft is \$144,591. In February, 1921, rich ore was opened on the 24th level of No. 2 shaft. The 2 pumps on No. 24 level are lifting 600 g. p. m. The new level opened 1921 is 150' below the 21st level and 2,283' below the surface. There is no diminution of values on 19; 20 or 21st levels, on the northerly 1,200' of the great vein system. The No. 2 vein at the tunnel-level has been opened for 1,200', all in ore.

Equipment: includes the Independence mill at Victor, Colo., which can treat 1,400 tons of ore daily. Since the mill was acquired in July, 1915, it has been completely remodeled and is now an up-to-date cyanide plant. Flotation was tried, but was discarded. High-grade ore is sent to the Golden Cycle mill.

Chilean-mill practice at the Portland mill was described by L. W. Lennox in Bull. 153, September, 1919, of the A. I. M. & M. E. The primary grinders consist of six 6' Chilean mills, taking as feed the product from two 20 by 72" Garfield type rolls. Secondary grinding on the classified sand from the mills is done by six 6 by 6' ball mills. These discharge to Akins classifiers, which return the sand in closed circuit. The mills were put in

as the result of 8 years' experience on Cripple Creek ores at the Victor plant. Fine grinding costs for 1918 were 30.82 cents per ton, for 441,435 tons treated.

Production: years ending Dec. 31:

Year	Tons	Gold	Year	Tons	Gold
1920.....	31,425	\$ 867,381	1915.....	72,192	\$1,710,277
1919.....	45,416	1,173,615	1914.....	62,997	1,467,005
1918.....	53,887	1,120,851	1913.....	53,245	1,380,713
1917.....	86,668	1,768,971	1912.....	44,562	987,416
1916.....	96,045	2,236,842			

The total to end of 1919 was \$50,592,638 from 4,322,441 tons of ore from the Portland mine only.

Management estimates from 12 to 15 million tons of low-grade ore in the mines and on dumps.

Company has a co-operative insurance fund and maintains a hospital at Victor, jointly with the Vindicator company, for the benefit of the employees. The management is excellent, and the outlook is still promising for many years of profitable operations.

POTOSI-CARIBOU MINING CO. COLORADO

Address: J. G. Clark, mgr., Boulder, Colo.

Officers: J. A. F. Durocher-Stone, pres.; Wm. Kline, v. p.; J. E. Riva, treas.; R. J. Faulkingham, sec., with J. G. Clark and R. S. McKiernaw, directors.

Inc. 1921, in Colorado. Cap. \$500,000.

Property: a group of claims, including the Potosi, Idaho, Silver Point, Virginia and Maine, in Grand Island (Caribou) district, Boulder county. Ore contains gold and silver. The Potosi mine was operated by lessees part of 1920. The group as a whole now being developed.

POWERS LEASING CO. COLORADO

Address: Silver Plume, Clear Creek Co., Colo.

Property: Everett gold-silver-lead mine, operated during part of 1920.

POWERS MINING, MILLING & LEASING CO. COLORADO

Address: Robert Wilkinson, mgr., Central City, Colo.

Property: company has a lease on the Powers mine in Russell district, Gilpin county, said to contain copper-gold-silver bearing ore.

Operated part of 1919, but shipped no ore.

POZO GILPIN MINING CO. COLORADO

Probably defunct. See Vol. XIV.

PRECIOUS METALS CORPORATION COLORADO

Idle since November, 1914. See Volume XIV for organization, history and property of company.

PRICE MINE COLORADO

Address: Detwiler Bros., Breckenridge, Colo.

Property: a gold-silver-lead mine at Breckenridge, Summit county. Operated during part of 1920.

PRIDE OF ASPEN MINE COLORADO

Address: F. M. Yates, Aspen, Colo.

Property: a silver-lead mine at Aspen, Pitkin county. Operated during part of 1920.

PRIDE OF CRIPPLE CREEK MINING CO. COLORADO

Address: W. H. Trask, gen. mgr., Denver, Colo.

Company has leased its Pride of Cripple Creek mine, on Ironclad hill, Cripple Creek district, Teller county, to Edwin Gaylord. Mine is near the Jerry Johnson, Forest Queen and W. H. P. mines.

PRIDE OF THE WEST MINING CO. COLORADO

Address: A. W. Harrison, mgr., Silverton, San Juan county, Colo.

Property: the Pride of the West and Green Mountain mines, in Cun-

ingham gulch, 6 miles from Silverton. **Development:** by a 1,500' tunnel. At 600' a raise was driven to the surface and is said to have cut rich ore. In July, 1920, a contract was let for 800' of new work.

Equipment: includes an old mill, remodeled to include flotation.

PRIMOS CHEMICAL CO. COLORADO

Address: 1429 Walnut St., Philadelphia, Pa.

Fully described in Volume XIV. Assets including mining property sold to Vanadium Corporation of America in 1920, but company maintains its corporate identity. See **Primos Co.**

Officers: Gideon Boericke, pres.; Harold Boericke, sec.; John Boericke, treas.

Established 1888.

PRIMOS COMPANY, THE COLORADO

Address: 1421 Walnut St., Philadelphia, Pa.

The Primos Company is successor to the Primos Exploration Co. and is the parent company to the Primos Chemical Co. The Philadelphia Exploration Co. is also a subsidiary of the Primos Co. and was until recently doing exploration work in Plumas county, Calif. Reported Jan. 1921, that the Primos Co. and its subsidiaries, are not engaged in active mining operations.

PRIZE MINING CO. COLORADO

Address: O. Barlow Willmarth, gen. mgr., Montrose, Colo.

Officers: W. H. Gibson, pres. M. J. Katz, sec.; A. S. Schafer, treas.; with De Witt C. Cohen, H. F. Dawes, Fred Rothchild, Edward Schafer and Henry Sidenberg, directors.

Inc. in New Jersey. Cap. \$250,000; \$1 par; all issued. Annual meeting, April 25th, at Jersey City.

Property: 9 claims, 6 patented, 15 acres in Gilpin county. Claims show a 4' N. E.-S. W. fissure vein in granite. Ore is a sulphide containing gold and silver. Examined by E. E. Chase.

Development: by 1,500' shaft with 6,000' of workings.

Equipment: 37-h. p. electric hoist. No operating figures available.

PRINCETON MINING & REDUCTION CO. COLORADO

Address: c/o P. D. McNay, Silver City, Iowa.

Property: Alice silver-lead mine at Whitepine, Gunnison county. Operated during part of 1920.

PROGRESS MINING & MILLING CO. COLORADO

Idle several years. Fully described in Volume XIV. Formerly held property at Guyot Hill, Leadville, leased to **Katinka Gold Mining Co.**

PROSPECT MOUNTAIN M. & EX. CO. COLORADO

Fully described in Volume XIV. Property acquired in 1920 by the **Leadville Mine Development Co.**, which see.

PRUSSIAN MINE COLORADO

Address: S. A. Tarbet & Co., lessees, Rowena, Boulder Co., Colo.

Property: a gold-silver-lead-zinc group, equipped with 50-ton mill and flotation unit.

PUEBLO LEAD SMELTER COLORADO

Is owned by the American Smelting & Refining Co.

Office: 120 Broadway, New York. **Operating address:** F. C. Gilbert, mgr., Denver, Colo. **Works address:** F. G. Hill, supt., Pueblo, Colo.

Has an annual capacity of 380,000 tons. See **Blende Smelter.**

PULASKI MINING CO. COLORADO

Address: Alma, Colorado.

Property: Brownlow group in Mosquito gulch, adjoining the Black Hawk, at Alma, Park county.

Development: by 1,400' tunnel (July, 1921) said to cut several veins, 4-24' wide, containing gold, silver, lead, zinc and copper.

Equipment: installing a 50-ton mill.

- PUMPKIN MINE** **COLORADO**
Address: Rupert Nelson, Lawson, Colo.
Property: a silver-lead mine at Lawson, Clear Creek county. Operated during part of 1920.
- PURSEY CHESTER MINES CO.** **COLORADO**
Address: 2540 Market St., Denver, Colo.
Property: Pursey Chester and Poorman groups, at Redcliff, Eagle county. Ore contains gold, silver, copper.
- PUZZLE LEASING CO.** **COLORADO**
Probably dead. See Volume XIV.
- PYRAMID MINING CO.** **COLORADO**
Address: Silverton, Colo.
Property: the Pyramid gold-silver mine at Silverton, San Juan county. Operated part of 1919, but shipped no ore. Idle in 1920-21.
- QUANDRY MINES CO.** **COLORADO**
Address: 613 Kittredge Bldg., Denver, Colo.
Property: the Woodrow Wilson silver mine near Breckenridge, Summit county.
Operated and produced, during part of 1919 and 1920.
- QUARTZ HILL CONSOLIDATED MINES, INC.** **COLORADO**
Address: Idaho Springs, Clear Creek Co., Colo.
Property: Kansas Ophir mine at Central City, Gilpin county. Worked for gold, silver and copper during part of 1920.
- QUEEN GOLD MINING CO.** **COLORADO**
Address: John Tait Milliken, pres.-gen. mgr., Colorado Springs, Colo. Controlled by I. T. Milliken Estate, Natl. Bank of Commerce, St. Louis, Mo.
Property: 90 patented acres on Butte mountain and Raven hill, including Eclipse mine, between the Elkton and Cresson mines, at Cripple Creek, Teller county, formerly owned by El Oro Mng. & Dev. Co., and purchased by present company in 1915. Mine is said to show 2 parallel veins, carrying \$15 gold ore.
Development: by 1,000' shaft, with levels every 100'. Equipped with machine drills, hoist, pumps and electric power. Shipped 2 cars of milling ore daily during part of 1916. Idle several years.
- QUEEN MINING CO.** **COLORADO**
Address: Ohio City, Colo.
Property: the Queen gold-silver mine at Ohio City, Gunnison county. Operated and produced during 1919. Idle in 1920-21.
- QUEEN MINING & MILLING CO.** **COLORADO**
Address: Alma, Colo.
Property: Mav Queen gold-silver mine at Alma, Park county. Operated during part of 1920, but shipped no ore.
- QUERIDA GOLD MINES CO.** **COLORADO**
Address: H. S. Thayer, mgr., 310 Exchange National Bank Bldg., Colorado Springs, Colo. **Mine address:** G. H. Scibird, supt., Silver Cliff, Colo.
Officers: H. S. Thayer, pres.-treas.; W. L. Strachan, v. p.; B. A. Parsons, sec.; with E. W. Scowden, directors.
Inc. 1918, in Colo. **Cap.** \$2,500,000; \$5 par; \$1,029,000 outstanding. Expended \$76,075 in development and construction during 1920.
Property: 12 claims, 8 patented, 70 acres, includes the Bassick and Maine No. 2 gold-silver mines, at Querida near Silver Cliff, Custer county, held under 20-year lease from the Bassick M. & R. Co. The Bassick was worked continuously 1877 to 1914. Ore occurs as sulphide in a volcanic throat in andesitic agglomerate; that developed 1921 said to average \$13.51 per ton.
Development: by 1,850' shaft and about 8,000' of workings. Ore deposit an unique one described in many text books on mining geology.
Equipment: includes 500-cu. ft. compressor, steam hoist, 100-ton concentrator with one 12-cell M. S. flotation unit. The mine is credited with

total production under former ownership of 3,500,000 tons. Reserves estimated 1921, to be 350,000 tons of \$11.60 ore. Company plans completing mine equipment and development of larger ore reserves.

QUINTET MINING CO.**COLORADO**

Described in Volume XIV. Property now owned by **Wabash Mines & Power Co.**, which see.

RADIANT MINING & REDUCTION CO.**COLORADO**

Address: H. M. Kingsley, Silverton, Colo.

Officers: H. M. Kingsley, pres.; A. B. McClave, treas.; O. L. Keen, sec.

Property: a lease on the 27-claim group of the Ruby Mining Co., located at Red Mountain in a northern part of San Juan county, comprising 450 acres. Mine reported to have considerable high-grade silver ore. Some ore was being developed and shipped in September, 1919, but no definite information procurable concerning production.

Equipment: includes a 50-ton mill.

RADIUM COMPANY OF AMERICA**COLORADO**

Property: at Tidwell, 15 miles from Green river in Paradox Valley district, Montrose county, comprises a number of claims covering carnotite-bearing sandstone cut by quartz stringers. Carload shipments carried 2.24% uranium oxide and 3.87% vanadic acid. Described in U. S. Geol. Survey Bull. 530-K, p. 163.

RADIUM COMPANY OF COLORADO, THE**COLORADO**

Company is subsidiary of the **Metals Exploration Co.**

Main office: 1429—18th St., Denver Colo. Branch offices: 50 Union Square, New York; 108 North State St., Chicago; London; Paris. Works address: Denver, Colo. Mine addresses: Naturita and Grand Junction, Colo. Mines at Roc Creek, Long Park, Hydraulic and Gateway, Colo.

Officers: Bulkeley Wells, pres.-managing director; Warren F. Bleecker, v. p.; W. A. Schlesinger, v. p.; J. W. Thorne, sec.-treas.; C. A. Broughton, asst. sec.-treas.

Directors: H. Carey Morgan, Victor C. Thorne, Bulkeley Wells, K. L. Kithil, W. A. Schlesinger, W. V. Hodges, Fred G. Farish and Crawford Hill.

The Radium Company of Colorado is a merger, made in 1921 of the **Carnotite Products Co.**, and the **Radium Company of Colorado, Inc.** The Radium Co. of Colorado, Inc., was originally incorporated 1915, as the Schlesinger Radium Co. The Carnotite Products Co. was the successor of the **Tungsten Products Co.**

Inc. 1921 in Colorado. Cap. \$1,200,000 pfd. stock and 20,000 shares common stock of no par value.

Properties: 80 mining claims, in part in Paradox district, in part in Roc Creek district, Montrose county; also Gateway district, Mesa county. Contains sandstone blanket formations in horizontal beds, the ore being disseminated in pockets and layers in the sandstone. An exception to this general rule are the Roc Creek claims where the ore occurs in a fissure-like formation. The ore mined is carnotite carrying from 2% to 5% uranium oxide, from 1% to 9% vanadium oxide and from 2 to 10 milligrams of radium per ton of ore.

Development: is shallow, as ores lie close to surface; it comprises surface cuts, under-ground stopes, tunnels, shafts and inclines. In late years new methods for prospecting slightly deeper ores have been used. The jackhammer is used in prospecting to a depth of 40 feet and diamond drilling is used where the depth is 60 to 80 feet. This exploratory drilling has proven up new orebodies at unsuspected places.

Company is also opening and exploring valuable deposits near Tyrone, New Mexico.

Equipment: grinding and sampling works and chemical reduction plant at Denver. Five buildings are used to house the chemical plant. During 1920, new laboratories were equipped in up-to-date fashion and all labor-

atories and offices at Denver are housed in a three-story building in the down-town district.

Production: 1,000 to 1,200 tons of carnotite ore per year, averaging \$200 to \$500 per ton in 1919. Modern methods have made it possible to obtain over 90% recovery of the metals contained at a cost of approximately \$80 per milligram radium element. Both uranium and radium are recovered as a by-product and are sold as sodium uranate and uranium oxide, also, iron vanadate containing 40% V_2O_5 .

The Gold Light Manufacturing Company which makes luminous materials is a subsidiary of the company.

Company employs 300 men and pay roll is over \$60,000 monthly.

RADIUM LUMINOUS MATERIAL CO. COLORADO

Address: Naturita, Colo.

Property: the Long Park, Yellow Bird, Cripple Creek and other carnotite claims in Paradox valley, Montrose county. Mine was operated part of 1919.

RADIUM ORE SAMPLING CO. COLORADO

Address: O. Barlow Willmarth, gen.-mgr., Montrose, Montrose county, Colorado.

Company owns custom sampler completed in winter of 1918 and costing \$15,000, to sample all kinds of rare ores, such as vanadium, tungsten, etc., and concentrates. Company does not assay, purchase, or deal in ores. Up to January, 1921, the plant had handled 120 cars of radium-bearing ore.

RAINBOW MINE COLORADO

Address: Edwards & Butler, Alma, Colo.

Property: a gold-silver mine at Alma, Park county. Operated during part of 1920.

RAMONA MILLS CO. COLORADO

Address: A. D. Aitken, Colorado Springs, Colo.

Directors: W. C. Robinson, A. D. Aitken, C. H. Dudley, C. C. Hamlin and F. A. Mangold.

Inc. 1921, in Colo. Cap. \$100,000.

Property: Ramona mine on Bull hill, Cripple Creek district. Teller county. Operated by lessees.

RANDOLPH GOLD MINING, MILLING & TUNNEL CO. COLO.

Office: 214 Boston Bldg., Denver, Colo.

Officers: W. A. Snyder, pres.; T. P. Fahev, v. p.; J. H. Goodknight, sec.; W. C. Danks, treas.

Inc.: 1918, in Colorado. **Cap. \$1,000,000;** shares \$1 par; 525,000 outstanding. Bonds authorized, \$100,000; \$70,000 issued.

Property: the Gold dirt mines on Cavode mountain, Empire, Clear Creek county, consisting of 45 patented lode claims and 3 placers, 430 acres in all. Mine formerly owned by the Empire Tunnel Co., had been shut down for years because of litigation. Property bought in at trustee's sale. Ore contains gold, silver and copper.

Development: by two tunnels 2,700' and 4,000' long, greatest depth 600'. Past production of mine is said to be \$1,000,000. Present owners claim 1,730,000 tons blocked out that will average \$6.35 per ton. The Empire company received royalties from lessees amounting to \$7,690, \$22,270 and \$30,000, respectively, in the last three years of operation.

Recent work (1920-'21), in the Empress tunnel has been preparatory to operation on a large scale. A mill with concentration, flotation and amalgamation units is planned.

Equipment: includes compressor, transformer, and concentrating mill.

RARA AVIS MINING ASSOCIATION COLORADO

Address: 814 Central Savings Bank Bldg., Denver, Colo.

Property: a lease on the Rara Avis Silver-lead mine in Eureka gulch, near Central City, Gilpin county.

Development: by 550' shaft and 600' tunnel. An old producer, reopened in 1920.

RARE METALS ORE CO.**COLORADO****Office:** 603 Symes Bldg., Denver, Colo.**Officers:** G. S. Wood, pres.; Nelson Franklin, v. p.-mgr.; Geo. A. Stahl, sec.; A. F. Zang, treas.; S. B. Tyler, supt.**Inc. March, 1916, in Colorado. Cap. \$100,000; \$1 par.**

Owens a 75-ton custom tungsten mill at Rollinsville, Gilpin county, on the D. & S. L. R. R., 4 miles from Nederland, equipped with crusher, rolls, ball mills, jigs, Wilfley and Deister tables, classifiers, and Callow tanks. The concentrates produced averaged 60% tungstic acid. Shut down since 1919, owing to condition of tungsten market.

RAVEN & BEACON HILL GOLD MINING CO.**COLORADO****Office:** 309 Exchange Bank Bldg., Colorado Springs.**Officers:** W. W. Price, pres.; John T. Hawkins, v. p.; W. B. Price, sec. **Cap. \$170,000; shares 10¢; in treasury Jan. 1, 1917, 328,000 shares stock and \$4,500 in cash. Listed on the Colorado Springs Exchange.**

Property: 17 acres of the Arequa townsite and 7 acres of the Cameron townsite, at Cripple Creek, Teller county, crosscut by the Roosevelt tunnel. Developed by 554' shaft. The mine has been blocked out for leasing; the Elkton Cons. M. & M. Co. operates Blocks 1 and 2 from the Roosevelt level of the Elkton shaft.

Gross production to date, \$85,691; none in recent years.

RAWLEY MINING CO.**COLORADO**

The charter of the Rawley Mining Co. expired by limitation in 1921. The bond issue of \$500,000 on the property is in process of foreclosure and the mine is passing into the hands of a new group, represented by Lewis Sanders, 480 Lexington Avenue, New York City. This group is not yet ready to announce its final plans.

Mine address: Bonanza, Saguache Co., Colo.**Inc. 1901, in Colo. Cap. \$2,500,000; \$1 par; 1,903,679 shares outstanding; 28,487 shares sold for \$155 the lot at public auction in New York on Dec. 31, 1920. Annual meeting, third Monday in January.**

Property: 64 claims, 400 acres, show fissure veins in andesite, running N.-S., nearly vertical and about 6½' in width. Veins carry argentiferous galena, bornite, and chalcopyrite, in a heavy sulphide smelting ore.

Development: mine is 1,200' deep, with 10 levels and a total of 15,600' of workings. Reserves estimated at 90,000 tons, that will assay 8.89 oz. silver per ton; 2.36% copper, 8.92% lead, 80¢ gold; and 190,000 tons additional on same ore-shoot. Ore from all levels is handled downward through a 3-compartment shaft to a crosscut tunnel 6,235' long, and connecting with 1,200' level.

Equipment: includes 20-mile power line, 2,100 cu. ft. compressor, 3-ton locomotives. The Salida smelter is owned by the same interests.

RAYMOND CONSOLIDATED MINES CO.**COLORADO****Address:** Dexter T. Sapp, pres., Gunnison, Colo.

Property: about 600 acres, includes the Raymond mine in Gold Creek district, about 5 miles N. of Ohio City, Gunnison county, said to have 2 ore-bearing veins.

Development: by 2700' tunnel and drifts.

Equipment: includes compressor, steam plant, and concentrating mill. Has been idle for years.

READY CASH MINING & MILLING CO.**COLORADO**

Company operated a mill at Robinson, Lake county, in 1918-19. In addition to handling its own ores, company purchased zinc-lead-iron ore suited to its system of concentration.

RED BIRD MINE**COLORADO****Address:** John R. Sapp, Almont, Colo.

Property: a gold-silver mine at Almont, Gunnison county. Operated during part of 1920, but no shipments reported.

RED CLIFF MINING & MILLING CO.**COLORADO****Address:** J. Ham Lewis, mgr., Redcliff, Colo.

Property: 7 lode claims, 2 miles from Redcliff, Eagle county. Ore carries gold and silver. Examined by Forbes Rickard in 1911, who gave a conservative report.

Development: by 3 miles of tunnels and drifts.

Equipment: during 1920 a complete surface plant was purchased and a 100-ton mill was to be ready early in 1921. The "Eng. & Mng. Jour." of Oct. 30, 1920 considers the exaggerated statements issued by the management for stock selling purposes, "a particularly vicious example of questionable promotion practices".

REDICK MINING CO., O. C.

COLORADO

Office: 250 Omaha National Bank, Omaha, Nebraska.

Property: the Bryan mine at Blackhawk, Gilpin county. Ore carries gold, silver, and lead.

Operated and produced during 1919 and 1920.

RED ION MINE

COLORADO

Address: Dissman & Morrell, lessees, Alma, Colo.

Property: a silver mine at Alma, Park county, operated during part of 1920.

RED MOUNTAIN MINES CO.

COLORADO

Address: George E. Collins, mgr., 307 Boston Bldg., Denver, Colo.

Officers: Bulkeley Wells, pres.; Geo. E. Collins, v. p.; Harry W. Robinson, sec.

Property: includes the Yankee Girl, Genesee-Vanderbilt, Robinson and Joker tunnel properties at Red mountain, near Ironton, Ouray county.

Development: by the main or Joker adit, 4,950' long and the 4,500' Genesee Vanderbilt adit. The shafts are Genesee, surface to adit, 450'; Vanderbilt, below adit, 600'; Yankee Girl, from surface, 1,050'; Robinson, from surface, 700'. Equipped with small testing mill.

Properties had been idle many years, but are said to have produced copper, lead, silver, and other metals, of a total value of \$12,000,000.

Small shipments being made.

RED MOUNTAIN SILVER MINES CO.

COLORADO

Address: J. L. Cusick, mgr., Silverton, Colo.

Property: at Silverton, San Juan county.

RED STONE GOLD MINING CO.

COLORADO

Address: M. Justus, sec., Physician Bldg., Ft. Collins, Colorado.

Inc. March, 1909, in Colorado. Cap. \$300,000; \$1 par; 217,653 outstanding. Annual meeting held on March 1st.

Property: 4 claims and a lease on another claim, 100 acres altogether, 10 miles S. W. of Ft. Collins and ½ mile from Masonville, Larimer county. Claims carry a quartz vein in granitic schist, the vein running N. E. and dipping 85° and containing gold, silver, and copper ore.

Development: by 240' of workings including 40' shaft and 200' tunnel.

Presumably idle for several years.

REGINA MINE

COLORADO

A gold-silver mine at Empire, Clear Creek county. Operated during part of 1920 by F. E. Bender, San Diego, Calif.

REPUBLICAN MINES CO., THE

COLORADO

Address: Carl J. Sigfrid, Ouray, Ouray county, Colo.

Address: I. A. West, sec.-treas., 514 Equitable Bldg., Denver, Colo. G. W. Teagarden, mgr.

Property: in Griffith district, near Georgetown, Clear Creek county. Ore occurs in fissure veins, said to contain high grade silver values.

Development: by 350' main crosscut tunnel and drifts.

REQUA-SAVAGE MINES CO.

COLORADO

Formerly the Requa-Savage Gold Mining Co.

Address: A. Schumacher, sec., c/o. Keystone Market, Colorado Springs, Colo.

Idle. Fully described in Volume XIV.

Stock listed on Colo. Springs Exchange. ½¢ bid, 1¢ asked, Jan., 1922.

RESERVE MINING CO.**COLORADO****Office:** 840 Gas & Electric Bldg., Denver, Col.**Property:** the Hoil gold-silver mine at Alma, Park county. Operated part of 1919; idle in 1920-21.**RESOLUTE MINING CO.****COLORADO****Address:** J. A. Houghton, pres., 54 De Menil Bldg., St. Louis, Mo.**Mine address:** Rico, Dolores county, Colo.**Property:** Telegraph, Newman and Expectation groups, near Rico. Idle several years.**REVA GOLD MINING CO.****COLORADO****Address:** 935 Foster Bldg., Denver; or G. R. Calhoun, supt., Cripple Creek, Colo.**Property:** operating under lease, the Rose Nicol mine of Rose Nicol Gold Mining Co., Battle mountain, Cripple Creek, Teller county.**Development:** by 1,200' shaft and several thousand feet of workings. Ore has been opened on No. 6 and 7 levels, at 800' and 1,000' below the surface, respectively, and on Roosevelt tunnel-level about 2,100' below the collar of shaft. In 1920, ore opened on No. 10 level yielded \$25 to \$71 per ton.**Equipment:** includes aerial tram extending from mine to Midland Ry. terminal. Ore is treated at the Golden Cycle mill at Colorado Springs.**REVENUE TUNNEL MINES CO.****COLORADO****Address:** Carl J. Sigfrid, Ouray, Ouray county, Colo.**Property:** controlled by the Reynolds Estate of Denver. Includes the Cumberland, Revenue-Virginus, and Wheel of Fortune mines. Extensive development work was done in 1918, and the Cumberland mine shipped silver-lead ore. The Revenue-Virginus is credited with a total production of \$26,000,000. The Wheel of Fortune mine, located in 1875, has been worked for varying periods and is to be operated with the Revenue.**REVILS MINING & INVESTMENT CO.****COLORADO**

Idle since 1918.

Address: Silver Cliff, Custer county, Colo.**Property:** the Hornsilver Consolidated mine just E. of Silver Cliff in the Hardscrabble district, operated under bond and lease. Ore carries silver and manganese.**REX GOLD MINING & MILLING CO.****COLORADO**Properties are leased to **Lincoln Mines & Reduction Co.**, which see.**Address:** Cripple Creek, Teller county, Colo.**REY SILVER MINES CO.****COLORADO**Idle in 1920-'21. **Address:** Fairplay, Park Co., Colo. Mine at Alma, Sacramento district, reported to have opened a 12 to 15' silver vein, assaying \$50 per ton in 1919. The ore is believed to be on the London contact, which underlies several properties in that section. There were 31 sets of lessees working on the London.**RICHMOND HILL MINING, MILLING & LEASING CO. COLO.****Address:** Aspen, Pitkin county, Colo.**Officers:** W. H. Cornwall, pres.; C. E. Doolittle, v. p.; F. M. Yates, sec.-treas., with Jos. Mellor and A. Johnson, directors.**Property:** company has a lease and option on the Little Annie silver-lead mine and mill at Aspen. Dump was said to contain 5,000 tons of payable ore, besides 4,000 tons of ore broken in the mine. Operated part of 1919 and shipped products to smelter. The mill was enlarged to 80 tons per day during 1920.**RICO ARGENTINE MINING CO.****COLORADO****Office:** Mackintosh Block, Salt Lake City, Utah. **Mine address:** J. M. Stempfel, supt., Rico, Dolores Co., Colo.**Officers:** F. W. Price, pres.; A. E. Rvkert, v. p.; J. H. Woodmansee, sec.-treas.; with S. A. King, J. E. McKnight, N. S. Nielson and J. E. Frick, directors.**Inc.** 1912, in Utah. **Cap.** \$100,000; 10¢ par; 963,136 issued; assessable; assessment No. 10 of 1c. per share levied March 26, 1921. Company is its

own transfer agent and registrar. Listed on Salt Lake Exchange.

Property: the Blackhawk and Argentine groups, 21 claims, 145 acres, mostly patented, adjoining the Rico-Wellington Mining Co. property.

Geology: alternating strata of limestone and sandstone, dipping at angle of about 30° and cut by almost vertical fissures of great extent and persistence. Where these fissures cross the soluble limestone they contain flat replacement deposits of sulphide ores, carrying copper, zinc, and lead, with gold and silver values. The ore shoots or bedded deposits are from 3-30' thick. These fissures and the limestone are identical both in character and occurrence with those which are producing in the Rico-Wellington property. In the apex suit with the Rico Consolidated, the Rico Argentine held that the Blackhawk fissure was the source of the enrichment of the beds that had been followed into the disputed ground, in other words, it was the master vein. Judge Searcy decided January, 1921, that the ore-beds were formed by E.-W. fissures rather than by the Blackhawk. This reverses the generally accepted local theory.

Development: by a new tunnel, 200' lower than former workings, that drained the main shoot through to a connection with upper workings. In 1918, it was reported that bismuth was appearing in some of the ore. A tunnel was driven 700' in the ground in dispute with the Rico Cons. and opened silver-lead-copper shipping ore.

Production: for 1917, \$100,000; the net smelter returns of which were \$88,837. Of this, \$47,576 was for ore shipped by company and \$41,261, shipped by lessees. On January 1, 1919, company operations were suspended until September, but lessees continued shipping at rate of 1,000 tons per month.

Late in 1918 the Rico Consolidated M. Co. brought suit against the Rico Argentine Co. and Marmatite Leasing Co. over apex rights for wrongful extraction of 15,000 tons of ore, worth \$900,000. In October, 1920, the plaintiff agreed to modify the amount, provided the ore had been mined in good faith. Judgment was rendered in Jan., 1921, against the Rico Argentine, which had to pay \$29,946, and the Marmatite, \$7,346. This represents 5,000 tons of \$740 ore, net value.

All operations suspended, pending final decision of appeal.

RICO CONSOLIDATED MINES CO.

COLORADO

Owned by Knight interests of Provo, Utah. Mine address: Rico, Dolores Co., Colo. Stock listed on Salt Lake City Exchange.

Property: adjoining the Rico Argentine on the N. E., is said to show a vein of copper-silver-lead ore 35' wide in the upper workings. For geology see the Rico Argentine.

Development: by tunnel over 300' long. Shipments have been made, but no figures are available.

Company brought suit in 1918 against the Marmatite Leasing and the Rico Argentine companies, alleging that they had trespassed on the Allegheny lode. Company claims that 15,000 tons of ore valued at \$60 per ton, amounting to \$900,000 had been shipped. This was modified in Oct., 1920, to \$37,000, provided that the ore had been extracted in good faith. In Jan., 1921, judgment was rendered in favor of the Rico Consolidated for \$37,000, the net value of 5,000 tons.

RICO MINING CO.

COLORADO

Reorganized as Syndicate Mining & Milling Co., which see.

RICO-WELLINGTON MINING CO.

COLORADO

Address: 11 Knight Block, Provo, Utah.

Officers: O. Raymond Knight, pres.; Chas. Read, v. p.; R. E. Allen, sec.-treas.; R. L. Anderberg, asst. sec.-treas.; H. R. Trenholm, gen. mgr. Directors: O. Raymond Knight, J. W. Knight, Chas. Read, K. S. Jordan, W. L. Mangum, R. E. Allen, H. R. Trenholm, Albert Lofquist, supt.

Inc. August, 1911, in Utah. Cap. \$1,000,000; \$1 par; assessable; 51% of stock owned by Knight Investment Co. Listed on Salt Lake Exchange.

Since the property was taken over by its present owners it has earned

over \$500,000, has invested \$50,000 in a mill and expended \$100,000 in development work. The debt of \$150,000 advanced for this equipment and work was paid off in 1916. Early in 1921, company owed the bank \$80,000, and an assessment of 10¢ a share was levied.

Dividends: on April 25, 1917, No. 1 of 1½¢ per share was paid, and a total of 8½¢. in that year; \$39,000 paid to date.

Property: the Wellington mine, at Rico, Dolores county, which contains ore-shoots formed by replacement and contact metamorphism in the limestone beds of the middle member of the Hermosa formation. In 1914 a flat deposit of zinc-lead ore was cut. It lies parallel to the Blackhawk fault. To the north the orebody is cut off by a cross fault parallel to the Nellie Bly fault, the orebody north of the fault being 170' below. Across the Blackhawk fault a copper deposit, replacing limestone and broken by several faults, has been opened, the ore carrying good values in copper and silver.

Development: by the Mountain Spring tunnel and about 22,000' of work, said to expose large amounts of lead-zinc and copper ore. Exploration is devoted to the Blackhawk and Iron veins, two great ore-bearing fissures, traversing the property N. W. and S. E. In these the ore makes in lime beds that look almost like coal deposits, and as many as 5 and 6 beds, one above the other, have been opened.

In 1921, ore as mined was 30' wide, 6' high and of unknown extent on its strike. Shipments averaged 18 oz. silver per ton, and 7% lead. The high grade ore mined in 1920 was faulted. The large body of pyrite ore is mined and sold as flux.

Equipment: includes a compressor and 2,500' tram to the Rio Grande railroad, handling 50 tons of ore per hour at a cost of 23¢ per ton. The 100-ton mill formerly belonging to the Pro Patria Co. and leased for 5 years, was remodeled at a cost of nearly \$30,000. A tube-mill, 5 Deister tables, 6 Callow tanks, 2 Callow screens and electrical equipment were installed in 1918.

Production: for 1917, 424 tons of copper ore, 1,826 tons of lead-zinc, 709 tons iron sulphide, and 1,687 tons lead-silver, all dry weights, net value, \$105,589. No work was reported for 1918, but company was operating in 1919 and 1920, shipping lead carbonate and pyrite.

RILLA MINING CO.

COLORADO

Mail returned unclaimed and company presumably out of business. Described in Volume XIV.

RITO SECO GOLD MINE

COLORADO

Fifty-one per cent. of stock owned by **Assets Realizing Mines Corp.** of California, which see.

Address: 811 Merchants National Bank Bldg., Los Angeles, Calif.

Property: about 800 acres, patented, near San Luis, in Costilla county.

Development: shafts, tunnels, crosscuts and drifts, claimed to have proved 5,900,000 tons of ore, which will be mined by steam shovel and treated in a flotation plant, to have a capacity of 1,250 tons daily.

Idle, owing to high costs.

RITTENHOUSE MINE

COLORADO

Address: P. O. Box 36, Colorado Springs, Colo. A gold mine in Cripple Creek district. Teller county operated during part of 1920.

RIVER SMELTING & REFINING CO.

COLORADO

Affiliated with National Lead Co.

Works address: H. H. Utlev, mgr. and ore purchaser, Florence, Colo.; Louis V. Emanuel, supt.

Office: 722 Chestnut St., St. Louis, Mo.

Officers: Edw. J. Cornish, pres.; J. A. Caselton, sec.-treas.

Organized about 1913 jointly by National Lead and Stone & Webster, of Boston.

Operates a custom zinc smelter for treatment of complex Colorado ores, carrying zinc, lead, silver, gold and copper. Ores are reduced in a reverberatory furnace after partial desulphurization. Its products are in

lead white (leaded zinc oxide) and copper matte, containing silver, gold and some lead. An electrolytic plant at Keokuk, Iowa, has been abandoned and dismantled.

RIVER VIEW LEASING CO.**COLORADO**

Address: Creede, Mineral Co., Colo.

Property: River View silver mine at Creede, operated during part of 1920.

ROANOKE MINING & MILLING CO.**COLORADO**

Office: 221 Foster Bldg., Denver, Colo.

Officers: E. LeN. Foster, pres.-treas.; F. G. Warden, v. p.; W. C. Johnston, sec.

Inc. in Colorado. Cap. \$100,000; 10¢ par; all outstanding.

Property: 11 patented claims, in Clear Creek county, showing gold, silver, bismuth, and lead ore in a fissure vein in granite. Ore is a sulphide almost 2' wide, and runs N. 60° E.; said to assay 10 to 2,000 oz. silver, 30% lead, and 0.2 oz. gold per ton.

Development: by tunnel 900' long, and total of 3,000' of workings.

Reopened after 20 years, and company plans driving a crosscut tunned to intersect vein at 400' depth. Operated part of 1919 and 1920.

ROCHESTER MINING & MILLING CO.**COLORADO**

Address: Russell Gulch, Colo.

Property: the Rochester gold-silver mine at Russel Gulch, Gilpin county. Operated part of 1919 and 1920.

ROCKY MOUNTAIN GOLDFIELD MINING CO.**COLORADO**

Mail returned unclaimed from St. Elmo, and company presumably defunct. Described in Volume. XIV.

ROOSEVELT MINES & ELECTRIC CO.**COLORADO**

Office: Pitkin, Colorado.

Officers: L. H. Becker, pres.; R. B. Anderson, v. p.; A. P. Nelson, sec.-treas.-mgr.; with M. Woolley, F. R. Hansen, M. J. Ostergard, O. J. Watson, L. S. Kraft and W. J. Hurd, directors.

Inc. Feb. 3, 1920, in Colo. **Cap.** \$5,000,000; \$1 par; 3,700,000 issued. Annual meeting second Tuesday in August.

Property: 98 lode claims, 4 placer claims, 3 mill sites, total acreage about 1,200 acres, in Box Canon and Quartz Creek districts of Gunnison county. (Major part of property bought at foreclosure sale of the Brant Independent Mining Co., now defunct, includes 5 mines, the Camp Bird, I. X. L., Gold Ridge, Midnight and Roosevelt, opened up and proven by 400' Camp Bird shaft and 1,200' of drifting; 140' Midnight shaft; 60' I. X. L. shaft and 90' crosscut; Gold Ridge tunnel, which follows the vein for 130'; and shafts and exploration tunnels at the Roosevelt. Ore occurs in quartz veins imbedded in mica schist, diorite and granite; values said to average \$20 gold per ton and about 8% copper.

Development: mainly by crosscut tunnel which will drain the entire district and open up the company's mines at depths from 700 to 1,200'; tunnel in 2,500', February, 1921. Portal of tunnel 900' from the D. & R. G. Ry.; switch from main line installed.

Equipment: 400 h. p. hydro-electric plant, power transmitted to Camp Bird and other mines; 4-drill air compressor, machine drills and usual buildings, all lighted and heated electrically and with running water. Property is heavily timbered and Quartz Creek runs through it.

ROOSEVELT MINING & MILLING CO.**COLORADO**

Address: Nathan Shapiro, mgr., Alice, Colo.

Property: the Reynolds, Kaminky, Walder, Log Cabin, and Ottawa gold claims at Alice, near Idaho Springs, Clear Creek county.

Equipment: steam power, compressor, ¾ mile tram, 15-stamp mill, etc.

Mine and mill operated part of 1919 and 1920, and shipments made. Actively engaged in 1921.

ROSE NICOL GOLD MINING CO.**COLORADO**

Office: 315 Exchange National Bank Bldg., Colorado Springs, Colo.

Officers: L. L. Aitken, pres.; Ira Harris, v. p.; A. D. Aitken, sec.-treas.; with R. H. Forbes, directors.

Inc. in Colorado. **Cap.** \$1,500,000; \$1 par; all outstanding. Colorado Title & Trust Co., Colorado Springs, registrar. Expenses in 1918 were \$1,033.

Property: 11 acres on Battle mountain, between the Portland, U. G. M., and Cresson mines, Cripple Creek, Teller county. Property was reported leased in 1917 to the Camp Bird Mining, Leasing & Power Co., now presumably defunct. The lease on the Rose Nicol mine of the company was transferred to the Reva Gold Mining Co., which see.

ROSITA MINING & MILLING CO. COLORADO

Address: Florence, Colo.

Property: Maverick gold mine at Rosita, Custer county, operated during part of 1920.

ROSS MINING & MILLING CO. COLORADO

Idle many years.

Office: Ross Bldg., Waynesburg, Pa. Mines at Silverton, San Juan county. Company sub-leased the Champion mine, which it controls, in 1918, to Cassagranda & Co. The company has had much financial trouble, like its predecessors and collateral relatives in a chain of promotions, all fully described, Vol. XI, Copper Handbook.

ROYAL GEM MINING CO. COLORADO

Formerly operated near Caribou, Boulder county. No recent information. See Volume XIV.

ROYAL TIGER MINING CO. COLORADO

Address: J. A. Traylor, mgr.; Frank R. Wicks, gen. supt., Tiger, Colo. **Cap.** 1,000,000 shares; 1¢ par; 600,000 shares outstanding.

Property: company owns and operates the Royal Tiger mine, formerly known as the I. X. L. mine, the Cashier group, and a group of placer claims, covering 2,000 acres and extending 3½ miles S. W. from Tiger to the property of the Wellington Mines Co. at French gulch, Summit county. Ore occurs in a mineralized zone of intrusive porphyry, 200' wide, carrying low grade lead, zinc, gold, and silver.

Equipment: includes a 50-ton mill. A 500-ton mill is under construction.

RUBY CONS. SILVER MINES CO. COLORADO

Address: c/o Albert Sutcliffe & Co., 262 Washington St., Boston, Mass.

Property: the Ruby Consolidated No. 7, a gold-silver mine at Crested Butte, Gunnison county, operated during part of 1920.

RUBY MINING & MILLING CO. COLORADO

Dead. See Volume XIV.

RUSSIA MINE COLORADO

A gold-silver-zinc property at Alma, Park county, operated by Lincoln Consolidation Partnership.

RUTTILLA-BROWN LEASING CO. COLORADO

Syndicate has a lease on the Carbonero mine, which see.

SACO DE ORO MINING & MILLING CO. COLORADO

Address: Barrick-Dollison Co., fiscal agents, 511 Mack Bldg., Denver, Colo. Chas. E. Barrick, pres.-gen. mgr., Apex, Colo. W. S. Barrick, supt.

Cap. \$20,000; in 1918 an offering of 50,000 shares was made at 10¢ each. Advertised at 25 cents late in 1920.

Property: 31 claims, near Apex, Gilpin county, said to show fissure veins carrying gold, silver and lead ore. Examined in 1920 by C. H. Kinney of Des Moines, Iowa.

Development: the 1,000' Barrick tunnel, which was expected to cut ore 400' below the Rochester shaft.

Equipment: compressor, hoist and electric plant were added in 1919.

It is hoped that the mine will warrant its name. Those interested seem highly optimistic.

SAGUACHE EAGLE MINING CO. COLORADO

Address: 1940 Broadway, Denver, Colo.

Property: Eagle mine and mill at Villagrove, Saguache county. Ore contains gold, silver, lead and zinc.

ST. CLOUD MINE **COLORADO**

Address: Droesbaugh & Conner, Montezuma, Colo.

Property: a silver-lead mine at Montezuma, Summit county, operated during part of 1920.

ST. ELMO MINING CO. **COLORADO**

Address: Montezuma, Summit Co., Colo.

Property: a gold-silver-lead mine at Montezuma. Not producing.

ST. GEORGE MINE, INC. **COLORADO**

Address: Theo. R. Heinrichs, mgr., Flagg Bldg., Yonkers, N. Y. Mine address: Georgetown, Colo.

Officers: Theo. R. Heinrichs, pres.; Wm. E. Handy, v. p.; Geo. B. Kearns, sec.; A. E. Sheridan, treas., with W. G. Briggs, directors.

Inc. 1916, in So. Dakota. **Cap.** \$50,000; \$1 par; 3,938 shares in treasury.

Property: 12 claims, 120 acres, including the St. George gold-silver mine at Georgetown, Clear Creek county. Ore occurs in a fissure vein in granite, containing gold, silver, lead and zinc values.

Development: by 2,200' tunnel.

Equipment: includes compressor and 900' aerial tram connecting with railroad. A 40-ton mill is planned.

ST. JOHN MINES (COLORADO), LTD. **COLORADO**

Address: Edwin H. Platt, mgr., Equitable Bldg., Denver, Colo. M. F. Bremer, sec., 38 Broad St. House, London, E. C. 2, Eng. **Directors:** Geo. A. Williamson, chairman; J. O. Shepherd, Chas. P. Winterton, M. M. Dewar.

Inc. Feb. 13, 1913. **Cap.** £75,000; 5s. par; all issued and fully paid.

During 1917 the company's stock was sold to the Montezuma Silver-Lead Mines, Ltd., for £55,000, out of which the mortgage debt was discharged. The corporation is now a holding company, whose chief asset is 40,000 ordinary shares of the Montezuma S.-L. Mines, Ltd. See **Montezuma Cons. Silver Mines Co.**, also full description in Volume XIV.

ST. LOUIS-COLORADO MINING CO. **COLORADO**

Probably defunct. Described in Volume XIV.

ST. PAUL MINING & REDUCTION CO. **COLORADO**

Address: Frank L. Ross, Gas & Electric Bldg., Denver, Colo. Norwood Johnson, pres. and treas.; J. B. Ross, v. p. and gen. mgr.; Frank L. Ross, sec.

Inc. March 1908, in Colorado. **Cap.** \$100,000; shares \$1 par.

Property: the St. Paul group, in the Red Mountain district, San Juan county, an old mine, that formerly shipped some ore netting \$1,000 per car-load.

Development: by 300' shaft, with levels at 200' and 300', developing small but rich ore shoots, said by former management to carry 8% copper, 10% lead, 10% zinc, 5 to 10 oz. silver, and 1 oz. gold per ton. Since 1914 the mine has been worked by lessees. Equipped with an electric hoist. Operated part of 1919, and shipped ore.

SALIDA SMELTER **COLORADO**

The smelter at Salida, formerly the property of Ohio & Colorado Smelting & Refining Corp., was shut down in February, 1920. The mortgage of \$1,000,000 held thereon by the American Metals Co. was foreclosed and the property bought in on July 26, 1920, at foreclosure sale for a new group, represented by Lewis Sanders, 480 Lexington Avenue, New York City. The new group is not yet ready to announce its detailed plans for the smelter.

Works: Salida, Chaffee Co., Colo.

Property: the Salida smelter, 12,000 tons monthly capacity, did a general custom business. It includes a 300-ton sintering plant, sampling mill, 4 lead blast-furnaces, 48 x 180", handling mainly silver-lead ores. The only copper treated is that bought with lead ores, which is concentrated to 40% tenor.

SAN ANTONIO MINING CO. COLORADO

Dead. See Vol. XIII.

SAN JUAN GOLDEN FLEECE MINING SYNDICATE COLORADO

Address: 315 Kittridge Bldg., Denver, Colo.

Property: Golden Fleece group, on Treasure mountain, 18 miles N. of Silverton, San Juan county. Ore contains gold and silver. An old producer, under new management in 1921.

SAN JUAN INSPIRATION DEVELOPMENT CO. COLORADO

Officers: F. M. Ward, pres.; Jack Klepick, v. p.; E. J. Slone, sec.-treas., with A. D. Medved, and R. G. Slone, directors.

Inc. 1920, in Colo. Cap. \$400,000.

Property: a lease on Kansas City group, in Red Mountain district, San Juan county.

SAN JUAN SILVER SYNDICATE COLORADO

Address: E. D. Van Keuren, fiscal agent, 725 Symes Bldg., Denver, Colo.

The Syndicate is considered by the promoters to be "a double-barrelled opportunity". The pre-organization offer was 2,000 units of \$75 each, and every membership was to receive 500 shares in a new company to be formed, the shares to be unloaded at 30 cents a piece. This was early in 1920.

Property: the Weatherly group of 5 lode claims on Mt. Hayden, near Ouray, Ouray county. Formerly operated by a British company, reported to have spent \$75,000. Examined by Kirby Thomas, Fred Carroll, and David Foerster.

Development: by 635' tunnel, to be extended 170'. Reserves were estimated as 9,000 tons of \$11 net silver ore, but 300,000 tons are probable, if the ore persists in depth.

SAN JUAN SMELTING & REFINING CO. COLORADO

Absorbed by American Smelting & Refining Co., and company dissolved. Owned the Durango (Colo.) lead and copper smelter, which see.

SANTIAGO CONS. MINING, MILLING & TUNNEL CO. COLORADO

Office: Georgetown, Clear Creek county, Colo.

Officers: Mrs. S. F. Glass, pres.-treas.; Mrs. E. J. Smith, v. p.; S. F. Glass, sec.

Inc. Feb., 1906, in Colorado. Cap. \$600,000; \$1 par; 594,101 shares outstanding.

Property: 20 claims, 13 patented, 100 acres in all, near Georgetown, Clear Creek county. Has a fissure vein, averaging 1½' wide, carrying sulphide ore said to run 2 oz. gold, 300 oz. silver, 10% copper and 30% lead.

Development: by 600' shaft and tunnels 200' to 1,200' in length, workings totalling 25,000'. In 1918, a lessee on No. 4 level mined 200 tons of ore carrying 2 oz. gold, 65 oz. silver, 9% copper, and 23% lead. On No. 7 level, an orebody about 10" wide was opened for about 150'. Company claims to have 100,000 tons of ore in reserve, with 300 tons blocked out.

Equipment: includes electric hoist, tramway, and sampler.

Production: from January, 1911, to December, 1918, was \$247,653, the average grade being about \$50 per ton. Operated part of 1919 and shipped some ore. Idle in 1920-1921.

SARATOGA MINING CO. COLORADO

Address: F. L. Colby, pres.: Union Trust Bldg., Detroit, Mich. Mine office: Idaho Springs, Clear Creek county, Colo.

Idle several years. Described in Volume XIV.

SCEPTRE MINES & MILLS CO. COLORADO

Presumably defunct. Described in Volume XIV.

SCHLESINGER RADIUM CO. COLORADO

Name changed, early in 1919, to Radium Co. of Colorado, Inc., which see.

SCHLEY MINE COLORADO

Address: C. M. Tavler, lessee, Idaho Springs, Colo.

Property: at Idaho Springs, Clear Creek county, operated during part of 1920. Ore contains gold, silver, lead.

SEATON MINING & MILLING CO. COLORADO

Address: Cincinnati, Ohio. H. E. Machol, supt., Idaho Springs, Colo.

Property: the old Seaton mine on Seaton Mountain, near Idaho Springs, Clear Creek county. Mine re-opened, 1916, through Argo tunnel and 650' raise was to be put through from west drift on Seaton vein to connect with Foxhall tunnel. The Seaton vein is cut at 6,007' from entrance to the Argo tunnel. Operated during part of 1919.

SEDALIA COPPER CO. COLORADO

Address: C. H. Swanton, sec., Canon City.; D. A. Freeman, pres., Boston, Mass.

Inc. 1899. **Cap.** \$1,000,000; shares \$10 par.

Dividends reported paid in 1900, when shares were sold at \$10, declining to \$1.

Property: 40 acres, patented, 7 miles from Salida, Chaffee county, shows 35' ledge of pyritic copper-zinc ore carrying 2.75% to 12% copper, 750' below outcrop. Upper levels show large amount of oxidized ore.

Whittemore Bros., shoe polish manufacturers, originally interested. Property formerly leased to Salida Gold & Copper Mining Co., succeeded by Shawmut Consolidated Mining Co., succeeded by Salida Copper Co., all now dead. The Shawmut Co. purchased the leaching plant and remodeled it for a 50-ton ore concentration mill.

Development: by shaft and tunnels, aggregates 4,000'. Was producing in 1918. No recent information.

SEEMANN INVESTMENT & FINANCE CO. COLORADO

Address: Box 1375, Denver, Colo.

Officers: Henry I. Seemann, pres.; K. R. Seemann, v. p.; W. S. Lip-pincott, sec.-treas.

Inc. July 12, 1904, in Colorado. **Cap.** \$100,000; \$100 par.

Property: company owns the following claims at Cripple Creek, Teller county: Black Crow Lode, Mayflower Lode, Pride of Grassy Lode, W. E. S., E. F. C. & Rittenhouse, the 4-11-44, Idlewild & Mexican, Dark Cloud and Nada Lodes; and in Clear Creek county; Golden Star Lode, Ace of Diamonds Lode, Deuce of Diamonds Lode, Jack of Diamonds Lode, and ½ Surprise Ext. West, Vindicator Lode.

The company is not a mining company, but wishes to lease or sell, or probably form a mining company, and turn the properties over to such company.

SENATOR HILL & OPHIR SYNDICATE COLORADO

Address: 535 Mack Bldg., Denver, Colo.

Property: Senator Hill and Ophir gold mines at Magnolia, Boulder county, operated during part of 1920.

SENATOR MINE COLORADO

Address: J. J. Molony, lessee, Box 351, Silverton, Colo.

Property: a silver-lead mine at Silverton, San Juan county, operated during part of 1920.

SENORITA MINE COLORADO

Address: R. E. Meyers, Ourav, Colo.

Property: a gold mine at Ourav, developed by tunnels. Operated during part of 1920.

SEVEN METALS MINING CO. COLORADO

Address: 233 Coronado Bldg., Denver; or Georgetown, Colo.

Officers: E. J. Wilcox, pres.-treas.; James McGee, v. p.; J. J. Webber, sec.; John Hanson, supt.

Inc. in Colo. **Cap.** \$1,000,000; \$1 par. Listed on Boston Curb. Old South Trust Co., Boston, transfer agent; Metropolitan Trust Co., Boston, registrar.

Property: 27 claims, in the Argentine district, Clear Creek county, embraces the Stevens group, Centennial mine, and mineral rights to the Tobin vein between the Stevens and Centennial. Ore contains silver, gold and copper.

Development: by 900' tunnel in the Stevens; 2 tunnels in the Tobin, one 1,500' long and 1,600' below top of mountain, and the other 200' long, 700' below apex; the Centennial is developed to a depth of 1,000'.

Equipment: at Stevens includes concentrating mill, compressor, and hydro-electric power-plant.

Production: the Stevens group is credited with a production of nearly \$2,000,000 worth of silver, when it was 65¢ an ounce, and the whole property is said to have produced \$3,850,000.

This company has been much advertised by T. W. Lawson of Boston, who operated a pool that hoisted the stock for awhile, and presumably sold out its holdings.

Operated part of 1919, but shipped no ore. There were 4 men employed part of 1920 in development work.

SEVEN THIRTY MINE**COLORADO**

Address: John Hilton, Rollinsville, Colo.

Property: a gold-silver mine at Rollinsville, Gilpin county. Operated during part of 1920, but no shipments reported.

SEVENTY SIX MINE**COLORADO**

Address: Leadville, Colo.

A zinc mine at Leadville, Lake county, operated by lessees.

SHAFTER MINING CO.**COLORADO**

Office: 1 Broadway, New York. **Mine office:** Idaho Springs, Clear Creek county, Colo. M. S. Payton, pres.; Chas. D. Ross, sec.-treas.

Inc. 1880, in New York. **Cap.** \$100,000; shares \$100 par.

Lands show copper ores with value mainly in gold.

Development: by an 800' shaft and a 5,500' tunnel. Has been idle for several years.

SHAMUS O'BRIEN LEASING CO.**COLORADO**

Address: Box 548, Leadville, Colo.

Operates a lease on the Shamus O'Brien zinc mine at Leadville, Lake county.

SHIP AHOY MINE**COLORADO**

Address: John Peterson, Idaho Springs, Colo.

Property: at Idaho Springs, Clear Creek county, worked for gold, silver and lead.

SHIRLEY MINE**COLORADO**

Address: Rowley & Coonan, lessees, Eldora, Colo.

Property: a gold-silver mine at Eldora, Boulder county, operated during part of 1920.

SILL MINE**COLORADO**

Address: Finnerty & Margowski, 321 Boston Bldg., Denver, Colo.

Property: at Grant, Clear Creek county, shows gold-silver bearing ore. Operated during part of 1920, but no shipments made.

SILVER CANYON MINING CO.**COLORADO**

Former office: 928 Foster Bldg., Denver, Colo. **Mine address:** Ames, San Miguel Co., Colo.

Operated the Shamus O'Brien group during part of 1919, but shipped no ore; idle 1920. Earlier operations and organization described in Vol. XIV of this work.

SILVER CITY MINING CO.**COLORADO**

Presumably out of existence. See Volume XIV.

SILVER DAY MINING CO.**COLORADO**

Address: 1215 Pearl St., Boulder, Colo.

Officers: F. P. Ball, pres.; G. W. Hobson, v. p.; H. C. Meade, sec.-treas.; S. H. Corfield, mgr., Boulder, Colo.

Inc. 1920, in Colorado. **Cap.** \$200,000; \$1 par.

Property: 4 claims, 25 acres, in the Caribou district, Boulder county. Outcrops are said to show good gold-silver ore and a shaft was being sunk at last accounts.

SILVER GEM MINING CO.**COLORADO**

Address: J. B. Donald, mgr., 329 U. S. Natl. Bank Bldg., Denver, Colo.
 W. H. Stephens, supt., Silver Plume, Colo.

Directors: J. B. Donald, pres.-treas.; Thomas Donald, v. p.; R. M. Layton, sec.

Inc. 1918, in Colorado. **Cap.** \$500,000; increased to \$750,000; \$1 par; 450,000 shares issued.

Property: 15 claims, 10 patented, 75 acres, includes Silver Horn mine, on Ute Creek, 6 miles from Idaho Springs, Clear Creek county. Ore occurs in fissure veins in granite, said to contain gold, silver, copper, lead and zinc.

Development: by shaft to depth of 207' and tunnels, with 1,500' of workings. Company also has a lease on the Gold Belt, or Silver Plume group of 7 claims developed by 2,200' tunnel.

Stock offered at \$1 per share in 1921 to provide necessary funds for further development.

SILVER GLANCE MINING CO.**COLORADO**

Address: Louis Sigmund, pres., Coaldale, Fremont county, Colo.

Inc. 1919 in Colorado.

Property: 4 gold-silver claims at Coaldale, from which shipments have been made from time to time.

SILVER GULCH MINING & MILLING CO.**COLORADO**

Office: 1023 St. Paul Ave., Milwaukee, Wis. **Mine office:** Dunton, Colo.

Officers: C. H. Koenig, pres.; Robert Rom, sec.-treas.; with Henry Indra and Matt. Jacobsen, directors. E. C. Koenig, supt.

Cap. \$250,000; shares 10¢ par.

Property: the Rosebud mine, 7 claims, in the Lone Cone district, Dolores county. Mine shows a fissure vein, about 4' wide, in sandstone, containing gold, silver, copper and lead sulphides. Course runs N. E.-S. W. with dip of 95°. The main product is silver.

Development: by about 900' of tunnels, blocking out 1,000 tons of ore.

Equipment: includes a 50-ton flotation mill.

Operated part of 1919 and 1920, and shipped ore.

SILVER KING LEASING CO.**COLORADO**

Address: Creede, Colo.

Property: the Silver King mine at Creede, Mineral county. Operated part of 1919 and 1920.

SILVER KING MINE**COLORADO**

Address: Henry Bolthoff, 1807 Emerson St., Denver, Colo.

Property: Silver King mine and mill at Dumont, Clear Creek county. Ore contains gold, silver, lead. No shipments made in 1920.

SILVER LAKE MINES**COLORADO**

Owned by American Sm. & Ref. Co. R. P. Reynolds, supt., care A. S. & R. Co., Durango, Colo.

Property: 143 patented claims in the Animas mining district, Silverton, San Juan county.

Ore: carries gold, silver, lead, copper, and zinc in fissure veins in andesite. Veins dip 70°, and have an E.-W. strike. Ore reported to occur in shoots from 1x20' to 8x1,200', and said to assay 0.20 oz. gold; 6 oz. silver; 2.5% lead; 1% copper; 3.5% zinc.

Development: by tunnels, the two longest 12,000 and 7,500'; greatest depth of workings 1,700' below surface; total workings, 165,000'.

Equipment: includes 2 air-compressors, aerial tram, and a 450-ton mill equipped with flotation plant.

Mine has been worked by lessees since 1911; the Erma Leasing Co. was operating in 1921.

SILVER LEASERS ASSOCIATION**COLORADO**

Address: 411 Boston Bldg., Denver, Colo.

Property: a lease on the O'Donovan Rossa silver-lead mine at Leadville, Lake county. Operating in 1920, but no shipments made.

SILVER LEDGE LEASING CO.**COLORADO****Address:** Silverton, Colo.**Property:** the Silver Ledge mine near Silverton, San Juan county. Ore carries gold, silver and lead.

Operated and produced during 1919.

SILVER LINK MINE**COLORADO****Address:** F. O. Seaberg. Ouray, Colo.**Property:** a gold-silver group at Ouray, operated during part of 1920.**SILVERMANE MINES CO.****COLORADO****Address:** Lake City, Colo. R. A. Ralph, supt.

Inc. in 1919; a close corporation.

Property: 14 claims, patented, including the Lillie mine, 7 miles west of Lake City, Hinsdale county, shows gold, silver, copper, and lead ore in a fissure in rhyolitic and andesitic breccia. There are 3 pay-shoots, one 250' long, and two each 100' long. Orebody is from 9" to 4' wide. Ore assays 25 to 100 oz. silver, 20% lead, 3% copper and 0.1 oz. gold per ton.**Development:** by tunnels, 1,140' and 200' long; also 4,030' of workings. The inclined shaft is 620' deep and connects with the tunnel.

Company said to have been recovering old workings and blocking out new ore. Operated part of 1919 and shipped ore.

SILVER MINES CO. OF AMERICA**COLORADO****Office:** 801 Magee Bldg., Pittsburgh, Pa. Stuart Croasdale, managing director, 730 Symes Bldg., Denver, Colo. **Mine address:** J. T. Boyd, gen. mgr., Aspen, Colo.**Officers:** P. S. Chambers, pres., Stuart Croasdale, v. p., with W. B. Hammond, Edwin N. Ohl, J. W. Johnston and H. E. McLain, directors.

Inc. Nov. 29, 1920, in Delaware. Cap. \$1,600,000; \$1 par; 900,000 shares in treasury, November, 1921. Pittsburg Trust Co., registrar and transfer agent. Earnings for 7 weeks, Aug. and Sept. 1921, \$15,242.

Property: company controls a consolidation of mines tributary to the Cowenhoven 3 mile tunnel at Aspen, Pitkin county, which drains mines to depth of 1,500'. Also has producing mines on Aspen Mtn.**Development:** by shafts and 2¾ miles of tunnels to depth of 3,500'. Ore carries silver and lead, on contact between limestone beds. About 1,000,000 tons said to exist above water level.**Equipment:** 250-ton Hunter mill, to be changed to 500-ton in 1922. Hydro-electric power runs plant.**Production:** to start Nov. 1921.**SILVER MINING & REDUCTION CO.****COLORADO**Idle. **Address:** care J. L. McLean, 10 State St., Boston. See Volume XIV. for full details.

Company inactive for some years. Operations of its subsidiary, the Colorado Concentrating Co., at the Pingrey mill at Leadville, unsuccessful, bond and lease was dropped.

SILVER MOUNTAIN MINES CO.**COLORADO****Address:** 50 Broad St., New York City.**Property:** Kentucky Giant and Indiana groups at Ouray. Ore contains gold and silver. Closed down in 1920.**SILVER MOUNTAIN MINING CO.****COLORADO****Address:** 421 East 18th Ave., Denver, Colo. A. B. Kamp & Co., (late C. W. Savery Securities Co.), fiscal agent and promoter.**Officers:** C. W. Savery, pres.; Eugene Perlev, v. p.-mine mgr.; D. C. Stratton, sec.-treas.

Inc. in Colorado. Cap. \$2,500,000; \$1 par; transferred at main office.

Property: owns outright the Galena claim, and the Brooklyn group of patented claims; also has bond and lease on the Black Jack, Linden Castle, and Wheeler Tunnel all situated on Silver mountain, near Blackhawk, Gilpin county.**Development:** 260' Black Jack shaft and considerable drifting. Ores contain gold, silver, and lead. Developing two veins, the Wheeler tunnel is

said to show 2' of ore running \$12-\$22 in W. face, and 14' of \$50 ore in E. face; Black Jack vein, opened on 260' level shows a 4' width with streaks of high grade. Last shipment to smelter reported to have netted \$1,685. Shipping at rate of one car every ninety days.

Promotion methods and publicity campaign unfavorably regarded.

SILVER PAINT MINES CO.

COLORADO

Office: 1037 First National Bank Bldg., Denver, Colo. Mine address: Harry E. Larson, supt., Box 548, Ouray, Colo.

Officers: A. E. Bundsen, pres.-treas.; H. E. Larson, v. p.; P. R. Anderson, sec.

Inc. February, 1918, in Colorado. Cap. \$50,000; \$1 par.

Property: a bond and lease on three claims, 2 patented, 40 acres, in Uncompahgre district, Ouray county, said to show gold, silver, copper, iron, zinc and lead in pink quartzite, that dips at 30°. Orebody is 2'-4' wide and is said to assay \$1.60 gold, 10-400 oz. silver, 14% copper, 5% zinc, 6% lead, 14% iron.

Development: three tunnels, 160' 135' and 140' long. Equipped with 550' tramway. Mine idle for 30 years before work was started by the present company. Inactive, 1920-'21.

SILVER PLUME CONSOLIDATED MINING CO.

COLORADO

Offices: C. D. Davis, Silver Plume, Colo.; and 1221 Foster Bldg., Denver, Colo.

Cap. \$3,000,000; \$1 par; in treasury 1,470,000 shares. Transf. office at Registrar & Transfer Co., Equitable Bldg., New York.

Property: 12 claims, 249 acres, grouped as (1) the Buxton, ten claims on Brown mountain, two miles west of Silver Plume, Clear Creek county, consolidated by tunnel claim and covering area of 3,000 by 5,000'. (2) the Lone Wolf mine, two claims, on Republican mountain, at Silver Plume; (3) the Snowdrift dump, adjoining Lone Wolf mine.

Geology: claims show pre-Cambrian granite and granite-gneiss intersected by porphyry dikes. Blende and galena, with some pyrite, are the principal minerals in silver-lead deposits. Both the galena and blende are argentiferous, but silver exists mainly as polybasite, tetrahedrite, cyrargyrite, and ruby silver, in a gangue of crystalline quartz with calcite and brown carbonates of iron and lime.

Development: by a main tunnel, 1,400' in length, cutting 8 veins.

Equipment: includes 75-ton Burleigh mill, compressor and ½ mile aerial tram, completed in 1920.

Reported shipping 1,000 tons per day in June, 1921.

SILVER PLUME MINES CO.

COLORADO

Successor to Cole Mining Co.

Address: G. L. Cole, pres.-mgr., Springfield, Mo.

Property: 80 patented claims, 6 mill sites, 250 acres, includes the Dives-Pelican and Seven-Thirty mines, near Georgetown, Clear Creek county. Ore contains silver-lead.

Equipment: 200-ton mill, electrically equipped.

SILVER SCREEN MINING & MILLING CO.

COLORADO

Office: Room 509, Guardian Life Bldg., 50 Union Square, New York.

Mine address: D. A. Ferguson, supt., Ouray, Colo.

Officers: Louis Weiler, pres.; Stewart P. Foltz, v. p.; J. H. Ehlers, sec.-treas.

Inc. 1920, in Colo. Cap. \$1,500,000; \$1 par; 400,000 shares issued.

Property: 36 claims, 35 patented, about 500 acres, in San Juan and Ouray counties. Ore contains gold, silver, copper and lead, averaging \$25 per ton.

Development: by shafts to depth of 200' and tunnels, with about 3,250' of workings.

Equipment: includes compressor and pump. A 100-ton concentrator is planned.

Production: suspended in 1917; only development work done in 1918 and 1919.

SILVERTON MINES CO.**COLORADO****Address:** 703 Mining Exchange Bldg., Denver, Colo.**Property:** the Bandora mine at Silverton, San Juan county. Ore contains gold, silver, lead and zinc. Developing and a compressor installed in 1920.**SILVER WAVE MINE****COLORADO****Address:** E. W. Shrock, Alma, Colo.**Property:** a silver mine at Alma, Park county. Operated during part of 1920.**SLICK BROS. MINING & MILLING CO.****COLORADO****Address:** B. B. Slick, Ridgeway, Colo. W. B. Slick, pres., Boise, Idaho.**Inc.** 1909, in Nevada. **Cap.** \$1,500,000; \$1 par.**Property:** 10 claims, 100 acres, patented, on Mt. Hayden, Uncompahgre district, Ouray county, shows fissure vein in andesite. The vein runs N. E.-S. W., dips at 45°, and for 2,400' in length shows 3' of sulphide copper ore carrying gold-silver values, reported to average \$35 per ton in all three metals. The shoot is said to show ore for 600'x600'x3'.**Development:** by 3 tunnels, aggregating 1,200' and having back of 350'. Property reported on by F. M. Kilmer, of Boston Inst. of Technology.

Company spent about \$15,000 for development work during 1916-18. Plans were laid and funds reported pledged to drive a 2,300' tunnel. No recent information.

SLIDE GOLD MINING CO.**COLORADO**

Out of business. See Volume XIV.

SMALLHOPES-BOREEL MINING CO.**COLORADO**Presumably dead; property sold to **Empire Zinc Co.** (q. v.) in 1916.**SMITH LAWSON MINING CO.****COLORADO****Address:** Lawson, Colo.**Property:** a lease on Platts Long mine at Lawson, Clear Creek county. Ore contains gold, silver and lead. Under development in 1920.**SMUGGLER LEASING CO., THE****COLORADO****Address:** C. E. Anderson, Aspen, Colo.**Officers:** D. M. Hyman, pres.; Mark Hyman, v. p.-treas.; J. L. Tilton, sec., with A. B. Simon, E. M. Rogers, Edw. Kuhn and W. P. Arms, directors. **Inc.** May, 1911, in Maine. **Cap.** \$500,000; \$1 par; all issued.**Property:** the Smuggler mine at Aspen, Pitkin county, shows contact deposit in lime and shale, containing silver, lead and zinc ores.**Development:** by 5,000' and 15,000' tunnels, and 1,000' shaft; ground opened to 1,800' depth.**Equipment:** includes 2,250-h. p. electric plant, hoist, compressor, and 500-ton concentrating mill.

Water is troublesome, 3,500 to 4,000 gallons per minute being pumped. A fire in the lower workings hindered work during 1919. Producing in 1920-'21.

SMUGGLER MINE**COLORADO****Address:** Stewart-Marshall Corp., 409 Jackson Bldg., Denver, Colo. **Mine address:** Silver Plume, Clear Creek Co., Colo.

Ore contains lead, zinc and silver. The high-grade smelting ore is shipped to Georgetown sampler. The milling ore is shipped to the Hudson mill at Idaho Springs, where it is concentrated 5 tons to one, giving, it is said, a product carrying 50% zinc, 60% lead and 150 oz. silver per ton. Operated during part of 1920.

SMUGGLER MINE & MILLING CO.**COLORADO****Mine office:** Lyons, Boulder county, Colo.**Officers:** C. F. Leetes, Fredonia, Kan., pres.; G. M. Maupin, v. p.; G. R. Prunty, sec.-treas; T. W. Clements, gen. mgr., with G. P. Farmer, A. R. Elder and W. B. Scruggs, directors.**Cap.** \$500,000.**Property:** the Smuggler mine at Balarat, 8 miles S. W. of Lyons and three miles N. of Jamestown in Boulder county. Mine contains gold and silver tellurides. One ore-shoot reported producing commercial ore averaging \$200 per ton. Past production is said to be \$1,500,000.

Equipment: new compressor and drills have been installed lately and a 100-ton mill is planned.

SMUGGLER UNION MINING CO. (THE) COLORADO

Controlled by the **New England Exploration Co.** (which see), 14 Ashburton Place, Boston, Mass.

Officers: 201—14th St., Denver, Colo., and Telluride, Colo.

Officers: Bulkeley Wells, pres.-gen. mgr.; with R. L. Agassiz, T. L. Livermore, N. H. Stone and J. M. Crafts, directors. T. E. Sherwin, sec.-treas.; H. G. Palsgrove, mgr.; Walter J. Eaton, mine supt.

Inc. 1891, in Colorado. **Cap.** \$5,000,000; all outstanding; \$100 par. Bonds authorized, \$250,000; outstanding, \$67,500. Annual meeting in June. 14 Ashburton Place, Boston, transfer office. Financial reports not made public.

Property: 52 patented claims, about 816 acres, in San Miguel county, includes the Smuggler mine. Ore carries gold, silver, lead and iron, occurring in a true fissure quartz vein cutting andesite, tuff and rhyolite for a vertical distance of 2,000'. Vein strikes N. W.-S. E., dips 70°; average width, 2½'. For geology of the Telluride district, see U. S. G. S. Geological Folio No. 57; also see **Tomboy Gold Mines Co., Ltd.**, in this volume.

Development: by tunnels with a 280' winze from lowest tunnel, 3,700' long; main haulage level, 3,600' long; greatest depth of workings, 2,300'. Total workings aggregate 30 miles.

Equipment: includes a 50-h. p. electric hoist, 2 compressors, pumps, hydro-electric power, 800-ton stamp and concentrating mill and flotation plant. An apartment house with electric stoves, steam heat, etc. was erected for employees in 1919.

Production: 118,668 tons ore in 1912; 137,567 in 1913; 126,505 in 1914; 107,119 in 1915; 53,009 in 1916. Grade of ore, production and recovery not made public.

SNOWBOUND MINING CO. COLORADO

Address: Gold Hill, via Salina, Colo.

Property: Snowbound gold-silver mine at Gold Hill, Boulder county, operated during part of 1920.

SOCIAL SIX MINING CO. COLORADO

Address: 1439 Larimer St., Denver, Colo.

Property: the Calvin and Remington gold-silver claims near Idaho Springs, Clear Creek county.

Operated during part of 1919 and 1920.

SOUTH LONDON MINE COLORADO

Address: Johnson & Co., Alma, Colo.

Property: a gold-silver mine near Alma, Park county.

SOUTH MOYER MINE COLORADO

Address: c/o William Carson, lessee, Leadville, Colo.

Property: a silver mine at Leadville, Lake county.

SOUTHWESTERN MINING CO. COLORADO

Formerly the Iowa Tiger Mining Co., name changed November, 1919.

Address: Silverton, Colo.

Property: the Iowa and Mayflower mines in the Silverton district of San Juan county. Ore carries gold, silver, and lead. Only the Iowa gold mine is now being worked. The mill includes a flotation unit. Company has been one of the largest shippers of concentrate in the district. No figures are available.

S. P. SILVER MINING CO. COLORADO

Address: Silver Plume, Colorado.

Property: the Silver Leaf mine at Silver Plume, Clear Creek county. Ore contains gold, silver, lead. Developing 1920.

SPAR CONSOLIDATED MINING CO. COLORADO

Address: Aspen, Colo.

Property: the Spar silver-lead mine at Aspen, Pitkin county. Operated and shipped ore during 1919 and 1920.

- SPECIE PAYMENT GOLD MINING CO.** COLORADO
 Mine purchased in June, 1917, by C. A. O'Leary & Co., of St. Paul, Minn., who organized the **Cons. Specie Payment Mng. Co.**, which see.
- SPEERS MINE** COLORADO
 A gold mine at Blackhawk, Gilpin county, operated by lessees.
- SPRINGDALE MINE** COLORADO
Address: McCampbell & McLean, lessees, Russell Gulch, Colo.
Property: at Russell Gulch, Gilpin county, shows gold, silver and copper ore. Operated during part of 1920.
- SPRING GULCH MINING & MILLING CO.** COLORADO
 Presumably defunct. See Volume XIV.
- SPUR DAISY MINE** COLORADO
Address: John Brohl, lessee, Central City, Colo.
Property: at Central City, Gilpin county. Ore contains gold, silver, lead. Under development in 1920.
- SQUARE DEAL GOLD MINING CO.** COLORADO
Address: Central City, Gilpin county, Colo.
Officers (at last accounts) R. J. Foster, pres., 424 Wyoming St., Scranton, Pa.; Max Frank, v. p.; E. H. Lawall, treas., with H. K. Griffith and L. F. Hueblein, directors.
 No capitalization or financial statement received.
Property: 3 patented claims, near Central City, said to show gold, silver, copper and lead ore in quartz vein. Vein strikes E. W., dips 65° N.
Development: 850' incline shaft, with 4 miles of workings.
 No work reported in several years. See Vol. XIV for litigation with **Coloma Mng. Co.**
- STANDARD CHEMICAL CO.** COLORADO
Office: Naturita, Colo.
Officers: Jas. C. Gray, pres.; A. R. Raymer, v. p.; H. A. Neeb, treas.; C. H. Viol, directors.
Property: 350 claims, including the Club group, in Paradox Valley, Montrose county, 60 miles from Placerville, shows vanadium-bearing and radium-producing ores.
 Company gives out no information, but is reported working at full capacity, October, 1921.
- STANDARD GOLD-BEARING M. & M. CO.** COLORADO
Officers: F. E. Groves, v. p. and mgr., Salida, Colo.; Hon. W. P. O'Brien, pres.; George L. Ramey, sec.; J. S. Ramey, treas.; with Jas. Zoeter, John Millner, and Dr. S. B. McFarland, directors.
Property: 8 claims, 144 acres, in Monarch district, Pass Creek, Chaffee county, shows fissure veins in granite porphyry that carry copper-lead ores. Values run \$4-\$16 per ton.
Development: by 900' of tunnel work with 285' back. Company had a mill with flotation equipment. Examinations have been made by Clyde H. Jay and J. H. Freeman. No recent report received.
- STANDARD MINE** COLORADO
Address: Frank Shearer, Breckenridge, Colo.
Property: at Breckenridge, Summit county, contains gold-silver-lead bearing ore. Operated during part of 1920.
- STANDARD MINES DEVELOPMENT CO.** COLORADO
Address: Paul Ramsey, Lake City, Colo.
Property: a lease and bond on the Little Chief silver-lead group, 3 claims, 2½ miles W. of Lake City, Hinsdale county. In December, 1920, a contract was let to extend the lower tunnel. Shipping ore mined from a shoot in the upper level, said to average 55.9 oz. silver per ton. Machinery being delivered, and a power-plant reported under construction in 1921.
- STANLEY CONSOLIDATED MINES CO.** COLORADO
Office: 1027 First National Bank Bldg., Denver, Colo. **Mine office:** Idaho Springs, Clear Creek county, Colo.

Officers: J. P. H. Cunningham, pres.; Geo. W. Johnson, v. p.; H. J. Wolf, sec.-mgr.

The property formerly owned by this company was acquired by Cunningham, Johnson & Fisher, a co-partnership, in August, 1916, by purchase, the old Stanley Mines Co., being dissolved. The S. M. company was incorporated 1904 with \$75,000 capital as successor to Consolidated Stanley Mining & Milling Co.

Property: 76 lode claims, 10 placer claims, 3 mill sites, all patented, near Idaho Springs. Veins carry gold and silver-bearing lead and copper ores.

Development: by 641' main shaft, and 5 others from 60' to 680' deep; 24 crosscuts, total 1,050'; Hukill tunnel, 380'; adits and drifts, 22,790'; raises, 5,460'; winzes, 570'; a total of 30,181'. Vein area stoped is 635,000 sq. ft. Past production is \$3,500,000. New company cleaned and retimbered main adit level 3,500' long and resumed active development, November, 1918. Work was continued during part of 1919 and 1920.

STAR GROUP

COLORADO

Address: John M. Larson, Aspen, Colo.

Property: a gold-silver mine at Tin Cup, Gunnison county, operated during part of 1920.

STAR OF THE WEST GOLD MINING CO.

COLORADO

Address: Central City, Colo.

Property: Star of the West gold-silver mine at Central City, Gilpin county.

Operated part of 1919, but made no shipments. Presumably idle, 1920-21.

STARS CONSOLIDATED MINING CO.

COLORADO

Address: Leadville, Colo.

Property: claims on Carbonate hill, Leadville, Lake county. In 1918, company erected the first 100-ton unit system of a 300-ton mill for treatment of low-grade iron-manganese ores. Mines being worked for most part by lessees.

STAR TUNNEL & MINING CO.

COLORADO

Company dissolved February, 1921. Fully described in Vol. XIV.

STRATTON CRIPPLE CREEK M. & D. CO., THE

COLORADO

Address: Wm. Lloyd, sec., P. O. Box 178, Colorado Springs, Colo.; or F. M. Keeth, supt. Box 68, Cripple Creek, Colo.

Property: about 600 acres including the American Eagle, Abe Lincoln, Longfellow, Orpha May and other mines on Bull hill and Globe hill at Cripple Creek, Teller county, with the typical veins of the district. Company is operating the American Eagle mine and has lessees at work on other properties. In 1920, good ore was being extracted from a depth of 750' in the American Eagle shaft.

Matoa Gold Mng. Co. is a subsidiary, and there are a half dozen or more incorporated leasing companies working on Stratton ground.

STRATTON'S INDEPENDENCE

COLORADO

Out of business. See Vol. XIII.

STRONG GOLD MINING CO.

COLORADO

Address: Owen Roberts, lessee, Box 202, Victor, Colo.

Inc. 1892, in Colo. Company is a close corporation, owned by the Giddings-Lennox interests of Colorado Springs.

Property: in the Cripple Creek district. shows a cluster of veins in granite, carrying large shoots of ore. The yield of gold per acre is said to be the richest of any mine in the district. Twelve sets of sub-lessees reported at work.

Development: by 1,800' shaft with extensive levels and drifts. Lessees are working on every level from 300 to 1,500' depth.

Equipment: complete for a considerable output.

Production: over \$10,000,000. In 1920 the monthly output was about 600 tons of \$20 ore.

SULPHIDE GROUP**COLORADO**

Address: Elliott & Da Lee, lessees, Redcliff, Colo.

Property: a silver mine at Redcliff, Eagle county, operated during part of 1920.

SULPHURET MINING & REDUCTION CO.**COLORADO**

Address: Lake City, Colo.

Officers: W. B. Thomas, pres.; W. C. Humphrey, sec.; H. G. Heath, treas.

Inc. in 1919. Cap. \$100,000.

Property: a bond and lease on the Cora and Sulphuret silver properties 1½ miles from Lake City, owned by H. G. Heath.

Development: by 216' shaft and tunnels. Company plans concentration plant with flotation unit. Developing in 1920. but no shipments made.

SULPHURIC MINING & REDUCTION CO.**COLORADO**

Address: Lake City, Colo.

Property: sulphuric silver mine at Lake City, Hinsdale county, operated during part of 1920.

SUMMIT COPPER MINING & MILLING CO.**COLORADO**

Offices: Ironton Colo., and Federal Reserve Bldg., St. Louis, Mo.

Officers: Frederick Kohn, pres.; R. A. Morris, sec.; G. P. Heckel, mgr.;

J. F. Roper, supt.

Inc. 1915, in Colorado. Cap. \$500,000; \$1 par.

Property: 34 claims, patented, 200 acres, including Carbon Lake, Camp Roberts and Koehler groups and a 20-acre mill-site, all located in Red Mountain district of Ouray and San Juan counties. Mines said to show veins in porphyry ore carrying 12% copper, 10% lead, 10 oz. silver and about \$3 gold per ton. Property was formerly owned by San Antonio Mining Co. Examined in August, 1919, by Kirby Thomas.

Development: by 37' and 200' shafts, the 625', Camp Roberts tunnel and 2,800' Koehler tunnel; driving a raise 310' from the Koehler tunnel to the Carbon Lake workings.

Operated part of 1919, but shipped no ore.

SUMMIT METAL MINES CORPORATION**COLORADO**

Address: R. H. Wilson, mgr., Telluride, Colo. A. J. Weinig, supt.

Officers: R. H. Wilson, pres.; D. N. Rosen, v. p.; R. L. Kryder, sec.; J. B. Merriman, treas., with R. P. Hassler, directors.

Inc. 1918, in Colo. Cap. \$2,000,000; \$1 par; 1,250,000 shares outstanding.

Property: 19 claims, 14 patented, about 225 acres, includes the Summit mine in Iron Springs district, San Miguel county. Ore occurs in quartz fissure veins in andesite and porphyry, 2'-2' wide, containing principally gold and silver.

Development: by 3 miles of tunnels to depth of 1,400', with estimated blocked out reserves of 70,000 tons of ore running \$9-\$35 per ton.

Equipment: includes 325 cu. ft. compressor, water power, 1 mile tramway and an old 100-ton concentration and cyanidation mill. The mill is being remodelled and extensive development work planned.

SUNBURST CONSOLIDATED MINES CORP'N.**COLORADO**

Address: c/o Tallmadge Kvner, Savoy Hotel, Denver, Colo. Mine address: Georgetown, Colo.

Inc. in Colorado. Cap. \$1,000,000; \$1 par. In treasury 400,000 shares. Registrars and transfer agents, U. S. Corporation Co., N. Y., and Metropolitan Trust Co., Boston, Mass.

Property: 16 patented, 3 unpatented claims and 3 patented mill sites, includes Sunburst, Astor, Stewart, Sceptre and Wolverine mines on Republican and Democrat mountains, near Georgetown, Clear Creek county.

Geology: ore carries about 10 oz. silver, 10% lead, 12% zinc, and \$2.40 gold in the low-grade area, an ore from which company expects to net almost

\$25 a ton. In other sections, silver is reported as running from 150 to 500 oz. per ton. Principal veins are in gneiss and pegmatite.

Development: by Sceptre tunnel, 3,200' long; Grant, 1,000' long, and Sunburst, 900'. A 380' raise from Sceptre to Grant and Sunburst tunnels was completed in 1918. The main tunnel was re-timbered in 1919, and lessees opened some rich silver ore.

Equipment: includes compressor, transformer, blacksmith shop. Aerial tram, 6,935' long connecting loading station with Col. & Southern R. R. at Georgetown, costing \$25,000, was completed early in 1919.

Operated by lessees; no shipments made in 1920.

SUN-MOON LEASING CO.

COLORADO

Fully described in Volume XIV. Mine operated by Hill Top S. M. Co., which see.

SUNNYSIDE GOLD MINES CO.

COLORADO

Defunct. Property taken over by The Sunnyside Mining & Milling Co., a subsidiary of the U. S. S. R. & M. Co.

SUNNYSIDE MINING & MILLING CO., THE

COLORADO

Fully described under own title in Vol. XIV. Subsidiary of the U. S. Smelting, Refining & Mining Co., which see.

SUNSET MILLING CO.

COLORADO

Address: Sunset, Colo.

Property: Lalla Rookh gold-silver mine at Sunset, Boulder county, operated during part of 1920.

SUN TUNGSTEN CO.

COLORADO

No work done since 1917. Was a G. R. Q. proposition and not favorably regarded. Described in Volume XIV.

SURETY GOLD MINING CO.

COLORADO

Address: Idaho Springs, Colo.

Property: the Orinoco gold-silver mine at Idaho Springs, Clear Creek county.

Operated during 1919-'20, and '21.

SWARTHMORE CONSOLIDATED MINING CO.

COLORADO

Officers: Chas. B. Galbreath, pres.; Harvey Hanes, v. p.; J. E. Carpenter, sec.; Paul Barriclow, treas., at last accounts.

Inc. July, 1907, in Colorado, as a merger of the Swarthmore Copper Co. and Enterprise Mining Co. **Cap.** \$3,500,000; \$1 par.

Property: 17 claims, 11 patented, 60 acres, near Eldora, Boulder county, includes the Golden Fleece mine, having fissure veins in pre-Cambrian gneiss cut by dikes. Vein said to average 8' wide and to carry a paystreak of 3 to 5% copper ore with occasional telluride of gold.

Development: by 5 shafts, deepest 403', and by tunnels of 800', 1,000' and 2,000'.

Equipment: includes 2 small steam plants, a 60-h. p. hoist and a 12-drill air-compressor, a small concentrator with a 50-ton chlorination plant, and 4 mine buildings.

Property leased to Consolidated Leasing Co. since 1917.

SWEET HOME MINE

COLORADO

Address: Kasel & Bartos, lessees, Alma, Colo.

Property: at Alma, Park county, contains silver-copper-lead bearing ore. Operated during part of 1920.

SYNDICATE MINING & MILLING CO.

COLORADO

Mine office: Rico, Dolores county, Colo. Geo. E. Hicks, supt.

Is a reorganization of the Rico Mining Co., whose property was sold October 29, 1917, to a reorganization committee and transferred to the Synd. M. & M. Co., a corporation capitalized at \$500,000.

Property: 156 claims, 1,110 acres, with 20-acre mill site and 320 acres coal land, in the Pioneer district, Dolores county, includes the Group and Syndicate mines. Ore occurs in fissure veins as lime replacements. Veins are reported to vary from a few inches to 15' in width, traceable a mile long and to be proven to a depth of 700'. In one mine the ores carry 4% copper,

10% lead, 10% zinc and 10 oz. silver, the copper ore occurring as chalcopyrite associated with pyrite, sphalerite and galena in fluoritic gangue.

Development: by tunnels, 1,000 to 3,000' long. A crosscut tunnel was planned, 1919, to run through the group and to cut 3 veins. Equipped with 125 hydro-electric power at mine and 100-h. p. at mill. There are two 75-h. p. hoists, 2 compound air compressors, 10 air drills and 1 air electric drill; two 9 by 15" Blake crushers, 18 Wilfley tables, etc.

Production: up to 1918 estimated at 1,200,000 lb. copper. Operated and produced during 1919. No figures available.

TALISMAN MINE**COLORADO**

Address: George Stahl, care Vindicator Consolidated G. M. Co., Independence, Teller county, Colo.

Property: about 5,000 acres directly N. of the main mineralized belt of Cripple Creek. Acting on the theory of W. H. Trask of Denver, in which he argues that below the granite overburden are valuable orebodies, diamond drilling is under way. By January 1921, the first hole on the Wild ranch was 1,357' deep, at 1,290' the drill entered 'dike' formation, showing fluorite, with a trace of gold. No 2 hole on the Talisman claim was 400' deep early in 1921: at 390' a phonolite dike, 7' wide, was cut; is to be sunk to 800'.

TAMASOA MINE**COLORADO**

Address: Cicero Barber, Idaho Springs, Colo.

Property: at Idaho Springs, Clear Creek county, contains gold-silver-lead bearing ore. Operated during part of 1920.

TARBOX TUNNEL MINE**COLORADO**

Address: J. L. Tarbox, Clayton, Ill.

Property: at Ward, Boulder county, contains gold-silver-bearing ore.

TAYLOR MINES CO.**COLORADO**

Address: Central City, Colo.

Property: the Homer gold-silver mine, at Central City, Gilpin county. Operated during 1919 and 1920.

TAYLOR MOUNTAIN MINING CO.**COLORADO**

Address: D. E. Cook, asst. sec., Chippewa Falls, Wis. **Mine office:** Garfield, Chaffee county, Colo. W. F. Norway, pres.

Inc. Oct., 1905, in Colorado. Cap. \$1,200,000; shares \$1 par. Annual meeting, in November.

Property: the Lily mine, 7 claims, 65 acres in the Monarch district, 1½ miles from Garfield and 19 miles from Salida. The property has a nearly vertical N.-S. contact vein, between granite and limestone, carrying lead and copper ores and showing copper ore which the management estimates to average 6% copper and 2 oz. silver per ton.

Development: by a 280' main shaft, with 4,000' of workings.

Equipment: includes electric power with 16-h. p. hoist and 35-h. p. air compressor. Shipments made in 1918.

TEK MINING, MILLING & LEASING CO.**COLORADO**

Presumably defunct. See Volume XIV.

TELESCOPE MOUNTAIN MINING CO.**COLORADO**

Address: 32 Midland Block, Colorado Springs, Colo.

Property: the Telescope mine at Chattanooga, San Juan county. Operations started in fall of 1917, but owing to internal difficulties among the stockholders and officials, mine was closed until April, 1918. The Maude vein on property said to show ore that assays 50% lead, 8-10 oz. silver, with small gold values. Development continued during 1919.

Equipment: includes compressor and power.

TENDERFOOT HILL CONS. MNG. CO. COLORADO-SO. DAKOTA

Office: 317 Exchange Nat'l. Bank Bldg., Colorado Springs, Colo.

Officers: W. A. Otis, pres.; L. L. Aitken, v. p.; A. D. Aitken, sec.; Russell H. Forbes, treas.

Cap. \$1,500,000; \$1 par; all issued. Listed on Colorado Springs Stock Exchange. No liabilities and no production. Cash in treasury, January 1, 1919, \$11,036; securities, \$3,675.

Property: 61 acres on Tenderfoot hill, Cripple Creek district, Teller county, and 93 acres in the Black Hills, South Dakota.

Development: main shaft on Cripple Creek property, 511' deep with 600' of drifting. Black Hills property has drifts, tunnels and crosscuts totaling about 1,350'. Idle several years.

TENNESSEE MINING & MILLING CO. COLORADO

Office: care J. W. Thaver, sec., 715 Belmont Ave., Chicago, Ill.

Officers: J. W. Loofhourow, pres.; S. B. Anderson, v. p.; J. F. Kidnell, treas., and H. J. Fersdick, directors.

Inc. Feb. 11, 1911, in Colorado. **Cap.** \$400,000; \$1 par; issued 294,050. Annual meeting, August 13. Company is a reorganization of the Gold Bug Mining Co.

Property: leased to the Golden Empire M. Co., which see.

TEPEE MINING & DEVELOPMENT CO. COLORADO

Probably dead. See Volume XIV for description.

TERRIBLE DUNDERBERG MINING & POWER CO. COLORADO

Company liquidated; entire assets sold to the Denhigh Silver Lead Mines Co., which see.

THIRD VENTURE MINING CO. COLORADO

W. A. Palmer, pres.-mgr., Leadville, Lake county, Colo.

Property: the St. Louis and Colorado Prince claims, on Breece mountain, at Leadville.

Development: by 1,450' tunnel.

Equipment: electric, with air-compressor.

Work reported resumed in September, 1921.

THOMPSON MINE COLORADO

Address: Dan Hill, Elkton, Colo.

Property: a gold mine at Cripple Creek, Teller county, operated during part of 1920.

THURN MINING & LEASING CO. COLORADO

Address: 618 Harrison Ave., Leadville, Colo.

Property: Hibsche mine at Leadville, Lake county. Ore contains silver, lead and manganese.

TIPPECANOE MINE COLORADO

Address: C. C. Bracken, Boulder, Colo.

Property: at Rowena, Boulder county, contains gold-silver bearing ore. Mine and mill operated during part of 1920.

TOMBOY GOLD MINES CO., LTD., THE COLORADO

Under management of Exploration Co., Ltd. of London.

Offices: H. F. Wreford, sec., 24 Lombard St., London, E. C. 3, England; 61 Broadway, New York; care N. S. Kelsey, gen. mgr., Tellurida, Colorado.

Officers: Marquess of Ormonde, chairman; Marquis d'Hautpoul and I. H. M. Shaw, directors.

Operating staff: N. S. Kelsey, gen. mgr.; J. S. Peterson, gen. supt.; K. K. Betty, met. adviser; T. H. Stephenson, sec.; P. L. Foster, cons. engr.

Inc. June 7, 1899, in England. **Cap.** £350,000; shares £1 par; 310,000 issued.

Financial statement, years ending June 20:

Year	Revenue	Profit	Dividends	Previous Balance	Balance Forward
1921.....	£235,271	£2,681†	£1,581**	£4,262*
1920.....	208,925	42,891†	21,310	21,581*
1919.....	\$861,700	\$67,000	\$168,000
1918.....	1,131,267	287,843	111,000	149,000	168,000
1917.....	1,180,000	346,000	149,000	94,560	149,000
1916.....	1,120,320	369,200	149,000	99,760	94,560

*Debit. **After income tax refund, £20,000. †Operating loss of £4,894, plus £37,997 for taxes and depreciation in 1920; and in 1921, depreciation, etc., of £20,687, less £18,006 operating gain.

Dividends: since 1899, to June 1918, total is 56s. per share, equal to 280%.

Property: included, July, 1915, 76 claims; others have since been added. Original holdings were the claims acquired from the old Tomboy Gold Mines Co. of W. Va., also claims carrying a parallel vein, known as the Argentine. Later the company bought the claims containing the Montana vein and its northern extension from the Nevada Tunnel Co. The Sidney-White Cloud property was acquired in 1916, for \$75,000. All in San Miguel county.

Geology: the veins in the Telluride district are filled fissures, 2½' to 4' in width, larger lodes sometimes appearing as a number of parallel plates of filled veins separated by sheets of altered rock. Country rock is andesite, rhyolite and San Juan tuff, with underlying sedimentaries in which the existence of the veins has not been proven. Principal metallic minerals are gold, pyrite, galena, zinc blende, and chalcopryrite. Ores contain 2 to 3% sulphides, and yield about \$6 in gold and a few ounces of silver per ton. For geology of the district, see U. S. G. S. Geologic Folio No. 57; also Lindgren's "Mineral Deposits."

Development: on the Tomboy and Montana properties to 2,400' depth, and on the Argentine to 2,200'. In the Argentine lower levels is a large quantity of complex sulphide ore containing zinc, lead and copper, which will be profitable by flotation. The Montana mine is opened longitudinally by the Ophir or 1,740' level, also 300' beyond the boundary.

In the year 1918, 568' of new work was done in the Argentine mine, opening a 5' vein for 359' on the 1,900' level, assaying \$3.62 in gold and silver, 4.5% lead, 6.89% zinc, and 0.8% copper; and for 111' on the 2,100' level, 4.2' of ore, running \$2.83 gold and silver, 2.13% lead, 4.42% zinc, and 0.95% copper. New work in 1919-20 covered 1,155'. The vein on the 1,750' level is 4' wide, assaying \$2.77 gold, 4.4% lead, 6.3% zinc, and 1.5% copper. No development was done 1920-21. Reserves are estimated at 285,000 tons.

In the Montana mine, the reserves aggregate 603,000 tons. New work on the Virginius vein in 1918-19, disclosed 3' of ore for a length of 900', that averaged \$9 in gold and silver. During 1919-20, this vein continued to reveal good ore. A typical assay is \$21.32 gold and silver, 5.3% lead, 7.9% zinc and 0.5% copper, across 14 inches. Extensions in the Montana mine during the year totaled 2,208', and in 1920-21, 1,588'. A parallel vein, opened for 200', shows 4' of \$12 silver and 5.9% of lead ore.

The grade of ore in the Montana is somewhat lower than heretofore, due partly to the presence of waste, but it is hoped to increase the average grade by adding richer ore from the Virginius vein, in which reserves are now (1921) being developed. Fortunately the increased tonnage treated has lowered the per ton cost.

Equipment: electric power and flotation plant erected in 1919, capable of treating up to 450 tons daily.

Production: years ending June 30:

Year	Tons crushed	Total yield	Yield per ton	Cost per ton
1921.....	197,557	\$ 876,356	\$4.44	\$3.98
1920.....	146,066	811,990	5.56	5.59
1919.....	155,334	864,699	5.56	5.10
1918.....	151,028	1,135,389	7.50	5.66
1917.....	148,939	1,150,611	7.72	5.57
1916.....	150,488	1,074,088	7.14	4.92

Tomboy has still a good future, especially now that flotation permits the complex ore to be treated.

TOM, DICK, AND HARRY MINING CO.

COLORADO

Address: Room 24, State Capitol, Denver, Colo.

Property: Tom, Dick and Harry gold-silver claims at Twin Lakes, Chaffee county.

Operated during part of 1919 and 1920.

TONOPAH PLACERS CO.**COLORADO**

Controlled by the Tonopah Mining Co., Tonopah, Nev., which owns 83⅓% capital stock.

Office: Bullitt Bldg., Philadelphia, Pa. **Operating office:** Breckenridge, Colorado. J. E. Hopkins, supt.

Cap. \$1,000,000; \$1 par. Notes outstanding, \$46,000.

Financial statement: years ending Dec. 31:

Assets.			
Year	Property and plant	Current	Total
1920.....	\$1,067,703	\$135,693	\$1,203,396
1919.....	1,079,422	154,399	1,233,821
1918.....	1,075,162	152,947	1,228,110
1917.....	1,183,426	172,410	1,355,627

Liabilities.					
Year	Capital	Notes due	Current	Surplus	Total
1920.....	\$1,000,000	\$46,000	\$12,117	\$145,279*	\$1,203,396
1919.....	1,000,000	56,000	78,525	99,296	1,233,821
1918.....	1,000,000	56,000	92,326	79,784	1,228,110
1917.....	1,000,000	112,000	80,001	163,626	1,355,622

*This amount plus \$32,205 reserved for depletion of properties.

Income Account

Year	Revenue	Other income	Total	Expenses	Profit or loss
1920.....	\$233,662	\$3,329	\$236,991	\$181,008	†\$55,983
1919.....	309,509	6,788	316,297	293,225	† 23,072
1918.....	282,974	10,005	292,979	332,902	39,923

Property: placer claims, 4,800 acres, near Breckenridge, Summit county, on which 3 dredges operate for about 9 months each year. Because of unprofitable ground, one dredge ceased operations in Dec., 1919; a second dredge operating on ground leased from the Long Island Mng. Co., ceased for same reason, Dec., 1920. Both will be dismantled and sold. Reported prospecting with drill late in 1921 and operating one dredge on the Blue river below Breckenridge. This enterprise is apparently about at an end.

Production:

TOPEKA CONSOLIDATED MINING CO.**COLORADO**

Idle. Probably dead. Fully described in Volume XIV.

TORONTO MINING CO.**COLORADO**

Office: 401 Jacobson Bldg., Denver, Colo.

Officers: G. W. Summers, pres.-treas.; Stephen Haskins, v. p.; E. H. Summers, sec.; J. J. Elliot, supt., with F. G. Elliot, directors.

Inc. 1918, in Colorado. **Cap.** \$100,000; \$1 par.

Property: Congress mine, a patented lode claim, in Enterprise mining district, Gilpin county, two miles from Blackhawk. The mine was held under bond and lease to March, 1921, for \$18,375. Vein is 3' to 60' wide, carrying iron and lead carbonates with native silver and said to average about \$3 per ton in gold.

Developed by shaft, 350' deep with about 600' of drifts and considerable stoping.

Equipment: includes a 60-h. p. hoist.
Operated during part of 1919 and 1920.

TREASURE MOUNTAIN MINES, INC.

COLORADO

Successor to Martin Mng. & Power Co., Inc.

Address: Samuel G. Martin, pres., Rm. 720, 67 Exchange Place, New York.

Mine address: S. Lawrence Martin, mgr., Eureka, Colo.

Officers: S. G. Martin, pres.; Willard B. Jones, v. p.; Gibson and Zahner, directors.

Inc. 1920, in Colo. **Cap.** \$600,000; \$10 par; changed to \$6,000,000; \$1 par; 3,500,000 shares issued.

Property: 34 claims, 600 acres, 215 lots, 13 acres; other property, held by agreement and lien, option, etc., 1296 acres, located in Silverton quadrangle and Eureka mining district, San Juan county.

Geology: eruptive porphyry cut by fissure veins. Company claims to have three vein zones; first, from 20-60' wide, carrying some native gold; second, a copper-silver vein; third, several zinc-lead-silver veins.

Development: by 15,000' of tunnels the lower Martin Carrier tunnel at the side of the railroad track, will, according to company, cut 20 known veins within 10,000'. Management reports over 3,000,000 tons of partly developed ore, with an average gross value of \$12 per ton. About \$500,000 has been expended in development and exploration work, but company idle in 1921.

Equipment: plans include from 1,000 to 2,000-ton mill, water power, tram and compressor plant.

TREASURE VAULT MINE

COLORADO

Address: W. G. Arkills, Idaho Springs, Colo.

Property: at Idaho Springs, Clear Creek county, contains gold-silver-lead bearing ore. Operated during part of 1920.

TUCKER MOUNTAIN M. & M. CO.

COLORADO

Mail unclaimed and company probably dead. See Volume XIV.

TUNGSTEN EXPLORATION CO.

COLORADO

Out of business. See Volume XIV.

TUNGSTEN GIRL CO.

COLORADO

Out of business. See Vol. XIV.

TUNGSTEN METALS CORPORATION

COLORADO

Out of business. Mail returned in 1920. See Vol. XIV.

TUNGSTEN MOUNTAIN MINES CO., THE

COLORADO

Offices: Boulder National Bank Bldg., Boulder, Colo., and care I. D. Maxwell, Tungsten, Colo.

Officers: J. G. Clark, pres.; Thomas Leeke, v. p.; F. N. Totman, sec-treas., with S. A. Greenwood and L. W. Means, directors.

Inc. Oct. 6, 1916, in Colorado. **Cap.** \$1,250,000; \$1 par; 1,049,500 issued.

Balance sheet of September 30, 1918, shows assets of \$1,314,184, including mining claims and equipment, \$1,268,590; mine development, \$34,456; notes receivable, \$10,899; cash, \$434. Liabilities include surplus, \$63,429; and accounts payable, \$755.

Property: 42 claims, 24 patented, 360 acres, in Grand Island district, Boulder county, contains tungsten deposits in veins.

Development: to depth of 300 to 800' by shafts, and tunnels, totaling 2,400', but apparently nothing done during 1919 or 1920, on account of the tungsten market. Work started June, 1917. Lessees were reported producing steadily.

TUNGSTEN PRODUCTS CO., THE

COLORADO

Reported succeeded by Carnotite Products Co., and latter absorbed by The Radium Co. of Col. (q. v.), April, 1921.

Office: Boulder, Colo. **New York office:** 43 Exchange Place. **Mines office:** H. K. Thurber, mgr., Grand Junction, Colo.

Officers: W. F. Bleecker, pres.; H. C. Morgan, v. p.; Morgan Belmont, treas.; J. H. Holmes, Jr., sec.; also directors.

Company operates a tungsten and carnotite reduction plant at Boulder, Colo.; operated 1920 and 1921 with manufacture of ferrotungsten, tungsten powder, ferrovanadium, ferromolybdenum, radium and radium products. During 1919, the plant operated on ore from China, also made radium compound from carnotite ore.

Mining property: a large acreage of carnotite ground near Gateway, Colo. First shipment of radium bromide valued at \$50,000, was made from the Boulder plant in February, 1921. On Oct. 26, 1920, about 100 carnotite bearing claims S. of Moab, Grand county, Utah, were purchased from the Kearns estate of Salt City for \$150,000.

Property said to be in operation, 1921. Closely associated with **Tungsten Products Mining Co.**, which see.

TUNGSTEN PRODUCTS MINING CO.

COLORADO

Office: 3-8 William Block, Boulder, Colo.

Officers: W. F. Bleecker, pres.-mgr.; R. D. George, v. p.; L. C. Schultz, treas.; M. C. Goss, sec. with Harry Cassaday, directors.

Inc. in Colorado. Cap. \$2,500,000; par \$1.

Property: owns and operates Luckie 2 groups of mines, 112 acres, 9½ miles from Boulder, in Boulder Canyon, between Middle and North Boulder Creek. Ore averages 2%-6% tungsten. The Luckie 2 and Lookout are the best developed mines.

Company has an arrangement with Carnotite Products Co. (formerly the Tungsten Products Co.), whereby the Products Co. contracts to treat the Mining Company's ore at a reasonable charge, and the Mining Company has an option to purchase control of the Carnotite Products Co. at a reasonable price.

TURNER MINE

COLORADO

Address: Fitzmorris & Co., Idaho Springs, Colo.

Property: at Idaho Springs, Clear Creek county, contains gold-silver-lead-copper bearing ore.

TURRET MINING & MILLING CO.

COLORADO

Address: Salida, Colo.

Officers: R. F. Stratton, pres.; T. Richardson, v. p.-treas.; G. K. Mann, sec., with F. M. Stratton and L. S. Wade, directors.

Inc. in Colorado. Cap. \$100,000; \$1 par.

Property: the Copper King group of 4 claims in Turret district, Chaffee county, about 8 miles from Salida.

Geology: veins occur in mica-schist that alternates with black gneiss, cut by dikes of quartz porphyry. Croppings of amphibolite carry fibrous asbestos and crystallized hornblende. Average value of ore reported as, gold, \$1.40, silver, \$2.00 and copper, \$22 per ton. Company claims 25,000 to 50,000 tons in sight.

Operated part of 1919, but shipped no ore.

TWIN PORTS & EMPIRE MINING CO.

COLORADO

Formerly Duluth & Empire Mining Co.

Address: Frank Brady, supt., Empire, Colo.

Officers: C. D. Pelletier, pres., Rm. 27, Wisconsin Blk., Superior, Wis. J. E. Teporter, v. p.; P. J. Borgstrom, sec.; O. G. Olsen, treas., with H. R. Corey, T. W. Leahy and Z. E. Darrow, directors.

Inc. in Colorado. Cap. \$500,000; \$1 par; 200,000 issued, 100,000 for property 100,000 for cash at par and 198,000 pooled. Bonds authorized \$50,000 (for mill), convertible 1927; over \$4,000 issued.

Property: 16 claims, 2 tunnel sites and 5-acre mill site, about 520 acres, in upper Union district, Clear Creek county, 8 miles W. of Idaho Springs. Company organized 9 years ago as a consolidation of 14 properties whose location, high up on a mountain side, permit working by a tunnel.

Ore: gold and complex lead zinc pyrite, also galena in the Pelletier vein.

Development: main tunnel 2,900' with face 1,100' below surface, exposes 15 veins. There is also 1,100' of drifting (850' on Columbine vein alone.) The Columbine vein with average width of 5' carries ore assaying \$2 to \$20 per ton. A 500' tunnel, 600' above main tunnel, also exposes this vein. The Pelletier vein developed by 190' tunnel, will be cut by new tunnel 3,400' from portal, and 1,500' below existing workings.

Equipment: tramway, 60-h. p. hoist, air-compressor and drill.

Operated part of 1919-20, but shipped no ore.

TYMOS MINES CO.

COLORADO

Address: J. A. Theobald, sec., Breckenridge, Colo.

Property: claims on Shock hill, near Breckenridge, Summit county.

Development: by 300' shaft, and crosscut, being driven on this level, in 240' at end of 1920, to connect with the Brooks-Snyder property.

JILLA MINE

COLORADO

Address: Lively & Wells, Empire, Colo.

Property: in Empire district, Clear Creek county, contains gold-silver bearing ore. Operated during part of 1920.

UNION MINING & DEVELOPMENT CO.

COLORADO

Address: Mrs. Emerson J. Short, 1531 S. Washington, Denver, Colo.

Officers: Mrs. E. J. Short, pres.-treas.; L. A. Short Stinson, v. p.; G. J. Short, sec., with M. W. Spaulding and Mrs. Sadie R. McBride, directors. Inc. 1903, in Colo. Cap. \$1,250,000; \$1 par; 791,000 shares outstanding.

Property: 2 patented claims, 320 acres, near Lakewood, Boulder county.

Ore occurs in fissure veins in granite and limestone, containing copper, tungsten and traces of gold and silver.

Development: by 75' shaft. **Equipment:** steam power, compressor and hoist.

A prospect. Idle since 1917.

UNION MINING & MILLING CO.

COLORADO

See Ouray Union M. & M. Co.

UNITED GOLD MINES CO.

COLORADO

Offices: Exchange Natl. Bldg. Colorado Springs, Colo. and Cripple Creek, Colo.

Officers: A. E. Carlton, pres., L. G. Carlton, v. p.-gen. mgr.; with R. Roelofs, W. D. Wright and C. S. Davis, directors. H. D. McDonald, sec.-treas.; Lynn Richmond, supt.

Inc. in Colorado. Cap. \$5,000,000; par \$1; in treasury, 9,159 shares; unissued January, 1919, 990,931 shares. Total dividends to date, \$561,179; last dividend paid January, 1920, amounted to \$40,000. Stock listed on Colorado Spring Stock Exchange.

Financial statement for 1920 shows receipts, \$22,709; expenditures, \$26,738; operating loss, \$4,028.

Controls several subsidiary mining companies at Cripple Creek, Teller county, including the W. P. H. Damon and Montrose Co., Ironclad Hill, May B. Squaw Mountain, Deadwood, Wild Horse, Requa Gold Mining & Milling Co., B. H. & S. M. Co., on Bull hill. In October, 1917, the B. H. & S. Co.'s property was purchased outright for \$31,642.

Development: for 1920 totaled 1156' of which 835' was done on company account. The feature of 1920 was the finding of rich ore at a depth of about 60' in the Hardwood claim of the Damon group. The vein is 5' wide and flat, averaging over \$100 per ton. The Bonanza ore averaged \$30.52 per ton.

Production: total for 1920 was 1,523 tons, having a gross value of \$74,223. Output on company account was \$41,585 and royalty received amounted to \$20,489.

UNITED IMPERIAL MINING CO.

COLORADO

Address: 233 Coronado Bldg., Denver, Colo.

Property: the Tobin and Imperial gold-silver claims at Georgetown, Clear Creek county.

Operated part of 1919 and 1920, but shipped no ore.

U. S. GOLD CORPORATION

COLORADO

Address: John R. Wolff, Boulder, Colo.

Officers: N. P. Garretson, Topeka, Kan., pres.; J. R. Wolff, v. p. and gen. mgr.; W. T. McGinnis, sec.-treas.; with J. W. Middlesworth, J. H. Howry, F. E. Campbell and C. N. Watts, directors.

Inc. 1903, in Colorado. **Cap.** \$3,500,000; \$1 par; 3,271,062 outstanding.

Property: the Klondike group, 225 acres, patented, Sphinx group, 22 mining claims, in Boulder county, and Livingston group, 50 acres. Company also owns 50,000 shares, or entire capital stock of the U. S. Reduction Co., which owns the mill. Claims show fissure veins in porphyry, carrying gold ore. Widths, 3-15', in different workings; mill feed varies from \$4-\$12 per ton.

Production: 34 tons of ore shipped, 1915, to Denver smelters, which netted \$1,414. Company reported April 10, 1916, bullion to the amount of \$15,086 shipped to U. S. Mint, Denver, and that 7 tons ore shipped to Denver smelter Feb. 9, yielded \$1,974. Mill was treating up to 100 tons daily at end of 1916. During 1917 the yield was about \$75,000 from 15,000 tons of ore. All work is now limited to leasing, but when conditions are more favorable, company work will be resumed on the Klondike and Sugar Loaf groups.

UNITED STATES MINING CORPORATION

COLORADO

W. R. Benzie, 502 Majestic Bldg., Denver, Colo.

Inc. in Colorado. **Cap.** \$50,000; shares \$1 par. "No individual liability."

Organized to operate leases in the Cripple Creek district. Was a stockholder's mail order promotion. Probably defunct.

UNITED STATES MINING CORPORATION

COLORADO

Address: E. C. Condit, Silverton, Colo.

Property: the Astor, Copper Bell, Mable, and Toltec silver-lead mines in the Gladstone district, San Juan county. The Toltec has been opened by a tunnel. Work was held up for 9 years by litigation. Developing 1920-1921.

UNITED STATES RARE METALS CO.

COLORADO

Address Tarryall Creek, via Lake George, Park Co., Colo.

Property: 8 miles N. of Lake George, produces molybdenite.

U. S. REDUCTION & REFINING CO.

COLORADO

Dead since 1916. See Vol. XIV and previous volumes.

UNITED STATES ZINC CO.

COLORADO

Subsidiary of A. S. & R. Co., which owns all stock.

Office: 120 Broadway, New York. **Operating address:** F. C. Gilbert, mgr., Denver, Colo.

The works, known as the Blende Plant, at Pueblo, Colo., have 2,320 retorts for smelting zinc. Plant was operated at greatly reduced capacity in 1919. In Dec., 1920, company was converting the smelter into a zinc oxide plant, at a cost of \$10,000 per unit.

Company also operates zinc smelters at Sand Springs and at Henryetta, Okla.

UNITED VERDE MINES

COLORADO

John Miner, owner, Verde Camp, via Westcliffe, Custer Co., Colo.

Property: 7 claims, about 50 acres, in Verde mining district, Custer county. Sulphide ore occurs in shoots and pockets, containing gold, silver and copper.

Development: by 500' shaft and 100' tunnel.

UNIVERSAL ORE PRODUCTION SYNDICATE

COLORADO

Apparently idle since 1918, and company dormant. See Volume XIV for description of holdings.

U. P. R. MILLING & MINING CO.**COLORADO**

Property: the Buell concentrator at Central City, Gilpin county. Mill leased 1919 to Fuller, MacCulloch Co., which see.

UP TO DATE MINING CO.**COLORADO**

Address: John R. Wolff, mgr., 1216 Pearl St., Boulder, Colo. A. F. Hankins, supt., Caribou, Colo.

Officers: John R. Wolff, pres.; F. W. Kohler, v. p.-treas.; W. T. McGinnis, sec., with G. A. Stephens and I. S. Blackwell, directors.

Inc. 1902, in Colorado. **Cap.** \$750,000; \$1 par; 12,000 shares in treasury.

Property: Eureka group, 20 claims, 2 patented, 200 acres in Grand Island district, Boulder county. Ore occurs in a fissure vein on a contact between monzonite porphyry and pyroxenite granite, containing gold, silver, copper and lead.

Development: by tunnels and 200' shaft to depth of 400', with 4,000' of workings.

Equipment: hoist, compressor, pumps and electric power.

Production: 30,000 oz. silver to end of 1917. Only development work done in recent years. Financed by sale of treasury stock.

URANIUM CHEMICAL CO.**COLORADO**

Address: Grand Junction, Colo.

Property: formerly owned by the National Radium Products Co., consists of 18 claims, 360 acres, in Gateway mining district, Mesa county. Ore is a blanket deposit in sandstone yielding 1½% uranium oxide and 3% vanadium oxide. Output to 1919 was about 72,000 lb. of these metals.

Equipment: includes a 10-ton concentration mill. Reported enlarging experimental plant to 200 milligrams of radium salts per month.

UTAH-COLORADO MINING & MILLING CO.**COLORADO**

Office: Wm. Penn Hotel, Denver, Colo.

Officers: Chas. E. Havener, pres.; John E. Maider, treas., with Wm. A. Brumond, John W. Phares, and L. C. Withington, directors. M. C. Havener, sec.; Edward Manion, mng. engr.

Inc. January 13, 1920, in Colo. **Cap.** \$1,000,000; \$1 par; 666,000 shares outstanding. All the outstanding stock is owned by the Colorado Utah Mines Holding Co.

Property: 13 patented and 4 unpatented claims in Pleasant Valley, Gilpin and Clear Creek counties, also 5 unpatented claims in Chaffee county. Ore occurs in fissure veins carrying silver-lead and high grade uranium, said to run from \$15-\$75 per ton.

Development: by 4 shafts and a tunnel.

UTICA MINING & MILLING CO.**COLORADO**

Described in Volume XIV.

VALLEY VIEW LEASING & MINING CO.**COLORADO**

Address: Mr. Beselack, Ames, Colo.

Property: the San Bernardo and Valley View mines at Ames, San Miguel county. Ore carries gold, silver and lead.

Equipment: includes a 100-ton plant at Matterhorn employing crusher, ball-mills, tables and flotation.

The mill started shipping concentrate in December, 1920 and was making 8 cars of concentrate per month, May, 1921.

VANDERBELT MINE**COLORADO**

Address: John Paulus & Co., Montezuma, Colo.

Property: a silver-lead group at Montezuma, Summit county, operated during part of 1920.

VASCO MINING CO.**COLORADO**

Subsidiary of Vanadium Alloys Steel Co., Latrobe, Pa. J. A. McKenna, pres.; T. W. Conklin, v. p. and gen. mgr., Voegtle Bldg., Boulder, Colo.

Acquired property in the Nederland district in 1915, and remodeled the Boyd mill for concentration of tungsten ores which are both mined and pur-

chased. Ore is ferberite occurring in veins in pegmatite or granite, containing from 3 to 50% WO₃ and averaging 10%.

Property: includes 15 operating mines, shipping 8-10 tons concentrates weekly.

Mill equipment: crusher, rolls to ¼", trommel, jigs, stamps for jig tails, classifiers for jig hutches and battery pulp, Card and Wilfley tables, Monell slime tables, Deister slime tables, and rag tables. Three mills have been built.

The Vasco company and the Wolf Tongue Mining company were the only producers of tungsten in the United States in 1920, with a total combined output of 216 tons, containing 60% WO₃.

VERDE SILVER MINING CO.

COLORADO

Address: 425 Foster Bldg., Denver, Colo.

Property: a lease on a group of silver mines, including the Gresson, May and Wedge mines, at Westcliffe, Custer county. Operated during part of 1920-'21.

VERNON MINING CO.

COLORADO

Fire destroyed entire plant in June, 1919, and workings caved. Company out of business. See Volume XIV for complete description.

VICTOR GOLD MINING CO.

COLORADO

Mine leased until 1925 to the Vindicator Cons. G. M. Co., which see.

VICTORIA MINING CO.

COLORADO

Offices: W. S. Garland, 86 Main St., Brockton, Mass., and Salina, Colo.

Mine office: W. H. Hubbard, supt., Wall Street, Colo.

Officers: W. S. Garland, pres.-treas.; John Buchanan, v. p.; F. Allen, sec., and Burton W. Neal, directors. Victor C. Alderson, Golden, Colo., cons. engr.

Inc. 1917, in Colo. **Cap.** \$500,000; \$1 par; 200,000 outstanding; 125,000 shares of stock held in treasury for conversion of bonds. **Funded debt** \$125,000. **Stock listed** on Boston Curb. Equitable Trust Co., Boston, registrar and transfer agent.

Property: 6 patented claims, about 19 acres, at Summerville, Gold Hill district, Boulder county. Ore occurs as tetrahedrite in fissure veins in granite, said to average ½ oz. gold and 200 oz. silver per ton.

Development: 470' shaft with 6,295' of workings.

Equipment: includes electric power, compressor and hoist.

Production: to date reported to be \$750,000. Developing on 400' level.

VICTOR MINE

COLORADO

Address: Whitepine, Colo.

Property: at Whitepine, Gunnison county, contains silver-lead-zinc bearing ore.

VICTORY GOLD MINING CO.

COLORADO

In 1918 company purchased the Smith lease on the Howard shaft of E. P. Arthur, Jr., Mgr., Cripple Creek, Colo.

The Mary McKinney mine on Raven Hill, Cripple Creek, Teller county. The Howard is credited with \$2,000,000 production. Eight men at work at last accounts. (April, 1921). Shipments made to the Golden Cycle mill.

VILLAGE BELL GOLD & COPPER CO.

COLORADO

Address: Cowdrey, Colo.

Property: the Village Bell mine at Cowdrey, Jackson county. Ore carries gold, silver, and copper.

Operated part of 1919, but shipped no ore. Idle. 1920-'21.

VINDICATOR CONSOLIDATED GOLD MINING CO., THE COLO.

Office: 603 Symes Bldg., Denver, Colo. **Mine address:** Independence, Colo.

Officers: G. S. Wood, pres.; A. F. Zang, v. p.; P. A. Zang, treas.; G. A. Stahl, sec. and gen. mgr, with A. E. Carlton, C. Sigel, Jr., and D. W. Strickland, directors. Nelson Franklin, v. p.-mgr., Ferro-Alloy Co., Denver; W. E. Ryan, gen. supt.; W. G. Zulch, field engr.; T. H. Sheldon, purch' agt.

Inc. Nov. 20, 1896, in Colorado. In November, 1916, charter was extended for 20 years. Cap. \$1,500,000; \$1 par; all issued; no bonded indebtedness. Annual meeting, second Thursday in February. International Trust Co., Denver, transfer agent and registrar. Listed on Colorado Springs Stock Exchange.

General Balance Sheet:

Assets—						
	Property	Equip.	Ore Res.	Secur.	Current	Total
1920.....	\$1,266,365	\$500,423	\$780,275	\$52,935	\$468,874	\$3,143,873

1915....	1,969,646	703,783	1,265,862	84,302	225,000	1,046,939(b)	78,225

(a) Includes depreciation and mine depletion, \$631,794 in 1916, \$605,183 in 1918, \$115,824 in 1919.

(b) Includes notes paid, \$910,000. (c) Deficit. (d) Loss.

Royalties from lessees amounted to \$153,683 in 1917; \$151,265 in 1918; \$92,525 in 1919; \$98,087 in 1920.

Dividends: 1900, 17½%; 1901, 15½%; 1902, 23%; 1903, 16%; 1904, 9%; 1905, 13%; 1906, 12%; 1907, 13%; 1908, 15%; 1909, 7½%; 1910, 1911, 1912, 1913, 12% each; 1914, 18%; 1915, 15%; 1916, 18%; 1917, 12%; 1918, 4%; 1919, 4%; 1920, 1% to Jan. 24. The total is \$3,832,500. Distributions were suspended in April, 1920.

Property: the Vindicator and Golden Cycle mines at Cripple Creek, including former holdings of the Keystone M. & M. Co., the Golden Cycle mine and that of the Christmas Gold Mining Co. Company in 1918 also acquired absolute control of the Ferro Alloy Co. of Denver on payment of \$100,411, covered by liquid assets, and payment to Ferro Alloy Co. stockholders of the amount of their investment plus 6% interest to be paid when realized from operations of the plant. The Deer Creek Chromite mine in Wyoming was purchased at same time and is operated by the F. A. Co.

Company investments include \$10,000 in Saffordville Oil Syndicate, \$30,-

000 of shares in the Western Oil Fields Corp. and \$25,000 in the Lane Oil Syndicate.

Cripple Creek Property

The Cripple Creek property includes the Vindicator, Golden Cycle mine, 130 acres and a lease on the Victor mine.

Geology: the plateau on which Cripple Creek is located is mainly made up of red granite. Breaking through this is a plug of volcanic breccias and tufts composed of phonolite, and including many granite fragments torn off and carried up from below. This volcanic core is cut by dikes and intrusive masses of syenite and phonolite, and latest of all, the basalt dikes.

The ores occur in veins which follow a system of steep fissures, the veins being mere fissures with a central film or streak of ore filling and an impregnation of the wall rock on both sides. The low-grade ores are formed by mineralization of the country rock adjacent, to such narrow seams. Most of the veins occur in sheeted zones ranging in width up to 40'.

The gold occurs chiefly as the telluride, calaverite, with but little silver but associated with it there are small quantities of iron, copper, zinc, and molybdenum sulphides. The gangue is either quartz and fluorite with some carbonate or merely altered rock. The greatest horizontal extension of any pay shoot thus far opened is about 1,300'. Such pay shoots are many and usually vary from 4' to 40' in length. The vertical extension has not yet been reached in some shoots. For detailed geology, see U. S. G. S. Prof. Paper No. 54; "Nature of Ore Deposits," by Beck and Weed, or Lindgren's "Mineral Deposits."

Development: by Vindicator shaft, 1,950' deep, and Golden Cycle 2,200'; linear extent of workings, about 51 miles. Mining methods, filled stope and square set. New work amounted to 10,327' in 1917; 5,112' in 1918; 7,622' in 1919, and 5,306' in 1920. Lessees did about 20% of 1920 work.

No commercial ore was opened on No. 20 level of the Golden Cycle during 1916-17 and work was discontinued there in 1918. Mining cost \$2.81 per ton hoisted. By November, 1919, the shoot on the 18th level of the Vindicator shaft had been opened for 250', showing good ore. In 1920, the Lillie vein was entered on the 1,900' level, 900' S. of the shaft. Ore is 300' long, 8 to 12' wide and high grade, but flat, lying on a dike.

Reserves are estimated at 46,440 tons which contain from 50 to 75c. per ton profit.

The Victor mine, 3,000' N. E. of the Vindicator main shaft, and the intervening ground, has been leased until 1925. The whole area is being explored by crosscuts. The Victor shaft, 1,000' deep, has produced over \$3,000,000 in gold. Sub-lessees are mining continuously.

It is expected that the Cripple Creek drainage tunnel would reduce pumping costs, but as the tunnel reached the neighboring Portland property in 1918 and no improvement is apparent, the indications are that there is an impervious dike lying between Portland and Vindicator properties. The Portland company is pumping and holding the water on their property, 210' below water level of the Vindicator, but Vindicator pumps have to handle 300 gallons per minute.

Equipment: includes two hoists, Sullivan electric and Ingersoll-Sargent compressors, 3 electric triplex 175-h. p. pumps, electric locomotive on No. 17 level and steel sharpening shop on No. 16 level. Power is steam and electric. Treatment plants consist of one 300-ton washing and concentrating mill, which handled in 1916 a total of 127,947 tons of \$1.68 ore at a cost of 17.4c per ton. This ore and the reject from the Golden Cycle ore house, averaging about \$2 per ton, was treated in a 500-ton flotation plant started in October, 1916. Ball-mills and the Minerals Separation flotation system are employed. On \$2.26 ore the recovery in January, 1917, was 84.4% and the process deemed a success. This plant reported closed late in 1919, owing to lack of sufficient suitable ore.

Production: in 1917, 252,810 tons, sorted down to 86,918 tons, yielding \$1,690,340; in 1918, 283,767 tons crude ore, or 45,712 tons sorted ore, valued at \$1,629,809; in 1919, 143,400 tons crude ore, yielding 19,922 tons sorted ore, valued at \$718,136 gross. In 1920, 22,104 tons shipped, yielding \$405,104 gross proceeds after deducting freight and treatment.

Like other Cripple Creek mines, the Vindicator has passed its zenith, although good ore will be mined for some time; the future lies in a profitable treatment of the lower-grade ores.

VINDICATOR MINES & TUNNEL CO. COLORADO

No recent information. See Volume XIV.

VIRGINIA MINES CO. COLORADO

Address: 221 Foster Bldg., Denver, Colo.

Property: Revenue mine at Grant, Clear Creek county. Ore contains gold, silver, lead and copper. Operated during part of 1920, but no shipments made.

VIVIAN NOTAWAY MINE COLORADO

Address: Wm. Mitchell, Central City, Colo

Property: at Central City, Gilpin county, contains gold-silver-copper bearing ore.

VULCAN MINES & SMELTER CO. COLORADO

Presumably out of business. Fully described in Volume XIV.

VULCAN TUNNEL SYNDICATE COLORADO

Address: W. L. Shull, v. p.-gen. mgr. Col. James H. Myers, pres.; Breckenridge, Colo.

Reported organized in 1921 to operate the Old Dominion gold-silver claims in Snake River mining district, near Montezuma, Summit county. The Vulcan tunnel to be extended to connect with Old Dominion workings, 1922.

WABASH MINES & POWER CO. COLORADO

Address: Creede, Colo.

Property: the Monon silver mine at Creede, Mineral county, formerly owned by Quintet Mng. Co.

Operated and produced during 1919 and 1920.

WANAKAH MINING CO. COLORADO

Defunct.

Property sold at sheriff's sale during 1916 to Bright Diamond Mining & Milling co., and again sold in 1920 to Ouray Union M. & M. Co. The latter company was succeeded in 1921 by Welch-Worland Mines Syndicate, which see.

WARD GOLD COIN MINING CO. COLORADO

J. F. Weber, mgr., Ward, Colo.

Property: the Ward Gold Coin mine group and 2 mill sites, near Modoc Lake, Ward, Boulder county. Mine is said to show a vein 5-15' wide carrying iron-gold-silver-lead sulphides. Developed by 218' shaft.

WARD MINING & MILLING CO. COLORADO

Office: 415 Frick Bldg., Pittsburgh, Pa.

Inc. in Colorado. Cap. 2,000,000 shares; par 1 cent.

Property: 14 claims, at Tolland, Pine district, Gilpin county, opened by a 150' shaft and 100' of drifts. Ore claimed to have assayed over \$100 a ton in gold and silver. Operated during 1919, but shipped no ore.

WAR EAGLE CONSOLIDATED MINES CO COLORADO

Address: 115 N. 3rd St., Cripple Creek, Colo.

Officers: Tully Scott, pres.; M. E. O'Bryan, sec.-treas.; with S. J. Burris. T. Annear, T. E. Munison and T. R. Countryman (cons. engr.). directors. C. Kissell, supt.

Cap. 5,000,000 shares; par value not reported; in treasury at last report 4,000,000, to be used acquiring and developing additional property. Financed by T. M. Pettigrew & Co., Denham Bldg., Denver.

Property: originally 17.3 acres, since increased to 41 acres, in Cripple

Creek district, upon which in January, 1916, there was a bond of \$50,000, due in 3 years. Examined it December, 1920 by W. Dellman of Minneapolis, Minn.

Development: mainly by lessees. The Scott shaft was sunk to 500' in the Happy Year claims and \$10 to \$15 ore was opened in this ground. On the 400' level the shoot is 110' in length. In August, 1919, an arrangement was made with the Blue Flag Gold Mining Co., whereby the properties were to be connected by means of the Moffat tunnel and by April, 1920, this connection was completed. Work was suspended during part of 1920 and 1921 on account of abnormal conditions.

WARRIOR'S MARK MINING CO.

COLORADO

Subsidiary of Alpha Mines Co. Office: 342 Madison Ave., New York City.

Mine address: care George Robinson, Breckenridge, Colo.

Officers: Geo. Robinson, pres.; W. A. Winn, J. D. Devoy, J. W. Hanley, J. C. May, S. Klous, M. C. Nelson, F. J. Quist, J. C. Stearns, directors.

Inc. in Colorado. **Cap.** \$5,000,000; \$1 par; increased from \$1,000,000, March, 1920. Listed on Boston Curb.

Company organized by Samuel Klous of Boston; Mr. Geo. Robinson, treasurer of Summit county, and W. T. Keogh, former county assessor, all of whom own large interest in company.

Property: the Pioneer or Warrior's Mark mine, 18 claims, 14 patented in McBarnes district, Summit county, 7 miles from Breckenridge, Colo. Mine was formerly a producer of phenomenally rich silver ore and credited with a production of over a million dollars.

Tract contains 2 fissure veins in red sandstone, 2-12' wide, with a chimney of high grade ore. Recent work at 68' depth opened 14"-20" of shipping ore. Ore streak on lower level 2' wide of 200 oz. ore.

Development: about 5,000', includes 3 inclined shafts, 625', 125' and 200' deep. Work carried on continuously during 1919-'21, aggregated several hundred feet, mainly on a new tunnel 1,000' long, but not yet in commercial ore, though a good vein was cut.

In Sept., 1921, the old Mark shaft 625' deep was re-equipped and unwatered to 150' level; a new drift on 100' level is said to have opened up 8"-10" of high grade silver ore in December 1921, from which shipments were made in January, 1922. Vein on second level said to be larger. A mill and flotation plant are planned for 1922.

Property may have merit, having been idle for 30 years as a result of failure of German Natl. Bank of Denver.

WASATCH-COLORADO MINING CO.

COLORADO

Address: F. L. Palmquist, mgr., Silver Plume, Colo.

Property: the Mendota and Frostberg mines at Silver Plume, Clear Creek county. Ore carries gold, silver, lead, and zinc. The lead ore is concentrated at company mill; zinc is shipped to local sampling plant. A 75-ton wet concentration mill was erected in 1919.

WEBER GROUP

COLORADO

Address: Wheeler & Logue, 634 Inca St., Denver, Colo.

Property: at Alma, Park county, contains gold-silver bearing ore. Operated during part of 1920.

WEDGE MINE

COLORADO

Address: Carney & Keleher, lessees, Ouray, Colo.

Property: in Bachelor district, below Ouray, said to contain high grade gold-silver bearing ore. Operated during part of 1920.

WELCH-WORLAND MINES SYNDICATE

COLORADO

Succeeds Ouray Union M. & M. Co.

Mine address: Edward Treweek, supt., Ouray, Colo.

Syndicate members: P. F. Welch, pres.-gen. mgr.; D. C. Worland, v. p.-assist. mgr.; L. D. Welch, treas.; L. C. Jennings, sec., with S. H. Keogh.

J. D. Cook, F. B. Utter, and C. L. Woods. D. R. Finlayson, cons. engr.; Chas. Blaha, metal. engr.

Inc. 1921. A close corporation.

Property: a 9-year bond and lease on the Bright Diamond group, north of Ouray, originally owned by the Wanakah Mining Co., which was succeeded by Bright Diamond M. & M. Co., described in Vol. XIV. The Ouray Union M. & M. Co. acquired the mine in 1920, but lacked funds to carry on development work. Ore is an iron sulphide containing gold, copper and some silver.

Development: by tunnels with 10,000' of workings. **Equipment:** includes electric hoist, compressor, 75-ton and 1 Ruth flotation unit. The mine is to be thoroughly prospected and the mill remodelled.

WELLER GOLD MINING CO.

COLORADO

Idle and probably dead. See Vol. XIV.

WELLINGTON MINES CO. OF COLORADO

COLORADO

Office: 1000 Grand Avenue Temple, Kansas City, Mo. **Mine office:** Breckenridge, Colo.

Officers: J. W. Oldham, pres.; Clifford Histed, v. p.; C. Charpiot, sec-treas., with Jas H. Harkless, and Frank J. Dean, directors. R. M. Henderson, gen. mgr.; W. T. Heinrichs, asst. mgr.

Inc. June 12, 1906, in Arizona. **Cap.** \$10,000,000; \$1 par; all outstanding. Company office in Kansas City, transfer office and registrar. Annual meeting first Monday in June. The company organized in Arizona was only a holding company, property being operated by the Wellington Mines Co. of Colorado, which had a capital of \$50,000. To avoid double taxation the former was dissolved and the present company reorganized Jan. 1, 1917, with a capital of \$1,000,000; shares \$1 par. Company has over 5,000 shareholders.

Cash on hand, Dec. 31, 1920, \$395,289.

Dividends: 1915, \$300,000; 1916, \$600,000; 1917, \$400,000; 1918, \$200,000 1919, \$100,000; 1920, \$100,000. The total for 19 dividends is \$2,050,000.

Property: 15 patented claims, 75 acres, at Breckenridge, Summit county, is said to show lead and zinc sulphide ore in a fissure vein in diorite; dip 60° S., strike N. 50° E. Pay ore occurs in shoots and is said to average 3% lead, 18% zinc, 23% iron, 15 oz. silver.

Development: by one vertical and incline shaft and several tunnels, longest 1,800'. Greatest depth of workings, 1,000'; total linear extent several miles. Orebody is mined by stulling method. In 1918, 3,340' of work was done; in 1919, 3,782'; in 1920, 2,505' of drifts, crosscuts and raises and 540' of diamond drilling.

Equipment: includes double-drum electric hoist, 500 cu. ft. compressor, pumps, 1,800' tramway, all electrically driven. There are two mills, a concentrator, and a plant for roasting and magnetic separation, with a capacity of 2,000 tons monthly. During 1918, the transformer capacity was doubled and an electric hoist to equip ore shaft for the developing of the Siam vein was purchased.

Production: in 1918, 39,295 tons of ore carrying 25% zinc was crushed and there were produced 16,631 tons of 49.6% zinc concentrates and 184 tons of lead concentrates assaying 25.7 oz. silver and 36% lead; 2,681 tons of iron tailings from No. 2 mill was shipped to the smelter. There was 947 tons of 45.7% zinc ore sent direct to smelter.

In 1919, shipments were suspended for a large part of the year, but amounted to 6,266 tons of concentrate, assaying 50% zinc, 26.5% lead, and 23 oz. silver per ton; also 415 tons of zinc ore and 1,734 tons of pyrite. The mills treated 12,947 tons of ore. In 1920, 30,040 tons of ore were mined; the mill operating 8 months only treated 30,401 tons carrying 21.4% zinc, making 11,085 tons concentrate assaying 49.7% zinc.

Wellington Mines is now a highly profitable concern, handling a complex ore in a satisfactory manner.

WENTWORTH MINES CO.**COLORADO**

Address: Westcliffe, Custer county, Colo.

Inc. in Colorado. **Cap.** \$500,000; \$1 par.

Property: 90 acres in the Westcliffe district, adjoining the Bull-Domingo mine.

Development: by 5 shafts from 20 to 65' deep, said to show "remarkable and unusual ore; which carries silver".

A prospect launched about mid-1919. Developing, but no shipments made.

WESTERN DEVELOPMENT CO.**COLORADO**

Office: Boatman's Bank Bldg., St. Louis, Mo., and 129 W. 8th St., Leadville, Colo.

Officers: C. J. Walker, pres.; E. T. Cash, v. p.; W. H. Mann, sec.; J. E. Allen, treas., with W. M. Edinger, directors.

Inc. March, 1913, in Maine. **Cap.** \$2,250,000 common and \$750,000 preferred, of which all the common and \$500,000 preferred is outstanding March 1919. Dividends paid amount to \$100,000.

Is a holding company, its principal assets consisting of the entire capital stock of the **Down Town Mines Co.** of Leadville, Colo., which see. Has also a stock interest in **Western Zinc Oxide Co.**

WESTERN MINING CO.**COLORADO**

Am. Sm. Sec. Co. holds a majority interests. Mines closed in December, 1918. See Vol. XIV.

WESTERN SLOPE COPPER MG. & SM. CO.**COLORADO**

Formerly operated in Unawep district, Mesa county. Out of business, bondholders have taken over property. For description, see Vol. XII.

WESTERN TUNNEL MINING CORPORATION**COLORADO**

No recent information.

Reported to have taken over the property of the Vindicator Mines and Tunnel Co. of Idaho Springs, Colo., which see.

WESTERN ZINC CONCENTRATING CO.**COLORADO**

Dead. Now a part of the **Western Zinc Oxide Co.**, which see.

WESTERN ZINC MINING & REDUCTION CO.**COLORADO**

Presumably dead. Assets taken over by **Western Zinc Oxide Co.**, which see.

WESTERN ZINC OXIDE CO.**COLORADO**

Is a consolidation of **Western Zinc Cons. Co.** and **Leadville Zinc Co.**

Address: 139 E. 9th St., Leadville, Colo.

Officers: C. H. Collins, pres.; Jas. B. McDonald, treas.; Harry L. Noble, sec.

Organized in 1915, and purchased all assets of **Western Zinc Mng. & Reduct. Co.** The **Downtown M. Co.** and **Western Devel. Co.** are stockholders.

Employs the Wetherill process of producing zinc oxide by volatilization and collecting fume in flues. Improvements have been made in method of hauling residue. A new unit of 16 furnaces, with independent bag-house and embracing all recent improvements, was added in 1920. Plant is operated continuously but one-half only of the 34 furnaces was in use in 1921. Total daily capacity, 100-125 tons of ore.

WESTMORELAND MINE**COLORADO**

Address: O. E. Williams, lessee, Kokomo, Colo.

Property: a silver mine at Kokomo, Summit county, operated during part of 1920.

WEST SIDE MINING CO.**COLORADO**

Operated at Georgetown, Clear Creek county, in 1919. See Vol. XIV.

WHALE MINES LEASING & REDUCTION CO.**COLORADO**

Address: 1454 Marion St., Denver, Colo.

Property: the Whale mine at Cassells, Park county. Ore carries silver, lead, and copper. Equipped with mill.

The mill worked part of 1919 and 1920 and products were shipped to smelter.

WHEELER MINE**COLORADO**

Address: R. H. Baxter, Alma, Colo.

Property: near Alma, Park county, contains gold-silver-lead bearing ore. Operated during part of 1920, but no shipments reported.

WHITE CLOUD MINING & MILLING CO.**COLORADO**

Address: 424 Cooper Bldg., Denver, Colo. Bert Humphrey, mgr., Ouray, Colo.

Property: the Paymaster silver-lead mine near Ouray, Ouray county.

Development: by shaft and tunnel. A 42" shoot of ore yielded 36 oz. silver per ton and 60% lead. Developing.

WHITE RAVEN MINES**COLORADO**

Address: L. A. Ewing & Co., Boulder, Ward Star Route, Boulder Co., Colorado.

Property: the White Raven mine and Rook mine, near Ward, Boulder county. The first, though located on the edge of the gold sulphide belt, produces silver and high-grade lead ore. The Rook mine, located a mile S. W. of Puzzler station, is a new silver-lead property.

Development: by tunnel and winze to depth of 1,000', so that 5 distinct ore shoots have been opened, including the main chimney which has been worked from tunnel level to apex, and by winze down to the 10th level.

Equipment: includes electric hoists and compressor; a 25-ton concentration and flotation mill was completed in 1919 and has been operated continuously since.

W. H. P. LEASING CO.**COLORADO**

See Volume XIV.

WICK MINES CO.**COLORADO**

Address: D. A. Shumock, Almont, Gunnison Co., Colo.

Property: the Doctor zinc mine in Gunnison county. A steady output was maintained during 1919 and 1920.

WIDE WEST MINING CO.**COLORADO**

Address: 514 Equitable Bldg., Denver, Colo.

Property: 30 claims on Leavenworth mountain, between Georgetown and Silver Plume, Clear Creek county. Ore carries gold and silver.

Development: by 2,700' tunnel, to be driven an additional 500' to cut the veins of the Wide West group.

Equipment: includes compressor and electric power. Operated part of 1919, but shipped no ore.

WIGWAM MINING CO.**COLORADO**

Address: Nederland, Colorado.

Property: Wigwam silver mine at Nederland, Boulder county, operated during part of 1920.

WILD IRISHMAN MINE**COLORADO**

Address: W. L. Miles & Co., lessees, Salina, Colo.

Property: at Summerville, Boulder county, contains gold-silver bearing ore. Operated during part of 1920, but no shipments made.

WILSON MINE**COLORADO**

Address: Mrs. A. C. Wilson, 515 N. Main St., Pueblo, Colo.

Property: at Empire, Clear Creek county, contains gold-silver-lead bearing ore. Operated during part of 1920.

WIN-U-WILL MINING & MILLING CO.**COLORADO**

Address: 807 Central Savings Bank Bldg., Denver, Colo.

Officers: A. M. Beam, pres.; J. A. Beam, sec.; L. J. Beam, asst. sec.; Frank Potts, treas.

Inc. July 30, 1917, in Colorado. **Cap.** \$50,000; \$1 par.

Property: about 10 claims at Ward, Boulder county, including the Little Giant.

Development: by a 900' shaft and 1,400' of driving. No stoping has been done below 100'. Presumably idle.

WOLF TONGUE MINING & MILLING CO. COLORADO

Office: 1541 Oliver Bldg., Pittsburgh, Pa., or 1137 Pearl St., Boulder, Colo. **Mine and mill office:** Nederland, Colo. William Loach, gen. mgr.; W. T. Todd, supt.

Property: about 600 acres, including the Cold Spring and other mines in the 75-acre Beaver group, a mile south of Nederland, and the Clyde mine of the Ranch group, 3 miles N. E. The Cold Spring mine is leased to Geo. Retallack and others.

Ore: the principal ore mineral is ferberite, iron tungstate, occurring in veins, in granite or pegmatite. Orebodies are commonly in the form of small lenses a few feet in length. The Cold Spring mine has a vein showing a 6' face of ore with 12" ore streak containing 57% tungstic acid in a shoot 150' long on the 300' level. For full description of Colorado tungsten ores, see Bull 583 and 652 of U. S. Geol. Survey.

The greater part of the mining is done by lessees who are paid for shaft sinking and ship their ore to the company's mill; the company receives as royalty 25% of the net proceeds, after deducting treatment charges.

In its leasing system the company supplies lessees with hoists, shaft houses, timber, rails, piping, ore cars, etc., and loans money for development when certain work is started. Company operates a 50-ton mill. A little development was done during 1919, and work was resumed in 1920.

The Wolf Tongue and Vasco Mining companies were the only tungsten producers in the United States in 1920.

WOOD MOUNTAIN MINE COLORADO

Address: Osberg & Pherson, lessees, Boulder, Colo.

Property: near Wall Street, Boulder county, contains gold-silver bearing ore.

YAK MINING, MILLING & TUNNEL CO. COLORADO

Office: Marbridge Bldg., W. 34th St., New York. **Mine office:** Leadville, Colo.

Officers: Myron T. Herrick, pres.; Harry C. James, v. p.; Walter W. Davis, v. p.; J. C. Mitchell, sec.-treas., Denver National Bank, Denver. J. G. Hardy, mine mgr.; E. L. Hartwell, mgr.

Cap. \$1,000,000; reduced Jan. 10, 1918 to \$500,000, when the company declared a distribution of liquidation capital which amounted to \$500,000; shares \$1 par; all outstanding and assessable.

In December, 1917, company sold an undivided half interest in the property to the American S. & R. Co. for \$500,000, which, although not a lien, is to be returned to the American S. & R. Co. out of the profits of operations, after which both companies will share in the profits equally. The A. S. & R. Co. through its mining department began company operations on January 1, 1918.

Comparative balance sheet and income account of the Yak Co. for 6 years preceding 1918 may be seen in Vol. XIII.

The profit in 1918 amounted to about \$200,000; in 1919, it was \$81,010; in 1920, \$11,206.

Dividends: quarterly, commenced March 31, 1904, and were continuous up to September 30, 1918, when the amount distributed totaled \$3,497,685. Dividends were then discontinued until July 1, 1919, when 1½% was declared. The above total includes a stock dividend of 12½%. declared October 31, 1904; it also includes a distribution of liquidated capital, January 10, 1918, of \$500,000.

Property: owns 250 acres and controls an additional area of 1,133 acres at Leadville. Also holds agreements covering several hundred addi-

tional acres, under which agreements company has the right to drive the Yak tunnel into such ground at its option.

The Yak tunnel is a 4-mile transportation and drainage tunnel which drains an important part of the Leadville camp, including the White Cap and Cord properties on Iron Hill. The portal of the tunnel is in California Gulch, about 1 mile from Leadville. In March, 1917, the surface track to switches, dumps, etc., was 9,100'; the main Yak tunnel, by way of Louisville and North Moyer, equipped with 30-lb. rails and trolley line for operation of 50-h. p. locomotives was 23,032'; laterals equipped with trolley line 6,207'; laterals equipped with track but not trolley line, 1,922'; csmiellanous laterals suitable for equipment for electric locomotives, about 5,912'.

The ore developed by the tunnel is chiefly a complex sulphide containing gold, silver, lead and zinc. For geology of the Leadville district, see U. S. G. S. Bull. 320, by S. F. Emmons and J. D. Irving.

Reported in 1921, that 2,000,000 tons of low grade ore was in reserve and that milling tests for its treatment had been completed. A 100-ton mill is to be erected, 1922.

Production: of ore in tons for years ended Dec. 31:

Year	Iron	Lead	Pyrite	Total
	Silver	Zinc		
1918.....	34,152	22,653	1,802	58,607
1919.....	28,882	16,737	8,200	53,819
1920.....	10,754	21,091	3,811	35,656

YELLOW BIRD GOLD MINING CO.

COLORADO

Dead. Holdings reported sold at sheriff's sale in November, 1918, to Hildreth Frost, the judgment creditor. See Volume XIV.

The Yellow Bird mine was worked by 19 sets of lessees, 1921, and mill reported to be running, 1922.

YELLOW JACKET MINES CO.

COLORADO

Address: Stock Exchange Bldg., Philadelphia, Pa.

Officers: C. J. Hood, pres.; C. E. Davis, sec.-treas., with Robt. Radford and J. A. Barry, directors.

Inc. 1916, in Colo. **Cap.** \$1,000,000; \$1 par; 400,000 shares outstanding: Corporation Trust Co., transfer agent and registrar.

Property: 5 claims and a mill site in Uncompahgre district, Ouray county. Ore contains lead and zinc, with some gold and silver.

Development: by 550' tunnel. A mill and power plant were reported completed in 1920.

YELLOW PINE MINES & REDUCTION CO.

COLORADO

Address: Box 494, Boulder, Colo. Ralph Cotten, mgr., Boulder, Colo. Worked by lessees.

Property: the Yellow Pine gold-silver mine on Sugar Loaf Mountain, above Crisman, Boulder county. **Development:** by 6 tunnels and 5 miles of workings. Sinking under way and some rich ore has been shipped. Nine-teen sets of lessees reported working, September, 1921.

YOUNGSTOWN-GILPIN MINING CO.

COLORADO

Office: 1200 Mahoning Bank Bldg., Youngstown, Ohio.

Officers: Louis Liebman, pres.; Geo. J. Renner, v. p.; Donald J. Lynn, sec.; Chas. Ephraim, treas.; Geo. E. Collins, mgr.

Inc. 1908, in Colorado. **Cap.** \$1,500,000; \$1 par. Transfer office, 120 Wick Ave., Youngstown, Ohio.

Property: 2 patented claims, about 5 acres, on Quartz hill, Gilpin county. Mine shows gold, silver and copper in quartz vein and patch deposits.

Development: by 700' shaft and 600' tunnel. **Equipment:** includes a compressor and 30 h. p. hoist. Idle.

CONNECTICUT

NEW HAVEN COPPER CO.

CONNECTICUT

Inactive, and probably defunct.

Property at Seymour, Conn., shows a copper-bearing band of hornblende schist, carrying chalcopyrite with some bornite. Operations were carried on intermittently for several years, the last work being done in October, 1911. Company had power plant on the border of the Naugatuck river.

TUNGSTEN COMPANY OF AMERICA

CONNECTICUT

Owms a tungsten property at Trumbull, Conn., long famous for its minerals. Company organized in 1916, but became involved in litigation soon afterward, and is now inactive. See Vol. XII. for description. The deposit is said to be well worth exploitation.

GEORGIA

AMERICAN MINERALS CO.

GEORGIA

Address: 609 Provident Bank Bldg., Cincinnati, Ohio.

Owms the Shirley mine, operated by the Shirley Mining Co. and the Little Bob mine, leased to the Georgia Mining Co., at last account

AMERICAN VENTURE & MINES CORPORATION

GEORGIA

Property proved unprofitable and was abandoned in 1920. See Vol. XIV.

ARIZONA & GEORGIA DEVELOPMENT CO

GEORGIA

Described in Vol. XIV. Company hopelessly insolvent and leases expired.

BARTOW MANGANESE MINING & MFG. CO.

GEORGIA

Address: M. G. Dobbins, agent, Cartersville, Ga.

Property: 325 acres, known as Dobbins mines, 4 miles N. E. of Cartersville, Bartow county. Mine first opened 1866; has been operated by lessees at different times up to present.

Geology: the ore deposit consists of ferruginous and manganiferous nodules and masses in yellow clay, the depth of this decomposed formation depending upon the irregularities of the underlying Weisner quartzite. High grade manganese ore of pyrolusite and psilomelane formed output to 1916. Present lessee concentrating on production of manganiferous iron. See Bull. 35, Geol. Survey of Ga.

Development: by six shafts, 50', 80', 100', 106', 110' and 190' in depth and 8 cuts, 100-150' long, 50' wide and 25-30 deep. Ore produced said to average 15.84% manganese, 25.71 iron and 0.188 phosphorus.

BELL-STAR MINE

GEORGIA

Address: J. J. Westerman, Woodstock, R-3, Ga.

Property: 3 lots, 222 acres, in Cherokee county, known as Bell-Star mine, 3.8 miles from Woodstock; shipping point, Kenshaw, 6.7 miles away.

Geology: country rock is mica gneiss, with bands of horn blende gneiss. Property has a pyrite vein, about 100' wide, containing iron, sulphur, manganese and zinc. The gossan is silicious, indicating a low-grade ore. There is a gold vein to the E. and a schistose zone belt called the Sandstone vein to the W. of the gossan, the last named worked for gold from 1846-1860. The quartz of the Sandstone vein carries magnetite and garnet; vein is opened to a depth of 900'. See Bull. 33, Geological Survey of Ga.

Mine has not been worked in many years, owing to lack of money.

Developed by 6 shafts including an incline, 200' deep, a second 200' shaft, vertical for 150'; the other 4 varying from 40' to 60' in depth. The two deeper shafts have considerable work on the vein.

CARRIBEE MINING CO.

GEORGIA

Address: Phil Dorn, mgr., Cartersville Poor Farm, White, Ga.

Property: 320 acres, 12 miles W. of Cartersville, Bartow county, shipping point White $2\frac{1}{4}$ miles away. Mine was leased, 1918, to J. W. Brockman and Philip Dorn of Birmingham, Ala., by the Bartow County Commissioners, who are in charge.

Geology: ground shows Cambrian formations of gray quartzite, schist and gray slate, whose folds and faults are obscure. Manganese ore occurs in soft yellow clay, both as a soft, granular material and as hard concretionary masses, not over 5" in diameter. This is treated in log washers and jigs producing ore carrying 40% metallic manganese. An average sample of the ore assays 17.41 manganese, 0.40 phosphorus, 5.54 alumina, 5.60 iron and 46.58 silica. See Bull. 35, Geol. Survey of Ga.

Development: by 5 open cuts, from 60'-100' long, 20'-80' wide and 10'-30' deep.

Equipment: steam shovel, double log washer, steam engine, boiler, 600' tram, tram cars and motor-trucks. Several hundred tons of manganese ore were produced during 1917-1918.

CHEROKEE MINING CO.

GEORGIA

Address: F. W. Padgett, mgr., Blue Ridge, Ga. E. L. Hertzog, pres., Spartanburg, S. C.

Company is a North Carolina firm, operating the McKinney property in Blue Ridge, Fannin county, since 1918. Mine was worked long ago for its brown iron ore, but present company produced manganese ore from old open cuts. Ore is gravelly, occurring in pockets and veins in clay schist and slate. The ore deposit is not believed to be over 20' in width. Several car loads of ore containing about 43% manganese were shipped in 1918 and in 1920.

CHEROKEE OCHRE CO.

GEORGIA

Office: Cartersville, Bartow Co., Ga.; J. T. Norris, pres.-mgr.

Inc. Dec., 1904, in Georgia. Cap. \$30,000; \$100 par; all outstanding.

Property: about 170 acres, just outside Cartersville, contains yellow "Peruvian ochre," and barite in sandstone. This is reported to assay: iron peroxide, 52.53%; alumina, 11.75; silica, 10.05.

Company has 15-ton mill and flotation unit. Mine openings are 30'-40' deep.

CHESTATEE PYRITE & CHEMICAL CORPORATION GEORGIA

Office: Third National Bank Bldg., Atlanta, Georgia.

Officers: N. P. Pratt, treas.; G. L. Pratt, v. p.-treas.; Palmer Pratt, sec. C. E. Julihn, cons. eng.

Property: the Chestatee pyrite mine, in Lumpkin county, 6 miles E. of Dahlonega, and on S. side of the Chestatee river, on which mining was started in 1892.

Geology: mica gneiss and hornblende gneiss are cut by granite, which is also metamorphosed. The important pyrite and gold deposits of the district occur in a belt of more basic rock that lies within a mile of the granite contact. At the Chestatee mine the granite border is but a few hundred feet S. E. of the vein. The orebody has a gossan outcrop of commercial iron ore 5,800' long. This exposure runs N. 45° E., and the dip is 60° N. W. A parallel vein occurs not far away. The ore occurs as a tabular mass, showing a number of rolls or minor folds.

The ore is classed as either lump or concentrating material, according to the pyrite content. The first named occurs as lenses or shoots, is massive, and consists mainly of pyrite and a little chalcopyrite, in a gangue of quartz, garnet, and sericite. It averages 43.52% sulphur, 39.70% iron, 1.60% copper, 9.26% silica, 2.53% alumina, and 0.72% zinc. The concentrating ore is lower grade, but of similar mineralogical character.

Development: by 205' incline and main haulage-level over 1,200' long, with crosscuts to the vein every 100 feet. Reserves are estimated at 1,300,-000 tons.

Equipment: electric power-plant, loading bins, crushing and sorting

plant for 800 tons of run-of-mine ore daily, and mill for concentrating 400 tons daily. The mill employs a 24 by 12" crusher set at 3", one dry trommel, washer, picking belt, lump ore being shipped at this point: crusher set at 1½", 9 mm. trommel, rolls, 2 mm. trommel, Hancock jig, tables, and storage bins for concentrates.

Production: no figures are available. In 1919, the company applied to the War Minerals Relief Commission for \$900,000. Of this, \$223,529 was awarded.

COGGINS & SMITH MINING CO.

GEORGIA

Address: R. R. Smith, mgr., 391 Peachtree St., Atlanta, Ga.

Inc. March, 1918, in Georgia.

Property: covers about 77 acres, in Paulding county, 5 miles east of Dallas. Shows granite cut by a pyrite vein, 25' wide, containing gold, silver and copper values and reported to assay 42-49% sulphur, \$1.43 gold per ton and 1.8% copper. Vein dips about 70° NE-SW.

Developed: by 50' shaft. **Equipment:** includes mill, pump and engine. Little work has been done since 1907.

COLLEY MINE

GEORGIA

Property: a manganese mine about 80 acres, east of Lincolnton, owned by J. D. Colley and J. H. Boykin. Had been leased to J. R. Whitman, Healy Bldg., Atlanta. Operations ceased at close of war, late in 1918.

Is developed by small open cuts. Assays show a content of 32.8 manganese, 9.57 alumina, 3.28 iron and some barium. Production, 1918, reported as a few hundred tons of manganese ore.

ETOWAH DEVELOPMENT CO.

GEORGIA

Address: R. S. Munford, gen. mgr., Cartersville, Barton Co., Ga.

Property: brown iron and manganese mines, embracing several thousand acres near Cartersville, and including the Iron Hill and Hebble mines.

The Etowah river runs through the land, giving a river frontage of 4 miles on the two sides, with a fall of 70', capable of developing 12,000 h. p.

Property has been worked at intervals since the early forties, but mainly for iron ore in 1918. Present company was developing iron ore at the Iron Hill mine, while lessees were mining manganese on other sections of the property. The Hebble, 2 miles E. of Cartersville, is the most important mine and is developed by 36' shaft, 150' tunnel and open cuts; was leased to J. C. Hebble and produced 45% manganese ore. See Bull. 35, p. 78, Geol. Survey of Georgia.

Equipment on property includes 4 steam shovels, 8 log washers, 3 jigs and about 4 miles standard gage railroad and locomotives.

ETOWAH MILLING & POWER CO.

GEORGIA

Mail returned from 420 Healey Bldg., Atlanta, Ga.

Officers: J. P. Given, pres.; J. H. Simms, v. p.; C. H. Butts, sec.; D. S. Walraven, treas.

Inc. April, 1916, in Georgia. Cap. \$500,000; \$10 par; 26,496 issued, U. S. Corporation Co., New York, transfer agent and registrar.

Property: gold claims and water rights near Atlanta, Fulton county. A prospect.

EXPERT PROSPECTING & DEVELOPING CO.

GEORGIA

See Volume XIV.

FLOWER MINING CO.

GEORGIA

Address: John Baker, mgr., Higdon's Store, Fannin county, Ga.

Property: a copper prospect on Mt. Pisgah, 1 mile of Higdon's Store, secured by company in 1917. Average strike is E. with dip of 45° N., the principal ore mineral is chalcopyrite with some pyrrhotite.

Developed: by 150' tunnel, three shafts, some test pits and open cuts.

FOX & DOWLER MINE

GEORGIA

Address: F. H. Dowler, Chattanooga, Tenn. **Mine office:** Tunnel Hill, Whitfield county, Ga.

Property: 6 lots, 730 acres, and the mineral interests on two lots, 3

miles north of Tunnel Hill, in Catoosa county. Mine had been worked about 1890 by Catoosa Mining Co., which made large open cuts and drove an adit 160' on the vein, the deepest workings being 225' below surface. See Bull. 35, Geol. Surv., Ga.

The ore deposits occur along a fault zone, in Knox dolomite, the ore showing manganese oxide, mixed with clay and chert breccia. Some shipments made in 1918 were said to be high in silica, but containing iron and manganese.

FREEMAN MINE**GEORGIA**

Owned by M. J. Freeman, Dallas, Texas, J. L. Smith and F. L. Smith, Cartersville, Ga.

Property: located just outside Cartersville, Bartow county, operated in 1918 by Cherokee Ochre Co.

Geology: manganese ore occurs in clay as gravel, nodules and boulders. Mine has been worked at intervals and several hundred tons have been produced. According to the Geol. Survey of Georgia (Bull. 35), the whole ore deposit will analyze silica, 71.02; alumina, 10.22; manganese, 2.40; iron, 5.15; phosphorous, 0.073%.

GEORGIA & TENNESSEE COPPER CO.**GEORGIA**

Controls 99.8% of the stock of the Georgia Pyrites Co., which see.

GEORGIA COPPER CO.**GEORGIA**

Office: Washington, Ga. **Mine office:** Lincolnton, Ga.

Officers: M. N. Whittaker, pres.-gen. mgr.; Joshua A. Brown, v. p.; A. Kahr, sec.; Z. J. Ray, asst. sec.

Cap. \$1,000,000; par \$1.

Property the Magruder or Seminole mine, 28 acres, held in fee simple, and mineral rights to 901 acres in Wilkes and Lincoln counties, 12 miles from Washington, and within a mile of Lovelace, on Washington and Lincolnton, R. R. which connects with Georgia R. R. Shows gray sericitic schist intruded by eruptive dikes of 2 different ages, with 6 veins in schist and between schists and eruptive rocks. Lodes have an average strike of N. 30° E., to N. 40° E., and dip of 50° to vertical, averaging 3 to 14' in width, and traceable 2,200'. The ores contain pyrite, chalcopyrite, some bornite, cuprite and melaconite, and ore estimated by company to average 7.3% copper, 32% lead, 7 oz. silver and \$5 gold per ton.

The mine, opened 1852, and closed 1862, on account of American Civil War, reopened 1880-1884, as Magruder Mine and operated 1889-1906 by Seminole Mining Co., which company was succeeded by Lincoln Gold & Copper Mng. Co. The Georgia Copper Co. purchased the property in 1917. The Hanna Minerals Co., Cleveland, operated the mine under lease to September, 1919.

Development: by 4 shafts, the main one being 380' deep, the others ranging from 40'-80'; an 100' air shaft and 1,200' underground workings. New work in 1920 on the 200' level reported to have crosscut 6 veins. Closed down in spring of 1920.

Equipment: includes two 175-h. p. boilers, 2 hoists, 15 and 20-h. p., 8 air-drills, air-compressor, electric generator and 3 electric motors. During 1918-19 a 10-stamp mill with flotation unit was completed.

GEORGIA IRON & COAL CO.**GEORGIA**

Office: Atlanta, Ga. **Mine address:** White, Bartow Co., Ga. Joel Hurt, pres. Center of operations is Aubrey, one mile south of White.

Property: about 12,000 acres, 8 miles N.-N.E. of Cartersville. The Iron Belt R. R. owned by the company, connects the various mines with the main railroad at McCallie, 1½ miles S. W. of Aubrey. Holdings include Bishop, Peachtree, Chinnley, Moccasin and Red Mountain mines.

Geology: property shows brown iron and manganese deposits, but in 1918 manganese only was produced. Manganese properties are about 12 by 3½ miles in area. Ore is found in quartzite and limestone, and has high percentage of barium oxide. The deposit is reported to be very large, ex-

tending from Bishop mines, one mile south of Aubrey to Sugar Hill mines, six miles away. Bull. 35, Geol. Survey of Georgia.

Development: by open cuts at Stevenson, Buford, Chumley and Aubrey tracts, each about 300' long, 250' wide and 70' deep. Many shafts have been sunk, deepest 149', and considerable tunnelling done.

Equipment: 9 steam shovels, 10 miles standard gage railroad, 2 locomotives, dump cars and 4 washeries, only one of which, the Aubrey, is in operation.

Daily output of Aubrey concentrating mill is 50 tons. Enough development has been accomplished in past to guarantee an output, at present production rate, for many years. Employed 225 men at last reports.

GEORGIA MANGANESE CO.

GEORGIA

See Volume XIV.

GEORGIA MINING CO.

GEORGIA

Address: 727 Union Central Bldg., Cincinnati, Ohio.

Officers: D. C. Collins, pres.; R. L. Tilton, v. p.; T. S. Doheman, sec-treas., with M. L. Kirkpatrick and S. Hickenlooper, directors.

Inc. in April, 1917, in Kentucky. **Cap.** \$7,500; \$1 par; all outstanding. **Bonds** authorized \$75,000, outstanding \$71,500; interest 7%. **Dividends:** 20% in 1917 and 33½% in 1918.

Property: 36 acres at Copper Mine Station on Seaboard R. R., Paulding county; includes a lease on the Little Bob mine, which is owned by the American Minerals Co. Is subleased to the Hanna Minerals Co. Produces pyrite, with average composition of 40% sulphur and 2½% copper; developed by 175' incline shaft.

Equipment: includes 500-ton mill, compressors and pumps.

Production: 9 months 1917, 7,500 tons; 9 months 1918, 7,700 tons.

GEORGIA PYRITES CO.

GEORGIA

Controlled by **Georgia & Tennessee Copper Co.** Wm. Tudor, Temple, Ga.

Property: 400 acres, including the Tallapoosa mine, in Haralson county, 9 miles from Buchanan and same distance from Morgan. Property owned in fee simple was first opened in 1856 and developed at different times up to 1884; practically unworked from that time to 1916. (Bull. 33, p. 68, of Geol. Surv. of Ga.)

Geology: main lode 180' wide on surface has a dip of 30°. This extends 500' with average width of 50' workable ore. A second lode lying 250' S. E. of main lode is said to be 10'-15' thick, but no work has been done, though good surface assays have been reported. Outcrops traceable for 3,500' over the tract. Pyritiferous ore occurring in a bedded-vein in chloritic schist averages 17.5% sulphur, 1.5% copper and \$1 in gold and silver. About 20% of the ore is lump, averaging 47% sulphur, 3.92% copper and \$2.50 in gold and silver. Treatment of the remaining 80% on Hartz jigs gave a concentrate with about a 50% sulphur content.

Development: by extensive underground workings, including 2 shafts; one 300', the other a prospect shaft 800' N. E. of old shaft.

Equipment: a small plant, costing \$50,000.

Mine leased 1916-1919 to Arizona and Georgia Development Co., of Temple, Ga.

HAUCK MINE

GEORGIA

Property: 28 acres owned by C. J. & R. L. Smith, of Cartersville, Ga. Was leased July, 1918, to W. O. Hauck. Located 7 miles from Cartersville, Bartow county, and 2¼ miles from the Louisville & Nashville R. R.

A vertical shaft sunk in 1918 to depth of 42', is said to have cut 32' of ore. Mine shows manganese oxides in yellow clay with underlying quartzite.

INTERNATIONAL ALUMINUM CO.

GEORGIA

Address: Glen L. Williams, Nitro, near Charleston, W. Va.

Inc. 1920.

Property: an area in S. W. Georgia estimated to contain 100,000,000 tons

of kaolin, from which it is proposed to extract aluminum and numerous by-products in works at Nitro, W. Va., built by the U. S. Government in 1918. A daily output of 240 tons of metal is expected 6 months after starting.

LIBERTY PYRITES CO.**GEORGIA**

Address: J. F. Ryan, Healy Bldg., Atlanta, Ga., or L. S. Berg, 47 Wall St., N. Y. City. D. S. Leonard, supt., Hiram, Ga.

Property: 3 lots, 100 acres, adjoining the Shirley mine, 3 miles north of Hiram and same distance south of Dallas, Paulding county, and within a few hundred feet of switch of Southern R. R.

Developed by two shafts, 70' and 100' deep, put down in 1910. Ore reported as medium grade pyrite in gangue of siliceous material. Geology described in Bull. 33, Geol. Survey of Georgia.

LINCOLN GOLD & COPPER MINING CO.**GEORGIA**

Lincolnton, Ga. Property purchased, 1917, by Ga. Copper Co., which sec.

Inc. June 11, 1906, in Oklahoma. Cap. \$2,000,000; \$1 par. Paid 1 dividend, of one-half of 1%. Was practically the successor of the Seminole Mining Co., which was a sad failure.

MARKSTEIN-DORN MINING CO.**GEORGIA**

Address: Phil. Dorn, mgr., Birmingham, Ala. **Mine address:** Rydal, Bartow county, Ga.

Reported to have a lease on the mineral rights on part of the property of W. B. Vaughan, White, Ga., consisting of 9 lots, 1,400 acres, in Bartow and Cherokee counties, near Pinelog Mountain, about 3 miles from Rydal on Louisville and Nashville R. R. Mine contains manganese and manganeseiferous iron.

Developed: by 150' shaft, 180' underground passages and some vertical test pits, the deepest 75'.

Equipment: includes steam shovel, concentration mill, double log washer, 35 h. p. boiler, 15 h. p. engine and jigs.

PAGA MINING CO.**GEORGIA**

Property abandoned in 1918. Described in Vol. XIV.

RABUN MINING & DEVELOPMENT CO.**GEORGIA**

Developing a prospect near Burton, in Rabun county.

REPUBLIC MINING & MANUFACTURING CO.**GEORGIA**

Reported operating the Sweetwater mine, two miles W. of Flint River, Sumpter county, at last accounts.

Mine contains bedded deposit of bauxite running 56.3% alumina, 11.8% silica, and 1.8% ferric oxide. Outcrops about 1,300' long, average thickness 4'.

SHIRLEY MINING CO.**GEORGIA**

Address: D. C. Collins, 217 Main St., Cincinnati, Ohio.

Officers: D. C. Collins, pres.; R. L. Tilton, v. p.; T. S. Doheman, sec. treas., with M. L. Kirkpatrick and S. Hickenlooper, directors.

Cap. \$1,500; shares \$1 par.

Property: a lease on the Shirley mine, abandoned in 1919. See Vol. XIV.

SOUTHERN LEASING CO.**GEORGIA**

See Volume XIV.

WISCONSIN-GEORGIA COAL & IRON CO.**GEORGIA**

Mail returned from last address: 808 Steger Bldg., Chicago, Ill.

Officers: A. H. Kluender, pres. P. W. Butler, v. p.; E. D. Edgerton, treas.; A. E. Roberts, sec.; A. L. Roberts, mgr., with J. H. Nullamore, directors.

Inc. in Delaware. Cap. \$800,000.

Property: about 200 acres, at Cohutta, Whitfield county, near the Georgia-Tennessee line, showing manganese and brown iron ore.

Developed by open cut 175' long, 40' wide and about 20-25' deep. Some shipments have been made.

IDAHO

The great mines of the State are in the Coeur d'Alene region in Shoshone county, 90% of the gross value of the metal output coming from that county. Idaho suffered considerably during 1920-21 from labor shortage and low metal prices, though the larger part of its metal production, being derived from silver-lead ores, it was not so acutely affected as were some other states.

In actual tonnage of ore mined the Bunker Hill & Sullivan Mng. & Conc. Co. was the largest producer, Federal Mng. & Sm. Co. and Hecla Mng. Co. following in that order, but in the matter of gross value of production, the Hercules Mng. Co. was far in the lead. Dividends paid by mining companies in 1920 totaled about \$4,500,000.

Idaho's output in 1921 showed a decline of about 51%. Production was \$497,000 gold; 5,720,000 oz. silver; 1,436,000 lb. copper; 192,000,000 lb lead; no zinc. Total value approximately \$15,208,000.

The following table, from the records of the State Mining Inspector, shows the metal output of Idaho over a period of years:

Metaf	1920	1919	1918	1917	1916
Gold, oz.	22,917	35,000	36,308	41,326	53,079
Silver, oz.	7,617,387	5,579,056	9,572,214	12,496,017	12,205,132
Lead, lb.	277,102,608	182,341,898	290,848,425	395,883,000	366,594,000
Zinc, lb.	21,931,200	15,994,229	51,691,000	96,123,000	98,700,740
Copper, lb.	2,730,000	3,122,763	5,240,000	7,282,000	8,052,725
Total value	\$38,837,708	\$18,374,000	\$37,320,082	\$56,292,210	\$49,102,693

The grand total value in 63 years is \$967,357,941; and in the past 26 years, \$533,382,197.

ADVANCE MINING CO.

IDAHO

Dissolved in 1919. Fully described in Vol. XIV.

AEOLIAN COPPER CONSOLIDATED MINING CO., LTD.

IDAHO

Idle. Described in Copper Handbook, Vol. XI.

AETNA MINING & MILLING CO.

IDAHO

Address: Wallace, Idaho.

Officers: Jas. Murphy, pres.; O. W. Lewis, sec.-treas., with Dr. C. S. Stone, Dr. F. Leo Quigley and C. W. Gilstrap, directors.

Cap. \$150,000; shares 10¢ par; assessable. Last assessment of 1 mill, due Oct. 25, 1920.

Property: 4 claims, unpatented, 1 mile S. E. of Burke, Shoshone county, developed by 300' tunnel. Idle since 1915.

AJAX MINING CO.

IDAHO

Office: 714 West 14th Ave., Spokane, Wash.

Officers: F. E. Starkey, pres.; H. W. Woodward, v. p.; J. A. Havighorst, sec.-treas., with F. Moriarity, G. E. Sprague, Gus Benson, and Alva C. Bixby (mgr.), directors.

Cap. \$1,600,000; \$1 par; all issued; assessable. Last assessment, No. 20, of 1 cent, levied Aug. 27, 1921. Annual meeting, first Tuesday after first Monday in September.

Property: 13 patented claims, 184 acres, in Gorge gulch, near Burke, Coeur d'Alene district, adjoining the Hercules on the E., and said to cover the extension of the Hercules vein system for 1¼ miles in length. Ore contains silver and lead.

Development: by several tunnels; No. 2 tunnel is over 3,000' in length, cutting the shoot opened in upper workings and exposing 1 to 8' of milling ore, with a 400' drift on a 6 to 8" high grade streak. A 250' shaft was sunk near the point where the vein was reached by the tunnel 650' from the Hercules boundary. Shaft fully equipped with air-hoist, compressor, and electric

motors. A large outcrop at east end of property was opened by 1,000' of work in 2 tunnels, and arrangements made to use the 3,500' Oom Paul Cons. Mining Co.'s tunnel, to explore Ajax ground. Early in 1918 the heading was in 7,000' and a 2' vein was cut at a vertical depth of 1,200'. Owing to high mining costs, mine was closed down during much of 1918, but was reopened in 1919. During 1920, the 200' level opened 160' of pay ore. A winze, sunk 120' below this level, also opened ore.

ALAMEDA MINING CO.**IDAHO**

Address: Wallace, Idaho.

Officers: F. J. Finucane, pres., 323 8th St., Spokane, Wash.; Frederick Burbridge, v. p.; Chas. McKinnis, mgr.; J. A. Wayne, sec.-treas.; above, with Chas. Hussey, directors. R. K. Catching, supt.

Originally Inc. 1900 as the Alameda M. & M. Co., Ltd. Reorganized 1910 as Alameda Mng. Co. **Cap.** \$1,500,000; \$1 par; assessable; 14 assessments levied since 1900. Control of 800,000 shares purchased April, 1916, at 15¢ a share, by syndicate consisting of above named officers. Stock listed on Spokane and Butte exchanges.

Property: 6 claims adjoining Success mine on the E., in Nine-mile section, Coeur d'Alene district, Shoshone county. Little work was done on the property during the 5 years up to 1918, owing to litigation with the Success company. Operations of the latter company have shown that orebodies opened on the 400, 450, and 700' levels of the Success mine extend into Alameda ground. Faces on the 400' and 450' levels are said to have averaged 31.7 oz. silver per ton, 31.5% lead, 21.1% zinc; and on the 700' level, 7.5% lead, 7 oz. silver, and 25.7% zinc.

The first suit was won by the Alameda Co., which was awarded \$56,070 damages. The Success Co. won on appeal, the court permitting company to follow the granite vein downward between vertical planes along the end-lines of the Granite claim beneath surface of the Cardiff, or any other claims under which this vein extended within the vertical lines named. The Alameda Co. appealed the case, but lost.

Development: by several tunnels, one being 2,500' long. Some lead-zinc ore was found on same level as the Success main tunnel, 500' below the upper workings on this ore-shoot.

ALBANY LEAD MINING CO.**IDAHO**

Address: c/o J. H. Nordquist, Eagle Bldg., Wallace, Idaho.

Officers: John Dunphy, pres.; C. W. Betts, sec.

Property: 11 claims S. E. of Burke, Coeur d'Alene region. No recent information, save that the annual meeting was held on Oct. 2, 1920.

ALCIDES MINING CO.**IDAHO**

Out of business. See Volume XIV.

ALHAMBRA MINING CO., LTD.**IDAHO**

Address: W. A. Corey, sec., Spokane, Wash.

Cap. \$1,000,000; \$1 par; assessable.

Property: 22 patented claims, in Yreka district, Coeur d'Alene, said to show silver-lead ores.

Development: to depth of 800' by 6,450' tunnel and several thousand feet of drifting.

Equipment: included compressor and 50-ton flotation plant erected late in 1917; financed by men identified with the Bunker Hill & Sullivan property.

A report in December, 1919, showed that total receipts had been \$168,326, of which \$165,000 was from assessments. Expenses were \$146,096 for development and \$16,055 for general charges.

ALICE MINING CO.**IDAHO**

Address: Wallace, Shoshone county, Idaho.

Officers: Walter Mackay, pres.; J. H. Foss, v. p.; J. F. McCarthy, sec.-treas.-mgr., with C. E. Bender and G. W. Ruggles, directors.

Cap. \$1,000,000; \$1 par; assessable.

Property: 23 patented claims, known as the Alice mine, situated between Wallace and Mullan.

Development: by 685' shaft and 9,570' of workings, from which 3,420 tons of silver-lead ore were shipped.

Equipment: includes a compressor and 125-ton concentrator. Idle.

ALLIE MINING CO., LTD.

IDAHO

Officers: E. C. Ross of Gilmore, Idaho, pres.-gen. mgr.; T. B. Cook, v. p.; H. R. Hyde, sec.-treas.

Inc. 1905, in Idaho. **Cap.** \$300,000; \$10 par.

Property: 6 claims, including the Allie mine, in the Texas district, near Gilmore, Lemhi county.

Geology: lead-silver ores occur in fissure veins in flat Devonian limestone underlain by Cambrian quartzite. The Allie vein, closely parallel to the lead veins, has gangue of iron oxide with no lead and only a trace of silver, the ore averaging 1 oz. gold and 50% iron. For geologic details see Umpleby Bull. 528, U. S. Geol. Survey, 1913, p. 107.

Development: a 4,500' tunnel has been driven into Gilmore mountain by the Gilmore, and the Pittsburgh-Idaho companies jointly. This tunnel crosses a dozen silver-lead veins and one carrying gold ore. Development work on the Latest Out lead vein is 800' below the outcrop. Ore reserves were claimed 1914 to be 15,000 tons, averaging \$12 per ton in gold. Extensive prospecting has not yet shown any commercial silver-lead deposits, though it has opened up good gold ore.

Production: first shipment in Feb., 1914, of 26 tons of gold ore gave smelter returns of \$11,060. Total production for that year was 50 tons, averaging better than \$300 per ton. Idle since 1914, except for limited work done by lessees.

ALMA RAY MINING CO.

IDAHO

Address: Kellogg, Idaho.

Officers: R. A. Brockman, pres.; C. C. Bloomquist, v. p.; C. B. Forbes, sec.-treas., with W. W. Papesh, Peter Engels and D. Barnhart, directors.

Cap. \$375,000; 25¢ par; assessable; last assessment, 1 mill, payable July 1, 1921.

Property: 14 claims near Kellogg, Shoshone county, between the Lombardy and Teddy groups.

Development: by several tunnels. Operations resumed early in 1921, and 181' of crosscutting said to have exposed 70' of mineralized quartz containing lead and silver.

ALPENA COPPER MINING CO., LTD.

IDAHO

Address: Gyde-Taylor Bldg., Wallace, Idaho.

Officers: C. W. Beale, pres.; A. H. Featherstone, sec.-treas.

Cap. \$100,000; 10¢ par; assessable. Assessment No. 4 of 1 mill per share payable July 2, 1920.

Property: 6 claims, 2½ miles N. of Adair, in St. Joe district, shows veins containing copper ore. Mine is in an isolated region and miners are hard to get. Work suspended indefinitely in 1920.

ALPINE MINING CO.

IDAHO

Address: Charles H. Treacy, mgr., Banks, Boise county, Idaho. J. McNeill and T. Harrington, supts.

Officers: Judge Charles Kerr, pres.; R. J. Colbert, sec.-treas.; with C. P. Nevin; J. J. McCarthy, and W. H. Maloney, directors.

Inc. 1919, in Idaho. **Cap.** \$600,000. Capital was raised in Lexington, Kentucky.

Property: the Three Sisters claims near Banks on the Idaho Northern branch of Oregon Short Line. Ore carries silver and lead. An 8-mile road has to be constructed.

ALTA COPPER MINING CO.

IDAHO

Probably dead. Fully described Volume XII.

ALTA-IDAHO GOLD & COPPER MINING CO.

IDAHO

Probably dead. Fully described Volume XI.

ALTA MINING CO., LTD.

IDAHO

Address: W. B. Horn, pres., Salmon, Idaho.**Cap.** \$500,000; \$1 par.**Property:** 3 claims on Jessie creek, near Salmon, Lemhi county.**Development:** by tunnels totaling 1,100', revealing a considerable quantity of gold-silver-lead ore. No data procurable regarding shipments.**AMAZON-DIXIE MINING CO.**

IDAHO

Office: Wallace, Idaho. **Mine office:** Sildix (not a P. O.), Mont.Consolidated 1921 with **Leslie Copper Mining Co.**, owning adjoining claims. Stock exchanged share for share.**Officers:** Wesley Everett, pres.-mgr.; A. W. Ellenberger, v. p.; Herman J. Rossi, sec.-treas., with Minnie Wyman and T. Motetta, directors.**Inc.** 1908, in Montana. **Cap.** \$750,000; increased 1921 to \$1,250,000; 50¢ par; 447,596 shares in treasury; assessable; 3¢ levied in Nov., 1919; 3¢ in Aug., 1920; 2¢ in March, 1921; 2¢ in Oct. 1921.

Operating expenses for 1920 amounted to \$251,108, with a cash balance in bank, Jan. 20, 1921 of \$18,136. This money was received from two assessments. (For earlier figures, see Vol. XIV.)

Property: 15 claims, in process of patenting, well timbered, at Sildix, Salted district, Mineral county, Mont., near Lookout, just across the state border-line, including holdings formerly owned by the Leslie Copper Mining Co. Property shows a fissure vein in quartzite exposed by surface trenching for 2,000', carrying galena, chalcopyrite and lead carbonates, associated with pyrite, with value mainly in lead.**Development:** by 2 tunnels, 8,000' long, the lower or main working tunnel with portal near the Northern Pacific Railway. Tunnels are connected by a 400' raise. A double compartment shaft is 1,300' deep and is to be continued another 400'. Crosscuts to north and south opened two veins, the southern one showing a body of gold-silver-lead-copper concentrating ore along a 60' drift. Early in 1921, the main work being done was extending No. 7 tunnel over 2,000' long, into the Leslie ground.**Equipment:** includes compressor, hoist, pumps, a water-power plant, 20,000' sawmill. (150,000' of sawn lumber on hand". Machine-shop, smithy, carpenter shop, and other necessary mine buildings. Property is served by the Northern Pacific Railway, 160' from the mine and over a 9-mile line from the Montana Power Co. The mine is electrically equipped throughout.**AMAZON-MANHATTAN MINE**

IDAHO

Address: Eugene R. Day, Burke, Idaho.**Property:** 6 claims N. W. of Callahan Zinc-Lead Co., Beaver Creek district, Coeur d'Alene region. Its history, which is one of continuous litigation over ownership, dates from 1912 and is given in Vol. XIV.**Development:** by tunnels, the lowest, or No. 3, 2,000' long, attaining a depth of 900'. Early in 1918, a ½-mile tramway was constructed to the Ray-Jefferson company's 400-ton mill, from which 60 carloads of concentrates from Amazon-Manhattan ore were shipped in 1918.**AMBERGRIS MINES CO.**

IDAHO

Address: Wallace, Idaho.**Officers:** Eugene R. Day, pres.; Harry L. Day, v. p.; W. B. Heitfeld, sec., with August Paulsen, W. Clayton Miller and Al. Page, directors.**Inc.** June, 1916, in Idaho. **Cap.** \$1,000,000; \$1 par; assessable; last assessment, 2c per share, called August, 1917. Company is a reorganization of the Ambergris Mining Co., organized under laws of Washington with \$3,000,000 capitalization. Stock was exchangeable at the rate of 3 shares of old for 1 share in the new company. Controlled by the Day family through Hercules Mng. Co., which holds 505,333 shares.**Property:** 3 claims, patented, adjoining the Hercules at Burke, Coeur d'Alene region, developed by 200' shaft, said to show 2-3' of silver-lead ore. As a result of former litigation, company has the right to use the Hercules tunnels and the aerial tram for shipments to rail. Developing through the

No. 4 Hercules tunnel to cut the Ambergris vein. Company is not yet a big producer.

AMBRO MINING CORPORATION**IDAHO**

Address: 600 West Pratt St., Baltimore Md., or Bellevue, Blaine county, Idaho.

Officers: J. H. Mencken, pres.; J. R. Kelly, v. p.-mgr.; Christopher Schaefer, sec.-treas.

Inc. in Delaware. **Cap.** \$1,000,000; 10c par.

Property: the Hidden Treasure and Idaho Central groups of 7 claims, 4 miles S. E. of Bellevue, and half mile from railroad between Hailey and Shoshone. Examined by Arthur Lakes, whose report is rather non-committal. Ore consists of iron oxide and galena, the latter with silver. Previous owners are reported to have extracted ore worth \$150,000.

Development: by 725' tunnel and 300' crosscut, being extended in 1920, said to have opened high-grade silver-lead ore, also some copper.

During 1920 the house of Thompson & Co. of Philadelphia, which is financing this prospect, offered to sell shares at 10 cents each, for cash or in 10 installments. If cash be paid, a 25% bonus was promised.

AMERICAN COMMANDER M. & M. CO., LTD.**IDAHO**

Address: H. B. Kingsbury, mgr., Mullan, Shoshone Co., Idaho, or Box 765, Wallace, Idaho.

Officers and directors: Patrick Johns, pres.; J. A. Glowe, v. p.; Herman Marquardt, sec.-treas.; J. L. McCormick, asst. sec.-asst. treas.; H. B. Kingsbury, mgr.

Cap. \$1,500,000; \$1 par; 1,200,000 issued; assessable. Last assessment, of 1 cent per share, payable May 19, 1921. About 200,000 shares sold at delinquent sale on Dec. 6. Cash on hand in Jan., 1920, amounted to about \$3,000.

Financial report for year ended June 30, 1921, shows total receipts, \$36,832; of which \$33,525 was from 3 assessments; disbursements totaled \$32,363; balance, \$4,469.

Property: 2 claims and 2 fractions, patented, 32½ acres, situated 1 mile N. of Mullan, and between the Gold Hunter mine and the Federal M. & S. Co.'s Morning mine. Considered well located for exploration through adjoining properties. Ore carries lead and silver.

Development: by 4,500' of workings, includes 2 tunnels, No. 1, 1,200' and No. 2, 2,600' long. The tunnels are to be connected and crosscuts driven to the vein. Present work is devoted to completing a 300' crosscut tunnel to reach a high-grade silver-lead vein found in the bottom of an old 60' shaft, 493' above No. 1 tunnel.

Equipment: includes a compressor and machinery sufficient for extensive exploration. Six men were employed during the winter of 1920-21.

AMERICAN DEVELOPMENT, MNG. & REDUCT. CO.**IDAHO**

Described in Vol. XIV. Name changed to **Rescue Gold Mines Co.**, which see.

AMERICAN EAGLE MINING CO.**IDAHO**

Address: A. W. Boyd, Sandpoint, Bonner Co., Ida.

Inc. 1919, in Idaho.

Property: 7 claims, on W. side of Pend Oreille Lake and 4½ miles S. of the Armstead mine.

Development: by 1,375' of crosscuts and drifts, on a quartz vein 2-8' wide, carrying lead and silver.

AMERICAN MINING CO., LTD.**IDAHO**

Address: John Dolan, sec.-treas., Box 236, Wallace, Idaho.

Inc. Oct. 2, 1910, in Montana. **Cap.** \$50,000; \$1 par; assessable, issued 25,000 shares, sold at \$1. Assessment of 2 mills per share levied Sept. 4, 1920.

Property: a half interest in the Blue Jacket and Queen mines in Seven Devils district, near Landore, Adams county. The Blue Jacket mine has a

400' shaft, and the Queen has a 1,500' tunnel; these properties said to have produced about \$250,000 in ore, with up to 47% copper....

Holdings also include a five-eighth interest in the Peacock, White Monument, a two-third interest in the Helena mines, held jointly with A. M. Holter and S. T. Houser; and a one-half interest in the Blue Jacket No. 2, Copper Queen, Norman, Legal Tender, Copper Crescent and Calumet mines, held jointly with A. C. Johnson and Amelie H. Kleinschmidt.

The Peacock mine, discovered 1869, is the most noted property and has been the largest producer in the Seven Devils district, having 1,500' of workings, which have produced 25,000 tons of high-grade ore. Estimated to show 200,000 tons of $4\frac{1}{2}\%$ copper ore with about \$5 combined gold and silver value on dumps now. Shipments, 1903, returned 13.3, to 18.3% copper, from 3 to 5 oz. silver and \$1.33 gold per ton; and 11 shipments to the Oregon Smelting & Refining Co. gave returns of 20.5 to 40.2% copper, 1.15 to 8.7 oz. silver and \$1.20 to \$3.40 gold per ton. Production, 1905, was 5,000 tons of ore, of about 15% copper tenor, equal to 750,000 lb. fine copper.

Company inactive since 1909, owing to litigation. The Blue Jacket mine was last operated by lessees in 1917.

See Mines Handbook, Vol. XII.

AMY-MATCHLESS MINING & MILLING CO. IDAHO

Address: W. A. Beach, treas., Mankato, Minn.

Officers: Geo. Wedemann, pres.; C. J. Holman, sec.; W. A. Beach, treas.

Inc. July, 1914, in Arizona. Cap. \$1,250,000; \$1 par; assessable.

Property: 19 claims, on Pine Creek, Coeur d'Alene, 3 miles from rail. A contact vein between quartzite and slate trends N. W., dips S. W. and is displaced 500' by a fault. Ore carries lead and zinc.

Development: by 4,000' tunnel and 200' shaft. A 3' vein, with selected ore carrying 60% lead and 12 oz. silver, was reported cut in the tunnel in 1920.

ANCHOR MINING CO. IDAHO

Address: Evan Evans, pres., Burke, Idaho, or J. L. Prickett, sec.-treas., Raymond Hotel, Spokane, Wash.

Cap. \$1,500,000; \$1 par.

Property: lead-silver bearing claims near Murray, Lalande district, Coeur d'Alene. Developed by tunnels. An ore-shoot 200' long was opened early in 1919.

ANTIMONY-SILVER MINING CO. IDAHO

Defunct. See Volume XIV.

ARCO MINING & MILLING CO. IDAHO

Address: Angus McKellar, pres., Walker Bank Bldg., Salt Lake City, Utah.

Property: an antimony mine 18 miles S. W. of Arco, Blaine county.

Ore also carries small values in silver and gold. Vein 4' wide, opened for 70'. A second vein cut 30' from portal of tunnel, said to show ore in winze.

ARCTIC MINING & MILLING CO., LTD. IDAHO

Address: W. H. Keating, treas., Wallace, Idaho.

Cap. \$1,500,000; \$1 par; assessable.

Property: 5 claims on Placer creek, 6 miles S. of Wallace. Tunnels have opened lead-silver ore.

ARGENTA MINING CO., LTD. IDAHO

Address: C. D. Brock, Wallace, Idaho.

Officers: E. Lindsley, pres. and mgr., Missoula, Mont.; D. C. Smith, v. p.; C. D. Brock, sec.-treas., with A. L. Duncan and W. C. Richardson, directors.

Inc. Dec., 1906, in Idaho. Cap. \$1,092,000; \$1 par; assessable; all outstanding. Last assessment, $\frac{1}{2}$ mill per share, payable May 30, 1921. Annual meeting, second Monday in January.

Property: 5 claims, 3 patented, 75 acres in Hunter district, Shoshone

county claimed to show quartz fissure vein 12' wide, carrying carbonate and oxide ore at surface and sulphide ore at depth; the surface ore consisting of iron oxide, quartz and barite, averages 2% lead and 1 oz. silver. Development by 875' tunnel to depth of 400'. Lessees were extracting ore, at last account (1918).

ARGENTINE LEASING CO.**IDAHO**

Address: M. W. Emmett, sec.-treas., Kellogg, Ida.

Officers: Carl F. Nelson, pres.; John Stoykoff, v. p.; Steve Corrick, mgr., with Geo. Newsome, directors.

Property: a 2-year sublease from Rush J. White, on the Argentine mine, an old silver producer, 2½ miles W. of Kellogg. A strike of 100 oz. silver ore was reported in October, 1921.

ARKANSAW LEASING CORPORATION**IDAHO**

Address: F. D. Smith, 217 Linden Ave., Ithaca, N. Y.

Property: the Arkansaw mine of the Seven Devils Copper Co., near Landore, Adams county. Contact deposits occur between diorite and limestone, and carry copper, silver, and gold.

Development: by tunnels 700' and 1,200' in length.

Idle since 1919.

ARLINGTON MINING CO.**IDAHO**

Address: Burke, Idaho.

Officers: C. T. Fisher, pres.; M. J. Mahoney, sec.-treas., with W. Fisher, Joseph Ruby and Otto Freeman, directors.

Cap. \$1,500,000; \$1 par; assessable.

Property: 20 claims near Mountain House, Coeur d'Alene. Ore carries lead, silver and copper.

Development: by 2,000' of tunnels. Equipped with compressor, etc., driven by water power.

ARMSTEAD MINES INCORPORATED**IDAHO**

(Formerly the Blacktail Mining Co.)

Address: Talache, Bonner county, Idaho.

Officers: Major H. H. Armstead, pres.-mgr., Washington, D. C.; A. H. Burroughs, v. p.; Karl Jungbluth, 2nd v. p.; H. D. Kingsbury, treas.; H. L. Brown, sec., with C. C. Dula and J. Peterson, directors. Daniel G. McLachlan, supt.

Property the Keystone, or Blacktail mine, on Blacktail mountain, west side of Pend d'Oreille lake, near Talache landing. Originally owned by the Keystone Mines Corporation (See Volume XII of the Mines Handbook). Property sold by Blacktail Co. (Volney D. Williamson) for \$250,000 in June, 1917, and 13½¢ per share was paid on the 1,746,440 outstanding shares of the old company.

Development: by 4,000' Rainbow tunnel, intersecting vein at 3,500' at a vertical depth of 1,000'; a 1,200' raise and about 3,000' of drifting are said to expose between 60,000 and 75,000 tons of gold-silver-copper ore, averaging \$25 per ton, mainly in silver. Milling ore persists to 1,200' vertical where the vein is up to 7' wide. A 60° three-compartment raise at 3,800' connects with No. 2 level 600' above. By the end of 1919, the 700' level had opened the vein at points 1,600' apart. During the winter of 1920-21, exploration was done on the 800, 900 and 1,000' levels. Workings total 15,000'. Sixty men employed, Sept., 1921.

Equipment: includes boiler, pump, hoist, compressor, and six drills. A concentrating plant is being erected.

ATLANTA MINES CO.**IDAHO**

Address: Jas. A. Dunn, 47 E. 42nd St., New York.

Controlled by the Barnsdall Corporation, which owns \$1,938,300 of the stock.

Officers and directors: F. H. Minard, pres.; E. O. Bartlett, v. p.; Jas. A. Dunn, sec.; J. T. Furlong, treas.

Inc. Aug., 1909, in Delaware. Cap. \$2,000,000; \$100 par.

Property: 11 patented and 6 unpatented claims, mill-sites, and water-rights in Boise district, Elmore county, carrying gold-silver ore.

Development: by 600' shaft and extensive workings.

Equipment: hydro-electric plant, hoist, compressor, aerial tram, 200-ton concentrating mill and cyanide plant.

Presumably idle.

ATLANTIC MINING CO.

IDAHO

Address: Herman J. Rossi, pres., or Otto A. Olsen, sec.-treas., Wallace, Idaho.

Cap. \$1,000,000; \$1 par.

Property: 7 claims in Beaver section of Coeur d'Alene. Assessment work only being done.

AURORA-SAMPSON MINING CO.

IDAHO

Consolidated Jan. 14, 1916, with H. E. M. Mng. Co. to form the **Western Union Mining Co.**, which see.

AUXER GOLD MINES

IDAHO

Address: Jas. Campbell, postmaster, Hope, Ida.

Officers: Jas. Campbell, pres.-gen. mgr.; F. O. Hagie, v. p.; M. B. Dunkle, sec.-treas., with W. W. von Canon and J. L. Breckenridge, directors.

Inc. 1920, in Idaho. Cap. \$500,000.

Property: a group of 7 gold-silver claims, near Hope, Bonner county.

Development: by tunnel and 90' shaft, said to show a quartz vein, 11' wide, samples averaging \$5.99 in gold.

Machinery installed in 1921 and a new tunnel started to cut the orebody at 250' depth.

BANNER-IDAHO MINING CO.

IDAHO

Address: C. J. Smith, sec., 63 Zeigler Bldg., Spokane, Wash.

Cap. \$1,500,000; \$1 par; assessable after all issued.

Property: 5 patented claims in Hunter section of Coeur d'Alene region. Ore carries lead and silver and is opened by 1,500' of tunnels, etc.

No information obtainable.

BANNER MINING & MILLING CO.

IDAHO

Address: Peter Steele, mgr., Silver City, Idaho.

Inc. in Idaho. Cap. \$1,000,000; \$1 par.

Property: 20 claims, at Silver City, Owyhee county, an old-time producer.

Ore: quartz, carrying gold and silver, occurs in a fissure vein.

Development: by tunnel. In 1920, the Blaine tunnel and the "28" crosscut of the Florida Mountain M. Co. were leased to permit of easier exploration. The crosscut will be extended into Banner ground.

Equipment: 4 (Nissen)-stamp mill, using pan-amalgamation and concentrators, compressor and electric power.

BASIN MINING CO.

IDAHO

Address: Wallace, Idaho.

Officers: E. R. Day, pres.; J. J. Murphy, v. p.; P. Maggy, sec.-treas., with H. J. Rossi and J. J. Day, directors.

Inc. July, 1915. Cap. \$75,000; shares 5c par. Company is a reorganization of the old Basin Mining Co., involved in litigation since 1907. Control purchased May, 1916, by the Hercules Mining Co., which bought 700,000 shares of issued and 500,000 shares treasury stock, and held 840,854 shares, at last accounts.

Property: 5 patented claims in the Burke section, south of and adjoining the Hercules mine, between the Laclede on the west and the Stanley group. It is valuable to the Hercules Co. for tunnelling from the Hummingbird and Stanley into the Hercules mine. No information obtainable.

BEAR CREEK MINING CO.

IDAHO

Address: Wallace, Idaho.

Officers: L. L. Sweet, pres.; J. F. Forest, v. p.; J. F. Morton, sec.-treas., with F. C. Curran and John Noonan, directors

Inc. Aug., 1916. Cap. \$250,000; 25c par; assessable. Last assessment of 1c payable Sept. 17, 1921. Annual meeting third Tuesday in August. Company bought the holdings of the Oro Fino Co. at receivers sale, June, 1916, and is a reorganization of that company.

Property: 11 lead-silver claims, about 7 miles from Murray, in the Summit district, Coeur d'Alene, 3 miles from the railroad.

Development: by tunnels. Twelve feet of milling ore reported opened in a drift at 1,200' depth.

Equipment: includes a mill and flotation plant.

Production: one carload of concentrate weekly, assaying 61% lead and 6 oz. silver, was shipped during part of 1920.

BELLE OF THE WEST MINING CO. IDAHO

Address: G. R. Trask, pres., P. O. Bldg., Wallace, Idaho

Cap. \$75,000; shares 5c par; assessable.

Property: 2 claims, adjoining the Success mine, and said to carry the western extension of the Success vein.

Development: by tunnels and crosscuts. The main vein under development contains lead, silver and chalcopyrite.

BELL MINING CO. IDAHO

Address: C. H. Hussey, sec., Empire State Bldg., Spokane, Wash.

Cap. \$50,000; 10c par; assessable.

Property: 8 patented claims in Lalande section of Coeur d'Alene, carrying lead-silver ore, developed by over 7,000' of tunnels and other workings. Bonded to F. J. Markwell.

BELMONT-BANNER MINING CO. IDAHO

Office: 417 Hutton Bldg., Spokane, Wash.

Officers Conrad Wolfe, pres. and gen. mgr.; E. A. Wolfe, v. p., M. E. Poole, sec.-treas., with A. J. Davis and Gale Smith, directors.

Cap. \$1,000,000; \$1 par.

Property: 10 claims one fractional, near Delta and 12 miles from Wallace, Shoshone county, shows a fissure vein of 3 to 4' surface width, in quartzite, carrying silver, lead and copper. Mine has a tunnel over 500' long with a 60' winze sunk on the orebody. No recent information available.

BELMONT MINING CO., LTD. IDAHO

Office: F. P. Hess, sec., 415 Cedar St., Wallace, Shoshone county, Idaho. Mine in Two Mile gulch, Evolution district, 3 miles north of Osborne.

Officers: Wm. Scheave, pres.; M. E. Hess, v. p.; Frank P. Hess, sec.-treas., with Ida Scheave and H. Scheave, directors.

Inc. 1900. Cap. \$100,000; 10c par, with 200,000 shares in treasury. Reorganized 1909, 1,000,000 shares at \$1 par; assessable; placing 500,000 shares in treasury. Assessment of 5 mills per share levied Oct. 22, 1921.

Property: 12 claims, showing several contact veins in Burke and Revett quartzite. Ore is said to assay 2.5% lead, 2oz. silver, 15% manganese with only a trace of copper.

Development: by 2,600' of tunnels. No development work done in 1918-19. Representation work only in 1920-21.

BENTON MINING CO. IDAHO

Address: Barnard Block, Wallace, Idaho.

Officers: John Callahan, pres.-mgr.; F. P. Candee, sec.-treas.; E. G. Gnaedinger, cons. engr., with Fred Richardson and N. E. Nuzum, directors.

Cap. \$1,250,000; \$1 par; issued 1,165,000 shares; assessable; increased to \$1,500,000 in March, 1920. Listed on Spokane Exchange. Annual meeting in April at Wallace.

Property: 6 claims on east side of Gorge gulch, adjoining the Stanley and Moonlight, near Burke, supposed to have a continuation of the Stanley vein system. **Ore:** is silver-lead-copper-antimony, occurring in fissure veins, said to assay 60% lead, up to 12% copper and 65% antimony. **Lead vein**

dipped out of winze at 60' depth and at 200' the McNeil fault was passed through. Crosscutting at this level exposed lead vein to the S. E., but main orebody is supposed to be deeper.

Development: by adits, 200' winze from main adit level, with over 1,000' of drifting.

BERNEZ MINING CO.

IDAHO

Succeeded by the **New Caledonia Cons. M. Co.**, which see.

BEST CHANCE MINING CO., LTD.

IDAHO

Main office: 614 Lyde Bldg., Spokane, Wash. **Mine office:** Wallace, Shoshone county, Idaho.

Officers: Chas. H. Bell, pres.; Chas. A. Gram, sec.-treas., with J. A. Scott and Chas. Horr, directors.

Inc. March, 1909, in Idaho. Cap. \$1,500,000; \$1 par; fully paid and assessable.

Property: 12 claims in the Yreka section, Coeur d'Alene. Fissure veins, carrying lead and silver ore in Burke quartzite, are said to be 100' wide.

Development: by 3,500' of workings.

BETHLEHEM GOLD MINES, LTD.

IDAHO

Office: Geo. H. Van Dusen, sec.-treas., 408 Sherwood Bldg., Spokane, Washington. D. B. Heil, trustee.

The former president, Harry Dudman, is charged with misusing company funds and is out on bond. A new company was to be organized by stockholders in 1921, stock to be exchanged upon payment of a 2c. assessment to meet claims of about \$14,000.

Inc. in Washington and registered in Idaho. Cap. \$1,500,000; \$1 par.

Property: 7 claims on Tungsten mountain, 20 miles N. E. of Bonners Ferry in Boundary county, and 4½ miles E. of Copeland on G. N. R. Examined 1919 by C. A. Low. Veins are quartz fissures cutting granite. Sulphides show near surface, and include iron pyrite, chalcopyrite, galena, and sphalerite. There is also some tungsten and molybdenite.

Development: 400' of surface trenches exposed several large veins and a number of stringers paralleling and running into the Dora vein. These were opened by tunnels, revealing fair ore in places. The main tunnel followed the Dora for over 100', showing 2 to 7' of ore.

BIG BALDY MINING & MILLING CO.

IDAHO

Address: Jas. Petikan, pres.; G. W. Sommer, sec., Old Nat'l. Bank Bldg., Spokane, Wash.

Cap. \$1,000,000; 50c. par.

Property: 21 gold quartz and 3 placer claims in Buffalo Hump district, Idaho county, so far only developed by 600' of workings.

BIG CREEK LEASING CO.

IDAHO

Address: Kellogg, Idaho.

Officers: D. W. Price, pres.; Thomas Fluke, v. p.; O. A. Larson, sec.-treas., with R. R. Price, W. A. Beaudry and Elmer Brown, directors.

Cap. \$50,000; shares \$10 par; all issued. Assessment of \$1 per share levied Jan. 4, 1921. Annual meeting July 8.

Dividends: initial of 50c per share paid September, 1917; total is \$10,000. Profit was \$11,193 in 1917.

Property: a 7-year lease, to 1920, on the ground below the 500' level of the Yankee Boy mine of the **Sunshine M. Co.**, which see.

Development: by tunnels, one 2,150' long, opening silver-copper ore.

Production: 25 cars of ore in 1916, valued at \$28,000; 2,468 tons valued at \$127,298 in 1917. Shipments were made in 1919, but no recent returns received from company.

BIG CREEK MINING CO.

IDAHO

Address: 513 Bank St., Wallace Idaho.

Officers: G. Scott Anderson, pres.-mgr.; W. W. Smith, sec., above with A. H. Featherstone, Irving Anderson, and C. E. McCoy, directors. Charles Couch mill supt.

Cap. \$1,250,000; \$1 par; assessable. Assessment of 10 mills per share levied Sept. 10, 1921.

Property: 6 claims, 1½ miles up Big Creek, near Kellogg, in the Coeur d'Alene district. Ore contains silver, lead and copper.

Development: by 3,380' crosscut tunnel with levels 200' apart, reaching maximum vertical depth of 1,100'. Two other tunnels have opened the same shoot, which can be developed 500' deeper by tunnel. Dumps contained over 4,000 tons of ore in 1920.

Equipment: includes electric power, air-compressors, 1,400' aerial tramway, drills and a 75-ton mill.

Production: from 1915 to 1917, 17 cars of 1 to 5% copper and 2 to 5% lead ore, yielding \$44,010 net; and 18 cars in 1918, yielding \$43,510. Shipments being made at the rate of 5 cars of concentrate per month. Twenty-five men employed.

BIG CREEK SILVER MINING CO.

IDAHO

Address: John P. Gray, Coeur d'Alene, Idaho.

Cap. \$100,000; 10c par.

Property: up Big Creek, near Kellogg. No information available.

BIG DIVIDE MINING CO., LTD.

IDAHO

Address: Wallace, Idaho.

Officers: Alexander Murphy, pres.; F. P. Markwell, v. p.; E. H. Pattison, sec.-treas., with C. A. Markwell and J. F. Markwell, directors.

Cap. \$1,500,000; \$1 par; 1,241,740 issued.

Property 137 acres, a silver-lead prospect in Lalande district, Shoshone county, between the Success mine and property of Federal M. & S. C..

BIG FIVE MINING CO.

IDAHO

Address: W. F. Sargent, sec.-treas., St. Maries, Idaho.

Cap. \$2,000,000; \$1 par; assessable.

Property: 40 acres in St. Maries section of Coeur d'Alene, carrying gold, copper, and lead, and opened by tunnels. Idle several years.

BIG IT MINING & MILLING CO.

IDAHO

Address: M. L. Pratt, sec., Kellogg, Star Route, Idaho.

Officers: H. S. Davenport, pres.; F. M. Cummings, v. p.; M. L. Pratt, sec.-treas., with Jack Shiplet and J. J. Randall, directors.

Cap. \$150,000; 10c. par. Annual meeting first Tuesday in June.

Property: in Pine Creek section of Coeur d'Alene. Ore said to contain lead, silver and zinc.

BITTER ROOT MOUNTAIN MINING CO.

IDAHO

Address: 939 South Hilliard St., Spokane, Wash.

Officers: F. A. Edgerton, pres.; F. A. Noteware, sec.-treas.

Inc. 1900, in Washington. Cap. \$75,000; 5c par; 1,200,000 issued.

Property: 3 patented claims in Hunter district, Shoshone county, developed by 1,000' of tunnels, and shaft, opening a little silver-lead ore.

BLACK BARB MINING CO.

IDAHO

Address: Wm. H. Alexander, 469 Fifth Ave., New York, or R. Guyer, 318 Symons Bldg., Spokane, Wash. **Mine address:** Hailey, Idaho.

Officers: Raymond Guyer, pres.-mgr.; Edw. W. Van Asmus, v. p.; Wm. H. Alexander, sec.-treas., with John A. Martin, H. G. H. Tarr, Edw. W. Beattie, J. R. Powell, Nelson Macy and Theo. Van Dorn, directors.

Inc. March 21, 1917, in Idaho. Cap. \$1,500,000; \$1 par; all outstanding. Coal and Iron Nat'l. Bank, New York, registrar and transfer agent.

Property: 14 claims, 4 patented, 280 acres in Mineral Hill mining district Blaine county. Ore contains gold, silver, lead and zinc with iron pyrite occurring in quartz fissure veins in limestone.

Development: consists of 2,700' of workings, including tunnels, 600', 200' and 300' in length. Reported 10,000 tons of ore blocked out in 1917. Some rich lead-silver ore was opened in 1918, and 1919 on the 550' level. Inactive, 1920-21.

BLACK BEAR CONSOLIDATED MINING CO., LTD. IDAHOReorganized as **Black Bear Mines Co.**, which see.**BLACK BEAR MINES CO. IDAHO**Formerly **Black Bear Cons. M. Co., Ltd.** Office: Wallace, Idaho.**Officers:** Chris Hagan, pres.; Peter Bernier, v. p.; H. J. Arnett, sec-treas., with R. E. Weniger, H. J. Rossi and Otto Grice, directors.**Inc.** March, 1917, in Idaho. **Cap.** \$400,000; 20c par; assessable; 1,007,000 issued. Assessment 1c. a share, delinquent Oct. 9, 1920.**Property:** 4 patented claims and a mill site, 4½ miles N. W. of Wallace, Shoshone county. Examined by Frank J. Davey.**Geology:** claims carry a fissure vein in Burke quartzite that dips 80° S., and runs N. 75° W.; in upper horizons vein carries 10% lead as carbonate, with 2 oz. silver per ton. Though narrow and poor at surface, the vein has widened to 8' at 125' in depth, with the content just given. In places the vein widens to 23'. At 1,180' below the surface the vein is lean and shows evidence of extreme pressure, as shown along drifts from a 2,400' crosscut tunnel. Raises from that level encounter concentrating ore carrying silver, lead, and zinc, a short distance upward.**Development:** by 6,000' of tunnels. No. 1 cuts vein at 500' depth, exposing carbonate ore continuing down to bottom of 125' winze. Main or working tunnel, 1,000' lower, also cuts ore, the shoot being 2'-25' thick and 300' long. As shown in raises, the ore averages 6' wide, and runs 2.2-oz. silver, 7.76% lead, and 16.57% zinc. The face of the workings is but 350' from the end line of the Flynn property.**Equipment:** includes electric motors, compressors, shops, etc.

Company is inactive. In June, 1921, an agreement was made with the Coeur d'Alene Syndicate whereby the later company secures access to and can operate the Flynn group and Senator Mining company holdings through the Black Bear tunnel. The consideration is reported to be \$50,000 payable in cash and in stock of the Senator M. Co. on or before August 1, 1926.

BLACKBIRD COPPER & GOLD MINING CO., LTD. IDAHO**Idle. Offices:** Du Bois, Pa.; and 807 Newhouse Bldg., Salt Lake City, Utah.**Officers:** John E. DuBois, pres.; Chas. J. North, v. p.; F. O. Frick, sec.; W. H. Watt, treas. and gen. mgr.; with L. N. Morrison, directors.**Inc.** in West Virginia. **Cap.** \$2,000,000; \$1 par. Bonds, \$500,000, at 6%. Annual meeting, fourth Tuesday in January. Is a close corporation.**Property:** Brown Bear mine and adjoining ground, covering 29 claims, patented, 482 acres, in the central part of the Blackbird district, Lemhi county.**Development:** 3 shafts, with drifts and numerous short tunnels. Ore-bodies are irregular replacements along fracture zones in schist and quartzite. Property is in one of the best mineralized sections of the state and is said to show wide zones of disseminated ore carrying 2½% copper and 5 cents gold for each per cent of copper. Said to have spent \$1,000,000 on exploration work and ore testing.

Company also owns 97 claims, 87 patented, adjoining the Cactus mine in the San Francisco district of Utah. This property has considerable development and was explored by diamond-drilling. Development on the 300' level from an old shaft disclosed a vein of chalcopyrite.

BLACKHAWK MINING & DEVELOPMENT CO., LTD. IDAHO

Controlled by Federal Mining & Smelting Co.

Address: A. W. Hoover, sec., Wallace, Idaho.**Cap.** \$150,000; 10c par; assessable.**Property:** the Blackhawk lead-zinc mine in Government gulch, Coeur d'Alene, developed by about 6,300' of workings.**BLACK PINE MINING CO. IDAHO****Office:** 926 W. Lehigh Ave., Philadelphia, Pa. **Mine office:** Elk City, Idaho.

Officers: S. J. Rieben, pres.; Louis H. Michel, v. p.; Dr. Wm. H. Kinch, treas.; R. T. Moyer, sec., with J. B. Shourds, Dr. Fred Bridgland, E. Thompson and Jas. McGrath, directors.

Inc. Feb., 1913, in Arizona. **Cap.** \$1,000,000; \$1 par.

Property: 41 claims, 700 acres, includes Black Pine and Crown Point mines, at Elk City, Idaho county.

Ore: carries gold and silver, in veins believed to be a continuation of the Mascot lead vein, averaging \$12 per ton in gold, silver, lead and zinc.

Development: by 1,400' tunnel.

Equipment: compressor, drills, 5-stamp mill, and concentrators.

Production: 40 tons of ore daily early in 1918.

BLACK ROCK MINING CO.

IDAHO

Address: G. W. Sommer, Old National Bank Bldg., Spokane. Wash.

Cap. \$200,000; 10c par.

Property: 12 unpatented lead-silver claims 2 miles N. of Kellogg.

BLACKSTONE MINING CO.

IDAHO

Address: J. H. Hawley, pres., Boise, Idaho.

Cap. \$1,000,000; \$1 par.

Property: 5 patented claims in Volcano district, carrying gold-silver-copper ore. Developed by 400' tunnel and crosscuts, said to have opened a vein 2' wide, averaging \$50 per ton.

Operated by lessees since November, 1920.

BLACKTAIL MINING CO.

IDAHO

Address: Jos. Plastino, Italian Consulate, Spokane, Wash.

Officers: Joseph Plastino, pres.; Mrs. Sosetta Plastino, sec.; Wm. Paptist, treas.

Cap. \$200,000; \$1 par.

Property: 6 unpatented claims, on Pend Oreille lake, near Talache, Bonner county. Ore carries copper, gold, and silver. Developed by short tunnel. Six feet of \$7.60 silver ore opened in November, 1919. Plan driving a 200' tunnel.

BLAINE & EMMETT MINING CO., LTD.

IDAHO

Address: R. W. Skeman, sec., Murray, Idaho.

Officers: M. Heblethwaite, pres.; Bert Kincaid, v. p.

Cap. \$1,000,000; \$1 par. Annual meeting held July 31, 1920.

Property: 4 unpatented claims near Union, Shoshone county, carrying copper, silver and lead ore. Driving a crosscut tunnel, in 600', August, 1921.

BLOYER MINING CO.

IDAHO

Alex Bills, gen. mgr., Pierce, Idaho.

Property: 7 claims, on Poor Mans creek, 9 miles N. W. of Pierce, Clearwater county, said to show four veins carrying free milling ore with an average value of \$12 per ton.

Development: by 120' crosscut tunnel and 230' of drifts. **Equipment:** includes 25-ton Chilean mill, crusher and steam-power plant.

BLUE BELL MINING CO., LTD.

IDAHO

Address: Frank Bland, sec., Barnard Block, Wallace Ida. M. J. Weber, pres., 2732 N. San Francisco Ave., Chicago, Ill.

Cap. \$1,000,000; \$1 par; assessable. Last assessment, of 4 mills per share levied August 4, 1920.

Property: 11 unpatented claims near Wardner, Shoshone county, Idaho.

Development: by a 2,500' tunnel, said to have opened silver-lead ore.

Idle for several years, but worked was resumed in 1920 and a crosscut driven N. from the main tunnel.

BLUE GROUSE MINING CO.

IDAHO

Address: Gydc-Taylor Bldg., Wallace, Idaho.

Officers: Donald A. Callahan, pres.-treas.; D. F. Staley, v. p.; C. W. Newton, sec., with J. F. McCarthy, John Borg, and F. L. White, directors.

Company is controlled by the Callahan Zinc-Lead Co., which see.

Property: Blue Grouse mine, 4 patented claims, between the Callahan

Zinc-Lead and Amazon-Manhattan properties, developed by 1,500' of tunnels on 2 veins. Ore is lead-silver, with some zinc.

BLUE JACKET COPPER CO., LTD.

IDAHO

Company has discontinued operations. Fully described Vol. XI, Copper Handbook. See American Mng. Co., Ltd.

BLUE JACKET MINING CO.

IDAHO

Address: Lucile, Idaho county, Idaho.

Officers: W. B. Clark, pres., Johns Hopkins University, Baltimore, Md.; B. N. Baker, v. p., J. M. Lawford, sec.-treas., with F. T. Homer and Frank E. Johnesse, m.gr., directors

Inc. Oct. 20, 1908, in Idaho. **Cap.** \$50,000; \$1 par, fully paid. Annual meeting, first Monday in January. Company is a close corporation.

Property: 7 claims, patented, about 132 acres, in Crooks Corral mining district, Idaho county.

Geology: ore occurs as replacement along contact between diorite and andesite porphyry. Orebody is from 50 to 70' wide, runs east and west, and dips at an average angle of 35°. The orebody is more or less oxidized down to the 700' level, though the greater part of the ore in the lower levels is original sulphide and the enriched portion lies between the 1st and 4th levels.

Development: by a 300' shaft, tunnels, crosscuts, and drifts, aggregating 3,395'. These workings block out 33,000 tons of ore, carrying 3.7% copper, 1.5 oz. silver, and \$1.80 gold per ton. Total reserves estimated at 542,000 tons. Property has no mill, hoist, or reduction plant of any kind and has been closed down since 1909 awaiting railroad transportation, which is still 40 miles away. Property is a good one and officers able and responsible.

BLUE RIBBON MINING CO.

IDAHO

Address: A. Harris, sec.-treas., 601 N. Monroe St., Spokane, Wash. Geo. Goebler, pres.

Inc. 1914, in Washington. **Cap.** \$150,000; 10c par.

Property: 140 acres, 5½ miles N. E. of Burke, Shoshone county, carrying lead ore.

Development: by 1,900' tunnel gaining depth of 350'.

BLUE STAR MINING & MILLING CO., LTD.

IDAHO

Address: A. C. Morbeck, sec., Kingston, Idaho.

Inc. 1909, in Idaho. **Cap.** \$1,000,000; \$1 par.

Property: 160 acres on Pine creek, Shoshone county, carrying silver and lead.

Development: by 500' two-compartment shaft, and 3,000' of workings. In 1920, the 400' crosscut on the 500' level was extended 150' to reach the vein and the shaft was to be sunk 300' deeper.

Reported in July, 1920, that T. S. Welch of Butte had secured an option on all the outstanding shares.

BLUE WING MINING CO.

IDAHO

Address: Herman J. Rossi, Wallace Idaho.

Cap. \$150,000; 10c par.

Property: 3 unpatented claims on Nine Mile, Shoshone county, carrying silver-lead ore. Assessment work done.

BOBBIE ANDERSON GROUP MINING CO.

IDAHO

Address: Herman J. Rossi, sec., Wallace, Idaho.

Cap. \$1,500,000; \$1 par; assessable.

Property: 70 acres near Wardner, Shoshone county. Ore carries silver, copper, and zinc, opened by shallow shaft and short tunnel.

BOISE KING PLACERS CO.

IDAHO

Defunct. Described in Volume XIV. Wm. MacLeod, Boise, Idaho, and Geo. D. Satterfield of Nebraska, former officers and large stockholders have a suit pending against the original promoter, Mrs. E. E. Stelle, alleg-

ing fraud. Mrs. Stelle foreclosed the mortgage in 1917 and now owns the property.

BOISE ROCHESTER MINE**IDAHO**

Address: H. B. MacGowen, owner, and T. L. Chapman, mgr., Atlanta, Idaho.

Property: near Atlanta, Elmore county, formerly owned by the Boise-Rochester M. Co. Claims show a fissure vein, 3 to 12' wide, developed by 800' tunnel. Ore is said to average \$9 per ton in gold and silver. In 1921 a new tunnel was driven to cut the vein several hundred feet deeper.

Ore is delivered to 40-stamp mill by Bleichert tram. Treatment consisted of amalgamating, concentrating and cyaniding. A new mill was contemplated in 1920.

BOISE ROCHESTER MINING CO. (INC.)**IDAHO**

Property, sold to H. B. MacGowen. See Vol. XIII. and **Boise Rochester Mine** in this volume.

BONANZA MINING CO.**IDAHO**

Fully described in Volume XIV.

BONNER MINING CO.**IDAHO**

Property: Marguerite group of 11 claims, formerly owned by the Marguerite Mining Co., on Trestle creek, near Sandpoint, Bonner county. Ore contains gold, silver and lead.

Development: by 1,700' adit. Operations resumed in 1921.

BOSS ZINC MINING CO.**IDAHO**

Address: H. Lieb, mgr., Box 564, Wallace, Idaho. A. F. Lieb, sec-treas.

Cap. \$50,000; 5c par; assessable.

Property: 5 claims on Two-Mile creek, 2½ miles N. of Osborne, Shoshone county, carries lead, silver, zinc and some copper. After 2 years idleness the mine was reopened in Dec., 1920, and the manager reports: "over 400' of work done to Jan. 1, 1921, with encouraging results."

BOSTON IDAHO GOLD DREDGING CO.**IDAHO**

Address: E. Walker, sec., Idaho City, Idaho.

Property: placer ground in Boise basin, Boise county, on which a dredge was operating, but as gravel was exhausted the boat was dismantled in 1918, and moved to California.

The Gold Hill lode mine at Quartzburg was then acquired. It has been a gold producer for 54 years.

BOSTON-IDAHO MINING CO.**IDAHO**

Office: 720 Scollay Bldg., 40 Court St., Boston, Mass. **Mine office:** Ketchum, Blaine county, Idaho.

Officers: Levi Diamond, pres.; Joseph Briggs, v. p., Winthrop, Me., M. A. Costello, sec.; E. M. Schwarzenburg, treas., with A. H. Bailey, Winthrop, Me.; David A. Calhoun, Portland, Me.; J. H. Hickey, Boston, Mass., and W. C. Smith, directors; C. Fred Howe, supt., Ketchum, Idaho.

Inc. May 28, 1907, in Maine. Cap. \$2,500,000, in 1,000,000 common, \$1 par; and 150,000 preferred, \$10 par. In treasury \$200,000 common, \$1,300,000 preferred. **Bonded debt:** \$125,000 authorized, \$110,000 issued.

Property: 500 acres, 29 claims, 7 patented, 12 held by location, 8 leased and bonded; 2 mill sites at Boyle Mtn., Idaho, comprising one zinc and two lead-silver mines.

Geology: claims cover a granite-limestone contact showing fissure veins a few inches to several feet wide, cutting across the granite. Veins carry complex sulphide ores containing argentiferous galena, zinc blende and other sulphides in irregular stringers and replacements. The ore shipped is reported to show from 9% lead, and 10 oz. silver to 79% lead and 36 oz. silver per ton, with 19% to 54% zinc. Over a million dollars worth of ore is reported to have been taken out by former owners.

Development: by 3,000' tunnel work to depth of 900'

Equipment: includes 100-ton mill; an office, laboratory. 2 warehouses,

boarding house, bunk house, a 5,000' sawmill, 2 ore houses and 8 dwellings.
BOULDER CREEK MINING CO. IDAHO

Address: E. Arthur Miller, pres., 905 Lincoln Ave., Decatur, Ill. A. Krieg, sec.-treas. and M. M. Krieg, supt., Silver City, Idaho.

Cap. \$5,000; 1c. par.

Property: 8 claims, 12 miles S. of Silver City, Owyhee county. Ore carries free milling gold and silver.

Development: by 650' tunnel and six shafts from 25 to 60' deep. Assessment work only being done.

BOULDER CREEK MNG. & MLG. CO., LTD. IDAHO

Office: 922 Old Natl. Bank Bldg., Spokane, Wash.

Officers: Leo Greenough, pres. and mgr.; W. D. Greenough, v. p.; W. J. Beaton, sec.-treas.

Cap. \$1,500,000; shares \$1 par; assessable; 976,230 issued. Annual meeting, first Monday in December.

Property: 1 claim, 20 acres, about 2 miles S. of Mullan, developed by several tunnels, longest 1,200', said to show ore assaying 10-15% lead with gold, copper and silver. Property considered promising, but has been idle for several years.

BRADY DEVELOPMENT CO. IDAHO

Address: Patrick Brady, mgr., Wallace, Idaho. J. C. Parsons, pres.; F. Cushing Moore, engr.

Property: a bond on the Olympia and Rose claims, W. of and adjoining the Green Hill-Cleveland and S. of the Tamarack & Custer, on Nine-Mile creek. Ore carries lead and silver.

Development: by a 1,450' crosscut tunnel driven from the 1,200' Headlight tunnel, to cut the Rose vein, attaining a depth of 1,200'. A 100' shaft on the Rose opened lead carbonate and galena.

BRISTOL MINING CO., LTD. IDAHO

Out of business. Property sold in 1920 to the Jim Blaine Syndicaté, which sec.

BROWN LEASING CO. IDAHO

Absorbed, 1918, by Kellogg United Mines Co., which sec.

BRYAN MINING CO. IDAHO

Address: E. R. Day, Wallace, Idaho. Owned by E. R. Day and Chas. Burns.

Property: silver-lead claims on Packer Creek, 4 miles from Saltese, Montana, in East Coeur d'Alene.

Development: by 3 tunnels, 400' and 300' apart, connected by raises. Late in 1920, 15' of good milling ore had been opened in the lower tunnel.

BUFFALO HUMP-CRYSTAL LAKE MINING CO. IDAHO

Address: W. B. Chandler, sec., Paulsen Bldg., Spokane, Wash.

Cap. \$100,000; \$1 par; assessable.

Property: a gold quartz prospect in Robbins district, Idaho county.

BUFFALO MINING CO. IDAHO

Address: Mr. Conroy, sec., Missoula, Mont.

Cap. \$1,500,000; \$1 par; assessable.

Property: 28 gold-silver-lead claims, partly in Shoshone county, Idaho, and partly in Mineral county, Mont. Developed by 2,400' of tunnels.

BULLION MINING CO., LTD. IDAHO

Address: James H. Taylor, mgr., 7 Shoshone Bldg., Wallace, Idaho.

Officers: Wm. Squance, pres.; Robt. A. Marshall, v. p.; J. H. Taylor, sec.-treas.-mgr., with Frank Taylor and J. M. Klingman, directors.

Inc. 1902, in Idaho. Cap. \$1,500,000; \$1 par; all issued; assessable. Last assessment, of 1 cent a share, levied July 8, 1920. Fifteen assessments have made stock fully paid.

Property: 16 claims, 2 patented, 320 acres, in Shoshone county, near Lookout, 2 miles from the C. M. & St. P. railway, and 4 miles from Borax station, on the No. P. line, on the Idaho slope of the Bitter Root divide.

with a good wagon-road to Borax. Property has a quartz vein of 4 to 20' width, with average of 6 to 12', and nearly vertical dip, carrying shoots of copper ore, 2-4' wide, mainly chalcopyrite.

Development: by shafts and crosscut tunnels. No. 3 tunnel is now 4,000' long with 600' of drifts on a copper bearing vein.

Equipment: includes 12 h. p. hoist, Pelton wheel, 5-drill air-compressor, drills and dwellings. A 100-ton mill is contemplated.

Company is operating jointly with the Copper Chief M. & M. Co., under same management.

BUNKER HILL SMELTER

IDAHO

Owned by **Bunker Hill & Sullivan Mng. & Conc. Co.**, which see.

Operating office: care Frank M. Smith, 1117 Paulsen Bldg., Spokane, Wash. **Works address:** Kellogg, Idaho, care M. H. Sullivan, smelter supt., R. R. Station, Bradley, Idaho.

Is a lead smelter with an annual capacity of 400,000 tons. Accepts custom ores.

BUNKER HILL & SULLIVAN M. & C. CO.

IDAHO

Offices: 1022 Crocker Bldg., San Francisco, Cal. and Kellogg, Idaho.

Officers: F. W. Bradley, pres.; San Francisco; J. W. P. McFall, v. p.; Wm. H. Crocker, treas.; J. S. Wallace, asst.-treas.; Geo. F. Holman, sec.; G. D. Abbott, asst sec.; Stanley A. Easton, mgr.; F. M. Smith, smelter director at Spokane.

Inc. 1885, in Oregon. **Cap.** \$3,270,000; all issued; \$10 par. Not listed. Company is practically a close corporation. Transfer agent and registrar, asst. sec. of the company at San Francisco. Annual meeting, third Thursday in June. Bankers are The Crocker National at San Francisco and The National Park Bank of New York.

General Balance Sheet, year ending December 31:

Assets—						
Year	Property & Plant	Supplies	Cash, Ore & Concts.	Invest. Reserve	Miscel.	Total
1920	\$42,529,045	\$704,447	\$1,177,254	\$1,915,995	\$1,148,058	\$47,474,801
1919	43,969,920	605,560	1,540,234	1,815,099	450,566	48,381,389
1918	44,933,202	710,581	1,670,573	1,615,580	526,939	49,456,875
1917	45,494,361	360,201	1,894,912	1,429,384	393,713	49,572,571
1916	46,180,979	125,976	977,395	1,029,409	226,889	48,540,648
1915	4,977,268	253,583	603,416	1,047,550	190,274	7,072,095

Re-valuation of mine increased the property account from \$4,977,268 in 1915 to \$46,180,979 in 1916. This was done to comply with Federal Revenue Act of September 8, 1916, and subsequent amendments, by which owners of mineral deposits are entitled to a deduction from gross income on account of depletion of natural deposits "not to exceed the market value in the mine of the product thereof, which has been mined and sold during the year, etc.," nor exceeding in the aggregate the capital originally invested, or in case of purchase prior to March 1, 1913, the fair market value as of that date.

Liabilities—

Year	Capital Stock	Surplus Account	Property Re-valuation Surplus	Miscel.	Total
1920	\$3,270,000	\$7,711,305	\$35,760,873	\$ 732,622	\$47,474,801
1919	3,270,000	7,387,580	36,999,332	724,476	48,381,389
1918	3,270,000	6,789,445	38,188,589	1,208,841	49,456,875
1917	3,270,000	2,609,776	42,290,265	1,402,530	49,572,591
1916	3,270,000	2,761,946	42,290,265	218,437	48,540,648
1915	3,270,000	3,691,164		110,930	7,072,095

Income Account:

Year	Operating Revenue	Other Revenue	Oper. Ex. & Losses	Operating Profit	Dividends Paid	Balance
1920..	\$7,040,868	\$321,146	\$4,860,811	\$2,380,311	\$1,962,000	\$418,311
1919..	4,990,732	393,355	3,492,803	1,888,552	1,144,500	627,964
1918..	6,128,667	840,887	3,769,138	3,200,417	1,553,250	532,456
1917..	9,546,874	611,623	6,306,423	3,852,074	2,043,750	662,947
1916..	6,229,887	572,631	4,437,478	2,365,040	1,716,750	507,998
1915..	4,153,672	648,361	2,957,364	1,844,669	1,062,750	662,992

Dividends: in 1910, \$3.15; in 1911, \$2.65; in 1912, \$2.30; in 1913, \$2.50; in 1914, \$3; in 1915, \$3.25; in 1916, \$5.25; in 1917, \$6.25; in 1918, \$4.75; in 1919, \$3.50; in 1920, \$6; in 1921, \$1 to April 4. The total is \$25,130,970.

Holdings: as a result of apex litigation with the Caledonia Mining Co., B. H. & S. controls that company, owning 1,308,100 shares out of 2,605,000 issued. See **Caledonia Mining Co. B. H. & S.** jointly with the Hecla Mining Co., owns the stock of the Sullivan Mining Co., which owns 1,000,000 shares of the Star Mining Co. In May, 1920, the Star Company finally won an apex suit with the Federal M. & S. Co., judgement being for over \$1,000,000. Costs were advanced by the B. H. & S.

Company paid \$15,000 for 7 claims in Government gulch in 1921, that were formerly owned by Western Silver Mining Co. and McElmeel estate. The Sierra Nevada is also a subsidiary of B. H. & S. Company also controls the Northwestern Lead Co. of Seattle.

Mining property: 187 patented claims, 2,920 acres, 59 claims surveyed for patent, 6 claims held by location; 2 patented mill sites and 10 held by location; 1,129 acres of patented timberland; 7 lots in the town of Kellogg; 1,183 acres of ranch land; and 24 water-rights, supplying 73,000 miner's inches of water.

Geology: the larger part of the ore is principally a replacement of the Revett quartzite, in which the replacement is closely connected with fissuring. The principal ore mineral is galena with some pyrite and zinc blende, and in places a little argentite rich in silver. The orebodies are definitely related to a persistent fissure, strike N. 45° W., dip 38° S. W., locally known as the "foot wall fissure." The zone of fissured quartzite in which the orebodies occur has a maximum width of 300'; ore is found in the hanging-wall of the fissure. The orebodies are very irregular in form and may be several hundred feet in length and depth with width in places as much as 40'. For geology of this district, see U. S. G. S. Prof. Paper 62, *Geology and Ore Deposits of the Coeur d'Alene district*, by F. L. Ransome and F. C. Calkins, in 1908.

Development: by tunnels and shafts. The Kellogg tunnel, 8x9', in section, and about 2 miles long, as the main working level. It is equipped with electric locomotives.

Above the tunnel the orebodies have been explored to the surface. Below the tunnel at 200' intervals are 6 working levels, No. 10, 11, 12, 13, 14, and 15.

The persistence of value and size of orebodies down to No. 16 sub-level, a mile deep, was proven by work in 1920-21, in fact, the grade of the ore is better than in 35 years.

Development work has been as follows:

Year	Feet	per ft. Cost	tons Reserves,
1920.....	27	\$73.33	4,762,437
1919.....	286	31.41	5,116,938
1918.....	1,740	13.73	4,362,024
1917.....	1,524	20.06
1916.....	3,944	9.87
1915.....	4,783	9.32
1914.....	2,754	10.77

Ore reserves: January 1, 1921, were 4,762,437 tons, including 107,891 tons in Stewwinder, 167,918 tons in Sullivan mine and 4,486,628 in Bunker Hill mine.

Equipment: includes 3 concentrators, power-plant, water power, machine-shops, saw-mills, etc. Replacement value of surface equipment, exclusive of smelter, is placed at \$2,000,000. Mill extraction is about 85% for lead and 80% for silver.

The Sweeney mill, consisting of jigs, trommels, and tables, and employing Minerals Separation flotation process, is treating 500 tons of old tailings daily.

The company has a 12-year contract, dated March 1, 1918, to sell portions of its ore, assaying between 40 and 66% lead to the A. S. & R. Co. As friction between the two companies had been constant, B. H. & S. Co. built its own smelter at Kellogg, in 1917. It has an initial daily capacity of 1,000 tons. Power is obtained from the Washington Water Power Co. of Spokane.

Production:

Year	Ore Mined,	Conc'ts.,	Lead,	Silver,	Cost per ton	
	tons	tons	lb.	oz.	Mng.	Mlg.
1920.....	409,986	96,489	71,071,988	1,194,478	\$3.189	\$0.839
1919.....	393,698	82,662	65,595,917	1,102,213	2.885	0.752
1918.....	389,027	84,169	67,125,717	1,191,907	2.92	0.71
1917.....	493,030	103,982	93,992,898	1,692,765	2.38	0.60
1916.....	475,784	76,284	77,298,879	1,406,260	2.36	0.43
1915.....	452,142	59,901	74,584,741	1,298,284	1.99
1914.....	440,819	56,163	70,663,236	1,161,324	1.98
1913.....	436,060	59,471	71,860,773	1,227,076	2.25

Production since 1886 is 9,079,597 tons of ore worth \$98,350,625.21 gross. Net smelter returns were \$58,346,137, of which \$33,469,716 was profit, plus \$3,638,288 from investments, etc., and \$25,193,250 paid in dividends to end of 1920.

Cost of producing lead has been as under:

Year	Price rec'd cents per lb.	Cost per lb. cents
1920.....	7.9227	5.730
1918.....	7.375	5.340
1919.....	5.8774	4.940
1917.....	8.731	6.640
1916.....	6.881	5.670

The company is the world's greatest silver-lead producer and is moreover exceedingly well managed. The mine is a big one and will undoubtedly pay dividends for many years. A series of 13 articles, written by T. A. Rickard, in the 'Mining and Scientific Press' for 1920, covers every phase of the B. H. S. company's activities.

Bunker Hill Smelter.

Subsidiary of Bunker Hill & Sullivan Mining & Concentrating Co.

Address: Kellogg, Idaho. R. R. station, Bradley, Idaho.

Offices: Crocker Bldg., San Francisco; F. M. Smith, smelter director, 1117 Paulsen Bldg., Spokane, Wash.; and Kellogg, Idaho.

Officials: M. H. Sullivan, smelter supt.; J. S. Wallace, sales of pig lead.

The smelter, erected in 1917, improved and enlarged since, is near Kellogg, at Bradley railroad station. The principal supply of ore and concentrate is from the B. H. & S. mines, but custom business is done, and by 1920 the company had arranged to receive ores from British Columbia, thus competing with the Consolidated M. & S. Co., at Trail, Northport smelter, and the A. S. & R. Co.

The works consist of 4 Traylor blast furnaces, 48 by 180 inches at tuyères 2 I.-R. turbo-blowers of 12,000 cu. ft. capacity per min. at 48 in pressure, slag settlers, 20-ton electric crane, 130 cu. ft. motor-dumping slag pots, 10-ton Baldwin-Westinghouse loco, Dwight-Lloyd sintering machines, two 50-ton drossing kettles, centrifugal pumps, two softening furnaces, 10-ton crane, Faber du Faur retort furnaces, using powdered coal, cupel furnaces, and Cottrell precipitators. The furnace charge carries 35 to 40% lead and the slag assays only 1% lead.

During 1920 the company decided to enter the zinc business and a large electrolytic plant is to be erected at Kellogg. The initial capacity will be 25 tons of spelter daily.

An interest was acquired during 1920 in the Northwest Lead Co., a lead manufacturing concern that uses B. H. & S. lead exclusively, and in 1921, company started work on its Hailey properties.

These works are in able hands, and are of great importance to the Northwest.

Sullivan Mining Company

This company's operations at the Star mine include driving an 8,000' crosscut from the 2,000' level of the Hecla, to cut the Star vein at the 2,250' level of the Morning shaft. Waste will be dumped into worked out stopes of the Hecla.

The ore is a complex lead-zinc sulphide, which will yield concentrate of each metal, the zinc going to the new electrolytic plant of the B. H. & S. Co.

Hailey, Idaho Properties

Address: J. W. Gwinn, supt., Hailey, Idaho.

In October, 1921, company took over the Mayflower and Bullion mines at Hailey. These properties, idle for 25 years past, are now equipped with electric power, and will be developed and put on a producing basis in 1922. Company also has option on the Red Elephant Cons. Mines Co. holdings (q. v.) and the Minnie Moore,

BURKE MINING CO.

IDAHO

Address: J. C. Glahe, sec., Burke, Idaho.

Cap. \$1,500,000; \$1 par; assessable.

Property: 10 patented claims in Canyon creek, 2 miles E. of Burke, Shoshone county. Opened by 1,500' tunnel.

BURLINGTON MINING CO.

IDAHO

Address: John Hall, Grinnell, Iowa.

Cap. \$2,500,000; \$1 par.

Property: 17 unpatented claims in Evolution section of Coeur d'Alene, Shoshone county, developed by 1,600' of tunnels

BURNS MINING & MILLING CO.

IDAHO

Address: David Farmer, mgr., Nampa, Idaho.

Cap. \$500,000; \$1 par.

Property: 7 claims in Canyon county, carrying gold, silver, and lead. Opened by short tunnels. Idle at last accounts.

BUTTE & COEUR D'ALENE MINING CO.

IDAHO

Address: care Jos. Rosslow, Hyde Bldg., Spokane, Wash.

Inc. 1907. Cap. \$1,500,000; \$1 par; assessable up to 10 cents.

Officers: L. C. Lens, pres.; Peter McGregor, v. p.; Joseph Rosslow, sec.-treas.; with R. C. Dillingham and J. M. Pickrell, directors.

Property: 8 claims, 1¼ miles from Mullan, Shoshone county, adjoining the Gold Hunter mine on the east. Ore contains copper, silver, and lead.

Development: by 1,550' tunnel, and 2-compartment winze 400' deep, with 200' and 400' crosscuts at bottom.

Equipment: compressor, drills, hoist, dwellings, etc., for 35 men.

Little work done for several years past.

BUTTE & KELLOGG MINES CO. IDAHO

Out of existence. See Vol. XIV.

CALEDONIA DEVELOPMENT CO. IDAHO

Presumably out of existence. Described in Vol. XIV.

CALEDONIA MINING CO. IDAHO

Office: Kellogg, Idaho.

Officers: S. A. Easton, pres.-gen. mgr.; J. E. Gyde, v. p.; Lee Prather, sec.-treas., with Chas. McKinnis and J. S. Wallace, directors.

Inc. July 9, 1907, in Idaho. Cap. \$2,605,000; \$1 par; assessable; all issued. Transfer office at Wallace, Idaho. Listed on San Francisco and Butte Exchanges.

Balance sheet for year ending Dec. 31, 1920, shows cash, \$1,466; accounts receivable, \$21,673; Liberty bonds and treasury certificates, \$325,846; current liabilities, \$4,190; profit and loss surplus, \$338,484.

Dividends: \$130,250 in 1914; \$755,450 in 1915; \$911,750 in 1916; \$937,800 in 1917; \$885,700 in 1918; \$312,600 in 1919; \$208,400 in 1920. The total is \$4,141,950. Present rate is 1c. per share per quarter.

Company has acquired stock control in the **Jemison Mines Co.**, which see.

Property: 8 claims adjoining property of the Bunker Hill & Sullivan M. & C. Co., at Kellogg, Idaho. The vein strikes N. 65° E. and dips 38° S. E. On the surface the shoot was 400' long, but only 40' at a depth of 950'. Ore carries silver, lead and copper.

Development: the workings are reached through the Kellogg tunnel of the B. H. & S. company, at a point 4,705' from the portal. The Keating, or 1,000' level, is 228' above the Kellogg tunnel and is reached by skip. Crosscuts on this level are out 2,250' N. E. The orebody was followed to within 50' of this level, but was cut off by two faults. Most of the ore was mined between the 500 and 700' levels. Management reported May 1, 1917, that development had failed to disclose new ore, and that the downward extension of the orebody could not be found. Further work during 1917, 1918, 1919 and 1920 failed to find new ore. It is probable that the vein is displaced laterally along the Howard fault, and that the orebody will be found with its upper portion considerably above and N. E. of the present workings. Exploration (1921) was concentrated on the 500' level, keeping the fault in the center of the drift. If successful, work will be resumed on the 700' and Keating levels. Unofficially, the mine is said to have a fair quantity of ore available.

The mine was idle from 1912 to July, 1914, on account of litigation with the Bunker Hill & Sullivan over apex rights. A compromise was effected whereby the capital of the Caledonia company was increased from \$1,500,000 to \$2,605,000. B. H. & S. taking 550,000 shares. The company is virtually a subsidiary of B. H. & S.

Equipment: includes an electric hoist, air-compressor and electric pumps. Ore is treated at the mill of the B. H. & S. Company employs about 35 men.

Production:

Year	Ore tons	Copper lb.	Lead lb.	Silver oz.	Net profits	Dividends
1914..	245,610	6,599,720	537,854	\$ 761,797
1915..	15,005	659,660	11,142,580	1,212,730	760,324	\$755,450
1916..	17,464	741,225	10,412,640	1,297,193	1,154,762	911,750
1917..	17,983	544,802	9,434,900	1,068,700	1,227,155	937,800
1918..	17,971	94,326	6,038,784	668,784	647,819	937,800
1919..	15,225	55,999	4,224,053	507,962	420,197	312,600
1920..	14,319	45	2,019,326	304,197	223,371	208,400

The cost of mining and shipping was \$9.05 per ton in 1919.

Company operations for months ended September 30, 1921, yielded net profits of \$53,845, the majority of the income being derived from the leavings

in worked over stopes. During this period the company mined a total of 6,963 dry tons of ore which yielded 994,095 lb. of lead, 148,051 oz. of silver and 4,757 lb of copper, the gross value of which was \$84,423. Mining costs amounted to \$52,105, or an average of \$7.48 per ton.

Surplus account totals \$401,358, to be distributed to the stockholders as soon as the amount of taxes due the Government is ascertained. No new ore has been found on the property and there is no expectation of discovering any, but President Easton estimates that it will take nearly a year to work the good ore remaining in the stopes and dumps.

CALIFORNIA CONSOLIDATED MINING CO.

IDAHO

Address: S. Severance, sec., Pittsburgh, Pa.

Cap. \$1,000,000; \$1 par.

Is a merger of the Pittsburgh Lead Mng. Co., and Panhandle M. & M. Co., made July, 1916.

Properties: are in Nine Mile creek section, or Placer Center district.

The Pittsburgh property was formerly a shipper but idle several years, comprises a small group only. The Consolidated consists of the Black Cloud group, 4 patented claims, idle since 1901, but owns a mill 2 miles above Wallace, leased and operated until recently by the Marsh Co.

The Panhandle group: consists of 2 patented claims on Nine Mile Creek

CALLAHAN ZINC-LEAD CO.

IDAHO

Formerly the Cons. Interstate-Callahan Mng. Co.; name changed 1920.

Office: 61 Broadway, New York. Mine address: C. W. Newton, mine mgr., Interstate, Idaho.

Officers: John Borg, pres.; M. G. Rodearmel, 1st v. p.; Milie Bunnell, 2nd v. p.; with Jos. B. Cotton, A. L. Warner, S. S. Titus, J. S. Macnie, C. W. Newton, Gust Carlson, Chas. H. Borg, and D. A. Callahan, directors. J. B. Parker, met. engr.; H. T. McMeekin, sec.-treas.

Executive Committee: John Borg, M. G. Rodearmel, J. B. Cotton, Donald A. Callahan and Gust Carlson.

Inc. June 12, 1912, in Arizona as a consolidation of the Interstate Silver-Lead Mining Co. and the Callahan Mining Co. Cap. \$5,000,000; \$10 par; 437,000 shares outstanding. Listed on New York Stock Exchange. Title Guarantee & Trust Co., New York transfer agent; Registrar & Transfer Co., New York, registrar. There were 2,484 shareholders, June 30, 1921.

Range of shares in New York during 1920 was \$20¾ in January and \$4 in December. A total of 24,300 shares changed hands. In 1921, the range was \$7½ to \$3¾, with total share sales of 336,900.

With the cancellation (see Vol. XIV) in October, 1918, of contract with the American Metal Co. for sale of company's output, arrangements were made with the Grasselli Chemical Co. of Cleveland, Ohio, for sale of its zinc until July 1, 1919. This was extended. The lead-silver ore is sold under contract to the Am. Sm. & Ref. Co. and treated at Colorado smelters.

During 1920, company purchased 51% and 80% interest in the Chicago-Boston Mng. Co. and Killbuck Mng. Co., Ltd., respectively, and in 1921 consolidated them under the name of Galena Mng. Co. (q. v.), which will operate as a subsidiary of Callahan.

Financial Statement—Year ending June 30, to 1916, and December 31, thereafter:

Current assets.

Year	Cash	Ore account	Other	Total	Current liabilities	Current Surplus
1920.....	\$29,278	\$ 932	\$189,381	\$ 219,591	\$164,818	\$ 279,055*

*Loss. **Includes proceeds of treasury, or other, stock sales.

Dividends: initial paid April 1, 1915, amount that year being \$1.50 per share; \$7 in 1916; \$5.50 in 1917; \$1.25 in 1918; none in 1919; \$2 in 1920. The total is \$7,721,689, or \$17.25 per share. Distributions during 1920 were paid from ore depletion reserve, and are not dividends as defined by the Income Tax laws.

The mineral holdings are a consolidation of two prospects, called the Interstate and Callahan groups, the first named developed and the Interstate vein found while Walter Harvey Weed was consulting engineer, and on whose advice the present consolidation was effected at a time when this part of the Coeur d'Alene district was regarded by many mining men as worse than unpromising. The mine has developed into one of the principal zinc-lead producers in America; in fact, the third largest, and one of the world's greatest.

Property: 79 claims, 1,250 acres, 601 patented; also the Nipsic group, 7 claims, the Blue Grouse (q.v.), 4 patented claims, together 225 acres; and a controlling interest in the Silver State Mining Co., adjoining the Interstate, all in the Coeur d'Alene district, Wallace, Shoshone county. The Amazon-Manhattan mine was relinquished in 1917, by order of the Courts on account of defective title. Little ore was found in it. In the dispute over the Virginia claim, located in 1883, Callahan was adjudged the owner in January, 1920, and now holds a 77% interest in this claim.

The holdings of the Galena Mng. Co. comprise the Chicago-Boston mine of 13 claims (2 patented), 280 acres, and the adjoining Killbuck group of 5 patented claims, 100 acres, 2 miles from Wallace and about 9 miles from the Callahan. See Galena Mng. Co. for other details.

Geology: the two fissure veins thus far worked in the property are the Interstate and the Callahan. The veins cut through Prichard slates, which are intruded by a monzonite porphyry dike and by small diabase dikes. The Interstate vein varies from 3-20' in width, the Callahan from an inch to 8'. For geology of the district see U. S. G. S. Professional Paper by F. L. Ransome and F. C. Calkins in 1908; also reports of the mining industry of Idaho, by Robert N. Bell, especially that for 1918, covering general conditions.

Development: totals over 49,300', of which 2,338' was done in 1920. The main haulage tunnel is level No. 4, about 1,200' below the mountain top, where an ore shoot 1,200' long has been encountered, running from 1 to 54' in width. This ore extends from the uppermost tunnel down, with equally good metal content on the lowest level. The 3-compartment shaft sunk from No. 4 level had reached 1,300' in 1920. It is equipped with a 250 h. p. electric hoist, in a 40x40' underground hoist room, and is good for a lift of 12,000 lb. at a speed of 800' per minute from an ultimate depth of 2,000'. Exploration during these periods on the new levels has been very satisfactory. By November, 1919, a large orebody had been opened on the 600' level assaying 31% zinc, 34% lead and 7 oz. silver per ton.

The principal work in 1920 was the sinking of shaft for 200' and opening the 10th (1,250') level where 2 to 5' of good ore was followed for 100'. Early in the year, an extension of No. 5 level, 200' below the haulage tunnel cut an orebody 22' wide, assaying 23.7% zinc, 12.8% lead, and 4 oz.

silver per ton. This increased reserves considerably. Further work during the year showed this new shoot to maintain its high grade.

A factor aiding deep development (to 3,000', or 1,500' below No. 7 level) is the construction of the O.-W. R. & N. Ry. branch from Mullan, up to Beaver creek.

Ore reserves: on Jan. 1, 1921, about 165,000 tons of ore averaging 12½% zinc, 6½% lead and 2½ oz. silver, plus a tonnage of low grade, plus a certain amount of probable ore, and excluding outside properties.

The Nipsic claims are situated about a mile N. of the portal of Interstate No. 4 tunnel. The group lies between the Idora and Callahan groups on the Beaver creek side of the Nine Mile divide. The claims are crossed by two fissure veins in quartzite and slate, that average 3' in width and carry bands and shoots of lead and zinc ore, the lead ore carrying 4 oz. silver per ton to each 10% lead. The mine has been intermittently prospected since 1892, but no important orebody discovered. There are several tunnels, longest 1,200', with a total of 2,140' of workings. The group is intrinsically valuable, but has an additional value to the Callahan, as it permits much deeper tunnel work than any now existing and gives an outlet on the Beaver creek side of the mountain, with easy access to the North Fork.

In connection with this work, in 1917 a crosscut was started from Interstate No. 6 level, across the Silver State ground, and into the Nipsic, to open the latter's vein at 1,000' below the orebody indicated in the upper levels of the Nipsic. This crosscut will also develop the Silver State. By December 31, 1918, the drift was driven 2,282' to the side-line of the Nipsic and 248' into that ground. At 233' from side-line, 12' of clean ore, assaying 27% lead and 10 oz. silver, was cut. Ore carries very little zinc. Raising is under way. At a point 1,100' above, there is 120' of high-grade ore from 18 to 24" wide, so a substantial orebody may be developed. During 1920, drilling revealed a 6' vein in the Nipsic. Good progress was made in the crosscut.

The Blue Grouse property is developed by 2 tunnels, aggregating 1,500', showing 2 veins; ore is lead-silver with some zinc. Development work on the Virginia consists of 740' of tunnels, disclosing 2 to 3' of good zinc ore.

Equipment: is modern, with a view to future big development. Buildings include saw-mill, bunk and rooming-houses for 300 men. The concentrating mill was completely remodeled, 1917-18, with a capacity of 400 tons, consisting of a 75-h. p. motor blower of the Root type, two 18" elevators, 2 Janney emulsifiers, and 16 double-cell Janney mechanical air flotation machines, each driven by an 8-h. p. motor. The blower furnishes air for agitation. There are 2 sets of roughing flotation machines and one set of cleaners. The former are in parallel, each unit consisting of one emulsifier cell and 6 flotation cells, while the cleaners consist of 4 flotation machines in series.

The grinding department contains a 200-h. p. motor, a 6x10' ball-mill, 2 Akins' classifiers, two 18" elevators, and four 4" Krogh sand pumps.

A Sauerman slack-lime cable excavator is used to reclaim tailings from the dump. They are dumped into a hopper, and then conveyed to the new flotation plant. In 1917, there were 225,000 tons of these, 50% being fine slime assaying 12% zinc, and 2% lead; the remainder, from jigs, are coarse, and assay 8% and 2% respectively. By 1919 the tonnage had been reduced to 125,000 tons.

During 1918 the old mill was altered to make room for 10-Deister-Overstrom and Wilfley tables; building elevator to feed tables; installing laundry system and classifiers; and repairing line shafting and gearing throughout. A new set of rolls was built on concrete foundation; the trommel and jigs were repaired and duplicates built; a new 6x6' ball-mill was put in; another Oliver filter was erected; the pumping system was altered; and a

30' Dorr settler added. Both in 1919 and 1920, additional machinery was installed, including a Hardinge mill, Dorr thickener and more flotation machines.

By late 1920, zinc concentrate had improved from 48 to 53% zinc, lead being reduced to 2.7%; and lead concentrate was 58% lead and 20.3 oz. silver. The intention is to make the entire lead product by flotation, the same as with zinc.

From 350 to 375 men are normally employed.

Production: during 1919 on account of low metal prices and labor conditions, continued for 4½ months only and in 1920 for 10 months. There was no output in 1921.

	1920*	1919*	1918	1917
Ore mined, tons	172,930	67,952	85,363	240,858

Gross value of all products	\$1,863,988	\$724,535	\$1,816,444	\$5,153,398
Operating costs per ton of ore mined	\$6.234	\$6.59		\$5.901

*4½ mos. in 1919; 10 mos. in 1920.

The total production to Sept. 30, 1920, is 250,000,000 lb. zinc, 69,000,000 lb. lead and 1,200,000 oz. silver.

Management is able and progressive. With reasonable prices for spelter and silver and normal costs, Callahan should continue to make big profits on an average monthly output of 9,000,000 lb. spelter, 3,400,000 lb. lead, and 34,000 oz. silver.

Shipments were suspended on Oct. 31, 1920, but development, to a limited extent, was continued throughout 1921, including the deepening of shaft to the 11th level.

CARBONATE CENTER MINING CO.

IDAHO

Mine office: Mullan, Shoshone county, Idaho.

Officers: Archie Gillis, pres.; John H. Foss, v. p.; John E. Sherrard, sec.-treas., with John Erickson and Hans J. Rice, directors.

Inc. 1912, as successor of Tombstone Mining Co. **Cap.** \$1,500,000; \$1 par. Last assessment of 2 mills per share called Nov. 24, 1920.

Property: 8 claims, near the Carney mine, on Stevens peak, south of Mullan, shows a promising vein of 8 to 15' surface width, carrying a little silver-lead ore. The mine has a 500' crosscut tunnel, with about 1,000' of workings, showing ore that has given assays up to 15% copper and 2.5 oz. silver per ton. Idle at last accounts.

CARBONATE HILL MINING CO.

IDAHO

Absorbed by Idaho Carbonate Hill Mining Co., which see.

CARIBOU GOLD & COPPER CO., LTD.

IDAHO

Address: A. V. Scott, sec.-treas., Idaho Falls, Idaho.

Officers: Eric H. Wakeman, pres.; with A. J. Wipperman, Wm. Arave and A. V. Scott directors.

Inc. Aug. 30, 1903, in Idaho. **Cap.** \$2,500,000; \$10 par; assessable; 61,000 shares issued, 189,000 in treasury. Annual meeting, 3rd Monday in February.

Property: the Monte Cristo mine, on Caribou Mountain, Bingham county. Ore carries gold and silver. On 150' level vein said to be 12' wide.

CARIBOU GOLD MINES CO.**IDAHO**

Mail returned from former address: J. P. Fanning, Pocatello, Idaho.

Cap. \$10,000; shares 1c. par; all outstanding.

Property: 13 claims and a mill-site, 2 claims and mill-site patented, in Mount Pisgah district, Bonneville county, 42 miles from Soda Springs. The mine was first operated in the early 70's, but was closed down on account of poor management, after an accredited production of \$200,000 from free-milling gold ore.

Development: by tunnels and 280' shaft.

Ore reserves: were to be 12,000 tons in 1915, averaging \$6.14 gold per ton.

Equipment: 10-stamp mill, 100-h. p. engine, air-compressor, and hoist.**CARIBOU MINING CO.****IDAHO****Address:** G. R. Scott, Coeur d'Alene, Idaho.

Officers: G. R. Scott, pres.-gen. mgr.; H. Hilson, v. p.; C. O. Sowder, sec.; John W. Boothe, treas., with A. A. Crane, directors

Property: 9 miles E. of Coeur d'Alene, Kootenai county, said to have two separate orebodies, about 150' apart.

Development: by 150' tunnel. Driving an additional 100' (July, 1921).**CARMAN CREEK MINING CO.****IDAHO**

Only assessment work being done. Described in Vol. XIV.

CARNEY COPPER CO., LTD.**IDAHO****Address:** C. D. Miller, Mullan, Shoshone county, Idaho.

Officers: J. L. Martin, pres.; A. P. McRae, v. p.; C. D. Miller, sec.-treas., with W. C. Richardson and Gust Almqvist, directors.

Inc. 1906, in Idaho. **Cap.** \$1,500,000; shares \$1 par; assessable; 1,400,000 issued.

Property: 11 claims, 4 fractional, 175 acres, carrying a good water-right, north of the Reindeer, on the northern slope of Stevens peak, about 4 miles from Mullan. Vein is in quartzite.

Development: by 3 tunnels, the uppermost showing a body of chalcopryrite ore that has not been found in the lower tunnel. The upper, or No. 1 tunnel, is 450' long, with 3 crosscuts; No. 2 tunnel, 1,500' long has 1,300' of crosscuts and drifts; No. 3 tunnel was 350' long, 1917, at last accounts. There also are several open-cuts and pits, showing ore of about 3% copper tenor. Workings show up to 4' of solid ore, carrying chalcopryrite, with some chalcocite and bornite. No. 1 tunnel shows an ore shoot up to 40' width, and about 175' long, averaging about 2% copper, with small values in lead and silver, with a paystreak of 6 to 18" assaying 5 to 35% copper. Company leased upper levels in 1917, but mine was closed in 1919.

CARPIE MINING CO.**IDAHO****Address:** Cabinet, Bonner Co., Idaho.

Property: in Clark Fork section of the Pend Oreille district, ¼ mile from Cabinet.

Development: by 300' shaft and crosscuts, said to open a 6' vein containing copper and silver. The shaft is being continued to 500' depth.

Equipment: includes steam power, compressor, hoist, pumps, etc.**CEDAR CREEK CONSOLIDATED MINING CO.****IDAHO****Address:** Arthur A. Diegel, Buhl, Idaho.

Officers and directors: Arthur A. Diegel, pres.-mgr.; R. E. Browne, v. p.; F. A. Eveleth, sec.-treas.

Inc. Dec. 4, 1920, in Idaho. **Cap.** \$10,000; \$1 par; 3,000 shares in treasury.

Property: 7 claims, 140 acres, in Sec. 9-10-16, Twp. 15, South Range 13 East B. M., Twin Falls county, 20 miles from railroad. Ore said to contain 1.15% uranium. Developed by 40' shaft.

CEDAR CREEK MINING & DEVEL CO., LTD.**IDAHO****Address:** Wm. Becker, sec., 710 Hotel St., Wallace, Idaho.

Officers J. W. Weyer, pres.; W. C. Schwabe, v. p.; William Becker, sec.-treas.; J. M. Weyer, mgr.; with Clem Weyer, directors.

Cap. \$1,000,000; \$1 par; 694,317 shares issued; assessable. A 5-mill assessment was levied on Sept. 17, 1921.

Property: 19 claims and a mill site, 5 miles above Murray, in Summit section of Coeur d'Alene, Shoshone county. Ore carries lead, silver and zinc.

Development: by 3 tunnels, the lowest in about 2,500', with a total of over 5,000' of workings. After a year's suspension, due to abnormal conditions and shortage of water, work was resumed in May, 1920, and a strike of high lead-silver ore reported.

CHAMPION COPPER MINING CO.

IDAHO

Probably defunct. See Vol. XIV. Property at Mullan, Idaho.

CHAMPION MINING CO.

IDAHO

Idle since 1917.

Address: R. T. Badger, sec.-treas., Utah National Bank Bldg., Salt Lake City, Utah. **Mine office:** Mackay, Custer county, Idaho.

Officers: Edw. R. Hall, pres.; C. T. Mixer, v. p.; with O. D. Mallory and J. E. Frick, directors. H. A. Brown, supt

Inc. 1905 in Utah. **Cap.** \$100,000.

Property: 9 claims, unpatented, in the Alder Creek district, 6 miles from a railroad. Developed by tunnel, with 1,500' of workings, showing silver, lead and copper ores.

CHESTER MINING CO., LTD.

IDAHO

Address: S. P. Fairweather, sec., Wallace, Idaho.

Cap. \$1,000,000; \$1 par.

Property: 6 patented lead-silver claims in Evolution district, Shoshone county.

CHICAGO-BOSTON MINING CO.

IDAHO

Fully described in Volume XIV. Consolidated in 1921 with Kill Buck Mining Co. and listed under new title, **Galena Mining Co.**

CLARENCE RAY-BUFFALO HUMP GOLD MNG. CO.

IDAHO

Address: Fred Hasbrook, sec.-treas., E. 2629 First St., Spokane, Wash.

Cap. \$100,000; 10c par.

Property: 8 claims in Robbins district, Idaho county, developed by tunnel.

CLARINDA COPPER MINING CO.

IDAHO

President's office: 50 Broad St., New York. Compton I. White, mgr., Sandpoint, Idaho.

Officers: J. P. Delaney, pres.; E. W. Wheelan, v. p.; C. I. White, sec.-treas.; with Max Theilheimer and A. W. Bowen, directors. Delaney & Co., fiscal agents and promoters.

Inc. April 1, 1916, in Arizona. **Cap.** \$1,500,000; \$1 par. Stock transferred at company office. According to sworn statement of the president, revenue during the year ended June 1, 1920, was \$20,821, of which \$19,702 was from sales of shares. Operating expenses were \$11,463., leaving \$9,358 on hand. A stockholders committee (Paul J. H. Hollberg, chairman, Belleville, N. J.), is supplying funds to complete development.

Property: 9 claims and 3 fractions, 196 acres, in Pend Oreille district, 2½ miles W. of Clark Fork, Bonner county. Examined in 1919, by J. K. Ashley, and in 1920 by C. W. Wilson.

Geology: country rock is quartzite and slate, cut by a diorite dike. Ore occurs in well defined quartz veins, containing chalcopyrite, gold, silver and lead.

Development. by 3 tunnels, a total of 2,000' of workings. No. 3 tunnel, 602' long, reported to cut 4½ ft. of \$32 silver-copper-gold ore; also opened 8" of rich copper-silver ore. Work was abandoned in this tunnel "on account of the physical difficulties presented." No. 5 tunnel, 5 by 7',

was in 1,120' July 30, 1921. This adit cut the Woodman vein, said to be 40' wide at 450', carrying lead and silver.

Equipment: electric power, compressor, drills, etc.

CLAYTON MINING & SMELTING CO.

IDAHO

Described in Voi. XIV. Property operated by the Idaho Mine Development Co., which see.

CLEAR CREEK MINING & DEVELOPMENT CO.

IDAHO

Address: Wallace, Idaho.

CLEAR GRIT MINING CO.

IDAHO

Address: O. W. Lewis, sec.-treas., 616 Cedar St., Wallace, Idaho. Dr. F. C. Rood, pres., Walla Walla, Wash.

Last assessment of 1½ mills per share, was paid Aug. 30, 1920.

Property: 7 claims, in Beaver district, between Delta and North Fork, Shoshone county, said to show silver-lead ore. Developing.

CLEARWATER GOLD & COPPER MINING CO.

IDAHO

Officers: Samuel Seidenfeld, pres.-mgr., 1027 W. 10th Ave., Spokane, Wash.; Herman A. Bush, v. p.; J. H. Wourms, sec.-treas.

Inc. August, 1907, in Idaho. **Cap.** \$2,500,000; \$5 par; assessable; all outstanding.

Property: 16 claims, 13 patented, including the Cunningham group, on the north fork of the Clearwater river, 50 miles south of Wallace, Shoshone county; nearest rail point Amador, with 6 miles of wagon-road and 11 miles of trail. Property shows a vein in quartzite said to be traceable 5 miles, 1 mile on company's land, carrying oxidized ores near surface, with chalcopryrite and chalcocite at depth assaying up to 3½ copper, 60c to \$1 gold, and 1½ to 2 oz. silver per ton.

Development: by 3 tunnels, lower tunnel, 1,900' long, cutting the vein at the face 300' below surface. Management estimated 18,000 tons of ore on dumps, June, 1915, and total reserves at 300,000 tons.

Equipment: includes hoist and air compressor.

No work done for 4 years on account of lack of transportation facilities.

CLEVELAND MINING CO.

IDAHO

Address: A. F. Parker, Grangeville, Idaho.

Property: 6 patented gold-quartz claims, and 20 acres of placer ground, 3 miles W. of Grangeville and 8 miles S. of Elk City, Idaho county. A stamp mill and water supply are available. No recent returns.

CLIMAX SILVER-LEAD MINING CO.

IDAHO

Address: H. V. Edwards, Jr., Wallace, Idaho.

Cap. \$375,000; 25c par.

Property under lease until 1925 to the Grand Forks Leasing Co., which see.

COEUR d'ALENE ANTIMONY MINING CO.

IDAHO

Office: Kellogg, Idaho.

Officers: M. E. Jolley, pres.-mgr., Davenport, Wash.; Clyde R. Millard, v. p.; C. M. Powell, sec.-treas., Kellogg, Idaho.

Cap. \$150,000; 10c par; assessable; 789,466 issued. An assessment of 3 mills per share was levied June 20, 1919, and another on October 30th. Annual meeting held on Jan. 17, 1921.

Property: 2 claims, including an antimony mine on Pine Creek, west of Kellogg, and about ¼ mile from Kingston station. The mine has been worked intermittently since 1885. The vein occupies a fault or shear-zone in black slates of the Prichard formation. Ore is from 1 to 5' wide, and consists of stibnite in a gangue of quartz and slate, with some gold.

Development: by 300' shaft and tunnels.

Equipment: 100-ton mill employing flotation.

Production: amounts to about 2,000 tons of ore containing 5000,000lb of antimony.

Property was acquired for \$20,000 from A. J. Brainard of Kellogg, who

in June, 1921, secured a judgment for the unpaid balance of \$6,400 and brought foreclosure proceedings; sale set aside by Court, June, 1921.

COEUR d'ALENE CHAMPION MINING CO. IDAHO

Address: James Keeth, sec., 311 Hyde Blk., Spokane, Wash.

Cap. \$1,500,000; \$1 par; assessable.

Property: 17 claims near Burke, Shoshone county, carrying lead and silver. Developed by 4,000' of tunnels and fairly well equipped.

COEUR d'ALENE CRESCENT MINING CO. IDAHO

Address: F. W. Hauser, 404 Jamieson Bldg., Spokane, Wash.

Officers: L. W. Bonney, pres.; J. B. Millsbaugh, v. p.; F. W. Mauser, sec.-treas.; with F. R. and G. E. Crocker, directors.

Cap. \$1,250,000; \$1 par; assessable; 675,000 issued.

Property: 5 unpatented claims, and mill sites, one mile N. W. of Osborne, Shoshone county. Vein is in quartzite carrying silver and lead, assaying \$2.50 to \$25 per ton.

Development: by 300' shaft, and 500' tunnel, which is being extended.

COEUR d'ALENE EMPIRE MNG. & M.L.G. CO. IDAHO

Address: A. Herman, Rookery Bldg., Spokane, Wash.

Officers: F. D. Garrett, pres.; Frank Johnson, v. p.; A. Herman, sec.-treas., with T. H. Holland, directors.

Inc. 1917, in Washington, to take over property of Coeur d'Alene M. & M. Co. Cap. \$1,500,000; \$1 par; assessable.

Property: 9 silver-lead claims near Wardner, Shoshone county.

Development: by tunnels and workings aggregating over 3,000 feet.

COEUR d'ALENE EXPLORATION CO. IDAHO

Address: O. A. Olsson, sec., Wallace, Idaho.

Property: 10 claims on Big creek, near Wardner, Shoshone county. A strong vein shows on the surface and carries copper and silver.

Development: by tunnels. After being idle for some time, work was to be resumed in 1921.

COEUR d'ALENE SYNDICATE IDAHO

Address: Rush J. White, Shoshone Bldg., Wallace, Idaho.

Seeley W. Mudd and Philip Wiseman, managers, 1210 Hollingsworth Bldg., Los Angeles, Calif.

Members of the Syndicate are D. C. Jackling, C. O. Lindberg, H. V. Winchell, S. W. Mudd and F. A. Keith.

Property: an option on 40 claims, including holdings of the Senator M. Co. and the Flynn Group M. Co. at Mullan, between the Frisco on the W. and the Star on the E. and owned by the Federal M. & S. Co. Arrangements have been made to use the Black Bear tunnel.

Development: by the Black Bear tunnel which has been extended 700', making it 4,500' long, attaining a depth of 2,000'. A crosscut was driven S. to the Flynn vein, and an E. drift to the Iron Silver vein. To May, 1921, the Syndicate had done 3,100' of drifting and crosscutting. Eighteen men employed.

COLLINWOOD MINING CO. IDAHO

Office: 10 Gunn Block, E. 152nd St., Cleveland, Ohio. J. C. Northrup, mgr., Palouse, Wash.

Officers: F. G. Garrett, pres.; Gustav Kirchner, v. p.; E. N. Conrad, sec.-treas., with F. C. Lohiser, A. L. Cornwall, H. O. Hess and H. A. Brooks, directors.

Inc. August 29, 1917, in Ohio. Cap. \$12,500; \$1 par; all issued. Annual meeting first Tuesday in September.

Property: 300 acres, (the Mizpah mine), 17 miles from Harvard in Latah county, leased for 7 years (to March 1926), from Merger Mining Co., which see.

COLONIAL MINING & MILLING CO. IDAHO

See Vol. XII for details of fake promotion.

- COLUMBIA COPPER MINING CO.** IDAHO
Idle. See Volume XIV.
- COLUMBUS MINING CO.** IDAHO
Address: Victor Carlson, supt., Gyde-Taylor Bldg., Wallace, Idaho.
E. P. Gallagher, sec.-treas., Philadelphia, Pa.
Inc. in Delaware.
Property: 16 claims, in Eagle Creek district, Shoshone county, near the Jack Waite mine. Ore carries lead and silver.
Development: by tunnels, one 550' long, with about 3,000' of workings, reported to have cut a 4' vein containing gold, silver and lead.
Equipment: a compressor and steam boiler installed in 1921.
- COMBINATION MINE** IDAHO
Now owned by Profile Metals Co., which see.
- COMET GOLD & COPPER MINING CO., LTD.** IDAHO
Presumably out of existence. Described in Volume XIV.
- COMMONWEALTH MINING CO.** IDAHO
Office: 412 Zeigler Bldg., Spokane, Wash.
Officers: Henry F. Troub, pres.; Arthur W. Davis, v. p.-treas.; Patrick J. Kelly, sec., with Geo. Bailey and Daniel Stairs, directors.
Cap. \$1,500,000; \$1 par. Annual meeting in January.
Property: 140 acres, on Hayden creek, 2 miles from Hayden lake, Kootenai county. Ore carries silver, lead and copper, but chiefly silver.
Development: by 585' and 300' shafts, 740' tunnel, and several hundred feet of drifts. A vein, standing 90' high and 60' wide above the surrounding country, is traceable through three claims, engineers pronouncing it a contact fissure between quartzite and chlorite slate. In 1920, the vein was said to be 24' wide on the 200' level.
Equipment: 120-h. p. steam plant, 100-h. p. water heater; 2 air-compressors, hoists, pumps and drills. Operations have been conducted for 3 years with a force of from 15 to 30 men.
- COMSTOCK COPPER MINING CO., LTD.** IDAHO
Presumably out of existence. See Volume XIV for description.
- CONSOLIDATED INTERSTATE-CALLAHAN MNG. CO.** IDAHO
Name changed in 1920 to Callahan Zinc-Lead Co., which see.
- CONS. MASCOT MINES CORPORATION** IDAHO
Mine address: David J. Cook, gen. supt., Peter, Blaine county, Idaho.
Company controlled by Chas. Peter and associates of Salt Lake City.
Property: near Hailey, Idaho.
- CONSTITUTION MINING & MILLING CO.** IDAHO
Office: Columbia Bldg., Spokane, Wash.
Officers: Judge Geo. Turner, pres., 525 Seventh St., Spokane, Wash.; Frank H. Graves, v. p.; B. H. Kizer, sec.-treas., with Frank T. Post, Richard W. Nuzum and Thos. Thwaite, directors. Joseph Trainor, supt.
Cap. \$1,500,000 increased Jan. 1916, from \$1,000,000; shares \$1 par; assessable; all issued.
Property: 10 claims, 8 patented, on east fork of Pine creek, 9 miles from Pine Creek siding on O. W. R. & N. R. R., Coeur d'Alene district, shows zinc-lead ore in veins 4' to 8' wide, in a shear-zone in Prichard slate.
Development: by adits, one at vertical depth of 150' and the other at 400'. At 1,500' south of the latter a 550' crosscut tunnel cuts the vein 150' below tunnel No. 2. This orebody is said to be several hundred feet long. A shaft, sunk at the portal of tunnel No. 2, is 200' deep and from the bottom a 700' drift is said to have been run on ore.
Equipment: includes hoist, compressor, 100-ton mill, sawmill, and electric motors.
Production: from Aug., 1917, to early in 1918, shipped 1,400 tons of crude ore, averaging 12% lead, 9 oz. silver, and 27% zinc; also 700 tons of 16% lead, 12 oz. silver, and 33% zinc concentrates.

Property is considered valuable, but operations have been hindered by lack of good transportation.

COOPERATIVE MILLING CO.

IDAHO

Consolidated with Reed Level Mining Co., which see.

COPPER BASIN MINE

IDAHO

Address: H. W. Weiler or F. A. Stacy, Mackay, Idaho.

Property: 15 claims, formerly owned by Copper Basin Mining Co., 24 miles from Mackay, Custer county. Ore shipped in 1919 said to have assayed 10¼% copper, 13% iron, and some silver. Transportation difficulties have been a drawback. The State Inspector of Mines reports that the deposit is encouraging.

COPPER BASIN MINING CO.

IDAHO

Described in Volume XIII. Property passed to new ownership in May, 1919. See Copper Basin mine.

COPPER CHIEF MINING & MILLING CO.

IDAHO

Office: care J. H. Taylor, sec., Shoshone Bldg., Wallace, Idaho.

Cap. \$1,000,000; \$1 par; assessable. Five mills per share levied Oct. 15, 1921.

Property: 7 claims, E. of Troy, Latah county.

Development: The Copper Chief is being developed through a crosscut tunnel driven jointly with the Bullion M. Co. This is over 4,000' long. At a point 1,800' from the portal, 1,000' deep, the Copper Chief is driving W. on the vein, and the Bullion E. on the vein. The latter had opened 170' of ore at last accounts.

COPPER GIANT MINING CO.

IDAHO

Officers: Rev. J. G. Lake, pres., Rookery Bldg., Spokane, Wash.; Dr. M. McKinnon, sec.-treas.; with H. F. Thibadeau, Dr. H. J. Betton and P. D. Young, directors. B. Haberman, supt.

Cap. \$1,500,000; \$1 par; 1,100,000 issued.

Property: 5 claims and 3 fractions, 3 miles W. of Clark Fork, Bonner county. Ore is chalcopyrite, carrying some silver.

Development: by 3 tunnels aggregating over 1,500' in length (Nov., 1918).

COPPER KING MINING & SMELTING CO.

IDAHO

Address: H. W. Ingalls, Mullan, Idaho.

Officers: Sam. Edelstein, pres.; Dave Holzman, v. p.; Harry W. Ingalls, sec.-treas.-gen. mgr., with H. R. Schroeder, R. C. Vanderford, and John Jahde, directors.

Inc. October, 1901, in Idaho. **Cap.** \$1,500,000; \$1 par; assessable; all issued. Last assessment, No. 24, of 2½ mills per share. Levied June 4, 1921. Annual meeting first Wednesday in September. Company expended \$30,000 in development in 1918, and on March 17, 1919 had a bank balance of \$2,020.

Property: 18 claims surveyed for patent on the west fork of Deadman creek, adjoining the National mine on the west, in Shoshone county.

Development: by 2 tunnels, 1,600' apart, which have developed a lead-silver orebody 250' long and from 2 to 6' wide, assaying 20% lead, 15 oz. silver, 4% zinc and 5% copper. Lower tunnel (No. 3), was driven a distance of 5,000' at 100' below No. 2 at a total cost of \$14 per ft. Four separate orebodies have been opened on this level so far, but no extensive development has been done on any of them. About 3,000 tons of ore on dump average 4.5 oz. silver, 4% lead and 1% copper. Hand-sorted ore on dump assays 30% lead and 10 oz. silver. Three of the ore shoots average 3' wide and 50' long, while largest shoot is 65' wide and 100' long. A raise is up 100' on the latter. In September, 1919 a 50' vein containing irregular bunches of lead ore was reported cut on the tunnel level; and by Oct., 1920, 4' of ore was cut on a new level, 200' above the lower tunnel. New work in 1921 limited to diamond drilling.

Equipment: includes 1-drill Franklin air-compressor and 35 h. p. electric motor.

COPPER PRINCE CONSOLIDATED M. & M. CO. IDAHO

Mine 10 miles W. of Avery, Shoshone Co., Idaho.

Officers: S. B. Holbert, pres.-treas.; Samuel R. Hite, v. p., Fairmont, W. Va.; Boyd Hamilton, sec.; W. M. Ramsey, with S. C. Dooley, W. Hankins, H. C. Crampton, and J. W. Wood, directors. Frank Drummond, supt.

Inc. July 30, 1910, in Idaho. **Cap.** \$4,000,000; reduced Sept., 1915, to \$400,000; \$1 par. Annual meeting, first Monday in September.

Property: 37 claims, unpatented, 740 acres in 2 groups on the north bank of the St. Joe river, 6 miles and 20 miles, respectively, above the head of navigation. Property includes water-rights. The Copper Prince group, formerly known as the Black Prince, has 13 claims, and the Idaho-Virginia, or Gold Ridge group, of about 24 claims, is about 6 miles east of the Copper Prince, and 3 miles from the C. M. & St. P. railway.

The Copper Prince group shows contact orebodies, between granite and Revett quartzite, of 20 to 30' estimated average width, carrying chalcopryrite, bornite and gray copper, assaying 3 to 41% copper, and 8 to 13 oz. silver per ton. **Developed:** by 500' of drift tunnels, driven from the sides of 2 canyons. The orebody has been traced by trenches and crosscut tunnels, on each claim, for the entire length of property, a distance of 7,800'.

The Idaho-Virginia is reported to have a 15 to 20' contact deposit, between granite and slate, carrying galena assaying 8 to 40% lead, and 14 to 46 oz. silver. **Developed:** by 2 shafts of 50' and 250' depth, and 3 cross-cuts, intercepting a vein said to show galena ore of good quality.

Company planned utilizing water-power from Prince creek by 6 miles of 3' ditch and 1 mile of 3' flume.

Equipment: includes 4 boilers, 2 hoists, 2 six-drill air-compressors, and a saw-mill. In 1916, S. B. Holbert, brought suit against company to recover \$27,970 for services rendered and money advanced.

No recent information is obtainable and company presumably moribund.

COPPER QUEEN MINING & MILLING CO. IDAHO

See *Neindeer Queen Mining Co.*

COPPER QUEEN MINING & SMELTING CO. IDAHO

Office: 608 Lonsdale Bldg., Duluth, Minn. **Mine office:** Salmon, Lemhi county, Idaho.

Officers: Geo. H. Crosby, pres.-gen. mgr.; Emerson Hill, v. p.; A. J. McLennan, sec.-treas., with C. W. McFadden, W. M. Harrison and E. F. Clarke, directors. A. F. Bennett, supt.

Inc. June 12, 1905, in Arizona. **Cap.** \$500,000; \$1 par; issued, \$282,000. Absorbed the Copper Queen & Crescent Mining & Smelting Co. in 1908, giving 1 share for 8.

Property: the Queen of the Hills mine, 17 claims, 320 acres, in the Eureka district, 7 miles N. W. of Salmon, is said to show 3 nearly vertical fissure veins in granite and schistose quartzite, with a generally N. E. strike. The Eva, or westernmost vein, shows an 8 to 14" quartz band on the wall of a brecciated zone 5' wide. The central, or Queen, and the Nellie veins show 12 lodges of granite breccia partly cemented by quartz. The ore is coarsely crystalline quartz, carrying pyrite, chalcopryrite and some galena, with \$3 to \$5 in gold occurring in 5 known ore-shoots, 2 in the Nellie, 2 in the Queen and 1 in the Eva vein.

Development: by shafts of 105' and 400' with 5 levels and by 7 tunnels, longest 450', with 4,700' of workings.

Equipment: includes 100-h. p. electric plant, 24-h. p. hoist, good for 700', 5-drill air-compressor, gyratory crusher, 15 stamps, and 2 Wilfley tables. Probably idle at last accounts.

COPPER & URANIUM MINING CO. IDAHO

Probably dead. Described in Volume XIV.

CORB'Y LODE MINE**IDAHO**

Address: J. B. Steffes, 709 Division St., Kellogg, Idaho. C. W. Simons, v. p.

Property: 4 claims surveyed for patent, on Pine creek, Shoshone county, adjoining Federal M. & S. on west, owned by 5 people, but controlled by J. B. Steffes and wife. A quartz fissure in slate carries \$7.20 gold per ton and some antimony.

Development: by 488' tunnel, attaining depth of 400'. Examined by Oscar Hershey. A prospect.

CORONA MINING CO.**IDAHO**

Office: 833 S. 9th St., East, Salt Lake City, Utah. **Mine Office:** Clayton, Idaho.

Officers: Horace Lewis, pres.-treas.; Clyde A. Torrey, v. p.-mgr.; J. A. Barclay, sec.

inc. in Utah. **Cap.** \$50,000; 5c par.

Property: 5 unpatented claims in the Bay Horse district, Idaho, 5 miles above Clayton, Custer county.

Development: by 200' tunnel being driven to encounter a 4' fissure vein in limestone with N. W.-S. E. strike and dip. 45°. Sample as reported gave 63% lead, 40 oz. silver, and \$5 gold.

C. AND R. MINING CO.**IDAHO**

Address: H. J. Rossi, sec.-treas., Wallace, Idaho.

Officers: Edwin Roberts, pres.; B. L. Collins, v. p.; with H. J. Rossi, Roy Smith, and R. F. Collins, directors.

An assessment of 5 mills per share was levied February 14, 1920.

Property: several claims in the Sunset district of Coeur d'Alene, Shoshone county, adjoining the St. James. Ore contains silver, lead and zinc.

Development: by 3 tunnels, No. 1. having a total of 335' of work; No. 2, 2,065'; and No. 3, 2,542'. Diamond drilling amounts to 500'. This exploration cost \$56,472.

Equipment: compressor, power plant, buildings, etc., representing an investment of \$11,120.

Operating during 1920.

CROESUS GOLD & COPPER MINING CO.**IDAHO**

Company dead. See **Croesus Mining Co.**

CROESUS MINING CO.**IDAHO**

Address: F. C. Robertson, 1721 Riverside, Spokane, Wash. D. H. Palmer, 1 W. 34th St., New York, fiscal agent.

Cap. \$1,000,000. An issue of \$200,000 treasury stock was offered in April, 1920.

Property: the Croesus mine, 4 miles west of Hailey, Blaine county, contains a fissure vein of nearly vertical dip, in granite. Pay streaks on both walls said to carry chalcopyrite, with value mainly in gold. There also is a nearly vertical blind vein, apparently joining the main vein at depth, carrying silver-lead ore at depth of 600'.

Development: by 800' shaft and 150' winze below the bottom level.

Equipment: includes steam and electric power, and a 12-drill air-compressor. The 150-ton concentrator has 10 stamps, crusher, rolls, and Huntington mills.

Over \$350,000 is said to have been spent on this property by Croesus G. & C. Mng. Co.

CROWN POINT LEASING CO.**IDAHO**

Out of business after Coeur d'Alene Development Co. sold mine to Stewart Mining Co. See Vol. XIII.

CUBA MINING CO.**IDAHO**

Address: J. Dolan, sec.-treas., 406 Bank St., Wallace, Idaho. D. L. Hopkins, pres., 335 Clay St., Portland, Ore.

Cap. \$1,000,000; \$1 par. Annual meeting April 20.

Property: 2 patented lead-silver claims in Nine Mile canyon, Placer Center district, about 2 miles from Wallace.

CUSTER CONSOLIDATED MINING CO.

IDAHO

Address: Wallace, Shoshone county, Idaho.

Inc. July, 1910, in Nevada. **Cap.** \$1,000,000; shares \$1 par.

Property: near the Tamarack & Chesapeake mine. Stock control held by the Day Bros. Property a good one.

CUSTER SLIDE MINING & DEV. CO.

IDAHO

Property: 700 acres in Yankee Fork district, Custer country, including the Montana and Sunbeam groups, also mill, power plant and dam of the Sunbeam Cons. Mines Co. An aerial tram connects the mine with the Sun beam. The Montana mine was operated during 1916 and some rich gold ore is said to have been found. Mine is an old producer.

Active operations began in 1917, but were suspended in January, 1918, In March 1919, company became bankrupt, and in July, 1919, the mine was bought by G. Von Brecht and J. I. Love, of Colorado Springs for \$30,000. A new company was to be formed.

CYANIDE GOLD MINING CO.

IDAHO

Officers: 403 Sherwood Bldg., Spokane, Wash.

Officers: J. B. Ellis, pres.-mgr.; Jas. La Fountain, v. p.; Geo. Causton, sec.-treas., all of Bonners Ferry, Ida., with John Kendall and M. J. Sweeney of Spokane, directors.

Inc. 1919. **Cap.** \$3,000,000; \$1 par.

Property: the Buckhorn mine, formerly owned by the Deer Creek Gold Mining Co., 25 miles N. E. of Bonners Ferry, Boundary county.

Development: by 2,300' tunnel, said to have opened a fair tonnage of ore.

Equipment: includes a 4,200' Riblet aerial tram, 50-ton ball and cyanide mill, 20-drill compressor, etc.

DADDY MINING CO.

IDAHO

A co-partnership, not incorporated.

Address: A. D. Coplen, 2324 Altamonte Bldg., Spokane, Wash.

Property: 25 acres, Murrav district, containing a fissure vein in Prichard slate; gold value is reported to be \$30 per ton.

Development: by 800' tunnel with 4,000' of workings.

Equipment: 10-stamp mill. Production to date is \$200,000.

No recent information.

DAISY MINING CO.

IDAHO

Address: C. D. Miller, treas., Mullan, Idaho.

Last assessment of 1 mill per share, due Jan. 10, 1921.

Property: in Freemont county, developed by tunnels.

DEER CREEK MINES CONSOLIDATED

IDAHO

Formerly the Deer Creek M. & M. Co.

Address: E. C. Orr, sec., 114 Fifteenth St., Spokane, Wash.

Inc. in Washington. **Cap.** \$1,500,000; \$1 par.

Property: 17½ claims, 17 miles S. W. of Winchester, and 11 miles S. W. of Forest, the nearest P. O., in the Deer Creek district, Nez Perce county, shows orebodies 10 to 20' wide, carrying copper ore with some gold. One vein has 4' of chalcovrite ore developed by a tunnel. Reported that \$150,000 was spent in development and equipment, latter including 2,000' of flume, water wheel, compressor, and 100-ton mill, employing amalgamation, gravity concentration and flotation.

DEER CREEK MINING & MILLING CO.

IDAHO

Succeeded in 1920 by the Deer Creek Mines Consolidated, which see.

DE LAMAR MINING & MILLING CO.

IDAHO

Address: H. H. Bonnel, pres.-mgr., De Lamar, Owyhee Co., Ida.

Property: a lease on 36 patented claims, 379 acres, includes the old De Lamar mine, on the W. slope of the Owyhee range, about 7 miles from Silver

City. The mine is credited with a past production of \$14,000,000 in gold and silver. Ore occurs in quartz fissure veins in granite and porphyry.

Development: by tunnels, 1,000' and 3,000' in length, with 10,000' of old workings.

Equipment: includes 150-ton mill and electric power. The property was reopened in 1919.

DEMMING MINES CO.

IDAHO

Main office: Nampa, Idaho. **Mine address:** Demming, via Murphy, Idaho.

Officers: C. T. Payton, pres.; D. C. Montore, v. p.; W. J. Long, 2nd v. p.; W. L. De Remer, sec.-treas.; L. W. Mills, asst. sec., with C. C. Nelson, W. L. Kellogg and M. J. Rowland, directors.

Inc. in Idaho. **Cap.** \$15,000,000; \$5 par. **Bonds,** \$250,000 issued.

Property: 38 claims, 600 acres, about 38 miles from Murphy, Owyhee county, shows fissure veins in granite that run N. E.-S. W. and are cut by cross fissures 5 to 12' wide. Ore is sulphide carrying gold and silver.

Development: by tunnels and shaft. Over 6,000' of new work done since June, 1918. Reserves in No. 1 were estimated as worth \$400,000 in 1917.

Equipment: hoist, compressor, 100-ton mill, using ball-mill, 6-cell Janney flotation machine, 4 Senn tables, Oliver filter, roasting furnace, cyanide plant auto-trucks, etc.

Production: several carloads of concentrates were shipped to smelters in 1918-19. Shut down in 1920, pending reconstruction.

DENVER COPPER CO.

IDAHO

Inc. by H. M. Ross of Spokane, but apparently never functioned. See Vol. XIV.

DOUGHBOY MINING & LEASING CO.

IDAHO

Address: F. B. Sherry, supt., or A. N. Sweet, cons. engr., Mackay, Idaho.

Property: 4 claims, 5 miles N. E. of Mackay, Custer county. Ore occurs in a 4' contact vein in limestone and porphyry, and carries lead and silver, said to average 35% lead and 33 oz. silver per ton. Shoots appear as a succession of lenses.

Development: by a 350' incline, with levels at 80, 170 and 350'. Each level said to be in ore. The shaft is being sunk to 500', and raises driven from the 350' to the 250' level.

Equipment: includes an oil engine, compressor, hoist, shop, dwellings, etc. Shipments made to the smelter at Midvale, Utah.

DOUGLAS MINING CO.

IDAHO

Address: R. S. Clough, sec., Insurance Bldg., Wallace, Idaho. H. J. Rossi, v. p.

Cap. \$1,200,000; \$1 par; assessable; 853,500 issued. Two dividends of 1¢ each paid in 1917, and ¼¢ in January, 1918. An assessment of 2 mills was levied Dec. 30, 1920.

Property: 7 full claims on Pine creek, which were under option to the Anaconda Copper Mng. Co. until December, 1918, when it was relinquished, probably due to transportation difficulties.

Development: by 1,550' of tunnels and several hundred feet of other work. Reserves are said to be 100,000 tons.

Production: Anaconda shipped 198 carloads of ore assaying 25% zinc, 8% lead, and 5 oz. silver per ton.

No work is being done, save to keep the plant in good order. When the Bunker Hill & Sullivan erects its zinc plants, the Douglas Co. will have a market nearby.

DREADNAUGHT MINING CO.

IDAHO

Address: W. J. I. Smith, Wallace, Idaho.

Officers: M. P. Flannery, pres.; J. E. Codd, v. p.; C. P. Lindsley, sec.

Property: 7 claims near the New York and Manhattan claims of the Callahan Zinc-Lead Co., Coeur d'Alene district., Idaho.

Development: by tunnels. At depth of 730' No. 1 shoot is 42" wide and said to contain 10 oz. silver, 12% lead, and 4% zinc. All ore carries a little copper and gold. A shoot of fair-grade ore was opened in 1918.

DRILLING DEVELOPMENT CO.**IDAHO****Address:** C. W. Sherwood, mgr., Salmon, Lemhi county, Idaho.**Property:** the Gold Dyke group of 18 claims, 13 miles E. of Salmon. Deposit consists of porphyry dike, estimated to contain 3,000,000 tons worth \$5.50 per ton in gold and silver, with some zinc and lead. Mining is done by open-cut.**Equipment:** a 200-ton cyanide mill employing the Koering process, was completed July, 1919, and was enlarged in August.**DU BOIS MINING CO.****IDAHO****Address:** H. H. Rhodes, Kellogg, Idaho.**Officers:** H. E. Ginter, pres.; J. B. Eberhardt, sec.-treas., with J. W. Jones, Austin Blakeslee and S. J. Schreckengast, directors.**Inc. in Idaho. Cap.** \$1,000,000; \$1 par.**Property:** 80 acres, 2 miles E. of Kellogg, Shoshone county, carrying gold, silver, and copper, and developed by 1,500' tunnel and 600' shaft. There is a 10-stamp mill available. Mine has been idle for years.**DULUTH-LEMHI MINING CO.****IDAHO**

Company out of business. Described in Vol. XII.

DULUTH-MINNEAPOLIS MINING CO.**IDAHO****Address:** O. B. Wallace, mgr.**IDAHO****Officers:** G. W. McClelland, pres.; R. M. White, v. p.; P. M. Olsen, sec.; J. J. Ecklund, treas., with J. S. Graves, directors.**Property:** on Grouse gulch, Coeur d'Alene district, Idaho.**Development:** by 1,850' of tunnels. Crosscuts said to have opened from 12 to 20' of lead zinc ore. No recent returns. Presumably idle.**EAGAN COPPER MINING CO.****IDAHO****Address:** Wallace, Idaho.**Officers:** Roy A. Henkle, pres.; J. T. Dickinson, v. p.; L. L. Brainard, sec.-treas., above with Tom Eagan, F. E. Rice and F. C. Blakely, directors.**Inc.** 1916, in Idaho **Cap.** \$125,000; 10¢ par.**Property:** 2 miles from Adair in the St. Joe district, under development by Tom Eagan since 1892. Claims reported to show copper ore with considerable silver.**Development:** by tunnels. New work in 1919 consisted of 510' of drifts and crosscuts, and 190' of raises.**EAGLE MOUNTAIN MINING CO., LTD.****IDAHO****Address:** W. H. Herrick, sec., Wallace, Idaho. D. A. McLeod, mgr.

An assessment of 2 mills per share was levied April 23, 1921.

Property: adjoins the Montana Standard on the Idaho-Montana divide, east of Burke.**Development:** by 700' crosscut.**EAST ALAMEDA MINING CO., LTD.****IDAHO****Address:** Alexander Murphy, treas.-mgr., Wallace, Shoshone county, Idaho.**Cap.** \$1,000,000; \$1 par; 650,000 issued; assessable.**Property:** 2 claims, 1 patented. Is a lead-silver prospect adjoining the Headlight and Big Divide mines in the Coeur d'Alene region.**EAST CALEDONIA MINES CO.****IDAHO****Address:** Franklin Pfirman, sec., Wallace, Idaho.**Officers:** Herman J. Rossi, pres., Wallace; W. H. Nichols, v. p., Butte with W. I. Hall, Kellogg, and Franklin Pfirman, Wallace, directors.**Inc.** March, 1915, in Idaho **Cap.** \$ 250,000; 25¢ par; assessable.**Property:** 60 acres, including the Keating mine, at Wardner, Shoshone county, Idaho.**Development:** by several tunnels and the Keating 600' vertical shaft. The mine was worked intermittently for several years before present company acquired control. In February, 1918, the vein was cut on 600' level, 60' from the shaft, showing some galena.

Equipment: electric hoist, air-compressor, pump, shaft-house and blacksmith shop. Is still in the prospecting stage.

EAST HERCULES EXTENSION MINING CO. IDAHO

Address: W. O. Applequist, act. sec. 337 Rookery Bldg., Spokane, Wash.

Officers: J. B. Millspaugh, pres.; C. S. Crawford, v. p.; W. H. Macfarlan, sec.-treas.; W. H. Reeves, mgr., Cheney, Wash.

Inc. in Idaho. Cap. \$1,500,000; \$1 par; assessable; 2 mills levied, July 15, 1920.

Property: 8 claims, unpatented, 176 acres, 4 miles east of Burke, and about 2½ miles from the Hercules mine, reported to show a quartz vein carrying gold, copper, silver values.

Development: by tunnels 137' and 500' long, and 150' of surface cuts. Annual assessment work only being done. Is a prospect.

EAST SNOWSTORM MINING CO. IDAHO

Mine near Larson, Shoshone county. A fraud order was issued, 1911, by the postal authorities against C. E. Mitchell, promoter of this company, and also against the company. The title was changed, 1911, to "The Snowstorm Deep Mines, Ltd.," which has also been branded fraudulent. Property described Vol. X, Copper Handbook.

EAST STANDARD MINING CO. IDAHO

Address: Joseph Matt, Burke, Idaho.

Officers: Joseph Matt, pres.; Hans Helgeson v. p.; Gus Lohoeffer, treas.; C. E. Inseip, sec., with Swan Monson, directors.

Cap. 1,000,000 shares; 710,391 shares issued. Assessable; 2 mill assessment levied.

Property: 4 fractional claims adjoining the Hecla on the west in Coeur d'Alene region.

Development: by 1,600' tunnel and drifting which has opened 4 veins.

ECLIPSE MINING CO. IDAHO

Was formerly the **Lead King Mining Co.**

Address: E. W. Conrad, pres.-mgr., Eagle Block, Spokane, Wash.

Property: 13 claims, in McFarren gulch, about 1 mile south of Osborne, Shoshone county, said to carry 2 veins, one with outcrop of high-grade galena, the other showing silver-copper ore.

Development: mainly by 4 tunnels, longest 550', with open-cuts and shallow shafts, showing silver-lead and gray copper ore, giving good assays.

Mine was dormant from 1913 to April, 1918, when present company opened some ore in a tunnel.

ELDORADO MINING & SMELTING CO., LTD. IDAHO

Address: 301 Sixth St., Wallace, Idaho, or R. B. Lundy, mgr. G. W. Dougherty, supt.

Officers: J. C. Waddell, pres.; John Hamlin, v. p.; G. W. Dougherty sec.-treas., with M. A. Curran, and J. A. Patterson, directors.

Inc. July, 1907, in Idaho. **Cap.** \$2,000,000; 10¢ par; assessable; 123,-301 shares in treasury. Assessment No. 1, of ½ mill, levied Jan. 22, 1921.

Property: 4 claims, 1 patented, 75 acres, E. of Kellogg. Ore occurs in fissure vein in quartzite, said to average \$19 gold, 3% copper and 3 oz. silver.

Development: by 800' of workings to depth of 300'; includes 500' tunnel. Operated by lessees.

ELK MINING CO. IDAHO

Address: John F. Carson, pres.-mgr.; Mullan, Idaho. Clara Carson, sec.

An offering of shares at 5 cents each was made in May, 1920. Assessment of 1 mill per share levied Aug. 7, 1921.

Property: 3 patented claims adjoining the You-Like claim of the Federal company's Morning mine, on Mill creek.

ELMORE COPPER CO.**IDAHO****Address:** W. O. Reuss, pres.-mgr., Mountain Home, Ida.**Officers:** Wm. Reuss, pres.; Wm. C. Reuss, v. p.-treas.; C. W. Dingman, sec., with Frank W. Waddell and David A. Noyes, directors.**Inc.** 1916, in Idaho. **Cap.** \$5,000,000; \$1 par; 3,894,014 shares issued.**Property:** 26 claims, 520 acres, includes the Cat Creek, Camel Back and Little George groups, a townsite of 320 acres and 160 acres of timberland, in Dixie district, Elmore county, 12 miles E. of Hill City on the Oregon S. L. R. R. Reported on by Frank E. Johnesse.**Development:** by 2,700' of drifts and crosscuts, and 300' shaft. At depth of 200' the vein is said to be 76' wide, and 80' wide on the 300' level. A triple-compartment shaft is being sunk to 500' depth. Ore occurs in a true fissure vein in granite, containing gold-silver and copper.**Equipment:** includes 50-ton mill, saw-mill, cement block plant, hoist, 4 cottages, etc.**EMPIRE COPPER CO.****IDAHO**

See Vol. XIV. Succeeded by Idaho Metals Co., which see.

ENTERPRISE MINING CO.**IDAHO****Address:** Kellogg, Idaho.**Officers:** Fred F. Donaldson, pres.-mgr.; Gust Samuelson, v. p.; W. A. Tuson, sec.-treas.**Inc.** June 17, 1910, in Idaho. **Cap.** \$1,000,000; \$1 par; assessable; 775,000 issued. A 2-mill assessment was levied on July 17, 1920.**Property:** 55 acres unpatented, 2½ miles E. of Kellogg, S. side of Coeur d'Alene river. Ore consists of lead and silver in a fissure in Prichard formation. Vein is said to be 30' wide, dipping 40°.**Development:** by 1,200' tunnel to a depth of 600', also 1,400' of workings. Small shipments have been made in the past to Anaconda. Non-productive in 1919, but presumably developing, 1920-'21.**EUREKA DEVELOPMENT CO., LTD.****IDAHO****Officers:** W. A. Wilson, pres.-treas.; Dooley Bldg., Salt Lake City; A. C. Ellis, v. p.; Causten Browne, sec.; with Wm. Bradley, directors.**Cap.** \$100,000; par 50c; 50,000 shares in treasury.**Property:** 11 patented claims, and 2 millsites, also a ½ interest in the Richmond claims, located in Mineral Hill district. Blaine county, 7½ miles from Hailey. Said to show a fissure zone in limestone and shale, with strike N. 40° W. and dip 70° N. E.**Ore:** silver-lead, and a little copper and zinc. Reported that ore, as shipped, assayed 70 oz. silver and 50% lead.**Development:** by a 425' incline with 6 levels, and several tunnels. Idahoan claim has a 650' shaft, 1,800' from the incline on the Eureka claim. More than half the ground between the shafts is undeveloped, and possibility of finding new ore-shoots is said to be good.

The Eureka is said to have produced \$300,000 and the Idahoan, \$1,500,000.

Equipment: includes hoist, boilers, and a 75-ton mill.

Property worked by lessees, but company planning to resume development.

EUREKA MINING & MILLING CO., LTD.**IDAHO****Address:** A. D. Marshall, 206 Bank St., Wallace, Idaho.**Officers:** W. R. Powell, pres.; C. B. Fly, v. p.; A. D. Marshall, sec.; C. A. Sterling, treas.; and J. S. Mooney, directors.**Inc.** 1905, in Idaho. **Cap.** \$1,000,000; \$1 par.**Property:** 7 claims, 1½ miles N. of Wallace, on Nine Mile creek Shoshone county, carrying lead-silver ore. Developed by tunnels, one being 1,200' long.**Equipment:** includes purchased electric power, compressor, etc.

Operated part of 1919, 1920, and 1921.

EXCELSIOR MINING CO.**IDAHO**

A Coeur d'Alene property that is presumably dead. See Vol. XIV.

FALLS CREEK MINING CO.**IDAHO****Address:** W. C. Ames, pres., or W. M. Hollenback, sec.; Sandpoint, Bonner county, Idaho.**Cap.** \$500,000; \$1 par, assessable.**Property:** 11 claims, 3 miles E. of Pend Oreille Lake, near Sandpoint. Ore carries lead, copper, and silver.**Development:** by tunnels. A 50-ton mill was erected in August, 1918. Developing.**FEDERAL MINING & SMELTING CO.****IDAHO****Officers:** 120 Broadway, New York; Wallace, Idaho; and Denver, Del.**Officers:** F. H. Brownell, chairman of board and pres.; H. A. Guess, v. p. and mgr. director; with E. L. Newhouse, Wm. Loeb, Jr., Chas. Earl, and Roger W. Straus, directors, J. L. Martin, sec.; A. C. Druding, treas.; Frederick Burbidge, gen. mgr.; Wallace M. Murray, supt., Mullan, Idaho.**Inc.** 1903, in Delaware, (charter perpetual,) amended Aug. 22, 1903. **Cap.** authorized \$20,000,000 pfd., 7% cum., and \$10,000,000 com.; shares \$100 par. Outstanding, \$12,000,000 pfd. and \$6,000,000 com. Preferred stock has no voting power except in connection with the increase of preferred stock, but is preferred as to assets. One-sixth entire capital stock said to be held by American Smelters Securities Co. Federal Guaranty Trust Co., New York, transfer office; U. S. Mortgage & Trust Co., New York, registrar. Annual meeting, second Monday in April. Listed on New York and Spokane exchanges.**Dividends, per cent:**

Cash includes Liberty Bonds.

Smelting contract: the Federal has a contract with A. S. & R. Co., dated October 16, 1905, terminating August 31, 1930, by which the Federal company must sell all of the silver-lead ore, slime and concentrate, of its own or leased mining properties, and all owned or leased property of any company in which the Federal owns 75% of the capital stock to the A. S. & R. Co., and the latter agrees to take all such output.

Apex litigation with the Bunker Hill & Sullivan, started in 1908, was settled in 1910 by agreement between the two companies. The Federal company holds 28,000 B. H. & S. shares.

Property: company entered upon the operation of its properties Sept. 1, 1903; \$10,500,000 pfd. and \$5,250,000 common stock, being issued upon the acquisition of all the mining property formerly owned by the Empire State-Idaho Mng. & Dev. Co., the Standard Mining Co., and the Mammoth Mines in Idaho; also certain smelting property at Everett, Wash. The smelting property has since been sold without loss to the company. The above mentioned mining property consists of silver-lead mines in the Coeur d'Alene region, Shoshone county and included the Tiger-Poorman and Last Chance mines, at Burke and Wardner.

The Morning mine, ½ mile N. W. of Mullan, one of the largest and best equipped lead-silver properties in the district, was purchased in 1905. It adjoins the Star Mng. Co.'s holdings and is the most important of the Federal group, though its ores are the lowest grade of any property in the district and very difficult to treat.

In 1910, company acquired an option on a portion of the stock of the Govt. Gulch Dev. Co., lying east of the Black Hawk mines in the Wardner district. On account of default of the stockholders, 414,000 shares out of a million reverted to the Federal Mining & Smelting Co. The property of this company consists of 1 patented and 6 unpatented claims. Company also controls through stock ownership the **Black Hawk Mng. & Dev. Co., Ltd.** with holdings in same district.

In 1912, Federal organized Green Hill-Cleveland Mng. Co. to take over the Cleveland group of the Idaho Investment Co., and the Green Hill ground at Mace in the Coeur d'Alene region, ownership and management resting equally between the Federal company and Green Hill interests. Operations began Nov. 1, 1912 and mines were finally worked out and closed early in 1918. Dividends to Federal from Green Hill-Cleveland for 4 years ending 1916, were \$1,280,000. See Vol. XIV for further details.

The Helen-Frisco property, near Gem, was purchased in January, 1913, for \$100,000; it includes the Black Bear mine. Operations proved unprofitable and mine was closed down, Aug. 9, 1916. The mill, plant and buildings were sold to the Tamarack Custer Cons. Mng. Co. for \$150,000, the Federal company retaining all mineral rights. Shipping ore, however, was produced in 1917 and 1919 from the Frisco mine and in 1921, the Idaho Mines Leasing Co. (t. v.) began operations on the Black Bear mine.

In July, 1915, Federal purchased, at receiver's sale, the mine, concentrator, power line and supplies of the Iron Mt. Tunnel Co., at Superior, Mineral county, Mont., for \$100,000. The mine is an old one, having been stoped for 1,700' above water level 20 years previous. Operations proved disappointing and the mine was closed down, August, 1916. Salvage value of plant was \$78,331.

The North Star-Triumph mines, near Hailey, Blaine county, Idaho, acquired under bond 1916, have a 300-ton concentrator with flotation system and electric separator under construction. The properties are said to carry a large tonnage of complex ore, containing 14% zinc, 8% lead and 8 oz. silver. The ore-shoots are 20' thick and several hundred feet in length and depth. Treatment is hindered by an excess of arsenical pyrite and some antimony.

Negotiations for the purchase and development of the Independence mine at Hailey, in Wood River district, Idaho, for \$500,000, were completed late in 1917. The ore is easy to treat, being almost free from zinc. It consists of shattered quartz coarsely crystalline galena and a little pyrite.

Company owns also the Lucky Jack and Brewster mines in Oklahoma and a 55% interest in the Lucky O. K. Mng. Co. of Kansas. These are described under their titles.

Reported late in 1921 that the Stenwinder and Ontario group adjoining the Sullivan mine of Cons. M. & S. Co., near Kimberley, in Fort Steele division, S. E. Kootenay district, British Columbia, has been placed under bond to the Federal. A former option expired in 1918. This silver-lead-zinc property is to be explored by drilling.

The Federal holdings in the Coeur d'Alene area are officially designated as the Burke mines, Mace mines, Wardner mines and the Morning mine. The Last Chance mine and the Sweeney mill became the property of Bunker Hill & Sullivan M. & S. Co. in 1918 and in 1920, the Tiger-Poor-man mine and the Mono, O'Neil and Russell claims were taken over by the Hecla Mng. Co. Thus, the Morning mine remains the one important producing Federal property in the Coeur d'Alene. See Vor. XIV for other details.

Development: of company's mines in the Coeur d'Alene region, is by shafts, the deepest being 1,250', while at the Morning mine tunnels aggregate 12,000'. Reserves at the latter at the end of 1920 were 625,000 tons, excluding those under litigation, compared with 1,088,600 in 1919. In addition to 55,520 tons of shipping ore, reserves are estimated to contain 39,090 tons of lead concentrates and 37,280 tons of zinc concentrates.

The Morning is a sub-level mine, in that below the main, or No. 6 tunnel is a shaft, the 20th level being 1,400' below it. This shaft was deepened 200' during 1920. Some interesting notes and diagrams on the mine will be found in the report of former State Inspector of Mines, R. N. Bell, for 1918.

The new 2,000' sub-level opened in 1919, shows normal ore 3,000' vertically below the apex of the vein. In 1920 a new shoot was opened for a length of 800'; it averages 30' in width, and ore is of good grade in lead and silver.

In the Independence, 6 levels have been opened at 100' intervals. In 1918, a shoot 80' long and up to 30' wide was developed. A small mill is making concentrates. A 3,000' tunnel, and 450' raise, to connect this mine and the North Star mill, was completed during 1920. Reserves are estimated at 40,000 tons of milling, of which 2,700 tons are shipping ore.

Equipment: company is amply provided with modern concentrating (one of 1,000 tons capacity employing flotation at Wardner), pumping, hoisting, compressing and electric plants. During 1920 a complete clubhouse, costing \$100,000, was built for employees at the Morning mine, which has over 500 men on the payroll.

Ventilation of the mines has been attended to, and in February, 1918, a Sirocco fan of 30,000 cu. ft. capacity per minute was installed at the Morning, and one of 60,000 cu. ft. was ordered.

Adjoining the Morning mine is the property of the Star Mining Co., which late in 1917 brought suit against the Federal company, alleging wrongful extraction of ore, and claiming \$500,000 damages. Many well-known engineers were retained by both sides. In March, 1918, the Star

lost the case. In an appeal, the U. S. Circuit Court reversed the decision in May, 1920. This long drawn out and costly litigation was suddenly terminated by compromise, December, 1921.

Another important apex suit was started in 1919. In this, Marsh Mines Consolidated, which has a 10-year lease, until 1926, on the Mono, O'Neil, and Russell claims of the Federal company, the result of previous litigation, started suit against the Hecla for alleged wrongful extraction of ore and claiming that the apex of the east orebody is within the Russell claims. In order to help prove its contention the Federal company sank 350' shaft in this claim during 1920. It also applied to the Court to be allowed to raise from Hecla workings to meet this shaft, but was denied this permission.

Production:

Year	Ore, tons	Lead in products, tons	Silver products, oz.
1920.....	423,144*	20,811	1,161,614
1919.....	242,821	12,126	787,776
1918.....	320,794	19,702	1,015,986
1917.....	622,159	35,613	1,684,224
1916.....	802,288	37,338	1,683,587
1915.....	461,252	26,777	983,830
1914.....	421,631	25,487	913,498
1913.....	691,487	36,687	1,344,074
1912.....	836,947	50,937	2,649,667
1911.....	784,600	52,272	3,304,538
1910.....	741,650	48,155	2,801,319
1909.....	832,568	56,904	3,111,931

*Not including 74,488 tons from Lucky O. K. mine, but does include 90,394 tons from the Brewster mine.

The above table shows that though the company has been a big producer in the past, its Coeur d'Alene mines apparently are nearly worked out. Recognizing this, company has bought new properties at Hailey, Idaho, in British Columbia, Kansas and Oklahoma. Inasmuch as \$12,000,000 7% preferred stock is in arrears over \$2,000,000, and common has received no dividend since 1909, and is now worthless, and the various apex suits are costing so much, the principal property, the Morning mine—has a heavy load to carry.

FERN QUICKSILVER MINING CO.

IDAHO

Address E. H. VanMeter, Cascade, Valley Co., Idaho.

Property: 5 quicksilver claims, at elevation of 9,000' in Yellow Pine district, Valley county, 50 miles N. E. of Cascade, which is 40 miles from Knox, over bad roads. Freight costs about \$100 per ton. Cinnabar occurs in chalcedonic quartz seams in soft yellowish limestone. The seams vary from a few inches to 3 or 4 feet, and are fairly persistent, one being followed 80', with 2' of ore assaying 3.8% mercury.

Development: by 3 tunnels, with several hundred feet of work.

Equipped with 12-cylinder Johnson-McKay type retort furnace. Ore treated averaged 5 tons per day, containing 2-5% quicksilver, when in operation. Idle 1921.

FIDELITY CO.

IDAHO

Address: A. G. Kennedy, mgr., Murray, or Monarch, Idaho.

Property: the Monarch mine in the North Fork district, above Murray, Shoshone county, formerly owned by the Monarch Mng. Co., and operated to May, 1912 by Coeur d'Alene North Fork Mng. Co. Ore carries lead, silver and zinc. The ground between the 1,100' and 600' levels is being operated by lessees and several shipments have been made to the B. H. & S. smelter. A small mill is available.

FIRST NATIONAL SILVER MINES, LTD.**IDAHO****Address:** 323 Lindelle Bldg., Spokane, Wash.**Property:** 27 claims, 7 patented; in Big Creek section of Coeur d'Alene, Shoshone county, under development, 1920-21.**FLORENCE MINING & MILLING CO.****IDAHO****Address:** John B. Steffes, sec.-treas., Kellogg, Idaho.**Officers:** Chas. Dallaire, pres.; with J. D. Chisholm, Jas. Ezkiel, and John Haalund, directors, at last accounts.**Inc.** 1908, in Idaho. **Cap.** \$1,000,000; shares \$1 par; assessable; 440,000 issued. Assessment of 2 mills levied on October 11, 1919. Annual meeting second Tuesday in July.**Property:** 10 claims, 170 acres, due E. of the Alhambra and S. E. of the Sherman and Roanoke mines in the Yreka section of the Coeur d'Alene district. Ore occurs in vein in Revett quartzite, carrying lead, silver, and copper.**Development:** by crosscut tunnels, 150' and 300' long, with a total of 800' workings. A lower tunnel was started in 1917 to intercept the vein; in Jan., 1921, it was in 120' and a contract was let to drive another 100'.**FLORIDA MOUNTAIN MINES CO.****IDAHO****Address:** R. J. Goodwin, supt., Silver City, Idaho. George Kessler, mine supt.**Property:** over 1,000 acres of patented claims, including the old Trade Dollar silver mine at Dewey, near Silver City. Up to 1904 this mine produced over \$10,000,000. Reopened in 1918. Ore, consisting of argentite and pyrite in a quartz gangue, occurs in fissure veins, from 1 to 3' wide.**Development:** previous work was by over 30 miles of drifts and tunnels driven near the base of Florida mountain, reaching a depth of 1,700'. The present company has been opening old stopes and picking up caved ground, amounting to 1,200' by the middle of 1920.**Equipment:** includes electric power, electric locomotives, I. R. compressor, 20 stamps, ball-mill, tables, vanners, shops, bunkhouses, dwellings, etc.

Company suspended operations early in 1921 and plans leasing blocks of ground to local miners.

FLYNN GROUP MINING CO.**IDAHO****Address:** J. F. Whelan, sec. Wallace Idaho.**Officers:** J. J. Hayes, pres.; with J. J. Cronin, K. J. White and Thertt Towles, directors.**Inc.** 1905, in Idaho. **Cap.** \$1,000,000; decreased March, 1920 to \$625,000; 25c. par; all issued.**Property:** 4½ miles N. E. of Wallace, Shoshone county, on the high ridge between Canyon creek and the South Fork of Coeur d'Alene river. It includes 16 claims owned outright, and an interest in 3 others. The Black Bear and Frisco mines are on the W., and the East Flynn and Ivanhoe on the E. By securing an option on control of the Black Bear shares, a right-of-way through the Black Bear was also acquired.There are 3 veins in Burke and Revett quartzite. No. 1 vein carries a little lead; Nos. 2 and 3 have no mineralization, though the latter is honey-combed and well oxidized. Little development has been done, but on the adjoining property, the Black Bear Fraction vein has been developed to a depth of 1,160', at a point within 300' of the Flynn. The shoots are irregular and from 5 to 7' wide, the ore assaying 2.2 oz. silver, 7.76% lead, and 16.57% zinc. Future development can best be affected by tunnels. Transportation is good, and power is obtainable nearby. More work is required to prove whether this property has merit or not. Property is controlled by the **Senator M. Co.** and is under option to the Coeur d'Alene Syndicate.**FORT HALL MINING & MILLING CO., LTD.****IDAHO****Address:** C. W. Pomeroy, sec., Pocatello, Bannock county, Idaho.

Officers: Wm. A. Hyde, pres.; C. W. Pomeroy, sec.; L. Fargo, treas., with M. A. Hendricks, W. H. Witty, and T. H. Doane, directors.
Cap. \$350,000; \$1 par. Stock listed on Salt Lake City Exchange.

Property: 23 claims, 9 miles S. E. of Pocatello, said by R. N. Bell to show big, low-grade deposits of copper-iron-sulphide ores, not as yet profitably mined.

Development: by 8,000' of tunnels, 300' shaft, 200' winze, 100' of raises and 300' of crosscuts. Equipped with steam power and 50-ton mill.

No recent information.

FOUR TIMBERS MINING CO.

IDAHO

Address: F. Bland, sec.-treas., Wallace, Shoshone county, Idaho.

An assessment of 2 mills per share due Dec. 4, 1920.

Property: between the Ray-Jefferson and Amazon-Manhattan mines.

Development: by tunnels, the uppermost 600' long, cutting a well-defined vein. The lower adit was 900' long with two shifts working late in 1919. **Equipment:** electric power, 3-drill air-compressor, etc.

FRIEND MINING CO.

IDAHO

Address: 321 Lindelle Bldg., Spokane, Wash.

Officers: Wm. Schierding, pres.-treas.-mgr.; David Barth, sec.; T. F. Havens, v. p.; with Geo. Baxter and Herbert Nuffer, directors.

Inc. 1915, in Idaho. **Cap.** \$150,000; 10c. par; assessable. Annual meeting first Wednesday in August. Assessments of 2 mills were levied Aug. 6 and Oct. 6, 1921.

Property: 9 unpatented claims in Beaver Creek district, Shoshone county, carrying veins with lead, silver, and zinc.

Development: by tunnels, and a shaft below the main adit.

Equipment: includes electric power and a 10-ton concentrating mill.

GAIETY MOUNTAIN GOLD MINES CO.

IDAHO

Address: E. F. B. Dande, cons. engr.-agent, Warren, Idaho.

Officers: D. L. Rhodes, pres.; John Becker, v. p.; C. C. Roeder, sec.; F. M. Woods, treas., with J. H. Latham and Geo. Cochran, directors.

Inc. 1920, in Delaware. **Cap.** \$1,200,000; \$1 par; 300,000 shares issued.

Property: 226 claims, 4,560 acres, in Warren district, Idaho county. Ore occurs in quartz veins in granite, said to average \$20 gold per ton.

Development: by 200' tunnel. Work started in 1921 and small mill is to be erected.

GALENA MINING CO.

IDAHO

Subsidiary of Callahan Zinc-Lead Mng. Co. Is a consolidation of the Kill Buck and Chicago-Boston mining companies.

Address: D. W. Newton, mgr., Wallace, Idaho.

Officers: C. A. Callahan, pres.-treas.; Dr. L. E. Hanson, v. p.; C. W. Newton, sec.-mgr.; with John Borg, directors.

Inc. 1921 in Ida. **Cap.** \$2,500,000; \$1 par.

Property: 15 claims on Lake creek, 2 miles W. of Wallace, Shoshone county, one mile from railroad and electric power. A ½ interest is held in the Tincup claim. There are two ore-bearing veins, one the Tincup, having high-grade gray copper ore, from which shipments have been made. The second vein, the Killbuck, is said to have 8 to 12' of lead-silver milling ore, opened by No. 6 tunnel. The copper vein is up to 5' wide, and some ore carried 20 oz. silver per ton. So far as explored, the property is within the Revett quartzite.

Development: by 6 tunnels and a 400' shaft. A crosscut driven on the 400' level cut the downward extension of the big orebody in Dec., 1921.

Property is now a mine, though it needs further development to determine the extent of the orebody and to block out ore for the mill.

GERTIE MINING CO.

IDAHO

Office: 708 Hutton Bldg., Spokane, Wash. **Mine office:** Burke, Idaho.

Officers: L. W. Hutton, pres.; A. A. Booth, v. p.; with Eugene R. Day and F. W. Anderson, directors.

Cap. \$150,000, increased in 1914 to \$250,000; shares 10c par. Listed on Spokane Stock Exchange.

Property: 3 patented claims, 35 acres, near Burke, adjoining Hec'a mine on the S. E. and Maher Ahern group on the W. Also about 10 acres at mouth of crosscut tunnel. Company has driven a 4,100' tunnel, with back of 1,400', in the expectation of cutting ore in a vein mined on the Hecla property. This vein is said to have shown 3 or 4" of clean galena, 300' from the Gertie line and 250' farther back Hecla is said to have mined 3 to 5' of clean ore. A large vein was cut 1915, but results, being disappointing, management started a crosscut tunnel to Gertie claim to find the vein. Expenditures are over \$75,000. In March, 1919, mine was closed down.

GIANT LEDGE MINING CO.

IDAHO

Office: 714 Peyton, Bldg., Spokane, Wash.

Officers: J. J. Taylor, pres.; J. Erikson, v. p.; W. W. Johnson, sec.-treas., Spokane; D. S. Prescott and J. A. Folsom, trustees. Chas. G. Taylor, mgr.

Inc. 1913, as a reorganization of the Granite Allie Co., the new company assuming liabilities of \$30,392, which have since been paid off. **Cap.** \$1,500,000; \$1 par; assessable; 1,350,000 shares issued.

Property: 65 claims, water-rights, and timber land (6,000,000'), on Granite gulch, 4 miles E. of Murray, Shoshone county, near the O-W. R. & N. Co's. line.

Development: by 400' shaft and over 1,500' of other workings. On the 400' level the vein has been followed for 1,400', and carries good value in lead, copper, and gold. One shoot, 120' long, said to assay \$36 per ton. The shaft is to be deepened.

Equipment: 7-drill compressor, hoist, pumps, 1½ mile flume and electric power. A 150-ton mill started 1917 was not finished by 1921, although lumber was being cut for this purpose and foundations were laid.

GIANT MINING & DEVELOPMENT CO.

IDAHO

Address: 517 Bank St., Wallace, Idaho.

Officers: Paul Liver, pres.-mgr.; A. Rechsteiner, v. p.; E. R. Turk, sec.-treas.; with G. Malacrida and Isaac Davids, directors.

Cap. \$100,000; 10¢ par; assessable; 3 mills per share levied, August, 1921.

Property: 7 claims in Beaver district, Shoshone county, opened by 1,600' of workings, which show some lead-silver ore. A crosscut is being driven to the vein.

GILMORE MINING CO.

IDAHO

Officers: 222 Kearns Bldg., Salt Lake City, Utah; and Gilmore, Lemhi county, Idaho.

Officers and directors: Edgar C. Ross, pres. and gen. mgr.; Frank Hahne, v. p.; Harry R. Hyde, treas.; Clarence Warnock, sec.

Inc. Feb. 10, 1912, in Utah. **Cap.** \$1,000,000; shares \$1 par, assessable; outstanding \$800,000. Bonds authorized, \$100,000; none issued. Company is a close corporation. Annual meeting, January 2. All receipts from ores spent in development work. Has levied 2 assessments, last one December, 1918, payments were to run until August, 1919.

Property: 12 patented claims, 250 acres, in the Texas mining district, at Gilmore, was purchased from the Allie Mng. Co., Ltd.

Ore: gold-silver in fissure veins in limestone, said to have an average value of \$14.50 per ton. Veins strike N. 10° E. and dip 60°. See U. S. G. S. Bull., 528, p. 107.

Development: by a 60° incline and tunnels, greatest depth of workings on the vein is 850'; total workings, 8,800'. This company in conjunction with the Pittsburgh-Idaho and Allie Mining companies has run a 4,500' development and transportation tunnel into Gilmore Mtn. which is said to cut a number of lead-silver fissures and one important gold vein.

Production: shipments in 1917 totaled \$72,084, ore averaging 0.025 oz. gold, 7.75 oz. silver, and 23.16% lead; in 1920, 557 tons, returning \$16,984.96,

compared with 2,281 tons returning \$19,955.38 in 1919, and 1,286 tons returning \$15,706.40 in 1918.

GLEN METALS MINING CO.

IDAHO

Address: C. D. Miller, treas., Mullan, Idaho.

Last assessment, of 1½ mills per share, due Jan. 10, 1921.

GOLD CREEK MINING & MILLING CO.

IDAHO

Address: Paul Bockmier, mgr., Pacific Hotel, Spokane, Wash.

Officers: E. V. Thompson, pres.; A. G. Crum, v. p.; Paul Bockmier mgr.; preceding with J. H. Fussy and C. C. Burr, directors.

Property: in Gold Creek district, Latah county.

GOLDEN AGE JUNIOR MINING CO.

IDAHO

Address: Arthur W. Stevens, supt., Pioneerville, Idaho.

Cap. \$1,000,000; \$1 par.

Property: 300 acres in Boise Basin district, Boise county, shows veins carrying gold-silver ore.

Development: by a 1,700' tunnel and a 500' double compartment shaft sunk in 1920 to cut the vein 380' below the tunnel.

Equipment: includes a 15-stamp mill to be remodeled and enlarged.

The Michigan Investment Co. of Grand Rapids, Mich., is said to be financing the company.

GOLDEN CHEST MINING CO.

IDAHO

Address: T. H. Thomas, sec., Iron Mountain, Montana.

An assessment of 3 mills per share was due Nov. 22, 1920.

Property: 51 claims, 1 mile E. of Murray, Coeur d' Alene, Idaho.

Geology: quartz vein in Prichard slate. Ore from upper levels was free milling, and the gold easily recovered. At depth the ore became pyritic and rebellious. Gold and tungsten occur in the same vein, but the scheelite is confined to the disturbed part of the vein and is almost free from gold. The gold shoots are free of tungsten, though in mining both become mixed to some extent.

Development: consists of over 13,000' of workings.

Treatment: in Bull. 128 of the A. I. M. E., R. R. Goodrich and N. E. Holden describe tests made on this ore, tungsten with a little gold. Considerable clean scheelite is sacked direct for market. It was found that gravity concentration gave 53.7% tungstic oxide concentrate, with much pyrite, not a marketable product; flotation does not clean the concentrate properly and loses tungsten in the overflow; roasting and magnetic separation of the pyritic tungsten material yields over 60% grade; and the net extraction of W. O. is about 90%. A new mill was erected in 1918.

GOLDEN GATE PLACER MINES

IDAHO

No information for several years. Former office at Pendleton, Ore. See Vol. XIV.

GOLDEN GLOW MINING & MILLING CO.

IDAHO

Office: Hailey, Ida.

Officers: J. D. Pope, pres., Butte, Mont.; C. L. Friederichs, sec.-treas., Helena, Montana.

Property: 18 miles N. of Ketchum, Blaine county. Veins contain low-grade silver-lead-copper ore, opened by tunnels.

A 75-ton wet concentrator was built in 1920 and 300 tons of high grade ore shipped during the year.

GOLD FLOTATION DEVELOPMENT CO.

IDAHO

Office: H. G. Loop, 1526 L. C. Smith Bldg., Seattle, Wash., or Mullan, Ida. E. A. Renny, supt.

Officers: W. H. Havlin, pres.; Harold Williams, v. p.; H. G. Loop, sec.-treas.; with John Brizel and O. W. Lewis, directors.

Inc. 1919, in Idaho. Cap. \$1,500,000.

Property: the old Singiser, or Monument gold mine, a group of 6 claims in Lemhi county, 50 miles from Salmon. Idle for past 15 years. Formerly owned by the Oregon Gold M. Co. Ore contains gold and silver, said to average \$11 per ton.

Development: by double-compartment incline, with drifts on the 40, 100 and 200' levels, a total of 3,000' of workings.

Equipment: includes 6-stamp mill, compressor, sawmill, etc.

GOLD HILL & IOWA MINES CO.

IDAHO

Controlled by Boston-Idaho Gold Dredging Co. of Idaho City, Idaho.

Address: E. E. Carter, mgr., Quartzburg, Boise Co., Idaho.

Property: Gold Hill and Iowa group, at Quartzburg, also the Newburgh mine, a total of 43 claims. Veins consist of porphyry, carrying quartz stringers, averaging \$10 to \$12 per ton. Workings are on the intersections of 2 fissures and rhyolite-porphry dikes.

Development: by 20,000' tunnel work and a 550' shaft.

Equipment: includes electric power, compressor, drills, and 150-ton plant using 8' Hardinge mill, tables, and cyanidation.

Production: total to date is given as over \$7,000,000.

Company was the largest gold producer in Idaho in 1919 and 1920.

Employs about 150 men.

GOLD HUNTER MINING & SMELTING CO.

IDAHO

Address: C. L. Herrick, Mullan, Shoshone Co., Idaho.

Officers: T. F. Kelley, pres.; E. C. Hennessy, sec.; C. L. Herrick, managing supt.; C. K. Cartwright, mine supt.; G. Almquist, mill supt.

Cap. \$2,000,000; \$10 par; is a close corporation.

Dividends: \$50,000 in 1919; \$100,000 in 1920.

Property: 7 claims and a fraction, 240 acres, patented, in Hunter district, Coeur d'Alene region; also 20-acre millsite. The Paymaster group of 3 claims, adjoining the Hunter, was acquired from the Greenough estate in 1920.

Geology: fissure zone in quartzite and shale. Lead-silver sulphide ore occurs in shoots with dip of 80° S. and course of N. 75° W. The mineralized area is 200' by 1,800'.

Development: by tunnels and shafts. Main tunnel 4,800' long. Winze down 1,200' below tunnel level. Two shoots developed, the N. 12' wide, the S. 20' wide. Best ore came from east part of Yolande and west part of Hunter claims.

Equipment: includes 150 h. p. electric hoist, two 1,500 cu. ft. compressors, 100 g. p. m. pump, 500-ton mill.

Results of operations:

	Tons Ore	Gross	Cost Mining	Trans. and Treatment	Improve-ments	Net Profit
1915.....	118,764	\$614,590	\$333,904	\$214,315	\$34,707	\$31,662
1916.....	119,490	815,779	482,275	180,186	8,044	161,361
1917.....	116,562	994,407	525,493	293,202	44,892	130,812
1918.....	1,028,434	667,456	290,755	13,693	56,528
1919.....	132,921	821,456	463,762	279,134	11,623	66,937
1920.....	160,027	1,336,732	793,656	312,199	15,043	115,833

The monthly shipments of lead concentrate averaged 1,100 tons in 1918 and 900 tons in 1919. Operations suspended December, 1920, to await return of normal conditions.

GOLD MINES CO.

IDAHO

Address: J. W. Higgins, 401 Chamber of Commerce Bldg., Spokane, Wash.

Officers: J. W. Higgins, pres.; H. G. Twomey, sec.; W. H. Stowell, treas.

Cap. \$1,500,000; 10¢ par; 1,000,000 shares in treasury.

Property: 4 claims, in Bear Creek district, N. of Mountain Home, Elmore county, credited with gold production amounting to \$250,000.

Development: by 700' tunnel, reaching a depth of 350', with about 4,000' of workings.

GRAND FORKS LEASING CO.

IDAHO

Address: H. V. Edwards, Wallace, Idaho.

Organized Jan., 1921, with a capital of 25 units, 15 of which pay \$25 per

month for 5 months, a total of \$1,875; while the promoter and associates take 10 units.

Property: a 4-year lease, until Jan., 1925, on the **Climax Silver-Lead M. Co.'s** 4 claims, E. of the Western Union, 2½ miles N. W. of Wallace, Shoshone county. Development is by tunnels, and equipment includes a compressor, etc.

GRAY COPPER MINING CO. LTD.

IDAHO

Probably dead. Described in Volume XIV.

GREAT DUNKER M. & M. CO.

IDAHO

Last Address: E. C. Connor, Kellogg, Idaho.

Company was organized in July, 1919, to develop ground near Kellogg. \$40,000 was to be spent on equipment and new work. Probably dead.

GREAT EASTERN MINING CO., LTD.

IDAHO

Officers: John Carlson, pres.; Charles A. Solberg, v. p.; John C. Furst, sec.-treas.; with Edwin Erickson and Charles Bollinger, directors.

Inc. Sept. 19, 1900, in Idaho. **Cap.** \$1,000,000; shares \$1 par; assessable. Annual meeting in April. In 1921 the **Senator Mining Co.** and **Coeur d'Alene Syndicate** secured an option on 225,000 shares of treasury stock at 10¢ per share and also were granted a permanent easement and right of way over Great Eastern property, the consideration being \$5,000 cash, payable on or before May 15, 1924.

Property: the Great Eastern group, 14 claims, patented at Gem, 4½ miles N. E. of Wallace, Shoshone county, said to show silver-lead-zinc ore in fissure veins.

Development: by shafts and tunnels, longest tunnel 3,000'. Claims are still in the development stage. Property is easily accessible to Northern Pacific and Union Pacific (O.-W.) railroads.

GREAT WESTERN MINING CO.

IDAHO

Address: Burke, Shoshone county, Idaho.

Officers: Jesse Norton, pres.; Victor Hunt, v. p.; W. S. Bowie, sec., with W. K. Karnes, F. T. Robinson, and J. J. Jenkins, directors.

Property: 7 claims, patented, 3 miles from Burke, show vein traced for about 1,200' by trenching, carrying copper and lead ore.

Development: by tunnels of 1,270' and 900', and a 207' shaft. Work was begun Aug. 12, 1904. A raise driven in 1914 was reported to have opened a 12' orebody, assaying 7% lead, 1.54% copper and 0.4 oz. gold.

Equipment: includes hoist and small air compressor, driven by a 6-h. p. motor. Idle since 1917.

GREEN HILL CLEVELAND MINING CO.

IDAHO

See **Federal Mining & Smelting Co.**

GUELPH MINING & MILLING CO., LTD.

IDAHO

Head office: Kellogg, Idaho. **Mine office:** Sunset, Idaho.

Officers: Byrd Coyle, pres.; H. H. Rhodes, v. p.; A. P. Corby, sec.; Eliza H. Steffes, treas., with L. M. Pung, E. P. Biotti, Alfred Conneybeare, I. B. Steffes and S. D. Lemieux, directors.

Inc. Mar. 6, 1916, in Idaho. **Cap.** \$1,500,000; \$1 par; assessable; 1,300,000 outstanding. Assessment of one cent a share levied in March, 1920.

Property: 7 claims and 3 fractions, in Sunset district, adjoining the Hercules, Ambergris, Sunset, and Callahan zinc-lead mines, Shoshone county.

Geology: quartz vein in Burke quartzite, with dip of 55° and strike, S. E. to N. W. Ore occurs as streaks and contains lead carbonate and silver chloride.

Development: by 250' two-compartment shaft a 125' upper and 1,100' lower tunnel, with 810' of drifts.

Equipment: includes 5-drill compressor, pump, hoist, electric power.

HAMBURG-AMERICAN COPPER M. & M. CO.

IDAHO

Address: J. A. Rock, sec., Kellogg, Idaho.

Inc. Nov., 1908, in Idaho. **Cap.** \$1,500,000; \$1 par; assessable; 1½ mills levied in May, 1920, and 1 mill in May, 1921.

Property: 8 claims, between the Handspike and Riverside, on the Little North fork, 18 miles from O.-W. R. & N. line.

Development: 1,100' tunnel opening copper ore. No operating data 1917.

HAMILTON MINING CO.

IDAHO

Office: 307 Benton St., Portland, Oregon.

Officers: R. E. White, pres.; A. N. Hamilton, sec.

Cap. \$2,400; shares \$1; all outstanding.

Property: on the South fork of Salmon River, Idaho county, Idaho. Company reported, October, 1917, to have purchased the Grand Central mine, consisting of 2 claims in Cable Cove district, near Sumpter, Baker county, Oregon, formerly owned by Mollie Gibson Gold M. & M. Co.

Development: by 500' of tunnels, said to show an ore-bearing vein from 2-4' wide. No recent information.

HARMONY MINES CO.

IDAHO

Offices: 105 W. Monroe St., Chicago, Ill., and 116 North Carson St., Carson Nevada. **Mine address:** Earl F. Nieman, cons. engr.-gen. supt., Salmon, Ida.

Officers: A. W. Nieman, pres.-gen. mgr.; C. F. Nast, v. p.; O. G. Paasche, asst. treas.; with C. Nickelsen, Henry Cohen, A. C. Skafgard, C. V. Nieman, Morris D'Hoore, and Richard de Smet, directors. Gladys Nieman, sec.; J. W. Reihman, treas.

Inc. Jan. 22, 1916, in Nevada. **Cap.** \$1,000,000; \$1 par; assessable; 791,498 issued. Annual meeting, third Thursday in January.

For year 1920, receipts were \$193,617, of which \$100,601 was from sale of shares; cash received on loans, \$49,077; ore sold realized \$15,687. Development, etc., cost \$92,941; equipment, etc., \$55,583; promotion expense, \$2,222; administration, \$12,294; and re-payment of loans, \$20,882. The cash balance was \$9,693. In 1920 receipts were \$135,066, including \$113,897 from stock sales; \$639.99 from sale of ore; \$6,150 received on loans; mine expenditures amounted to \$51,795, not including \$8,050, repayment on loan; balance, \$28,242.

Property: 17 claims, being patented, in Withington Creek district, Lemhi county. Examined by J. A. Herndon and J. F. Inglis of Salmon, Idaho; J. W. Copes of Leesburg, Idaho, and R. O. Clifford of Salt Lake City.

Geology: the mine opens 2 veins, the Contention and the Leapyear. In the Contention, which is a shear-zone in schist, dipping 70° with a N. 60° W. course, the orebody is from 2 to 12' wide, and shoots average 4' in width and 100' in length. The principal mineral is chalcopryrite assaying from 3 to 5% copper. In the Leap Year, the ore is massive chalcopryrite averaging 5.5% copper. The Income vein will be cut in 1922.

Development: by tunnels and various crosscuts, with total of over 6,000' of workings. Ore reserves estimated at 53,840 tons. The 300' level, or lower tunnel is to be driven along the Contention vein to Explore the full length of the shoot. A depth of over 2,500' can be reached on the dip of No. 6 vein. Early in 1920, a parallel vein to No. 1 was found 36' distant. It was 3' wide, assaying 12% copper.

Equipment: 2 aerial trams, one a jig back two-bucket plant of 50 tons a shift capacity, and 2,400' long; the other a friction grip tram of 100 tons capacity and 2,800' long; also 2 fuel-oil driven compressors of 10-drill capacity, 7.7-mile transmission-line.

Mill: a 100-ton concentrating mill was constructed in 1919. Operations show that the mill recovery was but 54.71% of copper on 2,412 tons of 3.52% ore milled. Flotation is to be installed to increase saving to 85% or better.

Production: in 1920, was 213,793lb copper compared with 32 tons of

ore and 5,376lb of copper in 1916; 500 tons and 61,170lb in 1917, 100 tons and 20,000lb in 1918.

Over \$250,000 has been spent on the Harmony mine, which seems to be of considerable merit.

HARTFORD MINING CO.**IDAHO**

Address: Therret Towles, sec.-treas., Gyde-Taylor Bldg., Wallace, Ida.

An assessment of 1½ mills levied March 24, 1921.

No other information available.

HARTWIG MINING CO.**IDAHO**

Out of business. See Vol. XIII for description of property.

HAYES CO.**IDAHO**

Officers: A. Hayes, pres., Kellogg, Idaho; Martin Nicholson, sec.; S. A. Easton, treas.

Inc. 1917, in Idaho. **Cap.** \$50,000; shares \$1 par. Organized by the Bunker Hill & Sullivan and Federal M. & S. companies.

Property: company has a lease on about 1,200 acres, including 3 miles of river bed along the Coeur d'Alene river, and operates a 75-ton flotation plant costing \$50,000, for recovery of lead and silver from slime from the bed of the south side of Coeur d'Alene river.

Shipping about 200 tons of concentrate per month to the Bunker Hill smelter. Concentrate said to average 25% lead and 20 oz. silver.

HAYNES STELLITE CO.**IDAHO**

Address: Kokomo, Indiana; and Haynes Camp, Blackbird Creek, via Salmon City, Lemhi Co., Idaho.

Property: 30 claims in the Blackbird district. 32 miles S. W. of Salmon. A wide ore zone shows dissemination of cobalt-sulphide ore in fine grained black quartzite, with interbedded green schist. The ore occurs with abundant tourmaline.

The Haynes Stellite Co. is the largest user of cobalt in the world. The malleable stellite alloys made by it are composed mostly of cobalt and chromium. The metal is forged and polished, but cannot be machined.

Production: 4,000 tons of ore in 1918 yielded 55 tons of concentrates, assaying 17.74% cobalt, 0.63% copper, 15.32% iron, 23.75% sulphur, and 14.15% arsenic. Only development work done in 1919-20.

HEADLIGHT MINING CO., LTD.**IDAHO**

Address: Wallace, Idaho, and Markwell Bldg., Long Beach, Cal.

Officers: F. P. Markwell, pres.; Alex. Murphy, v. p.; Everett H. Pattison, sec.; Oscar Nordquist, treas., with C. A. Markwell and Angus Sutherland, directors.

Inc. 1900, in Idaho. **Cap.** \$1,800,000 \$1 par; 1,438,995 issued. **Bonds:** \$50,000 issued.

Property: 13 claims, 10 patented, 130 acres, in the Leland mining district, Shoshone county, reported to show lead-silver ore in fissure veins is quartzite. Developed by tunnels. Idle since 1917.

HECLA MINING CO.**IDAHO**

Office: Wallace, Idaho. **Mine office:** Burke, Idaho.

Officers: Jas. F. McCarthy, pres.-treas.-gen. mgr. at Wallace; W. J. C. Wakefield, v. p.; with Sarah E. Smith, Carl Landsee, F. J. Kipp, E. J. Nolan, and H. C. Lambach, directors. L. E. Hanley, sec., Wallace; C. H. Foreman, engr.; J. B. Sloan, mechanic.

Original Hecla Mining Co., inc. in Idaho in 1891, with **cap.** \$500,000 and shares \$1 par, owned the Hecla and Katie May claims. **Inc.** July, 1898, in Washington. **Cap.** \$250,000; shares 25cts. par; all issued and fully paid. Security Transfer and Registrar Co., New York, transfer agent; Metropolitan Trust Co., New York, registrar. Annual meeting in April. Listed on New York Curb, Los Angeles and Spokane stock exchanges.

Financial statement for years ending December 31:

	1920	1919	1918	1917
Ore sales and sundry revenue	\$2,573,840	\$1,692,771	\$4,035,339	\$3,671,818
Operating charges, depreciation, etc.	1,385,774	1,066,232	1,980,621	1,507,868
Net profit	1,188,066	626,539	2,054,718	2,163,950
Dividends	650,000	600,000	350,000	1,600,000
Current assets	1,710,489	1,822,226	2,467,607
Current liabilities	482,657	63,318	76,933

Dividends: \$7,224,000 up to Sept. 28, 1921. In 1915, dividends were but \$220,000; increased to \$565,000 in 1916; \$1,550,000 in 1917; \$1,600,000 in 1918; \$600,000 in 1919; \$650,000 in 1920 and \$330,000 in 1921.

The total to end of 1920 was \$8,505,000.

Property: 29 patented claims, 347 acres, in Burke, or Lelande district, of the Coeur d'Alene region, near Burke, and a mill site at Gem.

In Aug. 12, 1921, company agreed to cooperate on equal terms with Bunker Hill & Sullivan Mng. & Conc. Co. in the purchase and development of Star Mng. Co.'s holdings at Mullan, and which Bunker Hill had transferred to its subsidiary, the **Sullivan Mng. Co.**, on Dec. 13, 1920. On Aug. 17, an injunction to prevent this deal was granted to Eugene R. Day and Sarah E. Smith, as Hecla stockholders, on the principal ground that the Star mine is "worthless". In September Bunker was made codefendant. Hecla's total share under the purchase contract is about \$437,000, of which \$99,505, the initial payment, is $\frac{1}{2}$ the cost to Bunker Hill of defending the Star Mng. Co. in its litigation with the Federal M. & S. Co. It is proposed to attack the Star vein through the Hecla shaft by an 8,000' crosscut to cost \$66,000. This vein is believed to be an extension of the Morning orebody of the Federal M. & S. Co.

Geology: ore is chiefly a silver-bearing lead sulphide accompanied by sphalerite and pyrite, occurring in the Hecla lode; strike N. W.-S. E., with average dip 80° to N. E. General country rock is sericitic Burke quartzite. The lode is intimately associated with a lamprophyric dike, which has an average width of 2'. Ore averages 5' to 6' in width, occurs mainly in the quartzite on one or both sides of the dike, and, to a large extent, fills fissures. The pay-shoot has an extreme length of 1,200'. For geology of Coeur d'Alene district, see U. S. G. S. Prof. Paper No. 62, published in 1908; also paper by Oscar A. Hershey, published by M. and S. Press.

In November, 1919, the Federal M. & S. Co. for its lessee, the Marsh Mines Consolidated, instituted an apex suit against the Hecla, alleging ore was wrongly extracted from the east orebody of the Hecla. Although denying the allegations, Hecla in November, 1920, bought the Tiger-Poorman property, certain water rights at Burke, and the Russell, Mono and O'Neil claims from the Federal company for \$750,000. As the three last named were subject to a lease held by the Marsh Mines not expiring until 1926, partial payment only was made pending negotiations for cancellation of lease. Final settlement was reached in March, 1920, with full payment. The Gertie M. Co. also started suit in January, 1920. By June it was permitted to inspect the Hecla No. 3 tunnel, which was driven through a corner of the Gertie, before 1911. Permission to examine other parts of the Hecla was denied by the Court.

Development: by a vertical 3 compartment shaft and by shaft No. 2. New work totaled, 6,420' in 1916; 12,386' in 1917; 13,566' in 1918; 4,449' in 1919; and 4,731' in 1920.

The main shaft was 2,000' deep in 1918; at this depth the drift on the vein showed ore 12' wide, which by January, 1921, had been opened for 842'. It was then 16' wide, and equal in grade to the 1,600' level, with 3 to 8' of shipping ore. Work in 1918 continued on the East orebody between No. 3 adit and the 900' level, also from No. 2 shaft level to 1,200' on the Ore-Or-

No-Go orebody; in 1919 but little new work was performed on these orebodies, and none in 1920.

Ore reserves were estimated at 1,296,000 tons in 1916; 1,326,399 tons in 1917; 1,584,115 tons in 1918; 1,549,833 tons in 1919, plus 750,000 tons probable; 2,095,745 tons in 1920.

The Tiger-Poorman, idle since 1908, is said to have reserves of lead-zinc ores, now of commercial value because of improved treatment methods. Its plant has been moved to the Hecla mine.

Equipment: the property is one of the best equipped in the district, with hoists, compressors, machine-shops, and a 750-ton concentrator with a flotation unit at Gem. In 1918, a leased 600-ton mill was also operated. Electric haulage was started in 1917.

Production:

	1920	1919	1918	1917	1916	1915

In 1917 company made a very favorable 5-year contract with the Bunker Hill & Sullivan Co. for the smelting of its lead-silver ore and concentrate at the Kellogg plant. Prior to this arrangement these products were sent to Tooele, Utah.

The Hecla mine, though unsuccessful in its early years, has become one of the steady dividend-payers of the district. The property is kept up to a high standard, is efficiently managed, and costs are low.

H. E. M. MINING CO.

IDAHO

Consolidated with the Aurora-Sampson Mining Co., to form the Western Union Mining Co., which see.

HENRIETTA EXPLORATION CO.

IDAHO

Address: S. L. Shonts, mgr., Wallace, Idaho.

Organized, 1917, by Wm. A. Beaudry, P. Weber, Ben. Harmon, Sidney Shonts, and Frank H. Skeels. Has a 5-year lease from 1917 with option to purchase at \$80,000, on the Bear Top mine, formerly owned by the late M. S. Simmons of Murray.

Property: about 5 miles from Murray, shows a vein in slate, carrying silver-lead ore in pockets and irregular shoots. Lessees operate on a royalty basis, paying 15% on lead settled for under 7½c. per lb., and 20% for shipments above that figure.

Development: 2,200' of tunnels and over 2,000' of other workings.

Equipment: power plant and concentrator, but no returns therefrom are published.

HENRIETTA LEASING CO.

IDAHO

Name changed to Henrietta Exploration Co., which see.

HERCULES MINING CO.

IDAHO

Address: Eugene R. Day, mgr., Burke, Idaho.

Company is a partnership, not a corporation, the Day family owning a half interest and dominating the policy. It owns 500,000 shares Northport Smelting & Refining Co., at whose smelter at Northport, Wash., ore and concentrate from the Hercules and other mines was reduced, but in 1920, products from the Hercules were sent to the B. H. & S. plant at Kellogg.

Hercules holds the following stock:

168 shares	Pennsylvania Smelting & Refining Co.
9,800 shares	Hidden Treasure Co.
720,330 shares	Idaho & Eastern Mining Co., a controlling interest.
912,719 shares	Hummingbird Mining Co., a controlling interest.
505,333 shares	Ambergris Mines Co., a controlling interest.
840,854 shares	Basin Mining Co., a controlling interest.

Dividends: (estimated) see following table for distributions up to 1916; then \$3,000,000 in 1917; \$2,500,000 in 1918; none in 1919; \$850,000 in 1920; total, \$16,831,227.

Property: the Hercules mine near Burke, Shoshone Co., is the greatest bonanza of the Coeur d'Alene region. It has one big vein in quartzite and slate, cut by two cross-faults and one dike.

Development: by tunnels. In the lowest or Hummingbird tunnel nearly level with the town of Burke, there is a 1,200' shaft, making a total depth of 2,900' below the apex. This shaft is to be sunk 400' deeper in 1921. Early in 1918, N. 5 level of this shaft, 2,000' below the surface, entered rich lead-silver ore opened for a length of 480' at last accounts.

Equipment: includes 175-ton mill erected in 1915, using rolls, jigs, tables, tube mill and Callow flotation plant.

Production: 1901 to October 28, 1916:

1920..	52,435	5,337,360	1,979,251	2,172,193	38,208	*1,147,706

*Federal taxes not deducted.

The property normally employs 500 men. On account of the lead market, mine was closed for 5 months in 1919.

According to reports, all work but development was suspended in March, 1921.

Litigation in which the Hercules is involved is known as the Cardoner case. On October 28, 1916, a 1/16 interest in the mine was purchased from Mathilde Cardoner of Albuquerque, New Mexico, by Eugene R. Day, for \$350,000. Later it was alleged that he did not give correct statements as to the value of the mine, therefore Mrs. Cardoner was not paid enough for her interest. On January 25, 1918, the U. S. District Court upheld the legality of the sale, but in August the case was appealed.

HERMIT MINING CO.

IDAHO

Address: Clayton, Custer county, Idaho.

Officers: H. L. Carpenter, pres., 800 1st Nat. Soo Line Bldg., Minneapolis, Minn.; W. E. Smith, v. p.; Wm. M. McCrea, sec., with S. C. Sherrill, all of Salt Lake City, directors. W. E. Smith, supt.

Property: a group of claims 15 miles from Clayton, on which development work on a vein 20' wide has disclosed an ore shoot 2½' wide, the ore carrying 50 to 73% lead, 114 to 211 oz. silver, and \$3.80 to \$6.80 gold per ton according to report. One carload shipped to the smelter netted \$1,700. Only such rich ore can stand the long haul to the railroad.

No recent returns.

HIGHLAND-SURPRISE CONSOLIDATED MINING CO. IDAHO

Address: First State Bank, Kellogg, Idaho.

Officers: C. R. Mowery, pres.; M. J. Sinclair, v. p.; George Lamielle, sec.-treas., with Al Page, H. H. Huemann, W. W. Papesch, and George Bitner directors.

Inc. 1912, in Idaho. Cap. \$1,200,000; \$1 par; assessable. Last assessment of 5 mills per share levied May, 1921. Seven assessments have been levied to date.

Financial statement for period beginning March 1, 1917 and ending June 1, 1920, showed, cash on hand, \$1,099; receipts from smelters, \$78,435; receipts from 5 assessments, \$60,060; miscellaneous receipts, \$3,600; bills remaining unpaid, \$5,757. Report for 10 months ending March 1, 1921, showed receipts from assessment No. 6, \$12,113, balance on hand, \$783.

Property: 36 claims, at head of Stewart creek, in Pine Creek district, 15 miles S. of Kellogg.

Ore: carries silver-lead-zinc sulphides in fissure veins in slate; veins

strike N. 60° E., dip 70°. Ore said to average 5 oz. silver, 8% lead and 20% zinc. One shoot is 200' long, 2 to 4' wide, with a back of 270'.

Development: consists of 2,600' of drifts, 1,515' of crosscuts, 250' of raises and 150' of winze.

Equipment: includes 125-ton mill erected in 1915, using rolls, jigs, tables, tube mill and Callow flotation plant.

A few men employed on development work. See Vol. XIII, for details of property. Transportation up Pine creek is the main trouble.

HILARITY MINING CO.

IDAHO

Dead. Listed in Vol. XIV. Consolidated Jan., 1917, with the **Pine Creek M. & M. Co.**, which see.

HILL MINING & MILLING CO.

IDAHO

Address: L. S. Harrison, sec.-treas., Kellogg, Idaho.

Officers: Josiah Hill, pres.; Horace Trask, v. p., with L. S. Harrison and T. L. Rowland, directors.

An assessment of 1 mill a share was levied Sept. 10, 1920.

Property: a group of 3 claims and a fraction, near Kellogg, Shoshone county, adjoining the East Caledonia on the east.

Development: by tunnels, one 900' long, exposes some lead-silver ore in a 4' vein cutting slate and quartzite.

Reported operated under lease and bond by Patrick Brady and W. J. Stratton, October, 1921.

HOLTE MINE

IDAHO:

Acquired in 1921 by **Unity Gold Mines Co.**

HOMEBUILDER MNG. & DEVELOPMENT CO.

IDAHO

Address: W. C. Brower, pres., 1329 Old Nat'l Bank Bldg., Spokane, Wash.

Property: 43 claims, 18 miles E. of Coeur d'Alene, Kootenai county. Company's literature issued in 1916 said 200,000,000 tons of ore were exposed in the mine, and that it carried gold, silver, copper, uranium, cobalt, zinc, and other valuable elements. A reduction plant was planned 1918. The absurd statements made about the mine caused suspicions as to its value.

No recent information.

HOMESTAKE GOLD MINING CO.

IDAHO

Address: A. W. Boyd, 703 23rd. St., Spokane, Wash.

Property: the Homestake, Pennsylvania and Sadie H. No. 1 and 2 claims in Oro Grande mining district, south of Elk City, Idaho. Mine under lease and bond for \$25,000 from James Penman of Elk City, has been under development since 1918 and is said to show a fine orebody.

HOMESTAKE MINING CO.

IDAHO

Subsidiary of **National Copper Mng. Co.**, which owns practically all its stock.

Property: a group of claims, extending west across Deadman gulch to Enterprise, or Silver Reef property. Claims were acquired by National Copper Co. as site for deep tunnel when it was believed the ores of company persisted downward.

Development: on Homestake, comprises 4 tunnels, lowest near wagon road, 400' long, to be extended 900' by Silver Reef Co., to common end line, with back of 1,200'.

HOPE MINING & MILLING CO.

IDAHO

Address: Hope, Bonner county, Idaho.

Officers: G. H. Martin, pres.; A. W. Bowen, treas.; John Larson, sec.; F. S. Hayes, supt.

Inc. June, 1916, in Idaho. Cap. \$1,500,000; \$1 par.

Property: 11 claims and a fraction, 225 acres, lying about 1½ miles E. of Hope, on main line of N. P. R. R. A vein with 14" of ore contains copper, silver and lead. Is a prospect, developed by a short tunnel. A new 1,500' tunnel, 600' below the present one, was to be driven during 1921.

HORSESHOE COPPER CO**IDAHO****Address:** D. J. Archibald, sec., Mackay, Custer county, Idaho.

In August, 1919, the U. S. S. R. & M. Co. secured a lease and bond on the mine until Dec., 1920, employing a force of 25 men. Two thousand feet of development work was done and 50 cars of oxidized lead ore shipped.

HORSESHOE MINING CO.**IDAHO****Address:** J. B. Scoles, mgr., Mullan, Idaho.

Officers: Lawrence Hollywood, pres.; P. J. Scoles, sec.-treas., with P. B. Scoles, directors.

Inc. 1908, in Idaho. **Cap.** \$1,500,000; \$1 par; 900,000 issued.

Property: 12 claims, 1½ miles S. E. of Mullan, Shoshone county, and adjoining the Kennedy group in Rio Grande gulch.

Ore: carries silver and lead occurring as carbonate and galena in fissure veins in quartzite.

crosscut was driven early in 1921 to cut one vein at a depth of 400'.

Equipment: purchased electric power, compressor, etc., acquired from

Development: by tunnels, one being 1,000' long, cutting 2 veins. A the St. James M. Co.

HORST-POWELL COPPER MINING CO.**IDAHO**

Merged August, 1919, with the Linfor Copper Co., which see.

HUMMING BIRD MINING CO.**IDAHO**

Address: W. H. Hoover, sec., Burke, Idaho. Reported controlled by the "Days".

Assessment of 5 mills per share levied July 6, 1921.

Property: 21 patented claims, at Burke. The portal of Hercules No. 5 tunnel is on Humming Bird ground. No record of development work.

HYPOTHEEK MINING & MILLING CO.**IDAHO**

Address: Gyde-Taylor Bldg., Wallace, Idaho. **Mine office:** Kingston, Shoshone county, Idaho.

Officers: J. H. Kerns, pres. and gen. mgr.; J. H. Guenther, v. p.; O. A. Olsson, sec.-treas. and mgr.; with W. W. Davidson, J. H. Kirk and S. A. Covet, directors.

Cap. \$200,000; 10c. par; 1,700,000 issued; assessable. **Bonds:** \$150,000, 7%, 12 year; authorized in 1914. An assessment of 5 mills per share was levied Feb. 21, 1921. Listed on Spokane Exchange.

Net smelter returns from November 1, 1916, to February 11, 1918, were \$207,911, and expenses for same period totalled \$211,829.

Property: 9 claims, 6 miles from Enaville, Shoshone county, located 1886 by Octave Guay, shows 3 veins; 2 of 10 to 20' estimated width; the third vein, known as the Great Western, of 8 to 25' width, having a 12 to 18" paystreak carrying native copper and cuprite, assaying up to 16%, balance of vein showing low-grade ore, estimated to carry 2% copper, with small gold and silver values in quartz gangue. The country rocks are gray and blue slates and thin bedded quartzites.

Development: by 1,000' tunnel and 3-compartment shaft to the 1,100' level. The 523' level (750' below surface) opened up a fine shoot of commercial lead ore. The 900' level showed this ore to be 6' thick and 400' long. This is the deepest mining work in the Prichard slates of the Coeur d'Alene sedimentary series, a formation hitherto considered unpromising. The finding of chalcocite at this mine below 1,000' of Burke quartzite completely contradicts all former views. In February, 1916, a crosscut on the 1,100' level opened up a vein of solid galena ore from 18 to 24" wide. In Dec., 1919, a new tunnel was started about 2,000' N. W. of the shaft to cut 2 veins found by drilling at a point about 400' in. The adit was completed late in 1920. One vein was cut at 170' and carried some lead and silver.

Property examined by J. V. Richards in June, 1917, who reported that the ore shoot opened by the 700', 900' and 1,100' levels was 400' long and averaged 3' in width. The ore is largely lead carbonate, assaying 10%

lead and 1 oz. silver per ton. Half-way between 900' and 1,100' the shoot is cut off and but little ore is found at 1,100', or 100' below it, although the vein is strong. Reserves would not exceed 20,000 tons. In 1917, the company let a contract for drilling the ground north and south of the vein, also below 1,200', and it was reported that 4' of 20.5% lead ore had been cut by the drill.

Equipment: the mine is electrically equipped and has a 200-ton concentrator with Chilean mill, Wilfley tables, Frue vanners, etc., A 3-mile aerial tram was installed to convey ore from the mine to the railway.

IBEX MINING CO.

IDAHO

Presumably dead. Described in Vol. XIV.

IDAHO ANTIMONY MINING CO.

IDAHO

Property: in Yellow Pine mining district, near Cascade, Valley county, shows stibnite ore 18 to 30" wide, developed by 4 tunnels. Two carload shipments, 1915-16, are reported to have yielded 47% antimony. Operated under lease by Frank Novak, Inc., at last accounts.

IDAHO CARBONATE HILL CONS. MINING CO.

IDAHO

Address: A. W. Witherspoon, Peyton Bld., Spokane, Wash.

Officers: W. D. Greenough, pres.; Alfred Thompson, v. p.; A. W. Witherspoon, sec.-treas.; with Herbert Wheeler and Dr. R. A. Griffiths, directors. W. E. Greenough, mgr.

Inc. 1917, Cap. \$750,000; 25c par.

Property: 24 claims formerly owned by the Carbonate Hill and Idaho Giant Mining companies purchased 1917 for \$275,000. Total area 473 acres, 2½ miles S. E. of Mullan, Shoshone county.

Development: both groups are opened by tunnels, workings aggregating over 5,000'. Ore carries lead and zinc. A shaft has been sunk 800' below the Carbonate Hill tunnel, at a point 1,200' from portal. Encouraging results were reported from the 400' level in September, 1919.

Equipment: 12 by 15" hoist, water-driven compressor, at Snowstorm mine at Larson connected by 11,000' pipeline, dwellings, and shops. Normally about 25 men are employed.

Work was resumed on the 400' level in April, 1920, and continued until September.

IDAHO CONSOLIDATED PLACER MINING CO.

IDAHO

Mail returned from former address: Fred A. Clauson, 309 Broadway, New York.

Inc. 1919, in Delaware. Cap. \$1,500,000; 600,000 shares in treasury. Security Transfer & Registrar Co., N. Y., transfer agents.

Equipment: 6 giants, capable of handling 7,000 cu. yd. daily.

IDAHO CONTINENTAL CO.

IDAHO

Address: Klockmann, Idaho.

Officers: A. A. Klockmann, pres.-gen. mgr., 711 Paulsen Bldg., Spokane, Wash.; J. B. Whitehill, v. p.; R. Schacht, sec.-treas., with E. M. Robinson, and Wm. Wraith, directors. Joseph Lancaster, mine supt.

Inc. 1909, in Washington. Cap. \$1,500,000; shares \$1 par; all issued. John D. Ryan, through the International Smelting & Refining Co., advanced \$325,000 for the development of the property on condition that it be given a 10-year contract to treat the company's ores at Tooele, Utah.

Property: 20 patented claims, 26 miles from Porthill, Boundary county, N. of head of Priest lake; said to show a strong vein m quartzite with a succession of ore-shoots, 8' to 20' wide, carrying galena, which have been opened to a depth of 700' and on that level exceed 1,500' in length.

Development: by 3 drift tunnels on the vein, the lowest (No. 4) being 1,800' long with a back of 500'. Reserves above No. 4 tunnel were estimated to be 200,000 tons at the end of 1920 including 28,000 tons of broken ore in stopes.

Equipment: a hydro-electric plant 12 miles from the mine, sawmill, 15-drill compressor assay office shops, 1,750' ground tram, 250-ton concen-

trator, replacing that burned in 1915, 2,000' aerial tram across the Kootenai river, and 13 motor-trucks. A narrow-gauge railway from the mine to Porthill, 26 miles, is proposed. About 130 men are employed, when property is in full operation.

Production: total shipments, from 1916 to Jan., 1921, exceed 23,000 tons of crude ore and concentrate from 193,633 tons of ore. In 1919, 4,695 tons of concentrate averaged 63% lead, 22 oz. silver, 0.026 oz. gold, 3% zinc, and 4.5% iron. In 1920, to November, 2,400 tons of concentrate were shipped, that assayed 65% lead and 24 oz. silver.

The Idaho Continental is considered one of the important lead mines of the State, and has been rapidly developed despite its isolated position and high cost of operation.

IDAHO COPPER CO., LTD.

IDAHO

Address: 419 Providence Bldg., Duluth, Minn., or Boise, Ida. Cooley Butler, mgr., 844 Title Insurance Bldg., Los Angeles, Calif. Frank A. Kennedy, supt., Cuprum, Ida.

Officers: O. H. Griggs, pres.; R. J. Whiteside, v. p.; Maytor Hoppenyan, sec., L. C. Brewer, treas., with E. C. Kennedy and Richard Johnson, directors. **Inc.** Jan. 10, 1920, in Idaho. **Cap.** \$500,000; \$10 par; 8,600 shares outstanding.

Property: the Red Ledge copper mine, 44 claims, 800 acres, in Seven Devils district, Adams county, 15 miles N. W. of Cuprum, the nearest P. O. Claims cover an outcrop of red and yellow stained quartz porphyry, about 3 miles long and 3,000' wide, bordered by granular igneous rock on one side and greenstone on the other, which is permeated with a fine-grained cupriferous pyrite, as well as stained with green carbonate of copper. Geologic examination indicates that the orebody is an anticline or saddle fold of bedded porphyry schist, 100' thick.

Development: by 400' and 300' crosscut tunnels, opening up four ore zones, 46', 70', 118', and 60' in width, the latter averaging 2.50% copper, 2 oz. silver and .050 oz. gold. The ore mineral is said to be a primary sulphide. About 5,000' of diamond drilling has been done and management estimates 10,000,000 tons of ore blocked out, August, 1921. Examined by Robt. N. Bell.

Appears to be a promising low-grade property.

IDAHO COPPER MINING CO., LTD.

IDAHO

Offices: Wallace, Idaho, and Mullan, Shoshone county, Idaho.

Officers: John H. Nordquist, pres.; A. N. Stroud, v. p.; Geo. F. Stoney, sec.; A. H. Featherstone, treas.; W. H. Herrick, gen. mgr.

Property: 6 claims, 3 patented, on the Continental Divide, between Idaho and Montana, near the head of Willow creek, in the Hunter district, west of the Reindeer Copper & Gold M. & M. Co., Ltd. Claims carry about 4,500' of the strike of the extension of the Reindeer vein, and are developed through the 3,000' Reindeer crosscut tunnel. Idle at last report.

IDAHO COPPER MINING & SMELTING CO. P.

IDAHO

Officers: M. R. Straight, pres.; H. B. Hershey, v. p.; J. B. Adrian, treas., with R. N. Stanfield and F. A. Reid, directors. A. H. Goddard, sec.

Inc. Sept. 18, 1919, in Virginia. **Cap.** \$10,000,000; \$10 par.

Property: the I. X. L. copper group, 60 claims, and fractions, 1,620 acres, in the Heath district, Washington county, 10 miles from the Huntington branch of Oregon Short Line, and 16 miles by road from Pacific & Idaho Northern Line, a branch of the O. S. L. at Weiser. Examined by H. C. Parker, D. MacVichie, and Robt. N. Bell.

Geology: the district embraces Cuddy mountain, 8,000' high, with a central boss of quartz hornblende diorite, or monzonite. The mountain is flanked to the N., S. and E. by horizontal lava flows of basalt. The western slopes of the mountain show monzonite, cutting large bodies of greenstone porphyry, with included masses of marbelized limestone containing typical contact metamorphic minerals and lenses of characteristic sulphide ore.

The I. X. L. group covers a large part of an erosion basin; near the crest of the mountain there is also a well-defined zone, 400' wide and a mile long, of more altered mineralized monzonite, in which the numerous shallow pits and trenches show copper carbonate stains and threads of chalcopyrite. Widespread mineralization is indicated by large patches of brown stained rock. Lower down the slope a second zone 800' wide and a mile long traverses the middle of the claims. This also shows a carbonate and sulphide ore.

Development: by 3,000' of tunnels, shafts, drifts and crosscuts. A recent prospectus states that the deposit contains "a very desirable concentrating copper ore aggregating 16 million tons, containing a gross value of \$74,000,000 that promises a net profit of \$16,000,000 on its extraction and treatment, with a potential possible ore resource that may warrant, on full development, a repeated multiplication of these figures". Mr. Bell considered the property a possible "porphyry copper".

Company does not maintain an office and Simpson, Thatcher & Bartlett, former fiscal agents, know nothing about the present status of the organization.

IDAHO EXPLORATION CO.

IDAHO

Property sold and company out of existence. Was a close corporation. See Vol. XIV.

IDAHO GIANT MINING CO.

IDAHO

Absorbed by Idaho Carbonate Hill Mining Co., which see.

IDAHO GOLD COIN CO.

IDAHO

Controlled by the John A. Salzer Seed Co., La Crosse, Wis.

Property: in the Black Lake section of the Seven Devils district, Adams county, carries gold ore assaying from \$12 to \$16 per ton. Company expended \$450,000 in 12 years' development work and built a 50-ton cyanide plant. Idle and mine for sale.

IDAHO GOLD CORPORATION

IDAHO

Address: Thos. Marioneaux, sec., care Marioneaux & Beck, Kearns Bldg., Salt Lake City. **Mine address:** Rocky Bar, Elmore county, Idaho.

Officers: Earl McIntyre, pres.-mgr.; Jas. Ivers, v. p.; Judge Thos. Marioneaux, sec., with Norman D. McLeod, and Wm. D. Ebbert of Rocky Bar, Idaho, directors.

Inc. 1921 in Utah. **Cap.** 5,000,000 shares; 3,000,000 in treasury.

Property: 2½ miles along a mineral zone containing the Elmore, Vishnu- and Mountain Goat gold bearing veins.

According to Geo. H. Short, each vein has been mined for only 500' on its course and to an average depth of 400' yielding several million dollars worth of \$80 to \$100 ore, some 50 years ago.

IDAHO GOLD & RUBY MINING CO.

IDAHO

Address: Mohawk Bldg., Spokane, Wash., or Leonia, Boundary county, Idaho.

Officers: J. M. Schnatterly, pres.-gen. mgr.; A. B. Babb, v. p.; M. L. McCormick, sec.-treas., with S. A. Deardorf, directors.

Cap. \$4,000,000; \$1 par. Successor to Idaho Gold & Radium Co.

Property: 4,000 acres of placer ground and quartz claims, 5½ miles S. of Leonia, on which company's engineer estimated 300,000,000 cu yd. of gravel available.

Equipment: consists of three giants in operation since April, 1921, and reported handling 50,000 cu. yd. per day.

IDAHO GROUP MINING CO.

IDAHO

Address: Geo. H. McKinnis, Kellogg, Ida.

Inc. 1921, in Idaho. **Cap.** \$100,000; \$1 par.

Property: 2-year bond and lease on the Idaho group of 3 claims, on Pine Creek, owned by Chas. McKinnis. Developed through the Nabob tunnel, the owners having a perpetual right to use this tunnel for development and operating purposes. Ore contains lead, silver, copper and zinc.

IDAHO AND LOS ANGELES M. & M. CO.

IDAHO

Address: A. J. Dunn, Wallace, Idaho.

Cap. \$1,000,000; \$1 par; assessable; last assessment, of 2 mills levied Sept. 15, 1920.

Property: 14 claims, 7 patented, in Beaver and Placer Center districts, Shoshone county, said to show a well defined vein containing lead-silver-zinc ore. Developed by 1,700' tunnel with various crosscuts, and drifts, working in 1920.

IDAHO METALS CO.

IDAHO

Address: L. R. Eccles, Eccles Bldg., Ogden, Utah. Mine office: Mackay, Custer Co., Idaho; J. Ray Webber, supt.

Officers: L. R. Eccles, pres.; Ralph E. Bristol, v. p.; H. D. Campbell, sec.-treas., with R. B. Porter, C. A. Boyd and H. V. Jenkins, mgr., directors. Inc. October, 1921, in Idaho to succeed Empire Copper Co., described in Vol. XIV. Cap. \$1,200,000; par \$1; all outstanding.

Dividends: by former company: 23% in 1913; none in 1914; 18% in 1915; 17% in 1916; 20% in 1917; and 10% in 1918; a total of \$880,000.

Property: the White Knob Copper Mine, 3 miles south of Mackay on the Salmon River branch of the Oregon Short Line, with 39 claims, 18 patented, 700 acres, also mill and smelter sites of 480 acres, and a railroad right-of-way, in the Alder Creek district, Custer county.

Geology: property carries a great number of lenticular contact replacements, in quartz porphyry and granite porphyry. The property is remarkable for its peculiar ore deposits, varying greatly in size and shape, occurring in the metamorphosed garnetized margin of contact, garnetization existing in some instances for fully six hundred feet from the contact. The geology has been carefully studied and is described by Kemp in Transactions of A. I. M. E. for 1917, and in Genesis of the Mackay Copper Deposits, by Jos. B. Umphey, Econ. Geol. The ore is largely a cupriferous pyrite with much chrysocolla derived from its alteration. The average assay of the 69,475 tons of ore mined in 1916 was copper, 4.008%; gold, 0.04 oz.; silver, 1.97 oz. per ton.

Development: mine has a glory hole, 125 to 200' wide, but mining is mainly by tunnel. The property is opened by 46 tunnels and 5 shafts, and total workings of about 18 miles. The greatest vertical depth, 1,800' is attained in the 6,000' Cossack tunnel, which opens ore at 900' below the present producing levels. Levels are at 125' intervals and the cost of establishing one level is \$100,000. Only shipping ore is mined, the last nine months of 1919, averaging 5.5% Cu., 2.5 oz. Ag. and \$1 gold per ton. By mid-1920, a new shoot carrying 6% copper ore was opened on 9th level.

Equipment: includes steam driven air-compressors with a capacity of 36 drills, machine-shop, bunk-houses, boarding-house and commissary.

A 3-mile aerial tram of 100 tons an hour capacity, erected in 1918, connects mine with loading station near Mackay, from where connection is made with Blackfoot on the Oregon Short Line R. R. Co., by its 85-mile branch. This tram replaces the company's 36" gauge Empire Railroad, 7¾ miles long, with an 80% reduction in haulage charges.

Smelter at mine is not in operation, ore being shipped to the A. S. & R. Co.'s plant at Garfield, Utah, for treatment.

Production:

Year	Tons	Mined	Lb. Copper	Oz. Gold	Oz. Silver	Value
1920	9,300
1919	12,380
1918	53,484
1917	66,807	\$1,139,110
1916	69,475	4,999,147	2,860	123,253
1915	54,295	4,702,119	3,155	125,135
1914	18,251	2,012,244	962	53,768
1913	34,722	3,565,479	1,812	92,805

Thirty lessees, employing 100 men, are extracting 1,500 tons of 4 to 8% ore per month. Company employs 75 men. Idaho Metals continues to be the principal copper mine of Idaho.

IDAHO MINE DEVELOPMENT CO.**IDAHO**

Address: Robert N. Bell, pres., Clayton, Idaho.

Officers: Robt. N. Bell, pres.; Geo. A. Snow, v. p.; Wm. M. Snow, sec.-treas.

Inc. 1921, in Idaho. **Cap.** \$500,000; \$1 par.

Property: 3 groups of claims, formerly owned by the Clayton M. & Sm. Co., including the Ella, Silver Rule and Red Bird groups, at Clayton, Custer county. The Red Bird mine is the principal property, developed by 1,600' tunnel and shaft to depth of 900'. Ore occurs in well-defined veins, in hard blue limestone, and contains lead-silver-copper-gold. Property is held under a 3-year option to purchase at \$100,000, with a 15% royalty to apply on purchase price.

Equipment: includes 50-ton mill and compressor.

Production: under former owners, mine is said to have yielded \$1,500,000. Reserves estimated at 80,000 tons of milling ore, averaging 10% lead and 8 oz. silver per ton.

IDAHO MINERAL MINING CO.**IDAHO**

Address: Box 326 Spokane, Wash.

Officers: D. W. Cassidy, pres.-treas.; C. E. Adams, v. p.; B. B. Adams, sec.; with C. H. Pugh, M. C. Guilbert, and O. E. Cushing, directors.

Inc. Oct., 1909, in Washington. **Cap.** \$150,000; 10c. par; 1,350,000 issued. Annual meeting 1st Monday in October.

Property: 4 claims, 80 acres, on east side of Lake Pend d'Oreille, Bonner county. Group contains a fissure vein in quartzite, with silver-lead ore having some copper and gold.

Development: by 350 and 600' tunnels, and a total of 2,300' of workings with a maximum back of 350'. A long crosscut tunnel being driven in 1919 will give a back of 550'.

One car of sorted ore shipped in 1918 netted \$48.60 per ton. Total output to date is 2 carloads. Is regarded as a good prospect.

IDAHO MINES LEASING CO.**IDAHO**

Address: Wm. J. Stratton, sec., Gyde-Taylor Bldg., Wallace, Idaho.

Officers: L. L. Sweet, pres.; Jas. Bond, v. p.; J. W. Wimer, treas., with Wm. J. Stratton and Frank Maneglia, directors.

Assessment of 5¢ per share, levied June 27, 1921.

Property: a lease on ground above the No. 3 tunnel of the Black Bear group, belonging to the Federal M. & S. Co., 4½ miles N. W. of Wallace. Ore occurs in a shoot 4' wide and 400' long, containing lead-silver-zinc.

Equipment: includes an 800' aerial tram, 50-ton mill employing crusher, rolls, jigs, and tables.

Operating in 1921 and several carload shipments made to the East Helena smelter.

IDAHO MINES SYNDICATE**IDAHO**

Address: 120 Broadway, New York.

Controls the Unity Gold Mines Co., which see.

IDAHO-MONTANA AMALGAMATED MINING CO.**IDAHO**

Owms the Idaho-Montana mine, near Kalka station on the Great Northern R. R., 7 miles E. of Bonner's Ferry, Bonner county.

Developed by a 400' incline shaft which discloses a 2 to 4' vein in diorite with ore containing lead and silver values associated with iron sulphide, expected to develop copper with depth. Has 50-ton concentrator. A 2,600' tunnel is planned. Considered promising.

IDAHO-NEVADA EXPLORATION CO., LTD.**IDAHO**

Address: Wallace, Idaho.

Officers: M. J. Mahoney, pres.; Jos. Peila, v. p.-gen. mgr.; E. R. Turk,

sec.-treas., with A. B. Livingston and August Holst, directors. W. B. Lively, mgr.; S. L. Shonts, cons. engr. at last report.

Inc. 1914, in Idaho. **Cap.** 1,500,000 shares; shares given to those agreeing to pay an assessment of 1 mill per share every 2 months.

Property: 3 lode claims, the Castle Rock, Smart Alec and Arlington, and a mill site, formerly owned by the Castle Rock Mining Co., about 3 miles S. E. of Wallace on Placer Creek. Ore occurs as chalcopryite in a 4' vein in quartzite. Developed to depth of 250', by crosscut driven to intercept the main vein.

Equipment: includes compressor and hoist. A carload shipment to Tacoma smelter in 1915 said to have assayed .04 oz. gold, 10.89% copper, 10.5% silica, 35.7% iron.

In June, 1919, mine was sold at forced sale for \$60,000, to pay for mortgage and interest amounting to \$73,916. The original owners bid in the property.

IDAHO NORTHERN MINING CO.

IDAHO

Mine address: Oscar Eckman, supt., Murray, Idaho.

Officers: J. A. Sangren, pres.; O. M. Nordquist, v. p.-mgr.; W. M. Kesiter, sec.-treas., with Oscar Nordquist, Fred Williams and A. Engquist, directors.

Inc. in Washington. **Cap.** \$1,500,000; shares \$1 par.

Property: 18 claims, in the Summit mining district, 5 miles from Murray, shows copper, lead, silver and gold ore in 3 well defined veins.

Development: by tunnel being driven 1,600' to reach a depth of 1,000'; in about 400' at end of 1920.

Equipment: includes compressor, drills, etc.

IDAHO QUICKSILVER MINING CO.

IDAHO

Address: Geo. C. Brewer, Boise, Ida.

Property: White Metal group of 7 claims in the Yellow Pine district, Valley county, east of the Fern Quicksilver mine. A gray quartz replacement vein, 4-5' wide contains cinnabar and a little copper carbonate. Little work has been done.

IDAHO-SEATTLE MINING CO.

IDAHO

Mail returned in 1920, marked "gone" from 1604 Hoge Bldg., Seattle, Wash. **Mine office:** Tendoy, Idaho.

Officers: L. E. Eyman, mgr.; F. R. Van Tuyl, F. A. Linforth, and L. R. Margetts, directors.

Inc. Oct. 13, 1915, in Montana. **Cap.** \$100,000; \$1 par. Annual meeting 2nd Monday in January. Gross earnings in 1916 were \$20,000 from dump and mine, and \$7,000 in 1917.

Property: the Copper Queen mine, 3 claims, 2 patented, 60 acres, in Agency creek, 8 miles from Tendoy, Lemhi county. Claims show bornite, chalcopryite, copper glance and quartz in fissure veins dipping at from 45 to 70°. Ore occurs in shoots 20" to 16' thick, said to average 10% copper, ½ oz. gold, 1 oz. silver per ton. One shoot is 500' long. Developed by 1,600' of workings to depth of 300'. Ore is mined by overhead stoping.

Equipment: includes a 20-ton concentrator. No record of shipments since 1918.

IDAHO STANDARD MINES CO.

IDAHO

Address: E. H. McAuly, mgr., Warren, Idaho.

Property: 5 claims in Warren district, Idaho county, showing veins of gold-bearing ore developed by 2,000' tunnel work, etc.

Equipment: includes a mill with crusher, Huntington mill, vanners, boiler and engine. Idle since 1919.

IDAHO TUNGSTEN CO.

IDAHO

Had a 7-year lease on the Ima Cons. M. & M. Co. (which see). No recent returns.

IDORA MINING CO., LTD.**IDAHO**

Absorbed 1918 by **Sunshine Consolidated Mining Co.**, which see. Described in Vol. XIII.

IMA CONSOLIDATED MINING & MILLING CO.**IDAHO**

Inc. 1900, in Idaho.

Property: 18 patented claims near Ima, on Patterson creek, 31 miles S. W. of Landore, Adams county. Tungsten was discovered on this property in 1903, but was not mined until 1911.

Ore: mainly hubnerite with some wolframite, occurs in white quartz fissure veins, 1-10' thick, in a formation of pre-Cambrian sedimentaries, closely resembling silicious schist. The quartz gangue shows lead, zinc and iron sulphides.

Development: aggregates about 2,500' of tunnels and drifts.

Equipment: includes a 50-ton concentrator with flotation unit. Property was worked under a 1-year's lease by the Idaho Tungsten M. Co. and shipped about 12 tons of 60% tungsten concentrates. Under lease to L. A. Jeffs and E. W. Johnson in 1916 and to J. Nolan in 1917. Idle.

IMPERIAL MINING CO.**IDAHO**

Office: Homer G. Brown, gen. mgr.-purch. agt., 710 Hotel St., Wallace, Idaho. Jas Doucette, supt.

Officers: John H. Nordquist, pres.; J. N. Thennes, v. p.; H. G. Brown, sec.; with Eugene R. Day and A. Lohoefer, directors.

Inc. Sept. 12, 1908, in Idaho. **Cap.** \$1,000,000, increased later to \$1,500,000; \$1 par; assessable; 1,486,469 issued. Last assessment of 2½ mills per share levied Nov. 30, 1921. Financial statement for year ended July 1, shows receipts, \$20,233; disbursements, \$19,853; balance on hand, \$380.

Property: 8 patented claims, 159 acres, adjoins the Copper King on the west, 1 mile E. of Burke. Deposit is a fissure vein in Revett and Burke quartzite, carrying silver-bearing lead ore.

Development: totals about 6,000', including diamond drilling and raising to prospect the orebody found in the upper, or 4,200' tunnel, which was not encountered below. Early in 1921, a 110' raise was made at a point 2,600' from the portal of the lower tunnel and a 500' drift run from the top of the raise, which cut several stringers of ore containing 10-13% lead and 2.3 oz. silver.

Equipment: 3-drill electrically-driven compressor, sawmill, etc. Employs 6-8 men.

INDEPENDENCE LEAD MINES CO.**IDAHO**

Address: 511 Hyde Bldg., Spokane, Wash.

Officers: Henry W. Kingsbury, pres.-mgr.; John H. Wourms, v. p.; W. E. Cullen, Jr., sec., Hyde Bldg., Spokane, Wash.; with R. A. Carnochan and C. Van Ordstrand, directors.

Inc. Nov., 1914, in Idaho, as a reorganization of the Independence Gettysburg Mining Co. **Cap.** \$1,500,000; \$1 par; assessable; 1,400,000 shares issued. Assessments of 1c per share levied Feb. 1, 1921 and Oct. 17, 1921. Stock listed on the Spokane Exchange and New York Curb.

Property: 10 patented claims and a ½ interest in the Key Lode claim, in the Coeur d'Alene district, 1 mile from Mullan, on the N. P. R. R. Claims adjoin the Gold Hunter M. Co. holdings to the E. and the You-Like and Morning mines of the Federal M. & S. on the W. Mine shows 3 veins believed to be the extension of the Morning-Evening, You-Like and Midnight orebodies, which have been prontably worked to depth of 2,800' on adjoining properties.

Development: mainly by 4 crosscut tunnels, 200' 400' and 1,800' long. The longest, or No. 4 tunnel, 370' vertically below No. 3 early in 1916 intercepted the You-Like vein, showing 8' of ore assaying 4 oz. silver, 3% lead with some iron sulphide. In 1918 this tunnel was continued north to reach the Morning vein. Mine was formerly owned by F. A. Heinze, and \$50,000

has been spent in exploration. In 1918, it was reported that Harry L. Day had obtained control.

INDEPENDENCE MINING CO.**IDAHO**

Property: in Wood River district acquired by Federal M. & S. Co., for \$300,000.

INDEPENDENCE PLACER CO.**IDAHO**

Address: William Fahe, mgr., Wallace, Idaho.

Property: 300 acres of placer ground near the old camp of Moose City, on the North Fork of the Clearwater river, 55 miles from Rivulet, Mineral county, Montana, on the Missoula branch of the N. P. R. R. There is said to be some good gravel and plenty of water is available.

INDEPENDENT COPPER MINING & MILLING CO.**IDAHO**

Address: Wallace, Idaho.

Officers: John H. Nordquist, pres.-mgr.; Carlton Fox, v. p.; Otto A. Olsson, sec.-treas., with Sig. Torkilson and John A. Hanson, directors.

Inc. 1907, in Idaho. **Cap.** \$1,250,000; \$1 par; issued \$950,000; assessment to date 1½ cts. per share. Special meeting held at the office of the secretary, Oct. 10, 1921.

Property: 3 claims, the Bullpen, San Quentin and Independent Fraction, in the Snowstorm copper belt, 3½ miles N. E. of Mullan in the Hunter district, Shoshone county. Claims show quartzite cut by 4' fissure vein running N. 72° W., with dip 80° S., the vein underground said to be 10' wide and to carry scattered bunches of 2% copper ore.

Development: includes 800' crosscut tunnel, with 300' or more of drifts at a depth of 300' below the outcrop. Property idle 1908 to 1913; later work did not develop ore in commercial amount and the mine has been closed down several years.

INDEPENDENT DEVELOPMENT CO.**IDAHO**

Presumably out of existence. See Vol. XIV.

INLAND EMPIRE MINING & MILLING CO.**IDAHO**

Address: Box 73, Burke, Idaho.

Officers: Mary Madar, pres.; Frank Bath, v. p.; Geo. Clair, sec.; John Madar, treas.

Inc. Feb., 1910, in Washington. **Cap.** \$1,000,000; \$1 par; assessable; 1,000,000 issued.

Property: 11 acres, patented, in Leland district, Shoshone county. Sulphides of lead, silver, zinc, with low gold values occur in a quartz vein 80' wide in Burke quartzite. Selected sample assayed \$59 per ton.

Development: by 225' inclined shaft, tunnels 450' and 500' long, and 1,200' of workings.

Equipment: a 5 h. p. electric hoist, small compressor, 10 h. p. electric pump and partly completed mill. Expended \$15,000 in 1918.

Property idle and company involved in litigation.

INTERNATIONAL MINING & METALS CO.**IDAHO**

Office: C. A. Gray, sec., Empire State Bldg., Spokane, Wash.

Property: embraces the former holdings of the Silver Tip Mining Co., known as the Inland, 140 acres, in the east Coeur d'Alene region, on the Montana side of the divide, 2 miles from the Snowstorm mfn. Also the 11 claims of the Hecla Copper & Silver M. Co., near Chewelah, Washington.

Development: at the Inland, by a 300' tunnel and drifts. An 8' vein, carrying zinc-lead-silver ore, is being developed. At the Hecla, by 75' tunnel and 150' shaft, from which a drift is following a vein of copper-gold-silver ore.

Equipment: each property has steam power, hoists, compressors, etc.

IRON KING MINING & MILLING CO.**IDAHO**

Address: A. P. Reinardt, Wallace, Idaho.

Property: a group of claims W. of Wallace, on which about 3,000' of work was done previous to closing down 3 years ago. Work was reported resumed in 1920.

IRON MASK MINING CO.**IDAHO**

Officers: T. B. Huey, pres.; Leon Demers, v. p.; P. Martin, sec.-treas.; with J. J. Bouchard, and P. J. Bovingertner, directors.

Inc. May, 1908. Cap. \$1,000,000; shares \$1 par; \$500,000 outstanding. Assessment No. 3, of 2 mills per share, levied June, 1913.

Property: 6 claims, well timbered and watered, 3 miles from rail, in St. Joe district, said to show a 10' vein of concentrating ore, with an 18" vein of smelting ore.

Development: by 1,400' main tunnel with back of about 700', and 2,400' of drifting on the vein in the various tunnels. Workings show silver and lead ore of good average grade, with a small percentage of copper.

Equipment: includes gasoline power and necessary mine buildings. Apparently idle.

IRON SPAR COPPER MINING CO.**IDAHO**

Address: A. L. Honeker, Wallace, Idaho.

Officers: Wesley Everett, pres.; A. L. Honeker, v. p.-treas.; G. W. Doherty, sec.; with A. L. Nicholsons, directors.

Inc. May, 1904, in Idaho. Cap. \$1,000,000; \$1 par; assessable.

Property: 6 claims, well timbered and watered, 3 miles from rail, in St. partly in Idaho and partly in Montana, 1½ miles from N. P. R. R. Vein carries gold-silver values in lead-copper ore, encased in quartzite walls.

Development: by 850' tunnel. No equipment on property.

IVANHOE MINING CO.**IDAHO**

Address: C. D. Miller, Wallace, Idaho.

Officers: J. A. Bean, pres.; C. D. Brock, v. p.; C. D. Miller, sec.-treas.; with S. C. Bean, J. H. Foss, and J. H. Nordquist, directors.

Cap. \$1,500,000; \$1 par; an assessment of 1½ mills was levied early in 1918.

Property: 2 claims, the Ivanhoe and Palisades, patented, adjoining the Star group on the S. 3 miles N. W. of Mullan, Shoshone county, shows lead-silver-zinc ore. Mine supposed to have continuation of Morning vein. A crosscut from the Star main tunnel (4,200' long) intersected the main vein at 1,400' vertical depth. Drifting on the ledge for 200' proved it to average 6' in width with 2' of low-grade milling ore. Property has been under development since 1904. Diamond-drilling was suspended early in 1918 on account of litigation between the Federal and Star companies.

I. X. L. GOLD MINING CO., LTD.**IDAHO**

Address: H. W. Dorman, Caldwell, Canyon county, Idaho.

Inc. in Idaho. Cap. \$200,000; \$1 par; all issued.

Officers: Douglas Fleming, pres.; L. S. Diller, sec.; W. H. Kalback, treas.; H. W. Dorman, mgr.

Property: 120 claims in the Westview district, Boise county, near Pearl. Deposit is a 4' contact vein between granite and porphyry, carrying sulphides of lead and silver with some gold.

Development: by 3,000' tunnel giving a back of 550'. Idle for several years.

I. X. L. GROUP**IDAHO**

See Idaho Copper Mng. & Sm. Corp.

JACK WAITE EXTENSION MINING CO.**IDAHO**

Address: J. T. Ellarson, sec., Murray, Idaho.

Officers: Chas. McElroy, pres.; M. Schuelman, v. p.; J. T. Ellarson, sec.; Theo. Bedard, mgr. and director. John T. Pollock, supt.

Inc. in Idaho. Cap. \$1,000,000; \$1 par; 823,000 issued. Annual meeting first Monday in July.

Property: 53 claims on Big Beaver Creek, adjoining the Jack Waite, on the E. 9 miles from Whitepine, on the N. P. R. R.; 3 claims are in Idaho, balance on Montana side of the divide, in Sanders county, reported to carry the extension of the Jack Waite veins.

Geology: fissure vein 6-12' wide cuts slate and granite.

Development: by crosscut tunnel on Idaho side, which will cut 2 veins, one at 650', a second at 1,000' from portal, claimed to be 6' wide and to carry gold-silver values.

Equipment: includes a 12-h. p. gasoline engine and compressor.

JACK WAITE MINING CO., LTD.

IDAHO

Address: P. O. Box 2173, Spokane, Wash. **Mine address:** Union, Shoshone county, Idaho.

Officers: E. Winsby, pres.; Robert Shuffuls, v. p.; C. E. Chamberlain, sec.-treas.; C. I. Grimsloe, supt.

Inc. Nov. 26, 1909, in Idaho. **Cap.** \$1,500,000 \$1 par; assessable; 1c assessments. Stock listed on Spokane Exchange.

Property: 3 patented claims on Tributary creek, 13 miles from rail at Prichard, said to show a vein in slate dipping 60° S. W. and pitching N. 70° W. Orebody is said to be 300' by 10' and average of ore from 8 to 15% lead.

Development: totals 5,000' including 2 tunnels, 1,400' and 2,900' long, respectively. The greatest depth of workings, is 1,300'. Plans to erect 100-ton mill.

Production: irregular but important. Shipments made in 1919-'20 reported to have averaged 55% lead. Is a small, but well known producer.

JIM BLAINE SILVER SYNDICATE, LTD.

IDAHO

Address: P. O. Box 2173, Spokane, Wash. **Mine address.** Union, Shoshone county, Idaho. Harry Morrell, mgr.

Officers: M. Baumgartner, pres.; R. L. Brainard, v. p.; W. L. Niehorster, sec.-treas.; with Charles Lafavre and John Jahde, directors.

Inc. 1920 in Washington.

Property: 27 claims on Pine Creek, near the new Nabob mill, Shoshone county, including the Bristol and Chesapeake groups acquired in 1920. Ore carries silver and lead.

Development: by 500' tunnel. A new 1,500' tunnel is being driven to reach a depth of 650' on the Bristol vein, also to prospect several other veins.

JUMBO MINING CO.

IDAHO

No recent returns. Listed in Volume XIV.

KELLOGG GALENA MINING CO.

IDAHO

Idle Office: Old National Bank Bldg., Spokane, Wash.

Officers: C. C. McEachran, pres.; S. A. McCoy, v. p.; H. F. Aldrich, sec.-treas.; with Charles Lafavre and John Jahde, directors. Harry Morrell, mgr.

Inc. 1915, in Washington. **Cap.** \$1,500,000; 10c par; 1,260,000 issued. Annual meeting second Tuesday in February.

Property: 2 groups, each of 7 claims, one 3 miles N. W., the other 2 miles S. E. of Kellogg, adjoining the Bunker Hill & Sullivan. Deposit is quartzite with iron carbonate and small values in silver and lead. opened by a 700' tunnel.

KELLOGG SUNNYSIDE MINING CO.

IDAHO

Absorbed by Kellogg United Mines Co., which see.

KELLOGG UNITED MINES CO.

IDAHO

Address: Old Nat'l Bank Bldg., Spokane, Wash.

Officers: S. A. McCoy, pres.; J. A. McEachran, sec.; G. W. Sommer, treas., with Theo. Brown, directors. H. M. Thronson, mill supt.

Cap. \$500,000; shares 25c par. Is a consolidation of the Kellogg-Sunnyside Mining, Brown Leasing, and Coeur d'Alene Atlas Mining companies.

Property: a lease on Corrigan group, 38 claims, Pine Creek district, Shoshone county, said to have 40,000 tons of lead-zinc-silver ore. Early in 1921, the Savage & Gordon leases on old workings of the Bunker Hill & Sullivan were purchased.

Development: by tunnels and shafts (the Corrigan is 800' deep); workings aggregating over 5,000'.

Equipment: includes a 50-ton flotation mill.

KENNAN MINING CO.**IDAHO****Address:** A. B. Ward, supt., Wallace, Idaho.

Officers: Robt. Scott Ord, pres.-treas., Empire State Bldg., Spokane, Wash., Chester J. Kennan, v. p.-sec.-mgr. and E. J. Roberts, directors.
Inc. 1917, in Idaho. **Cap.** \$250,000; shares \$1 par. Annual meeting, June 23rd.

Property: about 1,250 acres on Pony creek, between Wallace and Murray, Shoshone county. Management reports having 6 gold veins, a tungsten vein and 8 silver-lead-veins; latter having aggregate length of 8 miles. Late in 1920, a 5' vein was cut carrying high tungsten content and \$5 gold per ton.

KENT PLACER GOLD MINING CO.**IDAHO**

Presumably out of business. Described in Vol. XIV.

KEYSTONE MINES CORPORATION**IDAHO**

Liquidated 1918, stockholders receiving 13 $\frac{1}{2}$ c per share for their holdings. Property sold to **Armstead Mines Corporation**.

KILL BUCK MINING CO., LTD.**IDAHO**

Described in Volume XIV. Company consolidated in 1921 with Chicago-Boston Mining Co., as **Galena Mng. Co.**, which see.

KIMMEL MINING CO.**IDAHO****Address:** Marcus F. Whitman, mgr., Leadore, Idaho.

Officers: F. O. McFall, pres., W. L. Eckley, treas.; J. Williams, sec., Pocatello, Ida.

Stock offered at 10c., February, 1920, and quoted at 2c bid, 3c asked, September, 1920.

Property: 25 claims, 500 acres, includes the Kimmel lead-silver mine near Leadore, Lemhi county. A crosscut tunnel in 1920 opened a wide vein in quartz-porphry, said to carry 6 to 15% lead and 3 to 7 oz. silver per ton.

Development: by 3,400' of tunnel, raises and shafts.

KING DAVID CO.**IDAHO****Address:** 446 Peyton Bldg., Spokane, Wash. **Mine office:** Neva, Idaho.

Officers: A. R. Immisch, pres.; F. C. Dolke, v. p.; P. A. Hughes, sec.; L. A. Smith, treas., with J. A. Brown and T. W. K. Whittan, directors.

Inc. Aug. 27, 1915, in Washington. **Cap.** \$1,500,000; \$1 par; 1,150,000 issued.

Property: 6 claims in Ruby Creek district, Clearwater county, said to show contact veins in trachyte and metamorphic granite with vertical streaks, 1 to 4", carrying 45 to 63% zinc, with some lead and silver.

Development: 165' shaft with 135' drift on vein, and several crosscuts.

Equipment: includes steam hoist, compressor, pump, etc. A prospect.

KIRKHAM GROUP**IDAHO****Address:** H. L. Kirkham, owner, White Bird, Idaho county, Idaho.

Property: 6 claims, 61 acres, in Camp Howard district, Idaho county, containing a contact vein in granite and diorite. Ore contains copper sulphides carrying gold and silver and is said to assay \$25 per ton.

Development: by 60' tunnel.

LACLEDE MINING CO.**IDAHO****Address:** care Eugene R. Day, Burke, Idaho.

Cap. \$1,000,000; \$1 par; increased, 1916, to \$1,500,000; all issued; assessable at the rate of 3 mills every 3 months.

Property: lies between the Callahan zinc-lead and Tamarack & Custer mines in the Coeur d'Alene district, Shoshone county.

Development: consists of 300' crosscut tunnel and a winze down 300' below the tunnel level, 600' vertically below the apex of the vein, with levels run each way every 100'. Ore occurs irregularly.

The Day interests secured control, June, 1917, by purchase of 400,000 shares at 9c each. No recent information.

LAKEVIEW SILVER MINES CO.**IDAHO**

C. G. Fennell, pres., St. Louis, Mo.; T. C. Cunningham, supt., Lakeview, Idaho.

Inc. 1919, in Idaho. **Cap.** \$1,000,000; \$1 par.

Property: the Conjecture mine, 4½ miles E. of Lakeview, Bonner county, formerly owned by the **Pittsburg M. Co.**; also the Spider, Rainbow and Comet groups.

Development: by 2,000' tunnel and 230' shaft, said to have blocked out 40,000 tons of ore containing argentiferous galena, blende, and pyrite. In the Spider claims there is a shoot 200' long and 4' wide; an orebody in the Conjecture claim is 600' long and 5' wide. There is over 3,000' of development on the vein.

A 100-ton concentrating plant was to be finished during 1921. Hydroelectric power will be developed and transmitted 3 miles to the mine.

LAKINA COPPER CO.**IDAHO-WASHINGTON**

Officers: E. A. Patrick, pres.-mgr.; T. E. Coleman, v. p.; Luther Haynes, sec.-treas.; with E. E. Younge, Charles Zeige, V. C. Hill, and J. S. Ross, directors.

Cap. \$3,000,000; shares \$1 par; 2,175,000 outstanding.

Property: 2 claims, 40 acres, in Deadwood mining district, 3 miles N. E. of Lowman, Boise county, Idaho; and 4 claims, about 25 miles N. of Twisp, Okanogan county, Wash. The Idaho property has free-milling ore, 30' wide, traversing granite-porphry and giving assays of from \$48 to \$76 per ton. Both properties inactive.

Company also owns 750,000 shares in **Lakina Kennecott Mining Co.**

LATAH COPPER MINING CO., LTD.**IDAHO**

Potlatch, Latah county, Idaho. Idle since 1907. See Vol. XI. Copper Handbook.

LATEST OUT MINING & SMELTING CO.**IDAHO**

Address: Gilmore, Lemhi county, Idaho.

Officers: Ralph Nichols, pres.; D. L. Nichols, v. p.-sec.-mgr.; F. A. Nichols, treas., with A. C. Cherry and F. B. Watson, directors.

Inc. June 1, 1910, in Idaho. **Cap.** \$500,000; \$1 par.

Revenue from ore sales in 1918 was \$163,293, and operating expenses were \$151,331. **Dividends:** \$10,000 paid in 1918.

Property: the Latest Out mine, 1 and a fraction patented claims, at Gilmore. Mine is a lead-silver-gold producer. (See full description by Nichols in Trans. Am. Inst. M. E. Vol. XLVI, pp. 937-9, 'Lead-Silver Mines of Gilmore').

Geology: fissure veins that cut limestone beds at right angles contain ore shoots of limonite and hematite replaced by lead ore. Sulphides appear to decrease with depth. Ore reported to average 25% lead, 25% silica, 15% iron, 0.5% sulphur, 10 oz. silver and 0.03 oz. gold per ton. Ore-shoots are upwards of 1' wide, and have a southerly rake.

Development: by 900' shaft, and total of 16,000' of workings. Reserves: 20,000 tons blocked out with an equal quantity of possible ore. In December, 1919, a good orebody was being mined on the 600' level.

Equipment: includes a 40-h. p. gasoline hoist and 750' gravity tram. Fire destroyed the engine room, part of the tram, and bunkhouse late in 1920, causing a suspension of operations.

Production: \$163,293 of ore shipped in 1918, and about the same in 1919 and 1920, total over \$1,000,000 to date. Average grade was \$22.50 per ton.

Apparently a good mine.

LAWRENCE MINING & MILLING CO., LTD.**IDAHO**

Address: Chas. A. Button, sec.-treas., Uniontown, Wash. Mine office: Clark Fork, Idaho.

Officers: August Loding, pres.; O. A. Turnbow, v. p., with Dr. W. A. Borg, and Louis Desirgues, directors. C. L. Wixstrom, mgr., P. O. Box 1694, Spokane, Wash.

Cap. \$75,000; 5c par; 1,433,862½ shares outstanding.

Property: 9 claims, 1½ miles from Clark Fork, Bonner county, said to carry gold-silver-copper-lead ore in fissure veins 2" to 9' thick.

Development: by 817' tunnel, with about 1,100' of crosscutting and drifts and a 110' incline shaft.

Equipment: 60-ton concentrator, pump, and compressor. Concentrates assay 75% lead and 17 oz. silver per ton. Total net receipts are over \$55,000 to date.

Operations are to be resumed early in 1922.

LEAD CRYSTALS MINING CO. IDAHO

Address: L. L. Leighty, sec.-treas., 406 River St., Wallace, Idaho.

Officers: J. E. Steen, pres.; Frank Fisher, v. p.; with G. S. Leshler, Otis Fisher, Roy Steen, L. L. Leighty and John Anderson, directors.

Property: 12 claims on Eagle creek, 7½ miles from Eagle or Waite station on the O. W. R. & N. Ore contains lead, zinc and silver values.

Development: by 3 tunnels, longest 1,100'.

LEAD KING MINING CO. IDAHO

Merged August, 1917, into Eclipse Mining Co., which see.

LEESBURG GOLD DUST MINING CO. IDAHO

Office: 420 Constitution Bldg., Salt City, Utah. O. E. Kirkpatrick, gen.-mgr.

Officers: D. H. Wenger, pres.; W. C. Burton, v. p.; W. S. Burton, sec.-treas.; with E. W. Stifel and T. H. Pollick, directors.

Cap. \$1,500,000; \$1 par; 1,096,705 issued.

Property: 4 claims, 2 patented, at Leesburg, Lemhi county. Deposit is a contact vein between granite and quartzite, containing ore said to average \$7.50 per ton in gold and silver.

Development: by 150' shaft and tunnel, with 1,000' total workings.

Equipment: includes steam plant and a 10-stamp mill and cyanide plant completed in August, 1921. Developing for several years.

LEESBURG MINING & POWER CO. IDAHO

Address: M. H. Phillips, supt., Mackinaw, via Leesburg, Lemhi county, Idaho.

Cap. \$1,000,000; \$1 par.

Property: 29 claims in Mackinaw district, carrying veins of gold and silver ore.

Development: by 165' and 200' shafts with over 2,500' of workings.

Equipment: hydro-electric plant, hoist, 40-stamp mill, sawmill, etc. Production reported to total \$125,000 up to 1915. No recent returns.

LEMHI GOLD MINING CO. IDAHO

Formerly operated the property of the Virginia Cons. Mining Co., near Baker, Lemhi county, which is now worked by the Mines Developing & Leasing Co., which see.

LEROY GOLD & COPPER MNG. CO. IDAHO

Described in Volume XIV. Succeeded by Leroy Mining Co., which see.

LEROY MINING CO. IDAHO

Office: Wallace, Idaho.

Officers: G. F. Damm, pres.; C. E. Clark, sec.-treas., with Wm. Fissenger, Chas. Bollinger, and Mrs. Grace M. Hall, directors.

Inc. 1920, as successor of Leroy Gold & Copper Mng. Co. **Cap.** \$1,000,000; par \$1; assessable; 3 mills per share levied November, 1921. Annual meeting second Tuesday in August.

Property: 6 claims at Adair, on Milwaukee River, adjoins the Monitor mine, whose tunnel runs through the property. Ores carry gold and copper.

LESLIE COPPER CO. IDAHO

Described in Volume XIV. Company consolidated in 1921 with Amazon-Dixie Mining Co. and stock exchanged share for share.

LEWIS & CLARK MINING CO.**IDAHO****Address:** J. Wm. Grismer, pres., Mullan, Shoshone county, Idaho.**Inc.** 1907, in Idaho. **Cap.** \$1,250,000; \$1 par.**Property:** 9 claims. N. E. of the Snowstorm. has surface showing of red hematite, with silver and copper.**Development:** consists of 120' tunnel and 500' of workings. Management was trying to raise funds for further development in 1917, but no information since.**LIBERTY BELL GROUP****IDAHO****Address:** E. M. Griffith, owner, Grangeville, Idaho county, Idaho.**Property:** 3 claims in Buffalo Hump district, which contain 2 veins 20 to 35' wide. One vein has a shoot showing 5' of rich gold ore carrying some galena and petzite (a telluride of gold and silver).**Development:** by 400' tunnel, and considerable surface work.

Reported that \$7,000 was spent on property during 1918, but litigation resulting from the discovery of such rich ore on the surface, stopped further development.

LINFOR COPPER CO.**IDAHO**

Successor of the Horst Powell C. Mng. Co.

Bankrupt and property sold. Fully described in Vol. XIV.

LISTON MINING CO., LTD.**IDAHO****Address:** Matt Baumgartner, pres., 323 Lindelle Bldg., Spokane, Wash.**Cap.** \$1,500,000; \$1 par.**Property:** 17 patented and 19 unpatented claims in Big Creek district, east of Wardner, Shoshone county.**Development:** by tunnels, 1,100' and 2,300' long, which expose fissure veins containing galena and copper sulphide ore.**Equipment:** includes steam power, 3-drill compressor, drills, shops and suitable dwellings.

Worked in 1918 and 1919.

LITTLE NORTH FORK COPPER M. & M. CO., LTD.**IDAHO****Address:** C. E. Metzgar, sec. Kellogg, Idaho.**Inc.** Sept., 1903 in Idaho. **Cap.** \$1,500,000; shares \$1 par; assessable; 2 mills per share levied April 18, 1921.**Property:** the Handspike mine, 10 claims, on Little Copper creek, near Little North Fork, 12 miles from rail, in Kootenai county.**Development:** by the 2,320' No. 1 upper tunnel, showing ore assaying up to 28.8% copper, 1 oz. silver and \$1.20 gold per ton, and the No. 2 lower tunnel of 1,500' showing a 12 to 18" paystreak of argentiferous copper ore that averages \$8 to \$30 per ton. Property claimed to have \$200,000 worth of copper ore blocked out.**LITTLE PITTSBURG MINE****IDAHO****Address:** G. A. Smith, Kellogg, Idaho.**Property:** 2 unpatented claims on Denver creek, 1½ miles from the East Fork of Pine creek. Ore carries zinc, lead, and some copper.**Development:** by a 500' and 150' tunnel, 1,000' apart.**Equipment:** includes a 150-ton mill.**LOG CABIN MINING & MILLING CO.****IDAHO****Address:** W. H. Hanson, sec., Gyde-Taylor Bldg., Wallace, Idaho.

Last assessment of 2 mills per share levied Sept. 29, 1920.

Annual assessment work only being done.

LOMBARDY MINING & MILLING CO.**IDAHO****Address:** H. J. Rossi, Wallace, Idaho.**Officers:** Peter Albinola, pres. and gen. mgr.; Ed. Albinola, v. p.; Herman J. Rossi, sec.-treas.; Robert Albinola, asst. sec.; H. O. Beemis, mgr.**Inc.** 1898, in Idaho. **Cap.** \$1,000,000; shares \$1 par. Annual meeting fourth Thursday in April. Last assessment payable July 26, 1920.**Property:** 15 claims, patented, N. of Kellogg. A bedded vein estimated to average 27' wide with shale foot and quartzite hanging wall be-

been traced for 800'. Ore is said to carry some copper, and up to 47% lead and 33 oz. silver per ton.

Development: by tunnels of 360' and 900', and 200' shaft, with about 2,000' of workings. Management planned to crosscut at 200' and drift on the orebody cut on tunnel level.

Equipment: includes 85-h. p. electric motor operating hoist and drills. Only assessment work being done at last accounts.

LOOKOUT MOUNTAIN M. & M. CO.

IDAHO

Office: R. L. Brainard, Kellogg, Idaho.

Officers: R. L. Brainard, pres.; Wm. Boro, v. p.; W. L. Penny, sec-treas.; with Thomas Hackett and William Hallead, directors.

Inc. 1916. **Cap.** \$375,000; 25c. par; assessable. One mill per share levied Sept. 1, 1921.

Property: 13 claims and 2 fractions, about 250 acres, in the Pine Creek district of the Coeur d'Alene, said to show three veins in quartzite carrying lead-silver values.

Development: by 2 tunnels, the lower one 500' long, being extended to cut the vein about 150' ahead. Management hopes to cut the downward extension of the 3 veins encountered in upper tunnel, which are reported to average 14" in width and to carry 37.5% lead and 10 oz. silver.

Equipment: includes an oil engine, compressor, etc.

LOST CABIN MINING CO.

IDAHO

Probably dead. Described in Vol. XIV.

LOST PACKER MINING CO.

IDAHO

Office: John P. Boyle, mgr., c/o Secretary, American Mining Congress, Salt Lake City, Utah. **Mine works office:** Ivers, Custer county, Idaho.

Reported October, 1921, that company had sold its property to the Bingham Galena Mining Co. of Salt Lake City, a George Graham Rice affair.

Inc. 1903, in Utah. **Cap.** \$150,000; shares \$1 par; changed 1916 to 600,000 shares, 25c par; assessable. Stockholders privileged to purchase new shares at ratio of 3 for each old share held. Dividend of 25c a share, paid October, 1913. Stock listed on Salt Lake City Exchange.

The Packer Co. was incorporated June 1917, as a holding company to take over 80% or more of the Lost Packer Mng. Co. stock.

Property: 34 claims, 4 patented, in the Loon Creek district, 112 miles west of Mackay the nearest rail point. The mine and smelter are in the mountains 7,100' above sea-level, but an auto road runs to the mine. Claims said to show a number of iron outcrops covering two contacts, two miles apart, one a limestone diorite contact, the other between limestone and quartzite. These outcrops are of favorable character.

Development: by tunnels. No 1 having a back of 450', No. 2 a back of 700', and No. 9 a back of 870', latter showing rich ore, and to have a back of 2,000', ultimately. Tunnels show vein to be 2 to 7' wide, with maximum width of 15 to 18', carrying ore said to average 9 to 16% copper, and 2-8 oz. gold per ton, with a paystreak of 2' to 5' width, proven to average about 2' for a distance of 500', and depth of 400'. Mine is developed to 1,000' level with 3' of \$15 ore in winze below it. See U. S. Geological Survey Bull. 530 G.

Company at one time employed 80 men at the mines and 400 horses were required to handle supplies and output.

Equipment: about \$225,000 has been expended on surface improvements and equipment, including the smelter, but excluding the 50-ton oil flotation concentrator. The property has water power, with an electric light plant, assay office and necessary mine buildings.

The smelter has a 100-ton water-jacket blast furnace, making matte of about 45% copper, 25 oz. silver and 8 to 10 oz. gold per ton, with slugs running only about 0.2% copper. The smelter ran 243½ days in the summer of

1913, smelting 1,800 tons of ore and producing 380 tons of matte. Total production to end of 1915 was \$800,000. Management estimated 20,000 tons of ore in old stopes and expected to net \$4.97 per crude ton.

Mine idle during past 3 years, due to remote location and economic conditions.

LOST PACKER MINING & SMELTING CO. IDAHO

Cap. \$3,000,000; \$5 par, Inc. 1907 in Wyoming, as a holding company, to gradually acquire the outstanding stock of the Lost Packer and other mining companies.

LUCKY BOY GOLD MINING CO. IDAHO

Office: Empire Bldg., Boise. Mine office: Idaho City, Idaho.

Officers: Thos Brown, pres.; E. W. Barry, v. p.; Fred V. Tinker, mgr., with R. E. Highnote, F. E. Johnesse and John G. Huber, directors T. E. Rippey, sec.-treas.

Inc. Sept. 30, 1914, in Idaho. Cap. \$500,000; shares \$1 par; 320,000 shares outstanding. Annual meeting second Tuesday in January.

Property: 7 claims, 120 acres, in Gambrius mining district, 6 miles N. E. of Idaho City, Boise county, said to show a shear zone, 3-40' wide, of granite porphyry, carrying some quartz streaks and considerable soft talc. The orebody runs E.-W. and dips about 60°. Ore is free gold.

Development: by 300' shaft and 840' tunnel to depth of 360', with 2,100' of drifts and crosscuts.

Ore reserves: estimated Feb., 1916, 130,000 tons of ore.

Equipment: includes 12"x14" compressor, electric power, 100 h. p. crude oil engine direct connected to 55 k. w. electric generator, 100-ton Marathon mill and electric hoist.

Property: credited with production of \$130,000 under former owners. Present management competent and property considered promising.

LUCKY BOY MINING & CONCENTRATING CO., LTD. IDAHO

Consolidated in 1920 with Silver Star Mng. Co., Ltd.

Address: Mullan, Shoshone county, Idaho.

Officers: M. D. Needham, pres.-mgr.; John Kammerer, v. p.; Walker Richardson, sec.-treas.

Inc. Jan., 1907, in Idaho Cap. \$1,000,000; \$1 par; assessable, 700,000 issued. Assessment of 3 mills per share levied Aug. 10, 1921.

Property: 17 unpatented claims, 280 acres, 3½ miles E. of Mullan, 1 mile up Gentle Annie gulch. Quartz vein cuts through shale, and carries ore said to average \$2 gold, 2% lead, 1 oz. silver, and 3% zinc.

Development: by 250' tunnel. Work was started through the Silver Star company's tunnel, and by March, 1919, the face was in 1,700', attaining a depth of 500'. A prospect.

LUCKY CALUMET COPPER MINING CO., LTD. IDAHO

Office: Eagle Block, Wallace, Idaho. Mine office: Mullan, Shoshone county, Idaho.

Officers: John H. Nordquist, pres.-gen mgr.; Chas. H. Solberg, v. p.; Otto A. Olsson, sec.-treas.; with A. J. Olsson, directors. Al. J. Grills, supt.

Inc. Oct., 1906, in Idaho. Cap. \$1,500,000; shares \$1 par; assessable. Last assessment reported was 5 mills per share, levied in 1914.

Property: 10 claims, patented, 181 acres, on Snowstorm hill, between the Independent and Snowstorm mines, and about 5 miles N. E. of Mullan. Property shows 2 fissure veins of 10 to 50' width in quartzite.

Development: by 3 tunnels. The upper one, of 1,700' length, has a quarter-mile of drifts and crosscuts, which develop what is supposed to be the extension of the Snowstorm vein, showing low-grade ore carrying disseminated carbonates and bornite of 2 to 3% estimated copper tenor. The lower tunnel, a crosscut from the head of Gentle Annie gulch, is 3,600' long, and has opened up a good body of ore, presumably the National at depth of 1,200'.

Equipment: includes electric power, with 2 motors, and a 5-drill air-

compressor. Property is worked intermittently with proceeds of annual assessments, but information is hard to obtain from this as well as all other Nordquist companies.

LUCKY FOUR MINING CO.**IDAHO**

Office: corner E. 73rd and E. Gilson Sts., Portland, Oregon.

Officers: Chas. Hyle, pres.; Henry Wingert, sec.-treas.

Cap. \$50,000; 5c par; \$29,285 issued.

Property: lode and one placer claim in Summit mining district, Shoshone county, containing lead, silver, and zinc ore. Probably idle.

Company pronounced delinquent, Jan., 1920 by Secretary of State of Idaho, for failure to file 1919 corporate statement a common fault among the many lesser companies of this state and others.

LUCKY FRIDAY MINING CO.**IDAHO**

Address: Wallace, Idaho. Is a reorganization (1914) of the Lucky Friday Mines Co.

Officers: Franklin Pfirman, pres.; Jas. A. Wayne, sec.; J. H. Wade, mgr.

Cap. \$1,500,000; shares \$1 par; assessable; 170,000 shares in treasury.

Property: 4 claims at Mullan, Shoshone county, adjoining the Hunter mine on the south.

Development: by 90' shaft, 625' upper crosscut tunnel and 800' lower crosscut tunnel, developing a 10' vein with 4' paystreak giving assays up to 3.5% copper, 29% lead and 89 oz. silver per ton.

Equipment: includes electric drilling plant.

Presumably idle.

LUCKY STONE MINING CO.**IDAHO**

Address: G. H. Walters, sec., Wallace, Idaho.

Cap. \$1,000,000; \$1 par; assessable.

Property: 14 claims near Osborne, Shoshone county, Idaho, and 7 claims in Granite county, Montana. The former carries gray copper and silver-lead ore.

Development: by 1,000' of tunnel work in the Idaho group in which 12 to 14" of \$100 ore was disclosed in the summer of 1919. In the Montana property two veins have been exposed by over 600' of drift tunneling.

The claims have been surveyed for patent and development work resumed June, 1921.

LUCKY SWEDE GOLD & COPPER MINING CO.**IDAHO**

Out of business. Described in Vol. XIV. Succeeded by Pearson Mng. Co., which see.

MACEDONIA MINING CO.**IDAHO**

Address: A. M. Mundell, Wallace, Idaho.

Officers: A. M. Mundell, pres.; A. D. Burrow, v. p.; Chas. A. Keating, sec.-treas., with Adolph Haupt and W. H. Hanson, directors.

Inc. 1921, in Idaho. Cap. \$150,000; 10c. par.

Property: 23 claims, on Slate creek, said to contain three well-defined veins carrying silver-lead-copper.

A prospect.

MAGNET MINING & MILLING CO.**IDAHO**

Address: J. C. Brandon, 424 Dooly Bl., Salt Lake City.

Inc. 1921, in Idaho. Cap. 1,200,000 shares; 10c. par; assessable. Assessment levied, Dec. 9, 1921.

Property: 4 claims, 80 acres, includes the Hidden Treasure mine in Little Smoky district, 22 miles from Fairfield, Camas county. Ore said to average 15-20% lead, 10 oz. silver and 0.2 oz. gold.

Development: by 1,100' of tunnels. Equipped with 100-ton concentrator.

MAINE-STANDARD MINING CO.**IDAHO**

Address: 6 P. O. Bldg., Wallace, Idaho.

Officers: Alexander Murphy, pres.-mgr.; J. W. Tator, v. p.; E. H. Pattison, sec.-treas.

Cap. \$1,500,000; shares \$1 par; assessable, assessment of one mill per share levied July 20, 1921.

Property: 5 unpatented claims in Yreka district, Coeur d'Alene region, on which \$13,000 has been spent. Apparently idle.

MAJESTIC MINING CO., LTD.

IDAHO

Address: Therrett Towles, sec.-treas., Gyde-Taylor Bldg., Wallace, Idaho. Jas. Dunne, pres.-mgr., Burke, Idaho.

Cap. \$1,000,000; \$1 par; assessable; assessment of 2½ mills levied Aug. 4, 1921.

Property: 13 patented claims, 1½ miles N. E. of Burke, Shoshone county. Veins with shoots of lead-silver ore have been opened by 1,525' of tunnel work.

Development: by tunnels. A new tunnel to explore 1,600' deeper than the present adit was driven 50' in 1920, and an additional 50' in 1921, opening up a 3' quartz ledge.

MANDARIN MINES CORPORATION

IDAHO

A reorganization, 1914, of the **Yellow Jacket & Gold Mining Co.** Officers at that time were: C. W. Pope, pres., 25 Broad St., New York; D. C. Catlin, v. p., 60 Broadway, New York; with C. E. Pope, H. E. Parker, and John B. Hastings, directors.

Inc. 1914, in Nevada. **Cap.** \$1,000,000; par \$1.

Property: 4 claims, patented and 3 millsites, on Yellow Jacket creek, in Lemhi county, 45 miles S. W. of Salmon City, was a producer until the ore above a large fault was exhausted. Gold ore occurred in a quartz vein. Said to have produced \$600,000 in the past. Mine has been idle for several years.

MARSH MINES CONSOLIDATED

IDAHO

Office: 601 Empire State Bldg., Spokane, Wash. **Mine office:** Wallace, Idaho. W. G. Harris, supt.

Officers: Edward Pohlman, pres.; M. M. Lee, v. p.; Joseph McCarthy, sec.; J. V. Pohlman, treas., with F. Cushing Moore of Spokane, cons. engr. M. W. Lee, Duluth, Minn., trustees.

Is the successor of **Marsh Mining Co.**, which was incorporated 1909 in Washington. Reorganized July, 1916, as the Marsh Mines Consolidated, stock being exchanged share for share. In addition, for each three shares of Marsh, stockholders subscribed for one share of new stock at 15c. a share.

Inc. May, 1916. **Cap.** \$1,500,000, increased to \$2,000,000 at time of reorganization in July, 1916; shares 25c. par; reduced, 1918, to \$500,000, same par value. Annual meeting in March. Stock listed on Spokane Exchange. Assessments, 1911 to Oct., 1918, aggregated \$200,000. A levy of 1 cent was made in Dec., 1920. A 2c. dividend was paid June 20, 1921.

The chief reason given for shutting down the mines in 1916 was that litigation with the Federal Mining & Smelting Co. threatened. The latter company owns mining properties to the south and west of Marsh, and Marsh had been mining orebodies extending under the surface of the Federal ground, at a depth of 900' below the main tunnel level and 1,300' below the surface. This controversy was settled, by agreement, with the Federal Mining & Smelting Co., Marsh getting a 10-years' lease on the Mono, Russell and O'Neil claims of the Tiger-Poorman group, which include the vein in controversy. This agreement provided for a complete settlement of all claims for alleged trespass.

In Nov., 1919, the Russell vein was opened in the Russell claim, under lease from the Federal M. & S. Co., to July 20, 1926. A tunnel driven on this vein showed up to 6' of lead-silver ore at 380'. This vein can also be reached by 1,100' of crosscutting from the main Marsh tunnel. A suit was started against the Hecla Co. for alleged wrongful extraction of ore from the east orebody (see Federal M. & S. Co.) To help prove its contention, the Federal sank a 375' winze on this vein. It also applied to the Court for permission to drive a raise from the Hecla workings; but this was denied.

In Jan. 1921 the Russell tunnel was being extended 700' through the east lines of the claim in order to show whether the vein actually passes through it before the Court will allow the Marsh company to raise 700' from Hecla ground. In November, the Hecla purchased the Russell, Mono and Tiger-Poorman group of claims from the Federal for \$750,000, thus ending that suit. A settlement of apex litigation with the Hecla and Federal companies was made in March, 1921, Marsh company getting \$112,500 cash and valuable concessions including tunnel rights for exploration of the Russell vein and cancellation of the A. S. & R. ore contract. In return the Marsh company relinquished all right to title and interest to that part of the Hecla east orebody apexing within the Russell claim, held by lease from Federal Mng. & Sm. Co.

Property: 7 claims, about 100 acres in O'Neil gulch, N. E. of Burke and adjoining the Tiger-Poorman mines. Claims show simple fissure veins in quartzite. The vein is 2' wide in the upper 175' tunnel averaging 5' on the 5th level. It carries silver-lead ore with zinc in shoots, the orebody thus far developed being 300' long and 4½' wide. The shoot is short, limited by a fault, and must be developed in depth to get tonnage..

Development: includes a main working tunnel and 940' shaft with levels at 399, 550, 687 and 904'. Tunnel cuts the vein at 625' and a drift follows it for 475'. The vein runs north 70° W. and dips 78° S. A rich lead-silver vein was cut, 1917, on the 900' level and produces a small quantity of ore. The shoot is narrow, but promising.

Ore reserves: were estimated at 26,000 tons in 1918, equal to 8 or 10 months' production. Arrangements were under way to deepen shaft to 1,100' and a winze is to follow the shoot found at 900'.

Exploration work on the Got-em-now vein, exposed in the Gertie tunnel, which traverses the Marsh property, is under way. This vein was cut 512' from the portal of the Gertie tunnel and at a depth of 350' to 400' from the surface; ore from this vein can be quickly mined by utilizing the present working shaft of Marsh now 900' deep and splendidly equipped to handle a large output.

Equipment: includes 1,150' Ingersoll-Rand and 690' Franklin compressors, 300-h. p. Nordberg electric hoist, 40-h. p. Lidgerwood and two Ottumwa hoists, Gould and Cameron pumps, Ingersoli, Waugh, and Wod drills, etc., with complete electrical equipment.

Company leases and operates the California or Pittsburg mill in Nine Mile Canyon, 2½ miles from Wallace. Freight on Northern Pacific costs 15c. a ton. This mill, remodeled at cost of \$34,000 in 1915, handles 150 to 225 tons daily, saving 90% of the lead and 85% of the silver. It contains 2 sets of 14"x30" rolls, 7"x10" tube-mill, trommel, 4 Wood screens, 7 new concentrating tables. Pachuca agitator, Callow flotation cells, two 24"x10" Dorr thickeners, etc.

The mill was operated jointly with the Hecla Mining Co., the Marsh Co. treating 200 tons daily for 10 days each month, being under control of the Hecla the rest of the time. This tenancy by Hecla is subject to cancellation on 30 days' notice. Milling was suspended in Feb., 1918, and only a few men were employed on surface exploration during 1919.

Smelting contract with the A. S. & R. Co. runs for a period of 10 years from July, 1916.

Production: in July, 1917, 2,200 tons of ore, yielding 200 tons of concentrate assaying 52 to 58% lead and 22 to 28 oz. silver; also 100 tons of concentrate containing 21% lead, 33% zinc, and 12 oz. silver per ton. Output yielded \$14,000 net.

Net returns from ore shipments have been as follows: 1911, \$30,313; 1912, \$114,648; 1913, \$139,429; 1914, \$81,944; 1915, \$143,640; none in 1916. The Marsh mine and mill were closed down May 15, after operating a little more than 4 months in 1916, and producing 17,828 tons of ore, worth \$139,111, which just balanced expenses.

MASCOT MINING & MILLING CO.**IDAHO****Address:** Pocatello, Idaho. **Mine office:** Hailey, Idaho.**Officers:** Charles Peter, pres. and mgr.; J. M. Stevens, sec.-treas.; A. J. Weber, v. p.-asst. sec.-treas.; Ferd. Walters, A. H. Freber, W. R. Calvert, F. Van Da Linda, R. E. Rosen, and William Jacobson, directors. H. E. Johnson, supt.**Inc.** March 4, 1916, in Idaho. **Cap.** \$1,000,000; \$1 par; 800,000 issued. Annual meeting, first Monday after first Tuesday in October. Operating expenses in 1918 were \$52,000.**Property:** 25 claims, 4 patented, at Peter, near Hailey, in Warm Springs Creek mining district, Blaine county, said to show gold, silver and lead sulphide ore in a vein in limestone-shale formation. Examined by E. R. Zalin-ski, and H. A. Linke.**Development:** by tunnels and over 5,000' of workings. Main workings are on the Silver Fortune claim. A double-track 6x8 ft. tunnel, started in 1919, was driven easterly for 250' and is to be continued northeasterly for 3,000', to a vertical depth of 1,500' below the outcrop. At 180' from the portal, the Oregonian vein is being followed.**Equipment:** air-compressor, oil engine, hydro-electric plant and complete quarters.

Company is well financed and is developing its property thoroughly.

MAYFLOWER MINING & DEVELOPMENT CO.**IDAHO****Address:** John H. Foss, pres., Mullan, Idaho.**Cap.** \$1,250,000; \$1 par; assessable.**Property:** 13 patented claims in Hunter district, Shoshone county, on which over 4,000' of tunnels, etc., have been driven, opening veins with lead-silver ore. After a 5-years' shutdown, some work was done in 1918 and 1919.**McKINLEY GOLD MINES CO.****IDAHO**

Held a property near Idaho City, but is presumably out of business. Described in Volume XIV.

MELCHER MINING & MILLING CO.**IDAHO****Office:** 404 McIntyre Bldg., Salt Lake City, Utah. **Mine office:** Albion, Cassia county, Idaho.**Officers:** Samuel McIntyre, Sr., pres., gen. mgr. and treas.; R. M. Wilkinson, sec. and purch. agt.; P. McIntyre, supt.**Inc.** in Utah. **Cap.** \$50,000; 10c. par.**Property:** 37 claims, including former holdings of the-Cumora Mining Co., bought 1912, in the Stokes district, 38 miles from rail and 12 miles from Albion. Country rock is schist, granite and quartzite, orebodies occurring in fissure veins in both schist and granite. The vein developed runs N. 10° E. and dips 68° west.**Development:** by two shafts and 4 tunnels, one 3,290' long. Shows a 3' quartz vein carrying chalcopryrite and galena and lead carbonates, said to average 5% copper, 4% lead, 5 oz. silver and \$5 gold per ton. A large quantity of ore is said to be available.**Equipment:** includes 200 h. p. steam and water power plant, 5-drill air compressor and 100-ton mill and flotation plant.

In June, 1919, the mill was operating and one shipment of concentrate was made. Company is said to have expended \$200,000 to date.

MERGER MINING CO., LTD.**IDAHO****Address:** E. R. Northrup, sec., Palouse, Wash. Mine under lease to Collingwood Mining Co., until 1926.**Inc.** Oct. 15, 1913, in Washington. **Cap.** \$3,750,000; \$1 par; assessable for annual labor only. Annual meeting April 16.**Property:** the Mizpah mine, 20 claims, 318 acres, well watered and timbered, on Copper mountain, near the Palouse river, in the Hoodoo district, Latah county, almost 40 miles from Palouse. A 20-mile wagon-road runs to Harvard, 10 miles from the Puget Sound railway.**Geology:** the property is covered by quartzite and schist, with fissure

veins on the quartzite-schist contact. The veins run N. E. and dip N. W. The developed orebody is 10 to 40' wide, and contains 3% chalcopyrite and 22% copper glance.

Development: includes 5 tunnels, with about 3,000' of workings reaching depth of 250'. A 30' shaft revealed over 5' of chalcopyrite, assaying 10% copper, early in 1920. Six of the eleven feet of the vein carried 2%.

Equipment: includes 60-h. p. gasoline power, with a 3-drill air-compressor. There are 16 buildngs. A 50-ton mill is to be erected. Milling ore averages 4½% copper.

Production: 2,000 tons of milling grade has been mined, and 170 tons of high-grade ore shipped.

METTA MINING CO.

IDAHO

Probably dead. Fully described in Vol. XIV.

MIDNIGHT MINING CO.

IDAHO

Address: E. L. Kerstetter, sec., 50 Broad St., New York. **Mine office:** care N. C. Sheridan, Gyde-Taylor Block, Wallace, Idaho.

Officers: N. C. Sheridan, pres.-gen. mgr.; E. F. Carlson, v. p.; E. L. Kerstetter, sec.-treas.; M. F. Quinn, gen. mgr.

Inc. July 25, 1919, in Idaho as Solid Mining Co., to which all the assets and liabilities of the Midnight Mng. Co. of Delaware were transferred. A little later the name of the Solid Mining Co., was changed to Midnight Mining Co. **Cap.** \$1,500,000; \$1 par; assessable, 1,345,104 shares issued and owned by **Mines Holding and Operating Corp.** New York Trust Co., registrar; Corporation Trust Co., transfer agent.

Property: Midnight-Bummer patented claims, 21½ acres, on Trapper creek, Pine Creek section, 1½ miles from Mullan; side lines the Morning and You Like claims of Federal M. & S. Co. Deposit is a fissure vein in quartzite, carrying silver-lead ores.

Development: by 1,600' tunnel, the 3,700' of workings reaching a depth of 1,262'. The vein has been opened by a 280' drift and a 1,100' raise to the surface, was being made in 1921.

MIDWAY SUMMIT MINING & MILLING CO., LTD.

IDAHO

Address: W. W. Waltman, sec., 419 Chamber of Commerce Bld., Spokane, Wash.

Inc. 1911, in Idaho. **Cap.** \$1,500,000; \$1 par; assessable.

Property: 11 claims, surveyed for patent, 1 mile S. of Burke, Shoshone county. Ore contains silver-lead.

Development: over 6,000' of work has been done on property, without disclosing ore in commercial quantities, though some rich ore was opened. No recent information.

MILITARY MINING & MILLING CO., LTD.

IDAHO

Address: Geo. K. Penkert, treas., S. 107 Elm St., Spokane, Wash.

Assessment of ½ mill per share levied June 25, 1921.

MINERAL FARM MINING CO.

IDAHO

Offices: Paulsen Bldg., Spokane, and Mullan, Idaho.

Officers: C. J. Carlson, pres. and mgr.; Wm. Sellars, v. p.; C. D. Miller, sec.-treas., with J. H. Pelletier, director.

Inc. 1904, in Idaho. **Cap.** 1,500,000 shares; \$1 par; assessable, outstanding 800,000. Annual meeting, first Monday in September. Listed on Butte Exchange.

Property: 8 claims, 7 patented, 170 acres. 1 mile west of Mullan, Shoshone county, has a fissure vein in Revett and Burke quartzite, on which work was started in 1908.

Development: 3 tunnels, 60', 800' and 1,445' in length, with 3,700' of workings. Probably idle.

MINERAL POINT MINING CO.

IDAHO

Address: Paul Leuschel, sec., 114 Bank St., Wallace, Idaho.

Assessments of 1 mill per share, were levied Dec. 10, 1920 and July 26, 1921.

MINERAL ZONE MINING CO.**IDAHO****Address:** G. L. L. Baskett, supt., Elk City, Idaho.**Property:** known as the Parr group, includes the Mineral Zone gold mine near Elk City.**Development:** is by 2,000' of tunnels, etc. There is a 3-stamp mill which was being worked in 1918. No recent returns secured.**MINES DEVELOPING & LEASING CO.****IDAHO****Address:** W. A. Byers, 207 Atlas Bldg., Salt Lake City, Utah.**Property:** a lease on the holdings of the Virginia Consolidated Gold Mining Co., 7 miles from Baker and 22 from Salmon, Lemhi county, Idaho, 1 mile south of the Montana-Idaho boundary.**Development:** by tunnels and shaft, opening copper-silver gold ore. Formerly held lease on holdings of Lemhi Gold Mng. Co.**MINNIE MOORE MINES CO.****IDAHO****Officers:** I. E. Rockwell, pres., Bellevue, Idaho.**Cap.** \$500,000; shares \$1 par.**Property:** at Bellevue, in the Mineral Hill district, Blaine county, was bouded to Chas. M. Schwab interests, but relinquished by them in 1906 when ore was found to be cut off by complex faulting.

In June, 1912, all the property of the Idaho Cons. Mines Co. was bought at receiver's sale and in 1914 the Mill Site and Onyx lode claims were bought for \$5,000. Some lead and zinc concentrates have been shipped.

Idle, "awaiting intensive prospecting," when funds permit.

MISSOULA COPPER MINING CO.**IDAHO****Address:** Mullan, Shoshone county, Idaho.**Officers:** A. McLeod, pres.; C. A. Barnes, v. p.; J. R. Bean, sec.-treas., with R. J. McLeod, T. M. Brennan, L. Dooling, and H. E. Chaney, directors. **Inc.** 1901, in Idaho. **Cap.** \$100,000; increased 1907, to \$1,500,000; shares \$1 par, assessable; issued, 1,350,000. Shares listed on Spokane and Vancouver Stock Exchanges. Annual meeting, first Monday in November.

Assessment levied in April, 1917, to pay for having examination made of property.

Property: 10 claims, about 175 acres, at the head of Deadman gulch, adjoining the Lucky Calumet, and about 1½ miles N. W. of the Snowstorm, in the Hunter section.**Geology:** property has a wide fissure vein in Revett quartzite, carrying native copper, cuprite, azurite, malachite, bornite and chalcopyrite, with value mainly in sulphides, ranging from about 1% on the hanging, to 8% on the foot-wall, ore averaging about ½ oz. silver per unit of copper. The property also carries some argentiferous galena. Geology described in U. S. G. S. Bull. 540 E., p. 48, 1913.**Development:** consists of a 1,400' upper tunnel and a 2,800' lower tunnel, with a connecting shaft and nearly 1 mile of workings. The main tunnel runs N. 30° E. for 1,900', then N. 70° E. for 700', passing from purple St. Regis slates at the portal into Revett quartzite.

Diamond drilling was done October, 1917.

Equipment: includes a 100-h. p. electric plant, with an 8-drill air compressor and mine buildings.

March 1, 1914, ten of the largest stockholders formed an ironclad pool with 650,000 shares, deposited with Union Trust & Savings Bank of Spokane to March 1, 1916. In April, 1914, a lease and bond was given to Snowstorm M. Co. at \$600,000, said agreement calling for expenditure of \$2,000 for each month the option ran. Snowstorm expended \$36,000, and option was cancelled on Sept. 12, 1915.

Missoula stockholders assert that property contains apex of National vein. The Missoula vein is flat, dipping about 37° S. towards National vein which was struck in long crosscut at vertical depth of 1,400', and is said to show dip similar to Missoula's. It is said that National Co., feared to raise lest it prove apex in Missoula ground. Idle since 1919.

MIZPAH COPPER MINING CO., LTD. IDAHO

Property sold to Merger Mng. Co., which see.

MONITOR CONSOLIDATED COPPER MINING CO. IDAHO

Stockholders sold property to Montana-Idaho Copper Co., 1914, for \$102,000, payable in shares of new company at par, stock exchanged April 17, 1917, and company discontinued. See Mont-Idaho C. Co.

MONTANA-IDAHO COPPER CO. IDAHO

Address; Paulsen Bldg., Spokane, Wash. Mine address: S. P. Burr, supt., Adair, Idaho.

Officers: H. F. DeBower, New York, pres.; J. L. Dirks, Spokane, v. p.; W. J. Kirby, sec.-treas.; with Otis Hill, and G. B. May, directors.

Inc. 1914 to take over holdings of Monitor Cons. C. M. Co. Cap. 6,000 shares; \$100 par, increased to 250,500 shares, \$10 par, in 1920.

Property: 44 claims, 10 patented, $\frac{1}{4}$ to $1\frac{1}{2}$ miles from Adair, on main line of C. M. & St. P. Rv. First copper location in the eastern Coeur d'Alene. A fissure vein of 10 to 30' width, with N. E. strike and nearly vertical dip has a paystreak carrying massive chalcopryite ore, balance of vein carrying disseminated chalcopryite, mainly of concentrating grade. Occasional native copper is found.

Development: by main tunnel 8,600' long. At the 3,865' point a drift driven 3,600' on a vein, had a back of 1,400'. About \$70,000 has been spent on exploration at the Monitor shaft.

Equipment: hydraulic power plant, compressor, drills, etc.

MONTE CRISTO GOLD MINES CO. IDAHO

Address: C. E. Eddy, Bonanza, Custer county, Idaho.

Property: a gold mine 4 miles from the Lost Packer copper mine, which was to "electrify the mining world and make a great new boom for mining in Idaho" in 1918. Examined by Paul Valtinke, who said that "the new quality of ore coming in at 150' depth would commonly be called a telluride, but is in fact a selenide, resulting from super-heated action and volcanic fumes, which deposited the rich gold and silver values and gave the ore a peculiar blue-greyish cast." This is extremely interesting if true.

MONUMENTAL MERCURY MINES CO. IDAHO

Property: a lease on 10 claims in Yellow Pine district of Valley county, 50 miles N. E. of Cascade, adjoining property of the Fern Quicksilver Co.

Geology: brecciated quartzite and brecciated, silicified limestone carry cinnabar as seams and disseminations.

Development: by tunnels.

Equipment: 12 screw-top retorts, each capable of holding 14 lb. of 2% ore, and treating 3 charges, a total of one ton daily.

MOONLIGHT MINING CO. IDAHO

Address: E. Hedin, Wallace, Idaho.

Officers: Eugene R. Day, pres.; Jas. J. Murphy, v. p. and mgr.; E. Hedin, sec.-treas.

Cap. \$1,500,000; shares \$1 par; assessable.

Property: 9 patented claims, adjoining the Hercules mine on the east, in Shoshone county.

Development: the main tunnel through which the property has been worked is an extension of the old Trade Dollar tunnel, 600' below the upper workings and 900' below the outcrop. The vein was cut in 1914 and drifting was started, but vein was found to be cut off by a fault. A crosscut was then started 1,400' back. About 800' of drifting has been done, but little ore has as yet been found. Total workings over 5,000'.

Equipment: water power, compressor, etc., reaching depth of 1,000'. No. recent returns.

MOUNTAIN GIRL MINING CO. IDAHO

Address: A. H. Peabody, treas., 1064 Third Ave., Salt Lake City, Utah. Inc. Nov., 1919, in Idaho. Cap. \$250,000.

Property: claims in Stanley basin, Custer county. Work was started in 1920, and a car of lead ore shipped to the smelter.

MOUNTAIN QUEEN MINING CO. IDAHO

Address: W. M. Keister, sec., Wallace, Idaho.

Last assessment of ½ mill per share, levied Sept. 15, 1920.

MOUNT SULLIVAN MINING CO. IDAHO

John J. Howell, pres.-mgr., Mackay, Ida.

Property: a lease and bond on Geo. W. Stewart group on Alder Creek, near Mackay, Custer county.

Development: by 640' tunnels. Shipments said to have assayed 25% lead and 35 oz. silver per ton.

MOYIE GOLD-COPPER M. & M. CO., LTD. IDAHO

Address: G. E. Crocker, Bonners Ferry, Idaho.

Officers: G. E. Crocker, pres.; A. J. Kent, v. p.; M. P. DeWolf, treas., with H. L. Medbury, directors.

Inc. Sept. 11, 1911, in Idaho. **Cap.** \$1,250,000; \$1 par; assessable; 750,000 issued. Annual meeting first Monday in September.

Property: 12 unpatented claims in Moyie Yakt district, 17 miles from rail; also 5 claims in Moyie Kootenai district, 3 miles from rail, all in Boundary county.

Geology: at the first or Damon group, a gold-bearing quartz vein cuts granite and diorite, the paystreak being 6" to 6½' wide. The second or Queen group has a contact vein in quartzite, that carries gold, silver, lead.

Development: at the Damon group comprises a 35' shaft and 360' tunnel; and at the Queen group a 480' tunnel and open cuts, said to show a 20" vein containing 55 oz. silver and 65% lead.

Properties appear to be worth development.

MULLAN MILLING CO. IDAHO

Address: C. L. Hewitt, mgr., Kellogg, Idaho.

Property: a lease on old tailing dump of Ontario & Silver King mines, in Government Gulch, W. of Kellogg, Shoshone county.

Production: averages 225 tons of silver-lead concentrate per month, with total shipments of about 3,000 tons.

MULLAN MINING CO. IDAHO

Address: L. Leighty, Wallace, Idaho.

Cap. \$50,000; shares 5c par; assessable.

Property: 3 claims in Hunter district, Shoshone county, on which veins show lead-silver ore.

Development: a 1,000' tunnel with 1,200' of drift-work on vein.

MURRAY HILL MINING CO. IDAHO

Out of business. Described in Vol. XIV. Property sold to the Paragon M. Co., which see.

NABOB CONSOLIDATED MINING CO. IDAHO

Subsidiary of Stewart Mining Co., financing Nabob Cons. and Nabob Mining, described in Vol. XII of this book. See **Stewart Mining Co.**

NABOB MINING CO. IDAHO

Absorbed by Nabob Consolidated Mining Co., now a subsidiary of Stewart Mng. Co., which see.

NATIONAL COPPER MINES CO. IDAHO

Office: 926 Chamber of Commerce, Portland, Oregon.

Officers: Wm. Trevor, pres. and mine supt.; Dr. R. J. Marsh, v. p.; Edward H. Hayes, sec.; W. F. Coffey, treas., with Jas. Wolfs and Fred Hagstrom and C. H. Skewes, directors.

Inc. in Oregon. **Cap.** \$3,000,000; \$1 par; non-assessable.

Property: 33 claims, patented, in Cuprum Basin, Seven Devils district, Adams county, Idaho; also the Gold Barr mine and Coad placer mine, 2 patented claims, in southern Oregon. The Idaho claims are near Cuprum, a few miles from Homestead on the Northwest (Snake River), R. R.

Development: by over 3,500' of tunnels, shafts, and open-cuts, showing

copper stained andesite and a little chalcocite. Is a stock selling proposition and unfavorably regarded.

NATIONAL COPPER MINING CO., LTD.

IDAHO

Address: August Paulsen, Paulsen Bldg., Spokane, Wash.

Officers: August Paulsen, pres.; A. P. McCrae, v. p.; Chas. McKinnis, sec.-treas., Barnard Blk., Wallace, Idaho.; Jas. F. McCarthy, mgr., with Harry White, H. H. Stampaugh and R. C. Steese, directors.

Inc. Sept. 22, 1906, in Washington. Cap. \$2,500,000; \$1 par; increased from 1,250,000 shares in July, 1913; 1,800,000 issued; 800,000 shares treasury stock were sold at 50c. Assessments of 19½c. per share have been levied to date, a total of \$342,000. Stock listed in Spokane. Quoted at 1¢ bid in Jan., 1921.

Company owns entire capital stock of Homestake Mng. Co., with claims at mouth of Deadmans Gulch.

Property: 9 patented claims, 180 acres, in Deadman gulch between Mullan and Larsen, on the north side of the Coeur d'Alene Valley. It is about 1½ miles west of and in same belt as the Snowstorm copper property, which it closely resembles in character.

Geology: ore occurs in a fault-vein in thickly-bedded white Revett quartzite, with talcose slips bordering the ore. The vein runs nearly E.-W., and dips steeply to south. The surface gives no indications of the orebody 1,700' beneath it, in fact the ore-bearing quartzite does not show in the upper workings.

During the boom days of 1906-07, the company sank a 400' shaft and drove an adit tunnel developing a fissure vein and strong fault, but found no ore in commercial quantity. Dec., 1912, a large body of silver-bearing copper ore was cut at a distance of 4,800' from the portal, about 1,000' lower than the old tunnel and shaft. The crosscut tunnel runs for 4,000' through very hard and tight Wallace slates and St. Regis quartzites to a slightly mineralized fault separating the St. Regis from the more favorable Revett quartzite. The National vein is cut 200' from this big fault. It is a vertical quartz vein, filling a fault in Revett quartzite. The vein carries copper ore and a drift east disclosed the orebody which gave the mine its short-lived prominence. A sample cut across the orebody where it was 85' wide showed an average value of 2½% copper, 5 oz. silver, and 80c. in gold.

Development: by a 1,200' upper tunnel, a 4,800' lower crosscut tunnel with about 1,000' of drifting on the vein,, a 400' shaft with 400' of drifting and a winze sunk to the 1,500' level. In Feb., 1916, company reported sufficient ore above the 1,200' level to run the mill 2 years. Leached areas on the 800' and 1,000' levels make the extent of orebody uncertain. An estimate of 545,000 tons of ore available above the 1,000' level, made 1913, was changed to 170,000 tons because of an unexpected barren streak.

Equipment: a 500-ton concentrator with Callow flotation plant, and 2-mile trolley line. The crushing plant can handle 500 tons in 16 hours and reduce the ore to ¼". The storage bins have a capacity of 1,100 tons, receiving the ore over a 2-mile electrically operated railroad. The various motors at the mill total 615-h. p.

Mill was operated two months early in 1914, and again in Oct., 1915, crushing 4,243 tons of 0.83% copper ore carrying 1.99 oz. silver per ton. Operations were suspended in June, 1916.

In August, 1917, a crosscut from shaft at depth of 535' below main working tunnel, passed through 35' of ore of better grade than in upper workings, which confirmed theory that better ore would be found at depth.

Property represents an investment of \$400,000 without a dollar's profit, the mill having been built before a producing mine had been developed. Deep work alone can open up a large tonnage, but management announced this would not be done unless new work above the 1,200' level justified it.

In May, 1918, a small profit was being made from 1½% copper and 4 oz. silver ore, but unluckily, the 1,500' level showed the vein to be more oxidized

and leached than on the upper levels. A new hoist and electric pump were installed in 1918, and the mill ran at 33% capacity, the ore coming from the 800,900, 1,000 and 1,200' levels. The mill treated 300 tons daily, early in 1919, the January output being 14 cars of concentrate running 15% copper and 40 oz. silver. A raise above the 800' level opened good ore early in 1918, but the mill had to be stopped two months for repairs. The monthly output averaged about 15 cars of concentrates, netting approximately \$20,000. Fifty men were employed in July. In September, the mine was closed indefinitely and a statement published that liquid assets, including \$51,205 in cash, totaled \$59,079. There were no liabilities. From Nov., 1917, to July, 1919, the mill treated 105,129 tons of ore averaging 1.05% copper and 3.27 oz. silver per ton. The value was \$4.68 per ton, and costs were \$4.085. The 5,931 tons of concentrate averaged \$83.11 per ton, carrying 15% copper and 43 oz. silver; the recovery was 80% and 74% respectively. No ore of commercial grade has been found below the 1,500' level, as the Snowstorm fault ends the National vein a short distance below this horizon. The ore opened by 1,820' of work carried up to 0.7% copper and 1 to 2 oz. of silver. This mine has proved to be a disappointment after extensive intelligent development and large expenditure of capital, and unless a new orebody is found the property cannot be made to pay. In January, 1920, it was decided to reopen the mine and continue the 1,000' level crosscut 300' further. All work was finally stopped in March. The equipment, worth nearly \$200,000, is for sale.

NATIONAL LEAD MINING CO.**IDAHO**

Address: J. L. McCormick, asst. sec., 608 Cedar St., Wallace, Idaho.

Last assessment of 1 mill per share levied Dec. 27, 1921.

NATIONAL MINING & DEVELOPMENT CO.**IDAHO**

Address: A. C. Gallupe, pres., Placerville, Idaho.

Inc. Sept. 23, 1911. Cap. \$1,000,000; \$1 par; divided into 600,000 common and 400,000 preferred shares.

Property: the Mountain Chief mine at Placerville, Boise county, shows gold-silver ore in a fissure vein, 1-3' wide. Ore averages from \$20-\$25 per ton. Developed by 5 tunnels.

Equipment: includes 30-ton all-sliming cyanide plant.

Practically idle since 1918. Property promising.

NELLIE BLOOM MINING CO.**IDAHO**

Formerly operated near Horse Shoe Bend. Presumably defunct.

NELLIE MINING & MILLING CO.**IDAHO**

Address: Wallace, Idaho.

Officers: C. E. Benedict, pres.; O. E. Cushing, v. p.; W. F. Cushing, sec.-treas.

Cap. \$60,000; \$1 par.

Property: 1½ miles from Osborne, Shoshone county, on O.-W. R. & N. R. R., has a fissure vein with gray copper ore (tetrahedrite) in quartz, the ore being said to carry 100 to 240 oz. silver per ton.

Development: by 3 tunnels, shafts and 10,000' of stoping and raises. A crosscut on the 500' level opened up a vein 3' wide, showing good milling ore. Shipped 20 tons of high-grade ore in Sept., 1914, from leasing operations. Has water power plant for pumping and hoisting work, and a small mill. Idle except for work by leasers, since 1918.

NEVADA-STEWART MINING CO.**IDAHO**

Address: H. M. Huemann, 611 S. 4th St., Wallace, Idaho.

Officers: Dr. C. R. Mowery, pres.; H. E. Huemann, sec.-treas., M. J. Sinclair, mgr., and A. J. Devlin, directors.

Inc. Nov. 19, 1915, in Idaho. Cap. \$150,000; 10c par; assessable. One mill per share levied Aug. 13, 1921.

Property: 7 claims in Pine Creek district, near Kellogg, Shoshone county, adjoining the Highland Surprise on the west, shows lead, silver, zinc ore. The vein lies in a fault-zone in slate.

Development: by 800' crosscut tunnel, and 200' of drifts. During 1920

a 7' vein was opened, showing stringers of lead-zinc ore, one being 18" wide.

Equipment: includes electric power and air-compressor.

NEW CALEDONIA CONS. MINING CO.

IDAHO

Address: M. W. Emmett, sec.-treas., Kellogg, Idaho.

Officers: Geo. S. Decker, pres.; Walter Owens, v. p.; E. C. Moore, gen. mgr.

Inc. in 1920. Company succeeded the **Bernice and Wardner Mining companies**. **Cap.** \$375,000; 25c par; 500,000 shares in treasury.

Property 20 claims on N. Slope of Haystack peak, near Wardner, Shoshone county, adjoining the Caledonia on the S. and W. Ore contains silver, lead, and gold.

Development: by open-cuts with a 450' crosscut tunnel on the New Caledonia and a 750' tunnel on the Magnet group.

Equipment: includes purchased electric power, compressor, drills, etc. **Developing.**

NEW HOPE MINING CO., LTD.

IDAHO

Address: Otto A. Olsson, sec.-treas., Gyde-Taylor Bldg., Wallace, Ida.

Officers: Eugene Thomas, pres.-mgr., Osborn, Ida.; with Otto A. Olsson, E. F. Gentry, O. W. Lewis and C. A. Solberg, directors.

Assessment of 2 mills levied July 20, 1921.

Property: on Two Mile Creek, near Osborn, Shoshone county, developed by 1,800' of tunnels and drifts, disclosing a vein of silver-lead ore. Assessment work only being done.

NICKEL PLATE MINING CO.

IDAHO

Office: 701 Mohawk Blk., Spokane, Wash.

Officers: S. M. Daniels, pres.; J. R. Fordyce, v. p.; Chas. F. Cowan, sec.; Thos. Keogh, treas, with L. Oriard and S. L. Americus, trustees.

Inc. in Washington. **Cap.** \$2,000,000; \$1 par. Annual meeting first Monday in June.

Property: 22 claims on Nickel Plate Mountain, between Reeder and Granite creeks in Bonner county. Country rocks include granite, syenite, and gneiss. Cut by veins reported to have shown some cobalt, platinum and palladium values together with gold and copper. About \$30,000 was spent on equipment up to 1918, and about 1,000' of work done.

NIPSIC MINING CO.

IDAHO

Mine sold to Cons. Interstate-Callahan, now **Callahan Zinc-Lead Co.**, which see.

NONPAREIL COPPER MINING CO.

IDAHO

Address: H. J. Rossi, sec., Wallace, Idaho.

Inc. in Idaho. **Cap.** \$1,500,000; shares \$1 par; assessable; assessment of 1 mill per share was levied Aug. 10, 1921.

Property: 4 full and 3 fractional claims, on the west fork of Willow creek, across from the Carney mine, 3 miles S. E. of Mullan, Shoshone county.

Development: by 4 tunnels. Surface ores have given assays up to 1.5% copper, and 8 to 19 oz. silver per ton.

Idle.

NORTH AMERICAN M. & M. CO., LTD.

IDAHO

Address: J. J. Presley, Wallace, Idaho.

Officers: J. J. Presley, pres.; C. F. Reedy, v. p.; J. F. Morton, sec.; F. J. Presley, treas., with Alex Murphy, directors.

Inc. May, 1903, in Idaho. **Cap.** \$1,500,000; \$1 par; none outstanding. Held annual meeting, June 1, 1920.

Property: 25 patented claims, 390 acres, 3 miles S. E. of Kellogg, Shoshone county, adjoining the Bunker Hill & Sullivan, and believed by manager to carry the continuation of the B. H. & S. main fissure. Examined, 1919, by F. J. Davey. Also 280 acres of millsite, water-rights, etc. The vein is in Revett quartzite, and ore averages 1% lead and ½ oz. silver per ton.

Development: by tunnels totaling 1,700' reaching depth of 400'

In 1916, company tried to raise funds with which to continue the main tunnel another 1,200', by lurid advertisements, written by an "advertising agent." The engineer's report is worth quoting: "It is a good business proposition to go into, for while there may be some chance that ore will not be found in commercial quantities, it is remote under the conditions existing elsewhere in the same vein."

No record of operations obtainable.

NORTH BUNKER HILL MINING CO., LTD.

IDAHO

Address: N. T. Hardy, mgr., Kellogg, Idaho.

Officers: Elmer Brown, pres.; J. L. Trowbridge, v. p.; N. T. Hardy, sec.; Chas. Cartwright, treas., with A. W. Vangilder, E. A. Vangilder and J. E. Gunn, directors.

Inc. Feb. 16, 1907, in Idaho. **Cap.** \$1,250,000; shares \$1 par; assessable; 4 mills per share called Dec. 11, 1920 and April 2, 1921; 1,079,721 issued.

Property: 3 patented claims, 60 acres, at Wardner, Coeur d'Alene district, joined on the E. by the East Caledonia, on the W. by the Caledonia, and on the S. by the Bunker Hill & Sullivan Mines.

Development: by tunnels, and 500' incline from tunnel level, opening an cre shoot 30x115', said to average 30% lead and 15 oz. silver.

Equipment: 75-h. p. motor, 500 cu. ft. compressor, electric hoist and pump.

Work is paid for by calling assessments, and the installation of the machinery noted shows that shareholders are getting good value for their money.

NORTHERN LIGHT MINING & MILLING CO.

IDAHO

Address: B. E. Harmon, sec., 352 W. Morton St., St. Paul, Minnesota, and S. L. Shonts, mgr., Gyde-Taylor Bldg., Wallace, Idaho.

Officers: W. G. Nye, pres.; Fred W. Sachse, v. p.; Tom J. McGrath, treas., Benj. E. Harmon, sec., with S. L. Shonts, directors.

Inc. Jan., 1915, in Idaho. **Cap.** \$75,000; shares 5c par; assessable; last assessment of 1¼ mills levied Feb. 10, 1920; 1,100,000 outstanding. Annual meeting, second Saturday in May, at Wallace, Idaho.

Property: 5 claims 234 acres, 2½ miles south of O. W. R. N. Ry. on Pine creek, 5 miles west of Kellogg, and 3½ miles west of the new Bunker Hill smelter at Bradley, Shoshone county.

Mine reported on by Merriam Bros. of Wallace, and Albert Burch.

Property contains four veins in beds of quartzite separated by slates. **Mill ore** averages 3 to 8% lead, 6 to 10% zinc, and 1.5 to 3 oz. silver per ton.

Development: by 500' tunnel and 400' vertical shaft, with 2,400' drifts and crosscuts, 100' raises and 70' winze.

Equipment: includes hoist at main shaft, Ingersoll-Rand compressor, electric power, Gould and Cameron pumps, air hoist in winze, machine drills, etc. and 200-ton mill to be erected.

The secretary wrote in June, 1919, that the mine was not worked during 1918, because the shaft was flooded, power being disconnected. Work will be resumed when litigation over the power supply is settled.

NORTH FRANKLIN MINING CO.

IDAHO

Address: Norman Ebbley, pres., Wallace, Idaho.

Inc. in Idaho. **Cap.** \$1,000,000; shares \$5 par; assessable.

Property: 7 claims adjoining the Morning mine on North, near Mullan, Shoshone county, Idaho. About 3,000' of work has disclosed bunches of lead-silver ore, but not in commercial amount. Idle several years.

NORTH STAR M. & D. CO., LTD.

IDAHO

Address: G. W. Dougherty, sec.-mgr., 516½ Cedar St., Wallace, Idaho.

Officers: D. E. Wherry, pres.; A. J. Mullen, v. p.; G. W. Dougherty, sec.-treas., with J. E. White and E. L. Wherry, directors.

Inc. 1920, in Idaho. **Cap.** \$1,250,000; \$1 par; assessable; 906,170 shares issued. Assessment of 1 mill per share levied July 26, 1920 and April 30, 1921.

Property: 5 claims, 90 acres, in the Nine Mile district, 2½ miles N. of

Wallace, Shoshone county. Ore occurs in quartz veins carrying lead and silver.

Development: by 4 by 6' tunnel, 1,000' long and 334' crosscut, being extended to the main orebody.

NORTHWESTERN DEVELOPMENT CO.

IDAHO

Former address, Salmon, Idaho.

Property: the Ranger copper mine, 12 miles E. of Salmon, in Lemhi county, worked for gold in the eighties, though the copper content prevented gold recovery, 60% being lost. About \$260,000 was spent on the mine at the time. In 1917 the mine was unwatered after 33 years idleness, and new work disclosed an ore shoot 320' long, 4' wide, some of the ore carrying \$50 to \$75 per ton. About 100' out of 150' in depth was stoped. In 1918, an 800' tunnel was started to cut the vein at depth of 650'. Dumps said to contain 10,000 tons of \$10 ore.

Hydro-electric power can be developed nearby.

NORTHWESTERN MINING CO.

IDAHO

Out of business. Described in Vol. XIV.

OLD HICKORY MINING CO.

IDAHO

Address: Oscar Nordquist, pres., 424 E. Nora St., Spokane, Wash.

Inc. Oct., 1918. Cap. \$150,000; shares 15c. par.

Property: the Old Hickory claim of North Star M. & M. Co., adjoining You Like claim of Federal M. & S. Co. Lead ore was opened in 1919, in a tunnel, and geological conditions were said to be encouraging. Idle 1920-21.

OLD VETERAN MINING CO.

IDAHO

Office: Barnard Blk., Wallace, Idaho.

Officers: M. J. Farrell, pres.-gen. mgr.; Allan G. Kennedy, v. p.; L. L. Brainard, sec.-treas., with B. J. Farrell, directors.

Inc. March, 1915. Cap. \$150,000; shares 10c. par; assessable; 750,000 shares were sold at 2cts. per share, upon which assessments of 2cts. were to be levied every two months.

Property: 10 claims, 2 miles above Burke, Shoshone county, shows several fault fissures.

Development: by 1,500' of tunnels. No. 3 tunnel cut a few inches of ore, carrying 1.84% copper and ½ oz. of silver in 1918, and drifting continued in 1919 and 1920, showing more or less copper, but no large orebody. Assessment work only being done, 1920-21.

OMAHA MINING CO.

IDAHO

Address: O. B. Olsson, mgr., Wallace, Idaho. Controlled by August Paulsen, Paulsen Bldg., Spokane.

Property: the Omaha group of 4 claims and the Albany group of 6 claims, near Mace, Shoshone county, under development during 1920.

Equipment: includes compressor and complete machine shop.

ONTARIO MINING CO.

IDAHO

Address: Kellogg, Idaho.

Officers: M. A. Folsom, pres.; H. Nicholson, v. p.; Stanley A. Easton, sec.-treas. and gen. mgr.

Cap. \$25,000; shares \$1 par.

Property: on Ontario Creek, adjoining the Steward in the Kellogg-Wardner district, Shoshone county, shows quartz fissure veins carrying pyrite, sphalerite and galena, and proved to be the southern extension of the main Steward orebody. The vein system is faulted, as in the Steward, and the ore crushed, making mine operations troublesome.

An apex suit brought by the Steward Mining Co. was decided, in 1915, in favor of the Ontario Mining Co., giving the latter company a verdict for \$48,245.

Development: by 800' crosscut tunnel from which a shaft was sunk to 320' depth.

Equipment: compressor, 200-ton mill, and complete plant.

Production: 8,209 tons of ore worth \$712,666 in 1915, and 1,201 tons worth \$32,811 in 1917. It is generally understood that this mine has made a profit of over \$500,000, but this cannot be verified.

OOM PAUL CONSOLIDATED MINING CO.**IDAHO**

Office: Wallace, Idaho.

Officers: Jas. F. McCarthy, pres.-mgr.-treas.; F. H. Richardson, v. p.; supt.; L. E. Hanley, sec., with Edward Ryan, J. B. Sloan and Walter Mackay, directors.

Inc. April, 1907, in Idaho. **Cap.** \$1,600,000 shares \$1 par; assessable; 7 assessments of 1c. each levied; 1,397,598 shares issued. Stock formerly listed on Butte and Spokane Stock Exchanges.

Property: 10 patented claims, 200 acres in Coeur d'Alene district, near Burke, shows silver-lead ore in fissure veins traversing a quartzite formation.

Development: by 3,500' crosscut tunnel, driven to cut the downward extension of the ore found above. A vein was cut but contained no value.

Equipment: consists of compressor. Work suspended, 1917, because of disappointing results. The Ajax Mining Co. which adjoins it, arranged for use of the tunnel to prospect its own ground during 1918.

OROGRANDE GOLD MINING CO.**IDAHO**

Address: Judge Geo. Turner, Columbia Bldg., Spokane, Wash. William Hogan, pres.; M. A. Sherman, v. p.

Cap. \$1,500,000; \$1 par; non-assessable.

Property: on the Crooked River, 64 miles S. E. of Stites, nearest rail point, Idaho county. Ore carries \$2.30 to \$3.60 per ton gold, and is developed by 1,000' of tunnels and lateral workings. Mining is done by the glory-hole method.

Equipment: includes a 500-ton all-sliming cyanide mill. In August, 1918, trial runs showed that 1,700 tons ran \$2; 2,697 tons gave a recovery of \$2.03; and 2,939 tons went \$1.93. Small shipments made in 1919.

OVERLOOK MINING & DEVELOPMENT CO.**IDAHO**

Probably defunct. See Vol. XIV.

THE PACKER CO.**IDAHO**

Former address: Mackintosh Block, Salt Lake City, Utah.

Officers: Chas. Read, pres.; E. G. Rowe, v. p., with W. A. Black, T. E. Guhin and A. L. Miller, directors. J. H. Woodmansee, sec.-treas. Registrar & Transfer Co., N. Y., registrar and transfer office.

Inc. June 12, 1917, in Maine. **Cap.** \$600,000; \$1 par; \$500,000 issued.

Organized as holding company to take over 80% or more of Lost Packer Mining Co. stock (which see).

PANDORA COPPER MINING CO., LTD.**IDAHO**

Address: care J. C. Weatherhead, Larson, Shoshone county, Idaho.

Inc. Oct., 1906, in Idaho. **Cap.** \$1,000,000; shares \$1 par; assessable; issued 450,000. Annual meeting, fourth Wednesday in October.

Property: 10 claims, 150 acres, adjoining the Snowstorm mine on the east, and supposed to carry about 3,000' of the Snowstorm ore zone. Property shows St. Regis and Revett quartzites, with copper impregnations in the latter.

Development: includes 1,750' main, or working tunnel, which has not yet crosscut the vein. Only assessment work done in recent years.

PARAGON CONSOLIDATED MINING CO.**IDAHO**

Name changed to Paragon Mining Co., which see.

PARAGON MINING CO.**IDAHO**

Office: 709 Commerce Bldg., St. Paul, Minn. **Mine address:** Chas. Grimsmore, supt., Paragon, Idaho.

Officers: Geo. S. Monson, pres.; M. O. Nelson, v. p.; F. O. Hammer, sec.-treas., with W. W. Dunn, N. C. Johnson, R. C. Patterson, directors.

Inc. Nov., 1908, in Minnesota. **Cap.** \$1,500,000; \$10 par; outstanding, 1,205,430. **Bonds:** authorized, \$100,000; outstanding, \$25,000. Annual meet-

ing in November. Listed on New York Curb. Registrar & Transfer Co., New York, transfer agent.

Property: 52 claims, 19 patented, about 1,000 acres, in the Coeur d'Alene district, Shoshone county, shows fissure and contact orebodies. Values are in lead, zinc, silver and gold. Holdings include the Murray group, formerly owned by Murray Hill Mining Co.

Development: by tunnels and 300' shaft with about 20,000' of workings. A double-compartment shaft being sunk 300' in 1921.

Equipment: includes the Murray Hill 100-ton concentrating mill, 1-drill compressor, tram, etc. Power is developed at waterfall nearby, but operations have been hampered by scarcity of water, so steam is used part of the time. The mine has been an intermittent shipper during the past few years, but returns are not made public. Fifteen men employed in 1921.

PARK COPPER & GOLD MINING CO., LTD.

IDAHO

Office: 616 Cedar St., Wallace, Idaho. **Mine office:** Mullan, Shoshone county, Idaho.

Officers: O. W. Lewis, pres.-mgr.; Nellie J. Stockbridge, sec.-treas.

Cap. \$150,000; shares 10c par.

Property: 7 claims, on the southern side of Stevens Peak, 5 miles from a railway. The property is said to have a fissure vein in quartzite, of about 60' in average width, capped by a 40' gossan of mixed hematite and siderite, carrying kidneys of high-grade copper carbonates and chalcopryrite, with occasional native copper.

Development: by two 25' shafts, and 3 tunnels, the two upper tunnels showing ore, while No. 3, the lower tunnel, of 1,680' length, with a back of about 1,000', shows no ore. The mine has about one-half mile of workings.

Idle since 1917.

PARROT MINING CO.

IDAHO

Absorbed by Sunshine Cons. Mining Co., which see.

PATUXENT MINING CO.

IDAHO

Address: Gyde-Taylor Bldg., Wallace, Idaho.

Officers: J. H. Wourmes, v. p.; F. C. Boutin, sec.

Annual meeting held May 19, 1921.

Property: adjoining the Callahan Zinc Lead on the S., in the Coeur d'Alene district, Shoshone county, reported to show a 4' vein of high-grade lead-zinc ore, in a fissure zone 50' wide.

Development: totals 3,000' of tunneling, crosscutting and drifting. Development operations are conducted through the Rex. Cons. workings.

PAWHATTAN MINING CO.

IDAHO

Address: Joseph Turner, pres., 505 Cedar St., Wallace, Idaho.

Last assessment of 1 mill per share, levied Dec. 6, 1920.

PEARSON MINING CO.

IDAHO

Address: J. F. Ferguson, treas., 7 Shoshone Bldg., Wallace, Idaho.

Morris Pearson, pres.-supt.; Harry Pearson, gen. mgr.

Inc. 1920, in Minnesota. **Cap.** \$250,000; \$1 par. A reorganization of the Lucky Swede G. & M. Co.

Property: 14 claims in the St. Joe district, Shoshone county, S. E. of Mullan, near the C. M. & St. P. R. R., shows 3 veins with surface ores giving good assays in copper and gold.

Development: by a 1,950' crosscut tunnel, with 200' to be driven in 1921, to reach the main vein.

Equipment: includes oil engines, compressor, and a Pelton wheel.

PEGRAM M. & M. CO.

IDAHO

Property: at Pegram, Bear Lake county, 18 miles E. of Pocatello, said to contain a large deposit of low grade gold ore. Developing at last account.

PHEDORA SILVER-LEAD MINING CO.

IDAHO

Address: Kellogg, Idaho.

Officers: Wm. Schaefer, pres.; Geo. Moison, v. p., with M. Mosauer, Al. Blanq, Wm. Weyer, and Chas. Bollinger, directors.

Cap. \$1,500,000; shares \$1 par.

Property: 12 lead-silver claims, adjoining the Jack Waite, in Eagle district, near Murray, Shoshone county.

Development: about 1,000' of workings.

PHOENIX MINING & MILLING CO., LTD.

IDAHO

Address: E. C. Allen, asst. sec.-treas., Ryan Hotel Bldg., Wallace, Ida.

Officers: Norman Ebbley, pres.; Jos. Whelan, sec., with R. H. Kingsbury, and W. Roberts, directors.

Cap. \$1,000,000; shares \$1 par; assessable, 800,000 shares outstanding. Annual meeting, second Monday in May. Assessment of 5 mills per share levied June 25, 1921.

Property: 14 lead-silver claims, in Coeur d'Alene district, near Wallace, Shoshone county, opened by 1,500' of workings, but still only in exploration stage.

PINE CREEK DEVELOPMENT CO.

IDAHO

Dead. See Vol. XIII for data.

Mine held by **Sherman Lead Co.**, which see.

PINE CREEK M. & M. CO.

IDAHO

Consolidated Jan., 1917, with the **Hilarity M. Co.**

Address: O. W. Lewis, sec., Wallace, Idaho. C. S. Stone, pres.; E. G. Gnaedinger, cons. engr. H. W. Ingalls, mgr.

Cap. \$1,000,000; \$1 par. Listed on Butte, Mont. exchange. Assessment of 1½ mills per share levied Jan. 11, 1922.

Property: 14 claims in the Pine Creek district, Shoshone county, covers about 1 mile along strike of vein said to be the extension of the Constitution and Douglas.

Ore is low grade, consisting of pyrite, sphalerite, pyrrhotite and a little galena and chalcopyrite in quartz.

Development: by 2 tunnels, 400' and 250' long. Property is a prospect.

PIONEER MINING CO.

IDAHO

Address: S. H. Linn, Wallace, Idaho.

Officers: O. A. Olin, pres., San Francisco, Calif., with S. H. Linn, Ole H. Linn, Wm. Shannon and Herman Marquard of Wallace, directors.

Property: 12 claims on Beaver Creek, adjoining the Ray-Jefferson on the N. W. and the Callahan on the W.; and said to carry extension of these veins.

Development: by crosscut tunnel being driven 1,700'. Only assessment work being done.

PITTSBURGH-IDAHO CO., LTD.

IDAHO

Address: 23 Fourth Ave., Pittsburgh, Pa., or Kearns Bldg., Salt Lake City, Utah. **Mine address:** A. D. Ross, Gilmore, Idaho.

Officers: A. S. Ross, pres.; Irvan Neckermann and Robt. B. Little, v. p.'s; W. A. McCutcheon, sec.-treas.; with G. W. Provost, J. W. Brown, E. C. Chalfont and J. S. Alexander, directors. J. E. Walker, supt.

Inc. in Idaho. **Cap.** \$1,000,000 common, \$250,000 pfd.; \$1 par; 846,000 common and 83,000 pfd. shares outstanding. **Bonds:** \$150,000, with \$127,000 outstanding Commonwealth Trust Co., Pittsburgh, registrar; company makes its own stock transfers. Annual meeting, first Monday in July.

Stock listed on New York Curb.

Financial Statement years ending December 31:

Year	Operating				
	Revenue	charges	Profit or loss	Dividends	Surplus
1917.....	\$199,060	\$247,208	—\$48,145	\$65,523	\$68,738
1916.....	165,468	+159,934	44,928	182,409

Balance sheet dated Jan. 1, 1920 showed accounts receivable, \$4,766; ore in transit, \$11,786; accounts payable, \$22,773; bills payable, \$128,500; surplus, \$9,662.

Dividends: total \$375,000.

Property: 25 claims, 5 patented, about 500 acres, in the Texas district, near Gilmore, Lemhi county, shows limestone cut by fissure veins 3 to 30' wide and traceable for 200 to 700'. Veins strike N.-S. and dip about 45°. Ores are a mixture of lead carbonates and cube galena, averaging 25% lead, 11 oz. silver, 0.03 oz. gold and 15% iron. Ore at the bottom level is still partly oxidized.

Company is also developing the Brown group on which high-grade ore has been discovered.

Development: by 18,000' of workings including a 45° shaft to depth of 850', and a 6,000' transportation tunnel connecting with the 400' level. The 7th level had cut 7 orebodies by December, 1920.

Equipment: electric power is produced by two 250-h. p. Diesel engines direct connected to 135-k.w. generator close to rail, hoist, compressor, pump, tramway, and other complete plant.

Production: 120,656 tons ore has been sent to the smelters since 1910, yielding over \$5,000,000. During 1919 shipments amounted to about 400 tons per month.

PITTSBURGH LEAD MINING CO.

IDAHO

Merged with California Cons. Mng. Co. and Panhandle M. & M. Co., July, 1916.

Former properties noted under California Consolidated in this volume.

PLACER CREEK SILVER-LEAD MINING & MILLING CO. IDAHO

Address: 415 Chamber of Commerce Bldg., Spokane, Wash.

Officers: Oscar Cain, pres.; G. B. Dennis, v. p.; F. C. Bailey, sec.-treas.-mgr., with G. W. Rumberger, J. Elmer West, E. J. Bailey and W. H. Kleiman.

Cap. \$1,000,000; \$1 par; 700,000 shares issued; assessable at rate of 1 mill per month.

Property: 7 claims, on Placer creek, 6 miles from Wallace, Shoshone county, developed by a 1,750' tunnel, which is reported to have cut the main ledge at a depth of 500', in August, 1921.

POCATELLO GOLD & COPPER MINING CO.

IDAHO

Address: Pocatello, Idaho. H. W. Lockhart, pres.

Inc. Dec. 1, 1902, in Idaho. Cap. \$1,000,000; shares 50c. par.

Property: 6 claims, 120 acres, in the Fort Hall district, 9 miles N. E. of Pocatello, Bannock county, shows a 3' vein of chalcopryrite, replaced near surface by chalcocite, bornite and malachite. Ore is of milling grade but contains a small streak of rich ore, from which shipments gave returns of 17 to 22% copper and 8 oz. silver per ton.

Development: by tunnels, with about 1,000' of workings. Presumably idle, 1921.

POLARIS MINING & DEVELOPMENT CO.

IDAHO

Address: Wallace, Idaho.

Officers: W. E. Mann, pres.; P. J. Gearon, mgr.; L. C. Wilson, sec.-treas., with P. Schmitz and H. M. Davenport, directors.

Inc. Dec., 1915, in Idaho. Cap. \$50,000; shares 5c par.

Property: 3 patented claims between Osborne and Kellogg, in the Coeur d'Alene, Shoshone county. Ore carries lead and silver, with some copper.

Development: by 1,100' of tunnels, winze, and several hundred feet of other workings.

Production: several carloads shipped reported to average 140 to 200 oz. silver and 3% to 6% copper, and in 1916, 7 cars netted \$25,163. No later figures available.

PONDERAY MINING & SMELTING CO.**IDAHO**

Offices: 922 Old National Bank Bldg., Spokane, Wash., and Sandpoint, Bonner county, Idaho.

Officers: Geo. S. Brooke, pres.; Leo Greenough, sec.-treas.

Cap. \$500,000; \$100 par; all issued.

Property: 4 patented gold-silver-lead claims near Lakeview, in Bonner county, and 4 copper claims near Bayview, Kootenai county.

POPE-SHENON COPPER CO.**IDAHO**

Address: Salmon, Lemhi county, Idaho.

Officers: R. H. Winder, pres. Thomas Austin, v. p.; C. R. Bradford, sec.-treas.; A. Boulais, supt.; R. H. Bradford, metallurgist.

Cap. 1,000,000 shares; 800,000 issued.

Six assessments have been levied, the latest on February 21, 1919.

Property: claims near Salmon, Lemhi county, covering a wide mineralized zone. Ore carries carbonate and oxide of copper, chalcocite, and chalcopyrite.

Development: by 5 tunnels, No. 5 being 800' long. Reserves are said to amount to 100,000 tons of 5% ore.

Equipment: includes a 50-ton plant employing a combination of the Bradford volatilization and Cottrell precipitation processes, said to give good results.

Small shipments have been made.

PORTOMA MINING CO.**IDAHO**

Officers: D. C. O'Reilly, pres., Bates Bldg., Portland, Oregon. F. A. Knapp, sec.-treas.

Cap. \$100,000; 5c. par; \$53,000 issued.

Property: 4 claims in Beaver district, Shoshone county, showing lead-zinc ore, opened by 1,300' of tunnels, etc.

PRINCEMONT MINING CO.**IDAHO**

Officers: S. B. Holbert, pres.-mgr., Wm. M. Ramsey, sec.-treas., C. F. Briggs, W. J. Williams, E. F. Holbert, and W. H. Batting, directors.

Inc. 1916, in Idaho. **Cap.** \$2,000,000; shares \$1 par; non-assessable; 1,650,000 issued. Annual meeting second Monday in September.

Property: 43 claims, 875 acres, as follows: Copper Prince of 13 claims, on C. M. & St. P. R. R., Ida., also the Idaho-Virginia group of 24 claims near St. Joe, Ida.; and the Pilgrim group of 6 claims near Noxon, Sanders county, Mont.

The Copper Prince and Idaho-Virginia properties are fully equipped; the former developed by 600' tunnel and 125' shaft and the latter by 162' shaft. The Pilgrim is opened by tunnels.

No record of recent operations.

PROFILE METALS CO.**IDAHO**

Address: Judson Spofford, gen. mgr., 403 Empire Bldg., Boise, Idaho.

Officers: Judson Spofford, pres.; J. B. Burns, v. p.; E. G. Davis, sec.-treas., with J. B. Eldridge and E. C. Kiersted, directors.

Inc. July 7, 1919, in Idaho. Stock offered at 50c.

Property: Combination mine, 3 claims, 60 acres about 1½ miles S. of Profile, Valley county and 12 miles N. of Yellow Pine, said to show 3 fissure veins in granite-prophyry, carrying gold, silver, copper and lead. Developed by 400' of workings.

PURITAN MINING CO.**IDAHO**

Address: Otto B. Olsson, Wallace, Idaho.

Officers: Frank Boutin, pres.; Theo. Anderson, v. p.; Chas. A. Solberg, sec., with O. B. Olsson, and John H. Roberts, directors.

Cap. \$1,500,000; shares \$1 par.

Property: 5 patented lead-silver claims in Pine Creek section W. of the Tamarack & Chesapeake.

Development: by 1,100' tunnel and over 2,000' of other workings. No

recent information obtainable. Is a promising prospect controlled by the late Jim Callahan.

RABBIT FOOT MINING CO.**IDAHO**

Address: R. E. L. Ramey, Farney, Lemhi county, Idaho.

Property: 15 quartz and 16 placer claims near Farney, gold-silver ore being opened by 2,000' of tunnels. A 10-stamp mill and cyanide plant was formerly operated.

RAINBOW MINING & MILLING CO., LTD.**IDAHO**

Office: Peyton Bldg., Spokane, Wash.

Officers: Geo. Austin, pres; Henry Tuft, v. p.; R. P. Woodworth, sec.-treas., with I. A. Libby, A. H. Nourse and A. E. Bronson, directors.

Inc. June, 1907, in Idaho. Cap. \$300,000, increased 1913 to \$500,000; shares 25 cts. par, assessable; 800,000 in treasury, Aug., 1919. Annual meeting, June 1st.

Property: 19 claims, 7 patented, 360 acres, in 2 groups. The Rainbow No. 1 group, 3 miles west of Wallace on Shields creek, Shoshone county, has St. Regis and Burke quartzite cut by the Sunshine and the Rainbow veins. The Sunshine vein carries grey copper ore with iron and quartz gangue.

Development: about 3,000' includes a 40' tunnel on the Sunshine vein and the main No. 3 tunnel on the Rainbow vein. The latter is a crosscut for 250', then follows vein N. 75° W. for 1,050', reaching a depth of 500'. Lead-zinc ore was opened at 300', 20" assaying 26% lead, 30% zinc, and 16 oz. silver. A shaft was being sunk on this in 1921. Another tunnel on the opposite side of the creek is 450' long.

Equipment is ample, and railroad but $\frac{3}{4}$ mile away.

The second group, of 5 claims, bought 1910, is about 3 miles from the Handspike mine, and 15 miles from a railway, at the mouth of Bootjack creek, a tributary of the North fork of the Coeur d'Alene river, in Secs. 23 and 24, T. 31 N., R 1 W., in an unorganized district. This property shows a vein of 12' estimated average width, traceable 6,000', carrying lead and copper ore, associated with iron carbonate, in a quartz gangue.

Equipment: engine house, 25-h. p. oil engine, 8 by 9" compressor and air pipe and flume supplying water to operate an air blast. Company is developing steadily with funds derived from stock assessment, and by selling lumber.

RAMSHORN MINING & SMELTING CO.**IDAHO**

Address: F. H. Skeels, mgr., Bayhorse, Idaho; and G. A. Joslin, cons. eng. Felt Bldg., Salt Lake City, Utah.

Property: at Bayhorse, Custer county, Idaho.

Geology: claims show replacement veins in black altered slate. Vein worked averages 14" in width and carries quartz and spathic iron, with ore-shoots containing streaks and spots of tetrahedrite carrying 3% copper and 100 oz. silver per ton.

Development: by tunnels, said to block out over 20,000 tons of high-grade silver ore.

Equipment: hydro-electric plant, compressor, motor-trucks, and tramway; a 100-ton mill, including flotation was erected in 1919. Fifty men are employed.

Production: several carloads of ore were sent to a Utah smelter during 1918, and regular shipments were being made in 1919. During 1920 the output was 265,000 oz. silver.

RANKIN CREEK PLACER MINES CO.**IDAHO**

Address: A. S. Thatcher, pres., Walker Bank Bldg., Salt Lake City, Utah. T. B. Meldrum, sec.-treas.

Inc. 1917, in Utah. Cap. \$25,000; shares 25c. par; 60,000 in treasury.

Property: 80 acres in Yankee Fork district, Custer county, reported to carry free gold. About 1,000' of placer ground previously worked aver-

aged \$3 per cu. yd. There is an old mill on the ground. No record of operations since 1917.

RAY-JEFFERSON MINING CO.**IDAHO**

Address: Daniel L. McGrath, mgr., Wallace, Idaho.

Officers: E. R. Day, pres.; J. J. Murphy, v. p.; P. J. Maggy, sec., with Geo. K. Garrett and D. L. McGrath, directors.

Cap. \$2,000,000; \$1 par; assessable. An assessment of 12 cents, 2½ cents at a time, was levied in May, 1919. Last assessment of 2½¢ per share levied May 3, 1920.

In May, 1916, control passed to the Day interests, owners of the Hercules, Tamarack and Custer mines, and of the Northport S. & R. Co. Company sold treasury stock to finance construction of mill and installation of electric haulage system, 1916.

Property: 38 claims, 600 acres in a compact group, adjoining the Callahan Zinc Lead Co. holdings and including the Hill group. Is reported to show the Interstate-Callahan, Amazon and Manhattan veins, one with an orebody 400' long. The Carlisle is a cross vein running northerly and intersecting the Interstate. The latter is supposed to be of the Hercules vein.

Development: by the Blue Grouse and Carlisle tunnels. The Mountain Goat tunnel opens a shoot 300' long, showing 3' of shipping ore and 9' of mill ore on the Callahan vein. The Carlisle tunnel has 400' of drifting on the vein of this name, said to carry 5' to 10' of mill ore for the entire distance. A long tunnel was driven in 1918 to cut the vein 1,000' below the upper workings.

The Beaver Creek branch of the O.-W. R. & N. line was completed to the Ray-Jefferson in Feb., 1917.

Equipment: compressor, drills, shops, tramway, and 400-ton mill.

Idle several years.

RED BIRD MINING & SMELTING CO.**IDAHO**

Property acquired by Clayton Mining & Smelting Co., which is under option to Idaho Mine Development Co.

RED HORSE MINING CO., LTD.**IDAHO**

Address: Harrison, Kootenai county, Idaho.

Officers: M. W. Frost, pres.; E. R. Goodwin, v. p.; M. A. Kigar, sec.-treas.; with D. R. Frost, Otto Borchardt, S. Jones, R. A. Jones, John Demay, and Charles Custer, directors.

Inc. 1904, in Idaho. **Cap.** \$1,500,000; \$1 par; assessable; 1,000,000 issued.

Property: 16 claims, 320 acres, 5 miles N. E. of Springston, Idaho. A quartz vein in granite carries ore with gold, silver and copper values.

Development: by 80' shaft and 2,000' tunnel. During 1918, \$2,000 was received from assessments and expended in development work. Development work reported resumed July, 1921.

RED JACKET MINING CO.**IDAHO**

Property: Caldwell group, in War Eagle district, near Silver City, Owyhee county. Developing 1920-21.

RED LEDGE COPPER MINE**IDAHO**

See Idaho Copper Co., Ltd.

RED MONARCH CONSOLIDATED MINING CO.**IDAHO**

Offices: 300 Title Bldg., Spokane, Wash., and Wallace, Idaho.

Officers: G. I. Toers, pres.; Conrad Wolfe, v. p.; David Ackerman, sec.-treas., with Moritz Thompson, F. J. Guth, A. J. Davis, and H. E. Reiners, directors. T. H. Keefer, supt.

Inc. in 1915, in Washington. **Cap.** \$2,000,000; shares \$1 par; assessable; 1,533,000 issued. Annual meeting, first Tuesday in April.

Property: 43 claims, about 800 acres, in Beaver Creek district, Shoshone county, 9 miles north of Wallace, adjoins Cons. Interstate-Callahan on the west; claims are on S. W. slope of Sunset Mt. and on opposite side of the mountain from the Interstate. Said to show 5 well defined fissure veins of

silver-lead-zinc ore in Prichard slate and Burke quartzite. Veins are parallel, strike N. 70° W., dip 80° to the S. W.

Development: up to the time acquired by the present company, Nov., 1915, consisted of 2,000' of prospect tunnels and open cuts. Ore had been found in one tunnel, 650' long, at a depth of 500'. The company has since driven two tunnels from Missoula gulch, one north to attain a depth of 1,000' within a length of 1,000', and one south to attain a depth of 2,000' within a length of 3,000'. By Oct., 1918, the latter was in 4,410'. It cut three promising lead-zinc veins. Work was suspended for a year, but was resumed late in 1920.

Equipment: includes compressor, capacity 2,000 cu. ft., operated by a 250-h. p. G. E. motor.

The property was advertised for sale at sheriff's sale Oct. 29, 1921, to satisfy judgment for \$52,860, obtained by D. Ackerman.

REED LEVEL MINING CO.

IDAHO

Address: H. M. Thorndsen, supt., Wardner, Idaho.

Is a consolidation of various leases held on the upper workings of the Bunker Hill & Sullivan mine and the Co-operative Milling Co.

The mill is being enlarged to handle 200 tons per day.

Production: about 50 tons per day; 14 cars of concentrate shipped to Bunker Hill smelter to May, 1921, said to have netted \$1,000 per car.

REINDEER QUEEN MINING CO.

IDAHO

Office: Wallace, Idaho. **Mine address:** Mullan, Idaho.

Officers: J. C. Glahe, pres.; A. P. McRae, v. p.; J. R. Bean, sec.; S. D. Lemieux, treas, with D. E. Keyes, directors.

Inc. Sept. 19, 1913, in Idaho. **Cap.** \$200,000; shares 10 cts. par; assessable. Company is a consolidation of the **Copper Queen** and the **Reindeer Queen** companies, whose holdings are contiguous and cover extensive copper exposures. The new company exchanged stock, share for share. The consolidation was made so that the Reindeer tunnel could be extended along the vein into the Copper Queen.

Property: 15 claims in the Mullan copper belt, including the Stevens Peak (or Copper Queen) group and the Reindeer group of 6 claims, all at the head of Willow Creek. The outcropping shows a big copper-stained fissure vein, 5 to 20' wide.

Development: by a crosscut tunnel which has cut the vein at a depth of 800', showing bornite and chalcopyrite ore opened by a drift on the vein. Some lead-silver ore occurring in Burke quartzite was encountered in drift, May, 1917, while in 1918 there had been opened 150' of 2½% ore.

Equipment: includes compressor, 200-ton mill and electric power.

Examined by Rush J. White. No recent returns.

RESCUE GOLD MINES CO.

IDAHO

Address: J. J. Bauer, mgr., Gibbonsville, Idaho.

Property: 400 acres of lode and placer claims and millsite, at Gibbonsville, Lemhi county.

Development: by tunnels and shaft. **Equipment:** 15-stamp mill, tables and small cyanide plant.

REX CONSOLIDATED MINING CO.

IDAHO

Name changed, 1918, to **Rex Mining Co.**, which see.

REX MINING CO.

IDAHO

Office: 25 Broad St., New York City.

Officers: L. E. Whicher, pres.; Raymond Guyer, v. p.-gen. mgr., 25 Broad St., New York; R. M. Atwater, Jr., treas.; S. L. Sherman, sec., with Henry Sachs, C. C. Burger, Theo. Gross and John Corlow, directors.

Inc. July 31, 1915, in Delaware, reorganized in 1918. **Cap.** \$1,250,000; 25c. par; 3,809,702 shares outstanding. Stock listed on N. Y. Curb. U. S. Corporation Co., registrar and transfer agent.

A reorganization of the **Rex Consolidated Mining Co.**, effected during 1918. This included the issuance of 5,000,000 shares of new stock, having a

par value of only 25 cents, of which 2,000,000 shares were to be exchanged, on a basis of share per share, for the 2,000,000 shares of existing stock, having a par value of \$1 a share and to offer rights to the present stockholders to subscribe to 1,500,000 more of the new shares at 15 cents a share, as well as to pay for the new properties with the remaining 1,500,000 new shares. By March, 1919, the Rex Mining Co. owned all the properties and equipment, free of encumbrance, and had cash assets of about \$40,000.

Statement dated April 2, 1921, showed assets, \$1,285,036, which included, cash, \$7,800; Liberty Bonds, \$24,549; bills payable, \$7,000.

Property: 15 claims and fractions, 185 acres, in Nine Mile section, Coeur d'Alene, including the Sixteen-to-One mine, about 6 miles N. of Wallace.

The claims are in the slate belt, long considered valueless as an ore formation, until work at the Interstate-Callahan demonstrated its falsity. The claims contain 3 strong veins, the Rex, Okanogan, and Delaware, which converge at depth.

Development: through a main working tunnel 900' long. Below this a 2-compartment shaft has been sunk to No. 9, or 1,280' level. A crosscut at this depth cut 3 parallel veins. The Okanogan vein is from a few inches to 10' in width. The Delaware outcrop is stronger than the Rex or Okanogan and lies 350' S. of the latter. Underground work totals over 10,000', and cost over \$350,000. From a relatively small area in the upper workings there was produced nearly \$2,000,000 of silver-lead ore. Most of the zinc ore remains.

Equipment: 75 h. p. electric hoist and 3 air hoists under ground, 15-drill compressor of 1,050 cu. ft. capacity driven by 200-h. p. motor and mill costing \$250,000. On lead ore the mill had a capacity of 350 tons daily, and on zinc-lead ore, 200 tons. Plant includes flotation units and an Oliver filter. At upper terminal of the 6,600' aerial tram of 400 tons capacity, a modern sorting plant is operated. Surface improvements include repair shops, bunk and boarding houses, dwellings, etc.

Production: during 1917 the mill treated 39,731 tons of ore, yielding 8,446 tons of concentrates producing 2,965,395 lb. of lead, 5,954,280 lb. of zinc, and 58,629 oz. of silver. The gross value was \$492,943. Mining, development, equipment, freight, and treatment absorbed the whole amount.

Since the reorganization the upper levels of the mine have been leased and the main shaft deepened below the 1,380' level. Company resumed operations in 1921, after an idleness of three years. Property considered promising.

RHODE ISLAND MINING CO.

IDAHO

Address: C. E. Clarke, sec., 204 Bank St., Wallace, Ida.

Cap. \$50,000; 5c. par; assessable. An assessment of 1 mill per share levied Aug. 4, 1920.

Property: 5 claims N. W. of Osburn, Shoshone county. An old mine, but with only limited development.

RICE M. & M. CO.

IDAHO

Property: Mother Lode claim, in Big Creek district, 28 miles from Elk City, Idaho county. Ore is free milling.

Equipment: includes compressor and machine drills. A hydro-electric power plant is planned.

RIVERSIDE MINING CO.

IDAHO

Address: T. R. Mason, pres., Kellogg, Idaho. Owned in Kellogg and Spokane.

Cap. \$1,000,000; shares \$1 par; assessable.

Property: 5 claims in National Forest Reserve, at headwaters of the North Fork of Coeur d'Alene river, Kootenai county, shows a 7' vein with 18" of high-grade silver-lead ore.

Development: 460' crosscut tunnel reaching depth of 100'.

Equipment: steam power, compressor, hoist, etc.

Idle several years.

ROBERTA MINING & MILLING CO.

IDAHO

Idle and no record of recent work. See Vol. XIV for description.

ROCKFORD MINING CO.

IDAHO

Address: W. H. Hanson, sec., Gyde-Taylor Bldg., Wallace, Idaho.
Charles Garenson, pres., Chas. Hyland, v. p., with August Holtz and Wm. Johnson, directors.

Last assessment of 2 mills, levied Aug. 18, 1921.

Property: 11 patented claims at the head of the west fork of Big Creek, adjacent to the B. H. & S. holdings. Assessment work only being done.

ROYAL MINING CO.

IDAHO

Address: Soren Simonson, sec., 231 Wright-Stonestreet Bldg., Coeur d'Alene, Idaho.

Assessments of 2 mills per share levied on June 1 and August 25, 1921.

Property: on slate creek. In 1920, 250' of crosscutting at \$18 per foot was done.

RUTH CONSOLIDATED MNG. & MLG. CO.

IDAHO

Address: Box 2186, Spokane, Wash.

Officers: C. M. Crego, pres.; F. W. Tuetting, v. p.; G. D. Crego, sec-treas., with Jos. McCarthy; Wm. Hoare, M. H. McCall, and J. F. Thompson, directors.

Inc. 1905, in Washington. **Cap.** \$1,500,000; shares \$1 par; assessable to 10 cents; all issued.

Property: 7 claims, 120 acres, in Placer Center district, 3 miles N. of Wallace, Shoshone county. Ore carries lead and silver.

Development by 2,000' of tunnels, and a total of 5,000' of workings; a depth of 700' has been reached. About \$3,000 was spent in 1920.

Equipment: electric power connections, compressor, drills, shops, and dwellings. No production reported.

SABINA MINES CO.

IDAHO

Address: E. C. Allen, sec., Ryan Hotel Bldg., Wallace, Idaho.

Officers: E. J. Duff, pres.; W. R. Miller, v. p.

Inc. 1920, in Idaho. **Cap.** \$100,000; 10c. par; assessable; 693,440 shares issued. Assessment of 2 mills per share levied Aug. 21, 1921 and 2½ mills, Aug. 9, 1921.

Property: 11 claims, E. of Sunset peak, between the Phoenix group and Cedar creek. Tunnels have revealed promising shoots of lead-silver ore. Assessment work only is being done.

SABINA M. & M. CO.

IDAHO

Succeeded 1920 by the Sabina Mines Co., which sec.

ST. JAMES MINING CO., LTD.

IDAHO

Described in Volume XIV. Consolidated with La Fleur Mng. Co. of Wash. and described under La Fleur-St. James Mng. Co., Washington.

ST. LOUIS & IDAHO M. & M. CO.

IDAHO

Address: Russell F. Collins, pres., E. 1211 - 12th St., Spokane, Wash.

Property: 2 claims and 3 fractional claims in Gorge Gulch, near Burke, Shoshone county.

Development: by 1,900' of workings, with 600' and 700' tunnels. Work resumed in 1921 after an idleness of six years.

SAMSON MINING CO.

IDAHO

Address: R. L. Brainard, sec., Wardner, Idaho.

Last assessment of 2 mills per share, payable Oct. 30, 1920.

SAMSON MINING & DEVELOPMENT CO.

IDAHO

Address: R. L. Brainard, sec., Wardner, Idaho.

Property: 8 claims on Eagle creek, near Wardner, Coeur d'Alene district, Shoshone county. Ore contains silver, lead and copper.

Development: by shaft, tunnel and drifts. No record of production or recent development work.

SENATOR MINING CO.

IDAHO

Address: Ed. Ehrenberg, 1124 14th St., Spokane, Wash.

Inc. 1918. Cap. \$1,500,000, changed to \$625,000; 25c par; 2,000,000 shares outstanding.

Property: the Flynn group of 20 patented claims adjoining those of the Star company near Mullan, Shoshone county, and considered to contain an extension of the Federal company's Morning vein. The Senator holdings are optioned to the **Coeur d'Alene Syndicate**, which see.

Company in 1921 acquired an option on stock control of the **Great Eastern M. Co.**, with a permanent easement and right of way over Great Eastern ground for development purposes.

SEVEN DEVILS COPPER CO.

IDAHO

Address: Wm. K. MacNamara, pres., Huntington, Pa. Mine office: Landore, Adams county, Idaho.

Officers: Wm. K. MacNamara, pres.; Chas. H. McColloch, sec.; Fred D. Smith, treas. and gen. mgr.; with Chas. Marvin, directors; Geo. A. Jones, supt.

Inc. March 31, 1908, in Arizona. Cap. \$2,000,000; \$1 par; issued \$1,558,993.

Bonds: \$250,000 authorized at 6%. Annual meeting, second Tuesday in March.

Property: 15 claims, partly patented, 134 acres, including the Arkansaw, Margaret mines, and bond and lease on the Decorah mine, 16 miles from rail. Lands show contact deposits, between diorite and limestone, having a strike of N. 75° W., and said to be 15 to 50' in width. These deposits carry oxidized ores, succeeded at a little depth, by sulphides, the chalcopyrite and bornite ores said to average 5% copper, 2 oz. silver and \$1 gold per ton.

Development: exclusively by tunnels, there being drift tunnels of 900' and 150', and a 483' crosscut tunnel, with 2,800' of workings, estimated by the management to show 182,700 tons of ore blocked out for stoping. The Arkansaw mine has produced a little high-grade ore in the past.

Equipment: includes a 125 h. p. electric plant, taking power from the Oxbow station of the Oregon-Idaho Power Co., and there is a sawmill near the mine.

Production: to 1916, 555 tons ore said to have averaged 11.2% copper.

Inability to pay off \$20,000 debentures caused closing down of mine and suspension of all operations except leasing, in 1915. Company's Arkansaw mine has since been taken over by the Arkansaw Leasing Corporation. The Seven Devils company is alive legally, being held to take over the various interests when the results of development are completed, giving a better basis for distribution of interests in the corporation.

SHERMAN DEVELOPMENT CO.

IDAHO

Described in Volume XIII. Absorbed by **Sherman Lead Co.**, which see.

SHERMAN LEAD CO.

IDAHO

Successor to Sherman Development Co.

Address: Charles McKinnis, v. p., Ranger, Texas.

Inc. 1918, in Idaho. In return for an advance of \$100,000, 51% of the shares were given to E. R. Day, who controls company.

Property: the Union claims, originally owned by **Pine Creek Development Co.**, on Canyon creek, near Burke, Shoshone county. Ore is lead and silver bearing.

Development by tunnels. In 1918, No. 4 tunnel disclosed 4' to 8' of 20% lead ore for 180', at a depth of 1,000'. To develop this shoot further, the old Creek tunnel of the Tiger-Poorman mine was cleaned out and is to be extended. This orebody is considered to be on the strike of the Tamarack & Custer vein. In August, 1919, a raise had opened ore. No recent returns.

SIDNEY MINING CO.

IDAHO

Address: L. W. Gay, Kellogg, Idaho.

Officers: L. W. Gay, pres.; C. F. Gloystein, v. p.; W. T. Simons, sec., with Evans and Leslie Gay, directors.

Inc. in Idaho. Cap. \$1,500,000; shares \$1 par; assessable; 1,275,000 issued.

Property 19 claims in Pine Creek district of Shoshone county, adjoining the Denver mine of the Nabob Cons. Ore carries silver, lead, and zinc.

Development: by tunnel and drifts. A 10' vein opened 500' from the old workings has been drifted on for 250' in length, yielding 175 tons of ore said to average 50% lead and 40 oz. silver.

Property reported under 2-year lease from May, 1921, to W. W. Papesh of Kellogg.

SIERRA NEVADA CONSOLIDATED MINING CO. IDAHO

Subsidiary of Bunker Hill & Sullivan Mining & Concentrating Co., which see.

Officers: Stanley A. Easton, Pres., Kellogg, Idaho; C. W. Simmons, sec.

Property: 5 patented claims in Deadwood gulch, Coeur d'Alene region, near Kellogg, Shoshone county, developed by about 5,000' of workings.

Company began shipping ore in July, 1913, selling its output under contract to April 29, 1915, to the A. S. & R. Co. Management being unable to extend contract satisfactorily, discontinued production during 1916 and 1917.

Production:

Year	Tons	Net Profit
1915.....	15,159	\$46,364
1918.....	19,234	188,042
1919.....	14,820	108,650
1920.....	10,877	99,765

SILVERADO MINING CO. IDAHO

Office: C. D. Muxen, sec.-treas., Old National Bank Bldg., Spokane, Wash.

Officers: J. E. Orr, pres.; C. D. Muxen, sec.-treas., with F. P. Mattie, W. B. Pickerell, Wilbur Wood, F. M. Gardner, J. F. Daily, and William Patterson, all of Spokane, Wash., directors. Fred Bell, supt.

Inc. in Washington. Cap. \$2,500,000; \$1 par; about 1,500,000 shares issued. Has a \$4,000 mortgage.

Property: 20 claims, 560 acres, near Osborne, Shoshone county, reopened in 1915, after several years' idleness, shows fissure vein in shale, running downward into the underlying quartzite.

Development: 4,000' tunnel, 400' of it a drift on a 1 to 3' vein showing 6 to 18" silver-lead and gray copper ore. A 170' shaft shows persistence downward.

Equipment: includes 6-drill compressor, electric power, and a 100-ton mill with flotation plant. Mill seems to have been erected before enough ore was developed, as there was a suspension of operations from 1918 to 1921, save that some leasing was done. Work was resumed late in 1920.

SILVER CITY MINING CO. IDAHO

Defunct. See Volume XIV.

SILVER CLIFF GOLD AND COPPER MINING CO., LTD. IDAHO

Address: Halver Johnson, Wallace, Idaho.

Officers: Thomas Jay, pres.-gen. mgr.; Halver Johnson, v. p.-treas.; Edw. C. Young, sec., with John Rolin and J. A. McLachlan, directors.

Cap. \$1,500,000; \$1 par; assessable; an assessment of 2½ mills per share levied July 25, 1921.

Property: 18 claims, 7 miles from Mullan near Larson, Shoshone county, developed by 3 tunnels, the lowest of 850' and longest of 1,500' showing copper ore with some lead and fair value in gold. Total openings, 3,000'.

Equipment: includes a Pelton wheel and an 8-drill air-compressor.

SILVER DALE & BIG HILL MINING CO. IDAHO

Address: D. W. Knudson, 168 McKinley Ave., Kellogg, Ida.

Officers: J. R. Niemeier, pres.; E. G. Johnson, v. p.; D. W. Knudson, sec.-treas., with J. Olson, P. Petterson and Carl Arenauder, mgr., directors.

Inc. Sept. 12, 1917, in Idaho. **Cap.** \$10,000; shares 1 cent par, assessable; 425,000 issued. Three mills per share, levied July 5, 1921.

Property: 21 claims on Big creek, east slope of Kellogg peak, the west line adjoining the Bunker Hill & Sullivan. Deposit is a contact in Revett and Burke quartzite. Ore carries galena, containing silver, and is developed by an 1,100' tunnel, giving a depth of 700'. Tunnel was extended 200' in 1921. Outcrops are promising. Management reports having spent \$18,000 since 1917 on the mine.

Owners are candid in saying that property is a wildcat project, whose proximity to the Bunker Hill & Sullivan warrants the real exploration that is underway.

SILVER EAGLE MINING CO. IDAHO

Address: C. W. Betts, sec., 406 Bank St., Wallace, Idaho.

Property: claims adjoining those of the North Star in Nine Mile canyon. **Development:** by 4 tunnels, No. 4 being 1,100' long. Work was resumed in 1921 after a suspension of 4 years.

SILVER LEAF MINING CO. IDAHO

Address: J. B. Sullivan, Lakeview, Bonner county, Idaho.

Property: silver-lead prospect near Lakeview, which in 1918 was opened by tunnels, with some ore ready for shipment. The upper level showed 20" of \$125 silver ore, alongside 36" of \$35 lead carbonate ore.

SILVER LODE M. & M. CO. IDAHO

Address: M. W. Emmett, sec., Kellogg, Idaho.

Officers: L. T. Wilson, pres.; Chas. Hollar, v. p.; H. D. Lance, mgr.

Assessment of 1 mill per share payable Nov. 1, 1920.

Property: on Prospect Creek, 15 miles S. of Wallace, Shoshone county, developed by 175' tunnel, said to have opened 8' of galena bearing ore.

SILVER MOON MINING CO., LTD. IDAHO

Address: Gus Ehrenberg, Palmerston Hotel, Spokane, Wash.

Officers: Eugene Sage, pres.; H. C. Lambach, v. p.; G. Ehrenberg, sec.-treas., with Geo. Steward and Ed. Ehrenberg, directors.

Inc. Sept., 1906, in Idaho. **Cap.** \$1,500,000; \$1 par; assessable; 946,903 issued. Three mills per share levied on Oct. 19, 1920.

Property: 10 claims, north side of Canyon creek, 4½ miles from Wallace, Shoshone county, adjoining the Frisco mine, shows 2 veins of lead ore in quartzite.

Development: by 2,133' crosscut tunnel and 1,723' of other work, to depth of 600'. Prospecting being continued, while 2 veins cut in tunnel are to be opened.

Equipment: includes a 200 cu. ft. compressor, electrically driven.

Property is a promising prospect; but promoters were frank enough to state that "buyers must be prepared for a long pull." Assessment work being done.

SILVER MOUNTAIN MINING CO., LTD. IDAHO

Address: W. E. Horstkotte, 950 Pine St., Potlach, Latah county, Idaho.

Officers: L. Tice, pres.; E. D. Wilkins, v. p.; W. E. Horstkotte, sec.; G. L. Fulton, treas., with G. Carlson and G. Kruger, directors. Arthur Horstkotte, mgr.

Inc. in Idaho. **Cap.** \$1,500,000; shares \$1 par; assessable; an assessment of 2 mills per share levied June 6, 1921.

Property: 9 claims, 4 patented, near the Alice mine, on St. Joe Gulch, shortly west of the Morning mill, about 3½ miles from Mullan, Shoshone county. The mine has three tunnels, and a 900' crosscut tunnel intersects an

8' vein carrying ore said to give assays of 2% copper, 3 oz. silver, and \$1.80 gold per ton.

Equipment: includes a small steam plant and air compressor. Developing with a small force.

SILVER RANGE MINING CO.

IDAHO

Address: E. M. Burt, mgr., Wallace, Idaho.

Officers: C. W. Crews, pres.; Fred Williams, v. p.; E. M. Burt, sec-treas., with Reuben Crandell and Chas. Downing directors.

Property: 7 claims, adjoining the Chicago-Boston, about 2 miles from Wallace, Shoshone county. Ore carries lead and silver.

SILVER REEF MINING CO.

IDAHO

Address: J. W. Buhler, N. 4512 Howard St., Spokane, Wash.

Property: a group of claims in Deadman gulch near the National Copper group, and close to the Gold Hunter mine near Mullan, Ida.

Development: by tunnel shows an ore shoot 887' long, and as much as 12' wide, with high grade ore on one wall. Further development is to be done by an extension of the lower tunnel of the Homestake Mining company, which will give a total depth of 1,700' below surface.

SILVER STAR MINING CO., LTD.

IDAHO

Out of business. Consolidated in 1920 with the Lucky Boy M. & C. Co., which see.

SILVER STATE MINING CO.

IDAHO

Address: C. W. Newton, Wallace, Idaho.

Officers: D. A. Callahan, pres.-treas.; Jacob Hill v. p.; C. W. Newton, sec., with John Borg and C. S. Kalb, trustees.

Controlled by the Callahan Zinc-Lead Co.

Inc. in Washington.

Property: 6 patented claims on the N. side of the Callahan Zinc Lead.

SILVER TIP MINING CO.

IDAHO

Merged with National Mining & Metals Co., which see.

SILVER TRIUMPH MINING CO.

IDAHO

Officers: Hailey, Idaho, and 479 Mills Bldg., San Francisco.

Officers: W. H. Slayton, pres.; G. K. Ford, sec.-treas.; with Elliott Johnson and H. K. Lewis, directors. Frank Dillon, mgr.

Inc. Nov., 1919, in Idaho. Cap. \$150,000.

Property: 238 acres near Hailey, Blaine county. The mine was first worked in 1880 and had been closed from 1892 to Sept., 1919. On cleaning out old workings, large orebodies were found unworked. Ore carries silver, lead, and zinc.

Development: by 300' shaft with 2 miles of openings, 1 mile along the orebodies. Reserves are estimated as 400,000 tons of positive ore, averaging \$30 per ton, and 800,000 tons of probable ore of same grade.

A 300 or 500-ton mill is to be erected.

SINKER TUNNEL MINING CO.

IDAHO

Address: W. G. Adams, sec., Nampa, Idaho.

Property: the War Eagle group of gold claims in Silver City district, Owyhee county. Idle since 1878, but re-opened in 1916, since when the 6,400' tunnel has been extended 310', cutting a rich free gold vein. The depth is 2,000'. An electric locomotive is used in the tunnel.

SISTER LEASING & MINING CO.

IDAHO

Address: A. G. Kennedy, sec.-treas., Wallace, Ida.

Officers: Ben Murphy, pres.; Amos Thompson, v. p.

Inc. 1920, in Idaho.

Property: a lease on the Sister mine, on Canyon creek, 1 mile from Wallace, Shoshone county, developed by 600' tunnel. Ore occurs in shoots 6" - 3' wide, containing silver, lead, and zinc. Five shipments to July, 1921, reported to have averaged 33 oz. silver, 32% lead and 16% zinc.

Seven men employed.

SLATE CREEK MINING CO.**IDAHO****Address:** Walter H. Hanson, Wallace, Ida.**Directors:** Peter Peterson, John A. Lewis, Alfred Greenwald, August Holst and Walter H. Hanson.**Inc.** 1921, in Idaho.**Property:** on Slate creek, Coeur d'Alene district, 12 miles S. of Wallace, formerly owned by Franklin Security Co., said to contain lead-silver ore.**SLAVONIAN MINING CO.****IDAHO****Address:** Risto V. Kajonich, mgr., Wallace, Ida.**Officers:** R. V. Kajonich, pres.; G. W. Dougherty, sec.-treas., with Mike Savage and John Lucas, directors.**Inc.** Nov. 26, 1910, in Idaho. **Cap.** \$1,500,000; \$1 par; assessable; 641,837 shares issued.**Property:** 3 claims, 60 acres, at Wardner, Shoshone county, E. of the Last Chance mine. Ore occurs in quartz vein containing silver and lead.**Development:** by tunnel to depth of 500' with 1,100' of workings.Mine under option to **Wardner Leasing Co.****SMOKY BULLION GROUP****IDAHO****Address:** E. A. Worswick, Soldier, Camos county, Idaho.**Property:** 3 claims, patented, 57 acres, on headwaters of Smoky river, near Hailey, Blaine county, idle many years. Fully described in Volume XIV.**SNOWSHOE MINING CO.****IDAHO.****Address:** Mullan, Shoshone county, Idaho.**Officers:** P. J. Gearon, pres.; Paul Lucia, v. p. and gen. mgr.; J. L. Martin, sec.-treas., with J. A. Bean, William Wallace, and A. P. McRae, directors.**Inc.** Sept., 1903, in Idaho. **Cap.** \$1,000,000; \$1 par; assessable; fully issued; last assessment 2 mills per share levied Aug. 1, 1921. Shares are listed on the Spokane and Butte Exchanges.**Property:** 7 claims patented, adjoins the Snowstorm on the east and supposedly carries the extension of the Snowstorm fault, at the head of Gentle Annie gulch, near the top of Snowstorm mountain, in the Hunter district, 1 mile from railway. Claims show Revett quartzite, mineralized for 30' in the Snowstorm fault, with some cuprite, azurite and chalcopyrite, giving assays up to 9% copper and 8 oz. silver per ton.**Development:** by crosscut tunnels, longest 2,000', and drifts, a total of about 5,000' of workings, showing a mineralized zone of 30 to 40' width, carrying various copper ores sparsely disseminated. Drifting on the N.-S fissure opened up a body of high-grade copper ore, 8 to 24" wide, at 650' depth and about 1,600' from portal of No. 2 tunnel. The upper crosscut tunnel, 700' long, intersected a vein up to 60' wide and running from 1-20½ copper, at a vertical depth of 250'. A second crosscut, 696' vertically below No. 1, cut the vein 1,700' in. Some good lead-silver ore has been opened.**Equipment:** includes 3-drill air-compressor, power house, mill and buildings. Further development planned and necessary.**SNOWSTORM APEX MINING CO.****IDAHO**

Letters returned from Mullan, Idaho. Probably idle. Listed in Volume XIV.

SNOWSTORM EXTENSION COPPER MINING CO.**IDAHO****Address:** Mullan, Shoshone county, Idaho.**Inc.** Oct., 1909, in California, as successor of **Snowstorm Extension Mining Co., Ltd.** **Cap.** \$1,000,000; assessable.**Property:** 9 claims, adjoining the Snowstorm on the east, supposed to carry the extension of the Snowstorm ore zone. Pits and trenches have shown ore of about 3% copper tenor, markedly similar to that of the Snowstorm.**Development:** by a drift tunnel, starting from North Fork creek, 2,000'

long at last accounts, planned to be driven to secure an eventual back of 1,630' on the dip of the vein. No recent information.

SNOWSTORM MINING CO.

IDAHO

Company dissolved, July, 1916, and succeeded by **Snowstorm Mines Consolidated** (Montana), which see. For production and description of organization, etc., see Vol. XIII.

SOLID MINING CO.

IDAHO

Incorporated 1919, in Idaho, to take over holdings of **Midnight Mng. Co.**, a Delaware corporation with non-assessable stock. Name changed later to **Midnight Mng. Co.**, which see.

SONORA MINING & MILLING CO.

IDAHO

Address: W. A. Smith, White & Bender Bldg., Wallace, Idaho.

Officers: A. H. Featherstone, pres.; W. A. Smith, sec.-treas., with J. T. Boyle, C. B. Lund, M. Werkheiser, O. A. Dubach and H. S. Tofte, directors. **Cap.** \$1,000,000; shares \$1 par; assessable. Last assessment of 2 mills per share delinquent on February 14, 1920.

Property: 12 claims, patented, over the hill from the Marsh mine above Burke, Shoshone county. Is an old mine worked intermittently since 1896; \$75,000 expended and 3,200' of work done prior to 1908, when a 6' vein was cut at 1,400' from portal and at depth of 800'. Total workings are over 4,000'.

Mine reported under lease to A. P. Reinhardt, July, 1921, company to receive 10% royalty on net smelter returns. Four men employed.

SOUTHERN IDAHO DEVELOPMENT CO.

IDAHO

Probably dead. See Volume XIV.

SOUTH FORK MINING & MILLING CO.

IDAHO

Office: 401 Chamber of Commerce Bldg., Spokane, Wash.

Officers: W. H. Stowell, pres.-mgr.; H. C. Kreysler, v. p.; J. W. Higgins, sec.-treas.; with W. D. Scott, directors.

Inc. April 15, 1914, in Washington. **Cap.** \$1,500,000; \$1 par; assessable to 5 cents (1 cent a year); 945,946 issued.

Property: 12 claims, 220 acres, in Ten mile and Elk City district, Idaho county. Deposit is a quartz vein in granite, carrying \$10 gold per ton. Shoots are 430' long; \$8 is recovered by amalgamation and \$4 in sulphides.

Development: by 4 tunnels totaling 3,000', reaching depth of 400'. Workings amount to 4,000'.

Equipment: water and steam power, and 5-stamps with concentrator. Concentrates assay \$150 per ton. A new mill and water power are planned.

Production: totals about \$200,000.

SPRINGFIELD MINING CO.

IDAHO

Address: Tillie Zeitfuchs, sec., 414 First St., Wallace, Idaho.

Assessment of 1½ mills per share levied Aug. 18, 1920.

STANLEY MINING CO.

IDAHO

Address: Eugene R. Day, Burke, Idaho.

Cap. \$1,500,000; shares \$1 par; treasury, 200,000 shares. Listed in Spokane. Controlled by Day family, principal owners of Hercules Mining Co.

Property: 12 patented claims, west of Benton and N. E. of Humming Bird, in George Gulch, half mile N. of Burke, Shoshone county, said to show antimony ore. Authentic information is scarce. The Humming Bird cross-cut tunnel, run by the Hercules, passes through Stanley ground.

STAR ANTIMONY CO.

IDAHO

Address: Kellogg, Idaho.

Officers: B. A. McIntosh, pres.; W. F. Smith, sec.-treas., with Joe Gordon, Geo. Gordon and Theo. Brown, directors.

Inc. March, 1916, in Idaho. **Cap.** \$10,000; shares 1c par.

Property: the Brown & Fennell claims and others, eleven in all, on Pine creek, Coeur d'Alene district, Idaho. Ore carries stibnite (antimony sulphide).

Development: by 3 tunnels, equal to 1,500'.

Production: 3 carloads in 1916, assaying 52.4 to 54.8% antimony. Mine assayer reports 50c. to \$15.36 gold per ton. Idle since 1919.

STAR MINING CO.**IDAHO**

Address: Charles Hussey, sec., Mullan, Idaho, or 507 Empire State Bldg., Spokane, Wash.

Officers: W. J. C. Wakefield, pres.; Austin Corbin, v. p., with Chas. Hussey, J. G. Cunningham and Chas. E. Bender, directors.

Cap. \$1,000,000; \$1 par. The Bunker Hill & Sullivan has an option on the property at 75¢ a share, equal to \$750,000, and financed the litigation with the Federal M. & S. Co.

Property: 9 patented and 7 unpatented claims adjoining Morning mine on west, 2 miles from Mullan. Late in 1917 the Star company brought suit against the Federal for alleged wrongful extraction of ore from its ground. The case was heard in March, 1918, many well-known engineers being retained by both sides. The Star received an adverse judgment, from which it appealed in August.

The Appellate Court reversed this decision. A re-hearing was denied the Federal in September and the Star company brought suit for an accounting of ore wrongfully extracted. This suit was settled by compromise. December, 1921.

Development: by 2 tunnels, one 400', the other 2,200' long, with 3,700' of drifting on the vein.

STECKNER GOLD MINING CO.**IDAHO**

Address: care D. B. Cornell, sec.-treas., Great Barrington, Mass. Henry Tator, pres.; F. H. Cornell, v. p.

Inc. Feb. 17, 1914, in Arizona. **Cap.** \$2,000,000.

Property: the Gold Dollar group, 10 lode and 5 placer claims, near Orogrande, Idaho county, shows fissure veins in granite. The veins are 2 to 4' thick and carry gold ore, shown by systematic sampling to carry \$3 to \$13 per ton.

Development: by 3,000' of work, all tunnels, 1,000' depth.

Idle several years, but presumably awaiting new financing.

STERLING MINING CO., LTD.**IDAHO**

Address: J. J. Presley, pres., Kellogg, Idaho.

Inc. 1903, in Idaho. **Cap.** \$1,500,000; shares \$1 par.

Property: 12 claims, 240 acres, in Lake gulch, 3 miles S. W. of Wallace, Shoshone county. Contains a vein in Revett quartzite, surface samples assaying 13% lead and 8 oz. silver per ton. Development by a 850' tunnel.

STERLING SILVER MOUNTAIN MNG. CO., LTD.**IDAHO**

Address: 323 Lindelle Block, Spokane, Wash.

Officers: R. L. Brainerd, pres.; F. W. Miller, v. p.; M. Baumgartner, sec.-treas.; Harry Morrell, supt., Kellogg, Idaho; with Dan Krehbiel, C. C. Schweer, and E. T. Richter, trustees.

Receipts from Sept., 1919, to March, 1920, were \$3,714, and expenditures \$2,606. Assessment No. 2 of 3 mills per share was levied in March, 1920.

Property: 7 claims on Big creek, adjoining the Yankee Boy. 4 miles E. S. E. of Wardner, Shoshone county. Veins are in quartzite, and ore carries silver and lead. Examined 1920 by R. S. Merriam of Wallace.

Development: by crosscut tunnels, the lower being over 2,500' long. New work in 1920 amounted to 537', and in 1921 the lower crosscut was driven 600'

Equipment: includes electric power, compressor, mills and buildings. Six men employed. A prospect.

STEWART MINING CO.**IDAHO**

Office: 1465 Broadway, New York. **Mine address:** Kellogg, Idaho.

Officers: J. E. Harrington, pres.-treas.; J. L. Williams, sec. and asst.-treas., with Nash Rockwood, counsel, Albert H. Featherstone, and W. Harrington, directors. B. N. Sharp, gen. mgr.

Inc. Aug. 29, 1902, in Idaho. **Cap.** \$1,250,000; \$1 par, increased July,

1916, to \$3,000,000; \$1 par; 2,738,362 outstanding. No bonded indebtedness. M. A. Hennessey, 1465 Broadway, New York, transfer agent; Metropolitan Trust Co., New York, registrar. Annual meeting in August. Listed on Boston and New York curbs. Stock inactive, but 500 shares were sold at public auction in New York, Feb., 1921, for 5.2 cents per share.

Company controls the Coeur d'Alene Development Co. through ownership of 562,498 of 1,000,000 shares; also the Nabob Consolidated Mining Co., holding 1,750,000 shares.

Current assets, June 30, 1917, amounted to \$159,966, and liabilities, \$21,996. A year later the respective totals were \$256,787 and \$100,525. The surplus was \$670,186 in 1917, and \$484,486 in 1918.

On Jan. 23, 1919, there was assigned to the American Smelting & Refining Co. a mortgage by the Nabob Consolidated covering the Nabob mill in lieu of advances made by the A. S. & R. Co. to the Stewart Mining Co.

Dividends: paid at the rate of 10c quarterly from 1913 to Dec., 1915, with extra dividends amounting to 32½c. in 1913; 62½c. in 1914; 70c. in 1915. Rate was reduced to 5c. quarterly in 1916; none since. The total is \$2,043,296.

Holdings: company owns the Stewart mine at Kellogg, Idaho and controls the Nabob Cons., Coeur d'Alene Development Co., Stewart Tuscarora Mining Co. (controlling Tuscarora Nevada Mines Co.)

Property: the Stewart mine at Kellogg, 8 claims, partly patented, 150 acres. The mine covers about 2,000' along a fissure vein at a fault contact between quartzite and slate. The outcrop of the contact carried silver-lead ore averaging \$6.06 per ton for 2,000'. Output during 1914 and 1915 averaged 500 tons daily, but declined to 125 tons in 1916. The mine was formerly considered as worked out, because extensive development in 1915 failed to find any new orebodies, but in 1920 a careful geologic examination indicated that prospecting for the orebody E. of the fault should be done.

Equipment: the Stewart mill at Wallace, 12 miles from the mine, has a daily capacity of 500 tons. It includes crusher, 4 sets of rolls, 2 Huntington, 12 Wilfley tables, 18 Frue vanners, 35 Harz jigs, 4 Deister slime-tables, and a flotation unit. Concentration ratio is 6 to 1, the product averaging 50% lead and 50 oz. silver per ton. About 200,000 tons of tailings were available for treatment in 1920.

Production: a few figures are available. In 1915, 189,615 tons of ore was valued at \$2,140,363. The profit from this was \$554,433.

The mine was under lease to H. M. Childs of the Bunker Hill & Sullivan company, 1920-21, who shipped several cars of rich ore during 1920. The company reopened mine late in 1921, to recover the main vein lost in the old workings by a fault.

Management searched for new properties for some time, and various mines were investigated, including the Old Sport Group of the Quatsino Copper Co., comprising 26 patented claims, 2,000 acres, Vancouver, B. C., on which \$100,000 was spent before the option was relinquished.

Litigation with the Ontario Mining Co., was decided adversely, April, 1915, and the Ontario company granted \$48,000 for ore illegally extracted.

Notwithstanding the spectacular career of the Stewart company under the Heinze regime, the mine made good, paying \$1,000,000 a year dividends for two years.

Coeur d'Alene Development Co.

Address: Wm. E. Benton, sec., Saratoga Springs, N. Y.

Property: 10 patented claims, developed to 400' lever and equipped with a mill. Twelve years ago a rich orebody produced about \$150,000 worth of ore, but property was abandoned when this vein was worked out. Extensive development work was under way in 1917 and 1918, but no details are available.

Judgments for a few thousand dollars for legal fees were obtained against company in 1921, which will of course be paid off, and property redeemed.

Stewart Tuscarora Mining Co.

Described in Nevada section of this volume.

Nabob Consolidated Mining Co.

Subsidiary of Stewart Mining Co., financing Nabob Cons. and Nabob Mining, described in Vol. XII of this book.

Office: 1465 Broadway, New York, and Kellogg, Idaho.

Officers: J. E. Harrington, pres.; John L. Williams, sec.-treas., with A. H. Featherstone, and Nash Rockwood (counsel), directors. B. N. Sharp, gen.-mgr.; R. Sherwood, mine supt.; H. M. Thronson, mill supt.; R. H. Hughes, office mgr.; B. M. Moye, assayer.

Inc. 1917, in Idaho. **Cap.** \$3,500,000; \$1 par; 2,600,000 issued; 1,750,000 shares held by Stewart Mining Co. The Lippert Investment Co. of Spokane is largely interested. Annual meeting in August. Registrar, Metropolitan Trust Co., and transfer agent, M. A. Hennessey, 1465 Broadway, both in New York. Listed on New York Curb. Quoted at 4 cents in Jan., 1921.

Property: 28 claims on Pine Creek near Kellogg, Shoshone county. Principal claims are the Denver, Mascot, and Nabob. Veins occur in Burke quartzite and Prichard slate; ore is a mixturt of galena, sphalerite, pyrrhotite, and pyrite in a quartz gangue.

In Aug., 1921, the Stewart company announced that the rich silver-lead ore in adjoining Sidney mine, was on a vein that continued into and traversed the company's claims. Development work uncovered this vein in Nabob ground and disclosed rich silver-lead ore in commercial amount at the surface at one point and zinc-lead ore at another.

Development: by 3,000' tunnel, shaft, etc., totaling over 6,000'. Reserves in 1918 were estimated as 22,000 tons possible and 46,000 tons probable ore, but augmented by later work. In the Denver claim, ore averaging 10% lead, 16% zinc, and some silver has been followed for over 400' on two levels. Several other tunnels and workings have opened a good deal of ore. A rich shoot of ore in lower Nabob tunnel yielded several cars of ore in 1918. The mill ore carries 10% lead, 15% zinc, and 7 oz. silver per ton. Five shoots were yielding ore in 1920.

Equipment: complete 3,800' 3-rail gravity tram, connecting No. 4 tunnel with Pine creek, and 150-ton mill including flotation, started work early in September, 1918.

Mill construction work was financed by a loan of \$60,000 from the A. S. & R. Co., through the Federal M. & S. Co., to be repaid by a smelting charge of \$2 per ton on shipments of concentrate, while a smelting contract was signed for 5 years, with renewal privilege for a similar period. The sum proved insufficient owing to increased cost of labor and supplies, and further loan of \$15,000 was granted.

The mill was run for a month or so in March, 1920 after a financial arrangement was made with creditors, and several carloads of 51% lead and 25 oz. silver concentrates were shipped. In November, work was suspended again, on account of the lead market.

SUCCESS MINING CO., LTD.**IDAHO**

Office: Gyde-Taylor Bldg., Wallace, Idaho.

Officers: Franklin Pirman, pres.; Jas. F. Callahan, v. p.; Herman J. Rossi, sec.-treas., with W. R. Mullan, and M. L. Mahoney, directors. A. G. Kennedy, mgr.

Cap. \$1,500,000; shares \$1 par; all issued; assessable. Last assessment was 1¢ a share with delinquent date, Dec. 29 and sale, Jan. 26, 1922. Listed in Butte Spokane, and on New York Curb.

Dividends: suspended April 20, 1913, totaled \$345,000 to that date; resumed April 30, 1915, and \$550,000 paid in 1915; \$345,000 to July 26, 1916; none since.

Financial statement dated Nov. 1, 1921, shows: plant valuation \$200,000; supplies, \$1,998; cash and bills receive, \$560; prepaid insurance, \$346; operating cost, \$5,703. Misc. income was \$835; bills pay., \$5,000; acc'ts pay.,

Litigation with the adjoining Alameda company, which claimed payment for ore, said to have been extracted from its ground by Success was decided in favor of Alameda Co., but the Success Co. appealed and won. This was followed by the Alameda appealing, but the court dismissed case in May, 1917.

Property: 8 claims on Nine Mile creek, 2 miles N. W. of Wallace, is one of the oldest located properties in the Wallace district; first operated by the Granite Mining Co., taken over in 1905 by H. F. Samuëls, who organized the Success Mining Co., continued under his management until 1915, when control passed to "practical" mining men and brokers, and large blocks of stock, aggregating over a million shares were worked out through the New York, Duluth Spokane and Butte exchanges.

The company received considerable publicity during 1917, as a result of stock manipulation, said to have been aided by the management, and to friction between the management and several mining publications. This was aggravated by the seeming aversion of the directors to take stockholders into their confidence, especially in connection with the new smelter contract with the Grasselli Chemical Co., effective May 1, 1916. The distrust of the management culminated, April, 1916, in the Success officials being summoned to court to show why stockholders should not know the terms of contract. This covered 2,000 tons monthly for 3 years, with minimum zinc content of 38%, and maximum lead of 5% at certain prices.

The old management was ousted in Dec., 1917.

Geology: according to the Government geological report (U. S. G. S. Prof. Paper, No. 62) there is no vein, the ore occurring in masses of irregular form and size, which are chiefly replacements of quartzite in places where it has been most thoroughly fissured. The ore is strictly confined to the sedimentary rock; surrounding country rock is monzonite. Ore carries zinc, with lead and silver.

Development: by tunnels to 700' level, and by shaft from 700' to 1,600' level. From July, 1916, to Feb., 1918, 4,000' of driving was done on the 1,200, 1,300, 1,400, 1,500, and 1,600' levels, and 480' of sinking, revealing 25,000 tons of ore. Two years' work above the 1,200', amounting to 5,000', exposed 150,000 tons of ore. Exploration was practically confined to the known ore-shoot but ground to the east was to be explored during 1918, and it is reported that the 1,500' level shows 6' of high-grade zinc ore and considerable lead.

Equipment: complete and includes a 250-ton mill, employing flotation.

Production: in 1916, was valued at \$693,045 from ore mined and flotation slime.

The mill was operated during part of December, 1918, and January, 1919. In February, 1919, the mine was closed indefinitely, excepting for work being done above the 700' level by lessees. Royalties paid to company by lessees amounted to \$3,944 to January 1, 1921.

SUNRISE MINING CO.

IDAHO

Address: O. C. Smith, sec., Wallace, Idaho.

Cap. \$100,000; assessable. An assessment of 2 mills per share was levied June 28, 1920.

Property: adjoins the Sunset mine of Senator Clark, near Burke in Coeur d'Alene district, Shoshone county.

Development: by several tunnels, drifts and crosscuts.

Stock closely held and work financed by assessments.

SUNSET-BANNER MINING CO.

IDAHO

Absorbed, 1918, by Sunshine Consolidated Mining Co., which see.

SUNSET MINING CO.

IDAHO

Address: J. H. Cooke, 602 Dooly Bldg., Salt Lake City. **Mine address:** Leadore, Idaho.

Officers: J. H. Cooke, pres.; I. Coleman, sec., with J. C. Lynch, W. Van Wagenen, (gen. mgr.), and J. R. Murdock, directors.

Assessment No. 10 of 1/2c. per share, levied April 27, 1921.

Company is controlled by Utah capital. 7,600 shares sold for \$5 the lot at public auction in New York on Dec. 22, 1920.

Property: is 20 miles north of Gilmore, in Lemhi county. Examined by S. M. Soupcuff and L. G. Burton of Salt Lake City.

Geology: the ore occurs in a contact deposit between blue Carboniferous limestone and an underlying sheet of white silicious quartz-porphry. The best ore is found under a red fault gouge, which overlies the ore-bearing brecciated limestones and separates them from a capping of Tertiary lake bed gravels that constitute the hanging wall. Deposit has a flat dip. Ore in upper levels consists of grey lead carbonate, but the orebody in the lower tunnel consists of fine-grained steel galena scattered through brecciated limestone, with occasional segregations of clean shipping ore. On the 500' level the orebody is 10' to 20' thick and 200' long, all of it of milling grade.

Development: by tunnels and extensive lateral workings, opening a considerable tonnage of ore.

Equipment: includes a 60-ton concentrating plant.

Production: in 1918 irregular shipments of 11% lead and 7-oz. silver ore were made to Utah smelters, while in 1919 and 1920, regular shipments were made to Midvale and Murray. Mine closed down in 1921 on account of low price of lead and high freight rates.

SUNSHINE CONSOLIDATED MINING CO.

IDAHO

Officers and Directors: Dan McGrath, pres.; John Lucas, v. p.; H. J. Hull, sec.-treas.; A. L. Horneker, all of Wallace; David C. Smith and Dr. E. G. Ellis, of Missoula, Mont.

Inc. Jan., 1918. **Cap.** \$2,500,000; shares \$1 par; assessable. Assessment of 2½ mills levied July 11, 1921.

Property: a consolidation of the Idora Mining Co., Parrot Mining Co., Sunset Banner Mining Co., Sunshine Mining Co., Toughnut Mining Co. and Tuscumbia Mining Co., all operating on Beaver creek, Shoshone county. The Consolidation includes about 30 claims on which over 15,000' of work has been done through tunnels, the Idora having one of 5,000', and the Tuscumbia one of 4,000'. It is planned to drive a main working tunnel to serve the group and to open ore at much greater depth. Orebodies are in Prichard slate, and carry lead, silver, and zinc.

Equipment: each mine has suitable machinery and buildings, including compressors at the Idora, Sunshine, and Tuscumbia mines, drills, and aerial tram and 150-ton concentrator employing flotation at the Idora.

Production: the Idora and Tuscumbia have shipped ore and concentrate for several years, but figures are lacking.

This consolidation should ultimately benefit these 5 properties, which have had but limited development for want of funds.

SUNSHINE MINING CO.

IDAHO

Is a consolidation of the Yankee Boy M. Co. and Yankee Girl Mng. Co.

Address: Eugene C. Tousley, 509 Empire State Bldg., Spokane, Wash.

Mine address: Wm. F. Newton, mgr., P. O. Box 144, Kellogg, Idaho.

Officers: Geo. Kebel, pres.; Wm. F. Newton, v. p.; Eugene C. Tousley, sec.-treas.

Inc. May 25, 1920, in Washington. **Cap** \$150,000; 10c. par; 1,000,000 shares in treasury.

Property: 14 claims, 4 patented, 280 acres in Big Creek district, about 7 miles from Kellogg, Shoshone county. Ore occurs in quartz veins, containing mainly silver with some copper and lead.

Development: by tunnels to depth of 1,100' with 6,000' of workings.

Equipment: hoist, compressor and electric power. A 50-ton mill was completed in 1921. and is producing 3 tons of concentrate per day. Shipments made to Bunker Hill smelter at Bradley.

Production: Yankee Boy is credited with past production of \$400,000.

SUNSHINE MINING CO., LTD.

IDAHO

Absorbed 1918 by Sunshine Consolidated Mining Co., which see.

SWASTIKA MINES CORPORATION**IDAHO****Address:** A. H. McKnight, mgr., Dixie, Idaho.**Officers:** A. H. McKnight, pres.; H. A. Henderson, v. p.; Miss F. T. Bannon, sec.-treas., with W. T. Fox and F. Joelsing, directors.**Inc.** May 20, 1919, in Idaho. **Cap.** \$500,000; \$1 par; 300,000 shares outstanding.**Property:** 20 claims, 400 acres, 4½ miles S. E. of Dixie, Idaho county, central Idaho. Ore occurs in fissure vein in porphyry, carrying gold, silver and lead.**Development:** by tunnels, 600', 500' and 700', with total workings of 1,811'.**SYNDICATE MINING & EXPLORATION CO.****IDAHO****Address:** Lewis Stevens, sec., Wardner, Idaho.

An assessment of one mill per share levied in July, 1920 and July, 1921.

Property: a group of claims near Wallace, at the mouth of Big creek, Shoshone county.**Development:** by a crosscut tunnel (1,000' long Sept., 1919,) in which it was expected the vein would soon be cut.**TAMARACK & CUSTER CONSOLIDATED MINING CO.****IDAHO****Address:** P. O. Box 328, Wallace, Idaho.**Officers:** J. J. Day, pres., gen. mgr. and treas.; E. R. Day, v. p.; H. L. Day, sec., with R. M. Walker, E. H. Knight, E. Boyce, and F. M. Rothrock, directors.**Inc.** 1913, in Nevada. **Cap.** \$2,000,000; \$1 par; 1,877,288 issued; shares quoted at \$2.

Financial statement shows net profits for 1914, \$187,063; for 1915, \$346,796; for 1916, \$338,746; and \$350,857 in 1918.

Dividends: initial of 2c per share was paid May, 1916; total in 1916 was \$71,050; \$53,287 in 1917; \$266,855 in 1918; \$56,400 in 1919; \$75,000 in 1920: 4c. per share paid Jan. 6, 1921.**Property:** about 40 claims and fractions, acquired from the old Tamarack & Chesapeake and Custer companies, on Nine Mile creek, Coeur d'Alene district, Shoshone county. The Hercules mine nearby is controlled by the same interests. Ore carries galena with silver values and as mined is part direct smelting and part concentrating material.**Development:** by 7 tunnels, No. 7 now being driven from Canyon Creek to open orebody several hundred feet lower, will be about 7,000' long.

This company, together with the Hercules interests, built and operates the lead smelter at Northport, Wash.

Early in 1917 the 500-ton Frisco mill at Gem was purchased from the Federal Mining Co., for \$150,000, also the 8,000' Hercules aerial tram. To this line was added 2½ miles to connect the mine and mill. In June, 1919, operations were resumed after 3 months' suspension. The remodeled mill includes a flotation plant. About 350 men employed when operations are normal.

Production: in 1920 was 22,889 tons with gross value of \$1,711,658, and net profit of \$169,371 compared with 14,121 tons in 1919, with gross value of \$1,044,753 and net profit of \$221,429. Mining costs in 1920 were \$891,770, betterments, \$29,053 and freight and treatment \$621,462.**TEDDY MINING & MILLING CO., LTD.****IDAHO****Address:** J. B. Cox, sec., Kellogg, Shoshone county, Idaho.**Cap.** \$1,000,000; shares \$1 par; assessable. Last assessment, 1½ mills per share, levied Dec. 15, 1920.**Property:** 7 claims and a mill-site, 1 mile E. of Kellogg, shows 2 veins, 1 of above 15' width carrying copper ore with quartz gangue, and 1 of about 12 to 35' width, carrying silver-lead ore giving assays up to 12% lead and 30 oz. silver per ton.**Development:** by crosscut tunnels of 100' and 550', and total of 1,200' of workings.

Property operated by lessees at last account.

TERRIBLE EDITH MINE**IDAHO**

Address: Washington Snyder, Murray, Shoshone county, Idaho.

Property: 4 claims, 1½ miles E. of Murray.

Development: by 1,300' crosscut and 1,700' of drifting, opening lead-zinc ore of shipping grade. Several shipments of 50% ore were made, prior to 1916, and that years' output returned \$100,000. No recent information.

TORINO MINING CO.**IDAHO**

Address: Jos. F. Whelan, sec., 408 Sixth St., Wallace, Idaho.

Last assessment of 1 mill levied July 19, 1920.

Property: in Hunter district, near Mullan, Shoshone county, developed by 2 tunnels, said to contain lead-silver ore.

TREASURE MINES CO.**IDAHO**

Address: Bob Mabry, Mabry & Co., Hutton Bldg., Spokane, Wash.

Property: a gold mine in the Rocky Bar district, Elmore county, opened by tunnels, and said to have reserves valued at \$200,000.

TRI-METALLIC MINING CO., LTD.**IDAHO**

Address: Pardee, Idaho county, Idaho.

Officers: H. F. Bethmann, pres.; A. C. Jack, v. p.; F. M. Bethmann, sec.; E. F. Bethmann, treas.; William Jack, mgr.; Miles Johnson, cons. attorney.

Inc. in Idaho. Cap. \$250,000; \$1 par.

Property: 7 claims and a millsite, all patented, ½ mile N. W. of Pardee, in the Lolo mining district, near the N. P. R. R. Claims show a quartz vein in granite, the ore carrying copper carbonates and sulphides. Examined by Samuel Aughey.

Development: by 700' of shafts and tunnels. A 2-drill compressor is available. No recent work has been reported.

TUCKER MINING & MILLING CO.**IDAHO**

Address: Box 551, Wallace, Idaho.

Officers: Peter Bahn, pres. and gen. mgr.; J. Pearson, v. p.; W. Turner, sec.-treas., all directors.

Inc. June, 1908, in Idaho. Cap. \$1,000,000; \$1 par; assessable; 600,000 issued given in exchange for the property. Annual meeting in June.

Property: 6 claims, unpatented, 120 acres, in the Hunter district, Shoshone county, 3 miles E. of the Snowstorm and 7 miles E. of the Morning, shows Revett quartzite, cut by a diabase dike with veins, 1 to 4' in surface width, said to carry silver ore.

Development: by a 1,000' tunnel. A prospect.

TUNGSTEN HILL MINING CO.**IDAHO**

Address: C. D. Muxen, sec., Old Natl. Bank Bldg., Spokane, Wash.

Officers: Austin Ready, pres.; G. A. Henkel, v. p., with C. D. Muxen, F. P. Motie and A. E. Douglas, all of Spokane, directors.

Cap. \$50,000; shares 5c. par; assessable.

Property: 17 claims, formerly known as the Bull Moose group, in the Moyie-Yahkt district, Boundary county. Ore carries scheelité, gold, silver, and lead. The formation is diorite and serpentinite.

Development: by a 300' tunnel. Late in 1920, results were reported as encouraging.

Equipment: includes gas engine and compressor; a concentrating plant was planned at last accounts.

TUSCUMBIA MINING CO.**IDAHO**

Absorbed, 1918, by Sunshine Consolidated Mining Co., which see.

UNA MINING CO.**IDAHO**

Address: Ralston McCraig, sec., N. 1319 A. Ave., Spokane, Wash.

Inc. 1914. Cap. \$1,250,000; shares \$1 par; 650,000 issued; assessable.

Property: 3 claims, 4 miles west of Orogrande, shows a vein 10' wide, carrying pay streaks of a few inches to 5' thick. In the 40' shaft the ore is said to average \$7 per ton in gold, with some silver.

- Development:** by 1,100' tunnel which cut the vein, in 1919.
- UNITED LEAD CO.** **IDAHO**
Name changed to **Silverado Mining Co.**, which see.
- UNITED METALS & POWER CORPORATION** **IDAHO**
Address: Century Bldg., Pittsburgh, Pa.
Mine Office: Stanley, Ida. Walter Hovey Hill, Consulting Engineer.
Officers: J. C. Hungerman, Pres., E. L. Keally, Vice Pres., H. C. Curstead, Vice Pres., A. L. Schweibinz, Stc'y and Treas., with Dr. J. A. Stevens, J. I. Rogers, C. M. Hafer, M. E. Frazee, and W. P. Fowler, Directors.
Inc. April, 1918, in Delaware. **Cap.** \$5,000,000; \$5 par; 600,000 issued.
Property: Eight quartz claims six of which 111.2 acres, patent application. Five placers 100 acres, all contiguous, covering part of Sea Foam Mountain, in district same name, Custer County, Idaho.
Nearest rail Ketchum, 102 miles. In granite area, dikes, andesite, dioritic, and rhyolite. Four known veins. Shear zones. Ore replacement deposits. Gold ore, small silver values, 40% to 90% free recovery. Other deposits silver, lead, copper and gold.
Development: tunnels all on vein or in ore body. No equipment. Planning hydro-electric power and all sliming gold mill 50-ton capacity.
- UNITED MINES CO.** **IDAHO**
Office: 501 C. of C. Bldg., Spokane, Wash. **Mine office:** J. L. Magney, Fairfield, Idaho.
Officers: T. S. Griffith, pres.; E. J. Peterson, v. p.; L. J. Raef, sec.; Chas. Uhden, treas., with V. A. Johnson, E. A. Worswick, Jack Wallace, and J. C. Lawrence, directors.
Inc. May 17, 1916, in Washington. **Cap.** \$250,000; 25c par; 659,670 issued.
Property: 13 claims, 10 miles N. E. of Fairfield, Blaine county, said to show a fissure vein in granite, dipping 45° with N.-S. course. Shoots are 3 to 7' wide, 260' long and 150' deep. Ore is mostly sulphide, carrying pyrite, galena and chalcopyrite. Value in gold, silver, and copper is \$20 per ton.
Development: by 511' tunnel, opening to 157' depth with total of 1,800' of workings. Ore reserves estimated at 30,000 tons, 13,000 tons blocked out.
Equipment: 10-stamp mill, 2 concentrators, flotation plant, assay office sawmill, etc. No details available regarding operations, 1920-21.
- UNITED STATES SILVER-LEAD MINES CO.** **IDAHO**
Address: Jos. McCarthy, sec., Paulsen Bldg., Spokane, Wash. C. J. Diebrel, pres.; A. N. Nash, mgr.
Property: 11 lode claims, in the Eagle district, near the Jack Waite, 13 miles from rail at Prichard, Shoshone county. Veins are in quartzite, and ore carries lead and silver.
Development: by 2 tunnels, both 350' long. No. 1 opened 13" of 80% lead and 20 oz. silver ore. Late in 1920 a 7' vein was reported cut in the lower tunnel and 200' of drifting E. and W. was done in 1921.
Equipment: includes steam power, gasoline engine, compressor, etc.
- UNITY GOLD MINES CO.** **IDAHO**
Offices: Warren, Idaho county, Idaho, and 120 Broadway, New York.
Officers: James H. Hawley, pres.; Lorren M. Hart, v. p.; George C. Luebbers, treas.; Eduard C. Christensen, sec.; Jay A. Czizek, managing director, also directors.
Inc. April, 1916, in Delaware. **Cap.** \$2,500,000; \$5 par; 375,000 outstanding. Listed on New York Curb. Security Transfer & Registrar Co., New York, transfer agt. and registrar. Company has no debts, and has funds to bring property to production stage.
Property: 200 acres, patented, including the Little Giant and Charity mines, and 2 tunnel sites, each 3,000' long and 1,500' wide, crossing vein sys-

tem at right angles; all at town of Warren, Idaho county, 40 miles from Lakeport on O. S. L. Ry.

Geology: typical quartz veins occur in granite cut by later dikes of porphyry. Veins are step faulted, both by these dikes and by fault fissures. Shoots of free milling quartz occur, one in the Little Giant mine being 800' long, 3' thick, and averaging \$85 per ton for 5,500 tons milled. The ore shoot of Old Charity mine workings is 1,000' long, and averaged \$30 per ton. These shoots are faulted and were lost in old mine workings, but the deep crosscut drainage tunnel proves the shoot to persist in size and value down to that level 450' below old stopes. One vein cut in the tunnel carries high-grade tungsten ore.

Development: by 800' incline shaft and extensive lateral workings. Re-cross section driven beneath the old mine workings at a depth of 300' to 800' below the vein outcrop. This has opened up five veins each with stopping back of 300 to 500 ft. and crosscuts, raises and drifts expose the veins, and open up stoping ores. This tunnel will be extended 2,500' farther to crosscut five other known veins.

Production: in former years said to total \$1,200,000 from 150' backs stoped in the two mines; including the 5,500 tons from the Little Giant.

A scheelite vein was cut at 1,850' in main tunnel at a depth of 450'. A drift on it for 120' shows vein to be 3' wide. Ore was stripped for 40'. Product tested by Ledoux & Co., New York, shows 60% concentrate from crude ore. Analysis showed 75.8% tungstic acid; phosphorus, 0.005%; arsenic, 0.18%; copper, 0.05%. Recovery was 94.7%.

Equipment: hydro-electric power developed from water carried in ditch $4\frac{1}{2}$ miles, gives 238' head for driving compressors 50-ton stamp-mill, and tramming ore and waste through tunnel.

Company in 1921 acquired the Holte gold mine and cyanide mill in Marshall Lake district, Idaho county. Is regarded as a well managed property, which has solved the faultings, is now blocking out ore, and should soon be on a producing basis.

UTAH BELLEVUE MINES CO.

IDAHO

Address: J. H. Saxman, pres.-mgr., Bellevue, Idaho.

Cap. 500,000 shares; in treasury, 165,000. No bonded indebtedness.

Property: 3 claims in Wood River district, Blaine county. Veins carry gold-silver-lead-zinc ore.

Development: by 108' incline shaft and 500' crosscut tunnel, said to disclose a large orebody of milling grade. Some shipments have been made.

VALENTINE CINNABAR MINING CO.

IDAHO

Address: Black Pine, Cassia Co., Idaho.

Property: a group of claims on eastern slope of Black Pine mountains, $4\frac{1}{2}$ miles W. of Black Pine P. O., Cassia county.

VERDE MAY MINING CO.

IDAHO

Address: Charles Jackson, treas., Gem, Idaho.

Assessment of 1 cent a share due Jan. 6, 1921.

VIENNA-INTERNATIONAL MINING CO.

IDAHO

Address: R. A. Marshall, sec., Wallace, Idaho.

Officers: A. H. Featherstone, pres.; Geo. Moison, v. p.; R. A. Marshall, sec.-treas., with A. B. Livingston and Hugh Toole, directors.

Cap: \$1,500,000; shares \$1 par. Annual meeting first Tuesday in September.

Property: 6 claims, 3 patented; and a mill-site, near the mouth of Flora gulch, on Placer creek, 6 miles S. of Wallace, shows banded shales and quartzites of the middle part of the Newland formation, striking N. 50 to 60° W., dipping 70° S. Principal vein has a quartz-sidrite orebody, 3 to 5' wide with strike almost E.-W. and vertical dip. Ore on the dump shows galena, pyrite and chalcopyrite in a quartz-sidrite gangue of too poor a grade to be profitably concentrated.

Development: by a 400' shaft, and 2 tunnels of 700'. Mine was optioned to Spokane people in 1916, but the bond was forfeited in 1917; company then did a little more work, but finally suspended development in 1918.

VIRGINIA CONSOLIDATED GOLD MINING CO. IDAHO

Property leased to **Mines Developing & Leasing Co.**, which see.

WALLACE MINING, MILLING & REALTY CO. IDAHO

Address: G. G. Evans, sec.-treas., Wallace, Idaho.

Assessment of 1c. a share levied Oct. 23, 1920.

Property: 9 claims on Placer creek, alongside of city limits of Wallace, Shoshone county, said to show a big vein with scattered galena ore.

Development: by 2,000' tunnel, and total of 2,400' of workings. Several veins were reported cut in 1920.

WALL STREET MINING CO. IDAHO

Address: C. Fred Kratzer, sec.-treas., 519 Waverly Place, Spokane, Wash. C. A. Pooley, pres., Burke, Idaho.

Cap. \$1,250,000; \$1 par. **Assessment:** of 5 mills per share levied July 9, 1921.

Property: the Owatonna group, 19 claims, N. E. of the Morning and S. E. of the Hecla, developed by tunnels. A lower tunnel is being driven to cut the vein at depth of 600'.

WALTON MINES CO. IDAHO

Address: Geo. R. Colvin, mgr., Hailey, Idaho.

Cap. \$375,000; par 10¢. Property acquired for \$25,000.

Property: Lucky Point group of 4 claims, in Smoky district, 14 miles N. of Fairfield, Camas county. Sulphide ore occurs in a vein 2-4' wide, reported to contain gold, silver and lead.

Development: by 900' of tunnels.

Equipment: includes 50-ton mill, tramway and sawmill.

WARDNER LEASING CO. IDAHO

Address: J. D. Owen, Kellogg, Idaho.

Officers: R. A. Carnochan, pres.; D. W. Price, v. p.; J. D. Owen, sec.-treas., with C. E. Struthers, directors. W. A. Beaudry, mgr.

Inc. April, 1917, in Washington. **Cap.** \$500,000; increased to \$600,000 in 1918; \$1 par; assessable.

Company has a 2-year option, until 1922, on the holdings of the **Slavonian M. Co.** at Wardner.

WARDNER MINING CO. IDAHO

Succeeded by the **New Caledonia Cons. M. Co.**, which see.

WASHINGTON MINING CO. IDAHO

Address: C. A. Dettman, sec., Burke, Idaho.

Assessment of 2 mills per share levied July 13, 1921.

Property: east of Burke, Shoshone county, developed by 1,100' and 870' tunnels. Ore contains lead and silver. Development work was resumed in July, 1921.

WAVA MINING & MILLING CO. IDAHO

Address: J. D. Hedrick, Hailey, Idaho.

Inc. Sept., 1919 in Idaho. **Cap.** \$50,000; in 35,000 common and 15,000 preferred shares of \$1 par.

Officers: C. E. Gordon, pres.; Jack Edwards, v. p.; J. D. Hedrick, sec.; C. S. Shepherd, treas.

No information is given out as to property or operations.

WEILER MINE IDAHO

Address: H. W. Weiler, Mackay, Idaho.

Property: 6 claims, in Antelope district, Butte county, Idaho. Ore occurs in fissure and contact veins in porphyry and limestone, the veins varying up to 4' wide. Ore reported to assay 20% lead, 25 oz. silver, and up to \$1 gold per ton.

Development: 200' shaft and 5,000' workings. Reserves are estimated at 2,500 tons.

Equipment: 6-h. p. gasoline hoist.

WEIMER COPPER CO.**IDAHO**

Controlled by W. H. Timlin, Milwaukee, Wis.

Property: 18 claims, 360 acres, on Birch Creek, in Skull canyon district, 40 miles from Dubois, shows a crushed zone 100 to 200' thick between quartzite and limestone, which carries high-grade ore in pockets and in cross-fissures, of 3' to 2' width, running at right angles to the main contact deposit.

Development: by an open-cut and 2 tunnels of 300' each. A car of hand-sorted ore averaging 30% copper was reported shipped in August, 1921.

WEST COAST MINES CO.**IDAHO**

Address: H. J. Hibschan, Wellington Apts., Spokane, Wash.

Cap. \$500,000; shares \$1 par; non-assessable.

Property: 13 claims, the Pearl mine near Boise, Ada county, showing a vein of gold-silver ore, developed by 200' shaft and several hundred feet of lateral workings. Idle since 1917 for want of capital.

WESTERN STAR MINING CO.**IDAHO**

Address: Elmer Johnson, sec., Gyde-Taylor Bldg., Wallace, Idaho.

No. 4 assessment, of 4 mills per share, levied Dec. 8, 1920.

Property: 6 claims in Big Creek section, Coeur d'Alene district, Shoshone county. Ore contains copper and silver.

Development: by 2,000' of workings.

WESTERN UNION MINING CO.**IDAHO**

Is a reorganization of Aurora-Sampson and H. E. M. companies.

Address: Ben L. Collins, sec.-mgr., 1109 Paulsen Bldg., Spokane, Wash.

Officers: D. H. Anderson, pres.; Eric Hagman, v. p.; B. L. Collins, sec.; J. F. Austin, Tacoma; J. E. Burbank, Cheney, Wash.; H. D. Winchester, Wm. Holm, Geo. W. Allen, directors.

Inc. Jan. 1916, in Idaho. **Cap.** \$200,000 10¢ par; 1,800,000 shares issued; assessable. Last levy of 5 mills per share was payable July 15, 1920.

Financial report to June 1, 1921 showed receipts from assessment No. 4 \$9,995; receipts from royalties, \$8,932; expenditures include, development, \$7,199; right of way and tunnel site, \$2,000; surplus, \$4,810.

Property: 20 claims, 2½ miles N. W. of Wallace, known as Aurora-Sampson and H. E. M. groups, carries fissure veins in quartzite and slate.

Development: aggregates over 9,000'; the main tunnel is 4,900' long, 2,300' as a crosscut, the remainder a drift on the vein. The mine is operated by five sets of lessees.

Production: by lessees from Nov., 1920, to July, 1921, amounted to 666 tons, netting \$35,725. Shipments averaged 40.86 oz. silver and 50% lead. Company receives 25% royalty on net smelter returns.

WEST HECLA MINING CO.**IDAHO**

Office: 601 Empire State Bldg., Spokane, Wash.

Officers: Morton Webster, pres.; J. V. Pohlman, sec.-treas., with A. A. Booth and T. A. Russell, directors.

Inc. in Washington. **Cap.** \$1,500,000; shares \$1 par; assessable; 1,450,000 issued.

Property: 3 patented claims opposite the Hecla mine, Burke, Shoshone county.

In Sept., 1917, company was prospecting in quartzite for the Hecla lead-silver vein. Workings to depth of 650' totaled 1,750'. Idle since 1917.

WEST HUNTER MINING CO.**IDAHO**

Address: J. L. Martin, Mullan, Idaho.

Officers: E. T. Davey, pres.; T. B. Cosgrove, v. p.; J. L. Martin, sec.-treas.; with Mike Murray, P. J. Sweeney, J. H. Hunter, directors.

Cap. \$1,500,000; 10c. par; assessable.

Property: 2 patented, 10 unpatented claims about one-half mile from Mullan, Shoshone county, adjoining the You Like mine on the E. and the Gold Hunter on the W.

Development: by two tunnels, 300' and 600' in length, with about 1,200' of workings. A crosscut was driven from No. 3 tunnel of the American Commander and a 200' drift run on a 12' vein containing silver-lead, and said to be the extension of the You Like vein.

Equipment: compressor, black-smith shop and dwellings. Development work financed by sale of treasury stock.

WEST NINE MILE MINING CO.

IDAHO

Address: Chas. Heilbronner, pres. and gen. mgr., Wallace, Idaho. H. C. McAllister, treas.

Cap. \$1,000,000; shares \$1 par; assessable.

Property: 4 claims west of the Success and Alhambra mines on west fork of Nine Mile creek, Shoshone county.

Development: by 700' tunnel that shows a vein said to carry occasional bunches of ore. Only assessment work being done at last advice.

WEST SUNSET MINING CO.

IDAHO

Controlled by the Day interests.

Address: Jerome J. Day, P. O. Box 328, Wallace, Idaho.

Property: the Portland mine, in Nine Mile section, Coeur d'Alene district. Ore contains silver and lead. A drift is being extended on the 1,000' level of the adjoining Sunset mine, (owned by Senator Clark), into West Sunset ground.

WILBERT ANNEX MINING CO.

IDAHO

Bought out, 1919 by Wilbert Mining Co., which see.

WILBERT MINING CO., LTD.

IDAHO

Office: 222 Kearns Bldg., Salt Lake City, Utah.

Officers: A. S. Ross, pres. and gen. mgr.; J. A. Foley, sec.-treas.; D. J. Lennion, supt.

Inc. 1907, in Utah. **Cap.** \$1,000,000; shares \$1 par; assessable; increased to \$2,000,000 in February, 1918. Annual meeting in May. Stock transferred at company's office. Listed on Salt Lake Stock Exchange and New York Curb. U. S. Corporation Co., New York, transfer office. Assessment No. 5 of 1 cent per share was levied June, 1919.

Dividends: \$10,000, Nov. 15, 1915; \$40,000 in 1916; and \$40,000 in 1917, and \$30,000 in 1918.

Financial Statement, years ending May 1:

Year	Revenue	Expenses	Dividends	Cash Balance
1918.....	\$165,961	\$135,961	\$30,000	\$925
1917.....	181,389	128,475	40,000	12,914
1916.....	40,000	42,467

Property: 16 patented claims, plus those of the Wilbert Annex, in the Dome mining district, 40 miles from Arco, Butte county.

Geology: the claims show Cambrian quartzite cut by a fissure vein that contains lead and silver ore, mostly of concentrating grade. The top of the vein has been folded into a nearly horizontal bed, worked by quarrying. The main ore-shoot has been followed to a depth of 800' and is stoped out from No. 5 level to the surface.

Development: by 800' incline shaft and extensive lateral workings. Recent work has been concentrated on the 500' level.

Equipment: most of the surface plant, including a 100-ton mill, was burned in August, 1918.

Production: for year ending May 1, 1916, was 15,204 tons crude ore, assaying 25% lead and 3.86 oz. silver, which yielded by sorting and concentration, 5,787 tons, assaying 52% lead and 8 oz. silver. Costs were \$3.56 per ton.

In 1916-17, the mill treated 6,981 tons of 18.7% lead and 4.9 oz. silver ore, yielding 1,758 tons of concentrate assaying 54.2% lead and 15.3 oz. sil-

ver. Extraction was 72.9% and 78.6%, respectively. Milling costs were \$1.89 per ton.

WILLOW CREEK MINING CO.**IDAHO**

Address: Andrew Hedin, pres., Mullan, Idaho.

Property: 8 claims between the Carney Copper and Reindeer-Queen mines, on the northern slope of Stevens peak, 4 miles from Mullan. Veins are in quartzite, and ore contains lead and silver.

Development: by a crosscut tunnel started in Carney ground. It is to be driven about 1,000' to reach a depth of 700'. The length was 500' by mid-1920.

WISCONSIN MINING CO.**IDAHO**

Address: W. O. Straight, sec., Kellogg, Idaho. Louis Bolduc, pres.-mgr.

Inc. 1912. Cap. \$1,500,000; \$1 par; assessable. Company is practically the successor of the Gold Leaf Consolidated Mines and the Coeur d'Alene Consolidated Mining Co., the shares of the old companies being made transferable share for share in the new company, upon payment of back assessments. Three mills per share was levied in June, 1920.

Property: 4 claims, unpatented, 2½ miles east of Kellogg, has 800' of tunnels and crosscuts and one 90' vertical shaft, developing a vein of 5 to 6' width, carrying copper ore and a little lead.

Equipment: includes a 2-drill compressor, run by water power from Moon creek, and a hoist. Idle.

WISE BOY GROUP**IDAHO**

Address: E. W. Oliver, Grangeville, Idaho.

Property: 5 claims, 3 patented, in northern part of Buffalo Hump district, Idaho county, 50 miles by road from Grangeville. Surface exposures are said to be promising.

Development: a 500' crosscut tunnel and a 200' shaft. A drift on the vein for 700' north and 200' south from bottom of shaft exposes an average thickness of 7' of ore estimated to run \$20 gold per ton. Owing to litigation, mine was closed or 15 years, so that timbering, 10-stamp mill, boiler, engine-building, etc., require considerable overhauling. Dumps are said to contain \$25,000 of free-milling ore.

WONDERFUL MINING CO., LTD.**IDAHO**

Office: A. H. Featherstone, sec.-treas., Otterson Bldg., Wallace, Idaho.

Officers: W. H. Holden, pres.; with John Taylor, A. H. Featherstone, and H. E. Howes, directors.

Cap. \$1,500,000; \$1 par; assessable.

Property: 3 patented and 6 unpatented claims, in the St. Joe district, near Mullan, Shoshone county, Idaho, W. of the Bullion mine, on the eastern slope of Stevens peak. Ore carries lead and copper, the former predominating.

Development: by 2 tunnels, 200' apart, and about 2,000' long.

YANKEE BOY MINING CO.**IDAHO**

Out of business. Consolidated in 1920 with the Yankee Girl Mining Co., as **Sunshine Mng. Co.**, which see.

YANKEE GIRL MINING CO.**IDAHO**

Consolidated in 1920 with Yankee Boy Mng. Co., as **Sunshine Mng. Co.**, which see.

YELLOW JACKET GOLD MINING CO.**IDAHO**

Reorganized, 1914, as **Mandarin Mines Corp.**, which see.

YELLOW PINE QUICKSILVER MINING CO.**IDAHO**

Office: 822 Main St., Boise, Idaho.

Officers: J. E. Fox, pres.; J. A. Marks, v. p.; G. G. Adams, sec.; Wm. McIntyre, treas., with O. R. Call, directors.

Inc May 24, 1918, in Idaho. Cap. \$1,000,000; \$1 par; assessable. Annual meeting, May 24.

Property: 4 claims being patented in Yellow Pine district of Valley

county. Examined by W. H. Hill. The deposit is in quartzite and limestone, and carries from 2 to 10% mercury.

Development: by 100' tunnel, to be extended 300'. About \$8,000 was spent during 1918. A 25 or 50-ton furnace was contemplated.

ILLINOIS

The metal mine output of Illinois is practically confined to lead and zinc ores. These come from two distinct areas of very different geologic character. Those of northern Illinois occur in gently folded dolomite and limestone (Galena and Platteville beds) of Ordovician age. The deposits of Hardon and Pope counties occur with fluorite in fissure veins, controlled by jointing and faulting in Mississippi limestone, in the northern extension of the Kentucky fluorspar regions.

Zinc, lead, and silver recoverable from ores mined in northern and southern Illinois during 1920 were valued at \$1,052,450, compared with \$1,219,151 in 1919. The tenor of the ore in the northern fields may be judged from the following.

	1919	1920
Crude ore, tons.....	404,000	312,000
Zinc, per cent.....	2.07	1.87
Lead, per cent.....	0.40	0.26
Zinc in concentrates, per cent.....	33.50	32.40
Lead in concentrate, per cent.....	74.50	74.80
Value of zinc concentrate, per ton.....	\$19.63	\$22.03
Value of lead concentrate, per ton.....	63.51	81.21

As the lead-zinc output of the southern Illinois area is procured as a by-product to the fluorite industry, it is not included in the above figures. See U. S. G. S. Mineral Resources, 1920, Pt. 1, page 120.

AMERICAN ZINC CO. OF ILL.

ILLINOIS

A subsidiary of the Amer. Z. L. & Sm. Co. and described under that title. Operates a zinc smelter at Hillsboro, Ill.

BLEWETT MINING CO.

ILLINOIS

Office: Galena, Ill.

Officers: J. H. Billingsly, pres.-mgr.; J. W. Westwick, v. p.; R. I. McKee, sec.-treas.

Inc. April, 1918, in Illinois. Cap. \$100,000; \$100 par. Company is financed by the Burr Mining Co.

Property: 60 acres of zinc-lead land, 1½ miles N. W. of Galena.

Development: 230' shaft to be sunk. **Equipment:** mill handling 200 tons of ore each 10-hour shift. Was the third largest producer of sphalerite of the State in 1920.

BURR MINING CO.

ILLINOIS

Address: Connersville, Ind. Controls the Blewett Mng. Co., which see.

Officers: F. C. Bosler, pres.; Jos. R. Mountain, v. p.; P. H. Kinsler, sec.-treas.; J. H. Billingsly, gn. mgr., Galena, Ill.; with J. H. Banghman, directors. F. J. Dewilde, cons. engr.

Inc. in Indiana and Wisconsin. Cap. \$30,000; shares \$100 par.

Property: the Treganza lease, 40 acres mineralized land, near Galena, Ill. A 165' shaft develops sheet-ground formation.

COLLINSVILLE ZINC CORPORATION

ILLINOIS

Address: 1000 Times Bldg., St. Louis, Mo., or Collinsville, Ill.

Officers: O. F. Mesiter, pres.; A. F. Versen, v. p.-gen. mgr.; R. W. Barrell, treas.; J. T. Williams, Jr., sec., with W. R. Wild, H. W. Schulz, Jos. Carr and C. D. Lukens, directors. Schuyler Frazier, supt.

Inc. 1918, in Delaware. Cap. 10,000 shares; no par value; 5,000 shares

outstanding. In January, 1919, company authorized \$500,000, 7% first mortgage, convertible gold bonds, due January, 1929; \$415,000 outstanding.

Property: the Lost Mill mine of 80 acres at Moselle, Missouri, estimated to contain 300,000 tons of zinc-lead ore and barite. Also a smelter at Collinsville, Ill., of 50 tons daily capacity of metallic zinc, complete in every detail. The original plant was erected in 1873.

Object of the bond issue was to equip a quarter of the smelter for the manufacture of 30 tons of lithopone daily. The demand for this pigment (mixture of 70% barium sulphate and 30% zinc sulphide) is reported large and increasing.

FAIRVIEW FLUORSPAR & LEAD CO.

ILLINOIS

Address: Rosiclare, Ill. W. C. Bohn, gen. mgr., Rosiclare; S. E. Herl, supt. Golconda, Ill.

Officers: J. M. Blayne, pres.; E. P. Raab, v. p.; D. W. Vayles, sec., with W. H. Saunders, Hugo Eysell and R. A. Griffin, directors.

Inc. in Ill. Cap. \$550,000.

Property: includes the Good Hope and Extension mines 800 acres at Rosiclare, Hardin county, Ill. and Crittenden county, Ken. The Good Hope, or Fairview-Rosiclare vein, first developed in 1862, is the largest of its type in America. It is a true fault-fissure, between walls of limestone and sandstone. The vein dips almost vertical and strikes N.-S. Fluorspar occurs in lenticular masses, from 2 to 30' wide, in a gangue of calcite with a little lead and zinc. Orebody continuous into Rosiclare Co. ground.

Development: by 4 shafts, deepest 500', and extensive workings on the 200 and 500' levels. The shrinkage system of stoping is generally employed. Water is troublesome, and there is danger from flooding.

Equipment: complete with electric power, 6 pumps with total capacity of 7,000 g. p. m., electric locomotives underground, hoist, compressor etc. The mill, of 50-ton an hour capacity includes washer, picking-belt, crusher, rolls, trommels, classifiers, and jigs. A lead concentrate is made carrying up to 80% metal and 8 oz. of silver per ton.

Property closed down, February, 1921, owing to lack of demand for fluorspar.

Production: in 1919, 47,604 tons; 1920, 47,334 tons; 1921, 6,484 tons; or a total of 101,422 tons, of ore carrying 40 lb. lead per ton.

FEDERAL LEAD CO.

ILLINOIS

Subsidiary of the American Smelters Securities Co.

Office: 120 Broadway, New York. **Works address:** Rudolph Porter, mgr., Federal, Ill.

Operates a smelter with an annual capacity of 96,000 tons of pig lead. Also owns lead mines in **Missouri**; see thereunder for description.

FRONTIER MINING CO.

ILLINOIS

Office: Fletcher Trust Bldg., Indianapolis, Ind.

Mines at Galena, Ill. See description under Wisconsin.

GREAT WESTERN LEAD MANUFACTURING CO.

ILLINOIS

Idle and letters returned unclaimed from Galena, Ill.

Property: the Pittsburgh lead mine was the second largest producer in northern Illinois. Workings are down 140' and a 100-ton mill was operated at last report (1919).

GREAT WESTERN SMELTING & REFINING CO.

ILLINOIS

Office: 41st and Wallace Sts., Chicago, Ill.

Officers: Ivan Reitler, pres.; Zachariah Lippe, sec.; Joseph Mathes, treas., with David Blum, Emile Benjamin, A. Glanz and Adolph Saltzer, directors. Charles Granberg, supt.

Inc. in Ill. Cap. \$7,500,000; all outstanding.

Company is a smelter and refiner of metals, mostly secondary material, and has branches at Atlanta, Cincinnati, Cleveland, Detroit, Kansas City, Mo., New York, Pittsburgh, Minneapolis, Portland, Ore., St. Louis, San Fran-

cisco, Los Angeles, Seattle and Vancouver, B. C. The copper furnaces at Chicago have a capacity of 7,000 tons per annum.

HEGELER ZINC CO.

ILLINOIS

Operates a zinc smelter at Danville, Ill.

HILLSIDE FLUORSPAR & LEAD MINING CO.

ILLINOIS

Address: Rosiclare, Ill.

In 1920, was opening a new mine and building a concentrator, near Rosiclare.

ILLINOIS ZINC CO.

ILLINOIS

Address: E. H. Wolff, Peru, Ill. Eastern sales office: 280 Broadway, New York.

Company operates a zinc smelter at Peru and manufactures brass, slab zinc and sulphuric acid. All operations were suspended early in 1921. Has been one of the best buyers of Wisconsin zinc ores for years. Employs 1,000 men at zinc, acid and sheet mills, and its coal mines, when operating at normal capacity.

JOPLIN SEPARATING CO.

ILLINOIS

Address: Galena, Ill.

Company has a roasting and magnetic separation plant of 50 tons capacity in 10 hours. Mill product carrying 16 to 40% zinc is partly roasted (without sizing) in a rotary tube, and then passed through a Cleveland-Knowles separator, which gives a 58% product.

LANYON ZINC & ACID CO., R. H.

ILLINOIS

Property: a zinc smelter at Hillsboro, Ill.

MATTHIESSEN & HEGELER ZINC CO.

ILLINOIS

Office: La Salle, Ill.

Officers: Jos. Brennemann, pres.; C. B. Lihme, v. p.; Geo. P. Blow, sec., with M. H. Carus, F. W. Mathiessen and F. O. Wetmore, directors. H. C. Nichol, treas.

Owens and operates large zinc oxide and spelter furnaces, etc., and is a noted buyer of pure and high-grade zinc ores from the Missouri-Oklahoma and Wisconsin fields. Is also a manufacturer of sulphuric acid, zinc sheet, plate and ribbon.

Company also has a mine in Illinois, producing coal for use at its smelters. Officers of the subsidiary are Joseph Brennemann, pres.; G. B. Blow, v. p.; C. B. Lihme, sec.; H. C. Nichol, treas.; M. A. Field, mgr. and D. McCrindle, supt.

Reported to be controlled by Schwab interests since Jan., 1921.

MINERAL POINT ZINC CO.

ILLINOIS

Subsidiary of the **New Jersey Zinc Co.**, 160 Front St., New York.

Among other activities, operates a zinc smelter at Depue. See description of mines under company's name in Wisconsin section of this volume.

NATIONAL ZINC CO., INC.

ILLINOIS

Subsidiary of **International Minerals and Metals Corp.**, which see.

Address: Springfield, Ill.

Operates a zinc custom smelter at above address, of 7 blocks with a total of 4,480 retorts, and an acid plant. Plant closed during 1921.

See also description of zinc smelter at Bartlesville under Oklahoma and of acid plant at Argentine, Kansas.

NORTHWESTERN MINING CO.

ILLINOIS

Out of business. Described in Vol. XIV.

OHIO VALLEY FLUORSPAR CO.

ILLINOIS

Address: care E. P. Earle, 165 Broadway, New York City.

PIGMY MINING CO.

ILLINOIS

Owned by Rosiclare Lead & Fluorspar Co. Address: Rosiclare, Ky.

ROSICLARE LEAD & FLUORSPAR MINING CO.

ILLINOIS

Address: Mills Bldg., Washington, D. C. Mine address: Rosiclare, Ill.

Officers: Benedict Crowell, pres., 407 Perry Payne Bldg., Cleveland, O.;

Edw. B. McLean, v. p.; F. H. Bugher, sec.-treas. W. P. Hanson, gen. mgr.; E. C. Clark, supt.

Property: at Rosiclare, Hardin county, is the largest fluorspar mine in the world. Developed to depth of 620' and equipped with 500-ton mill, designed to save lead and zinc, by jigs and tables.

ST. LOUIS SMELTING & REFINING CO. ILLINOIS
Subsidiary of National Lead Co.

Works address: Collinsville, Ill.

Operates a lead smelter and refinery. For further details, see same title under Oklahoma.

SANDOVAL ZINC CO. ILLINOIS

Operates a zinc smelter at Sandoval, Ill.

SPAR MOUNTAIN MINING CO. ILLINOIS

Address: Martin Schwerin, mgr., Cave-in-Rock, Ill.; John W. H. Blee, supt.

Officers: A. H. Strong, pres., 120 Broadway, New York; Chas. J. W. Mackelvey, sec.

Inc. in Delaware.

Property: a fluorspar mine at Cave-in-Rock, developed by 600' tunnel, with 5,000' of drifts and crosscuts. Equipped with hoist, compressor, and 120-ton mill. Galena does not apparently occur as in the case of some Illinois fluorspar mines.

VINEGAR HILL ZINC CO. ILLINOIS

Address: Platteville, Wisconsin.

See description under this title in Wisconsin section, this volume.

WISCONSIN ZINC CO. ILLINOIS

Subsidiary of the American Zinc, Lead & Smelting Co., 55 Congress St., Boston, Mass.

Address: Platteville, Wisconsin.

Property: the Birbeck zinc mine in the Galena district, northern Illinois.

INDIANA

AMERICAN ZINC PRODUCTS CO. INDIANA

Office: Greencastle, Ind.

Officers: W. A. Taylor, chairman; C. W. Martin, pres.; C. C. Stewart, v. p.; C. H. Stewart, sec.

Inc. in Ohio. Cap. \$1,400,000.

Works: modern zinc-rolling mill on Pennsylvania railroad, with monthly capacity of 1,000 to 1,500 tons of zinc plates and sheets. Described by J. H. Dietz in "E. & M. Journal" of Nov. 2, 1918.

GRASSELLI CHEMICAL CO., THE INDIANA

Address: Terre Haute, Ind.

A zinc smelter and acid plant. See company under U. S. section.

GRASSELLI REFINERY INDIANA

See U. S. S. Lead Refinery, Inc., of Indiana.

INTERNATIONAL LEAD REFINING CO. INDIANA

Subsidiary of the Anaconda Copper Mng. Co.

Works address: G. P. Hulst, supt., East Chicago, Ind.

Operates a lead refinery; see under International Smelting Co. for description.

U. S. S. LEAD REFINERY, INC. INDIANA

Also known as the "Grasselli Refinery".

Works address: F. Y. Robertson, pres., East Chicago, Indiana. Operates a custom electrolytic lead refinery. Is a subsidiary of the U. S. Smelting, Refining & Mining Co., which see for details.

KANSAS

For Kansas see Tri-State district under Missouri.

KENTUCKY

Lead and zinc ores occur in both central and western Kentucky, the latter being the well known fluorspar region that extends into Illinois. Production for 1920 was 172 tons of lead concentrate, containing 122 tons of lead valued at \$12,295, and 25 tons of zinc carbonate valued at \$1,458. This is the lowest production for many years.

AMERICAN SPAR CO.

KENTUCKY

Address: Salem, Livingston Co., Kentucky.

Operated the Hudson mine, owned by the Eagle fluorspar Co., during 1920, but made no shipments.

KENTUCKY FLUORSPAR CO.

KENTUCKY

Address: care C. W. Haynes, Marion, Ky.

PERSON, J. M.

KENTUCKY

Address: Marion, Ky.

Operated several properties in 1920-1921.

ROBERTS FLUORSPAR & LEAD CO.

KENTUCKY

Address: Marion, Kentucky.

MAINE

DOUGLAS COPPER MINE

MAINE

Address: Blue Hill, Hancock Co., Maine. Was operated by American Smelting & Refining Co. for the 60,000 tons of fluxing ore developed on property, but was closed early in 1919. Mining was done through a 300' inclined shaft. The silicious chalcopyrite ore was treated by flotation in a 125-ton mill. It yielded well in copper, with a little gold and silver.

PISCATAQUIS IRON CO.

MAINE

Address: Frederick Hill, pres.; Bangor House, Bangor, Maine.

Property: the Katahdin iron mine, on the Bangor and Aroostock railway, in Piscataquis county, Maine, 85 miles from tidewater. Examined late in 1917 by E. S. Bastin for U. S. Geological Survey. Under option to J. S. Morris 206 Spring Street, Portland, Maine. Mine was worked from 1846 until 1890 for iron ore, the gossan being mined. Beneath this is an orebody, 300' to 700' wide and 2,300' long, estimated to contain 5,000,000 tons of pyrrhotite, running 42 to 50% iron and 26 to 35% sulphur. It was proposed to extract the ore by quarrying, and sell it for its sulphur content. Total costs of delivering ore to New York or nearby were estimated at \$4 per ton under conditions prevailing in 1918 and \$2.90 for normal times.

MARYLAND

BALTIMORE COPPER SM. & ROLLING CO.

MARYLAND

Address: W. H. Pierce, gen. mgr., Baltimore Copper Works, Fourth Ave. and Fifth St., Canton Baltimore, Md.

Officers: Wm. H. Peirce, pres.; F. H. Brownell, v. p.; H. A. Thoman, sec.; Chas. N. Sappington, treas. Company succeeded the Baltimore & Cuba Smelting & Refining Co., which built the first American copper smelter, 1845, and is controlled, through stock ownership, by American Smelters Securities Co., a subsidiary of the A. S. & R. Co.

Lands: 45 acres, located on one of the best harbors of the Atlantic seaboard, with direct rail connections, being advantageously located for both domestic and foreign business. The plant is large and modern, including a nickel refinery, electrolytic plant, and sheet copper rolling mill. The electrolytic refinery, of 1,000 tons daily capacity, has anodes arranged on both series and multiple plan. Material treated is entirely auriferous and argentiferous, being received in the form of blister copper from various western states, and from several foreign countries. Works normally employ about 3,000 men.

CHROME MINING CO.**MARYLAND****Address:** Lee W. Squier, sec., Finance Bldg., Philadelphia, Pa.**Property:** the State Line mine in Cecil county, near Rock Springs. This old property was unwatered in 1918 by present company. Producing in 1920.**GREAT FALLS MINE****MARYLAND**

Formerly called the Hill-Townsend gold mine, in Montgomery county, Md. In 1914 the old workings were cleaned out, the shaft re-timbered and new drifts run. The 25-ton tube mill was only used to make tests of ore mined.

MARYLAND CHROME CORPORATION**MARYLAND****Address:** F. A. Dolfield, pres., Canton National Bank Bldg., Baltimore, Md.**Property:** chrome deposit, 4 miles W. of Owings Mills, and 15 miles N. W. of Baltimore, owned by the Tyson Mining Co. Was the first chrome mine of this country, opened in 1827.**TYSON MINING CO.****MARYLAND****Address:** W. H. Pleasants, Tyson Estate, Baltimore, Md. See under California for further details. Maryland holdings operated by Maryland Chrome Corporation.**UNITED M. M. & COPPER SM. CO.****MD. AND PENNSYLVANIA****Idle Office:** Frederick, Md. Mines at New London, Md., and Charmian, Pa. A. L. Wickart, sec., Allentown, Pa.**Inc. 1913, in New Jersey, as a merger of the Eagle Metallic Copper Co. and the Linganore Copper Co., now dead. Owns all the property of Linganore C. Co. Cap. \$2,000,000.****Property:** 806 acres, in 2 groups, include the Dolly Hyde, New London, and Eagle mines, on the Western Maryland and Baltimore & Ohio railroads.

The Dolly Hyde mine, 220 acres, was for many years the principal copper property of Maryland, though never a large producer. The mine has contact deposits in dolomite and phyllite, carrying a little malachite in the upper workings, succeeded at shallow depth by bornite and chalcocopyrite in white marble.

The New London or Linganore mine, 86 acres, with 14 acres of timber land, was opened and worked 1835-55, apparently at a profit, and was idle after 1881, until reopened, May, 1907, but is again idle. The property has two 4 to 5' fissure veins in slate, with N.-E. strike, carrying bornite and gray copper, estimated to average 3% copper and 16 oz. silver per ton, with a trace of gold. Development is by a 250' shaft and 4 tunnels, longest 340', with a total of 1,095' of workings, estimated to block out 17,307 tons of ore for stoping.

The New London mine has a 65-h. p. steam plant, with a 35-h. p. hoist, good for 500' depth, and an 8-drill air compressor. There are 12 buildings.

The mill, 40x25' in size, consisting of a ball mill and slime tables, was built in 1911.

The Eagle mine comprises 500 acres near Charmian, including an old copper mine, never successfully worked. Property shows a mineralized zone of 400' average width, carrying native copper, chalcocite, bornite, chalcocopyrite and tetrahedrite, averaging about 2 oz. silver per ton, with

traces of gold. Mine has a 480' shaft at 40° incline, in ore from surface, giving assay up to 6% copper, but is worked opencast.

Equipment: includes a 175-ton smelter and 150-h. p. steam plant.

MASSACHUSETTS

DAVIS SULPHUR ORE CO.

MASSACHUSETTS

Address: C. B. Stranahan, pres., 65 Wall St., New York.

Inc: 1907, in New York. **Cap.** \$25,000; \$100 par; all issued.

Property: an old and long-worked pyrite mine at Davis, Franklin county, Mass., idle several years.

MERRIMAC DEVELOPMENT CO.

MASSACHUSETTS

Address: T. C. Woodworth, pres., Newbury, Mass. Walter Norris, supt.

Property: old Chipman mine, at Highfield, 3 miles S. W. of Newbury, Essex county, and 32 miles from Boston, reopened in 1919. The Chipman lode is the principal orebody. It is a replacement vein containing galena and pyrite, with some tetrahedrite, chalcopyrite, sphalerite and bornite.

Development: by 220' shaft and 2,100' of workings. The shaft is to be sunk 300' further. A carload of lead-sulphide ore containing gold and silver returned \$67 per ton.

Equipment: steam power, hoist, compressor, etc.

NEW ENGLAND MINING CO.

MASSACHUSETTS

Office: 35 School St., Greenfield, Mass. **Mine office:** Chalemont, Franklin county, Mass. Othello A. Fay, pres.; E. Forrest Sweet, sec.; Capt. Geo. H. Davenport treas. and gen. mgr., at last accounts.

Inc. 1902. **Cap.** \$500,000; shares \$5 par.

Property: about 1,000 acres, 2 miles west of the Davis pyrite mine. Vein traceable 700', is approximately vertical, conforming closely in dip and strike with the Savoy schist in which it occurs. Deposit apparently is a fahlband, lacking well-defined walls, ore occurring scattered through 15 to 20' of the schist, with 6 to 12" of quartz, well mineralized, on the south wall, and a heavy impregnation of chalcopyrite, 1 to 2" wide, on the north wall. Property has been partly stripped, and vein trenched across. Idle.

MICHIGAN

Michigan contains the oldest iron and copper mines of the country, in continuous operation for three quarters of a century and still producing. The mining companies are described alphabetically and not grouped—as heretofore—geographically, or by metal content.

The copper production for 1920 was 154,695,073 lbs. copper and 470,189 oz. silver of a total value of \$28,976,399, compared with 178,826,486 lbs. copper and 441,430 oz. silver of a total value of \$33,756,128 in 1919; of \$56,-527,619 in 1918 and \$70,376,231 in 1917, the record production.

Normally, the American production of iron ore is about 60,000,000 tons, but was only 35,349,876 tons in 1920. Of this, the Lake Superior region contributes 85%, Michigan accounting for 25%. There are three iron ranges or districts in Michigan, namely the Gogebic, Marquette and Menominee. Part of Gogebic is in Wisconsin, but the most important, section is in Michigan. The iron formation rests on quartzite, cut by igneous dikes. The ores are mostly soft, red hematites, carrying 54% iron, 0.03% phosphorus, and 6% silica. Some of the mines are over 2,000 feet deep.

The Marquette range is smaller than the others. The formation lies in quartzite and greenstone, and is cut by dikes. The ores are massive or micaceous hematite (rarely magnetite) similar to those of the Gogebic area, but carry 60% iron, 0.5% phosphorus, and 7% silica. The mines are also deep, down to 2,200 feet. The Menominee range though usually considered a

Michigan district, is partly in Wisconsin. In Michigan, the productive formation occurs in steeply-dipping narrow belts, resting on dolomite and overlain by slate. The ores are soft, bluish-black hematites containing 55% iron, 0.6% phosphorus, and 5% silica. Mining is conducted to a depth of below 1,500 feet.

From the various ranges the ore is transported by rail to docks on Lake Superior, carried by steamer to lower points, and then by rail to furnaces at Pittsburg and other centers.

ADVENTURE CONSOLIDATED COPPER CO. MICHIGAN

Office: 52 Broadway, New York. Mine office: Greenland, Ontonagon county, Mich.

Officers: W. Parsons Todd, pres.; W. A. O. Paul, sec.-treas.; Chas. J. Devereaux, W. R. Todd, Jas. L. Bishop, J. S. Dunstan and Chas. D. Hanchette, directors; E. W. Walker, supt.

Inc. Oct. 17, 1898, in Michigan. Cap. \$2,500,000; shares \$25 par; paid in, \$24. American Trust Co., Boston, registrar; Old Colony Trust Co., Boston, transfer agt. Annual meeting, first Thursday after first Wednesday in June. Stock listed on Boston Stock Exchange.

An assessment of \$1 per share was levied July 20, 1911, and again in March, 1916. On December 31, 1918, debit balance was \$11,295, which compared with \$11,892 on December, 1917, and \$53,784 credit balance on December, 1916. Gross receipts for 1918 totals \$14,436 and expenses were \$13,839, which compares with gross of \$205,832 and expenses of \$271,506 in 1917. The 1918 receipts came from rent, and sale of copper and silver on hand. In 1919, revenue was \$4,942 and expenses \$13,417. Current assets at end of 1919 were \$17,095 and liabilities \$36,865; balance of liabilities over assets, \$19,770.

Property: consists of 3 old mines, the Adventure, Knowlton and Hilton opened in 1850, 1853 and 1863 respectively, 1,696 acres on the mineral belt, also a mill site on Lake Superior. The mineral lands are located in Secs. 35 and 36, T. 51 N., R. 38 W., and in Secs. 1 and 2, T. 50 N., R. 39 W. The tract is surrounded by the Toltec, South Lake and Mass ground. The village of Greenland lies on the northwestern corner of the Adventure's principal tract, and the village of Maple Grove, controlled by the company is near the mine.

The old Adventure mine was opened 1850, along a line of ancient pits showing prehistoric mining. The largest annual production was 233,941 lbs, fine copper, 1857. After being closed by owners, the old openings were worked for years by tributors, proving notably rich in silver.

The Hilton, or Ohio mine, opened 1863, on the Mass lode was never worked vigorously. The Knowlton was opened in 1853. These three old mines made 1,949,173 lbs. fine copper, previous to their merging as the Adventure Consolidated which started work November 1, 1898.

The Adventure property is crossed by the Evergreen belt of Ontonagon county, a series of upturned beds of trap, amygdaloid and conglomerate, 7 of these amygdaloidal beds carrying copper on the Adventure tract in a distance of 1,200'.

The cupriferous beds of the Evergreen belt though very rich in places are bunched. On the Adventure tract the lodes run N. 73° E. on the main tract, where operations were conducted, shafts being sunk at an angle of 45°.

There are 5 shafts, No. 5 being 1,520' deep. The No. 1 lode, opened by an 80' crosscut on the 1,021' level was drifted upon for a distance of about 200' and disclosed very little copper. An 1,150' exploratory crosscut south and west on the 1,500' level intercepts 3 beds, designated as No. 2, 3 and 4, cutting the first at a distance of 634', the second at 880' and the third at 1,015' from the shaft. These lodes, opened by drifts out from the crosscut, are practically without promise so far as opened. A fifth lode, No. 1½, first

encountered in shaft sinking, is opened for a distance of about 130' at a depth of 1,190' in the shaft, and had a fair showing.

The new Mass lode, so-called, lying about 120' S. E. of the Evergreen bed, shows a width of 8 to 12', but carries flaky copper, with considerable epidote.

Production has been as follows: 23,572 lbs. in 1900; 29,361 lbs. in 1901; 606,211 lbs. in 1902; 2,182,608 lbs. in 1903; 1,380,480 lbs. in 1904; 1,606,208 lbs. in 1905; 1,552,628 lbs. in 1906; 1,244,874 lbs. in 1907; 16,500 lbs. in 1916, and 652,977 lbs. in 1917. Shipments to the Winona mill recommenced in November, 1916, and gradually increased up to May, 1917, when about 300 tons per day were sent out.

Operations were suspended in Oct., 1917 and have not been resumed since.

AHMEEK MINING CO.

MICHIGAN

Office: 12 Ashburton Place, Boston, Mass. **General Office:** Calumet, Mich.

Officers: Rodolphe L. Agassiz, pres.; Jas. MacNaughton, v. p. and gen. mgr.; with Wm. A. Hodgson, Thomas L. Chadbourne, Jr., John T. Burnett, and Q. A. S. McKean, directors; Clarence H. Bissell, sec.-treas.; G. L. Os-good, Jr., asst.-sec.-treas.; Ocha Potter, supt.; A. L. Burgan, mill supt.

Inc. March 22, 1880, in Michigan and charter extended, 1910, for 30 years. **Cap.** \$5,000,000; shares \$25 par; fully paid, all issued increased June 8, 1915, from a capitalization of \$1,250,000, par \$25, paid in \$17. In the change four new shares were given for each old share issued. Last assessment \$5, paid February 5, 1905. American Trust Co., Boston registrar; State Street Trust Co., Boston transfer agent. Listed on Boston Stock Exchange. Annual meeting, second Tuesday in April.

Dividends: in 1911, \$5; 1912, \$22; 1913, \$17; 1914, \$4; 1915, \$13, on old capitalization and \$5 on new; 1916, \$14; 1917, \$14; 1918, \$8; 1919, \$3; 1920, \$1.50, making a total of \$12,150,000.

Is controlled by Calumet & Hecla Mining Co., through ownership of 99,168 shares out of a total issue of 200,000 shares.

Balance Sheet as of June 30, 1921, shows the following:

Assets.	
Real estate	\$2,538,548
Buildings and machinery	2,950,024
Fair value of mineral deposits	30,832,335
Development and underground equipment	1,042,422
Cash	212,439
Notes receivable	511,200
Accounts receivable	342,598
Reserve for pledged copper	35,784
Copper	2,626,915
Supplies	115,890
Profit and loss	3,869,555
Total	45,077,733

Liabilities.

Capital stock	\$5,000,000
Reserve for depletion	7,071,288
Reserve for depreciation	1,549,781
Mineral deposit supplies	30,832,355
Reserve for foreign sales	511,200
Accounts receivable	113,108
Total	45,077,733

Current assets exceeded liabilities by \$3,079,475 at end of 1921; \$3,235,289 in 1920; \$2,709,065 in 1919, \$2,438,720 in 1918; \$1,505,444 in 1917; \$2,233,364 in 1916; \$1,583,654 in 1915, and \$968,772 in 1914.

Income account year ended December 31:

Year	Net Income	Miscel. & Taxes	Dividends	Balance
1920.....	\$159,630	\$601,549	\$300,000	\$741,919 (a)
1919.....	640,423	600,000	709,536 (a)
1918.....	3,174,625	1,640,000	1,600,000	122,992 (a)
1917.....	3,157,889	1,047,635	2,800,000	727,920 (a)

(a) Deficit. In 1918 the increase in reserves for depreciation and depletion totaled \$624,456, making a surplus balance of \$501,464.

Unsold copper on hand Jan. 1, 1921, 17,003,646 lbs. carried at 13¢, or \$2,283,154 and Dec. 31, 1921, 9,892,100 lbs. carried at 14c., or \$1,384,894.

Property: 931 acres, lying between the Mohawk and Allouez mines, acquired 1880, from the Seneca Mining Co., in order to mine the Kearsarge or Houghton conglomerate. Under the management of Capt. John Daniell, 2 shafts were sunk on this bed, which averages about 70' width, with 3 pay-streaks of 2 to 3', aggregating 7' width, each carrying copper in good quantities, but bed not payable as a whole, owing to great width of partly or wholly barren rock. Boundary lines were rectified, by exchange of 11.18 acres with Allouez, July, 1903, and by a similar exchange of 20 acres, with Mohawk, 1909, giving straight boundary lines on the dip of the bed, permitting easier development by all mines concerned. Work on the present mine was started 1902, after work at the Mohawk had disclosed the position and trend of the Kearsarge lode.

The Kearsarge bed, on which the present mine is opened, varies from 14 to 18' in width, with but little poor ground in the entire mine. Openings are carried ahead of stoping requirements, and blocking out is almost entirely by drift stopes, which are carried about 9' wide and 14' high, to the boundary limits, where extraction is begun and brought backward to the shafts, reducing timber requirements to a minimum. The mine keeps 3,000,000 to 3,500,000 tons of stamp rock blocked out for stoping. All levels below the first are 125' apart. A Richmond electric bell signal system connects all underground workings with the engine rooms, and underground stations are connected with surface by telephone. Concrete is substituted for timber in the construction of the shafts, and in other places where practicable, rendering the shafts as nearly fireproof as possible. Mules are used in tramping rock underground.

Development: the mine has 4 shafts, numbered from south to north, planned to develop the entire tract. Nos. 1 and 2 shafts, 1,445' apart, sunk at 42°, are each 8x17' 4" in size, with 2 hoisting compartments and a ladder-way. These shafts were 2,799' and 3,677' deep respectively at end of 1920. Each shaft has, between the 9th and 10th levels, a 400-ton rock bin, equipped with a measuring hopper holding exactly one 7-ton skip load, loaded in 20 seconds by one man, this system saving much time, and confining hoisting of all rock mined down to 10th level to one point in the shaft. No. 1 shaft is bottomed 43' below 22nd level, in a shattered area, requiring close timbering. The 20th level, has been holed through to corresponding level of No. 2 shaft, through which rock mined below the 22nd is hoisted. No. 2 shaft can be sunk much deeper before lode passes into Allouez ground.

The No. 1 shaft workings all show ore of averaged quality, save the stopes on No. 10, 11, 14, and 16 levels south, beyond the disturbed area. The 10th and 16th levels south have reached property boundaries.

During 1916 and up to April, 1917, exploration was continued in the Kearsarge conglomerate, when work was temporarily suspended owing to labor shortage. The Kearsarge conglomerate was cut in 1916, on level

No. 10, shaft No. 2, when a drift was driven at right angles to general strike of the lode and continued as a crosscut, 1,352' W. of the Kearsarge lode. The body is 36' wide, and carries a little copper in streaks.

During 1919, all shafts opened ground of average grade. In 1920, shafts 2 and 3 were sunk 144 and 200', respectively; No. 1 shaft having reached the Allouez boundary will cease to be a producer. Drift extensions on the Ahmeek fissure at No. 2 shaft were made on 15, 16, 17, 19, 20, 22, 23 and 24 levels, the 16th opening rich ore and mass copper. At No. 3 shaft, the 22, 24 and 25th levels were advanced. The use of power shovels will hereafter permit of higher stopes and fewer new levels.

The northern end of the mine is developed by two shafts known as Nos. 3 and 4, which have a common collar, being only 6' apart at surface, but diverging north and south, from the surface, at an angle of 42°. These shafts are sunk through 70' of overburden, and are concreted into the solid rock ledge for depth of 95' from surface, the outcrop of the Kearsarge lode being owned by the Mohawk, Ahmeek having only the underlay at its northern end, shafts 3 and 4 are sunk in the hanging, at an angle of 80° on a plane corresponding longitudinally to the strike of the bedded formation, and bend at depth of 980', in a curve with a radius of about 400', bringing the shafts to 34°, to correspond with the rather flat dip at the Kearsarge bed, both shafts entering the bed at depth of 1,275'. Concrete sets and stringers have been used in these shafts wherever ground would permit. Each shaft has 3 compartments, with two 8x8' skipways and a 4x8' ladderway. The upper portion of the bed was worked by crosscuts, beginning at 1,020' in No. 4 shaft which is the 1st level in this and No. 3 shafts, though there are 3 stations above the point where the bed intersects, from which crosscuts will be run to the Kearsarge bed, to the Mohawk line. No. 3 shaft was 3,241' and No. 4 was 2,880' deep at end of 1920.

During 1917 and 1918 a commercial grade of "rock" showed in all the openings of shafts No. 3 and 4. In shaft No. 3, the 17, 18 and 19 levels south, reached the Mohawk boundary and levels N. 16 to 19 north correspond with those of No. 4 shaft.

New openings totaled 3,018' in 1921; 14,657' in 1920; 17,771' in 1919; 13,085' in 1918; 16,085' in 1917; 12,848' in 1916, and 8,769' in 1915.

Equipment: the main power house is in 2 parts, of brick and steel, with composition roof. Equipment of No. 1 power house includes 60-drill and 50-drill cross-compound 2-stage air compressors, and a 32x72" cylinder hoist. The electrical plant consists of a 13x26" tandem-compound engine, direct-connected to a 200 k. w. 250-volt generator. Condenser pumps and reheaters are located in the basement. No. 2 engine house is a duplicate of No. 1, containing a similar hoist with double conical drums with maximum diameter of 18'6", capable of hoisting 10-ton skips in counterbalance from 1 mile depth. Nos. 1 and 2 engine houses are connected to a steel-frame boiler house, having six 200 h. p. boilers, with room for 8, equipped with feed pumps, ash sluices, coal trestle, etc. The boiler house has a self-supporting steel smokestack, 150' high and 7' 6" in diameter, on a sandstone-faced concrete base. A 1,360 cu. ft. compressor was installed early in 1917.

Shafts 3 and 4 are equipped with two 32x72" cylinder hoists, a triple-expansion compressor, and turbo-generator, housed in a brick structure, 65 x 146', with corrugated-iron roof; a steel boiler house, 57x84', with corrugated-iron roof, housing eight 200 h. p. boilers, and a steel self-supporting brick-lined smokestack, 7' diameter and 140' high. There is also a change house of brick construction, 39x139'. One shaft rock house serves both shafts.

Storage battery locomotives to be used for tramping were installed 1917-1919 as follows: 6 in shaft No. 2; 2 in shaft No. 3 and 5 in shaft No. 4. In 1919, 32 five ton cars were installed on levels of shafts 3 and 4. Power scrapers in stopes were adopted in 1920.

The central crushing plant, of brick, is 800' north of No. 1 shaft, and 624' south of No. 2 with which the plant is connected by a temporary frame

trestle 37' high and 14' wide, carrying a double track for 7-ton tram cars, which are dumped by means of cradles, and rock directed by grizzlies and chutes to the crusher, below which is a hopper, feeding directly into a shaker driven by a 7½ h. p. electric motor, crushed ore being fed automatically into a link-belt conveyor driven by a 35 h. p. motor, going to the rock bin. The crusher building, of steel, contains 3 Farrell crushers, driven by a 12x24" engine, and tram cars are actuated by two 35 h. p. motors, located in the 2nd story of the building. Crushed ore goes to a 1,600-ton cylindrical steel rock bin, 32' in diameter and 48' high, set on concrete piers, with tunnel and railway track beneath, permitting the filling of cars by gravity, 1 man loading a 40-ton car in 10 seconds.

Mine buildings include office, machine shop, warehouse connecting with railway tracks; an office for mining captains and timekeepers, smithy, cold-storage shed, and about 100 dwellings. The locality is protected by a water system having 6,000' of 6" mains with 16 Ludlow hydrants. Water is taken from an 8' dam across the outlet of Seneca lake. A large water supply could be developed from Ahmeek lands near the Allouez boundary, and an inexhaustible, supply is available from Lake Superior, 4 miles distant, but about 600' lower. The fire-protection system connects with that of the Calumet & Hecla.

The Mineral Range and Keweenaw Central railway lines run to the mine, the former connecting mine and mill over a steel trestle 100' high.

The stamp mill, at Hubbell, on Torch lake, has 8 heads, each stamp breaking about 500 tons of rock daily. The mill site has a frontage on Torch lake, of about 2,000' with a maximum water depth of 90', providing for tailing sands for many years.

The mill is steel and concrete throughout. Stamps rest on concrete piers, each standing on a concrete slab 4' 6" thick, that rests directly upon a hard pan of closely cemented gravel. Each slab holds about a mile of wire cable interlaced upward on its surface and reaching into the pier above, which is 40x40' at the base, pyramidal in form and 38' high, giving the stamps an elevation of about 50' above lake level. There are four 1,000-ton rock bins. The mill has double-deck floors, the jigs being located on the upper or roughing floor, and sands overflowing to Wilfley concentrators on the ground floor. The jigs and tables are run by electricity.

The mill power house has six 200 h. p. boilers, and a low pressure steam turbine. The plant has a 300 k. w. generator, and a pump of 40,000,000-gal. daily capacity, capable of supplying water for 8 heads, connected with Torch lake by a 600' pipe intake.

Production:

(a) Includes mining, transportation, stamping and taxes. (b) Due to unusually heavy construction costs. * 3 months.

Copper production is marketed through the United Metals Selling Co. Reserves not officially given are maintained at about 5,000,000 tons, and the life of the mine is estimated at 18 years, with present output.

Operations ceased, April 1, 1921.

ALGOMAH MINING CO.

MICHIGAN

Office: 60 Congress St., Boston, Mass. Mine office: Lake Mine, Ontonagon county, Mich.

Officers: R. M. Edwards, pres. and gen. mgr.; S. L. Powers, v. p.; Henry Tolman, treas., with A. C. Paine and Thos. S. Woods, directors. Thos. Bennetts, supt.; Wm. Wearne, mg. capt. Albert L. Wyman, sec

Inc. June 4, 1910, in Michigan. Cap. \$2,500,000; shares \$25 par; issued 70,000 shares; paid in \$13. Last assessment, May 18, 1916, \$1. Of the capitalization, 60,000 shares were given land owners in full payment for property and 10,000 shares were sold to public at \$10 per share. Annual meeting, third Tuesday in April. American Trust Co., Boston, transfer agent; Federal Trust Co., Boston, registrar Stock is listed on the Boston Stock Exchange.

Financial statement: in 1919, current assets exceeded liabilities by \$5,078; in 1918, surplus of \$10,331; in 1917, surplus of \$16,868; in 1916, surplus of \$26,470; in 1915, deficit of \$18,133; in 1914, surplus of \$14,597; in 1913, surplus of \$27,707. At the end of 1919 the profit and loss account stood at \$269,640 and on Dec. 31, 1920, at \$275,588 with a deficit for the year of \$5,948.

Property: 480 acres, adjoining the Lake mine in Ontonagon county, Michigan, being the N. $\frac{1}{2}$ and S. W. $\frac{1}{4}$ of Sec. 3 T. 50 N. R. 30 W. Property was formerly owned by a company of the same name, which began work in 1852, and did a little prospecting with negative results, expending about \$65,000.

Development: an 8x12' exploratory shaft, was over 560' deep at end of 1916. For the first 95' the shaft was in amygdaloid vein material, passing into the hanging wall at about 95' from surface. The first level, opened at 104', has about 2,350' of drifts, and a 90' crosscut to the eastern sandstone. The second level, 212' from surface, has a crosscut northwest across the formation which, for more than 1,000', exposes almost solid trap, a small amygdaloid bed 560' from the shaft, showing some native copper in about 680' of drifts. The Algomah bed, in which the shaft is sunk, apparently has a dip of about 80° and a width ranging from about 40' at the first level to about 60' at a depth of 470', as indicated by diamond-drill borings.

The Algomah bed is peculiar in both strike and contents, the strike being apparently nearly north and south, in line with the strike at the Lake mine, to the north. The bed carries copper oxide instead of the native copper found in all of the other copper mines of the Lake Superior district thus far opened on the bedded formation of the Keweenaw series.

Ore is mainly black oxide, or melaconite, carrying traces of native copper, and chrysocola ore of 16 to 19% assay tenor was found in a test pit near the shaft. Assays made of a small quantity of selected ore, removed in the course of shaft sinking, gave a copper value of 24.1%, this sample representing one-eighth of the entire body of material taken from the shaft.

Extensive diamond-drilling west of the orebody to great depths has given conflicting results so that little is known concerning dip, strike or value of the several copper-bearing formations encountered. A shipment of selected ore made in 1914 yielded 5.005lb copper and sold for \$1,695. A few shipments of ore, taken from above the 40' level, ran 14% copper. Shaft sinking, is expected to encounter the lodes worked in the Lake and South Lake mines, as they flatten downward and dip toward the Algomah ground. Shaft sinking and all mining operations have been stopped since 1917 owing to high costs and adverse labor situation.

Equipment: includes a steam hoist, with capacity to lift a 3-ton load from a depth of about 500', and an air-compressor. Buildings include a

power plant, office and boarding houses. Property considered promising.
ALLOUEZ MINING CO. **MICHIGAN**

Office: 12 Ashburton Place, Boston, Mass. Mine office: Allouez, Keweenaw county, Mich.

Officers: Rodolphe L. Agassiz, pres.; Jas. MacNaughton, v. p. and gen. mgr.; with Harry F. Fay, D. S. Dean, E. B. Dane, Geo. S. Mumford, D. L. Pickman and Alex. Whiteside, directors; Geo. G. Endicott, sec.-treas.; H. L. Bennett, asst. sec.-asst. treas.

Inc. Sept., 1859, in Michigan. Cap. \$2,500,000; shares \$25 par; paid in \$22.25; last assessment, \$3 a share, levied 1904. Capital was increased in 1889, from \$500,000, shares \$25 par. At that time company was reorganized and reincorporated. Annual meeting, second Wednesday in April. Old Colony Trust Co., Boston, registrar; American Trust Co., Boston, transfer agent. Listed on Boston Stock Exchange. Owns 36,164 of the 100,000 shares in the Lake Milling, Smelting & Refining Co. Is controlled through ownership of 41,000 shares, by Calumet & Hecla Mining Co.

Dividends: initial dividend, \$1 per share, July 31, 1915; \$7 in 1916; \$12 in 1917; \$7.50 in 1918, and \$1 in March, 1919, totaling \$28.50 per share or \$2,850,000. None since.

As of December 31, 1921, Allouez had on hand a net surplus of cash and quick assets, \$570,043, made of cash, accounts receivable, government securities and the small amount of \$78,957 for supplies at the mine. Allouez produced no copper in 1921. The company had on hand January 1, 1921, 1,265,581 lbs. of copper valued at 13¢ a lb., and sold during the year at an average price of 12.90 cents per pound. Including the cost of selling and delivery there was a loss of \$10,585 which, together with maintenance expenditures of the property, closed down for the year, made a total loss of \$104,944 shown prior to adjustments of "other income" and depreciation, the latter bringing down the actual decrease in the balance of current assets to \$88,561.

Balance Sheet, December 31, shows:

	Cash	Other Quick Assets	Accts. Payable	Reserve for Taxes	Bal. of Quick Assets
1920.....	\$ 76,193	\$541,701	\$ 37,285	\$ 580,610
1919.....	363,401	846,451	115,450	\$86,539	1,007,863
1918.....	363,401	873,373	115,450	228,765	892,560
1917.....	715,567	960,159	273,230	244,793	1,157,703

Income Account:

	Receipts	Costs	Other Deduct'n	Depr'n Depl'n	Taxes	Def. (a)
1920..	\$ 522,523	\$ 571,824	\$214,762	\$ 88,316	\$ 94,387	\$270,134
1919..	578,500	626,361	37,689	107,773	293,323
1918..	1,819,148	1,386,882	242,782	464,070
1917..	2,101,303	1,015,666	273,092	388,110
1916..	2,633,679	1,086,847	582,003(b)

(a) Includes deduction of assessments, levied by The Lake Milling, Smelting and Refining Co. which totaled \$11,811 in 1919; \$48,902 in 1918; \$126,152 in 1917 and \$42,508 in 1916. (b) Surplus.

In 1918, company added \$198,927 as increase in reserves for depreciation and depletion, which made decrease in current assets \$265,143 instead of \$464,070.

Property: 3,400 acres including mineral ground 640 acres, adjoining the Ahmeek Mining Co., which contains the Kearsarge amygdaloid lode at great depth.

History: the old mine, opened 1859, is on the Allouez conglomerate, a bed underlying the greenstone. The conglomerate, 30' wide in many places, with strike of N. 39° E., and dip of 39°, averages 0.7 to 1% copper, and is very refractory under the stamps. Mining was begun actively in 1869, and stopped in 1877, with an exhausted treasury. The mine was then leased to

Watson & Walls, who made money from it, after paying a royalty of one-eighth on gross production. In 1880 the company resumed control, to quit once more, financially exhausted, in 1885. Watson & Walls took the mine again, and once more did well; the company resumed work on its own account for the third time, and again lost money, stopping all work in 1892. The old mine had been idle for some years, except for exploratory and development work in 1898 to 1900, when a shaft was sunk 1,200' on the Osceola lode, and nearly 4,000' of openings secured thereon, with indifferent results. The old Allouez made 26,051,528 lb. fine copper, 1869 to 1892.

Development: as the Allouez mine is on the Kearsarge amygdaloidal bed which does not outcrop on Allouez lands, though it underlies the entire 640-acre tract, the shaft was sunk in the underlay. The mine had but one producing shaft until 1909. Shafts No. 1 and 2 are connected by crosscuts and drifts, on several levels. The Kearsarge bed, above the 14th level, is opened by crosscuts, uppermost being at the 6th level. The Kearsarge bed averages about 16' width in the Allouez mine.

Underground openings totaled 1,802' in 1920; 3,562' in 1919; 2,759' in 1918; 2,838' in 1917; 3,504' in 1916; 4,458' in 1915; 3,526' in 1914; 4,400' in 1913; 8,517' in 1912.

No. 1 shaft, at the extreme southeastern corner of the tract, with 3 compartments, and 4,254' deep, leaves surface at an angle of 75° but at slight depth takes an angle of 80°, continuing thereon to about 1,435' in depth, when a curve of 60° brings the shaft to an angle of 38° 30', which is the dip of the bed. At the change of angle, on reaching the bed, a single idler with a very wide flange cares for the cables passing at either end. Owing to the steep pitch of the shaft, back rails of 6x10" timber are set so close to the wheels of the skips that their flanges cannot leave the steel rails, the wooden timbers serving as guides.

The first level is opened at depth of 1,264'. In order to save pumping charges on surface water, a gutter, cut entirely around the shaft, leads to an incline 36' long, used as a sump. This shaft showed very fine ground in its upper levels, but deeper openings are not so good. Equipment at No. 1 shaft includes a 42x62' steel shaft rock house having two 18x34" crushers. The floor was re-modeled during 1916.

Development in 1920 brought the shaft 346' below the 22nd level, but in poor ground. Openings were made on the 23rd. and 24th. levels and extended N. and S. on the 21st. and N. on the 22nd. levels, while stoping was done on the 17, 18, 19 and 20th levels.

No. 2 shaft, 1,500' northeast of No. 1, is similar to No. 1 in general design, but changes pitch when entering the bed at 2,307' from surface from 80 to 42°. This shaft is sunk further in the hanging than No. 1, owing to the proximity of a Lake. The collar of No. 2 shaft is of concrete. Washington fir and 16x24" steel I beams, with 14x14" square timber wall plats and 4" planks are used. The interior, from collar to solid rock ledge, is lined with 22" of concrete, dividers having their ends bedded in concrete, this giving an impregnable shaft, sunk through 52' of treacherous quicksand overburden. No. 2 shaft is 3,553' deep. During 1920, 986' of work was done at No. 2 shaft, the 20th level was extended N. to the boundary; the 21st and 23rd levels extended N. and the 22nd N. and S., showing an average grade of ore. Output was from stoping on the 13th to 17th levels N. and 18-19th levels S.

Equipment: includes a hoist with 32x72" duplex cylinders and 18" double-conical drum for No. 1 shaft, and No. 2 has a 20x30" engine good for depth of 5,000'. No. 1 engine house, of mine rock, with redstone trimmings, has 12-drill and 18-drill air compressors, and No. 2 engine house has a 60-drill air compressor. The stone boiler house has five 125-h. p. boilers and a 120' self-supporting steel smokestack. Buildings include a redstone machine shop and smithy, and a large warehouse. There is a very considerable mine location, with numerous dwellings, some remaining from 40 years

ago, and some new. The mine is reached by a spur of the Mineral Range Railroad.

At No. 1 mill, Point mills, Hardinge conical mills replaced Chilean mills Nos. 4, 5 and 6. At No. 2 mill, Hubbell, the 4th stamp, was put into commission in 1918. A pumping plant to dump tailings farther out into Torch lake, was put in commission in spring of 1919. Both mills were closed in 1919 and ore sent to the Osceola plant adjoining.

Production:

(a) Includes mining, transportation, stamping and taxes.

(b) Includes a charge for depreciation and depletion amounting to 2.81 cents per pound.

Operations were suspended in July, 1920, due to the market.

AMERICAN-BOSTON MINING CO., THE MICHIGAN
Office: Diorite, Mich. J. R. Thompson, mgr. M. A. Hanna & Co., sales agent.

Property: the American mine on the Marquette range, in Marquette county, opened in 1880. Ore is a Bessemer hematite containing 54% iron and 0.027% phosphorus. It is mined by caving to a depth of 1,850'.

Production: has been decreasing yearly. In 1916 it was 745,969 tons; in 1917, 142,526 tons, compared with 120,756 tons in 1918 and 72,228 tons in 1919, a total of 1,648,253 tons.

ANTOINE ORE CO. MICHIGAN

Address: Francis J. Webb, gen. mgr., care Republic I. & S. Co., Duluth, Minn., or Youngstown, Ohio. **Mine office:** Iron Mountain, Dickinson county, Mich. Frank Carbis, supt.

Republic Iron & Steel Co. owns 50% of capital stock.

Property: the Clifford mine, opened in 1895, on the Menominee range. Ore carries 38% iron, 0.18 to 0.29% phosphorus, and 37 to 41% silica.

Production: 2,131,694 tons to end of 1919; in 1916, 113,361 tons; in 1917, 115,823 tons; in 1918, 118,894 tons.

ARCADIAN CONSOLIDATED MINING CO. MICHIGAN

An amalgamation of the New Arcadian and New Baltic Copper Companies, effected Oct. 7, 1919. **Office:** Houghton, Mich.

Officers: Robert H. Shields, pres.; S. T. Everett, v. p.; W. F. Miller, sec.-treas., with W. B. Anderson, J. C. and J. W. Shields, L. W. Killmar, H. W. Fesing, and J. G. Stone, directors.

Inc. Dec. 11, 1919, in Michigan. **Cap.** \$6,250,000; \$25 par; \$14.50 paid in; 152,311 issued, assessable. Of the 250,000 shares, 150,000 go to New Arcadian stockholders and 44,042 to New Baltic, 20,000 shares treasury stock were sold at \$3 per share, March 1, 1920. Assessment of .50c. per share was levied in October, 1921.

The company's capitalization is equal to that of the two companies combined. Shares of the new company were issued, share for share to holders of

New Baltic and New Arcadian, 24,000 shares of the new company going to the New Arcadian, because it owned 24,000 shares of New Baltic; New Baltic's 18,958 shares becoming treasury stock of new company. The shares issued, as well as all treasury stock are on a basis of \$13.50 per share paid-in.

Transfer office, American Trust Co., Boston; and registrar, Boston Safe Deposit & Trust Co. Listed on Boston Stock Exchange and New York Curb. Annual meeting second Tuesday in February.

Balance sheet at end of 1920 shows cash and supplies, \$46,121; liabilities, \$1,867. There was \$17,941 due on assessments and \$519,933 treasury stock; profit and loss, \$819,119. Total receipts were \$84,699 and disbursements, \$68,119.

New Arcadian Property: 3,500 acres, includes five old mines worked at various periods in the past. The Arcadian Copper Co., operated the property with great vigor, 1898-1901, and equipped it with machinery, and a 3-stamp mill at Grosse Point. Operations on the Isle Royale bed proving unsatisfactory, all work was suspended, 1903; the hoist, machinery and shaft-houses were sold to the Trimountain Mining Co., the stamp-mill to the Centennial Copper Mining Co., and the property dismantled. The floating debt of the old company was liquidated by the sale of 800 acres of land, for \$750,000, to the Quincy Mining Co. The old mine and equipment were fully described in Vol. I and II of The Copper Handbook.

Development: exploratory work was resumed Oct., 1905, by the Arcadian company, on an amygdaloidal bed about one-fourth mile east of the Isle Royale amygdaloid previously worked, and crosscutting from the 200' level of the exploratory shaft disclosed 5 cupriferous beds in a distance of 110'. Work was suspended March, 1908, until organization, and was resumed August, 1909, by diamond-drill boring from the bottom of the 200' exploratory shaft, which is in the S. W. $\frac{1}{4}$ of Sec. 29. Exploratory work, 1910-13, included considerable trenching and test pitting, but was devoted mainly to securing 3 cross-sections, nearly 1 mile apart, by diamond drilling, 26 holes being drilled, aggregating over 26,000'. Drill-hole No. 22 cut a promising amygdaloid lode, in the north area. A shaft started June, 1912, on this lode, was 1,860' deep in 1918, and is to be sunk to a depth of 2,500 to 3,000'.

Crosscutting was done on the 750' level to explore the 2 copper-bearing amygdaloid beds disclosed by diamond drilling, one 300' east, the other 150' west of the shaft. On this level an amygdaloid vein of great promise was opened up 150' east of the shaft. Crosscuts and drifts have also been driven on the 250', 600', 900' and 1,050' levels and disclosed good copper contents.

The Old Arcadian vein was exposed in 1918, in the west extension of the 1,500' level crosscut. The No. 8 conglomerate, which was well mineralized on the 900' level, was encountered in the E. crosscut of the 1,700' level, 520' from shaft. It is 26' wide, with some fine copper, but not of commercial value. The New Arcadian vein is exposed 47' from shaft on both the 1,700' and the 1,850' levels; it is 18' thick and heavily charged with copper.

Equipment: includes a steam plant, a hoist good for 2,500'. 15-drill air-compressor, necessary mine buildings, and a fully equipped ore-house with an 18 by 24" crusher.

In 1922, the new Baltic shaft was deepened from 942' to 1,100' to correspond with the 1,050' level of the New Arcadian shaft.

Production: in 1916, 1,391 tons yielded 23 lb. of copper per ton; in 1917, from stock-pile, 4,900 tons yielded 10.87 lb.; in 1918, 10,195 tons yielded 16.16 lb. copper.

New Baltic Property: 800 acres, Sec. 16, T. 55 N., R. 33 W., with mineral rights to N. W. $\frac{1}{4}$ of the N. W. $\frac{1}{4}$ reserved by the New Arcadian. Exploration, begun June 10, 1909, included extensive trenching in the horizon of No. 3 conglomerate, supplemented by boreholes put down by a Calyx shot-drill cutting a $3\frac{1}{2}$ " core, considerable trouble having been experienced

in getting down stand-pipes. No. 3 borshole, at a depth of 330', cut 2' of exceptionally good copper-bearing rock, with 6" of heavy copper, and a drill core fairly charged with copper was taken, Sept., 1909, from what was thought to be the western Baltic bed, at depth of 300'. In Nov. 1909, a drill-hole pitched at an angle of 60°, cut an amygdaloidal bed estimated to pitch at 60° in opposition, giving cores of 105' aggregate depth, showing copper at various points, the final 7' being well charged with fine stamp copper and a considerable amount of very coarse stamp copper. The drilling also disclosed an unidentified amygdaloidal bed of about 75' width, carrying considerable copper in masses approaching barrel-work size. Deepest hole bored was 1,200'.

Ground was broken June, 1910, for an exploratory shaft, which was started about 35' in the footwall trap, and sunk to a depth of 500'. Although the shaft was started in the foot, the formation rolls so that the bed was cut at 3 points in the depth of 310'. At 200' the shaft cut the footwall of the amygdaloidal bed, carrying much calcite but devoid of copper. At depth of 310' the bed was cut again, carrying extremely heavy copper of a grade materially better than the average of the payable mines of the district. Drifts on the 350' and 500' levels disclosed exceedingly buncy ground, with occasional pockets of rich copper, and a crosscut on the 500' level showed further copper ground in an unidentified amygdaloidal bed underlying No. 4 conglomerate bed, distant about 1,500' from the shaft. This crosscut was continued to a point over 1,900' from the shaft. Facts concerning this vein were obtained from work done on it by the New Arcadian, the adjoining property.

The drilling campaign ended with No. 7 hole at a depth of 1,235' in 1916. No. 8 conglomerate was 41' thick at depth of 1,192'. Hole passed through good-looking amygdaloid veins, with copper in beds at 329', 493', 652', 792', and 1,192'. The New Arcadian vein was probably that cut at 792'. A shaft was started to cut the N. extension of this vein, and was down 500' in August, 1918. At 60', 250' and 400', where the vein was cut, it was well charged with copper. Company reported an exceptionally good showing on the 400' level. On the 500' and 600' levels, the showing of copper was on a par with that of upper levels, with the vein 26' wide, and management estimated, Dec. 31, 1920, that, if the vein disclosed same copper values between the shafts as prevailed at the shafts, there would be 1,000,000 tons of merchantable vein rock above 900'.

On March 1, 1921, shaft had reached 942' and a 2,500' drift, to be 3,400' in all, begun to connect with the 900' level of the New Arcadian shaft. Reported that drift had advanced 700' by November 1, and that good copper-bearing ore was exposed with a vein width of 5 to 20'.

Development in feet:

	Sinking	Drifting	Crosscutting	Total
1918.....	170	100	185	455
1917.....	180	185	105	770

Work was suspended in Sept., 1918, due to abnormal labor and supply conditions, but was resumed in May, 1920, and has continued since. H. W. Fesing, company's engineer, says "company possesses possibilities of becoming within a reasonable time, one of the largest Lake Superior copper producers."

Equipment: includes a hoist, compressor, boiler-house, etc.

The new company has good management and a property of immense mineral acreage that offers great possibilities of profitable and long continued mine operations.

ARNOLD MINING CO.

MICHIGAN

Office: 70 State St., Boston Mass. Mine office: Copper Falls, Keweenaw county, Mich.

Officers: Francis L. Maguire, pres.; C. J. Morrissey, sec.-treas.; Capt. Wesley Clark, supt., with Edward F. Newton and John E. Fitzgerald, directors. Annual meeting, second Tuesday in May.

Inc. May, 1864, in Michigan. Cap. \$2,500,000; \$25 par; issued, \$1,550,000 paid in \$621,308. Listed on Boston Stock Exchange.

Property: 3,323 acres, in T. 58 N., R. 31 W., in 2 tracts, including the Old Copper Falls mine and the Arnold mine proper, with frontage of about 3 miles on Lake Superior. The Copper Falls mine, worked 1850, until Aug., 1893, made 25,686,429 lb. fine copper, mainly from the Owl Creek fissure, and paid dividends of \$100,000. The Arnold mine proper developed on the Arnold ashbed, was opened 1863, reopened 1897, and closed 1901. Ore stamped averaged under 0.8% copper. Has a stamp-mill and 2½-mile narrow-gauge railroad known as Arnold & Eagle Harbor, rolling stock of which has been sold. No. 1 shaft of the Arnold is about 1,000' deep, sunk at an angle of 26° with the horizon. Total production, 1899 to 1911, inclusive, was 2,065,817 lb. fine copper.

Idle for several years.

ASHBED MINING CO.

MICHIGAN

Office: 70 State St., Boston, Mass. **Mine office:** Copper Falls, Keweenaw county, Mich.

Officers: Francis L. Maguire, pres.; C. J. Morrissey, sec.-treas.; Capt. Wesley Clark, supt., with Edward F. Newton and Chas. G. Lund, directors.

Inc. 1880, in Michigan. Cap. \$1,000,000; \$25 par. Listed on Boston Stock Exchange. Annual meeting, second Tuesday in March.

Property: 1,143 acres, Petherick mine, in vicinity of Copper Falls, adjoining the Arnold mine. The last mining work was done 1905-06. Described in detail in Vol. II of the Copper Handbook.

ASHLAND MINE

MICHIGAN

See Hayes Mining Co., Michigan.

ATHENS MINING CO., THE

MICHIGAN

Office: Negaunee, Mich.

Officers: M. M. Duncan, mgr.; G. R. Jackson, supt. Cleveland-Cliffs Iron Co. and Pickands, Mather & Co., sales agents.

Property: the Athens mine on the Marquette range, Marquette county, opened in 1913. A Bessemer hematite carrying 52% iron is mined.

Production: 20,923 tons in 1918; 74,500 tons in 1919.

ATLANTIC MINING CO.

MICHIGAN

Controlled by Copper Range Co., which see.

BALTIC MINING CO.

MICHIGAN

Dissolved. Property now owned by Copper Range Co., which see.

BATES IRON CO.

MICHIGAN

Office: Iron River, Mich.

Officers: F. A. Vogel, gen. mgr.; Andre Formis, supt. M. A. Hanna & Co., sales agents.

Property: the Bates mine on the Menominee range, Iron county, opened in 1910. Ores are Bessemer and non-Bessemer hematites, containing 54 to 59% iron and 0.342 to 0.348% phosphorus. It is mined by stoping to a depth of 1,050'.

Production: 449,492 tons since 1915; in 1918, 98,194 tons; in 1919, 91,049 tons.

BOHEMIA MINING CO.

MICHIGAN

Office: 85 Devonshire St., Boston, Mass. **Mine office:** Lake Mine, Ontonagon county, Mich. **Operating office:** Dee Bldg., Houghton, Mich.

Officers: Wm. A. Paine, pres.; Chas. A. Snow, v. p.; Robt. H. Gross, sec.-treas., with John H. Rice, Thos. S. Dee, Richard M. Edwards and F. Ward Paine, directors.

Inc. Jan. 29, 1910, in Michigan. Cap. \$2,500,000; \$25 par; assessable; paid in, \$8; issued, \$1,875,000. Of the 75,000 shares issued, 30,000 were given for

lands, and 45,000 were sold to the public at \$8. Boston Safe Deposit & Trust Co., transfer agent. Registrar, State Street Trust Co., Boston. Annual meeting, third Wednesday in April. Shares listed on Boston Curb. Cash and Liberty Bonds on Feb. 28, 1921, totaled \$140,226, compared with \$136,977 in 1920.

Property: 960 acres, originally known as the Piscataqua, and later as the Henwood, is traversed by the cupriferos amygdaloidal bed of the Lake Copper Co. Diamond-drilling was done 1910. Drill-holes have yielded a number of cores, from various amygdaloidal beds, with copper in fair quantities, but with nothing remarkably promising or that would justify sinking a shaft. As soon as sufficiently important developments are made on adjoining properties, development work will be resumed. No work has been done since March, 1911.

BOSTON & LAKE SUPERIOR MINERAL LAND CO. MICHIGAN

Office: Leopold Bldg., Houghton, Mich. Fred W. Nichols, resident agent. Property is mineral land in the Lake Superior copper district. No mining work ever done.

BREITUNG HEMATITE MINING CO., LTD. MICHIGAN

Office: Negaunee, Mich. C. B. Dunster, mgr.; E. N. Breitung & Co., sales agents.

Property: the Breitung Hematite No. 1 and 2 mines, reported sold to Jones & Laughlin Ore Co., in 1921.

Breitung & Co., being sued, Jan., 1922, for \$420,000, by Robert Ingalls, who claims this amount is due him as a 5% agent's commission on sale of above property.

BREITUNG IRON CO. MICHIGAN

Name changed July, 1918, to Marquette Iron Co., which see.

BRISTOL MINING CO. MICHIGAN

Office: 1208 Hanna Bldg., Cleveland, O. E. W. Hopkins, range mgr., Ironwood, Mich. Arvid Bjork, supt., Oglebay, Norton & Co., sales agents; W. K. Carter, purch. agent, Ironwood, Mich.

Property: on the Menominee range, Iron county. **Ore:** Bessemer and non-Bessemer hematite, containing 52.96% iron, 4.04% manganese, 0.612% phos., and 7.25% silica. **Mining method:** by stoping to 1,274'.

Production: 1920, 291,835 tons; in 1919, 133,159 tons; in 1918, 245,151 tons; in 1917, 188,688 tons; in 1916, 462,801 tons; total to end of 1920, 5,277,780 tons.

BROTHERTON IRON MINING CO. MICHIGAN

Subsidiary of the Lackawanna Steel Co., through the Lake Erie Co.

Address: C. H. Munger, gen. mgr., Western Reserve Bldg., Cleveland, O. W. P. Chinn, asst. gen. mgr.; L. M. Hardenburgh, gen. supt. **Sales agents:** Pickands, Mather & Co., Cleveland, Ohio.

Property: the Brotherton mine on the Gogebic range, opened in 1886. **Ore:** Bessemer and non-Bessemer hematite. Mining by under ground method to depth of 1,342'.

Production: 107,813 tons in 1916; 84,524 tons in 1917; 6,905 tons in 1918; 5,002 tons in 1919, a total of 2,626,541 tons. No production in 1920-'21.

BRULE MINING CO. MICHIGAN

Address: E. W. Hopkins, range mgr., Ironwood, Mich. F. J. Smith, supt. Stambaugh, Mich.; Oglebay, Norton & Co., sales agents; W. K. Carter purch. agent.

Property: the Berkshire mine on the Menominee range, Iron county, opened in 1908. Ore is a non-Bessemer hematite, carrying 56% iron, 0.60% phos. and 0.22% manganese. Mining is by caving to depth of 492'. The Chatham mine, which yielded 1,371,396 tons of ore, was abandoned in 1919.

Production: 49,073 tons in 1919; 152,860 tons in 1920; a total of 567,292 tons to end of 1920.

BUFFALO IRON MINING CO.**MICHIGAN**

Address: E. C. Bowers, mgr., Iron River, Mich. H. E. Duff, supt.

Cap. \$200,000; \$25 par.

Property: the Homer mine, on Menominee range, Iron county. Ore is a non-Bessemer hematite carrying 50% iron and 0.355% phosphorus.

Extraction is by sub-stoping to depth of 660'.

Production: in 1918, 213,059 tons; in 1919, 205,254 tons; total is 885,496 tons.

CALUMET AND HECLA MINING CO.**MICHIGAN**

Office 12 Ashburton Place, Boston, Mass. Mine office: Calumet, Mich. Mill office: Hubbell, Mich.

Officers: Rodolphe L. Agassiz, pres.; Jas. MacNaughton, v. p. and gen. mgr.; with Robert F. Herrick and W. Hunnewell, directors. Chas. A. Hall, sec. asst.; treas.; H. Vivian, engr.; John Knox, gen. supt.; W. M. Gibson, asst. supt. Ocha Potter, chief efficiency engr.; Henry Fisher, mill supt.; C. H. Benedict mill metallurgist. Smelter offices: Hubbell, Mich. H. D. Conant, supt.; L. C. Graton, geologist.

Inc. 1871, in Michigan. Cap. \$2,500,000; shares \$25 par; paid in, \$12. Charter renewed, 1900, for 30 years, and amended, 1905, under the new laws of Michigan, making the corporation a securities-holding company, as well as a mining and smelting company. Was organized as a consolidation of the Hecla, Calumet, Portland and Scott mining companies. Stock is listed on the Boston Stock Exchange, and traded in on the unlisted department of the New York Stock Exchange. Annual meeting, second Thursday in April. Old Colony Trust Co., Boston, transfer office: American Trust Co., Boston, registrar. Range of shares during 1920 was \$415 high and \$206 low, the lowest for 25 years. In 1921, the range was \$280 to \$210; in 1907, \$1,000 was touched, and \$630 in 1916. In February, 1921, company took a 6% interest, \$2,400,000 total amount, in the Copper Export Association's \$40,000,-000 8% note issue.

The company controls the following subsidiaries, each described under its respective title:

Ahmeek. Allouez. Centennial. Cliff. Gratiot. Isle Royale. La Salle. Superior. Osceola. White Pine C. Co., Calumet Transportation Co. and Great Lakes Transit Corporation.

Balance sheet as of June 30, 1921, shows the following:

Assets	
Real estate	\$5,685,296
Building and machinery	21,285,287
Tamarack sands	1,054,538
Stampage and timberlands	122,755
Fair value of mineral deposits	44,386,662
Development and underground equipment.....	7,588,552
Stamp mills patents	55,169
Investments in other companies	16,086,505
Cash	498,663
Fourth Liberty loan bonds	1,200,000
U. S. certificates of indebtedness	200,000
Notes receivable C. E. A.	1,369,680
Notes receivable	990,000
Accounts receivable	2,210,041
Copper	3,200,936
Total	112,573,133

Liabilities

Capital stock	\$1,200,000
Reserve for depreciation	12,282,738

Reserve for depletion	16,196,621
Reserve for foreign sales	1,369,680
Mineral Deposit Surplus	44,386,662
Accounts payable	1,577,664
Surplus	35,559,767
Total	112,573,133

Net current assets at end of 1920 were \$12,901,087, as compared with \$14,376,730 for 1919; \$12,591,964 (revised) for 1918, and \$10,624,485 for 1917.

Dividends: (100,000 shares outstanding):

1921.....	\$..	1914.....	\$10	1907.....	\$65
1920.....	5	1913.....	32	1906.....	70
1919.....	10	1912.....	42	1905.....	50
1918.....	55	1911.....	24	1904.....	40
1917.....	85	1910.....	29	1903.....	35
1916.....	75	1909.....	27	1902.....	25
1915.....	50	1908.....	20	1871-1901.....	830

The grand total is \$152,250,000.

Dividends received from other mining companies amounted to \$3,011,205 in 1917, and \$1,800,747 in 1918; \$472,371 in 1919; \$182,312 in 1920.

Since the change in charter, 1905, permitting the acquisition of stock in other corporations, the Calumet & Hecla has secured control of various other mines and mineral tracts, by organizing subsidiary corporations and also by acquiring stock in companies previously organized. In 1905 the company bought the following stocks, at a cost of \$8,592,129.99 in cash and notes; 9,600 shares of Osceola; 19,400 shares of Tamarack; 24,796 shares of Ahmeek; 27,507 shares of Isle Royale; 10,316 shares of Seneca; 25,000 shares of Laurium. The attempt to secure physical control of the Osceola Consolidated Mining Co., at the annual meeting, March, 1917, was met by determined opposition, which took the fight into the Michigan legislature and the Federal courts. After nearly 2 years of litigation, the Calumet & Hecla assumed control of the Osceola and other Lake Superior mining companies formerly under the management of A. S. Bigelow, by the sale of his entire stock interests to the Calumet & Hecla.

Securities Owned on December 31, 1920.

	Shares	Shares		Shares	Shares

			Corp. (Com.)	1,000	

The Frontenac, Laurium, Manitou, Dana, St. Louis, and Tamarack companies have been completely absorbed and the Laurium Mng. Co. has been dissolved.

On Dec. 23, 1916, the company sold to the Seneca Corporation its 11,207 shares of Seneca Mng Co. for \$672,420 and in 1919, its 50,100 shares of Gratiot Mng. Co. for \$100,000. Capital investment was increased in 1919 by \$20,000 for stock of the Copper Export Assoc'n and in 1920 by \$102,000 for 65,000 Copper Canyon Mng. Co. shares.

Property: the mine and landed holdings of the Calumet & Hecla, including property owned outright, property controlled through subsidiary corporations, mining lands under options, and timber and miscellaneous lands, in Houghton, Keweenaw and Ontonagon counties, amounts to about 165,000 acres, of which 102,804 acres are in Keweenaw county. The company, with its subsidiaries, has a water-front of more than 34 miles, on the shores of Lake Superior, Lac La Belle and Torch Lake, and approximately 60,000 people are supported by the operations of the company and its allied interests.

The Calumet & Hecla mine proper, about 2,750 acres, lies in a compact tract in Secs. 11, 13, 14, 15, 22, 23 and 24, T. 56 N., R. 33 W., in addition to which the company owns extensive tracts, all west of the Tamarack mine, carrying the underlay of the Calumet conglomerate at such stupendous depth that opening would require a 2-mile vertical shaft, and it is very doubtful whether these lands ever will become available for mining on the Calumet conglomerate. The lands west of the Tamarack were explored in 1904 by diamond-drill, in search of a supposed cupriferous conglomerate, but nothing of promise was found.

The original Calumet & Hecla mine is opened on the Calumet conglomerate bed, and a parallel mine has been developed on the Osceola amygdaloid, while a third parallel mine has been partly developed on the Kearsarge amygdaloidal bed.

The Calumet conglomerate proved unprofitable both to the north and south of the Calumet & Hecla, though workable at the Tamarack mine, which has developed the underlay by vertical shafts. The conglomerate has an average strike of N. 33° 30' E., with average dip of 37° 30' with the horizon. The bed is of 5' to 26' width, with an average of 13', giving about 2,400 fathoms of stoping ground, or about 43,200 tons of stamp rock per acre. As a rule, the richer portions of the conglomerate are in the central part of the Calumet & Hecla tract. The walls of the conglomerate carry considerable copper, especially the amygdaloidal footwall, and much of the adhering trap rock formerly rejected is now milled. Pillars of 75' and even up to 150' width, left on either side of every conglomerate shaft, contain stamp rock equivalent to about 18% of the stoping ground available before the robbing of the pillars.

The conglomerate lode in the lower workings is not up to its average value above, being wide and low in copper. By 1914, yield per ton had decreased to 1.32% copper, but this has since been much improved, partly because old pillars have been robbed.

About 18,000,000' of timber, board measure, is used in the mine annually, and to the end of 1918, over 935,000,000' of timber had gone underground. Iron pillars are used as supports in crosscuts connecting the Red Jacket shaft with drifts on the bed, and in various incline shafts to support the hanging wall. Iron, mainly scrap material, such as worn out skip rails, cut to 10' lengths and placed above beams, is used for lagging, to some extent.

The Calumet & Hecla has suffered severely from underground fires. The ore carrying native metal cannot burn, like sulphide ore, but the old timbering eventually becomes nearly as inflammable as tinder.

Development: the Conglomerate property of the Calumet & Hecla is worked as 2 separate mines, known as the Hecla and Calumet branches, the South Hecla being a southerly continuation of the Hecla branch, and the Red Jacket vertical shaft a part of the Calumet mine. The Calumet to the north, the Hecla in the center, and the South Hecla at the south, form one continuous mine, developing the Calumet conglomerate by inclined shafts, the Red Jacket being the one exception. The conglomerate, opened for 2 miles along the outcrop, has 11 shafts, 8 single compartment, 2 double compartment, and one, the Red Jacket, with 6 compartments. Also opened by a blind shaft and 3 shafts on the Tamarack property.

No. 11 Hecla, 2,400' deep, showed poor ground at the bottom. All pillars were removed and shaft abandoned in 1918.

No. 12 Hecla shaft, at the company's southern line, is 5,643' deep, bottomed in poor ground, disclosing a formation nearly barren of copper at depth. This shaft is to be extended to connect with the 81st level haulage system, and also for ventilation, supplies, and safety.

The 4,900' Red Jacket vertical shaft, of 1,800 tons, daily capacity cuts the bed at 3,287'. Rock temperature was 87° F., reduced to about 70° by connection with No. 4 Calumet shaft, exhaust air from the power drills aiding in cooling the mine. The Red Jacket shaft is 14' 6" x 24' 6" within timbers, and is built of brick and cement from collar to the solid rock, and timbered below with Georgia pine. Of the 6 compartments, 2 are used for hoisting, 2 for water, and 2 for men and supplies. The 2 hoisting compartments have cages with 9-ton Kimberly self-dumping skips swung under. The 2 western compartments have double-deck cages for men and material, and 2 middle compartments have large cylindrical steel bailers, for raising water. Timber for the Red Jacket shaft is lowered through No. 4 Calumet, with which the Red Jacket is connected by a crosscut. The Red Jacket shaft hoists rock from all of the northern shafts below the 56th level, at which point the conglomerate is intersected. There are 9-ton steel storage bins at the various productive levels, which aid in maintaining the uninterrupted hoisting service that is absolutely essential in a shaft of a mile depth. The shaft ore-house of the Red Jacket is 100x100', and 110' high, with 4 crushers, 1 for poor ore. The work of removing shaft pillars and arches is being continued, 349,384 tons of ore in 1919, and 308,590 tons in 1920 coming from that source.

Sinking has been discontinued at shafts No. 6 and 7 Hecla, and No. 9 and 10 South Hecla, due to excessive cost of maintenance, but in order to reach the deeper ground at this end of the mine, a 9x12' haulage-level (80th level) was commenced in 1918, to connect this area with the Red Jacket shaft. This haulage-level is driven in an amygdaloid lode, 180' under the Conglomerate, and will be 7,800' long when completed. From this main haulage level sub-shafts will be sunk, and the lower part of the conglomerate mined. The ore mined will be trammed by electric-power to the Red Jacket shaft. This project will be completed in mid-1922. The four shafts mentioned are 7,875', 7,978', 8,132' and 8,132' deep respectively.

Tamarack No 3 is 30' below the 18th level, or 5,223' from surface. Tamarack No. 3 (inclined), 129' below the 24' level or 5,990' below the surface. Tamarack No. 5, 147' below the 40' level, or 5,309' from surface, is used only for bailing water. The hoist operates 9,000 gal. tanks, and discharges 3,000,000 gal. daily.

The "Five Forties" is a tract of 200 acres, a quarter-mile wide and 1¼ miles long, lying between the Tamarack and Tamarack Junior mines, carrying the underlay of the conglomerate at great depth and, to obviate sinking a deep and costly vertical shaft, this tract is opened by a blind slope shaft, 1,583' deep, starting from the 57th level, 2,750' N. E. of the Red Jacket vertical shaft. The blind shaft is sunk 40' under the footfall, at the same angle as the dip of the conglomerate, thus assuring solidity of walls while saving long and expensive crosscuts to the bed on each level. A foot-wall lateral on the 57th level parallels the regular drift, at a distance of 40' in the footwall between the Red Jacket vertical shaft and the blind shaft, offering an avenue for operations that obviates the confusion certain to result were the regular mine drifts given double duty. The blind shaft starts in the footwall drift, under and parallel with the 57th level, and eventually will be about 1 mile in depth, opening four of the five 40-acre tracts, leaving the 5th and last to be opened by a sub-shaft from the blind shaft, which doubtless will be sunk on the same system. The necessity for this peculiar method of development arose from the fact that the boundary lines of the property run north and south, while the strike of the bed is N 33° 30'

E., giving a plane of dip of N. 56°-30' W. Owing to the incline shafts being sunk on the dip of the bed, while the blind shaft must follow the section lines, the latter descends diagonally on the dip of the bed, giving the blind shaft an average dip of about 22° only, although the bed dips at 37° 30'. This unusually flat incline permits the hoisting of rock in tram cars, by an electric hoist on the 57th level, cars being hauled through the blind drift and dumped into the steel bins of the Red Jacket shaft for hoisting, thus saving a transfer at the mouth of the blind shaft. The workings of the "Five Forties" show the conglomerate bed to average about 14', with about 10' carrying milling ore, the bed as a whole being very lean at this great depth. The abandoned workings of the Tamarack Junior mine of the Osceola Consolidated, which adjoins the "Five Forties" are drained by holes bored by diamond-drill from the boundary stopes.

A drainage drift is driven, at depth of about 5,000' measured on the incline, 250' from the conglomerate, with a length of 5,100', extending from No. 10 South Hecla shaft to No. 7 Hecla and from Tamarack boundary to Nos. 5 and 6 Calumet. This drift drains water to shafts Nos. 7, 5 and 6 from which it is lifted to surface by centrifugal electric pumps.

The shaft ore (or "rock" of Lake Superior usage) houses are all of uniform pattern and accommodate 40-ton railroad cars. Rock is hoisted to the top of each shaft house, passing thence over grizzlies that allow the finer rock to fall through, the larger masses being reduced in 24x36" crushers. Crushed ore falls into storage bins, whence it is dumped into cars that take it to mills, railroad tracks running underneath each rock house. The standard equipment includes a 50-h. p. induction motor at each shaft, for driving crushers.

Work on the Conglomerate lode totaled 4,019' in 1920; 8,966' in 1919; 10,841' in 1918; compared with 2,942' in 1917; 5,142' in 1916.

The Osceola lode (Amygdaloid Mine) bed, which outcrops 730' east of the Calumet conglomerate, with parallel strike and average dip of about 38°, underlies the entire main tract of the Calumet & Hecla mine, with about 11,000' on the strike. The lode runs about 35' wide, with principal values along the foot and hanging; the middle third being lean as a rule. It carries fair copper content, at a depth of nearly one mile in the Tamarack property. There are 6 shafts, Nos. 13 to 18 inclusive, numbered from south to north and all with 3 compartments, of which 2 are used for hoisting and 1 for pipes and ladder-ways. The mine has over 35 miles of workings and has frequent connections with the conglomerate by crosscuts. Laterals in the Osceola workings are carried as drift stopes of 12' height along the hanging wall. The mine was closed 1901, and reopened 1904.

Depths of Shafts Jan. 1, 1919

Distance between Shafts

No. 13.....	3,232'	13 to 14.....	2,780'
No. 14.....	3,235'	14 to 15.....	2,400'
No. 15.....	3,236'	15 to 16.....	2,100'
No. 16.....	3,384'	16 to 17.....	1,800'
No. 17.....	2,279'	17 to 18.....	1,600'
No. 18.....	1,460'		

As a result of introducing one-man drills in the mines in 1911, the daily output of ore was increased from 11.42 tons per man in 1912, to 26.29 tons in 1920; while costs dropped from 35 to 34¢, in spite of a 100% increase in wages and supplies.

During 1918, 14 storage-battery locomotives were installed for tramping in the Osceola lode. Stope scrapers, each doing the work of 5 men, were introduced in the conglomerate area during 1920. Each handles over 60 tons of ore per shift.

Openings on the Osceola lode covered 13,076' in 1920; 14,883' in 1919; 10,192' in 1918; 16,690' in 1917; 16,582' in 1916.

The Kearsarge Amygdaloid bed outcrops about 2,200' east of the Osceola lode and 2,900' east of the Calumet conglomerate, with parallel strike and dip of about 38°, underlying the entire main tract. Development was begun August, 1903, and there are 3 shafts, numbered from north to south, each having 3 compartments and being practically duplicates of those on the Osceola amygdaloid. The shafts above the ledge are "timbered" with steel, brick and concrete, the hanging wall being lined with 3 arches of brick, laid in 3 to 5 courses, thickness being increased with depth, supported by 2 rows of I-beams which serve also as dividers for the shaft. The Kearsarge lode, as opened by these shafts, is erratic, though showing stretches of ground that probably will yield 18 to 22 lb. fine copper per ton, with reasonable selection.

No. 19 shaft, about 1,000' south of the Centennial boundary line is 1,350' deep; No. 20 shaft, next south of No. 19, is about 1,350' in depth; No. 21, the southernmost shaft on the Kearsarge bed, is 8,000' south of No. 20, and, at shallow depth, showed well in copper, but deeper workings were not so promising, the rock yielding only about 12 lbs. of copper per ton of rock mined; it is 2,291' deep. No work done on this lode since the beginning of the strike, July 23, 1913.

The Laurium property carries about 1½ miles of the strike of the Kearsarge bed, with 280 acres of underlay. The Laurium shaft, started August 7, 1909, as a result of previous diamond-drill borings, is about 2,200' from the S. W. corner of Sec. 26, and about one-half mile N. of No. 1 Tecumseh shaft. The shaft is 1,661' deep, with about 7,000' of workings. The mine was closed in 1913, at the time of labor strike. When operations were suspended, workings on the 12th, 14th and 15th levels were in poor ground, showing little copper. Equipment included a boiler-house, engine-house with a large hoist and air-compressor, and a change-house.

The Calumet amygdaloid, lying between the conglomerate and the Osceola amygdaloid, has been little opened, but might prove payable, as it shows some good ground in a crosscut on the 900' level.

Equipment: on surface at the Calumet & Hecla is probably the most complete installation to be found in the world. With few exceptions everything is duplicated, to prevent possible delay or suspension, by reason of fire or accident.

The power-plants at the main mine, on the Calumet conglomerate, include 4 large boiler plants and 6 hoisting plants. The hoists of the conglomerate mine are very powerful, ranging in capacity from 1,000 to 5,600 h. p. each. Miners are carried to and from work, in the incline shafts, by man cars, these being long trucks having tiers of circus seats, replacing skips when needed, being shifted quickly on or off the skip tracks by large cranes. This method has proven the safest, quickest and cheapest for moving men in and out of deep incline shafts.

At No. 4 Calumet shaft there is a group of the most powerful mining machinery in existence. Engine house contains the 2,500-h. p. Corliss engine "Superior," with 40" cylinders and 72" stroke; the auxiliary engines "Baraga" and "Rockland," of 1,000 h. p. and 600 h. p., respectively; 2 Rand air compressors, of 25 and 40-drill capacity, and the engine "Mackinac," a 4,000-h. p. quadruple-cylinder triple-expansion steel giant, operating 4 Nordberg air compressors with a combined capacity of 500 drills. There also are four 35-drill auxiliary compressors. In the old Riedler compressor, water was injected into the compression cylinders, while the Nordberg machines deliver the compressed and greatly heated air to a cylindrical steel cooler, 12' in diameter and 30' high, into which water is sprayed from above and drawn off at the bottom, cooling the air to 80° F. Power is supplied by batteries of boilers in 2 boiler houses adjoining. Locomotives haul the coal into the boiler-houses, where it is fed to the grates by stokers.

The Hecla engine-house, flanked by a large boiler-house, contains the 1,200-h. p. compound hoisting engine "Frontenac" and 2 auxiliary engines,

of 600 h. p. each, also a 30-drill Rand air compressor and a pair of water-plunger air compressors, with combined capacity of 144 drills, being the largest machines of this type ever constructed.

South of the Hecla plant is the "G. H. & S." engine house, having the "Houghton" and "Seneca" engines, of 1,300 h. p. each. The Hecla boiler house has 5 large boilers and a 200' smokestack, of 9' 6" internal diameter.

The engine house operating Hecla shafts Nos. 7 and 9 contains the engines "Hancock" and "Pewabic," each of 1,400 h. p. which operate 25' drums by spur gearing, and two 600 h. p. vertical compound engines for man cars. Boiler-house has 5 boilers and a 250' smokestack of 12' 6" internal diameter.

The South Hecla engine-house at shaft No. 11 has a 1,000-h. p. Lidgerwood hoist.

The Red Jacket shaft has two 2,850-h. p. triple expansion hoists, and in an adjoining building are five 300-h. p. boilers. In raising 10-ton loads perpendicularly from a depth of 1 mile, the weight of the cage and steel cable nearly equals that of the cargo of rock, but with the aid of counter-balance the engines can hoist 10-ton loads at a speed of 40 miles per hour, the regular hoisting time being about 90 seconds for distance, including time taken for starting and stopping, an achievement no locomotive could duplicate on a horizontal plane. The engine operates on a system devised by S. B. Whiting, formerly manager of the company. To overcome the dangerous strain caused by unequal wearing, Walker differential rings are placed on the sheaves, the cables taking 4 complete turns around the driving sheave.

Equipment at the Amygdaloid shafts on the Osceola bed is practically the same at shafts 13, 14, 15 and 16. Shafts 13 and 16 have Nordberg first-motion double conical-drum hoists, operating 7½-ton skips in balance, good for 5,000' depth each. No. 14 and 15 have Corliss hoists with 25' cylindrical drums, good for 5,000' depth. Shafts No. 17 and 18 are equipped with small Lake Shore and Lidgerwood hoists and single 5 and 2½-ton skips. All the shafts have permanent shaft rock-houses, similar to those of the conglomerate workings. All engine-houses have air connections with the main compressor-plants at the old mine.

The machine-shop has an equipment excelled by only a few of the largest shops in the country, including a 25-ton electric traveling crane and mammoth planers, with electric power throughout. These shops are capable of handling anything and everything in the line of repair work, and also have complete manufacturing facilities for the making of mining, milling and smelting machinery, and have turned out hundreds of Wilfley tables, and other special machinery, under agreement with the owners of the patents.

The foundry has 2 iron cupolas and a brass foundry, with a 20-ton electric traveling crane. The pattern shop has 2 departments, one for the shop proper and one for the storing patterns. The carpenter shop is equipped with as complete a line of labor-saving machinery as can be found in any general woodworking establishment. The blacksmith shops are as large as those of the largest manufacturers of machinery, and are fully equipped. The Calumet shop alone sharpens upwards of 50 tons of steel drills daily. The Hecla shop does blacksmithing and forging for the entire mine. The various shops employ upwards of 150 blacksmiths.

The main electric plant of 12,000 h. p. capacity is at the mills, in Lake Linden, with a substation at the mine.

The office building is a large and handsome stone structure, housing the various executive departments and the engineering force of the mine. The company's private telephone system has an exchange with about 220 instruments, including a number of deep underground stations, with local and long-distance connections.

The Calumet & Hecla public library had 45,000 volumes in 1917; ranks third in point of circulation in the State of Michigan, with an attendance in reading rooms of 88,040 in 1917. In addition to books in English, there

are works in German, French, Italian, Swedish, Norwegian, Slavonian, Polish, Hungarian, Finnish and Croatian, with periodicals and newspapers in a score of languages, about 30 different nationalities being represented on the company's payroll. There also is a branch library and reading room at Lake Linden, for employees of the stamp-mill and smelters.

The company maintains a hospital, for employees solely, with complete surgical and laboratory apparatus and a dozen physicians.

The company owns about 1,200 dwellings, furnished to employees at an average rental of 6% on actual cost, plus cost of maintenance, and upwards of 1,200 dwellings are owned by employees on lands leased from the company at low yearly rentals. This low rent is equivalent to an increased wage, compared with Western mines.

There are 15 school houses on the lands of the Calumet & Hecla, most of which were built by the company, including a fine manual training school, and a truly magnificent high school building at Calumet. Also there are upwards of 30 churches, of a dozen different denominations, for which sites were donated by the company; and in most cases substantial aid has been given in their erection and maintenance, entirely regardless of creed.

The company built a \$50,000 bath-house containing tubs, showers and a 26 by 40' swimming pool. A charge of 2½ cts. per bath is made, except in the women's department, which is free to women and children. The charge covers merely the cost of washing the towels and in no way compensates for the operation of the bath-house proper.

In October, 1919, C. & H. and its subsidiaries announced that it had taken out a blanket life insurance policy covering the life of each of its employees in sums ranging from \$1,000 to \$1,500, without cost to the insured. The contract amounted to \$10,000,000.

The company maintains 4 distinct systems of waterworks, one at the mines in Calumet, one at the mills in Lake Linden, and two on the shore of Lake Superior, 4 miles N. W. of Calumet. The Lake Superior plants pump water for domestic uses at Calumet against a head of 733', with an electric centrifugal pump of 3,000,000 gals. daily capacity and also furnish water to the mill and smelter boilers, on Torch lake. At the Calumet dam and mine there are 7 pumps having a combined daily capacity of upwards of 45,000,000 gallons.

The company maintains a fire department, affording protection to the mine buildings and locations, and responding to calls from Red Jacket, Laurium and the other towns that go to make up the mining camp of Calumet, with 40,000 population.

The Hecla & Torch Lake standard gauge railroad, owned by the company, connects the mines, mills, smelter and shops by upwards of 20 miles of main tracks, spurs and sidings. Equipped with 250 forty-ton steel rock cars and several locomotives.

The two stamp mills, known as Hecla and Calumet, are at Lake Linden, 4 miles from the mine, on a tract of 998 acres, having several miles of frontage on Torch Lake. The mills have steel frames, with concrete foundations, spaced 20" apart, with 2 and 3 tiers driven to bed-rock, and topped with 6x12" square timber, capped by a 4x6" bed of concrete. The mills have 27 Leavitt heads and 1 Nordberg steeple-compound head; 17 heads treating conglomerate ore and 11 crushing amygdaloid rock. Stamps are actuated by steam power, but the other milling machinery is operated electrically. The Leavitt heads have a daily capacity of about 350 tons of conglomerate, and 500 tons of Osceola amygdaloid. The mill equipment below the stamps, includes Woodbury-Benedict jigs, Dorr thickeners, and flotation machines, which in 1918 replaced round tables and Wilfley tables. Chilean and Hardinge mills are used for regrinding.

As the mills stand on the flat western shore of Torch lake, but little above water level, tailings speedily filled the shallow lake for some distance

off shore, and to deposit the sand it became necessary to secure a considerable initial elevation, which is gained by sand wheels. The material entering the mills as conglomerate rock leaves as coarse sand to the extent of fully 6,000 tons daily. The sludge is washed through launders to the sand-houses, where it is scooped up by the buckets of the wheels and dumped, high above, into launders running on trestles far out into the lake. There are two wheel-houses, one for each mill. The Calumet wheel house has sand wheels of 50' diameter, and the Hecla 50' and 64' diameter. The largest wheel weighs 500 tons, and is mounted upon massive concrete masonry. Four 25-ton iron bed plates support the pillars carrying the 21-ton Krupp forged steel axle, which is 27' long and 32" in diameter with a hollow core of 26" diameter. Radiating from axle to rim are 2" steel spokes 32' long. The completed wheel is 10' wide and 64' in diameter, driven by gear and pinion, power being furnished by a 700-h. p. motor, and has a capacity of 55,000 gal. per revolution. Nearly 2 years were required to build and adjust this great wheel.

Flotation tests in the laboratory having been encouraging, two 50-ton Mineral Separation machines were installed in 1916. In 1917, two 600-ton units were ordered with all the necessary auxiliary machinery, including Dorr thickeners and Oliver filters. A plant of 2,000 tons daily capacity was in commission in 1918, and second plant of like capacity was put in commission in 1919. The six units of the Hecla mill were remodeled 1918 and 11 units of the Calumet mill during 1919. Two additional units were being added in 1920. Conglomerate ore only is treated by flotation. All ore will be subject either to flotation or leaching as a final treatment. Company will pay Minerals Separation 1c royalty per lb. of copper recovered.

The No. 1 regrinding plant built 1908-09, and in full commission January, 1910, occupies a 195 by 340' building. The frame is of steel, resting on concrete foundations, the floor being of stamp sand, with a concrete capping, no wood entering into the construction of the building. Power is furnished by eight 250-h. p. induction motors, giving about 100% excess capacity, to provide against delays through overhauling and repairing.

Equipment: includes 24 large Hardinge mills (8' diameter by 72" cylindrical length), which replaced in 1918 the 48 Chilean mills formerly used.

There are 200 Wilfley tables, each section of the plant having 6 grinders, 18 tables for roughing, 4 tables for middlings, and 12 tables for slimes. Product from each set of 2 grinders goes to a settling tank, from whence the roughings go to the first 3 tables, and the slimes to 2 other tables, the middlings from each 15 tables going to 2 additional tables. The coarse sands from the Calumet mill go to sand wheel No. 2, and waste sands to wheel No. 1, the coarse sand elevated by wheel No. 2 running to the regrinding plant, where the amount going to each mill is regulated by feed gates, an overflow tank at the end of the launder caring for the surplus, in case of stoppage of the mill. A Hardinge conical tube-mill crushing coarse tailings, is 8' in diameter at the larger end, the pulverizing of sands being accomplished by the use of Danish pebbles on a lining of hard brick. Re-modeling of No. 1 plant was completed in 1918.

The regrinding mill has traveling cranes, and every piece of machinery is duplicated, so that breakages can be repaired quickly. The mill is fed with coarse sand carrying up to 17 lb. copper p. t. No slime goes to the regrinding plant, which treats exclusively coarse gravel and sand from the jigs and tables. The product is clean mineral, of good average tenor, which is pumped into bins, and thence loaded into cars for shipment to the smelter. Labor costs are low, the plant being automatic throughout, and the force is only 12 men and boys per shift.

No. 2 regrinding plant, started in 1914, is practically a duplicate of No. 1. It contains classifiers, 64 Hardinge conical mills, and tables. It is fed

by tailings reclaimed from Torch lake, recovered by a suction dredge, known as the reclamation plant.

A duplicate regrinding plant to that at Lake Linden is being constructed near the site of the dismantled Tamarack mill, at a reported cost of \$2,500,000. Tamarack sands carry 14 lb. copper per ton.

An ammonia leaching plant of 4,000 tons daily capacity, using ammonia in solution, treats tailings from the regrinding plants.

Details of the work of the regrinding reclamation, and leaching plants are as follows :

Regrinding plants:

Year	Tons treated	Assay headings —(From mine)—	Assay tailings	Copper lb.	Lb. Cu. per ton	Cost per lb. (a)
1918.....	530,657	0.599%	0.414%	2,243,022	4.23	6.75c.
1919.....	581,583	0.564	0.387	2,186,209	3.76	7.22
1920.....	540,327	0.626	0.428	2,221,000	4.11	8.15

(From old sands)

-----------	---------	-------	-------	-----------	------	------

(a) exclusive of smelting and selling charges.

(b) Total treated prior to 1918, 1,458,002.

Water for the mills is supplied by 4 pumps, of which the "Michigan" is the most powerful in the world, having a daily capacity of 60,000,000 gals. Auxiliary pumps are the "Huron" and "Ontario" of 20,000,000 gal. capacity each, and an I. P. Morris pump of 22,000,000 gal. daily capacity.

The electrification of the Calumet & Hecla was begun in 1904, and eventually will be completed, at mines, mills and smelters, except for some of the big compound hoists and air compressors at the mine, where a change from steam to electricity would be doubtful economy, as well as necessitating enormous initial outlays.

Machinery at the power plant includes a 10,000 kilowatt mixed flow turbine, and a Leavitt engine of 3,000 h. p., built originally for hoisting purposes, direct-connected to a 2,000-k. w. generator. A second turbine of 10,000 k. w. capacity was put in commission in 1918, giving the powerhouse a total capacity at maximum load of 22,500 k. w. The electric equipment of the mills includes 15 motors, of 20 to 250 h. p. each.

The boiler house has twenty 500-h. p. Babcock-Wilcox tubular boilers. There are coal crushers, feeding an endless link-belt system with 308 steel link buckets, of 60 tons hourly capacity, taking coal to overhead bins, whence it is fed to the grates by Roney automatic stokers. Water requirements at the boiler plant are about 750,000 gals. daily, obtained from a 750,000-gal. reservoir, fed from Lake Superior via the Calumet pipe-line. Coal on hand amounts to one year's supply.

The Torch Lake smelter is at Hubbell, about a mile south of the mills, on a 30-acre site having ample frontage on Torch lake, with deep water in front and 3 railways at the rear. The smelter has 4-stone furnace buildings, and a 50x70' furnace building, both blast-furnaces and reverberatories having been rebuilt within the past few years. There are 18 reverberatories, which are top-charged, having platforms above on which the mineral is thoroughly dried before charging. The blast furnace is 40x128" at the tuyeres, its comparatively small size being due to the use of reverberatory furnaces for the bulk of the smelting work. A new steel-frame smelter building houses three 150-ton reverberatory-furnaces, of so-called Jumbo pattern, modeled after the furnaces of the Lake Superior Smelting & Refining Co. The practice of the smelting plant is fully abreast of the time, in all essentials. In November, 1916 another furnace was blown in. In 1921, coal dust firing was started in the furnaces. The smelting works have an assay-office, a laboratory, and a large warehouse for supplies.

The electrolytic plant, 155x270' at Hubbell has superseded the Buffalo reduction plant, which has been abandoned. It is built of steel and brick, contains four 7½-ton traveling cranes and 512 lead-lined wooden tanks, 3'x11'x3' 9" deep, in 4 sets of 128 tanks. Each set is arranged in 4 sections of 32 tanks, and each section in two tiers. The electric current is furnished by four 125-volt direct current generators driven by alternating current motors operating on current transmitted at 13,000 volts from the power plant at Lake Linden, transformed to 2,300 volts. There is a continuous circulation through the deposition tanks of the electrolyte which contains about 3 to 4% copper and 10 to 12% sulphuric acid. The plant has a capacity of 65,000,000 lb. copper per year. Company markets its own copper. This plant also recovers several hundred thousand ounces of silver yearly.

There is 1 concentrate or mineral house, with a storage capacity of 18,000 tons, at Hubbell. Calumet & Hecla concentrate, locally called mineral, carries less than 60% copper.

The power plant at the smelter has three 125-h. p. boilers, and each of the two large reverberatory furnaces has a 300-h. p. boiler attached through which the waste gases pass.

The dock system of the Calumet & Hecla is extensive, including a series of very large coal sheds at Lake Linden and a series of docks at the mills and smelters on Torch lake. An electrically operated coal bridge capable of handling, from vessels, 10,000 tons per 24 hours, was commissioned in spring of 1918. This bridge will unload all coal formerly handled at No. 1 and 2 docks. It also owns and operates the ship canal connecting Torch lake with the government waterways on Portage lake, this canal being 21' deep and accommodating the largest vessels plying the Great Lakes. Tolls, ranging from 10 cts. on soft coal to 50 cts. per ton on package freight, are charged by the company on independent cargoes entering Torch lake through this canal.

The company owns extensive tracts of pine, hemlock and hardwood timber along the southern shore of Lake Superior, this land carrying between 400,000,000' and 500,000,000' of standing timber. The company also has a long term timber contract with the Keweenaw Association, Ltd., and buys extensively of jobbers, the requirements for underground timbering alone being 18,000,000' annually, in addition to the many million feet of timber and lumber used on surface at the mines, mills and smelters.

Construction: cost \$186,955 in 1920, compared with \$592,850 in 1919; \$179,588 in 1918; \$2,274,901 in 1917.

Net returns: the conglomerate from the old Calumet & Hecla workings has shown a strongly declining tendency in metal content for many years past. Net returns were almost 5%, or 100lb of fine copper per ton in 1873; 4.75%, or 95lb fine copper per ton, in 1880; 3.012%, or 60.24lb per ton, in 1889, 2.99% or 59.93lb in 1900; 2.62% or 52.44lb in 1902.

Recent Net Returns.

Production: has shown a decline since 1906, in which year the high mark of 100,023,420lb fine copper was reached; in 1913 it was only 45,016,890lb copper, climbing to 53,691,562lb in 1914 and 71,030,518lb in 1915. Production in 1913 and 1914 was seriously affected by the labor strike, called by the Western Federation of Miners on July 23, 1913, and declared off on April 12, 1914, and by the extraordinary conditions prevailing in the copper market in 1914, due to the European war. The mine was operated on a $\frac{3}{4}$ -time basis from September 1, 1914, until February 1, 1915, when work was resumed on full time.

Copper on hand at end of 1920 was about 70,000,000lb., compared with 28,000,000 a year previous.

The Kearsarge lode produced 228,985lb of copper from 19,050 tons of ore in 1912, and 233,915 lb from 18,203 tons in 1913.

In 1904, the Calumet & Hecla Mining Co. started a pension fund. Certain employees who had attained the age of sixty years or more and who had been in the company's employ twenty years or more, were retired on a pension proportionate to their length of service and their wages. These pensions have run from \$9 per month to \$38 per month.

On July 15, 1916, the C. & H. celebrated its 50th anniversary. Long-service medals were given to 1,371 employees; of these, 169 were for men who had worked over 40 years, 380 for 30 to 40 years, the remainder for 20 to 30 years.

Reviewing the 55 years career of this company, several features deserve attention. To the investor, the total dividends, \$152,250,000 paid on an investment of \$1,200,000 is not only remarkable for its amount, but because dividends have been continuous.

To the technical man this record is particularly noteworthy, when the mining record is considered. Beginning in 1866, with a small production from the rich native copper ore of the Calumet conglomerate, the company's present daily production is 10,000 tons, mined through 20 shafts, several of them a mile deep. The yearly production of copper is from 65 to 75 million pounds, with a record amount, 100 million, in 1906.

This production comes from very low-grade ore—lower, in fact, than that of the Utah Copper or other great porphyry deposits. The ore originally mined, carried nearly 5% or 100lb of copper per ton, but the grade of ore decreased from year to year as depth was gained until it is now only 25 to 28lb. copper per ton of ore. The maintenance of dividends, despite this decrease in metal content is due to the ability of the management in keeping down costs, so that a pound of copper is now produced as cheaply from the lean ore as it was from the richest ore. The company is also saving over 14,000,000lb of copper annually by retreating the old waste or tailings made many years ago at its mills and dumped into the lake. It has installed a leaching plant which gives a new youth to the entire district, by its treatment of ore carrying flake copper, and it has adopted flotation in connection with the treatment of conglomerate ores.

In 1906 the company, realizing that the Calumet conglomerate lode, on which the company was started, would eventually be exhausted, began the purchase of other properties and of shares in other Lake Superior companies. Controlling interest in six companies, bought for \$8,592,000 has proved very profitable, these stocks returning over \$11,000,000, in dividends, and meanwhile increasing in market value.

Operations on the Osceola lode were suspended toward the end of 1920 and on April 1, 1921. Calumet & Hecla and its subsidiaries stopped production. Development and smelting operations were, however, continued in a small way.

Management announced resumption of operations about April, 1922.

CASCADE MINING CO.

MICHIGAN

Address: O. B. Warren, gen. mgr., 709 Security Bank Bldg., Minneapolis, Minn. Fully described in Volume XIV.

Property: Isabella mine, sold to Steel & Tube Co. of America, Wisconsin, and described under that title.

CASS COPPER CO.

MICHIGAN

Address: Houghton, Mich.

Officers: Fred Smith, pres.; John T. Reeder, v. p.; F. W. Nichols, sec-treas., with John H. Rice and Jas. P. Corgan, directors.

Inc. 1916, in Michigan, to take over the Norwich mine, formerly owned by the Copper Crown Mining Co. **Cap.** \$3,750,000; shares \$25 par; 40,000 shares were paid for the property and 14,660 issued to the public at \$3 per share, to pay for diamond-drill campaign. Assessment of 10c. per share payable Jan. 16 1922. Annual meeting, last Monday in June.

Property: 1,980 acres, in Ontonagon county, T. 49 N. R. 41 W., has several well-known lodes crossing the ground.

Development: by 9,550' of diamond-drilling, which discovered an unidentified lode of shot and mass copper. This will probably be developed by an old 1,000' tunnel. Work stopped August, 1917, until material and labor are again available at reasonable prices.

CASTILE MINING CO.

MICHIGAN

Office: 1208 Hanna Bldg., Cleveland, O.

T. W. Hopkins, range mgr., Ironwood, Mich. P. S. Williams, supt., Oglebay, Norton & Co., sales agents; W. K. Carter, purch. agt.

Property: four mines on the Gogebic range, Gogebic county; the Asteroid, Castile, Eureka and North Mikado.

Production: total to end of 1920, 3,361,397 tons. Shipping ore carries from 60% to 62.76% iron and 0.042% to 0.102% phosphorus.

CENTENNIAL COPPER MINING CO.

MICHIGAN

Subsidiary of Calumet and Hecla Mining Co.

Office: 12 Ashburton Place, Boston, Mass. **Mine office:** Calumet, Houghton County, Mich.

Officers: Rodolphe L. Agassiz, pres.; Jas MacNaughton, v. p.-gen., mgr. with H. F. Fav. Dudley S. Dean, E. B. Dane, Francis L. Higginson, and J. T. Burnett, directors. C. H. Bissell, sec.-treas.; G. L. Osgood, Jr., asst.-sec-treas.; J. H. Chynoweth, mg. capt.

Inc. 1896, in Michigan, as successor of Centennial Mining Co. **Cap.**, \$2,500,000 shares \$25 par; 90,000 issued; paid in, \$19.50. Last assessment, 1905, was \$4. Calumet and Hecla owns 41,500, or 46%, of the 90,000 shares outstanding. Company owns 16,164 shares of the 100,000 shares of the Lake Milling, Smelting and Ref. Co. American Trust Co., Boston, transfer agent; Old Colony Trust Co., Boston, registrar. Annual meeting, first Tuesday in April. Listed on Boston Stock Exchange.

Dividends: Sept., 1916, \$1 per share; 1917, \$1; 1918, \$2, amounting to \$360,000.

Profits were \$6,046 net in 1911, \$50,511 net in 1912, \$31,397 in 1913, \$3,213 deficit in 1914, \$142,440 in 1915, \$276,546 in 1916, \$145,399 in 1917 and \$128,295 in 1918; \$73,121 (loss) in 1919; \$127,326 (loss) in 1920.

Balance Sheet, December 31:

	Current Assets			Current Liabilities		Excess of Assets
	Cash, etc	Supplies	Total	Acct's. Pay	Reserve	
1920.....	\$208,986	\$36,883	\$245,870	\$22,466	\$223,403
1919.....	362,358	48,463	410,822	33,672	377,150
1918.....	423,750	45,637	469,387	33,387	\$14,035	421,965
1917.....	408,333	66,389	474,722	34,230	4,384	436,108
1916.....	454,959	30,344	485,304	36,825	448,379

Property: 670 acres, Sec. 12, T. 56 N., R. 33 W., and a triangular patch of about 30 acres at the S. E. corner of the main tract, bought to secure the outcrop of the Kearsarge lode, and including about 10 acres, bought 1905, of the Old Colony, for the surface plant. The first work was done, 1863, by the Schoolcraft Mining Co., which failed to open a paying mine, and was reorganized, 1876, as the Centennial Mining Co., and again reorganized, 1896, with present title. Expenditures of upwards of \$1,500,000 were made by the old company in unsuccessful efforts to open a payable mine on the northern extension of Calumet conglomerate. Seven shafts, 3 of considerable depth, were sunk on this bed, No. 3, the deepest, being bottomed at 3,200'. The Centennial lands are in the great mining area of Calumet, and are available for building purposes. Two additions have been platted and surface rights sold at good prices, mineral rights being reserved.

The present company did a little work, 1897 on the old conglomerate shaft, then turned attention to the Osceola bed, deepening 2 shallow shafts to 1,050' and 1,150' depth, respectively. The Osceola bed, where opened on the Centennial tract, averages about 15' in width, but is lean.

Work on the Kearsarge bed was begun September, 1899. Owing to the outcrop of the Kearsarge occurring on the 30-acre tract bought of the Osceola, with only a 100' right-of-way connecting it with the main tract, it was necessary to open the mine on the Kearsarge bed in a peculiar manner, by 2 shafts. These are but 90' apart, on surface, and continue parallel, on the dip of the bed, until the 13th level, when the main tract is reached, after which No. 2 shaft diverges from No. 1 at an angle of 15° on the plane of the bed, 300' being taken by the curve. This method of opening gives short drifts until the shafts enter the main Centennial tract. Each shaft is 17x18' inside of timbers, with 3 compartments, sunk at an angle of 39° with the horizon, through an overburden of about 100' depth. The Kearsarge bed averages about 16' in width, and showed fair copper values in the upper levels, followed by a comparatively barren zone until the 14th level, when there came a gradual improvement, which unfortunately has not been maintained, the mine as a whole proving disappointing.

Development: new openings made during 1920 amounted to 1,021', which compares with 1,729' in 1919; 742' in 1918; 1,409' in 1917 and 2,208' in 1916. No. 1 shaft is 4,000' deep. No. 2 shaft, 4,689' deep, is bottomed at 192' below the 40th level. Drifts were extended N. & S. on the 39th level and N. on the 40th (in 1920); the ore disclosed was below the average grade. Stopping was carried on in levels No. 31, 33, 34, 35 and 36, where ore averaged about 2 lb. lower than in previous year.

Equipment: at shaft No. 2 includes a cylindrical steel shaft rock-house, with 1,000-ton bins, and a 32x60" duplex straight-face hoist, with 2 drums of 14' diameter and 15' 6" winding face, grooved for 1 3/8" cable. The hoist is fitted with devices to prevent overwinding, and is calculated to raise 5-ton skips at the rate of 4,000' per minute, operating under 150-lb. steam pressure.

To overcome a labor shortage in 1917 a rope-haulage system was installed on No. 37 level. This handles ore sent from the 4 levels above.

The mine is served by the Copper and Mineral Range railroads, and has a private line connecting the shops and shafts.

The No. 2 mill of the Lake Milling, Smelting & Refining Co., at Hubbell, was closed in 1919 and rock has since been treated at the Osceola mill.

(a) Includes mining, transportation, stamping and taxes.

*Operations suspended July, 1920.

CHAMPION COPPER CO.

MICHIGAN

Office: 82 Devonshire, St., Boston, Mass. Mine office: Painesdale, Houghton county, Mich. Mill office: Redridge, Houghton county, Mich.

Officers: Wm. A. Paine, pres.; Chas. J. Paine, v. p.; F. W. Paine, sec.-treas.; with Frederick W. Denton, Geo. P. Gardner, W. Cameron Forbes, and Chas. F. Choate, Jr., directors; J. A. Ackroyd, asst. sec.-asst. treas.; W. H. Schacht, gen. mgr.; John Jolly, underground supt.; Edw. Koepel, mill supt.; M. L. Cunningham, asst. mill supt.; H. F. Mercer, chief engr.; E. W. Kruka, chief clerk; W. J. Richards, master mechanic.

Inc. Dec., 1899, in Michigan. Cap. \$2,500,000; shares \$25 par, all issued, full paid in. Is controlled jointly by Copper Range Consolidated Co. and St. Mary's Mineral Land Co., through equal ownership of stock, and owns \$110,000 stock in the Michigan Smelting Co. Annual meeting second Wednesday in May.

Balance sheet of Dec. 31, 1919, showed a net profit of \$1,399,714 and surplus of \$1,953,398; and for 1920, a net profit of \$399,772 and surplus, \$1,-721,756. Receipts for 1920 were \$2,345,801 and expenditures, \$1,946,028. Total assets of \$1,801,774 include cash, \$369,847; supplies, \$344,143; liabilities, \$80,017; excess of assets, \$1,721,756.

Dividends: \$3 in 1903; \$2 in 1904; \$10 in 1905; \$12 in 1906; \$10 in 1907; \$5 in 1908; \$8 in 1909; \$9 in 1910; \$5 in 1911; \$11 in 1912; \$9 in 1913; \$31 in 1915; \$60.14 in 1916; \$44.80 in 1917; \$19.75 in 1918; \$12.80 in 1919; \$6 in 1920; making a total of \$258.50 per share or \$25,850,260.

Property 1,240 acres, being the S. ¼ of Sec. 30, W. ½ and N. ½ of N. E. ¼ and S. W. ¼ of N. E. ¼ of Sec. 31, T. 54 N., R. 35 W., practically all on the mineral belt. Neighbors are the Copper Range and Trimountain on the north, lands of St. Mary's Co. and Hussey, Howe & Co. on the east; Hussey-Howe lands and the Globe tract on the south, and Copper Range lands on the west. The tract carries 9.047' on the strike of the bed, and, at the present angle of dip, the deepest shaft could go down to the impossible depth of 18,950' before reaching the western boundary.

Geology: development started in 1899, under direction of Dr. L. L. Hubbard, and 3 parallel amygdaloidal beds were uncovered by trenching, one of which, the Baltic, showed phenomenal copper content. The 2 amygdaloids paralleling the Baltic bed showed copper in sufficient quantities to render their future exploration advisable. A fourth amygdaloidal bed, about 15' wide, discovered 1901, east of the Baltic bed, carries heavy copper to an encouraging extent, and there also is a fissure vein of arsenical ore, apparently algononite (copper arsenide) near "C" shaft. The width of this vein at surface is slight, and mineral contents variable, but on the second level the fissure is 2' wide, and well mineralized.

The dip of the Baltic bed at the Champion is about 70° and strike same as at the Trimountain, not the easterly trend of the Baltic mine. The bed runs 13 to 45' and averages 24' width, carrying more epidote than at the

burden is less than is found either to the northward or southward. The stretches of lean ground in the mine are few, and the bed carries heavy copper in profusion, mostly in barrel size, but running up to masses of 10 tons in weight. Only about 60% of the rock broken is hoisted, waste rock being sorted out and used for dry walling, packing itself.

All shafts are connected on numerous levels and about 2 miles of new workings are normally made yearly. The bed shows so little poor ground that nearly every level will be opened from end to end of the mine, eventually giving the longest average drifts of any Lake Superior property. The only really poor ground found in the mine was shown in "E" shaft, between the 3rd and 4th levels, and the mine shows some stopes of phenomenal width and richness. The ground opened in 1918 was of average grade. In 1919, by more careful rock selection, the yield of copper per ton was higher than at any time previously; further improvement was shown in 1920.

Development: by 4 shafts; No. 1, the northernmost and 1,835' S. of Trimountain boundary, is 2,668' deep; No. 2, 1,050' S. of No. 1, 2,662' deep; No. 3, 1,300' S. of No. 2, 2,339' deep; No. 4, 1,300' S. of No. 1 and 3,900' N. of Globe boundary, 2,388' deep.

The third level of No. 4 shaft has been driven 3,000' toward the Globe boundary, "F" shaft, started 1,300' S. of No. 1, was abandoned on account of treacherous overburden, but the Baltic bed was located, 1907, by diamond drill at a new site, 1,800' S. of No. 4, and 2,100' N. of the Globe boundary.

New work in 1918 was 4,500'; in 1919, 6,814' including sinking No. 2 shaft 149'; in 1920, 3,746', including sinking No. 1 shaft 154' to the 25th level and No. 2 shaft 50' to the 24th level.

Equipment: the shafts are practically duplicates in all essential particulars, having 40x50' shaft rock houses, with 90-ton ore bias. Equipment at each rock house includes a steam hammer for heavy copper, and one 12x15" rock crusher, taking everything hoisted from the mine direct from chutes. The shafts have duplicate first-motion hoists with 24x60" duplex cylinders and double conical drums of 14' diameter, with capacity for two 3,000' cables each, hoisting 6-ton skips. The boiler houses have Bradley and Burt boilers, with coal trestles connecting. Water for boilers is furnished from a 12,000-gal. dam.

Extensive use is made of electric power on surface, and there are some underground electric pumps. The electric plant at "F" shaft has a 250-k. w. generator, direct connected to a cross-compound vertical engine.

The adoption of power shovels for underground work is under consideration.

The main steel compressor building at "F" shaft has a 100-drill quadruple expansion 2-stage air compressor, with capacity to compress 9,120 cu. ft. of free air per minute to a pressure of 70 lbs. per inch. The compressor operates at a steam pressure of 280 lbs., and has a regenerative feed-water system. Power is furnished by three 250-h. p. water-tube boilers. At No. 1 shaft there is a 40-drill cross-compound 2-stage air compressor with vertical receiver inter-cooler. The electric plant, with a 100-k. w. generator, is in the main compressor building.

Buildings at the mine include a change house, dwellings and machine shop, with traveling crane and trolley rail for its entire length, with a 30-h. p. electric motor.

Mill: The stamp-mill is at Freda, on Lake Superior, 2 miles west of Redridge. Low-pressure turbine and accessories were installed in 1915. The mill has 6 stamps, there being 4 compound stamps, with 15½" cylinders, each treating about 700 tons daily, and 2 simple stamps, with 28" cylinders of about 660 tons daily capacity each, giving the mill a total capacity of fully 4,000 tons daily.

The concentration department has Hodge graduated adjustable-speed

jigs, with plungers working simultaneously or alternately in pairs, jigs and concentrating tables. Raggings are reground by crushing rolls having 1 roll fixed and the other in a spring bearing. The preliminary discharge from the stamp heads is treated on very large jigs, having 30x48" sieves, of punched steel, with one-eighth inch openings, installed in connection with the head. Each head has a V-shaped settling tank, 40' long, 9' deep, 12' wide at the top and 6' wide at the bottom, slimes being drawn from spigots at the bottom. The flow of water through the settling tanks does not exceed 6' per minute.

The boiler house has four 200-h. p. Stirling and 5 Scotch marine boilers. In 1916 a 235' concrete stack, 100" dia. at top, was constructed, and a new boiler installed. Coal is brought to the boilers by tram, and reduced to uniform size by a grinder before feeding to the grates, and ashes are washed into the lake through a launder. Exhaust steam passes through dry condensers, thence to a hot well, from which water is fed to the boilers. Power for the mill is supplied by a 500-h. p. cross-compound engine and a turbine, with a 180-h. p. engine in reserve.

The steel pump house, with truss roof and traveling crane, has a 20,000,-000-gal. triple-expansion pump. Water for the mill and boilers comes from the lake through a 1,020' tunnel, the shore end having a well with bottom 8' lower than the lake level, this being the longest tunnel ever driven under Lake Superior. The intake crib has an area of 45 sq. ft. and, with a second crib, the tunnel could furnish water for 10 stamps. Water cost was less than 1½ cents per ton of ore stamped. Screens have been installed in the tunnel, obviating the trouble formerly caused by sand and wood pulp in the water. A sand loading plant was erected in 1915.

Production:

Year	Ore Stamped Tons	Copper Produced Pounds	Yield per Ton Pounds	Cost per Lb. ¢	Price Receive.	Net Profits
1920.....	321,664	13,610,324	42.42	17.17c	\$ 399,772.

1906.....	671,785	16,954,986	25.24	09.30c	10.06c	1,654,435.23

Total production, 1902-1920, is 341,669,308lb of copper, valued at \$61,-505,341.

The Champion is one of the largest and richest of Lake Superior mines and has been admirably managed. Operations were somewhat curtailed in 1919, and more so in 1920, but production continued even during 1921.

CHARCOAL IRON CO OF AMERICA

MICHIGAN

Address: H. H. Bingham, gen. mgr., Detroit, Mich. W. E. McRandle, supt., Bessemer, Mich. Rogers, Brown & Co., sales agents.

Officers: Frank W. Blair, pres.; F. W. Hutchings, v. p.-treas.; H. H. Bingham, v. p.-gen. mgr.; C. H. Havill, asst. sec.-treas.; A. E. La Bonte, asst. sec.

Cap. \$8,056,600 in 521,725 pfd. shares and 283,935 com. shares; \$10 par. Funded debt, \$994,500 7% Gold debenture notes. Total assets, Dec. 31, 1920 were \$15,162,924, with surplus, \$1,852,175; June 30, 1921, total assets were \$14,536,232 and surplus, \$1,584,497.

Property: a 23-year lease on the Yale mine on Gogebic range. **Ore:** 3 grades, all soft red, one a Bessemer, the second non-Bessemer and the third silicious hematite. The best ore contains 57.49% iron, 0.020% phos. and 3.24% silica.

Development: by shaft. Ore is mined by caving to a depth of 1780'.

Production: 149,155 tons in 1916; 73,633 in 1917; 103,491 in 1918; 270,006 in 1919; 348,007 in 1920; 71,897 in first half of 1921. Company is the largest producer of pig iron, charcoal, acetate of lime and wood alcohol in the United States.

CHEROKEE COPPER CO.

MICHIGAN

Address: J. A. Thomas, supt., Houghton, Mich. **Mine office:** Winona, Houghton county, Mich.

Officers: W. A. Hodgson, pres.; Linus Stannard, 1st v. p.; Deen L. Robinson, 2nd v. p.; Wm. D. Calverly, sec.-treas.; with J. H. Rice, B. F. Sparks and F. W. Nichols, directors.

Inc. April, 1910, in Michigan. **Cap.** \$2,500,000; \$25 par; issued, \$1,750,000, of which 49,000 shares were given for lands, 5,000 shares went to the promoters, and 16,000 shares were sold to the public at \$5. Paid in \$5.50 per share; last assessment of 50c. paid March 26, 1917. Boston Safe Deposit and Trust Co., transfer agent; International Trust Co., Boston, registrar. Listed on Boston Curb. Annual meeting second Tuesday in April.

Statement for December 31, 1917, shows receipts of \$22,227; previous surplus, \$17,326. Expenditures were \$27,066, of which \$25,264 was spent for mining, leaving cash on hand \$12,486. In August, 1919, there was \$20,000 in the treasury.

Property: 880 acres, Sec. 2 and S. E. $\frac{1}{4}$ of Sec. 31, T. 51 N. R. 37 W., lying between the Bohemia and King Philip, 1 to 2 miles S. W. of the latter, formerly were owned by the Penn Mining Co., and later by the ill-starred Belt Mines Co., Ltd. Land, entirely on the mineral belt, formerly included what is now the Lake mine of the Lake Copper Co. and carries upwards of a mile of the copper-bearing formation, presumably carrying the Evergreen belt. Diamond-drilling began in 1913. No. 6 drill-hole cut a cupriferous amygdaloidal bed of 32' width, of which 5' carried good copper.

The vein is amygdaloid to epidotal amygdaloid in character with general N. E. strike and dip of 62°, having barrel and shot copper in surface workings, and a width of 30' to 45'.

Development: by shaft, down 450', with openings at 110', 220', 320' and 420' levels, with drifts following the vein (N. E.-S. W.), from each station driven in 1917, for 653'. A fault-plane crosses shaft at No. 3 station; it dips 45° E.; the extent of disturbed ground is unknown.

Equipment: hoist, compressor, pumps, etc. Work suspended December, 1917.

CLARK MINE

MICHIGAN

Office: care Dr. Leon Estivant, owner, 47 Ave. de l'Alma, Paris, France. **Mine office:** Copper Falls, Keweenaw county, Mich. Fred W. Nichols, agt.

Property: 2,433 acres, includes mine formerly known as the Clark, Bell and Montreal, about 3 miles south of Copper Harbor, between Lake Fannie Hooe on the north and Breakfast on the south, including Lake Manganese. Mine opened 1858, for copper, also carries a promising \mathcal{Z} of pyrolusite, average of assays, 1900, by Duparc of Geneva, giving 55.73% manganese and 1.36% copper. Was tested 1905, and again, 1910, by diamond-drills. Shipped about 1,200 tons of high-grade manganese ore. Was under option, 1910, to United States Smelting Refining & Mining Co. Fully described Vol. II. Idle for years.

CLEVELAND-CLIFFS IRON CO.**MICHIGAN**

Offices: Cleveland, Ohio and Ishpeming Mich. M. M. Duncan, mgr.

Officers: W. G. Mather, pres.; M. M. Duncan, v. p.; G. G. Heer, treas.; S. L. Mather, sec., with T. H. Newberry, C. W. Bingham, S. Mather, J. H. Wade and H. A. Raymond, directors. C. J. Stakel supt.

Inc. May 9, 1891 in W. Va. Cap. \$10,000,000; \$100 par; 995,740 issued. Reincorporated December, 1920 in Ohio. Cap. 400,000 shares, no par value, 398,296 shares issued.

Funded debt: authorized \$3,500,000 Firsts Collateral Trust Gold 6s; \$175,000 outstanding, May, 1921; \$72,000 Grand Island Steamship Co. First Gold 5s., due Dec. 1, 1921 and guaranteed by the Cleveland Cliffs Iron Co. In June, 1920, company with Trumbull Steel Co. purchased all the common stock of the Trumbull Cliffs Furnace Co.

Dividends: 62½c. per share paid Jan. 25 and April 25, 1921; 35c. July 25, 1921. The old company paid 2½% quarterly.

Balance sheet dated Dec. 31, 1921 shows current assets, \$28,033,412; total assets \$63,549,005; current liabilities, \$12,068,798; surplus, \$63,549,005.

Property: iron mines in Michigan and Minnesota. For the Minnesota properties see Cleveland-Cliffs Iron Co., Minn. The Michigan properties include the following mines all in the Marquette range: Angelina, Adams, Austin, Athens, Barnes-Hecker, Bunker Hill, Cliffs shaft, Francis, Gwinn, Holmes, Jackson, Lake, Maas, Morris-Lloyd, Negaunee, Republic, Salisbury, Stephenson, Princeton, Mackinaw, Lloyd and Gardner.

The McClure power project was completed 1919, after 2 years' work, commenced in August, 1917. The dam on the Dead River, 7 miles west of Marquette, Mich., is the largest hydro-electric project in northern Mich. The dam is 500' long, spillway 200' long, height 50' from foundation, and base 50' wide, tapering to 4' at top of spillway. It is of concrete construction throughout. A pipe-line 13,600' long connects with the power-house; 10,000' of this is of fir wood-pipe 7' in diameter, the remaining 3,600' is steel, 7' in diameter.

The power-house built at the junction of Rainy creek and Dead river, is 90' long, 45' wide and 25' high. Two 5,000 Kva. generators are coupled to 7,000 h. p. turbines. The transformers are outside the building; the current is received at 2,000 volts and stepped up to 30,000 volts for distribution throughout the company's mines. This plant is described in the Eng. and Min'g. Jour., Sept. 13, 1919.

CLIFF MINING CO.**MICHIGAN**

Subsidiary of Calumet and Hecla Mining Co.

Office: 12 Ashburton Place, Boston, Mass. Operating office: Calumet, Mich.

Officers: Rodolphe L. Agassiz, pres.; Jas. MacNaughton, v. p. and gen. mgr., with Q. A. Shaw McKean, R. C. Grew, W. E. L. Dillaway, and Walter Hunnewell directors; C. H. Bissell, sec.-treas.; Geo. L. Osgood, Jr., asst. sec.-treas.

Inc. Jan., 1910, in Michigan. Cap. \$2,500,000; shares \$25 par; issued, \$1,500,000, \$13 paid in. Is controlled through ownership of 28,785 shares, by Calumet & Hecla Mining Co. State Street Trust Co., Boston, registrar; American Trust Co., Boston, transfer agent. Listed on Boston Stock Exchange. Annual meeting, first Wednesday in April.

Assets and Liabilities:

	Current Assets					Surplus
	Cash & Accts. Rec.	U. S. Cert.	Supplies	Accounts Pay.		
1920.....	\$50,817	\$1,176	\$49,641	
1919.....	5,373	\$10,000	...	39	15,135	
1918.....	16,209	10,000	...	137	17,071	
1917.....	19,854	\$495	1,731	18,618	
1916.....	20,954	492	110	21,335	

Receipts in 1920 were \$37,103, of which \$34,993 was from sale of real estate.

Property: includes both the Cliff and the South Cliff mines connected underground on the third level. The Cliff mine, 2 miles N. E. of the Ojibway, is the oldest mine in the Lake Superior district, opened 1846, closed 1870, again reopened 1872, and abandoned 1878, paying dividends, 1849-79, of \$2,518,620. The mine was opened on a fissure vein crossing the bedded formation at practically right angles, and was pretty thoroughly worked out before the property was abandoned. The main fissure vein had several feeders, and a number of independent fissure veins, including the West vein, which was rich in copper near surface, and the East Cliff vein, about an eighth of a mile east of the main vein. The Cliff ore was notably rich in native silver.

The Cliff carries the Kearsarge amygdaloidal bed for about 2 miles, and for practically unlimited depth, the shaft being a trifle less than 2 miles from the most northerly shaft of the Ojibway, which is the nearest opening on the Kearsarge lode. The Tamarack Mining Co., which owned the Cliff until 1910, secured a complete geological cross-section of the tract, in 1903-7 by diamond drilling, the location of the Kearsarge bed being proven by 12 drill-holes, the majority of which were said to show commercial values, and, in addition, the property carries about 20 other amygdaloidal beds, east of the greenstone bluff, which is such a prominent feature of the landscape rising to a height of several hundred feet. A 217' vertical shaft was sunk, 1910, entering the bed where the ground is considerably disturbed. Work in this shaft was abandoned, 1913, as the Kearsarge vein at this place proved narrow, dry and barren.

Five diamond-drill holes were put down during 1914 and 1915 to explore the beds eastward in the hope of finding a profitable vein towards the Eastern sandstone. The cross-section crossed the horizon of the Old Colony, Mayflower and St. Louis amygdaloid lodes and the Bohemia and St. Louis conglomerate lodes, but very little copper was disclosed by this work.

The Cliff was the first mine ever opened for native copper, and production, 1845, was 19,903 lb., which was the first commercial output of copper from Lake Superior. Total production, 1845-'82, was 38,054,340 lb. fine copper.

In October, 1919, company sold a mill-site of 346 acres on the northerly side of Keweenaw Point to the Seneca Corporation.

Equipment: includes a power house, with boilers, duplex hoist, and a 5-drill air-compressor. Buildings include a smithy, changing house, combination office and warehouse, boarding house and a number of dwellings. The mine is reached by the Keweenaw Central railway.

Owing to the unsatisfactory assays of the drill cores, property has been idle since 1915.

CONTACT COPPER CO.

MICHIGAN

Office: 70 State St., Boston, Mass. Mine office: Houghton, Mich.

Officers: Harry F. Fay, pres.; C. J. Morrissev, sec.-treas.; with W. A. Mosman, W. S. B. Cram and John G. Stone, directors. G. S. Goodale, supt., Houghton, Mich.

Inc. May 16, 1910, in Michigan. Cap. \$2,500,000; \$25 par; paid in \$250. By vote of stockholders, March 21, 1918, the capital stock was reduced from \$5,000,000 to \$2,500,000 by redemption of 100,000 shares in treasury. Annual meeting, third Thursday in March. American Trust Co., Boston, transfer agent. Old Colony Trust Co., Boston, registrar. Listed on Boston Curb.

Company is a reorganization of the Elm River Copper Co., whose shareholders were given the privilege of exchanging their stock for shares in the Contact Copper Co., share for share, if they subscribed for additional shares at \$2 each, to the extent of 50% of their holdings in Elm River.

Practically 75% of Elm River stock was exchanged and the Contact Co. acquired title to all the real estate and personal property of the former company, which has been dissolved.

Report January 1, 1919, showed cash on hand, \$4,450.

Property: 2,360 acres, in one tract, within the copper-bearing formation in Houghton county, Mich. The property extends along the strike of the copper belt for 16,900', with a width across it of 11,600', and bracing the horizon of all the copper bearing beds of the Keweenaw formation, between the Eastern Sandstone and the upper part of the Ashbed series.

Development: as the tract is deeply covered by drift, it has been explored by diamond drill work, a nearly complete cross-section being secured by upwards of 11,600' of drill holes. Cores show copper in a number of different beds, but not in commercial quantities. On July 1, 1915, drilling was resumed in the S. E. $\frac{1}{4}$ of Sec. 11, to investigate the horizon believed to contain the so-called No. 8 Amygaloid opened on the neighboring Wyandot property and correlated with the Baltic lode on which all the mines of the Copper Range Co. are located. Up to March, 1916, about 5,271' of drilling had been done and the lode definitely located at depths of 450' and 950', respectively, from the outcrop. In hole No. 20, 2,518' of drilling was accomplished between March 1 and June 29, 1916. In hole No. 20 the lode was located between 1,878' and 1,958'; in No. 21 between 641' and 671'. In these 4 holes, the formation averages 35' of uniformly favorable rock.

Equipment: includes a duplex hoist good for 1,000', 2 Burt marine boilers and a 4-drill air-compressor. Water is taken from a dam by a Blake pump. Buildings include a carpenter shop, two-story warehouse, boarding house with accommodations for 100 men, school house and a number of dwellings.

In order to protect the company's cash, work was suspended in 1916 and no active mining exploration has been carried on awaiting the result of active diamond drill work on the ground north and south of the company holdings.

COPPER CROWN MINING CO.

MICHIGAN

Inc. July 18, 1902, in Michigan. Cap. \$2,500,000; increased about 1911, to \$3,000,000; \$25 par; issued, 66,200 shares. Company in July, 1916, sold its property to the Cass Copper Co., which see.

COPPER RANGE COMPANY

MICHIGAN

Office: 82 Devonshire St., Boston, Mass. **Mine office:** Painesdale, Houghton county, Mich. Sales Dept.: 52 Broadway, New York.

Officers: Wm. A. Paine, pres.; F. W. Denton, v. p.; F. W. Paine, sec.-treas., with L. P. Yandell and R. H. Gross, directors; William H. Schacht, gen. mgr.; J. A. Ackroyd, asst. sec.-asst. treas. W. Parsons Todd, sales mgr., New York; John M. Wagner, purch. agent, Houghton, Mich. American Trust Co., Boston, transfer agent; State Street Trust Co., Boston, registrar. Annual meeting, first Wednesday in May.

Inc. 1899, in Michigan. Cap. \$10,000,000; increased 1915 from \$2,500,000; shares \$25 par; 394,363 shares issued December 31, 1920; reserved for exchange of 637 shares; treasury stock, 5,000 shares. The company is the successor of the Copper Range Consolidated, which December, 1901, took over 99,699 shares of that company's stock. On October 18, 1915, this holding company was formally dissolved and the shares exchanged for those of the Copper Range Co. Natl. Shawmut Bank, registrar; American Trust Co., transfer agent, both of Boston. There are about 7,000 shareholders. Listed on Boston Stock Exchange. Range of shares during 1920 was \$48 $\frac{5}{8}$ high and \$25 low; in 1921, \$41 and \$25 $\frac{1}{2}$.

Dividends: \$1,536.086 in 1905; \$2,304.810 in 1906; \$2,304.810 in 1907; \$1,536.740 in 1908; \$1,536.930 in 1909; \$1,537.340 in 1910; \$1,357.104 in 1911;

\$788,428 in 1912; \$1,084,498 in 1913; \$1,182,003 in 1915; \$3,941,648, or \$10 per share in 1916; \$3,943,912, or \$10 per share in 1917; \$2,366,390, or \$6 per share, in 1918; \$2.50 per share in 1919; \$1.50 in 1920; \$1 on March 1, 1922; the total is \$27,392,708.

Holdings consist of the entire assets of the Copper Range Consol. Co. Company's treasury holds: 50,000 shares of Champion Copper Co., or one-half the total issue; 97,231 shares Atlantic Mining Co.; 99,690 shares Trimountain Mining Co., and 42,443 shares Copper Range Railroad Co. The Baltic Mining Co., absorbed by the Copper Range Co., has been dissolved and the mine operated as the Baltic mine of the Copper Range Co. Although described separately, financial and other data relative to the Cham- pion C. Co. are also included below.

Balance sheet for years ending December 31:

Assets—	1920	1919
Cash at Boston	\$ 396,922	\$ 85,053
Cash and Supplies at mine	964,382	732,805
U. S. Bonds & Cert. of Indebt.	2,014,000	2,014,000
Copper on hand, since sold for	1,211,854	1,904,420
Copper delivered, not paid for	170,661	774,542
Michigan Smelting Co. stock	340,000	340,000
Balance due from U. S. Govt. as compensation for C. Range R. R. Co.	642,551	108,781
C. Range R. R. Co. bonds	870,000	870,000
Accounts receivable	110,130	133,323
Miscel. Securities	28,169
	\$6,748,672	\$6,962,923
Liabilities:		
Mine indebtedness	\$ 130,398	\$ 164,219
Accounts payable	319,907	34,118
One-half Champion	860,878	976,699
Excess of Assets	5,437,488	5,787,887
	\$6,748,672	\$6,962,923

There was a deficit of \$4,839 from operations of all companies in 1920, compared with an operating income of \$972,654 in 1919; \$2,895,615 in 1918; \$4,966,825 in 1917; and \$6,078,189 in 1916. Federal income and excess profit tax, paid in 1918 for 1917 operations amounted to \$711,905, taken out of the surplus carried from 1917 account.

Property: 23,517 acres, mainly in Houghton county. Mining companies controlled own an additional 12,240 acres. In 1916 company secured an option on 3,500 acres lying to the south from the St. Mary's Mineral Land Co. and bought for \$50,000 scattered lands to the extent of 5,000 acres in Houghton and Ontonagon counties, from the South Range Mining Co. During 1917, company purchased 5,050 acres, surface and mineral rights, also the mineral rights on 2,000 acres. The price paid was approximately \$50,000.

The company's original tract of 9,360 acres mineral and 441 acres non-mineral land, lies between the Baltic (800 acres) on the south and the Tri-mountain (1,351 acres) on the north. The Champion lies between the Baltic and the St. Mary's Mineral Land property. The Atlantic mine has been idle since the mine was wrecked by air blasts in 1911. The Baltic mines a highly mineralized amygdaloid bed 15'-60' wide, mined through three shafts more than 2,500' deep. The Champion works three separate amygdaloid beds mined by four shafts, all over 2,000' deep. The Trimountain output comes from the Baltic bed mined by 3 shafts, one 3,225' deep.

Development: new work in 1920 totaled 13,948', compared with 25,095' in 1919; 28,062' in 1918; 41,950' in 1917. During 1917, \$57,364 was expended diamond drilling the lands under option from the St. Mary's Land Co., but no important discoveries were made.

Production: (Baltic, Trimountain and ½ Champion):

	Ore, tons	Copper lb.	Yield p. T., Lb.	Price rec'd	Cost p. Lb.	Net Profit
1921.....	30,000,000*
1920.....	452,957	16,951,105	37.42	17.14c.	17.17	\$ 4,839**
1919.....	614,342	23,082,498	37.57	18.67	15.35	972,654
1910-'19....	1,071,746	28,581,304	26.67	18.87	10.87	2,293,955

* estimated.

** Deficit.

The company's output was sold in 1917 for the highest average price ever received by any copper company, namely, 28.735c per lb. In 1918, despite the fact that much copper was sold at prices established by the Government, the high price received of 24.757 cents was due to fact that company books its sales well forward. Copper Range is an assured success, and worthy of all the praise that has been given it. It is the second largest producer of the Lake Superior district.

During 1921, Copper Range and its subsidiaries operated at 60% of normal capacity.

Copper Range Railroad Co.

Office: 82 Devonshire St., Boston, Mass. **Operating office:** Houghton, Mich.

Officers: Wm. A. Paine, pres.; F. W. Paine, sec.-treas.; G. H. Wescott, gen. mgr.; J. A. Ackroyd, asst.-sec.-asst.-treas., with John H. Rice, F. W. Denton, v. p.; Thos. S. Dee, Wm. D. Calverley, W. H. Schacht, and J. R. Stanton, directors.

Inc. 1899, in Michigan. Cap. \$5,000,000; shares \$100 par; issued, \$4,244,300. Debentures outstanding, \$2,280,000 first-mortgage 5% bonds. Company is authorized to issue bonds to extent of \$20,000 per mile of completed main line, and \$15,000 per mile of completed branch lines and side-tracks. Total cost of the road to the end of 1920 was \$7,669,222.

Operating results have been as under:

Year	Revenue	Profit
1920*	\$94,940x
1919*	\$1,002,912	117,030
1918*	1,171,804	100,880
1917	960,275	228,852
1916	930,606	324,131

*Operated by U. S. Government, 1918, 1919 and 8 months of 1920.

xLoss. About 75% of the revenue is derived from carriage of ore, mineral and freight.

The railroad has upwards of 100 miles of track, the 65-mile main line running from Calumet to McKeever, and connecting with the Keweenaw Central at Calumet; the Duluth, South Shore & Atlantic, Hancock & Calumet and Mineral Range railways at Hancock and Houghton, and the Chicago, Milwaukee & St. Paul railway at McKeever. The company also has track rights over 19 miles of the Chicago, Milwaukee & St. Paul railway, between McKeever and Ontonagon, with additional trackage rights of 73 miles over the same line, over which fast freights are operated between Calumet and

Channing, Mich. Track rights have been given the Chicago, Milwaukee & St. Paul over the Copper Range between McKeever and Houghton, and a direct passenger service, with exceptionally good equipment, is operated jointly by the Chicago, Milwaukee & St. Paul and Copper Range lines, between Chicago and Houghton. Spurs connect the main lines with all of the principal mines along the right-of-way.

The company owns a half-interest in a bridge crossing Portage lake, between Houghton and Hancock; also extensive water frontage on Portage lake, in the western part of Houghton, with general office building, shops roundhouse, warehouses and wharves for merchandise and coal. The coal wharf is equipped with modern unloading machinery, and has deep water alongside, capable of accommodating the largest freighters plying the Great Lakes. The Copper Range railway is a model small road.

Baltic Mine

Property: 800 acres, near the eastern limit of the Michigan copper belt, about 75 acres being on the eastern sandstone and non-mineralized. Holdings comprise all of Sec. 21 except the S. E. $\frac{1}{4}$, and W. $\frac{1}{2}$ of Sec. 20, T. 54-N., R. 34 W. Lands are bounded on the north by the Wheel Kate and Sec. 16 of the Atlantic; on the east by St. Mary's Mineral Land Co., on the south by St. Mary's lands, lands of Hussey, Howe & Co., and the Trimountain mine; on the west by the Trimountain. Exchanged 39 acres, 1905, with the Atlantic mine, which will enable the Baltic to sink No. 5 shaft to much greater depth than otherwise possible. To the southward the Trimountain and Champion mines are opened on the same bed, which has a strike of N. 63° E., from Baltic shafts 2 to 5, and to the northward is the Superior mine, on the same bed. The dip of the bed averages about 73° , being the sharpest of any developed cupriferous bed in the Lake district.

Two beds, known as the main and west lodes, are mined, the main Baltic amygdaloidal bed is exceptionally strong, ranging 15 to 60' in width, and so well mineralized that at most points it can be more or less thoroughly stoped from wall to wall. The great width of the stopes has brought about the use of a walling system, by which waste rock is built into dry walls along the drifts, thus saving timbering, while giving stronger walls than any timber could supply, and saving the cost of hoisting lean rock. This system has proven a success, and is now in general use in the Lake district, the credit being due Mr. Denton. A little melaconite is found in narrow fissures crossing the lode, these being too small to follow, but the black oxide ore mined in the stopes is saved in milling, with 35 to 40% copper as dressed, and smelts readily with the native copper mineral. The native copper of the Baltic is arsenical, and it is probable that some conner arsenides are mined and milled, as narrow arsenical fissure veins occur occasionally in the district south of Portage lake. While the finished copper is arsenical, it makes wire of great tensile strength.

Development: in 1917 totaled 14,519'; in 1918, 13,871'; in 1919, 11,010'; in 1920, 2,155'.

Shafts are numbered from South to North.

No. 1, the discovery shaft, located between Nos. 2 and 3, was sunk at a wrong angle, and was abandoned at depth of 219'.

No. 2, the southernmost shaft, 3,062' deep, began production 1906. The surface plant at No. 2 includes a boiler house with two 250 h. p. boilers, and an engine house with an air-compressor reducing 4,000' of free air per minute to a pressure of 70 lb per square inch, and a hoist with double-conical drum. The shaft rock house has a crusher operated electrically, and the shaft has concrete stringers.

No. 3 shaft, 1,170' northeast of No. 2 and 3,755' deep, has a steel shaft

rock house of the circular type, with 1,200-ton bins, equipment including a 16x18" engine, two 18x24" crushers and a large crusher operated electrically.

No. 4 shaft, 900' northeast of No. 3 and 2,982' deep, has a frame shaft rock house sheathed with steel, 36x71', with 17x31' wing, 88' high, with 1,400-ton rock bins and two 18x24" crushers.

No driving was done from the bottom of No. 3 and 4 shafts during 1919, as the ground was poor for a considerable distance. The lode was drilled and only one hole revealed good ore. In 1920, shafts 2 and 3 were sunk and drilling continued.

No. 5 shaft, the northernmost, 885' N. E. of No. 4 and 1,624' deep, has a rock house duplicating that at No. 4. Stopping was done on the 9th and 14th levels, inclusive, and drifts run to the Atlantic boundary. The ground was considerably disturbed in the upper levels, but is growing more settled at the bottom, and good showings are reported on the West lode. Hoist is duplex good for 1,500' depth. Shaft has been abandoned and ground tributary thereto is mined and ore hoisted through the No. 4 shaft.

Equipment: hand power cranes for handling mass copper have been installed at all shafts, and the mine has electric pumps. In 1915 installation of additional generator for underground haulage and construction of transformer house for new transmission line from stamp-mill was completed.

The compressor house, between shafts Nos. 3 and 4, is 36x58' in size, with concrete foundations, stone walls and steel roof, housing a compressor with capacity to reduce 4,000' of free air per minute to a pressure of 70 lbs. per inch. Adjoining is a boiler house of similar material, 49x76', with wing 12x62', having four 250-h.p. boilers and a 140' self-supported steel smokestack. This boiler plant supplies steam for shafts 3 and 4. A new boiler plant was constructed in 1916. Adjoining the boiler is a 360' coal trestle, of 5,000 tons capacity, underneath being a 5x8' concrete tunnel, through which coal is hauled in tram cars, on a down grade, by endless cable. The mine has a complete electric light plant. A considerable town has grown up about the mine, with well-built dwellings for employees on lands owned by the company. The property is served by the Painesdale branch of the Copper Range railroad.

The mill, on Lake Superior, one-half mile west of the Atlantic mill, went into commission, 1901, and was enlarged, 1907. The building is of structural steel, on stone foundation equipped with 4 simple heads of 500 to 625 tons capacity each, and 2 compound heads of about 800 tons capacity each, giving the mill a capacity of about 4,000 tons daily. Equipped with Wilfley tables, Woodbury jigs and Deister concentrating tables for treating the finer slimes. The mill has crushing rolls and a Huntington mill for regrinding, and a settling tank for slimes. Mineral carries about 60% fine copper. Power is furnished by a 500-h. p. 14x32" cross-compound engine, and a 180-h. p. auxiliary engine.

Adjoining the mill is a boiler house with five 250-h. p. boilers. Draft is secured by a set of duplex fans, driven by the mill engine, with a concrete smokestack 226' high and 8' in diameter. Behind the boiler house is a 25,000-ton coal storage yard, for the joint use of the Baltic and Atlantic mills, coal being brought to the boilers, through tunnels, by gravity. A 1,250-k. w. electrical plant, installed 1912, at the Baltic mill, supplied power for a number of regrinding mills at this and other stamp mills of the parent company.

Water for the Baltic and Atlantic mills is furnished by a \$150,000 gravity dam across the mouth of Salmon Trout river. The entire steel structure is anchored to a 2" steel base plate, at the bottom of the concrete, by a large number of 1½", 2", and 2½" steel rods of 15 to 30' length. Water is taken from the dam about 20' below the crest by three 38" riveted steel pipes, one on the Atlantic and two on the Baltic side. Surmounting this structure is a trestle of the Copper Range railroad.

Production:

	Ore Stamped Tons	Copper Produced Pounds	Yield per Ton, Lb.	Cost per Pound, c.	Price Rec'd, c.
1908.....	764,117	17,724,854	23.19	08.28	13.39
1909.....	814,260	17,817,836	21.88	07.98	13.00
1910.....	781,419	17,549,762	22.46	08.32	12.74
1911.....	696,795	15,370,449	22.06	09.09	12.54
1912.....	652,433	13,373,961	20.50	10.94	16.16
1913.....	333,289	7,736,126	23.21	11.91	14.89
1914.....	324,433	7,001,945	21.58	11.17	13.38
1915.....	378,443	12,028,947	31.79	09.50	17.40
1916.....	369,287	12,425,804	33.65	10.85	25.28
1917.....	325,342	11,214,861	34.47	13.77	28.73
1918.....	10,406,097
1919.....	235,832	7,864,653	33.35	17.53	18.67
1920.....	175,357	6,613,918	37.71	18.02	17.12

The ultimate productive capacity of the mine cannot be predicted with safety, but the present milling capacity is equal to making nearly 25,000,000 lbs. fine copper yearly, and ultimately this output, or even a greater production, should be reached.

Trimountain Mining Co.

Company was ordered dissolved January, 1917, by Circuit Court, County of Houghton, but on appeal by dissenting stockholders the Supreme Court of Michigan, in March, 1918, reversed the dissolution order and company continues to operate as a separate corporation.

Office: 82 Devonshire St., Boston, Mass. **Mine office:** Trimountain, Michigan.

Officers: W. A. Paine, pres.; F. W. Paine, sec.-treas.; J. A. Ackroyd, asst. sec.-asst.-treas., with J. R. Stanton, F. P. Son and F. W. Denton, directors. H. H. Schacht, gen. mgr.; John Jolly, supt.; Edw. Koepel, mill supt.; H. T. Mercer, engr.; Benj. D. Noetzel, clerk; Richard Bowden, mng. capt.; Ww. J. Richards, master mechanic.

Inc. 1899, in Michigan. **Cap.** \$2,500,000; shares \$25 par; paid in \$20.

Controlled by Copper Range Co., through ownership of 90,690 shares of stock. Company owns \$110,000 worth of Michigan Smelter Co. stock.

Dividends: \$3 in 1913, \$5 in 1908, \$1.50 in 1910, \$3 in 1912, \$2 in 1913; \$5 in 1918; \$13 in 1919; none in 1920 and 1921. Total dividends, \$3,250,000.

Financial statement: years ending Dec. 31:

	Total Revenue	Profit	Dividends	Surplus
1920.....	\$ 653,847	\$247,391	\$1,626,238
1919.....	1,074,338	51,303	\$1,300,000	1,865,069
1918.....	1,380,984	338,533	500,000	3,127,821

Property: 1,120 acres, the E. ½ of Sec. 19, W. ½ of Sec. 20, N. ½ of Sec. 29, and N.-E. ¼ of Sec. 30, all in T. 54 N., R. 34 W. The Baltic mine lies to the N. and the Champion to the S., with undeveloped lands to the E. and W.

Owing to a very heavy sand overburden the mine was opened by drop-shafts sunk through alluvium, with raises to surface on the angle of the dip of the stratified formation. The Baltic bed runs 15 to 50', with an average width of 25', on the Trimountain property. Heavy copper is found near the walls, and masses upwards of a ton in weight have been found, but values occur mainly disseminated in stamp rock.

The Trimountain shafts enter lean streaks or shoots, sometimes 500' in horizontal length, with flat northerly pitch or rake, underlain by copper ore. Lying parallel with and about 65' W. from the Baltic bed, is a wide amygdaloid, carrying some heavy copper and considerable ore. This bed has not yet been worked, but may be made available for production at some time in the future. The great width of the lode has led to a dry-walling with waste rock, which is used also for building underground chutes, which are roughly circular, with inner diameter of about 5' and are filled about with waste, as stopes are carried upward, three chutes being built at a sharp pitch, the wedging of the surrounding rock serving to hold the walls immovable. The saving in timbering brought about by dry-walling and building chutes of mine rock is large.

Development: No. 1 shaft, 210' north of the Champion boundary line, is sunk at an angle of 68°, with first level opened 168' below the collar, levels thereafter at 100' intervals. The upper levels tributary to No. 1 shaft have been worked out, and the shaft abandoned at depth of 2,284'. It now serves as a waste sand chute.

No. 2 shaft, 1,023' N. E. of No. 1, was 3,370' deep at the end of 1920, and a considerable improvement has been noted in ground below the 14th level, with the lower levels the best opened in this shaft. The shaft rock house, has 2,000-ton ore bins, and is equipped with an engine, steam hammer and two crushers. Ore is raised by a 2,500-h. p. direct-connected duplex hoist, with double-conical drum of 18' maximum diameter, capable of raising 6-ton skips from 1 mile depth.

No. 3 shaft, 1,027' N. E. of No. 2, sunk at an angle of 68° was 2,563' deep at the end of 1920. Beneath 60' of sand, the rock was found to be badly fractured and barren down to the 2nd level, only becoming solid and payable below the 14th level.

No. 4 shaft, the northernmost, 3,267' deep at the end of 1920, is the best shaft of the mine. Openings during 1919 and 1920 showed average ground, with improvement in the bottom drifts north. Sinking of shafts 2 and 4 was continued in both years.

New work covered 8,031' in 1918; 7,271' in 1919; 7,843' in 1920.

Equipment: the mine buildings near shafts Nos. 2 and 3, include machine and carpenter shops, smithy and warehouse. There is a 35-drill air-compressor at No. 2 shaft, with a condensing plant in a separate building. The power plant at No. 3 shaft includes a battery of water-tube boilers and a 4,500' air-compressor. The mine has electric pumps and works about 60 drills. The property is served by the main line of the Copper Range railway, which reaches all the shafts and principal shops. Mine has underground electric haulage on several of the levels.

The mine property has macadamized roads, a large boarding house, upwards of 100 dwellings, general store, hospital and a nurses' home.

Mill: the mill, at Beacon Hill, 2 miles west of Redridge, having been destroyed by fire, the mine output is treated in the Baltic mill. The mill boiler house has six 250-h. p. and two 200-h. p. boilers, the latter maintaining a steam pressure of 180 to 200 lb. per sq. inch. The pump house at the mill has a 20,000,000-gal. pump, taking water from a well connected with a tunnel running 1,960' to an intake crib in Lake Superior.

Production was begun January 4, 1902, with a leased head at the Arcadian mill, and with a return of 37 lbs. fine copper per ton, but fell off later to 27 lb., and still later production fell sharply to 18 lb. fine copper per ton. It is now 30 lb.

Production:

	Ore Stamped, Tons	Copper Produced, Lb.	Yield per Ton, Lb.	Cost, c. per Lb.	Price, c. Rec.	Net Profits
1920.....	116,768	3,532,025	30.24	17.12	25.52	(d)\$247,391

1910.....	317,299	5,694,868	17.95	12.17	12.74	32,250
1909.....	323,408	5,282,404	16.33	13.89	13.00	(d)47,841
1908.....	334,929	6,034,908	18.00	12.69	13.39	41,842

(d) Deficit.

The total copper to end of 1920 was 130,958,123 lb. As copper was produced at a loss, production was not pushed during 1919.

Champion Copper Co.

Owned jointly by St. Mary's Mineral Land Co., and Copper Range Company described under its own title.

Atlantic Mining Co.

Office: 82 Devonshire St., Boston, Mass. **Mine office:** Painesdale, Houghton county, Mich.

Officers: Wm. A. Paine, pres.; F. W. Paine, sec.-treas., with Frank P. Son, F. W. Denton and L. P. Yandell, directors, J. A. Ackroyd, asst. sec.-asst. treas.

Inc. Dec., 1872, in Michigan; reincorporated, 1901, for 30 years. Cap. increased, 1902, to \$2,500,000, shares \$25 par; fully issued; paid in, \$1180. Last assessment was \$2, October 11, 1909, the first in 30 years. Has paid dividends of \$990,000, last in 1905. Owns \$40,000 stock in Michigan Smelting Co. Boston Safe Deposit & Trust Co., registrar; American Loan & Trust Co., Boston, transfer agent. Annual meeting, second Tuesday in March. The Atlantic Co. is controlled by Copper Range Co., through ownership of 97,231 shares of the capital stock. Receipts (rents, interest, etc.) for 1920 totaled \$19,563, and expenditures, \$11,205. The surplus was \$416,511 at end of 1920; \$357,719 in 1919; \$337,577 in 1918 and \$286,887 in 1917.

Property: 8,217 acres, including 1,351 acres of mineral lands, 4,760 acres of timber lands, and 2,106 acres miscellaneous lands, latter including the mill site and a valuable frontage on Portage Lake. Mineral lands are S. ½ of Sec. 4, except S. E. ¼ of S. E. ¼; N. ½ of Sec. 9; N. W. ¼ of Sec. 10 and Sec. 16, all in T. 54 N. R. 34 W. Principal holdings are the old Atlantic mine, 640 acres, including the mines known before 1872 as the South Pewabic and Adams, located about 2 miles south of Portage Lake and 4 miles southwest of Houghton, and the Sec. 16 tract of 640 acres. The mines, idle since 1911, are fully described, Vol. X of the Copper Handbook.

DAVIDSON ORE MINING CO.**MICHIGAN**

Office: 403 White Bldg., Buffalo, N. Y. **Mine office:** Iron River, Mich.

Officers: F. N. Beegle, pres., Geo. Davidson, v. p.; T. F. Hildreth, sec.-mgr.; L. R. Davidson, treas.; Rudolph Ericson, gen. supt.

Inc. 1910 in Michigan. Cap. \$500,000; shares \$25 par; 16,000 shares outstanding.

Property: 240 acres, includes the Davidson No. 1, 2, 3 and 4 mines, near Iron River. Ore is a soft, high grade non-Bessemer limonite, containing 52.35% iron, 0.41% phos. and 5.4% silica. Mining is by stoping to 550' in No. 1; sub-level caving and shrinkage stoping to 340' in No. 2; back stoping and shrinkage to 230' in No. 3 and shrinkage stoping to 320' in No. 4.

Equipment: includes 4 hoists, 3 compressors and steam shovel.

Production: in 1920 was 250,000 tons, compared with 262,048 in 1919; 113,779 in 1918; 223,990 in 1917; 164,248 in 1916; 152,430 in 1915; 122,567 in 1914, a total of 1,656,151 tons.

DOUGLASS COPPER CO. MICHIGAN

Office: 705 Sears Bldg., Boston, Mass. Property north of Allouez and west of Ahmeek holdings in Allouez township, Keweenaw county, Mich.

Officers: Charles J. Paine, pres.; George P. Gardner, v. p.; with R. S. Sheldon, C. C. Douglass, W. A. S. Chrimes, and A. S. Knight, directors. J. F. Dolloff, sec.-treas.

Inc. 1913, in Michigan. **Cap.** \$2,500,000; shares \$25 par; assessable; 50,000 shares given for land, making \$10 paid in value; 17,902 shares owned by St. Marv's Mineral Land Co.

Property: 440 acres in E. ½ of Sec. 30 and W. ½ of Sec. 29, embracing eleven 40-acre tracts formerly owned by the Sheldon Douglas and the Northcy estates, and the St. Marv's Mineral Land Co. This tract covers the underlay, or deep extension of the Kearsarge lode into which the rich ore-shoot now worked in the Ahmeek, pitches. To open this ground a 3,300' vertical shaft must be sunk.

DUNN IRON MINING CO. MICHIGAN

Office: First Wisconsin National Bank Bldg., Milwaukee, Wis.

Officers: E. G. Wilmer, pres.; C. N. Turner, v. p.; M. T. MacLaren, v. p.; H. J. Schlesinger, treas.; W. Saeger, sec.; A. D. Chisholm, mgr.; A. E. Redner, supt. M. A. Hanna & Co., sales agents; J. P. McGuigan, purch. agent.

Inc. April, 1895 in Wisconsin. **Cap.** \$25,000; shares \$25 par. The capital stock is entirely owned by the Steel & Tube Co. of America, Wisconsin.

Property: the Palms mine on the Gogebic range. Ore is a hard non-Bessemer hematite, assaying 55% iron and 0.083% phos. It is mined to 1600' by sub-slicing.

Production: in 1916, 529,751 tons; in 1917, 481,465 tons; in 1918, 821,867; in 1919, 628,207; in 1920, 615,683, a total of 4,952,235 tons.

EVERGREEN BLUFF MINING CO. MICHIGAN

Dissolved. Property owned by Mass Consolidated Copper Co.

FEDERAL SYNDICATE COPPER CO. MICHIGAN

Mail returned from last address: Hosking Blk., Calumet, Mich.

Officers: A. C. Stielow, pres.; H. E. Murrav, v. p.; Harry Olson, 2nd v. p.; Dr. P. D. MacNaughton, sec.-treas.; John D. Kerr, asst. sec., with P. L. de Voist and John R. Ryan, directors; Mortimer North, engr.

Inc. Oct. 12, 1916, in South Dakota. **Cap.** \$1,000,000; shares \$1 par; 152,272 issued on organization. The initial offering of stock May, 1917, was at 50c., changed June, 1917, to \$1 a share.

Property: approximately 360 acres in T. 57 and 58, N. R. 31 W., being the Salem tract, formerly owned by the Federal Copper Co., south of the Phoenix shaft of the Keweenaw Copper Co. Lands cover a 1½ mile stretch across the strike of the copper lode and near the Phoenix, St. Clair and Eagle River properties of the Keweenaw Copper Co., with Ojibway lands on west and east. Lands are crossed by Kearsarge amygdaloid which dips 30° N. W., giving 292 acres underlain by this lode, whose copper content in this part of the range is as yet unprospected.

It was reported in 1917, that company, acting under name of Bear Lake Extension, had secured option on 2,000 acres, S. W. of Calumet, in T. 55, 56 R. 34, and in 1918, the Longyear-Michigan options in T. 56 R. 34 aggregating 1,240 acres, were said to have been absorbed by Federal. The Bear Lake Pool options on 1,360 acres in T. 56 R. 34, were later reported acquired by the Federal.

Equipment: includes compressor with 2 drills, and 1,000' hoist. During 1917-1918, six diamond-drill holes were opened and four said to show commercial ore. Shaft down about 40'. No recent information available.

FORTUNE LAKE MINING CO., THE MICHIGAN

Mine office: Crystal Falls, Mich.

E. W. Hopkins, mgr., Ironwood, Mich.; R. A. Bowen, supt. A. Bjork, asst. supt.; W. K. Carter, purch. agt.; Oglebay, Norton & Co., sales agents.

Property: the Fortune Lake mine on the Menominee range, Iron county. Ore is a non-Bessemer, carrying 50% iron, 0.6% phos. and 4% manganese. Mining is to be entirely by underground work.

FRANKLIN MINING CO. MICHIGAN

Office: 60 Congress St., Boston, Mass. **Mine office:** Demmon, Houghton county, Mich. **Mill office:** Point Mills, Houghton county, Mich.

Officers: R. M. Edwards, pres.-gen. mgr.; H. M. Howard, v. p.; Henry Tolman, treas., with C. F. Moore, C. A. Hight, Sidney J. Jennings and T. S. Woods, directors. Albert L. Wyman, sec. Enoch Henderson, supt.

Inc. April 3, 1857, in Michigan; re-incorporated in 1887 for 30 years, and again in 1917. **Cap.** \$5,000,000; par, \$25; 166,519 shares issued; \$19.20 paid in, including \$2 on Aug. 12, 1920. **Cap. increased,** 1899 from \$500,000 to \$2,500,000, and again increased, November, 1908.

Unissued stock has been set aside for the purpose of acquiring the total capital, or 100,000 shares, of the Rhode Island Copper Co. Franklin has paid dividends of \$1,240,000; last in 1894. Federal Trust Co., Boston registrar; American Trust Co., Boston transfer agent. Annual meeting third Wednesday in April. Listed on Boston Stock Exchange.

Revenue in 1919 totaled \$192,822, and expenditures, \$385,752, making a deficit of \$192,930. Expenses at the mine were \$331,037. Cash, copper, supplies and uncollected assessments at end of year were \$289,085. Current liabilities, including notes for \$221,000, were \$255,745. Revenue in 1920 amounted to \$138,776, and expenditures, \$285,977, leaving a deficit of \$147,200. Current assets, \$414,844; current liabilities, \$251,887.

Property: 3,280 acres of mineral property, and a 217-acre mill-site, with 1 mile of frontage on Portage lake. The old Franklin mine (described Vol. VIII), 160 acres, was sold, July, 1908, to the Quincy Mining Co., for \$170,000, and Sec., 6, T. 55 N., R. 33 W., 640 acres, lying directly north of the Franklin Junior and west of the Rhode Island, was bought from St. Mary's Mineral Land Co., 1909, for 33,333 shares.

Property carries 2 miles of the strike of the Pewabic amygdaloid and other cuprififerous beds of the Keweenaw series. In addition to the main tract, there are 3 other tracts of mineral lands, of 160, 480 and 640 acres. The company also controls, and is absorbing, the Rhode Island Copper Co., which has 800 acres immediately north of the Franklin Junior mine.

Development: early work was on the Franklin Junior property, where two parallel lodes, the Allouez conglomerate and the Pewabic amygdaloid, 500' apart, have been worked. The amygdaloid worked prior to 1902, gave but 9.65lb copper per ton, and was abandoned in favor of the conglomerate until the latter, decreasing in width and value on the 2,000' to 2,400' levels, was abandoned and work resumed on the Pewabic in the Franklin, Jr. shaft (No. 1), sunk about 20' in the footwall. The copper content being extremely low, mining was stopped, and only exploratory work done. In 1913, a crosscut was started eastward from the shaft at 3,200' level to explore the entire eastern part of the company's holdings. At 550' from the amygdaloid this crosscut entered payable ore in the Allouez conglomerate and drifts were started to prove the extent and copper content of the orebody. Work continued until August, 1914, and was resumed in July, 1915, the orebody being developed for 1,100' on the 32nd level. It is opened for stoping on each level from the 27th down to the 39th, an average of 900' on each level, or about 9,000' of drifting, with a continuous raise, used as an ore-chute from the 2,700' to the 3,700' level, where ore is gathered by electric motor trains and carried to the shaft. Besides this main raise there is another for men and

supplies. No. 1 shaft is equipped with a steel circular ore-house (Edwards design), formerly used at No. 2 conglomerate shaft. On the 28th level a crosscut driven in 1915 connects the lode with the shaft, and a similar crosscut has been driven on the 37th level. The conglomerate shaft, bottomed at 2,400' on the incline, has not been connected.

An extension of No. 27 and 22 levels S. from No. 1 shaft to a point under No. 2 shaft was completed in 1916. The conglomerate was much richer and wider than the average. The ground above this up to No. 17 level was untouched. No. 2 shaft, which had caved, was re-opened and repaired from the 4th level to the bottom of the 17th level, but work here was stopped in 1918 for lack of miners. Between No. 18 and 19 levels of No. 2 shaft there is estimated to be over 200,000 tons of good ore.

Mechanical haulage installed on No. 29, 30 and 31 levels greatly reduced costs.

A long crosscut on No. 32 level driven through the Kearsarge lode, stopped on the footwall side of the Wolverine sandstone, 4,542' from the Pewabic amygdaloid. It passed through a thickness of 25' of Calumet conglomerate at 2,150', the 10' Osceola amygdaloid at 2,820' and the Kearsarge conglomerate, 40' wide, at 3,380' from the shaft, but all three lodes were devoid of any copper. Twenty-two other amygdaloids were also cut, 9 of them copperbearing, but only 2 rich enough to warrant exploratory drifts and raises; the remaining 13 were barren. Ore of sufficiently good grade to warrant further exploration was found on the footwall side of the Kearsarge amygdaloid.

During 1917, the 30th level was carried forward 540', to a total of 1,460' north of No. 1 shaft (on the Pewabic), and the best copper seen in the amygdaloid was opened. This level was driven 115' farther in 1918, all with same copper content. Management believes this same condition will be found in the extension of north drifts on lower levels. Production in 1917 came almost entirely from the Allouez Conglomerate and No. 1 shaft; in 1918, 24.6% of the output came from the Pewabic lode and 75.4% from the Allouez lode.

New work amounted to 524' in 1920; 579' in 1919; 2,149' in 1918; 1,916' in 1917; and 8,023' in 1916.

Ore extraction was stopped May, 1919, company announcing that development work only would be carried on until conditions improved and copper could be sold at a profit. Production was stopped May, 1919, and all work confined to developing the Pewabic amygdaloid at bottom of shaft which was sunk to the 39th level. This work was continued for 12 months when management announced that:

"Developments have proved a long stretch (650') of good ground at the bottom of the 39th level on the Pewabic amygdaloid. It is undoubtedly better than any similar stretch heretofore opened. There are excellent grounds for the belief that the values will continue and probably improve as drifting north proceeds. This theory is corroborated by the fact that the 30th level is better at 1,600' from the shaft than it is at 600'."

Before operations completely ceased, this opinion was corroborated by that of two disinterested mining men.

Equipment: includes a hoist with a 10-ton skip at No. 1 shaft, and has special air-compression cylinders, storing up energy, otherwise wasted in compressed air, the compressed air being mixed with steam, in the cylinders, as a prime motive force.

The mill is reached by the Mineral Range railroad. Equipment includes five 2-way heads, with 20x24" cylinders, each capable of crushing 350 tons of conglomerate or 500 tons of amygdaloid rock daily. Each stamp is fed from a 1,000-ton ore bin, and equipped with hydraulic separators, which remove considerable heavy copper. All stamp mortars are on concrete foundations. The washing plant includes 8 classifiers, 20 roughing jigs, 15 finishing jigs, 32 Wilfley and 10 Overstrom tables. The jigs are of the Hodge eccentric type, with centershield copper discharges, obviating skimming. In 1918, an experimental regrinding plant, consisting of one 8'x48" Hardinge mill, one

75-h. p. motor and 6 Wilfley tables, were set up. In 1919 the Hardinge mill ground tailings from the roughing jigs.

Power for the mill is supplied by a 16x32" engine, and steam is supplied by two 500-h. p. boilers. The boiler house has a self-supporting, brick-lined smokestack of 7' diameter, 165' high, on a 52' brick foundation. Water is furnished by a 15,000,000-gal. vertical compound pump, having 12x42" high-pressure and 42x42" low-pressure cylinders, with 47" stroke and plungers of 37½" diameter. Water is drawn through a 36" pipe line, running 200' under the rock to a crib protected by quarter-inch screens. The mill has a 5x12" duplex fire pump, with fire hose, and electric light. There is a 267' wharf at the mill site, equipped with coal hoist and sheds, with 18' of clear water alongside. The mill site has about 20 dwellings for employees.

Production: in 1903 the recovery of copper was 15.25lb per ton of ore stamped and in 1907 was only 11.48lbs., falling in 1909, to 9.47lbs. The largest yearly production ever made by the mine was 5,259,140lb fine copper in 1902. Recent production has been 4,206,085lb in 1905; 4,228,650 in 1906; 4,401,248lb in 1907; 3,703,421lb in 1908; 1,615,556lb in 1909; 966,353lb in 1910; 820,203lb in 1911; 1,710,651lb in 1912; 1,021,440lb in 1913; 93,283lb in 1914; 3,116,566lb in 1916; 3,155,574lb in 1917.

In 1918 production was 2,827,313lb of copper from 273,964 tons of rock; in 1919 (4 mos.), 1,062,879lb from 109,565 tons; no output in 1920 or 1921.

Costs were 24c. per lb in 1915; 18c in 1916; 24c. in 1917; 38c. in 1918; and 36¢ in 1919.

In June, 1920, all work was discontinued and in December, the pumps were pulled and mine was entirely closed.

Management has been excellent, but rock is low in grade, necessitating quantity production to make the mine profitable.

· GLOBE MINING CO.

Office: 15 William St., New York.

Officers: L. P. Yandell, pres., with R. D. Rickard, J. R. Stanton, Gerit Smith of New York and W. H. Leggett, of Detroit, directors. F. G. Heumann, sec.-treas.

Inc. May, 1911, in Michigan. **Cap.** \$78,250; \$25 par; fully paid and issued.

Property: 3,200 acres. Secs. 1, 2, 3, 4 and 5. T. 53 N., R. 35 W., extending entirely across the Keweenawan trap formation, from the eastern to the western sandstone. Land lies next south of the Champion, and immediately north of the Challenge, carrying about 6,000' of the strike of the Baltic and all parallel beds. Mine was developed by the Copper Range Consolidated Co., under option, but option was relinquished, February 1, 1909, after expenditure of upwards of \$500,000.

Development: diamond-drill borings, to locate the Baltic bed, gave some cores with excellent values, but disclosed a heavy overburden of sand and boulders, rendering it necessary to reach the solid rock by a vertical shaft. Work was begun 1905, but the first shaft was abandoned, owing to quicksand, and was replaced by a new vertical shaft, about 700' south of the Champion boundary. The shaft is telescopic, inside measurements of timbers at the collar being 13' 3"x23' 3", with a second section below of 9x19' 6", and a third section of smaller size.

The shaft is 1,040' deep, with first level 356' below surface, and stations were cut at 100' intervals thereafter. The Baltic amygdaloidal bed was tested by diamond-drill boring, and by about 900' of drifting on the seventh level. This level about 1,000' below surface, showed a little copper in patches, but on the whole was unavable. Work was suspended January 31, 1909, and property has been idle since. Notwithstanding the unfavorable results secured by the work done so far, the property is not devoid of promise.

GRATIOT MINING CO.

See Seneca Copper Corporation.

HANCOCK CONSOLIDATED MINING CO.

Office: Hancock, Mich.

Officers: John D. Cuddihy, pres.; Capt. Thos. Hoatson, v. p.; John H.

MICHIGAN

MICHIGAN

MICHIGAN

Hicok, sec.-treas., with Allen F. Rees, W. R. Thompson, and Capt. Jas. Hoatson, directors; Clyde E. Weed, gen. mgr.; Daniel Fisher, clerk.

Inc. June 11, 1906, in Michigan. **Cap.** \$5,000,000; shares \$25 par; issued, 2,500,000; fully paid with \$3 assessment levied March, 1915, payable \$1 each, in May and Sept., 1915, and Jan., 1916. Old Colony Trust Co., Boston, Mass., registrar; State Street Trust Co., Boston, transfer agent. Stock listed on Boston Exchange. Annual meeting, third Wednesday in June.

Debentures: \$500,000 bonds authorized in June, 1920.

Company began business with \$1,000,000 and paid \$552,623 for its property.

Operations for years ended Dec. 31:

	Copper	Ass'mt., Interest etc.	Mining Exp. (a)	Int. & Taxes	Lake M., S., & Ref. Co., St'k etc.	Net Profit
1919.....	\$ 180,858	\$257,151(b)	\$ 145,521	\$44,105	\$210,957(c)	\$37,336
1918....	917,092	776,819	59,044	33,678	47,551
1917....	1,142,454	1,056,541	54,421	31,492
1916....	755,946	119,256	705,778	53,268	12,467	103,688

(a) Includes smelting, freight, marketing, etc. (b) Includes sale of land and machinery. (c) includes \$208,604 payment on notes.

Current assets including investments and inventories totaled \$301,667, at the end of 1919; current liabilities were \$261,101, including loan account of \$256,024.

Property: 725 acres of mineral territory, immediately west and south of the old Quincy mine, in T. 55 N., R. 34 W., including the original Hancock mine, 136 acres, set aside, 1859, by the Quincy Mining Co., which reserved the mineral rights to the Pewabic bed. The Pewabic bed, on lands other than original Hancock tract of 136 acres, is owned by the Hancock Consolidated. Lands carry the Pewabic, Quincy, West and Hancock or Sumner copper-bearing beds.

Perhaps the best part of the Quincy mine is tributary to No. 7 shaft, which is immediately north of the Hancock boundary.

In June, 1916, approximately 75 acres were sold to the Quincy Mining Co. for \$226,000. In part payment thereof the Hancock was granted the right to use Quincy No. 7 shaft and one stamp of the Quincy mill. Operations were carried on under this agreement during 1916, 1917, and part of 1918, but the tonnage hoisted from the shaft did not warrant the expense of its upkeep. In June, 1919, company sold 128 acres, which includes the shaft, to the Quincy Mining Co. for \$244,585.

The old Hancock mine, opened 1859, was closed June 1, 1885, on account of the low price of the metal, after producing 5,709,384 lb. fine copper. The Hancock or Sumner amygdaloidal bed averaged about 12' in width below the fifth level, to a depth of 1,052', where the mine was bottomed.

The property carries the upper half of the Michigan series of cupriferous traps and conglomerates, and has 4 known copper-bearing beds, the Pewabic being the most important. The property also carries the underlay, but not the outcrop, of the 3 copper-bearing beds of the Quincy, these being the Quincy to the eastward, apparently of little value, followed by the Pewabic, which is the main bed of the Quincy and the so-called West lode of the Quincy. The known copper-bearing beds outcropping on the Hancock property are the Hancock or Sumner, mined in the old Hancock mine, and now known as No. 1 lode, lying about 1,100' west of the Pewabic; the old West bed, now known as No. 2 lode lying about 300' west of No. 1, and the New West bed, now known as No. 3 lode lying about 75' west of No. 2. Company also owns lots 6 and 7, Sec. 28, for a mill site.

Development: No. 1 shaft is the old main 3-compartment shaft of the Hancock mine. It has a remodeled wooden shaft rock house, with a hoist good for 2,000' depth.

The new and main 5-compartment working shaft known as No. 2 is 2,200' N. W. of No. 1. It is vertical, with dimensions 9'6" x 29'6", being the second largest in the Lake Superior district, and is 4,500' deep. This shaft intersects No. 3 bed at a depth of 2,038', the bed here showing a pitch of 37°, compared with 47° in the upper workings, this flattening of 10°, at depth, corresponding to a similar flattening shown to the northeast in the No. 7 shaft of the Quincy. The No. 4 lode is intersected by the shaft at a depth of 3,105'; it is 17' thick and carries payable ore. In 1917, 74%, and in 1918, 62% of the ore from this shaft came from this vein.

Ground below the 53rd level, 4,000' below the surface, is reached by 2 subsidiary shafts sunk from the 49th level, connecting with the No. 2 shaft through chutes on the 53rd level and through drift connections on the 49th level.

In 1917, diamond-drilling disclosed some lodes to the south of the big fault which crosses the property and crosscuts were driven to these lodes on the 53rd and 49th levels. The 53rd level crosscut was advanced 611' east in 1918, cutting 2 mineralized veins, the first one narrow, the second, called No. 3 east vein, showed good mineralization. The 49th level crosscut was advanced 428' cutting 2 veins, called No. 1 and No. 2 east; both showed fair mineralization.

Considerable drifting has been done on both No. 2 and No. 3 beds, No. 3 being opened by a winze from the 10th to 18th levels, with drifts on the 9th to 18th levels, inclusive, several of which are more than 1,000' long. No. 2 shaft has loading stations on the 13th, 18th, 23rd, 27th, 34th, 39th, 44th, 49th and 53rd levels, to which rock broken will be sent by chutes from the levels above.

No. 2 shaft has an ore-house that is the most modern in the Lake Superior district. The building has a total height of 128', with working floor 60' above the ground. The bins are of 1,000 tons capacity each.

Work in 1917 showed mineralization to be of fair commercial grade. Work stopped on No. 2 west vein due to narrowness and a poor hanging wall. Stopping on No. 4 vein was carried from 53rd to 38th levels. Development work in No. 2 shaft totaled 7,472' in 1917 and 4,971' in 1918. In No. 7 shaft work amounted to 2,489' in 1917 and 611' up to May, 1918, when shaft was closed.

Equipment: includes two 50-ton crushers and a smaller one for waste rock. The 2 large crushers are fed by 2 steel traveling-belt picking tables. Each machine has a 50-h. p. induction motor and each picking table has a 10-h. p. induction motor. Two men per shift are expected to do all work on the crushing floor.

The main engine-house at No. 2 shaft is equipped with 2 hoists, main engine being a Sullivan-Corliss direct-connected hoist, operating 2 skips in counter-balance, with capacity to hoist 8 tons of rock from a depth of 4,000', at a steam pressure of 150 lbs.; There also is a Sullivan first-motion hoist.

The steel compressor house has an electric traveling crane, 13-drill and 16-drill air compressors and a 35-drill tandem-compound air compressor. The boiler-house has 2 batteries of 4 return tubular boilers, each 72" in diameter and 18' long.

Buildings at No. 2 include a machine-shop, smithy, office, changing house and a number of dwellings. The main plant at No. 2 shaft is reached by a spur of the Mineral Range railway. Company employs about 200 men when running full time.

Electric haulage was installed in lower levels of No. 2 shaft, 1917.

	Production: Ore Milled	Copper Pro-	Yield per	Estimate	Received
	Tons	duced. lb.	Ton. lb.	cost per lb.	per lb.
1918.....	227,049	3,041,514	13.40	25c	24.290c
1917.....	302,725	4,005,882	13.223	26	28.229
1916.....	203,112	2,824,934	13.9	20	28.093

The ground opened, while by no means as rich as some in the Lake Superior district, is of fair average value and with exceptionally good equipment and an able and experienced management, the Hancock promises to make a successful low-grade mine.

Mine suspended operations in Feb., 1919, but pumps were kept in commission so that work could be resumed in 30 days. By December there were 10 drills at work. The first shipment of 1,700 tons of ore, from the east veins, made in Feb., 1920, yielded 0.75% copper. While results on No. 44 level were encouraging, operations were suspended early in 1920, and little but pumping has been done since.

HANNA & CO., M. A.**MICHIGAN-MINNESOTA**

Office: 1300 Leader-News Bldg., Cleveland, Ohio.

Partners: L. C. Hanna, M. Andrews, H. M. Hanna, Jr., F. B. Richards, Wm. Collins, R. F. Grant, J. D. Ireland and L. C. Hanna, Jr. Operated as a partnership and does not furnish reports for publication.

Agents for the following operating companies: Virginia Ore Mining Co., Virginia, Minn.; Consumers Ore Co., Buhl, Minn.; La Rue Mining Co., Nashwauk, Minn., American-Boston Mining Co., Diorite, Mich., Richmond Iron Co., Palmer, Mich., Hollister Mining Co., Crystal Falls, Mich.; Wakefield Iron Co., Wakefield, Mich.; Hanna Ore Mining Co., Virginia and Hibbing, Minn. Also operates vessels of 8,915 average tonnage on the Great Lakes.

HAYES MINING CO.**MICHIGAN**

Office: First National Bank Bldg., San Jose, Cal. **Mine office:** Ironwood, Mich.

Officers: E. A. Hayes, pres.; J. O. Hayes, sec.-treas.; with M. B. Hayes, C. L. Hayes, directors. Robt. King, supt.; L. R. Davidson & Co., White Bldg., Buffalo, N. Y., sales agents.

Inc: 1899, in Wisconsin. **Cap.** \$1,000,000; \$25 par; all issued. No bonds. Annual meeting in May. Transfer office: San Jose, Cal. Dividends to March, 1919. Total \$266,600, or \$66.65 per share.

Property: the Ashland mine, 120 acres, at Ironwood, Mich., first opened in 1884. Developed by inclined shaft 2,120' deep, with many miles of workings. As water is troublesome at certain seasons, large pumps are operated.

Ore: two grades of red hematite are produced, known as Globe, a hard and soft non-Bessemer and Ashland, a soft Bessemer ore. Average analyses for 1919, of all shipments, samples dried at 212° Fahr. Ashland ore: iron, 62.10; phos., 0.035; silica, 8. Globe ore: iron, 57.25; phos., .067; silica, 13.

Production: totals 6,436,652 to end of 1919. Annual shipments were 82,715 tons in 1916, compared with 38,164 tons in 1917, with 48,802 tons in 1918 and 36,359 tons in 1919.

HEMLOCK RIVER MINING CO.**MICHIGAN**

See Pickands, Mather & Co., in Minnesota.

Office: Western Reserve Bldg., Cleveland, Ohio.

Officers: H. G. Dalton, pres.; Wm. McLaughlin, v. p.; C. H. Munger, sec. mgr.; E. P. Williams, treas.; C. E. Lawrence, Palatka, Mich., gen. supt.

Inc. April 1884 in Michigan. **Cap.** \$500,000; \$25 par.

Property: the Porter (formerly Amasa Porter) and Warner mines, 240 acres, on the Menominee range, near Amasa, Iron county. Both produce non-Bessemer hematites, assaying 50% iron and 0.142% phos. Mining is by top-slicing.

Production: at the Porter mine was 116,148 tons in 1917; 65,148 tons in 1918; 46,802 tons in 1919 and 36,005 tons in 1920, a total of 428,286 tons. The Warner mine yielded 74,814 tons in 1917; 78,855 tons in 1918; 77,028 tons in 1919 and 89,344 tons in 1920, or 368,289 tons in all.

HOLLISTER MINING CO., THE**MICHIGAN**

Office: Crystal Falls, Mich. E. E. Hunner, mgr.; Alfred Martun, gen. supt. M. A. Hanna & Co., sales agents.

Property: the Carpenter, Monongahela and Ravenna mines, on the Menominee range. After producing 296,421 tons, the Ravenna is idle. The Monongahela is being developed and shipped 66,000 tons in 1919. The Carpenter produces a non-Bessemer ore, carrying 50% iron and 0.516% phos. Mining is by slicing and stoping to 500'.

Production: 1,625,107 tons to end of 1919; in 1917, 269,387; in 1918, 384,148; in 1919, 396,224 tons.

HUGHTON COPPER CO.**MICHIGAN**

Address: F. W. Nichols, Houghton, Houghton county, Mich.

Officers: Chas. J. Paine, pres.; Geo. P. Gardner, v. p.; with W. Cameron Forbes, Jas. P. Edwards and Fredric W. Nichols, directors; J. F. Dolliff, sec.-treas.

Inc. Jan. 8, 1910, in Michigan. **Cap.** \$2,500,000; shares, \$25 par; assessable; 67,000 issued; \$8 paid. Is controlled by St. Mary's Mineral Land Co., through ownership of 37,222 shares of the 67,000 shares outstanding. Old Colony Trust Co., Boston, registrar; State Street Trust Co., Boston, transfer agent. Listed on Boston Curb.

Operations. during 1919 showed a deficit of \$1,933 and in 1920, \$2,908, leaving liabilities, Dec. 31, 1920, \$19,892.

Property: 23 acres of surface rights, with mineral rights to 160 acres owned in fee, being the N. W. $\frac{1}{4}$ of Sec 14, T. 54 N., R. 34 W., lying E. of the Isle Royale mine and adjoining the Superior mine. Diamond drilling was begun March, 1910, in the horizon of the Baltic-Superior bed, showing 2 cupriferous amygdaloidal beds, the Superior and East lodes, 17' and 20' wide respectively, with dip of 51°, separated by about 83' of trap and conglomerate, the lower bed overlying another conglomerate at a distance of about 150', these strata corresponding exactly with the Baltic formation. Maximum operating depth is figured at 2,800'.

Development: by 620' incline shaft, sunk 60' in the footwall, beneath the lode and a winze sunk 513' below the 620' level, disclosing rich copper rock in the Superior lode. The shaft has been lined with concrete for depth of 300'. Winze cuts the Superior vein at 1,133' where it is 40' wide and shows pay ore on both foot and hanging wall with about 10' of poor rock between.

During 1917 a drift from the Superior mine was extended 350' into the property on the 19th level. In 1918, 908' of drifting and crosscutting on the 19th level, disclosed copper in both the Superior and West lodes, thus opening ground 700' below the lowest previous development.

Total workings amount to about 7,000'.

Equipment: includes a small power plant, and a 16-drill electric air-compressor. There are necessary buildings, including an office, change-house and warehouse, all of wood.

Due to the world war the mine was closed down from September, 1914, to July, 1915. Operations were again suspended in September, 1917, but exploratory work continued to August 1918, since when nothing has been done.

Production:

	Tons Ore milled	Lb. Min. prod.	Lb. Min. p. t.	Lbs. Ref. Copper	Lbs. Cu. p. t. Rock
1917.....	15,628	291,500	18.6	179,012	11.45
1916.....	19,444	365,880	18.8	204,274	10.55
1915.....	14,656	258,900	19.5	156,766	10.69

Sale price for 1915 was 22.2c per lb.; for 1916, 29.21c; 1917, 28.14c.

The property, though small for the Lake Superior district, is considered promising and management good. Before sinking the shaft to the 18th level, management is awaiting developments in the adjacent Superior mine.

HULBERT MINING CO.**MICHIGAN**

Address: Albert S. Bigelow, pres., 199 Washington St., Boston, Mass. W. A. S. Chrimes, sec.-treas.; Fred W. Nichols, agt., Houghton, Mich.

Inc. about 1865, in Michigan. **Cap.** \$1,000,000; shares \$25 par; all issued.

Property: 1,640 acres of mineral land, in Houghton and Keweenaw counties, Mich., undeveloped; part of the surface rights have been sold; but mineral rights reserved. No mining done since organization.

HUMBOLDT COPPER CO.**MICHIGAN**

Address: Copper Falls, Keweenaw county, Mich. Thos. Hoatson, pres.; C. A. Wright, sec., Calumet, Mich.

Inc. 1863, in Michigan. **Cap.** \$1,000,000; shares \$25 par. Amount paid in, \$252,814. Is controlled through ownership of 5/6 of the outstanding stock by the Keweenaw Copper Co. Annual meeting, fourth Tuesday in March. Listed on Boston Stock Exchange.

Balance sheet for year ended Dec. 31, 1920 gives assets, \$258,703, including \$162,217 for development and \$93,720 for real estate; cash on hand, \$163 and bills payable, \$5,870.

Property: Secs. 16 and 21, T. 58 N., R. 31 W., on the mineral belt, about midway between the Arnold and Phoenix mines, lying north of the greenstone, with the Eagle River and Natick mines to the south. The mine, opened 1853, though never a producer has a 300' shaft sunk on the Ashbed, which as at the Arnold, has occasional bunches of rich ground.

In May, 1914, diamond-drill holes were bored through a portion of the hanging wall and across the lode. Holes 12 and 13 intersected the copper bearing part of the lode at 489 feet and 364 feet, below the surface. No. 15 cut this same formation at 713' from surface, and disclosed vein matter of workable width with payable values in both the upper and lower portions of the amygdaloidal flow.

Equipment: includes an engine house, compressor building, smithy, warehouse and 4 dwellings. Idle since 1915.

HUSSEY-HOWE MINING CO.**MICHIGAN**

Address: care C. A. Senecal, Lake Linden, Mich., or Wm. H. Rea, Farmer's Bank Bldg., Pittsburgh, Pa.

Officers: Wm. H. Rea, pres., with Geo. W. Howe, C. G. Hussey, F. B. Nimick and G. H. Childs, all of Pittsburgh, directors.

Inc. 1911, in Michigan. **Cap.** 100,000 shares; \$25 par; 54,000 shares issued, fully paid; 45,000 going to owners for property; 9,000 sold for development.

Property: 320 acres, bounded by Indiana and Bohemia ground, includes N. E. quarter Sec. 22 and N. W. quarter Sec. 23, T. 51, R. 37, W., in Ontonagon county. Property shows outcrop of the Eastern sandstone and 100' west of it, an amygdaloid vein, supposedly the Baltic lode. This shows copper carbonates and oxides, over a width of over 100' resembling the Baltic outcrop at the Champion, 25 miles N. E. As the dip is 60 to 65°, the property contains a valuable area for workings.

IMPERIAL MINE**MICHIGAN**

See Michigan Iron Land & Lumber Co.

INDIANA MINE**MICHIGAN**

Address: John M. Thomas, owner, Milwaukee, Wis. G. A. Richards, supt., Iron Mountain, Mich.

Property: on the Menominee range, opened in 1882. The product is a low-phosphorus (0.007 to 0.013%) low-iron (35.73 to 38.39%) and highly silicious (36.40 to 38.25%) ore, mined by steam shovels to depth of 180'. Electrically equipped.

Production: 46,480 tons in 1917; 58,401 tons in 1918; 14,018 tons in 1919; the total is 233,502 tons.

INDIANA MINING CO.**MICHIGAN**

Office: 60 Congress St., Boston, Mass. **Mine office:** Dec. Bldg., Houghton, Mich.

Officers: R. M. Edwards, pres. and gen. mgr.; Sidney J. Jennings, v. p.; Henry Tolman, treas., with C. F. Moore and C. A. Hight, directors; Albert L. Wyman, sec.; Thomas Bennet, supt.

Inc. Aug. 11, 1909, in Michigan. **Cap.** \$2,500,000; \$25 par; issued 80,000 shares; paid in \$12.50. Last assessment March 1, 1917. Listed on Boston Stock Exchange. State Street Trust Co., Boston, transfer office; Federal Trust Co., Boston, registrar. Annual meeting, third Thursday in April. Company gave 60,000 shares to owners of land for property and offered 36,000 shares, August, 1909, for public subscription.

Revenue in 1919 totaled \$619, and expenditures \$10,639, leaving a deficit of \$10,020. Cash assets, including \$15,547 uncollected assessments, were \$22,187, and current liabilities, \$44,416; profit and loss account \$380,904. In 1920 total income was \$3.07, and expenditures, \$8,882, leaving a deficit of \$8,879. Current assets amounted to \$5,476; notes payable, \$30,000; acct's pay., \$16,928; taxes, 1918-20, \$5,184; profit and loss, \$389,783.

Property: 1,200 acres bought from the Indiana Copper Co., in 1909 the tract lying N. E. of the Lake and N. of the North Lake mines in Secs. 21, 27 and 28, T. 50 N., R. 37 W. The property was worked on a small scale before the mill burned in 1864, but the old openings are inaccessible and no work has been done thereon by the present company. The lands are heavily timbered and can supply mining timber for a considerable time. Ample water is available from the Fire Steel river. Transportation is furnished by a spur of the Copper Range railway, and the Mineral Range line is within a short distance.

Geology: the lands cover a considerable distance along the Evergreen belt of copper-bearing amygdaloid beds and a number of unidentified cuprififerous beds lying between the Evergreen belt and the eastern sandstone. The southeastern part of the tract is in the horizon of the Lake amygdaloidal bed. The Indiana ground though covered with a heavy overburden of sand, hampering drilling operations, has been tested by extensive diamond-drill borings.

No. 2 drill hole disclosed phenomenally rich copper rock in a bed immediately beneath a 400' conglomerate. The ore has been called sandstone, and conglomerate but there is little question that it is an altered felsite; the rock consists essentially of quartz and light-colored mica, with secondary infiltrations of calcite and small irregular grains of disseminated native copper. The even size of the quartz grains, with their interlocking texture, indicates an igneous origin. There are indications that the 40' of rich felsite rock and a second zone of about 25' width, are parts of a single bed of approximately 265' width, the second zone of 25' being near the center of the wide bed. No. 5 hole and No. 9 hole both cut felsite carrying heavy copper, apparently a continuation of the same orebody.

Development: ground was broken Jan., 1911, near No. 2 drill hole for a vertical shaft. The overburden at this point being about 110'. The shaft is cylindrical, of 17' outside diameter, lined with steel and concrete, with inner dimensions of 8x12'. and is 1,492' deep, on the N. edge of a large intrusion of felsite. Where fissured or fractured this rock carried native copper (mass).

Development on the 1,400' level and on 1,150' level did not locate No. 2 hole, but found No. 9 hole at 100' from its proper position. The work shows that the orebody cut by No. 2 hole was not of great size or regular trend.

In 1916, No. 2 shaft, an incline, was started in the S. W. quarter of Sec. 21 to cut one of the South Lake amygdaloid lodes. A year later this shaft was down 310', and 1,496' of exploratory work had been done on the 300' level. This work was believed to be in the horizon of the main system of Ontonagon county lodes, but as no conglomerate was encountered the posi-

tion of the crosscut in the geological section could not be definitely fixed. Enough copper was found, to warrant exploration, but not of commercial value when opened. Due to rising costs, work was suspended in 1918.

IRON MOUNTAIN IRON & CHEMICAL CO. MICHIGAN

Address: M. E. Richards, mgr., Iron Mountain, Mich.

Inc. 1921, in Michigan. Company is erecting a charcoal pig-iron furnace and by-product plant at Iron Mountain.

ISLAND COPPER CO. MICHIGAN

Office: Suite 3300, 120 Broadway, New York, N. Y. Mine office: Houghton, Mich.

Officers: Thos. F. Cole, pres. Henry P. Paull, v. p.; Frederick W. Nichols, sec.; F. R. Kennedy, treas., with Joseph B. Cotton, George G. Barnum, Geo. A. Tomlinson, E. R. Grochau, and Julius H. Barnes, directors.

Inc. March 8, 1909, in Michigan. Cap. \$1,000,000; \$25 par; \$7 paid in; issued 26,750 shares. Last assessment of \$1 per share called August 1, 1918. Annual meeting, first Tuesday in June.

Balance sheet of January 1, 1920, showed assets totaling \$198,797; including property, \$146,783; cash, \$1,822; accounts receivable, \$6,000; investment and miscellaneous \$44,192. Liabilities included \$11,547 bills payable.

Property: on Isle Royale, over 94,100 acres out of a total of 125,000 acres on the island, includes the former holdings of the Isle Royale Land Corporation, Ltd., and the Island Mining Co. Average cost of this property to the company was \$1.56 per acre. Present company has never done any exploratory work for mineral. Property fully described in Vol. XI, Copper Handbook.

ISLE ROYALE COPPER CO. MICHIGAN

Office: 12 Ashburton Place, Boston, Mass. General office: Calumet, Mich. Mine office: Houghton, Michigan.

Officers: R. L. Agassiz, pres.; Jas. MacNaughton, v. p.-gen. mgr.; with E. C. Lewis, E. B. Dane, G. R. Whitten and C. O. Whitten, directors. Clarence H. Bissell, sec.-treas.; G. L. Osgood, Jr., asst. sec.-asst. treas.; Jas. E. Richards, mine supt.; A. G. Andrew, Jr., mill supt.

Inc. March 14, 1899, in New Jersey, as a merger of the Isle Royale Cons. Mining Co. and Miners' Copper Co. Cap. \$3,750,000; shares \$25 par. Is controlled through ownership of 33,187 shares of outstanding stock by the Calumet & Hecla. Old Colony Trust Co., Boston, transfer agent; State Street Trust Co., Boston, registrar. Listed on Boston Stock Exchange. Company owns 18,836 shares of the Lake Superior Smelting Co. Annual meeting, first Wednesday in April, at 243 Washington St., Jersey City, N. J.

Balance sheet, years ended Dec. 31:

1916..	3,262,624	1,396,655	104,628	750,000	542,027+

*Net loss.

Annual report for year ended Dec. 31, 1921, shows loss of \$383,369. Copper production from Jan. 1 to March 31 amounted to 2,491,000 pounds at a cost of 20.57, including 3.46c. per pound for depreciation and depletion. This with the copper on hand on the first of January, 1921, made a sales supply of 10,663,284 lbs., of which 6,607,163 lbs. were delivered and paid for during the year at an average cost of 13c. per pound. Net current assets at close of the year amounted to \$1,336,557.

Dividends: \$1 per share was paid March 31, 1913; \$5 in 1916; \$4 in 1917; \$2.50 in 1918, \$1 in 1919; none in 1920 and 1921; a total of \$13.50 a share or \$2,025,000.

Property: 3,520 acres and an 80-acre millsite. Mineral lands include the old Isle Royale, Grand Portage and Huron mines, the Dodge and Frue prospects, the mineral rights in the Montezuma tract of about 200 acres purchased, 1913, for \$100,000, and sundry undeveloped tracts. The Hussey-Howe tract of 280 acres, lying N. E. of the Superior, supposed to carry the extension of the Baltic bed, was bought, 1907, for \$220,000. Lands include all of Secs. 1, 2 and 11, and parts of Secs. 3, 9, 10 and 15, T. 54 N., R. 34 W.; also 160 acres in Sec. 6, T. 54 N., R. 33 W., 40 acres in Sec. 31, T. 55 N., R. 33 W., and 160 acres in Sec. 36, T. 55 N., R. 34 W., embracing a compact tract carrying about 2½ miles of the strike of copper-bearing beds.

Geology: the Isle Royale has 3 parallel amygdaloidal beds, with strike of N. 32° E. and average dip of 56°, of which 2, the Isle Royale and Portage beds, have been extensively opened, the latter lying approximately 200' W. of the former. The shafts are on the Isle Royale, but the Portage bed is opened on many levels by crosscuts. East of the amygdaloids is the "Mabbs vein," lying near the Eastern sandstone, 4 to 7' wide and rich in mass and barrel copper, but deficient in stamp rock. It was opened to a depth of about 250' by John and Austin Mabbs, about 1875, and has been tested to some extent by the present owner. There also are unidentified and unexplored copper-bearing amygdaloids lying W. of the Portage bed and occasional narrow fissure veins carrying arsenical copper ores.

The 3 old mines included in the present Isle Royale tract produced 48,452,596 lb. fine copper, under primitive conditions, at a net aggregate loss of about \$2,500,000. The old Isle Royale and Grand Portage mines were opened in 1853 and the Huron in 1855. The history of these 3 mines is given in detail in Vol. II.

Development: considerable diamond-drilling has been done. Underground openings were 19,106' in 1912; 13,626' in 1913; 9,694' in 1914; 14,446' in 1915; 17,455' in 1916; 19,271' in 1917; 12,409' in 1918; 10,475' in 1919; 12,009' in 1920.

No. 1 shaft, 1,614' deep, near the northern boundary, was gutted by fire in December, 1903, and temporarily abandoned. About 2 miles of drifts had been opened on this shaft. During 1914-16, shaft was retimbered preparatory to sinking and exploring the Portage lode, but no sinking had been done up to 1921. The drifts indicated that about 45% of the ground would be available for stoping.

No. 2 shaft, with 3 compartments, 2,280' S. W. of No. 1, is 3,650' deep, or 62' below the 33rd level. Drifting in 1917-1918 was in the West lode, and showed that 55-60% of the ground may be available for stoping. It has a

combination shaft ore-house, with Portage Lake crushers. The engine-house is equipped with a hoist capable of raising 6-ton skips from a depth of 6,000'.

No. 3 is merely a site for a shaft, to reopen the old Huron mine.

The new shafts, No. 4, 5, 6 and 7, are all on the Isle Royale bed, at the southern end of the property, and have several miles of workings showing considerable heavy copper, No. 4, 5 and 6 being connected by drifts on the upper levels. These shafts are unconnected with the former workings, in shafts No. 1 and 2.

No. 4 shaft, about 3,100' S. of No. 2, is 78' below the 21st level, or 2,773' deep, developing stamp rock of average grade. Equipment includes a duplex-cylinder hoist, operating in balance good for 1 mile depth, a 35-drill air-compressor, and a cylindrical steel shaft rock house having cylindrical ore bins 42' in diameter and 32' high. In 1917, electric pumps were mounted in levels No. 1, 8 and 17 and in 1918, storage-battery locomotives were installed on No. 11, 12, 13 and 14 levels. All north drifts from the 1st to the 11th level, inclusive, connect with the Huron workings.

No. 5 shaft, about 5,100' S. of No. 2 in Sec. 2 was started 1906, and was 103' below the 20th level, or 2,640' deep by 1921. It is sunk in the footwall, and is equipped with 32x72" hoist, operating in balance, installed in 1920 in a new concrete engine house; a new boiler house was also erected. Electric pumps are in use on the 1st, 6th and 16th levels, and storage-battery locomotives were installed on levels No. 10, 11, 12 and 13.

No. 6 shaft, about 7,300' S. W. of No. 2, near the center of Sec. 11, has 3 compartments and was 73' below the 22nd level, or 2,700' deep, December, 1920. The levels are opened at 100' and 120' intervals. On surface there is a circular steel shaft ore-house, similar to that at No. 4. The plant at No. 6 includes a brick engine house, with hoist, operating in balance, and 45-drill air-compressor, a steel boiler house, with 6 boilers, electric pumps on the 1st, 3rd, 9th and 17th levels, and storage-battery locomotives on levels No. 10, 12, 13 and 14.

No. 7 shaft, 2,400' S. of No. 6, was started in 1913, and was bottomed in foot-trap 113' below the 9th level, or 1,249' deep, when it was indefinitely closed. The north drifts down to level No. 7 have been holed to corresponding drifts from No. 6 shaft. The south drifts have been driven 1,200' or midway to the point selected for No. 8 shaft.

"A" shaft, started September, 1908, on the Hussey-Howe tract, is 972' deep, with the first plat cut at depth of 350'. A 205' crosscut, at depth of 474', discloses only the bed in which the shaft is sunk. On the 3rd level, at depth of 714', a drift was run S. to within 50' of the Houghton Copper Co. boundary, disclosing a fair amount of amygdaloidal rock, not carrying copper in promising quantities. "A" shaft is supposed to be sunk on the Baltic bed, but there is very great doubt as to whether the shaft really is opened on the northern extension of the Baltic, and failure to locate the twin Baltic bed, within a distance of 205' in the crosscut on the 474' level, accentuates this doubt.

The Sec. 12 shaft, begun October, 1905, and discontinued January 1908, at depth of 812', also was sunk in search of the Baltic bed and drifts and crosscuts were opened in 4 directions, without securing satisfactory results. The shaft was sunk in a badly disturbed amygdaloidal bed, practically barren of copper.

A shaft was started, 1904, in Sec. 10, but was discontinued because of the heavy overburden, and a diamond-drill substituted, the drill-cores showing an amygdaloidal bed of which about 5' in width carried copper in fine grains.

Sinking was continued in shafts 4, 5, and 6 during 1920, and of the new ground opened 50 to 70% was found to be available for stoping. The Isle

Royale mill treated the entire output except for a small tonnage sent to the Osceola mill.

Surface equipment: the main plant at No. 2 shaft, includes No. 2 engine house, a compressor house having a 35-drill 2-stage air-compressor; a 44x72' boiler-house, with a 16x72' coal-storage addition and a 3,000-ton coal trestle, having four 150 h. p. 84" horizontal boilers, taking water from a dam 300x500x6'. The machine shop is of steel, on stone foundations. The company has a private telephone system. There are about 150 dwellings on the company's lands.

At No. 5 shaft a new collar was put in and a change-house erected in 1917. At No. 7, a timber frame ore-house, equipped with 24x48" crusher and operated by a 100 h. p. motor, was put into commission.

The Isle Royale railway, owned by the company, connects the mine and mill with about 5 miles of main line, having easy grades. Equipment includes 35-ton, 55-ton and 60-ton locomotives, and forty 40-ton steel ore cars, equipped with airbrakes.

The Isle Royale mill-site at Point Mills, at the mouth of Pilgrim river, has nearly 1 mile of frontage on Portage lake. The old mill burned, Dec. 24, 1914. A new 2,000-ton mill, with 3 stamp heads was in operation, August, 1915. The mill cost \$220,000 and has three 300-ton orebins and 3 stamps, having circular mortars and $\frac{5}{8}$ " screen openings. The stamps rest on concrete bases, 20' thick, and are fitted with steeple-compound steam cylinders, and have a maximum daily capacity of 700 to 750 tons each. The dressing floor has 78 rough jigs, 6 finishing jigs and 55 Wilfley tables to treat slime. There are rolls with fixed bearings to regrind coarse gravel from the mortars.

The mill has a complete machine-shop on the second floor, power being furnished by a 600 k. w. mixed pressure turbo-generator, taking steam from five 200 h. p. boilers in a boiler house at the rear of the mill. There is a 32x600' wharf, with deep water alongside, with appliances for unloading coal and general freight and for the dispatch of mineral in scows to the Dollar Bay smelter, 2 miles across Portage lake.

Water is furnished the mill by a 16,000,000-gal. pump, especially designed to handle muddy water, having a triple discharge into a 30" riveted steel water main, running 2,200' from pump house to mill, the pump being located some distance from the mill, to obviate stamp sand clogging the intake. Three 100 h. p. boilers furnish power for the pumps, fuel being taken from a large coal trestle at the rear of the pump house boiler rooms. A dam near the mill supplies feed water for the boilers. Because of reduced mine output the No. 2, or Hubbell, mill was closed down in 1919.

Production: has been as follows—

Year	Tons Ore Treated	Lbs.	Mine	Lb. Cu. Produced	Total	Rec'd per Lb. Cents
		Cu. per Ton Ore Stped.	Cost per Ton (a)		Cost per Lb. Cents	
1921*	116,576	21.37	2,491,000	12.86
1920	591,971	17.94	\$2.73	10,621,801	20.10	18.61
1919	724,667	17.95	2.35	13,007,647	15.80	18.60
1918	974,508	15.9	2.14	15,442,508	16.80	24.46
1917	922,160	14.6	2.02	13,480,921	15.74	26.87
1916	925,419	13.4	1.53	12,412,111	15.75	25.86
1915	680,270	13.7	1.45	9,342,106	14.94(b)	18.36
1914	474,349	13.9	1.49	6,601,235	13.05	13.16

1913.....	314,679	13.2	2.12	4,158,548	18.81	15.29

1911.....	457,440	16.4	1.47	7,490,120	10.85
1910.....	520,860	14.5	1.42	7,567,399	11.84

(a) Includes mining, transportation, stamping and taxes.

(b) Includes nearly 2c per lb. extraordinary construction expense.

* Three months.

The Isle Royale is a low-grade mine, but has earned substantial profits. Due to some improvement in the ground worked and by more careful selection, the quality of the ore has been substantially raised during the past 5 years. This, with an increased production, made possible by the development campaign begun some years ago, should permit Isle Royale to better meet abnormal conditions.

Beginning with 1921, 3 shafts only were operating, and on April 1, the mine and plant were completely closed down.

JONES & LAUGHLIN ORE CO.

MICHIGAN

Office: Jones & Laughlin Bldg, Pittsburgh, Pa Mark Elliott, gen. mgr., Virginia, Minn; C. T. Kruse, gen. supt.

Property: the Forbes mine, in the Iron River district, Iron county, contains a yellow, non-Bessemer hematite. Developed by 275' shaft. First opened in 1912; shipments commenced 1913. Produced 367,455 tons up to January, 1917. The Breitung Hematite mines on Marquette range, Marquette county, were acquired in 1921 from the Breitung Hematite Mining Co. Ltd. The mines were opened in 1901 and 1905, and are credited with total production of 1,631,532 tons to end of 1919.

JUDSON MINING CO.

MICHIGAN

Address: Alpha, Mich. E. E. Hunner, mgr.; Alfred Martin, supt.; M. A. Hanna & Co., sales agents.

Inc. 1912, in Michigan. **Cap.** \$750,000; shares \$10 par; all issued.

Property: Judson mine with 80 acres iron ore land having 2,000,000 tons hematite ore blocked out. Ore runs 50% iron and 0.5% phosphorus.

Development: by 580' incline shaft and 7,000' of workings.

Equipment: includes hoist 2,200 cu. ft. compressor, 1,000 gal. electric pump, motor tramway and a steam shovel.

Production in 1917, 60,235 tons; in 1918, 195,938 tons; in 1919, 106,869 tons; 532,180 tons to end of 1919.

KEWEENAW COPPER CO.

MICHIGAN

Office: Calumet State Bank Bldg., Calumet, Mich. Mine near Mandan, Keweenaw county, Mich.

Officers: Thos. F Cole, pres.; Spencer R. Hill, v. p.; Capt. Thos. Hoatson, 2nd v. p.; C. A. Wright, sec.-treas., with A. L. Warner, and G. G. Hartley, directors.

Inc. March 11, 1905, in Michigan. **Cap.** \$10,000,000; shares \$25 par; issued 213,871 shares; \$20 paid in. Last assessment of \$1 per share levied July, 1917. Stock listed on Boston and Duluth Stock Exchanges. Controls, through stock ownership, the Phoenix Consolidated Copper Co., Meadow Mining Co., Humboldt Copper Co., Keweenaw Central Railroad Co. and Washington Copper Mining Co.. Has about 2,300 shareholders.

American Trust Co., Boston, registrar; Old Colony Trust Co., transfer agent. Annual meeting, second Monday in March.

General Balance Sheet, December 31:

Assets—	1918	1919	1920

*This includes \$219,833 of Anaconda Copper Mining Co's 6% bonds.

The Keweenaw Central Railroad Co. is a reconstruction of the old Lac La Belle & Calumet railway. The entire capital stock issue, \$400,000, reduced from \$730,000 in 1918, is owned by the Keweenaw Copper Co. The railway company has \$500,000 bonds, not issued, and ended 1920 with accounts and bills payable of \$386,464, of which \$267,001 is due the Keweenaw Copper Co. The railway, with about 20 miles of main line, spurs and branches, cost \$692,346, and runs from Centennial, a northern suburb of Calumet, where connection is had with the Copper Range line, to the Phoenix shaft. The road consisted of about 40 miles of track, but in 1918, company sold the equipment and rails of the Mandan—Lac La Belle branch, because this equipment was not suited for the heavy duty that would be imposed whenever commercial rock was mined in considerable quantities. The proceeds of the sale, \$225,000, was invested in Liberty bonds.

Property: 25,195 acres, mainly mineral lands, heavily timbered, in 3 main groups, carrying the strike of the Keweenaw mineral belt for about 14 miles, including practically all of the amygdaloidal and conglomerate cupriferous beds of the district, as well as numerous copper-bearing cross fissures. Lands are in T. 58 N., of Rs. 27, 28 and 29 W., and include the tracts formerly owned by the Aetna Copper Harbor, Empire, Girard, Hanover, Keweenaw, Mandan, Medora, Pennsylvania & Boston, Resolute and Vulcan companies, in addition to lands controlled through stock ownership in subsidiary corporations.

The company's lands carry nearly 2 miles of water frontage on either side of the Montreal river, including Fish cove, 1 mile east of the river's mouth, which might be made a fair harbor at comparatively small expense. The lands include 5 miles of the course of the river; on both banks, and with other holdings, give the company the entire water-frontage of Mosquito lake, making possible the development of a great water power, with a hydro-electric installation at the mouth of the river. There is a mill site on Bete Gris bay, at the mouth of the Montreal river, having about 5 miles of water frontage.

The company also owns the Lac La Belle, or Mendota, ship canal, 1 mile long, connecting Lac La Belle with Lake Superior. This canal has a 14' channel and leads to a splendid haven that should be made a harbor of refuge.

The Medora mine, opened about 1860, had 3 old shafts, about 100' apart, deepest 140'. The Medora amygdaloidal bed traversing lands of the company for about 4 miles, lies immediately under the Allouez conglomerate, and outcrops several hundred feet north of the Montreal river bed. The Medora lode about 12' in average width, is a soft chocolate-colored amygdaloid, carrying considerable prehnite, calcite and quartz, in connection with fine stamp

copper and occasional heavy copper, a 30" paystreak along the footwall carrying some barrel work, the bed as a whole being lumpy.

The Medora tract also carries other copper-bearing beds, among these being the Medora fissure vein, outcropping about 225' E. of No. 1 shaft, but making into the shaft at depth. About 100' S. of the Medora amygdaloid is another bed carrying copper in small quantities, and to the northward are the Wolverine amygdaloid, of about 15' width, and the Allouez conglomerate, lying about 280' N. of the Medora bed, at surface. The mine was reopened and developed to a depth of 1,700' and length of 1,800', with about 2 miles of workings before work was stopped September, 1909. The Medora workings are fully described in Vol. VIII.

The Empire mine carries the Medora bed, about 3 miles E. of No. 1 shaft, and some trenching and test pitting, done 1906-07, on the Empire tract, showed a bed of about 15' width, carrying some copper at surface. The Empire also carries the Montreal river amygdaloid, on which the Manitou did considerable work.

The Medora-Mandan-Resolute tract of 2,440 acres carries the Kearsarge bed under practically its entire territory. The shaft on the Kearsarge bed, known as No. 2, is about a mile S. of the old Medora workings, and was 1,355' deep when abandoned, 1911.

The company owns a diamond-drill outfit and has made extensive borings, securing a cross section of the Medora, Mandan, Resolute and Empire tracts. Operations, 1912-1914, were confined to exploratory work in the horizon of the Ashbed lode, and the first drill-hole located a copper deposit of considerable promise, early in 1913, at a depth of about 500'. Mine has been idle since May 28, 1914.

Development: in 1917, operations were conducted on the Phoenix mine only. Fifty-three diamond-drill holes, aggregating 3,063', were put down for exploratory purposes and the shaft sunk to depth of 1,616'. The 5th, 6th and 10th levels showed fair copper. In 1917, 41,148 tons was stamped, yielding 9,248 lb. refined copper per ton.

Due to scarcity of labor and increasing costs, operations were suspended on December 1, 1917. Company was reported considering the sale of its timber-land or cutting the lumber itself. In either case, there would be a large return.

KEWEENAW LAND ASSOCIATION, LTD.

MICHIGAN

Office: Room 33, No. 87 Milk St., Boston, Mass. **Operating office:** Marquette, Mich.

Officers: A. B. Emmons, chairman; Nathaniel Wilson, sec.; Dudley S. Dean, treas.; John M. Longyear, gen. agt.

Is a land corporation, holding 400,000 acres, mainly timber lands, but with some mineral lands, partly on the Keweenaw copper belt, in the upper peninsula of Michigan, taken over from the Lake Superior Ship Canal, Railway & Iron Co.

LAKE COPPER CO.

MICHIGAN

Office: 85 Devonshire St., Boston, Mass. **Mine office:** Lake Mine, Ontonagon county, Mich.

Officers: Wm. A. Paine, pres.; John H. Rice, v. p.; Robt. H. Gross, sec.-treas., with William F. Fitzgerald, Reginald C. Pryor, William S. Rooney, F. Ward Paine, directors. Elton W. Walker, mgr.; James McKie, supt.

Inc. Nov. 27, 1905, in Michigan. **Cap.** \$2,500,000; shares \$25 par; \$5 paid, fully issued. Shares are listed on the Boston Stock Exchange. Federal Trust Co., Boston, registrar; State Street Trust Co., Boston, transfer agent. Annual meeting third Tuesday in June.

Financial statement for fiscal year ending April 30, 1921, showed receipts, \$112,385, of which \$7,704 was interest; \$44,567 cash in banks; \$50,000 from sale of U. S. Certificates of indebtedness; \$10,114 from sale of supplies, rents, etc. Expenditures were \$103,949, including \$90,000 for U. S. Certificates of

Indebtedness; cash on hand, \$8,436. Total assets, \$205,129 in cash, Liberty bonds and copper on hand; acct's payable, \$3,000; excess of assets, \$202,129.

Property: 2,010 acres, comprising the S. E. $\frac{1}{4}$ of Sec. 29, S. E. $\frac{1}{4}$ of Sec. 30, N. W. $\frac{1}{4}$ of Sec. 32, and E. $\frac{1}{2}$ of Sec. 31, T. 51 N., R. 37 W., includes 1,150 acres of mineral land, 680 acres of timber lands and 180 acres of cutover lands.

The company's first work was done on the Knowlton and Butler beds, principally on the Knowlton amygdaloid, on which there were old shafts of 170' and 300', latter having been deepened to 600' by the present company. There was also a 90' shaft on the Tresidder bed, 1,000' E. of the Knowlton, sunk in 1865, whose cost was paid for from the copper extracted. Though considerable copper was taken from the Knowlton bed, exploration work was soon transferred to Virgin territory, at the southern end of the property, a wise move, as demonstrated by the outcome. Considerable diamond-drilling on this as well as on the Adventure and adjoining lands, indicate that the Lake mine should have several other promising amygdaloid beds, all in the same general horizon as the Lake bed now being opened.

Geology: the strike of the Lake amygdaloid near the shaft is N, 6° E., with dip of about 35° W. It was at first thought that the Lake bed was a fissure vein, but this was disproved by the disclosure of parallel strata, including a conglomerate lying about 400' thereunder. The Lake lode is a typical Lake Superior amygdaloidal trap flow, but exceedingly wide for a copper-bearing bed, ranging from 50 to 100'. The hanging-wall or trap is fairly well defined, but the footwall is extremely irregular, there being no marked line of separation between copper rock and trap. The Lake bed appears to carry 3 well-defined shoots of enriched copper ground, raking northward with depth. An unsuccessful attempt was made to locate the northerly extension of the Lake bed by 3 diamond-drill holes, but it is now known that the lode turns W. and passes into South Lake ground. Thirteen diamond-drill holes, aggregating 1,628', have been bored. The northernmost bottom workings of the mine show a deflection to the westward, with a strike, at the extreme north, of N. 15° W., which corroborates the hypothesis of Dr. L. L. Hubbard, that the Lake bed is the third and the East lode, the fourth bed from the top in the series of 4 amygdaloid beds cut by the drill holes of the South Lake. There are two other lodes only 50' W. of the Lake with commercial ore. For order and description of the Knowlton, Butler and other lodes of the Evergreen belt, see Mass Copper Co., in this book and section.

The mine is operated by a 1,500' incline shaft, ore being extracted from all levels from the 2nd to the 11th. The lode is bunched containing very rich spots and some mass copper, but the general average is about 2%, equivalent to 25 lb. of refined copper.

The Knowlton shaft was unwatered August, 1916, in order to mine ore from the Knowlton lode, which, though narrow, shows good copper values wherever opened. From this shaft the Butler and Evergreen lodes are reached by a 900' cross-cut, the Evergreen being cut late in 1918. Four test runs of ore averaged 26 lb. per ton. Management expects to resume operations here when mine is reopened.

Development: the mine has about 3,500' of workings, a very large proportion of the drifts being in neither the footwall nor the hanging-wall, giving a rather poor idea of the actual copper content of the bed. New work during fiscal year ended April 30, 1919, totaled 1,204' compared with 2,813' for 1918.

Equipment: includes a 32x72" duplex-cylinder double-conical-drum hoist, capable of lifting 10-ton loads from depth of a mile; old 6-drill and 15-drill air-compressors, taken from the equipment of the old Belt mine, and a new 50-drill 2-stage cross-compound air compressor, in a steel compressor house. Mine structures include a machine-shop, smithy, office, boarding house, and a change-house at the Lake shaft. There are a number of dwellings and

many old houses at the Belt location. The property is reached by the Copper Range railway, which passes through the old Belt location, with a 1½ mile spur to the shaft, and a siding has been built to within 500' of the shaft by the Mineral Range railway, giving the mine the advantage of competitive railway rates.

Production: fiscal year ending April 30. Work resumed in May, 1915, after a 2-year shutdown.

	Tons Ore Stmpd.	Mineral Lb.	Lb. Cu. per Ton Ore	Lb. Cu. Produced	Cost per Lb.	Rec'd per Lb.
1919(d).....	23.13	717,403
1918.....	63,191	2,246,970	23.13	1,461,893	25.63(c)	25.57
1917.....	70,440	2,346,970	21.14	1,489,247	20.00(c)	29.726
1916(a).....	59,848	2,511,216	26.42	1,581,071	15.622(b)	20.149
1914.....	14.95	275,647	15.074
1913.....	83,109	2,153,128	15.39	1,300,562	19.5(c)

(a) Did not produce during first 3 months. (b) Includes 1.036c. charge due to resuming operations. (c) Approximately. (d) Did not produce during last three months.

On February 1, 1919, all operations were suspended due to labor conditions, high costs and low copper prices.

The management is both experienced and capable, and the mine, though small, is most promising.

LAKE MILLING, SMELTING & REFINING CO. MICHIGAN

Office: 12 Ashburton Place, Boston, Mass. **Operating office:** Calumet, Mich. **Works office:** Point Mills, Houghton county, Mich.

Officers R. L. Agassiz, pres.; Jas. MacNaughton, v. p. and gen. mgr.; Geo. G. Endicott, sec.-treas., with H. F. Fay and D. L. Dean, directors.

Inc. 1891, in Michigan. **Cap.** \$2,500,000; shares \$25 par; fully issued; \$11.85 paid in. Stock distribution is as follows: Allouez Mining Co., 36,164 shares; Centennial Copper Mining Co., 16,164 shares; Hancock Cons. Mng. Co. 10,000 shares; Isle Royale Copper Co., 18,836 shares; Superior Copper Co., 18,836 shares.

Works: company owns 2 mills; one called the **Centennial-Allouez** mill, is at Point Mills, on the shore of Portage lake, on land adjoining the Franklin mill-site. The mill was built by the Arcadian Copper Co., and was bought, 1904, by the Centennial Copper Mining Co., and later transferred to the present corporation. The mill of 4,000 tons daily capacity is equipped with 6 Nordberg stamps and crushing rolls to treat oversize material. Two additional stamp units have been planned. Power is furnished by a 600 h. p. cross-compound engine, and water is supplied by a 15,000,000-gal. pump. A 30,000,000-gal. pump has been ordered. In 1918, company installed a mixed flow pressure turbine to operate a 2,000 k. w. electric generator. A boiler-house containing 8 boilers was completed in 1915; a new addition was completed in 1917 to house the 4 boilers necessary to run the two new stamps.

The other mill, known as **Lake No. 2**, at Hubbell, has 4 stamps and treats all the ore from the Allouez Mining and Centennial Copper Mining companies' workings. A tailing pumping plant which started operating early in 1919, pumps tailings far out into Torch lake. This was erected jointly by the Osceola, Lake and Calumet & Hecla. Both mills have been closed since 1919.

LAKE SHORE MINING CO. MICHIGAN

Idle several years. See Volume XIV.

LAKE SUPERIOR DEVELOPMENT CO. MICHIGAN

Office: care Clyde Mackenzie, sec., Houghton, Mich. **Jos. Croze, pres.;** Jos. W. Selden, treas.

Property: 400 acres, held under option, the N. ½ of Sec. 25, and S. ½ of S. W. ¼ of Sec. 24, T. 57 N., R. 32 W., about ½ mile E. of the Gratiot

and about 1½ miles of the Ojibway. Lands are on the Keweenawan formation. Drilling done in 1910-11 gave encouraging results and company officials hope to resume operations at some future time.

LAKE SUPERIOR IRON & CHEMICAL CO. MICHIGAN

Described Vol. XIII. Name changed to Charcoal Iron Co. of America, which see.

LAKE SUPERIOR SMELTING CO. MICHIGAN

Office: 12 Ashburton Place, Boston, Mass. General office: Calumet, Michigan. Works office: Dollar Bay, Houghton county, Mich.

Officers: R. L. Agassiz, pres.; with F. L. Higginson, W. Hunnewell, J. F. Perkins and Jas MacNaughton, directors. C. H. Bissell, sec.-treas., Jas. MacNaughton, gen. mgr.; Henry D. Conant, supt.

Inc. July, 1891, in Michigan. Cap. \$1,200,000; shares \$25, fully paid and issued. Is controlled through ownership of 25,000 shares, by the Calumet & Hecla Mining Co., and by the Osceola Cons. Mining Co., which has 50,000 shares, and the Isle Royale Copper Co., which has 8,000 shares.

Balance Sheet—Years ended December 31:

Assets—

	Real Estate	Mchy. & Equip.	Mdse., Mat. In Process	Cash & Accts. rec	Total
1918.....	\$1,044,446	\$535,515	\$137,113	\$193,454	\$1,910,528
1917.....	1,044,446	416,000	163,546	157,865	1,781,857

Liabilities—

1917.....	1,200,000	391,839	103,437	86,581	1,781,857

The smelter has 11 reverberatory furnaces and 3 refining furnaces. There is a mechanical ladling and casting device having an 1,100-lb. ladle, and a casting machine with molds linked into an endless belt, dumping over sprockets into cooling tanks, whence the ingots are delivered mechanically by cleat elevators to inspection and loading platforms.

The smelter treats ore from the Osceola, Isle Royale, Ahmeek and Centennial mines. The company also owns the dismantled smelting plant at Hancock, Michigan. Idle since May, 1919.

LA SALLE COPPER CO. MICHIGAN

Office: 12 Ashburton Place, Boston, Mass. Mine office: Calumet, Houghton county, Mich.

Officers: Rodolphe L. Agassiz, pres.; Jas. MacNaughton, v. p. and gen. mgr., with W. Hunnewell, T. N. Perkins, D. S. Dean, F. L. Higginson, and Lindsley Loring, directors. G. G. Endicott, sec.-treas.; H. L. Bennett, asst.-sec.-asst.-treas.; Ole Hallingby, supt.

Inc. Dec., 1906, in Michigan. Cap. \$10,000,000; \$25 par; issued 302,977 shares. Old Colony Trust Co., Boston, transfer agent; State Street Trust Co., Boston, registrar. Listed on Boston Stock Exchange. Company absorbed the Caldwell Copper Co. and controlled the Tecumseh Copper Co., through ownership of practically the entire issue, giving 1 1-3 shares of La. Salle for 1 of Tecumseh, and bought the entire property of the Tecumseh. May 11, 1910, for \$1,648,000. Is controlled, through ownership of 152,977 shares, by the Calumet & Hecla Mining Co. The Calumet & Hecla contributed \$1,000,000 cash to the company's treasury, taking pay in stock, and agreed to loan \$750,000 additional cash, as needed. Annual meeting, second Tuesday in April.

Operations—Years ended December 31:

	Total Receipts	Oper. Exp.	Taxes Reserve	Deprec. Reserve	Inc. in Cur. Ass.	Excess Cur. Ass.
1920.....	\$28,014	\$80,796	\$39,805	\$44,804*	\$321,242
1919.....	158,440	205,545	32,887	37,736*	366,046
1918.....	485,013	407,956	\$8,800	24,359	92,615	403,781
1917.....	454,486	311,558	8,676	135,351	308,842

* Decrease.

Report for year ended Dec. 31, 1921, shows a profit of \$2,602. No copper was produced during the year. On Jan. 1, 1921, company had on hand 42,117 pounds of copper, of which it sold during the year 20,875 pounds at an average price of 13.2 cents per pound, leaving 21,242 pounds on hand at the close of the year, inventoried at 14 cents a pound. Net current assets on Dec. 31, 1921 were \$331,885, of which cash and government securities amounted to \$327,794.

Property: 2,360 acres. The Tecumseh and Caldwell contributed 560 acres each and 540 acres were furnished by the Calumet & Hecla, St. Mary's Mineral Land Co., Sheldon & Douglas Estate, and other interests, these lands being put into the company on a novel basis of valuation, figured upon zones of 2,500' depth on the dip of the Kearsarge bed, allowance being made for decreased land values on zones carrying the underlay at increased depths. There are 4 shafts, 2 on the Tecumseh and 2 on the Caldwell tract. The property carries the strike of the Keweenaw formation for about 2½ miles.

Development: property has been prospected by diamond-drilling, more than 30 diamond-drill holes having been bored on the Tecumseh and Caldwell tracts, a few years ago.

The first work at the Tecumseh mine was done on the Calumet conglomerate, many years ago, when a 1,000' shaft was sunk that found no payable ore. During the second era of activity, 1889-1902, a shaft was sunk 2,300' on the Osceola amygdaloid, but this bed, being found practically barren of copper, work was abandoned.

An arrangement was made in 1916 with the Osceola Consolidated, whereby levels No. 42 and 45 S. of No. 6 shaft, Osceola mine, were extended into La Salle ground. The ground was fair for the most part, but some sections were of no value. Work was discontinued in 1917, because expenditure of sinking shaft was not warranted. But in 1919, Osceola began mining this ground on a royalty basis under a 10-year contract; up to the time of closing down, 24,419 tons of ore were extracted.

La Salle No. 1 shaft, sunk on the Kearsarge bed, has 3 compartments, 2,146' deep, and shows the Kearsarge lode to be 8' to 12' thick, but characterized by irregularly distributed values. The quantity of workable ground is limited and the work done in 1918, was with the idea of mining that ground as soon as possible and abandoning the shaft, which was done in March, 1919. Equipment: includes 250 h. p. boiler and 18x24" hoist.

La Salle No. 2 shaft, 2,637' deep, is located about 1,700' S. of No. 1 and of the same size. Shows a bed of workable thickness, but without much copper. A branch of the Mineral Range railroad was built to the shaft in 1913. Development at end of 1919 and 1920 was confined to 25th level south, but ground proved too lean to warrant stopping. The power plant has a 125 h. p. boiler, an 18x24" hoist good for 2,500' depth, and a 15-drill air-compressor.

No. 5 shaft, 1 mile S. of No. 1, is 1,450' deep, shows a poorly-defined bed, with unsatisfactory copper content. Work was discontinued in 1910.

No. 6 shaft, sunk at a point 1,500' S. W. of No. 5, was abandoned in 1909, at depth of 882'. The surface equipment was removed to No. 2 shaft.

The Kearsarge bed is comparatively thin in the Tecumseh tract, ranging from 7 to 11', with an average thickness of about 9'

Total development work amounted to 141' in 1913; 1,123' in 1914; 1,127' in 1915; 3,107' in 1916; 2,146' in 1917; 1,532' in 1918; 1,545' in 1919; 1,177' in 1920.

Production:

	Lb. Cu.		Lbs. Cu. Produced	Mining Cost Per Ton	Net Cost Per Lb. Cents	Rec'd Per Lb. Cents
	Tons. Ore Treated	Per Ton Ore Stpd.				
1920.....	3,430*	17.41	59,713	19.62	18.76
1919.....	32,995	10.33	340,719	\$2.55	31.21	18.13
1918.....	176,423	10.339	1,832,665	1,893	21.96	24.34
1917.....	185,014	10.38	1,919,775	1.87	20.14	28.45
1916.....	144,829	9.53	1,380,352	1.79	19.96	25.68
1915.....	80,959	9.67	782,493
1914.....	45,509	11.88	540,731
1913.....	2,221	19.76	43,906

* Not including that treated by Osceola.

The 1919 annual report stated that "the ground opened thus far on the Kearsarge lode is of too low grade to warrant mining, except during periods of abnormally high prices of copper, " unless the 25th level should disclose rock of much better grade. Results on this level being unsatisfactory, the pumps were pulled in November, 1920 and mine closed.

LAURIUM MINING CO.**MICHIGAN**

Completely absorbed by the **Calumet and Hecla Mining Co.**, which see. Described Vol. XIII.

LONGYEAR-MICHIGAN EXPLORATION CO.**MICHIGAN**

Address: J. M. Longyear, Jr., Marquette, Mich.

Property: had options on 1,240 acres of land in Sections 26, 27, 34 and 35 T. 56 R. 34, near Calumet, Houghton county. Several diamond-drill holes, made in 1916, failed to show ore. Options reported taken over by **Federal Syndicate Copper Co.**, which see.

LORETTO IRON CO.**MICHIGAN**

Office: 1400 Fulton St., Chicago, Ill.

Officers: J. Ward Amberg, pres.; D. F. Brenner, v. p.; J. H. Amberg, sec.; T. J. Amberg, treas.; C. H. Baxter, supt., directors. **M. A. Hanna & Co.**, sales agents.

Inc. in Illinois. Cap. \$400,000; \$10 par; all issued. Is a close corporation.

Property: 280 acres leasehold on Menominee range at Loretto, Dickinson county, Mich., opened up in 1892. Main orebody averages 10-40' in width and is about 1,000' long with an overburden of above 25'. Ore varies greatly in iron content, but averages about 55% iron and 0.06% phos.

Development: to vertical depth of 900'. Mining is by top-slicing.

Production: 174,173 tons in 1916; 193,949 tons in 1917; 155,891 tons in 1918; 82,259 tons in 1919; total is 2,344,553 tons.

MARQUETTE IRON CO**MICHIGAN**

Name changed from **Breitung Iron Co.**, July, 1918.

Office of president: 7 Hanover St., New York, N. Y. **W. P. Pattison**, gen. supt., Negaunee, Mich.

Officers: E. N. Breitung, chairman; J. W. Dougherty, pres.-mgr.; F. E. Fenton, v. p.; J. W. Peddie, sec, with C. G. Breitung, directors

Inc. May 4, 1917, in Delaware, as Breitung Iron Co. Cap. common stock, 150,000 shares, no par value, and preferred stock, \$3,000,000, 7% cumulative, par value \$100. Outstanding; common, 90,000 shares; preferred, \$2,000,000. The preferred is convertible share for share into common stock at option of holders. Redeemable at option of corporation at \$110 per share and accrued dividends. Privilege of conversion up to thirty days, prior to date fixed for redemption. No bonds, but \$1,174,000 first lien, convertible 7% secured notes were outstanding Dec. 31, 1920. The unissued common stock, 60,000 shares, is reserved to provide for conversion of the first lien 7% notes and preferred stock. After July, 1921, 10% of surplus earnings. (pfd. dividends having been paid for each year) shall be applied to

the redemption of preferred stock at \$110 and accrued dividends. Quarterly dividends payable on first of Jan., April, July and October. Empire Trust Co., New York, transfer agent.

The various subsidiary companies and their locations are given below, together with the percentage of capital stock of each one held by the Marquette Iron Co., other than directors' qualifying shares.

Names of Subsidiary Operating Companies	Location	Iron Ore Range	% Capital Stock Owned
Mary Charlotte Mng. Co	Negaunee, Mich.,	Marquette Range..	95%
Juliet Iron Co.....	" "	" "	100%
Lucky Star Mng. Co....	" "	" "	70%
Washington Iron Co.....	Humboldt "	" "	51%
Breitung Iron Co.....	Wilde, Ont., Can.	Algoma Range	90%

Under date of April 1, 1917, the American Appraisal Co. of 120 Broadway, New York, N. Y., appraised the properties of the subsidiaries, as follows: Property assets permanent equipment and development: \$1,227,563; mineral lands and leases, \$7,078,250; investment in ships, \$325,259; total, \$8,631,073. Current assets, \$1,324,698. Less: current liabilities, \$422,978; Bonds and long term notes of two subsidiaries (less sinking fund for retirement of bonds, \$95,950), \$1,104,050. Total net assets, exclusive of good will, going value etc., \$8,428,743. The Appraisal company states that these values are very conservative.

The Marquette Co. reports that since this appraisal was made the ships have been sold for more than the amount carried on the books, the bonds and notes of subsidiaries reduced, Jan. 1, 1921, to \$200,000, and that through a subsidiary, it has acquired by deed and stock ownership title to 95% of the lands occupied by Mary Charlotte Mining Co., Breitung Hematite Mng. Co. and Juliet Iron Co.

Property: over 1,300 acres in one solid tract in the Negaunee district of the Marquette Iron Range in the Lake Superior region, and properties in other districts. Of this area, 1,000 acres are known to be in the iron formation.

Subsidiary Companies

Mary Charlotte Mining Co.

Mine office: Negaunee, Mich. C. B. Dunster, mgr., Cleveland, Ohio.; W. B. Pattison, supt., Negaunee, Mich. E. N. Breitung & Co., sales agents.

Property: the Himrod and Mary Charlotte No. 1 and 2 mines on the Marquette range, Marquette county, developed to 640' in depth. Ore is mined by caving and stoping. Mine has been worked since 1903. Ore assays from 54.50 to 59% iron and 0.095% phosphorus.

Production: 247,854 tons in 1917; 273,650 tons in 1918; 231,420 tons in 1919; total production, 3,377,337 tons.

Breitung Hematite Mining Co., Ltd.—holdings sold to Jones & Laughlin Co. in 1921.

Juliet Iron Co. holds 50-year lease on 960 acres in the Negaunee Basin iron formation and adjoins the Breitung No. 1 mine on the south, and almost surrounds the Breitung Hematite No. 2 mine and the Mary Charlotte; practically undeveloped except by shallow workings that show producing prospects. From one tract of 80 acres, known as the Milwaukee-Davis, 400,000 tons were produced. Mine idle since 1916, but company plans comprehensive drilling and developing in near future.

Lucky Star Mining Co. owns in fee 50 acres northeast of Breitung Hematite; property is crossed by a very rich orebody. Drill holes show more than 4,000,000 tons. A shaft has been sunk to within 200' of the ore, and company reports that it should soon be producing.

Washington Iron Co. owns in fee and operates the Barron mine in the Humboldt district of the Marquette range. Has 4 grades of hard gray non-Bessemer specular and magnetite ores, which are concentrated before shipment. No. 2 ore assays 56.83% iron, 0.136% phosphorus and 15.47% silica. Since 1908 property has produced 350,000 tons. There are 1,120 acres situated in the iron formation with considerable reserves showing in the small portion prospected.

MASS CONSOLIDATED MINING CO.

MICHIGAN

Office: 79 Milk St., Boston, Mass. **Mine office:** Mass, Ontonagon county, Mich.

Officers: John W. Linnell, pres.; Theo. O. Nicholson, v. p.; Wilfred A. Bancroft, sec.-treas.; Elton W. Walker, supt., with Francis L. Maguire, John S. White, Jas. B. Hill, T. S. Woods, and E. S. Martin, directors.

Inc. 1899, in Michigan. **Cap.** \$2,500,000; shares \$25 par; issued, 97,317 shares, assessable, all paid, \$8 paid on organization, balance in installments. Last assessment \$1 per share, April 15, 1921. Listed on Boston Stock Exchange. Old Colony Trust Co., Boston, transfer agent, American Trust Co., Boston, registrar. Annual meeting, second Thursday in March.

Balance Sheet, Years ending Dec. 31:

	Receipts	Net Profit	Prev. Assets	Divi. Inc. Tax, Etc.	Bal. of Cash Assets
1920..	\$ 27,339	\$ 48,403(a)	\$149,667	(b)\$ 3,645
1919..	429,845	146,106(a)	295,773	149,667
1918..	796,638	25,599(a)	321,372	295,773
1917..	1,062,319	181,631	449,255	\$309,514	321,372
1916..	1,255,896	430,528	213,361	194,634	449,255

(a) Loss. (b) shows depreciation in value of 1,626,973 lb. copper on hand of \$97,618.

Construction, 1918, cost \$11,269; 1917, \$83,782; 1916, \$94,556.

Dividends: initial dividend paid, Aug., 1916, with total for 1916 of \$194,634. In 1917, \$3 per share paid, amounting to \$291,951. None since.

Property: about 5,500 acres, lying in a very irregular but fairly compact tract, Secs. 33,34 and 35, T. 51 N., R. 38 W., in Sec. 4, 5, 6, 7, 8, 9 and 16, T. 50 N., R. 38 W., and in Sec. 1, T. 50 N., R. 39 W., holding being bounded on the N. by the Union, Adventure and farm lands, on the E. by the Adventure and Toltec, and on the S. by various lands, and on the W. by the Flint Steel, Adventure and St. Mary's Mineral Land Co. Holdings include 4 old mines, the Ridge, Evergreen, Mass and Ogima, also 2 old prospects, the Merrimac and Hazard, joint production of which, under previous managements, was 11,131,023 lb. fine copper. These 5 properties are described, in detail, in Vol. II, Copper Handbook.

Timber and surface rights on 600 acres were sold for \$25,000 early in 1920.

The Mass tract carries the outcrop of six of the copper bearing amygdaloid beds of the Evergreen belt, for about 1½ miles. The outcrops vary greatly in width, but average about 10', showing a sharp bend in the strike, which varies from N. 32° E., on the north, to N. 37° E. at the southern boundary. The dip of the beds varies from 38° at the Ridge to 47° at the old Mass mine. The copper-bearing beds are as follows, from north to south:

1. Knowlton. Carries heavy copper and stamp rock.
2. Mass. Lies 140' south of the Knowlton, and carries a little heavy copper and stamp rock (milling ore).
3. North Butler. Lies about 75' south of the Mass bed, is wide and fairly mineralized in places.
4. Butler. Lies about 200' south of the North Butler, is 12' to 35' wide, carrying mainly stamp copper with occasional heavy copper.
5. Ogima. Lies about 100' south of the Butler. Carries mainly stamp

copper with some barrel-work, being 5' to 10' wide and showing some good ground.

6. **Evergreen or Ridge.** Lies about 250' south of the Ogima and is one of the best beds of the property, ranging 4 to 40' in width and usually being richest where widest. It is very bunched, but shows some excellent stopes, yielding mass copper and stamp-rock of good grade.

7. **New Mass.** This bed, which is the lowest of the series of the Evergreen belt and brings the number of cupriferous beds to 7, corresponding with the number in the adjoining Adventure property, lies about 120' under the Evergreen bed and was opened by crosscuts from "A" shaft on the 15th and 18th levels. The bed averages about 12' in width, carrying considerable epidote and is very showy, but the copper is exceedingly fine, most of it being of a flaky nature, very deceptive to the eye. A mill test of ore from this bed in 1909 gave a recovery of only 18 lb. of mineral per ton.

Development: the Mass has underground workings on all its copper-bearing beds, and ore is hoisted through the nearest shaft, workings on each level being connected by crosscuts. The Mass carries the outcrop of the copper-bearing beds of the Evergreen belt for about $1\frac{1}{2}$ miles. Shafts "A" and "B" are connected on the Butler lode down to and including the 10th level. The mine as a whole is notably rich in mass copper and carries silver values, but the ground is exceedingly bunched, ranging from very rich to absolutely barren. Ore is sorted underground, bringing the average content of stamp rock to 16.51 lb. per ton. About 50% of the rock broken is hoisted, and about 25% of the recovery is in mass copper.

"A" shaft, 1,757' deep, with two compartments, sunk on the Evergreen bed has been abandoned.

"B" shaft, 875' S. W. of "A" has 3 compartments, and is bottomed at 1,857'. Levels are at variable intervals; those at considerable intervals permit a larger saving in drifting through poor ground and sub-levels can be run where needed.

"C" shaft, 2,148' S. W. of "B" and 1,554' deep with a plat cut on the 14th level, is the old Ogima shaft, sunk on the Butler bed, but the Evergreen bed is opened by a 400' crosscut on the 3rd, 5th and 7th levels. Some high-grade ground was opened on these and on the 9th levels west on the Butler bed.

Company will sink a new shaft 1,800' west of "C" as soon as labor conditions permit.

Considerable diamond-drilling has been done south from the Evergreen bed into the horizon traversed by the so-called Adventure lodes, cut by diamond drills on the Adventure property, and also north of the Knowlton bed. Diamond-drilling was done in 1910 in the N. E. $\frac{1}{4}$ of Sec. 5, to test amygdaloidal and conglomerate strata outcropping at that point, which is quite a distance under the hypothetical horizon of the so-called Adventure lodes, with distance to the eastern sandstone undetermined.

Development: during 1918 totaled 2,280', compared with 4,364' in 1917. Results underground were satisfactory in both years, but development and production were restricted due to labor shortage. Grade of copper produced was: 1916, 16.51 lb.; 1917, 16.29 lb.; 1918, 17.33 lb.; 1919, 15.86 lb. Work done on No. 5 level shows the Evergreen lode to be well mineralized as far west as "C" shaft in virgin ground. Drifting and crosscutting in 1917 revealed good ore from this Evergreen lode, and there seems little doubt that a new mine has been opened at this end of the property, and that it can be operated through "C" shaft.

In 1918, the Butler lode produced 127,491 tons, and the Evergreen 59,866 tons, compared with 163,310, and 74,733, respectively, in 1917.

The shaft ore-house at "B" is equipped with a steam hammer, Good Roads crusher, and a 50x24" engine; "C" shaft has a steel ore-house; both have been equipped with devices permitting automatic handling of ore.

The central power-house has a 24x48" duplex hoist, good for one-half

mile depth. The power plant includes a 50-drill 2-stage cross-compound air-compressor, a 20 k. w. dynamo for electric light, and three 335 h. p. water-tube boilers. During 1918 an air-compressor, with capacity of 2,550 cu. ft. free air per minute, was installed.

In addition to the usual mine buildings, there are about 90 good dwellings. The company also has a town site, Mass City, a village with a number of hotels and business houses, which is the terminus of the Mineral Range railroad, and a station on the C., M. & St. P. railway.

The Mass mill is at Keweenaw bay, on an arm of Lake Superior, at the junction of the Mineral Range and Duluth, South Shore & Atlantic railway, 16 miles S. of Houghton and 34 miles N. E. of the mine. Equipment includes 2 stamps, 1,350 tons daily capacity.

The mill boiler-house contains 3 water-tube boilers. Ashes and cinders are washed into the lake through a launder.

The pump house has a 16,000,000-gal. Nordberg vertical pump, connected with a tunnel running 300' under the bed of the bay to the intake.

Production: begun 1899, with an output of 42,800 lb. fine copper, gradually increased to 2,576,447 lb. in 1903 decreasing thereafter, through loss of the Evergreen bed. Recent production has been as follows: 2,007,950 lb. copper in 1905; 2,106,738 lb. in 1906; 2,078,677 lb. in 1907; 1,766,930 lb. in 1908; 1,723,436 lb. in 1909; 1,321,885 lb. in 1910; 1,326,898 lb. in 1911; 2,045,006 lb. in 1912; 1,213,545 lb. in 1913; 2,955,952 lb. in 1914; 4,638,452 lb. in 1915; 4,752,588 lb. in 1916; 3,984,616 lb. in 1917; 3,403,827 lb. in 1918; 1,797,000 lb. in 1919.

Ore stamped in 1919 totaled 123,780 tons; in 1918, 196,456 tons; in 1917, 244,671 tons, and in 1916, 287,900 tons.

Cost of refined copper in 1918 was 23.82c. and price received 24.34c. per lb., compared with 19.81c. and 26.23c. in 1917. The 1919 cost was 27.83c., and price received 19.46c.

The Mass Consolidated has conquered every sort of misfortune that befalls mines and through the acquisition of the Evergreen Bluff property was placed in a better mining position than ever before. The experience of 17 years has given a thorough knowledge of the vagaries and possibilities of the 7 cuprififerous beds of the Evergreen belt; though bunched, two of the number are of real promise, the Evergreen and Butler. It is probable that other beds can be worked occasionally, but the future of the mine appears to depend on these beds. There also is the possibility of locating and developing other and richer beds to the southward of the main workings, in the horizon of the Lake and Adventure beds.

Management is both progressive and experienced.

The mine was closed down early 1920.

-MAYFLOWER MINING CO.

MICHIGAN

In February, 1917, company was consolidated with the Old Colony Copper Co., under title of **Mayflower-Old Colony Copper Co.** (which see), on a share for share basis. Described, Vol. XII.

MAYFLOWER-OLD COLONY COPPER CO.

MICHIGAN

Address: 70 State St., Boston, Mass. **Mine address:** Geo. S. Goodale, supt. Houghton, Mich.

Officers: H. F. Fay, pres., with R. L. Barstow, G. E. Clarkson, G. P. Gardner, W. A. Mosman, C. J. Paine, and F. W. Nichols, directors; C. J. Morrissey, sec.-treas.

Inc. March 5, 1917, in Michigan, as a consolidation of the Mayflower Mining Co. and Old Colony Copper Co. Stock of new company was exchanged on a share for share basis.

Cap. \$5,000,000: shares \$25 par; 200,000 shares issued; \$14 paid in. Last assessment of \$1 paid February 6, 1922. No funded debt. American Trust Co., Boston, transfer agent. Old Colony Trust Co., Boston, registrar. Annual meeting, third Wednesday in March. Listed on Boston Stock Exchange.

Receipts during 1919 were \$109,993, nearly all from the assessment. With the balance from 1918, there was available, \$133,760. Expenditures totaled \$118,937, of which \$99,386 was for mining. Balance forward to 1920 was \$14,823, plus \$128,000 received to March on account of assessment. At the end of 1920 the treasury had \$140,000. Financial statement for fiscal year ending March 1, 1921, showed: receipts, \$178,783; expenditures, \$121,948; balance, \$71,658, with \$23,091 due on unpaid assessments.

Property: 2,044 acres on Mineral range, near Calumet, Houghton county, comprises Secs. 7, 8, 17 and 18, T. 56 N., R. 32 W. Lands are south of the Kearsarge mine and east of Wolverine, South Kearsarge, and Calumet & Hecla mines. Prospecting was begun on the Mayflower in 1899 and continued for 5 years.

Development: by the new 1,750' working, or No. 1 shaft, with 2,099' of new mine openings in year ended March 1, 1921. This work included 616' of drifting, 1,302' of crosscutting and 170' of raising. The property was extensively drilled for a number of years and large ore reserves located. The older workings are fully described in Vol. XIV of this book.

Operations in 1921 were satisfactory, showing the beds to have a reverse dip and solving the faulting. In 1922, drifts were run both N. and S. on the 1,400' level, in good ore and systematic mining work is to be planned.

The new shaft opened the lode from 1,403' to 1,456' and from 1,690' to 1,712'. The upper orebody showed a strongly amygdaloidal material, carrying finely disseminated copper. The lower occurrence resembles the upper physically, but is of higher grade. At a depth 1,730', the copper disappeared.

In the Old Colony mine a cross-section was secured, 1899-1901, by a tunnel driven: about 3,000' and by diamond-drill borings eastward to the western end of the tunnel; this cross-section showed upwards of 75 amygdaloidal and conglomerate beds, a number of which carried a little copper in the drill cores and where cut in the tunnel.

Diamond drill and exploratory work in the Mayflower and Old Colony mines show the Mayflower to be a big, well-mineralized amygdaloid bed, proven for a distance of 6,000', and for a depth of 1,500'. This lode lies on the extreme eastern side of the copper range, near the eastern sandstone.

Thirteen holes on the Mayflower and 10 on the Old Colony, ground show commercial ore and were sufficiently promising to warrant shaft sinking, provided both companies shared the expense, and as the most satisfactory way of dividing the expense was a consolidation of both companies, this was accomplished in 1917.

Equipment: includes 15 dwellings, boiler house, change-house and an engine-house, containing hoist and compressor.

McKINNEY STEEL CO. MICHIGAN, MINNESOTA
Office: Perry Payne Bldg., Cleveland, Ohio. **Mine office:** Virginia, Minnesota.

Officers: Price McKinney, pres.; J. E. Ferris, sec.; Donald B. Gillies, gen. mgr.

Currently believed to be a re-organization of Corrigan, McKinney & Co., which was dissolved in 1917. Said to be operating, or to control, the following properties:

Baker Mine.

Located in Sec. 21, T. 43, R. 32, Menominee range, Mich. Ore: is a soft, Bessemer hematite. First opened in 1909.

Production: totals about 267,107 tons.

Colby Mine.

Located in Sec. 16, T. 47, R. 46, Gogebic county, Mich. Ore: soft, blue Bessemer and non-Bessemer hematites, assaying 53.79 to 53.98% iron, 0.039 to 0.047% phosphorus and 5.89 to 6.15% silica. Mined by underground method.

Production: 423,553 tons in 1916; 353,880 in 1917; 324,731 in 1918; 268,129 in 1919; total 5,215,823 tons

Commodore Mine.

Located Sec. 9, T. 58, R. 17, near Virginia, St. Louis county, Minn. Ore: soft, blue Bessemer and non-Bessemer hematites, assaying 51.83 to 57.32% iron, 0.048 to 0.032% phosphorus and 7.67 to 6.01% silica. Mined by open pit system.

Production: 1916, 579,285 tons; 1917, 405,827 tons; 1918, 244,247 tons; 1919, 359,086 tons; total 6,421,911 tons.

Dunn Mine.

Located in Sec. 1, T. 42, R. 33, Menominee range, Mich. Ore: is a soft brown, non-Bessemer hematite, mined by underground methods.

Production: none since 1915. Total is 2,208,511 tons.

Great Western Mine.

Located in Sec. 2 1, T. 43, R. 32, Menominee range, Mich. Ore: is a soft, non-Bessemer hematite, mined by underground methods.

Production: has been irregular since 1882. Largest output was 311,218 tons in 1906. Only 42 tons in 1919; total is 2,198,025 tons.

Ironton Mine.

Located in Sec. 17, T. 47, R. 46, Gogebic county, Mich. Ore: soft, red Bessemer and non-Bessemer hematites, assaying about 51.38% iron, 0.248% phosphorus and 4.96% silica. Ore mined by underground system. First shipment, 1886. New electric hoists and compressors were installed during 1920.

Production: 1916, 148,200; 1917, 244,517; 1918, 184,627; 1919, 212,207 tons; a total of 2,202,207 tons.

Richards Mine.

Located in Sec. 36, T. 43, R. 33, Iron Co., Mich. Ore: soft brown non-Bessemer hematite, assaying 51.22% iron, 0.566% phosphorus and 6.47% silica. Mined by underground system. First shipment, 1914.

Production: 1914, 7,069 tons; 1915, 92,807 tons; 1916, 29,381 tons; 1917 43,890 tons; 1918, 56,087 tons; 1919, 111,116 tons; a total of 386,522 tons.

Stevenson Mine.

Leased from Great Northern Iron Ore Properties, Minn.

Located in Secs. 7, 8 T. 57, R. 15, near Hibbing, St. Louis county, Minn. Ore: soft, blue Bessemer and non-Bessemer hematites, assaying about 54.73% iron, 0.047% phosphorus and 7.19% silica. Mined by open pit system. First shipment, 1900.

Production: 349,960 tons in 1916; 345,265 tons, 1917; 323,514 tons, 1918; 73,416 tons in 1919; a total of 13,945,402 tons.

Odgers Mine.

Located in Sec. 30, T. 43, R. 32, Menominee range. Ore is a non-Bessemer hematite, assaying 53% iron and 0.0468% phosphorus.

Production: 257,637 tons in 1918; 100,061 tons in 1919; and 580,543 tons to date. After 6 months idleness, operations resumed, Oct. 1921.

St. James Mine.

Located in Sec. 3, T. 58, R. 15, near Aurora, St. Louis county, Minn. Ore: soft, blue non-Bessemer hematite, showing 50.88% iron, 0.068% phosphorus and 7.90% silica. Mined by underground system.

Production: 184,885 tons in 1917; 242,301 tons in 1918; 78,704 tons in 1919; a total of 541,956 tons.

St. Paul Mine.

Located in Sec. 24, T. 57, R. 22, near Keewatin, Itasca county, Minn. Ore: soft, blue non-Bessemer hematite, assaying about 50% iron, 0.50% phosphorus and 7.58% silica. Mined by open pit system.

Production: 181,852 tons. Only small shipments reported since 1913.

Tobin Mine.

Located in Sec. 30, T. 43, R. 32, Iron county, Mich. Ore: soft, red,

non-Bessemer hematite, assaying 52.75% iron, 0.470% phosphorus and 6.31% silica. Mined by underground system. First shipment, 1901.

Production: 1916, 146,113 tons; 1917, 188,590 tons 1918, 202,775 tons; 1919, 97,674 tons; totaling 3,132,347 tons. Operations resumed, Oct., 1921.

Tully Mine.

Located in Sec. 36, T. 43, R. 35 W., Iron county, Mich. Ore: soft, red, non-Bessemer hematite, assaying 55.60% iron, 0.347% phosphorus and 5.50% silica. Mined by underground system. First shipment in 1910.

Production: 1916, 236,300 tons; 121,426 tons in 1917; 125,087 tons in 1918; 134,141 tons in 1919; a total of 950,116 tons.

MEADOW MINING CO.

MICHIGAN

Is controlled by the Keweenaw Copper Co. **Office:** C. A. Wright, sec-treas., Calumet, Mich. Mine near Copper Falls, Keweenaw county, Mich.

Inc. 1898, in Michigan. **Cap.** \$1,500,000; \$25 par; 81,520 outstanding Dec. 31, 1918; 37,500 shares were given in payment for property. Is a re-organization of the Meadow Mng. Co., inc. 1863, under special Michigan charter.

Balance sheet for 1920 gives assets as \$87,068, including \$44,830 for development and \$36,578 for real estate. Cash amounted to \$2,242 and accounts payable, \$5,457.

Property: 364 acres, adjoins the Humboldt and Phoenix mines and carries the Ashbed lode, which was first opened 1851, with a little mining previous to 1860. Where the Ashbed is crossed by transverse fissures, bunches of ore occur and such places usually show pits made by prehistoric miners. Fully described Vol. II, Copper Handbook.

Idle many years.

MICHIGAN COPPER MINING CO.

MICHIGAN

Office: 15 William St., New York. **Mine address:** Theo. Dengler, gen. mgr., Rockland, Ontonagon county, Mich.

Officers: L. P. Yandell, pres.; F. G. Heumann, sec.; R. E. Graver, treas. **Directors:** L. P. Yandell, C. D. Lanier, J. S. Dunstan, W. A. Paine and A. M. Low.

Inc. June 15, 1898, in Michigan. **Cap.** \$2,500,000; \$25 par; fully issued; \$24 paid in. Last assessment levied July 1, 1918, was \$2 per share, equal to \$200,000. Old Colony Trust Co., Boston, registrar; American Trust Co., Boston, transfer agent. Annual meeting, first Tuesday in May. Listed on Boston Stock Exchange.

Financial statement, years ending Dec. 31:

Year	Copper Sales	Total Income	Operations	Taxes, etc.	Profit	Excess of Assets
1920.....	\$202,025	\$208,180	\$298,960	\$43,398	\$155,593(a)	\$332,654
1919.....	300,010	312,673	375,883	62,161	—125,371	177,061
1918.....	290,933	445,782	291,184	27,788	126,810	52,068
1917.....	8,878	105,864	130,856	44,142	—69,134

(a) Excess of liabilities.

Property: the Minnesota, Rockland and Superior mines, 4,870 acres of mineral territory, 1,466 acres of timber and miscellaneous lands and a 150-acre mill site, giving total holdings of 6,686 acres.

The main tract is 3 miles east and west by 4½ miles north and south, in addition to which there are 4 scattering tracts to the westward, one of 40 acres, two of 80 acres each and one of 160 acres, all carrying the outcrop of the Calico amygdaloid. The Superior mine produced 567,331 lb. fine copper, 1856-69 and 1876-79. The Rockland, lying next east of the Minnesota, was operated 1853-70, making 6,210,309 lb. fine copper from the Minnesota contact vein which averaged about 2' width and carried considerable silver in that mine. The old Minnesota mine, opened 1847, closed 1870, made 34-

704,668 lb. fine copper and paid dividends of \$1,820,000. The Minnesota mine is fully described in Vol. II, Copper Handbook.

Geology: the Michigan company's tracts carry the following known copper beds of the Evergreen belt, Calico, Contact, Minnesota, Branch, North Contact, Knowlton, Mass, Butler, Ogima, North Amygdaloid and South Amygdaloid, and presumably the other parallel beds, in addition to various other unidentified copper-bearing beds of the Keweenaw series. The Knowlton, or northernmost of the Evergreen belt of parallel beds, lies about 1,000' south of the old Minnesota shafts and the 7' amygdaloidal bed supposed to be the Butler, opened to some extent in Peninsula bluff 2,000' south of "B" shaft, shows some heavy copper and stamp rock. There are 3 old shafts on the Butler bed and a tunnel cutting several parallel copper-bearing strata. There also are cupriferous amygdaloidal outcrops north of the Calico bed on which no work has been done.

Development: mine has 3 shafts on the Calico bed and about 10 miles of workings. "A" shaft is 2,133' deep; "B" is bottomed at the 14th level and "C" at the 11th level. The lode grew steadily poorer with depth and showed a tendency to pinch, being only about 5' wide on the 16th level of "A" shaft, though well charged with copper. The mine was closed down in 1910, when the property was turned over to tributors, who continued to scam the mine with some profit to themselves and the company until May, 1913, when all work was stopped.

In July, 1915, work was resumed at the old "E" shaft, and continued to date. During 1917 this was enlarged from 2 to 3 compartments and sunk to a depth of 873'. Drifting south of the shaft encountered the Evergreen, Butler and Ogima lodes, all showing commercial values. Results from other development work were reported as most encouraging.

It was said in 1919, that a new shaft was to be sunk east of "E" shaft.

New work in 1919 amounted to 4,117', against 2,919' in 1918, mostly on the Butler lode on Nos. 4 and 7 levels.

All work was suspended in Oct., 1920.

Equipment: rockhouse, hoist, compressor, 1,000-ton orebin, machine-shop, smithy, carpenter shop, warehouse, office and change-house.

The mill, construction of which was begun April, 1906, is about 1 mile north of the Mass mill, on Keweenaw bay, with ample water frontage. Construction was suspended in 1907, after about \$175,000 had been expended.

The Baltic mill treated ore during 1919-20.

Production lb. copper: 1900-1905, 6,113,500; 2,875,341 in 1906; 2,665,404 in 1907; 3,000,206 in 1908; 1,979,305 in 1909; 36,682 in 1910; 327,773 in 1911; 162,590 in 1912; 90,000 in 1916; 35,400 in 1917; 1,177,176 in 1918; 1,697,107 in 1919; 1,075,492 in 1920.

The mine has thus far proved a disappointment, largely because limited funds have restricted the necessary exploratory and development work. Recent developments have been rather promising. The property is very fully described in Vol. X of the Copper Handbook.

MICHIGAN IRON LAND & LUMBER CO.

MICHIGAN

A subsidiary of Ford Motor Co., Detroit, Mich.

Inc. 1921, in Mich., by Henry Ford, Edsel B. Ford and Clara J. Ford, to acquire holdings of the Michigan Land & Iron Co., controlled in England. **Cap.** \$2,000,000; \$200 par; 10,000 shares issued and owned by the Ford family.

Property: covers 32,000 acres of timber and mineral lands in Baraga, Houghton and Iron counties, and includes the Imperial mine on Marquette range, Baraga county, credited with production of 1,000,000 tons of ore averaging 52% iron.

MICHIGAN SMELTER CO.

MICHIGAN

Office: 82 Devonshire St., Boston, Mass. **Works office:** Houghton, Houghton countv, Mich.

Officers: Wm. A. Paine, pres.; L. P. Yandell, v. p.; F. W. Paine,

sec.-treas.; Frederick I. Cairns, supt., and F. W. Denton, directors; John Mugford, asst. supt.

Inc. 1903, in Michigan. **Cap.** \$500,000; \$25 par. The entire stock issue is owned by 6 mining companies, the Copper Range group holding 12,000 shares and the Stanton companies 8,000 shares, holding in shares being as follows: Champion, 4,400 shares; Trimountain, 4,400; Baltic, 3,200; Mohawk, 3,200; Wolverine, 3,200; Atlantic, 1,600. No dividends have been paid, profits having been turned back into improvements. Annual meeting, second Monday in January.

Works: company owns and operates the Michigan smelter, 3 miles west of Houghton, near the old Atlantic stamp mill, with frontage on Portage lake. It was designed by Frank Klepetko, and is the largest and most modern smelter in the Lake Superior district, with a capacity of 90,000,000 lb. fine copper yearly. Arsenic is also recovered, and sold as an insecticide.

The plant is terraced throughout, permitting automatic handling of material. The copper ore (locally rock), is delivered in 40-ton bottom-dumping steel cars by the Copper Range railroad, which also hauls away the refined copper for shipment from the Copper Range wharves in Houghton.

The 3,000-ton storage bins hold 10 days' supply for the works. Concentrate, or in Lake Superior terms, mineral, is dehydrated in rotary dryers by water gases from the furnaces, taken to the furnaces in tram cars and dumped into hoppers on the charging floor. Coal strestles, on an upper level, hold 15,000 tons of hard and soft coal, with tunnels underneath through which fuel is taken in tram cars, descending by gravity to the furnaces and boiler rooms. There also are separate storage bins for charcoal, sand and limestone.

The reverberatory furnace buildings, have three 5-ton traveling cranes and 6 furnaces. Alternating with the larger reverberatories are one 300-h. p. and two 200-h. p. Stirling water-tube boilers, heated by waste gases from the furnaces. After leaving the boilers the gases are drawn through a 6x8' subterranean flue, with arched roof, up the hill to a 150' smokestack, with base 100' above the furnace building.

A pulverized coal plant for firing the reverberatories was erected early in 1921.

The blast-furnace building has 2 cupola furnaces. Blister copper is cast, mechanically, in molds upon a circular casting table, cooled in water, and carried by a link elevator to the loading platform. Slags are carried mechanically to the sampling mill and reduced in a 30-ton crusher of 1,000 tons daily capacity for re-smelting. The slag from the final fusion is granulated by water and discharged through launders to low ground northward.

The combination machine-shop and power house has a complete equipment driven by an independent engine, and a 300-h. p. Nordberg horizontal tandem-compound engine, driving a 200-k. w. generator, actuates the rotary blowers for the blast furnaces. Electric power is used for operating the drying plant, cranes, casting machinery and lighting. There are 3 specially designed Jeffrey electric locomotives.

Miscellaneous buildings include office, laboratory, warehouse, barn, etc. Water is obtained from the old Atlantic dam, on Cole's creek, through a 4,300' flume with capacity of 5,000 gals. per minute, leading to a 50,000-gal. storage tank, 100' above the works, giving good pressure at all points. The plant is well planned and well handled.

MINERAL MINING CO.

MICHIGAN

Office: Iron Mountain, Mich.

Officers: E. F. Brown, gen. mgr.; J. A. Monroe, supt.; Pickands, Mather & Co., sales agts.

Inc. May 7, 1904, in Wisconsin. **Cap.** \$100,000; shares \$100 par; 90,000

issued. Annual meeting, first Tuesday in May. Company is a close corporation.

Property: the Osana, Wauseca, Nanaimo and Breen iron mines near Iron River, Mich. The Nanaimo and Breen have been idle since 1908. The Osana yields a non-Bessemer limonite, carrying 50% iron and 0.42% phosphorus. It is mined by sub-level, caving and stoping to 428'. The Wauseca produces a non-Bessemer hematite, employing similar systems to a depth of 398'. A new steam plant and hoist were erected at this mine during 1920.

Production: the Nanaimo yielded 373,765 and the Breen 74,425 tons. The Osana mine produced 171,000 tons in 1917; 201,098 tons in 1918 and 137,579 tons of ore in 1919, a total of 1,418,738 tons. The Wauseca has yielded 111,087 tons.

MINONG COPPER CO.

MICHIGAN

Office: 122 Winder St., Detroit, Mich. Louis O. Broadwell, pres.; Hugh A. McPherson, sec.

Inc. Dec. 16, 1874. **Cap.** \$1,000,000; shares \$25 par.

Property: 1,455 acres in Secs. 22, 23, 26, 27, 34 and 35, T. 66 N., R. 35 W., lying at the head of McCargo's Cove on the Isle Royale, shows a line of ancient pits, largest 400' and about 1½ miles long. Idle since about 1881.

MOHAWK MINING CO.

MICHIGAN

Office: 15 William St., New York. **Mine office:** Kearsarge, Keweenaw county, Mich. **Mill office:** Gay, Mich.

Officers: L. P. Yandell, pres.; R. E. Graver, treas.; F. G. Heumann, sec. **Directors:** L. P. Yandell, J. S. Dunstan, C. D. Lanier, W. A. Paine and F. W. Denton.

Inc. Nov., 1898, in Michigan. **Cap.** \$2,500,000; shares \$25 par; all issued; assessable; paid in \$18. Stock listed on Boston Exchange. Boston Safe Deposit & Trust Co., registrar; American Trust Co., Boston, transfer agent. Annual meeting, last Tuesday in March. Company owns \$80,000 worth of Michigan Smelting Co. stock. Mohawk held 20,000 shares of Gratiot Mng. Co. stock, but sold them in Nov., 1920, to the Seneca company. Range of shares during 1920 was \$71½ high and \$43½ low; in 1921, \$54 high and \$50 low.

Dividends: formerly paid semi-annually, but are paid quarterly since August 1, 1918. Payable Feb., May, August and Nov.; \$5 in 1906; \$9 in 1907; \$2.50 in 1908; \$3 in 1909; \$2 in 1910; \$1.75 in 1911; \$3.50 in 1912; \$5 in 1913; \$1 in 1914; \$6 in 1915; \$17 in 1916; \$20.50 in 1917; \$10 in 1918; \$5 in 1919; \$5.50 in 1920; \$1 in Feb. 1922. The grand total is \$9,775,000.

Income account for 1920 shows: gross receipts, \$1,679,101 and expenses of \$1,046,340, compared with income of \$2,530,991 and expenses of \$1,559,025 in 1919. Mining profit was but \$177,262 in 1920, contrasted with \$598,822 in 1919; \$1,033,690 in 1918 and \$2,063,591 in 1917, which figures represent net profit.

Working capital Dec. 31, 1920, was: cash, \$54,659; accounts and bills receivable, \$403,134; loans, \$161,200; Liberty Bonds, \$1,068,150; copper on hand, \$378,507 and supplies at mine, \$289,862. Current liabilities at same date were \$242,321.

Property: 800 acres in an irregular tract, having its axis on the strike of the Kearsarge amygdaloid bed, in Secs. 27, 28, 33 and 34, T. 57 N., R. 32 W., about 4 miles N. E. of Calumet, with the Ahmeek and Seneca mines on the north and Ahmeek to the west. Also owns a millsite of 140 acres and town of Gay on Torch Lake, near Dollar Bay, with a long strip of shore on each side.

Geology: property contains the Kearsarge amygdaloid bed, which is from 15' to 18' in average width, as at the Wolverine, and in the upper workings carries about the same percentage of copper, but the lower workings are not so rich. The Kearsarge is crossed at approximately right angles by a number of narrow fissure veins, with nearly vertical dip, that

yield mass copper and in addition there are 3 cross-fissures carrying copper arsenides, including mohawkite, keweenaite, mohawk-whitneyite, and stibio-domeykite, the first two being peculiar to this district and first found in this mine. The fissures carrying mohawkite range between 3" to 3' in width, are well mineralized where crossing the amygdaloidal bed and for a short distance on either side, the mohawkite and allied arsenides occasionally occurring massive, but commonly being disseminated in an arenaceous gangue. The copper arsenides decrease with depth, and recent production has been small. There also are other cupriferous amygdaloidal beds in the stratified series that may be prospected later.

Development: by 6 shafts, 4 of them operated, with miles of underground workings, new work in 1920 being 7,764', compared with 9,006' in 1919; 9,253' in 1918; 13,134' in 1917; 15,224' in 1916, and 15,627' in 1915. The 4 operating shafts are of uniform size, 8x18' inside of timbering, with solid cribbing through the overburden and with identical equipment. The skipways in the shafts, are laid with concrete stringers which prove very satisfactory. The mine is equipped with electric signals and operates about 65 power drills.

No. 1 shaft, about 1,500' south of the northern boundary, is bottomed at the 25th level and is 2,693' deep. No. 1 hoist, in the central power-plant at No. 2 shaft, operates two 4-ton skips in counterbalance. No. 1 shaft has a combination shaft-rock house, equipped with a 12x24" engine and crushers. The new openings continue to show the necessity of selective underground working. Driving S. on No. 25 level was underway in Jan., 1921.

No. 2 shaft is 2,364' deep. Like No. 1, it had good ore near surface with impoverishment at depth, followed by improvement below the 12th level. The power plant at No. 2 shaft, serving both No. 1 and 2, includes an engine house and boiler house. Hoists are double-conical-drum duplex-cylinder engines, good for 6,000' depth, each handling two 4-ton skips in counterbalance. The boiler house has locomotive firebox boilers with foundations for 3 additional boilers, and the engine house has 2 air compressors, of 40 drills aggregate capacity. Shaft was not operated during 1918.

No. 3 shaft, 1,600' deep, is abandoned.

No. 4 shaft is 2,579' deep, developing good copper content from surface. Equipment includes a steel shaft rock house with 3 crushers and a steam hammer. The engine house has a double-conical-drum hoist, good for 6,000' depth. A compressor plant at No. 4 shaft has two compressors.

No. 5 shaft is 1,874' deep. Equipment includes a new all-steel shaft rock house and a Bullock hoist good for 2,000' depth.

No. 6 shaft, the southernmost, is about 2,600' south of No. 5 and 2,600' from the Ahmeek boundary, commanding about three-fourths of a mile of the strike of the Kearsarge bed under about 160 acres, or approximately as much ground as the entire Wolverine mine. This shaft, located about 60' in footwall rock, is 1,554' deep, and can be sunk to a maximum of 4,000'. Mechanical haulage was installed on No. 8 level in 1916, and two 4-ton trolley locomotives were put in operation in 1918.

New openings at No. 4, 5 and 6 shafts in 1919 and 1920 continued to show same excellent mineralization as in previous years.

Several storage battery and trolley locomotives are used in the mine, also scrapers in the stopes and loaders on the levels.

The mill, near the mouth of the Tobacco river, on Traverse bay, Lake Superior, opposite the mill of the Wolverine, is 178x206' in size, of steel frame sheathed with iron, on foundations of sandstone. A steel trestle, 350' long and 50' high, leads into the mill, loaded cars being pulled up the incline by a winding engine. The mill has 4 stamps, all compounded, giving a daily capacity of 2,800 to 3,000 tons. The mill has a Chilean mill and 3 sets of auxiliary crushing rolls, with fixed bearings, to reduce oversize material from the mortar boxes of the heads, this averaging 20 to 25% of rock stamped. Mineral from the wash discharges automatically and is

sluiced into the basement, there shoveled into 1½-ton mineral cars, having 14-mesh perforated steel bottoms that allow the drainage of water, after which the cars are weighed, then lifted by a cage elevator and dumped into bins. The bin house has 4 compartments, each with cement floor and steam-pipes underneath, for drying the remaining moisture from the wash. The mineral is taken from the bin house, in self-dumping steel mineral cars to the Michigan smelter at Houghton for reduction. Tailings from the mill are dewatered, then raised by bucket elevator, and stacked by belt conveyor, some distance from the mill. To utilize exhaust steam from stamps of the Mohawk and Wolverine mills, a 1,250-k. w. turbo-generator has been installed, and shows a marked saving in coal.

In 1918 a concrete building 42'x42'x18' on a concrete foundation 12' high was built to accommodate this turbine which will furnish power to drive all the mill machinery in addition to three 7,000 gallon electrically-driven centrifugal pumps which are to be installed at the old pump-house, thereby eliminating the present pumping boiler plant.

Water for both the Mohawk and Wolverine mills is furnished from a joint pump house, standing near the Tobacco river, from which water is taken. The pump house has at present a 20,000,000-gal. triple expansion pump, supplemented by a 9,000,000-gal. pump, giving an ample water supply for both mills.

A 30x300' wharf, on Traverse bay, a short distance from the mill, with 14' of clear water alongside, is fitted with coal hoists and storage sheds, ample for the needs of both mills. Employs about 700 men.

Yield of fine copper, per ton of rock stamped, averaged 15.79 lb for the decade ended 1912.

Production:

	Cost		Cost		Ref. Cu.	Cu. per Ton	Cost per lb.	Sell. Price Cts.

(a) Includes construction. (b) Includes strike. (c) Includes cost of depreciation, depletion, smelting, freight, taxes, etc. The actual cost of operating was 11.2c. (d) 11 months.

Finlay, in 1911, estimated 176,000,000 lbs. extractable copper, and a further life of 15 years. Our estimate made in 1915 was 260,000,000 lb and a life of 23 years. In May, 1920, the company engineers estimated 247,424,984 lbs copper, or a yield of 13,000,000 lb annually for 19 years. Total production to Nov. 31, 1921, was 200,514,829 lbs.

The Mohawk, while a lower grade mine than was anticipated at the beginning, is a fine property, having an assured future with the benefit of strong, honest, competent and thoroughly economical management. The copper on hand was almost all sold at end of 1920.

MULLOCK MINE

Described in Vol. XIV.

MUNRO IRON MINING CO.

Office: Iron River, Mich.

Officers: W. A. Rogers, pres.; Hugh Kennedy, v. p.; W. S. Rogers, sec., Erie county Bank Bldg., Buffalo, N. Y. G. L. Woodworth, mgr. Is a close corporation.

Property: includes the Chicagoan, Munro, Rogers and Hiawatha mines.

MICHIGAN

MICHIGAN

the last named one mile S. of Iron River; the Rogers, 3 miles E. of Iron River; the Chicagoan, 6 miles E. of Iron River, and the Munro at Norway, Mich.

Development: by shafts, 400 to 1,200' deep and about 30,000' of workings.

Production: 1913, 316,019 tons; 1914, 293,296 tons; 1915, 323,464 tons; 1916, 427,182 tons; 1917, 426,819 tons; 1918, 376,988 tons; 1919, 312,737 tons; 1920, 404,689 tons. Company reports about 1,000,000 tons of ore blocked out.

The Beaufort mine on the Marquette range is also operated, but recent shipments are from stockpiles.

NATICK COPPER CO.

MICHIGAN

Office: Leopold Bldg., Houghton, Mich. Mine near Copper Falls, Keweenaw county, Mich. F. W. Nichols, resident mgr.

Property: 200 acres, the N. E. $\frac{1}{4}$ and E. diagonal $\frac{1}{2}$ of E. $\frac{1}{2}$ of N. W. $\frac{1}{4}$ of Sec. 28, T. 58 N., R. 31 W., surrounded by holdings of the Frontenac Copper Co. Property was explored in early days, but has been idle many years.

NATIONAL MINING CO.

MICHIGAN

Idle. **Mine address:** Rockland, Ontonagon county, Mich.

Officers: B. T. Morrison, pres.; Harry Highley, sec.-treas.; Chas. M. Baker, Harry M. Howard and W. S. Warn, directors.

Inc. 1848, in Michigan; rechartered 1878. **Cap.** increased later to \$2,500,000; shares \$25 par; issued, \$1,875,000, and rechartered 1908. Listed on Boston Stock Exchange. Paid dividends, 1861-72, of \$320,000, and levied a 40c. assessment 1909. The company has no debts.

Property: 1,852 acres, with the Michigan mine on the north and east and the Victoria on the south and west, carries the western continuation of the contact vein of the old Minnesota mine, now owned by the **Michigan Copper Mining Co.** When work was begun, the property showed the relics of ancient mining operations, including a shaft of 50' depth, timbered and scaffolded, with a nearly continuous sheet of copper extending down one side. The company had troublesome litigation with the old Minnesota company over the title to 115 acres of land, the National finally winning. Idle since 1893.

NATIVE COPPER CO.

MICHIGAN

Idle since 1855.

Officers: at last accounts, Ashley Watson, pres.; Chas. E. Adams, sec.-treas.; Ashley Watson, Frederick Hoitt and Frank L. Van Orden, directors.

Inc. 1849, and reincorporated March 29, 1880, in Michigan. **Cap.** \$1,000,000; \$25 par; assessable; fully issued. Annual meeting, first Wednesday in March.

Property: 480 acres, being the S. $\frac{1}{2}$ of Sec. 3 and N. W. $\frac{1}{4}$ of Sec. 10, T. 58 N., R. 30 W., all on the Keweenawan trap belt. A little work was done, 1852-55, on a fissure vein crossing the Ashbed. Assessments levied total \$39,000.

NAUMKEAG COPPER CO.

MICHIGAN

Office: 61 Broadway, New York. **Mine office:** Houghton, Mich.

Officers: J. Parke Channing, pres.; Sam A. Lewisohn, v. p.; E. H. Westlake, sec.-treas.; Herman Cook, asst. sec. Directors: J. Parke Channing, Adolph Lewisohn, I. J. Sturgis, F. L. Van Orden, Theo. L. Herrmann, J. H. Susmann and Chas. J. Paine, Jr. J. Harry Reeder, supt.

Inc. March 21, 1912, in Michigan. **Cap.** \$5,000,000; \$25 par; 102,000 shares issued; \$10 paid in on 31,628 shares; \$10.50 on 70,372 shares. Last assessment 50c. a share due Nov., 1919. U. S. Mortgage & Trust Co., New York, registrar. Annual meeting, third Wednesday in March. Listed on Boston Curb.

From 1912 to end of 1919, \$246,432 had been spent on property, and \$57,767 for general and administration expenses. No report issued since

1919. Balance sheet at end of 1920 showed: cash, \$1,326; compared with \$18,551 in 1919; \$28,426 in 1918; \$84,297 in 1917.

Property: 1,200 acres, in Secs. 34 and 35, T. 55 N., R. 34 W., and Sec. 3, T. 54 N., R. 34 W. just west of Houghton, on the south shore of Portage lake, carries practically all of the Ashbed amygdaloidal beds, including the Atlantic and the Quincy-Pewabic lodes.

Development: property but slightly explored under former owners, whose efforts were sporadic and unimportant. Operations by present company were begun July 10, 1912, in the horizon of the Hancock lodes. Drill borings yielded good showings of copper at depth of 513' in what is presumed to be an extension of Hancock No. 3 lode, and again at a depth of 1,301' where a 6" streak of coarse copper was encountered.

In 1914, the main, or Dakota Heights adit on the old Pewabic lode was extended 126', encountered the lode at 100', and drifts No. 2-A north and south were continued for 70' and 63'.

This work showed a lode, 6-8' wide, opened for 700' and showing copper ore, but not of commercial value. During 1915 exploratory work on the Pewabic lode showed considerable copper on the No. 2 North drift. A 200' winze was sunk from this drift and 1,602' of drifts and crosscuts driven from the lower level. No beds of value were found in the southern part of the property.

In 1916, all exploration was confined to workings from No. 4 adit at N. end of property. No. 2 drift was put out 352' on the old Pewabic lode, showing no copper. Work from No. 4 E. crosscut disclosed nothing worth further exploration, save the bed in which the breast of crosscut is in.

In 1917, main shaft was sunk 47' to the 400' level. "A" shaft sunk 107' to adit level for ventilation, but the shaft and 250' of drifting along the bed showed less mineralization than was indicated by diamond-drill cores. During 1918 work at the main shaft was pushed on the 400' North drift, crosscut No. 2 W. was driven 450', excellent copper showing in spots. An incline shaft was sunk 1,027' from adit level. The showing at 1,000' was so inferior to either the adit or the 400' levels that work was abandoned in that section. Because of discouraging work in north end of property, company started to explore south.

In 1919, results of exploration work on the Pewabic lode at a depth of 1,000' were so discouraging that all work was stopped, January, 1920. It was then decided to crosscut the entire Pewabic series, starting from a point 3,234' from the portal of the 3,634' adit level. In September, 1920, work was suspended indefinitely.

Equipment: includes hoist, compressor, pump and electric power. Is a legitimate mining speculation, backed by the Lewisohn interests.

NEGAUNEE MINE

MICHIGAN

Address: M. M. Duncan, mgr.; G. R. Jackson, supt., Ishpeming, Mich.
Sales agents: Cleveland-Cliffs Iron Co., and Pickands, Mather & Co., Cleveland, Ohio.

Property: in sections 5, 6, T. 7, R. 26, in Marquette county, Mich. Has been worked since 1887.

Development: ore mined by caving system to vertical depth of 1,086'.

Ore: two grades: Negaunee, a soft, red, Bessemer hematite, containing 54.38% iron, 0.043% phosphorus and 6.72% silica; and a non-Bessemer, assaying 52.30% iron, 0.083% phosphorus and 6.72% silica. Moisture is 11% in both.

Production: 573,760 tons in 1917; 501,965 tons in 1918; 411,296 tons in 1919; a total of 7,663,308 tons.

NEVADA MINING CO.

MICHIGAN

Fully described in Vol. XIII. Merged November, 1919, with New Arcadian Copper Co., to form the **Arcadian Consolidated Mining Co.**, which see.

NEWPORT MINING CO.**MICHIGAN**

Mine now operated by **The Steel & Tube Co. of America**, which see. Described in Vol. XIV.

NEW YORK CONSOLIDATED MINING CO.**MICHIGAN**

Charter expired and corporate existence of company wound up by F. W. Nichols, Receiver, Houghton, Mich.

Property sold to J. H. Rickard, trustee, 1917.

NORRIE-AURORA MINE**MICHIGAN**

Fully described in Vol. XIV. Owned by **Oliver Iron Mining Co.**

NORTH LAKE MINING CO.**MICHIGAN**

Office: 60 Congress St., Boston, Mass. Operating office: Shelden Bldg., Houghton, Mich.

Officers: R. M. Edwards, pres. and gen. mgr.; S. L. Powers, v. p.; Henry Tolman, treas., with A. C. Paine and T. S. Woods, directors; A. L. Wyman, sec.

Inc. Aug. 26, 1908, in Michigan. Cap. \$2,500,000; \$25 par; fully issued; \$10.50 paid in. Assessment, No. 3, of 50c. levied March 6, 1918.

Company paid \$144,000 for 360 acres of land, bought of St. Mary's Mineral Land Co., one-half in cash and one-half in 9,000 shares of stock at \$8, beginning business with \$300,000 cash in the treasury. The company suffered heavily by the failure of S. R. Dow & Co., Sept., 1912, losing \$160,188 in cash and interest, unlawfully borrowed by its former president, S. R. Dow, and at the end of 1912 was \$19,000 in debt. This indebtedness was wiped out by an assessment of \$1 per share, levied April 18, 1913. Federal Trust Co., Boston, registrar; American Trust Co., Boston, transfer agent. Shares are listed on the Boston Stock Exchange. Annual meeting, third Thursday in April.

Annual reports show:

Year	Assessments	Other Inc.	Exp.	Prev. Bal.	Curr. Bal.
1920.....	\$1,829	\$2,057	\$12,614	\$4,461	\$8,729*
1919.....	1,256	15,685	11,224	4,461
1918.....	50,000	184	35,098	26,310	11,224
1917.....	387	55,264	28,567	26,310
1916.....	100,000	333	56,188	15,556	28,567

*Deficit.

Current assets at end of 1920, totaled \$5,772; liabilities, \$27,728, exclusive of \$1,331 for taxes and \$30,500 for notes payable. Profit and loss, \$497,415.

Property: 1,120 acres, in Secs. 28, 29, 32 and 33, T. 51 N., R. 37 W., lying immediately north and east of the Lake Copper Co. Property was supposed to carry about 7,000' of the strike of the Lake amygdaloidal bed, but apparently the Lake bed curves to the westward, rather than to the east. Property also carries the copper-bearing series of the Evergreen belt of amygdaloidal beds, and various other unidentified cupriferous strata. The company's lands are crossed by the Fire Steel river, and are traversed by both the Mineral Range and Copper Range railways.

Development: exploratory work has been thoroughly and systematically planned and carried out, the preliminary work consisting of diamond-drilling to give 2 complete cross-sections, of about 8,500' and 9,500', respec-

tively, to determine the strike and dip of all the strata on the property. These sections are about 1,000' apart, and the contact of the Keweenaw series with the eastern sandstone has been definitely located by drilling.

Fifteen diamond-drill holes were put down to depths of 200' to 2,000'. Several cupriferous amygdaloidal beds were disclosed, and No. 6 and 8 conglomerates have been correlated as extensions of No. 1 and 2 of the Adventure series of lodes. No. 1 bed, of about 33' width, showed 10' charged with copper, but No. 2 bed was lean. Formations above No. 8 conglomerate bed are practically unexplored, and excepting drill holes Nos. 3 and 7 remain untouched. An 800' vertical shaft was started July, 1913. At 300' depth a crosscut to the N. W. cut No. 8 conglomerate. A 200' winze, 30° incline, was sunk and 100' gained in depth. On the 400' level exploratory work to develop lodes cut on South Lake property was continued, but no commercial rock was found. At a distance of 1,030' N. W. of the shaft the crosscut broke into the overburden.

Crosscuts at right angles to the general trend of the formation were driven in both directions from the shaft on the 800' level. In Dec., 1918, the S. E. crosscut was 1,576' long and the N. W. crosscut was 1,969' long. The S. E. crosscut penetrated a lode which showed 2 to 8" of rich brick copper, and considerable fine copper. In September, the Butler lode was cut by the N. W. crosscut and a 30' drift on the lode shows considerable copper; but operations were suspended at end of 1918 until more favorable cost conditions prevail.

Equipment: includes a hoist good for 1,200' depth, small air-compressor, boarding house, and all mine buildings.

The North Lake is an exploration company, but in view of the encouraging results secured by diamond-drill borings on this and adjoining properties, is considered promising.

ODANAH IRON CO.

MICHIGAN

Address: Cleveland, Ohio. W. P. Chinn, asst. gen. mgr.; Pickands, Mather & Co., Cleveland, O., sales agents; L. M. Hardenburgh, supt., Ironwood, Mich

Property: the Cary and Windsor mines, on Gogebic range, Iron county. Ores are hard, reddish-purple Bessemer and non-Bessemer hematites, assaying 54.50% iron and 0.060% phos., and 49.05% iron and 0.054% phos., respectively.

The mine is worked to vertical depth of 1,322' by underground sub-level stoping system.

Production: totals 4,283,488 tons.

OGLEBAY NORTON & CO.

MICHIGAN

Office: E. W. Hopkins, Ironwood, Mich.

Business: company acts as sales agents for the following iron companies: Bristol Mng. Co., Brule Mng. Co., Castile Mng. Co., Commonwealth Iron Co., Fort Henry Mng. Co., Fortune Lake Mng. Co. and Montreal Mng. Co., all separately described herein.

OJIBWAY MINING CO.

MICHIGAN

Office: Suite 3300, 120 Broadway, New York City. **Mine office:** Calumet, Mich.

Officers: Thos. F. Cole, pres.; Thos. Hoatson, v. p.; Jos. B. Cotton, v. p.; Frederic R. Kennedy sec.-treas.; Henry Paull, auditor, above with G. A. Tomlinson, Walter B. Congdon, E. R. Grochau and Saml. Brenner, directors. Wm. J. Uren, mgr.

Inc. June 1, 1907, in Michigan. **Cap.** \$2,500,000; \$25 par; assessable; issued 84,000 shares, \$15.50 paid. Last assessment, 50c., paid August 1, 1918. Boston Safe Deposit & Trust Co., registrar; American Trust Co., Boston, transfer agent. Listed on the Boston Stock Exchange. Annual meeting, first Tuesday in June.

Balance sheet dated Dec. 31, 1920, showed: total assets, \$1,305,488, in-

cluding investments, \$48,037; securities, \$19,265; cash, \$682; accounts receivable, \$348; supplies, \$6,805; profit and loss, \$72,766. Liabilities: accounts payable, \$603; suspense, \$2,824.

Property: 2,520 acres, in T. 57 N., R. 32 W., Keweenaw county, bounded on the north by the Cliff and on the south by the Seneca. Owns in fee, 1,940 acres and mineral rights to 580 acres.

The Kearsarge bed, located 1904, on the Miskwabik tract, about 4 miles N. E. of Mohawk No. 1 shaft, was proven by 5 bore holes drilled across the formation at intervals of 1,200'. Four of these holes gave good cores, being especially rich toward the northern limits of the tract. The holes showed the Kearsarge amygdaloidal bed to be divided into 7 layers of amygdaloid and trap, immediately above the geological horizon of the Wolverine sandstone, the different cores each showing copper from either one or more of four horizons. Drilling indicated that copper values alternate from bed to bed, or layer to layer, if the cupriferous zone of the Ojibway be considered a single strata; only two of the amygdaloidal layers being well mineralized in a given cross-section, as a rule.

Development: by two 3-compartment shafts. No. 1, or north shaft, 1,500' from the northern boundary of the property, is 2,051' deep, disclosing copper from grass roots. Developments in this shaft show that the Kearsarge stratum is split in two, having distinct beds of 20' and 13' respectively, separated by 13 to 15' of trap. The 1,600' and 1,700' levels show good ore.

No. 2 shaft, 1,116' S. W. of No. 1, is sunk about 90' in the footwall, and is 1,954' deep, disclosing very little copper ground above 800', though a material betterment is noted below that depth, and a very marked improvement is noted below 1,500' depth. This shaft is sunk in unusually firm ground, requiring very little timbering.

The mine is equipped for development to a depth of 2,000'. Development has been systematic, but the former management planned making a mine upon 5-drill cores, which, as has been proven, gave rather too favorable an indication of the richness of the lode.

Work was suspended June 30, 1913, and date of resumption of operations is uncertain.

OLD COLONY COPPER CO.

MICHIGAN

By vote of stockholders, Feb. 26, 1917, company was consolidated with the Mayflower Mining Co., on a share for share basis, under the title of **Mayflower-Old Colony Copper Co.**, which see.

ONECO COPPER MINING CO.

MICHIGAN

Office: 70 State St., Boston Mass. **Mine office:** Hancock, Mich.

Officers: John D. Cuddihy, pres.; C. J. Morrissey, sec.-treas.; preceding, with F. L. Maguire, J. E. Fitz Gerald, Jr., directors; John L. Harris, gen. mgr.

Inc. Dec., 1898, in Michigan. Cap. \$2,500,000; \$25 par; \$5.50 paid in; issued 70,000 shares June 9, 1913. Levied a 50c. assessment, Jan. 15, 1906, a \$1 assessment, Feb. 21, 1910, and a \$1 assessment, Oct. 10, 1912. Annual meeting, third Thursday in March. Stock listed on Boston Curb. Company its own transfer agent; Federal Trust Co., Boston, registrar.

Property: 800 acres in Houghton county, all on the Keweenaw copper formation, in Secs. 2, 10 and 11, T. 56 N., R. 33 W., forming a main tract of 640 acres, and a smaller tract of 160 acres, adjoining diagonally, on the N. E. corner. The property lies east of the Franklin Junior and Rhode Island mines, but is separated therefrom by a quarter mile of intervening lands.

Development: the mine was opened in 1862, and exploring work done 1890 and 1898. Present company began sinking June 26, 1899, putting down a 500' shaft. Drifting on the upper levels showed a bed of fair width, carrying a little copper, and the shaft cut a narrow fissure, rich in copper, this being of much interest because it is one of the few productive cross veins found in the Portage Lake district. The bed on which the shaft was sunk

has been variously identified as the Isle Royale, Grand Portage and Kearsarge amygdaloids, but is now termed the Oneco amygdaloid.

Work was suspended 1900 until Aug., 1909, when a diamond drill campaign was begun, 10 drill-holes being bored, cutting the Oneco bed and an unidentified amygdaloidal bed, called the Torch Lake or Tomahawk lode, about 1,200' west of the Oneco, cores from both beds showing more or less copper. Drill holes were bored to depth of 1,000, to 1,700', locating the eastern sandstone and giving 2 complete cross-sections, 2,700' apart.

The mine was reopened Nov. 1910, drifting resumed on the 4th level, the shaft sunk to a depth of 1,250', and extensive drifting done on the 9th, 10th, 11th and 12th levels, both north and south, which showed the vein to be 10 to 20' wide and well mineralized. Mine has been idle since 1914, due to lack of funds.

ONONDAGA COPPER CO.

MICHIGAN

Address: Houghton, Michigan.

Officers: Reginald C. Pryor, pres., treas and gen. mgr.; C. H. Lang, v. p.; Wm. Duffnay, sec., with Ward B. Smith and D. L. Robinson, directors.

Inc. April 22, 1912, in Michigan. Cap. \$3,750,000; \$25 par; \$4 paid; issued, 99,955. Stock listed on the Boston Curb Exchange. State Street Trust Co., Boston, transfer agent; Commonwealth Trust Co., registrar. Balance, Dec. 31, 1916, \$33,130.

Property: 10,230 acres in Ontonagon county, Mich., near the White Pine mine of the Calumet & Hecla Co. The formation, a fine-grained sandstone, has been exposed by surface trenching at several points and found to carry flake copper in considerable quantity. The metal appears to be patchy, but as the ore frequently averages 10% where cross-faults occur, a commercial average may reasonably be expected.

Development: has been confined to diamond-drilling. The first hole completed in Jan., 1913, has a depth of 1,912' and is apparently in the horizon of the Isle Royale-Arcadian lode. Hole No. 2 is 1,500' deep. Hole No. 5 driven in 1913 to 2,000' depth failed to reach the contact. In 1914 holes Nos. 6, 7, 8 and 9 were drilled, making a complete cross-section from the S. E. corner of Sec. 14 to the N. W. corner of Sec. 4. None of the lodes cut in the holes gave cores showing copper in commercial quantities. Owing to financial conditions work was discontinued Sept. 21, 1914. Drilling near the northern boundary was again started July, 1915, each hole exploring the territory farther south. In the extreme S. E. corner the lode was located at 1,100' depth, but had no copper. In 1916, drilling gave cores from the lode in several places, but revealed no commercial values, so operations were stopped, and management awaits results of development on neighboring properties.

OSCEOLA CONSOLIDATED MINING CO.

MICHIGAN

Office: 12 Ashburton Place, Boston, Mass. General office: Calumet, Mich. Mine office: Osceola, Houghton county, Mich.

Directors: Wm. H. Dwelley, E. V. R. Thayer, J. M. Longyear, Wm. D. Calverley, D. S. Dean, E. B. Dane and J. T. Burnett.

Officers: E. V. R. Thayer, pres.; R. L. Agassiz, v. p.; C. H. Bissell, sec.-treas.; G. L. Osgood, Jr., asst. sec.-treas.; James MacNaughton, gen. mgr.; Frank H. Haller, supt.; A. Lincoln Burgan, mill supt.

Inc. 1873, in Michigan, and reincorporated 1903 for a term of 30 years. Cap. \$2,500,000; \$25 par; issued, \$2,403,850. State Street Trust Co., Boston, registrar; American Trust Co., Boston, transfer agent. Listed on Boston Stock Exchange. Annual meeting, second Wednesday in April. Controlled by the Calumet & Hecla Mining Co., through ownership of 33,560 shares. Range of shares during 1920 was \$58 high and \$22.50 low; in 1921, high \$32, low \$27.50.

Dividends: 98 dividends paid from 1878 to Dec. 31, 1920, aggregate \$17,765,375. Recent dividends were \$2 in 1904; \$4 in 1905; \$16 in 1906; \$7 in 1907; \$2 in 1908; \$14 in 1909; \$8 in 1910; \$7 in 1911; \$12 in 1912; \$7.50 in

1913; \$3 in 1914; \$11 in 1915; \$19 in 1916; \$14 in 1917; \$10 in 1918; \$3 in 1919, \$1 in 1920; none since June, 1920.

Net Earnings: (after allowing for taxes and construction.)

As to December 31, 1921, Osceola had a net surplus of cash and quick assets amounting to \$2,314,003, Osceola produced no copper in 1921. The company had on hand January 1, 1921, 5,533,927 pounds of copper valued at 13 cents a pound. It sold 5,125,664 pounds of copper during the year at an average price of 12.83 cents a pound, leaving 408,263 pounds of copper on hand December 31, 1921, valued at 14 cents. Including the selling and delivery cost for the copper sold of .59 cents per pound, the loss on the copper sold was 1.245 cents a pound, or \$63,652. By revising the valuation of the remaining inventory to a 14-cent basis this loss was reduced to \$59,570, which, together with \$421,291 maintenance cost on the property while closed down, provided a total loss of \$480,861, which was reduced to \$426,440 by net "other income." The company added to its capital assets the sum of \$77,616 through plant construction, etc., and charged back \$21,828 in adjustment of depreciation accounts, making the actual decrease in the balance of current assets for the year \$482,228.

Property: 2,120 acres, in 4 separate tracts, also an extensive millsite, in Houghton county, and miscellaneous lands in Houghton and Keweenaw counties, includes the Osceola, North Kearsarge, South Kearsarge and Tamarack Junior mines.

Mining operations were curtailed at all mines in 1920 and production was finally stopped in Nov., 1920, but resumed late in 1921.

New openings amounted to 1,297' in 1920, compared with 3,135' in 1919; 1,219' in 1918; 3,898' in 1917; 5,121' in 1916.

The **Osceola** mine proper, 720 acres, south of the Calumet & Hecla was opened 1873, on the Calumet conglomerate; this bed proving unremunerative, work was begun on the Osceola amygdaloidal bed, parallel and 730' east of the Calumet conglomerate. The Osceola amygdaloid has a strike of approximately N. 39° E., and is opened by six shafts numbered from north to south. Crosscuts to the Calumet conglomerate, at various depths showed no ore and diamond drilling to locate and test the Kearsarge amygdaloid was also disappointing.

The 4 northernmost shafts of the Osceola mine proper are abandoned. No. 5 Osceola shaft, 700' S. E. of No. 3, is 4,667' deep. No. 6 Osceola shaft, formerly known as the Opechee, 1,300' S. W. of No. 5, is 4,734' deep. This shaft shows some good stopes, especially on the lower levels in the southern drifts, toward the Tecumseh mine.

Some work was done at No. 3 shaft in 1916, but stopped 1917, awaiting an improvement in labor and mill conditions. Mining was limited to No. 6 shaft, where the 46' level was the most active and most productive. A new level was opened above the 38th in very good ground for 500'. No. 42 and 45 were driven into La Salle ground. The Auxiliary shaft 1,800' S. of No. 6 was operating between No. 43 and 46 levels. Rope haulage was used to tram ore from this new shaft.

Osceola mined 230,517 tons of 14.11 lb. copper ore in 1918, which compares with 203,288 tons of 12.38 lb. ore in 1917 and 225,030 tons of 14.89 lb. ore in 1916. In 1919 this branch supplied 150,233 tons of 15.74 lb. copper ore and in 1920, 93,383 tons of 17.9 lb. ore at a cost of \$3.27 per ton.

The compressor house is equipped with a 50-drill, 2-stage cross-compound air-compressor. Two trolley-type locomotives were ordered in 1918 for this section of the mine.

Water is secured from Lake Superior through a 1½-mile line of 6" pipe, connecting with a stand pipe at the Tamarack mine, leading to a 130,000-gal. concrete reservoir between Osceola shafts Nos. 5 and 6.

The **North Kearsarge** mine, 1,120 acres, lies north of the Wolverine, with which it has underground connections. Extensive diamond drilling, 1905-1907, showed considerable good stamp rock in the foot and hanging walls, at points where the main bed was impoverished. The Kearsarge amygdaloidal bed ranges 16 to 20' in width, in this mine, and has proven very bunchy, though of very good average grade. The southern workings approaching the Wolverine, have shown improvement, but the mine is richest near the Ahmeek, to the north.

No. 1 North Kearsarge shaft is 4,229' deep and has a hoist good for 6,500' depth, operating two 6-ton skips in balance. No. 2 North Kearsarge shaft was abandoned at depth of 2,400', some years ago.

No. 3 North Kearsarge shaft, 1,825' N. E. of No. 1, is 3,403' deep and develops a large area of good ground, especially in the northern drifts. No. 4 North Kearsarge shaft, begun 1907, sunk 75' in the footwall, is 1,761' deep. The shaft is lined with concrete for 185' from surface, and has large loading bins just below the 10th and 13th levels, to which rock is milled through chutes, from the levels above. Equipment of the rock house includes two 24 by 36" crushers driven by an electric motor. The steel-frame boiler-house at No. 4 has three 84" boilers, with room for 2 additional. During 1917 and 1918, four storage-battery locomotives with 5-ton cars, were installed on No. 15, 16 and 18 levels.

The North Kearsarge surface plant includes a stone compressor house and a 30-drill compressor at No. 1 shaft, combination machine and carpenter shops, warehouse and office, all of wood.

Electric haulage was installed early in 1919 on levels No. 31 and 32, shaft No. 1, and levels No. 34 and 35, shaft No. 3. Electric pumps were installed in 1921.

North Kearsarge contributed in 1918, 745,722 tons of 12.60 lb. copper ore, which compares with 691,263 tons of 12.54 lb. ore in 1917, and 651,079 tons of 14.23 lb. ore in 1916.

In 1920, this mine supplied 291,508 tons of 15.38 lb. copper ore at a cost of \$2.92 per ton, compared with 465,034 tons of 13.72 lb. copper ore at a cost of \$2.01 in 1919.

New work amounted to 2,971' in 1919; 501' in 1918; 2,547' in 1917; 4,325' in 1916.

The **South Kearsarge** mine, 160 acres, lying south of the Wolverine and east of the Centennial was known formerly as the **Iroquois**. Development was begun September, 1899, and the best stopes are toward the Centennial line, the Kearsarge bed averaging about the same width as in the North Kearsarge and Wolverine mines, and being remarkably uniform in copper values. This mine is practically worked out. There are about 100,000 tons in the pillars and arches yet to be mined, which will be a slow operation, with comparatively high costs.

In 1920, this mine supplied 71,091 tons of 18.45 lb. copper ore at \$2.79 per ton compared with 124,107 tons of 16.75 lb copper ore at a cost of \$2.25 p. t. in 1919. In 1918, mine yielded 218,728 tons of 14.96 lb. copper ore, which compares with 343,254 tons of 14.28 lb. ore in 1917, and 408,572 tons of 17.06 lb. ore in 1916. About 180,000 tons came from the shaft pillars in 1917 and 1918.

No. 1 South Kearsarge shaft, the northernmost, is 2,820' deep, and practically at the boundary. The shaft rock house cares also for rock from No. 2 shaft, with which it is connected by an 1,100' trestle. Two skips are operated in balance. No. 2 S. Kearsarge shaft is 1,992' deep.

The **Tamarack Junior** mine, 120 acres, lying between the Centennial and Calumet & Hecla, has 2 vertical shafts, on the Calumet conglomerate, No. 2 being 3,360' deep, with 12 levels opened. The Tamarack Junior has been idle since 1903, and is dead, so far as the conglomerate is concerned, with indifferent prospects of finding other workable cupriferous beds on the tract.

Rock is transported from the various mines to the mills by the Hancock & Calumet railway, a branch of the Duluth, South Shore & Atlantic system.

Mill: is built in 2 sections, the main section being 176x213', of steel frame, with 4 steeple-compound stamps. These stamps, which are now in very general use in the Lake Superior district, were invented by Bruno Nordberg as the result of years of experimentation. The stamps have circular mortars, with $\frac{5}{8}$ " screens, and hydraulic separators, about 20% of the copper from milling coming from the mortar discharges and separators. The older section has 3 stamps with circular screens having $\frac{5}{8}$ " openings, and is otherwise a duplicate of No. 2 mill.

The wash departments of the 2 mills are equipped with classifiers, jigs, Wilfleys, crushing rolls and Hardinge mills.

A complete automatic sprinkler system for fire protection was installed in 1917 and a plant to pump the tailings further into Torch lake was put into operation in 1919. This plant was built jointly by the Osceola Consolidated Mining Co., the Lake Milling, Smelting & Ref. Co. and the Calumet & Hecla Mg. Co.

During 1919 and 1920, ore from Allouez, Centennial and Isle Royale mines was treated in this mill, resulting in economy to the four companies with a slight profit to the Osceola. The steel boiler-house, adjoining the mills and furnishing power for both, has three 250 h. p. 72" boilers, delivering steam at 150 lbs. pressure, and nine 250 h. p. 84" boilers operated under 105 lbs. pressure, all of the locomotive-firebox type.

The power plant has an Allis-Chalmers Corliss engine, operating a 100

k. w. Morgan-Gardner d. c. generator, furnishing current for 220-volt incandescent enclosed arc lamps.

The joint pump-house of the Osceola and Tamarack mines has two 40,000,000-gal. triple-expansion pumps having 22", 40" and 60" cylinders, with three 30" horizontal plungers of 52" stroke and 42" discharge. Water is taken through an 8' tunnel, running 1,275' under Torch lake, with 3" intake holes, guarding against clogging by ice.

Production:

	Tons Ore Treated	Lbs. Cu. per Ton Ore Stpd	Cost per Ton (a)	Lb. Cu. Produced	Cost per Lb. Cts.	Rec'd per Lb. Cts.
1920.....	455,982	16.37	\$2.97	7,465,773	24.18	18.61

1911.....	1,246,596	14.8	1.14	18,388,193	9.28
1910.....	1,217,720	15.9	1.28	19,346,566	9.37

(a) Includes mining, transportation, stamping and taxes per ton of rock.

The total cost per pound in 1918 includes depreciation and depletion amounting to 3.07c per lb., but not taxes, about 4c per pound.

Mining costs per ton, at each mine vary, as shown below:

	Osceola	North Kearsarge	South Kearsarge
1920.....	\$3.27	\$2.92	\$2.79
1919.....	2.81	2.01	2.25
1918.....	2.10	1.69	1.74
1917.....	2.14	1.55	1.48
1916.....	1.84	1.30	1.18

Osceola is a low-grade mine whose profitable operation is ensured by the efficient management of the Calumet & Hecla control.

PACIFIC COPPER CO.

MICHIGAN

Office: Leopold Bldg., Houghton, Houghton county, Mich.

Officers: Geo. P. Gardner, pres.; Chas. J. Paine, Jr., sec.-treas., with W. Cameron Forbes, Chas. E. Perkins, Nathaniel H. Stone, J. E. Thayer, Jr., T. N. Perkins, Walter Hunnewell and R. R. Goodell, directors; F. W. Nichols, agent.

Inc: Aug., 1890, in Michigan. Cap. \$1,250,000; \$25 par; issued, 20,000 shares, \$10 paid, and 20,000 shares, \$2 paid. Is controlled, through ownership of 20,000 shares, \$10 paid, by St. Mary's Mineral Land Co. Ended 1920 with \$3,561 cash on hand and \$28,000 in Liberty Bonds.

Total receipts since 1890, \$100,273; total disbursements, \$96,713.

Property: 820 acres, the N. W. $\frac{1}{4}$ and the S. W. diagonal half of the S. W. $\frac{1}{4}$ of the N. E. $\frac{1}{4}$ of Sec. 4, and Sec. 5, T. 54 N., R. 34 W. Land lies just N. W. of the Atlantic mine, and supposedly carries the northern extension of the Atlantic Ashbed, on which a little exploratory work was done previous to organization.

Of the \$40,000 originally raised by sale of 20,000 shares, one-half was spent in prospecting work. The timber on the lands has been sold at various times and 140 acres sold to the Naumkeag Copper Co. From these sales and interest on funds, company has distributed \$40,000 cash and 4,000 shares of Naumkeag Copper Co. stock to its stockholders.

No mining done since 1900.

PENN IRON MINING CO.

MICHIGAN

Address: Vulcan, Mich. Wm. Kelly, mgr., M. A. Hanna & Co. sales agts.

Inc. in Michigan. Cap. \$150,000; \$25 par; all issued.

Property: in Menominee range, Dickinson county, includes the Cyclops, Norway, East and West Vulcan, Brier Hill and Curry mines. Developed to depth of 1,500' by vertical shafts. Ore: Bessemer and non-Bessemer hematites, varying from 57% to 39% iron. Reserves estimated by company at 1,200,000 tons, January, 1919.

The Cyclops, Curry, Norway and Vulcan have not produced since 1892. The others yielded 459,764 tons in 1917; 210,632 tons in 1918; 160,485 tons in 1919. Total production of all mines is 11,950,592 tons.

Operations have been gradually curtailed until in 1921, the West Vulcan was reported to be the only producing mine.

PEWABIC CO.

MICHIGAN

Office: 910 Wells Bldg., Milwaukee, Wis.

Officers: G. D. Van Dyke, pres.; W. D. Van Dyke, sec.-treas., with N. P. Hulst, J. H. McLean and D. G. Kerr, directors. E. F. Brown, mgr.; W. G. Monroe, supt.

Inc. Jan. 1, 1887, in Wisconsin. Cap. 8,000 shares; \$1.25 par, all issued. Is a close corporation. Liquidating dividend was declared in 1919, reducing par value of shares from \$25 to \$1.25.

Owms the Pewabic and Walpole iron mines at Iron Mountain, Dickinson county, Mich. On April 1, 1918, operations were suspended until more favorable conditions permit mining the low grade ore.

Production: the Pewabic yielded 9,359,339 tons to the end of 1918; in 1918, 113,999 tons.

PHOENIX CONSOLIDATED COPPER CO.

MICHIGAN

Controlled by Keweenaw Copper Co.

Office: State Bank Bldg., Calumet, Mich. Mine near Phoenix, Keweenaw county, Mich.

Officers: Thos. F. Cole, pres.; Spencer R. Hill, v. p.; C. A. Wright, sec.-treas., with G. G. Hartley, A. L. Warner and Thos. Hoatson, directors.

Inc. April 1889, in Michigan. Cap. \$2,500,000; \$25 par; all issued; \$18.50 paid in. Last assessment \$1, October 1, 1917. Is controlled by the Keweenaw Copper Co., through ownership of about 98% of the share capital, acquired by an exchange of shares on the basis of 10 shares of Phoenix for 1 share of Keweenaw.

Report for year ended December 31, 1920, showed assets of \$1,872,756, which includes real estate \$505,256, development and exploration \$1,277,031, cash \$660, investments, \$8,168; accts. receivable, \$933; Liabilities consist of capital stock \$1,850,000 and \$22,125 liability insurance fund.

Property: 2,505 acres, carrying 5 different fissure veins, on which more or less mining has been done, at various times. The old Phoenix mine, included in the consolidation, is famous for having produced the largest mass of native copper ever found, weighing upwards of 500 tons. The Phoenix fissure, on which work was begun 1846, was opened to a depth of only about 90', yielding considerable mass copper and silver. There also are possibilities on the Ashbed lode, which has been slightly developed by an exploratory tunnel. The mine has extensive openings and a modern equipment and was worked for 6 years without success, until closed down June 15, 1905.

Diamond drilling on the Ashbed lode, 1910, gave encouraging results and a resumption of this work late in 1913, after several years of idleness, showed fair copper ore.

In 1917, diamond-drill holes, aggregating 3,063', were put down, besides 1,410' of underground work. The shaft is 1,616' deep. In 1916, the "Old

Phoenix' fissure was explored by a crosscut northwards to the hanging wall of the Ashbed lode; it is not mineralized, excepting where it cuts the lode.

Equipment: at power plant at No 1 shaft includes 3 boilers, 2 air-compressors, hoist and pumps. The mill contains 7 Wilfley tables.

Operations suspended December 1, 1917, due to high operating costs and labor shortage.

PLYMOUTH MINING CO.

MICHIGAN

Address: Western Reserve Bldg., Cleveland; Ohio. L. M. Hardenburgh, gen. supt.; A. Matthews, Jr., Verona, Mich., local supt. Under direction of Pickands Mather & Co., 600 Western Reserve Bldg., Cleveland, Ohio.

Property: owns and operates a lease on the Plymouth iron mine, on the Gogebic range near Wakefield, Gogebic county. Property carries soft, non-Bessemer hematite, containing 53% iron, 0.077% phosphorus, and 3.23% silica.

Development: by open-pit system. In May, 1919, company was employing 355 men.

Production: started in 1916, 330,427 tons; 1917, 656,473; 1918, 821,867 tons; 1919, 498,842, a total of 2,309,401 tons.

Company also subleased the Mikado mine of the Verona Mng. Co. on the Gogebic range and mined 1,141,618 tons. Idle since 1919. The Pilgrim mine on the Gogebic range was opened in 1919 and yielded 286 tons.

QUINCY MINING CO.

MICHIGAN

Office: 52 Broadway, New York. **Mine and works office:** Hancock, Houghton county, Mich.

Officers: Wm. Rogers Todd, pres.; W. Parsons Todd, v. p.; Jas. L. Bishop, Chas. J. Devereaux, Wm. M. Belcher, J. F. Morse, and Walter P. Bliss, directors; W. A. O. Paul, sec.-treas.; F. J. McLain, asst. sec.-treas.; Chas. L. Lawton, gen. mgr.; Alex. Laist, smelter supt.; Ralph Hayden, mill supt.

Inc. March 30, 1848, under special charter from the state of Michigan. **Cap.** \$3,750,000; shares \$25 par; issued, \$2,750,000. Original cap., \$500,000; reincorporated March 6, 1878, for 30 years more with cap. \$1,000,000, increased, 1889, to \$1,250,000, again increased, 1896, to \$2,500,000, and once more increased, 1906, to \$3,750,000. Re-incorporated 1908 for a third term of 30 years. Old Colony Trust Co., Boston, transfer agent. American Trust Co., Boston, registrar. Shares are listed on the Boston Stock Exchange. Annual meeting, first Wednesday in June.

Comparative Statement: assets and liabilities exclusive of real estate, mine plant and supplies in use.

Dividends: Quincy paid its first dividend in 1862, and profits have been disbursed to shareholders in every succeeding year except 1866 and 1867, giving the company a continuous dividend record of 49 years, from 1868 to date, rendering it the oldest dividend-paying American copper mine, and second only to the Tharsis Sulphur & Copper Co., Ltd., which has a record of continuous dividends since 1867, or 1 year longer than the Quincy's record. Recent dividends, by years, have been as follows: 1900-1 36%; 1902, 28%; 1903, 22%; 1904, 20%; 1905, 24%; 1906, 50%; 1907, 54%; 1908, 18%; 1909, 16%; 1910, 20%; 1911, 16%; 1912, 21%; 1913, 15%; 1914, 2%; 1915 32%; 1916 64%; 1917 72%; 1918 34%; 1919 16½%; 1920 4%; none since March, 1920. The grand total is \$412.75 per share, or \$27,002,500.

A table of statistics, production, costs, etc., 1864-1905, is given in Vol. X., of The Copper Handbook.

The year 1918 marked Quincy's 70th anniversary. During this time it paid its stockholders \$26,452,500 in dividends and still had \$2,803,124 cash surplus; this is equivalent to a profit of 4¼c on each of 613,596,622 lb. copper produced, and sold at an average price for the entire 7 years of 16.1300c. equal to \$98,973,406.

Property: is very extensive, the management having adopted the policy, many years ago, of expansion of territory as opportunities offered. Acquisitions include a purchase of the Arcadian Copper Co., 1907, at a price of \$750,000; the old Franklin mine, 1908, at a cost of \$170,000, and the acquisition, 1910, of Sec. 14 and the N. E. ¼ of Sec. 22, of 800 acres, from St. Mary's Mineral Land Co. bought for \$600,000; 80 acres under and to the S. of shaft No. 2 were bought from Hancock Mining Co., July 1915, for \$226,250. In June 1919, company purchased 140 acres from the Hancock Mining Co., for \$251,823. This parcel adjoins the original 80 acres.

The holdings of the Quincy now include lands formerly held by the Pewabic, Franklin, Mesnard, Pontiac, Arcadian and St. Mary's, in order named, from south to north.

History: property carries the Pewabic bed and a number of parallel copper-bearing amygdaloids, from the Hancock mine, on the northern shore of Portage lake, to the boundary of the Franklin Junior mine, or about half way from Hancock to Calumet. Through the territory lately acquired shafts No. 2, 6 and 8 can be sunk to practically unlimited depth.

The mine was opened 1848, on the Quincy amygdaloid, a bed lying some distance west of the Pewabic, but the Quincy bed was abandoned 1856, when the Pewabic amygdaloid was opened. There is a footwall branch, known as the Pewabic East lode, underlying and parallel with the main bed, which occasionally yields good returns. The so-called West branch, about 300' west of the Pewabic bed, has been opened by shafts No. 2, 4 and 7 through crosscuts on different levels and considerable stamp rock has been stoped therefrom. About 1,000' west of the Pewabic bed is the Hancock amygdaloid, which is narrow but fairly mineralized, and which yielded an average of 21 lb. fine copper per ton, after reasonable selection, when worked in the old Hancock mine, this figure being materially above the present average return from the Pewabic bed.

The Pewabic amygdaloidal bed, on which all shafts are sunk, has a strike of about N. 30° E., with an average dip of 52 to 54' at surface, flattening in the lowest workings at depth of more than a mile to approximately 37° 30', the shafts following the dip of the bed on catenary curves. The Pewabic averages about 20' in width in the upper workings, but is materially narrower at the bottom. The lower workings show decreased copper values with much less heavy copper than above, but the ore is more uniform in value. Part of the decrease in copper returns is due to mining rock that formerly would have been left as worthless and practically the entire Pewabic bed is now mined. There are copper courses, or shoots, that rake to the north with depth.

The Pewabic bed has good walls and the mine requires comparatively little timbering. Dry-walls are built of waste rock, in wide stopes, saving the expense of hoisting waste and also the cost of timber. Shafts are sunk mainly in the footwall. The Pewabic rock now runs 19 lb. fine copper a ton, with some silver. Previous to about 1890, about 40% of the copper was secured in masses. In 1912 the proportion of mass copper was about 15%; company reports approximately the same percentage to date. The southernmost drifts of the Quincy are about 3,000' below mean water datum of Portage lake, while the northernmost workings at No. 8 shaft are fully 2 miles from the southern breasts.

Fire doors have been installed and every precaution is taken against fire. Miners are carried to and from work in man cars holding 30 men each, and hoisting cables are inspected frequently, with every care taken to prevent accidents.

The mine has a complete electric underground traction plant, tram lines averaging about 1,800' each in length with gradients of 1.5% towards the shafts. The equipment includes 20 electric trolley locomotives, each hauling 4 or 5 three-ton rock cars at a speed of 6 to 8 miles per hour, 1 man caring for each train. In 1918 4 storage-battery locomotives were installed.

Tram cars are unloaded into 500-ton storage bins, built on the hanging-wall side of the shafts. This system of storage obviates the loss of time by either the tram lines or skips, and adds about 25% to the hoisting capacity of the mine, the property being equipped with hoisting and rockhouse capacity for production of over 4,000 tons daily. About 200 rock-drills are used in sinking, drifting and stoping, and extensive use is made of the diamond drill for exploratory and preliminary development work.

The Quincy has been much troubled by air-blasts, violent disturbances brought about by the settling of super-incumbent rock in the scores of miles of worked-out openings, causing violent compression of the air elsewhere throughout the mine. The most serious disturbances from air blasts, which are practically artificial earthquakes, felt for only a few miles distance upon surface, were experienced in February, 1906, and March, 1914, and there seems reason to fear that these troubles will prove intermittently continuous for the balance of the mine's life. The air-blasts, while unpleasant, have caused more alarm than damage.

Development in recent years has been as follows:

	1920	1919	1918	1917	1916
New openings.....	16,700'	23,897'	24,580'	26,900'	29,910'
Shaft-sinking.....	369'	675'	428'	499'	547'

New work averages slightly over 5 miles yearly, the mine having approximately 125 miles of workings.

Owing to the acquisition of adjoining mines, the Quincy shafts are numbered irregularly and are described herein in order of occurrence, from south to north, rather than in order by number.

No. 7 shaft: the southernmost planned and sunk by John L. Harris. Leaves surface at an angle of 53° and is bottomed at an angle of 37° 30'. The shaft was sunk 4,000', in 18 months, through refractory rock, this phenomenal speed being rendered possible by sinking and raising in 5 sections simultaneously. The shaft is bottomed at the 71st level, at a depth of about 6,500'. Operations were suspended at this shaft on June 1, 1918.

Equipment: includes duplex hoist, with a 22' 6" straight-face drum, raising 8-ton skips; a 1,300-gal. bailer, a centrifugal feed-water heater being attached to one cylinder of the hoist, and a 100-drill 2-stage compound air compressor. The boiler house has four 250-h. p. water-tube vertical boilers, nine 100-h. p. locomotive firebox boilers, and a powerful fire pump.

The Franklin mine lies next north of No. 6. The Quincy bought the old Franklin mine, 160 acres, for \$170,000, taking possession December, 1908, and closing the mine immediately. It is doubtful if the old shafts ever will be used by the Quincy.

No. 8 shaft the Mesnard, 4,168' north of No. 6, is at the 71st level. It was sunk 205' in 1920 and has 28,000' of active openings extending from 51st to 69th level. Levels in this shaft were opened at 135' intervals and former numbering made the 24th level of No. 8 correspond with the 42d level of No. 6. This lode was poor in the upper levels, but the lower workings, while by no means up to the Quincy average of some years ago in quality of ore developed, show a bed wider and better mineralized than above, and the ground is of very satisfactory and profitable average, the improvement that began on the 10th level being very marked below the 20th level. The present average of the lode at the Mesnard shaft is nearly up to the present average of the older workings. This shaft is connected with the workings to the south, which at this depth are at 200' intervals, from the 41st, which was the first to pass under the old Franklin mine, to the 63rd inclusive. Shaft started production in 1907.

The power-house at No. 8 has a 32x72" duplex-cylinder engine with double conical drum, of 12' 6" minimum and 18' 6" maximum diam., good for 6,000' depth, and a 65-drill 2-stage cross-compound air compressor. The boiler room has ten 250-h. p. boilers. There is a large changing house of reinforced concrete at this shaft, and many well-built houses for employees.

No. 2 shaft is 8,360' deep. It lies 585' north of No. 4 shaft, and has about 48,000' of active levels extending from the 51st to the 81st. Equipment includes a 1,300-gal. bailer for raising water and 30 to 40 power drills are operated normally. The 82nd level of this shaft produced a great deal of mass copper during 1920, one piece weighing 24 tons.

Stamp ore from the shaft is dumped onto grizzlies, with wide bars, smaller material falling into circular bins, whence it passes by gravity to the crushers and thence into the main ore house bin. The smaller mass copper passes through the grizzly bars, is picked out by workmen and dropped into a chute carrying it to a steam hammer, there also being a chute for waste rock. The grizzlies allow large pieces of ore to fall into a bin of reinforced concrete in front of the steam hammer, where broken and sent to the main ore-house bin through a chute, while mass copper is dropped into a steel tube leading to a circular steel bin, which loads into railroad cars through chutes with pneumatic gates.

No. 2 shaft has a special crushing plant for waste rock, between the collar of the shaft and the rock-house. Poor ore is dumped into a circular bin and drawn by gravity to a crusher, going thence to circular storage bins, from which it is drawn off into wagons or railroad cars for use in railroad ballasting, road building and concrete work. There are similar crushing plants at the other main shafts, except No. 7.

The surface equipment of No. 2 shaft is very heavy, including two 60-drill cross-compound 2-stage air-compressors. A handsome concrete building was erected to house a new hoisting engine completed late in 1920 and described in the Eng. & Mng. Journal of Dec. 11th. It is of Nordberg design and is the largest in the world. The engine weighs 882 tons, is 60' high, high pressure cylinders are 32" and low-pressure 60" diam., with 62" stroke; the 2 cylindro-conical drums carry 10,000' of 1½" rope each; the load is 10 tons and speed is 3,200' per minute. Every safety device known is attached to the hoist. It is probable that the hoisting plant at No. 2 will be removed to No. 8 and the equipment at No. 8 will be installed at No. 9.

No. 6 shaft, 1,928' north of No. 2, below the 77th level, being sunk to the 78th, and has about 30,000' of active openings extending from the 59th to 77th levels. This shaft yields Quincy's highest grade ore.

No. 9 shaft; 2,600' north of No. 8 is the old 100' Pontiac shaft, given a concrete collar and cut down to 3-compartment size. The shaft is 2,900' deep, and at 2,600' cuts a drift from No. 8, giving ventilation; it is not in operation.

To the north of the Pontiac shaft there is a long stretch of ground, bought of the Arcadian Copper Co. and St. Mary's Mineral Land Co., carrying the extension of the Pewabic bed and available for later development. The surface plant of the Quincy is very complete. Miscellaneous buildings at the mine include a large warehouse, general office, several hundred dwellings at the mine location and a considerable number of houses at the mills.

Water for boilers and portable use at the mine location is taken from Portage lake, the pumps forcing water for a mile against a static head of 640'.

The company's private rail line, the Quincy & Torch Lake, built 1890, is 6 miles long, touching at all shafts and shops at the mine and at the boiler house, wharves and coal sheds at the mill. This line is connected with the Mineral Range, Hancock & Calumet and Copper Range railways. Equipment includes several locomotives, freight cars and nearly 150 hopper cars for rock, the latter having automatic couplers and air brakes.

Storage-battery locomotives have been added, and are very successful.

Stamp-mills: at Mason, on Torch lake, 6 miles from the mine, have 8 stamps, with combined capacity of about 5,500 tons daily, the stamps giving an average duty of about 700 tons. Two 36"x8' Hardinge ball-mills were added in 1916. In 1917, steel balls were substituted for pebbles in these mills. In 1918, 2 additional buildings were added to house 5 Marcy ball-mills and 240 tables for re-washing and re-grinding coarse tailings. The addition to No. 1 mill is 123'x215' and to No. 2, 91'x132'. Automatic fire sprinklers have been installed in both mills.

The Mills: No. 1 mill, of wood, has five 2-way stamps, taking steam at 100lbs. pressure. There is a mill for regrinding raggings, and the dressing machinery includes 92 jigs, and 32 Wilfley tables.

No. 2 mill, 630' north of No. 1, has 3 heads, each set on foundations of heavy timbers and concrete, surmounted by a bottom plate of 22 tons, a middle plate of 18 tons and a top plate of 18 tons, all of solid iron castings, above which are the mortar boxes of the stamps. The stamps have 1" revolving screens for the mortar boxes, with hydraulic discharges, as have the launders leading from the mortars these yielding about 60% of the copper secured. Finishing jigs and slime tables have been replaced by 24 Wilfley tables, 8 for each stamp, assisted by 3 Standard concentrators. Each stamp has 12 rough jigs, 6 Wilfleys for finishing and 2 Wilfleys and 1 Standard table for slimes. There is a settler from which slimes are taken to the Wilfley tables. Regrinding is done by a Chilean mill, with 3 jigs and 3 Wilfleys as auxiliaries. By the adoption of hydraulic discharges and other improvements the capacity of the stamp-heads has been increased about 25%, while changes in the wash have given an increased capacity of 30%, with labor costs reduced 25% and loss in tailings cut down 40 to 50%. About 35% of the present product of the mill is No. 3 grade mineral, carrying very fine copper.

The mill power-house at No. 2 mill, has four 250-h. p. vertical water-tube boilers. There is an electric light plant.

The mill and pump-house has a 20,000,000-gal. centrifugal pump, and A 20,000,00-gal. triple expansion pump, and the old pump house has 3 pumps with combined capacity of 21,000,000 gal. daily. Water is taken from a 7x7' 6" tunnel, driven 100' under the bed of the lake. A 6x6' 6" tunnel 440' long, connecting mills, boiler houses and pump houses, carries both water and steam pipes.

Tailings at the mills amount to millions of tons, and various experi-

ments on reconcentration have been conducted at intervals since 1902. The companies that have attacked this project have bankrupted themselves with monotonous regularity, notwithstanding which, the successful results being secured at the regrinding mills of the Calumet & Hecla offer promise that the Quincy sands also may be retreated profitably at some future time. In November, 1919, it was reported that the company was to spend \$500,000 on a plant for the treatment of this sand.

Smelter: this was blown-in Dec. 1, 1898. It is at Ripley, on the shore of Portage lake, opposite Houghton, just east of Hancock and only a half-mile from the mine. Remodeling of the mill was started in September, 1919. Smelter treated 23,000 tons of mineral in 1918.

One building has four 40-ton reverberatory furnaces, and a second building has 60-ton and 120-ton reverberatories, the latter having an automatic casting machine. On arriving at the reverberatory building the trucks carrying mineral are lifted by electric cranes and contents dumped into the furnaces, which are top-charged. An overhead trolley in the main building permits handling large bars and cakes, and a trolley dipping system is used for casting. Slags are trammed, in 3,000-lb. pots, to a 30' hydraulic elevator which raises the ladles and dumps their contents over the end of a trestle. The cupola building has 1 blast furnace only, for reverberatory slags. A briquetting plant has 2 boiler-iron retorts for briquetting low-grade mineral before smelting. Miscellaneous buildings at the smelter include an engine house, casting house, cooper shop, office, laboratory, machine shop, 50x100' warehouse, and a coal-shed.

During 1920 the smelter was improved by adding a 16 x 32' reverberatory, a 300 h. p. boiler, a 22' casting machine, 12½-ton motor crane for charging the furnace, a 6-ton crane for the casting plant, etc. Altogether, the enlarged smelter has a total daily capacity of 230,000 lbs. of copper, compared with 55,000 lbs. in the past.

Social conditions of employes have not been forgotten, company maintaining dwellings, club house, library, etc.

Production has remained nearly constant for several years, but was seriously lessened by the labor strike of 1913. Silver production during 1918 was 13,982 troy ounces of metal about 80% pure and 20,800 troy ounces of alloy 12-20% pure. Profit on silver in 1918 totalled \$54,680

Recent Production:

	Tons Ore	Lb. Mineral Produced	Ref. Copper Lb.	Lb. Cu. per Ton Ore	Cost (a) per Lb.	Sell Price

Total production, 1862-1919.....633,072,942

(a) Includes mining expense, smelting transportation, etc., and taxes paid in Michigan.

The 1921 production is estimated at 15,000,000 lb. copper.

No dividends in the near future appear likely, owing to the inability of the management to reduce operating costs to a basis assuring fair profits on present copper prices.

This condition may be attributed to three causes:

- (1) High coal prices.
- (2) High powder cost.
- (3) Failure of other commodities to drop appreciably.

Quincy has readjusted its wages in conformity with the Lake Superior scale paid by other mines in Michigan, and while costs of fuel and explosives have been lowered somewhat from the war peak, they have not dropped proportionately with the price of copper itself. The principal item is coal, to the high price of which must be added the increased freight rate.

The past year resulted in another deficit for Quincy, but its production capacity was raised to a rate of 30,000,000 pounds a year. It operated, however, at slightly better than 50% capacity and with one mill produced in the neighborhood of 15,000,000 pounds of copper.

Quincy raised its yield to about a 22-pound average in 1921 of which three pounds were due to regrinding. The company now regrinds a large part of its tailings. The tailings dump now contains 25,000,000 tons of material, containing possibly four pounds of copper per ton.

Management has followed an unswerving policy of expansion so that Finlay's 1911 estimate of a life of 7 years with production of but 200,000,000 lb. of copper, has been altered by additional acreage purchased since that year, making probable the production of over 1,000,000,000 lb. more copper and a further life of more than 50 years. The company has the longest record of continuous annual dividend payments of any American copper mine, and when normal conditions return bids fair to continue disbursing large profits for another generation.

RHODE ISLAND COPPER CO.

MICHIGAN

Subsidiary of the Franklin Mining Co.

Office: 60 Congress St., Boston, Mass. **Mine Office:** Demmon, Houghton county, Mich.

Officers: R. M. Edwards, pres.; Henry Tolman, treas.; with S. J. Jennings, H. M. Howard, Carl F. Moore and C. A. Hight, directors. A. J. Wyman, sec.

Inc. Dec. 9, 1898, in Michigan. **Cap.** \$2,500,000; \$25 par; paid in \$10.50. Assessment No. 2, of \$1, was payable January 14, 1907, and assessment No. 3, of 50c, was payable June 15, 1910. The Franklin Mining Co. owns 99,524 shares, or 99%, acquired by exchange of 3 shares Rhode Island for one of Franklin. Annual meeting, third Wednesday in April. No bonded debt. American Transfer Co., Boston, transfer agent.

Annual report for 1917 showed rents \$806, advanced by Franklin Mining Co., \$15,791, total receipts, \$16,597. Expenses amounted to \$4,619 at mine, \$1,295 taxes, balance being interest and incidentals. The 1919 report of the Franklin Mng. Co showed under "Assets"—Rhode Island Copper Co. acct., \$212,596; R. I. C. Co. stock, \$388,595.

Property: 800 acres, immediately north of the Franklin Junior mine. The ground has been explored by extensive diamond-drill work, showing cores from the Mesnard epidote, Allouez conglomerate, Pewabic amygdaloid, Kearsarge amygdaloid, and other copper-bearing beds. All the formations lying between the Kearsarge amygdaloid and the Calumet conglomerate were drilled by a series of holes, the Calumet bed showing traces of copper. The first cores from the Kearsarge bed showed copper in encouraging quantities from a bed of about 19' width.

Development: No. 1 shaft, 500' deep, is sunk on the Pewabic amygdaloid. This lode is 8 to 10' thick, of which 2 to 3' near the hanging wall is well mineralized but spotty in the 4 levels opened.

No. 2 shaft, 1,227' deep, has 10 levels, with a 125' winze below the 10th. The workings are north of the shaft, except on the 8th, 9th and 10th levels, the latter 2,400' long. The 8th level south develops a stretch of copper ground toward the Franklin Junior, and a 1,400' drift on the 8th level north showed 25 to 75' stretches of payable ground. The Rhode Island property

is being developed by the Franklin Mining Co., where at a depth of about 2,000', the Pewabic bed averages 8 to 10' width.

The Albany & Boston, or Allouez conglomerate, has been opened by crosscuts on the 500' and 1,000' levels, but the result was discouraging. A 250' crosscut on the 10th level, about 1,100' south of No. 2 shaft, has disclosed an amygdaloid bed of some promise. The east crosscut on the 8th level, at depth of 1,000' cut 2 apparently valueless beds, one being the Mesnard epidote. The East lode, about 5' wide, carries a little copper, but nothing of promise. The West lode, 96' from the Pewabic, is 7 to 9' wide, carrying occasional bunchy copper. The 4 amygdaloidal beds lying between the West lode and the Allouez conglomerate have been tested by N.-S. drifts, 3 proving barren.

Equipment: includes a frame shaft house at No. 2, with an engine house having hoist capable of raising 2-ton skips from a quarter mile depth, and a 12-drill air compressor. Buildings include a machine shop and smithy, warehouse and 15 dwellings.

The Rhode Island is idle and the plan of developing at greater depth through the north drifts of the Franklin is a good one, since the Pewabic bed to the south of the Rhode Island has shown great improvement below a depth of 2,000' in both the Mesnard shaft of the Quincy and the main shaft of the Franklin.

RICHMOND IRON CO.

MICHIGAN

Address: Palmer, Mich. E. E. Hunner, mgr.; John Huhtala, supt., M. A. Hanna Co., Cleveland, Ohio, sales agents.

Property: the Empire and Richmond mines on Marquette range, Marquette county, Mich. Ore is a silicious, hard, red-hematite assaying 39% iron, 0.045% phosphorus, and 36.81% silica. Both mines are worked by steam shovels.

Production: since 1896, about 1,700,000 tons. The Richmond has produced 2,029,407 tons of ore in the 4 years, 1916-20 and the Empire, 476,815 tons in the same period.

ROLLING MILL MINING CO.

MICHIGAN

Office: 1500 Alworth Bldg., Duluth, Minn. R. S. Archibald, mgr., Negaunee, Mich.; Edward P. Scallon, gen. supt., Crosby, Minn.; C. K. Quinn & Co., sales agents. Operated by Jones & Laughlin to end of 1918 and taken over by C. K. Quinn & Co. in 1919.

Property: the Rolling Mill mine on Marquette range, near Negaunee, Marquette county, opened in 1872. Ore is a non-Bessemer hematite. The mine is worked by underground and open pit steam shovel methods.

Production: 1,552,382 tons in 1918; 116,389 tons in 1919; total is 1,942,783 tons.

ST. LOUIS COPPER CO.

MICHIGAN

Out of business. Assets transferred to Calumet & Hecla Mining Co. For description, see Vol. XII.

ST. MARY'S MINERAL LAND CO.

MICHIGAN

Offices: Room 503, 120 Exchange Place, Portland, Me. and Houghton, Houghton Co., Mich.

Officers: Geo. P. Gardner, pres.; Nath. H. Stone, v. p.; Chas. J. Paine, sec.-treas., J. F. Dolloff asst. treas., with John E. Thayer, Jr., W. Cameron Forbes, Albert S. Bigelow, Thos. N. Perkins, Charles E. Perkins, N. H. Stone and G. H. Russell, directors, Fredric W. Nichols, resident agt.

Inc. March 4, 1901, in New Jersey. **Cap.** \$5,000,000; \$25 par, issued, \$4,000,000. Controls through ownership of entire stock issue, except founders' shares, the St. Mary's Canal Mineral Land Co., a corporation incorporated 1863, in New York, to acquire 180,000 acres of land given by the State of Michigan for the construction of the first ship canal at Sault Ste. Marie. These lands in Houghton, Ontonagon and Keweenaw counties, formerly included the tracts on which the Calumet & Hecla, Baltic, Tri-mount, Champion, Ojibway and other mines have been developed. Com-

pany has about 1,000 shareholders. Shares are listed on the Boston Stock Exchange. American Trust Co., Boston, transfer agent. Old Colony Trust Co., Boston, registrar. Annual meeting, first Wednesday in March, in Jersey City, N. J.

Income of the company consists mainly of dividends from the Champion Copper Co., with a small but steady revenue from sales of land, timber and wood and occasional but irregular large receipts from sales of mineral lands.

Revenue in 1919 totaled \$296,612 and expenditures, \$200,058. Cash on hand amounted to \$95,954; Liberty Bonds, \$300,000; notes and accts. receivable, \$205,566 and the securities listed below.

Revenue in 1920 amounted to \$425,103 and expenses, \$131,903. Cash on hand was \$69,154 at end of 1920.

Receipts in 1921, were \$204,822; disbursements, \$197,076; cash balance, Dec. 31, \$76,899.

Share assets of the company December 31, 1921, were 50,000 shares Champion Copper Co.; 20,165 shares La Salle Copper Co.; 79 shares Hancock Cons. Mng. Co.; 20,000 shares Pacific Copper Co.; 37,222 shares of Houghton Copper Co.; 2,000 shares Ojiway Mining Co.; 208 shares Copper Range Co.; 640 shares St. Mary's Mineral Land Co.; 8,340 shares Naumkeag Copper Co.; 17,902 shares Douglass Copper Co.; 10 shares Amphidrome Co.; 100 shares D. A. Stratton Co.; 3 shares Mayflower-Old Colony Copper Co.

In addition to these holdings, cash, bonds, and amounts receivable total \$746,143.

From 1863 to 1900 the old company paid cash dividends of \$2,200,000, and also paid stock dividends of 1 share of Tamarack, 1884; 1 share of Iroquois, 1890; 1¼ shares of Baltic and one-half share of Winona, 1898; 1 share of Old Colony and 1½ shares of Trimountain in 1899.

Dividends: (of the present company)—

1903.....	\$1	1913.....	\$3
1904.....	1	1914.....	0
1905.....	2	1915.....	8 (b)
1906.....	4	1916.....	19
1907.....	5	1917.....	14
1908.....	0	1918.....	5 (c)
1909.....	1	1919.....	4
1910.....	1 (a)	1920.....	2 (d)
1911.....	3	1921.....	1
1912.....	3		

(a) Not including Franklin stock distribution equivalent to \$4.

(b) Not including North Lake and Hancock stock distributions equivalent in cash to \$2.59 a share.

(c) Including \$1 per share from depletion Champion ore reserves. Not including Winona and Mayflower-Old Colony distribution, which amounted to 36 shares of Winona Copper Co., and 16 shares of Mayflower-Old Colony Copper Co., for each 100 shares of St. Mary's Mineral Land Co., stock held. Stockholders entitled to fractional shares were paid 2½ for each share of Mayflower-Old Colony stock and 1½ for each share of Winona stock.

(d) from depletion of Champion ore reserves.

Total dividends since organization amount to \$13,720,000, or \$87.75 per share.

Property: Dec. 31, 1921, consisted of 92,175 acres freehold, with mineral rights to 14,969 acres additional, property being scattered along the Lake Superior copper belt, with principal holdings on the South Range, S. W. of Houghton, in Houghton and Ontonagon counties.

A total of 6,362 acres was sold during 1919, plus the surface rights to

160 acres; in 1920, 10,802 acres and 390 acres respectively. In 1921 sales were 1,123.99 acres wood and timber, and 172 acres surface rights.

The company, since its reconstruction in 1900, has refused to sell its mineral lands outright, preferring to join with other land holders in the formation of new companies, taking pay for its lands in shares, on a pro-rata basis, or partly in shares and partly in cash. This policy has involved heavy outlays for exploratory and development work, but has resulted in giving the company a half interest in a new mine, the Champion, which is capable, alone, of furnishing funds to St. Mary's company for both dividends and development work elsewhere and a continuance of this policy must result in time in making St. Mary's Mineral Land Co. the part or sole owner of a number of fine mines. Owing to the great extent of its lands, located mainly on the Keweenaw copper belt, stretching along the mineral range for scores of miles, the landed holdings of the company are of great potential value. The management is vigorous and far-seeing.

SENECA COPPER CORPORATION

MICHIGAN

Offices: 11 Broadway, New York, and W. J. Uren, gen. mgr., 3 Calumet State Bank Bldg., Calumet, Mich. Mine near Mohawk, Mich.

Officers: J. Parke Channing, pres.; F. R. Kennedy, treas.; O. B. Van Sant, v. p.; Robt. Linton, v. p.; Fred B. Cole, v. p., with R. N. Atwater, Jr., Geo. A. Tomlinson, T. F. Cole, F. de C. Sullivan, P. A. Clark and W. F. Bartholomew, directors, E. J. McNamara, sec. **Operating Staff:** W. J. Uren, gen. mgr., J. M. Broan, supt.

Inc. Dec. 28, 1916, in New York. **Cap.** increased to 350,000 shares in June, 1921; all issued; of no par value. Bankers' Trust Co., N. Y. and Commonwealth Trust Co., Boston, transfer agents. Central Union Trust Co., N. Y. and United States Trust Co., Boston, registrars. Listed on Boston and New York Stock Exchanges. High for 1921, 25¼; low, 12¼. Annual meeting 2nd. Tuesday in February.

Debentures: \$500,000 of 8%, 5-yr. convertible bonds, due April 15, 1925. Shareholders could subscribe in the ratio of \$100 of bonds for each 40 shares held, subject to call at any time at \$110 and interest.

Corporation was formed to acquire control of the Seneca Mng. Co.'s stock held by the Calumet & Hecla Mng. Co.; 11,207 shares of this stock (par \$25 of which \$10.05 was paid in) was acquired January, 1917 for 44,828 shares, minority stockholders being offered the same terms of 4 shares of new corporation stock for \$60 cash per share. Company now owns all the 20,000 shares of Seneca Mng. Co.'s stock, that company being dissolved.

Income Account—Years ended December 31:

	Interest Received	Expenses	Surplus for year
1918.....	\$17,784	\$ 8,635	\$9,509
1917.....	30,772	22,849	7,923

Balance sheet for 1919 showed current assets of \$315,759 and liabilities of \$51,372. On May 1, 1920, the respective figures were \$649,615 and \$55,945, the latter exclusive of the funded debt of \$500,000. The 1921 report showed cash in treasury, \$830,000.

In June, 1919 company purchased an 80% stock ownership in the Gratiot Mng. Co. holdings and in Nov., 1920, the remaining 20% interest was bought. The holdings comprise 600 acres lying south and east of the Seneca property and carry the Kearsarge amygdaloid lode. In October, 1919, Seneca acquired from the Cliff Mng. Co., a millsite on north side of Keweenaw point consisting of 346 acres, the purchase including a railway right-of-way across Section 34. In May, 1921, company purchased the 10,000 share interest in the Lake M., S. & Ref. Co., owned by the Hancock which gives the use of 2 stamp heads of 1,000 to 1,200 tons per day capacity.

Property: the Seneca tract of 1,880 acres, located just north of the Mohawk and Ahmeek mines, carries the Calumet, Keweenaw, and Allouez

conglomerates and the Osceola, Kearsarge and other amygdaloidal beds. The Gratiot tract, 600 acres, adjoins the Seneca and carries the outcrop of the Kearsarge lode.

Development: the Seneca main shaft is steel and concrete lined, sunk vertically for a distance of 1,320', from which point it continues on a curve which cuts and passes through the Kearsarge lode at about 1,650' in depth. Shaft has been continued to 2,640' point and levels have been opened at depths of 128' apart.

Laterals 1 to 5 inclusive, driven to the South, have reached Ahmeek mine boundary. Laterals 3 to 7 inclusive are being developed to the north in a heretofore unexplored section of the Kearsarge lode; they are showing consistently good vein matter and compare favorably with the adjoining Ahmeek and Mohawk properties on the same lode.

The equipment is devised to reduce costs and promote high efficiency and is the best that can be obtained.

The property is now well opened and nearing the producing stage. No. 1 shaft is constructed for rapid hoisting of large tonnages and to handle 5,000 tons rock daily. To facilitate this, laterals are equipped with underground electric locomotives.

Gratiot mine is being opened with a double compartment shaft, capacity 2,000 tons daily, now 1,521' in depth, from which developments have been carried to the Mohawk mine boundary, approximately 1,064'. There is a distance between Seneca No. 1 shaft and Gratiot No. 2 shaft of 4,000' on the vein, which promises sufficient tonnages for many years' operations.

There has been expended in purchase and development of mine, including the Gratiot property, a little over \$4,000,000.

Production: during 1920, regular monthly shipments of rock obtained from lateral development work were shipped to Copper Range mill for stamping, and to Michigan Smelting Co. for refining. Returns therefrom gave an average of 23.722 lb. refined copper per ton stamped. Returns for 1921 were 14,397 tons rock stamped, yielding 466,323 lb copper, or 32.38 lb of copper per ton of rock.

The corporation continued its development campaign throughout the year 1921 and developments at lowest depth of shaft show some of best copper rock in Lake Superior district.

J. Parke Channing in January, 1922, estimates: the main or Kearsarge lode, if mined to a depth of, 500', on its dip beneath the entire 900 acres, will yield approximately 600,000,000 lb. copper, with an annual production of 20,000,000 lb. copper at a cost of 9½¢ per lb., sold in New York.

Gratiot Mining Co.

Office: 11 Broadway, New York City. **Operating office:** Calumet, Mich.

Officers: E. J. MacNamara, pres.; E. W. Brown, sec.-treas.; with E. H. Eckhoff, C. M. Wilson and J. R. Deering, directors.

Inc. Feb. 16, 1906, in Maine. **Cap.** \$300,000; \$3 par, fully paid. In 1919 the Seneca Copper Corp'n purchased the property, paying \$25,000 cash, with additional payments to extend over a number of years. Old Colony Trust Co., Boston, registrar.

Property: 600 acres, the N. W. ¼ of Sec. 26, N. E. ¼ of Sec. 27, S. E. ¼ of Sec. 23, and S. E. ¼ of Sec. 22, except the N. W. ¼ of the N. W. ¼, T. 57 N., R. 32 W. Property lies S. and E. of the Seneca and N. and E. of the Mohawk, carrying the Kearsarge amygdaloidal bed under about 175 acres, to a maximum depth of about 2,700'. Extensive drill borings were made before the shafts were started. The Kearsarge bed averages about 12' in width, with strike of N. 42° E., and average dip of 33 to 36° with the horizon, and its copper contents are painfully low.

Development: by two 3-compartment shafts, exact duplicates, sunk at an angle of 36° on the Kearsarge bed. Levels are opened at 100' intervals. No. 1 shaft, about 1,500' from the Seneca boundary, is 1,971' deep, having a

bed up to 18' in maximum width. Drifting has been done on the alternate odd numbered levels from the 1st to 9th, inclusive.

No. 2 shaft, 1,475' S. W. of No. 1, and 1,800' N. of Mohawk No. 1, is 1,520' deep, and drifting has been done on the 2nd, 3rd, 5th and 7th levels, the best showing being on the 5th.

Property is served by a 2¼-mile spur of the Mineral Range Railway, built north from the Mohawk mine.

Production: begun July, 1910, was 28,552 tons of ore yielding 265,869 lb. fine copper, and in 1911, was 1,347 tons ore, yielding 14,275 lb. fine copper, or about 9.3 lb. copper per ton ore milled. The mine was shut down on April 3, 1911.

SENECA MINING CO.

MICHIGAN

Inc. March 23, 1860, in Michigan. Cap. \$500,000; shares \$25 par. A subsidiary of the Calumet & Hecla Mining Co., was dissolved October 10, 1918, all its property being conveyed to the Seneca Copper Corp., which see.

SHELDEN & COLUMBIAN COPPER CO.

MICHIGAN

Address: care J. H. Rice, Houghton, Mich.

Property: lies next north of the Isle Royale mine and includes mineral rights under many private residences, near Portage Lake. An important discovery of sheet copper was made September, 1915, in an unidentified lode opened in excavating a cellar in this tract. Described in Vols. I and II of Copper Handbook. Idle for years.

SOUTH LAKE MINING CO.

MICHIGAN

Office: 60 Congress St., Boston, Mass **Mine office:** Houghton, Mich.

Officers: R. M. Edwards, pres.-gen. mgr.; Arthur C. Paine, sec.-treas.; preceding, with Thos. S. Woods, E. C. Robinson and Geo. E. Davis, directors.

Inc. Feb. 25, 1880, in Michigan, as the Aztec Copper Co., reincorporated Aug. 12, 1909, under present title and corporate existence extended for 30 years from Feb. 25, 1910. Cap. \$5,000,000, increased Dec. 11, 1917, from \$2,500,000; par \$25; assessable; 104,863 shares issued; \$9.60 paid in. Last assessment \$2, paid Mar. 22, 1920. American Trust Co., Boston registrar, Federal Trust Co., Boston, transfer agent. Annual meeting, 1st Tuesday in March. Listed on Boston Stock Exchange.

Of the total issued stock 40,000 shares were given to the old stockholders share for share, 20,000 were offered and taken by the same stockholders at \$2 per share and 10,000 shares were offered to holders of record May, 1913, at \$6.60, but were largely taken by the underwriters; 10,000 shares more were offered in March, 1915, and an additional 10,000 in October, 1915, at \$5, both of these last offerings being practically all taken by shareholders. In April, 1916, 10,000 shares more were offered to the stockholders at \$7.75 per share.

January 2, 1918, the 100,000 new shares authorized by the increase in capitalization of record were offered to stockholders of record at \$2 per share, at the rate of one additional share for each held.

Current liabilities at end of 1913 exceeded assets by \$150,316 and at end of 1920, by \$104,835, amounting to \$109,648. Receipts from all sources were \$60,715 and disbursements amounted to \$32,855 in 1919; in 1920, total receipts were \$68,249 and disbursements, \$22,768.

Property: 500 acres of mineral lands, being the W. ½ of Sec. 31 and S. W. ¼ of Sec. 30 T. 51 N., R. 37 W., adjoining the Lake mine on the east, and the Adventure on the West.

History: work was begun on the property in 1862, though the name Aztec was originally given because the extensive prehistoric workings were thought to have been the work of the Aztecs. A 16-lb. stone hammer was taken from the old workings.

The mine had a stamp mill in early days, and produced 756,853 lb. fine copper, of which 100 tons was secured in a single mass. Exploratory work

was done, 1905-06, on the Knowlton bed of the Evergreen series, by the Aztec-Algomah Development Co., and diamond-drilling was begun Sept., 1909, continuing until March, 1911, when suspended because of adverse financial conditions. Borings were begun at the base of Evergreen bluff near the foot of the Evergreen belt, thence working southward toward the eastern sandstone. Eight drill-holes were put down at various points on the property.

Exploratory drilling having shown copper rock in five holes, four of them at the corners of a 200' square, actual mine development work was determined upon. The holes showed that the beds run N. 70° W. and dip at about 56°. The drill-cores and recent underground work were carefully studied by A. C. Lane in 1916, who reports that of the four lodes cut by this work, No. 2 lode, or possibly a combination of number 1 and 2 lodes, is the Lake lode, mined by the Lake Copper Co., and that lodes dipping north in the 300' crosscut, north of the South Lake Shaft, are identical with, and the same as those dipping south on the 600' crosscut south of the shaft. This means that the veins fold over, dipping both N. W. and S. E., and that a vertical shaft can reach both limbs of the V-shaped fold.

A 600' vertical shaft, started 1912, opened up No. 1, 3, and the Butler lode, all north of the shaft. Ore was mined from all 3 lodes in 1917, and principally from the Butler, in 1918. A connection with the Lake mine on the sixth level gives good ventilation. Owing to the long distance ore has to be trammed, stoping will not be started until mechanical haulage is installed. The Butler lode is opened at 3 levels, viz., by crosscut into bluff from shaft collar, 300' and 600' level.

The tract north of the mine acquired in 1918, permits mining on the Butler lode to a depth of 5,000', and carries the Knowlton lode, that is well mineralized and worked in the Lake Copper Co. ground.

New work in 1918 amounted to 573' which compares with 2,520' in 1917. Operations were suspended in July, 1918 due to labor shortage and high production costs.

Equipment: includes a steel shaft-rock-house with a 5-drill air-compressor.

Production: commenced May, 1916, and to end of 1917, 63,368 tons sent to the Franklin mill, yielding 754,433 lb. of refined copper, or 11.03 lb. per ton. In 1918 to July, 7,694 tons were stamped, producing 226,141 lb. copper or 28 lb. per ton. Company has a decidedly promising property.

(a) deficit

Dividends: initial dividend of \$1 paid Oct., 1916; \$1 paid April, 1917. Total dividends, \$200,000.

Property: 400 acres, carries about 6,000' of the strike of the Baltic amygdaloidal bed, between the Isle Royale and Atlantic mines, embraces Sec. 15, of T. 54 N., and R. 34 W. The tract has room for 3 or 4 shafts, and has a light overburden, the bed being proven by trenches at intervals of 1,000', showing an amygdaloid of 35 to 40' average width, with extensive carbonate stains, due to weathering, and a little fine copper near surface. The property has been trenched to the eastern sandstone.

The mine has two workable copper lodes, the Baltic, locally known as the Superior, and the West lode, discovered in 1911, a formation independent of the Superior, 14 to 30' thick, which, however, cannot be stoped until the Superior lode is mined. On the Superior lode all ground above No. 15 level has been stoped out.

Development: by 2 shafts, sunk in the footwall of the lode, insuring solid ground, but necessitating crosscuts at each level. Owing to the great width of the copper-bearing stratum, it is necessary to crosscut along the bed at 100' intervals. The Superior mine is opened on the northern extension of the Baltic amygdaloid bed, though some call this the Superior lode, not being satisfied that the correlation is correct. The Baltic bed, in the Superior mine, carries copper impregnations in the footwall, always an evidence of strong mineralization, and there is a conglomerate bed under the foot that carries a small amount of copper. The milling ore is remarkably deceptive in appearance, as the copper oxidizes readily, and when it has been broken a few weeks, appears lean, unless a fresh fracture shows its true nature. As a triangular tract of land intervening between shafts No. 1 and 2 is owned by others, they cannot be connected above the 12th level. The mine has about 11 miles of workings, underground work for 1920 totaling 1,061' and 1,864' in 1919, compared with 2,564' in 1918, 2,502' in 1917, 5,136' in 1916, 4,199' in 1915, and 2,654' in 1914.

No. 1 shaft, 3,104' deep, is 1,200' from the northern limit of the property; it develops the Superior lode on all levels, and the West lode from the 12th to 31st inclusive.

No. 2 shaft, 2,540' S. W. of No. 1 and 2,400' from the southern boundary, sunk 40' in the footwall, at an angle of 53°, is 20' below the 18th level or 1,628' deep.

Over 3,000' of drifting on the lode on the 31st level having disclosed but one oreshoot, now stoped out, and the results of diamond drill work

and crosscutting being disappointing, the mine was closed down in 1920 and is not to be reopened.

TAMARACK MINING CO.

MICHIGAN

Out of business. Property sold for \$3,600,000, equal to \$60 per share, to Calumet & Hecla Mining Co., on April 1, 1917. For history and description of property, see Vol. XII.

THOMAS FURNACE CO., THE

MICHIGAN

Address: John M. Thomas, pres., 740 Kinnickinnic Ave., Milwaukee, Wis. G. A. Richards, mgr.; M. A. Hanna Co., sales agts.

Property: the Morgan mine, on the Gogebic range, opened in 1920 to depth of 300'. Production to commence as soon as rail connection is made. Company also operates the Indiana mine on the Menominee range, Dickinson county. The ore is hard, red, hematite assaying 35-39% iron and 0.007% phosphorus. Worked by open pit milling system to vertical depth of 180'.

Production: 14,018 tons in 1919 with total output of 233,502 tons.

TOLTEC MINE

MICHIGAN

Idle many years. Office: care J. M. Longyear, Marquette, Mich. Owners, Gogebic & Ontonagon Land Co. and Galen L. Stone, of Hayden, Stone & Co., Boston.

Mine at Greenland, Ontonagon county, Mich., 960 acres, carries the underlay of the Evergreen belt and the Calico and adjacent beds of the Michigan.

Production: 1851-1860, was 413,443 lb. fine copper. Some diamond-drilling was done in 1908.

TORCH LAKE MINING CO.

MICHIGAN

Idle. Office: 12-24 Exchange Place, Boston, Mass. Mine office: Leopold Bldg., Houghton county, Mich.

Officers: Thatcher Loring, pres.; Chilton Cabot, sec.; F. W. Nichols, agent.

Inc. in Michigan. Cap. \$500,000; shares \$25 par; assessable.

Property: 1,280 acres, Secs. 35 and 36, T. 56 N., R. 33 W., lying east of the Tecumseh mine of the La Salle company and about midway between Calumet and Lake Linden. The property was partially prospected, 1889-1900, by diamond-drill.

TOWNSITE MINING CO.

MICHIGAN

Office: Youngstown, Ohio.

Officials: Francis J. Webb, gen. mgr., care Republic I. & S. Co., Duluth, Minn. H. C. Jussen, supt.

Inc. Jan. 10, 1918.

Property: the Townsite (or Norrie) mine, on the Gogebic range, in which an interest is held by the Republic I. & S. Co. thru the Oliver Iron

Mining Co. A Bessemer hematite, carrying 53% iron, is mined by slicing to a depth of 300'.

Production: 25,970 tons in 1917, 83,428 tons in 1918; 80,203 tons in 1919; a total of 189,601 tons.

TREMONT & DEVON MINING CO., LTD.

MICHIGAN

Office: First National Bank Bldg., Hancock, Mich. Mine at Victoria, Ontonagon county, Mich.

Officers: H. L. Baer, pres.; W. M. Gibson, v. p.; Chas D. Hanchette, sec.-treas. with Claude Cooper, W. M. Gibson and Robt. T. Dunstan, directors, at last accounts.

Inc. Dec., 1908, in Michigan. Cap. \$250,000; shares \$25 par; 6,000 issued; two 10c. assessments levied to date.

Property: 680 acres, freehold, including the old Tremont and Devon mines, adjoining and directly W. of the Victoria, carrying about 1¼ miles of the strike of the Keweenaw copper formation, and apparently in the horizon of the western extension of the Lake bed.

In Feb., 1916, the E. J. Longyear Co. did some diamond-drilling. Three holes were put down; the first cut an unidentified lode lying above the Forrest lode; the third is said to have shown good values in the Victoria lode. No recent information.

TRIMOUNTAIN MINING CO.

MICHIGAN

Office: 82 Devonshire St., Boston Mass. **Mine office:** Trimountain, Mich.

Fully described under Copper Range Co., Mich., which see.

UNION COPPER LAND & MINING CO.

MICHIGAN

Office: 70 State St., Boston, Mass.

Officers: Harry F. Fay, pres.; Harold H. Anthony, Ezra H. Baker, Samuel Carr and Albert B. Merrill, all of Boston, and John G. Stone, of Houghton, Mich., directors; C. J. Morrissey, sec.-treas.

Inc. 1863, in Michigan; charter extended in 1893. Cap. \$2,500,000; \$25 par; 80,000 issued; \$2.06 paid in. Old Colony Trust Co., Boston registrar; American Trust Co., Boston, transfer agent. Stock listed on Boston Stock Exchange. Annual meeting, fourth Thursday in March.

Cash on hand Jan. 1, 1921, \$47,884, principally derived from timber sales, 1914-'20.

Dividends: in 1899, 50c. per share and ¼ share of stock of Old Colony Copper Co. in 1907, \$2, and in 1908, 50c. per share; none since.

Property: 4,279 acres of land, carrying both surface and mineral rights, and 2,087 acres additional of mineral rights only, divided into 200 or more tracts in Keweenaw, Ontonagon and Gogebic counties, Mich. Company is primarily a land-holding corporation, although its charter empowers it to carry on mining operations as well, and it has from time to time investigated various tracts to determine their mineral value. Greater part of the land is heavily timbered, valued in 1910, at \$125,000.

In 1910-11 exploratory work was done by diamond drill on 320 acres of land, lying W. of the Allouez and North Kearsarge mines, with satisfactory results, especially on the Quincy-Pewabic amygdaloid, which showed well in copper. The Allouez conglomerate was cut; also several other beds carrying copper.

VERONA MINING CO., THE

MICHIGAN

Office: Western Reserve Bldg., Cleveland, O. Pickands, Mather & Co., sales agts.

Officials: C. H. Munger, gen. mgr.; W. P. Chinn, asst. gen. mgr.; W. A. Rose, chief mng. engr.; W. H. Gallagher, chief mech. engr.; C. E. Lawrence, gen. supt., Palatka, Mich.; W. G. Hanson, Palatka, Mich., supt. of Baltic, Bengal and Caspian mines.

Property: the Baltic, Bengal, Fogarty and Caspian iron mines on the Menominee range. The Baltic and Caspian ores contain 50% iron and 0.421% phosphorus; the Bengal, 35% iron, 0.324% phosphorus and 12%

manganese. The Mikado mine on the Gogebic range, is subleased to the Plymouth Mng. Co.

Production: for 1918, '19, and '20, totaled 2,708,386 tons from the Baltic; 1,339,955 tons from the Bengal; 4,203,386 tons from the Caspian and 655,422 from the Fogarty.

VICTORIA COPPER MINING CO.

MICHIGAN

Office: 60 Congress St., Boston, Mass. **Mine office:** Victoria, Ontonagon county, Mich.

Officers: Fred H. Williams, pres.; Chas D. Hanchette, v. p.; Jas. P. Graves, treas.; with Willard S. Martin and A. W. Chesterton, directors; Sydney S. Millett, sec. and transfer agent; Staff: George Hooper, supt.; Chas. D. Hooper, mill and power supt.; A. R. Penberthy, clerk and purch. agt.

Inc. Jan. 16, 1899, in Michigan. **Cap.** \$2,500,000; \$25 par; all issued; paid in, \$15. Last assessment No. 7 of \$1, payable May 25, 1921. Shares listed on the Boston Stock Exchange. First National Bank, Boston, registrar. Company's secretary is transfer agent. Annual meeting, fourth Monday in February.

Income Account—Years ended December 31:

Receipts

	Copper Sold	Other Inc.	Expenditures	Prev. bal.	Balance
1920.....	\$137,908	\$ 9,215	\$305,540	\$262,385	\$103,967
1919.....	39,153	223,445	299,456	299,242	262,385
1918.....	305,644	84,678	358,917	267,836	299,242
1917.....	343,508	119,129	392,412	197,611	267,836
1916.....	293,298	176,930	384,898	112,280	197,611

Current assets of \$217,475 at end of 1920 include, \$162,544 copper on hand. Operations in 1920 resulted in a loss of \$116,753. Total expenditures for 1920 were \$305,540 and receipts but \$147,123, reducing surplus from \$262,384 to \$103,967 at end of 1920.

Property: 2,389 acres mining lands, in Sec. 19, 20, 29, 30 and 31, T. 50 N., R. 39 W., and Secs. 24, 25 and 36, T. 50 N., R. 40 W. This tract has an extreme E.-W. width of 2 miles, and a N.-S. length of $2\frac{3}{4}$ miles, lying just W. of the Ontonagon river. It is practically all on the mineral belt, only about 100 acres lying on the eastern sandstone. The tract may carry the western extension of the amygdaloidal bed under development by the Lake Copper Co. Neighboring mines, all idle for many years, are the West Minnesota on the N., National on the E., and Tremont-Devon on the W. The lands are well timbered, with an inexhaustible supply of good sandstone for building purposes. Nearest railroad is the C. M. & St. P., at Rockland, 3 miles distant.

The first known attempt at Lake Superior copper mining was made in the winter of 1770-'71, on what is now the Victoria property. In 1849, the property, known then as the Cushin, was opened on a line of prehistoric pits containing masses of native copper, one weighing upwards of a ton. The name was changed, 1850, to Forrest, and property reorganized. 1858 as the Victoria Mining Co. Under these titles the property made 373,279 lb. fine copper at a loss of about \$180,000. The mine was operated regularly, on a small scale, 1849-'55, and thereafter spasmodically. It was unwatered 1883, but remained idle until work was begun March 1, 1899, by the present company.

Geology: the Forrest amygdaloid bed, on which the mine is opened, is 5 to 80' wide, averaging about 12', but of very irregular width and dip, and very lumpy in content. The average strike is N. 66° E., and dip 61° N. W., the lode having about 2 miles of outcrop on Victoria lands. The formation is much disturbed at surface, the bed being irregular in dip, but widening at

depth, with more regular walls. The lode is low grade, but fairly regular in copper contents, with best value near the hanging wall.

Considerable diamond drilling has been done N. of the Forrest bed, a total of 15,292' of holes having been drilled, in 2 cross-sections disclosing several beds that may warrant future attention.

Development: the old mine was opened by 5 shafts, deepest, 300', located at irregular intervals, with levels spaced at 55 to 65'.

The Victoria, or, No. 2 shaft, which was chosen for new operations, was enlarged to 2 compartments, and a third compartment was added, 1916, 16" E. of the skipway. The two skips work in balance. The shaft is 2,910' deep, bottomed at the 28th level. Levels between the 4th and 24th have been opened at regular intervals of 100'; below the 23rd at intervals of 150', with drifting on all levels. The total openings tributary to No. 2 shaft were 69,368' on Jan. 1, 1920.

The productive part of the mine tributary to Victoria or No. 2 shaft is on the Forrest bed, an epidotal amygdaloid having an average width of 4' to 12', widening to 80', at one point. Walls are quite regular, but where crush zones occur, the mineralization extends into the walls, giving an occasional maximum of 50' width of ore. The footwall bed underlying the Forrest, at a depth of 2 to 12', is well mineralized in places, carrying occasional masses from 100 lb. to 3 or 4 tons in weight, but is very bunched, copper occurring mainly on the foot, with considerable epidote on the hanging. Underlying this epidotal bed, at a distance of 60', is a 6' amygdaloid showing much epidote and allied minerals, with a little milling ore. Stopes opened on all levels from the 4th to the 22nd inclusive, give fairly uniform results.

The copper shoot developed by this shaft is 1,000 to 1,500' wide, with a slight rake to the S. W. The ore stoped is low in average grade, but fairly regular in contents, with main values in stamp copper. All levels down to the 17th are connected by winzes, giving ventilation and safety.

	New drifts	New work	Cu. Fathoms stoped
1920.....	1,080'	1,382'	3,694'
1919.....	1,708'	1,982'	5,963'
1918.....	2,447'	2,847'	5,833'
1917.....	3,113'	4,090'	8,526'
1916.....	1,350'	3,806'	10,755'

Openings on No. 11, 23, 24, 26 and 27 levels east in 1919 were in fair to very good ground. No. 27 yielded mass copper and ore up to 60' wide, one mass weighed 14 tons and another 15 tons.

Operations in 1920 were limited to production of such ore as could be mined at least cost and development work was all but stopped to offset expense of keeping mine open and men employed.

Openings on the property totaled 78,034' or about 14½ miles, Jan. 1, 1921. Development work was resumed, January, 1922.

No. 6 shaft, 3,455', E. of No. 2, started December, 1919 develops the eastern end of the property already explored by diamond-drill work; it has three compartments with two skipways, designed for 6-ton skips. The shaft is 1,172' deep and has 2,593' of workings in generally poor ground.

The mine also has crosscut tunnels, 419', 150' and 724' long, the longest showing the contact between the Keweenawan trap beds and the eastern sandstone and cutting several amygdaloidal beds on which drifting, in the past showed encouraging copper mineralization.

Equipment: No. 2 shaft has a new shaft house, equipped with a duplex 32x72" cylinder, with conical drum, hoist, good for 5,000', and a 5-ton traveling crane for handling skips, man-cage and timber.

Equipment is sufficient to take care of exploration to a depth of 5,000', the present depth being 2,835'.

The rock-house has storage-bins for stamp ore and waste, with chutes, loading gates and air lifts, and there is a pneumatic hammer for mass copper. The boiler house is for heating purposes only.

Buildings at No. 2 shaft include machine and carpenter shops, smithy, concrete changing house, hospital, warehouse, general store, mine office, boarding house, 76 dwellings, sawmill, lathe, shingle and planing mill. There is also an amusement hall for motion pictures.

Mill: the stamp-mill, on the bank of the river near the power plant, has a single 24x24" Allis-Cuyahoga stamp. The stamp of 650 tons daily capacity, has $\frac{5}{8}$ " mortar screens, and all oversize above $\frac{3}{16}$ " is run to a set of 16x36" Traylor rolls. The washing floor contains 22 jigs, 5 Wilfley tables, 6 card tables, 1 standard table, hydraulic separators and settling tanks. In 1917, 15 new concentrating slime tables were installed. Machinery is driven by a 12x12" piston-valve engine. A 12x36" engine was installed in 1918. The mill started June, 1906, shows tailing losses of only 0.1 to 0.15% copper with an extraction of 81%. Mineral (concentrate) was formerly smelted by the Calumet & Hecla Co., but is now smelted at the Quincy smelter at Ripley. Three boilers at the stamp mill insure power when the water supply is low. The mine and mill are connected by a 4,800' tram line, in two sections, the upper with 6%, and the lower with a 12% grade. A stationary double-sheave hoist, at the top of the incline, serves to pull the empty cars up the steeper grades, but otherwise trains are operated by gravity, in counter-balance.

Hydraulic Plant: a large water power has been developed from Glenn Falls, on the W. branch of the Ontonagon river, about a mile from the mine, at a cost of \$251,603. This is the best natural water power of the Lake Superior copper district, the stream dropping about 110' on the company's property, by a series of small falls, between which are numerous rapids, with sandstone bottoms. The company utilizes 72' of this drop. Power is developed by means of a dam, canal and hydraulic air-compressor.

The dam is 225' between abutments, has an extreme height of 24', is 14' wide at the bottom and 8' at the top, and has a 320' main section with wings of 100' and 160', giving a total of 580', built with an arch upstream. It is provided with two 44' flush gates, for drainage and flushing out silt, a log chute, waste weir and sand fence.

The canal diverting water from the dam is 4,800' long, 10' deep at the head gates, with a bottom slope of 1" in 100'. At the end of the canal opens out in a forebay, at the extreme end of which the compressor shafts are located. The canal is equipped with drainage gates, slush gates, overflow weirs and submerged measurement gates.

The 3 intake shafts of the compressor are 5' in diameter, spaced 19' from center to center. The shafts were sunk through solid sandstone, by means of 5" preliminary holes, bored to the required depth of 343', then enlarged from 5" to 5' in diameter.

The shafts, lined throughout with concrete, formerly drew air through 5,000 special $\frac{3}{8}$ " tubes. This proved unnecessary as the water falling down each shaft sucks air with it and this air is carried through 280' of air chamber cut in the rock at the bottom of the shaft. A water seal at the intake end is formed by $\frac{3}{8}$ " steel shells firmly concreted into the bottom of the shaft, which is 16x18' in section, sunk at 72°, with a vertical depth of 271', 21' and maximum of 26' height, having a maximum capacity for 80,264 cu. ft. of compressed air. The water seal at the upflow end is formed by an arch of rock, 40' long, below which a tunnel 10' high leads to the upflow shaft, which is 16x18' in section, sunk at 72°, with a vertical depth of 271', leading to surface, where the water is again discharged into the river. The power head developed is 72', and the pressure head 271', giving a maximum air compression of 117 lbs. per sq. inch. Imprisoned air, carried down the shafts by suction and swept along the tunnel in bubbles, by the rush-

ing water, is released in the chamber where the constant accession of bubbles causes compression, escape backwards being prevented by the $\frac{3}{8}$ " steel shells connected in the shafts. The chamber, known as the compressor, is connected with a 12" pipe line to mine and mill. Extra pressure is relieved by a safety or blow-off pipe.

The Taylor hydraulic-pneumatic plant was completed in March, 1906, furnishes 4,000 to 5,000 h. p. under a full head of water, and has shown an efficiency of 82% under test. It is the largest single-unit air compressor in existence and the fifth installation of the sort in the world. It is possible to operate 1, 2 or 3 of the inlet shafts if so desired, with corresponding variation of energy developed, but only one unit is in regular use. The compression is automatic, practically isothermal, and the air as delivered is unusually dry.

An extensive topographical and hydraulic survey of the company's lands and the watershed shows that an average of 15,000 h. p. can be developed on the western branch of the Ontonagon river, but the expense of development necessarily will be large. During the drought of 1910, the water supply fell far below normal and additional storage for water was secured on the western branch of the Ontonagon, near the outlet of Lake Gogebic.

Production:

(a) Mining and Milling. (b) High cost due to the labor strike and high footage, 7,428' of development.

Copper carried over from 1919, 977,440 lb., sold at 18.163¢ per pound, leaving unsold metal, 1,180,955 lb. on Dec. 31, 1920.

Tonnage costs are low, but finished copper costs are high, owing to the exceedingly low average tenor of the rock stamped which contains only about 0.65% copper. Costs would be ruinous, and the mine hopeless, were it not for the great advantage that the property enjoys through the cheapest power that is had by any copper mine in this or any other district. The company's holdings are extensive, exploratory work is being conducted with vigor, and the management has displayed both courage and good judgment in its operations.

WAKEFIELD IRON CO., THE

MICHIGAN

Address: J. D. Ireland, 1300 Leader-News Bldg., Cleveland, O. Operating office: Crystal Falls, Mich.

Officers: H. M. Hanna, Jr., pres.; M. Andrews, v. p.; J. D. Ireland, v. p.; C. N. Hickok, treas., with F. B. Richards, L. C. Hanna, Jr. and Benton Hanchett, directors. Geo. M. Humphrey, sec.; E. E. Hunner, gen. mgr.; G. E. Frierickson, pur. agt.

Inc 1912 in Mich. Cap. \$2,000,000; \$25 par; all outstanding. Funded debt—\$1,200,000 6% serial gold notes dated Dec. 1, 1919.

Dividends: 10% in 1914; 10% in 1915; 25% in 1917; 12½% in 1918; 7% in 1919; 35% in 1920; none since.

Property: the Wakefield mine, at Wakefield, Mich., on Gogebic range, Gogebic county, Mich., first opened in 1913. Ore: two grades of ore, the "Andrews," a soft, red non-Bessemer hematite, carrying iron natural 53%; phosphorus, .077%, and silica, 4.11%; 2nd, the "Duane," a dark brown to blue-black hematite carrying iron natural, 52%; phosphorous, 0.074%; silica, 4.06%, and manganese, 2.25%.

Mining is by open pit and by underground work to depth of 400'.

Production: 1913, 15,260 tons; 1914, 313,050 tons; 1915, 651,300 tons; 1916, 1,061,730 tons; 1917, 1,144,411 tons; 1918, 1,130,432; 1919, 603,966 tons; 1920, 980,000 tons; total to date, 5,800,152 tons.

WASHINGTON COPPER MINING CO. MICHIGAN

Office: Calumet, Mich. Mine near Delaware, Keweenaw county, Mich.

Officers: S. R. Hill, pres.; Thos Hoatson, v. p.; Chas A. Wright, Jr., sec-treas., with Thos F. Cole, and G. G. Hartley, directors.

Inc: 1884 in Michigan. **Cap.** \$2,500,000; shares \$25 par; issued \$1,500,000.

Is controlled, through ownership of a majority of issued stock, by the Keweenaw Copper Co. Annual meeting, fourth Tuesday in March.

Property: 1,050 acres, on the western shore of Mosquito lake, on which desultory work has been done at intervals in the past. Idle since 1901.

WASHINGTON IRON CO. MICHIGAN

Address: W. B. Pattison, supt., Negaunee, Mich. C. B. Dunster, mgr.; E. N. Breitung & Co., sales agts

Property: the Washington mine on the Marquette range, Marquette county, opened in 1860. The ores, carrying 50% iron, are hard, non-Bessemer, specular and magnetite, extracted by stoping to 730'. **Production:** has been irregular.

WEST CHAPIN MINES CO. MICHIGAN

Operates an iron mine at Iron Mountain, Dickinson county, Mich.

WEST MINNESOTA MINING CO. MICHIGAN

Defunct. John Coughlin, receiver, 68 Devonshire St., Boston, Mass.

Inc. about 1864, in Michigan. **Cap.** \$500,000; shares \$25 par. Was an old and long inactive company owning 550 acres lying mainly W. of the Ontonagon river. Property sold May, 1916, to F. W. Nichols of Houghton, (¼ interest) and T. W. Cole, (¾ interest.) Sale ordered because company's charter had expired.

WETTERHORN LAND CO. MICHIGAN

Idle since 1913, and probably out of business. Owned 760 acres, in Secs. 21 and 22, T. 51 N. R. 42 W., Ontonagon county, Mich.

WHEALKATE MINING CO. MICHIGAN

Address: R. C. Pryor, mgr., Houghton, Mich.

Officers: N. F. Leopold, pres.; R. R. Goodell, v. p.; R. C. Pryor, sec.; A. F. Leopold, treas., with J. H. Rice, directors.

Inc. 1902 in Michigan. **Cap.** \$50,000; \$25 par; all issued and paid.

Property: 240 acres in and adjoining village of South Range, Mich. Company only conducts a real estate business. Part of its mineral rights sold to the South Range Copper Co.

WHITE PINE COPPER CO. MICHIGAN

Office: 12 Ashburton Place, Boston, Mass. **General office:** Calumet, Mich. **Mine address:** Ontonagon, Ontonagon county, Mich.

Officers: R. L. Agassiz, pres.; Jas McNaughton, v. p.-gen. mgr., with D. S. Dean, Fred'k Ayer, Jr., J. M. Longyear, F. L. Higginson and Q. A. Shaw McKean, directors; G. G. Endicott, sec.-treas.; H. L. Bennett, asst. sec.-asst.-treas.; Thos. H. Wilcox, supt.

Inc. 1909. **Cap.** \$5,000,000; \$25 par; in 150,000 common shares and 50,000 5% cumulative preferred shares; issued 85,320 common and 10,000 preferred. Is controlled by the Calumet & Hecla Mng. Co., through owner-

ship of 10,000 shares of preferred stock and 42,602 shares of common stock. Annual meeting, first Tuesday in April.

Company bought and retired 24,759 shares preferred stock in 1917-18.

Operations for years ended December 31:

	Total Receipts	Oper. Exp.	Taxes Divs., etc.	Surplus for year	Pfd. Stock Decrease	Balance Curr. Assts
1920.	\$280,643	\$319,268	\$207,863	\$246,488*	\$240,000
1919.	458,225	535,677	193,815*	360,834
1918.	850,156	724,649	30,028	95,479	332,814	402,040
1917.	897,935	455,850	73,925	368,160	472,336	509,733

* Loss.

A dividend on preferred shares, equal to \$116,676, was paid Jan. 2, 1917.

Property: the White Pine mine and surrounding land, formerly owned by the Keweenaw Association and others. The White Pine mine, 80 acres, is in Sec. 5, T. 50 N., R. 42 W., 3 miles E. of the Nonesuch mine at the extreme south end of the Keweenawan mineral belt. The other property was paid for by stock. A 9 mile railroad line connecting the property with the Chicago, Milwaukee & St. Paul R. R., was completed in Dec., 1915.

Geology: the tract shows eruptive rocks with interbedded sandstone and conglomerates of the secondary Keweenawan series. It also holds what F. E. Wright called epidote veins which are epidotal melaphyrs crossing the face of the cliffs parallel to the sandstones, but showing evidence of faulting and crushing. There is a second set of minor, nearly vertical epidote veins which, unlike the first, are barren of copper. The sandstone beneath the melaphyr is a fine-grained, dark red, almost quartzite rock that is jointed and has numerous calcite veins and occasional threads of malchite which extend down a few feet from the contact. The sandstone is, however, usually concealed by talus from the cliffs. Native copper also occurs in a very fine-grained sandstone-conglomerate, which is said to run from 5 to 10%. The dip of the bedded formation is towards the S. W., varying from 8 to 35°. The so-called Nonesuch formation consists of 2 parallel beds of sandstone running from 4 to 8' in thickness and separated by a 5' bed of slate, the entire copper-bearing ground having a width of about 40'. The beds carry considerable finely disseminated native copper which is as a rule very flaky. This formation is badly faulted and ground is said to have been thrown so that the payable lode abutted directly against the unpayable one. Besides the 2 veins described, there is a third which lies about 45' back in the footwall.

Development: by 4 shafts. The No. 2 temporary shaft was 1,584' deep and had about 4,756' of openings, Jan. 1, 1920. It connects with the old White Pine shaft. This shaft is vertical for 581', has 392' of curve and 605' of 45° underlay. A new hoist was installed in 1918. The mam working shaft (called No. 3), located between the two temporary shafts (No. 1 and 2), is incline 1,090' deep, with about 9,666' of workings. It is equipped with 5-ton skips.

The No. 4, an inclined shaft, west of No. 1 shaft, sunk in the hanging at a considerable distance above the lode, is 977' deep and has about 14,560' of workings. It is equipped with 5-ton skips. New workings totaled 3,578' in 1918; 3,478' in 1917; 5,288' in 1916. The rock is soft and can be mined and crushed cheaply.

New work amounted to 1,244' in 1920; 549' in 1919; 3,578' in 1918; 3,478' in 1917; 5,288' in 1916. At No. 3 shaft, stoping on the 2nd, 3rd 4th and 5th levels on the Third lode yielded rich rock; the stopes from No. 4 shaft on the three upper levels are also in good ore.

Equipment: includes a power plant and compressor at the mine. A 750-k. w. electric turbine on Iron river, 1½ miles from the mine and mill, supplies water for the mill.

Mill: company has a 1,000-ton mill equipped with gyratory crushers, rolls and Hardinge mills instead of the steam stamps common in the Lake Superior copper country. Concentration is effected on Wilfley tables and the tailings saved, as future regrading and leaching will undoubtedly be used in reclaiming the copper content

A 600-ton flotation plant was erected in 1917, near the working shafts and connects with them by means of trestles over which rock is transferred from the shaft rockhouses to the crushing plant at the mill. Two pebble mills were converted to ball mills for finer grinding and 2 Dorr thickeners, 3-tray type, each 40' in diameter added.

Production:

	Tons Ore Treated	Lb. Cu. per Ton	Mine Cost per Ton	Lb. Cu. Prod.	Cost per Lb.	Rec'd per Lb.
1920	93,260	19.85	\$3.797	1,850,787	23.12c	18.69c
1919..	84,008*	23.56	3.841	1,979,268	23.61c	18.74c
1918..	194,568	16.83	2.984	3,273,680	22.48c	24.30c
1917..	212,889	19.11	2.365	4,067,529	14.99c	28.30c
1916..	188,890	22.27	2.082	4,207,449	12.70c	25.26c
1915..	114,039	24.76	2.182	2,824,145	16.54c	18.353c

1915 production is for 8 months only.

Mine costs include mining, transportation, stamping and taxes per ton of rock treated; 1918 cost per lb. includes 2.64c. per lb. for depreciation.

Property is decidedly promising and its life has been lengthened by the flotation plant, which will reduce tailing losses and make available both lower grade ore and rock in which the copper is in an extremely fine state of subdivision.

WHITE PINE EXTENSION COPPER CO.

MICHIGAN

Office: F. L. Smith, 1905 Dime Bank Bldg., Detroit, Mich.

Officers: F. L. Smith, pres.; Angus Smith, v. p.; A. W. Brechting, sec.-treas., with J. R. Stanton and H. H. Campbell, directors.

Inc. June, 1915, in Michigan. Cap. \$3,750,000; \$25 par; assessable; issued 85,640 shares, 85,000 of which have been paid in at \$10. American Trust Co., Boston, transfer agent; Boston Safe Deposit and Trust Co., registrar. Listed on Boston Stock Exchange. Annual meeting, first Tuesday in March.

Due to labor conditions and high costs, all mining operations were suspended on May 28, 1918, and mine was closed down August 7, 1918.

Balance sheet dated March 15, 1921, showed: Assets—good will, franchises, etc., \$600,000; bills and acct's rec., \$16,000; inventories, \$42,339; cash, \$20; P. & L., \$322,876. Liabilities—include capital stock, \$856,540; bills and acct's pay., \$124,655; adjusted credits, \$40.

Property: 1,440 acres mineral land in the White Pine district, Ontonagon county, 5 miles west of the White Pine property of the C. & H. Mng. Co. The company owns the leases and exclusive mining rights for 50 years, paying a sliding scale royalty. These leases were purchased from F. L. Smith of Detroit, and associates who received 60,000 shares of stock in payment for their lands and the development work done prior to June 1, 1915.

The property is similar to that of the White Pine Copper Co. in that it shows sandstone and soft shales and slates. Considerable copper glance was found during diamond drill exploration work, the copper in the core of one hole showing glance only, no native copper being present.

All work was discontinued in 1918 and surface equipment sold to Michigan Iron Land & Lumber Co. in 1921. For results of exploratory work done, see Volume XIV.

WICKWIRE MINING CO.

MICHIGAN

Address E. C. Bowers, Buffalo, N. Y. H. Duff, supt., Iron River, Mich. J. M. Riddell, engr.

Property: the Virgil and Wickwire iron mines on the Menominee range, Iron county, Mich. **Ore:** yellow-brown and red-brown non-Bessemer hematite, the former containing 51.04% iron 0.396% phosphorous and 6.32% silica. Ore mined by sub-stoping, to 273' in the Virgil and slicing and caving to 313' in the Wickwire.

Production: the Virgil yielded 40,321 tons in 1918 and 174,803 tons to the end of that season. The Wickwire has been idle since 1917. Total amount produced, 129,111 tons. The Cardiff mine was being developed in 1920. It has a 560' shaft, concreted to the bottom and also has electric and steam power, 2 Nordberg hoists, a 1,300 cu. ft. I. R. compressor, shops, change-house, etc.

WILMOT MINING CO.**MICHIGAN**

Described in Vol. XIII. Probably out of business.

WINONA COPPER CO.**MICHIGAN**

Office: 60 Congress St., Boston, Mass. **Operating office:** Winona, Houghton county, Mich.

Officers: T. S. Woods, pres.; Alfred B. White, v. p.; A. C. Paine, sec.-treas., with John C. Coughlin, Fred W. Fisher, G. A. Braun and Geo. D. Baker, directors.

Inc. 1898, in Michigan. **Cap.** \$2,500,000; shares \$25 par; increased 1911 to \$5,000,000; issued 166,667 shares, fully paid. Last assessment of \$1 was paid July 2, 1914. The company, in 1911, acquired the property of the King Philip Copper Co., issuing 66,667 shares of Winona stock therefor. Boston Safe Deposit & Trust Co., registrar; American Trust Co., Boston, transfer agent. Listed on the Boston and Detroit Stock Exchanges. Annual meeting, last Tuesday in March.

Income Account—Years ended December 31:

	Copper Sales	Other Income	Expen- ditures	Prev. Surplus	Cu. Sold payt. not due	Balance of Assets
1919	\$83,092	\$5,893	\$202,375	\$1,301,362	\$71,930	\$1,414,752
1918	166,228	14,043	284,020	1,197,613(a)	1,301,362
1917	355,624	16,000	480,162	330,045	79,602	301,110
1916	473,583	15,500	545,202	223,324	162,840	330,045

(a) Deficit. The books being readjusted to meet Governmental requirements.

Current assets at end of 1919, totaled \$159,409, and liabilities including \$50,000 notes, \$79,548.

Company suspended operations May 15, 1920, and the mine was dismantled, which means the end of mining operations. The company sold all its timber to the Pampa Land Co., a newly formed concern, in 1921, but will sell power to the new company and rent its buildings, railway, etc.—retaining its land and mining rights. The property, etc., is very fully described in Vol. XIV, which see.

WOLVERINE COPPER MINING CO.**MICHIGAN**

Office: 15 William St., New York. **Mine office:** Kearsarge, Houghton county, Mich.

Officers: L. P. Yandell, pres.; R. E. Graver, treas.; F. G. Heumann, sec. **Directors:** L. P. Yandell, C. D. Lanier, W. A. Paine, J. S. Dunstan, and Theo. Dengler, gen mgr.; W. R. Bolley, supt.

Inc. 1890, in Michigan. **Cap.** \$1,500,000; \$25 par; \$13 per share paid in. The company owns \$80,000 stock in the Michigan Smelting Co. Old Colony Trust Co., Boston, registrar; American Trust Co., Boston, transfer agent. Annual meeting, first Monday in August. Listed on Boston Stock Exchange. In August, 1919, stockholders voted for continuation of corporate existence for a further term of 30 years beyond date of present article of association which is July 28, 1920.

Financial Statement for fiscal year ending June 30:

	Receipts	Tot. Exp.	Profit	Div.	Surp. for Year	Total Surplus
1921....	\$594,864	\$732,562	\$137,698*	\$446,876
1920....	673,000	759,025	86,025	\$90,000	\$176,025*
1919....	997,376	875,278	122,098	150,000	27,902*	847,812
1918....	1,074,491	737,711	336,780	570,000	233,220*	875,714
1917....	1,707,441	681,036	1,026,405	780,000	246,404	1,108,933
1916....	1,369,286	634,068	735,218	660,000	75,218	1,862,529
1915....	929,193	610,991	318,201	360,000	41,798*	787,311
1914....	484,061	402,936	81,075	81,075	829,109
1912....	1,327,030	713,840	613,180	540,000	73,180	746,520

* Deficit.

Profit and loss surplus was \$1,759,337 at end of 1917-18; \$1,565,607 in 1918-19; \$1,389,582 in 1919-20.

Dividends: the first dividend was paid Oct. 1, 1898, and 45 dividend disbursements, to Jan. 1, 1920, aggregated \$10,350,000.

Property: 320 acres, 280 acres freehold, and 40 acres mineral rights, carries 3,100' of the strike of the Kearsarge amygdaloidal bed, on which the mine is opened. Neighboring properties are the North Kearsarge (Osceola Cons. Mng. Co.), on the N., Mayflower on the E., Mayflower and South Kearsarge (Osceola) on the S., and Centennial on the W.

The Kearsarge bed averages about 16' in width on the Wolverine property, and this mine was for many years the richest amygdaloidal mine in the Lake Superior district, second in richness only to the Calumet & Hecla among all Lake Superior copper mines. All shafts are sunk at an angle of 41°, and skip tracks are laid on crossties, in place of longitudinal stringers, following the plan introduced in the Calumet & Hecla. All levels, except the uppermost ones, are opened at 100' intervals. Owing to the uniformity of the cupriferous bed, all levels from the 1st to the 23rd, inclusive are opened through the entire property, connecting all 4 shafts to the bottoms of No. 1 and 2, and connecting Nos. 3 and 4 only below the 17th level.

A new lease of life was given the mine by working the footwall rock of supposedly worked out stopes, throughout the mine. The total width of the lode is 15' to 20'; in the original work only 12' was mined, so there remains 3' to 5' of rock which contains about 18 lb. copper per ton.

For the year ended June, 1919, 35% of the total rock hoisted was secured by continuation of this re-working practice compared with 40% from similar work in year ended June, 1918.

Company was reported negotiating for the purchase of 640 acres from the Centennial or the Kearsarge properties. This would allow shafts to be carried to a depth of about 10,000'.

Development: to 43rd level, by four working shafts, with levels on the Kearsarge lode. In early days several parallel lodes were prospected, an exploratory crosscut being driven for 2,000' across the formation on the 14th level, reaching the Kearsarge conglomerate on the W., where it was barren. Another exploratory crosscut, 1,600' long, driven E. on the 28th level, intersects the Old Colony lode 1.489' E. of the Kearsarge amygdaloid and cuts other cupriferous beds. A little drifting on the Old Colony lode failed to disclose payable ground. The West lode lying 80' W. of the Kearsarge has been opened by several levels with some payable ore. The Wolverine lands also carry the Osceola amygdaloid, but it proved non-commercial in a 631' shaft with drifts on 5 levels.

No. 1 shaft near the Kearsarge line, was abandoned years ago. No. 2 shaft, next S., is bottomed at 1,700' and is used for handling men and supplies.

No. 3 shaft sunk in the footwall, is bottomed at the 39th level, total depth 4,005'. Sinking was stopped at the 39th level as the hoist had reached the

limit of its rope capacity. It is proposed to open and mine the remaining 100 below the 39th level by means of a winze 600' S. of the shaft. This inclined winze will eventually attain a depth of 700' in order to reach the boundary of the property.

Shafts No. 3 and 4 are connected by drifts down to and including the 33rd level.

No. 4 shaft sunk 45' in the foot, to guard against drawing, has reached the 43rd level, total depth 4,460', the bottom of the mine. This shaft was reopened in 1920 and pillars were being removed from No. 38 level upward. It yields 17 lb. per ton.

Development in 1918-1919 amounted to 1,259' which compares with 1,972' the previous year. All ground north of No. 3 shaft, from the 25th to the 40th levels, with the exception of about 90' of shaft pillars, was stoped out in 1919. Other openings showed a satisfactory grade. In 1918, levels No. 40, 41, 42 and 43 had practically reached the southern boundary, and drifting showed the levels to be well mineralized.

During 1920, old stopes above No. 40 level yielded fairly good ore.

Early in 1919, the South Kearsarge mine of the Osceola Cons. Mng. Co., discontinued pumping the lower levels. The Wolverine management was forced to connect from their 29th level to the South Kearsarge 23rd level, and cement in pipes with control valves and pressure gauges. The pumping facilities were doubled and a 1,400-gal. boiler installed in shaft No. 3. Company lifted 110,000 gal. of South Kearsarge water per day, in addition to its own. In 1920, Wolverine connected with the North Kearsarge, so that it is not now necessary to handle the water from the South Kearsarge.

Equipment: at No. 3 shaft duplicates that of the Mohawk mines. That at No. 4 includes a 14"x60" duplex-cylinder hoist with double conical drum having a maximum diameter of 18', capable of raising 4-ton skips from 1 mile depth, with a 1¼" steel cable. There are 20-drill and 22-drill compressors, and 3 water-tube boilers, with automatic stokers and fuel economizer.

Mine has electric pumps, 3 at No. 2 shaft, and two at shafts No. 3 and one at shaft No. 4, three pumps having an average lift of more than 1,000' each.

The principal mine buildings are at No 4 shaft, but there is a model changing house at No. 3 shaft. A telephone system connects underground pump stations and all buildings. The company maintains a 6-ward hospital and staff, and owns a large number of substantial dwellings, the location being exceptionally prosperous in appearance.

Rock is transported between the mine and mill by the Mohawk & Traverse Bay railroad, with a down-grade haul of 13 miles.

Mill is near the mouth of Tobacco river, on Traverse bay, Lake Superior, and adjoins the Hohawk mill, both being served by a single pump and managed by a joint superintendent. The mill has 2 Nordberg heads and uses Wilfley tables. Mineral from the heads and wash is sluiced to the basement through iron pipes, going to the works of the Michigan Smelting Co. at Houghton. A tailings plant provides for settling out the water and stacking the tailings 800' from the mill by belt conveyor.

The boiler-house contains a battery of 200 h. p. water-tube boilers, equipped with automatic stokers.

The pump-house, owned jointly by the Wolverine and Mohawk, has a 20,000,000,000-gal horizontal triple-expansion pump, with 18", 33" and 54" steam cylinders and 22" water plungers, with 36" stroke, besides an auxiliary 8,000,000-gal. triple-expansion water-end pump, with 3 plungers. The pump house is located on the river, near its mouth, the intake being protected by timber cribs running 300' into the lake to prevent clogging from floating bark and anchor ice.

Work was started, 1919, on an intake shaft and tunnel under the lake. Pump station was cut at 90' below lake level; shaft was 110' below lake level

and tunnel was driven 1,423' to July, 1919. Estimated length to be 2,200' where 30' of water will be attained.

A concrete building, 42x42x18' was constructed in 1918, to house a 1,250-k. w. capacity, 60-cycle, 3-phase, 2,200-volt mixed pressure turbine. This turbine will furnish power to drive all the mill machinery plus three 7,000-gal. electrically-driven centrifugal pumps to be installed at pump house, thereby eliminating present boiler pumping plant. This expense is being shared by the Mohawk Mining Co.

In normal times the average number of men employed at mine and mill was 370, but during 1919 the force averaged 30% below normal, and in 1918 20% below normal.

Recent Production: (fiscal year ending June 30).

(a) Cost per pound includes construction, but does not include costs of depreciation, depletion and taxes, which amounted to 6.103c. in 1921; 4.711c. in 1920, 4.395c. in 1919, 4.324c. in 1918.

Company has produced to June 30, 1921, a total of 173,517,285lb of copper.

Rumors that Wolverine was trying to get options on certain blocks of land in the district, seem to indicate that the management is contemplating expansion. The relatively large resources, small share capitalization, and efficient organization certainly admit such a policy.

WYANDOT COPPER CO.

MICHIGAN

Office: 68 Devonshire St., Boston, Mass. Operating office: Houghton, Mich. Mine office: Wyandot Mine, Houghton county, Mich.

Directors: Fred Hoitt, pres.; Ashley Watson, v. p.; Chas. E. Adams, sec.-treas., Joseph Dorr, and Frank L. Van Orden, mgrs; Louis La Rochelle, mng. capt.

Inc. Feb. 3, 1899, in Michigan. Cap. \$2,500,000; shares \$25 par; paid in, \$13. Last assessment \$1, levied August, 1917, payable 50c., Sept., 1917, and 50c., March, 1918. Has levied assessment of \$500,000 since organization. Shares are listed on the Boston Stock Exchange. State Street Trust Co., Boston, registrar; Federal Trust Co., Boston, transfer agent. Annual meeting, second Monday in May.

Balance sheet of March 31, 1920, showed \$20,088 of current assets and \$315 of current liabilities.; on March 31, 1921, current assets were \$15,200 and current liabilities, \$90.

Property: 1,065 acres, adjoining the Winona, in Secs. 16, 20 and 21, T. 52 N., R. 36 W. Exploratory work, begun Feb., 1899, was done in search of the Winona bed; later to locate the southern extension of the Baltic amygdaloid, after which attention was turned again to the Winona bed, and latterly to development of an amygdaloidal bed, the No. 8 lode, lying about 2,300' E. of the Winona lode. The average strike of the Keweenaw formation on this land is N. 53° E., with an average dip of 65°, and the Wyandot lands carry the strike of the Keenawan bedded series for about 1½ miles.

Development: by several shafts, No. 1, 1,000' deep, sunk in the foot wall of the Winona bed. No. 11 exploratory shaft is sunk 710' on a stratum

paralleling the Winona bed, at a distance of 1,200'. This bed looked good when first opened, and diamond-drill cores were rich, but proved poor under development. A crosscut driven S. E. from the bottom of No. 11 shaft for 2,640', intersects 13 distinct amygdaloidal beds, Nos. 3 and 2 showing copper. Drifting done on No. 3 bed disclosed considerable mass and barrel copper, but No. 8 is the more promising.

Miscellaneous work of the past includes a 102' vertical shaft, sunk on a lean amygdaloidal bed, known as the Misery river bed, in Sec. 16, T. 52 N., R. 36 W., but nothing of value was developed. Some years ago a vertical shaft was sunk on lands held under option, near the W. quarter post of Sec. 28, T. 52 N., R. 36 W., to depth of 250', and crosscuts driven both E. and W. with about one-half mile of workings. This work crossed the horizon of the Baltic bed, but what was deemed the Baltic amygdaloid was found highly altered, and worthless, as was the whole country in the neighborhood.

Extensive exploration has been done, the ground carefully prospected by diamond drill, in Sec. 16 and 21, but trenching and pits showed only low grade material.

Recent prospecting has been centered in the No. 8 lode, 1,100' S. E. of the No. 11 shaft. This lode is opened by the long crosscut on the 700' level, and below this depth by a 115' winze, with about 800' of drifts on the 815' level, 400' of drifts on the 900' level and about 600' of drifts on the 1,000' level, the bottom of the winze, up to March, 1918. The showing on these levels has been varied but sufficient work has not been done to demonstrate fully the value of the lode.

Equipment: includes a steam plant with hoist, good for 1,000' and compressors of 12 drills aggregate capacity.

Two mill tests have been made, the first, in March, 1917, being on 1,605 tons, yielding 12.54 lb. copper per ton, with 5.26 lb. in the tailing; the second later in 1917, being on 654 tons, averaging 21.62 lb. copper recovered per ton.

The Wyandot company worked persistently and with skill for more than a decade to make a profitable mine, and, though not yet successful, has not exhausted the possibilities of its holdings.

Due to labor shortage and excessive costs, plus the fact that many stockholders neglected to pay the last assessment, operations were suspended in April, 1918.

MINNESOTA

The four iron ranges of this State supply 60% of the iron ore production of America, the total for 1920 being 39,453,173 tons and for 1919, 34,593,000 tons. The Mesabi is the most important area; its ores are mostly soft and hydrated hematite and limonite, and are found in shallow deposits in greenstone, but few mines being over 300 feet deep. Some of the mines are very large, yielding annually over 1,000,000 tons each.

In the Cuyuna range the iron-bearing formation rests on slate, under which is quartzite. Mining is done to a depth of below 1,400 feet. The ores are hard blue and red hematites in part manganiferous. The two latter ranges produce over 1,500,000 tons each yearly.

ADRIATIC MINING CO.

MINNESOTA

Address: Pickands, Mather & Co., Sales Agts., Cleveland, O. R. M. Sellwood, mgr.; Wm. Mudge, supt.

Property: the Adriatic mine, on Mesabi range, St. Louis county, Minn.; opened in 1906. **Ore:** soft, red, non-Bessemer hematite, containing 49.31% iron, 0.067% phosphorus and 10.48% silica. Ore is mined by underground slicing to depth of 180'.

Production: 220,818 tons in 1916, 90,283 in 1917 and 37,189 tons in 1918, a total of 1,167,730 tons. Idle since 1919

ALGOMA MANGANESE CO.**MINNESOTA**Absorbed by **Onahman Iron Co.**, which see. Described in Vol. XIV.**AMERICAN MANGANESE MFG. Mining is done to a vertical depth of 133'.**Production:** was 507,660 tons in 1914; nothing in 1915 and 16; 99,983 tons in 1917; 188,255 tons in 1918; 105,489 tons in 1919.

ASH IRON CO.**MINNESOTA**

Address: W. B. Congdon, 807 Lonsdale Bldg., Duluth, Minn.

Inc. in 1917, by W. B. Congdon, J. Wanless, C. A. Humbert, D. T. Adams and K. Todd. **Cap.** \$500,000.

Property: a group of claims, held under lease, in Sec. 19, T. 46, R. 29, near Riverton, which is said to contain manganiferous ore. **Idlc.**

BALKAN MINING CO.**MINNESOTA**

Address: C. H. Munger, gen. mgr., Western Reserve Bldg., Cleveland, Ohio. D. B. Cavan, supt., Belgrade mine, Gilbert, Minn. E. W. Leach, supt., Danube mine, Bovey, Minn.; W. J. Pekins, supt., Balkan and Judson mines, Crystal Falls, Mich

Property: the Belgrade mine, Mesabi range and the Balkan mine, Menominee range. In 1917, company acquired the Washoe property, 1 mile N. of Bovey, Minn., and N. E. of the Walker and Canisteo mines, Mesabi range, from the No. Pacific Ry. Co. Property was renamed the Danube. The Judson mine was acquired from the Judson Land Co. in 1920.

Production: from 1915-19 was 1,686,118 tons from the Belgrade; 1,056,707 tons from the Balkan and 244,383 tons in 1919 from the Danube mines.

BANGOR MINING CO.**MINNESOTA**

Controlled by Pickands, Mather & Co., Sales Agts., Cleveland, Ohio.

Address: C. H. Munger, gen. mgr., Western Reserve Bldg., Cleveland, Ohio.

Property: Bangor mine on Mesabi range, opened in 1910.

Ore: soft, red, non-Bessemer hematite, assaying 49.39% iron, 0.059% phosphorus, and 9.10% silica. Mined by underground slicing to 307' vertical depth.

Production: to date, 1,274,668 tons. Mine was idle in 1919-20.

BENNETT MINING CO.**MINNESOTA**

Is operated by Pickands, Mather & Co., Sales Agts., Western Reserve Bldg., Cleveland, Ohio. F. P. Botsford, gen. supt., and A. E. Schneider, local supt., Keewatin, Minn.

Officers: H. G. Dalton, pres.; C. S. Robinson, v. p.; C. H. Munger, sec.; with S. E. Bool, D. P. Bennett, C. A. Buck and J. C. Agnew, directors. E. P. Williams, treas.

Inc. 1917, in Minn. **Cap.** \$900,000; \$100 par.

Property: the Bennett mine, formerly owned by the Keewatin Mining Co., in Sec. 24 T. 57, R. 22, Itasca county, Minnesota, developed to 150' depth. The mine was opened in 1912. Product is a Bessemer and non-Bessemer hematite carrying about 2% manganese. Company employed 187 men in 1920.

Production (tons): 88,931 in 1913; 25,868 in 1914; 50,475 in 1915; 672,57-17, opened in 1913. Ores carry 48.88% and 57.50% iron, and 0.051% to tons in 1920.

BOWE-BURKE MINING CO.**MINNESOTA**

W. W. Bowe, mgr., Pickands, Mather & Co., sales agents, Cleveland, O.

Property: the Morrow mine, on Mesabi range in St. Louis county, 4-57-17, opened in 1913. Ores carry 48.88% and 57.50% iron, and 0.051% to 0.060% phosphorus. They are mined by top-slicing to depth of 250'.

Production: total to end of 1919, 297,364 tons.

BUTLER BROS.**MINNESOTA**

Address: 639 Hamm Bldg., St. Paul Minn. Walter Butler, pres.; Emmett Butler, supt.

Producers of Bessemer and non-Bessemer iron ore from following mines on Mesabi range; G. N. North Uno, Harrison, Kevin, Margaret, North Harrison, Patrick, Quinn and Lamberton.

Analysis: Bessemer: 53.57% iron; 0.015-0.045% phosphorus; silica under 10%; non-Bessemer: 51.50% iron and silica under 10%.

Production: for 1918 and 1919 from all mines, 4,408,682 tons.

CHANDLER MINING CO.**MINNESOTA**

H. S. King, supt., Ely, Minn. Pickands, Mather & Co., sales agents.
Property: Chandler mine, operating since 1888. Ore is a hard, red, Bessemer hematite, carrying 60% iron, 0.043% phosphorus, .13% manganese, and 8.79% silica. Mining is by underground method to 920' vertical.

Production: highest was 808,359 tons in 1899, but yields have been irregular since 1907, being 171,594 tons in 1918, 48,274 tons in 1919 and 75,272 tons in 1920. The total output is 10,301,855 tons, including that mined by previous owners.

CHIPPEWA IRON MINING CO.**MINNESOTA**

Officers: F. W. Farnsworth, pres.; K. F. Williams, v. p.

Property: La Rue or Armstrong Bay mine, developed by 195' shaft.

CLEVELAND-CLIFFS IRON CO. THE**MINNESOTA**

(See Cleveland-Cliffs Iron Co., Michigan.)

The principal properties in Minnesota are: the Crosby, Fowler, Helmer, Meadow and Wade mines in the Mesabi range, whose combined output was 483,632 tons of 50% ore in 1919.

COATES & TWEED**MINNESOTA**

Office: 307 Lonsdale Bldg., Duluth, Minn.

Company explores, operates and is sales agent for mines in the Mesabi, Cuyuna and Gogebic ranges in Minnesota and Michigan.

In December, 1920, company was interested in the following mines: York, Seville, Julia, Hillcrest, Portsmouth, Gordon, and Townsite, producing Bessemer and non-Bessemer ores and mined by both open pit and underground mining systems. The Gordon yields a manganiferous ore, of which 250,000 tons were sold in 1920.

CONS. VERMILLION AND EXTENSION CO.**MINNESOTA**

Office: 312 Sellwood Bldg., Duluth, Minn.

Officers: T. J. Walsh, pres.-treas.; J. M. Christie, v. p.; A. M. Oulle:tc, sec., the president, M. C. Williams and Angus Cameron, directors.

Inc. Sept., 1911, in Minnesota. Cap. \$900,000; \$2 par; \$620,000 outstanding, no bonds. Stock transferred at company's office. No dividends.

Property: consolidation of the Vermillion Steel and Iron Co. and the extension of the Vermillion Steel and Iron Co. Operates under 50-year leases.

Company estimated, June, 1917, 20,000 tons of ore in stockpile with production of about 200 tons a day. Developed tonnage, claimed, 1917, to be 600,000 tons at a depth of 440'. A sample from stockpile was said to assay 69.85% iron and 0.76% manganese. No recent returns received.

CONSUMERS ORE CO.**MINNESOTA**

Address: Leader News Bldg., Cleveland, O. M. A. Hanna & Co., sales agents.

Property: Frantz mine at Buhl; Hanna A. and B. mines at Mountain Iron and Yates mine at Kinney on Mesabi range, St. Louis county.

Ore: non-Bessemer hematite, assaying in Frantz, 51% iron; in A, 50% iron; and in B, 47% iron. The Hanna A mine is worked by open pit system to depth of 175'. At the Hanna B mine, ore is mined by steam shovel in an open pit.

Production: in 1919 was 129,377 tons, compared with an output in 1920 of 114,448 tons.

CORSICA IRON CO.**MINNESOTA**

Operated by Pickands, Mather & Co., Cleveland, Ohio. D. B. Cavan, supt., Gilbert, Minn.

Property: the Corsica mine, on Mesabi range, Minn., opened in 1901.

Ore: soft, red Bessemer and non-Bessemer hematite. Mined by underground slicing system to 342' vertical. Employs 225 men.

Production: 384,692 tons in 1918; 340,588 tons in 1919; 323,725 tons in 1920; a total of 3,479,524 tons.

CRETE MINING CO.**MINNESOTA**

Address: C. H. Munger, gen. mgr., Western Reserve Bldg., Cleveland, O. Robert Murray, gen. supt., Hibbing, Minn.

Property: Albany mine on Mesabi range, opened in 1903. Also leasing the Utica mine from the Great Northern Iron Ore Properties.

Ore: soft, yellow, non-Bessemer, soft, red Bessemer, and soft, blue, non-Bessemer hematite. Mined by milling and underground slicing systems to 260' vertical.

Production to date: 4,831,974 tons from the Albany and 3,999,524 tons from the Utica mine.

CUYUNA DULUTH IRON CO.**MINNESOTA**

Consolidated with Cuyuna Mille Lacs Iron Co. and described under **American Manganese Mfg. Co.**

CUYUNA MILLE LACS IRON CO.**MINNESOTA**

Consolidated with Cuyuna Duluth Iron Co. and described under **American Manganese Mfg. Co.**

CUYUNA MINNEAPOLIS IRON CO.**MINNESOTA**

Office: Ironton, Minn. W. H. Fetzer, mgr.; P. C. Merrill, supt.

Property: leased on S. W. $\frac{1}{4}$ S. E. $\frac{1}{4}$ sec. 23-47-29, known as the Ida May mine, on Cuyuna range, Minn. **Ore:** non-Bessemer and manganese showing 40% iron, 0.20% phosphorus and 16% manganese. Ore is mined by underground system.

Production: 20,000 tons in 1918, which was the first output. Pumps were pulled and the mine allowed to fill with water late in 1920. A dump of 18,000 tons of 15% manganese ore was sold.

CUYUNA REALTY CO.**MINNESOTA**

Offices: c/o N. P. Ry. Co., St. Paul, Minn.; and Ironton, Minn. Carl Zapfe, mgr., Brainerd, Minn. F. G. Priest, purch. agt.

Property: the Feigh mine on the Cuyuna range. Ore is a non-Bessemer hematite, carrying 56% iron, .30% manganese, and 0.226% phosphorus. Mining is by underground methods.

Production: 21,011 tons in 1919; 79,144 tons in 1920, and 100,155 tons to date.

DRAPER IRON CO.**MINNESOTA**

Office: Calumet, Minn.

Officers: G. F. Murphy, gen. supt.; S. N. Vivian, supt.

Property: on the Mesabi range, opened in 1918. Ore is mined by steam-shovel and washed before shipment. It carries 55% iron, 0.034% phosphorus and 8% silica.

Production: 33,792 tons in 1919.

FAULT MINING CO.**MINNESOTA**

Office: Eveleth, Minn.

Officers: M. S. Kingston, mgr. Pickands, Mather & Co., sales agents.

Property: the Fault mine on Mesabi range, opened in 1917, producing soft, brown Bessemer and non-Bessemer hematites. Mining is carried on to a depth of 85' by open cut and top slicing. Ore carries 49% iron, 0.052% phosphorus, and 7.40% silica.

Production in 1917 was 33,710 tons; in 1918, 133,266 tons and in 1919, 38,152 tons, a total to date of 205,128 tons.

FEDERAL CONSOLIDATED MINING CO.**MINNESOTA**

Office: 327 Palace Bldg., Minneapolis, Minn. L. F. Lammers, sec. and purch. agt.

Property: the Ajax mine, near Biwabik, on Mesabi range, Minn. **Ore:** a non-Bessemer showing 58.46% iron, 0.08% phosphorus and 1.61% manganese, is mined by underground system.

Production: 200,000 tons, to date. Operations reported resumed in 1920.

FEIGH MINE**MINNESOTA**

See **Cuyuna Realty Co.**

FORT HENRY MINING CO., THE MINNESOTA

Office: 1208 Hanna Bldg., Cleveland, Ohio; E. W. Hopkins, range mgr., Ironwood, Michigan. Oglebay, Norton & Co., sales agent; W. K. Carter, purch. agt.

Property: a lease on the Woodbridge mine on Mesabi range, opened in 1912, producing non-Bessemer ore carrying 58.55% iron, 0.065% phosphorus and .93% manganese. Mining is by slicing, to depth of 255'.

Production: to date (1920); 1,522,651 tons.

The lease was abandoned in 1921 and the equipment dismantled and moved.

GLORIA MINING CO. MINNESOTA

Office: 301 Alworth Bldg., Duluth, Minn. E. J. W. Donahue, mgr. and purch. agent.

Property: the Gloria mine on the Cuyuna range, opened in 1916. Ore carries 30% iron, 0.170% phosphorus, 13.80% silica, and 15% manganese, and is mined to a depth of 110'.

Production: mined 3,375 tons in 1918; ore shipped in 1919. The mine was closed in December, 1918, on account of metal market. Company was awarded \$52,000 compensation by the War Minerals Relief Board, March, 1921.

GORDON MINING CO. MINNESOTA

See Hillcrest Mining Co.

Office: Lonsdale Bldg., Duluth, Minn. **Mine address:** Crosby, Minn.

Officers: A. B. Coates, pres.; R. R. Hill, v. p.; G. P. Tweed, sec.-treas.

Property: the Portsmouth mine, in Crow Wing county, which was leased and explored by the Hill Mines Co., prior to 1918. **Equipment:** includes 3 steam shovels, electric power and 3 locomotives.

Production: 186,259 tons in 1920.

GORHAM-GARBETT CO. MINNESOTA

Office: 627 First Ave., Minneapolis, Minn.

Officers: J. Pve, pres.; S. H. Wood, v. p.; C. F. W. Carlson, sec.-treas.; above with S. Bailey, S. F. Grover and R. W. McGarry, directors.

Inc. January, 1908, in Minnesota. **Cap.** \$1,000,000; \$1 par; 924,792 issued.

Dividends: 2% in 1917, and in 1918, 5½%.

Property: 360 acres of iron and manganese ore land on Cuyuna range. Crow Wing county, Minn., all leased on royalty plan. Lessees are the Iron Mtn. Mng. Co., Chas. W. Potts and associates. The Onahman Iron Co. leased the Ferro mine, but in 1920 the Gorham-Garbett Co. bought in the property at sheriff's sale for \$15,157.

GRAHAM IRON CO. MINNESOTA

Out of business since 1918. The mine (Knox) surrendered to the Northern Pacific Ry. Co.

GREAT NORTHERN COPPER CO. MINNESOTA

Idle since 1911. **Office:** 504 Globe Bldg., Minneapolis, Minn. Mine at Hinckley, Pine county, Minn. Fully described Vol. XI. Copper Handbook.

GREAT NORTHERN IRON ORE PROPERTIES MINNESOTA

Address: G. R. Martin, comptroller, First Nat'l Bank Bldg., St. Paul, Minn.

Inc. Dec. 7, 1906. Is a trust created by directors, and approved by shareholders of the Great Northern Railway Co. Trustees: Louis W. Hill, James N. Hill, Ralph Budd and E. T. Nichols.—Transfer office: 32 Nassau St. New York City. Bankers' Trust Co., New York City, registrar. Listed on New York Stock Exchange.

Shareholders of the Lake Superior Co., Ltd. (a subsidiary created to hold various securities and properties of the Great Northern Ry Co.), transferred to the trustees of the Great Northern Iron Ore Properties, shares in 10 iron ore mining companies, conservatively worth \$1,738,400. Any dividends declared by the Allouez Bay Dock Co., or by Duluth, Superior & Western Terminal Co., up to Dec. 31, 1912, were to be paid to the trustees, to be applied by them to the uses of the trust.

When the trust was created, the trustees issued certificates of beneficial interest, amounting to 1,500,000 shares, to stockholders of the Great Northern Ry. Co., at the rate of one share of "Trustee's Certificates" for each share of stock of Great Northern Ry. Co. The trustees' income has come from dividends from stocks held and from interest earned. This revenue, less administration expenses, is distributed as dividends to holders of Certificates of Beneficial Interest.

Property: 65,091 acres of iron ore land in the Mesabi district, Minn. Through leases made in 1917 and in previous years, the 10 original companies disposed of their developed mines (except interests in the North Star, Hill and Walker mines, now idle). The principal leases were with the Interstate Iron Co., a subsidiary of Jones & Laughlin Steel Co., the Hanna Ore Mining Co., organized by M. A. Hanna & Co.; the Cleveland-Cliffs Iron Co. and the Mesaba Cliffs Iron Mng. Co., org. by the Cleveland-Cliffs. The

Interstate Iron Co. lease covers 3 mines, the net royalties ranging from 30c. to 75c per ton of ore extracted; the 1918 minimum was 924,000 tons. The Hanna Ore Mng. Co. lease covers 10 mines, and royalties range from 40c to \$1.15 a ton. Leases call for mining operations on an increasing scale each year. Since July, 1917, the proprietary companies have withdrawn from active mining operations.

Reserves in all properties amount, to about 291,000,000 tons.

Production—shipments and receipts are as under:

From old leases:

	1920	1919	1918	Total*
Shipments, tons	2,423,445	1,824,510	2,734,678	35,463,312
Receipts	\$376,317	\$316,741	\$392,680	\$5,606,061

* Since 1907.

Includes Mahoning, Stevenson, Leetonia ($\frac{1}{2}$), Utica and Sweeney ($\frac{1}{2}$) mines. Average royalty was 17.360¢ in 1919 and 15.528¢ in 1920.

From Arthur Iron Mining Co.: (a)

	1920	Total
Shipments, tons (from stock pile)	13,091	2,472,907
Receipts	\$35,057	\$3,860,598

Receipts from new leases, 1913 and subsequent years:—(b)

Shipments	4,066,154	15,107,620
Receipts	3,171,606	\$10,854,156

- (a) all business of a general character is carried on in the name of the Arthur Iron Co., which is the managing agent for all the other companies. Mining operations by the Arthur Mng. Co. ceased June 30, 1917 as all its properties were leased. The 1,380,082 tons of ore then on hand has been disposed of.
- (b) Includes following mines: Dean, Dunwoody, Fay Harold, Harrison, Hill, Hill-Annex, Kevin, Leonard ($\frac{1}{2}$) Mace № 1 and Mace № 2 ($\frac{1}{2}$), Mississippi, № Harrison, ($\frac{1}{2}$), № Uno G. N., Patrick ($\frac{1}{2}$), Smith, So. Agnew, So. Uno G. N. Thorne (90%) Wabigon (90%) Wade (90%) and Warren ($\frac{1}{2}$) mines.

HALE DEVELOPMENT CO.

MINNESOTA

Office: 408 Exchange Bldg., Duluth, Minn.

Officers: F. A. Day, pres.; A. H. Brown, v. p.; H. W. Cheadle, sec.-treas.

Inc. in Minnesota. Cap. \$150,000; \$10 par; 5,000 shares issued. Is a holding corporation. Dividends: \$1.30 per share in 1920.

Property: 360 acres on Cuyuna range, Crow Wing county, Minn. Only 80 acres have been thoroughly explored, which portion is included in the Wilcox mine. These 80 acres were leased on a royalty basis to the Division Co. of Minneapolis, Minn. Idle.

HANNA & CO., M. A.

MINNESOTA

See same title under Michigan iron mines.

HANNA ORE MINING CO.

MINNESOTA

Office: Hibbing, Minn.

Officers: E. E. Hunner, mgr.; C. E. Hendrick, gen. supt., Eastern Mesabi; F. H. Cohoe, gen. supt., Western Mesabi. Company is a subsidiary of the M. A. Hanna Co., operating leases on Great Northern ore lands at Buhl, Virginia, Hibbing, and Chisholm, Minn.

The mines included in the leases are: the Fay, Leonard, Mesabi Chief, L & W. Enterprise, Harold, North Uno G. N., South Uno G. N., Wabigon No. 1, Wabigon No. 2, and Thorne. Total production in 1920 was 1,960,116 tons,

HECTOR MINE

Mine exhausted. Described in Vol. XIV.

MINNESOTA**HILLCREST MINING CO.**

(See Gordon Mining Co.)

MINNESOTA

Office: Lonsdale Bldg., Duluth, Minn. **Mine address:** J. W. Van Evera, mgr., Crosby, Minn.

Officers: A. B. Coates, pres.; R. R. Hill, v. p.; G. P. Tweed, sec.-treas.

Property: E. $\frac{1}{2}$ S. E. Sec. 9-46-29; W. $\frac{1}{2}$ N. W. $\frac{1}{4}$ of S. W. $\frac{1}{4}$ Sec. 10 and W. $\frac{1}{2}$ S. W. $\frac{1}{4}$ of N. W. $\frac{1}{4}$ sec. 10, T. 46, N. R. 29 W., Crow Wing county. In April, 1919, company took over the Hillcrest mine on Cuyuna range formerly operated by the Hill Mines Co., Minn., first opened in 1918. Mine yields a soft, red, non-Bessemer hematite, assaying 50.59% iron, 0.208 phosphorus and 4.80% silica.

Development: by open pit and hydraulic stripping.

Production: 645,927 tons to Jan. 1, 1919, most of this ore produced in 1917 and 1918.

HILL MINES CO.**MINNESOTA**

Office: Hill Bldg., Saginaw, Mich.

Officers: Roger R. Hill, pres.-treas.; J. G. Williams, v. p.; J. J. Quinn, sec.

Inc. Jan. 14, 1914, in Maine. **Cap.** \$5,000,000, increased in 1917 from \$500,000; \$10 par; \$1,177,840 issued.

Property: the Portsmouth mine was taken over, June, 1918, by the Gordon Mining Co., and the Hillcrest mine was taken over by the Hillcrest Mining Co., April, 1919.

HOBART IRON MINING CO.**MINNESOTA**

Address C. H. Munger, gen. mgr., Western Reserve Bldg., Cleveland, O. D. B. Cavan, Gilbert, Minn., and F. A. Kelley, Calumet, Minn., supts. Pickands, Mather & Co., sales agents, Cleveland, Ohio.

Property: the Elba mine, opened in 1898, the Labelle, and the Majorca mine opened in 1917, all on Mesabi range.

Ore: at Elba, soft, red, Bessemer hematite; at Majorca, a soft, red non-Bessemer hematite. The mines are worked by underground methods. Company employs 225 men.

Production: (to date) 3,495,909 tons from the Elba; 698,016 tons from the Labelle; 757,901 tons from the Majorca mine.

Ore from the Majorca mine is washed before shipment. This mine is leased from the State of Minnesota, and company has to pay a royalty on all "wash" ores as crude ore.

HOCH MINING CO.**MINNESOTA**

Company out of business. The Algoma mine is now owned by Onahman Iron Co., which sec.

HOYT MINING CO.**MINNESOTA**

Officers: W. P. Chinn, asst. gen. mgr.; Robert Murray, gen. supt.; Pickands, Mather & Co., sales agents, Cleveland, Ohio.

Property: the Scranton mine on Mesabi range, in St. Louis county, 12-57-21. Ore is a soft, red, non-Bessemer hematite to be mined by open cut when preparations are completed.

Production: total, 521,841 tons; none since 1915. Reopened in 1919.

INLAND STEEL CO.**MINNESOTA**

Office: 38 S. Dearborn St., Chicago, Ill.

Officers: L. E. Block, chairman; P. D. Block, pres.; G. H. Jones, v. p.; E. M. Adams, v. p.-sec.; E. J. Block, v. p.; H. C. Jones, v. p.; J. W. Lees, v. p.; D. P. Thompson, asst. to president; W. D. Truesdale, treas. R. L. Wahl, gen. supt.

Inc. Feb. 6, 1917, in Delaware, as successor of an Illinois corporation of same name. **Cap.** \$30,000,000; par \$25; issued \$25,175,175. First Trust

& Savings Bank, Chicago, transfer agent, Continental & Commercial Trust & Savings Bank, Chicago, registrar.

Bonded debt: \$1,050,000; first mortgage, 6% gold bonds of old company being balance of \$3,000,000 issue; due \$150,000, each April 1st to 1928; also \$4,091,000 extension and ref. mtgs., 6s, due July 1, 1942. Authorized \$10,000,000, issued \$5,000,000, of which \$909,000 had been cancelled to January 1, 1921.

Income Account—years ended Dec. 31:

Surplus	17,365,526	18,708,682
Totals	\$59,370,754	\$61,325,284

Dividends: on stock of former company for 1911, 1912 and 1913, 10% per annum (i. e. 7% regular and 3% extra); 1914, 6½% plus a stock dividend of 25% paid September, 1914; 1915, 6%; 1916, 8%; 1917, 11%; 1918, 8% or at rate of 2% per quarter from June, 1917, to March 1920; since then 75c. per share on \$25 par.

Property: valuable ore leases on 3 producing mines, the Laura, near Hibbing, on the Mesabi range; two, the Armour No. 1 and Armour No. 2 on the Cuyuna, at Crosby, Minn., with about 30 years' ore reserves at each mine. Furnaces are at Indiana Harbor, Ind.

In 1917, company purchased 2,000 acres of coal land near Dorseyville, Pa., and a lease on further ore lands from the Great Northern Iron Ore Co.

The Indiana Harbor furnace has a capacity of 1,000,000 tons steel per year. It has 3 modern blast furnaces, delivering molten metal to twelve 60-ton and ten 80-ton open hearth basic furnaces.

INTERNATIONAL HARVESTER CO.

MINNESOTA

See Wisconsin Steel Mines, Minnesota.

INTER-STATE IRON CO.

MINNESOTA

Subsidiary of Jones & Laughlin Steel Co.

Office: Jones & Laughlin Bldg., Pittsburgh, Pa.

Operating office: care Mark Elliott, gen. supt., Virginia, Minn.

Property: the Grant, Lincoln, and South Longyear mines on the Mesabi range in St. Louis county, under lease from the Great Northern Iron Ore Properties. Also the Columbia and Longyear mines, now idle. Operations

on the South Longyear were about to begin late in 1920. Ores are both Bessemer and non-Bessemer, that of the Lincoln containing 55.73% iron, 0.02% phosphorus and 9.88% silica. Top slicing and caving systems are employed to depth of 237'.

Reported that company is operating the Hill-Annex, adjoining the Hill-Trumbull, near Marble, Itasca county, and that a washing plant and concentrator are nearing completion. Hill-Annex is said to have a reserve of 22,000,000 tons of ore.

Production: totals 2,429,788 tons from the Grant mine and 4,607,371 tons from the Lincoln mine.

J. BENNETT SMITH MINING CO. MINNESOTA

Company controlled by R. D. Lacoë, Oceanside, San Diego county, Cal., who advanced most of the money for development. Former office, Kingston, Pa. **Mine address:** Pine City, Pine county, Minn.

Property: 500 acres of copper-bearing ground, along Snake river, a mile below Cross lake, in Pine county, Minn. The lands show the western extension of the Keweenawan copper-bearing beds of Lake Superior, the bedded formation having a strike of about N. 20° E., with dip of about 72° S.-E., showing the beds to be on the northern fold of the syncline.

Development: includes 560' shaft; also several shallow pits and shafts. Several of the amygdaloidal and conglomerate strata, showing native copper, have been proven by test pitting and diamond-drill borings. Company reports having expended about \$50,000 on exploratory and development work since 1879. No recent returns available.

JOAN MINING CO. MINNESOTA

General office: 106 Providence Bldg., Duluth, Minn. **Mine office:** Iron-ton, Minn.

Officers: G. M. Fay, pres.-supt. S. J. Fay, v. p.; Marcus Fay, sec.-treas., directors.

Inc. 1916, in Minnesota. **Cap.** \$50,000; shares \$100 par.

Property: 4 mines, the Joan Nos. 1, 2, 3 and 4, in the Cuyuna range, Crow Wing county, Minn.

Development: by shafts to 200' depth. Ore contains 27% iron, 0.120% phosphorus and 23% manganese.

Production: Joan No. 1 produced 5,338 tons from 1917 to end of 1919.

JONES & LAUGHLIN STEEL CO. MINNESOTA

See under Michigan for general statement.

JUNE LAKE IRON CO. MINNESOTA

Office: 22 Columbia Bldg., Superior, Wis. E. L. Johnson, gen. mgr. sec.-treas.

Inc. 1910, in Minnesota. **Cap.** \$50,000; shares \$10 par.

Property: 70.90 acres in Lot 3 and N. W. of S. W. Sec. 9, T. 46, R. 29, Crow Wing county, said to contain iron and manganese.

KINGSTON MINING CO. MINNESOTA

Address: No. Hays St., Eveleth, Minn.

Property: a lease on the Spring and Silverton mines, on the Mesabi range, in Sec. 11, T. 59, R. 14, St. Louis county, credited with production of 67,682 tons to 1910. Under development and a washing plant to be erected.

LA RUE MINING CO. MINNESOTA

Office: Virginia, Minn.

Officers: E. E. Hunner, mgr.; C. E. Hendrick, supt. M. A. Hanna & Co., sales agents.

Property: on Mesabi range, in Sec. 39 and 32, T. 57, R. 22, Itasca county, carrying 53% iron, 0.031% phosphorus, and 7.84% silica, is mined by open pit system to depth of 80'.

Production: 1902-1919, totals 2,928,158 tons.

LEETONIA MINING CO.**MINNESOTA**

Subsidiary of Jones & Laughlin Steel Co., Jones & Laughlin Bldg., Pittsburgh, Pa.

Mark Elliott, gen. supt., Virginia, Minn.

Property: the Leetonia mine, on the Mesabi range, leased from the Great Northern Iron Ore. First opened in 1920. **Ore:** soft, red, non-Bessemer hematite assaying 50.3% iron, mined by top slicing and caving and steam shovels to 182' depth. Also operates the Nassau mine on Mesabi range, St. Louis county, inactive from 1910 to 1918, when it produced 40,412 tons.

Production: 656,823 tons in 1916; 402,894 tons in 1917; 230,865 tons in 1918; 374,963 tons in 1919; 404,270 tons in 1920; a total of 7,328,815 tons.

LIBERTY MINING CO.**MINNESOTA**

General office: 106 Providence Bldg., Duluth, Minn. **Mine office:** Iron-ton, Minn.

Officers: M. L. Fay, pres.; C. E. Schulze, v. p.; G. M. Fay, sec.-treas. Inc. 1917, in Minnesota. **Cap.** \$100,000; \$100 par.

Property: the Bonnie Belle iron mine, near Ironton, Cuyuna range, contains a high-grade non-Bessemer ore, assaying 60% iron, 0.115% phosphorus and 0.66% manganese.

Production: in 1918, 1,636 tons; to Sept., 1919, 33,276 tons. Company shipped by rail to Duluth, Minn.

LONGYEAR, E. J. & CO.**MINNESOTA**

Office: Minneapolis, Minn.

Officers: E. J. Longyear, pres.; John E. Hodge, v. p.; R. N. Dow, sec.; H. J. Loddell, treas. L. D. Cooper, gen. mgr. Inc. in 1911.

Company engages in the exploration and development of mineral lands by means of geological examinations, diamond core drilling and shaft sinking. Also owns a substantial interest in a large nickel-copper property, proven up by diamond drilling, near Sudbury, Ontario, Canada.

LYCOMING CO.**MINNESOTA**

Office: 708 Lonsdale Bldg., Duluth, Minn. Was a securities-holding company. Inactive and no assets.

MACE IRON MINING CO.**MINNESOTA**

Office: 709 Security Bldg., Minneapolis, Minn.

Officers: R. M. Bennett, pres.; O. B. Warren, sec. and gen. mgr.; J. A. MacKillican, supt., Hibbing, Minn. Pickands, Mather & Co., Cleveland, Ohio., sales agents. Operated as a close corporation.

Property: Mace No. 1 mine on Mesabi range, in St. Louis county, Minn., producing a high grade, direct shipping Bessemer iron ore, and developed by shaft 120' deep, operated by steam hoist.

Mace No. 2 mine, on Mesabi range, in Itasca county, Minn., producing high grade, concentrating Bessemer iron ore and developed by open pit system, worked with steam shovels and locomotives, etc.

Production: Mace No. 1, 1915, 120,888 tons; 1916, 163,352 tons; 1917, 122,500 tons; 1918, 66,405 tons; none in 1919; 50,088 tons in 1920; total 1,051,764 tons. Mace No. 2, 1916, 307,496 tons; 1917, 251,280 tons; 1918, 247,590 tons; 112,228 tons in 1919; 101,935 tons in 1920; total 918,655 tons. Ore from Mace No. 2 is concentrated at Harrison plant.

MAHNOMEN MINING CO.**MINNESOTA**

Address: Clement K. Quinn, pres.-mgr., 1500 Alworth Bldg., Duluth, Minn. E. P. Scallon, gen. supt., Crosby, Minn.

Property: on the Cuyuna range, first opened in 1915. The ores assay from 58% iron, and 5 to 20% manganese. Mining is done by open pit methods to depth of 250'.

Production: total, 1,000,000 tons.

MAHONING ORE AND STEEL CO.**MINNESOTA**

Office: Widener Bldg., Philadelphia. Cambria Steel Co. owns 50% of capital stock; Republic I. & S. Co. (q. v.) has an interest.

Property: Mahoning mine on Mesabi range, at Hibbing, Minn.; R. M. Marble, supt. **Ore:** soft, blue, Bessemer, and soft brown, non-Bessemer hematite, containing 51.18% iron, 0.037% phosphorus, and 2.39% silica. Mined by open pit system to 270' vertical depth.

Production: 2,215,788 tons in 1916; 2,525,145 tons in 1917; 2,019,481 tons in 1918; 1,217,167 tons in 1919; 1,704,871 tons in 1920; with a total of 31,269,889 tons.

MANGAN IRON & STEEL CO.**MINNESOTA**

Office: 805 Lonsdale Bldg., Duluth, Minn.

Officers: A. F. Gress, press.; P. Martin, v. p. and treas.; W. G. Whitney, sec.-mgr., with F. J. Sensonbrenner and C. A. Babcock, directors. Wm. Pascoe, supt., Ironton, Mich., E. Schramm, pur. agt.

Inc. 1913, in Minnesota. **Cap.** \$500,000; \$1 par; non-assessable; outstanding \$238,053.

Property: 80 acres including Mangan No. 1 mine on Cuyuna range, producing manganiferous ore. Developed by two shafts, 160' deep.

Equipment: 2 hoists, compressor, 3-000-gal. pump.

Production: 1917, 49,868 tons, 15% manganese; 1918, about 43,007 tons, 17% manganese; total output 125,804 tons. Company reports ore reserves of 500,000 tons. Mine closed down May, 1919 waiting improved market conditions.

MAPLE LEAF MINING CO.**MINNESOTA**

Address: Crosby, Minn.

Property: the Thompson mine, at Crosby on the Cuyuna range, on which lease was previously held by the Inland Steel Co., but surrendered in December, 1919. The mine has many years of reserves and has produced 1,019,381 tons of ore.

MARQUETTE ORE CO.**MINNESOTA**

Address: C. B. Dunster, mgr., Cleveland, O. W. B. Pattison, supt., Negaunee, Mich. E. N. Breitung & Co., sales agents.

Property: Maroco mine, on Cuyuna range, Crow Wing county, worked by open pit system. Ore is a soft, red non-Bessemer hematite. Initial shipments made in August, 1921.

McKINNEY STEEL CO.**MINNESOTA**

See under Michigan.

MERRIMAC MINING CO.**MINNESOTA**

Office: Crosby, Minn.

Officers: J. F. Murphy, gen. supt.; Thomas Turnbull, supt.; John A. Savage & Co., Duluth, sales agents.

Property: operates the Croft mine, near Crosby, Cuyuna range, Minn.

Ore: a soft, reddish blue Bessemer hematite assaying 53% iron. The caving system is used to depth of 333'.

Production: to date totals 499,314 tons.

MERRITT DEVELOPMENT CO.**MINNESOTA**

Office: 514 Plymouth Bldg., Minneapolis, Minn. Franklin W. Merritt, pres. and gen. mgr.

Property: operating Merritt mines, No. 1 and No. 2, in Cuyuna range, Minn., containing manganiferous ores showing 25 to 40% iron, 0.080% phosphorus and 12 to 25% manganese. Ore is mined by underground method.

No. 4 shaft was producing 200 tons daily in 1920.

Production: in 1920, 22,000 tons shipped, said to have averaged 20% manganese.

MESABA-CLIFFS IRON MINING CO.**MINNESOTA**

Office: Hibbing, Minn.

Officers: M. M. Duncan, mgr.; M. H. Barber, supt. Sales agents, Cleveland-Cliffs Iron Co.

Property: the Bingham and Boeing mines on the Mesabi range opened in 1919. The Boeing is worked by open pit methods, using a 300-ton steam shovel. No production figures available. Also the Hill-Trumbull mine, former opened in 1910 and latter in 1919. A washing plant, with capacity of 80 cars per shift, is operated on silicious ore.

Production: of Hill-Trumbull to date totals 7,674,455 tons.

Year	Tons	Year	Tons
1915.....	998,649	1919.....	575,509
1916.....	552,104	1920.....
1917.....	1921.....	300,000
1918.....	559,074	To date.....	7,674,455

The North Star mine is being prepared for production.

MESABI IRON CO.

MINNESOTA

Address: J. R. Dillon, 25 Broad St., New York. W. G. Swart, mgr., Babbitt, Minn. Fred A. Jordan, supt.

Officers: Charles Hayden, chairman of directors; D. C. Jackling, pres.; W. G. Swart, v. p.; J. R. Dillon, treas.; with J. D. Ryan, W. E. Corey, P. A. Rockefeller, C. M. MacNeill, Sherwood Aldrich, W. Hinkle Smith, A. C. Dinkey, S. W. Mudd, H. V. Winchell and J. C. Agnew, directors. Dwight E. Woodbridge and E. W. Davis, cons. engrs.

Inc. 1919, in Delaware. **Cap.** \$3,000,000 of 8% cumulative, convertible preferred shares, \$100 par; and 300,000 common shares of no par value; outstanding, 30,000 shares pfd. and 150,000 common. Equitable Trust Co., transfer agent; Guaranty Trust Co., registrar.

Property: 15,000 acres, carrying low-grade iron ore (magnetite) deposits in the eastern part of the Mesabi range, Minnesota. The crude ore is taconite, a mixture of chert and lenses of magnetite assaying 25 to 30% iron.

Preliminary investigations were started in 1913, and by 1915 a syndicate was formed to drill, develop, and make metallurgical tests on the ore. A 100-ton concentrating plant was completed at Duluth by mid-1916 and operated until the end of 1918, producing several thousand tons of high-grade iron concentrate, desired by smelters. The Syndicate has spent \$750,000 on this work, and finds that the problems resemble those of the disseminated (porphyry) copper deposits. A 3,000-ton daily mill, employing rolls, magnetic separators, and sintering plant, is being erected at Babbitt, 14 miles E. of Mesaba, near the mines on a branch of the Duluth & Iron Range Railroad, and it is hoped to start marketing an agglomerated concentrate, carrying 60% iron, and low in phosphorus, by 1922.

Mining will be by open cut methods. The deposit has little or no overburden. This appears to be a big and sane project, backed by men experienced in the treatment of low-grade copper and gold ores.

MESSABA-CUYUNA IRON LAND CO.

MINNESOTA

Office: 506 Sellwood Bldg., Duluth, Minn.

Officers: D. D. Murray, pres.; C. W. Stilson, v. p.; P. L. DeVost, sec.; J. Oreckoosky, treas., with W. B. Patten, directors.

Inc. 1912, in Minnesota. **Cap.** \$250,000; \$1 par; outstanding, 218,084.

Dividends: April, 1918, 10%; Sept. 1919, 3%; Feb. 1921, 3%; total, \$35,000.

Property: 2,200 acres, on Mesabi and Cuyuna ranges, in St. Louis, Cook, Aitkin, Crow Wing and Cass counties, Minn., under lease to various companies. No ore has been mined, but company received \$11,750 for royalties on "minimum output" basis. Lands contain manganiferous and iron ores. Developed by 150' shaft.

MOHAWK MINING CO.

MINNESOTA

Officers: W. P. Chinn, asst. gen. mgr.; L. C. David, gen. supt. Pickands, Mather & Co. sales agents, Cleveland, O.

Property: the Mohawk mine, opened in 1906, on Mesabi range, in St. Louis county, 4-58-15. Ore is a soft, red, non-Bessemer hematite, carrying 49% iron; extracted by underground slicing to depth of 305' vertical.

Production: total to end of 1919, 2,110,927 tons.

MUTUAL IRON MINING CO.

MINNESOTA

Office: 519 Providence Bldg., St. Paul, Minn. **Mine office:** Geo. Reilly, supt., McComber, Minn.

Officers: J. Coates, pres.; G. H. Rowe, v. p.; J. L. Dorsey, sec.-mgr.; T. B. Schultz, treas., with E. O. Olund, A. H. Beyers, M. C. Welch, John Miller, I. F. Green, J. C. Houck and W. D. Limehan, directors.

Inc. in Minnesota. Cap. \$350,000; \$1 par; outstanding 339,000.

Property: leased on the McComber mine, in St. Louis county, Minn., sub-leased September, 1918, to the **National Mining Co.**, which see.

NATIONAL MINING CO.

MINNESOTA

Address: McComber, Minn.

Officers: J. B. Sullivan, pres.-gen. mgr.; A. F. McBride, v. p.; C. S. Bunnell, sec., with J. Hicks, directors.

Inc. in Minnesota. Cap. \$500,000; \$1 par; all outstanding.

Property: leasing the McComber iron mine, at McComber, St. Louis county, developed by shafts 250' and 500' deep and by 1,300' of drifting. Three thousand tons of ore in sight.

Equipment: includes 2 steam hoists, 2 compressors and tramway.

Company commenced shipping in 1919; output to date about 25,000 tons of 60% ore.

NORTH AMERICAN IRON MINING CO.

MINNESOTA

Address: C. M. Simpson, Shawnee, Okla.

Ground transferred to a new company in 1918. See Vol. XIV.

NORTHERN MINNESOTA ORE CO.

MINNESOTA-ARKANSAS

Office: Deerwood, Minn.

Officers: C. W. Potts, pres.; L. Peterson, v. p.; C. M. Farney, sec. and treas.; with C. E. Updike, H. M. Miller, A. Murry, John Berg and R. S. Billingsley, directors. A. K. Knickerbocker, supt., Cushman, Ark.

Inc. March, 1917, in Minnesota. Cap. \$700,000; \$1 par; outstanding \$460,000.

Property: 12 fee interests, totaling 520 acres, and leases on 320 acres known as Northland mine, 2 miles north of Cuyuna on Cuyuna range, Minn.

Development: by shaft 200' deep and 200' of workings. Method used, top slicing and selective stoping on manganese ore.

Equipment: includes two hoists, compressor and pump. Company started shipping in 1919, but after mining 5,000 tons, closed the mine and acquired 600 acres of manganese bearing land, 1½ miles E. of Cushman, Arkansas.

NORTHWESTERN IMPROVEMENT CO.

MINNESOTA

Office: Ironton, Minn. E. E. Hunner, mgr. M. A. Hanna & Co., sales agents.

Property: the Feigh mine on the Cuyuna range, opened in 1917. Ore is a non-Bessemer hematite, carrying 51% iron and 0.247% phosphorus.

Production: 21,011 tons in 1919.

OLIVER IRON MINING CO.

MINNESOTA

Company, a subsidiary of the U. S. Steel Corporation, is a close corporation, owning, controlling and operating mines in Michigan, Minnesota and Wisconsin.

Office: Wolvin Bldg., Duluth, Minn.

Officers: W. J. Olcott, pres.; P. Mitchell, v. p.; G. D. Swift, sec.-treas.; J. H. McLean, genl. mgr.; O. C. Davidson, gen. supt., Eveleth, Minn.; W. M. Tappan, gen. supt.; L. D. Davenport, chief eng.; L. R. Salsich mgr., Western Mesabi district, Hibbing, Minn. A. Y. Petersen, gen. supt., Coleraine district, Minn.; F. R. Mott, genl. supt., Virginia district, Minn.; Ver-

non Claypool, asst. supt., Chisholm district; W. W. J. Croze, geologist. D. E. Sutherland, asst. gen. supt.

The U. S. Steel Corp. owns all of the issued capital stock \$1,200,000.

Production: in 1913, 26,037,585 tons; in 1914, 14,586,454; in 1915, 21,079,224; in 1916, 29,927,767; in 1917, 28,453,154; in 1918, 25,671,908; in 1919, 23,300,000; in 1920, 30,000,000 tons.

Employment is normally given to over 12,000 men, of whom 60% are Americans.

Of the 49 mines owned or controlled approximately 25 were inactive during 1920. The Carson Lake was abandoned early in 1920. The Queen and Stegmiller mines in the Marquette range and the Deacon in the Mesabi range have been exhausted. Lease on Zenith mine was taken over in 1919 by Zenith Iron Mng. Co., and in turn by the **Vermillion Mng.** (q. v.) in 1920.

Company also owns zinc mines at Shullsburg, Wis., equipped with a 300-ton roasting and separating plant, erected in 1916. Plant was operating in 1919.

OMAHA IRON CO.

MINNESOTA

Address: 1019 Marquette Bldg., Chicago, Ill.

Officers: D. A. Dunn, pres.; W. A. McClaron, v. p.; L. M. Swindler, treas. Directors: W. P. Mars, D. A. Dunn, A. A. MacKay, W. A. McClaren and J. T. Paige. W. H. Squier, sec., mgr. and pur. agt.

Inc 1917, in Minnesota. **Cap.** \$100,000; par \$10. Presumably controlled by stockholders of the Onahman Iron Co.

Company bankrupt in 1920. Assets, \$160,839; liabilities, \$334,327.

Property: a lease on the Wilcox and Omaha mine, 240 acres. 7 miles N. E. of Brainard, on South Cuyuna range, Minn. Mine has been developed by 5 miles of underground openings and is said to have reserves of about 4,000,000 tons of non-Bessemer ore that assays 50.34% iron; .228% phosphorus, and .30% manganese.

Production: 1918, 41,000 tons; total to date about 200,000 tons.

ONAHMAN IRON CO.

MINNESOTA

Office: Omaha, Nebraska.

Officers: W. A. McClaren, pres.; W. C. Fraser, mgr.; H. H. Hunner, supt.; W. H. Locker, sales agent.

Inc. 1913, in Nevada. **Cap.** \$1,250,000; \$1 par; 1,060,000 issued.

Dividends: paid 3 dividends amounting to 15% during 1917. Gross earnings in 1918 were about \$442,000, all from ore sales. Earnings to April, 1919, about \$1,043,391 gross. Company went into bankruptcy in 1920, and was to be reorganized in 1921.

Property: 200 acres of manganiferous iron ore land on Cuyuna range, Crow Wing county, Minn., including the Ferro and Algoma mines, the latter purchased for \$536,649 in 1917, when the Algoma Manganese Co. was merged with the Onahman Iron Co. The Ferro mine reverted to fee owner, the Gorham-Garbett Co. and equipment was sold at sheriff's sale to satisfy mortgage against Onahman Co. for \$14,000 on unpaid royalty. The Algoma yields ore carrying 33% iron, 0.082% phosphorus, 19.40% silica, and 17.15% manganese; and the Ferro, 30% iron, 0.073% phosphorus, 18.41% silica and 19.25% manganese.

Production: a total of 100,945 tons from the Algoma and 153,264 tons from the Ferro mines.

ONFIDA MINES CO.

MINNESOTA

Office: 207 Fergusson Bldg., Duluth, Minn.

Officials: R. M. Sellwood, mgr.; Wm. Mudge, Jr., supt. Pickands, manager.

Inc. 1918, in Minnesota. **Cap.** \$500,000; \$1 par. Company was formed to take over all the assets and assume all debts, obligations and contracts of the Sultana Mines Co., issuing 301,070 shares to Sultana Mines Co. and offering Sultana holders, 90,321 new shares retaining in treasury 108,609

shares. The Sultana properties were appraised, 1918, at \$309,710, as 903,210 Sultana shares were issued, the reorganization was equivalent to reducing outstanding shares to $\frac{1}{3}$ the number.

Property: the Sultana mine, on Cuyuna range, in S. W. $\frac{1}{4}$ of S. E. $\frac{1}{4}$ of Sec. 3, T. 46 N. R. 29 W., Crow Wing county, containing ore suitable for basic pig iron and spiegeleisen. Dried samples assay 39.3% iron, 0.17% phosphorus, 8.45% silica and 13.43% manganese. Mined by sub-level slicing method to 130' depth.

Company also owns a lease on Clark mine, an undeveloped iron property in S. E. $\frac{1}{4}$ of N. W. $\frac{1}{4}$ Sec. 34, T. 47 N. R. 29 W., Crow Wing county said to contain a high-grade manganiferous ore, low in phosphorus and suitable for ferro-alloy manufacture. Both mines reported closed down.

Production: from Sultana, 35,169 tons in 1916. Idle since 1916.

ORIENTAL GRANITE & IRON CO.

MINNESOTA

Office: 30 N. La Salle St., Chicago, Ill.

Officers: Edw. Romberg, pres.-treas.-mgr.; S. Romberg, v. p.; G. A. Hail, sec., with R. L. Benson, L. B. Lehman and H. J. Grannis, directors. Inc. April, 1887, in Minnesota. **Cap.** \$80,000; shares \$2 par, 38,000 issued.

Owns the Spring iron mine on Mesabi range, in St. Louis Co., Minn., and other unexplored iron lands. Ore of the Spring mine reported to assay 51% iron, .034% phosphorus and 22% silica. Idle since 1910.

PALATINE MINING & DEVELOPMENT CO.

MINNESOTA

Address: Palatine City, Minn.

Officers: Jos. Mierzynski, pres., 5251 Windsor Ave., Chicago, Ill.; Frank Wydra, sec.; Stanley Grzybowski, treas.; Jas. Ostrowski and Edw. A. Zolkowski, directors.

Property: 2,500 acres of iron-ore land in Cook county and a blast furnace at Port Arthur, formerly owned by the Atikokan Iron Co. Extensive diamond drilling planned.

PERKINS MINING CO.

MINNESOTA

Office: 811 Sellwood Bldg., Duluth, Minn.

Officers: R. M. Sellwood, mgr.; Wm. Mudge, Jr., supt. Pickands, Mather & Co., sales agents.

Property: the Perkins mine on Mesabi range, opened 1919.

Production: 612,890 tons to end of 1919, varying from 18,509 tons in 1919 to 80,942 in 1917.

PICKANDS, MATHER & CO.

MINNESOTA

Officials: C. H. Munger, gen. mgr., 600 Western Reserve Bldg., Cleveland, Ohio, and Sellwood Bldg., Duluth, Minn.; W. P. Chinn, asst. gen. mgr.; W. A. Rose, chief mng. eng.; W. H. Gallagher, chief mech eng.; C. P. McClure, purch. agt., Duluth, Minn.

Company operates, controls, or is selling agent for a great number of mines in the Lake Superior region. The ore mined is a hematite, equal in quality to the average standard of Lake Superior ore. The properties include:

Mine	Operating Company	General Supt.	P. O. Address
Albany	Crete Mng.	R. Murray	Hibbing, Minn
Balkan	Balkan Mng.	C. E. Lawrence	Crystal Falls, Mich
Baltic Fogarty	Verona Mng.	C. E. Lawrence	Caspian, Mich.

Judson	Balkan Mng.	C. E. Lawrence	Alpha, Mich.
Brotherton	Brotherton I. M.	L. M. Hardenburgh	Wakefield, Mich.

Total production in 1920 from all mines was 4,702,194 tons.

PITT IRON MINING CO.

MINNESOTA

Address: C. E. Moore, gen. mgr., Virginia, Minn.; R. M. Rice, purch. agt.

Property: Miller and Wacootah mines on Mesabi range, St. Louis county, Minn. **Ore:** soft, brown, non-Bessemer hematites, containing in Miller, 49.28% iron, 0.07% phosphorus, 0.62% manganese; in Wacootah, 49.25% iron, 0.090% phosphorus and 0.69% manganese. Ore is mined by shafts to 212' at Miller and stripping to 200' at the Wacootah.

Production in 1919, 310,140 tons at Miller mine, compared with 329,151 in 1918; 312,875 in 1917, and 252,404 in 1916, a total of 4,027,585. At the Wacootah mine the 1919 production was 86,326 tons, compared with 174,342 tons in 1918; 73,908 in 1917 and 101,970 in 1916, a total of 971,379 tons.

PITTSBURGH IRON ORE CO.

MINNESOTA

Office: Virginia, Minn. E. E. Hunner, mgr.; F. H. Cohoe, gen. supt. **Sales agents:** M. A. Hanna & Co., Cleveland, Ohio.

Property: the Brunt mine, on Mesabi range, St. Louis county. **Ore:** soft, red, non-Bessemer siliceous hematite, assaying 49% iron, 0.049% phosphorus and 8.50% silica. Mined by open pit method to 110' depth.

Production: to end of 1919, 1,486,411 tons.

PITTSBURGH STEEL ORE CO.

MINNESOTA

Address: Riverton, Minn. C. H. Munger, mgr.; W. P. Slaughter, supt.; C. P. McClure, pur. agt., 700 Sellwood Bldg., Duluth, Minn. Pickands, Mather & Co., sales agents.

Property: the Rowe mine, on Cuyuna range, Crow Wing county. Ore is a soft, brown non-Bessemer, requiring washing and crushing; assays 48% iron, 0.189% phosphorus and 8% silica. The mine was worked out during 1920 and the lease surrendered. Total production, 783,349 tons.

PROVIDENT IRON CO.

MINNESOTA

See Volume XIV.

QUINN, CLEMENT K. & CO.

MINNESOTA

Office: Alworth Bldg., Duluth, Minn.

Officers: C. K. Quinn, pres., Duluth, Minn. E. P. Scallon, supt., Crosby, Minn.

Property: Mahnomen mine at Ironton; Madrid mine at Virginia; Pearson mine at Nashwauk; Wisstar mine at McKinley, and Rolling Mill mine at Negaunee, all separately described. Annual production totals 1,000,000

tons. Company acquired an option on the Atikokan iron mine, 125 miles W. of Port Arthur, Ontario, in 1921.

REPUBLIC IRON & STEEL CO.**MINNESOTA**

See same title in U. S. section of this volume.

ROGERS, BROWN ORE CO.**MINNESOTA**

Office: 111 W. Washington St., Chicago, Ill.

Officers: H. J. Schlesinger, pres.; A. D. Chisholm, v. p.-gen. supt.

Property: the Susquehanna iron mine, on the Mesabi range, Minn. Opened in 1906. Also the Kennedy mine on the Cuyuna range, opened in 1907, worked by slicing and caving to 362', and the Meachem mine on the Cuyuna range, opened in 1909.

Ore: Bessemer and non-Bessemer, assaying 48-50% iron. Mined by striping method, to depth of 190'. Shafts are lined with steel.

Production: to end of 1919 totals 6,324,358 tons from the Susquehanna mine; 1,795,887 tons from the Kennedy, and 49,457 tons from the Meachem mine.

ROLLING MILL MINING CO.**MINNESOTA**

Address: R. S. Archibald, mgr., Alworth Bldg., Duluth, Minn. Edw. P. Scallon, gen. supt.; Clement K. Quinn & Co., sales agents.

Property: Rolling Mill mine on Marquette range, produces soft, brown-Bessemer hematites. Mined by underground methods to depth of 786'.

Production: in 1919, 116,380 tons; total, 1,668,771 tons.

RUTLAND MINING CO.**MINNESOTA**

Office: Eveleth, Minn.

Officers: M. S. Kingston, mgr.; Pickands, Mather & Co., sales agents.

Property: the Aad mine, opened in 1917. Product is a soft, red non-Bessemer hematite, extracted by underground top-slicing. Ore carries 49.16% iron and 6.48% silica.

Production: for 1918 and 1919, totals 112,189 tons.

SACHEM IRON CO.**MINNESOTA**

Office: 704 Lonsdale Bldg., Duluth, Minn.

Officers: H. C. Dudley, pres.-treas.; A. L. Agatin, sec. Bowe-Burke Mining Co. acts as manager and sales agent.

Property: the Burns mine, Mesabi range, opened in 1917. Ore: soft, red, Bessemer hematite, carrying 53-54% iron; .028-.034% phosphorus; 7.5% silica, and non-Bessemer carrying 49-51.50% iron; .049-.060% phosphorus and 5.4-6.6% silica.

Production: total to date, 223,215 tons.

SAGAMORE MINE**MINNESOTA**

See *Savage & Co.*, John A.

SAVAGE & CO., JOHN A.**MINNESOTA**

Office: Crosby, Minn. and Alworth Bldg., Duluth, Minn. J. F. Murphy, gen. supt.; Clark Henry, supt.

Property: the Sagamore mine on the Cuyuna range, in Sec. 19 T. 46 R. 29, Crow Wing county, opened in 1919. The ore mined by open pit methods is a manganiferous hematite, carrying 39% iron, 0.251% phosphorus, and 11% manganese.

Production: 86,398 tons in 1919.

SEAFIELD EXPLORATION CO.**MINNESOTA**

Office: Ironton, Minn.

Officers: Wm. Seafield, pres.; H. M. Stetson, sec.-treas.

Inc. March, 1908. Cap. \$8,000; \$100 par.

Company does exploration work only.

SECTION THIRTY MINE, INC.**MINNESOTA**

Succeeds Section Thirty Mining Co.

Address: G. A. St. Clair, Sellwood Bldg., Duluth, Minn.

Property: Section Thirty mine on the Vermilion range, Lake county, Minn. Ore is a hard, blue Bessemer and non-Bessemer hematite, containing 59.85 and 55.67% iron, 0.044 and 0.080% phosphorus; and 7.13 and 11.14%

silica, respectively. Ore is crushed, and cargo analyses show 63% iron in Bessemer and 58.6% in non-Bessemer.

Worked by open pit and sub-stoping methods to 650' vertical.

Production: from 1915 to end of 1919, totals 1,295,538 tons.

SECTION THIRTY MINING CO.

MINNESOTA

Address: G. A. St. Clair, Sellwood Bldg., Duluth, Minn.

Succeeded by **Section Thirty Mine, Inc.**, and company to be dissolved.

SHADA MINING CO.

MINNESOTA

Address: 1500 Alworth Bldg., Duluth, Minn. Clement K. Quinn, mgr.; E. P. Scallon, gen. supt.

Property: Pearson mine at Nashauk on the Mesabi range, contains Bessemer and non-Bessemer hematite, assaying 60% iron and 8% silica.

Production: total to date, 102,300 tons of concentrate.

SHENANGO FURNACE CO.

MINNESOTA

Address: E. J. Maney, gen. mgr., Chisholm, Minn.

Property: Shenango, Tioga, Webb and Whiteside iron mines, on Mesabi range, St. Louis county, opened in 1904, 1916, 1905, and 1910, respectively.

Ore: all four produce soft, brown Bessemer and non-Bessemer hematites, containing 53.23, 50, 53.52, and 50.85% iron; 0.041, 0.039, 0.051, and 0.088% phosphorus; and 4.75, and 10.97, 6.13, and 7.49% silica, respectively. Ore is mined by underground and open-pit methods to 300' in the Shenango; underground to 200' in the Tioga; underground and stripping to 250' in the Webb mine, and underground to 250' in the Whiteside. Company also owns the South Tenor mine, an undeveloped property. The old Virginia mine was reopened in 1920. Reserves are estimated at 4,000,000 tons.

Production: to end of 1919, totals 12,085,218 tons.

SOUTH CHANDLER MINE

MINNESOTA

Address: B. M. Pattison, lessee, Sellwood Bldg., Duluth, Minn. W. J. Mudge, supt.

Property: an iron mine on Vermilion range, St. Louis county, that was worked in 1888, abandoned 1905 and reopened 1913, mainly working ground already worked.

Ore: a hard red Bessemer hematite, containing 54% iron, 0.042% phosphorus, and 11.22% silica.

Mining by slicing system, to 800' vertical.

Production: 30,534 tons in 1919, and 464,830 tons to date.

STAMBAUGH IRON CO.

MINNESOTA

Office: Chisholm, Minn.

Officers: J. S. Lutes, mgr., Duluth, Minn.; C. H. Claypool, supt.

Property: the Billings mine on the Mesabi range, yielding a soft non-Bessemer hematite, carrying 57% iron, .85% manganese, and 0.050% phosphorus. Underground methods are practised.

Production: 23,918 tons in 1919; none since.

SULTANA MINES CO.

MINNESOTA

Company dissolved 1918, and all assets taken over by the **Oneida Mines Co.**, which see. The directors of the Sultana comprised the first directorate of the Oneida. The transaction was a reorganization, cutting down the outstanding stock to one-third.

SYRACUSE MINING CO.

MINNESOTA

Formerly operated the Hudson mine on the Mesabi range, now exhausted. See Vol. XIV.

TOD-STAMBAUGH CO., THE

MINNESOTA

Address: C. A. Thompson, v. p., Cleveland, Ohio. J. S. Lutes, mgr. for Cuyuna range mines. Sales agents for the following iron mines:

Property	Range	Mining System	Ore	Iron Contents %	Prod.* Tons
Biwabik.....	Mesabi.....	Open pit.....	Bessemer and non-Bessemer }	55 to 50	395,109
Dean-Itasca..	Mesabi.....	Open pit.....	Bessemer and non-Bessemer }	52	448,003
Dunwoody....	Mesabi.....	Open pit.....	non-Bessemer..	50	535,930
Morton.....	Mesabi.....	Underground.....		50
North Eddy..	Mesabi.....	Underground..	non-Bessemer..	49	72,854
Pennington..	Cuyuna.....	Open pit.....	non-Bessemer..	51	100,981
Warren.....	Mesabi.....	Open pit.....	non-Bessemer..	52	159,150
Zimmerman..	Menominee..	Underground..	non-Bessemer..	51	198,649

* Approximate 1919 production.

The Biwabik, opened in 1893, has produced 12,793,623 tons; the Dean-Itasca, 3,067,817 tons; the Morton, 141,262 tons; the North Eddy, 468,846 tons; the Zimmerman was opened in 1907 by the Spring Valley Iron Co., and was taken over by the Tod-Stambaugh Co. in 1918; total production to December, 1919, about 1,480,459 tons.

During 1920, company secured a 50-year lease on a property 2 miles W. of Grand Rapids. The deposit can be exposed by hydraulicking; the ore will be concentrated. Company has been prospecting for a possible extension of the western Mesabi range.

UNION ORE CO

MINNESOTA

Address: Youngstown, Ohio. Francis H. Webb, gen.-mgr., care Republic I. & S. Co., Duluth, Minn. William White, supt.

Republic I. & S. Co. holds a 50% interest.

Property: the Union mine, on Mesabi range, St. Louis county. Ore: two grades, soft red and blue Bessemer and non-Bessemer hematites, assaying 50 to 56% iron, 0.039 to 0.063% phosphorous and 6.23 to 8.42% silica.

VERMILLION MINING CO.

MINNESOTA

Address: Kenneth Duncan, supt., Ely, Minn.

Subsidiary of Pickands, Mather & Co. Republic Iron & Steel Co. also has a substantial interest in the company.

Property: company acquired a lease on the Zenith mine from the Zenith Iron Mining Co. in Aug., 1920. Property is on the Vermillion range. Ore is a Bessemer hematite, carrying 58.46% iron and 5.52% silica. Operations are conducted to a depth of 1,100'. Reserves are over 2,000,000 tons.

Production: from 1916 to end of 1920, total, 5,934,296 tons.

Operations curtailed in 1921 and force reduced to 130 men.

VIRGINIA ORE MINING CO.

MINNESOTA

Subsidiary of M. A. Hanna & Co.

General office: 1300 Leader News Bldg., Cleveland, O. J. D. Ireland, gen. mgr.; E. E. Hunner, mgr., 909 Fidelity Bldg., Duluth, Minn. C. E. Hendrick, gen. supt., Virginia, Minn. G. E. Frederickson, purch. agent, Duluth.

WAWBEEK MINING CO.

MINNESOTA

Office: 1500 Alworth Bldg., Duluth, Minn. C. K. Quinn, mgr.; E. P. Scallon, gen. supt.

Property: the Madrid mine on Mesabi range, opened in 1912. Ore carries 53% iron, and is a soft, red-brown Bessemer hematite. Mining is by underground caving, to depth of 132'.

Production: 43,943 tons in 1917; 18,258 tons in 1918; 8,254 tons in 1919; a total of 193,365 tons.

WHITE IRON LAKE IRON CO.

MINNESOTA

Address: R. F. Belleperche, sec., 402 Exchange Bldg., Duluth, Minn.

Officers: J. P. Labree, pres.; Jos. Trudel, treas., with C. M. Forest, F. P. Teepoorten, Jos. Lafortune, R. Hoch, directors.

Property: at Ely, idle several years.

WHITMARSH MINING CO.**MINNESOTA****Address:** G. H. Crosby, mgr., Duluth, Minn.**Property:** the Huntington and Martin mines on the Cuyuna range, opened in 1918, yielding non-Bessemer hematites carrying 48% iron. Slicing and caving is practised to a depth of 190' and 217'. No production figures obtainable.**WISCONSIN STEEL CO.****MINNESOTA**Owned by the International Harvester Co. **Office:** 606 Michigan Ave., Chicago, Ill. **Mine office:** Nashwauk, Minn.**Officers:** H. F. Perkins, gen. mgr.; B. W. Batchelder, gen. supt.; J. H. Williams, chief engr.; W. B. Edgar, purch, agt.**Cap.** \$1,000,000 ; fully paid; all owned by International-Harvester.**Property:** all on the Mesabi range; the Agnew mine at Hibbing, St. Louis county; the Hawkins at Nashwauk and the Sargent at Keewatin, both in Itasca county.**Agnew Mine:** 40 acres, opened in 1902, and containing a soft, red, non-Bessemer hematite assaying 48.51% iron and 0.058% phosphorus. Mined by underground system to 230'. **Hawkins Mine:** 160 acres, first opened 1902. Ore is a Bessemer hematite, assaying 55% iron and 0.04% phosphorus. Mined by open pit system to 123' depth. Has an ore washing plant. **Sargent Mine:** first opened in 1918. Ore is a non-Bessemer hematite, assaying 57.61% iron and 0.065% phosphorus. Underground mining and open pit systems used, with a possible annual output of 200,000 tons. The property has been explored by diamond-drilling which showed ore estimated at 10,000,000 tons. The **Bruce** prospect at Chisholm has been abandoned.**Production:** at the Agnew mine was 108,908 tons in 1917; 96,940 in 1918; 44,673 in 1919; total, 1,894,414 tons; at the Hawkins mine, 616,523 tons in 1917; 528,600 tons in 1918; 393,159 in 1919; total, 4,853,078 tons.**WISSTAR MINING CO.****MINNESOTA****Address:** C. K. Quinn, mgr., 1500 Alworth Bldg., Duluth, Minn.; E. P. Scallon, gen. supt., Crosby, Minn. C. K. Quinn & Co., sales agents.**Property:** 40 acres, known as the Wisstar mine, near McKinlev, Mesabi range. Property explored 1917 and development started in 1918. **Ore:** soft, brown, granular, non-Bessemer hematite, assaying 58% iron, 10% silica. Underground caving and slicing to 175' is practised.**YORK IRON MINING CO.****MINNESOTA****Office:** Virginia, Minn.**Officers:** A. B. Coates, pres.; G. P. Tweed, sec.-treas.; C. A. Myers, mgr.; John Sandberg, supt.**Property:** the York mine, on Mesabi range, containing Bessemer and non-Bessemer hematites. Ore mined by open pit system, shows 55% iron, .04 to 0.05% phosphorus and 10% silica.

Development started 1917.

Production: to January 1, 1921, 469,000 tons.**ZENITH IRON MINING CO.****MINNESOTA****Office:** 811 Sellwood Bldg., Duluth, Minn.**Officers:** R. M. Sellwood, gen. mgr.; Kenneth Duncan, supt.; Pickands, Mather & Co., sales agents.

On July 1, 1919, company took over a 50-year lease on the Zenith mine from the Oliver Iron Mng. Co. and in August, 1920, turned lease over to the Vermillion Mng. Co., which see. for description of property.

MISSOURI**OKLAHOMA****KANSAS**

The mining companies of these three states are grouped together because with a few though important exceptions, the mines are in the Tri-State or Joplin field, which covers the adjacent parts of three states. This field ex-

tends northeasterly for fifty miles from Miami, Oklahoma, to Neck City, Missouri. It was formerly known as the Southwest Missouri or Joplin lead, but with the increasing and at present preponderating importance of the Oklahoma portions of the field locally called the Miami district, the name Tri-State is more appropriate.

The ores consist of chert and altered limestone containing a small amount of galena and of zinc blende and their oxidation products. They occur in the irregular deposits of "broken ground" near the surface and in flat blanket deposits, or so called "sheet ground." The latter occurs in a cherty layer of the Boone limestone formations in which "runs" of ore 50 to 100' wide, and 5 to 15' thick, are sometimes a mile or two in length.

The principal orebodies are said to occur where cross fractures run out from the two main faults of the region, the main Miami fault with a throw of but 15 ft. being many miles long and some runs extending parallel to it.

Since the "runs" are practically level and at so shallow a depth that only a small amount of capital need be used for development and equipment, labor trouble is not a factor, the miners of to-day being often the operators of to-morrow.

Production from the Tri-State field for 1920 totaled 569,581 tons of concentrate—locally "ore"—which sold for \$43,004,711. The bulk of this came from Oklahoma, the official figures being as follows:

Production for 1920:

	Kansas	Missouri	Oklahoma
Lead conc. tons.....	20,831	247,185	81,464
Lead metallic tons	16,788	165,114	65,394
Zinc conc. tons	113,148	48,864	407,569
Zinc metallic tons.....	61,073	24,509	219,727
Rec'd for lead conc.....	\$2,005,517	\$20,283,887	\$10,463,040
Rec'd for zinc conc.....	\$5,154,572	\$2,842,564	\$35,595,774

In the Missouri portion of the field 1,304,400 tons of ore was mined in 1920 that averaged 0.31% lead and 2.09% zinc, comparing with 1,114,300 tons in 1919 that averaged 0.32% lead and 2.9% zinc.

Kansas produced 1,704,700 crude tons of zinc ore carrying 3.98% zinc and 0.98% lead yielding 113,148 tons zinc concentrate of an average value of \$45.30 per ton and 20,831 tons of lead concentrate that sold for \$96.27 per ton.

ABBOTT, REBHOITZ & STEWARTY MINING CO. KANSAS

Was to build \$25,000 plant at Baxter Springs in 1918, but did not.

ACME LEAD & ZINC CO.

OKLAHOMA

Address: 209 C. C. Cole Bldg., Tulsa, Okla.; also Box 812, Picher, Okla.

Officers: C. C. Cole, pres.; J. R. Cole, Jr., sec.-treas.; L. Lockey, supt.; and John Wingfield, mill supt.

Inc. March 15, 1917, in Oklahoma. Cap. \$200,000; \$1 par.

Property: 40 acres S. E. of Picher, containing zinc-lead ore.

Development: by 170' and 210' shafts.

Equipment: includes two 250-ton mills, worked throughout 1921.

Mine and No. 1 mill reported under option to Federal M. & S. Co., at last account.

Production: 146,340 lb. blende concentrate for week ending Dec. 17, 1921.

ACME MINE

MISSOURI

(Formerly Acme Lead & Zinc Co.)

Property near Lawton, Kansas, now owned by the Butte-Kansas Mng. Co., which see.

ADAMS-HICKS ZINC & LEAD CORPORATION

MISSOURI

Address: Frisco Bldg., Joplin, Mo.

Officers: D. D. Adams, pres, Batesville, Ark.; Grover James, sec.; Abel Greene, supt.

- Cap.** \$200,000.
Property: a 100-acre lease, 4 miles S. W. of Joplin, developed by 4 shafts, with fair ore reserves.
Equipment: includes a 200-ton mill driven by 4 gas engines. Idle part of 1919-1921.
- ADIRONDACK MINING AND MILLING CO. MISSOURI**
 Probably dead. Formerly operated in Joplin. See Volume XIV.
- ADMIRALTY ZINC CO. OKLAHOMA**
Office: Douthat, Okla.
Officers: F. M. Aiken, pres.; J. S. Cosden, sec.; H. C. Williamson, treas.; W. B. Shackelford, gen. mgr., Baxter, Okla. M. B. Lawrence, mine supt.
Inc. 1915 in Delaware. **Cap.** \$600,000.
Property: 4 mines, 120 acres at Douthat, Okla., and 40 acres in Cherokee county, Kansas. Shafts are down 220' and open the usual type of 6 to 16% blende and galena ore. Four mills are treating 1,100 tons in 10 hours.
 Company operated No. 2 and No. 3 mines throughout 1921, employing 140 miners. The same interests own the Sinden Zinc Co. mine at Cardin, closed since 1920, save for prospecting, and the Queen Esther mine north of Hockerville where electric hoists were installed in Dec., 1921, in readiness for a resumption of operations.
Equipment: includes hoist, 2 compressors, 4 electric pumps, tramway and 4 mills, with a daily capacity of 1,200 tons. Ore treated during 1915-16 amounted to 51,200 tons, concentrates averaging 62.50% zinc and 81.50% lead.
Production has been as follows: in 1915, 936,750 lb. zinc and 156,000 lb. lead; in 1916, 6,085,400 lb. zinc and 1,014,200 lb. lead. In 1921, 200,000 to 700,000 lb. zinc concentrate weekly.
- AKSARBEN MINING CO. KANSAS**
 Dead. Listed in Volume XIV.
- ALAMO LEAD & ZINC Co. OKLAHOMA**
Offices: 401 Security Bldg., Dallas, Texas, and Quapaw, Okla.
Property: is N. W. of Quapaw. A 200-ton mill was erected in 1918, but has not worked regularly.
- ALEXANDER LEAD & ZINC CO. OKLAHOMA**
Address: Orville Sneed, Miami, Okla.
Property: is near the Larsh mine, ½ mile N. W. of Cardin. A 500-ton mill was erected in 1918. Idle.
- ALLEGHENY-WESTERN MINING CO. MISSOURI**
Address: P. C. Seddon, mgr., Gentry Apts., Joplin, Mo.
Inc. in West Va. **Cap.** \$100,000.
Property: a lease and mill on 400 acres, in the Waco district.
Development: by 162' shaft. **Equipment:** includes 250-ton concentrator, hoist and compressor. Twelve men employed.
- ALLIED MINING CO. OKLAHOMA**
Address: L. B. Ellis, Wagoner, Okla.
Property: a lease and mill N. E. of Lincolnville, Oklahoma.
- ALTON ZINC & TRADING CO. MISSOURI**
Address: Alton, Oregon Co., Mo.
 Mined zinc carbonate and silicate ores, in 1920, from shallow workings, ores being cleaned in log washers.
- AMALGAMATED ZINC & LEAD CO. MISSOURI**
 Out of business since August, 1918. See Vol. XIII.
- AMARILLO MINING CO. MISSOURI**
Address: care Amos Hatton, Webb City, Mo.
- AMBER MINING CO. KANSAS**
 Dead. See Volume XIV.
- AMERICAN SMELTING & REFINING CO. OKLAHOMA**
 See in United States section of this volume for general statement. Com-

AMERICAN TRIPOLI CO.

Address: P. B. Butler, Frisco Bldg., Joplin, Mo. **Mine address:** Seneca, Mo.

MISSOURI**AMERICAN ZINC, LEAD & SMELTING CO.**

See same company under United States section of this volume.

Address: H. I. Young, mgr., Cartersville, Mo.

MISSOURI**AMERICAN ZINC & SLATE CO.**

Address: 126 Liberty St., New York City.

MISSOURI

Works: at Picher, Okla., contain Mineral Separation plant. Mining properties near Joplin reported as closed down.

AMY T. MINING CO.

Dead. Former address, Ed Ballinger, supt., Miami, Okla.

OKLAHOMA**ANALEE MINING CO.**

Address: Wm. C. Lucas, atty., Kansas City, Mo., former president. Company defunct. See Vol. XIV for description.

MISSOURI**ANDAYER MINING CO.**

Address: Bob Andrews, 5th & Moffett Sts., Joplin, Mo. Is a close corporation, consisting of four stockholders, with mines at Galena, Kansas. Company has no stock for sale and refuses to furnish a report of operations. The mine was the only one in the district that operated steadily during 1919, producing about 40 tons of blende (60% metal) per week.

KANSAS**ANNA BEAVER MINING CO.**

Subsidiary of **Metals Exploration Co.**, Hobart Bldg., San Francisco, Calif. **Address:** Cardin, Okla. L. L. Fillins, district mgr., Baxter Springs, Kansas.

OKLAHOMA

Officers: Bulkeley Wells, pres.; S. J. Burris, Jr., mgr.; A. D. Snodgrass, sec.-treas.

Inc. Feb., 1917.

Property: a lease on 2 mines, 180 acres N. of Cardin. Cages are used instead of buckets for hoisting, which is an innovation here. Developed by 3 shafts.

Equipment: includes 2 modern mills with total daily capacity of 1,200 tons.

Production: was 222 tons of blende weekly in 1921.

ANNAPOLIS LEAD CO.

Address: A. J. Meir, mgr., Annapolis, Mo. Principal shareholders: F. M. Strickland, St. Louis, Mo.; D. G. Cook and C. F. Dana of Vessie, Mo. and J. A. Nolan of Webster Groves, Mo.

MISSOURI

Inc. in Missouri. **Cap.** \$2,500,000.

Property: on the Missouri Pacific R. R. near Annapolis, in Iron county. In 1919 and 1920, a $\frac{3}{4}$ -mile spur line was constructed and a 3-compartment shaft was sunk 400' to open the lead ore revealed by 79 drill-holes. A 500-ton mill was to be constructed during 1921.

ARISTA MINING CO.

Address: W. J. Forbes, mgr., Sarcoxie, Mo.

MISSOURI

Property: a lease on 140 acres, 5 miles west of Sarcoxie and a 125-ton concentrator. Shipped 33,020 lb. blende in November, 1921.

ARKANSAS Z. & S. CORP'N

Address: L. Vogelstein, 42 Broadway, New York City. Company's smelting plant near Van Buren, Arkansas, sold in 1920 to American Metal Co., together with entire business of L. Vogelstein and Co.

ARKANSAS**ASSOCIATED LEAD & ZINC CO.**

In receivership. B. F. Bryant, Miami, Okla. Company had a lease on a tract in the town of Quapaw, on which a mill was erected in 1918.

OKLAHOMA**ATHLETIC MINING & SMELTING CO.**

Address: Webb City, Jasper county, Mo. Charles T. Orr, pres. and gen. mgr.; R. O. Sturlock, v. p.; A. G. Young, sec.; James B. Millar, treas.;

MISSOURI

C. A. Rice, supt.; R. E. Baird, chief engr. Formerly operated under name of Gopher M. & M. Co.

The mines covering about 100 acres, in the sheet ground district of Webb City, and Duenweg, Jasper county, have been closed down since March, 1919. Described in Volume XIV. The zinc smelter at Fort Smith, Arkansas, is in operation, treating about 2,000 tons of zinc ore per month in 1921. Product is Prime Western and Brass Special.

Company is active in the smelting and gas producing field, but not in mining. Is under same management as the Bertha A Mining Co. and the Wingfield Mng. Co.

ATOKA-MIAMI L. & Z. CO.

OKLAHOMA

Address: E. M. Applegate, supt., Miami, Okla. Mine is near Cardin.

Property: a lease on 40 acres west of Picher, on which 12 drill-holes exposed good ore at 240'. A 300-ton mill was to be built and hand jigs erected to treat a tailing dump.

A. T. S. MINING CO.

MISSOURI

Out of existence. See Vol. XIII.

AUBURN MINING CO.

OKLAHOMA

Address: Perry Webster, Miami, Okla. Mine address: Commerce, Okla.

AURORA MINING CO.

OKLAHOMA

Address: J. E. Turner, mgr., Box 214 Miami, Okla.

Officers: T. S. Adams, pres.; J. E. Turner, v. p. and mgr.; and C. A. Moore, sec.-treas. J. W. Hale, supt.

Property: near Sunnyside, in the Leadville district, E. of Quapaw.

Development: shaft sunk to open ore shown by drill at depth of 65 to 95'. Assays averaged 19.7% blende and 1.9% lead.

Equipment: 150-ton mill driven by 100-h. p. gas engine, and compressor. Operated part time, during 1920.

A. W. C. MINING CO., INC.

MISSOURI

Address: Amos Gipson, sec.-treas., W. 7th St., Joplin, Mo. Amos Gipson and I. T. M. Johnston, principal owners.

Inc. 1916, in Missouri. Cap. \$500,000.

Property: 160 acres at W. 7th St., Joplin, in center of sheet ground district. Ore carries 2½% zinc and lead. The deposit is 12' thick. Six shafts are down 200'

Equipment: includes three mills of 500 tons capacity; two on A. W. C. land and one at the south end of the Expansion Co.'s land.

Production: in 1916, company is reported to have sold 2,435 tons of zinc concentrates, assaying 62% zinc, for \$245,520 and 477 tons of lead ore for \$40,914. Lead concentrate assays 75% metal. No recent production.

AZTEC MINING CORPORATION

OKLAHOMA

Address: H. G. Larsh, Miners Bank Bldg., Joplin, Mo.

Officers: H. G. Larsh, pres.-gen. mgr.; D. L. Larsh, v. p.; T. W. Clelland, sec.

Inc. July, 1919, in Okla.

Property: 20-acres lease, ½ mile S. of Zincville, formerly held by the Lucky Strike Lead & Zinc Co. Mill employs a crusher, rolls and 10 hand-jigs. Rich ore is mined. Weekly production is about 75 tons of blende.

BADGER MINING & DEVELOPMENT CO.

KANSAS

Address: J. M. Bloyd, 323 Miners Bank Bldg., Joplin, Mo. T. E. Forster, pres.

Inc. 1917, in Missouri. Cap. \$250,000; \$1 par.

Property: a lease on 210 acres at Badger, developed by 4 shafts from 95 to 185' deep. Ore is high in lead. A 250-ton mill was built in 1918.

BAKER LEAD CO.

MISSOURI

Out of business. Property sold for \$357,000 in 1920 to the St. Joseph Lead Co., which see.

BAKER MILLING, SMELTING & REFINING CO. OKLAHOMA

John Baker, pres., writes that he holds the charter, keeping it in force for the present with no stock for sale. See Vol. XI, Copper Handbook.

BANKERS MINING CO. MISSOURI

Address: J. M. Boyd, mgr., 323 Miners Bank, Joplin, Mo.
Cap. \$250,000.

Property: had a lease on St. Regis tract, near Chitwood, Mo. and at Picher, Okla.

BANTY HEN MINING CO. MISSOURI

Address: C. W. Moore, Pittsburg, Kansas. Mine address: Joplin, Mo.

BARNETT MINING CO. MISSOURI

Judgment of \$174,000 rendered against this and other defendants in favor of R. B. Conklin of New York, on ground of misrepresentation as to value of Porto Rico No. 1 mine, near Duenweg. Property said to have been an active producer in 1918, from the Porto Rico No. 1 mine in sheet ground, between Duenweg and Carterville, Mo.

BARNSDALL ZINC CORPORATION MISSOURI

Company is a subsidiary of the Barnsdall Corp'n.

Address: P. O. Box 235, Joplin, Mo. and 41 East 42nd St., New York City.

Officers: F. H. Minard, pres.; P. B. Butler, v. p.-mgr.; E. O. Bartlett, v. p.; J. A. Dunn, sec.-treas.; with Robt. Law Jr., E. B. Reesser and A. W. Thurman, directors. R. S. Butler, asst. mgr.; Archie Butler, gen. supt.; Chas. Smith, mine foreman; Jas. Henson, mill foreman at No. 2 plant; Clarence Mosebaugh foreman; Claude Russell, mill supt. at No. 3 plant.

Inc. 1917, in Missouri. Cap. \$500,000; \$1 par; all issued and owned by the Barnsdall Corp'n. Company has large interests in the **Independent Zinc Lands and Waco Mng Companies**, which see.

Property: 3 tracts, No. 1, No. 2 and No. 3, 186 acres in the Waco district, 15 miles N. W. of Joplin. Ore carries blende and galena averaging 6 to 7% recovered. Deposit is 2,200' by 200', shafts are 110' to 190' deep.

Equipment: 3 mills employing jaw-crushers, Cornish rolls, Cooley jigs and Wilfley tables. The respective capacities are 300, 600, and 1,000 tons per day. Zinc concentrates carries 62% zinc; that of lead, 78%.

Production: averages 1,800 tons of zinc concentrate per month from No. 2 and No. 3; none from No. 1. At end of 1921 was about 1,500,000 lb. zinc concentrate weekly.

BARR H LEAD ZINC CO. OKLAHOMA

Address: O. E. Houston, Oklahoma City, Okla. Mine address: Sunny-side, Okla.

BARTLESVILLE ZINC CO. OKLAHOMA

Subsidiary of American Metal Co., Ltd., 61 Broadway, New York, which owns 100% of the \$500,000 capital.

Officers and directors: C. M. Loeb, pres.; Wm. Simon and Otto Sussman, v. p.'s.; Julian B. Beaty, sec.-treas.; Hy. V. Putzel, asst.-sec. Wm. H. Brady, asst.-treas.

Works: 2 zinc smelters at Bartlesville and one at Blackwell, Okla., on which \$2,500,000 has been spent. One of the smelters was formerly owned by the Lanyon Starr Smelting Co., which was merged into the Bartlesville Zinc Co. The plants include the following:

	Bartlesville No. 1	Bartlesville No. 2	Blackwell
Furnaces	6	9	12
Retorts in each.....	576	576	800
Total retorts.....	3,456	5,184	9,600
Monthly ore capacity, total tons.....	14,000
Monthly spelter output, tons.....	5,000 to 6,000

At Bartlesville, one plant produces 350 tons of zinc oxide monthly, the other plant yielding 100 to 150 tons of zinc dust. At each smelter a clinking plant treats the residue from the retorts, making it available for blast-furnaces. The clinker carries precious metals, mainly silver. A smelter at Collinsville, Okla., was dismantled in 1918.

BEAVER MINING CO.**OKLAHOMA**

Address: Miami, Okla.

Officers: J. F. Robinson, pres.; G. L. Coleman, v. p.; Geo. Bayless, supt.; R. J. Tuthill, purch. agent.

Inc. in Okla.

Property: at Cardin. **Production:** at end of 1921 was 1,522,870 zinc concentrate for week ending Dec. 10, compared with 4,666,860 lb. for succeeding week.

BECK MINING CO.**OKLAHOMA**

Address: G. W. Beck, gen. mgr., Frisco Bldg., Joplin, Mo. Ed. Ziler, supt.

Company is a partnership, not a corporation.

Property: a mine, $\frac{1}{2}$ mile N. E. of Picher, was operated continuously in 1921, a 240' shaft yielding lead ore. The mill operated 2 shifts daily, producing both lead and zinc concentrate.

BEN B. MINING CO.**MISSOURI**

Address: Miners Bank Bldg., Joplin, Mo.

Officers: O. Longacre, Jr., pres. mgr.; B. W. Brice, v. p. and supt.; G. J. Hiatt, sec.-treas.

Inc. Oct. 25, 1917, in Missouri. Cap. \$30,000; increased June 21, 1918, to \$50,000.

Property: 80 acres, $2\frac{1}{2}$ miles W. of Joplin, on 7th Street. Ore deposit is 20' thick, opened to 145' depth and carries 8% zinc.

Equipment: 150-ton mill with crusher, rolls, 2 jigs, tables and gas engines.

BENDENE MINING CO.**OKLAHOMA**

Address: J. R. Green, supt., Baxter Springs, Kansas.

Officers: W. B. Conrad, pres.; G. T. Bacastow, v. p.; W. T. Baird, sec.-treas.-pur. agt.

Inc. Jan., 1918, in Oklahoma. Cap. \$200,000.

Property: 20 acres south of Baxter Springs, Kansas, near State line. Zinc occurs in the usual sheet formation, and is 25' to 35' thick. Developed by shaft 96' deep.

Equipment: 400-ton mill (10 hours), closed since late in 1918, but to be reopened by 1920.

BENNY MINING CO.**OKLAHOMA**

Address: Miami, Okla. A co-partnership.

Officers: J. F. Robinson, pres.; G. L. Coleman, sec.-treas.; A. Purcell, supt.; R. J. Tuthill, purch. agt.

Property: $\frac{1}{2}$ mile S. of Cardin.**BERTHA A MINING CO.****MISSOURI**

Address: Chas. T. Orr, pres.-gen. mgr., Webb City, Mo.; Jas. B. Millar, treas.

Company was one of the largest producers of zinc and lead concentrates in the Webb City district, in 1918.

Closed down since March, 1919 and partly dismantled. Fully described in Vol. XIV.

BEST MINING CO.**OKLAHOMA**

Inc. in March, 1918. Cap. \$200,000. S. H. Lester, M. J. McLaughlin, and H. B. Callahan, of Shawnee, Okla., incorporators.

BETHEL L. & Z. CO.**OKLAHOMA**

Address: W. E. Broach, sec.-treas., Box 555, Tulsa, Okla. W. H. Aul, mgr.-purch. agt.

Property: the Bethel, Domado, and Croesus leases near Cardin. 3 mills and a tasing plant.

Production: weekly production normally is 140 tons of blende (60% metal); but was 334 tons in third week of February, 1920.

BETHLEHEM ZINC CO.**KANSAS**

Office: 229 Liberty Bank Bldg., Oklahoma City, Okla. Herman Jones, mgr., Joplin, Mo.

Officers: T. L. Wade, pres.; D. E. Rodgers, v. p. with J. F. Kroutil, Dr. R. L. Montgomery, P. A. Howle and J. A. McArthur, directors. J. D. Wade, sec.

Inc. Aug., 1917, in Oklahoma. Cap. \$300,000.

Property: a 55-acre lease on the Wright land near Treece, Kansas, next south of the Silver Fox mine. A 225' shaft was sunk, opening lead and zinc-bearing ore in a deposit 25-40' thick. The 300-ton mill at Quapaw has been moved from mine at Quapaw to the new mine.

BETTY H' MINING CO.**KANSAS**

Address: H. N. Miller, Scammon, Kansas. **Mine address:** Bellville, Kansas.

BEULAH B MINING CO.**OKLAHOMA**

Address: W. E. Broach, sec., Box 96, Cardin, Okla. J. R. Cole, mgr.; C. W. Ritter, supt.-pur. agt.

Property: a lease in the Tar River district, E. of Picher.

BEULAH MINING CO.**MISSOURI**

Address: Ed. James, Webb City, Mo.

Property: the Beulah mine at Kelcey, Franklin county, is a producer of marcasite ore, running 40 to 44% sulphur. This is shipped to Chicago and used for acid burning.

B-G-M. MINING CO.**MISSOURI**

Idle. Address: Webb City, Mo.

Officers: Z. A. Metzler, pres.; J. B. Gibson, v. p.; S. C. Boggess, sec.-treas.

Inc. in Missouri. Cap. \$100,000.

Property: 60 acres N. of Webb City, Mo. Ore carries 2% zinc and lead and is opened to depth of 180'.

Equipment: 800-ton mill (24 hours), containing crusher, rolls, jigs and sludge tables. Concentrate assays 59 to 61% zinc. Cost of mining and milling is \$1.25 per ton.

No recent returns.

BIG BEN MINING CO.**MISSOURI**

Address: A. Baker, v. p., Springfield, Mo.

Inc. in Missouri. Cap. \$5,000.

Property: about 160 acres, 6 miles S. E. of Springfield, developed by 190' shaft. **Equipment:** includes 100-ton concentrator, compressor, drills, steam power.

In 1919, mine was reported producing 6 tons of zinc and 2 tons of lead concentrates daily. Twenty men employed.

BIG CHIEF MINING CO.**OKLAHOMA**

Described in Vol. XIV. Property now operated by **Kentucky Chief M. Co.**, which see.

BIG EIGHT MINING CO.**OKLAHOMA**

Dead. Formerly operated at Miami.

BIG ELK MINING CO.**KANSAS**

Address: J. T. Whaley, pres., Miami, Okla. C. L. Kelly, gen. mgr.

Property: 20-acre lease N. W. of Treece. Ore was found by drills at 194'. Developed by two 259' shafts. Ore is remarkably rich.

Equipment: 250-ton (per 10 hours) mill moved from Dorris mine at Quapaw, Okla. A dump on the ground assaying 30.6% zinc and 17.18%

lead has been treated. Is a regular producer; output for week ending Dec. 17, 1921, was 149,970 lb. lead concentrate and in previous week, 1,083,080 lb. zinc concentrate.

BIG FOUR MINING CO.**MISSOURI**

Operated at Potosi, Washington county, in 1919.

BIG HAWK MINING CO.**MISSOURI**

Address: Cartersville, Mo.

Property: 40 acres, developed by 2 shafts to depth of 122' and equipped with steam power. Three men employed in 1920.

BIG JIM MINING CO.**OKLAHOMA**

Address: Box 128, Miami, Okla.

Property: 40 acres at Douthat, Okla., where one hole has been drilled in each acre, showing good ore.

BIG L. & Z. CO.**OKLAHOMA**

Address: Dr. J. A. Settle, Boyington, Okla. Mine located N. W. of Picher, Okla.

BIG LEAD MINING CO.**KANSAS**

Idle since 1918. See Vol. XIV.

BIG MUDDY COAL & IRON CO.**MISSOURI**

Property: Pilot Knob iron mine in Iron county.

BIG SEVEN MINING CO.**OKLAHOMA**

Address: W. W. Oder, sec., Oklahoma City, Okla. Company has a surface tram to connect its mines with the mill and mines of its Queen City property, S. of Commerce.

BIG SHOT LEAD & ZINC CO.**KANSAS**

Address: J. A. Frates, pres., Miami, Okla.

Inc. 1918, in Kansas. Cap. \$200,000.

Property: a lease S. W. of Baxter Springs. Drilling exposed ore at two points in tract.

BIG THREE MINING CO.**OKLAHOMA**

Officers: Seth V. Conrad, pres., Marshfield, Mo.; V. Jenson, v. p.; Ira Edwards, sec.; C. C. Atterbery, supt.

Property: 160 acres N. W. of Quapaw. On 80 acres 26 holes exposed ore carrying from 5 to 20% blende. Another 40 acre tract was sold to Howard Paschal, of New York, for \$75,000, plus 2½% royalty.

BIG V MINING CO.**OKLAHOMA**

Address: J. C. Voorhees, c/o Vinita Bank, Vinita, Okla.

Property: S. E. of Quapaw. A 250-ton mill was erected early in 1919.

BIG VEIN LEAD & ZINC CO.**OKLAHOMA**

Incorporated with capital of \$250,000 in March, 1918, by W. A. Dotty, of Miami, G. B. Crumbine and J. A. Utterback, of Oklahoma City.

BILHARZ MINING CO., O. M.**OKLAHOMA**

Address F. H. Gartung, Commerce, Okla.; and O. M. Bilharz, Baxter Springs, Kan.

Company has 3 mines, the Shorthorn, Chapman and Bluebird, and 3 mills, shut down at mid-1919 on account of the market. The weekly output was 370 tons of blende and 33 tons of lead early in 1920. A year later it was 510 tons of blende worth \$27 per ton. In December, 1921, production was 1,513,250 lb. zinc concentrate for week ending Dec. 10, and 610,450 lb. lead concentrate for week ending Dec. 17, 1921.

BILL BOY MINING CO.**OKLAHOMA**

Address: Clyde Poole, Miami, Okla. Mine address: Tar River, Okla.

BILLIKEN MINING CO.**OKLAHOMA**

Address: J. B. Ellis, pres., Oklahoma City, Okla.

Property: a lease on ground adjoining that of the St. Louis M. & S. Co.

BLACKBERRY MINING CO.**MISSOURI**

Address: Granby, Newton Co., Mo.

Property: in Section 12, T. 25, R. 31., is developed by 100' shaft. Operated with a small force in 1921.

BLACK EAGLE MINING CO.**OKLAHOMA****Address:** Box 265, Miami, Okla.**Officers:** J. B. Milan, pres.; P. R. Mattocks, v. p.; W. G. Phelps, sec.-treas.; M. F. Owens, supt.**Inc. in Okla. Cap.** \$200,000.**Property:** 40-acre lease, 1 mile E. of Picher, contains only high-grade zinc ore, no lead.**Equipment:** includes a 300-ton mill.**BLACK HAWK LEAD & ZINC MINING CO.****OKLAHOMA****Address:** Box 143, Picher, Okla., and 708 Boatman's Bank Bldg., St Louis, Mo.**Officers:** J. H. Yount, pres.; G. K. Williams, v. p.; R. H. Cornell, sec.-treas.; G. N. Williams, mgr.; J. A. Cohenour, supt.-pur. agt.**Inc. 1917 in Okla. Cap.** \$250,000.**Property:** 20-acre lease on Walker land, S. of Picher. Drilling revealed ore from 218 to 248' depth. Developed by two 250' shafts.**Equipment:** includes a 400-ton mill.**Production:** at end of 1921, 766,030 lb. for week ending Dec. 17.**BLUE BIRD MINING CO.****OKLAHOMA****Address:** O. M. Bilharz, Baxter Springs, Kansas. **Mine address:** Commerce, Okla.**BLUE BONNET MINING CO.****OKLAHOMA**Described in Volume XIV. See **Victory Metal Co.****BLUE DIAMOND MINING CO.****KANSAS****Address** c/o Nial Wagner, Box 743, Baxter Springs, Kans. **Mine address:** John Hoffman, Treece Kansas.

A producer of lead and zinc, adjoining the Blue Mound and controlled by same interests.

BLUE GOOSE MINING CO.**OKLAHOMA**See **Commerce M. & Royalty Co.****BLUE JAY MINING CO.****OKLAHOMA****Address:** Grant Maus, gen. mgr., Miami, Okla. **Mine** located W. of Cardin, Okla.**BLUE MOUND MINING CO.****KANSAS****Office:** 618 Bryant Bldg., Kansas City, Mo.; or Baxter Springs, Kansas.**Officers:** Wm. Kenefick, pres.-treas.; J. W. Hoffman, v. p.-mgr.; A. E. Rucker, sec.; N. Wagner, supt.**Inc. 1917, in Kansas. Cap.** \$20,000; \$100 par. Gross returns from ore sales were \$933,765 in 1920.**Property:** three 20 acre leases, 7 miles S. W. of Baxter Springs, Kansas, just N. of Picher, Okla. Ore carries zinc and lead, totaling 9.11%. Some promising lead ore was discovered in 1920.**Development:** with the Blue Diamond, 9 shafts, 210' deep. Mules are used underground for haulage.**Equipment:** modern mining and milling plants on both properties. The concentrators treat 600 tons in 24 hours, and produce from 1,000 to 1,500 tons of concentrate monthly, that averages 61.5 to 62.5% metallic zinc. The Blue Mound was a large producer in 1919 and 1920.**BLUE RIBBON MINING CO.****OKLAHOMA**

Was a producer of zinc concentrate in December, 1921, output being \$4,880 lb. for week ending Dec. 17th.

BLUE ROCK MINING CO.**MISSOURI**Control acquired 1917 by the **Crescent Lead & Zinc Corporation**, which see.**Address:** Glen Smith, Carl Junction, Mo.

- BLUE STAR MINING CO.** **MISSOURI**
Address: C. V. Jones, Joplin, Mo. Mine between Lincolnville & Peoria, Missouri.
- BON AMI MINING CO.** **OKLAHOMA**
Address: Miami, Okla. In Nov., 1918, a 150-ton mill was to be built.
- BONANZA MINING CO.** **MISSOURI**
Address: Aurora, Mo.
Production: 60 tons of blende weekly.
- BOOR MINING CO.** **KANSAS**
Dead. Formerly operated near Galena, Kan.
- BOSKA MINING CO.** **KANSAS**
Address: Coe Rhea, 402 Commerce Bldg., Miami, Okla. John T. Ready, trustee c/o Miami Trust & Savings Bank, Miami.
Inc. in Oklahoma.
Property: 40-acre lease on the Wright land, just W. of Treece, formerly held by **Redskin Mining Co.**
Equipment: includes a 250-ton mill driven by gas engines.
Production: about 125 tons of zinc concentrates and 4 tons of lead concentrates a week.
A suit is pending (Nov., 1921) involving foreclosure of the mortgage and appointment of a receiver.
- BOSTON DUENWEG MINING CO.** **MISSOURI**
Presumably out of business. See Vol. XIV.
- BOSTON-ELVINS LEAD CO.** **MISSOURI**
Address: Elvins, St. Francois county, Mo.
Property: 40 acres at Elvins, on Flat river. Main shaft was completed in 1916, but mining has only been carried on for two short periods up to early 1919 on account of water. In 1917, about 10,000 tons of ore was shipped to the St. Louis Sm. & Ref. Co.'s plant at St. Francois.
Idle.
- BOSTON-MIAMI ROYALTY CO.** **OKLAHOMA**
Office: Denman Blanchard, pres., 19 Congress St., Boston, Mass. R. M. Sturdevant, mgr., Miami, Okla.
Property: 400 acres in the Picher-Tar River district.
- BOSTON MINING CO.** **KANSAS**
Out of business. Formerly operated near Treece, Kan.
- BRADLEY LEAD & ZINC CO.** **MISSOURI**
Address: 1705 Bird Ave., Joplin, Mo.
Property: a lease on the St. Louis-Joplin Lead & Zinc Co.'s land, comprising part of the A. B. C. Mining Co.'s ground, and the Martha Ball mine, in the Chitwood district, near Joplin, Jasper county, Mo.
Ore: lead-zinc occurs in disseminated deposits in the A. B. C. and as sheet-ore, 20' thick at depth of 200' in the Martha Ball.
Development: by shafts. Equipment: 250-ton mill on Martha Ball ground and a second 250-ton mill in the West Joplin district.
- BRENZ MINING CO.** **KANSAS**
Said to have operated in 1919 near Galena, Kan., but no record of company obtainable, 1921.
- BREWINGTON MINING CO.** **MISSOURI**
Address: Carterville, Mo., or C. L. Turner, Carthage, Mo.
Property: 20-acre lease at Carterville, developed by 2 shafts to depth of 90'. Four men employed.
- BREWSTER MINE** **OKLAHOMA**
Owned by Federal M. & S. Co. of Idaho.
Address: 120 Broadway, New York; and Box 133, Baxter Springs, Kan. P. W. George, supt.
Property: 220 acres at Zincville, Okla., bought for \$125,000. Drilling since March, 1919, revealed 147,000 tons of ore, containing 13,600 tons of

zinc and 830 tons of lead concentrates. A 300-ton mill, employing flotation process was erected.

Production: in 1920 was 90,394 tons of ore; operations suspended late in that year.

BRINSTON-KIRTLEY MINING CO.**OKLAHOMA**

Address: Box 49, Quapaw, Okla.

Officers: M. E. Brinston, pres. T. P. Kirtley, sec.-treas., Miami, Okla.; A. G. Kelly, mgr.-pur. agt.

Inc. in Okla. Cap. \$125,000.

Property: 20-acre lease just N. W. of Quapaw. A heavy flow of water has hindered shaft sinking.

Equipment: 200-ton mill driven by gas engine.

BROWN & HEAD ZINC CO.**KANSAS**

See Brown Bros. Mining Co. Listed in Vol. XIV.

BROWN BROS. MINING CO.**KANSAS**

Former address: J. Wise Brown, Box 421, Baxter Springs, Kansas.

Property: 20-acre lease on the Cooper estate, S. of the Southern mine, N. W. of Treece.

Development: by shaft to depth of 256'.

Equipment: includes a modern mill of 400 tons capacity per 10-hour shift.

Produced regularly during 1919, but reported out of business, 1922.

BUCKSHOT MINING CO.**KANSAS**

Address: Box 205, Miami, Okla.

Officers: J. A. Frates, Sr., pres.; J. A. Frates, Jr., v. p., with W. Matthews and R. E. Brooke (gen. mgr.), directors. J. H. Grant, sec.; G. E. Matt, treas.

Inc. in Oklahoma. Cap. \$300,000; \$10 par; 8,000 issued.

Property: lease on three 40-acre tracts N. of Picher, Okla., just over the line in Kansas, under development. Royalty payable is 10%.

Development: 12 test holes showed ore from depth of 315 to 340', some samples assaying up to 16% zinc. The ore is a dissemination in flint. Development done is considered to justify an expenditure of \$200,000. A 200-ton mill was moved from Joplin to the mine.

BULL FROG MINING CO.**MISSOURI**

Address: W. E. Skelley, Joplin, Mo. **Mine address:** Smelter Hill, Mo.

BUMBLE BEE MINING CO.**MISSOURI**

Address: Joplin, Mo.

Production: 140 tons of blende per week during part of 1918. No later figures.

BUNDY ZINC CO.**MISSOURI**

Address: Dr. J. W. Boyd, Sarcouxie, Mo. **Mine address:** Sarcouxie, Mo.

BUNKER HILL MINING CO.**KANSAS**

Dead. Last operations, 1918, near Baxter, Kan.

BUNKER HILL MINING CO.**OKLAHOMA**

Address: care Hayward & Frey, 344 Robertson Bldg., Tulsa, Okla.

Mine address: Hockerville, Okla.

BURNHAM LEASE MINING CO.**OKLAHOMA**

Address: Chas. Vorr Weise, mgr., Ardmore, Okla.

Inc. in Oklahoma.

Property: 1½ miles N. W. of Picher.

BURTON MINING CO.**MISSOURI**

Dead. Described in Vol. XIV.

BUTLER BROS. MINING CO.**MISSOURI**

Dead. Formerly operated near Waco, Mo.

BUTTE-KANSAS MINES CO.**KANSAS**

Address: Box 433, Joplin, Mo. L. P. Buchanan, mgr.; E. Y. Ellis, supt.

Officers: C. J. Stralem, pres.; John MacGinnis, v. p. Hallgarten & Co., 5 Nassau St., New York, hscal agents.
Inc. 1917.

Property: a lease on the Butte mine, 120 acres, in Cherokee county, Kansas, and the Acme mine, 130 acres, in the Waco field, Joplin district, Missouri. Ore carries 8% blende. Reserves placed at 750,000 tons. Orebodies are long but narrow with 50' face.

Development: by six 200' and one 120' shafts in Kansas.

Equipment: steam power plant, air-compressors, oil engines, and two mills (in Kansas) of 500 tons capacity in 10 hours. The 400-ton mill at Waco, Mo., was burned in Dec., 1918; the second mill was destroyed in May, 1920, by a cave-in. A new mill was completed by August.

Production: 800 tons of concentrate monthly, assaying 62.5% zinc and 0.05% lead. Costs are \$1.70 per ton for mining and 40c. for milling, a total of \$2.10.

CACTUS HILLS MINING CO.

MISSOURI

Out of business. See Vol. XIV.

CACTUS MINING CO.

OKLAHOMA

Address: Miami, Okla.

Officers: J. F. Robinson, pres.; G. L. Coleman, sec.-treas.; R. J. Tut-hill, pur. agt.

Inc. in Oklahoma.

Property: at Commerce.

CANTON MINING CO.

OKLAHOMA

Address: Box 511, or Room 317 Hancock Bldg., Miami, Okla.

Officers: J. L. Eggert, pres.; J. C. Abbott, v. p.; Geo. Wilson, sec.-treas.; Otis white, mgr.; J. L. Eggert, supt.

Inc. April, 1917, in Oklahoma. Cap. \$75,000.

Property: 40 acres at Lincolnville, Okla.

Development: the deposit is 35 by 1,320 by 1,320', and is worked by 4 shafts, 75' deep.

Equipment: gas engines, compressor, drills, and 500-ton (24 hours) mill. Developing.

C. & O. MINING CO.

OKLAHOMA

Address: W. T. Landrum, mgr., Picher, Okla.

Property: 2 miles W. of Treece, developed by shaft.

CARLAT MINING CO.

MISSOURI

Address: Curley Cornett, Webb City, Mo. **Mine address:** Webb City, Mo.

CARL JUNCTION COMMUNITY DEVELOPMENT CO

MISSOURI

Address: Carl Junction, Mo.

Officers: D. G. Evans, pres.; C. M. Dawns, v. p.; C. W. Roney, sec.; C. W. Hilliker, treas., with J. A. Magoon, C. E. Hawk and J. B. Coons, directors.

Is a partnership of local business men, who each pay \$10 monthly drilling ground a mile west of Carl Junction. When ore is found, the lease will be turned over to responsible operators for development. This is a worthy effort to develop a mine in the Carl Junction field, 10 miles from Joplin.

CARMEAN & SQUIRES MINING CO.

MISSOURI

Office: Room 14-16 Wagner Bldg., Webb City, Mo.

Inc. in Missouri. Cap. \$2,000.

Property: mines in S. W. Missouri, including Gwinn land, 2 tracts, one 20, the other 40 acres of Kelly land, all located in Jasper county, the old John L. mine 20 acres, in the north Webb City sheet ground district, purchased for \$30,000, in November, 1915, and the Old Virginia mine, near Car-terville.

Development: the Gwinn tract has 2 shafts, depth 186', and a 250-ton concentrator. The 20-acre Kelly tract is opened by 200' shaft, and has a

150-ton concentrator; the 40-acre tract is opened by 180' shaft and has a 200-ton concentrator.

Production: lead-zinc concentrates, not reported.

CARNEGIE MINING AND MILLING CO. OKLAHOMA

Address: P. L. Bucy, Bartlesville, Okla.

Property: a lease near Douthat, on which the 300-ton mill bought from the National Zinc & Lead Co., of Webb City, Mo., was re-erected.

CAROLYN METAL CO. MISSOURI

Idle. Address: Nels Darling, Oklahoma City, Okla.

Property: that of Neosho Granby Metal Co., at Granby, bought in July, 1918. The 150-ton mill was remodeled to 250 tons capacity.

No recent returns secured.

CARTHAGE MINING CO. OKLAHOMA

Address: Emma R. Knell, Carthage, Mo.

Cap. \$32,000; shares \$100 par; \$16,000 paid in.

Property: 20-acre lease in the N. E. Oklahoma zinc field.

C. & S. MINING CO. MISSOURI

Address: Campbell Dawson, 417 Frisco Bldg., Joplin, Mo. Mine address: Commerce, Okla.

CATHOLIC MINING CO. KANSAS

Dead. Formerly operated the Alabama Coon mine S. E. of Lincolnville.

CAVE SPRINGS LEAD & ZINC CO. MISSOURI

Last address: M. Grundler, supt., Cave Springs, Mo. Mail unclaimed in 1920. Described in Vol. XIV.

C. C. & B. MINING CO. MISSOURI

Address: J. D. Morgan, Duenweg, Mo.

CENTER CREEK MINING CO. MISSOURI

Office: O'Neill Bldg., E. Daugherty St., Webb City, Mo.

Officers: I. D. Snedeker, pres.; M. L. Sears, v. p.; with Mrs. A. V. Stewart, Thos. McCroskey and J. H. Capelli, directors. R. F. Stewart, sec.-treas. and gen. mgr.

Inc. 1889, in Missouri. Cap. \$200,000, reduced in July, 1919, from \$1,500,000; shares \$10 par. Dividends: paid from 1900-1917, aggregate 60%.

Company does not carry on active mining operations, but leases its land to other companies.

Property: 200 acres and mill-site between Webb City and Carterville, Jasper county, Mo., developed by 13 shafts from 110' to 165' deep, producing both lead and zinc ore. In 1920, reported to have started operations at the Jewel mine in the N. W. part of Carterville, Mo.

Total output is valued at nearly \$14,000,000.

CENTRAL LEAD CO. MISSOURI

Entire capital stock owned by American Smelters Securities Co.

Property operated by the Federal Lead Co., which see.

CENTRAL LEAD & ZINC CO. OKLAHOMA

Address: W. A. Geissing, mgr.-sec.-treas., Tar River, Okla.

Described in Vol. XIV.

CENTRAL ZINC MINING CO. MISSOURI

Address: Frank Danglade, supt., Waco, Mo.

A new mill was erected late in 1918.

CENTURY MINING CO. OKLAHOMA

Address: Gillespie Bldg., Miami, Okla.

Officers: J. E. Trogden, pres.; H. B. Webster, sec.-treas.-mgr.

Property: 40-acre lease S. E. of Douthat and E. of Century. A large deposit of ore was first entered at depth of 55'. A 150-ton mill is operated.

CENTURY ZINC CO. KANSAS

Address: Sid Davis, Baxter Springs, Kansas.

CHANUTE SPELTER CO. KANSAS

Subsidiary of American Metal Co., Ltd.

Offices: 61 Broadway, New York; 1625 Boatman's Bldg., St. Louis, Mo.; 315 Frisco Bldg., Joplin, Mo. and Baxter Springs, Kan.

Officers: Otto Sussman, pres.; D. F. Haley, v. p.-mgr.; Heath M. Steele, v. p.; Wm. Simon, sec.-treas., with E. R. Rombauer, directors. G. B. Corless, asst. mgr.; T. J. Rightly, supt. of operations; Arthur Warden, purch. agt.

Inc. May 26, 1915, in Missouri.

Property: owns 628 acres and leases 17,000 acres in Cherokee county, Kan., selected after careful study of the geologic conditions governing ore occurrences in the district. About \$1,000,000 has been spent in development and lease fees. Over 30 drills used to block out ore. Royalties vary from 5 to 12½% on sales-value of the ore produced. Water was troublesome during shaft sinking, and at one time 7,000 gal. per minute were pumped. One of the principal mines is the Hartley, 320 acres, 1 mile W. of Baxter Springs; one mile N. of the Hartley is the Brewster mine. **Development:** by 10 shafts.

Equipment: includes 400-ton (10 hours) Hartley mill. Another mill reported to be under erection at the Brewster in 1921. The company's smelter at Chanute, Kan., was dismantled in 1917.

Production: from the Hartley for its first year of operation, ending about May, 1921, is a record for the Tri-State district. Average output about 1,800 tons of zinc concentrate per month.

CHARLOTTE LEAD & ZINC CO.

OKLAHOMA

Address: Baxter, route 2, Baxter, Kansas.

Officers: I. M. Holcomb, pres.; Lee Lumsberry, sec.; I. M. Holcomb, treas.; John W. Hale, mgr.

Inc. in Oklahoma.

Property: 3 miles from Quapaw.

CHECOTAH ZINC SMELTER

OKLAHOMA

Address: D. R. Muir, mgr., Baxter Springs, Kans. A custom smelter at Checotah, Okla., owned by U. S. Smelting, Refining & Mining Co., which see for further details.

CHEROKEE ZINC CO.

OKLAHOMA

Address: Treece, Kansas.

Officers: J. B. Milam, pres.; F. J. Childers, v. p.-mgr.; A. Phillips, sec.-treas.

Inc. in Oklahoma.

Property: 1½ miles N. W. of Treece.

OKLAHOMA

Office: 171 W. Randolph St., Chicago, Ill.

Officers: J. E. Cairns, pres.; Emil Eitel, v. p.; W. E. Shirra, sec., all of Chicago; Max Eitel, treas.; R. J. Eitel, mgr., Picher, Okla.

Inc. 1907 in Ill. **Cap.** \$450,000.

Property: 40-acre lease, 1¼ miles N. W. of Picher.

Equipment: includes 300-ton mill, erected in 1918, producing 2 cars of zinc and 1 car of lead concentrates per week.

CHICAGO MINES CO.

MISSOURI

Idle. **Address:** 301 Miners Bank Bldg., Joplin, Mo.

Property: 10 acres owned by the Conner Investment Co., near Webb City, Jasper county. Opened by two 200' shafts, and equipped with a 200-ton mill. No recent returns.

CHICKASHA MINING CO.

KANSAS

Address: Geo. Dashner, Baxter Springs, Kansas.

CHOCTAW CHIEF LEAD & ZINC CO.

OKLAHOMA

Address: Geo. Sullivan, Miami, Okla.

Property: the Sullivan and Williams lease at Hockerville. Ore, 15' thick, assaying 8 to 17% blende and lead, was opened, a 250-ton mill erected and shipments made in 1918. No recent returns.

CLEAR-PEACHER MINING CO.**MISSOURI**

Address: Fletcher Clear, supt., Cunningham Bldg., Joplin, Mo.

Property: 3 miles E. of Joplin, is a zinc silicate (calamine) mine. An average of 28' of ore was reported mined at depth of 107'. Has a 150-ton mill.

CLEVELAND & AURORA MINERAL LAND CO.**MISSOURI**

Address: Aurora, Mo.

Officers: John T. Gill, pres.; H. J. Baldwin, sec.; J. J. Sullivan, treas.; C. C. Plank, supt.

Inc. in Illinois.

Property: company owns zinc and lead lands, which it leases to others.

CLIMAX MINING CO.**OKLAHOMA**

Address: Grant Mans, supt., Cardin or Miami, Okla.

Property: 40-acre lease N. W. of Cardin and 3 miles W. of Picher. Shaft cut ore at 230' in October, 1918, and a 150-ton mill was planned.

C. M. & H. MINING CO.**MISSOURI**

Address: George Meece, mgr., W. 7th St., Joplin, Mo.

Inc. in Missouri. Cap. \$80,000.

Property: 20-acre lease on the Malloy tract just south of Duenweg. Drilling showed good disseminated ore at 86 to 165' depth. Equipment includes 200-ton mill, compressor, steam power.

Ten men employed. Produced high grade sphalerite ore for several months in 1920.

COAHUILA LEAD & ZINC CO.**MISSOURI**

Mill office: Carthage, Mo.

Officers: C. F. Jennings, pres.; C. D. Smith, v. p.-mgr.; W. E. Parker, sec.-treas.

Inc. in Missouri. Cap. \$300,000. 250 shares sold for \$35 the lot in New York on Dec. 8, 1920.

Property: operated a lease on 120 acres, owned by Amsden & Amsden, in the Carthage district, Jasper county, Mo. Ore occurs in sheet-ground and soft ground. Also owns land in Barry county, Mo., where several shafts have been sunk and ore discovered, but not worked at present. Also reported to own mining and rubber lands in Mexico.

Development: by 5 shafts, 160 and 180' deep. Equipment: includes a 400-ton mill, compressor, Wilfley tables. About 40 men employed.

Production: in 1918 was about 270 tons of blende concentrate weekly.

COALGATE LEAD & ZINC CO.**OKLAHOMA**

Address: H. F. Scruby, treas.-mgr., Miami, Okla.

Inc. in Oklahoma.

Property: 1½ miles W. of Cardin, now being operated by Stephen & Crissman.

COLUMBUS M. & D. CO.**KANSAS**

Property sold 1917 to American Metal Co. for \$3,000, and a royalty of 2½% on future output.

COMMERCE MINING & ROYALTY CO.**OKLAHOMA**

Address: J. F. Robinson, Miami, Okla.

A partnership consisting of J. F. Robinson and G. L. Coleman of Miami, Okla.; C. M. Harvey, of El Paso, Texas; and Al Coleman, of Rocky Ford, Colo.

Property: 2,000 acres, including the Cactus mine at Commerce, the Beaver and Webber at Treece, Kansas the Pelican mine and mill at Picher, and the Bennie, Jay Bird, Grace Walker, Lost Trail, Woodchuck, and Wilbur at Tar River. These mines are equipped with mills.

A new concentrator was erected late in 1921, on a lease N. E. of the Barr mine, N. of Picher, at foot of the Blue Mound, or Hill. Two drill rigs were operated by the company in West Cardin, November, 1921.

COMMONWEALTH LEAD & ZINC CO.**OKLAHOMA**

Address: 1. Shelton, mgr., Box 14 A. Picher, Okla., or 401 McClelland Bldg., Kansas City, Mo.

Inc. in Oklahoma.

Property: a lease $\frac{1}{2}$ mile N. E. of Picher. Drilling revealed 12% ore at depth of 235' and two shafts were sunk.

Production: at end of 1921 was 305,510 lb. zinc concentrate for 2 weeks ending Dec. 17th.

CONCORD MINING CO.**MISSOURI**

Address: Cartersville, Mo. Phil Gray, Webb City, chief owner.

Inc. in Missouri. Cap. \$100,000. Company controlled by same people and management as Unity Co.

Property: the Concord mine, 50 acres, at Cartersville, developed by 2 shafts to depth of 165'.

Equipment: includes 300-ton concentrator, compressor, tables, crusher, drills, steam power. Thirty five men employed when active.

CONNECTICUT ZINC CORPORATION**MISSOURI**

Office: 500 Fifth Ave., New York. A. J. Burnham, gen. mgr., Independent Bldg., Joplin, Mo. **Mine address:** Oronogo, Mo.

Officers: Ross M. Turner, pres.; A. J. Burnham, v. p.; Geo. P. Smith, treas., with J. H. Ballantine, W. M. Crombie, R. M. Turner, A. R. Turner, W. S. Hallowell and W. H. Lyon, directors. M. A. Pappert, sec.

Inc. June, 1914, in New York, as holding company for Oronogo Circle Mining Co. In July, 1917, company took over leases and cancelled stock and charter of the Oronogo Circle Co., and now owns and operates this property. Cap. authorized and outstanding, \$2,000,000; increased in 1921 from \$1,000,000; \$25 par. Fidelity Title & Trust Co., transfer agent, Stamford, Conn. Bonds: authorized, \$1,250,000 first mortgage 7% 10-year dated Nov. 15, 1920; \$1,000,000 outstanding. Sinking fund 80% of net earnings. Annual meeting second Monday in July.

Property: a 40-year lease, from Nov. 15, 1919, on 280 acres, including the Oronogo Circle mine at Oronogo, Mo., that has been a producer for 60 years. Developed by 2 shafts to depth of 240'.

Equipment: includes locomotives, $2\frac{1}{2}$ -ton dipper-shovel, power drags, 5-ton side-dump ore-cars, No. 8 McCully crusher on 240' level (all underground); 2 compressors, 5-ton skips, 2,500-ton storage-bin at surface, belt-conveyors.

Mill of 3,000-ton capacity with two 24-in. Webb City Cartersville crushers, two sets of 60-in. rolls, four sets of 40-in. high-speed rolls, 8 Akins classifiers, various jigs, 27 sludge-tables, 5 Dorr thickeners, and complete oil flotation plant. The power plant consists of 3,050 h. p. connected load of electrical power.

Production: 35,000 tons of blende (60%) per annum. Twenty men employed.

CONQUEROR ZINC CO.**MISSOURI**

F. H. Houk, sec., Joplin, Mo.

In liquidation at last reports.

CONSOLIDATED LEAD & ZINC CO.**OKLAHOMA**

Address: Picher, Okla.

Property: S. E. of Picher. The mill includes sludge-tables, Dorr thickeners, and flotation plant.

CONSOLIDATED ZINC & SMT. CO OF OKLAHOMA OKLAHOMA

Dissolved 1919. See Emma Gordon Mng. Co.

CONSTITUTIONAL LEAD & ZINC CO.**OKLAHOMA**

Address: L. Viers, receiver, Miami, Okla. **Mine address:** Century, Okla.

CONSUMERS MINING CO.**MISSOURI**

Idle. Former address: W. 7th St., Joplin, Mo.

Cap. \$10,000.

Property: lease on 15 acres of mineral-bearing land near Joplin formerly worked by Otis Mining Co.

Development: by 2 shafts to 185' level.

Equipment: includes 300-ton concentrating mill, crusher, 8 tables, 11 air drills, 2 hoists and pump. Employs 80 men.

CONTINENTAL ZINC CO.

MISSOURI

Company liquidated in Nov., 1920, stockholders receiving \$1.90 per share. Fully described in Vol. XIV.

COOK & McCULLOUGH MINING CO.

KANSAS

Probably dead. Former address: W. McCullough, Baxter Springs, Kan.

CORTEZ MINING CO.

OKLAHOMA

Address: Jefferson City, Mo., or Box 1568, Picher, Okla.

Officers: Houck McHenry, pres.; Charles Tweedy, v. p.; H. B. Church, Jr., sec.-treas., with Cortez F. Enloe, A. W. Happy, G. E. Haigh, D. M. Oberman, C. C. Carson, W. T. Paylor, H. L. Grigsby, and W. T. Landrum (supt.) directors.

Inc. 1918, in Oklahoma. Cap. \$105,000; \$10 par.

Property: 40 acres, 1 mile N. E. of Picher. The deposit is a dissemination of galena and blende in flint and limestone.

Development: by two 260' shafts.

Equipment: hoist, compressor, pump, gas power, and 200-ton mill, started in February, 1919.

Production: 4,500 tons of 8% ore treated during 1919; 105 tons of blende per week in February, 1920. Operations resumed late in 1921 and output was 267,000 zinc concentrate for 2 weeks ending Dec. 17, which was below average.

COSMOS MINING CO.

OKLAHOMA

Subsidiary of Lucky Tiger Combination M. Co., operating in Mexico.

Address: Frank Childress, Cunningham Bldg., Joplin, Mo.

Property: 40 acres, known as the Lucky Tiger, E. of Picher. A 300-ton mill, employing flotation, was started in October, 1918. The first year's run averaged 12% zinc and lead.

COW CREEK MINING CO.

MISSOURI

No news since 1918. Probably dead. Formerly at Carl Junction, Mo.

CRESCENT LEAD & ZINC CORPORATION

MISSOURI

(Succeeds Blue Rock Mining Co., by purchase of assets in 1917.)

Office: 804 Grand Ave., Kansas City, Mo. Glen Smith, mgr. at Waco, Mo., W. A. Doty, mgr. at Miami, Okla.

Officers: Lawrence E. Smith, pres.; Lewis H. Falley, v. p.-mgr.; W. R. Rowe, sec.; W. T. Grant, treas.

Inc. March 21, 1917, in Missouri. Cap. \$500,000; 411,000 shares issued. To September, 1919, a total of \$165,000 had been expended on the mine and machinery.

Property: the Blue Rock mine, 40 acres in the new field at Waco, Mo. Also 480 acres of land at Sunnyside, Ottawa county, Oklahoma, 5 miles S. of Baxter Springs, Kansas. This property is sub-leased, and in May, 1919, there were 5 mills in operation.

The Blue Rock mine has 2 shafts opening up ore 10 to 30' thick, that is of very high quality assaying as high as 63% metallic zinc and averaging 7 to 10% actually recovered. Though the output is mainly blende, occasional pockets of lead ore are mined. The ore comes from depth of 165 to 240'.

Equipment: at Field shaft, 50 h. p. boiler, geared steam hoist, one 3" and one 4" double-action pump; at Mill shaft, first-motion hoist and 300-ton hopper. Power plant consists of 150 h. p. and 40 h. p. high-pressure boilers and steam-driven air-compressor.

The 250-ton mill at Waco, uses an 18" crusher, 2 sets, each of 30 and 36" rolls, 2 jigs, 2 separators and classifiers, three trommel screens and 5 tables. The power unit has 3 distillate engines, two of 80 and one of 50 h. p., and one 600 cu. ft. 2-stage compressor.

Not operating.

CROESUS MINING CO.

OKLAHOMA

Address: W. E. Broach, sec.-treas., Box 555, Tulsa, Okla.

Officers: Lee Clinton, pres.; W. H. Aul, mgr.-pur. agt.

Inc. in Oklahoma.

Property: 1½ miles S. of Cardin, developed by 208' shaft, with two levels. Operations resumed August, 1921, and on 145' level of mine a run of lead ore was found. Forty men employed. Output 65,000 to 86,000 lb. zinc concentrate weekly at end of 1921.

CRYSTAL MINING CO.

OKLAHOMA

Address: B. B. Dancey, pres., Picher, Okla.

A 250-ton mill was planned in 1918.

CULBERT LEAD & ZINC CO.

MISSOURI

Address: W. S. Pate, Bartlett Bldg., Joplin, Mo.

Property: a lease and mill at Four Corners, N. W. of Joplin. Plant was sub-leased late in 1919.

CYGNI MINING CO.

MISSOURI

Address: A. J. Burnham, mgr., Joplin, Mo.

Property: a lead-zinc mine near Prosperity; a veteran sheet-ground producer, yielding 1,000 tons per day of 2% ore in 1917. Mine has 3 shafts. No recent returns.

DALLAS MINING CO.

MISSOURI

Address: Granby, Mo.

Property: Little Bess mine, on the Knight land at Carl Junction Jasper county, Mo.; also 20 acres of the Nilson land and a lease near Granby.

Development: on the Knight land, 2 shafts, deepest 170'. The Nilson land has a 195' shaft.

Equipment: 300-ton concentrating mill and sludge mill for treatment of sand and slime from large mill at Carl Junction and a mill erected in 1920 at the Granby mine.

DALLAS-PICHER LEAD & ZINC CO.

OKLAHOMA

Address: A. J. Harrington, Carterville, Mo.

Company had a lease on the Southland mine at North Century.

DANIEL BOONE MINING CO.

OKLAHOMA

Incorporated in March, 1918, with capital of \$150,000, by J. E. Jenkins, of Springfield Mo., and A. Avery, of Oronogo, Mo., to operate at Quapaw.

D. C. & E. MINING CO.

MISSOURI

Address: Box 224, Webb City, Mo.

Officers: E. M. Drummond, pres.; M. O. Curd, v. p.; R. C. English, treas.

Inc. in Kentucky. Cap. \$300,000; \$1 par.

Property: 200 acres, 1 mile N. of Webb City. Shafts are 150' deep.

Equipment: 500-ton mill treats 3% zinc-lead ore.

DE ARMOND MINING CO.

KANSAS

Probably dead. Mail returned from former address: Treece, Kan. See Vol. XIV of this Handbook.

DEFENDER MINING CO.

OKLAHOMA

Described in Vol. XIV. Property now owned by S. S. & G. Mng. Co.

DELAWARE ZINC CORPORATION

KANSAS

Address: Hayward Scott, pres., Joplin, Mo.

Property: well-developed leases W. of Baxter Springs.

DELTA LEAD & ZINC CO.

MISSOURI

Dead. See Vol. XIV.

DESLOGE CONS. LEAD CO.

MISSOURI

Office: St. Louis, Mo. Mine address: Desloge, St. Francois Co., Mo.

Inc. in Missouri. Cap. \$1,000,000, with \$1,500,000 invested in land and plant.

Property: 4,704 acres, developed by shafts to depth of 366'.

Mill: a 1,500-ton concentrator, equipped with Wilfley vanners, rolls, Chilean mills, a 780-k. w. steam turbine, and Mineral Separation machines; also smelter equipped with reverberatory furnaces. Flotation is employed in the mill, and a Lowden drier used for dewatering flotation concentrate. Employed about 167 men in 1920.

DESPERATION MINING CO.

OKLAHOMA

Formerly the Tiger L. & Z. Co.

Address: Box 164, Cardin, Okla. Charles Von Weise, pres.; E. Van Drevelt, mgr.

Property: near the Harrisburg mine, west of Cardin. Drilling revealed three orebodies at depths of 150, 250, and 320'. The 350-ton mill was treating 8% ore in 1919.

Production: 42 tons of blende and 42 of lead per week early in 1920.

DEW DROP MINING CO.

OKLAHOMA

Out of business. See **Howe Mining Co.**

Formerly at Picher, Okla. See Vol. XIV.

DIAMOND JOE MINE

OKLAHOMA

Address: G. W. Dixon, owner, F. Street, 33 N. W., Miami, Okla.

Property: 80 acres, 1¼ miles E. of Hockerville, Okla. The 250-ton mill was idle most of 1919. Mine reported taken over by Niangua M. & R. Co.

DIPLOMAT MINING CO.

KANSAS

Out of business. Formerly operated near Galena, Kansas.

DOE RUN LEAD CO.

MISSOURI

A subsidiary of **St. Joseph Lead Co.**, and described thereunder.

DOMADO LEAD & ZINC CO.

OKLAHOMA

Address: W. E. Broach, sec.-treas., Box 555, Tulsa, Okla.

Officers: J. H. McBurney, pres.; W. H. Aul, mgr.-pur. agt.

Inc. in Oklahoma.

Property: ½ mile S. of Cardin, with main workings on 220' level. Operations resumed June, 1921, employing 50 men.

Production: about 250 tons of zinc concentrate weekly.

DOROTHY BILL MINING CO.

OKLAHOMA

Office: Box 1605, Picher, Okla.

Officers: J. R. Cole, Jr., pres.-mgr.; C. C. Cole, v. p.; W. A. Easley, sec.-treas.; C. W. Ritter, supt.

Inc. Jan., 1918 in Okla. Cap. \$500,000.

Property: a 40-acre lease W. of Picher. Rich lead-zinc ore was opened at depth of 184'.

Equipment: complete with 1,000-ton (10 hours) mill, yielding an average of 25 tons of blende concentrate daily.

DOROTHY G CO.

OKLAHOMA

Address: Box 513, Commerce, Okla. or Miami, Okla.

Officers: W. S. Godfrey, pres.; F. H. Gartung, sec.-treas.; Joe Ramsey, mgr.-pur. agt.

Inc. in Oklahoma.

Property: a 10-acre lease at Commerce.

DOUTHAT MINING CO.

OKLAHOMA

Address: A. P. Standefer, receiver and manager, Miami, Okla. Harry Wright, supt.

Property: between Cardin and Commerce. Some rich ore was opened in 1918, and hand-jigs were used to dress it, but a 200-ton mill was to be built at last report. Litigation has hindered operations.

DROM IRON CO.

MISSOURI

Property: Judith Spring iron mine in Franklin county.

DUDLEY MILLING CO.**OKLAHOMA****Address:** Douthat, Okla.

Is the owner of three tailings mills near Douthat, which remill chat piles. Operated in 1921. Produced 60 tons blende concentrate weekly, December, 1921.

DULUTH-MIAMI MINING CO.**OKLAHOMA****Address:** H. L. Kylo, mgr., Quapaw, Okla.

Fully described in Vol. XIV of this Handbook.

DUNCAN LEAD & ZINC CO.**OKLAHOMA**

Incorporated 1918 with capital of \$200,000 by W. E. Williams, J. H. Goodnight, and W. M. Lockett, of Duncan, Okla.

DUQUESNE MINING CO.**MISSOURI**

Lease given up, 1916, and company out of business.

DUTCH GIRL MINING CO.**MISSOURI****Address:** Granby, Mo.

Property: in Sec. 6, T. 25, R. 30, Newton county, developed by 100' shaft. Four men employed.

EAGLE-PICHER LEAD CO., THE**OKLAHOMA-MISSOURI**

Office: Continental & Commercial National Bank Bldg., 208 S. La Salle St., Chicago, Ill.

Officers: John B. Swift, pres.; Frederick Hertenstein, v. p.; S. M. Evans, v. p.; Thos. S. Brown, Jr., v. p.-treas.; A. E. Bendelari, v. p.; J. A. Schaffer, v. p.; Jos Hummel, Jr., sec., with F. L. Perin and J. Edward Webb, gen. mgr., directors.

Inc. June, 1916, in Ohio. **Cap.** \$9,000,000 com., and \$1,000,000 6% non-cumulative preferred; \$100 par; \$8,000,000 common, and \$1,000,000 preferred outstanding. Preferred dividends payable quarterly; initial dividend of 1½% paid July 12, 1905. Office of the company, transfer agent. Annual meeting in February.

Company is a consolidation of the Eagle White Lead Co., of Cincinnati, Ohio, and the Picher Lead Co.

The Eagle Picher Lead Co. is the third oldest corroder of white lead by the Dutch process in the United States, having been established in 1843 as the Eagle White Lead Co., and in continuous operation ever since. Company is a manufacturer of carbonate of lead, sublimed (sulphate of) lead; oxides of lead, sulphuric acid, lithopone, oxide of zinc and plumbers lead goods; and also mines and smelts zinc and lead ores.

Plants are situated at Joplin and Webb City, Mo.; Galena, Kan.; Picher, and Henryetta, Okla., Newark, N. J.; also at East St. Louis, Hillsboro, and Argo, Ill.

Production: normally 1,300 tons of blende (60% metal) per week.

The output of both galena and sphalerite by the Eagle Picher Lead Co. is much larger than that of any other operator in the Miami district. Flotation units have been installed at nearly all the plants and the concentrate recovered by that process has materially added to the production.

The estimated capacity of the concentrating plants is 6,400 tons in 24 hours. The ore is mainly derived from levels between 250 and 270'. There is also a large production from ground leased to other companies.

Operations resumed and 450 men at work in May, 1921. Shipped 1,080 tons blende concentrate in week ending Dec. 17, 1921.

EAGLEWOOD MINING CO.**MISSOURI****Address:** Joplin, Mo.

Production: averaged about 27 tons of blende per week, at last report.

EARLY BIRD MINING CO.**KANSAS****Address:** Chas. Neal, supt., Baxter (route 5), Kansas, or Miami, Okla.

Officers: W. Atwood, pres.; C. Y. Semple, v. p.; F. E. Ireton, sec.-treas.

Property: 20-acre lease and mill, 1½ miles N. W. of Treece. Rich ore was opened at depth of 185'. A producer since 1919.

EASTERN LEAD & ZINC CO.**KANSAS**

Address: Walter Ragland, mgr., Webb City, Mo. J. B. Jameson, principal owner, Concord, N. H.

Property: owns 160 acres and leases 80 acres of land near Lawton. Equipped with a mill, and has been good producer since 1915, but operated for a few days only early in 1920.

EDGAR ZINC CO.**KANSAS**

Works address: Cherryvale, Kansas. Is part of American Steel & Wire Co., a subsidiary of the United States Steel Corp.

Office: Boatman's Bank Bldg., St. Louis, Mo.

Officers: A. S. McMillan, pres.; J. S. Keefe, v. p.; John Davis, sec.-treas.; L. B. Schneider, auditor. O. F. Garrison, mgr.

Cap. \$1,000,000.

Company operates a zinc smelter with 4,984 retorts.

The Glendale smelter in the Carondelet section of St. Louis; was closed in April, 1918. This was one of the oldest zinc works in America, being in operation for 49 years.

EDWARDSVILLE MINING CO.**MISSOURI**

Address: Herbert Wheeler, W. 4th St., Joplin, Mo.

Property: at Joplin, developed by several shafts, to depth of 100' and equipped with 150-ton concentrator, compressor and drills. Thirty men employed.

EIGHT FRIENDS MINING CO.**OKLAHOMA**

Probably dead. Reported to have taken over the Denver-Miami mine, near Miami, in 1917.

ELCOSA MINING CO.**OKLAHOMA**

Address: Tar River, Okla.

Officers: M. Dawedoff, pres.; R. S. Sampson, Oklahoma City, v. p.; W. C. Greening, Oklahoma City, sec., with Messrs. Tolliver and Martin, directors.

Cap. \$200,000.

Property: a 40-acre lease W. of Tar River.

Development: drilling exposed zinc-lead ore at depth of 180 to 215'. Shafts were to be sunk and a mill erected at last report.

ELEVEN O'CLOCK MINING CO.**OKLAHOMA**

Reported out of business, 1921. Described Vol. XIV. Formerly at Quapaw, Okla.

ELIZABETH MINING CO.**MISSOURI**

Address: 625 Frisco Bldg., W. 20th St., Joplin, Mo.

ELLIS MINING CO.**KANSAS**

Address: Kanok Metals Co., Box 1576, Picher, Okla.

Property: 80-acre lease near Crestline, Kansas. A mine and mill are operated.

ELLSWORTH MINING CO.**OKLAHOMA**

Incorporated in January, 1918, by Lloyd Weber, J. W. Brown, of Tulsa, Okla.; and A. B. Ellsworth, of Joplin, Mo., with capital of \$150,000.

No record of operations.

EMMA GORDON MINING CO.**OKLAHOMA**

Address: G. W. Bigham, pres., Miami, Okla.

Inc: 1908. **Cap.** \$250,000; reduced from \$1,000,000.

Property: 320 acres near Quapaw, Okla., which have produced zinc and lead worth \$4,500,000 up to 1920.

Equipment: includes 4 mills of 450 tons capacity.

EMPIRE DEVELOPMENT CO.**KANSAS**

Address: A. S. Molacsay, mgr., 402 James Bldg., Miami, Okla.

Officers: B. E. Mance, pres.; J. H. West, v. p.; M. G. West, sec.-treas.

Inc. in Kansas.

Property: a zinc mine N. of Hockerville, 2 miles S. W. of Baxter. A 200-ton concentrator was erected in 1920 and regular shipments made, 1921, employing 30 men.

Production: about 130 tons weekly of zinc concentrate.

E. & N. MINING CO.

MISSOURI

Address: Walter Eberlin, Joplin Mo. **Mine address:** Duenweg, Mo.

Property: 40-acre lease, developed by 4 shafts to depth of 110.

Equipment: includes 75-ton mill, compressor, drills, steam power. Six men employed.

ESSENTIAL PRODUCING CO.

OKLAHOMA

Company was organized in January, 1918, to drill leases, operate mills, and a smelter, etc. A 150-ton mill was secured in the Lawton-Waco district, Mo. Rich ore was reported cut by drilling between Hockerville and St. Louis, Okla. Company also said to own 600 acres of oil leases in the Chelsea-Nowata field. No record of operations securable.

EUTERPE MINING CO.

OKLAHOMA

Address: D. M. Collins, mgr., Hockerville, Okla.

Property: a 250-ton mill and the Euterpe mine, a half mile north of Hockerville. Operated 2 shafts with 35 men for 2 shifts in 1921, opening a large cave with zinc blende ore.

Company uses oil engines.

Production: resumed October, 1921, was about 115 tons zinc concentrate weekly in December.

EVANS-HALL-SOY MINING CO.

MISSOURI

Address: J. M. Evans, pres., Joplin Mo.

Property: a lease and mill at Duenweg, Mo. Operations were suspended in latter part of 1919.

F. AND F. MINING CO.

OKLAHOMA

Address: F. E. Finerty, sec.-treas., Oklahoma City, Okla. C. E. Holliday, supt.

Inc. 1918, in Oklahoma. **Cap.** \$100,000; \$100 par; all issued.

Property: 100 acres, W. of Quapaw. A new mill was completed in May, 1919.

FAIR HOPE MINING CO.

MISSOURI

Address: M. L. Kline or E. D. James, Porto Rico, via Joplin, Mo.

Officers: Albert Boiling pres; D. M. Murphy, Greensburgh, Ind., v. p., and W. E. Brown, Connersville, Ind., directors.

Property: 23 acres purchased in 1918 from Playter Bros., of Joplin, operated for a while by company, then leased, May, 1919, to E. D. James. A 200-ton mill in operation.

FARMERS LEAD & ZINC CO.

OKLAHOMA

Dead. Formerly operated the Katy mine in the Quapaw district, and small shipments made in 1918.

FARMINGTON MINING CO.

OKLAHOMA

Out of business. Mine sold 1920 to the Lucky O. K. M. Co., a subsidiary of Federal M. & S. Co., which see.

FEDERAL LEAD CO.

MISSOURI

Subsidiary of American Smelters Securities Co., 120 Broadway, New York City.

Address: Flat River, Mo. H. A. Guess, pres.; H. G. Washburn, mgr.; Parkhurst Sleeth, bus. mgr.

Inc. in Delaware. **Cap.** \$2,000,000; shares \$10 par. The lead-smelting and refining plant, at Federal, Ill., near Alton, comprises 302.5 acres. The plant is a custom smelter, and has a daily capacity of 540 tons of ore.

Property: 14,000 acres including the Central Lead Co.'s property, in the Flat River district, southeastern Missouri, containing lead ore in limestone.

Development: mine has 12 shafts, and prospecting is done by diamond drills, as no outcrop of disseminated ore occurs. In Dec., 1919, No. 12 shaft was producing 3,000 tons of ore daily.

Equipment two mills are in operation. No. 3, of 5,000 tons daily capacity, is equipped with 12 Hancock jigs, 72 tables, 18 vanners arranged in 6 sections; also regrind rolls, elevators, Esperanza-Federal drag classifiers and a flotation unit. Mill No. 4 of 3,000 daily capacity was put into operation during January, 1917. It is equipped with 6 Hancock jigs, 40 tables arranged in 2 sections, regrind rolls, elevators, mills for regrinding and drag classifiers and a flotation plant for slime treatment. The ratio of concentration is approximately 20:1. Mineral Separation flotation units are used.

Most of the power is generated at a central plant. This plant consists of a battery of 12 boilers, equipped with chain-grate stokers. Three 750-k. w. vertical turbines, two 2,000-k. w. and one 800-k. w. Allis-Chalmers turbines, four compressors, together with necessary condensing equipment, etc. About 550 men employed.

Production: 1,163,000 tons of ore in 1913; 1,212,000 tons in 1914; 1,355,000 in 1915; 1,328,474 tons in 1916; 1,870,000 tons in 1917; 1,905,000 tons in 1918; 1,241,651 tons in 1919; 1,506,080 tons in 1920. Tons milled was somewhat less, in 1921.

FEDERAL LEAD & ZINC CO.

OKLAHOMA

Address: H. Martin, Miami, Okla.

Officers: H. L. Holen, pres.; J. P. Whatley, v. p.; R. W. Yakish, sec-treas.

Inc. in Okla. Cap. \$40,000.

Property: 20 acres at Tar River and 40 acres at Quapaw, thoroughly developed in 1917-18. A 300-ton mill was erected and regular shipments made.

FERCH MINING CO.

MISSOURI

Idle, 1921.

Property: company early in 1918 was operating on West Seventh street, Joplin, under a lease from the Continental Zinc Co. Good ore was opened at depth of 224'. No returns.

FIELDS MINING CO.

MISSOURI

Producing zinc concentrate, Dec., 1921, at rate of 40-50 tons weekly.

FIFTEENTH STREET MINING CO.

MISSOURI

Address: C. L. windbigler, Box 41, Joplin, Mo.

Property: on east 15th St., Joplin, Mo., was sold by O. W. Sparks, of Galena, Kansas, and associates, to H. C. Clinton of Clinton, Oklahoma, and others, for \$100,000. Two shafts were sunk, opening rich ore and a mill built.

Idle.

FINK MINING CO.

MISSOURI

Idle. No news since 1918. **Property:** near Ozark, Mo.

Development: by 210' shaft and level at 90, 135 and 175', all in pay-ore. The face is 20' thick. A 400-ton mill was in operation, at last accounts.

FIRST NATIONAL MINING CO.

OKLAHOMA

Address: Quapaw, Okla.

Property: N. W. of Quapaw, Okla. Two shafts are down to ore at 145'. Rich ore was treated in the Red Rose mill in 1919.

FLANNERY ZINC CO.

MISSOURI

Idle. **Address:** W. F. Friday, Sarcoxie, Mo.

Property: the Boyd zinc mines at Sarcoxie, acquired in 1915, and \$40,000 spent in rehabilitating mine and mill.

Equipment: includes a 1,000-ton concentrator and a Diesel engine. The ore is blende, but some calamine is also mined.

FOCH MINING CO.

OKLAHOMA

Address: A. E. Bendelari, mgr., and A. J. Beasley, supt., Picher, Okla. Inc. in 1919. Owned by employees of the Eagle-Picher company.

Property: the Sheridan-Adams mine, a 40-acre lease, one mile W. of Picher, developed by 240' shaft, and equipped with 250-ton mill. Idle in 1919-20.

- FORT WORTH LEAD & ZINC CO.** OKLAHOMA
 J. C. Squires & Co., lessees, Picher, Okla.
 The mine, located south of Picher, is developed by 2 shafts, opening an orebody 35' thick. **Equipment:** includes 200-ton mill.
- FOUR MILE MINING CO.** OKLAHOMA
 Dead. See description in Vol. XIV.
- FRANKLIN MINING CO.** MISSOURI
 Probably dead. See Volume XIV.
- FREEHOLD OIL & GAS MINING CO.** MISSOURI
Address: W. S. Marquis, Webb City, Mo.
 Inc. in W. Va. **Cap.** \$200,000.
Property: several leases covering 60 acres, in the Waco field. Three mills are at work, producing 64% zinc concentrate. **Equipment:** includes compressor, steam power and drills. All mines are regular producers.
- FRISCO L. & Z. CO.** MISSOURI
Address: E. S. Warnet, Buffalo, Mo. **Mine:** S. E. of St. Louis, Mo.
- FRISCO MINE** OKLAHOMA
Address: G. W. Dixon, Miami, Okla., or W. W. Innis, mgr., Picher, Okla. Presumably owned by C. I. & D. Mng. Co.
Property: a 40-acre lease S. W. of Hockerville, equipped with a mill.
- GAGER MINING & MILLING CO.** MISSOURI
Address: F. D. Gager, Joplin, Mo.
- GALENA LEAD & ZINC CO.** KANSAS
 Dead. Once operated near Galena, Kan.
- GALENA MINING & DEVELOPMENT CO.** OKLAHOMA
Property: is at Century, Okla.
- GASCHO ZINC CO.** MISSOURI
Address: Frank Dangler, supt., Cunningham Bldg., Joplin, Mo.
 Inc. 1919, in Missouri. **Cap.** \$100,000.
Property: a 40-acre lease near Waco, Mo. Drilling revealed ore at 300 to 340' depth.
Development: by two 200' shafts. Ore is mined below 150'.
Equipment: includes 300-ton mill, drills, crusher, compressor and tables. Thirty five men employed.
- GEORGE BALL MINING CO.** MISSOURI
 Probably dead. No information since 1918. **Address:** George Ball, supt., Webb City, Mo.
- GEORGETTE MINING CO.** MISSOURI
 Dead. See Vol. XIV. Formerly operated in Newton county, Mo.
- GIBSON MINING CO.** MISSOURI
 Dead. Operated, 1918, near Joplin, Mo.
- GILMAN MINING CO.** MISSOURI
Address: C. L. Windbigler, Box 41, Joplin, Mo.
Property: a 40-acre lease and mill in the Waco field, developed by 2 shafts to depth of 173'. **Equipment:** includes 200-ton concentrator, compressor, crusher, drills and tables. Twelve men employed at last account.
- GILT EDGE MINING CO.** MISSOURI
 Dead. Lease transferred, June, 1916, to Wade Mining & Milling Co., which see.
- GOLCONDA MINING CO.** OKLAHOMA
 Organized in March, 1918, with capital of \$50,000, by J. M. Imrie, E. E. Chivers and O. C. Lashier, of Ardmore, Okla. No record of operations.
- GOLDEN EAGLE MINING CO.** OKLAHOMA
Address: M. A. Young, R. F. D. 2, Baxter, Okla. **Mine address:** Miami, Okla.
- GOLDEN ROD MNG. & SMELTING CORP'N** OKLAHOMA
Address: Box 106, Cardin, Okla., and Keystone Bldg., Joplin, Mo.
Officers: E. Z. Wallower, pres.; F. C. Wallower, v. p., with W. R.

Ramsey, P. E. Tabor, H. T. Parker, Paul Johnston, and H. A. Riddle, directors. H. C. Mills, sec.-treas., Joplin, Mo. A. N. Gaines, mgr.

Inc. Aug., 1917, in Oklahoma. Cap. \$1,100,000 com. or dfd. dividend shares and \$1,000,000 pfd. shares; \$5 par; all of com. and \$755,607 pfd. issued. Preferred shares receive all earnings until 100% has been paid, after which the deferred shares participate.

Bonds: \$1,000,000 first sinking fund 5-year, 6s, dated April 1, 1919; \$916,500 issued. A sinking fund of 50% of net operating earnings, with a minimum of \$10,000 monthly started July 1, 1919.

Financial statement for year ended Jan. 1, 1921, showed net income, \$762,548, of which \$761,100 was net from ore sales after deducting \$155,506 for royalty; expenditures were \$703,554; surplus, \$58,994.

Property: 320 acres, including the Dallas-Picher mine, near Tar River, Okla.; also 4 mills, (3,000 tons daily capacity), No. 4 being of 1,500 tons in 20 hours. In No. 5 tract, drilling is said to have blocked out 1,500,000 tons of zinc-lead ore, assaying from 30 to 40% blende and galena. The latest mill employs the best practice, including flotation. Purchase price of property was \$1,350,000.

Production: weekly output in 1921 averaged about 300 tons of zinc concentrate from ore of 220 and 230' levels of No. 1 and No. 4 mines. Company kept two rigs busy in 1921 doing prospecting work. Employs 60 men at No. 1 mine and mill.

This is one of the big producers of the Tri-State region.

GOLDEN SPIKE MINING CO.

OKLAHOMA

Organized in February, 1918, with capital of \$125,000, by R. H. Drenna, F. E. Herrin, and O. D. Halsell, of Oklahoma City. No record of operations.

GOLDEN STATE MINING CO.

OKLAHOMA

Formerly operated near Picher. See Volume XIV.

GOOD CHANCE MINING CO.

OKLAHOMA

Organized January, 1918, with capital of \$30,000, by George Ostrander, of Miami; R. W. Eastman, and H. H. Sherman, of Alva, Okla. Had no mines at last report.

GOODEAGLE MINING CO.

MISSOURI

Mine sold in 1920 to the Hartford Mining Co., which see.

GRACE MINING CO.

MISSOURI

Out of business. Formerly operated at Joplin, Mo.

GRACE WALKER MINING CO.

KANSAS

Controlled by Commerce M. & R. Co., Okla. The 250-ton mill at Baxter Springs was destroyed by fire, in 1918.

GRANBY CONSOLIDATED MINES CO.

OKLAHOMA

Dead. Former address, care W. G. Wilkerson, supt., Granby, Mo. Mine presumably near Miami, Okla.

GRANBY MINING & SMELTING CO. OF MISSOURI

MISSOURI

Subsidiary of the American Z., L. and S. Co., which see.

Address: Granby, Mo.

GREAT SCOTT MINING CO.

MISSOURI

Dead. See Vol. XIV.

GREAT WESTERN LEAD & ZINC CO.

OKLAHOMA

Organized April, 1918, with capital of \$100,000, by M. B. Rook, of Miami; Edward Kesler, of Carter, and J. G. Wherry, of Commerce, Okla. No further information obtainable.

GREENBACK MINING CO.

OKLAHOMA

Probably dead. Operated in 1918 at Quapaw. See Volume XIV.

GREENFIELD LEAD & ZINC CO.

OKLAHOMA

Organized in March, 1918, by J. E. Ross, J. C. Collier, and J. W. Baker, of Greenfield, Okla. No record of operations obtained.

GREENING MINING & SMELTING CO. **OKLAHOMA**

Subsidiary of the Hare M. & M. Co.

GREEN ZINC CO. **OKLAHOMA**

Dead. Formerly operated near Miami, Okla.

GRIFFITH LEAD & ZINC CO. **MISSOURI**

Dead. See Vol. XIV. Formerly held lease on land near Saginaw, Newton Co., Mo.

GUENING MINING CO. **OKLAHOMA**

Dead or dormant. No news since 1918. See Volume XIV.

HANOVER LEAD & ZINC CO. **OKLAHOMA**

Organized December, 1917, with capital of \$160,000, by J. J. Strong, C. W. Rice, and Rudolph Johnson, of Cushing, and J. T. Dickinson, of Edmond, Okla.

No record of operations obtained.

HARDING MINING CO. **MISSOURI**

Succeeds Log Cabin Mining Co., which see.

HARD ROCK MINING CO. **KANSAS**

Address: Ben Malang, Joplin, Mo.

Property: a new producer at Peacock, Kansas, S. W. of Waco, Mo

HARE MINING & MILLING CO. **OKLAHOMA**

Office: Hobart, Okla. Works: Picher, Okla.

Officers: Alfred Hare, pres. and gen. mgr.; J. D. Carruthers, v. p.; W. F. Hearne, sec.; A. E. Fritsche, treas.

Property: one mile W. of Picher. Also owns control of the **Greening M. & S. Co.**, and bought the Jack Rabbit mine for \$35,000. Good ore was opened in all mines, and a 200-ton mill erected. Is one of the large producers in the southwestern part of the Picher camp. Mill contains Mineral Separation flotation equipment.**HARRISBURG MINING & MILLING CO.** **OKLAHOMA**

Address: F. C. Wallower, mgr., Box 102 Cardin, Okla.

Officers: F. S. Wallower, pres., E. Z. Wallower, sec.-treas., with Geo. J. Smoyer and H. C. Mills, directors.

Cap. \$400,000.

Property: 40 acres W. of Cardin, Okla., equipped with 2 mills.

HARTFORD MINING CO. **MISSOURI-OKLAHOMA**

Address: 305 Miners Bank Bldg., Joplin, Mo.

Officers: L. A. Barbour, pres., Hartford, Conn.; Harlan H. White, sec.-treas.-gen. mgr., Joplin; with S. B. Griswold, Carthage, Mo., and C. C. Spencer, Joplin, directors. Geo. Elliott, supt., Galena, Kansas.

Inc. 1906, in Missouri. Cap. \$100,000; \$100 par; all outstanding.

Property: a 120-acre lease, 1 mile N. of Duenweg, including the No. 1 mine; a 10-acre lease at Carthage, including the No. 3; and a 70-acre lease near Galena, Kansas, but in Missouri, including No. 2. The Goodeagle mine in Oklahoma was purchased in 1920 for \$250,000.

Development: by 5 shafts in sheet-ground at No. 1; one shaft in sheet-ground at No. 3, and 3 shafts with 40' ore face in No. 2.

Equipment: includes 600, 150, and 350-ton mills, gas and steam power.

Production: about 200 tons of zinc concentrate weekly during 1921.

HAWKINS LEAD & ZINC CO. **OKLAHOMA**

Address: Baxter (route 2), Okla.

Officers: Lee Hawkins, pres., J. A. Henry, v. p.; H. H. Hawkins, sec.-treas.-mgr.

Property: operating in the Sunnyside district, E. of Quapaw, on land of the **Crescent L. & Z. Co.** A modern mill was erected, part of it to treat an old dump of zinc-lead tailing, and small shipments made.**HAWK MINING CO.** **OKLAHOMA**

Dead. Formerly operated near Miami, Okla.

HAYNES MINING CO. **OKLAHOMA**

Address: I Hawthorne, Commerce, Okla.

No record of operations obtained.

HEALDTON MINING CO.**OKLAHOMA**

Address: Cardin, Okla.

Cap. \$100,000. Incorporated by W. A. Rodgers, John Mulkey and H. S. Cox, of Ardmore, Okla. A mill was to be built, at last report. No news since 1919.

HEATON & HODGES MINE**MISSOURI**

Idle or dead. Address: W. Heaton, supt., Granby, Mo.

Property: a tract in the Sheet-ground area of Joplin district, in which the ore lies at depth of 210'. Reported that shafts were sunk and a mill erected in 1919.

HENRYETTA ZINC SMELTER**OKLAHOMA**

Owned by the United States Zinc Co. (q. v.), a subsidiary of the Am. Sm. & Rfg. Co.

Office: 120 Broadway, New York. Works address: C. E. Gregg, supt., Henryetta, Okla.

Smelter has 3,200 retorts and complete accompanying equipment.

HERCULES DEVELOPMENT CO.**KANSAS**

Dead. Formerly did exploratory work near Louisville, Kan.

HIDDEN TREASURE MINING CO.**OKLAHOMA**

Probably dead. Former address: Baxter Springs, Kan. See Vol. XIV.

HIGH FIVE MINING CO.**MISSOURI**

Office: Temple Chapman, 627 Frisco Bldg., Joplin, Mo., or Waco, Mo.; Geo. E. Starr of Philadelphia is also an interested party.

Inc. in Missouri. Cap. \$500,000.

Property: 80 acres in the Waco district, Mo., held under lease on a 10% royalty basis. Also 80 acres in Kansas.

Development: 17 drill-holes cut good ore at depths of 135 to 150'. Three shafts were sunk to 196'.

Equipment: includes compressor crusher and drills; a motor-driven mill, finished in July, 1919, has a daily capacity of 600 tons. Operated during 1919-20. Reported September, 1921, that a long-term option on the Waco holdings has been taken by the Am. Z. L. & Sm. Co. Forty men employed normally.

HIGH GRADE LEAD & ZINC CO.**OKLAHOMA**

Address: Picher, Okla.

Officers: P. W. Payton, pres.; Earl Edgerly, treas.; Clyde Walker, sec.; Fred Star, mgr.

Property: 1 mile W. of Quapaw.

HIGH GRADE ZINC CO.**MISSOURI**

Address: care J. W. Baker, Duenweg, Mo.

Inc. in Missouri. Cap. \$50,000.

Property: 80 acres, developed by 3 shafts to depth of 105'.

Equipment: includes 150-ton concentrator, steam power, drills and crusher. Seven men employed.

HILDA MINING CO.**MISSOURI**

Address: Amos Freeman, Joplin, Mo.

Property: N. E. of Baxter, Mo.

HILL LEAD & ZINC CO.**MISSOURI**

Dead. Last address: care H. B. Wolcott, Joplin, Mo.

HOME RUN MINING CO.**MISSOURI**

Address: Granby, Mo.

Property: developed by 2 shafts, to depth of 70'. Three men only were employed in 1919.

HOMESTAKE MINING CO.**KANSAS**

Operating in the Hockerville district and shipments made regularly since 1918. Production for week ending Dec. 17, 1921, was 297,750 lb. lead concentrate.

HOPE LEAD & ZINC CO.

Address: J. F. Ladd, mgr., Fayetteville, Ark.

Property: 1½ miles N. of Quapaw, Okla.

OKLAHOMA**HOPKINS MINE**

Owned by the Producer L. & Z. Co., which see.

HOWE MINING CO.

Address: F. S. Seagrave, mgr., Box 234, Picher, Okla. A merger of the Dew Drop and Howe companies.

Property: the Dew Drop mine, ½ mile W. of Picher.

Production: normally 43 tons of blende (60% metal) per week.

OKLAHOMA**OKLAHOMA****HUNT MINING CO.**

Address: 2200 Ins. Exchange Bldg., Chicago, Ill., and Box 67, Picher, Oklahoma.

OKLAHOMA

Officers: Robt. W. Hunt, pres.; J. C. Halstead, v. p.; C. B. Nolte, sec-treas.; C. C. Whittier, mgr.; H. L. Jones, supt.

Inc. 1919 in Oklahoma. Cap. \$250,000.

Property: 50-acre lease on the Pittsburg-Miami mine, about 1 mile N. E. of Picher. Developed by two shafts to depth of 280'.

Equipment: includes 400-ton concentrator. Mine started producing in 1919

HURRY-UP MINING CO.

Address: Webb City, Jasper Co., Mo.

Property: in the North Webb City sheet-ground district, said to show lead-zinc ore occurring at depth of 200'. A 300-ton mill on the property, operating almost continuously for 10 years was to be dismantled and replaced by one of 400 tons capacity per 10 hours. Company hoists ore from the Florence shaft, 1,000' N. E. of the mill.

MISSOURI**HUTTIG LEAD & ZINC CO.**

Address: R. F. D. No. 5, Baxter Springs, Kansas.

Officers: F. Huttig, pres.; F. J. Huttig, sec-treas.; H. E. Huttig, v. p.; all of Kansas City, Mo. B. E. Brown, supt.

Property: a 120-acre lease on the Brewster land N. E. of St. Louis, Okla. Company was the second largest producer in the district in 1918, ore coming from the 225 to 265' levels. The 200-ton mill was burned in August, 1918, but was replaced by the Inspiration company's old mill in November 1919, so there are two 300-ton plants at work. No. 2 mine was operated continuously throughout 1921 employing 100 miners in 3 shafts. This mine is between Hockerville and Zineville.

OKLAHOMA

Production: weekly output in 1920, was 40 to 50 tons of blende. In Jan., 1921, it was 300 tons, worth \$27 per ton. Shipments in December, 1921, varied from 125 to 225 tons of zinc concentrate weekly.

ICE PLANT MINING CO.

Out of business and corporation dissolved. See Vol. XIII.

MISSOURI**IMPERIAL DEVELOPMENT CO.**

Address: Quapaw, Okla.

OKLAHOMA

Officers: C. H. Cleveland, pres.; R. E. Gilbert, sec.; F. T. Cochran, treas. G. O. Spafford, mgr.

Inc. in Delaware. Property is in the Osage tract just S. W. of Quapaw, where water caused much trouble and necessitated an expenditure of \$200,000 before mine was adequately drained and ore production was begun.

IMPERIAL MINING & DEVELOPMENT CO.**OKLAHOMA**

Address: care T. L. Robinson, Miami, Okla.

IMPERIAL ZINC CO.

Address: Bud M. Robinson, Frisco Bldg., Joplin, Mo.

MISSOURI**INCLINE MINING CO.**

Property: a lease on part of the lands belonging to the Center Creek Mining Co. between Webb City and Carterville. Developed by 5 shafts to depth of 150', showing lead and zinc ore.

MISSOURI

Equipment: included 2 concentrators of 500 tons capacity, pump, boiler and steam power.

INDEPENDENT ZINC LANDS CO.**MISSOURI**

Subsidiary of the **Barnsdall Corporation**, which see.

Office: P. B. Butler, mgr., Frisco Bldg., Joplin, Mo.

Property: a lease on 2,600 acres of land, S. W. of Joplin.

INDIANA MINING CO.**MISSOURI**

Address: care of F. H. Kissling, Joplin, Mo. **INCORPORATED**
Inc. 1921, in Mo. **Cap.** \$150,000; \$80,000 subscribed (Nov., 1921).

Property: an 80 acre lease, north of Carl Junction.

INDIAN CHIEF MINING CO.**OKLAHOMA**

Dead. Formerly at Miami, Okla.

INDIAN QUEEN MINING CO.**OKLAHOMA**

Address: H. H. Hawkins, Hockerville, Okla.

Officers: W. W. Hanlan, pres.; E. A. Gualtney, v. p.; T. L. Ripley, sec.; W. W. Champion, treas.; J. E. Ernhart, gen. mgr.

Property: a lease S. W. of Hockerville, adjoining the Lucky O. K. and Blue Bonnet mines. A mill was erected and shipments begun in 1918.

INSPIRATION MINING CO.**KANSAS**

Dead. Described in Vol. XIV.

INSPIRATION MINING CO.**OKLAHOMA**

Out of business: See Vol. XIV.

INTERSTATE LEAD & ZINC MINING CO.**OKLAHOMA**

Organized January, 1918, with capital of \$40,000, by L. G. Sims and L. M. Linebaugh, of Vinita, Okla., and S. P. Strong, of Dallas, Texas.

Property is a tract four miles W. of Picher, on which a 200-ton mill was to be built. Idle since 1918.

IOWA MINING CO.**OKLAHOMA**

Address: A. F. Place, pres., Leon, Iowa; or E. P. Rhodes, Box 224, Joplin, Mo.

Cap. \$100,000.

Property: a lease on 40 acres of the Fred Gillmore tract, just across the State line from Baxter Springs. Ore occurs at depth of 138'. Seventeen drill-holes show good ore, suitable for hand-jigging. A 150-ton concentrator was erected, September, 1920.

IRISH GIRL MINING CO.**MISSOURI**

Address: Granby, Mo. Has a 6-acre lease, developed by 75' shaft.

IRON MOUNTAIN M. & SM. CO.**MISSOURI**

Property: the Iron Mountain mine in St. Francois county.

JASPER COUNTY LAND & MINING CO.**MISSOURI**

Dead. Formerly operated near Carterville, Jasper county, Mo. See Vol. XIV.

JAYBIRD MINING CO.**OKLAHOMA**

Address: c/o Commerce M. & R. Co., Miami, Okla.

Officers: J. F. Robinson, pres.; Geo. L. Coleman, sec.-treas.; J. E. Pearson, supt.

Inc. in Oklahoma.

Property: about ½ mile S. of Cardin.

JEFF CITY MINING CO.**OKLAHOMA**

Address: Box 1571, Picher, Okla.

Officers: Geo. Potter, pres.; H. B. Church, sec.-treas.; A. E. Bendelari, mgr.; O. E. Lichtner, supt.

Inc. in Oklahoma.

Property: S. E. of Picher.

JEFFERSON MINING CO.**OKLAHOMA**

Address: Box 666, Picher, Okla.

Officers: A. B. Clark, pres.; T. J. Landers, v. p.; F. W. Hackman, sec.-treas.; G. M. London, mgr.

Inc. in Oklahoma. Cap. \$400,000.

Property: 40 acres, S. E. of Picher, which contains the ore horizon at 230' in depth, with a face of 12' of stoping ore.

The 300-ton mill employing flotation, erected February, 1919, yields 160 tons concentrate per week.

JOHNSON MINING & DEVELOPMENT CO. KANSAS

Dead. Formerly operated near Baxter Springs, Kans.

JOPLIN BOY MINING CO. KANSAS

Address: T. R. Lynas, 11 S. La Salle St., Chicago, Ill. **Mine address:** R. F. D. 2, Galena, Kan.

JOPLIN-KENTUCKY LEAD & ZINC CO. MISSOURI

Dead. Formerly operated near Joplin. See Vol. XIV.

JOPLIN ORE AND SPELTER CORPORATION KANSAS

Mail returned from last address: 40 Exchange Place, New York. E. Allendorf, Joplin, Mo., treas.

A George Graham Rice promotion.

Inc. April, 1916, in West Virginia, to take over the property of the Joplin Ore & Spelter Co., of Missouri. **Cap. \$2,000,000;** shares \$1 par; changed from \$5 July, 1916; all issued and fully paid. Empire Trust Co., New York, registrar. Stock transferred at company's office.

Dividends: initial one of 5.5% paid May 25, 1916, followed by others in June and July.

Property: a zinc smelter at Pittsburg, Kan., about 37 miles from Joplin, Mo.

Company was exploited by Ridgely & Co. (Geo. Graham Rice), of which the late William Barrett Ridgely, former Treasurer of the United States, was the nominal head. On the New York Curb shares skyrocketed to \$5, only to fall back to 5c. Appears to be a good property that was used for speculative purposes rather than mine profits. Presumably out of business. Described in Vol. XIV.

JOPLIN ZINC METALS CORPORATION MISSOURI

Company dissolved. Described in Vol. XIII of this book.

JUANITA W. MINING CO. MISSOURI

Formerly Tampa Mining Co., Treece, Kansas.

Address: Bob Wilkerson, Carterville, Mo.

JULIAN MINING CO. MISSOURI

Dead. Formerly at Joplin, Mo.

KANOK METALS CO. OKLAHOMA

Offices: 417 Boston Bldg., Denver, Colo., and A. M. Gaines, gen. mgr., Box 1576, Picher, Okla.

Officers: F. M. Woods, pres.; J. M. Kuykendall, v. p.; R. P. Jones, sec.; and C. H. Shilling, treas.

Inc. in Colorado.

Company controls the Ellis and McBee companies in Kansas, the Plumb company in Oklahoma, and 50% of the Premier in Oklahoma, which see under respective titles.

KANOMA ZINC CO. KANSAS

Address: C. Plavter, Treece, Kan.

KANSAS CITY-IOPLIN MINING CO. MISSOURI

Company dead. See Vol. XIV.

KANSAS LINE MINING CO. OKLAHOMA

Address: G. Meese, pres., Joplin, Mo.

Property: near the Kansas State line, just N. of Zincville.

KANSOURI MINING CO. KANSAS

Address: C. B. Boylan, pres., Miami, Okla.

Property: a lease northwest of Treece, in Blue Mound territory. Thirty drill-holes cut ore to depth of 270'. Two shafts were sunk and 400-ton mill erected. Shut down in 1919 on account of metal market.

KATY MINING & MILLING CO.**MISSOURI**

Address: J. R. Underwood, Granby, Mo.

Property: a lease on 50 acres at Granby, Newton County, developed by 4 shafts to depth of 90'. Equipped with 300-ton concentrator, drills and crusher. Fifteen men employed.

KEENO MINING CO.**OKLAHOMA**

Dead, or dormant. Formerly held a lease near Miami, in which 21 holes showed rich lead-zinc ore. A 220' shaft was reported in ore in 1918.

KENEFICK ZINC CORPORATION**MISSOURI**

A subsidiary of **United Zinc**, which see. Organization, record, etc., fully described in Vol. XIV.

KELTNER MINING CO.**OKLAHOMA**

Address: F. W. Evans, mgr., Box 1526, Picher Okla.

Officers: F. W. Evans, pres.; J. M. Keltner, v. p.; E. C. Nott, sec.-treas.

Inc. Nov., 1917, in Oklahoma. Cap. \$200,000.

Property: a 40-acre lease E. of Picher, on Eagle Picher Lead Co. ground. Drills passed through 21' of ore, assaying up to 25% blende and galena. Two shafts were sunk in 1918 and a third shaft, N. E. of the mill, was down 125' in May, 1919. The 500-ton mill has been in operation since mid-1918, and early in 1920 the weekly output was 44 tons of blende. In Jan., 1921, it was 87 tons, worth \$27 per ton.

Equipment: includes 150 h. p. gas engine and 880 ft. compressor.

Reported November, 1921, to have bought the mining property of the **Southern Lead & Zinc Co.**, a mile west and north of Blue Mound, near Treece, Kansas.

KENTEX MINING CO.**OKLAHOMA**

Address: E. C. Malbon, Miami, Okla.

A mill costing \$100,000 was erected and shipments made in 1918.

KENTUCKY CHIEF MNG. CO.**OKLAHOMA**

Address: Box 1586, Picher, Oklahoma.

Officers: John A. Skinner, pres. Webb City, sole owner. R. C. English, sec.-treas.; Fred Sallee, mine mgr.

Inc. in Oklahoma.

Property: Big Chief mine and mill, 1/4 mile N. of Picher. Closed down in summer of 1921.

KEYSTONE TAILING CO.**MISSOURI**

Address: P. B. Butler, Frisco Bldg., Joplin, Mo. Mine address: Cardin, Mo.

KING BEE MINING CO.**OKLAHOMA**

Dead. No record of operations since 1918. See Vol. XIV.

KING-BRAND MINING CO.**KANSAS**

Address: W. T. Landrum, Box 1538, Picher, Okla.

Officers: A. W. Happy, pres.; D. W. Oberman, v. p.; F. J. Kersting, sec.-treas. Directors: Joseph Pope, Felix Senevey, Dr. C. F. Enloe, Lee Jordan, Horick McHenry.

Inc. August 10, 1918, in Missouri. Cap. \$170,000. Issued and sold, 100,000 shares.

Property: 55 acres near Treece, in Cherokee county. Ore contains galena and zinc blende limestone and is mined by 280' shaft. Ore reserves are stated as equivalent to 26,000 tons of concentrates, with 5,000 tons on dumps.

In 1921, acquired the O. Longacre lease of 22 acres adjoining company's own tract at Treece. Land is proven by 30 drill holes and has a 130' shaft.

Development: by two 225' shafts.

Equipment: steam hoist, 650 cu. ft. compressor, 250-ton mill and gas power. Half of mill product is galena, the other half blende. Operating Dec., 1921, producing 35 tons concentrate in week ending Dec. 10th.

- KINGSBURY MINING CO.** **MISSOURI**
Property: the Carson iron mine in Howell county, Mo.
- KIRKWOOD MINING CO.** **MISSOURI**
Out of business since 1918. Formerly at Webb City, Mo.
- KITTY MINING & MILLING CO.** **OKLAHOMA**
Address: J. H. Minnrick, mgr., Box 175, Cardin, Okla.
Officers: S. B. Waters, pres.; J. B. Waters, sec.-treas.
Property: 40-acre lease W. of Cardin, equipped with a mill.
Production: about 170 tons of blende per week, 1920-21.
- KROPP MINE** **OKLAHOMA**
Address: Chas. E. Schwarz, Picher, Okla. Mine located 2 miles E of Picher, Okla., owned by the St. Louis S. & R. Co., Miami, Okla.
- KUSA SPELTER CO.** **OKLAHOMA**
Office: 120 Broadway, New York. Works address: C. W. Morrison, supt., Kusa, Okla.
Owns a zinc smelter with a 5,360 retort capacity, under lease to the U. S. Zinc Co., subsidiary of A. S. & R. Co.
- LACLEDE LEAD & ZINC CO.** **OKLAHOMA**
Address: Cardin, Okla.
Officers: W. E. McComb, pres.; R. O. Mayfield, sec.; O. L. Weissgerber, treas.-mgr.; C. A. Rice, supt.
Inc in Oklahoma.
Property: a 40-acre lease in the Tar River-Douthat area, with a weekly output of over 80 tons of blende. A steady producer. Mine has been noted for its lead caves.
- LADD MINING CO.** **KANSAS**
See Vol. XIV.
- LADISON MINING CO.** **KANSAS**
Address: Geo. West, Coffeyville, Kansas. Mine address: Galena, Kans.
- LA NORA MINING CO.** **MISSOURI**
An inactive company. Organized February, 1918, with capital of \$48,000, by G. G. Bayless of Carterville and Phil Gray of Webb City.
- LANYON STARR SMELTING CO.** **OKLAHOMA**
Dissolved. Fully described Vol. XII.
- LARSH LEAD & ZINC CO.** **OKLAHOMA**
Address: H. G. Larsh, Miners Bank Bldg., Joplin, Mo.
Property: N. E. of Commerce. Ore occurs from a depth of 215 to 265', and is high-grade. The mill was reported making 22 tons of blende concentrate and 3 or 4 tons of galena concentrate daily, at last account.
- LA SALLE MINING CO.** **OKLAHOMA**
Address: A. E. Bendelari, mgr. Picher, Okla.
Company composed of employees of the Eagle-Picher company.
Property: N. W. of Picher. Hand-jigs were used prior to the erection of a 500-ton mill in December, 1918. The jig product paid for the mill.
- LAWYERS MINING CO.** **KANSAS**
Address: E. G. McAdams, Terminal Bldg., Oklahoma City, Okla., pres.; Harry Rodgers, v. p.; J. B. Dudley, sec.-treas.; George Pearson, mgr.
Property: 40 acres, west of Treece, just across the State line. Rich ore being mined, and a 400-ton mill erected early in 1919. Recovery is 10% lead and zinc. A regular producer.
- L. C. H. CORPORATION** **OKLAHOMA**
Probably defunct. No record of operations since July, 1918, when a 200-ton mill was erected.
- LEAD & ZINC DEVELOPMENT CO.** **OKLAHOMA**
Address: Box 352, Miami, Okla. Mine located N. E. of Quapaw, Oklahoma.
- LEAD BOY MINING CO.** **OKLAHOMA**
Address: Baxter (route 2), Okla.

Officers: Robt. M. Scott, pres.; Geo. S. Alcorn, sec.-treas.; R. H. Elkins, mgr.

Inc. in Oklahoma.

Property: Lead Boy mine on Crescent L. & Z. Co. land, in the Sunny-side field. The 150-ton mill was remodeled and enlarged in 1918 and shipments made. Operated by lessees at last account.

LEAD-KING MINING & CONCENTRATING CO. MISSOURI

Address: E. A. Grady, 123 Moffett, Bldg., Joplin, Mo. **Mine address:** Duenweg, Mo.

LEADLAND MINING CO. MISSOURI

Address: R. H. Barratt, Joplin, Mo. **Mine address:** Chitwood, Mo.

LENABEE MINING CO. KANSAS

Dead; mill planned to be erected in 1919, did not materialize so far as known.

LENNAN ZINC & LEAD CO. OKLAHOMA

Address: Box 635, Miami, Okla.

Had a lease on the Commerce Mng. & Royalty Co.'s land at the N. E. end of the town of Commerce.

LEONORA MINING CO. OKLAHOMA

Address: H. Chamberlain, 6th & Moffett Sts., Joplin, Mo.

Inc. in 1917. **Cap.** \$200,000.

Property: formerly the Lucky Five mine, 1 mile S. of Picher, Okla., thoroughly drilled, a shaft sunk, and mill under construction in March, 1919. Water hindered development for some time.

LIBERTY MINING CO. KANSAS

Address: care Jno. Wingfield, Baxter Springs, Kansas.

LIGHTFOOT O. & M. CO. OKLAHOMA

Dead. Was to erect a mill in 1918.

LINCOLNVILLE LEAD & ZINC CO. OKLAHOMA

Address: T. H. Nerbern, pres., Miami, Okla.

Property: a lease between Lincolnvillle and Sunnyside, on which considerable drilling has been done, shaft sunk, and mill erected.

LION MINING CO. OKLAHOMA

See Velie Mines Corporation.

LITTLE BILL MINING CO. MISSOURI

Address: George Moore, Joplin, Mo.

Property: a lease west of Chitwood, adjoining on the south the property of the St. Regis M. & S. Co.

Development: drill-holes yielded up to 18% zinc and lead, and shafts were sunk to 180' level. Equipped with 200-ton mill. No record of operations since 1919.

LITTLE JEWEL MINING CO. OKLAHOMA

Address: J. W. Chaffner, Quapaw, Okla.

Property: the Miami Sunrise mine, S. E. of Quapaw. Ore is mined at a depth of 85'. The mill contains crusher, rolls, and 6 hand-jigs, and the concentrate shows the ore to carry 15% mineral in equal portions of zinc and lead. Developing. See Miami Sunrise Mining Co.

LITTLE MARTHA CORPORATION MISSOURI

Address: H. B. Wolcott, Joplin, Mo.

Property: N. of Chitwood, said to produce 75 tons of blende weekly. In July, 1919, entire holdings valued at \$10,000, assigned for the benefit of creditors to H. W. Blair, of Carthage, Mo.

LITTLE MARY MINING CO. MISSOURI

Address: Webb City, Jasper county, Mo.

Cap. \$100,000.

Property: a lease on 40 acres of mineral land, owned by D. S. Weaver. Developed by 3 shafts to depth of 175'.

Equipment: includes 500-ton concentrating mill, pumps, 3 drills, 2

hoists, steam power, and compressor. No record of production available since 1919.

LOGAN & CO., W. & H.**OKLAHOMA**

Address: F. Sleck, mgr., Picher, Okla.

In August, 1919, the old Coronet mill north of Blue Mound in Kansas was to be moved to the mine at Picher.

LOG CABIN MINING CO.**MISSOURI**

Address: W. W. Wakeman, Baxter Springs, Kansas.

Property: the old Log Cabin mine N. E. of Duenweg, said to have yielded lead ore worth \$1,000,000 from depth of 40', all concentrated by hand-jigs, and whose tailings were to be re-treated. At depth of 175 to 200' more ore has been found and a mill was erected in 1919. Name reported changed to **Harding Mining Co.**

LONE ELM DEVELOPMENT & MINING CO.**MISSOURI**

Address: W. F. Shaner, sec.-gen. mgr., Webb City, Mo.

Inc. 1913. Cap. \$10,000.

Property: a lease on 240 acres of Granby land and 80 acres of Picher land, N. W. of Joplin. Company unwatered the ground, sublet its holdings in small tracts, and operates a 150-ton custom mill. Deposits are shallow, and many lessees are at work.

LONE STAR MINING CO.**OKLAHOMA**

Address: W. A. Claunch, sec.-treas., Waxahachie, Tex.

Organized in March, 1919, with capital of \$40,000, by Ray Thompson, Clark, Oklahoma City, and R. I. Tibbs, Maypearl, Texas.

Property: 20-acre lease, 2 miles E. of Picher. Sinking a shaft and equipment installed at last account.

LONGACRE-CHAPMAN MINING CO.**MISSOURI**

Dissolved in June, 1918, and all profits distributed. Described Vol. XIII.

LONG-HUNT MINING CO.**OKLAHOMA**

Address: 404 Commerce Bldg., Miami, Okla. Mine address: Hockerville, Okla.

LORANE MINING & ROYALTY CO.**OKLAHOMA**

Organized in March, 1919, with capital of \$40,000, by Ray Thompson, C. C. Moses, J. T. Dewberry, and J. T. Gephart, of Miami, Okla. No other information obtainable.

LOST TRAIL MINE**OKLAHOMA**

See **Miami Mining Co.** Mine on land of the Commerce M. & Royalty Co., at Commerce, is one of the oldest producers in the field.

LOWER LEVEL MINING CO.**MISSOURI**

Address: Sarcouxie Mo. Is a reorganization of the Bearcat Mining Co.

Directors: J. W. Boyd, J. J. Stephenson, Geo. Spiva, and Sam Tamblin.

Property: the Cameron zinc mine on J. W. Boyd land, at Sarcouxie, 20 miles E. of Joplin, Jasper county, Mo. Developed by 278' and 200' shafts.

Equipment: includes 400-ton mill, compressor, and boilers.

LUCKY BELL MINING CO.**MISSOURI**

Dead. Operated near Webb City, Mo., in 1918.

LUCKY BILL MINING CO.**OKLAHOMA**

Address: G. L. Childres, Cardin, Okla.

LUCKY BOB MINING CO.**OKLAHOMA**

Address: William Pascal, pres., Miami, Okla. Mine lies one mile W. of Quapaw, Okla.

LUCKY DOZEN LEAD & ZINC CO.**OKLAHOMA**

Probably dead. Formerly operated N. W. of St. Louis, Okla. Ore was opened at 195' in October, 1918, and hand-jigs installed to treat the ore.

LUCKY ELEVEN MINING CO.**MISSOURI**

Address: W. F. Cooper, Keystone Hotel, Joplin, Mo. Mine located S. E. of Carthage, Mo.

LUCKY JACK MINE**OKLAHOMA**

Address: P. W. George, supt., Box 160, Baxter Springs, Kansas.

Property: at Hockerville, owned by Federal M. & S. Co. of Idaho. No production figures available.

LUCKY JEM LEAD & ZINC CO., THE**KANSAS**

Dead, or dormant. Planned to operate a mine and mill near Miami, in 1919.

LUCKY JENNY MINING CO.**KANSAS**

Property: 160-acre lease in Miami field, 7 miles W. of Baxter Springs, drill holes showed 3.6 to 19.9% blende, with some lead in places, and the dump contained 25,000 tons of rich ore. A 300-ton mill was erected late in 1918. Under option to the Lucky O. K. Mining Co., which see, under Federal Mng. & Sm. Co. of Idaho.

LUCKY JEW LEAD & ZINC CO., THE**KANSAS**

Address: 1313 R. A. Long Bldg., Kansas City, Mo., or M. G. West, mgr., Baxter (route 5), Kansas.

Officers: W. C. Bowman, pres.; E. J. Bushaw, v. p.; M. G. West, sec.; Robt. H. Bowman; treas.; H. Stout, supt.

Inc. in Oklahoma. Cap. \$200,000.

Property: 160-acre lease, in Miami field, 7 miles W. of Baxter Springs, Cherokee Co., Kansas, near the U. S. Smelting property. Ninety holes drilled showed ore to depth of 350', carrying 11% zinc and lead.

Development: by 4 shafts, 328', 330', 326' and 325'.

Equipment: a 300-ton mill was erected in 1919. Shipments made in 1921.

LUCKY JIM MINING CO.**KANSAS**

Address: O. C. Hamilton, supt., Galena, Kan.

A 200-ton mill and mining plant was erected late in 1918. In 1920 a new shaft was sunk to 110' depth. Producing.

LUCKY KID MINING CO.**OKLAHOMA**

Address: Frank Childress, Cunningham Bldg., Joplin, Mo.

Property: at Zincville. Has two mills whose normal weekly production is 40 tons of blende (60% metal) and 40 tons of galena (80% metal).

LUCKY MINING CO.**MISSOURI**

Dead. Formerly operated 8 active mines in the Joplin district.

LUCKY O. K. MINING CO.**KANSAS**

Address: Federal M. & S. Co., 120 Broadway, New York; or Fredk. Burbidge, gen. mgr., 725 Old Natl Bank Bldg., Spokane Wash.; or P. W. George, mgr., Baxter Springs, Kans.

Subsidiary of Federal Mng. & Sm. Co., Idaho, which invested \$171,283 in purchase of 55% interest. First earnings are to be devoted to repayment of this sum at 6% interest, after which profits will be divided between company and former owners on basis of 55 and 45% respectively.

Property: the Lucky O. K. mine in Kansas, just north of Hockerville. Orebodies are horizontal, in chert, at depth of 180 to 230', carrying 1 to 5% lead and 3 to 15% of zinc. Reserves at the end of 1919 were 80,000 tons, estimated to contain 5,330 tons of zinc and 1,600 tons of lead concentrates. Mining is by room and pillar system.

The Farmington mine was purchased in 1920; and an option is held on the Lucky Jenny and Choctaw Chief mines.

Equipment: includes steam hoist, compressor, pumps, electric motors and oil engines for general power, and 300-ton mill employing the flotation process.

Concentrates carry 61% zinc and 82% lead. One month recently yielded 300 tons of lead and 280 tons of zinc concentrates.

A large producer during 1919, its output in 1920 was 74,488 tons of ore up to suspension of operations in December.

LUCKY PAT MINING CO.**KANSAS**

Address: W. L. Turner, Galena, Kansas.

Cap. \$125,000.

Property: E. of Lincolnville. A 200-ton mill was completed in 1919.

LUCKY STRIKE LEAD & ZINC CO. OKLAHOMA

Described in Volume XIV. See Aztec Mining Corporation.

LUCKY SYNDICATE CO. OKLAHOMA

Address: J. G. Marcum, mgr., Joplin, Mo.

Mill, ½ mile N. W. of Picher, was burned in June, 1918, but was re-built later in year. In Jan., 1921, weekly output was 175 tons of blende, worth \$27 per ton.

LUCKY THREE MINING CO. OKLAHOMA

Address: Quapaw, Okla.

Mine located 1 mile S. W. of Quapaw.

LUCKY TIGER MINING CO. MISSOURI

Property transferred, 1916, to Utah-Missouri Mines Co., which see.

MAGIC MINING CO. KANSAS

Address: Jess Graham, Coffeyville, Kansas. Mine lies N. W. of Picher, Okla.

MAHATMAH MINING CO. MISSOURI

Address: E. D. Hornbrook, 1116 Oak St., Kansas City, Mo.

Property: 120 acres S. of Webb City, developed by two 200' shafts in sheet-ground formation. Equipment: includes a 200-ton motor-driven mill.

Production: about 83 tons of blende weekly during 1918. Idle since 1919.

MAHUTSKA MINING CO. OKLAHOMA

Office: A. H. Ramage, mgr., 608 Frisco Bld., Joplin, Mo. J. H. Capelli, mgr.; W. L. Kepner, supt. Controlled by S. Y. Ramage interests.

Inc. May 9, 1917, in Oklahoma. Cap. \$150,000.

Property: 40 acres at Picher, Okla. Development: by 3 shafts, 250' deep. Ore carries 7% zinc and 3% lead. A feature of the deposit is the occurrence of rich ore in the caves opened in mining.

Equipment: 500-ton mill, in 70 hours' test run in April, 1919, dressed 1,300 tons of "dirt", yielding 185 tons of lead and 99 tons of zinc-concentrates. The company is a large producer of both galena and sphalerite concentrate, operating one of the largest lead mines in the district. Output to 1920 was valued at over \$1,000,000. Producing throughout 1920-21, at rate 45 to 85 tons zinc concentrate weekly.

MALCONA MINING CO. MISSOURI

Dead. Formerly operated near Joplin, Mo. Produced 32 tons of blende weekly.

MANHATTAN MINING CO. OKLAHOMA

See United Zinc Smelting Corporation. Mine at Picher Okla.

MANHATTAN MINING CO. OKLAHOMA

Address: Miami, Okla.

Operates a mine with workings at 230' depth, near Victory Co's property. Employed 40 men at mine and mill in 1921.

MANSFIELD MINING & DEVELOPMENT CO. OKLAHOMA

Idle. Address: J. R. Sardage, supt., Mansfield, Mo.

Property: 1,712 acres in Wright county. The ground was drilled, and a 250-ton mill was erected at last accounts.

MARGARET D. MINING CO. MISSOURI

Address: Granby, Mo.

Inc. in Mo. Cap. \$25,000.

Property: in Sec. 12, T. 25, R. 31, developed by 4 shafts to depth of 120', and equipped with 150-ton concentrator, tables, compressor, crusher, steam power, 4 drills. About 20 men employed.

MARJORY STEWART MINING CO. KANSAS

See Vol. XIV. Company dead.

M. & R. MINING CO. MISSOURI

Address: W. R. Rice, Wentworth, Mo.

MARY ANN MINING CO.**OKLAHOMA**

Address: F. H. Kissling, sec.-gen. mgr., Baxter Springs, Kansas, or Box 624, Joplin, Mo.

Officers: A. J. Roth, pres.; R. V. Newton, v. p.; Carl C. Smith, treas., with W. H. Johnson, John M. Hedges, G. Edwin Johnston, G. O. Foster, and George Darsee, directors.

Inc. in Oklahoma. Cap. \$350,000; \$1 par.

Property: 40 acres near St. Louis, just S. of the Kansas line, on which zinc-lead ore occurs in limestone and flint.

Development: by several shafts to depth of 235'. Extensive drilling is carried on to keep development ahead of ore extraction and keep the 300-ton mill fully supplied. A rich strike was made in November, 1921.

Production: for 1920 was 6,500 tons of lead and zinc concentrate.

M. AND T. MINING CO.**MISSOURI**

Dead. Described in Vol. XIV.

MAURINE LEAD & ZINC CO.**OKLAHOMA**

Address: J. R. Cole, C. C. Cole Bldg., Tulsa, Okla. Company has a lease and mill S. E. of Douthat, Okla.

MAXINE MINING O.**OKLAHOMA**

Address: Nat McCutchin, Douthat, Okla.

Property: a tract S. of Picher on which 26 drill-holes showed good ore at depth of 205', the ore being 35' thick. A 400-ton gas-driven mill was erected 1920.

McBEE MINING CO.**KANSAS**

Address: Kanok Metals Co., Box 1576, Picher, Okla.

Property: 40-acre lease near Crestline, Kan. Ground has been drilled and a 400-ton mill erected during 1920.

McBRIDE MINING CO.**MISSOURI**

Dead. See Vol. XIV. for description.

McCLELLAN & MUNSON MINE**OKLAHOMA**

Address: J. J. McLellan & Ray Munson, Webb City Mo. Mine address: Douthat, Okla.

McCURDY BROS. MINING CO.**OKLAHOMA**

Inactive. Formerly operated a 250-ton mill built in 1918-19, between Picher and Quapaw.

MEDIA MINING CO.**MISSOURI**

Probably dead. See Vol. XIV for description.

MEDICAL MINING CO.**OKLAHOMA**

Out of business. Described in Vol. XIV.

MELROSE MINING CO.**OKLAHOMA'**

No record of operations since 1918-19. See Vol. XIV.

MERRILL MINING CO.**KANSAS**

Defunct. In 1918. operated near Baxter Springs, Kans.

METALS EXTRACTION CORPORATION**MISSOURI**

Office: 212 McKinley St., or Bldg., Joplin, Mo. Alfred Schwartz, metallurgist. D. M. Liddell, New York, cons. engr.

Company buys concentrates containing 60% zinc, with no iron, and reduces it direct into lead-free zinc oxide by the Schwarz process. Two furnaces were operated in 1920, capable of producing 10,000 lb. of oxide per day of 24 hours. Attached to the furnaces are fans, flues, and a bag house. The ultimate capacity is to be 80,000 lb. daily.

METALS MILLING CO.**OKLAHOMA**

Operated 1918. near Tar River, Okla. Probably dead.

METROPOLITAN MINING CO.**MISSOURI**

Mine address: c/o Dr. C. W. Boyd, Wentworth, Mo.

MIAMI-ADA MINING CO.**OKLAHOMA**

Owned a lease near Quapaw; also the Phillips zinc mine near Yellville, Ark. Drills at the former passed through 42' of ore, beginning at 190' depth; while drifts in the Phillips were in ore.

- MIAMI METALS CO.** **OKLAHOMA**
 Address: Otis W. White, lessee, Commerce, Okla. L. E. Cartwright, supt.
 Property: the Southeast Missouri lease at North Picher, reported reopened and under development since September, 1920.
- MIAMI MINING CO** **OKLAHOMA**
 Address: R. J. Tuthill, agt., Miami, Okla.
 Property: a lease on the Lost Trail mine of the Commerce M. & R. Co., ½ mile S. W. of Commerce.
 A 400-ton mill was built in July, 1918.
- MIAMI NATIONAL LEAD & ZINC CO.** **OKLAHOMA**
 Dead. No record of operations since 1919. See Vol. XIV.
- MIAMI SUNRISE MINING CO.** **OKLAHOMA**
 Address: J. W. Chaffner, Quapaw, Okla.
 Property: S. E. of Quapaw, was operated by Little Jewel Mng. Co., which see.
- MIAMI-TEXAS MINING CO.** **KANSAS**
 Dead. In 1918, operated near Treece, Kans.
- MIAMI VOLUNTEER MINING CO.** **OKLAHOMA**
 Dead. Was active in 1918. See Vol. XIV.
- MIAMI-WACO LEAD & ZINC CO.** **KANSAS**
 Dead. See Vol. XIV for description.
- MIAMI WONDER MINING CO.** **OKLAHOMA**
 Address: Miami, Okla.
 Officers: Fred D. Whiting, pres.; A. V. Ellis, v. p.-mgr.; O. R. Hisel, sec.; S. P. Carey, treas.
 Property: S. E. of Picher. Rich ore was opened at depth of 208' and a mill erected.
- MIAMI ZINC & LEAD CO.** **KANSAS**
 Address: T. F. Lennan, sec.-mgr., Joplin, Mo.
 Inc. in 1918. Cap. \$250,000.
 Property: a 40-acre lease on the Chubb land, W. of Treece.
 Development: by two 265' shafts. A mill was to be erected.
- MIAMI ZINC MINES CO.** **OKLAHOMA**
 Address: Denman Blanchard, 19 Congress St., Boston, Mass. R. M. Sturdevant, mgr., Miami, Okla.
 Property: 200 acres at Picher, Okla.
- MID CONTINENT IRON CO.** **MISSOURI**
 Operates a furnace and by-product charcoal plant at Midco, near Fremont, Carter county. Also operated mines 15 and 32 in Shannon county.
- MID-NATION IRON PRODUCTS CO.** **MISSOURI**
 Probably dead. No record of operations since 1918. See Vol. XIV.
- MILLER WORLEY MILL** **OKLAHOMA**
 Address: W. C. Miller, Box 83, Miami. Tailing mills located S. W. of Picher, Okla., destroyed by fire in March, 1921.
- MINE LA MOTTE CO.** **MISSOURI**
 Name changed Nov. 1, 1916, to **Missouri Metals Corp.**, which see.
- MINT MINING CO.** **OKLAHOMA**
 Dead. Formerly operated near Miami, Okla. See Vol. XIV.
- MIO OIL & MINING CO.** **OKLAHOMA**
 Address: W. J. Briggle, 535 Frisco Bld., Joplin, Mo.
 Property: the W. F. White mine and flotation mill N. W. of Picher, taken over in July, 1919. Operating profitably at last accounts.
- MISSISSIPPI QUEEN MINING CO.** **KANSAS**
 See Vol. XIV. Probably dead since 1919. Formerly at Baxter Springs, Kan.
- MISSISSIPPI VALLEY IRON CO.** **MISSOURI**
 Owns the Puxico iron mine, at Puxico, Hoddard county. Ore is a

MISSOURI COBALT CO.**MISSOURI****Address:** S. F. Kirkpatrick, mng. director, Fredericktown, Mo.**Inc. in Missouri. Cap.** \$1,000,000.

Property: that of old North American Lead Co., about 911 acres, at Fredericktown, Madison county. Ore is a complex mixture of the sulphides of copper, iron, cobalt, nickel and lead. Developed by 2 shafts to depth of 250'.

Equipment: includes a 100-ton smelter and 300-ton mill completed in August, 1917, employing flotation process.

The mill produces lead concentrates and a copper-cobalt-nickel product. The metals recovered are sold as electrolytic copper ingots, nickel either as shot metal or nickel oxide; cobalt as metal or cobalt oxide.

In 1920 the managing director states that this was the only producer of cobalt in the United States. It is also one of the principal copper producers in that State. Employs about 65 men.

Closed down since Oct., 1920.

MISSOURI COPPER MOUNTAIN MINING CO.**MISSOURI**

Office: Room 4, Pehl Bldg., Sedalia, Mo. **Works office:** Sullivan, Franklin county, Mo.

Officers: S. Urban, pres.; F. Maerschel, v. p.; Peter Pehl, treas.; J. W. Graham, sec., with H. H. Graham, C. C. Kelly, and F. T. Mulcahy, directors.

Inc. Jan., 1903, in Arizona. Cap. \$1,500,000; shares \$1 par.

Property: about 5,134 acres in Crawford and Washington counties, Missouri, including some farm lands. The Copper Hill mine, 32 acres, worked in a small way before 1850, shows an orebody with a good gossan in manganese limestone.

Development: by a 50' shaft and about 200' of tunnels. Idle several years.

MISSOURI LEAD & ZINC CO.**MISSOURI**

Office: Mercantile Trust Co., trustee, 805 Frisco Bldg., Joplin, Mo.

Officers: S. A. Mitchell, pres.; W. L. Chambers, v. p.-gen. mgr.; J. P. Newell, sec.-treas.; J. G. Farrell, asst. sec.

Inc. Feb. 19, 1898, in Missouri. Cap. \$300,000.

Property: 1,100 acres of land within the city limits of Joplin, on which there are a number of developed mines. Ore carries blende, calamine and galena, found at depths of 110' to 200'. Company does no work itself, only deriving income from royalties. Ground has been a big producer for years.

MISSOURI METALS CORPORATION**MISSOURI**

Offices: 1945 Railway Exchange Bldg., St. Louis, Mo.; 52 Vanderbilt Ave., New York. **Mine office:** Win. G. Dooley, asst. treas., Mine La Motte, Missouri.

Officers: A. J. Meier, pres.; F. E. Butcher, v. p.-sec.; with W. S. McCall, G. G. Moore, A. J. Drexel, Jr., Hamilton Fish, H. E. Taylor, and J. E. Liggett, directors; R. Morrison, Jr., treas.

Inc. in Maine, as the Mine La Motte Co., 1914; name changed, 1916.

Inc. Nov. 1, 1916, in Missouri. Cap. \$5,000,000; shares \$100 par; all issued. Security Transfer & Registrar Co., New York, transfer agent. Equitable Trust Co., New York registrar.

Bonds: \$1,000,000 1st refunding gold 6s, due Nov. 1, 1926. Coupon, \$1,000. Empire Trust Co., New York and S. H. West, St. Louis, Mo., trustees. Is first lien, subject to \$330,000 prior lien, retired by this issue. Offered Feb., 1917, at 96½. On Dec. 31, 1920, \$80,000 in bonds sold for \$1,000 the lot at public auction in New York.

Net earnings (applicable to interest) \$169,432 for year ended June 30, 1916: quarter ended Sept. 30, 1916, \$53,438.

Property: Mine La Motte with 37,614 acres of mineral and farm lands in Madison and St. Francois counties, Mo. Lands have produced since

1723, over \$20,000,000, mostly lead. For geology, see Kemp's "Ore Deposits," p. 228, also Mo. Geol. Survey, Vol. IX, Report 4, p. 48.

Development: by a number of shafts, average depth 125'. The shallow surface diggings, which were first worked, were followed down 100-125' and from this level the ore has been coming that for 50 years has supplied the mill and smelter. In recent years the copper and nickel cobalt sulphide ores, which occur in bunches and masses in the lead ore, have not been mined, owing to the difficulty of smelting them. In 1915 four shafts were operated, and much of the ground was re-worked with steam-shovels, the only mine in S. E. Missouri to be so worked. Much carbonate of lead is recovered.

Reserves are reported to be equal to 3,000,000 tons yearly for 60 years, half of which can be mined by open-cut methods.

Equipment: 19 miles of railway, 1,000-ton ore concentrator with 350-ton flotation unit, 1,000-ton tailing plant, Diesel engine power-plant, etc.

Mine was closed in 1919, due to a receivership and foreclosure proceedings started, 1920.

MISSOURI MULE MINING CO.

OKLAHOMA

Address: Ed. Standefer, Miami, Okla.

Officers: Chas. Fribley, pres.; Dr. W. A. Powers, sec.-treas.; E. L. Standefer, mgr.

Inc. in Oklahoma.

Property: a lease and mill S. of Picher. Work retarded by water.

MISSOURI ZINC MINES CO.

MISSOURI

Dead. Described in Vol. XIV.

MIZPAH MINING CO.

OKLAHOMA

Address: Miami, Okla.

Officers: G. L. Coleman, pres.; R. J. Tuthill, sec.-pur. agt.; T. J. Dooley, supt.

Inc. in Oklahoma.

Property: the Blue Goose mine, 2 miles N. E. of Commerce and the Grace Walker mine, 1 mile S. E. of Picher.

M. K. & T. MINING CO.

MISSOURI

Address: S. J. Williams, pres., or C. A. Davis, mgr., Granby, Mo.

Property: at Granby. Ore is mined at depth of 240' and treated in a 500-ton mill.

MOGUL MINING CO.

OKLAHOMA

Address: A. E. Dunlap, sec.-treas.-mgr., Miami, Okla.; J. B. Stringer, supt.

Officers: E. E. Wilson, pres.; W. M. Rothrock, v. p.

Inc. in Oklahoma. Cap. \$250,000.

Property: a 20-acre lease, 1½ miles E. of Picher; also operates west of the town. Drilling exposed from 4 to 51% ore, at 180' and 212' depth, and a shaft was sunk late in 1918. Hand-jigs were formerly used to dress the ore, but a new mill was started in November, 1919. In 1920 the output exceeded 30 tons of blende per week. Operations resumed Oct. 1921.

Production: about 80,000 lbs. of blende concentrate weekly.

MONARCH MINING CO.

OKLAHOMA

Address: A. O. Nichols, Gentry Apts., Joplin, Mo. **Mine address:** Picher, Okla.

MONLUX & CO.

KANSAS

Mine address: care Geo. C. Monlux, Galena, Kan.

MONTREAL MINING CO.

OKLAHOMA

Address: C. F. Dike, mgr., Joplin, Mo.

A partnership, consisting of the manager, J. P. Heffernan, and Mr. Henault of Montreal, Canada.

Property: 40 acres at Century said to be one of the richest mines in the region since 1916. The weekly output in 1918 was 330 tons of blende, 60%

metal, and the same early in 1920. This mine was the largest shipper of sphalerite in the district.

MORGAN & SIMPSON MINE

MISSOURI

Mine address: care J. D. Morgan, Duenweg, Mo.

MOSELEY MINING CO.

MISSOURI

Address: Granby, Mo.

Property: in Sec. 12, T. 25, R. 31, Newton county, developed by 110' shaft. About six men employed during 1919.

MOUNT NEBO LEAD & ZINC CO.

OKLAHOMA

Address: J. E. Turner, mgr., Peoria, Okla.

Development: 3 shafts open ore at a depth of 130' to 176'. A 200-ton mill erected in 1918, includes 100 h. p. steam engine for mill, 80 h. p. engine for compressor, crusher, 4 sets of rolls, 3 jigs, and 5 tables.

MUNCIE MINING CO.

KANSAS

Controlled by Clover Bros., Tulsa, Okla.

Address: R. C. Kelly, mgr., Baxter Springs (route 5), Kansas.

Officers: S. C. Clover, pres.-mgr.; D. Vensel, v. p.

Inc. in Oklahoma.

Property: 40 acres on the Cooper land, W. of Baxter Springs and N. W. of Trece. Drilling was done in 1917. Ore is chatty, needing fine grinding.

Development: by two 240' shafts, with high ore faces.

Equipment: includes 3 oil engines and 1 gas engine, air hoists, compressor, and large mill. A regular producer.

MUSKOGEE LEAD & ZINC CO.

OKLAHOMA

Address: Box 191, Quapaw, Okla.

Officers: Phil Brown, pres.; W. M. Eicholtz, v. p.; L. W. Thompson, mgr.

Inc. in Oklahoma.

Property: 60 acres, just W. of Quapaw. Ore was encountered at 165' and 180', but water was so troublesome that company joined with the Imperial Development, St. Louis, and Big Three companies to drain the ground. The Muskogee shaft was cemented and a depth of 200' attained.

MUTT & JEFF MINE

MISSOURI

Address: L. Fannan, or F. M. Kelley, Joplin, Mo.

Property: on A. C. Maherland, worked from 45-60' levels. Drilling to 130' reported to have cut rich lead ore in December, 1921.

NAPOLEON MINING CO.

MISSOURI

Dead. Described in Vol. XIV.

NATIONAL LEAD CO.

MISSOURI

For description, see under United States section.

NATIONAL LEAD & ZINC CO.

OKLAHOMA

Address: E. C. Ruff, pres., Oklahoma City, Okla. Mine lies south of Quapaw, Okla.

NATIONAL ZINC & LEAD CO.

MISSOURI

Property sold. Company dead. See Vol. XIV.

NATIONAL ZINC CO., THE

KANSAS-OKLAHOMA

Subsidiary of International Minerals & Metals Corporation, which see, in United States section.

NEARBY MINING CO.

MISSOURI

Probably dead. Was operating in 1918 at Webb City, Mo.

NECK CITY MINING CO.

MISSOURI

A company incorporated 1919, that never functioned so far as known.

NEIL MINING CO.

KANSAS

Dead. Was to build mill in 1918 at the Old Abe mine, Lincolnville, Kan.

NEMO MINING CO.

KANSAS

Probably dead. Last operations, 1918.

NEVER SWEAT MINING CO.

Dead. Formerly operated near Miami, Okla.

OKLAHOMA**NEW CHICAGO MINING CO.**

Address: A. M. Gaines, mgr., Box 1576, Picher, Okla. Controlled by the Joplin Royalty M. Co. and Utopia M. Co.

OKLAHOMA

Property: 40-acre lease at Picher, fully equipped and producing. The new Chicago mine east of Douthat, is 140' deep. Employs 80 miners since July, 1921 when mining was resumed. Shipping 70 to 100 tons zinc concentrate weekly at end of 1921.

NEW ENGLAND ZINC CORPORATION

Dead. Described in Vol. XIV.

MISSOURI**NEW GERONIMO MINING CO.**

Probably dead. Formerly at Joplin, No record of operations since 1918.

MISSOURI**NEWKIRK SMELTING CO.**

Address: care R. S. Chappel, Forney Hotel, Joplin, Mo. Mine lies west of Joplin.

MISSOURI**NEW STATE MINING CO.**

Address: Homer Seals & Co., Box 24, Commerce, Okla., or Joplin, Mo.

OKLAHOMA

Property: operates the New State mine on McBee land at Commerce. Galena and sphalerite ores are reported mined at the 110' level and treated in the 75-ton mill.

NEW YORK MINING CO.

Address: W. T. Landrum, mgr., Box 1538, Picher, Okla.

OKLAHOMA

Property: 1 mile S. of Picher, developed by shaft.

NIANGUA MINING & ROYALTY CO.

Address: W. S. O'Bannon, receiver, Box 588, Picher, Okla. Frank Childress, supt.

OKLAHOMA

Officers: E. S. Warner, pres.; R. W. Smith, v. p.; W. S. O'Bannon, sec.-treas.

Inc. in 1917, in Okla. Cap. \$125,000. Company went into bankruptcy in 1920 and is being operated by a receiver for the creditors.

Property: lease of 40 acres on Tar River, midway between Picher and Cardin. The royalty is 17½%. In August, 1919, the M. & M. mine was acquired at a cost of \$150,000.

Geology: orebodies lie on three levels—145', 179', and 200'. At 149' level ore is all lead; at 170' horizon, ore is mixed lead and zinc, the latter predominating, and on the 200' level ore is 75% lead. About 30% of the ore is of disseminated type in flint and lime-breccia; remainder is lump ore in broken flint. Ore now being milled assayed 6.5% lead and 4% zinc.

Development: 2 shafts to 200' level, and 600' drift connecting mine and mill.

Equipment: mill treats 500 tons, in 10 hours. It includes a 500-ton ore bin, 18-in. crusher, 42-in. rolls, with 36 in. return rolls, 2 rougher Colley type jigs, one cleaner and one sand jig, same type, one 36 in. high-speed rolls for recrushing, and 10 tables. The recovery is 82%, or 6½% blende and lead.

Power furnished by 150-h. p. gas engine; hoist and drills are operated by air furnished by 3,400 cu. ft. gas-driven compressors.

Production: 110 tons of blende per week in 1919; in 1921, 80 tons, worth \$27 per ton.

NORTH AMERICAN LEAD CO.

Property: sold at forced sale in 1910 to the Missouri Cobalt Co., which see.

MISSOURI**NORTH AMERICAN ZINC CO.**

Property sold and company out of business. March, 1919. See Vol. XIII of this book.

MISSOURI**NUOVA DINERO MINING CO.**

No record of operations since 1918. Former address, Baxter Springs, Kan.

KANSAS

NYMO ZINC & LEAD CO., INC.**MISSOURI**

Company dissolved. Fully described in Volume XIV.

O. F. & L. MINING CO.**MISSOURI**

Idle and probably dead. Former address: Duenweg, Jasper county, Mo. See Vol. XIV.

OHIMO MINING CO.**OKLAHOMA**

Address: Box 687, Miami, Okla.

Officers: O. M. Bilharz, pres. F. H. Gartung, sec.-treas.-mgr.

Property: 20 acres, N. of Picher, developed by 2 shafts. Crude ore is mined at level between 220' and 265', the ore is concentrated in a 250-ton mill built in 1918, with a recovery of 10% as concentrates. The weekly output given as 100 tons of blende. A regular producer during 1919.

OKA MINING CO.**OKLAHOMA**

Address: Box 695, Picher, Oklahoma.

Officers: W. H. Tyles, pres.; T. F. Lennan, mgr., Box 295, Joplin, Mo.; J. E. Reno, supt.

Inc. in Oklahoma. Cap. \$200,000.

Property: 40-acre lease, 1 mile S. of Picher, developed by 3 shafts.

Equipment: includes 300-ton concentrator, producing in 1920-21.

OKLAHOMA MINING CO.**MISSOURI**

Dead, or dormant since 1918.

OKLAHOMA WOODCHUCK ZINC LEAD CO.**OKLAHOMA**

Office: 25 Broad St., New York, N. Y.

Officers: C. C. Burger, pres.; R. M. Atwater, Jr., v. p.; L. E. Whicher, treas., with W. T. Rosen and Herman Aaron, directors S. L. Sherman, sec.; C. F. Dike, mgr. at Joplin, Mo.

Inc. May 5, 1915, in Delaware. Cap. \$1,000,000; \$10 par: all outstanding. Authorized and outstanding, \$250,000, 8% 5 year gold notes.

For year ended April 30, 1920, company received from ore sales, \$270,258; operating expenses totaled \$225,753; net income, \$21,939, which was charged against depreciation and depletion.

Property: leases located at Cardin, Ottawa county. Mine contains a chamber deposit of zinc and lead sulphides, assaying 10 to 30% zinc and 3 to 10% lead.

Production: 1917, 7,258,300 lb. zinc and 6,080,200 lb. lead; 1918, 15,405,200 lb. zinc and 1,065,500 lb. lead; 1919, 12,094,100 lb. zinc and 775,690 lb. lead; 1920, 11,864,600 lb. zinc and 4,732,800 lb. lead.

OKLA LEAD & ZINC CO.**OKLAHOMA**

Dead. See Vol. XIV.

OKO ZINC & LEAD CO.**OKLAHOMA**

Address: Box 226, Commerce, Okla.

Officers: A. W. Pope, pres.; Malcolm Green, v. p.; A. Mayfield, mgr.; Tom Kitto, supt.

Inc. in Massachusetts.

Property: the Southland mine at North Century, lease formerly held by the Dallas Picher Lead & Zinc Co., but forfeited for non-working. The Lennan mill at Commerce was moved to the mine, and was yielding over 40 tons of blende weekly.

Operated during 1921, producing between 500,000 and 900,000 lbs. of zinc concentrate weekly.

OLD GLORY MINING CO.**MISSOURI**

Address: M. M. Kline, Frisco Bldg., Joplin, Mo. Mine address: Waco,

Mo.

OLD RELIABLE MINING CO.**OKLAHOMA**

Property about 2 miles S. E. of Quapaw.

Developed and small shipments made in 1918.

OMAHA LEAD & ZINC CO.**OKLAHOMA**

M. R. Moore, mgr.

Property: 40 acres in Oklahoma, S. of Baxter, Kan. The mill was destroyed by fire, May, 1920.

ONAMENA MINING CO.**MISSOURI**

Plant sold in 1918, and company out of business. See Vol. XIII of this book.

ONCE MORE MINING CO.**MISSOURI**

Out of business. See Vol. XIII of this work.

ONTARIO SMELTING CO.**OKLAHOMA**

Address: J. G. Starr, pres. and mgr., Independent Bldg., Joplin, Mo. F. M. Sparks, supt.; Harry G. Stephens, ore buyer.

A lead smelter at Hockerville, in the Oklahoma section of the Tri-State region. Plant has been working since March 15, 1918. It consists of bag-house, motor-room, and furnace-room, all of brick, concrete, and steel; also a refinery of frame construction. Five Newman furnaces have a capacity of 1,600 tons of "Ontario" lead per month.

ORANGE MINING & MILLING CO.**MISSOURI**

Address: Joplin, Mo.

Works at Carterville, Jasper county, include a mill with Mineral Separation flotation machines and complete equipment.

ORONOGO CIRCLE MINING CO.**MISSOURI**

Stock and charter cancelled, July, 1917. Property now owned by Connecticut Zinc Corp'n., which see.

ORONOGO MUTUAL MINING CO.**MISSOURI**

Property sold September, 1918, to the Athletic Mining & Smelting Co., which see.

OSAGE MINING CO.**MISSOURI**

Dead or dormant. Mail returned from former address, 306 Commerce Bldg., Kansas City, Mo. Fully described in Vol. XIV.

OTIS MINING CO.**MISSOURI**

Property operated by the Consumers Mining Co., which see.

OTTAWA METAL CO.**OKLAHOMA**

Dead. No record of operations since 1918.

OWOSSO MINING CO.**MISSOURI**

Address: J. L. Harris, Hancock, Mich. The mine is owned by J. L. Harris, Daniel Fisher, Jas. Fisher, Jr., T. G. Shubert, all of Hancock, Mich., and H. H. Culver.

Property: a 10-year lease on 1 claim, 40 acres, on Baker land, Jasper county, Mo., carrying lead and zinc ore in sheet-ground formation. This is a virgin mine in the sheet-ground field in Duenweg, between the Lincoln and Coahuila mines.

Development: by 2 shafts, deepest 242' in sheet-ground, with 20' ore face.

Equipment: includes compressor, 8"x8" steam hoist, 3 pumps and 200-ton concentrating mill with jigs, crusher, rolls and tables. Plan reconstructing 200-ton mill at Duenweg, which will double capacity.

Production: begun in Sept., 1915, amounted to 4,240 tons of ore, or \$9,872. Concentrates averaged 58% zinc and 78% lead. Not operating in 1921.

OZARK LEAD & ZINC CO.**OKLAHOMA**

Dead. Former address: St. Louis, Okla.

Reported that a mill was put up a year before any development was done and the little exploration done up to July, 1919, failed to find ore.

Dead. Planned operations in 1918. See Vol. XIV.

PARAGON MINING CO.**MISSOURI**

Address: Joplin, Mo.

Production: 31 tons of blende per week.

PEARL CITY-JOPLIN MINING CO.**MISSOURI**

Address: Jess Hibbs, pres., Joplin, Mo.

Property: the Bankers mine, just N. W. of Joplin, reported sold for \$30,000, early in 1919.

PELICAN MINING CO.**OKLAHOMA****Address:** Picher, Okla.

Officers: J. F. Robinson, pres.; G. L. Coleman, sec.-treas.; Guy Blackmer, supt.; R. J. Tuthill, pur. agt.

Property: W. of Treece, reported under development.

PERRY ZINC LEASE**MISSOURI**

Property: a 12 acre lease at Joplin, Jasper county, equipped with hoist and drill. Six men employed.

PERUVIAN MINING & DEV. SYNDICATE, LTD.**MISSOURI**

Dead or dormant. No record of operations since 1918.

PFAEFFLE-KELLY MINE**MISSOURI**

Dead or dormant. Last address, care F. Pfaeffle, Joplin, Mo.

A small mill was erected and started in May, 1919.

PHOENIX MINING CO.**MISSOURI**

Address: E. N. Cunningham, mgr., Joplin, Mo. Not incorporated.

Property: 40 acres in Jasper county, Mo., carries lead-zinc ore in a soft limestone formation.

Development: by 176' vertical shaft and total workings of 600'.

Equipment: includes steam power, hoist, pump and 150-ton concentrating mill.

Production: in 1913, was 3,222,450 lb. zinc and 1,003,450 lb. lead; in 1914, 5,524,310 lb. zinc and 428,080 lb. lead.

Mine has been idle since October, 1914, save for some diamond-drilling done in 1916.

PICHER BIG CHIEF MINING CO.**OKLAHOMA**

Address: O. D. Halsell, Picher, Okla. Property last operated by Kentucky Chief Mng. Co.

PICHER LEAD CO.**MISSOURI**

Merged, June, 1916, with the Eagle White Lead Co., of Cincinnati, and a new company organized called the **Eagle Picher Lead Co.** (Okla.), which see.

PICHER-OKLAHOMA MINING CO.**OKLAHOMA**

Dead. Operations planned for 1918 failed to materialize. See Vol. XIV.

PIOKEE MINING CO.**OKLAHOMA**

Address: H. W. Harrison, sec.-treas., Box 717, Picher, Okla.

Officers: H. O. Abbott, pres.; A. G. Happock, v. p.; J. W. Wright, mgr.; A. N. Gaines, supt.

Inc. in Oklahoma. Cap. \$67,000.

Operates a lease on Eagle Picher Lead Co. land, just W. of Picher. The normal production is 40 tons of blende (60% metal) per week, from a 350-ton mill.

PIONEER LEAD & ZINC CO.**OKLAHOMA**

Address: Box 553, Joplin, Mo.

Officers: Harry Larsh, pres. and mgr.; J. L. Wilken, treas.; D. L. Larsh, sec.; C. M. Britt, supt.

Inc. in 1917 in Oklahoma.

Property: a 40-acre lease near the Bluebird mine of the Bilharz company, in Tar River area. Drilling opened 15 to 42% ore.

Equipment: a 600-ton mill was erected in 1918, and has been a steady producer. In February, 1920, the weekly output was over 40 tons. To Jan., 1920, the output was 5,000 tons of zinc and 2,000 tons of lead concentrates.

PITTSBURG-MIAMI LEAD & ZINC CO.**OKLAHOMA**

Idle. Property operated by Hunt Mining Co., which see.

PLAYTER BROS. PARTNERSHIP**MISSOURI**

Office: 201 Pearl Ave., Joplin, Mo. A partnership consisting of C. C. Playter and Geo. H. Playter.

Engages in prospecting and development and when ore is opened and mining started, operations are then controlled by separate organizations.

In 1920, leases W. of Baxter Springs, Kan., and E. of Picher, Okla., were being explored. Firm specializes in looking after interest of non-resident owners of mining properties.

PLEASANT VALLEY MINING CO.

MISSOURI

Address: J. M. Millard, pres. Carthage, Mo.

Inc. in Missouri.

Property: 100-acre leases, 3 miles S. W. of Carthage, developed by 138' shaft. Further drilling in 1920 revealed a 20' face of 15-25% blende ore at 128' depth and 7.6% ore at 175'.

Equipment: hoist, 400 cu. ft. compressor, 1,200-gal. pump, 3 engines, drills, and 100-ton mill, employing 90 h. p. gas engine, 30-in. rolls, 14-in. crusher, rougher and cleaner jigs. Concentrate assays 62% zinc, no lead, and under 1% iron. Eight men employed in 1919, and mine produced high-grade ore.

PLUMB MINE

OKLAHOMA

Controlled by the Kanok Metals Co., Box 1576, Picher, Okla. A. N. Gaines, mgr.

Property: 40-acre lease S. E. of Douthat, on which a mill was erected during 1920.

PORTLAND LEAD & ZINC CO.

OKLAHOMA

Dead. See Vol. XIV.

PORTO RICO MINING CO.

MISSOURI

See Barnett Mining Co.

POTOSI MINING CO.

OKLAHOMA

Address: T. F. Blount, pres., Potosi, Mo.

Property: 1 mile N. of Douthat.

POWER MINING CO.

OKLAHOMA

Address: C. W. Power, 1304 Kentucky Ave., Joplin, Mo.

Property: 48 acres, 1½ miles S. of Baxter, Kansas, in Oklahoma. Rich zinc-lead ore was revealed by drilling. Development underway in 1920.

PRAIRIE LEAD & ZINC CO.

OKLAHOMA

Address: Commerce, Okla.

Officers: C. O. Bedwell, pres.; Lester Eads, sec.-treas.; C. G. Giles, supt.

Property: a tract E. of Quapaw, on which at depth of 81', a drift shows ore to be 18' thick for a distance of 300' and drill holes show the ore horizon to vary between 62' and 112' below the surface. The 150-ton mill on the Crescent lease, E. of Quapaw, had a 3,000-ton dump to treat while mine development was underway.

PREMIER ZINC CO.

OKLAHOMA

Address: A. M. Gaines, mgr. Box 1576, Picher, Okla.

Owned by Kanok Metals Co. and Tri-State Mining Co.

Property: a lease on Tri-State company ground on South Main street, Picher; said to be one of the richest tracts in the district.

Development: ore occurs at 193' to 230' depth, with main level at 242'. Caves of rich ore are found frequently. Two shafts were sunk.

Equipment: includes a 500-ton mill.

Production: in 1919, 199,019 tons of ore hoisted, yielded 7,493 tons blende and 1,929 tons galena; in 1920, 105,537 tons hoisted yielded 5,176 tons blende and 1,974 tons galena. During Sept., 1921, company's mine yielded 22,320 tons of "dirt," producing 1,584 tons of zinc concentrate and 795 tons of lead concentrate. Employs 250 miners.

PRODUCERS CO.

OKLAHOMA

Address: E. C. Wirtz, receiver, Miami.

Operating the Hopkins lease, at Picher, Okla., at last accounts.

PRODUCERS LEAD & ZINC CO.

OKLAHOMA

Address: I. G. Conkling, mgr., Enid, Okla.

Officers: F. W. Hemme, pres.; A. C. Black, v. p.; I. G. Conkling, sec.-treas.

Inc. Oct., 1917. Cap. \$350,000.

Dividends: amount to \$35,000.

Property: leases in the Picher district. Shafts were sunk to open 6 to 30% ore found by drills, and a 250-ton mill erected. A recovery of 7% lead and zinc is made.

PROSPECTORS' DEVELOPMENT CO.

OKLAHOMA

Address: Geo. Sullivan, mgr., Miami, Okla.

Officers: J. D. Simpson, Clinton, Okla., pres.; Ellis Lamb, treas.

Property: 40-acre lease on the Weiss land, S. of Hockerville. **Equipment:** includes a 150-ton mill.

PROSPERITY MILLING CO.

MISSOURI

Dead. Operated near Joplin, in 1918. See Vol. XIV.

PRUDENTIAL MINING CO.

OKLAHOMA

Dead. Formerly at St. Louis, Okla.

QUAKER VALLEY MINING CO.

KANSAS

Dead. Last reports, 1918. Former address, Baxter Springs, Kan.

QUAPAW JACK LEAD & ZINC CO.

OKLAHOMA

Address: 233 Terminal Arcade, Oklahoma City, Okla.

Officers: L. E. Knight, pres.; Geo. Bass, v. p.; A. M. Coats, sec.-treas.

Inc. in Oklahoma.

Property: 1 mile N. of Quapaw. In July, 1918, company built a 200-ton mill and small shipments were made, but the slump in prices closed this and many other small plants at the time the armistice was signed.

QUAPAW MINING CO.

OKLAHOMA

Dead. Formerly at Quapaw, Okla.

QUEBEC MINING CO.

OKLAHOMA

Address: Tom Shelton, mgr., Drawer A, Douthat, Okla.

Mining and milling with production of lead and zinc concentrates began in September, 1918. In 1920, the weekly output was over 40 tons.

The company is involved in litigation with W. P. McCullough over rightful ownership of lease on Fish estate.

QUEEN ESTHER MINING CO.

KANSAS

Office: 805 Cosden Bldg., Tulsa, Okla.

Officers: F. M. Aiken, pres.; Allen Mason, v. p.; E. R. Perry, sec.; J. S. Cosden, sec.-treas., also directors. W. B. Shackelford, mgr., Cunningham Bldg., Joplin, Mo.

Inc. Aug. 18, 1915, in Oklahoma. **Cap. \$50,000; \$100 par; all issued.**

Property: a lease of 20 acres, 3 miles S. W. of Baxter Springs, Kansas, and one at Hockerville, Okla. Deposit is a dissemination of galena and sphalerite in limestone, at depths of 30' to 80' and 120' to 240'. Ore assays 0.672% lead and 4.704% zinc.

Development: by 180' shaft. **Equipment:** steam and electric power, hoist, compressor, pump, and 350-ton mill with 3 jigs and 14 tables. Was in operation Dec., 1921, shipping 80 tons of zinc ore in week ending Dec. 17th.

QUICK SEVEN MINING CO.

MISSOURI

Dead since 1918. See Vol. XIV.

QUINTON SPELTER CO.

OKLAHOMA

Works address: Quinton, Okla. **Office:** Joplin, Mo.

Officers: J. G. Starr, pres.-treas.; G. F. Streich, v. p.-gen. mgr.; L. P. Coblentz, sec.-asst. treas.

Cap. \$1,000,000.

Operates a zinc smelter with a 2,016 retort capacity and a production of 700 tons of slab zinc per month.

RAINBOW LEAD & ZINC CO.

OKLAHOMA

Address: Ed. Dunkin, Quapaw, Okla.

Officers: F. E. Herring, pres.; O. D. Halsell, v. p.; R. H. Drennan, sec.-treas.

Inc. in Oklahoma. **Cap. \$100,000.**

- Property:** E. of Picher and N. W. of Quapaw. Ore is found at 165' depth, and is from 20' to 35' thick. A 300-ton mill was built.
- RAMAGE MINING CO.** OKLAHOMA
Address: 608 Frisco Bldg., Joplin, Mo.
Officers: S. Y. Ramage, pres.; A. Green, sec.; Alfred Ramage, treas.; H. H. Hartsell, mgr.
Inc. May 9, 1917, in Okla. **Cap.** \$240,000.
Property: a lease at Century, equipped with a 500-ton mill. Weekly production averages 90 tons of blende, 60% metal when operating normally. Mill idle since Sept., 1918.
- R. & N. KANSAS LINE MINING CO.** KANSAS
 See Vol. XIV. Probably dead.
- RASHGO MINING CO.** MISSOURI
 Dead. No record of operations since 1918. Formerly at Joplin, Mo.
- REBECCA MINING CO.** KANSAS
 Dead. Mail returned from former address, Treece, Kan.
- RED EAGLE MINING CO.** OKLAHOMA
 Out of business. See Vol. XIV.
- RED GRANITE COPPER & WATER POWER CO.** OKLAHOMA
 Dead. See Vol. XIV.
- RED ROSE LEAD & ZINC CO.** OKLAHOMA
Address: Hockerville, Okla.
 Erected a 200-ton mill, 1918.
- REDSKIN MINING CO.** KANSAS
Office: 404 Commerce Bldg., Miami, Okla., or Baxter (route 5), Kansas.
Officers: D. H. Wilson, pres.; E. B. Frayser, v. p.; F. R. Bouldin, sec.-treas.-mgr.
Inc. in Oklahoma.
 Holdings acquired by **Boska Mining Co.**, which see.
- RED WASP MINING CO.** MISSOURI
 Out of business since 1919. Mill sold, 1920, to Larry Brunk. Formerly operated 2 miles N. of Aurora, Mo.
- REINDEER LEAD & ZINC CO.** MISSOURI
 Dead. No record of operations since 1918.
- REPUBLIC MINING CO.** OKLAHOMA
 Dead. See Vol. XIV.
- REX MINING & SMELTING CO.** MISSOURI
Address: Box 553, or 1805 Frisco Bldg., Joplin, Mo.
Officers: W. L. Chambers, pres.-mgr.; W. H. Picher, v. p.; Herbert Schnurr, sec.; E. A. Lucia, treas.
Inc. 1891, in Missouri. **Cap.** \$250,000.
Property: 1,000 acres of land adjoining the city of Joplin, to the S. W. Ore is mined at from 60 to 150' depth, and carries blende, calamine and galena. Production is said to total about \$3,000,000. Company does no mining, but leases ground on a royalty basis.
- RIALTO MINING CO.** OKLAHOMA
 Is a large and steady producer of zinc concentrate, at the rate of 60 tons weekly.
- RICHARD MINING CO.** MISSOURI
Address: L. M. Richard, trustee, 1401 Rialto Blvd., Venice, Calif. J. R. Marquette, mgr., Belle, Mo. J. Barbarick, supt.
Property: a diaspore mine at Belle, Mo., opened by shaft and opencuts and equipped for a production of 100 tons daily. The product is a highly aluminous material used in place of bauxite for the manufacture of abrasives.
- RICHARDSON MINING CO.** OKLAHOMA
Address: W. J. Mendenhall, sec., Claremore, Okla. **Mine address:** Quapaw, Okla.
- RICH STRIKE MINE** OKLAHOMA
 Reported drilling, shaft sinking, and a mill erected in 1918, near Quapaw.

RIGHT GOOD MINING CO.**OKLAHOMA****Address:** W. T. Dunlap, mgr.-supt., Box 327, Quapaw, Okla.**Officers:** Walter Glidden, pres.; E. D. Reed, v. p.; Arthur Gollaber, sec.**Property:** a 40-acre lease on the Kropp land, ½ mile S. of Hockerville, developed by 154' shaft. Erected a 250-ton mill early in 1921.**ROYAL MINE****OKLAHOMA****Address:** F. J. Childress, supt., Picher, Okla. Controlled by United Zinc Sm. Corp., Missouri.

Operated intermittently. Normal production 60 tons weekly.

ROYAL SHELL MINING CO.**KANSAS**

Dead. No record of operations near Baxter Springs, Kans.

SAFEGUARD MINING CO.**OKLAHOMA**

Probably dead. Planned mill near Commerce, Okla., in 1918.

SAINT FRANCOIS LEAD CO.**MISSOURI**

Property acquired by the Baker Lead Co., and sold in 1920 to the St. Joseph Lead Co.

ST. GEORGE MINING CO.**MISSOURI****Address:** W. E. Lloyd, mgr., or Warren Heaton, Neosho, Mo.**Cap.** \$400,000.**Property:** 40 acres in Aroma, Newton county, 2 miles S. of Granby, Mo.

Ore occurs in a sheet formation carrying blende and lead under 200' of limestone. Drill-cores assayed 9.65%.

Development: by a 274' shaft, sunk in 1919, and another sunk in 1920.**Equipment:** includes a 500-ton mill, erected in 1920.**ST. JOE MINING CO.****OKLAHOMA****Address:** J. W. Grounds, Jr., pres.-mgr., Box 564, Picher, Okla.**Inc.** in 1916. **Cap.** \$70,000.**Property:** a 40-acre lease on Eagle-Picher Lead Co.'s land in the town of Picher. Equipped with a 300-ton mill, working steadily since 1919, producing about 125 tons of zinc concentrate weekly.**ST. LOUIS LEAD & ZINC CO.****OKLAHOMA****Address:** George Lumick, supt., Quapaw, Okla.**Property:** S. W. of Quapaw. Drilling has proved ore and shafts have been sunk. The mill near Quapaw was moved to the Jefferson mine south of St. Louis, Okla., late in 1918. Gas-driven compressors are at work.**ST. LOUIS SMELTING & REFINING CO.****OKLAHOMA**

Subsidiary of National Lead Co.

Address: J. A. Caselton, 2nd v. p. 722 Chestnut St., So. Louis, Mo.; C. E. Schwarz, supt., Miami, Okla.**Cap.** \$500,000, all owned by National Lead, reduced from \$2,000,000 in 1917, when St. Louis holdings, except smeltery, basic lead sulphate plant and some minor properties, were taken over by National Lead, and became nucleus of its branch, St. Louis Smelting & Refining Wks.**Property:** 160 acres of leased property at St. Louis, Okla., on which three 400-ton modern mills are erected. Also 1,240 acres of partly developed ground about 3 miles E. of St. Louis. More than half of all the crude ore mined in the territory E. of Picher was treated in the mills of this company, which are regarded as the best in the district. Ore was hoisted from 4 shafts from levels between 232 and 245'.**Production:** over 600 tons of blende weekly early in 1920.

Company operates also a lead smelter and refinery at Collinsville, Ill.; capacity is 72,000 tons of pig lead and 120,000 tons of concentrate.

ST. LOUIS SMELTING & REFINING WORKS**MISSOURI**

Formerly owned by the St. Louis Sm. & Ref. Co. (q. v.), now a branch of the National Lead Co.

Address: J. A. Caselton, asst. mgr., 722 Chestnut St., St. Louis, Mo.**Property:** 1,895 acres at St. Francois, southeastern Missouri. **Ore:** carries lead sulphide in dolomite. Six shafts are in operation, deepest 565'.**Equipment:** complete with a 3,000-ton concentrating plant. Flotation is employed with gravity concentration. Besides treating its own ore, company

treats that from the Baker Lead Co., at Leadwood, and the Boston-Elvins Lead Co. at Elvins.

A system of conveyors takes ore to the crushers, after which it passes rolls, screens, jigs, tables, and finally to the flotation department.

Company has its own power-plant, consisting of 32,000 h. p. in steam boilers, supplying 5 engines and generators of 2,161 k. w. capacity, two large air-compressors, 5 motor-generator sets for the underground haulage system, electric light, pumps and fans in the mines, hoists, mill, and other works. One of the hoists is of double-drum type, driven by a 225-h. p. motor provided with control in the hoist-house or at 365' down in the mine. Five ton skips are hoisted 425' in 55 seconds. Employs about 380 men.

ST. REGIS MINING AND SMELTING CO. MISSOURI

Address: McClelland Bldg., Kansas City, Mo. E. R. McClelland, pres.-treas.

Inc. in September, 1915. **Cap.** \$100,000.

Property: 40-acre lease, including the old American Beauty mine, N. W. of Duenweg, developed by two 208' shafts in sheet-ground formation; said to have a 20'-25' ore face.

Equipment: includes 350-ton concentrator, 4 gas engines, 2 compressors, two 100 h. p. boilers and a change-house.

Production: 103 tons of blende per week.

SAND SPRINGS ZINC SMELTER OKLAHOMA

Owned by the **United States Zinc Co.** (q. v.), a subsidiary of the Am. Sm. & Rfg. Co.

Office: 120 Broadway, New York. **Works address:** F. P. Lannon, Jr., gen. supt., Sand Springs, Okla.

Has a 5,936 retort capacity.

SANTA FE MINING CO. OKLAHOMA

Address: A. J. Davidson, mgr., Box 451, Baxter Springs, Kansas.

Officers: W. G. Skelly, pres.; J. H. E. Nilsson, sec.-treas.

Property: 40 acres, 1 mile S. W. of Hockerville.

Operates a 300-ton mill, driven by 15, 37½, 50, and 100 h. p. oil engines; operations show a recovery of 10% zinc and lead. Weekly output is about 50 tons of concentrate.

SCHOOL HOUSE MINING CO. MISSOURI

Idle. Address: Joplin, Jasper county, Mo.

Inc. in Missouri. **Cap.** \$100,000.

Property: 40 acres of lead-zinc land near Carterville.

Development: by 3 shafts, average depth 167'. Equipped with 800-ton concentrator. Does not reply to requests for information.

SCOTT EAGLE MINING CO. OKLAHOMA

Dead. Formerly at Commerce, Okla.

SCOTT MINING CO. MISSOURI

Address: D. L. Argyle, supt., Duenweg, Mo. Haywood Scott, pres.

Property: in Duenweg district. The 500-ton mill was destroyed by fire in 1917. No recent returns.

SEA BEE MINING CO. MISSOURI

Idle. Address: Sam Smith, Carterville, Mo.

SEMINOLE MINING CO. MISSOURI

Address: J. W. Mabry, supt., Purcell, Mo. Mine at Neck City, Mo.

SHAWGO MINING CO. MISSOURI

Dead. Formerly operated near Webb City, Mo. (1918).

SHORT CREEK ZINC & LEAD CO. MISSOURI

Out of business. Described Vol. XIII.

SILVER CROWN MINING CO. OKLAHOMA

Dead. Formerly at Peoria, Okla.

SILVER FOX LEAD & ZINC CO. KANSAS

Address: Treece, Kans., or Box 1596, Picher, Okla.

Officers: B. J. Conley, pres., F. J. Childress, mgr.

Inc. in Oklahoma.

Property: 40-acre lease, 1½ miles N. W. of Treece, an extension of the Picher, Oklahoma, field. The 300-ton mill, erected in 1918, was burned in July, 1919, but was rebuilt. Mine is a steady producer.

SILVER PLUME MINING CO.**OKLAHOMA**

Address: W. H. Logan, Baxter Springs, Kan. Mine located N. of Picher, Okla.

SINDEN ZINC CO.**OKLAHOMA**

Address: W. B. Shackelford, mgr., Douthat, Okla.

Officers: F. M. Aiken, pres.; J. S. Cosden, v. p.; E. R. Kemp, sec.-treas.; M. B. Lawrence, mine supt.

Inc. 1917, in Oklahoma. **Cap.** \$200,000.

Property: 20-acre lease just N. of Douthat. Equipped with a 300-ton mill. Producing, December, 1921.

SKELTON LEAD & ZINC CO.**OKLAHOMA**

Address: Frank Childress, mgr., Douthat, Okla.

Property: a 10-year lease on 240 acres, including 9 producing mines and 9 mills, at Douthat and Tar River.

Production: the mills dress about 1,000 tons of 6% ore per shift. Company is second largest producer in Oklahoma.

The weekly output averages 500 tons of zinc concentrate. All operations were stopped December, 1920, but resumed 1921 at four of company's mines, viz. 1, 4, 5, and 7. The No. 2 mill was burned in 1921.

SLEDGE HAMMER MINING CO.**MISSOURI**

Address: Granby, Newton county, Mo. Operates a one-acre lease. Three men employed.

SLIGO FURNACE CO.**MISSOURI**

Operates the Walker mine at Sligo, Dent county. Ore is red and specular hematite. Also operates the Winkler mine in Phelps county.

SOUTHEAST MISSOURI MINING CORP.**OKLAHOMA**

Probably dead. Former address: Picher, Okla.

In 1918, two shafts were sunk, to open a 35' face of ore exposed by drills at depth of 185', and a 300-ton mill erected.

SOUTHERN ACID & SULPHUR CO.**MISSOURI**

Inc. in Illinois. **Cap.** \$50,000.

Property: 160 acres, includes Rueppel iron mine at Stanton, Franklin county, developed by 2 shafts to depth of 175'. About 18 men employed.

SOUTHERN LEAD & ZINC CO.**KANSAS**

Address: H. S. Clarke, sec.-treas., Box 676, Miami, Okla. C. A. Neal, mgr.

Inc. 1907, in Okla. **Cap.** \$300,000.

Property: 100-acre lease on tract of Cooper land, near the State line, 1 mile N. W. of Treece, and 7 miles W. of Baxter Springs. Two shafts have been sunk. Water was reported to be troublesome.

Equipment: includes an electrically-driven 500-ton (10 hours) mill.

Operated one shift during 1919. Reported, Nov., 1921, that company's property had been sold for \$150,000 to F. W. Evans for the Keltner Mining Co.

SOUTH SIDE MINING CO.**KANSAS**

Idle. Last operations in 1918, near Galena, Kan.

SPELTER MINING CO.**OKLAHOMA**

Address: J. J. Gurlach, Woodward, Okla.

Cap. \$150,000.

Property: a lease on Abrams' land E. of Quapaw. Eight drill-holes found ore, one lot assaying 38%.

SPIRAL LEAD & ZINC CO.**MISSOURI**

Address: J. S. Mullen, pres., Ardmore, Okla.

Property: the Martha Ball mine, a sheet-ground mine W. of Chitwood, and E. of La Nora B. mine, developed to depth of 195'.

SQUARE DEAL MINING & ROYALTY CO.**MISSOURI**

Dead. Formerly operated near Ozark. See Vol. XIV.

- SQUIRES MINING CO., C. W.** **KANSAS**
 Idle, if not dead. Last operations reported were in 1918, near Galena, Kan.
- S. S. & G. MINING CO.** **OKLAHOMA**
 Address: A. M. Gaines, Box 1576, Picher, Okla.
 Property: a tri-partnership operating a 50-acre lease and 450-ton mill, 2 miles N. of Cardin, formerly owned by the Defender Mining Co. A regular producer since 1919, output in 1921 being between 300,000 and 400,000 lb. of zinc concentrate weekly.
- STANDARD ZINC LEAD MINING CO.** **OKLAHOMA**
 Office: 314 Frisco Bldg., Joplin, Mo. J. F. Haley, gen mgr.
 Property: at Cardin, Okla.
 Development: two 220' shafts were sunk during 1918-19, opening a thickness of 30' of unusually rich ore of indefinite length. High-grade lead ore has also been developed from which a concentrate is made that assays up to 85% Pb.
 Equipment: a 300-ton mill, completed in Feb., 1919, and operating regularly since.
- SUCCESS ZINC CORPORATION** **MISSOURI**
 Address: J. F. Adair, Ruby Hotel, Joplin, Mo.
 Inc. in Missouri. Cap. \$100,000.
 Property: 40-acre lease on the Rensenhausen land, S. W. of Joplin, developed by 155' shaft.
 Equipment: includes 150-ton mill, compressor, Wilfley tables, steam power, drill.
- SULLIVAN ZINC MINING CO.** **MISSOURI**
 Dead. See Vol. XIII of this work for data.
- SWARTZ MINING CO.** **MISSOURI**
 Probably dead. Formerly at Joplin, Mo.
- TAR CREEK MINING CO.** **OKLAHOMA**
 Address: O. Longacre, Jr., 207 Miners Bank Bldg., Joplin, Mo. Property: 310 acres at Alba.
- TAR RIVER MINING CO.** **OKLAHOMA**
 Dead. Formerly at Douthat, Okla.
- TATUM MINING CO.** **MISSOURI**
 Controlled by F. U. Tatum and W. M. Youtsler, of Joplin, Mo.
 Property: Dime Mine, said to contain high-grade ore.
- TENNESSEE ZINC & LEAD CO.** **MISSOURI**
 Mail returned from former address, 220 Miners Bank Bldg., Joplin, Mo.
 P. H. Corbett, pres.
 Inc. 1916, in Missouri. Cap. \$100,000.
 Property: 62 acres, 8 miles N. W. of Joplin, Mo. Ore carries zinc blende from 3 to 20%, the average being 7.15%. The deposit is 12' thick, 600' long and is opened by 92 and 123' shafts.
 Equipment: includes 100-ton mill, using rolls, crusher, jigs, screens and tables.
 Production: (1917) 70 to 335 tons of 63% zinc concentrate, with up to 0.16% lead per month. Costs were \$1.90 for mining, 32.9c for milling, a total of \$2.23 per ton. Good profits were made in 1917 and 1918.
 Probably closed down.
- TEN O'CLOCK MINING CO.** **MISSOURI**
 Address: Carterville, Mo.
 Property: 10 acres in Carterville district, Jasper county, developed by 5 shafts to depth of 180'.
 Equipment: includes 150-ton concentrator, compressor, drills, crusher, steam power. About five men employed.
- TEXAS MINING CO.** **OKLAHOMA**
 Address: 1802 Bird St., Joplin, Mo. H. H. Holeman, sec.-treas.; W. L. Owen, mgr.
 Property: 2 miles E. of Picher. Rich ore—20 to 30% blende—was

opened at 176' depth, and a mill erected in 1918. Water has hampered development. Weekly output is over 40 tons of blende.

TIGER MINING CO.**OKLAHOMA**

Address: Theo. Hudson, mgr., Miami, Okla.

Property: N. of Cardin.

TOLTEC MINING CO.**MISSOURI**

Address: H. G. Larsh, Miners Bank Bldg., Joplin, Mo.

Property: S. of Hockerville, was operated in 1921, shipping 67,400 lb. zinc concentrate in week ended Dec. 10, 1921.

TRIANGLE MINES CO.**OKLAHOMA**

Dead. Formerly at Commerce, Okla. See Vol. XIV.

TRI-STATE COMPANY**OKLAHOMA**

Address: L. C. Church, Frisco Bldg., Joplin, Mo.

Company has over 1,000 acres under lease in Oklahoma and two mills. the Premier and Blue Bonnet.

TROUP MINE**MISSOURI**

Address: Geo. J. Kusterer, owner, Webb City, Mo. Operated by Caylor, Davis and Burk.

Property: at Prosperity, said to contain high grade lead ore. Developing and shipping in 1921.

TULSA FUEL & MANUFACTURING CO.**OKLAHOMA**

Subsidiary of New Jersey Zinc Co.

Works: at Collinsville, Okla. Company operates a zinc smelter.

TULSA-PITTSBURG MINING CO.**MISSOURI**

Address: Margaret O'Connor, 435 West 6th Street, Pittsburg, Kansas.

Property: a lease on the Missouri side of the Waco district, tract carrying 17 to 30% ore at depth of 160 to 175'. Three shafts have been sunk, machinery installed, and a 250-ton mill erected. Operating part time. Shipped 424,800 lb. blende in December, 1921.

TULSA-SAPULPA-MIAMI ASS'D MINES CO.**OKLAHOMA**

Address: R. C. Howard, mgr. Tulsa, Okla.

Property: leases around Wyandotte, S. W. of Miami, Okla. Drilling was completed and shaft sinking started in June, 1918.

TWIN CITIES MINING CO.**MISSOURI**

Address: Geo. Moore, mgr., Webb City, Mo.

Inc. in Missouri. Cap. \$50,000. Is a merger of the Laura Alice and Ben Franklin mining companies.

Property: lands leased from Daugherty & Davey, in Jasper county, on Center creek, between Webb City and Carterville, using the 175-ton Davey No. 1 mill. Developed by two shafts steam power being used.

TYLEE & LENNAN**OKLAHOMA**

Address: P. O. Box 635, Miami, Okla. Mine located at Commerce, Okla.

UNDERWRITERS LAND CO.**OKLAHOMA**

Address: Box A-32, Picher, Okla.

Officers: Geo. H. Worthington, pres.; Andrew Squire, v. p.; Alvin Good, sec.-treas., with Warren S. Hayden, F. N. Bendelari, A. E. Bendelari, Harry W. Davis, directors. F. N. Bendelari, mgr.

Inc. 1901, in Delaware. Cap. \$1,000,000; \$1 par; all outstanding. Annual meeting in February. No bond issues. Transfer office, 1015 Hippodrome Bldg., Cleveland, Ohio; registrar, the Union Trust Co., Cleveland, Ohio.

Dividends: 6%, 1917; 14%, 1918; 14%, 1919 10%, 1920.

Property: 162 acres owned in fee in Jasper county, Missouri, 200 acres under lease in Ottawa county, Oklahoma, and 160 acres under lease in Cherokee county, Kansas.

Development: four mines in operation—No. 1 Mine at Douthat, Okla., with workings at 160'; No. 2 mine at St. Louis, Okla., with workings at 235'; No. 3 mine at St. Louis, Okla., with workings at 245'; No. 4 mine at Douthat, Okla., with workings at 165'. No. 1 mine is in mineralized brecciated rock

largely "water-course" ground. No. 2 and No. 3 mines are in mineralized brecciated rock "tight ground". No. 4 boulders with interstices mineralized.

Equipment: at No. 1 mine, 250 ton mill and flotation unit; No. 2 mine, 300 ton mill and flotation unit; No. 3 mine, 300 ton mill and flotation unit, No. 4 mine, 300 ton mill.

Normal production 500 tons concentrates weekly of which about 8% is galena, 82% pb., 92% sphalerite and 62% zinc. Producing Nov. and Dec., 1921, at rate of 200 to 250 tons weekly.

UNION METAL MINES CO.

MISSOURI

Address: P. B. Butler, mgr., Frisco Bldg., Joplin, Mo.

Described in Volume XIV. Property now owned by **Barnsdall Zinc Corporation.**

U. S. LEAD & ZINC CO.

MISSOURI

Promoted by C. L. Glass & Co., Vandergrift Bldg., Fourth Ave., Pittsburgh, Pa.

Directors: P. S. Chambers, D. A. Rees, and W. S. Maxey.

Inc. in Delaware. **Cap.** \$600,000; \$1 par.

Property: one 20-acre lease in Joplin district, opened by 190' shaft and several drifts, and one 24-acre lease opened by two 120' shafts, two 50' shafts, and drifts, all in high-grade ore.

Equipment: each mine has a 150-ton mill for concentrating the zinc-lead ore. Presumably idle several years.

UNITED ZINC SMELTING CORP.

MISSOURI

Controlled by Charles M. Schwab of the Bethlehem Steel Corporation since Dec., 1919.

Office: 233 Broadway, New York. D. G. Harrison, mgr., Frisco Bldg., Joplin, Mo.

Officers: B. Lissberger, pres.; Otto Proeßler, v. p.; W. A. Mitchell, sec.; and H. W. Lohman, treas.; with C. M. Schwab, Max Lissberger, J. H. Ward, Albert Bridgens, A. F. Cassidy, and B. D. Foster, directors.

Inc. May 1, 1916, in New York. **Cap.** 600,000 shares common without par value, offered at \$12.50 per share in April, 1916; 565,684 outstanding. Also \$1,000,000 pfd, par \$5, created April 1921. **Bonded debt:** \$307,000 of 8% serial notes. Bankers Trust Co., New York, transfer agent; Equitable Trust Co., New York, registrar. Listed on New York Curb.

Financial Statement: gross earnings for the year ended April 30, 1917, were \$807,026, and profit, \$638,957. The year ended Dec. 31, 1919, yielded a revenue of \$1,431,032, of which \$94,941 was profit, plus \$13,028 other income. Deducting depreciation, amortization of Manhattan mine, interest, taxes, etc., of \$201,754, net loss for year was \$93,785.

Company produces about 16,000,000 lb. of spelter annually.

Property: owns 98.5% of the common stock of the Kenefick Zinc Corp'n; also the entire stock of the Pearlman Co. Inc., which in turn owns the entire capital stock of the Clarksburg Zinc Co. Also owns the Manhattan mine at Tar River, Okla., which yields zinc concentrate, and the Royal mine acquired Oct., 1920.

Smelter: at Moundsville, W. Va. has two 50-ton Hegeler roasters, 2,304 retorts, pottery plant making 500 retorts daily and storing capacity for 12,000 gas producers, etc. Plant makes 100 tons daily of 60% sulphuric acid.

Zinc Leasing and Dev. Corp.

Inc. 1920 to take up various leases of the United Zinc and operate them on a royalty. **Cap.** \$300,000; par \$5. Issued 287,855. Stockholders of United Zinc of record Nov. 30, 1920, were given right to subscribe to one share of Dev. Corp'n for every 10 shares United Zinc owned.

UNITY MINING CO.

MISSOURI

Address: E. Carey, sec., Webb City, Mo.

Property: the Unity, a sheet-ground mine N. of Webb City, yielding about 5,500 tons of high grade concentrate annually.

UTAH-MISSOURI MINES CO.**MISSOURI**

Probably dead. Former address, Neck City, Mo. See Volume XIV.

VACATION MINING CO.**MISSOURI**

Dead. Described in Vol. XIV.

VANTAGE MINING CO.**OKLAHOMA**

Address: O. A. Sneed, mgr., Picher, Okla.

Property: operates on land of Eagle Picher Lead Co., in Picher district. At company's No. 1 mine at Picher, 79,476 tons of "dirt" yielded 7,293 tons of zinc ore and 3,808 tons of lead ore in 1921. The "recovery" was 9.17% zinc and 4.79% lead in local parlance. Produces between 300,000 and 600,000 lb. of zinc concentrate weekly.

In December, 1921, company took an option on the Boston mine, 1½ miles south of Baxter Springs, Kansas, a 40-acre tract with one shaft opening ore at 145' and a 150-ton mill.

VELIE MINES CORPORATION**OKLAHOMA**

Address: 420 Frisco Bldg., Joplin, Mo., or Box 181, Cardin, Okla.

Officers: S. H. Velie, pres.; F. E. Weeks, sec.-treas.-mgr.; C. O. Plunkett, supt.

Inc. in 1917. Cap. \$96,000.

Property: 200 acres, ½ mile N. W. of Cardin, including the Lion and Panther mines.

Equipment: includes two 300-ton steam and electric-driven mills.

VESUVIUS MINING CO.**MISSOURI**

Operations stopped and charter surrendered, 1918. Described, Vol. XIII.

VICTOR MINING CO.**OKLAHOMA**

Dead.

Operated a lease near Picher, on Eagle Picher Lead Co. ground in 1918.

VICTORY METALS CO.**OKLAHOMA**

Address: Geo. Moore, Joplin, Mo. Mine address: Miami, Okla.

Officers: Sam Davis, pres.; Arthur Wolf, v. p.; J. A. Harrison, sec.; W. H. Logan, treas.-mgr.; John Cox, supt.

Inc. in Arizona.

Property: the Blue Bonnet mine in the Miami field, and the Beck zinc smelter at Henryetta, Okla. The west Cardin mine had 60 men working double shift on 235' level during last half of 1921.

Equipment: a 250-ton mill driven by gas engines. Producing regularly at rate of 500,000 to 800,000 lb. zinc concentrate weekly with 57,000 to 92,590 lb. lead concentrate bi-monthly in 1921.

VICTORY MINING CO.**OKLAHOMA**

Address: John Wingfield, Baxter Springs, Kansas.

Officers: J. Wingfield, pres.; W. H. Langford, sec.; L. F. McDonald, treas.-mgr.

Inc. in 1919.

Property: the Republic mine, between Picher and Cardin, equipped with a mill. A steady producer.

VINEGAR HILL ZINC CO.**KANSAS**

Address: J. G. Trewartha, gen. supt., Baxter Springs, Kan. See same title in Wisconsin.

WACHUSETTS LEAD & ZINC CO.**OKLAHOMA**

Address: Box 226, Commerce, Okla.

Officers: Arthur Pope, pres.; Malcolm Green, sec.-treas. Is a Massachusetts corporation. Aug. Mayorhoff trustee, Miami, Okla.

Property: owns a mine located North of Tar River, Okla. Also a mine and mill at Treece, Kan., J. H. Klinefelder, mgr., to which the Lennan mill, formerly at Commerce, was moved in 1921.

WACO MINING CO.**MISSOURI**

Address: P. S. Butler, Joplin, Mo.

Fully described in Volume XIV. Holdings transferred to Barnsdall Corporation, which see.

WADE MINING & MILLING CO. MISSOURI

Dead or dormant. Address: 620 Joplin St., Joplin, Mo.

Officers: C. E. Brenton, pres.; Frank Boehm, v. p., St. Louis; and E. W. Buskell, treas., Joplin.

Property: a lease formerly held by Gilt Edge Mng. Co., on the Wade farm, 120 acres, 3 miles W. of Diamond and 3 miles E. of Tipton Ford, Mo. The proportion of metal in the ore is 33% lead and 66% zinc. Two shafts, drifts and drill-holes have been opened. Ore treated in a 150-ton mill.

WALKER MINING CO. OKLAHOMA

Dead. Last address: Miami, Okla.

WAR BABY LEAD & ZINC CO. OKLAHOMA

Dead. Formerly operated in Peoria district. Fully described in Volume XIV.

WARD MINING & MILLING CO. OKLAHOMA

Dead. Former address: Lincolnville, Okla.

WARNER MINING CO. OKLAHOMA

Address: J. H. Medlin, Tar River, Okla. Mine located E. of Tar River, Okla.

WARREN-BREWSTER MINING CO. MISSOURI

Address: Joplin, Mo.

Inc. in Mo. Cap. \$9,000.

Property: in Sec. 18, T. 27, R. 32, developed by 3 shafts to depth of 125'.

Equipment: includes 100-ton concentrator and Wilfley tables. Employed 18 men during part of 1919.

WASHINGTON LAND & MINING CO. MISSOURI

Idle.

Address: W. Maclay, mgr., Bliss, Mo.

Officers: A. L. Shapleigh, pres.; J. D. Filley, v. p.; R. W. Shapleigh, sec.; the foregoing are directors.

Inc. about 1880, in Missouri. Cap. \$50,000; \$100 par; all issued.

Owns 6,250 acres lead and baritic lands in Washington county, operated on royalty basis.

WAUGH & JONES MINE KANSAS

Address: W. B. Waugh, Baxter Springs, Kansas. Mine address: Treece, Kansas.

WAXAHACHIE MINING CO. OKLAHOMA

Address: Gateway Hotel, Quapaw, Okla.

Officers: L. D. Laswell, pres.; J. A. Simmons, v. p.; Alfred Hare, sec.-treas.-mgr.

Inc. in Oklahoma.

Property: Waxahachie No. 1 mine, about 3 miles E. and Waxahachie No. 2 mine, 1 mile W. of Quapaw. Produced over 30 tons weekly in 1920. A new 200-ton mill was erected in 1920.

WAYLAND MINING CO. KANSAS

Out of business. See Vol. XIV.

WEAVER MINING CO. OKLAHOMA

Dead. Formerly at Commerce, Okla.

WEBB CITY-CARTERVILLE DEVELOPMENT CO. MISSOURI

Address: G. J. Kusterer, chairman, Webb City, Mo.

Organized March, 1919, by local business and mining men to raise \$100,000 and drill for new ore deposits in this district. The developed tracts are sub-leased to other operators.

WEBBER MINING CO. OKLAHOMA

Address: R. J. Tuthill, agt., Miami, Okla.

Property: 1½ miles N. of Picher.

WELCH MINING CO.

Company held leases on 360 acres of mining land near Douthat owned by Indians. These leases were declared void by the Secretary of the Interior in 1920 and the land has been leased to various other companies, including the Skelton L. & Z. Co. on a 10% royalty basis.

OKLAHOMA**WENTWORTH MINING CO.**

Owens 40 acres lead-zinc land at Wentworth, equipped with 250-ton mill. Shipped 51,200 lb. blende, in October, 1921.

MISSOURI**WESTERN SPELTER CO.**

Presumably dead. Its 3,200 retort zinc smelter was acquired by U. S. Zinc Co., subsidiary of the A. S. & R. Co.

OKLAHOMA**WEST VIRGINIA LEAD & ZINC CO.**

Address: E. B. Hatton, Savoy Hotel, Miami, Okla., or Baxter (route 2), Kansas.

OKLAHOMA

Officers: Chas. Heinselman, pres.-mgr.; A. D. Sees, v. p.; A. A. Haught, treas.; and H. B. Reid, sec.

Inc. in 1918 in W. Va.

Property: at Sunnyside, adjoining the Lead Boy, in the Quapaw district. Drill holes said to show good ore. A mill was erected late in 1919 and company was producing and shipping about 50 tons of zinc concentrate weekly at end of 1921.

WEST VIRGINIA MINING CO.**KANSAS**

Dead. Last address: care W. W. Mucklow, Galena, Kan.

WHAT CHEER MINING CO.

Dead. Operated, 1918, at Duenweg, producing 32 tons of blende per week.

MISSOURI**WHITE BIRD MINING CO.****OKLAHOMA**

Address: T. F. Steers, Joplin, Mo.

Property: 40-acre lease E. of Picher. Has a mill, and is a steady producer. Shipments for week ending Dec. 17th, 1921. were 216,980 lb. of zinc concentrate.

WHITE EAGLE MINING CO.**MISSOURI**

Address: Chas Theurer, Joplin, Mo. Mine located S. of Baxter.

WHITE MINING CO., WM. FOSTER**OKLAHOMA**

Address: Otis White, mgr., Picher, Okla.

Operating the old Buffalo mine in N. W. Picher, late in 1921, and shipping 40-50 tons of concentrate weekly. Employs about 70 men.

WINGFIELD MINING CO.**MISSOURI**

Dead. Sold mill and surrendered lease, 1920. See Vol. XIV, for account of Oklahoma mine and mill.

WINNIE-LAWSON ZINC CO.**MISSOURI**

Probably dead. Highly advertised in the Joplin papers, January, 1916, as an "investment offering of great significance and importance." The company claimed to have under lease, 270 acres of land in the "most promising portions of the southwest lead and zinc district," and that it had let a contract for a 400-ton mill. Edward Lawson was the promoter.

WOLFTON MINING CO.**OKLAHOMA**

Dead. Formerly at Picher, Okla. See Vol. XIV.

WOLVERINE MINING CO.**OKLAHOMA**

Address: Verne E. Thompson, pres., Miami, Okla. Mine located S. W. of Quapaw.

Officers: above with V. Taylor, sec.-treas.; C. R. Garrett, supt. and purch. agt. Is an Oklahoma corporation.

YALE MINING CO.**MISSOURI**

Address: Hornbrook & Federmann, owners, 1116 Oak Street, Kansas City, Mo.

Property: 35-acre lease on Missouri Zinc Fields land, S. of Webb City, developed by two 200' shafts in sheet-ground.

Equipment: includes a 350-ton electrically-driven mill. Idle since 1919.
YELLOWSTONE MINING CO. **MISSOURI**

Address: T. P. Jones, 323 Miners Bank Bldg., Joplin, Mo.

Property: a lease on East 15th Street, Joplin. Equipped with 150-ton mill. Idle during 1919, but operated part of 1920.

ZINC CORPORATION OF MISSOURI **MISSOURI**

Address: Tom Franks, Cunningham Bldg., Joplin, Mo.

ZINC LEAD CORPORATION **OKLAHOMA**

Address: C. C. Whittier, Box 67, Picher, Okla.

Officers: J. J. Cole, pres.; C. C. Whittier, mgr.; O. N. Maness, supt.; Robert W. Hunt & Co., 2200 Insurance Exchange, Chicago, Ill., engineers.
Inc. in 1917 in Delaware. **Cap.** \$350,000.

Property: 40 acres, about 1 mile N. W. of Picher, on Tar Creek. Two shafts supply a 400-ton mill.

MONTANA

Montana is essentially a copper and silver State, the 1918 output of these metals being 323,174,850 lb. copper, and 16,797,489 oz. silver, both an increase over that of the previous year. Gold declined to 150,193 oz., a decrease of 20,000 oz.; lead increased to 37,135,875 lb. or 65%, while the zinc output of 209,258,148 lb. was also an increase. Dividends totaled over \$20,000,000. In 1919 there was a decrease in production of all metals, partly due to labor strikes, partly to fuel shortage. Production in 1919 was 180,246,000 lb. copper; \$2,272,000 gold; 42,163,000 lb. lead; 13,281,000 oz. silver, and 176-432,000 lb. zinc. Dividends were over \$10,000,000.

Metal production in 1920 was \$1,851,165 gold, 12,579,178 oz. silver, 177-743,747 lb. copper, 31,253,916 lb. lead, and 184,337,786 lb. zinc, valued at \$65,573,047. Dividends totaled \$9,515,000.

In 1921, the value of gold, silver, copper, lead and zinc mined was about \$16,212,000, a decrease from the 1920 value, owing to the unusually low prices for copper, lead and zinc which resulted in the closing down of the large copper and zinc mines at Butte, in April, 1921.

Metal production for 1921 was \$1,360,000 gold; 6,233,000 oz. silver; 51,595,000 lb. copper; 21,674,000 lbs. lead and 23,000,000 lb zinc, valued at \$16,212,000. No dividends were paid during the first eleven months of 1921.

AINTRAM MINING CO. **MONTANA**

Address: D. Buchanan, supt., Martina, Missoula county, Mont.

Property: a small gold mine sufficient to keep 5 light stamps and a Forrester rod mill employed, the latter machine being added in May, 1919.

ALICE GOLD & SILVER MINING CO. **MONTANA**

Office: John Gillie, gen. mgr., Hennessy Block, Butte, Mont.; C. L. Berrien, gen. supt., Butte, Mont. Is a subsidiary of the Anaconda Copper Co. Output, 1918, 132,600 tons. Is a zinc silver mine. Closed down 1919-20.

Mine is operated as one of the Anaconda units. A steel head-frame and large hoist were erected during 1918. For recent litigation, see Vol. XIII.

In December, 1919, minority shareholders were allowed a re-argument of the proceedings covering sale of the mine to the Anaconda company. The dispute was over the price paid, and upon jurisdiction of the court, the Alice Company having been incorporated in Utah. In Jan., 1921, the U. S. Supreme Court set aside the decision in favor of the Anaconda and ruled that the price paid was not enough.

ALLIANCE COPPER CO. **MONTANA**

Address: Donald Campbell, pres. or J. D. Stemons v. p.-treas., Butte, Mont. A. T. Morgan, sec.

Inc. May 19, 1906, in Montana. **Cap.** \$400,000, fully issued, shares \$2 par. Stock listed on Butte Exchange.

Property: is very small acreage in the S. E. portion of the Butte district with surface rights to sundry town lots.

Development: by shaft, sunk jointly by the Alliance and Farrell companies. Mine was worked by lessees in 1919.

ALPENA COPPER MINING CO.

MONTANA

Office: Wallace, Idaho. **Mine office:** Saltese, Mineral county, Mont.

Officers: C. W. Beale, pres.; A. H. Featherstone, sec.-treas.; preceding officers, Alex. Muir and A. P. Cochrane, directors.

Mine: in the St. Joe district, near the Monitor, and 2 miles from Adair on the C. M. & St. P. railroad.

Development: by 2 long tunnels and shaft, showing a 2' vein of quartz with chalcopyrite. At last account face was 400' from projection of ore-shoot exposed on surface.

Equipment: includes several buildings. No recent data available.

ALTA CONSOLIDATED MINING CO.

MONTANA

Address: Curlew, Montana.

Frank V. Whiting, pres., c/o N. Y. Central R. R. Co., New York City. S. L. Bright, mgr.-dir.

Inc. Oct. 5th, 1920. Cap. \$1,500,000; par \$1.

Company had an option on and reopened the old Alta mine, did new work on the botton level finding the vein, and spent over \$10,000 on test work on ore and old tailings, finally closing down at the end of 1920 and transferring the company's activities to the Curlew mine, near Victor, Missoula county, Mont., which is being actively developed. The Alta is regarded as a "likely prospect" as the zinc and pyrite found in the bottom levels, which discouraged the former owners, can now be handled by flotation. See **Alta Montana M. Co.**

ALTA MONTANA MINING CO.

MONTANA

Address: L. S. Ropes, mgr., Helena, Mont. See Boston & Alta Copper Co. and Alta Consol.

Inc. 1917. Cap. \$3,000,000; \$5 par.

Property: an old silver-lead mine with large production (reported variously up to \$4,000,000) in the Corbin district of Jefferson county. Mine closed for 23 years, but workings reported open.

Development: by 8 tunnels, from the lowest of which a vertical shaft is down 682'. The lowest point of development is 1,300' below apex of the veins.

New York interests spent over \$110,000 up to 1919 sinking 300' shaft and endeavoring to find a body of commercial ore in the undeveloped part of the ground. Early in 1920, L. S. Ropes, backed by Duluth people, secured a lease on the property, and has been working on No. 12 and 13 levels. A mill being erected in 1921, will treat old dumps.

AMALGAMATED SILVER MINES CO.

MONTANA

Address: 42 W. 6th Ave., Helena, Mont. **Mine address:** Clancy, Mont. H. P. Emigh, mgr.

Officers: R. A. McCray, pres.; J. S. Scott, v. p.; R. A. Weisner, sec.-treas. with M. E. Weston, J. W. Stolzenback, J. G. Shaffer, R. L. Varney, R. E. Smith, and Jas. G. Bain, directors.

Inc. 1917, in Montana. Cap. \$1,500,000; increased March 29, 1921 from \$1,000,000; \$1 par; 912,666 issued to pay for property and development. The Banking Corp'n of Montana, registrar and transfer agent, Helena, Mont.

Property: 33 claims, including the Free Coinage and Silver King mines, at Lump Gulch, in Jefferson county, 2 miles from rail at Clancy. Previous production is given as several million dollars.

Development: by 350' shaft on the Free Coinage to be sunk another 300'. There are other shafts, including the 300' Little Alma and 125' Silver King; with over a mile of workings. Dumps are estimated to contain 10,000 tons of ore.

Equipment: hoist and compressor; electric power and equipment to be installed.

Production: during part of 1919, shipments were as much as 30 tons of 115 oz. silver ore per week. In 1920, some small, though rich shipments were made. Operations suspended, March, 1921.

A New York Stock brokerage firm had an option on 200,000 shares, and offered them at 60c. in Dec., 1919, and at 70c in 1920. Extravagant statements were published, such as, "Will it develop into a \$30,000,000 silver producer?" "Net profits of \$1,000 a day or over \$300,000 a year." "..... will be in a position to distribute dividends to its stockholders by August (1920)".

AMAZON-BUTTE COPPER CO. MONTANA

Office: Butte, Mont.

Officers: James H. Lynch, pres.; John A. Poore, v. p.; with F. Love, M. J. Cavanaugh, and Thomas T. Poore, directors.

Inc. Sept. 29, 1906, in Montana. **Cap.** \$2,500,000; \$5 par; 198,000 issued.

Property: the following lode mining claims: Amazon, Altoona, Annie, Antoinette, Bertha, Henrietta, Jessie, Josephine, and Gaynor. Approximately 128 acres, situated in the east side district of Butte, Silver Bow county.

Property has been inactive for a number of years.

AMAZON DIXIE MINING CO. MONTANA

Property: at Sildix. Mineral county Mont, on the Idaho-Montana boundary is really a Coeur d'Alene corporation, and is described under Idaho.

AMERICAN COPPER MINING CO. MONTANA

Office: St. Regis, Mont. William Lintner, mgr.

Cap. \$10,000; 10c par.

Property: 120 acres between St. Regis and De Borgia, in Mineral county, Mont. Ore occurs in a limestone and quartzite formation and averages 4% copper, and 4 oz. silver. Development is by tunnels.

AMERICAN ZINC, LEAD & SM. CO. MONTANA

See in U. S. section of this volume.

Address: Silver Dike mine, Neihart, Mont.

Bought the Silver Dike mine, for \$145,000 in March, 1922. Had 30 men employed for a year, in development work, and will build 350-ton concentrator to handle the low grade lead-silver-zinc ore, said to average \$10 to \$13 per ton.

ANACONDA COPPER MINING CO. MONTANA

See under United States section.

ANGELICA MINING & DEVELOPMENT CO. MONTANA

Address: Wickes, Mont.

Officers: C. d'Autremont, Jr., Duluth, pres.; Chas. D. Morton, v. p.; C. K. Tibbetts, sec.-treas., with T. T. Hudson and C. M. d'Autremont (mgr.), directors. Chas. D. Horton, supt.

Inc. Jan., 1915, in Montana. **Cap.** \$500,000; \$10 par; increased July 27, 1920 from \$200,000; \$10 par; 14,320 issued. Annual meeting, last Monday in June.

Earnings: gross income from ore sales, \$164,652 in 1918, with \$88,956 expenses, not allowing for depletion of ore, compared with 1916 ore sales of \$49,556, and operating expenses, \$64,714.

Property: the Mt. Washington mine. 6 claims, 110 acres, in Colorado mining district, 2 miles west of Wickes, Jefferson county.

Geology: ore occurs on both sides of a rhyolite-dacite dike cutting through andesite. The Bluebird is probably the western extension of this vein, but displaced by 5 cross faults. Development shows vein 60' wide with 20' of ore mostly on the Handy Andy and Homestake claims. A weighted composite sample from cuts throughout entire mine, 15 tons in all, assayed \$5 gold, and 24.3 oz. silver per ton, with 1.12% copper, 13% lead, 10.3% copper and 76.88% zinc.

Development: 4,000' tunnel and 100' levels down to 900'; total workings, 10,500'. Mining is by square-set system. Reserves were 13,915 tons. 8.58% zinc. The mill product runs 13.42% gold, 68.86% silver, 86.17%

Equipment: electric power, air-compressor and 100-ton concentrator completed in 1921. This mill produces tails that carry 72% of the gold but makes a good recovery otherwise.

Production: ore is sent to smelter at East Helena.

Year	Tons	Gold, oz.	Silver, oz.	Lead, lb.	Average value
					per ton
1919 (July).....	60 daily	\$33.50
1918.....	12,583	1,694	171,400	1,659,223	27.90
1917.....	6,711	933	65,526	1,012,176

ANSELMO MINING CORPORATION MONTANA

Subsidiary of the **International Minerals & Metals Corp'n** (which see).

Mine address: Jos. C. Pyle, mgr., Miner Block, Butte, Mont. E. L. Ralston, supt., 1030 West Platinum St., Butte, Mont. General office: 61 Broadway, New York City.

Property: the old Anselmo mine in Butte, Silver Bow county, showing 2 veins, 3 to 6' wide, carrying zinc-lead ore with gold and silver values. Is developed by the 1,600' Trifle shaft with numerous levels; also by crosscuts and workings from the Gagnon mine of the Anaconda Copper Mng. Co.

ARGENTA-DILLON MINING CO. MONTANA

Idle. Property taken over by **Montana Mines Co.**, which see.

ARGYLE SILVER MINING CO. MONTANA

Address: J. B. Leggatt, Salt Lake City, Utah.

Inc. October, 1919, in Montana. **Cap.** \$100,000. Financial arrangements were completed by Aug., 1920.

Property: that of the Benton M. & M. Co., in the Vipond district of Beaverhead county, last operated in 1908. Nearest rail is 6 miles to Dewey on the Montana Southern R. R., or 12 miles to Divide on the Oregon Short Line.

Development: by 150' shaft and drifts. At the bottom is 12 to 18" of 75 to 200 oz. silver ore, while a W. drift is in 54" of good ore.

Equipment: hoist, compressor, etc.

Some ore shipped during 1920.

ARKANSAS COPPER CO. MONTANA

Property: on Ten Mile creek, near Helena, Mont., and about 2 miles W. of the summit of Mt. Helena, shows a 30' vein in diorite, traceable 800', carrying some copper ore with small gold and silver value.

Development: by 200' shaft. Was in hands of lessees early in 1915, but inactive at last advice.

ARLINGTON MINING CO. MONTANA

Idle. **Office:** Wallace, Idaho. Mine near Thompson, Sanders county, Chas. T. Fisher, pres.; M. J. Mahoney, sec.

Cap. \$1,500,000; shares \$1 par.

Property: 20 claims, well timbered in the Mountain House (unorganized) mining district, near the Idaho-Montana divide.

A vein is said to be traced 6,000' by surface cuts, 30 to 100' in width, carrying, at shallow depth, galena of concentrating grade, with some ore assaying up to 78% lead. The 175' upper tunnel shows 3' of concentrating ore, and the 900' lower crosscut tunnel shows a 10' stringer assaying 8% copper, 15% lead and 15 oz. silver per ton. No recent returns secured.

ATLANTIC MINES CO. MONTANA

Company dissolved May, 1916, and properties sold to Anaconda Copper Mining Co., Nov. 1, 1916. Fully described in Mines Handbook, Vol. XII.

ATLAS MINE MONTANA

Address: Wickes, Mont.

Property: the old Atlas mine at Wickes, Jefferson county, reopened in 1920 by Great Falls people. Ore carries copper, silver, and gold. The mine produced a good deal of ore years ago, and apparently operated a smelter, which made 10,000 tons of slag, some of which was sent to the smelter at East Helena.

Development: by 300' shaft, with 3 levels and a total of 800' of drifts. Reserves are given as 40,000 tons, assaying 3.2% copper, 12 oz. silver, and 80 cents gold.

Equipment: includes a small mill, hoist, etc.

AUGUST GOLD MINING CO.

MONTANA

Address: Landusky, Phillips county, Mont. cyanidation.

AUTOMOBILE GROUP

MONTANA

Property: a well-known producing gold mine. Ore is a porphyry dike, containing low value in gold. Ore is mined by glory-holing and treated by

Address: W. M. Cady, Libby, Mont.

Property: claims near Libby, Lincoln county. Ore carries gold. Work was started early in 1920.

B. & H. MINES & MILLING CO.

MONTANA

Owners: N. J. Bielenberg and W. I. Higgins, Deer Lodge, Mont.

Property: known as the Bielenberg-Higgins, consists of 30 claims, 10 patented, 360 acres, 3 patented millsites and 1 unpatented tunnel site, in Bear Gulch, 14 miles from Twin Bridges, Madison county, Mont., on a branch line of the N. P. R. R.

Geology: ore is a complex sulphide, occurring in porphyry and altered granite. There are 9 known veins, said to be traceable for 4,000' and to contain gold, silver, lead, iron and copper. Veins strike E.-W. with dip of 38°, becoming flatter as work progresses; 4 veins have been extensively developed and proven to be from 7' to 105' wide, and continuous at depth, containing ore of commercial value, said to average \$4 per ton. Ores are treated by wet concentration, making a recovery of 90%. Concentrates run \$54 to \$80 gold, 11 oz. silver, 25% lead, 2% zinc and 0.5% copper. Ore reserves are estimated at 200,000 tons of \$4 to \$10 ore.

Development: a 7'x7' crosscut tunnel, 900' long, drifts, raises and winzes, underground workings totaling 2,000'.

Equipment: 100-ton mill, 2 air hoists, pumps, wet-concentration plant, and compressor of 640 cu. ft. capacity.

In 1917, management planned adding electric power, driving the tunnel to 3,000', and increasing daily capacity of mill to 300 tons. In 1918, mill was closed, pending construction of a transmission line from Twin Bridges to the mine, 14 miles; completed, 1919.

BALKAN BUTTE COPPER MINING CO.

MONTANA

Office: Chas. Steele, mgr., 13 N. Wyoming St., Butte, Mont.

Officers: Chas. Steele, pres.; Thos. Tomich, sec.-treas.

Inc. Jan. 26, 1907, in Montana. Cap. \$450,000; shares \$1 par.

Property: operating throughout 1921, 4 patented claims, 80 acres, in Elk Park, Jefferson county, Mont., shows gold, silver, copper, lead ore.

BALTIMORE COPPER MINING CO.

MONTANA

Office: 49 W. Park St., Butte, Mont.

Officers: R. L. Clinton, pres.; J. Maher, v. p.; T. J. Fenlon, sec.-treas., with B. E. Calkins, D. J. Charles, and E. H. Renisch, directors.

Inc. in Montana. Cap. \$2,500,000; shares \$5 par; assessable; 197,520 shares outstanding. No bonds.

Property: five patented claims in Boomerang Gulch, near Boulder, Mont., showing on ore zone 40' wide, with silver-lead ore in lenticular shoos. Ore said to contain about 3% copper, 20 oz. silver, 12% lead, and \$2 gold.

Development: by 5 tunnels, 100' vertically apart, longest 700'. Property was under lease to the estate of M. W. Atwater, former manager of the Davis-Daly at Butte, who began operations late in 1918.

Production: 7 to 8 cars of ore monthly in early part of 1919.

BAMAR COPPER CO.

MONTANA

Address: Dr. M. J. Scott, Butte, Mont.

Officers: Dr. M. J. Scott, pres.; F. H. Butler, v. p.; J. B. Frisbee, sec.; M. A. R. Scott, treas

Inc. Sept. 24, 1910, in Montana. Cap. \$1,500,000; \$1 par. Annual meeting, first Tuesday in June.

Lands: 12 claims, 230 acres, in the Summit Mountain district, near Buxton Switch, in the foothills of Fleecer mountain, 13 miles S. W. of Butte. Claims were bought of Butte & Buxton Copper Mining Co. for 150,000 shares of Bamar stock. Country rock is granite, with a mineralized zone one-half mile wide, carrying 4 veins, with a diorite dike to the northward. Shallow pits and trenches show continuity of the veins, which are leached at surface, carrying a little lead and copper carbonate ore.

Development: by 180' two-compartment Linda shaft, connecting with the 700' tunnel, on a ledge, carrying a 10' streak, mainly pyrite, with some argentiferous chalcopyrite. Property has yielded ore carrying 1 to 36% copper and 43 oz. silver per ton, with up to \$2.50 gold, also galena assaying 11% lead, 24 oz. silver and \$1 gold per ton.

Equipment: includes a 40-h. p. boiler, 20-h. p. hoist good for 500', 2-drill air compressor and several mine buildings. Idle, but company plans deepening shaft, drifting, and crosscutting.

BANNACK GOLD MINING CO.

MONTANA

Reorganized, 1918, as the New York-Montana Mines Co., which see. Details of old company are in Vol. XIII of this work.

BANNER & BANGLE MINING CO.

MONTANA

Address: W. J. C. Wakefield, pres., Spokane, Wash. Leo Greenough, mgr., Spokane.

Cap. \$600,000; par \$1.

Property worked for many years by T. L. Greenough, is now under lease and bond to **Snowstorm Mines Consolidated**, which see.

BARNES-KING DEVELOPMENT CO.

MONTANA

Address: Hennessy Bldg., Butte, Mont. **Mine office:** Kendall, Fergus county, and Marysville, Lewis & Clark county, Mont.

Officers: C. W. Goodale, pres.; A. J. Davis, v. p.; J. E. Corette, sec.; C. C. Swinborne, treas., with C. R. Leonard, F. L. Melcher, I. A. Heitbronner, T. A. Marlow, directors. W. B. Roll, asst. sec.

Operating officials: G. T. McGee, gen. mgr., At the North Moccasin; T. W. Heatherley, in the mine; A. E. Worsdell, in the mill; C. A. Morgan, in the office; E. G. R. Manwaring, mining engineer, and W. A. Young, assaying. At the Piegan-Gloster: J. H. McCormick, in the mill; J. W. Johns, in the mine; William McClean, mechanical engineer; F. E. Eccles, in the office, and Ward Cole, assaying. At the Shannon; J. W. Johns, in the mine, and J. E. Goyer, in the office. At the Kendall: A. B. Fox, in the power-plant.

Inc. 1907, in Montana. Cap. \$2,000,000; \$5 par; all issued. W. B. Roll, Box 1375, Butte, Mont., transfer agent. Annual meeting, first Wednesday in March. Stock listed on Butte Exchange.

Financial Statement—Years ending December 31:

Assets.

Year	Property and Equipment	Deferred	Current	
			(Cash, Bullion, Liberty Bonds, Investments)	Total
1921.....	\$1,831,426	\$41,831	220,150	\$2,093,409

Dividends: initial on March 1, 1916, total of 15c per share in 1916; 10c in 1917; 40c. in 1918; 30c. in 1919; 15c. in 1920. The total is \$440,000.

Funds (cash and Liberty bonds) on Sept. 30, 1920, were reduced to \$110,000.

Loss.

For first half of 1921 earnings were \$30,529; expenses, \$21,625; net profit, \$8,903. Receipts from Shannon mine bullion were \$156,435 and royalties from the North Mocassin properties, \$3,628, with \$1,586 interest; expenses of Shannon were \$120,916; at Piegan Gloster, \$3,279; North Mocassin \$3,-699; Kendall mines, \$355; Black Hawk option, \$5,435 and Betsy Baker option, \$4,342 and miscellaneous expenses, \$3,469. Cash on hand and bullion in transit \$95,066, less wages and accounts payable, \$21,535, leaving cash and Liberty bonds, \$123,531, on July 1, 1921.

Property: three mines known as the (1) North Mocassin property, (2) Piegan-Gloster property (3) Shannon property. The company originally held only the Barnes-King mine.

In 1912, after spending considerable money in an unsuccessful search for new orebodies, the Barnes-King mine was closed down. In 1912, the North Mocassin property, covering about 2,000' in length along the ore-bearing formation adjoining the Barnes-King on the north and the Kendall on the south, was purchased for \$150,000; \$5,000 cash, and the remainder to be paid from net working profits as made. The Piegan-Gloster property, near Marysville, Lewis & Clark county, Mont, was obtained in 1913 for \$100,000, with an additional cost of \$8,200 for 5 adjoining claims. The Gloster mine had been worked from 1880 to 1888 and is credited with a production of several million dollars.

In 1915, the company paid \$100,000 for all the property of the Kendall Gold Mng. Co. The Shannon mine, 2½ miles southwest of Marysville, was purchased in 1915 for \$228,223, payable from mine profits. Final payment was made during third quarter of 1917.

Company has made an energetic search for new properties, and in addition to those mentioned, has had under option 3 claims, 1½ miles N. of the Gloster, at \$50,000; surface indications were good, but at 50' depth results were disappointing. In May, 1918, the Mount Pleasant group of 2 claims, 3,000' E. of the Shannon, was taken under option at \$30,000, but after doing 1,000' of work, no further exploration was deemed justified. In February,

1919, a \$70,000 option was acquired on the Silver Bullion group in the Judith mountains, 10 miles from Kendall. By July, a shaft was down 200', but 50' of work had revealed no ore. In Sept. 1920, the Black Hawk mine near the Shannon was acquired, and by Feb., 1921, had cut the Penobscot vein.

In March, 1920, Barnes-King bought 17,500 shares, at \$1 each, of the Kansas-Montana Oil & Gas Co., operating 3 miles from Winifred, and 63 miles N. of Lewiston, Fergus county, Mont. It has about 13,500 acres under lease with one well down 2,400'.

The Strawn property, under option, 1921, was being explored in December.

Barnes-King mine: The orebodies at Kendall are irregular replacement deposits in limestone, dipping 25°. The ores are mostly soft and well oxidized.

Development totaled 4,008 in 1916; 10,013 in 1917; 10,633 in 1918, and 10,864' during 1919. These figures are exclusive of work in properties under option.

The **North Mocassin group** was first worked through the Barnes-King shaft; later the Santiago shaft was completed to the 500' level and it is now the main working shaft. Orebodies have been opened up on different levels to a depth of nearly 800'. Exploration in 1919 on the 600' level has disclosed a new orebody said to average \$11 a ton. The Kendall mine has been under lease for over 2 years, giving the B. K. Co. a royalty of up to \$3,700 per year for ore mined and power used. Development kept up with ore extraction, but during 1920, the reserves were almost depleted, and the mine was leased in September. No production by leasers, Dec., 1921.

The old **Piegan-Gloster mine** had been opened by a vertical shaft to a depth of 500', and a winze sunk 300' below the 500' level. The Piegan claim had been developed by tunnels. The B.-K. Co. unwatered the Gloster mine to the 800' level and opened the Piegan orebody above water-level. The Norman tunnel, connects the No. 4 Piegan tunnel and Gloster workings with the tram to the mill. In 1918, the advance on the 500' level, 937' west, cut four ore-shoots with a combined length of 350'. They do not appear to extend far above the level. Reserves were 2,835 tons of \$7.30 ore. Mine closed down since May, 1920.

The **Shannon mine**, previous to the time of its being taken over by the B.-K. Co., was opened by a tunnel with 2,000' of workings, chiefly on the vein which, in the tunnel, was 300' long, from 4 to 10' wide, worth \$15 gold per ton. The B.-K. Co. has sunk a shaft 450' below the tunnel on the vein, dip 70°. The vein is in slate, and where crosscut on the 100' level is said to have a width of 15'. In 1918, a new ore-shoot, 400' long, was opened on the 500' level, but on the 650' level, the shoot was only 100' long. The Shannon is 13,400' from the Gloster mill, with which it is connected by aerial tram. This mine is now the mainstay of operations. Production, Dec., 1921, 3,294 tons of \$11.72 ore (recoverable value).

Equipment: at the **North Mocassin** there is a double-drum electric hoist, compressor, and a 1,400' electric tramway from mine to mill, which is on the original B.-K. group, and has a nominal daily capacity of 200 tons, allowing 10 days leaching period. There is also a small oil-fired roaster for treating the black unoxidized ore found in the eastern ore-shoot. There is a 500-ton cyanide plant on the Kendall.

The **Piegan-Gloster** equipment includes a double-drum electric hoist, 100-h. p. motor and compressor at the Gloster shaft. The old Gloster 60-stamp mill was remodeled with a No. 5 Symons disc-crusher, three 10' Chilean mills, 2 Wilfey tables, and a cyanide plant. The Shannon mine has a 75 h. p. electric-driven compressor.

Operations and costs at the Piegan-Gloster mill are described by J. H. McCormick in the September, 1918, Bulletin of the A. I. M. E.

Power: purchase of the Kendall property included a 400-h. p. hydro-

electric plant on Warm Springs creek, 6 miles from the mine. This plant furnishes power for the Kendall properties, and also supplies the towns of Hilger and Kendall with lighting facilities. The Piegan-Gloster and Shannon properties obtain power from the Montana Power Co.

Production:

	—North Mocassin—			—Piegan-Gloster—			—Shannon—		
	Tons	Value	Bullion Sales	Tons	Value	Bullion Sales	Tons	Value	Bullion Sales

1919.....	8.194	14.066	6.212
1918.....	7.558	10.197	6.885
1917.....	6.006	7.991	5.265
1916.....	6.307	6.998	6.494
1915.....	4.653	6.940

The Barnes-King Development Co. is a well-managed corporation, which issues a complete report. Development work generally has not been very encouraging, though enough ore was opened for the mills. Details of properties taken on option show that company is endeavoring to prolong its life, and it shows conclusively that most of these outside claims in the district are worthless.

BARTON GULCH MINING CO.**MONTANA**

Address: A. H. Jones, mgr., Virginia City, Mont.

Property: in Hungry Hollow, at Summit, near Virginia City, Madison county. Mine is opened by tunnels, and is said to show \$16 gold ore in a 7' vein. Living quarters and shops have been erected, and a mill was to be installed in 1919.

BASIN-MONTANA MINES CO.**MONTANA**

Office: Room 1012 Little Bldg., 80 Boylston St., Boston, Mass.

Officers: Melvin A. Houser, pres.-gen. mgr.; Francis A. Cave, v. p.; Wm. A. Fotch, treas.; K. F. Baker, sec., pro tem.; E. J. Strasburger, cons. eng.; R. W. Clinton, counsel

Inc. May 22, 1919, in Montana. Cap. \$500,000; \$5 par; non-assessable; \$350,000 issued. Annual meeting in July.

Property: 22 claims, 400 acres, at Basin, Jefferson county, 29 miles by rail N. E. of Butte. The claims were formerly held by the Ruby and Columbia Mines Co., but forfeited. Sixteen claims, acquired for \$350,000 in cash and stock, are said to contain ore to value of \$300,000. Six other claims are held under bond and lease. The Great Northern Railroad runs within 500 feet of the property. Examined by E. J. Strasburger and geology described in Bull. 527 of U. S. Geological Survey. Country rock is granite (monzonite) cut by porphyry dikes and traversed by two veins containing shoots of complex gold-silver-lead-copper-zinc ore, difficult of treatment. The group covers 6,000' along the outcrop of the Custer vein.

Development: on six claims. 2,250' tunnel on Custer vein and 8 tunnels, viz.: Wilson, 750'; Custer No. 2, 500'; Powder House, 100'; Confidence, 100'; Old Custer tunnel No. 1, 100'; Old Custer No. 2, 200'; and Bergman, 500'.

It was proposed to drive a new crosscut tunnel over 2,000' to the veins at a depth of 800'.

Equipment: electric power, air-compressor, drills, etc.

Production: shipments made some years ago carried 40 oz. silver and \$18 gold per ton. Management expects to resume shipments at an early date.

An official report states "The future of this enterprise can hardly be estimated when you take into consideration the orebodies in sight and with proper equipment. . . . The company can pay a dividend or disbursement of more than \$2 per share, or 40 per cent. . . . Take into consideration that the mine has only been developed to the 100 foot level and already produced \$100,000 and there is still left \$1,700,000 in sight in the mine." We hope so, but, in our opinion, the facts stated do not warrant the conclusions given, and such statements are reprehensible.

Property was operated by lessees during 1920-21, who were extracting rich silver-gold ore.

BEAR CREEK PLACER CO.

MONTANA

Probably dead, as letters sent to last address, E. G. Mellander, agent, Libby, Lincoln county, Mont., were returned unclaimed.

Property: company paid \$150,000 for Libby Placer Mining Co. and \$40,000 for Comet Placer Co.'s properties covering 10 miles of gravel flats along Libby creek, beginning 18 miles above the town.

A dredge was being erected in 1917 and ground was to be prospected thoroughly before beginning operations.

BEAR GULCH MINING CO.

MONTANA

Office: care of Alex. Johnston, Clark Brothers' Bank, Butte, Mont.
Mine: at Twin Bridges, Madison county, Mont.

Property: the Montana View group, carrying auriferous and argentiferous copper ores, opened by tunnel about 3,000' long. Has steam power and air-compressor. Property has little ore and is not on the contact zone; its chief value is for a tunnel-site for the Moffat claims, which adjoin it, and were being worked, 1917, by Charles J. Stone, former manager of the Alex Scott mine at Butte. The Moffat mine has developed a granite lime contact with basic ore carrying magnetite, that varies from 5' wide for 1,000' along the tunnel, to 100' wide near the face. This ore, averaging 2.1% copper, was shipped, in 1916, to the East Butte smelter. Trimming to rail cost \$2; freight, \$1.75, and smelting, \$3.75 per ton.

BEAVER CREEK MINING CO.

MONTANA

Address: Whitcomb, Phillips county, Mont.

Property: in the Little Rocky Mountains. Carries low-grade gold ore in a porphyry dike, mined by glory-holing and treated by cyanidation.

BEAVER CREEK MINING CO.

MONTANA

Address: Philipsburg, Granite Co., Mont.

Property: the Sharktown manganese mine, operated in 1916-17 by the Montana Manganese Co.

Development: by main adit exposing a vein of manganese oxide, 20-30' wide and 100' in length, averaging 40% manganese and 14% silica. A concentrating plant was erected in 1918.

Production: totals 16,000 tons of ore.

BEAVERHEAD MONTANA COPPER MNG. CO.

MONTANA

Argenta, Beaverhead county, Mont. Property taken over by the Montana Mines Co., which see.

BEAVER MINING CO.

MONTANA

Probably dead, as letters were returned unclaimed, 1919, from Duluth, Minn., and from Butte.

Officers: M. H. Gannon, pres.; W. L. Harnan, Butte, Mont., v. p.; Morgan M. Pattison, Duluth, v. p.; Dr. J. B. Sullivan, Butte, Mont., treas.; J. W. Neukom, Duluth, sec.

Inc. 1917. Cap. \$950,000. Treasury stock being offered, 1917, at 40c a share.

Property: 320 acres, 7 miles from Brown, on Oregon Short Line, in

Beaverhead county, about 50 miles from Butte, said to show several copper-bearing veins. A shipment of about 1,200 tons is reported to have averaged 4% copper and over 3 oz. in silver.

Development: work has only been done on 2 veins, and management in 1917, planned to drive 650' tunnel with raises, winzes, etc., to open up the orebody at a depth of 400' from surface.

BELL BOY MINE**MONTANA**

Address: L. S. Ropes, Helena, Mont.

Property: in Towsley gulch, near Marysville, operated by lessees. Rich ore was opened early in 1919, by the Intermountain Eng. & Dev. Co., and gold bullion and concentrates shipped.

BELL MINING CO.**MONTANA**

Address: A. C. Badger, Livingston, Mont.

Property: the Bell lead-silver mine near Livingston, on the E. side of Park county, in the Crazy mountains. A 7' vein of \$150 ore is said to have been opened early in 1921.

BENBOW MINE**MONTANA**

Address: T. C. Benhow, Columbus, Mont.

Property: in Sweet Grass county, 7 miles S. of Nye shows chromite deposits in a pyroxenite dike in a schist-gneiss contact; the ore is soft and when massive carries about 38% chromic acid. Was producing in 1920.

BEN HUR MINING CO., LTD.**MONTANA**

Address: Saltese Supply Co., Saltese, Mineral county, Mont.

Officers: D. S. Dickson, pres.; Frank H. Bell, v. p. and purch. agt.; Chas. J. Luedke, sec.; C. A. Keating, treas., with Peter Peterson and A. J. Matthiessen, directors.

Cap. \$1,500,000; shares \$1 par. Annual meeting, last Saturday in April.

Property: 9 claims, adjoining the Last Chance mine, 3 miles from Saltese, showing a fissure vein in quartzite, of 10' to 60' width at surface.

Development: by 3 crosscut tunnels, the lower, of 1,100' cutting a vein carrying silver lead and gray copper ores. Property considered a promising prospect. No recent returns secured.

BEN THOMAS MINING CO.**MONTANA**

Address: B. M. Thomas, Libby, Mont.

Property: 10 claims in Rainy Creek district of Lincoln county, was under bond to F. J. Doland, of New York.

Development: by 9 short tunnels, ore carrying gold, silver and copper, with molybdenite and vanadium.

BERNICE RED ROCK MINING CO.**MONTANA**

Address: Bernice, via Basin, Mont.

Officers: H. D. Fagon, v. p.; N. B. Lewis, sec.-treas.; J. B. Anderson, agent, 1924 Thirteenth St., Washington, D. C.

Property: 4 claims located 3 miles from Bernice station on Gr. Northern Ry., 26 miles from Butte.

A large vein shows scattered mineralization of lead carbonate and sulphide ore, but of low average value containing gold, \$0.40 to \$1.60, silver 2 to 7 oz., 0.5% copper, lead 2%, and zinc 5%. Course of vein is N. 70° W. with dip 70° S., and where exposed has a width of 8' in the upper tunnel, and 23' in lower tunnel.

Development: 2 tunnels, upper one 150' long, the other 100' vertically below the upper, cut the vein at a distance of 200' from the portal. A 20' winze was sunk on the vein from the lower level. The ore can be cheaply mined and is capable of flotation, but value is low. Company officers and stockholders are all colored men. No recent data available.

BETTY ALDEN MINING CO.**MONTANA**

Closed down and company probably dissolved. Fully described, Vols. XI-XII.

BIG EIGHT MINE**MONTANA**

Address: H. L. Day, Wallace, Idaho; or J. D. Finley, Exchange National Bank, Spokane, Wash.

Property: 3 claims and 1 millsite on Callahan creek, in the Troy district, Lincoln county, adjoining the Snowstorm Mines Consolidated. Ore carries zinc and lead.

Considerable litigation has hampered operations. In 1910, the Big Eight M. Co. leased the mine to R. C. McCaffrey, with an option to purchase for \$50,000. A good deal of work has been done, and ore shipped.

BIG EIGHT MINING CO.**MONTANA**

Property owned by H. L. Day of Wallace, Idaho, and others. See under Big Eight Mine.

BIG ELK MINING CO.**MONTANA**

Office: Wallace, Idaho. **Mine office:** Saltese, Mineral county, Mont.

Officers: Peter Peterson, pres. and gen. mgr.; Carlton Fox, v. p.; A. H. Featherstone, sec.-treas., with Geo. K. Garrett and W. S. Brown, directors. C. F. O. Merriam, mg. eng.

Inc. April, 1909, in Idaho. **Cap.** \$2,000,000; shares \$1 par; assessable; fully issued. Last assessment, 1 mill per share, July 22, 1914.

Property: 15 claims, 300 acres, unpatented, on Bald mountain, in the St. Joe district, near Adair, showing 3 fissure veins in St. Regis quartzite. Various treaches exposing veins with 4' thickness carrying streaks of chalcopyrite and spathic iron, in spar and quartzite. A carload shipment to Helena from an 18' prospect shaft, returned 28.7% copper, 28.9% iron, 15% sulphur, and 2 oz. silver per ton. A 125' upper tunnel and a 200' lower diagonal crosscut tunnel show chalcopyrite and bornite, carrying small values in gold. The C. M. & St. P. R. R. crosses property.

In May, 1918, control passed to S. B. Holbert, of Pittsburgh, Pa., who agreed to spend \$25,000 in development and plant in consideration for an option on 1,000,000 treasury shares at 2½ cents, and 500,000 issued shares at 5 cents.

Property considered promising.

BIG FOOT MINING CO.**MONTANA**

Address: Boulder, Mont.

Inc. Sept., 1917, in Montana. **Cap.** \$3,000,000; shares \$5 par.

Property: a group of 7 claims in the Big Foot district, Jefferson county, about 12 miles from Boulder. Claims said to show ore carrying silver, lead, and zinc.

Development: by several shafts from 50' to 200' deep, all under water.

Mine had been closed down for many years, and was unwatered and reopened in 1917.

BIG SEVEN MINING CO.**MONTANA**

Address: Neihart, Mont.

Officers: D. L. S. Neihart, pres., treas., mgr.; Violet Barker, v. p.; L. S. Barker, sec., with John Clover, directors.

Inc. 1893. **Cap.** \$3,000; shares \$2 par; assessable; all outstanding. Annual meeting, March 10th. Gross earnings for 1916 amounted to \$12,497, and operating expenses, \$19,259.

Property: the Big Seven mine, an old-time producer, near Neihart, Cascade county, Mont., which shows a fissure vein 2" to 2' wide, in granite-phyry, said to carry high value in gold and silver.

Development: 3,600' tunnel.

Equipment: includes compressor and steam power. Total production to date \$1,500,000. Management planned advancing tunnel and further development at last accounts.

BLACK FRIDAY GOLD MINING CO.**MONTANA**

Office: Helena, Mont.

Officers: Willard Bennett, pres.-treas.-mgr.; A. J. Galen, v. p.; R. M. O'Hearn, sec., with J. L. Templeman, directors.

Inc. 1910, in Montana. **Cap.** \$2,000,000; par \$5; issued; 356,000. Bonds authorized and issued, \$75,000.

Property: 10 patented claims, 128 acres in the Radersburg mining district, carrying a vein in andesite, that runs N.-S. and dips 45°. Ore contains iron pyrite, with gold and silver values.

Development: by 700' inclined shaft and 3,500' of workings. **Equipment:** includes 150 h. p. electric hoist, compressor, 15-ton concentrator.

Production: reported as \$261,000 to date. Concentrates average \$32 per ton.

Latest reports are that E. N. Breitung & Co. relinquished their option and that foreclosure proceedings were to be started by J. L. Templeman for the bondholders.

BLACK TRAVELER COPPER MINING CO. MONTANA

Address: J. R. Bean, sec., Mullan, Idaho.

Officers: O. S. Roof, pres., Mullan, with R. E. Sisler, Wallace, Idaho., and F. Lentke, Saltese, Mont., directors.

Cap. \$1,500,000; par \$1; assessable. Annual meeting, 2nd Tuesday in November.

Property: 6 unpatented claims in St. Regis district, under bond and lease to Saltese Consolidated Mining Co., which see.

BLISS MINING CO. MONTANA

Address: c/o C. W. Johnson, or Mrs. Josie Rose, Lewistown, Mont. Gustave Johnson, pres.

Property: a gold mine near Cone Butte.

BLUEBIRD COMPANY (THE) MONTANA

Office: 706 Sears Bldg., Boston, Mass.

Officers: W. B. Dickerman, v. p.; Clarence W. McGuire, sec.-treas. 39 State St., Boston, with F. M. Stone and H. K. McHarg, directors.

Inc. 1893, in New York. **Cap.** \$500,000; shares \$5 par; 66,667 shares issued.

Property: 237 acres, in Butte, Mont., shows silver, copper and zinc ores. Company has never operated its property. See U. S. G. S. Prof. Paper 74, by W. H. Weed, for geology, etc.

In 1917 the mine was taken over under bond and reopened. Shipments made in 1918. Idle, 1919-20.

BLUEBIRD-CORBIN GOLD, SILVER & COP'R M. CO MONTANA

Address: Wickes, Jefferson county, Mont.

Officers: Wm. Q. Ranft, owner and mgr.; John W. Johns, supt.

Property: 4 miles west of Wickes. One of the old mines of the district, taken over in 1911 together with the Penn Yan claim. Claims show 2 veins of 4' to 14' in width, carrying ore-shoots averaging 5% copper, 5% lead, 25 oz. silver, and \$1.50 gold per ton. Ore occurs in a tourmalinized vein in andesite tuffs and diorite along a contact with a 50' wide dacite dike that forms the foot-wall.

Development: by 2,248' tunnel and 225' shaft, with levels at 100' and 200'. Equipped with electric power. Mine was worked in 1919.

BLUEBIRD LODGE MONTANA

Address: C. T. Young, Getaway, Mont.; Gus. Peterson and Philip Fortin, owners.

Property: 6 claims, 1 patented, 14 miles from Getaway, Mont. Gold-silver-copper ore occurs in quartz vein, course N.-S. Tunnel 120' long.

An undeveloped prospect.

BLUE-EYED NELLIE MINE, INC. MONTANA

Address: A. W. Paterson, pres., and E. C. Paterson, sec.-treas., Spokane, Wash.; or C. H. Brown, Anaconda, Mont.

Cap. \$100,000; 10c par.

Property: 7 claims, 6 miles W. of Anaconda. Mine was a silver-lead

producer, reopened, 1918, after an idleness of 25 years. Yield from 1885 to 1891 reported to have been over \$1,000,000.

Development: by 325' shaft; an 1,800' tunnel (800' by May, 1918,) will open ore at depth of 700'. **Equipment:** compressor, drills, etc.

BLUE VEIN COPPER MINING CO. MONTANA

Office: 17 Owsley Blk., Butte, Silver Bow county, Mont.

Officers: F. L. Melcher, pres.; Lewis A. Smith, sec.; W. F. Noyes, treas., all of Butte.

Inc. June 21, 1906, in Montana. **Cap.** \$1,000,000; shares \$1 par.

Property: 9 claims, patented, being the Little Boulder, Valentine, Bunker Hill, Blue Vein, Blue Vein No. 1, Myrahl, North Star No. 1, the Ozone and Columbia lode claims in the southern part of the Butte district. Idle since November, 1909.

BONANZA-BUTTE MINING CO. MONTANA

Care: John Kenoffel, 111 S. Main St., Butte, Mont.

Officers: Chas. H. Lane, Wm. Youlden, J. J. McCarthy, H. H. Walrath, Wm. Meyer, John and Geo. E. Johnson, directors.

Inc. June, 1915, in Montana. **Cap.** \$500,000; shares \$1 par.

Property: the Bonanza, Bonanza Extension, and Ruth claims, 4 miles north of Butte. Mine under lease and bond to a syndicate of Butte people, who have made one substantial payment on the property.

Development: the Bonanza vein is opened by a 55' shaft and 300' crosscut tunnel. A new tunnel, 166' lower than old tunnel, was over 1,000' long in 1917, exposing 5 different but parallel E.-W. tourmaline veins, showing stringers and spots of galena. This tunnel cut the downward extension of the oreshoot exposed in the winze sunk below the upper tunnel. The shoot shows bunches of high-grade, fine grained and dense galena, with no copper. Selected samples are high in silver, but average samples are too low-grade for milling. The vein is in a granite area surrounded by rhyolitic rocks, near the B. & M. reservoir, on the road to Lowland creek. Ore carries a little gray copper, but the bulk of the black material seen in it is a tourmaline and not copper glance.

BOSTON & ALTA COPPER CO. MONTANA

Address: care Geo. S. Graham, 165 Broadway, New York City.

Company formerly owned the Alta mine near Corbin, Mont., but sold it to the Alta-Montana Mng. Co. for 100,000 shares of A. M. Mng. Co. stock, which now constitutes its sole asset. See Vol. XIV.

BOSTON-BUTTE COPPER & ZINC CO. MONTANA

Office: 46 East Broadway, Butte, Mont.

Officers: W. W. McDowell, pres.; F. J. Dorhofer, v. p.; W. E. Reynolds, sec.-treas., with W. S. Carns and Charles Schmidt, directors.

Inc. Dec. 12, 1912, in Arizona. **Cap.** \$1,000,000; \$1 par; 871,775 issued. Annual meeting, January 11, each year.

Property: 13 claims, all patented, on W. side of Butte district, undeveloped and not operated, but lying west of the Hibernia mine.

BOSTON-COLBY COPPER MINING CO. MONTANA

Address: N. Knudson, pres., Saltese, Mineral county, Mont.

Inc. September 16, 1903, in Montana. **Cap.** \$1,500,000; \$1 par; \$1,300,000 issued, of which 1,075,000 is held by Andrew Flaig, of 208 E. Lake St., Minneapolis, Minn.

Property: 9 claims, unpatented, 180 acres, and a 5-acre millsite, lying next east of the Butte-Coeur d'Alene Copper Mining Co., immediately west of Saltese, in the East Coeur d'Alene, formerly known as St. Regis district. Lands have 2 copper-bearing veins, No. 1 of about 40' width, showing a great iron capping, and No. 2, to the south, of about 3' width, carrying mainly chalcopryrite, with some bornite, of good average grade. Company is also interested in the Hemlock lead-silver mine, 1¼ miles from Saltese.

Developed: by 2 crosscut tunnels, upper of 400', lower of 900' length with about 500' of drifting in both tunnels, said to show chalcopryrite streaks

in blue hematite ore. Property crossed by C., M. & St. Paul railroad. Wood and water are abundant. Assessment work only has been done for several years owing to lack of funds, but owners wish to raise money and sink the shaft 500' deeper. At the end of 1920 some 12% copper ore was opened, and a raise was being driven from the lower tunnel.

BOSTON & CORBIN MINING CO.**MONTANA**

Office: C. R. Jeffers, treas., 67 Milk St., Boston, Mass.

Company is in process of liquidation. Development work at the mine was unsuccessful and the plant burned down. A distribution representing receipts from insurance and sale of remaining equipment was made in August, 1918, equal to 35 cents a share. This is probably the final distribution, unless property is sold. For description, see Vol. XIII.

BOSTON & MONTANA DEVELOPMENT CO.**MONTANA**

Succeeded by the **Boston Montana Corporation**, but shares of company are still traded in on the New York and Boston curbs. Shares exchangeable for Boston Montana Corp. stock, ten for one.

BOSTON MONTANA CORPORATION**MONTANA**

Succeeds Boston-Montana Dev. Co.

General office: 408 Daly Bank Bldg., Butte, Mont. Boston office: 63 Devonshire St.

Officers: W. R. Allen, pres.; J. D. Pope, v. p.-gen. mgr.; W. O. Siderfin, v. p.; George Gallup, sec.; Perry B. Goddwin, asst. sec.-treas.; J. A. Brown, gen. counsel. Foregoing with O. S. Heater, E. E. Esselstyn and T. J. Bennetts, directors.

Inc. April 29, 1920, in Mont. Cap. \$25,000,000; issued \$12,500,000; par \$25.

An issue of \$5,000,000, 6%, 10 year bonds, was made early 1922 to refund existing obligations of \$1,821,413, owed largely by subsidiary corporations. The bonds were offered stockholders of B. & M. Corporation (not Development Co.) for shares, accepted at \$10 per share, i. e. \$100 in bonds can be obtained for ten shares B. & M. Corpn. stock. The bonds at maturity are convertible into stock at \$25 per share.

Transfer agent, U. S. Corporation Co., New York City and New England Trust Co. Boston. Registrars: Equitable Trust Co., New York and Boston Safe Deposit and Trust Co., Boston.

Company acquired all assets and assumed all liabilities of the Boston & Montana Dev. Co., giving one share new stock for ten of the Development Co. stock.

General balance sheet, Dec. 31, 1920:—

Assets		Liabilities	
Mine properties, real estate	\$23,483,856	Capital stock	\$25,000,000
Treasury stock	5,278,575	Notes & acct. pay	238,202
Securities owned	5,988,775	Accrued liabilities. (pay roll)	8 280
Development	1,073,567	Surplus donated	12,500,000
Due from subsidiaries	1,405,403		
Cash	127,283		\$37,746,482
Notes and acct's rec	386,472		
Miscellaneous	3,539		
	\$37,746,482		

Company reports that up to March 13, 1922, expenditures total \$5,300,000, the railway costing \$2,100,000, the mill and power line \$1,200,000 and mine development \$1,500,000. According to reports made to the Montana state authorities the company and its subsidiaries owe \$1,821,413, most of it due in 1922.

Disbursements for the year 1920 amounted to \$943,138, including \$205,616 for mill construction; \$206,246 for completion of railway construction

contracts; \$163,285 for Mont. Southern Ry. Co., \$11,000 for salaries of general officers, etc.; \$144,363 for Elkhorn mines; \$40,509 for power line; \$27,224 for investments, besides numerous lesser items listed in annual report

Subsidiary Companies: The Boston-Montana Corporation owns the entire common stock of the Boston-Montana Milling & Power Co., and of the Montana Southern Ry. The latter owns a narrow gauge railroad 38.33 miles in length running from Divide, Mont. a station 28 miles south of Butte, on the Oregon Short Line R. R. to the Elkhorn properties; this line will it is said be extended into the Big Hole Valley and a branch line built to the French Gulch mines.

Property: two tracts about 20 miles apart, known as the Elkhorn and French Gulch properties.

The **Elkhorn group**, 65 claims, about 1,100 acres, owned or controlled, covers practically the whole of the Elkhorn mining district, together with 6 placer claims covering the townsite of Brundy, the company's millsite, rail yards, etc., the whole making a tract about 2 miles long by a mile wide.

Geology: the entire Elkhorn tract is covered by granite (quartz monzonite) cut by a number of quartz veins, 17 of which outcrop on the surface. Five veins run N. E.-S. W., 14 others run E.-W. being either faults or cross veins that link together the other fractures. The vein filling is quartz of replacement type, containing pyrite and scanty amounts of other sulphides, with local lenses of ore. Faulting is common; a great displacement dipping westerly delimits the veins to the east, and no payable ore has so far been found beneath this master fault. Westward this block above the fault shows promising surface exposures and the underground work has disclosed ore. The mining operations of many years ago were stopped by flat faults whose nature was not then understood. These and other steeper faults are common but well understood, features of the mine workings.

Development: of about 41,000 feet, comprises two tunnels, the lower, or 1,000' level, enters the mountainside near the railroad terminus and mill level; the upper, or 300 mill level, is some 700 feet higher and is at present the working level.

These two tunnels open the Idanha vein for a distance of nearly a thousand feet on the upper level, and over 400' on the 1,000' level; two raises above the 1,000 level, one connecting with the 300' level with drifts on the 450' and 800 levels, prove the continuity of the vein and disclose ore. The underground work shows the Idanha vein to vary from 8' to 30' in thickness, with streaks or bands of pyritic ore 4' to 5' wide and small lenses of high grade ore.

On the 300 level, ore is practically continuous for 700'. The Idanha workings are said to indicate about 300,000 tons of ore above the 1,000 level which will average about \$12.05 gross, figuring lead at 5c. and copper at 15c. a pound and silver at \$1.00 an ounce.

On May 15, 1922, the 300' level cut the Mono-Idaho lode beneath the Mono shaft, the 8' exposed showing a 12" hanging wall streak assaying 25 oz. silver per ton and 6% copper, the next two feet assaying 10 oz. silver, with ore carrying 5 oz. silver and 3% copper for 4' on hanging wall.

Work on the Central, Park and Elkhorn veins though extensive has not yet opened up any appreciable tonnage of commercial ore, though the Elkhorn contained small shoots or bunches of excellent ore. Work in 1922 on the Park vein is said to have disclosed a width of 10 ft. of ore carrying from 6 to 100 ounces of silver per ton.

The Mill: comprises a complete concentration plant with flotation equipment. The plant can handle 250 tons of ore in one eight hour shift or 750 tons in 24 hours. The first unit was started Nov. 11, 1921, but lack of miners restricted production to 200 or 225 tons per day.

On Feb. 29, 1922, the general manager stated mill was treating 225 tons of \$11 ore daily with a 90% recovery producing 40 tons of \$40 concentrate

with total mine and mill costs of \$5 to \$6 per ton. In April the mill feed was reported to be much higher.

Shipments up to April 15, 1922, of 57 car loads of concentrate from the mill aggregating 2,158 tons dry concentrate, yielded smelter returns of \$34.82, or \$22.49 per ton after deducting freight and treatment charges of \$4.50 to \$7.50 per ton.

These figures suggest that considerable waste or low grade material has gotten into the orebins. If they represent a true average it is apparent that selective mining will have to be done to raise the value of the mill heads.

The relatively small daily tonnage milled, is said to be due to scarcity of labor, owing to the reopening of the Butte mines, and not to scarcity of ore. As new ground is prepared for stoping, the Idanha vein should furnish an adequate supply for the mill from the ground already partly developed, and new work on the southwest drift on the 300' is expected to add materially to the existing tonnage.

Ore Reserves: according to three engineers who have examined and sampled the mine, viz Wm. F. Word, Geo. A. Packard and W. H. Weed, in 1920 the workings showed between 200,000 and 325,000 tons of developed and partly developed ore of an average value of \$10.16 per ton in lead, copper and silver, or of about \$2 net realizable return per ton of crude ore. If concentration is 4 to 1 and recovery 90%, \$40.00 concentrate is equivalent to \$11 ore as claimed.

The French Gulch group of claims includes 1,100 acres, patented, water rights to 5 streams and 15 miles of ditches and flumes. About \$750,000 is said to have been spent in development. Claims have been opened up by shafts and tunnels principally upon the Spain, Lucky Strike, Golden Crown and Leo. The work on the Spain consists of a 900' tunnel and 200' shaft, with 800' of drifting on the 290' level. The drift tunnel is about 350' below the apex, and shows the vein to carry from a few inches to 4' of sulphide ore, averaging \$17 a ton, according to estimates made by James E. Beveridge. Ore is said to be blocked out to the value of \$500,000.

The Lucky Strike has an 800' tunnel following a contact vein reported to be 20' to 40' wide and 100' shaft with 300' of drifting on the vein whose thickness is reported to be 35' with a paystreak of ore running from \$41.50 to \$80 gold, 5 to 7 oz. silver and 2½% copper.

The vein has been opened to the west by another 100' shaft, with 600' of drifting, showing an orebody 12' wide averaging \$18 a ton, according to the management. Eight hundred feet of tunneling on the Golden Crown claims shows a 1' to 3' vein said to carry \$8 to \$20 ore.

Besides these there are smaller shafts and tunnels on the various claims in the French Gulch group.

Conclusions:

Montana Southern Railway.

Company controls the Southern Montana Railway, a 38.33 mile narrow gauge line from Divide a station 28 miles south of Butte, on the Oregon Short Line (Union Pacific system), completed to the Elkhorn mine and mill in October, 1919. Three locomotives are employed and the line can handle 2,000 tons of ore daily. This road will handle all freight for the settlements of the Big Hole valley, and should derive a considerable revenue from the transportation of lumber milled along the road on Forest reserve ground and shipped to Butte and nearby Utah and Wyoming points.

In view of a recent report by a broker-mining engineer as to possible earnings, a careful review of the entire evidence is necessary before a conclusive opinion can be given. It is current belief however that the property can be made to pay and that the derogatory reports made against it were based on a very superficial examination. The next six months mill operations will tell who is right.

The property was developed and equipped during the war period and

costs have been undeniably high, but the financing of the project was successfully carried out against great odds, by the company's president and his friends.

BOULDER MINING CO.**MONTANA**

Address: E. M. Cooper, Box 1136, Helena, Mont.

Property: the Evening Star silver-lead claims of 20 acres bonded to Andrew Lavich, at last accounts.

BROADWATER COUNTY MINING CO.**MONTANA**

Officers: J. J. Fisher, pres., Harlowton, Mont.; Len Jobb, sec.; John A. Matthews, treas.

Inc. 1910. **Cap.** \$225,000; \$1 par.

Property: 7 claims, includes the Evening Star, Copper Glance and Lombard, about 5 miles west of Townsend, on the Radersburg road. Claims show promising outcrops and development is said to disclose veins 4' to 12' wide, with chalcocite ore assaying up to 60% copper, 6 oz. silver, with gold and lead. In 1918, management planned having property prospected and reported on with a view to resumption of operations in near future, but nothing recent available.

BUENA VISTA MINES CO.**MONTANA**

Officers: G. F. Russell, bus. mgr., 1303 Dean St., Spokane, Wash.; J. L. Magney, opr. mgr. Identified with the organization are W. P. Russell, J. D. Chickering, F. Leslie, J. Millsbaugh, G. P. Larson, J. P. Boyd, G. F. Russell, D. K. McDonald, V. Rapp, Wm. Coleman.

Property: 3 patented claims, known as Buena Vista mine, Maxville, Granite county. Idle for 20 years until present company secured bond and lease. Principal values in silver.

BULLWHACKER COPPER CO.**MONTANA**

Reorganized as **Butte Bullwhacker Mining Co.**, which see.

BUTTE-ALEX SCOTT COPPER CO.**MONTANA**

Dissolved. Property: 4½ acres at Butte, Mont., sold to Anaconda Copper Mining Co., for \$750,000 cash, on Feb. 10, 1916. Stockholders received dividends of \$10 a share. There were 79,311 shares outstanding and \$80,000 in the treasury. See Copper Handbook, Vol. XI.

BUTTE & ANACONDA CONSOLIDATED M. & M. CO.**MONTANA**

Office: Box 138, Anaconda, Mont.

Officers: J. C. Keppler, pres.; J. Winterhalter, v. p.; Andrew Flieger, sec., Box 359 Portland, Oregon; John J. Wegener, treas., with W. R. Allen, directors.

Inc. 1908, in Montana. **Cap.** \$1,500,000; shares \$1 par; assessable; 900,015 shares outstanding. Company is a consolidation of the Flint Creek Mining Co., and the Golden Eagle M. & M. Co.

Property: 9 patented quartz claims, 3 unpatented placer claims and 2 millsites, about 240 acres, in Flint Creek Gulch, Granite Co., Mont., 3 miles from a railroad. Claims show quartz veins carrying tellurides. Average assays said to run \$25 per ton in gold and silver. Developed to depth of 450' by 2 shafts and 2 tunnels, 900' long. No work was done in 1918, but in 1919 property was leased for 18 months.

Also owns 23 patented claims, a mile north of the Butte Superior shaft, purchased at sheriff's sale on Dec. 22, 1920 for \$75,315. The Great Butte Copper Co. formerly owned this group.

Development: exploration at the Calumet shaft, is 2,000' deep with cross-cuts and drifts at that level.

BUTTE & BACORN MINING CO.**MONTANA**

Owned by Great Butte Copper Co., which see.

Office: 53 Silver Bow Block, Butte, Mont. **Pittsburgh office:** 331 Fourth Ave. Chas. Hyde, treas.

In June, 1916, company was reorganized and sold its property to the Great Butte C. Co., which company paid indebtedness and exchanged 400,000 shares of its stock in ratio of 4 to 1. See Vol. XII.

- BUTTE & BOULDER MINE** **MONTANA**
See *Shielas & Ironsides Mining Co.*
- BUTTE & CORBIN CONS. COPPER MINING CO.** **MONTANA**
Officers: J. L. Templeman, pres.; Lewisohn Block, Butte, Mont.; Lee Williams, v. p.; J. B. Fitzpatrick, sec.-treas.; at last accounts.
Inc. May 1, 1907, in Montana. **Cap.** \$700,000; \$1 par; issued 469,000. Annual meeting, February 4.
Property: 5 claims, 82 acres; also 10 acres timber lands in the Corbin, or Colorado district, on the eastern side of Valparaiso mountain. The ore is a complex mixture of lead, copper, and zinc, occurring as short shoots in fissure veins in granite. Vein reported by company to average 8' 4" in width, and to carry 4% copper, 6% lead, 2% zinc, 8 oz. silver, and \$1 gold per ton.
Development: by shaft and the 500' *Rarus* tunnel, which cut a 10' vein at 165' from the portal, assaying 2.5% copper, with paystreak carrying covellite, averaging 6% copper, 8 oz. silver, and \$6 gold per ton. Amount of ore on dump, 7,000 tons of \$10 value, according to *Ropes & McIntyre*.
Idle at last accounts.
- BUTTE & ELK RANGE CO.** **MONTANA**
Address: Grant St., Pittsburgh, Pa.
- BUTTE & ELLISTON GOLD & COPPER MINING CO.** **MONTANA**
Merged into Evening Star Developing Co., which see.
Described, Vol. XIII.
- BUTTE & GEORGETOWN MINING & MILLING CO.** **MONTANA**
Office: The Napton, Butte, Mont.
Officers: Constant Rembaud, pres.; J. A. Nadean, v. p.; Orila Nadean, sec.-treas., with F. L. St. Jean (mgr.), and Franck Boucher, directors.
Inc. 1910, in Montana. **Cap.** \$1,000,000; par \$1; assessable; 530,000 outstanding.
Property: 13 claims, 12 patented, total 881 acres of placer ground, to be worked for gold platinum and sapphires. Inactive.
- BUTTE & GREAT FALLS MINING CO.** **MONTANA**
Inactive. **Address:** Box 1393 Butte, Mont.
Officers: E. Bryant Crump, Bloomington, Ill., pres.; R. M. Green, Butte, v. p. and gen. mgr.; Allen Pierson, sec.-treas.; with Ira N. Honnold, L. G. Diehl, J. Cohan, Wm. Richardson, J. W. Beckwith, Louis Lauritson, R. M. Sutherland, J. P. Mondloch, Walter A. Kenney and C. F. Murphy, directors.
Inc. Nov. 28, 1911, in Montana. **Cap.** \$500,000; shares \$1 par; assessable; 400,000 outstanding; \$32,000 was expended on development-work during 1914-15. In December, 1916, an assessment of 5c per share was levied.
Property: the Genevieve group of 8 claims, 134 acres, in the Lost Child mining district, 3½ miles N. E. of the Butte & Superior property.
Claims show Butte monzonite cut by aplite and traversed by wide, rusty veins carrying tourmaline and occasional specks of chalcopyrite. The Genevieve vein runs S. W.-N. E., with dip of 35° and reported width of 30'. It is mainly decomposed granite with clay and quartz streaks and one 3' band of quartz and tourmaline carrying occasional sulphides. Has a 1½ compartment shaft, 500' deep. The Genevieve is said to have a good showing in a 2' vein on 200' level, but average of assays is small. The Silver King claim has a 200' tunnel. Property reported on by Paul Billingsley, Jesse Cohan & Peterson.
Equipment: included electric hoist, good for 1,500', pump, 10-drill compressor, mine building and dwellings. Mine closed down and hoist sold, September, 1917.
Property regarded as a prospect of doubtful merit.
- BUTTE & LONDON COPPER DEVELOPMENT CO.** **MONTANA**
Office: 46 East Broadway, Butte, Mont.
Officers: W. W. McDowell, pres.; John D. Haines, v. p.; W. E. Reynolds, sec.; E. S. Passmore, treas.; with Fred. Whiteside, Guy W. Stapleton, W. S. Carns, J. A. Sheldon and Maurice Eisenberg, directors.

Inc. Jan., 1906, in Arizona, as Butte & London Copper Co. **Cap.** \$5,000,000; \$5 par; 907,700 outstanding. Annual meeting, third Tuesday in January. Listed on Boston Curb.

Property: 113 acres, known as the Greendale placer claims, lying immediately north of the Pittsburgh & Montana in the valley of Silver Bow Creek, east of Butte. Property claimed by the management to carry the possible extension of the Rainbow lode. Forty acres of the property is said to be valuable for townsite purposes.

Development: 1,350' three-compartment shaft with 2 crosscuts on the 1,100' level cutting 9 veins, none carrying ore of commercial value, except a streak that gave assays of 2% copper, 50 oz. silver, and \$2 gold, per ton.

The company agreed December 24, 1912, to accept a contract with Thos. F. Cole, for the transfer of all its property to a new company, the Greendale Exploration Co., with a capitalization of \$200,000, to be organized by him. The terms of the contract provided that in consideration of sinking the shaft to 1,600' level, running crosscuts north and south 2,500' the entire width of the property, and doing other stipulated development work, Mr. Cole was to receive 51% of the stock of the new company, one-half to be paid as the work progressed, the balance remaining in escrow until the work is finished. Mr. Cole spent \$300,000 on this development, and contract was completed. Failing to find shipping ore in commercial quantities the property was closed down.

BUTTE & PLUTUS MINING CO.

MONTANA

Address: Shelby Cohen, sec., 401 Phoenix Bldg., Butte, Mont.

Officers: J. R. Moyle, pres.; T. Tomich, v. p., with John Harrington, Sam Barker, Clement Stonemetz, and W. H. Bachman, directors. M. S. Cohen, attorney.

Inc. in Montana. **Cap.** \$1,000,000; \$1 par; increased to this amount in April, 1920.

Property: the Plutus, Mapleton, and other claims, N. of Anaconda's Nettie group at Butte, which contain veins of silver and manganese ore; also a half interest in the Jack Knife claims near Philipsburg, carrying manganese ore.

Development: by two 400' shafts and fairly extensive workings. Water is troublesome. The shafts are connected. During 1920, good silver-manganese ore was cut on the 100 and 250' levels. Drifting is progressing on the bottom level, and prospects appear to be good for a real mine.

Equipment: includes electric power, hoist, compressor, pump at 300', etc.

BUTTE & RED EAGLE COPPER CO.

MONTANA

Officers: Fayette Harrington, pres., Missoula, Mont.; Jas. A. Cauty, sec.-treas., Butte, Mont.

Inc. May, 1907, in Montana. **Cap.** \$5,000,000; shares \$5 par.

Property: 7 claims, patented, S. E. of the Butte & Bacorn and N. E. of the Butte & Superior, the Red Eagle claim having a 400' tunnel, showing a little ore. Mine shut down since 1907, but company still alive.

BUTTE AND SUPERIOR MINING CO.

MONTANA

Office: 25 Broad St., New York. **Mine office:** Butte, Mont.

Officers: and directors: D. C. Jackling, pres.; Charles Hayden, v. p.; C. W. Peters, v. p.; A. J. Ronaghan, sec.; J. R. Dillon, treas.; and Charles Bocking.

Operating officials: Charles Bocking, mgr.; E. V. Daveler, gen. supt.; Angus McLeod, mine supt.; J. L. Bruce, cons. engr.

Inc. Oct., 1906, in Arizona. **Cap.** originally \$6,000,000; \$5 par; reduced December 3, 1910, to \$2,500,000; \$10 par; increased September, 1912, to \$3,500,000. Outstanding December 31, 1920, \$2,901,977. No bonds. Equitable Trust Co., New York, and Old Colony Trust Co., Boston **transfer agents**; Guaranty Trust Co., New York, and National Shawmut Bank, Boston, registrars. Annual meeting 3rd Friday in April, at Phoenix, Ariz. Stock listed on Boston, New York and Butte exchanges and on the Paris

Bourse. Name changed from Butte & Superior Copper Co., May, 1916, and new stock issued.

Controls the **North Butte Extension Development Co.**, through ownership of 64% of the stock; also controls the **Butte-New York Copper Co.**, through ownership of more than 55%. Company holds 35,000 shares (\$25 par) of **Am. Zinc, Lead & Smelting Co.**, for which it issued in 1916, 17,500 shares (\$10 par) of its own stock. In 1920, acquired 36,000 shares of **Shasta Zinc and Copper Co.** for \$360,000.

In 1912 the control of the company passed into the hands of Hayden, Stone & Co. interests, who have been closely identified with Utah Copper, Chino, and other great and successful mining companies, thus ensuring ample finances and competent direction.

Comparative General Balance Sheet—years ending December 31:

Assets.					
Year	Prop. Equip & Devel	Investments	Current	Deferred Charges	Total
1920....	\$5,568,502	\$1,601,772	\$3,165,808	\$94,099	\$10,410,181

* Adjusted. †After deducting \$2,719,778 paid to Elm Orlu Co.

Dividends: initial in 1914, \$611,908; in 1915, \$4,908,115, in 4 quarterly payments of 75c each and extra payments of \$15 per share; in 1916, \$9,490,472 in quarterly payments, 2@75¢, 2@1.25, ea. and extra of \$30.00 per share; 1917, paid \$1.25 quarterly, for first three quarters, \$1.25 extra for first two, and Red Cross of 40c, a total of \$6.65 for the year. None since.

Property: 27 claims, 165 acres, including the Black Rock mine, about 2 miles N. E. of the business section of Butte, with the exception of 4 claims, Peake, Parker, Prescott and Pardee, which lie about 3 miles N. W. of Butte. In addition, fractional interests equivalent to 8.88 acres are owned in: 11 claims, 60.3 acres, and surface rights only for 34.15 acres. Also additional, North Butte Extension Development Co., a subsidiary, owns 29.48 acres. See below for holdings of another subsidiary, the Butte-New York Copper Co.

In November, 1917, a syndicate, known as J. L. Bruce Trustees, was formed to acquire for the Butte & Superior 200 acres of zinc-lead ground W. of the Emma mine of the Butte Copper & Zinc Co. In 1919, three claims just W. of Butte, carrying a vein of rich silver ore, were acquired.

The Germania-Tzarena claims, 1 mile S. W. of Butte, were worked under lease and option in 1918. Shaft was sunk to 1,000' and 500' driven on vein, but payments being due before ground was explored, the bond was dropped. In 1920, company undertook the development of property of Butte Metals Mng. Co., the latter to pay for work with stock; to date results have been unsatisfactory.

Litigation: Butte and Superior has had eight years of costly litigation; a suit with the Elm Orlu Mining Co. involving extralateral rights of certain orebodies, another with the Minerals Separation Co. concerning the patent rights of the flotation process. In this latter dispute, B. & S. has really done great service to the whole mining industry in forcing the patents to be clearly defined.

In 1916, Elm Orlu, through its controlling company, the Clark Montana Realty Co., started suit against the Butte and Superior Mining Co. over rights to certain orebodies in the Elm Orlu claim and in the Black Rock claim of Butte and Superior. The successive steps in this controversy are as follows:

In 1917, the U. S. District Court decided in favor of Elm Orlu, giving this company the westernmost 301' along the vein and B. & S. all rights to the Rainbow lode east of the point where it enters the Black Rock claim (B. & S.); subject, however, to the prior rights of the Pyle vein of the Elm Orlu, below its junction with the Rainbow.

The B. & S. appealed this to the U. S. Circuit Court of Appeals at San Francisco in November, 1917, which affirmed the decision of the lower Court, and found that ore taken by B. & S. from the disputed ground was worth, with interest, \$177,707. Application to the U. S. Supreme Court for a review of this decision, was denied on May 10, 1918; but the Circuit Court of Appeals granted an appeal to the U. S. Supreme Court, who heard the appeal January, 1919, and sustained the decision of the Circuit Court of Appeals. The Geological features of this case were presented by R. M. Searles in 'M. & S. Press' of May 10, 1919.

Another collateral issue of the case not wholly determined by the U. S. District Court involved claims on the part of Elm Orlu to certain orebodies developed in the Black Rock claim 550 ft. eastward of the point above referred to by reason of the alleged apex in the Elm Orlu claim of a branch of the Rainbow lode extending into the earth beneath Black Rock claim. This issue was never tried as a settlement was arrived at in August, 1919, and confirmed by the Court. By this agreement, Elm Orlu got about $\frac{1}{3}$ and B & S. $\frac{2}{3}$ of the disputed area, while B & S paid Elm Orlu \$2,719,778 cash for ore already extracted. Elm Orlu was awarded 186' additional eastward on the Rainbow vein below 1,200' and the B & S. that portion above 1,200'. The Jersey Blue vein west of the new plane below 1,300' was awarded to Elm Orlu. Each side paid its own costs. The suit involved examining 12 levels in each mine, crosscuts, 6 miles of drifts, 10 raises, 500 to 1,200' long, and a complexity of vein-intersections and fault-crossings.

Litigation with Minerals Separation over United States patents was first provoked by the installation made in 1911 by James M. Hyde, at the mill of the Butte & Superior Copper Co. (name since changed to B. & S. Mining Co.) In that suit (*Minerals Separation v. Hyde*) the District Court at Butte, Montana sustained U. S. patent No. 835,120 and found infringement as to 7 claims. In 1914, the Ninth Circuit Court of Appeals at San Francisco, reversed this decision; but on writ of certiorari the U. S. Supreme Court on December 11, 1916, unanimously adjudged this basic patent for air-froth flotation valid as to 10 of its 13 claims. The remaining 3 claims, which specified the use of "a small quantity of oil," and which the Court held to be invalid, have since by disclaimer, been brought within the scope of the Supreme Court's decision.

Following this decision of the Supreme Court in the Hyde case, the Butte and Superior Mining Co. began using oil in minimum quantities of $\frac{1}{2}$ of 1 percent contending that this relieved it of liability for infringement. This issue was tried in the suit of *Minerals Separation v. Butte & Superior*, and on May 4, 1917, the United States District Court at Butte, Mont., again found validity and infringement as to the 10 claims (3 modified by disclaimer) previously litigated. On May 13, 1918, the Ninth Circuit Court of Appeals at San Francisco partly reversed this decision, holding the patent limited to $\frac{1}{2}$ of 1% of oil on the ore. The U. S. Supreme Court reviewed this case on writ of certiorari, and on June 2, 1919, partly reversed the decision of the Circuit Court of Appeals, holding that the patent extended to and covered the use of oils in amounts equal to any and every fraction of 1% on the ore. Pursuant to this decision, the District Court of Montana entered its decree on July 19, 1919, issued a permanent injunction against the Butte and Superior, and held it to account for all profits made by reason of its infringement. This accounting was set for October 27, 1919, but extended to December 1. In its report filed with the U. S. District Court, B. & S. suggested to M. S. the sum of \$451,097 for infringement, this not being an admission of the amount saved by flotation, but as an aid in the accounting. Objections however were filed by M. S. and a new accounting to show production figures, selling contracts, and smelter returns, was ordered for submission on May 18, 1920. At the end of 1921, this case had not reached a settlement.

On September 8, 1919, the U. S. Circuit Court of Appeals at San Francisco dismissed an appeal of the Butte and Superior Mining Co. v. *Minerals Separation*. The appeal was against certain provisions of the decision of Judge George N. Bourquin at Butte in September, 1917. In January, 1920, M. S. brought contempt proceedings against B & S., alleging disregard of injunction. On June 1, the U. S. District Court, Judge Bourquin, dismissed this action, holding that B. & S. was not using less than 1% of oil on the ore, as alleged by M. & S.

Geology: the claims cover several thousand feet along the course of the big Rainbow lode, which cuts through granite and forms the northern

boundary of the known, productive area of Butte. The ore consists of an intimate, fine grained mixture of zinoblende, galena and small quantities of pyrite and chalcopryrite occurring with gangue material, mostly quartz, silicified granite, rhodochrosite and rhodonite as replacement of the granite. The ore forms parallel or branching ore shoots ranging in thickness from narrow stringers up to orebodies as much as 100' wide within the limits of the broad general zone of mineralization forming the Rainbow Lode. Near the surface the commercial ore consisted principally of silver ore, which was mined in the early days of Butte mining. The commercial zinc ore shoots as developed during recent years occur downward from approximately the 500' level, and increased in horizontal area and in importance as greater depth was gained. Ore blocked out ready for mining is normally maintained at about one million tons, greater development than this being inadvisable owing to the difficulty in maintaining developed drifts and crosscuts for any considerable period before actual mining operations are to be conducted.

The ore varies from 10% to 30% zinc, averaging about 18% zinc, 1.25% lead, 0.2% copper, 8 oz. silver and 30c. gold. The small amount of iron, lead and copper contents permits of the production of a good grade of zinc concentrates, but the very fine dissemination of the mineral requires fine grinding for efficient concentration, and most of the zinc mineral is afterwards recovered by oil flotation. The silver content decreases slowly with depth, but thus far the zinc ore continues clean and without appreciable pyrite.

Development:

Year	Total footage	Shafts feet	Total miles workings	Ore reserves tons	Zinc %	Silver o. z.
1920.....	16,981*	858	36	422,100	15.5	5.50
1919.....	21,069	33	263,300	16.7	5.70
1918.....	33,459	950	29	830,000	17.0	5.70
1917.....	17,730	724	23	1,059,200	17.6	5.90
1916.....	21,838	2,649	20	1,044,850	17.7	5.65

*Exclusive of 856' of drilling.

Reserves at end of 1919 showed a decrease of 25% due to loss of ground by adverse decision in the Elm Orlu case and not to any diminution of orebodies. A further decrease in 1920 was due to restricted development.

There are three shafts—No. 1 is 2,030' and No. 2 is 2,300'; No. 3 which is 2,600' deep, is the new main or working shaft. It has concrete skip-pockets on 1,200, 1,300, 1,400, 1,500, 1,600, 1,700, 1,800 and 1,900' levels. Ore occurs in heavy ground with frequent fault seams and slips, and there is considerable movement as a result of ore extraction. These facts necessitated sinking a new shaft. All 3 shafts are well protected by concrete and cement coating. On the 1,200' station of No. 2 shaft electrically-driven quintuplex pumps handle the mine water. The main ore-shoot has been opened continuously for 2,000' E of the ground in dispute with the Elm Orlu. No. 3 shaft is to be sunk to 3,050'.

While the property was shut down a considerable amount of development work was completed on the zinc ore reserves. This development work has resulted in the uncovering of what promises to be one of the most important copper mines discovered in the Butte camp for a series of years. On the 2,000' level B. & S. ran into copper ore while crosscutting north, of sufficient value to warrant further investigation. A vein of ore 8 to 10' wide was opened up on the 2,200' level for over 300' and averaging in excess of 5% copper with approximately 7 oz. silver to the ton. The same vein has again been opened up on the 2,600' level and at this point the ore is 18' wide with an average of better than 5% copper and approximately 6 oz. of silver. If drifting on the 2,600' level discloses a body of ore of the same size as on the 2,200' level, Butte and Superior will be justified in concluding that it has in

sight the making of a very important copper producer. This would, of course, be in addition to its present zinc properties, the operation of which was resumed Jan. 1922, after shutdown of 13 months.

Equipment, at main shaft is a Nordberg hoist designed for an ultimate depth of 5,000', hauling at 3,000' per minute, driven by a 2,000 h. p. Westinghouse motor, employing the Hgner and Ward-Leonard systems of balance and control; electric locomotives underground; movable Sirocco fan and motor for fire or gas purposes; compressors, complete machine-shops, coarse-crushing plant at No. 3 shaft, and 1,800 ton mill using gravity concentration and flotation. Normally, 430 men are employed in surface operations.

Part of the concentrates are sold under contract to the American Zinc, Lead & Smelting Co., and U. S. Smelting Co. under a toll basis, though small quantities have been disposed of by sale to various zinc retort smelters throughout the country or to the Anaconda Copper Mining Co. for treatment at its electrolytic plant at Anaconda.

Production: figures for the production of the property prior to 1913 are not available, but the results of operations since that time are as follows:

Year	Tons Milled	Oper. Cost	Tons Concn'ts	Assay Con. %	lb. Zinc in Concn'ts	Zinc Rec.	Aver. % Pr. c.	Net Incl per share	Profit
1920.....	334,919	\$9.80	81,836	53.18	87,037,776	94.98	7.91	\$ 187,929	\$0.65
1919.....	403,436	9.03	104,198	54.36	113,287,464	95.53	7.14	864,990	2.98
1918.....	468,814	11.23	135,543	51.22	139,522,506	92.97	7.58	628,348	2.16

1914.....	327,210	5.33	101,383	53.16	108,644,120	88.71	5.04	1,417,128	5.21
1913.....	296,940	5.70	106,443	49.00	102,997,916	88.43	5.52	942,988	3.47

This table does not give the lead, copper, and silver in concentrate, which in 1918 amounted to 11,956,951 lb., 1,293,313 lb., and 2,781,394 oz., respectively.

In 1919, these were 9,871,013 lb., 1,019,866 lb., and 2,254,485 oz.; also 3,634 oz. gold; and in 1920, 6,257,506 lb., 722,745 lb., 1,593,319 oz. plus 2,806 oz. gold. In the latter year, 1,150 tons of lead concentrate were produced yielding 22,558 oz. silver and 940,580 lb. lead and 221,695 lb. zinc.

All operations, save development, were suspended Nov. 10, 1920, and were not resumed until Jan. 16, 1922. Reported that 7,000,000 lb. of zinc will be purchased monthly by Anaconda C. M. Co.

Butte-New York Copper Co.

Controlled through stock ownership by Butte and Superior Mng. Co.

General office: 25 Broad St., New York.

Officers: M. M. Ferguson, pres.; R. J. Schaefer, v. p.; W. G. Sargent sec.-tres., with L. B. Hollaway, Philip Lawrence, G. M. Minton and A. J. Ronaghan directors. Annual meeting 2nd Monday in January.

Inc. Oct. 17, 1906, in South Dakota. Previously a holding company controlling over 95% of the capital stock of the Butte-Milwaukee Copper Co. In 1914 it purchased all the assets of that company. **Cap.** authorized \$1,100,000; outstanding, \$582,172; par \$1; decreased, April 16, 1915, from \$4,000,000, with shares at \$5 par. The Butte and Superior Mining Co. owns \$330,435 of the stock. Stock transferred at company's office. Registrar: Empire Trust Co., New York.

Bonded debt: \$150,000 first mortgage convertible income gold 6s; dated June 1, 1916; due June 1, 1925; int. J. & D. (up to and including June 1, 1920, interest is payable only out of income at rate of 6%, but is cumulative for that period; thereafter interest will be paid unconditionally). Coupon, \$100 \$500, and \$1,000. Authorized, \$500,000. The unissued bonds are reserved for future requirements. Convertible at any time prior to maturity into stock of the company at par. Subject to call on and after June 1, 1918, at

105 and interest. First offered (150,000) to stockholders of record April 19, 1915, at par, on the basis of \$100 bond for each 400 shares of stock held. Normal income tax deducted from interest.

Property: 4 claims, patented, known at the Pollock, Colonel Sellers, Florence, and Bird, in Summit Valley district, Silver Bow county, adjoining Butte and Superior, on the N., and 3 claims in the Argenta district, Beaverhead county, aggregating 53 acres.

The Colonel Sellers claim has a promising surface showing with strong persistent quartz veins in granite. The Butte and Superior completed the sinking of the 1,200' Milwaukee shaft on Colonel Sellers claim and connected it by a crosscut with 1,200' level of Black Rock mine. This work was continued beyond the Colonel Sellers shaft so as to open the Mastodon vein on the Florence claim. The Milwaukee shaft is well equipped with power plant and hoist. The Butte and Superior Co. spent \$24,000 in development work on the Butte-New York property, for which it received 205,000 shares of the capital stock of that company.

Surface outcrop on Bird claim is 100' wide and resembles outcrops of the typical fault veins of the district.

The Pollock mine has 4 veins, 2 more or less developed by a short tunnel and a 730' three-compartment shaft. A silver vein was opened on the 300' level and mine is said to have produced, years ago, about \$400,000 worth of ore, with values mainly in silver and gold, from above the 200' level. A little ore running 2% copper and 15 oz. silver per ton, with small gold values was produced, 1906 Drilling 698' during 1919 did not reveal any payable ore.

North Butte Extension Development Co.

Controlled through stock ownership by Butte and Superior Mining Co.

Office: 25 Broad St., New York. **Mine office:** O'Rourke Estate Bldg., Butte, Mont.

Officers: H. G. Bell, pres.; A. J. Ronaghan, sec.; with I. A. Heilbronner, Elbridge L. Adams, David Angus and C. W. Peters, directors.

Inc. Oct. 10, 1908, in Maine. **Cap.** \$1,500,000; shares \$1 par; issued, \$1,349,036. Is a reconstruction of the North Butte Extension Mng. Co. A controlling stock interest of \$870,040 was sold, March, 1910, to the Butte and Superior Mng. Co. Annual meeting in September.

2,000 shares (with a lot of other companies shares) sold for \$210 the lot at public auction in New York on Dec. 16, 1920.

Suit was instituted by the Butte and Superior interests against the promoters of the North Butte Extension Development Co. to recover shares of stock claimed to have been illegally issued and a proposal to return 50,000 shares was made and accepted by the company.

Apparently, the company's only present property is the Overman claim, the Black Crow fractional claim of 2½ acres and the Clipper and Assay mill sites.

Development: by a 700' shaft.

Most of the ground for which the various North Butte Extension companies were organized was held only under options which were forfeited. The Occidental claim was developed by a long crosscut from the Butte and Superior shaft, but nothing of importance was found and after payments of \$90,000 the claim was abandoned. Much of the original ground held by the company is now owned by the Rainbow Development and Butte and Superior companies.

According to the contract with the Butte and Superior, the latter company drove a crosscut on the 1,200' level through the Four Johns claim and through the entire length of the Overman claim belonging to the North Butte Extension Co. The total exploration E. of the 1,221' crosscut of the Butte and Superior was 3,318' after which work was abandoned at the prop-

BUTTE & ZENITH CITY MINING CO.**MONTANA**

Inactive. Wm. D. Gibson, mgr., Hirbour Block, Butte, Mont. Fully described in Vol. XIV, Mines Handbook, which see.

BUTTE-ARGENTA COPPER CO.**MONTANA**

Probably dead. See Vol. XII.

BUTTE-BALLAKLAVA COPPER CO.**MONTANA**

Address: Sherwood Bldg., Duluth, Minn. Carl Zachow, sec.-treas. The property of this company was sold at foreclosure sale Oct. 2, 1920 and bid in by bondholders, who transferred it to the **Silver Butte Mines Corp.** The bondholders waive interest, and are to get half of face of bonds in cash, payable in 18 months and balance in Silver Butte stock at par. Stockholders were permitted to exchange their stock, share for share by paying 50¢ a share for all stock held. The Ballaklava Co. is without any holdings or property and stock valueless. See Vol. XIV for description.

BUTTE BULLWHACKER MINING CO.**MONTANA**

Office: Hennessey Block, Butte, Mont.

Officers: A. Frank, pres. and gen. mgr.; H. I. Wilson, v. p.; H. Frank, sec.; D. J. Fitzgerald, treas.

Inc. Oct. 24, 1914 in Washington. **Cap.** \$1,000,000; \$1 par; assessable; all issued. Annual meeting, second Monday in January, at Butte. Security Transfer & Register Co., New York, transfer agents and registrar. Listed on New York Curb. A dividend of 1c. per share was paid Oct. 25, 1917.

Property was leased for one year to East Side Mining Co., incorporated, by I. A. Heilbronner and Patrick Wall, April, 1916. Lease called for royalty of 25% and shipments of not less than 1,000 tons a month. Controlling stockholders also gave an option on 51% of entire stock at 50¢ a share, payments in 30 and 90 days and at intervals for 18 months.

Company is a reorganization of the Bullwhacker Copper Co., whose stockholders received share for share in the new company on payment of 15c. a share in six months' installments. This wiped out a debt of \$121,200 due the sons of Patrick Clark (Clark Bros. & Klein) and put \$20,000 in the treasury. Mine was profitable when leased, but ran into debt for an experimental leaching plant. The **Mines Operating Co.** secured control by buying three-fifths of East Side stock at 75c. per share.

Property: one claim, 20 acres, on the east side of the Butte district, near the Pittsmtont smelter. Easterly part of claim covers a zone of granite impregnated with oxidized copper ores, mined in an enormous open pit 275' across and 75' deep, from which 30,000 tons of 4.07% copper ore were extracted by lessees in 1912-13. It is a highly silicious ore.

Development: by an old 300' shaft with crosscuts beneath the orebody at that level, also several new shafts, proving an extension of the orebody beyond the open pit. The ore body is extensive and, though probably not deep, has a large tonnage from which much money should be made. Deep development is expected to show veins carrying copper sulphides.

Equipment: includes hoist, compressor and a 75-ton leaching plant, which as yet has not been successfully operated (described by P. E. Peterson in "Min. & Eng. World," Oct. 4, 1913, p. 584).

Idle in 1921. See proposed consolidation with **Butte-Duluth Mining Co.**, under that title.

BUTTE-CABLE COPPER & GOLD MINING CO.**MONTANA**

Officers: Louis Feldman, pres.; Nicholas Bossnitz, v. p.; preceding officers, Wm. Henthorne, John Strasser, J. G. Kimball and Dan Kowsky, directors. G. W. Peterson, Anaconda, sec.

Inc: Nov. 21, 1906, in Montana. **Cap.** \$1,000,000; shares \$1 par.

Property: 6 claims, 4 patented, 15 miles west of Anaconda, near Cable-Consolidated Mining Co., show a 3 to 4' vein carrying about 2' of commercial ore, giving assays of 11.9% copper, 156 oz. silver and 0.6 oz. gold per ton. Sullivan & Peterson, of Anaconda, offered stock at 15 cts. a share, Feb., 1913 to raise money for patenting claims. Idle at last accounts.

BUTTE CENTRAL COPPER CO.**MONTANA**

A frenzied finance corporation put out by Davison & Co., formerly of Boston, reported out of business, 1922.

BUTTE CENTRAL MNG. & MLG. CO.**MONTANA**

Offices: 27 State St., Boston, Mass.; and Butte, Mont.

Officers: Walter R. McDonald, pres.; William G. Burns, v. p.; Ralph A. Gallagher, treas., with S. S. Carpenter and Harry W. Davis, directors. W. G. Burns, sec.; Carl J. Trauerman, agent and mgr., Butte, Montana.

Inc. Aug. 11, 1914, in Delaware. **Cap.** \$750,000; \$5 par; all issued. **Bonds:** \$300,000 1st mortgage 6% 30-year gold bonds, all issued. Fifty-one per cent. of the stock is owned by the Butte-Detroit Copper & Zinc Mng. Co., and 66½% of the bond issue by the U. S. Manganese Corp. Federal Trust Co., Boston, Mass., transfer agents. Was a promotion of Davison Co., of Boston, Mass. (reported out of business, 1922.)

Property: company formerly owned the Ophir claim, 20 acres, at Butte, once owned and developed by the Butte Central Copper Co.

The Ophir plant and mill were sold by the Sheriff of Silver Bow county, Mont., October 31, 1918, to satisfy an old judgment. It was bid in by the Butte Copper & Zinc Co., a subsidiary of the Anaconda Copper Mng. Co., and not redeemed within the legal period.

BUTTE-CONCORDIA MINING CO.**MONTANA**

Inc. Sept. 8, 1915, in Montana. **Cap.** \$50,000; shares 25 cts. **Directors:** G. F. Pitman, G. W. Deniger, G. Widmer, S. V. Wilking, 615 Phoenix Blk., Butte, Mont. E. C. Schwärzner, O. J. Olson, Geo. W. Wall, F. A. Kean and Alfred Pearson, all of Butte, Mont.

No further details obtainable.

BUTTE CONSOLIDATED COPPER MINING CO.**MONTANA**

Mine at Corbin, Mont. Idle and apparently waiting for developments in the Bertha mine of the Boston-Corbin Co. to prove this property. See Vol. XI, Copper Handbook.

BUTTE COPPER CO.**MONTANA**

Property operated by **Anselmo Mng. Corp'n.**, which see.

Address: James H. Rowe, pres., 120 West Granite St., Butte, Mont.

Officers: J. H. Rowe, pres.; E. T. Lawler, v. p., Brookline, Mass.; W. M. Hanson, sec., with R. L. Rhule and B. J. Keenan, directors.

Inc. March 29, 1906, in Montana. **Cap.** \$1,500,000; \$1.50 par. Shares traded on Butte Stock Exchange; 4c bid in 1920.

Property: company owns approximately one-half of the Anselmo, Anselmo No. 2 and Trifle claims, balance being owned by the Hauswirth family. Payments made under bond by Anselmo Mng. Corp'n will be distributed and company dissolved. Fully described in Volume XIV.

BUTTE COPPER CZAR MINING CO**MONTANA**

Address: R. M. Green, or L. P. Sanders, Butte, Mont.

Officers: C. F. Murphy, pres., Anaconda, Mont. John K. Claxton, treas.; E. C. Meiklejohn, gen. mgr., Butte.

Cap. \$300,000; shares 25c par. 2c bid, June 21, 1920.

Property: Copper Czar, Sunflower, and Mayflower claims E. of Butte. Examined by A. V. Corry and Morton Webber. In March, 1918, New York people acquired an option on control of shares.

Development: None in 1920. During 1918, work was in charge of Mr. Webber. A station was cut on 300' level, 510' of crosscutting done, and 477' of driving on the vein. In the surface workings the ore-shoot constituted an attractive mining speculation, and its downward prolongation was the crux on which the future possibilities depended. The work done indicated that the shoot did not persist at depth. Highest assays, in spots, were less than 2% copper and 2 to 3 oz. of silver. After this result the New York syndicate dropped its option. A circular issued by the Butte Copper Czar company in

1919, containing proposals for re-financing, is said to contain incorrect statements concerning the work done under Mr. Webber's direction.

BUTTE COPPER KING MINING CO. MONTANA

Address: care Beebe Grain Co., Butte, Mont. C. E. Beebe, pres.; A. P. Henningsen, sec. Portland, Oregon.

Inc. April 19, 1906, in Montana. **Cap.** \$1,500,000; shares \$1.50 par.

Property: 3 fractional claims, 28 acres, known as the Frenchman No. 2, Rare Steak, and Missouri Girl, west of the Jennie Dell mine and north of the Butte Water company's reservoir. Idle since organization.

BUTTE COPPER & ZINC CO. MONTANA

Office: 61 Broadway, New York. Mine at Butte, Mont.

Officers: A. J. Seligman, pres.; Albert Fries, v. p.; A. L. Bailey, sec-treas., with B. B. Thayer, C. F. Kelley, A. H. Melin, M. Eisenberg, and C. A. Wimpfheimer, directors.

Inc. Nov. 22, 1904, in Maine. **Cap.** \$2,500,000; \$5 par; increased to \$3,000,000 July 7, 1917; 600,000 shares issued. Bankers Trust Co., New York, transfer agent; Liberty National Bank, New York, registrar. Annual meeting, first Wednesday in April. Listed on N. Y. Stock Exchange. Shares \$11½ high, \$¼ low in 1920; compared with \$17 and \$5½ in 1919.

Financial statement for year ended Dec. 31, 1920 showed: income from sale of 126,359 tons of ore, \$517,844; interest, \$23,109; total receipts, \$540,953; total expenditures were \$81,835; surplus for year, \$459,118. Assets include: investments, \$443,750; cash, \$377,742; acc'ts. receivable, \$125,257; liabilities: acc'ts. payable, \$8,669; reserved for depreciation, \$40,000; surplus, \$1,111,576.

An initial dividend of 50c., \$300,000, paid July 30, 1918.

Property: the Emma mine, 13 acres, and other claims totaling 80 acres in the Butte district, 1½ miles from the main properties of the Anaconda company. Mine was originally developed to 800' level, but due to low copper and relatively high zinc content of the ore, was idle for several years. Development resumed by Anaconda Mining Co. by virtue of a 12-year option and lease, dated July 6, 1917. The Anaconda Co. agreed to install equipment and to ~~use~~ water mine to the 800' level. For expenditures actually made by the A. C. M. Co. in developing the Emma mine, the Butte Copper & Zinc Co. agreed to make payment in its capital stock in lots of 10,000 shares or fractional parts thereof, but total payment to the A. C. M. Co. for work and equipment shall in no case exceed 50,000 shares of Butte C. & Z. Co. stock. The A. C. M. Co. has a right to abandon the leased premises if it finds working them impractical, or impossible, in which event all machinery or equipment installed and permanently attached to the Butte property shall belong to that company. Anaconda now owns 217,040 of the 600,000 shares issued.

Development: aggregates several thousand feet from a 1,000' shaft with levels at 200', 400', 500', 800' and 1,000'. The 1,000' level has opened over 300' of ore.

The Emma mine is in the heart of the city of Butte, and as transportation facilities were poor, a crosscut was driven 2,500' south from the 1,800' level of the Gagnon mine of Anaconda to connect with and develop the Emma orebodies. During 1918, rich zinc ore was opened, also considerable rhodochrosite (pink manganese), which was much in demand, and enhanced the value of the mine. The manganese workings are kept open, as the ferromanganese made at Great Falls may eventually be sold as far east as Chicago. Reserves in Dec., 1917, amounted to 383,300 tons of zinc ore and 930,000 tons of manganese ore. The depletion of reserves and their low grade was offset by the ore opened on the 1,000' level which is reported to be one of the best silver-zinc-lead bodies opened by Anaconda on this property.

Production: in 1918 was 32,293 tons of zinc and 71,364 tons of manganese ore. In March, 1919, ore extraction was at rate of 2,000 tons of 15% zinc and 7 oz. silver ore per month. The mine was closed from August to December 1919; the total output for the year was 35,369 tons of zinc ore.

containing 10,027,165 lb. zinc, 4,346,653 lb. lead, and 260,580 oz. silver. During 1920, the mine was worked at full capacity, until January, 1921, when the Anaconda's ferro-manganese plant was shut down.

Polaris mine.

Glen Anderson, mgr., 46 E. Broadway, Butte, Mont.

The company also owns this property, a well known mine, once a good producer, in Beaverhead county, near Polaris P. O. The ores carry silver and copper and the property has a 200-h. p. steam plant. Idle for many years.

BUTTE-CURTIS & MAJORS COPPER MINING CO. MONTANA

Address: Geo. D. Curtis, 35 W. Granite St., Butte, Mont.

Company organized upon a lease and bond to purchase the surface and mineral rights of the Curtis and Majors addition to the city of Butte, the bond price being \$125,000. The company went bankrupt and in 1917 owed about \$700 labor claims. There are no legal assets and having defaulted on bond payment past due, the company has no rights thereunder, save the sentimental courtesy extended by John Curtis and associates, who would like to see the company rehabilitated and refinanced. Idle at last accounts.

BUTTE-DEER LODGE MINING CO. MONTANA

Address: Phoenix Bldg., Butte, Mont.

Officers: W. L. Hugo, pres.; Simon Bank v. p.; J. R. Davenport, sec.-treas., with E. F. O'Flynn and Dr. S. Herman, directors.

Inc. May, 1916, in Montana. Cap. \$300,000; \$1 par; all issued. Annual meeting in June.

Property: 11 claims, 7 patented, 200 acres, 9 miles S. E. of Deer Lodge and 28 miles N. of Butte. Former owners are said to have received over \$2,000,000 in dividends.

Development: a 1,400' incline (35°) shaft follows the ore to the bottom, no crosscuts having been driven. Water, in May, 1919, stood at 600'. Sampling above this level shows 1,000 tons of over \$10 silver-gold ore and dump is said to contain 100,000 tons, that average \$4.10 per ton, with silver at 56 cents an ounce.

Equipment: steam hoist, 1,000 cu. ft. air-compressor, mine pump, and concentrator.

Property has not been operated since 1917, when tests were made to devise suitable treatment. A concentration of dump ore, 12 into 1, gave a product worth \$40 per ton, with silver at 68 cents. A flotation plant and electric power are contemplated.

BUTTE-DETROIT COPPER & ZINC MINING CO. MONTANA

Letters returned in Dec., 1920 (unclaimed from the Dime Bank Bldg., Detroit, Mich.)

Officers: J. F. Austin, pres.; Ellery C. Wright, v. p.; Josiah S. Pishon, treas.; W. G. Burns, sec., Boston, Mass. Directors: Walter Colson, Charles A. Wilcox, Ralph A. Gallagher, Brigadier-General Henry M. Pellatt, James E. Simpson, Willard N. Morrison, Joseph Reriham, mgr., and Montana agt.; Carl J. Trauerman, engr., Butte, Montana.

Inc. March 7, 1916, in Delaware. Cap. \$2,500,000; \$1 par. Transfer agent, Federal Trust Co., Boston, Mass., and United States Corporation Co., New York. Registrars, State Street Trust Co., Boston, Mass., and Equitable Trust Co., New York.

Company owns 51% of the Butte Central Mng. & Mfg. Co. The U. S. Manganese Corp. owns 51% of the shares of Butte-Detroit Copper & Zinc Mng. Co., and has an agreement with shareholders of the latter company to exchange their shares for common stock of the U. S. Manganese Corp. It is probable that U. S. Manganese will eventually own all stock of the Butte-Detroit company.

This is another Davison & Co. promotion, now probably defunct. The above agreement, if carried out, would make Butte Detroit a subsidiary without property or business.

BUTTE-DULUTH MINING CO.**MONTANA****Office:** Chas. M. Everett, receiver, Lewisohn Block, Butte, Mont.**Officers:** A. B. Wolvin, pres.; C. M. Everett, sec.-treas., with Meyer Genzberger, Al Green, John W. Neukom, directors.

The property is under lease to Mines Operating Co., of Butte, controlled by Alfred Frank and associates, for 5 years, and was operated until May, 1921, producing about 250 tons of 1.7% ore daily.

Inc. in Minnesota. Cap. \$2,500,000; shares \$10 par; 200,000 issued, balance held for redemption of \$500,000 bond issue, on which interest is overdue since Dec., 1914 and sinking fund provision not fulfilled. Company went into receiver's hands on friendly suit, March 16, 1915. Receiver's report shows \$42,368 liens ahead of bonds and a floating debt of about \$190,833 unsecured. The prior lien is mostly for labor certificates (\$39,000) issued in half payment of wages in 1914. Bankruptcy proceedings instituted in March, 1915, were set aside by the Federal Court, Sept. 29, 1915.

Property: Brundy group, at the base of the mountains east of Butte, includes the Macarona, Montgomery, and portions of the Altona, Colleen Bawn, and Amazon claims. These claims aggregate 67 acres and are crossed by the Columbia Gardens street car line and adjoin the Pittsmeont mine on the southeast.

The ore thus far mined has come from open-cut work on the hillside back of the mill. This ore is an altered granite stained green and impregnated with silicate of copper with carbonate and oxide of copper in nests and bunches. As mined in the cut it has carried a little over 1.5% copper and with a mechanical loader can, it is said, be put in the mill for 15c a ton.

Development: underground is mainly on the Montgomery claim on which there is a tunnel 1,200' long and a 200' shaft, the latter with extensive workings at 100'. The main ore body on Altona hill, to the east of the street car line, has several tunnels, proving the downward extension of the ore on the property.

Equipment: included a \$725,000 mill, now largely dismantled, which treated the oxidized ore, but was not a commercial success.

The property has merit and aside from its leachable ores has a decided prospective value in the veins at depth of 1,000' below the surface.

In bankruptcy proceedings the former superintendent, Mr. Sherwood, said the mill ran an ore averaging 1.52% copper for 4 months before it was shut down, and that drill cores to a depth of 202' from the bottom of a 23' pit ran 0.98% to 2.70% copper. With acid at \$12.50 per ton, a saving of 38¢ per ton could be made in leaching costs.

Production in February, 1915, was 120,000 lb. electrolytic copper and 30,000 lb. of cement copper. In 1918, the daily output was 175 tons of ore containing 1.75% copper which was sent to the leaching plant of the Anaconda company. A year later the quantity was 250 tons averaging 2%.

The Royalties from a lease to the Mines Operating Co. were expected to pay off all indebtedness and put company on its feet again.

In January, 1921, a consolidation with the Bullwacker was proposed by a committee of Butte-Bullwacker stockholders and Butte Duluth bondholders, who plan a new company, with capitalization of \$2,500,000. par \$10, to be exchanged at par for \$500,000 Butte Duluth bonds, and one share new stock for each 20 shares of Butte Bullwacker stock; 40,000 shares to be sold to net company \$160,000, and 10,000 shares to pay off debts of the old companies.

BUTTE EAST SLOPE MINING CO.**MONTANA****Office:** mail returned in 1920 from 619 Daly Bank Bldg., Butte, Mont.**Officers:** E. P. Lomas, pres. and mgr.; M. F. Lyth, v. p.; C. E. Lomas, sec.-treas.; also directors.

Inc Jan. 28, 1916, in Montana. **Cap.** \$500,000; \$1 par. Annual meeting last Tuesday in January.

Property: 5 claims, 3 patented, 100 acres in Jefferson county, on E. side of range next east of Butte.

Geology: the country rock is granite and the vein formation is of the quartz-pyrite type. Ore carries gold and silver, with copper showing at depth. At 90' in depth vein is 23' wide and assays \$6.10 per ton.

Development: started in 1919, consists of a 185. vertical shaft, which was to be sunk to 500', a crosscut driven at 250', and hoist erected.

BUTTE EXEMPTION COPPER CO.

MONTANA

Officers: James H. Lynch, pres.; John A. Poore, v. p., Butte Mont.; with W. F. Love, M. J. Cavanaugh, T. P. Poore, and J. D. Crossman directors.

Inc. in Maine. Cap. \$2,500,000; \$1 par; \$2,010,000 issued.

Property: consists of undivided $\frac{3}{4}$ interest in the Canyon, Colleen Bawn, Exemption, and the entire interest in Mountain Spur lode claims, approximately 56 acres, situated in the Eastern part of the Butte district, Silver Bow county.

Company has been inactive for a number of years.

BUTTE HERCULES MINING CO.

MONTANA

Address: Geo. de Snell, sec., No. 1 North Montana St., Butte, Mont. Stock listed and quoted at 1c a share on Butte Public Stock Exchange. Is a dormant corporation, fathered by Passmore & Co., of 25 W. Granite St., Butte.

Property: 4 patented claims in the zinc-silver area on the western edge of the Butte district, near Rocker.

BUTTE HILL COPPER MINING CO.

MONTANA

Address: Harry A. Frank, sec., Daly Bank Bldg., Butte, Mont.

Officers: Maurice Eisenberg, pres., 61 Broadway, New York City; J. W. Murphy, v. p., with Duncan MacRae, W. P. Cary, W. H. Hall, Thos. Driscoll and John S. Davies, directors.

Inc. April 18, 1906, in Montana. Cap. \$5,000,000; \$5 par; \$2,950,000 issued. Annual meeting, fourth Saturday in January.

Property: 11 patented claims, 173 acres, in an undeveloped district in granite area, north of Walkerville. Has a 200' shaft, cutting a vein of 40' estimated width, showing stringers and bunches of ore assaying up to 4% copper and 19 oz. silver per ton. Has not been worked for several years and power plant is dismantled. Property is well located, has strong veins, and is much nearer developed ground than it was when operating.

BUTTE-JARDINE METALS MINES CO.

MONTANA

Officers: 50 Broad St., New York City, and 33 W. Granite St., Butte, Mont.

Officers: W. H. Nichols, pres.; M. W. Acklemire, v. p.; L. M. Harley, sec.; D. E. Nichols, treas., with H. W. Barry, directors.

Inc. Jan. 10, 1917, in Montana. Cap. \$250,000; shares 25c par; 600,000 shares issued.

The company was promoted and stock sold by W. H. Nichols & Co., New York.

Property: 11 claims, at Jardine, Park county, said to have over 1,600' of workings exposing gold-bearing veins that vary from 2' to 36' wide, and occur in pre-Cambrian schistose rocks. Property includes the Champion silver mine.

Development: by tunnels and several thousand feet of workings. Work is mainly at the Champion, where an ore shoot over 350' long has been opened. It averages 5' in width and carries 18 oz. silver, and \$1.50 gold per ton. The 600' level revealed a very rich shoot during 1920. Reserves to a depth of 600' are said to equal 3 years supply for the mill.

Equipment: includes electric power, 6-mile transmission line, transformer, compressor, head-frame, hoist, 150-ton flotation mill (completed early in 1921), shops, 60-man bunkhouse, sawmill, and 40 men.

Production: shipments to Anaconda, from June to Sept., 1920, totaled \$16,000. A sample lot yielded 72.6 oz. silver and \$4 gold per ton.

BUTTE-KNICKERBOCKER CO. MONTANA

Address: G. B. Conway, Helena, Mont.

No business done sine 1907, as property reverted to original owners on account of failure to make deferred payments.

BUTTE LODGE EXTENSION MINING CO. MONTANA

Address: care C. J. Kelly, treas., 805 W. Broadway, Butte, Mont.

Officers: Chas. S. Warren, v. p.; John M. Murphy, sec.

Inc. April 28, 1906, in Montana. **Cap.** \$500,000; shares \$1 par.

Property: 4 claims, known as the St. Angus group, 12 miles N. E. of Butte, has a 150' shaft with a crosscut showing 2 veins. Idle at last accounts.

BUTTE MAIN RANGE COPPER MINING CO. MONTANA

See Tuolumne Copper Co., which controls and operates the Butte Main Range property.

BUTTE METALS MINING CO. MONTANA

Address: Room 811.25 Broad St., New York City.

Inc. 1919, in Montana. Is controlled by Hayden, Stone & Co.

Property: claims in S. E. part of Butte, S. of the Davis-Daly mine. The 200 acres include the Otisco, Mary Louise, Syndicate, Railroad, Curtis & Major, and Alliance. In the Otisco workings 4' of ore was found on one wall of the vein and 6' on the other at 200' depth.

During 1920, Butte and Superior Mng. Co. arranged to develop the Mary Louise and Otisco claims, receiving stock in payment; and a shaft was sunk on the former. Results were unfavorable, lease on the Otisco was abandoned, and all work was suspended in July, 1920. Idle in 1921.

BUTTE-MILWAUKEE COPPER CO. MONTANA

Assets sold 1914 to Butte-New York Mng. Co. a Butte and Superior subsidiary, for \$500,000. Shareholders were obliged to exchange their stock at the rate $2\frac{1}{2}$ old for 1 new share, or 30c cash per share. Company paid a liquidating dividend of \$0.3278 per share in July, 1914, and is in course of dissolution. Fully described under Butte-New York Mining Co.

BUTTE MINE EXPLORATION CO. MONTANA

Officers: Clinton C. Clark, pres., 408 West Granite St., Butte, Mont.; C. P. Connolly, sec., at last accounts. **Inc.** 1901. **Cap.** \$250,000; shares \$1 par.

Is no relation to the company of same title formerly holding the Six O'Clock property, in Butte, or to the Butte Mines Exploration Co., formerly having property at Tecoma, Box Elder Co., Utah.

Property: the Pacific quartz lode claim, on which considerable work was done, 1901-02. Company practically defunct, but property was reported under option to the North Butte Mining Co.

BUTTE-MINNESOTA MINING CO. MONTANA

Officers: Peter E. Peterson, pres.; Angus McLeod, Butte, Mont.; William Vuoti, J. E. Portham, A. W. Havela, John Kukko, Emmanuel Autio, John Lampi, Ade Herranen, directors.

Inc. June, 1912. **Cap.** \$750,000; shares \$1 par.

Property: 6 claims, about 1 mile south of Rocker, at the western end of the Butte district. Ground shows well-defined veins, 1 of which is traceable for 3,000' across the surface. Country rock is granite, and part of the same mass as that in which the Butte deposits occur.

Development: 400' tunnel on the vein and an incline shaft 35' deep sunk on the vein disclosing well-defined walls, 6' apart, from which ore has been taken carrying 0.5% copper, 8% lead, 12 oz. silver, and \$28 gold, per ton. The property is equipped with a gallows frame, boilers and hoist.

Late in June, 1913, the company bought a group of mining claims in the Wolf Creek district, 40 miles east of Helena, Mont. Reports stated that development on these claims shows more than 100,000 tons of ore assaying

4 to 25% copper blocked out. A mill was to be built, but company has not reported any recent work.

BUTTE MONITOR TUNNEL MINING CO. MONTANA

Address: care C. J. Kelly, Daly Bank & Trust Co., Butte, Mont. Described in Volume XIII.

Reported 1919 that mine was purchased by **North Butte Mining Co.**, which see.

BUTTE-NEW ENGLAND MINING CO. MONTANA

Property: a fractional claim in the Davis-Daly tract at Butte. In May, 1919, development was under way on the 150' level, where good silver-copper ore was being opened, but work was suspended in August, possibly because the Davis-Daly might claim apex rights.

BUTTE-NEW YORK COPPER CO. MONTANA

Subsidiary of the **Butte and Superior Mng Co.**, which see.

BUTTE RAMSDELL COPPER MINING CO. MONTANA

Office: Room 22 Hirbour Bldg., Butte, Mont.

Officers: Henry Meloy, pres.; J. D. Pope, v. p.; J. A. Henshaw, sec.-treas.; Hugh Smith, supt.

Inc. Sept. 17, 1917, in Montana. **Cap.** \$300,000; \$5 par.

Property: 64 acres owned and 25 acres leased from Davis-Daly in southeastern part of Butte district. Ore carries gold, silver, copper, and zinc.

Development: by 300' shaft. New work in 1919 amounted to 1,240'.

Production: in 1918, averaged over 30 tons of ore daily. This ore carried from 1½ to 7% copper and 5 to 8 oz. silver per ton. In September, 1919, the daily output was a car of 10% ore.

During 1920, the Davis-Daly company arranged to mine the 6' of 20% ore revealed at a depth of 2,500' in the Ramsdell claims, on a profit-sharing basis.

BUTTE STANDARD COPPER MINING CO. MONTANA

Address: care H. G. Klenze, Box 377, Butte, Mont.

Officers: H. G. Klenze, pres.; A. M. Stephens, v. p.; J. W. MacLane, sec., Butte, Mont., with J. L. Templeman and H. H. Griffith, directors.

Inc. in Montana. **Cap.** \$1,000,000; shares \$1 par; 350,000 shares in treasury. Stock being offered at 12½c, August, 1917.

Property: 2 claims in the northern outlying section of the Butte camp and 2 patented claims at Amazon, Jefferson county, Mont., both partly developed and said to carry commercial orebodies. Selling stock in 1917. No news since.

BUTTE-SUMMIT COPPER CO. MONTANA

Presumably idle, as mail was returned in 1920 from 818 Hornet St., and Excelsior Ave., Butte, Mont.

Officers: Ed. A. Blomgren, Geo. P. Arnold and Wm. H. Smith, all of Lewistown, Mont., directors, at last accounts.

Inc. April, 1916, in Montana. **Cap.** \$3,000,000; shares \$10 par.

Property: the Hornet claim on the Yellow Jacket vein and a second vein 180' to the south.

Development: by 200' shaft, with levels at 100' and 200'. Oreshoot on 100' level. Yellow Jacket 13½' wide with 4' of ore assaying high in lead and silver, with over 20% zinc. On the 200' level 7' of commercial ore was opened on the downward extension of shoot cut on 100' level.

BUTTE VIPOND GOLD MINING & MILLING CO. MONTANA

Office: 91 Owsley Bldg., Butte, Mont.

Officers: Jas. M. Hinkle, pres.; Wm. Worth, v. p.; Wm. E. Carroll, sec.; T. P. Manley, treas.; also directors.

Inc. May 14, 1910, in Montana. **Cap.** \$600,000; \$1 par; all issued. Annual meeting, third Tuesday in May.

Property: 5 claims, unpatented, at Vipond Park, Beaverhead county, 16 miles N. E. of Melrose. Carries a fissure vein, 4 to 8' wide in granite, ore

containing gold and copper of an average value of \$18 per ton. Ore is oxidized to 200', changing to sulphide below that depth.

Development: 200' vertical shaft and 940' tunnel.

Equipment: includes boiler and pump. Little work has been done on mine for some time.

BUTTE & WESTERN MINING CO.

MONTANA

Address: Jens, Powell Co., Mont.

Property: 13 claims, 8 miles S. of Jens, on the N. P. Ry. The Forest Rose claims show 12' of ore carrying silver, lead, and copper.

Development: by 180' shaft and 450' tunnel. Work was underway early in 1921.

CABINET RANGE MINING CORPORATION

MONTANA

Address: S. A. Whiting, Libby, Mont. J. C. Langley, pres., Seattle, Wash.

Property: 9 claims, 40 miles S. of Libby, Lincoln county, between Bramble and West Fisher creeks. A stamp mill of 100-ton capacity to be erected.

CABLE CONSOLIDATED MINING CO.

MONTANA

Office: 52 Silver Bow Blk., Butte. Mont. **Mine office:** Cable, Deer Lodge county, Mont.

Officers: I. M. Fickeisen, H. Terheyden and S. Robinson, directors, Pittsburgh, Pa.

Property: 700 acres, 15 miles west of Anaconda, includes the Cable gold mine, in vicinity of the Southern Cross mine. Worked with varying success since 1870. Mine has produced about \$4,000,000 worth of ore, with value mainly as gold, but has auriferous copper ore on the tunnel level.

Equipment: includes steam power, air-compressor and a 30-stamp mill. A reorganization as Cable Mining Corp'n was planned, at last accounts.

CALAMONT COPPER CO.

MONTANA

Mine office: Norris, Madison county, Mont.

Officers: Walter V. Harrington, pres.; Wm. F. Davis, v. p.; Mark E. Davis, managing director; Hugh J. Leonard, sec.; Thos. F. Hogan, treas.; preceding officers, Jas. Keller and F. G. Crist, directors.

Inc. Nov. 1909, in Arizona. **Cap.** \$5,000,000; shares \$10 par; non-assessable. Apparently is connected in management with the Montana-Hecla Mining Co.

Property: 22 claims, 380 acres, include the Old Colony group, adjoining the Montana-Hecla, 5 miles southeast of Norris, carrying auriferous and argenteriferous copper ore.

Development: includes several shallow shafts, with an old 100' 2-compartment shaft on the Big Jack claim, and a 160' tunnel, with about 900' of workings. Not regarded favorably by the late H. J. Stevens. A report on the property made by Reeves Davis, 1911, recommended development of 2 surface outcrops. Mark Davis, former manager, reported to be protecting the property with a view to re-financing the company, at last accounts.

CAPE NOME COPPER MINING CO.

MONTANA

Office: 1 Dixon Bldg., Missoula, Mont. **Mine office:** Clinton, Mont.

Officers: Edw. Donlan, pres.; F. H. Woody, v. p.; H. T. Wilkinson, sec.-treas.-gen. mgr.; with A. L. Coffey, directors.

Inc. Nov., 1906, in Montana. **Cap.** \$1,000,000; shares \$1 par; issued. 924,000. Annual meeting, first Monday in June.

Property: 3 claims, patented, 40 acres, adjoining the Aladdin Mining Co., show 4 fissure veins in granite 1 of 8' average width, traceable 800', being opened by 500' double compartment, vertical shaft, and 4 crosscut and 5 drift tunnels, with 3,750' of workings.

Equipment: includes two 60-h. p. boilers, a 40-h. p. hoist and a 12-drill air-compressor. There are 6 buildings.

The mine considered promising though idle for several years. Efforts were being made in 1919 to resume operations, but evidently without success.

CARBON HILL MINING & MILLING CO. MONTANA

F. S. Earnest, Spokane, Wash., chief owner.

Property: 9 claims, in the Grass Valley section, 1 mile north and west of Fort Harrison, Helena, shows a vein for 2,300'.

Development: by 250' incline shaft, to be sunk to 400' at last accounts, showing 5½' of carbonate ore and galena, said to assay \$48 per ton. Value is chiefly in the gold content. A 15' shaft with 20' drift, shows a 9' vein of carbonate ore said to assay from \$23 to \$111 per ton. Has a 60-h. p. gas-line hoist.

Two carload shipments yielded \$23 and \$11 per ton respectively.

CASCADE CONSOLIDATED SILVER MINES CO. MONTANA

Address: William Creden, 1st Natl. Bank Bldg., Butte, Mont.

Company has a lease until Oct., 1923, on the property of the **Cascade Silver M. & M. Co.**, which see for description.

CASCADE SILVER MINES & MILLS MONTANA

Address: H. G. Palsgrove, mgr., Neihart, Mont.

Officers: G. Hale Brabrook, pres.; Lowndes Maury, v. p.; W. R. McLure, sec.; W. P. Wren, treas., with J. C. Fairchild, W. L. Creden, and Paul A. Gow, directors.

Inc. Jan., 1918, in Montana. Cap. \$1,000,000; \$1 par; 800,000 issued. Annual meeting in January. Cash on hand, April 1, 1919, \$53,318. A note issue of \$100,000, bearing 8% was offered in Aug. 1920. Profits were about \$40,000 monthly during the operating period of 1920.

Property: 10 patented claims, include the old Moulton mine, the Broadwater group, the Rochester mine, and the Empire claims, at Neihart, Mont. Examined by W. L. Creden and Paul A. Gow. Mining geology of district described by W. H. Weed, in U. S. Geological Survey report on Little Belt Mountains.

Geology: ores occur in fissure veins in gneiss; the veins are 3 to 8' wide, dipping 78° and run N. 18° E. Shoots are from 150 to 200' long. Ore is a complex sulphide, but easily milled, carrying 20 oz. silver, 5% lead, and 3% zinc.

Development: by 600' vertical shaft (to be sunk to 1,500'), and 3,000' tunnel, opening the Moulton to depth of 600 and Broadwater to 1,200. Underground workings total 15,000'. The Moulton was unwatered by April, 1919, and large bodies of milling ore and considerable smelting ore exposed, the latter returning from \$1,500 to \$2,500 per carload. Ore is mined by back filling system. Reserves comprise 100,000 tons blocked out and 300,000 tons probable ore. During 1920, the 300, 400, 500, and 600' levels revealed considerable ore. The Broadwater tunnel was cleaned out and exploration started in May, 1919. In 1920 the 700' level opened 10' of 150 oz. ore, and the 1,300' level, 10' of 60 oz. ore.

Equipment: 350-h. p. steam hoist, boilers, 1,000 cu. ft. compressor, 200-gal. electric pump, 2 aerial trams, and 200-ton mill with a 5-cell Minerals Separation flotation plant, started February, 1919.

Production: from May 1 to Dec. 31, 1918, 174 oz. gold, 108,629 oz. silver, and 470,000 lb. lead. Ore averaged 75 oz. silver per ton. According to W. L. Creden, there is a large tonnage of ore above the 500' level.

In June, 1919, a suit was started by Paul A. Gow against the other directors to compel them to return the 150,000 shares illegally voted themselves for alleged services.

In Sept., 1920, the State Attorney-General petitioned for an injunction, restraining company from dumping tailings in Belt creek; but this was denied, and the company was awarded costs.

In October the property was leased to the **Cascade Cons. Silver Mines Co.** for 3 years.

In 1920 the mill was operated to June 1, started again Oct. 1, but shut down by injunction proceedings for a month and finally shut down in December. An average monthly yield of \$50,000 was maintained while operating.

On October 17th, 1921, a meeting of the stockholders was held for the purpose of increasing the capitalization from 1,000,000 shares to 3,000,000 shares and for the further purpose of issuing to the Cascade Consolidated Company 250,000 shares for the release of their lease on the property and for the further purpose of issuing 800,000 shares in payment for the right to use the Schwartz Zinc Oxide process in Cascade County, Montana. Following this meeting a suit was instituted to prevent the carrying out of this program and the hearing set for January 16, 1922.

CASTLETON COPPER CO.**MONTANA**

Company probably dissolved as property was sold in 1917 for \$150,215 to Furnace Creek Oxide Copper Co. See Vol. XIII for description of Castleton Copper Co.

CAYUGA DEVELOPMENT CO.**MONTANA**

Office: 616 Lyceum Bldg., Duluth, Minn. **Mine office:** Divide, Silver Bow county, Mont.

Officers: C. T. Fitzsimmons, pres.; Nels Anderson, v. p.; E. J. O'Rourke, sec.; Max P. Shapiro, treas.; John Helehan, gen. mgr.; preceding officers, Jacob Stein and Jas. L. Norman, directors.

Inc. April 4, 1910, in Minnesota. **Cap.** \$150,000; \$1 par; issued, 65,000.

Property: 4 claims, 80 acres, in the Fleecer district, 15 miles southwest of Butte, near the Oregon Short Line railway.

Geology: property shows granite with dikes of porphyry, aplite and quartzite, carrying veins with a generally E. W. strike, main vein being estimated to range 50 to 125' in width, traceable for 2,000', carrying cuprite melaconite, malachite, azurite, chrysocolla, chalcopyrite, chalcocite and bornite.

Development: by 100' tunnel, and shafts of 45', 125' and 150', showing ore assaying up to 30% copper, and from a trace to 70 oz. silver per ton. The 125' shaft has crosscuts of 150' and 180', cutting the vein for an apparent width of 30'. The vein at this depth is nearly vertical. Idle, and no work reported done for many years.

CHAMPION MINING CO.**MONTANA**

Office: 313 Missouri Ave., Deer Lodge, Mont.

Officers: Tom McTague, pres.; Dr. H. A. Maillet, v. p.; Miles Blunt, sec.-treas.

An assessment of 10c. a share was levied in July, 1920, and over 80,000 delinquent shares were sold at about 25c. each. Another assessment was levied in September.

There is evidently some connection between the Champion and Butte-Jardine company, as the latter is operating the Champion mine, and exchanged Butte-Jardine stock for the old Champion stock at the rate of seven shares of Champion for one of Butte-Jardine.

Property: the old Champion silver mine, idle for many years until 1920, 16 miles S. E. of Deer Lodge, Powell county, and 6 miles from rail at Race Track.

Development: by 700' tunnel, with 1,600' of workings, and 800' shaft, which are to be connected. Some rich ore has been opened on the 600' level, and shipments up to 130 tons weekly made late in 1920.

Equipment: includes water power, head-frame, hoist, compressor, and 150-ton stamp-mill.

CHICAGO & ALTA EXTENSION MINING CO.**MONTANA**

Office: H. P. Skiles, pres.; 22 N. State St., Chicago, Ill. F. I. Foote, mgr., Helena, Mont., and Corbin, Mont.

Officers: Dr. H. P. Skiles, pres.; H. H. Ebert, sec., Helena, Mont.; Sheldon Leavitt, treas.; with F. I. Foote, J. E. Smith, E. F. Rinear and Arthur Dole, directors.

Inc. Oct., 1907, in Montana. **Cap.** \$600,000; \$1 par; \$10,000 in treasury.

Property: 2 claims, 36 acres, at Corbin, Jefferson county, adjoining the Boston & Corbin Mng. Co. property on the E. shows fissure veins in

granite. The veins are from 1' to 10' thick, averaging about 4', and carry lenticular shoots of copper, silver and lead ore, reported to assay \$48 per ton, as shipped.

Development: by 900' shaft with crosscuts and drifts cutting 4 ledges on 900' level. Also has a 1,200' tunnel. Underground workings total 2,000'.

Equipment: 30-h. p. electric hoist and compressor.

All work was done through the Boston & Corbin shaft, crosscutting the entire claim and reported to have cut 5 veins. Ore was milled in the B. & C. concentrator, until it was burned down.

CLARK MONTANA REALTY CO.

MONTANA

Address: 20 Exchange Place, New York City.

Is a close corporation, controlled by Hon. W. A. Clark, as a holding company for the Ophir mine, Utah; ½ interest in the Elm Orlu mine, Butte; ½ interest in the Timber Butte Milling Co., Butte, Mont.; Sunset mine, Wallace, Idaho, and in general all the Clark properties in the northwestern States. For litigation with Butte and Superior, see description of that company and Elm Orlu.

COEUR D'ALENE PACIFIC MINES CO.

MONTANA

Defunct several years. See Vol. XIII of this book.

COLUSA-LEONARD EXTENSION COPPER CO.

MONTANA

Is a subsidiary of the Tuolumme Copper Mining Co.

Officers: W. W. McDowell, pres., 804 W. Park St., Butte, Mont.; Guy Stapleton, v. p.; Meyer Genzberger, treas.; W. E. Reynolds, sec.; with J. Kaufman, directors.

Inc. Oct. 1, 1906, in Arizona. **Cap.** \$5,000,000; shares \$5 par.

Property: 5 claims, patented, 42 acres, consisting of the Maggie placer, Golden Hematite, Little MacQueen, Undine and Snow Bird placer, about a mile east of the Colusa and Leonard mines, and near the Pittsmtont shafts of the East Butte Copper Co.

Development: by 800 three-compartment shaft on the Little MacQueen claim lying about the center of the group, that has cut several small stringers of ore assaying up to 9% copper, but none of commercial size. There is also a 7' vein of 2% ore carrying 14" paystreak said to range 8 to 10% in copper tenor, with small values in gold and silver also some lead and zinc.

Property reopened August, 1916, by the Tuolumme C. M. Co. under an agreement whereby the T. C. M. Co. acquires a 51% interest in the C. L. property for sinking shaft from 800' to 1,600' and driving crosscuts on the latter level to the N. and S. boundaries of the group.

See *Tuolumme Copper Mining*, p. 1120.

COLUSA-PARROT MINING & SMELTING CO.

MONTANA

Office: Box 1683, Butte, Mont.

Officers: Hon. Wm. A. Clark, pres.; Wm. C. Siderfin, v. p.; W. C. Messias, sec.; Alex. J. Johnston, treas.

Inc. Nov. 26, 1897, in Washington. **Cap.** \$500,000; shares \$50 par.

Company is practically out of business, its only present property being lands, platted as an addition to the city of Butte. Has an asset of considerable value in a million-ton tailing dump at the Butte Reduction Works, which is being treated.

COMET MINING CO.

MONTANA

Office: Coeur d'Alene, Idaho. **Mine:** near Whitefish, Flathead county, Mont.

Officers: Dr. Max. A. Dorland, pres.; Fred Eppinger, v. p.; J. H. Wiggert, sec.; at last accounts.

Inc. 1909. **Cap.** 1,000,000 shares.

Mine is developed by a short tunnel, but is presumably idle.

CONDA MINING CO.

MONTANA

Company formerly operated the Jack Rabbit mine in the Argenta district of Beaverhead County.

CONREY-PLACER MINING CO.**MONTANA**

Address: G. H. Edmunds, business mgr., Ruby, Mont. O. O. Sweeney, Ruby, Mont., dredge superintendent.

Officers: C. F. Adams, 50 State St., Boston, Mass., pres.; F. F. Stanley, 79 Milk St., Boston, secretary-treasurer.

Inc. in 1898.

Property: extensive placer claims in the Alder Gulch district, Madison county, Mont.; about 80 miles by rail from Butte. Described in detail in Bull. 121 of U. S. Bureau of Mines, 1916.

Equipment: up to 1916 has cost \$1,200,000, advanced largely by the late Gordon MacKay and a few shareholders. There are 4 electric dredges, though since 1918 only 2 have been in operation. A few details of the electric dredges are of interest.

	No. 1	No. 2	No. 3	No. 4
Year built.....	1908	1908	1906	1911
Monthly returns, cubic yards.....	96,270	62,709	82,415	300,000
Power consumed, h. p.....	380	380	460	1,235
Depth of digging below water, feet..	30	35	45	55
Capacity of buckets, cubic ft.....	7½	7½	9½	16 to 17
Gold-saving area, square ft.....	1,231	1,231	1,264	3,000
Cost of boat.....	\$108,000	\$128,000	\$198,999	\$296,000

No. 4 boat has dug as much as 411,000 yards in a month. It weighs 2,000 tons.

Power is supplied by the Madison River power plant, 26 miles away. Over \$50,000 has been spent on a machine-shop, and over \$60,000 of spares and supplies are kept on hand. On the dredges 36 men have been employed; and 49 in other departments.

Production: from 1899 to 1916 a total of 37,000,000 yards had been dug, yielding 16c per yard, or \$5,920,000. From 1906 to July 31, 1915, the quantity moved was 31,379,890 yards, at a total cost of 6.96c. per yard. In 1918, 3,350,000 cu yds. were handled and in 1919, 4,282,349 cu. yds. of gravel.

This has been one of the most profitable dredging enterprises in America, but will soon be worked out. Many dredge improvements, now generally in use, have been devised by the Conrey Company. By the will of Gordon MacKay, Harvard University benefits largely from the profits made at Alder Gulch.

CONSOLIDATED CENTRAL BUTTE COPPER CO.**MONTANA**

Office: care R. M. Cobban, sec., Butte, Mont.

Officers: R. R. Jones, pres.; R. H. Wearing, v. p.; D. J. Charles, treas., and E. E. Hershey, directors

Inc. Oct. 29, 1906, in Montana. Cap. \$1,200,000; shares \$1 par; assessable; issued 446,000 shares. At last report had levied 3 assessments, aggregating 6¼ cts. per share, or about \$28,000. Annual meeting, second Thursday in January.

Property: a third interest in the North Star, South Star and January claims, patented, and mineral and mining rights on 110 acres of patented placer claims. The claims are developed by a 225' shaft, said to show an orebody 3 to 6' wide. Idle several years for want of working capital.

CONSOLIDATED SILVER-LEAD MINING CO.**MONTANA**

Address: 310 Hyde Bldg., Spokane, Wash.

A consolidation of Troy Mining Co., J. P. Lead Co. and Silver Tip M. Co.

Property: 26 claims on Grouse mountain, Lincoln county, 14 miles S. of Troy on the G. N. R. R. Developed by 2,400' of tunnelling, said to have opened up a 6' vein of ore containing silver, lead and zinc.

COOKE MINING & REDUCTION CO. MONTANA

Defunct. See Volume. XIV.

COPPER AGE & EDISON MINING CO. MONTANA

Idle. **Officers:** Chas. J. Heidenreich, Spokane, Wash., pres.; Morton Webster, Wallace, Idaho, sec.-treas.; L. N. Hyde, supt.

Inc. 1906, in Washington. **Cap.** \$250,000. Last assessment of 2½ mills per share, payable Feb. 1, 1921.

Property: 12 claims, 4 miles south of Saltese, is an eastern extension of the Richmond mines, carrying extension of copper-bearing outcrop of that mine, the vein paralleling the Monitor. The vein is exposed for 700' in the tunnel just east of the divide; it averages 10' thick, is nearly vertical and carries a very little chalcopryrite and chalcocite in a siderite gangue.

Development: includes a main 1,160' crosscut tunnel with back of 600' showing sulphide ore assaying up to 30% copper, and \$14 gold per ton. No work has been done since 1916, but company contemplated resuming operations at last report.

COPPER EAGLE MINING & SMELTING CO. MONTANA

Dead. Formerly owned Eagle lode claim, sold to satisfy creditors. Directors resigned.

COPPER HILL MINING CO., LTD. MONTANA

Office: Wallace, Idaho.

Officers: Morton Webster, pres.; A. T. Ryan, v. p.; P. L. Eberhardt, sec.-treas.; preceding, with Howard K. Welch and Jas. Howarth, directors.

Inc. March, 1908, in Montana. **Cap.** \$250,000; shares 25c par; non-assessable.

Property: 7 claims, 125 acres, in the Sunrise district near Quartz, Missoula county on the Montana side of the Montana-Idaho divide, showing an altered zone of highly siliceous rocks of 25' to 50' width, carrying fine disseminations of copper carbonates and sulphides. Mine has a 75' tunnel, showing ore said to be somewhat similar to that of the Snowstorm, and assaying about 4% copper.

Idle at last accounts.

COPPER KING MINING CO. MONTANA

Address: Cooke City, Park county.

Property: the King and Queen group, developed by tunnels, showing an extensive orebody, with fair value in gold. No recent data available.

COPPER MOUNTAIN MINING & DEVELOPMENT CO. MONTANA

Office: Mullan, Idaho.

Officers: John Hendricksen, pres.; A. B. Willard, v. p.; D. Flynn and John Foss, directors.

Inc. 1906, in Idaho. **Cap.** \$1,500,000; shares \$1 par. Annual meeting, 2nd Tuesday in December.

Property: 5 claims, one fractional, 95 acres, with 3 adjoining claims, at the head of Copper creek, near Thompson, Sanders county, Mont. Mine has 2 tunnels, the upper a crosscut, deflected for 56' along the vein, said to be 25' wide, carrying pockets and seams of copper carbonates, with gold and silver. Idle at last account.

COPPERSMITH MINING & MILLING CO. MONTANA

Address: Lothrop, Mont.

Inc. Jan. 23, 1909, in Idaho. **Cap.** \$3,000,000; \$1 par; issued, 2,200,000.

Property: 8 claims unpatented, 160 acres, the Coppersmith group of 6 claims and the Inverness group of 2 claims, also a water right and millsite, about 6 miles up Petty Creek from Lothrop. Property carries some good timber. The Coppersmith claim shows limestone and quartzite for an estimated width of about 400', and length of about ½ mile, with outcrops yielding 3 to 20% copper ore.

Development: by prospect shaft and crosscut tunnel, said by management to cut merely 300' of silicified limestone averaging 1% copper. Property has a number of open cuts and pits, and a 50' shaft, bottomed in

ore estimated to average better than 6% copper, with small gold and silver values. The Coppersmith was formerly reported to show 3 main veins, one reported to be over 100' wide at surface with ore assaying 2 to 3% copper. The Exty vein, parallel with and 500' from the Coppersmith, is reported as 15' wide.

The Inverness group, 3 miles from Lothrop, has a vein of 3' to 4' wide, in quartzite and slate, carrying malachite, chalcopryrite and chalcocite, giving assays of 15 to 17% copper, and \$10 to \$12 per ton in combined gold and silver values. Property has 4 buildings.

Idle except for annual assessment work.

CORBIN COPPER CO.

MONTANA

Office: 60 Congress St., Boston, Mass. **Mine office:** Butte, Mont.

Officers: R. M. Edwards, pres. and gen. mgr.; Henry Tolman, treas., Newton, Mass.; with S. L. Powers, Jos. C. Walker and T. S. Woods, directors; A. L. Wyman, sec.

Inc. Dec. 24, 1908, in Michigan. **Cap.** \$3,750,000; shares \$25 par; assessable; amount issued, 130,000 shares; amount outstanding, 26,000 shares; amount in treasury, 124,000 shares; \$8 per share paid in. Company sold 15,000 shares of treasury stock, early 1910, at \$10. Federal Trust Co., Boston, registrar; American Trust Co., Boston, transfer agt. Stock is listed on the Boston Curb. Annual meeting third Tuesday in April.

Three assessments levied: \$65,000 due February 11, \$65,000 due April 22, \$130,000 due November 14, 1913. Poor response was made to these and the company was forced to borrow \$95,000 on its notes, giving, as guarantee, the unpaid assessments. Owing to lack of funds all work was stopped on Corbin property early in 1914.

Annual report for 1920 shows receipts of \$848 and expenses of \$909. Assets include cash and accounts receivable of \$6,189. Plant and improvements, \$88,517. Delinquent stock purchased, \$107,271. Liabilities include \$76,857 notes payable and \$9,767 accounts payable. Total amount of money actually paid in is given as \$486,010.

Statement filed in May, 1919, with County Clerk at Butte showed property and other assets of \$672,665, and liabilities of \$86,596, all unsecured.

Property: company owns 57 mining claims, 45 patented, near Corbin, in Jefferson county. The 3 claims at Butte were sold to the Anaconda company.

The Corbin group lies at the head of Clancy Creek, a few miles west of Corbin, on the Western side of an andesite hill across from the Boston & Corbin mine. This property carries several strong fissure veins in andesite on which considerable exploration work has been done with disappointing results. A vein opened for 800' in the Rosalie tunnel carries up to 20 oz. silver and 7% copper, but is only 18" wide.

The Montana tunnel sows a pyritized conglomerate with andesite, dacite and aplite cobbles, the matrix containing small silver values in the upper tunnel, while the winze in the lower tunnel shows considerable pyrite. The Bonanza tunnel is driven on a tourmalinized granite dike in andesite, and in places the tourmaline rock carries galena and chalcopryrite with small amounts of zinc-blende and pyrite.

CORBIN-COPPER KING MINING CO.

MONTANA

See Silver Butte Mines Corporation. Fully described in Vol. XIV.

CORBIN METAL MINING CO.

MONTANA

Office: Pittston, Pa. **Mine office:** Corbin, Jefferson county, Mont.

Officers: J. H. Foye, pres.; John Hoy, v. p.; Thos. McLaughlin, sec.; M. W. O'Boyle, treas.; at last accounts.

Inc. 1907, in Montana, as Corbin-Montana Copper Co., changing name, Jan., 1910, to present title. **Cap.** \$1,000,000; \$1 par; issued, 400,000. Company apparently is a twin of the Jefferson-Montana Copper Mines Co. Annual meeting, second Tuesday in April.

Property: 11 claims, 176 acres, known formerly as the Baldwin mine.

2 miles S. E. of Corbin, in the Colorado district, shows 5 fissure veins ranging from a few inches to about 8' in width, cutting granite. Ores carry chalcopyrite, bornite and galena, estimated by company to average 4% copper, 8% lead, 5 oz. silver, and \$2 gold per ton.

Development: by 500' 2-compartment incline shaft with considerable drifting on 500' level, cutting a small orebody carrying lead-zinc-copper sulphides, and by several short tunnels.

Equipment: includes electric hoist, good for 1,000' depth, and a 10-drill air compressor. There are 6 buildings, including carpenter shop, smithy and change house.

Idle several years.

CORBIN-VALPARAISO COPPER MINING CO. MONTANA

Presumably defunct. See Vol. VI, Copper Handbook.

CRUSE CONSOLIDATED MINING CO. MONTANA

Property transferred to **Thomas Cruse M. & D. Co.**, which sec.

COTTER GROUP, THE MONTANA

Property: 10 claims, 200 acres, 6 miles E. of Butte, in Jefferson county, and 4 miles from the G. N. and N. P. Rys. by good wagon-road, said to contain quartz veins in granite, from 3 to 50' wide, and to show some gold and a little copper. The gold vein on the Banker claim is said to have been traced for 3,000', carrying from \$3 to \$40 per ton. A number of shafts, 10 to 60' deep, were sunk.

CRYSTAL COPPER CO. MONTANA

Office: 79 Milk St., Boston, Mass. **Goldsmith mine address:** P. O. Box 375, Butte, Mont. **Crystal mine address:** A. C. Ray, mgr., Basin, Mont.

Officers: Bowdoin S. Parker, pres.-treas.; George W. Clement, v. p.; Eugene H. Walker, sec., with Edward P. Barry, J. A. Frohock, James Holland, M. W. Alderson and Joseph Ellis, directors.

Inc. April 6, 1916, in Maine. **Cap.** \$3,000,000; \$5 par. Capital increased Feb., 1920, from \$2,000,000; \$5 par; it was originally \$1,500,000 and \$1,000,000; \$1 par. Federal Trust Co., Boston, transfer agent; Hanover Trust Co., Boston, registrar. Listed on New York and Boston curbs. Annual meeting, April first.

Financial statement for 1919 showed total receipts of \$119,146, of which \$48,245 was from ore sales. Expenses were \$117,614, leaving a balance of \$1,762.

Total receipts from Goldsmith ore shipped Jan. 1, 1920 to Nov. 10, 1921, \$269,815.15. Royalty, applying on purchase price for same period, \$82,441.28. Development work in that period cost \$45,000 and \$4,500 on railroad spur and orebins. In addition to above receipts the Crystal mine returned \$7,953 net to company besides a payment of \$6,300 royalty, that applies on balance due on purchase price of the Crystal (\$14,253).

Properties: the Crystal mine at Basin, the Goldsmith mine at Butte, and the Penobscot mine at Marysville, Mont.

The **Goldsmith** mine, 17½ acres, at Butte has been held under bond and lease since Nov., 1917. The rich silver bearing ores occur in fissure veins in granite, the main vein being the western split of the Rainbow lode. The main shaft, when only 367' deep, developed 3 veins from which about \$1,500,000 worth of silver ore was produced by former owners.

The Anaconda company owns ground adjoining the Goldsmith. Its Alice mine, the richest silver mine of that company, is only 1,500' distant, while W. A. Clark's Moulton mine, reputed to have produced over \$6,000,000, is but 400' away.

On acquiring the Goldsmith mine, company opened and retimbered the old Tong shaft, sinking it to the 700' level. Crosscuts on the 500' level intersect both the northern and southern veins, from which the company has been mining and shipping silver ore since 1918. Crosscuts driven in 1919 on the 600' level opened shipping ore, 2' of it very high grade. Between the 600' and 700' levels there is said to be ore enough for over a year's opera-

Equipment: the mine has up-to-date machinery and appliances, including a 150 h. p. electric compressor, a 100 h. p. electric hoist, good for a shaft of 1,000' depth.

Sixty men are employed. Over \$400,000 has been spent on the property.

Production: of the Goldsmith mine from Jan. 1, 1920 to Oct. 31, 1921, was 12,797 tons. Gross value of ore shipped during this period and up to Nov. 1, 1921, was \$269,815. Net smelter returns received for shipments from Oct. 29, 1921 to Jan. 5, 1922, of 13 cars, about 650 tons, yielded \$33,250.

(2) The **Crystal mine** is about 8 miles N. of Basin, Jefferson county. The company owns an undivided half interest in the Commerce and Crystal; one-half and one-sixth of the St. Lawrence and Jack Fraction and all of the Mammoth claim, total of about 84.39 acres, in the Cataract district. The output is mostly copper ore, but a silver-lead ore has also been developed, and shipments made.

Up to 1920, the gross value of copper ore mined and sold since the Crystal company took over the mine is \$70,000, and of the silver ore, \$25,000, a total of \$122,000.

Development: all work done so far has been devoted to mine development. The upper tunnel has been extended to 1,334., carrying it within 50' of the Jack claim. There is over 3,000' of unexplored vein to be opened by extending the tunnel farther W., the known orebodies on the St. Lawrence claim being over 1,000' further west. The Lower or Mammoth tunnel, 200' below the first is 1,500' long, driven through granite until it cuts the Crystal vein about 900' from the portal, running on it for 300' or more. The Mammoth claim dominates the other claims, as the only outlet of the lower tunnel is through the Mammoth.

The copper ore extracted thus far has been of fair average grade for shipping, but there is also in the mine a large tonnage of ore profitable for concentrating. The silver ore obtained from the Crystal mine in 1919 carried from 25 to 45 oz. per ton, indicating that the mine might be operated profitably for silver ore alone.

Production: of Crystal mine in 1919, was 607 tons, valued at \$34,892 gross. In 1920, the ore shipments returned \$7,953 net to the company, in addition to the \$6,300 paid on property account, as royalty.

Penobscot Mine: This property, near Marysville, Mont., was acquired in 1921. Formerly yielded extraordinarily rich ore from the vein of this name, for a length of 1,000', mainly from above the 200' level.

The property has 2 other veins, also in hornstone. While the desultory work of the past 20 years has developed no new ore, the geological conditions warrant well planned exploration.

Company's mines are well managed. Company now controlled by new and reliable people and outlook good for dividends in 1922.

CUPRITE COPPER MINING CO.

MONTANA

Office: Helena, Mont.

Officers: P. L. Reece, pres. and mgr., Helena, Mont.; J. B. Waltz, v. p.; F. J. Rixon, sec.-treas.; with P. B. Moss, Geo. M. Siple, directors.

Cap. \$300,000; \$1 par.

Property: 10 patented claims, about midway between Helena and Marysville, Mont. Two well-defined veins on property; one, a gold-silver-lead vein, 4' to 20' wide, the other, a gold vein of promise.

Development: by 200' shaft, 100' of drifting on this level, and a winze 100' deep, with 340' of drifting on the 300' level, which will cut the quartz vein at depth of 340'.

Equipment: includes a steam hoist and air compressor.

CURLEW MINE

MONTANA

Address: care A. M. Holter, owner, Helena, Mont.

Property: at Victor, Ravalli county, Mont. Was formerly a silver producer, but contains zinc ore, and a vein claimed to be 12' wide, is said to

centrating mill with flotation unit to treat 85,000 tons of tailings was worked successfully, 1917. Financed by Los Angeles capitalists.

In July, 1921, W. R. Price of Helena, took an option on the property for \$125,000.

DAILEY COPPER MINING & SMELTING CO. MONTANA

Address: Wickes, Mont. Wm. W. Dailey, pres.; A. R. Robertson, v. p.; C. H. Dailey, sec.

Inc. Feb., 1907, in Montana. **Cap.** \$1,500,000; \$1 par; issued, 870,000, of which amount 800,000 shares paid for the property, is held intact.

Property: the Atlas group of 4 claims, patented, 25 acres in town of Wickes, Jefferson county, said to show well-defined fissure vein in andesite. Vein runs E.-W. and is of 12' estimated average width, carrying lenses of ore showing chalcopryrite, bornite and chalcocite, estimated by management to average 3% copper, 12 oz. silver, and \$1 gold per ton, 20% iron, 18% sulphur and 50% silica, without lead or zinc.

Development: a 340' shaft, with 2,000' of workings on vein, said to show 70,000 tons of ore blocked out.

Former owners shipped about \$30,000 worth of ore. An independent source estimates ore to average about 3% copper, 7 oz. silver, and 80 cts. gold per ton.

Reports made and property endorsed by F. L. Sizer, and Potter, Dickman & McKenzie.

Idle for several years, owing to inability to finance the erection of a concentrator.

DARBY MINING AND MILLING CO. MONTANA

Office: S. G. Bean, sec., Mullan, Idaho.

Officers: M. J. McHugh, pres.; C. D. Miller, v. p.; S. C. Bean, sec.-treas.; N. C. Sheridan, mgr., with I. A. Ghormley, directors.

Inc. March, 1907, in Idaho. **Cap.** \$1,000,000; shares \$1 par; 400,000 issued; assessable.

Property: 10 unpatented claims, 200 acres, near Keystone, Sanders county, Mont., 4½ miles from a railroad, said to show a fissure vein in quartzite carrying lead and silver.

Development: by 3 tunnels 175, 375 and 670' long, opening vein at depth of 55, 155 and 450', respectively. Mine is a prospect.

DAVIS-DALY COPPER CO. MONTANA

Office: 79 Milk St., Boston, Mass.; and Butte, Mont.

Officers: H. M. Burton, pres.; Wm. Bloom, v. p.; Charles G. Schirmer, sec.-treas.; with F. M. Kimbal, asst. treas.; and F. A. Schirmer, directors. J. L. Bruce, gen. mgr.; J. W. Dudgeon, chief mng. engr.

Inc. Sept. 14, 1908, in Maine, as successor of Davis-Daly Estates Copper Co. **Cap.** \$6,700,000; \$10 par; assessable: (\$8.50 paid), issued, \$6,000,000. Listed on Boston Stock Exchange. Annual meeting 4th Tuesday in September. Federal Trust Co., Boston, transfer agent; Equitable Trust Co., Boston, registrar.

For the earlier chapters in the history of the company, readers are referred to description of the Davis-Daly Estates Copper Co., in Vol. VIII and X of the Copper Handbook.

Financial statement: years ending June 30th:

Year	Ore Sales, Etc.	Expenses	Profit After Deprecn. etc.	Current Assets	Current Liabilities
1921	\$1,333,193	\$1,412,310	\$411,230*	\$275,019	\$319,133
1920	1,953,420.51	1,544,834.01	292,178
1919	1,239,240.34	1,002,142.19	237,098.15	579,706.21	99,094.40
1918	1,400,219.00	942,729.34	457,489.66	496,077.03	69,927.94
1917	739,042.30	575,239.15	163,803.15	247,235.77	42,783.47
1916	234,236.18	284,326.00	128,233.15	100,778.52
1915	20,641.01	104,196.79	20,475.98

*Loss.

Dividends: initial 50c. paid June 29, 1918, and total of 75c. for that year; 50c. December 20, 1919, and 25c. March 30, 1920.

Property: a small surface area and mineral rights of 320 acres, 280 acres of which lie adjacent to, but south and west of the older productive area, and 40 acres, 1½ miles to the west of Butte, in the Burlington mining district. The area within Butte is being developed through the Colorado shaft.

Geology: several main veins of the northwest vein series have been developed in the workings from the Colorado shaft. These veins belong to the Blue Vein system, of which the Jessie, Edith May, and other very productive fault veins are examples. There are several east-west veins exposed in the workings, but no great amount of development has been done on these.

Development: to a depth of 2,800' by the Colorado shaft and workings, and to a depth of 600' by the Hibernia shaft. The northwestern part of the main property is developed by the Silver King shaft, 600' deep and the Mount Moriah shaft, also 600' in depth, both incline shafts. Development is being done at the rate of 9,000' yearly.

The principal veins in the Colorado mine have been opened down to the 2,100, 2,300, 2,400, 2,500 and 2,700' levels, these levels producing ore running over 7% copper. Reserves are said to be equal to a normal output of about three years.

To improve the ventilation of the Colorado mine, the 2,500' level was connected with the Anaconda Co.'s Belmont mine in May, 1919, and with the Stewart mine of the Anaconda Co. from the 2,300' level, in August, 1920. In addition to this, a new air shaft has been raised from the 1,700' level of the Colorado mine to the surface. A Jeffrey 6'x3' fan installed at the collar of this shaft will insure a volume of 125,000 cu. ft. of air per minute, thus giving the Colorado mine a ventilation system equal to any in the district.

The Hibernia mine contains zinc-silver ores, a large additional tonnage having been recently developed in the workings on the 600' level.

Normally, 400 men are employed, of whom 300 are underground.

Equipment: the hoisting equipment at the Colorado mine consists of a 22x22x48' double-drum Nordberg-Corliss hoist. Steam is supplied by a 500 h. p. Erie City tubular boiler, stoked by American Underfed Stokers. A battery of boilers consisting of two 150-h. p. and one 100-h. p. Scotch Marine boilers are held in reserve.

Hoisting is done in balance, using 3½-ton skips. The ore is dumped from the skips over a shaking grizzly and passed through a sorting plant before going to the mine bins. The ore from the mine bins is transported several blocks, over a narrow-gauge surface tram, to the ore bins alongside the Northern Pacific railroad.

The entire surface plant has been improved and rearranged during the past year, a modern timber-framing plant, blacksmith shop, and machine shop replacing the old equipment.

A copper precipitation plant has been installed, both underground and on the surface, to recover copper from the mine water.

Production: (all properties) years ending June 30th:

Year	Ore Mined, tons	Copper, lb.	Silver, oz.
1921.....	128,960	8,456,062	1,463,182
1920.....	123,607	13,654,064	902,979
1919.....	74,551	7,903,961	517,162
1918.....	70,273	7,014,272	437,116
1917.....	45,955	4,557,789	242,938
1916.....	20,512	1,955,722	161,730
1915.....	2,551	201,186	17,522

Mine operations at the Colorado were suspended Nov. 20, 1921. The Hibernia mine continues to produce. Property is splendidly managed, and has a prosperous future assured. Existing contention with the Anaconda company over apex rights will probably be settled through an amicable determination of rights based on the facts secured through development work by both companies.

DENNEMORA GOLD & COPPER MINING CO., LTD. MONTANA

Address: P. G. Swanson, sec.-treas., Wallace, Idaho.

Property: 6 lead and copper claims, one-half mile from N. P. R. R., near Taft, Mineral county, Mont. Described Vol. X.

According to Oscar Nordquist, manager, operations were resumed in 1918 and the vein has been opened for 600', and a 200' shaft put down, at 450' from portal with a crosscut to the vein.

Compressor and other equipment dismantled July, 1921. Company idle and no work planned for near future.

DIVIDEND MINING CO. MONTANA

Corporate existence lapsed.

DULUTH-NEW YORK MINING CO. MONTANA

Idle. Address: John Zundel, Butte, Mont.

Property: the Excelsior claims in North Walkerville, Butte, and the Amy-silversmith group nearby. Eastern capital is said to have agreed to finance company to enable it to deepen the Excelsior shaft to 1,500'.

DURANT MINING & SMELTING CO. MONTANA

Address: Spring Gulch, via Martinsdale, Mont. C. M. Durant, supt.

Property: 14 miles from Martinsdale, Meagher county, shows fissure veins carrying copper sulphide ore with gold.

Development: by 200' 2-compartment shaft. No recent returns secured.

EAGLE MINING CO. MONTANA

Address: Arthur V. Corry, Lewisohn Block, Butte, Mont. Name changed to **Copper Eagle Mining & Smelting Co.**, which in turn lost property at Sheriff's sale, claims being bought by Butte and Superior Mng. Co. See Volume XIV for description of Eagle Mng. Co. Both the Eagle and the Copper Eagle companies are defunct with no assets and officers resigned.

EAST BUTTE COPPER MINING CO. MONTANA

Office: 85 Devonshire St., Boston, Mass. **Mine and works office:** Butte, Mont.

Officers: Robt. H. Gross, pres.; Hon. Jas. H. Reed, v. p.; Wm. P. Everts, sec.; Frank P. Son, treas.; Oscar Rohn, gen. mgr., with F. Ward Paine and Wm. A. Paine, directors; L. A. Thulin, asst. treas.; Andrew J. Ray, mine supt.; John E. Rothwell, mill supt.; Julius H. Warner, engr.; G. E. Burton, geologist.

Inc. Oct. 14, 1905, in Arizona. **Cap.** \$3,000,000; shares \$10 par; increased, May 11, 1909, to \$6,000,000, shares \$10 par; 421,849 issued. State Street Trust Co., Boston, registrar; American Trust Co., Boston, transfer agent. Stock is listed on the Boston Stock Exchange and N. Y. Curb. Annual meeting, first Monday in April.

The East Butte Copper Mng. Co. has no indebtedness. It owns all of the outstanding bonds and all preferred stock of the Pittsmtont Copper Co., the latter amounting to \$1,000,000 par value; also 91% of the common stock. East Butte Co. works the property of the Pittsmtont Copper Co., paying the latter company as rental the net profit arising from such operation.

Financial Statement, years ending December 31:

Assets.					
Year	Property and Equipment	Stock Unissued	Cash and Copper	Accounts Receivable	Total
1920....	\$3,642,450	\$1,525,183	\$305,977	\$5,773,610
1919....	3,305,939	\$1,781,510	1,953,441	433,252	7,774,042
1918....	3,401,491	1,781,510	1,637,442	197,936	7,018,379
1917....	3,298,820	1,792,690	1,947,589	183,837	7,222,936

Dividends	210,924	632,774	831,731
Surplus	*68,162	313,264	132,595	190,230	1,565,769	782,997	222,253

* Deficit.

Dividends: initial of \$1 per share Jan. 29, 1917, and total of \$2 for that year; \$1.50 in 1918; 50 cents in 1919, a grand total of \$1,687,396.

Net profits for 1920 were \$260,033 not allowing for depreciation. Net deficit on all operations in 1920 was \$68,162. County taxes paid were \$31,888 in 1916; \$34,322 in 1917; \$8,802 in 1918; \$6,750 in 1920.

Property: the Dutton group, 134 acres, held by placer patent, is in the S. E. part of Butte, near the Pennsylvania mine, and is idle at present.

Principal property is the **Pittsmont group** and smelter at Butte.

Miscellaneous holdings include the **Swissmont group**, of 6 claims near Elkhorn, Jefferson county, Mont., and the **Chamounix group**, near Austin, Lewis & Clark county, Mont., including the **Christina group** of 6 claims and the **Fannie Parnell group** of 33 claims. The **Swissmont group** has developed a considerable tonnage of low-grade oxidized gold ore carrying an excess of iron over insoluble material, and of value as a flux.

The **Chamounix group** has shipped some silver-copper ore in the past, but is now idle. Company also has timber operations at Feeley, Mont.

A mill was erected at the Elkhorn property in 1917, but owing to scarcity of labor and increased cost of cyanide, operations have been postponed until conditions become more favorable.

An interest is also held in claims on the west of the producing area of Tonopah, Nevada, and some good ore has been exposed. Company also owns a valuable lime quarry 40 miles from Butte.

East Butte also has a 49% interest in the Ohio Oil Co., a Standard Oil subsidiary, operating in Mule Creekfield Wyoming. Company's gas wells in Kansas are earning over \$12,000 a month.

Colorado Holdings: E. D. Pratt, supt., Silver Plume, Colo.

In 1922, acquired **Dives Pelican**, **Seven Thirty** and **Diamond Tunnel** properties at Silver Plume, and installed machinery as preliminary to extensive development.

Geology: the **Pittsmont claims** cover 280 acres of flat valley bottom,

about 1½ miles east of Butte and extending outward from the footslopes of the continental divide mountain ridge. The ground is a filled-in valley, the sandy wash and debris being in places several hundred feet deep, so that no outcrops of any kind exist on the ground. The underlying rock is the normal Butte granite (quartz-monzonite) which is cut by 3 systems of veins; Northwest, corresponding to the Blue Vein series. Ore-shoots occur in veins of each series. The zone of oxidization and leaching of copper extends from 500' to 700' below the surface. There are 12 principal veins that have been productive. While these are not wide, usually under 5', the ore-shoots are long and persistent. At least 2 veins on the 800' level have been stoped almost continuously for 1,500' in length. Though the 800' level has been the most productive level opened to date, due both to an increased primary mineralization and secondary enrichment which has affected the lower levels to a much lesser extent, the lower levels continue to yield strong ore shoots of commercial grade, though lower in value than ore from upper levels.

Development: 2 shafts, No. 2 and 3, 1,830' and 1,240' deep, respectively. No. 2 is the working shaft, and levels are opened from it at 800', 1,000', 1,200', 1,500' and 1,800'. A 3' vein of 4½% copper ore was opened on the 1,800' level during 1920.

Good ore has been opened on the two bottom levels, but as the 1,800' level has bad ventilation, and it is difficult to get men to work there, a new shaft was raised from the 1,800' level to surface. New work during 1918 amounted to 9,787' and 6,303' in 1919.

Ore production comes from the following levels: 800', 39%; 1,000', 18%; 1,200', 15%; 1,500, 23%, and 1,800', 5%. Sorting of ore underground is found to be an improvement.

Normally, 630 men are employed underground.

Equipment: consists of hoisting plant, flotation plant, and smelter. The above includes a 2,000-h. p. steam plant, 2,000-h. p. electric plant, 600-h. p. steam hoist good for 2,000', and 50-h. p. steam hoist good for 1,500'; two 25-drill air compressors, and 50 machine drills. Electric power is used for practically everything except hoisting. There are about 20 buildings, which include the smelter, sintering plant, 2 engine rooms, change-house, boiler-room, concentrator, flotation plant, carpenter, machine and electric shops, sampling mill, laboratory and office building. The smelter building contains one 600-ton blast-furnace and one 300-ton furnace with 3 basic-lined converters. The sintering plant contains one 42" Dwight-Lloyd machine. Concentrator is equipped with crushers, jigs, tables, etc., and flotation plant is equipped with tube mills and Janney machines. The capacity of concentrator is 600 tons and of flotation plant 800 tons, the additional capacity of flotation plant is to be used in reworking tailings, of which 123,520 tons were treated in 1918, carrying 0.7 lb. copper per ton, at cost of \$1.29 per ton.

The Pittsmond reduction plant is the only operating smelter in Butte and does a considerable amount of custom business, treating ore from several independent mines, including Davis-Daly. The sampling mill for custom and second-class ores adjacent to the smelter was described by H. B. Pulsifer in Bull. 3, Nov., 1920, of the University of Montana. About 350 men employed on surface.

Production: normally, the daily output of ore is 900 tons.

	1920	1919	1918	1917	1916
East Butte ore tr., tons.	115,415	143,654	178,948	181,904	256,196

Cost per lb. copper, cents	*7.15	*6.14	19.71	17.70	16.89

*Cost mining per ton.

Management gives out little information about its work, but developments seem to be favorable and revenue from custom smelting helps swell profits considerably.

The East Butte company maintained operations throughout most of 1921, producing 87,469 tons of 4.88% ore yielding 17,766,017 lb. copper, compared with 18,534,270 in 1920 and 19,987,733 in 1919. Costs were reduced to 11.284 cents per pound, compared with 15.854 cents in 1920, 16.582 cents in 1919, and 19.71 cents in 1918. Work on the 1,800' level, the deepest in the mine, shows that the orebodies continue downward with substantially unchanged values and size, much of the ore averaging 7%. The No. 4 shaft is 2,000' deep. The company earned a net profit of \$150,772 in 1921, compared with a deficit of \$68,162 in 1920, and spent \$276,798 on outside properties.

EAST BUTTE EXTENSION COPPER MINING CO. MONTANA

Office: F. H. Cooney, mgr., 113 Hamilton St., Butte, Mont

Officers: Chas. J. Schatzlein, pres.; Philip A. Breen, v. p.; Frank H. Cooney, sec. and gen. mgr.; Dr. C. E. Blackburn, treas., with Chas. N. Joyce, directors; A. F. Munroe, engr

Inc. April 10, 1906, in Arizona. **Cap.** \$1,000,000; shares \$1 par; issued, \$550,000. Paid, October 1, 1906, a 1% dividend, amounting to \$2,486. Stock listed on Butte Exchange. Shares 4¢ bid, 1920.

Property: various fractional claims, 4 acres, lying between the Belmont, Pennsylvania and Ground Squirrel mines of the Anaconda developed by 6 shafts, deepest the 250' two-compartment No. 6 shaft, begun 1909, with about 500' of crosscuts. The Westlake and Wall mines are said to have produced, under former ownership, about \$300,000 worth of ore. The two-compartment No. 1 shaft is 170' deep, and the 200' No. 2 shaft shows ore assaying up to 13% copper and 1 oz. silver per ton. No. 3, 1,040', known as the Westlake, has a small precipitation plant.

Lessees shipments of 40 tons daily, with net smelter returns of \$37,360, yielded the company a net royalty of \$12,881.83 in 1917. Company also owns a divided one-half interest in the Centerville claim, and interests as follows: one-half in Malone; eleven-sixteenths in Little Evelyn; one-sixth in Valley Forge; one-half in Gregory; one-fourth in Simon; one-eighth in Eureka First; three-fortieths in Lost Fraction, and three-fortieths in Katy T.

Lessees operating in 1916 shipped several carloads of 8% copper ore from the 200' level. East Butte Extension is reported to receive 15% royalty on all ore shipments. No recent returns available.

EAST COEUR D'ALENE MINING CO. MONTANA

Address: H. P. Hogan, Mullan, Idaho.

Officers: H. P. Hogan, pres.; W. J. Hughes, v. p.-mgr, Saltese, Mont. Mrs. L. M. Westervelt, sec.-treas.; with T. A. Westervelt, directors.

Cap. \$150,000; 10c par; assessable.

Property: 14 claims, 3½ miles N. of Haugan, Mineral county. **Development;** tunnels totaling 1,324' have opened some 8% copper, ½ oz. gold, and 3 oz. silver ore.

EASTERN BELLE MINING CO. MONTANA

Address: Helena, Mont.

Officers: George W. Huffaker, pres.; S. T. H. Hill, v. p.; George H. Hill, sec.-treas.

Inc. Jan. 4, 1916. **Cap.** \$100,000; shares \$1 par. Bought the Eastern Belle mine from Helena Bureau of Mines.

Property: 2 claims, 40 acres, in the Scratch Gravel camp, near Helena. Claims show quartz, carrying free gold.

Management planned to sink incline shaft several hundred feet, at last accounts.

EAST HELENA LEAD SMELTER**MONTANA**

Owned by the Am. Sm. & Rfg. Co., which see.

Office: 120 Broadway, New York. **Works address:** C. W. Adams, mgr., East Helena, Mont.

Has an annual capacity of 330,000 tons.

EASTON MINES**MONTANA****Address:** Elling Estate, owners, Virginia City Mont.

Under option to W. H. Nichols, 50 Broad St., New York City.

Property: 5½ claims, patented, in Browns gulch, 4 miles west of Virginia City, covering the America and Eastern veins, lying in a very wide dike of andesite porphyry between granite and gneiss. Veins are 2½ to 6' between walls. Pay ore occurs in 3 shoots, each 250' long, and 16" to 4½' thick. Ore of Eastern vein averages \$8 gold and 15 oz. silver, exclusive of high grade.**Development:** by 300' vertical shaft with 210' winze on that level.**EAST PACIFIC MINING CO.****MONTANA****Address:** Box 122, Helena, Mont.**Officers:** R. A. Bell, pres.; O. N. Kessler, v. p.; W. A. Dickinson, sec.; with N. Gage, directors.**Inc.** in Arizona. **Cap.**, \$1,000,000; \$1 par; 556,118 shares issued. Annual meeting 1st Saturday in April.**Property:** 8 patented claims, 139 acres, and a millsite, 5¼ miles from Winston, Broadwater county, and 20 miles S. E. of Helena, reported to show a fissure vein in andesite, carrying gold, silver, lead values. Ore said to run \$7-10 a ton.**Development:** by 4 tunnels, longest 3,300', and by a 134' winze. Equipment includes 75-ton mill, pump and compressor.

Property idle for 3 years past, except for slight work by leasors.

EAST SPRING HILL MINING CO.**MONTANA****Address:** M. Kuphal, sec.-treas., 630 Monroe Ave., Helena, Mont.**Officers:** A. H. Kleinschmidt, pres.-treas.; M. Kuphal, v. p.-sec., with F. H. Hillehecht, directors**Inc.** Jan. 20, 1914, in Montana. **Cap.** \$40,000; 10c par; 100,050 issued. Annual meeting first Monday after first Tuesday in January.**Property:** 6 claims, 120 acres, surveyed for patent in 1920. Also the Moonlight claim, ½ of Gold Lode, the Standard, Standard Extension, S. E. millsite, ¼ of Daylight, ¼ of Star, ¼ of Big Mountain, and ¾ of Convention Lode claims. All these claims acquired 1920, lie south of company's older holdings and join the Whitlach Union property. Company has kept up assessment work, in 1920-21, by continuing tunnel work on the older claims and starting a new tunnel on the on the Peretite claim.

The same owners controlled American Mining Co., Ltd., at Landore, Idaho.

ECLIPSE ARGO MINING CO.**MONTANA**Defunct—property lost. **Address:** E. G. Hoffman, sec.-treas., New Britain, Conn., Eclipse, Argo Mine near Argo, Broadwater county, Mont. was lost by bondholders foreclosing and in April, 1913, deeds were given to trustee for entire property. In 1918 the **Furnace Creek Oxide Copper Co.**, bought 51% interest in this mine, for \$150,000.**ECONOMY GOLD MINES CO.****MONTANA****Address:** Rosenfield Bros., mgr's., Helena Mont.**Officers:** J. L. Kessner, pres.; S. Rosenfield, v. p.; J. Rosenfield, sec.; S. L. Joseph, treas.; directors. C. E. Freyberger, supt.**Inc.** in Montana. **Cap.**, \$1,500,000; shares \$1 par; 280,000 issued.**Property:** 180 acres, patented, including the Economy Mine, 6 miles from East Helena, shows 15 fissure veins in diorite, andesite and granite. Chief vein has an E.-W. strike, with 75° dip. Ore, containing gold, silver and copper, occurs in shoots said to average 3' in width and from 35' to

150' in length. The Chicago-Montana mine, in Mitchell gulch, is also worked by this company.

Development: by 2 shafts about 300' deep. Ore developed on 300' level is same shoot of high-grade ore stoped on the 100', but wider and varying from \$10 to \$235 per ton. Tunnels were driven in 1920.

Equipment: 200-h. p. electric, includes boilers, 3 gasoline hoists, two 75-h. p. compressors, and a 100-ton concentrator built during 1920. Employs about 30 men, normally.

ELK GOLD MINING CO.

MONTANA

Address: R. Lee Kelly, sec. and gen. mgr., Deer Lodge, Mont.

Officers: C. E. Aspling, Deer Lodge, pres. Trustees, I. S. Eldred, and J. E. Nevill, both of Deer Lodge.

Inc. March, 1913, in Montana. Cap. \$800,000; \$1 par; assessable; 400,000 shares issued.

Property: 2 claims, 1 patented, 20 acres, 10 miles S. E. of Deer Lodge, Powell county, and 17 miles N. of Butte, Mont. Claims show small stringers of oxidized ore on surface which at depth of 40' are reported to assay from 4-7% copper, 1 oz. gold and 7-14 oz. silver per ton.

Development: by 100' shaft. Shipped 15 tons of ore in 1915 netting \$30 per ton. **Equipment:** 30-h. p. steam. No recent returns.

ELKHORN QUEEN MINING CO.

MONTANA

Address: care R. C. Wallace, Helena, Mont.

Mine at Elkhorn, Jefferson county, Mont.

Lessees at last report were stoping ore, said to be 30' wide, from the 300 level. Shipments made to East Helena smelter.

ELM ORLU MINING CO.

MONTANA

Office: Miner Bldg., Butte, Mont.

Officers: W. A. Clark, Jr., pres. and gen. mgr.; W. A. Clark v. p., owners; W. D. Mangam, sec-treas.; J. C. Pyle, cons. engr.; W. N. Rossberg, mine mgr.

Inc. 1907. Cap. \$100,000; shares \$10 par. Statements filed with Assessor of Silver Bow county for years ending May 31:

Year	Ore Value		Expenditure			Net Profit
	Tons	per Ton	Mining	Const.	Trans.	
1918.....	135,130	\$18.20	\$1,105,363	\$351,338	\$871,588	\$43,790
1917.....	175,236	22.65	846,568	199,439	492,375	1,563,745
1916.....	200,752	18.52	1,011,537	18,029	408,823	1,783,352

County taxes paid were \$14,332 in 1916; \$23,678 in 1917; \$1305 in 1918; \$15,187 in 1920.

Property: company owns the Elm Orлу mine adjoining the Butte & Superior holdings, and the Badger State mine of the Anaconda Copper Co. in the N. E. section of the Butte district. The Poser claim is owned by a separate company.

Geology: the Elm Orлу covers part of the Rainbow lode and several other veins containing large bodies of copper and silver ore and immense bodies of zinc ore. Copper occurs as chalcocite both in secondary fault veins and in veins of the Rainbow lode, and also as chalcopyrite mixed with zinc ore.

Development: by 2,200' shaft and several miles of workings, principally below the 900' level.

An important development during 1919 was the opening of the North-western vein on 2,200' level. It carries copper, and the apex is below depth of 2,000'.

Litigation with the Anaconda company concerning part of the Emily vein in the Pilot-Butte mine was settled in 1920 by the Anaconda conceding the claim.

Equipment: is exceptionally complete and recent additions include electrically-driven hoist with 2 drums 10' diameter by 8' face, designed to

wind 3,500' of rope at a speed of 2,500' per min. The motor is of 1,800-h. p., operating in conjunction with a motor-generator flywheel set.

The output of the mine is treated in the mill of the Timber Butte Milling Co. (which see), also owned by Senator and W. A. Clark, Jr.; zinc concentrates go to the National Zinc Co.'s plants at Bartlesville, Okla., and Springfield, Ill. Copper ore is shipped direct to the Anaconda smelter, the mine yielding from 50 to 100 tons a day when working full time.

Elm Orlu produces 100-200 tons per day of silver ore.

Normally, 380 men are employed underground and 73 on surface, producing 730 tons of ore daily.

Timber Butte Milling Co.

Is the corporation owning the mill in which the ores of the various Clark properties are concentrated.

Officers: W. A. Clark, Jr., pres., and gen., mgr.; W. A. Clark, v. p., W. D. Mangan, sec.; J. K. Heslet and A. J. Johnston, directors; W. N. Rossberg, mgr.

Cap. 1,000 shares; \$100 par. A close corporation.

The mill was erected to concentrate zinc ores of the Elm Orlu mine. Capacity 2,000 tons daily. Process gravity separation and flotation. Crushing is by rolls and Hardinge mills; separation by tables and Minerals Separation flotation machines. Electric power is supplied by the Montana Power Co. Mill began operations about May 1, 1914. Recovery over 94% and concentrates average 52% zinc.

The copper section of 1,000 tons daily capacity, was added during the war. Zinc concentrates are shipped to the Great Falls zinc plant of the Anaconda Mining Co.

EMERY SILVER MINING CO.

MONTANA

Address: Phoenix Block. Butte, Mont.

Officers: Clem Barten, pres.; W. L. Hugo, v. p.; J. R. Davenport, sec.-treas., with F. C. Gormerly and Oscar Nordquist, directors.

Inc. Aug., 1919, in Montana. **Cap.** \$1,000,000; \$1 par; \$300,000 issued. Annual meeting in March.

The fiscal agents, C. W. Galvin & Co., 206 Broadway, New York City, arranged to sell 375,000 shares to finance development.

Property: 7 patented and 4 other claims, 10 miles E. of Deer Lodge, Powell county, including the Emery mine. A number of veins, carrying silver and gold, have been developed.

Development: by 450' vertical shaft. Dumps contain 123,000 tons of second-class ore.

Equipment: electric power, and 50-ton flotation mill, costing \$130,000; to be increased to 300 tons.

EVA MAY MINE

MONTANA

Basin, Mont. Was owned by Betty Alden Mng. Co., now dead.

Mine idle 1920-21.

EVENING STAR DEVELOPING CO.

MONTANA

Address: H. C. Cooney, Butte, Mont.

Officers: C. M. Joyce, pres.; R. E. Strasberger, v. p. and supt.; H. C. Cooney, sec.-treas.; also directors.

Inc. Sept. 28, 1918, in Montana. **Cap.** \$50,000; \$1 par; none issued.

During 1918, ore sold netted \$924 and operating expenses were \$6,200.

Property: the Big Dick and Black Jack mines, 5 claims, 1 patented, in Nigger Hill, Elliston district, Mont., formerly owned by the Butte & Elliston G. & C. M. Co. Examined by A. F. Monroe and E. J. Strasberger.

Geology: claims contain a fissure vein in diorite as well as a "blanket" deposit. Ore streak is 8" wide, and consists of a complex sulphide assay-ing 20% lead, 7% zinc, 1 oz. gold, and 26 oz. silver per ton.

Development: by 300' vertical shaft and 1,200' tunnel. Greatest depth is 485', and workings total over 2,000'. Ore is mined by underhand stoping.

On the 125' level of the Black Jack mine, a vein of silver-gold-lead ore was opened for 80' in length and work at 200' is underway to open it further.

Equipment: steam hoist and compressor. A one-mile aerial tram is to be erected.

Company started work in June, 1918, and shipped 26 tons of \$35 ore in that year. Shipments sent to East Helena in 1921, said to have run 100 oz. silver, 2 oz. gold and 35% lead.

FARRELL COPPER CO.

MONTANA

Office: Butte, Mont.

Officers: Dr. Donald Campbell, pres.; I. A. Heilbronner, v. p.; J. D. Slemmons, treas.; A. T. Morgan, sec.; with W. C. Lewis, W. H. Hall, and Daniel Tewey, directors.

Inc. July 24, 1906, in Montana. **Cap.** \$1,000,000; shares \$2.50 par.

Property: 17 acres, in the S. E. part of the Butte district, has a 200' shaft, sunk jointly with the Alliance Copper Co. Crosscut on the 200' level shows a little ore carrying copper, lead, zinc, and silver. Inactive.

FLATHEAD DEVELOPMENT CO.

MONTANA

Probably dead. Former address: Gen. Chas. S. Warren, 73 Hirbour Blk., Butte, Mont. and Coram, Mont. See Vol. XIV.

FLOHART SILVER MINES CO.

MONTANA

Address: W. H. Woodburn, v. p.-gen, mgr., Neihart, Mont. Robert Pierce, supt. Messrs. Liscomb & Parmeter, leasing a block of ground above No. 2 tunnel, were shipping in 1921. H. W. E. Carnahan, former manager, died in 1920.

Property: the old Florence mine and other claims at Neihart, Cascade county, with a past production of over 3,000,000 oz. of silver.

Development: by tunnels, and 500' shaft sunk below No. 1 tunnel. Ore opened during 1920 consisted of a 26" face of 300 oz. ore on No. 5 level and other promising shoots.

Equipment: includes electric power, pump, hoist, 750 cu. ft. Sullivan compressor, etc.

Production: several cars of ore assaying over \$80 per ton.

FRANKLIN MINING CO.

MONTANA

Described Volume XIII.

Mine transferred to Cruse Cons. Mng. Co., which see.

FURNACE CREEK OXIDE COPPER CO.

MONTANA

Office: John E. Corrette, sec., Hennessy Blk., Butte, Mont.

Company lost all of its property and has no assests of any kind. Fully described in Volume XIII.

GIRARD COPPER CO.

MONTANA

Officers: George J. Kirby, pres. Willimantic, Conn.; Geo. R. Grantham, sec., Kimball Bldg., Boston; E. C. Denton, supt.; Warm Springs, Mont.

Inc. 1912, in South Dakota. **Cap.** \$10,000,000; shares \$10 par; 601,120 issued; 501,000 shares pooled. Admitted to quotation on Boston Curb, for 91,020 shares, January, 1913. Annual meeting in January. First Nat'l. Bank, Boston, registrar; Ex. Trust Co., Boston, transfer agents.

Property: 20 claims, partly patented, 400 acres, 5 miles from Warm Springs and 10 miles N. W. of Butte. Ore occurs as a sulphide in 5' fissure-quartz vein, between monzonite and aplite, assaying 4-8% copper, 6 oz. silver and 2 oz. gold.

Development: by 60' Jack Pot shaft and 150' tunnel. Assessment work only done.

GISH CHROME MINE

MONTANA

See United States Chrome Co.

GLADSTONE MINES & REDUCTION CO.

MONTANA

Address: A. F. Dow & Co., 10 State St., Boston, Mass.

Officers: Charles Stoddart, pres.; L. R. Davidson, v. p.; Dr. F. J. Carr,

sec.-treas.; with W. F. Sikes, J. H. Carr, W. M. Decker, and E. H. Hechler, directors.

Inc. in Arizona. **Cap.** \$1,000,000; \$1 par.

Property: 8 patented claims, 12 miles from Sheridan, Madison county.

Development: on the Gladstone claim consists of four tunnels, known as the 900, 700, 650 and 570'; levels are connected by raises, said to block out ore to the value of \$200,000. The vein is from 12 to 60" wide, and ore carries gold and silver in proportion of 9 to 1. Ore assays from \$8.65 to \$101.36 per ton, the average being from \$15 to \$20.

Equipment: includes a 10-mile electric transmission-line bringing power from Virginia City; two 150 h. p. and several small motors; 12 drill compressor, tramway and a complete 125-ton mill consisting of crusher, Hardinge ball-mill, Dorr classifiers, etc., cyanide plant, filter, and dwellings.

The prospectus and accompanying letters indicate that most of the directors are physicians or druggists of Buffalo, N. Y., who appear to have invested personally. The circular states: "This ore is actual gold value, like so much wheat in an elevator waiting to be ground into flour," and "it is a conservative statement that our mines will not be exhausted in 50 years of operation." "As a rule there is more value below than above." "At the last calculation we should be able to divide \$700 per day among the shareholders—more than 30% per year." "We have a clean financial slate." Though the efforts of this company to make a profitable mine seem to be sincere they arouse suspicion by the publication of such absurd statements and estimates which are not at all likely to be fulfilled.

GLENGARRY MINING CO.

MONTANA

(Succeeds the Montana-Scotch Bonnet M. Co.)

Address: Foster Bld., Miles City, Mont. **Mine address:** F. A. Hancock, supt., Cooke, Mont.

Officers: J. T. Hamilton, Miles City, Mont., pres.; Charles Daly, v. p.; J. E. Campbell, sec.-treas. with C. H. Loud and F. A. Hancock, directors.

Inc. Sept. 1918, in Mont. **Cap.** \$1,500,000; \$1 par; 198,275 issued; 375,000 in escrow for payment of property. Annual meeting, 3rd Tuesday in January.

Property: the Scotch Bonnet mine, 20 claims, 12 patented, partly fractional, 402 acres, in the New World district at Cooke City, Park county. Ore hauled by truck to Gardiner 53 miles, thence by rail to smelter. Ore carries chalcopryite with gold, silver and copper, occurring as contact metamorphic deposit, between porphyry and granite, dipping 60°-78° N. E. An average is said to be \$16 gold and 13.47 oz. silver per ton with 8.65% copper, from near surface.

Development: by 1,445' main crosscut tunnel to prove downward extension of ore, a block of ore containing about 10,000 tons said to have been opened. Operating 1921, making small shipments to smelter. Has 250 h. p. hydro-electric plant, and Ingersoll Rand compressor.

Examined by V. D. Williamson, 1920.

GOLD CROWN MINING CO., LTD.

MONTANA

Probably dead. Described Vol. XII. A. A. Mayo, pres., Henderson. Mont.

GOLDEN CURRY LEASING CO.

MONTANA

Address: M. I. Lydig, mgr., Elkhorn, Mont. Is lessor of the Golden Curry Cons. Mng. Co., which owns the property.

Property: the Sour Dough group, 9 claims, 162 acres, near Elkhorn, Jefferson county, Mont. Orebody 100' wide is oxidized, lying between limestone and granite and dipping at 45°. Claims said to show 5 orebodies, 2 being developed. Ore is iron oxide carrying low values in gold and copper. It contains chalcopryite and tenorite, such ore assaying 1.9% copper, 4 oz. silver and 0.35 oz. gold per ton, with 48% excess iron. Geology and history of property given in Bull. No. 527, U. S. G. S., Helena Mining Region, pp. 136 to 139.

Development: by open cuts and tunnels; total workings said to be 8,200'

Was under lease May 1, 1917 to the A. S. & R. Co., which gave it up November 1, 1917. During 1918, lessees mined 335 tons of ore assaying 0.75 oz. gold, trace of silver, and copper, 52% iron, and 16% insoluble, sold as a flux to the East Helena smelter.

Daily output in 1919 was 30 tons, employing 16 men.

GOLDEN EAGLE MINING & MILLING CO. MONTANA

Address: Mullan, Idaho. J. L. Martin, sec.

Officers: Emil Lennarson, pres.-mgr., Frederick Hartkorn, v. p.; J. L. Martin, sec.-treas.; with John Rolin and W. Hutchinson, directors.

Inc. Feb. 14, 1919, in Idaho. **Cap.** \$1,000,000; par \$1; assessable; 600,000 issued. Annual meeting February 14.

Property: 9 claims, 180 acres, at Keystone, Mineral county. Ore carries lead and silver, and has been opened by 75 and 200' tunnels. A prospect.

GOLDEN SUNSET MINING CO. MONTANA

Address: J. W. Ridinger, mgr., T. H. Thomas, sec., Iron Mountain, Montana.

Assessment of 2 mills per share was due Sept., 1920.

Property: several claims on Cedar Creek, 15 miles from Iron Mountain, Mineral county. Ore carries gold. Ground was located about 10 years ago and has been opened to a depth of 200'. A 25-ton ball mill was erected late in 1919.

GOLD HILL MINE MONTANA

Address: Frank Eichelberger, supt., Melrose, Mont.

Owned by J. J. Edson, Jr., Diamond Bank Bldg., Pittsburgh, Pa.

Property: 10 claims, 3 patented, in "Highland" section, Moose Creek district, 20 miles south of Butte, shows gold-quartz vein averaging \$6.50 per ton, with payshoot 20' thick and 300' long in granite.

Development: by 500' incline shaft, at 10° dip with total of 1,400' of workings. 50,000 tons of ore developed. Has steam power and 50-ton mill.

Development work was done in 1920-'21.

GRAND VIEW MINING & DEVELOPING CO. MONTANA

Probably dead as letters sent to Twin Bridges, Madison county, Mont., are returned unclaimed.

Property: molybdenum-bearing claims, 11 miles E. of Twin Bridges, said to show a vein of porous and well-crystallized cerussite heavily impregnated with iron oxide, containing ½ to 1% crystallized wulfenite (molybdate of lead). Ore also carries gold and silver.

Development: little work, done to date and commercial value of deposit not known. Concentration may be complicated.

GRANITE BI-METALLIC CONSOLIDATED MNG. CO. MONTANA

Office: 821 Security Bldg., St. Louis, Mo. **Mine office:** R. S. Blitz, act. supt., Philipsburg, Mont.

Officers: Chas. G. Ewing, pres.; E. S. Orr, 1st v. p.; Jno. H. Dieckman, 2nd v. p.; F. D. Fusz, sec.; G. J. Tansey, treas.; with L. S. Mitchell, L. M. Rumsey, Jr., Jos. P. Hartnett, A. L. Shapleigh, W. C. Uhri and John P. Meyer, directors. Leigh Wyman, asst. sec.

Inc. April 6, 1898, in Montana. **Cap.** \$10,000,000; \$10 par; all issued. Shares transferred at company's office. Listed on St. Louis Stock Exchange. No dividends, no debts. Annual meeting in June at Philipsburg.

Property: over 2,500 acres at Philipsburg, Granite county, Mont. Is a merger of Granite Mountain and Bi-Metallic properties, which yielded over 4,000,000 oz. silver per annum in early days, total output being \$50,000,000, of which \$14,000,000 was distributed as dividends. Decline in price of silver resulted in practical suspension of work.

Geology: fissure veins in granite, adjoining a large area of limestone.

Best ore-shoot is said to be 4,400' long. Ore is mostly sulphide containing silver with accessory gold and copper values.

Development: by 3 shafts to 1,800' depth, and 2 tunnels, longest 8,800'. Greatest depth of workings, 2,250'.

Equipment: 100-stamp mill, 200-ton concentrator, flotation unit, and full mining equipment, etc.

Recent work being done by lessees, although in 1919, 2 shafts were sunk to 1,000' to prospect for the manganese area, where zinc-silver ore is expected. In October, 1918, the new hoist bought for one of the new shafts was sold to the Jib Mining Co., of Basin.

Present company has made a courageous attempt to open virgin ground in the hope of developing new orebodies comparable with those which made the district famous. Despite a large expenditure for machinery and development work, results to date are unsatisfactory.

GREAT BUTTE COPPER CO.

MONTANA

Described in Vol. XIV. Property sold at sheriff's sale Dec. 22, 1920, for \$75,315 to the **Butte & Anaconda Copper M. Co.**, which see.

GREAT FALLS-BARKER MINING CO.

MONTANA

Address: Hughesville, Mont.

Officers: S. R. Jensen, pres.; H. H. Roberts, sec. and mgr.; W. M. Johnson, treas.

Inc. 1916, in Montana. **Cap.** \$250,000; shares \$1 par.

Property: Liberty group of claims in Barker district, Cascade county, Mont., with past yield of \$30,000.

Ore: contains lead, zinc, gold and silver. A flotation plant was to be erected but no recent returns secured.

GREAT FALLS IRON CO.

MONTANA

Address: Theo. Gibson, Great Falls, Mont.

Inc. Sept. 11, 1917. **Cap.** \$50,000; par \$10; all issued.

Officers: Theo. Gibson, pres.; Donald Gibson, sec.

Property: 31 patented claims, about 800 acres on Running and Dry Wolf creeks, in Cascade and Fergus counties, 12 miles S. W. of Stanford on G. N. Ry. 54 miles from Great Falls.

Hematite iron ore carrying 60% to 68% iron, 0.014% phosphorus and no sulphur, occurs as contact metamorphic deposit between limestone and porphyry.

Development: workings 500' long, and 5' to 60' wide, and to depth of 50'. See Bull. 715 F-U. S. G. S.

GREAT NORTHERN COPPER CO.

MONTANA

Probably dead; letters sent company, returned unclaimed.

Property: the Great Northern mine, 1 mile north of Tava, Flathead county, Mont., developed by several tunnels, 200' to 500' long, on the strike of the vein. **Ore:** principally gold and copper.

GREAT WESTERN MINING & MILLING CO.

MONTANA

Address: Lost Creek, near Chico., Mont., H. F. Lawrence, mgr. at last accounts.

Property: 6½ miles from Chico Hot Springs, Park county, Mont., at 7,500' elevation. Nearest railroad is at Emigrant, 10 miles away.

Development: tunnel reveals a brecciated and somewhat altered, fine-grained, light-gray porphyry in which fine-grained molybdenite intimately associated with pyrite forms the matrix and permeates the individual fragments of brecciated material. Ore contains 5% molybdenite, and deposit is extensive. Low-grade copper-silver-lead ore was reported opened in 1920.

A mill using flotation was erected, 1917.

GREENDALE EXPLORATION CO.

MONTANA

See **Butte & London Copper Dev. Co.**

Controlled by Rainbow Lode Development Co. When the Rainbow

Lode Dev. Co. wished to acquire the Butte & London property at Butte, Mont., several years ago, it was not practicable to recall a majority of the outstanding stock of that company and the Greendale Exploration Co. was organized to meet the emergency. The property of the Butte & London was transferred to this company, the Rainbow Lode Dev. Co. receiving 51% of the stock in return for certain development work (see Rainbow Lode Dev. Co.) the remaining 49% is held by B. & L. C. Dev. Co.

HAMILTON-MONTANA GOLD MINING CO. **MONTANA**
 Idle. **Office:** Richard Daxon, mgr., Hamilton, Mont., at last reports, but letters returned unclaimed, 1919.

Property: company owns group of claims in Mineral county, Mont. developed by 400' crosscut, driven to intercept a vein of copper and lead ore.

HECLA MINES **MONTANA**
Address: Knippenberg Syndicate, Glendale, Beaverhead county, Mont.

Property: the Atlantic, Cleves, and other mines, 10 miles W. of Glendale, formerly owned by Hecla Cons. M. Co., which for 20 years was a large producer of silver and lead, with considerable gold and copper, latter reaching 100,000 lb. fine copper yearly. Property paid dividends of \$2,250,000 on an original investment of \$40,000, but was bought, 1906, at sheriff's sale, for \$28,000. About 65 men employed for a year or two, but the little ore found was low-grade, and the mine was again closed down, and abandoned, after some \$300,000 had been spent.

Mine worked by lessees until 1912, when it was taken over by the Longmaid Bros. of Helena, who installed electric power.

Several hundred tons of copper-lead ore from smelter dump shipped annually.

HELENA MINING BUREAU, INC. **MONTANA**
 Reported out of existence, 1922. Fully described in Vol. XIV. of this Handbook.

HEMLOCK SILVER-LEAD MINING CO **MONTANA**
Address: N. Knudsen, sec.-treas., Saltsee, Mont.

Officers: Peter Peterson, pres.; W. J. Hughes, v. p.; with Nels Knudsen, Henry Northan and W. A. Lea, directors.

Inc. 1907, in Montana. **Cap.** \$150,000; 10¢ par; assessable. Last call 1 mill per share, due Nov. 30, 1920.

Property: 3 claims on Packer Creek, 1½ miles from Saltsee, Mineral county.

Development: 1,500' of tunnels, a 250' shaft with crosscut 220' to the lode which is claimed to be 60' wide and to carry silver and lead ore.

Friction in the company is said to have delayed operations. In 1920, ore was being opened in the tunnel.

HIDDEN TREASURE GROUP **MONTANA**
Address: W. J. Stephens, owner, Missoula, Mont.

Property: 9 patented claims in the Wallace district, near Clinton, Missoula county, said to show 5 veins with gray copper and bornite ores averaging 2 to 20% copper, \$2 to \$4 gold, and 2 to 20 oz. silver per ton, assorted for shipments.

Development: mainly on Hidden Treasure and Cascade claims, includes 2 tunnels in a steep mountain side, uppermost 558' on vein claimed to be 50' wide. Ore cut 80' from portal and extends to face. Lower tunnel, 1,400' long, follows the east vein, said to be 50' wide. Crosscuts develop 1 other vein of 13' width and drifts have opened up some rich spots and several hundred feet of concentrating ore. Total work 3,600'. Shipments began 1899 and ceased in 1907, and property has had but little development since.

HIGGINS & BIELENBERG MINE (H. & B.) **MONTANA**
 See B. and H. Mines & Mill.

HIGHLAND CONSOLIDATED MINING CO.**MONTANA****Office:** 8 South Montana St., Butte, Mont.**Officers:** C. A. Hanswirth, pres.; J. T. Bluff, v. p.; W. G. Hoage, sec-treas.; with Dr. T. J. B. Shanley and R. S. Booth, directors.**Inc.** June 27, 1919, in Montana. **Cap.** \$500,000; par \$1; 260,000 issued for payment of property. Annual meeting 1st Tuesday after 1st Monday in October.**Property:** company owns the Gold Run and 5 other quartz claims, and has an option on 11 others, 22 miles S. of Butte. The Highland district was first opened in 1865 and produced much gold. The Only Chance, held under option, is said to have yielded \$1,000,000 from workings only 500' deep; the Three Ply claim also under option is equipped with a 5-stamp mill.**Development:** a 2,000' tunnel is being driven to cut veins in Nevin hill at depths of 300 and 800'. Face is said to be in a highly-mineralized zone.

Company is banking on past records which it is to be hoped will be equalled.

HIGHLAND COPPER CO. LTD.**MONTANA**

Out of existence. Described in Vol. XIII.

HOMESTAKE MINING CO.**MONTANA****Address:** H. V. Edwards, Wallace, Idaho.**Cap.** \$1,000,000.**Property:** on Trout creek, 22 miles W. of Thompson Falls, shows good copper ore occurring as "kidneys".**Development:** by 900' tunnel driven in 1920.**Equipment:** includes a hoist, compressor, etc.**HORSE SHOE MINE****MONTANA****Address:** John McMillan, Superior, Mont.**Property:** 70 acres, patented, 12 miles S. W. of Iron Mountain, Mont. This is a placer project equipped for hydraulicking and producing a little gold.**HUGO GOLD & COPPER MINING CO.****MONTANA****Address:** Richard W. Seideman, pres., Saltese Mineral county, Mont.**Officers:** W. W. Wood, Wallace, Ida, v. p.; A. G. Seideman, sec.-treas., with A. B. Atwater and Peter Weber, directors.**Inc.** 1907 in Idaho. **Cap.** \$1,000,000; 10c par; assessable; 770,000 issued. Last annual meeting was on Nov. 1, 1920.**Property:** 3 claims, carrying the extensions of the Boston-Colby vein system, next E. of the New York & Brooklyn mine, and one-half mile E. of Saltese. Claims carry 2 parallel veins, 300' apart, 1 about 15' wide, said to show copper carbonates, bornite and chalcopyrite, giving assays, from selected specimens of 2-57% copper. The second vein, proven by trenching, is said to be 12' wide, and to carry a 3' paystreak of ore assaying 12% copper, 6 oz. silver, and \$8 gold per ton.**Development:** by 195' drift tunnel, 50' winze, 60' shaft and a 750' cross-cut tunnel, with 600' farther to go to reach the first vein.**Equipment:** water turbine with 14' head of water, and 2-drill compressor. Still a prospect, in which Eastern capital was reported interested.**IDAHO-MONTANA MINING CO., LTD.****IDAHO-MONTANA****Address:** Walter Keister, sec., Murray, Idaho.**Inc.** Aug. 18, 1905, in Idaho. **Cap.** 1,000,000 shares; 10cts. par; assessable; 386,349 shares outstanding. Annual meeting 1st Saturday in September.**Property:** 10 claims, unpatented, 200 acres in Shoshone county, Idaho, and Sanders county, Mont., showing lead-copper-silver ore in quartz veins. Developed by 1,200' tunnel to depth of 540'.

In October, 1919, work was resumed in the Monitor tunnel, a crosscut being driven to cut the westerly extension of the Richmond vein at a depth of 1,200'; company is to do this jointly with the Richmond company.

Power was installed and development underway in 1920.

ILLINOIS GOLD MINING & MILLING CO. MONTANA

Address: E. G. McAnulty, sec., Carthage, Ill.

Officers: K. H. McAnulty, pres.; E. G. McAnulty, sec.-treas., with Dr. A. Saley, M. M. Wallace, and J. F. Williams, directors.

Cap. \$1,000,000; par \$1.

Property: 143 acres, patented, in West Fisher district, Lincoln county. Ore carries gold and silver. Only assessment work being done.

INDEPENDENCE COPPER-GOLD-SILVER MING. CO. MONTANA

Address: Deer Lodge, Powell county, Mont.

Officers: I. S. Eldred, pres. and gen. mgr.; C. H. Williams, v. p.; E. Scharnikow, sec.; C. E. Larabie, treas.

Inc. 1907, in Montana. **Cap.** \$900,000; shares \$1 par. Assessments to date 10 mills per share.

Lands: 120 acres in the Oro Fino district, 12 miles S. of Deer Lodge and 5 miles E. of 2 railways, include the old Independence mine located 1870, which is a patented tract of 102 by 2,200'. Examined in March, 1917, by Lucian Eaves.

Development: includes shafts and tunnels, one being 550' long, and showing vein entire length, from 2 to 4' wide, carrying gold and silver. The last 20 tons shipped assayed \$20 gold. Ore can be concentrated $3\frac{1}{2}$ into 1 giving concentrate with excess of iron.

Property for sale, or lease and bond.

INDEPENDENCE COPPER GROUP MONTANA

Address: G. F. Stannard, Kalispell, Mont.

Property: 4 claims, 1 patented, 8 miles N. E. of Eureka, Lincoln county. Tunnels total 850'. Ore contains 3.5% copper, \$1 gold, and 3 to 6 oz. silver per ton. Idle at last accounts.

INDIAN QUEEN MINING & SMELTING CO. MONTANA

Letters unclaimed at office, Butte, Mont. Mine near Apex, Beaverhead county, Mont.

Officers: Thos. F. Stephens, pres., treas. and gen. mgr.; Wm. Robertson, v. p.; Thos. W. Ellis, sec.; A. H. Stephens and T. J. Ellis, directors, at last report.

Inc. July, 1904, in Montana. **Cap.** \$450,000; shares \$1.50 par; non-assessable; issued, \$228,000.

Property: the Indian Queen mine, 2 claims, 40 acres, and a 3-acre mill-site, in the Utopia district, Beaverhead county, owned jointly by this company and the Anaconda Copper Mining Co. The mine shows granite, intrusive in quartzite and dolomite, having 2 contact deposits between granite and limestone, of 8 to 10' average width, carrying malachite, azurite and chalcocite, estimated by management to average 8% copper. 10 to 12 oz. silver and \$1 to \$4 gold per ton. Mine was opened 1867, and has been worked intermittently by lessees.

Development: by shafts of 150' and 220', and 820' tunnel, with about 1,600' of workings. Idle at last accounts.

INGERSOLL MINING CO. MONTANA

Idle. **Address:** Allen Pierse, Great Falls, pres.; or E. A. Shaw, Great Falls, sec.

Is a silver-lead property in the Little Belt range.

INTER-MOUNTAIN COMPANY MONTANA

Office: 26 Pittsburgh Bldg., Helena, Mont., at last report.

Company is a mining exploration and exploitation organization incorporated in 1909, to develop a large silver mine somewhere in Montana, and officers stated that it had gold mines to sell.

INTERMOUNTAIN ENG. & DEVELOPING CO. MONTANA

Address: L. S. Ropes, mgr., Helena, Mont.

Property: the Bell Boy gold mine in Stemple district, Lewis and Clark count.

INTER-MOUNTAIN MINING CO.**MONTANA**

Address: 518 Ziegler Bldg. Spokane, Wash.; and care P. L. Hoffman, supt.; Iron Mountain, Mineral Co., Mont.

Directors: John Hays, R. G. McIntosh, F. C. Daeufer, sec-treas., with W. G. Griffith and Donald Callahan. E. C. Gnaedinger, supt.

Inc. 1915, in Montana, to take over the holdings of the Amador Copper & Gold Mining Co. Cap. \$2,000,000; \$1 par; assessable, 1,621,800 issued. An assessment of 1c. was levied in November, 1918, others in March and June, 1919., also ½c. in April and Sept., 1920. Shares 2c. asked, 1920.

Dividends: \$16,218 in 1916; none since.

Property: 6 patented and 9 unpatented claims on Cedar creek, 10 miles S. of Iron Mountain, Mont., said to show a vein of copper and silver ore in quartzite, dipping 60° with E. W. course. Shoots are from 2' to 11' wide. Average assay of sorted ore is 15% copper.

Development: by tunnels, shaft, etc., totaling over 8,000', A 4' to 6' orebody was opened on the 400' level for 250', carrying good copper ore and a 100' winze sunk on this shoot in July, 1919. Reserves are given as at least 30,000 tons. No. 1 tunnel was extended during 1920, disclosing a promising vein.

Equipment: includes 250 h. p., water power and 450 h. p. electric power, 2-mile flume and pipe-line, delivering water under a 310' head, with 2 hoists, compressor, pumps, saw-mill, and about 15 mine buildings. A 100-ton concentrator, employing a Callow flotation unit, treats the ore.

Production: \$100,022, in 1917, making \$212,714 in all, plus shipments worth \$2,000 or over per carload at intervals in 1918 and 1919.

Employs 75 men normally, when output is 150 tons daily.

INTERNATIONAL MINING CO.**MONTANA**

Office: Bozeman, Gallatin county, Mont.

Officers: J. W. Wilcox, pres.; S. J. V. B. Henderson, v. p.-treas.; Samuel F. Walker, sec.-gen. mgr., with Harvey M. Farriss and A. Badgley, directors, all of Bozeman, Mont.

Inc. Oct. 2, 1902, in Montana. Cap. \$600,000; shares \$100 par; fully paid and non-assessable.

Property: 12 claims, 240 acres, well timbered, in Springhill mining district, Gallatin county, Mont., said to show gneiss, quartzite and shale, fissure and contact veins, opened by 380' to 1,800' tunnels, and 5 shafts of 80' to 800', showing sulphide ores.

Company developing an ore shoot, at last accounts, said to carry 26% lead, 8 oz. silver, and \$8 to 67 gold per ton. The Lone Star group adjoining the International is practically under the same ownership. Letters to company unanswered.

IOWA-MONTANA DEVELOPMENT CO.**MONTANA**

Probably dead; letters sent former address, Fraser, Iowa, and mine address, Jefferson Island, Madison county, Mont., returned unclaimed.

Officers: at last accounts, T. J. McGinnis, pres.; F. H. Hoeffner, sec.; E. H. Daniels, treas.; all of Fraser, Iowa, and John Young, J. D. Morrison, F. Wood, directors. J. D. Morrison, mgr., Butte, Mont.

Inc. June, 1915, in Iowa. Cap. \$75,000; shares \$50 par. Is a leasing company. Company obtained a 3-year lease, 1915, on the Bismark mine of the Montana-Illinois Copper Mining Co., which was absorbed in 1918 by Liberty-Montana Mines Co. The Iowa Mountain is probably out of business.
