According to the U. S. Geological Survey, the mine is 23 miles S. of Jefferson Island, in the Tobacco Root Mountains. Molybdenite was found in the ore shoot to a depth of 600', occurring as a film on quartz.

IRMA MINES (THE)**MONTANA**

Address: Cooke, Mont. Active in mid-1921.

IRON MASK LEAD MINING CO.**MONTANA**

Address: Troy, Mont.

Officers: G. F. Stannard, pres.; H. W. Dickey, v. p.; Robert Gregg, sec. Cap. \$150,000; \$1 par; assessable.

Property: 4 claims, 10 miles S. of Troy, showing veins carrying zinc, and lead-silver ore, also manganese. Development by tunnels. Leased to G. L. Goshow, of Indiana, at last accounts.

IRON MOUNTAIN TUNNEL CO.

MOUNTAIN

Purchased in July, 1915, by Federal Mining and Smelting Co., which see.

IRONSIDE MINE

MONTANA

Owned by Sheils & Ironside Mining & Milling Co., which see.

JACK RABBIT MINE

MONTANA

Address: Warren Graeter, Argenta, Mont.

Property: a well-known mine in the Argenta district of Beaverhead county, owned by the Conda M. Co., sold for \$1,800 at sheriffs sale in Jan., 1921, to Warren Graeter. Prospects are said to be good.

JARDINE GOLD MNG. & MLG. CO.

MONTANA

Address: Silver Bow Block, Butte, Mont.

Officers: W. S. Hunnewell, pres.-treas.; H. C. Bacorn, v. p.- gen. mgr.; with J. E. Stevenson and F. W. Bacorn, S. D. Bacorn (sec.), directors.

Inc. 1914, in Arizona. **Cap.** \$2,000,000; \$1 par. The company has no bond issue or debts and is financed for all current needs. It has spent over \$250,000.

Property: 26 claims, 23 patented, containing 353 acres, at Jardine, Park county, Mont. Title was obtained by present company in 1917, workings cleaned up and re-timbered, and new development work done adding largely to ore reserves.

Geology: quartz veins in schist, with general north and south strike and westerly dip. Ore is partly oxidized and partly arsenopyrite.

Development: over 3 miles of underground workings including 21 cross-cut tunnels and drifts on veins.

Equipment: includes belt-driven compressor, 40-stamp mill and cyanide plant for gold ore, 20-ton concentrator for tungsten ore, hydro-electric plant now generating 325 h. p.; all machinery at mines and mills being operated by electric power; offices, residences, boarding-house and bunk-houses for employees,

Production: a 20-ton concentrator was operated for the first six months of 1918, producing tungsten concentrates, together with crude tungsten ore, of a value of \$52,000. During the latter half of 1918 the concentrator treated 3,500 tons of gold ore that ran from \$10.03 to \$12.98 per ton. In 1920, the mill was treating 150 tons daily, netting \$15,000 per month, but was closed in December.

JEFFERSON & TETON MINING CO.

MONTANA

Address: Clancy, Mont.

Inc. 1920, in Montana.

Property: 7 claims, including the Willard mine on Warm Springs creek, near Clancy, Jefferson county. Ore carries silver, gold, and lead.

Development: by 150' shaft. Work underway in 1921.

JEFFERSON MINES CO.

MONTANA

Address: Angus McLeod, care Butte & Superior Mng. Co., Butte, Mont.

Officers: H. Gysbert Klenze, pres.; Angus McLeod, v. p.; J. K. Claxton, sec.-treas.

Inc. in Montana. **Cap.** \$100,000; par 10¢.

Property: 4 groups of claims, 700 acres, in Whitehall district, Jefferson **Development:** by 300' shaft.

JEFFERSON MONTANA COPPER MINES CO.

MONTANA

Address: Corbin, Jefferson county, Mont. C. K. McCormick pres.; P. A. Bell, supt.

Property: 16 patented claims, in Colorado mining district, 3 miles from Corbin, shows fissure veins, 3-5' wide in granite. The course of the ore-body is N. E.-S. W., with dip of 60-70°. Developed to depth of 540' by vertical shaft, and electric power installed.

No recent information available.

JEWELL MINING & MILLING CO., LTD.**MONTANA****Office:** 436 Peyton Bldg., Spokane, Wash.**Officers:** C. E. Morby, pres.; C. C. Baldwin, v. p.; J. A. Powers, sec.**Cap.** \$250,000; 25c par; non-assessable.**Property:** 10 claims and millsite 1½ miles from Eddy, Sanders county, and 36 miles E. of Burke, Idaho. Examined by F. C. Calkins and D. F. McDonald. **Geology:** 20' vein is in quartzite and shale. Three shoots of silver-lead ore have been opened.**Development:** is by tunnels, one 1,300' long.**Equipment:** 2-drill compressor, oil engine, jackhammers, pump and living quarters for 25 men. Work was resumed in March, 1920, after several months shut-down.**JIB MINING CO.****MONTANA****Office:** Balfour Bldg., San Francisco, Calif. **Mine address:** Basin, Jefferson county, Mont.**Officers:** A. E. Spriggs, pres.; C. G. Weidinger, sec.; Sol Genzberger, treas., with J. F. Cowan, and A. E. Spriggs, directors; O. F. Brenton, supt.; F. K. Derby, cons. eng.**Inc.** Nov. 19, 1917, in South Dakota. **Cap.** \$3,000,000; \$3 par; 600,000 issued. Security Transfer Co., New York, transfer agent and registrar. Annual meeting, third Wednesday in November.**Property:** the Hope, Katie and Jib mines, 17 claims, patented at Basin, Mont. Group has been idle for 20 years, after producing \$2,000,000. Reported by owners that 400,000 tons of ore is blocked out. Claims show a fissure vein in granite, 30' wide, with ore that assays 1½% copper, \$2 to \$4 gold, and 4 to 10 oz. silver. Examined by A. A. Blow, A. L. Pierce, R. M. Atwater, Jr., F. K. Derby, W. G. Nebeker and J. C. Adams.**Development:** by vertical shaft 600' deep, and 6,000' of workings. Some rich ore was opened on the hanging wall, August, 1919, near water-level, 35 tons yielding \$13,374, and 620 pounds, \$6,200. The average from this place is said to be \$150 per ton, but this rich ore is irregular in occurrence.**Equipment:** includes electric power obtained from the Montana Power Co., two 600-gal. centrifugal mine pumps, 250-h. p. hoist, bought from the Granite Bi-Metallic Company, and two 2,300 cu. ft. compressors. The old mill is to be re-built and modernized by adding a flotation plant of 2 units, making daily capacity of 300 tons.

Company has been financed by Utah capital. Ore was being mined for shipment in October, 1919. Lessees did most of the work during 1920, and opened good ore at 300 and 400' depth. There were 35 men employed early in 1921.

KALISPELL-TROY MINING CO.**MONTANA****Address:** Leonia, Idaho.**Officers:** D. R. Keeler, pres.; G. F. Stannard, v. p.; A. W. Keeler, sec.-treas., Kalispell, Mont., with T. S. Hand, J. W. Carey, J. Brinkhouser, W. Hogan and Stanley Wood, directors.**Cap.** \$60,000; 20 cents par.**Property:** 21 claims, 13 miles W. of Troy, 1 mile from Leonia, Idaho. Ore carries lead, silver, and zinc. No recent data available.**KEATING GOLD MINING CO.****MONTANA****Address:** J. A. Murray Estate, Butte, Mont.

All the property was sold under mortgage foreclosure in July, 1917, and in July, 1918, the statutory year for redemption had expired. Property was bid in by the late J. A. Murray, Butte, Mont., who was the holder of company's bonds, and company is entirely without cash or assets of any kind, but has not been dissolved. Thus ends the life of a company that spent six years mining a strong vein with good values, producing several million dollars worth of ore, but without a profit to the company. See description in Vol. XIII.

KENDALL LEASING CO.**MONTANA**

Address: Kendall, Mont. Owned by A. B. Fox and S. D. Whipple. Frank Bryant, supt., Kendall, Mont.

Has lease on the Kendall mine, owned by the Barnes-King Dev. Co. Work confined to ground above 100' level. Normally employs 15 men and has 175 h. p. electric equipment. Mined 7,152 tons of gold ore in 1918.

KING & QUEEN MINING CO.**MONTANA**

Now Pitt Copper Mining Co., which see.

KING SOLOMON MINING CO.**MONTANA**

Dead. See description in Vol. XIII. The mine in the Lump Gulch district, near Helena, was operated by P. A. Danaker and others in 1920, who shipped some ore.

LADYSMITH COPPER MINING CO.**MONTANA**

Company dissolved. Fully described Vol: XII. Formerly operated near Elliston, Powell County, Mont.

LAST CHANCE COPPER MINING CO.**MONTANA**

Probably dead; letters sent officials returned unclaimed.

Officers: Geo. Champagne, pres.-mgr.; Saltese, Mont., Sterret Napton, sec.-treas, Missoula, Mont.

Cap. \$1,200,000, shares \$1 par.

Property: 6 claims, 2 patented, adjoining the Ben Hur mine, 4 miles north of Saltese, Mineral county, Mont.

Developed by shallow shafts and a 2,300' tunnel, the workings said to show a 30' vein of silver lead ore faulted in the tunnel, but a winze shows an 18" streak of ore said to carry about \$100 per ton in values. Company reported past shipments of about \$150,000.

LEE MOUNTAIN MINE**MONTANA**

Address: W. Lee Heidenrich, Rimini, Mont. Also R. P. McDonald, attorney, Spokane, Wash.

Property: 6 patented claims at Rimini, Vaugh district, Lewis and Clark county reported to be bonded to New York capital in 1920. Located in 1864.

Geology: a quartz vein in quartz-monzonite, dipping 70° with course S. 70° W. Ore is a sulphide carrying 0.15 oz. gold, 12 oz. silver, 6% lead, and 4% zinc.

Development: by 1,200' tunnel to depth of 660', and 3,000' of workings. **Equipment:** steam power, compressor, pump, etc.

Production: \$1,500,000 in past 40 years. Lessees, in 1919, found small orebody and shipped considerable ore. Further exploration underway in 1920-21.

LEGAL TENDER CONS. MINES CO.**MONTANA**

Address: H. A. Galway, pres., Butte Mont., or Wm. Stussy, sec., Butte, Mont. J. D. Courtney, supt., Clancey, Mont.

Property: in Lump Gulch district, closed in 1920, but reported refinanced, 1921. Quartzose ore containing very rich argentiferous galena, zinblend and rich silver minerals occurred in narrow fissure veins in granite. The output in recent years carried but 25 to 35 oz. silver per ton. A pay streak, 6 to 18" thick, cut on the 400' level in 1920, yielded two carloads assaying 169 oz. and 479 oz. respectively shipped to East Helena smelter. The vein is 4-6' wide, vertical, and merges westward with a "silica reef".

Employs 25 men normally and has 75 h. p. electric power.

Option to Furnace Creek Oxide Copper Co., held 1919, was cancelled.

LERoy GOLD & COPPER MINING CO.**MONTANA**

See same title in Idaho.

LEVIATHAN GOLD MINING CO.**MONTANA**

Address: Lessee, Ben W. Wilson, Jefferson Island, Mont.

Mine is held under \$70,000 bond and lease, by B. W. Wilson, on which payments were made as due in 1919.

Officers: Chas. E. Morris, Pony, pres.; J. L. Templeman, v. p. Miner

Blk., Butte, Mont.; Wm. Morris, treas., Pony, Jas. A. Flint, sec., Pony, Mont.

Property: 6 patented claims, 105 acres, at Mammoth, Madison county, carried an E.-W. vein with 45° dip, cutting through gneiss. Vein shows 4' to 20' of copper-silver ore with gold values.

Development: by 700' tunnel and 2,000' of workings giving depth of 400'

Equipment: includes hydro-electric power plant, compressor, and 100-ton concentrator.

Appears to be another name for Leviathan Copper Mining Co., controlled in Waterloo, Iowa. A report by W. H. Winchell estimated reserves at 12,000 tons of \$30 ore on dump and twice that amount blocked out in mine. His sampling gave ore content as 2.7% copper, 4.1 oz. silver and \$17.20 gold per ton. Mine is an old one, located 1864. Company was developing property as well as mining and shipping ore at last accounts.

LIBERTY COPPER CO.

MONTANA

Office: J. F. Ferguson, Wallace, Idaho.

Officers: F. J. Luedke, pres.; Charles Luedke, v. p.; J. F. Ferguson, sec.-treas., with C. B. Spear, directors.

Cap. \$150,000; 10 cents par; assessable; 800,000 issued. Annual meeting, third Monday in June.

Property: 8 claims, 160 acres, near the Amazon-Dixie mine, Mineral county, Mont., shows a quartzite cut by a fissure vein with auriferous copper ore. Worked by tunnels. A prospect that was closed down in 1919.

LIBERTY METALS CO.

MONTANA

Address: Troy, Mont.

Officers: G. M. McKenna, pres.; J. T. Sugars, v. p.; J. F. Powers, sec.-treas.; also directors.

Inc. May 10, 1919, in Montana. **Cap.** \$500,000; \$1 par; 325,000 issued. Annual meeting, third Tuesday in August.

Property: 8 claims, 150 acres, 51 patented, 5 miles south of Troy, Mont. About \$6,000 has been spent on property to date.

Geology: main vein is a contact between a diabase dike and Burke quartzite, and has been traced on surface for 2,200'. Ore carries gold, silver, copper, lead and manganese. Ten other veins are said to be exposed and to vary from 6 to 48" wide.

Development: by 3 tunnels totaling 250' in length. A steam plant, compressor, and drills are to be installed.

A prospect in which some rich ore was reported opened up in 1919.

LIBERTY MINING CO.

MONTANA

Formerly Mike Horse Mining Co., reorganized May, 1919.

Described in Vol. XIV. Mine is now under bond and lease to the Sterling M. & M Co., which see.

LIBERTY-MONTANA MINES CO.

MONTANA

Address: B. W. Wilson, gen. mgr., 552 Phoenix Bldg., Butte, Mont.

Officers: J. W. Brown, pres., R. F. D. No. 8, Waterloo, Iowa.

Inc. 1918, in Montana. **Cap.** \$3,000,000; \$1 par.

Property: (1) the Mammoth mine, 3 patented claims and one millsite, 55 acres, at Mammoth, Madison county, Mont., formerly owned by the Leviathan Gold Mining Co. of Pony, Mont., (2) the Bismarck mine, 10 claims, millsites, and placer ground, 20 miles from Jefferson Island, and (3) the White Chief mine, 8 claims, near the Bismarck. Water and timber are plentiful. Country is mountainous.

Development: the Mammoth mine has 3 tunnels cutting strong gold

surface changing at 200' in depth to chalcopyrite ore with gold and silver values, averaging \$28 per ton. No. 1 tunnel is 500'; No. 2, 700'; No. 3, 550'.

Equipment: an electric transmission-line from the Madison Power Co.'s line extends to the Mammoth mine, 7 miles distant, a saw-mill, cutting lumber for new 200-ton flotation concentrator, and full equipment for mine and mill. An aerial tram is planned to carry ore from the two mines to the Mammoth mill.

The Mammoth mine located 1864, produced gold until 1900, but was hampered by copper in ore. According to J. H. Trerise, the mine has 225,000 tons above tunnel and 212,000 tons on the dump, that will net \$770,000.

LITTLE GOLDIE MINE

MONTANA

Address: M. R. Ostronick, Twin Bridges, Mont., owner and mgr.

Property: 3 claims, 54 acres, in Goodrich Gulch, Madison county Mont., said to show 2" to 18" fissure veins, running E.-W., and assaying as high as \$114 in gold, silver and lead. Ore occurs in gneiss and limestone formation.

Development: by 200' tunnel, several drifts, and raises. Equipped with compressor.

Shipments: in 1915, reported to have averaged \$80 per ton, amounted to \$30,000. Owner estimated 6,000 tons of ore blocked out, at last report.

LIVERPOOL SILVER MINES CO.

MONTANA

Offices: No. 11 Montana Bldg., Helena, Mont.; and W. G. Burns, 27 State St., Boston, Mass. Operated by Eichelberger and Fryberger, Helena. William Murray, supt.

Officers: J. W. Brien, pres., Essex, Ontario; J. F. Quinn, v. p.; J. E. Simpson, treas.; with Ralph Rawlings, C. E. Fryberger, cons. eng.; H. M. Ferry, P. E. Wagner, R. T. Hollis, C. Z. Potter, C. J. Trauerman, Joseph Reinham, H. S. Hirschman, C. H. O. Meyer, H. G. Gallagher and Frank Eichelberger, directors. W. J. Burns, sec.

Inc. May 17, 1919, in Delaware. **Cap.** \$250,000; par 10c.; non-assessable; 2,250,000 issued. Metropolitan Trust Co., Boston, transfer agents and registrar. The U. S. Manganese Corporation owns 50% of the shares, paid for by 8% preferred stock.

A prospectus issued by J. D. Crowley & Co., Boston, shows that the directorate includes several members of the U. S. Manganese Corp. The share selling campaign ended in 1920, and was said to have been "clean and successful in every respect".

Property: the Liverpool mine, 7 patented claims, 80 acres, in the Lump Gulch district, 1½ miles from Clancey. Company took over the Lump Gulch Mining Co. property, May, 1921, for \$100,000, making first payment.

The Lump Gulch tract contains 37 acres, has a 250' shaft and contains the eastern end of the Liverpool vein.

Geology: a fissure-vein in granite, 4 to 7' wide, dipping 85° N. and with E.-W. course. Oreshoots are reported to be 300 and 600' long, with 18" of ore that carries 10% lead and 35 oz. silver.

Development: by 750' vertical shaft and 5,000' of workings. Reserves are officially estimated at 40,000 tons. Shaft is to be re-timbered and sunk to 1,000'. Rich ore was opened on the 750' and 500' levels during 1920.

Equipment: 250 h. p. electric power, geared air hoist, 600 cu. ft. compressor, pump, shops, and quarters for employees.

Operations were resumed in June, 1919, and ore mined from 400 to 750' levels. In September, the old dumps, said to contain 10,000 tons of 9 oz. silver ore, were being sorted for shipment to smelter at East Helena.

Production: by mid-1920, the daily output of ore was about 40 tons. The May yield was 17,000 oz. of silver.

Mine shut down March, 1921, and new company being organized, 1921.

LOST RANCH & TUNNELSITE MINE

MONTANA

Address: Harvey Sullivan, Grant, Beaverhead county, Mont.

Property: 9 claims in the Bloody Dick sections, in Upper Horse Prairie, 5 miles from Brenner, shows gold, silver, lead copper ore in narrow fissure veins (2" to 3') in porphyry. The ore carries brittle silver, argentite and mixed sulphides in streaks 8" to 12" thick, the ore as shipped carrying 44 to 1,300 oz. silver, 4 to 20% copper, 60% lead.

Development: totals 1,200', including 420' tunnel, with 300' back, blocking out 100 tons of ore with 39 tons stoped. No recent returns.

LUKENS-HAZEL MINING CO.

MONTANA

Address: Oscar Nordquist, supt., Libby Mont.

Officers: C. E. Lukens, pres.-treas.; J. H. Town, v. p.; W. Jennison, sec., with H. L. Faust and Oscar Nordquist, directors.

Cap. \$1,600,000; \$1 par; assessable.

Property: 17 claims, 280 acres, all patented, with millsite and water-rights, on Shaughnessy hill, 8 miles S. of Libby, Mont.; is an old property lately re-opened. Formation is quartzite, cut by veins whose ore carries galena, sphalerite, and pyrite.

Development: by 2,000' main tunnel and over 10,000' of workings. The main orebody is said to average 5' in width for a length of 1,130'. Reserves are officially estimated as 150,000 tons worth over \$2,000,000, averaging \$8 to \$15 per ton.

Equipment: water, brought 1½ miles through a 36" pipe, drives the 250-ton mill, which contains rolls, jigs, tables and flotation unit.

Production: initial shipment of 3 cars of concentrates to East Helena was made in Jan., 1921. Employs 100 men.

LUMP GULCH MINING CO.

MONTANA

Address: T. J. Chestnut, Clancey, Mont.

Officers: T. J. Chestnut, pres.; G. S. Haynes, v. p.; C. L. Beers, treas.; with A. Munson and R. Wanderer, directors.

Inc. 1906, in Montana. **Cap.** \$500,000; \$1 par.

Property: under lease and bond for \$100,000 to **Liverpool Silver Mines Co.**, May, 1921.

LUMP GULCH SILVER MINES CO.

MONTANA

Office: 37 Union Bank Bldg., Helena, Mont.

Mine address: Clancey, Mont.

Officers: Gustave Strobel, pres.; R. E. Smith, v. p.; R. A. Weisner, sec.-treas.; Geo. J. Shaffer, with J. W. Soltzenbach, E. E. Smith and R. A. McCrav, directors. W. F. Word, cons. engr.; H. B. Emigh, efficiency engr.

Inc. Sept., 1919, in Montana. **Cap.** \$1,000,000; \$1 par; non-assessable; 500,000 issued. Nat'l. Security Co., New York, registrar and transfer agent.

Property: the Muskegon, Mariner and Mary Tate mines, 14 claims adjacent to the Free Coinage mine of the Amalgamated Silver company, at Lump Gulch, Jefferson county, 2 miles from Clancey and 11 miles S. W. of Helena. The elevation is 4,300 to 5,000'.

Company also has lease and bond on the Baby Helena mine adjoining the Liverpool.

Development: by a 200' shaft on the Mariner. At 100' crosscuts are said to have cut 4 veins, the main one apparently a continuation of the Liverpool-Free Coinage-Little Alma vein. The Muskegon claim has a 260' shaft, which was unwatered and connected with the Mariner shaft by a 350' drift in 1920. Some high grade silver ore has been opened.

The fiscal agents for this company are Curtis, Packer & Co., of New York, the same firm that was so optimistic over the Amalgamated nearby.

LUPFER MINING CO.

MONTANA

Address: Whitefish, Flathead county, Mont.

Officers: George Hoffman, pres. and mgr.; Mike Sullivan, v. p.; Pete Hoffman, sec., with E. Boettcher and John Roeder, directors.

Inc. 1906, in Montana. **Cap.** 500,000 shares; par value 15c; 250,000 issued.

150' shaft, showing a well defined vein of copper ore, 3' wide in porphyry and limestone, said to assay 2% copper, 3 oz. silver with a trace of gold. Has a small steam hoist and air compressor. Idle, owing to lack of funds.

MADDEN SCRATCH GRAVEL MINES CO. MONTANA

Idle since 1916. Address: Helena, Mont.

Officers: Jas. Madden, pres.; Peter Scharenbroich, v. p.; Wm. Muth, sec.-treas., above, with Theo. Starter, L. P. Wells and E. Edwards, directors. Inc. March 16, 1916, in Montana. Cap. \$300,000; \$1 par; outstanding 170,000. Annual meeting, third Monday in June.

Property: 3 patented claims, 50 acres known as the Jacquemin group, in the Scratch Gravel Hills, 8 miles from Helena, said to show gold ore in fissure veins in granite. The claims are said to have been worked in a haphazard manner by Jacquemin.

Development: 160' incline shaft, and 340' tunnel.

MAGINNIS MINE MONTANA

Address: W. A. Young, lessee, Gilt Edge, Mont.

Mine owned by Dartmouth Land Co., of Great Falls, 75%, and A. M. Halter, 25%; is a well known gold mine, which produces 100 to 150 tons of rich ore yearly. Normally employs 10 men and has 60 h. p. steam and gasoline power.

MAMMOTH MINING CO. MONTANA

Address: George Austin, Spokane, Wash.

Officers: A. H. Featherstone, pres.; G. J. Heyfron, v. p.; John Ferguson, sec.-treas. with Dr. W. A. Smith, Jesse Freeman, Dr. C. R. Mowery directors. J. Austin, mgr.

Cap. \$125,000; 10c par; assessable. Annual meeting, first Thursday in August.

Property: 7 patented claims, 7 miles N. E. of Bonita, Missoula county, containing veins from which ore was shipped that returned 28 to 37% lead and 5 to 6 oz. silver.

Development: by shafts, one 124' deep, tunnel, etc. Assessment work only done in 1920. Mine is close to the railway.

MARYSVILLE GOLD MINING CO. MONTANA

Idle. Address: Ted Collins, Helena, Mont. Mine office; Marysville, Mont.

Officers: Geo. O. Freeman, pres.; Ted E. Collins, sec.-treas.; L. S. Ropes, supt.-cons. eng.

Inc. 1911, in Montana. Cap. \$1,000,000; shares, \$1 par; 527,000 issued. Bonds: \$350,000, 6-year, 8%, authorized up to October, 1917. Taken off New York Curb, August, 1918.

Property: the Annie Dillon mine, 30 claims, 430 acres, in Marysville district, adjoining the Belmont. Company had \$10,000 in treasury at last account.

Development: mainly by tunnels. About \$120,000 said to have been spent in exploration.

Option held by Marysville Gold Mining Syndicate on the property was forfeited, 1921.

MCCAFFREY MINING & SMELTING CO. MONTANA

Address: S. B. McCaffrey, pres., La Salle & Bureau R. R. Co., La Salle, Ill.

Company owns the California, Phil Sheridan, New Cottage and East Doddington claims, in the Cataract district. Jefferson county, Mont., 2½ miles from Basin. Development work slight, though veins are well defined. Idle for several years but leasing property under consideration.

MEXICO-COEUR D'ALENES MINING CO. MONTANA

Letter returned from former address: R. N. Tutt, Kansas City, Mo.

Officers: L. F. Burnham, pres.; Stella Resium, v. p.; R. N. Tutt, sec.-treas.; Joe Kran, asst. sec.

Cap. \$1,000,000; \$1 par. Annual meeting January 10.

Property: 5 claims on Swamp creek, Sanders county, 18 miles E. of Burke, Idaho, with veins of lead-silver ore of usual Coeur d'Alene type.

Development: by 232' tunnel. No recent work reported.

MIKE HORSE MINING CO.**MONTANA**

Reorganized May, 1919, as **Liberty Mining Co.**, which has leased its property to the **Sterling M. & M. Co.**, which see.

MINES DEVELOPMENT CO.**MONTANA**

Out of business. Had bond and lease 1915-16 on **Moffit Group**, which see. Fully described in Vol. XII, Mines Handbook.

MINES OPERATING CO.**MONTANA**

Address: Alfred Frank, Newhouse Bldg., Salt Lake City, Utah. **Mine address:** H. A. Frank, sec., Daly Bank Bldg., Butte, Mont.

Officers: Alfred Frank, pres, and gen. mgr.; C. W. Whitely, v. p.; with John MacGinniss, and E. L. Newhouse, Jr., directors; B. H. Grant, supt.

Inc. 1916, in Delaware. **Cap.** \$100,000; \$100 par.

Property: a bond and lease on the Bullwhacker and Butte-Duluth (which see) mines on E. side of Butte. In 1919 and 1920 daily output to the Anacoda company's leaching plant was 500 tons of 2% ore.

Property shut down since May, 1921, will reopen in 1922.

MISSOURI MINE**MONTANA**

Address: J. H. Pankey, via Virginia City, Madison county, Mont.

Property: a few miles N. E. of Virginia City, is said to have shipped high-grade gold-silver ore for years. In 1918, a 10-stamp cyanide mill was installed. No recent information.

MITCHELL & MUSSIGBROD, INC.**MONTANA**

Address: Louis Mussigbrod, pres., Garnet, Mont.; J. Mokenland, v. p., Warm Springs, or Albert Galen, sec., Helena.

Property: a mine in First Chance mining district, Granite county. Has 60 h. p. steam plant and K. & K. flotation plant, installed 1919. Operated 1919, treating gold-silver ores in a 10-stamp mill.

MOFFIT GROUP**MONTANA**

Owner: J. W. Moffit, Box 6, Butte, Mont.

Mine: 8 miles from Twin Bridges, Madison county, Mont., was under bond and lease 1915-16 to Mines Development Co., now out of business.

Ore: said to average 2% copper. Over 600 tons have been shipped. Idle several years.

MOHAWK MINING CO.**MONTANA**

Address: S. G. Torgerson, Cooke, Mont. Apparently succeeds **Republic Mining Co.**, which see.

MONARCH MINING & POWER CO.**MONTANA**

Address: Eichelberger & Fryberger, operators, Montana Block, Helena, Mont.

Officers: P. N. MacDonald, pres.; J. E. Burgess, v. p.-treas.; Dr. C. E. Richardson, sec., with R. M. Davy, C. E. Fryberger, and Frank Eichelberger, directors. Charles Anderson, supt., Elliston, Mont.

Inc. Dec. 21, 1918, in Delaware. **Cap.** \$100,000; \$10c par; all issued. Metropolitan Trust Co., Boston, transfer agents and registrar. The U. S. Manganese Corporation owns 51%.

Property: 20 claims, 370 acres, 14 miles S. of Elliston, Mont., on W. slope of Bison mountain.

Geology: a fissure-vein in granite, 8 to 10' wide, with 80° N. dip and S. 82° E. course. Ore-shoots are 310 and 600' long, and carry \$1.50 gold, 12 oz. silver, 10% lead, and 1.3% copper.

Development: by 400' and 1,400' tunnels, to be extended; and 3,500' of workings, opening mine to depth of 1,200'. Reserves blocked out are given as 38,000 tons, and a total of 62,000 tons, averaging \$16 per ton.

Equipment: steam power plant, 600 cu. ft. compressor, hydro-electric plant, and jig-back aerial tram. A 200-ton flotation mill was built in 1919.

The mill operated during part of 1920, but in Jan., 1921, work was suspended, due to lack of funds.

Production: smelter returns from previous owners totaled \$600,000. Ore shipments of 25 tons daily resumed in October, 1919.

Company is connected with the Liverpool Silver Mines Co., which see, both re-opening old mines. The public is offered stock by Boston brokers whose publicity agent is a busy and hard worker, with a lively imagination.

MONITOR TUNNEL CO.

MONTANA

Company defunct. See Vol. XIV.

MONTANA-CLINTON COPPER CO.

MONTANA

Company forfeited bond on claims and the property was surrendered to original owner, C. L. Friederichs of Helena, Mont. Company shipped 168 carloads of ore netting \$140,000 at smelter up to October, 1914. See full description in Vol. XIII, of this Handbook.

MONTANA CONSOLIDATED COPPER CO.

MONTANA

Office: 51 Wall St., New York.

Officers: J. V. Allen, pres.; E. P. Haas, v. p.; J. A. Clark, sec.; T. F. Lee, treas.

Inc. 1906, in Maine. **Cap.** \$1,000,000; shares \$1 par; all issued.

Property: the Comet and Grey Eagle mines, 699.73 acres in the Cataract district, about 7 miles N. W. of Boulder, Jefferson county, Mont.

Ores: are mainly galena and sphalerite with associated pyrite and chalcocopyrite, and the Comet is popularly credited with having yielded a gross output of \$13,000,000. **Ore reserves:** said to be 1,350,000 tons, averaging \$20 per ton.

In 1915 M. K. Rogers, of Los Angeles, Cal., took an option on 75% of the capital stock and began an active rehabilitation of the mine and mill. Soon afterwards the New York brokerage firm of Baruch & Co., since dissolved (bankrupt), acquired minority holdings and began advertising the venture; they succeeded in driving the stock up to nearly \$2 a share, in the belief that Rogers stock was securely escrowed, when suddenly a large block of stock was thrown on the market and quotations dropped to negligible levels.

The Comet mine was unwatered in 1917, and company was said to be prepared to spend \$100,000 in mine development. Crosscuts from the 976' shaft have never been driven far enough to reach the main vein on the lower levels.

The vein is a large one and the property promising enough to warrant deep development. Clark, Dodge & Co. were said to be interested in the property, but have publicly disclaimed any interest whatsoever in the stock on the market.

The company's holdings were acquired and exploration undertaken in 1907 on the report of A. A. Blow, in which the hope was expressed that copper ores in paying quantity would be found in depth. The 1917 activity was the result of the abnormal price of zinc, and work at the mine was subordinated to the retreatment of the 100,000 tons of tailings from the old mill for extraction of their zinc content. The geology is described in Bull. 527, U. S. G. S., p. 114, 1913.

The property has a decided speculative value as a mine. In 1918, the 400 and 500' levels of mine were reopened, and the mine produced 100 tons of ore daily; in 1919, development was continued on the 600' level, and the mine yielded 20 to 25 tons daily, the ore being hauled to the G. N. railway for shipment. A 150-ton mill was planned. The Comet was closed down Aug., 1919, but was reopened and shipping in June, 1920, as the silver content of the ore was ample to pay expenses.

MONTANA COPPER-SILVER CO.

MONTANA

Address: E. R. Purnell, supt., Helena, Mont.

Mine in Scratch Gravel hills, Lewis and Clark county, Mont., 8 miles

from Helena, shows quartz veins in quartz-monzonite, carrying ores with pyrite and chalcopyrite and gold-silver values.

Development: by shaft and drills. Equipped with hoist. Idle at last accounts.

MONTANA GOLD HILL MINING CO. MONTANA

Probably dead. Letters unclaimed at former address: 609 - 1st Ave., Spokane, Wash.

Officers: E. V. Lambert, pres.; A. G. Benson, v. p.; J. W. Sarginson, sec.-treas.

Cap. \$100,000; 10c par.

Property: 7 mining claims and a millsite 138 acres, in the Deep Creek district, 14 miles from Iron Mountain and Superior, Mineral county. Surface exposures are said to be encouraging.

Development: by tunnels aggregating several hundred feet, opening some \$22 gold ore.

Equipment: includes smithy, sawmill, dwellings, and 50-ton mill completed in November, 1919.

MONTANA-ILLINOIS COPPER MINING CO. MONTANA

Absorbed by **Liberty-Montana Mines Co.**, which see.

MONTANA MANGANESE CO. MONTANA

Operated the Sharktown mine of the **Beaver Creek Mng. Co.**, in Philipsburg district, during 1916-17.

MONTANA MILLING & SMELTING CORP. MONTANA

Address: Gustaf Johnson, pres., Cone Butte, Mont.

See **Bliss Mining Co.** Organized to put up a 250-ton mill in the Cone Butte district, Fergus county, Mont.

MONTANA MINES CO. MONTANA

Formerly the **Beaverhead Montana Copper Mining Co.**, whose holdings were taken over, share for share.

Address: care Ray A. Cobban, Butte, Mont., sec.-treas., at last accounts.

Cap. \$100,000; shares \$1 par. Company obtained a lease and bond on the old Jack Rabbit mine at Argenta, Beaverhead county.

Development: by a 3,025' tunnel driven to cut a mineralized diorite dike.

In 1917 company shipped ore that returned 10% copper and 12 oz. silver.

MONTANA MINING ASSOCIATION MONTANA

Senator C. S. Muffy, pres.; Winston, Mont; Copeland C. Burg, secretary, Helena, Mont. Association does no mining, but was organized in 1919 to aid the industry of the State.

MONTANA MOLYBDENUM CO. MONTANA

Address: Chico, Park Co., Mont.

Property: in Emigrant canyon, 5 miles from Chico. An open-cut and 300' tunnel developed a deposit containing thin veinlets of molybdenite in a decomposed porphyry. Two small concentrating mills, one employing flotation, gave indifferent results.

MONTANA MORNING MINING CO. MONTANA

Address: 514 Hyde Block, Spokane, Wash. Stanley T. Wood, mgr., Troy, Mont. and 353 Munsey Bldg., Washington, D. C.

Officers: Jos. Rosslow, pres.; W. W. Dook, v. p.; E. W. Smith, sec.-treas. Stanley T. Wood and D. S. Wood, directors.

Inc. 1915, in Washington. **Cap.** \$300,000; 20c. par; 1,006,000 shares issued. Transfer office as above.

Property: 8 claims, 4 miles W. of Troy, Lincoln county, reported to show 3 well defined orebodies in a contact deposit partly developed by 1,000' of workings to depth of 225'. Ore opened contains copper, gold, lead, zinc, and silver.

The mine closed down since 1917, was to be reopened late in 1921 and ore shipped to the Snowstorm mill.

MONTANA OREWAY MINING CO. MONTANA

Address: Wm. P. Jahnke, Wisdom, Mont., pres. and mgr. **Mine office:**

Officers: W. P. Jahnke, pres.; J. B. Scott, v. p.; Fred W. Scott, sec., Chicago, Ill.; J. D. Rankin, treas.; preceding, with Frank Kimball, B. F. White and Thos. Fay, directors.

Inc. 1909, in Arizona. **Cap.** \$1,000,000; shares \$1 par; issued, 950,000.

Property: 7 claims, 5 patented, 100 acres, and a 25-acre millsite, known as the Straight Tip group, in the Big Hole basin. Claims show a mineralized diorite dike carrying copper oxide ores, with lead and small values in silver and gold between quartzite and serpentine.

Development: by a 3,025' tunnel. Also 2 shafts 200' apart, one 100' and another 130' deep, showing ore 8 to 36" thick, assaying \$32 per ton in gold, silver, lead and copper.

Equipment: includes a 35-h. p. steam plant, with 1-drill air compressor. There are 6 small buildings. Mill to be erected, at last accounts.

MONTANA RADERSBURG MINING CO.

MONTANA

Address: Townsend, Broadwater county, Mont.

Officers: A. E. Spriggs, pres.; Helena; Fred Allen, v. p. and supt., Townsend; B. E. Mathews, sec.-treas., with Hugh Broderick, C. A. Whipple, Sol. Genzberger and L. A. Sarecky, directors.

Inc. Nov., 1914, in Montana. **Cap.** \$300,000; shares \$1 par; \$100,000 stock donated to treasury. Annual meeting, in November. Operating expenses in 1914-1915, \$10,000; receipts, none.

Property: 5 claims, unpatented, 100 acres, in Broadwater county, said to show gold, silver, lead, zinc ore in a fissure vein in lime and quartzite. Vein has a N.-S. strike, dips 20°, and is said to be 12' wide, with average assays per ton of \$2 gold, 50 oz. silver, 20% lead, 2% zinc.

Development: 500' incline shaft with 1,500' underground workings. Management claims 200,000 tons of probable ore, with 100,000 tons already blocked out.

Equipment: includes a 40-h. p. gasoline hoist. Management states the company is preparing to erect a mill.

Production: said to have been \$300,000 in gold and silver up to the shutdown of property in 1908. Only development work done in 1919.

MONTANA SCOTCH BONNET COPPER & GOLD M. CO. MONT.

Fully described in Volume XIV. Succeeded by **Glengarry Mining Co.**, which see.

Property: sold Aug., 1918 to Robert McKay, who formed the Glengarry Mining Co. Montana Scotch stockholders get \$150,000 or about 5c. per share.

MONTANA SILVER-LEAD MINING CO.

MONTANA

Former address: 605 Dekum Bldg., Portland, Oregon.

Officers: H. G. Lougee, pres.-treas.; R. Naylor, v. p.; O. E. Heintz, sec., with J. Bingham and C. B. Roosa, directors.

Inc. Oct. 17, 1906, in Washington. **Cap.** \$1,000,000; \$1 par; 900,000 issued.

Property: 6 claims, 120 acres, in the Cabinet range, near Libby, Lincoln county, Mont., 16 miles from railroad.

Geology: contact vein in quartzite and slate. Orebody said to be from 2' to 20' wide, and pay-shoot on surface 600' long. Ore is a sulphide, assaying upwards of 5% lead, 5 oz. silver, \$2 gold, and 4% zinc.

Development: by 2 tunnels, 750' and 1,300' long, reaching depth of 1,100' with total workings of 2,050'. Lower tunnel was being extended to cut ore opened above, but mine was shut down in 1918. No later returns.

MONTANA STATES MINING CORPORATION

MONTANA

Office: William Muth, sec.-treas., Bailey Bldg., Helena, Mont. **Mine office:** Alhambra, Jefferson county, Mont.

Officers: R. A. Bell, pres. and gen. mgr.; R. Horsky, v. p.

Inc. May, 1911, in Montana. **Cap.** \$5,000,000; shares \$5 par; issued, 120,000 shares.

Property: 38 claims, partly patented, 700 acres, in the Warm Springs district, 6 miles from a railroad. Country rock is a quartz monzonite of the

Boulder batholith, cut by a rhyolite dikes and showing quartz veins with mineralization along the walls.

Development: by numerous shallow shafts, and short tunnels, with about 2,300' of openings. Ores are mainly galena, sphalerite and tetrahedrite, with a chalcadonic quartz gangue, reported by management to carry up to 22% copper, 10% lead, 8% zinc, 16 oz. silver and \$16 gold per ton.

Idle, 1919.

MONTANA UNITED MINING CO.

MONTANA

Address: J. G. Kirby, pres., Willimantic, Conn.

Cap. 150,000 shares; \$1 par; all issued.

Property: 240 acres, patented, 9 miles east of Deer Lodge, adjoining the Emery mine, shows a fissure vein varying from a streak to 7', average width 3'-4'.

Ore: gold, silver, lead, zinc and much antimony. Said to have 20,000 tons ore blocked out that will average \$20 per ton, including zinc.

Equipment: includes 50-h. p. hoist, 300-cu. ft. compressor, and all necessary boilers, buildings, etc. The mine is idle, needing money for a mill and further development.

MOULTON MINE (NEIHART)

MONTANA

See Cascade Silver M. & M. Co.

MOULTON MINING CO.

MONTANA

Address: W. A. Clark, owner, Miner Blk., Butte, Mont.

Is a W. A. Clark corporation, owning and operating the Moulton mine, at Walkerville, a suburb of Butte, Mont. Has 219 h. p. electric power, employs 20 men outputting about 40 tons of silver, zinc and lead ore daily.

MOUNTAIN VIEW OR JOHNSTON GROUP

MONTANA

Address: Alex J. Johnston, Butte, Mont.

Property: 6 patented claims in Bear gulch, near Twin Bridges, Madison county. The vein is a contact between limestone and granite. Ore is a sulphide, and carries 1½% copper, with some gold and silver.

Development: by 250' vertical shaft and 2,400' tunnel, opening ore to depth of 900'. Idle in 1919.

MT. THOMPSON GOLD MINING & MILLING CO.

MONTANA

Address: E. S. Rinehart, 658 Colorado, St., Butte, Mont.

Officers: Dr. E. S. Rinehart, pres.; John W. Franks, v. p.; C. L. Franks, sec.-treas., with A. L. Thomas and Jos. Hunter, directors.

Inc. 1916, in Mont. **Cap.** \$1,000,000; \$1 par.

Property: 10 claims, the Rhinehart mine, in tract 6,000' long, situated on Cataract Creek, 4½ miles from Basin, on the Great Northern R. R., Jefferson county, Mont.

Geology: ore is a complex mixture of galena, pyrite, some chalcopyrite, and much sphalerite, in small shoots in an E.-W. fissure vein in granite. The ledge is said to be 12' to 25' wide, and is a quartz-tourmaline silver-lead.

Development: by 1,400' Copper Hill tunnel, with 35' crosscut 300' in, exposing one of the main veins and a 160' crosscut at 800' in, tapped the center vein which shows ore on which a raise is being driven to surface.

Equipment: 14-h. p. gasoline engine, small compressor, etc.

Company claims 200,000 tons of ore blocked out that samples \$32 for 500'. Planned erection of mill 1917-18, run by water power. Not favorably regarded as vein is lean and orebodies small. Further work was to be done in 1920-'21.

MT. WASHINGTON MINE

MONTANA

Near Wickes Montana. See Angelica M. & D. Co.

NANCY HANKS & MONTANA MNG. CO.

MONTANA

Office: H. A. Bellows, Suite 711, 53 Park Row, New York. **Mine office:** Garnet, Mont.

Directors: Rudolph Schalk, J. O. Delamater and J. T. Thatcher. **N. O'Connor,** sec; H. A. Bellows, treas.

Inc. Oct. 28, 1916, in Maine. **Cap.** \$1,000,000; \$1 par; all issued. On July 16, 1919, 200 shares were sold in New York at auction for \$23 the lot. On Dec. 22, 1920, at New York, a lot of 15,000 shares sold for \$35. On Jan. 26, 1921, \$19,000 of 10%, first mortgage bonds were sold for \$1,000 the lot.

Property: company holds about 93% of the stock of the Nancy Hanks Mng. & Mfg. Co. Latter company owns 10 claims, 5 patented, at Garnet, Granite county, Mont., 12 miles from Bearmouth.

Geology: quartz vein in granite, from 1 to 8' wide, said to carry an ore-shoot from 100 to 130' long. Ore carries gold, silver, and copper; and is reported to average \$68 per ton, partly in free gold and partly as telluride of gold, associated with pyrite, etc.

Development: by 100 and 500' shafts; total workings about 4,000'. Ore reserves are estimated at 20,000 tons blocked out and stope fillings.

Equipment: 2-cylinder Anaconda hoist, 3-drill compressor, pumps, etc. Proposed at last report, to erect a 20-ton mill and hoist good for 1,500' depth.

Production: the Nancy Hanks mine was opened 20 years ago, and yielded \$500,000 from workings only 80' deep. Mills were built for the treatment of the lower-grade ores, but extreme friability of the ore caused a high percentage of fines in crushing, resulting in a loss of about 40% of the value in milling, with the imperfect methods of that period. After an 18 years' shut-down a new company secured a lease, and option on a large block of shares, sank the shaft to depth of 400', and mined ore yielding between \$150,000 and \$200,000. The present company purchased control completing payment Dec. 4, 1917, sank 100' deeper and extracted about \$130,000 of shipping ore. Due to the high cost of labor and materials the mine was shut-down in March, 1918.

A mill $\frac{1}{2}$ mile away from mine was secured early in 1919, and remodeled. In April, the mine was unwatered and milling begun on low grade ore and that from a 5,000-ton dump. Mill savings were not satisfactory owing to oil flotation being used after Wilflevs and mill was shut down, 1919. Mine fully described in U. S. Geological Survey, Bull. 660-F.

NATIONAL TUNGSTEN & SILVER MINING CO. MONTANA

Supposedly operating near Butte, Mont., but no information obtainable from Butte Chamber of Commerce, or other sources.

NEIHART CONSOLIDATED SILVER MINING CO. MONTANA

Address: Dan Tracy, Pearce Coal Co., Great Falls, Mont.

Officers: Dan Tracy, pres.; J. E. Dawson, v. p. W. A. Brown, treas.; L. M. McDonnell, sec., with William Thornton and F. R. Van de Putte, directors. John Drenville, supt.

Property: the Hartley mine, 7 claims in the Neihart district of Cascade county.

Development: by 300' shaft, with drifts and stopes at each 100'. Has electric equipment. A 4' shoot of ore was opened on the 200' level in Oct., 1919, said to contain an 18" streak assaying 100 oz. per ton. Rich shoots were opened at 200 and 300' in 1920 and several months reserves blocked out.

Production: prior to 1920, about 150 cars of 100 oz. ore when silver was 50 cents an ounce.

About 20 carloads during 1920 realized \$60,000 net; 1921 output averaged 15 cars a month, the ore averaging 70 oz. silver and some gold and lead. About 55 men employed.

NEIHART SILVER MINING CO. MONTANA

Address: R. O. Waller, res. mgr., Neihart, Mont. H. L. Mawry, pres. Butte, Mont.

Property: the Blackbird, Broadwater and Silver Belt mines in the Neihart district of Cascade county. Ore carries silver and lead. Company spent about \$80,000 to the end of 1920.

Development: by shaft and tunnel. A 4,000' drift connects the Broadwater and Silver Belt. Some rich ore was opened on the 100 and 200' levels in 1919. Ore reported 4' wide, with 35% lead and 50 oz. silver.

Mine was closed in Dec., 1920, to await financing.

NEW COPPER SILVER CO.**MONTANA**

Address: Helena, Mont.

Officers: W. C. Bardon, pres.; Z. B. Melborn, v. p.; J. R. Wine, sec-treas. Company acquired the holdings of the defunct Copper-Silver Montana Mining Company at receiver's sale in 1914

Property: 7 claims, 130 acres, adjoining the Lexington and Sacajewea, in the Scratch Gravel district, 1 mile from Great Northern railway, and 5 miles north of Helena.

Geology: claims show granite and monzonite, reported to carry numerous fissure veins, dipping N. W. and S. E. All veins are reported mineralized at surface, carrying melaconite, azurite and malachite. Mine has a 500' shaft, cutting at 300' a vein estimated to average 4.5% copper, 12 to 100 oz. silver, and \$1 to \$55 gold per ton.

Equipment: includes a 30-h. p. steam hoist and a gasoline engine. Operations were stopped during the war, but company hopes to resume in 1922.

NEW VICTOR EMPIRE M. & M. CO.**MONTANA**

Address: P. S. Rose, sec., Libby, Mont.

Officers: W. B. Dilly, Branson, Las Animas Co., Colo., pres.; W. R. Sampson, act. mgr.

Inc. in Montana. Cap. \$60,000; 10c. par; assessable. In Jan., 1921, W. B. Dilly, secured an option on 400,000 shares.

Property: 5 claims, on Granite creek, near the Lukens-Hazel mine, 12 miles from Libby, Lincoln county. Veins are in slate and contain silver-lead ore.

Development: by 1,340' adit to be extended 600' to reach a depth of 950', and get under an iron capping showing on the surface.

NEW VULCAN MINING CO.**MONTANA**

Officers: H. A. Arnold, pres., at last report; G. M. McDonald, v. p.; Hugh Monroe, sec-treas., with O. L. Jones, C. B. Etnier, J. L. Bailor, and B. E. Vaill. directors.

Cap. \$150,000

Property: 7 claims, 7 miles from Superior on C. M. & St. P. and N. P. railroads, Mineral county. Ore carries gold, silver, and copper in veins, developed by 2,000' of tunnels, etc. No recent returns secured.

NEW YORK & MONTANA COPPER MINING CO.**MONTANA**

Address: care E. J. Mathews, 1007 Hoge Bldg., Seattle, Wash. Mine near Corbin, Jefferson county, Mont.

Inc. 1903, in Delaware. Cap. \$1,000,000; shares \$1 par.

Lands: about 250 acres, including the Erickson, Scioto and Copper Gulch groups, opened by 3 two-compartment shafts, said to have a good showing of medium-grade ore. A plant costing \$30,000 was to be erected to treat mine and custom ores, at last accounts.

NEW YORK-MONTANA MINES CO.**MONTANA**

Address: Bannack, Beaverhead county, Mont.

Officers: F. B. Howell, pres.; C. H. Smith, v. p.; P. C. Hanson, sec-treas., with Samuel Barker, Jr., and W. C. Ebaugh, directors. C. W. Stallings, supt.

Is a reorganization of the Bannack Gold Mining Co., which in Jan., 1918, was in financial difficulties. Title and Guaranty Trust Co., New York, transfer agent and registrar.

The first discovery of gold in Montana was made in the Bannack district in 1862, and in that year the placers are reported to have produced \$600,000 in gold. Quartz mining began very shortly after. In 1863 a 6-stamp mill was in operation. A reasonable estimate from available data puts the total production of the district to 1905 at not less than \$4,000,000. From 1905 to 1913 the production reported is approximately \$2,000,000. The ores have been of value almost wholly on account of their gold, but they contain also some silver, lead and copper. The district has been comparatively inactive dur-

ing the last twelve years. The Bannack property has been operated in the past in a desultory manner by owners and lessees.

Property: the Golden Leaf group of 8 patented claims, adjacent to the town of Bannack at an altitude of 5,935', a part interest in 2 claims, the Junction millsite, with underground rights, also an additional area of 200 acres, besides the underground rights in Excelsior and Horace Placer mill-sites. Nearest shipping point is at Grant, 12 miles from Bannack, on the Pittsburgh-Gilmore Railroad, which connects with the Oregon Short Line at Armstead.

Geology: near Bannack, Paleozoic limestone is intruded by a mass of syenite about $1\frac{1}{4}$ miles in diameter. The contact deposit on which the company's claims are located extends around the border of the syenite intrusion. The orebodies are irregular masses in the limestone and vary in width from 1' to 30' and even 40', averaging about 10'. The high-grade bodies vary in length from 50' to 100'; the milling orebodies are of much greater extent. The best ore is usually in the widest parts of the vein, and is for the most part very soft, requiring little blasting though the ground stands well without timbering. A large tonnage of shipping ore, estimated at over \$1,300,000, has been removed from the property, leaving reserves of ore of milling grade. See U. S. G. S. Bull. 574, pp. 72-75.

Development: approximately 17,000' of underground workings to a depth of 600'. The Priscilla tunnel, the main working adit was driven 800' to the contact at an elevation of 90' above creek level, and cuts the contact 250' below surface, though the highest point of contact on the surface will be 800' above the Priscilla tunnel.

Ore reserves: were estimated Feb. 1, 1917, as 130,700, tons, averaging \$7.34 per ton, with a net realizable value of \$632,750. There were also 100,000 tons of probable low-grade ore at \$6, 5,000 tons medium grade at \$20, and 1,000 tons high grade at \$100 per ton, a total of 106,000 tons of a net value of \$535,000. The value is principally in gold, the silver contributing 50c to \$1 per ton. No account has been taken in above estimate of ore below the Priscilla tunnel level. In May, 1918 a winze was said to be down over 160' in rich ore.

Equipment: a well-equipped surface plant, also a reduction plant; the first unit of the cyanide plant has a daily capacity of 150 tons. The plant, which started operations May 5, 1917, uses the continuous counter-current decantation process. Power for mine and mill is furnished by a hydro-electric plant at the mill, water being obtained from Grasshopper creek, $2\frac{1}{2}$ miles above the mill, furnishing a net working head of 39'. During the winter, when water is not available, a Diesel oil engine will furnish the power.

Milling costs were estimated not to exceed \$2 per ton; mine and overhead costs not to exceed \$1 per ton. Average mill-heads were estimated at \$10 per ton, with an extraction of over 90%. A plant of 9,000 tons (yearly) capacity was under erection in 1918.

Mine is well developed and ore reserves, are estimated sufficient for 4 years' operation. The possibility of developing new orebodies seems good, since less than $\frac{1}{8}$ of the mineralized contact area owned by the company has been prospected, and no work goes below the water-level. Using modern methods and under an efficient management, the Bannack mine should make a profit. Shut down and tied up by litigation with farmers over water supply.

NEW YORK-MONTANA TESTING & ENGINEERING CO. MONT.

Office: Montana Bldg., Helena, Mont.

Officers: and directors: Charles E. Fryberger, pres.; Frank Eichelberger, v. p.; Ralph T. Hopkins, sec.-treas.

Inc. Jan. 1917, in Montana. Cap. \$100,000; \$1 par; fully paid and non-assessable; 91,000 issued, all owned by U. S. Manganese Corp. Bonds, \$35,000, first mortgage 7½%, due Jan. 1, 1922. U. S. Manganese Corp. owns \$15,000 of bond issue and \$8,000 of issued is still in treasury of New York-Montana Company. Transfer agent and registrar—company office at Helena.

Dividends: 7% each on April 20 and July 20, 1919.

Property: consists of a concentration mill, and lands at Stedman, a suburb of Helena. This concentrator was operated as a custom plant during the war, treating manganese ore from the mines of the Clark-Montana Realty Co. of Butte, the concentrates being shipped to the U. S. Steel Corp., and the Miami Metals Co. at South Chicago. The company also made a high-grade chemical manganese concentrate used in electric dry cells. The managers expect to develop a market for this class of ore and compete with foreign supplies.

Concentrator remodelled in 1919 to work on sulphide ores from the Rimini district, and will treat other custom ore from the various districts around Helena, including a second-class product of the Liverpool Silver Mines Co. which has a mine at Clancey. The New York-Montana company also conducts an ore testing laboratory, testing ores on both a laboratory and a commercial scale. Plant was closed at end of 1920 until metal prices improve.

NORTH BUTTE EXTENSION DEVELOPMENT CO. MONTANA

See under Butte and Superior Mng. Co., in this volume.

Shares of little value. Company fully described in Volume XIV.

NORTH BUTTE MINING CO. MONTANA

Business office: Suite 3300, 120 Broadway, New York. **Statutory office:** 604 Alworth Bldg., Duluth, Minn. **Mine office:** 14 West Granite St., Butte, Mont.

Officers: Robert Linton, pres.; Joseph B. Cotton, v. p. and gen. counsel; Frederic R. Kennedy, sec.-treas.; Henry B. Paull, auditor; Norman B. Braly, gen mgr.; Lester D. Frink, supt. **Directors:** Robert Linton, Francis DeC. Sullivan, William D. Thornton, Joseph B. Cotton, William F. Bartholomew, G. Ashley Tomlinson, Thomas F. Cole, Henry B. Paull and Frederic R. Kennedy. **Transfer office:** American Trust Co., Boston. **Registrar:** Old Colony Trust Co., Boston. Stock is listed on Boston Stock Exchange.

Inc. April 5, 1905, in Minnesota. **Cap.** \$9,000,000; \$15 par; 430,000 issued.

Comparative General Balance Sheet—Years ending December 31:

Assets

* Deficit.

The net working capital in 1919 was \$1,941,883, compared with \$1,556,870 in 1918. On Sept. 30, 1920, the total was \$1,536,900.

In Feb., 1921, company took a 1.75% interest, (\$700,000) in the Copper Export Association's \$40,000,000 bond issue.

Dividends: paid since organization of company per share: \$1.25 in 1905; \$7.25 in 1906; \$6 in 1907; \$3 in 1908; \$4 in 1909; \$1.10 in 1910; \$1.20 in 1911; \$1.70 in 1912; \$2 in 1913; \$1.50 in 1914; 90c in 1915; \$2.50 in 1916; \$2.50 in 1917, and \$1 in 1918. Total, \$35.90 per share, or \$14,657,000.

Property: consists of two groups of claims, the Speculator group of about 220 acres on Butte Hill, and the East Side of Sarsfield group, about 936 acres. Also owns a smelter-site consisting of 2,216 acres, near Whitehall, and water-rights about 18 miles from Butte, 8 miles from Anaconda, and near the tracks of the C. M. & St. P. Railway and the Northern Pacific Railroad.

In order to give a more regular outline to the company's property and to avoid controversies over extra-lateral rights, exchanges of acreage have been made between the North Butte and Anaconda companies and agreements have been made between the North Butte and Tuolumne companies covering the ownership and rights to certain parts of the Jessie vein. An undivided one-half interest in the Granite Mountain claim was acquired from the Lewisohns, the company to sink at its own expense the existing shaft from the 500' to the 2,000' level and make certain connections and explorations, the title to the shaft remaining with the North Butte company. During 1912 and 1913 company purchased by cash payments and 20,000 shares of the company's stock the entire undivided interests in the lode claims in the Butte East Side mineral area; and in 1917 also purchased the property of the Butte-Monitor Tunnel Mining Co., consisting of 8 claims.

Eastside Group

Eastside Group: It is believed that these claims carry the easterly extension of numerous big ore-bearing veins opened in properties contiguous to this tract. The group lies about 2 miles east of Anaconda hill, and covers the mountain slopes between the bed of Silver Bow creek and the Continental Divide; it is adjacent to the A. C. M. Co.'s Tropic mine, the Butte Main Range Co. and the Pittsmont mine of the East Butte Co. Development work has been in progress at this property for the past 3 years, and includes a 900' four-compartment shaft sunk on the Sarsfield claim at a point about 150' east of the Continental Divide. At this level, over 10,000' of cross-cutting has been done in two directions, to explore the ground on both sides of the Continental fault. Exploration was suspended late in 1920, as the 700' and 900' levels in granite had opened well mineralized veins, but of low grade. Work so far has cost \$500,000, of which \$80,000 was spent in 1920. Deeper work is needed here, as in the adjacent Main Range ground, where rich ore was cut on the 900', 1,200' and 1,600' levels.

Eastside equipment consists of a 125 h. p. electric hoist, compressor.

and two 225 h. p. electric pumps of 600 gal. capacity, one on the 700' and one on the 900' levels.

In 1920 the company shipped several hundred tons of 2.2% copper ore from the Bertha mine.

Speculator Group.

The Speculator Group, or Butte Hill property, is traversed by a number of fault-veins, mostly belonging to the Blue Vein series. These veins carry high-grade ore in shoots, which have thus far been remarkably persistent in depth. The ores carry much primary chalcocite, frequently massive, with considerable quantities of enargite and smaller proportions of other sulphides. All ores carry silver and lesser values in gold. The veins are 'heavy', requiring close attention and timbering with square-sets, monthly timber used being about 1,000,000' board measure. No waste is hoisted, all being used for dry-filling.

Exploration of the vein system has shown the necessity of thorough drifting along the veins at considerable depth, and development on all levels down to the 3,400' has opened profitable orebodies.

The principal ore supply comes from the following veins, named in their order of occurrence from the south boundary of the mine northward; Speculator, Adirondack, Sioux Chief, Edith May, Jessie, Gem, South Croesus, North Croesus, Snowball, and Berlin. Of these, the Speculator, Sioux Chief, South Croesus, and Snowball belong to the older or Anaconda vein system; the others are well-known members of the Blue Vein, or Northwest fault-vein series. The Edith May and Jessie veins were the principal ore producers of the North Butte in the early operations of the company.

The **Edith May** vein is opened on the 400, 600, 700 and 800' levels, and at 200' intervals from the 800' to the 3,600' level. The vein varies in width from 5 to 42', the greater width occurring above the 2,000' level. A good body of ore was opened on the 700' level, where a width of 8½' average 3.6% copper for a distance of 240'. Below the 700' level the vein was of little value until the 1,200' level was reached, after which a marked improvement was noted. Many of the stopes above the 2,000 level were practically all first-class smelting ore for a distance of 1,000'. The 2,000' level showed a slight decrease both in value and in length of ore-shoots. At the 2,200' level the vein splits into a hanging and a foot-wall vein. Metal contents of the foot-wall vein are low below the 2,400' level, while the hanging-wall vein carries good ore on all levels down to the lowest level now opened. On the 3,200' level, 4.1% of ore has been exposed for a distance of 1,086', the average assay being 5.1% copper. The 3,400' level development has encountered ore of a similar character. In 1920, 4½ to 8% ore was opened, crosscutting was done on the 3,600' level, and the vein opened in January, 1921.

The **Jessie** vein ranks next to the Edith May in production. Where opened on the 700' level in the Gem crosscut, the Jessie vein was 10' wide and held bunches of 6% ore. The ore-shoot has been found on all levels from surface to 2,200' level. On the 1,800' level, it is stoped for 1,400', changing in character below this depth and showing considerable spherulite in the drifts to the west. The drift on the 2,000' level opened an 1,100' ore-shoot 6' wide, carrying 6% copper and 7.5 oz. silver. The 2,200' level shows low-grade ore only; the 2,600' drift W. showed 4' of 3.5% copper ore, displaced by a fault 15' from the crosscut and not yet recovered; while 300' of drifting east disclosed only small bunches of high-grade ore. On the 2,800' level the vein where cut by a crosscut from the Granite Mountain shaft showed a total width of 6', with 3' of ore assaying 11% copper and 10 oz. silver per ton.

The **North Croesus** vein is opened by drifts on all levels from the 1,600 to the 2,800', developing a large and important orebody. On the 1,800' level the ore-shoot is 8½' wide, averaging 3% copper and 8 oz. silver per ton; on the 2,000' level it is 300' long, averaging 10' thick, 3% copper and 6 oz. silver.

This shoot has been developed down to 2,200', and on the 2,400' level another shoot, 300' east of the one just mentioned, shows 2' of 3% ore with 7 oz. silver per ton. This shoot has been opened on the 2,600' level for a length of 400', varying in width from 3 to 5', and averaging 3.5% copper. The vein also contains considerable quantities of zinc ore, from which shipments have been made from time to time.

The **South Croesus** vein has been mined from 1,600 to the 2,400' level with the best showing at the 2,200'. Here two shoots are developed, one 270' in length with an average width of 3', the ore containing 5.5% copper and 5.5 oz. silver per ton; the other, 240' long, averaging 3½' in width and assaying 3.2% copper and 4 oz. silver per ton. On the 2,400' level, a 3' body of ore has been exposed for 200', averaging 2.5% copper.

The **Gem** vein showed no ore of commercial importance above the 1,600' level, and the 1,800' level had about 6' of 4.5% ore. It is developed to a small extent on the 1,800', 2,000', 2,600 and 2,800' levels. The vein is irregular in size, and where developed has been broken by cross-faults. The Adirondack vein, like the Gem, shows no commercial ore above the 1,600' level, but has been mined from this horizon down to the 2,800'. On the 2,400' level the ore has been opened for 600', varying in width from 2' to 12', and averaging 4% copper. On the 2,600' level the shoot is over 300' long, varying in width from 4' to 7', and containing 3.8% copper. Drifting on the 3,000' and 3,200' levels has opened 2' of high grade ore for a length of 200'.

The **Snowball** vein has characteristically high silver content. It was first cut on the 1,800' level in 1910, since which time it has been developed and worked from the 1,400' down to the 2,800' level. The shoot varies in length from about 800' to over 2,000'. On the 2,200' level it has been worked for a length of over 2,000', of which 740' averaged 5' of ore assaying 8% copper. On the 2,600' level the shoot is over 1,000' in length, varying in width from 2 to 4' and averaging about 4% copper. On the 2,800' level the vein has been exposed showing 500' of ore 3' wide assaying 4.3% copper and 7½ oz. silver per ton.

The **North Berlin** vein was opened in 1916 on the 2,200' level. Since that time this vein has been developed on all levels from the 1,800 to the 2,800', inclusive. On the 1,800 and 2,000' levels drifting exposed bunches of ore, but none of commercial value. On 2,200' level, an ore-shoot 500' long and 4' wide has been developed, with an average assay of 5.5% copper and 11 oz. silver. On the 2,400' level the shoot now developed is 800' long, of an average width of 3', and assays 4.2% copper and 5.5 oz. silver. On the 2,600' level ore has been exposed for a distance of 450 ft., having an average width of 3½' and assaying 2.6% copper and 3.8 oz. silver. The crosscut on the 2,800' level shows 250' of ore assaying 3.5% copper, and 4 oz. silver per ton.

Development: is extensive aggregating many miles of workings. New development averages about 20,000' per year. The four-compartment Granite Mountain shaft, which is the principal working shaft, is 3,700' deep, with levels opened at the 400, 600, 700, 800, and at 200' intervals down to and including the 3,600' level. In 1915 a new electric hoist was installed at the Granite Mountain shaft, the largest electrically-driven hoist in America. It is capable of operating to a depth of 5,000', hoisting 7 tons of ore, and making a round trip in about 2 minutes.

Following a serious fire at the Granite Mountain shaft in 1917, the work of fire-proofing this shaft was commenced and completed in January, 1918. This work consisted of 1,500' of concrete of monolithic construction, while the "chippy" compartments of the upper part of the shaft were gunited (cement coating sprayed on).

The Speculator shaft, the other operating shaft, has been deepened to 3,000', with levels at 200' intervals, from and below the 1,400' point, developing all the veins in the mine. The Speculator shaft has a 128' steel head-frame standing on a 41 by 60' concrete foundation, equipped with self-dump-

ing skips and pockets, with daily capacity of 1,500 tons of ore. No waste is hoisted, as it is used for underground filling.

The 500' Jessie and 500' Adirondack shafts are idle, and of no present value. The Gem shaft, 2,200' deep, is used for ventilation, and a connection has also been made with the Rainbow shaft on the 2,000' level for purposes of ventilation. These two shafts, as well as the Speculator, are provided with reversible fans. The whole system of ventilation in the mine has been greatly improved, and good working temperatures prevail.

Standardization of mining methods at the North Butte was discussed by Robert Linton in the Aug., 1920, "Min. & Met." of the A. I. M. & M. E.

Equipment: the main machinery plant and buildings are at the Speculator shaft. The engine-house has a 20-ton traveling crane, and a 32 by 72" Nordberg-Corliss duplex-cylinder hoist, operating two cages, in counter-balance, with two 5-ton Kimberly skips swung under, and good for a depth of 3,500'. An 18 by 36" duplex-cylinder auxiliary hoist operates a double-deck cage in a third compartment, for handling men, material, and timber, and the shaft has a fourth compartment for ladders and pipes.

The compressor-house has air-compressors with piston efficiency of 9,860' of free air per minute, reduced to a pressure of 80 lb per sq. in., capable a contract by which the company pays the smelter charges to Anaconda, and five 100 h. p. boilers. Miscellaneous buildings include a machine-shop, smithy, carpenter shop, planing mill, and a plate-shop for repairing skips, all thoroughly equipped.

Under normal conditions, an average of 1,550 men are employed. The North Butte ore is smelted at the Washoe works of the Anaconda company under a contract by which the company pays the smelter charges to Anaconda, and the copper itself is turned over to North Butte and sold by the United Metals Selling Co. for its account.

Production:

	Ore, tons	Copper, lb.	Silver, oz.	Gold, oz.	Copper, per lb.	
					Cost, c.	Price, c.
1920.....	315,217	16,666,819	693,633	1,004	17.64	18.72

1910.....	408,528	25,267,092	988,190	1,196	10.36	12.77

Zinc production in 1916, 1,652 tons of ore for 412,953 lb. spelter.

Although the grade of the ore mined is lower than that produced in the early years of the company's operations, the total amount of copper now produced compares very favorably with the record year.

NORTHERN VALLEY MINING CO.

MONTANA

Officers: S. F. Mallette, pres.; Godfrey, Ill.; Walter K. Mallette, v. p.; Anaconda, Mont.; H. W. Wilson, sec.-treas., Twin Falls, Idaho.

Inc. 1912, in Arizona. **Cap.** \$1,000,000; shares \$1 par; 600,000 shares issued. Controlled by the American Metal Mining Ass'n of Arizona.

Property: consists of the holdings of the defunct **Amazon-Montana Development Co.** in Amazon district, near Boulder, Jefferson county, Mont. Idle and no work contemplated in near future, according to last advice.

NORTHWESTERN METALS CO.

MONTANA

Bankrupt. Entire property reported sold by court for \$22,000, July.

1916. Fully described in Vol XI, Copper Handbook.

OBELISK MINING CO.**MONTANA**

Address: William Hogan, supt., Basin, Mont. J. H. McBarron, pres., Butte, Mont.

Property: the Obelisk mine, 1½ miles E. of Basin, Jefferson county, close to the G. N. R. R. Ore carries silver bearing lead and zinc sulphides. cementing brecciated "porphyry" and aplite. The zinc blende carries the silver.

Development: by 400' shaft with levels at 150 and 250' and by 400' tunnel. One level opened 6' of 58 oz. silver and 2% lead ore. Two 50-ton shipments in 1920 to Anaconda were valued at \$1,100 each and two in March, 1921, yielded \$2,600.

OHIO KEATING GOLD MINING CO.**MONTANA**

Address: P. O. Box 1711, Butte, Mont. Mine at Radersburg, Broadwater county, Mont.

Officers: J. E. Oppenheimer, pres.; J. S. Cohen, v. p.; C. H. Smith, sec.-treas., with B. E. Calkins and W. M. Tuohy, directors.

Cap. \$800,000, increased Dec., 1910, from \$500,000. Company had \$113,924 debts, July, 1914, and stockholders changed stock from non-assessable to assessable with an initial assessment of 15 cts. per share.

Property: a promising, though small gold mine, producing some copper from pyrite ores found as shoots in strong fissure veins in igneous rocks. According to the late Fred T. Green, who examined the property, the probable ore in mine is valued at \$486,151 with \$116,914 worth of ore blocked out (6,680 tons) and \$90,000 worth of \$4 ore on the dump.

Development: to 500' level, with about 3,800' of drifts and crosscuts.

Equipment: includes electric and steam pumps, electric hoist, mining cars and tools. No recent news.

OLYMPIA MINING CO.**MONTANA**

Office: Princeton, Granite county, Mont.

Property: Lillian and Banner claims in the Philipsburg district. Tunnel said to cut 3 veins, one 20' wide, carrying galena, silver and gold values. Some development was done in 1917. Idle since.

O. & M. MINES CO.**MONTANA**

No longer active. Fully described in Volume XIII. See Liberty Mining Co. in Volume XIV and **Sterling M. & M. Co.** in this volume.

ORIGINAL BANNACK MINING CO.**MONTANA**

Office: 302 D. F. Walker Bldg., Salt Lake City.

Officers: Lorenzo Price, Jr., pres.; A. J. Bruneau, v. p.; E. F. Mobley, sec.-treas., with W. L. Smith and Ambrose Nord, directors.

Inc. in Utah. **Cap.** \$1,000,000; shares \$1 par; assessable; 600,000 shares outstanding. Listed on Salt Lake City Exchange.

Property: 9 patented claims in the Bannack mining district, Bannack, Beaverhead county, Mont., adjoining the Bannack Gold Mining Co., and said to have the extension of the latter's ore zone. Credited with a production of \$350,000. Management claims there is an ore-shoot 1,800' long and from 50 to 125' in width, containing "hundreds of thousands of tons of ore, that will average \$11 per ton." value mainly in gold, with some copper, a statement that is considered to be a gross exaggeration. Developed by 300' shaft.

Equipment: included a 325 cu. ft. compressor and a 25-h. p. gasoline hoist.

See geological conditions, under New York-Montana Mines Co.

PATTEN MINING CO.**MONTANA**

Address: A. J. Johnson, pres., Butte; J. K. Heslet, Butte, or Earl B. Patten, v. p., Phillipsburg, Mont.

Owns a promising silver property in the Flint Creek district, near Phillipsburg. Idle, 1920.

PAY BACK MINING CO.**MONTANA****Office:** 40 W. 6th. Ave., Helena, Mont.**Officers:** Gustave Strobel, pres.; R. A. McCray, v. p.; R. E. Strobel, sec.-treas.; H. B. Emigh, cons. engr.; R. A. Weisner and L. Strobel, directors.**Inc.** 1911.**Property:** the Pay Back mine, in Lump Gulch district on Clancey Creek, $1\frac{1}{4}$ miles west of Clancey. Ore was originally shipped by ox team to Corinne, Utah, from old 130' shaft. Company sinking new shaft 500' east on same lead, in wide body of quartz, thoroughly leached and low grade. From the experience of producers in Lump Gulch district, management hopes to strike higher grade ore below water level at about 100' in depth. Dripping will then be done below the old workings which will give a depth of about 235' below the surface.**PHILIPSBURG MINING CO.****MONTANA****Office:** 821 Security Bldg., St. Louis, Mo. **Mine office:** R. S. Blitz, supt., Philipsburg Granite county, Mont. A. E. Fritzberg, asst. supt.**Officers:** John P. Meyer, pres.; John H. Dieckman, v. p.; G. J. Tansey, sec.; F. D. Fusz, treas., with John J. Taussig, Max Kotany, L. M. Rumsey, Jr., C. G. Ewing, E. S. Orr, A. L. Shapleigh, Edward Barklage, directors.**Inc.** 1910, in Missouri. **Cap.** \$50,000; shares \$1 par; all outstanding Annual meeting, fourth Friday in March.Company is successor to **Hope Mining Co.**, one of the earliest companies formed in Montana. Mine is credited with past production of \$4,000.-000 in silver.**Property:** the Hope, Algonquin, Bryant, True Fissure and Horton mine, 450 acres at Philipsburg, containing ore in contact deposits and quartz fissure veins between limestone and granite. Ore carries gold, silver, copper, zinc, lead, and manganese.

Manganese ore is of the nodular variety of pyrolusite and psilomelane. Company was the largest producer of manganese ore in Montana.

Development: by several shafts, deepest 500', and a number of tunnels.**Equipment:** 350-ton mill with grizzlies, gyratory crusher, trommel with $1\frac{1}{2}$ -in. holes, in which the ore is washed, sorting-belt, rolls, elevators and trommels, Harz jigs, tables, thickeners and bins. Crude ore assays 32% Mn. and 35% SiO₂; wash ore, 41% Mn. and 18% SiO₂; and concentrate, 49% Mn. and 9% SiO₂. Three Holt tractors haul ore 2.67 miles from the mine to the mill, at a cost of 72c. per ton, equal to 27c. per ton-mile. Up to 500 men have been employed.**Production:** amounted to 55,000 tons of manganese ore, 1916-1918 inclusive from the Algonquin and 13,000 tons from the Bryant, and up to 2,000 tons per month in 1920, until the shut-down in October, due to the market.**PILOT BUTTE MINING CO.****MONTANA**

Company dissolved. See Vol. XII, this work.

PITT COPPER MINING CO.**MONTANA**Formerly the **King & Queen Mining Co.****Office:** John A. Lathwood, 30th & Wayne Sts., Pittsburgh, Pa. L. C. McHeffry, supt. in charge, Keystone, Mont.**Officers:** W. S. Markley, v. p.; W. D. Brew, sec.; J. H. B. Phillips, treas.**Inc.** Feb. 22, 1905, in Montana, practically as a reconstruction of the Montana Mining & Development Co. **Cap.** \$1,000,000; shares \$1 par.**Property:** 15 claims, partly patented, 188 acres and a 20-acre millsite, well timbered, $3\frac{1}{2}$ miles from Keystone, the nearest rail point, in the Spring Gulch district, 9 miles N. W. of Superior. Property carries limestone, quartzite and shale with contact deposits between quartzite and limestone. The deposit under development, of 8' estimated average width, shows copper, lead and silver ore with malachite, chalcocite, chalcopyrite and galena, re-

ported to average 4.5% copper and 12 oz. silver per ton with gold content ranging up to 8 oz. per ton.

Development: by 1,200' crosscut tunnel opening up 4' of 4.6% copper ore that carries 9 oz. silver and 11% lead. This tunnel, planned to be driven 1,600', has cut the vein 460' below the old workings and intersects several veins. A 200' raise gives ventilation with the upper workings now abandoned. The main workings total 5,000'.

Equipment: includes an 80-h. p. boiler, 25-h. p. hoist, 6-drill duplex air compressor and 100-ton mill. There are several small mine buildings and a saw-mill.

Development work was in progress, 1916-20. No recent returns received.

PITTSMONT COPPER CO.

MONTANA

Controlled by **East Butte Copper Co.**, which see.

Office: 1126 Farmers Bank Bldg., Pittsburgh, Pa. **Mine office:** Butte, Mont.

Officers: R. H. Gross, pres.; J. H. Reed, v. p.; F. Ward Paine, sec.-treas.; R. T. Rossell, asst. sec.-treas.; Oscar Rohn, gen. mgr., with Wm. A. Paine, directors.

Inc. April 21, 1906, in West Virginia, as Pittsburgh & Western Copper Co., and changed name, Jan. 21, 1908, to present title. **Cap** \$6,000,000; par value \$5, divided in 1,000,000 shares common stock and 200,000 shares 6% cumulative preferred stock. Initial dividend of \$3. paid Dec. 1, 1917.

The East Butte Copper Co. owns \$4,002,800 of the common, all the preferred stock. Annual meeting, first Monday in April, at Pittsburgh.

Company acquired the property of the Pittsburgh & Montana Copper Co., under foreclosure proceedings, July, 1909, selling it to the East Butte Copper Mining Co., which agreed to purchase bonds enough of the Pittsmont Copper Co., to fund its floating debt, aggregating at that time \$2,300,000, and also agreed, until these bonds were fully paid for, to advance all funds necessary for development and operation of the property and interest on the company's indebtedness. In consideration of this agreement the Pittsmont Copper Co. contributed \$4,000,000 of its common stock to the East Butte Copper Mining Co., the latter purchasing \$1,000,000 of Pittsmont preferred stock and \$110,000 of demand notes, issuing own stock therefor. This debt has now been paid off.

During 1918 East Butte paid Pittsmont \$1,000,000 on account of rentals accrued. The latter in turn purchased from the former its entire issue of 200,000 preferred shares, \$5 par.

Property: 267 acres of mineral and 160 acres surface rights and a lease of mineral rights on right of way of N. P. Ry. crossing the property at Butte. Also a property at Elkhorn, containing low grade gold ore, with 150-ton mill built 1917, but not operated as yet.

POLARIS MINE

MONTANA

Address: Jack Mercer, supt., Dillon, Beaverhead county, Mont.

Property: a famous producer of gold-silver ore. A cyanide mill was erected in 1919.

PONY MINING & MILLING CO.

MONTANA

Formerly **Garnet Gold Mining Co.** Ole Peterson, owner, St. Louis, Missouri.

Property: 19 claims at Ponv. Madison county; idle at last accounts. Is said to have yielded over \$700,000. Development is by tunnels.

Equipment: water power, compressor, 20-stamp mill, etc.

PORPHYRY DIKE GOLD MINING CO.

MONTANA

Address: James Breen, pres.-gen. mgr., Spokane, Wash. M. S. Gunn and Carl Rasche, directors. S. R. Brown, supt.; M. A. Evans, mill foreman. **Cap.** \$650,000; \$1 par.

Property: 19 claims, 18 patented, 7 miles S. W. of Rimini, and 17 miles from Basin, the nearest rail point. The formation is peculiar being a rhyolite lava flow containing numerous egg-shaped masses, technically called

spherulites, netted with quartz threads carrying gold; the rock itself also carries clay films and quartz films, containing gold. A large quantity, possibly 6,250,000 tons, of this ore has been exposed by surface workings and tunnels. Over 20,000 tons of this ore milled in a 10-stamp mill in former years gave a recovery of \$2.45 gold per ton. A 300-ton ball-mill plant, driven by electric power, was erected late in 1917. Mining costs are low, probably not over 75c., and ore mills easily and cheaply so that property ought to pay if a large enough tonnage were handled.

POTOMAC COPPER CO.

MONTANA

Office: 73 Hirbour Bldg., Butte, Mont.

Officers: Wm. P. Jahn, pres.; Paul A. Gow, v. p.; J. J. Harrington, sec.; George E. Palmer, treas., with N. J. Bielenberg, John Harrington, and W. I. Higgins, supt., directors.

Inc. Nov. 30, 1918, in Montana. Cap. \$1,500,000; \$1 par; 950,000 outstanding. Application made for listing on New York Curb. Security Transfer and Registrar Co., 66 Broadway, New York, transfer agent and registrar. Annual meeting, second Tuesday in March.

Receipts during 1919, were \$156,568, mostly from sale of 312,987 shares. Disbursements were \$91,092. Of this, \$51,895 was for payroll and supplies, and \$23,700 for property payments. The cash balance was \$18,847, plus \$46,625 for demand notes and subscriptions secured, a total of \$65,472.

Property: 20 claims, about 300 acres, in the Copper Cliff district, Powell county, Montana, 12 miles north of Bonita, Mont., on N. P. R. R., and 8 miles from Potomac, terminus of a branch line of the C. N. & St. P. R. R. Examined by W. H. Weed and P. A. Gow, 1919.

Discovered in 1881, the property was desultorily operated until taken over by an English syndicate in 1900, when selected ore was sorted and shipped.

Geology: ore occurs in six well-defined fissure veins cutting quartzite, and in faults between this and an impure limestone. The veins occur clustered in a zone of sheeting, 1,200' or more wide, and a mile long. The ore mineral is enargite, accompanied by famatinite, pyrite and some copper glance. A great outcrop of mineralized brecciated quartzite, 100' high, 400' long and about 100' thick, and known as the "Copper Cliff," is estimated to contain over 300,000 tons of 2½% copper ore, with \$2.50 per ton in gold. The reported gross value of the ore in this "Cliff" is \$5,000,000. A second ore zone, cut by the Copper Cliff tunnel, shows 40' of 2¾% ore with \$2 gold.

Development: by several tunnels and shaft. The lowest, No. 4, is 1,700' long, and is the main outlet for the property. It reaches a depth of 400' to 1,000'. During 1920, this adit cut 30' of 17% and 4' of 4% ore. No. 3 tunnel is 1,200' long, and 170' above No. 4. It is connected with the Copper Cliff shaft. At the Leonard mine a 100' shaft exposes a 10' vein with 60° N.-W. dip and good average grade.

Equipment: steam and electric power, an excellent 4-mile wagon-road to Potomac, and an old logging railway grade much of the way, which is available for a railroad. An 11-mile transmission-line will be put in 1922, 100 h. p. steam plant, compressor, and dwellings.

Company estimated that with 90% recovery, milling 10 to 1 and recovering 90% of value of concentrate paid for by smelters, the ore will have a gross value of \$9.42 per ton and a net profit of \$3.65 per ton.

Property covers an entire mining district, showing veins with commercial amounts of profitable concentrating ore and a promise of very large additional tonnages by development work. It is a very promising property.

PRICKLY PEAR MINING CO.

MONTANA

Office: care J. C. Murray, pres., Helena, Mont. Mine P. O. Jefferson City, Jefferson county, Mont.

Officers: J. C. Murray, pres.; Lee Dever, v. p.; H. M. Brooks, sec.-treas.

Property: the Prickly Pear mine, 2 miles from Jefferson, opened by a

350' tunnel, showing gold and silver-bearing copper ore. Has no power equipment. Production not reported for several years.

PRINCEMONT MINING CO.**MONTANA**

Property near Noxon, Sanders county, is listed under Idaho, as it is really a part of the Coeur d'Alene district.

RAINBOW LODE DEVELOPMENT CO.**MONTANA**

Office: 807 Lonsdale Bldg., Duluth, Minn. **Mine office:** 14 West Granite St., Butte, Mont.

Officers: Edward C. Congdon, pres.; G. A. Tomlinson, v. p.; James Wanless, sec.-treas., with Thomas F. Cole, Walter B. Congdon, directors.

Inc. Nov. 9, 1912, in Delaware. **Cap** \$1,500,000; increased June 1, 1915, from \$800,000; shares \$10 par, issued \$800,000. **Bonds:** \$400,000, 1st mortgage 5-year convertible 6% due June 1, 1920, convertible into stock at par, and \$80,000 2nd mortgage authorized, \$47,000 issued. Annual meeting, first Tuesday in June.

Property: 10 claims, including the Third Sphinx, Michigander, Moral, Valley Queen, Carn Brea, Sarah, Wedge, Hidden Treasure and Wanda claims, with fractional interest in the Lone Star Claim. The group lies east of the Butte & Superior property and is supposed to carry an extension of the Rainbow lode.

Equipment: at Rainbow shaft includes a 300-h. p. double drum hoist good for 2,500', 2 electric hoists, air compressors, combined capacity of 1,650 cu. ft. per min., one 400 gals., and 1,200 gals. pump, blacksmith shop, carpenter shop, change house and office.

During 1916 the company completed its Butte & London contract, and now owns 51% of the Greendale Exploration Co. stock, which latter company owns the Greendale Placer claim and the Six O Clock claim immediately south. It paid for this stock according to the contract by sinking the Butte & London shaft to 1,600' and crosscutting to the north and south-boundaries of the Greendale Placer claim on the 1,500' level.

The crosscut at the 1,500' level of the Rainbow shaft was extended to the north boundary and a few feet of drifting done from it along veins which looked promising. The drainage drift on that level from the North Butte was completed.

While quartz-filled veins of various dimensions were found in several parts of both the Rainbow and Butte & London and open cuts gave trifling assays of gold, copper and zinc, no ore was found of commercial importance.

In order to complete the Butte & London contract, it was found necessary to raise more money than was provided for in the first mortgage. Consequently, the second mortgage was authorized, and the amount outstanding on it, \$47,000, was advanced by two of the large stockholders so that the contract might be completed and the Rainbow company get control of the Glendale placer claim.

Although no ore has been found to a depth of 1,500' on the Rainbow group and 1,600' on the Greendale Placer claim, nevertheless, the officers feel that still deeper development will reveal pay ore. Company is now inactive.

RAMPART MOUNTAIN MINING CO.**MONTANA**

Office: 821 Security Bldg., St. Louis, Mo.

Officers: J. P. Meyer, pres.; Felix Coste, v. p.; E. C. Rowse, sec.

Cap. \$500,000; shares \$1 par; \$250,000 outstanding.

Property: 10 patented claims, 135 acres, in Park canyon, Silver Bow county, Mont., about 4 miles east of Butte, said to show fissure veins in granite. Ore contains gold, silver and copper. The Rocky Mountain claim is reported to show a vein about 100' wide, supposedly the continuation of the Spread Delight vein of the Main Range.

Development: by 1,500' of workings to depth of 400'. Tunnel said to show copper ore assaying up to 7% with high silver value. Work resumed 1920, on lower tunnel to open up downward continuation of oreshoots mined above.

Is a promising tract for deep development by tunnel work, as the veins show pay ore at the surface.

RAVEN COPPER CO.**MONTANA**

Property sold, August, 1915, to the Anaconda Copper Co., for \$65,000, and company liquidated. Fully described in Vol. XI., Copper Handbook.

RED MOUNTAIN CONS. MINING CO.**MONTANA**

Address: Rimini, Lewis and Clark Co., Mont.

Property: at Rimini, closed from 1888, until reopened in 1920.

RELiance MINING & MILLING CO.**MONTANA**

Officers: D. M. Adams, pres.; Box 386, Butte, Mont.; Frank Eichelberger, v. p.; J. F. Barnes, sec., with J. C. Lane and J. W. Higgins, directors.

Inc. April 17, 1913, in Montana **Cap.** \$150,000; shares 10c par; non-assessable; 1,325,000 issued. Control reported in hands of D. M. Adams and P. H. Kenny.

Property: the Reliance and Sunnyside group of claims, in the Moose Creek section, Silver Bow county, 18 miles south of Butte, showing veins of copper-silver-lead-zinc ore in carboniferous limestone. The new property—the Sunnyside, whose ore carries silver principally, is considered to have much merit.

Development: by shaft and crosscuts, in which water has been troublesome. During 1917, \$12,415 was spent and more money is needed for further exploration.

REPUBLIC MINING CO.**MONTANA**

Apparently reorganized as **Mohawk Mining Co.**, which see.

Address: Cooke City, Mont. R. H. Young, mgr. W. E. Renshaw, supt.

Property: the Mohawk mine, a group of claims near Cooke City, Park county, and 50 miles by road to rail at Gardiner. By May, 1920, there was 5,000 tons of \$100 gold-silver-copper ore ready for shipment, and by July it was being hauled to rail.

Equipment: engines, compressor, dwellings, orebins, and twenty 2½ ton trucks.

REVENUE CONSOLIDATED MINING CO.**MONTANA**

Address: G. D. B. Turner, Norris, Mont.

Property: near Norris, Madison county, closed in 1917 on account of excess of water and lack of power, since obtained from the Montana Power Co. Gold yield from depth of 200' said to be \$2,500,000. Four ore-shoots are exposed. Four winzes are in ore below 200' depth. Sinking was under way in February, 1920.

Equipment: 700 cu. ft. compressor, 100-h. p. electric hoist, etc. Mine is under option to Revenue Mines, Inc.

REVENUE MINES, INC.**MONTANA**

Address: Howard S. Candee, 43 Exchange Place, New York City, or G. D. B. Turner, trustee, Norris, Mont.

Has lease and bond on Revenue mine, owned by Revenue Cons. M. Co.

REVIAS CREEK MINING & POWER CO.**MONTANA**

Former mine near Dixon, Sanders county, Mont.; fully described in Vol. XI. Copper Handbook.

RICHMOND MINING, MILLING & REDUCTION CO.**MONTANA**

Office: 404 Sherwood Bldg., Spokane, Wash., and Delage, Idaho.

Officers: J. E. Codd, pres. and treas.; H. W. Claussen, v. p.; C. H. Maloy, sec.; B. N. Sharp (mgr), and P. W. Peterson, directors.

Inc. in Washington. **Cap.** \$1,500,000; \$1 par; increased from \$1,000,000 in February, 1920; 1,011,000 issued.

Profit in 1917 was \$93,360, and \$8,370 in 1918. **Dividends:** \$48,000 in 1917; \$8,400 in 1918; none since; total, \$92,400.

Property: on Idaho-Montana line 6 miles from Saltese, Mineral county, Mont., and 1½ miles from Adair, Idaho, connected with C., M. & St. P. R.

R. by 8,800' aerial tram. Company owns 7 claims, 6 patented, and millsite, total of 140 acres.

Development: 2,200' of tunnels, 500' of shafts, 2,000' of drifts, and 600' of raises. Lowest depth is 570', and total workings are 6,000'. Vein shows on surface for 2,200', of which 400' is being developed. Reserves are estimated as sufficient for 50 tons daily for a year. New work in 1918, amounted to 1,685'. A peculiarity of the mine is the presence of small but persistent stringers of high-grade ore on each level, indicating the existence of rich ore lodes below according to report.

Equipment: 2-h. p. gasoline hoist, 80-h. p. compressor, 8,800' aerial tram of 240 tons daily capacity, etc.

Production: 4,600 tons in 1917 worth \$292,117; and 3,912 tons in 1918, assaying 8.4% copper, 0.189 oz. gold and 0.64 oz. silver, or \$23 per ton, totaling \$90,535. Idle in 1920, as increased treatment charges, together with low metal market absorbed profits.

RIPPLE CONSOLIDATED MINING CO.

MONTANA

Address: J. C. E. Barker, lessee, Neihart, Mont.

Property: 10 claims, 6 miles from Neihart, Cascade county. Ore carries galena with high silver values. Reserves estimated at 30,000 tons. A 100-ton mill was planned in 1919.

In January, 1920, ore yielding \$18 per ton net was being sent to the smelter at East Helena, and earnings were said to be equal to 25 cents a share. Further shipments were made, but in November a change of management took place as company finances were low, and the McBarron management unacceptable to certain stockholders.

ROBERT EMMET COPPER CO.

MONTANA

Address: Amazon, Jefferson county, Mont. Wm. Q. Ranft, pres.; at last reports; John J. Schmitt, sec.-treas.

Cap. \$3,000,000; shares \$5 par.

Property: 6 claims, patented, 90 acres, carrying veins in granite, not far from the andesite contact. The main vein has a generally N.-E. strike, developed by a 500' shaft, showing a shoot of ore on the 350' level. A 1,200' tunnel having about 1,000' of laterals shows a 10' vein carrying copper, silver and lead ore.

Five feet of silver-copper ore was opened during 1920.

Equipment: includes 10-drill air-compressor, electric plant, with transformers for 60,000-volt current. Idle at last accounts.

ROCK ROSE MINING & MILLING CO.

MONTANA

Address: 32 Union Bank Bldg., Helena, Mont.

Company is controlled by the **Cruse Cons. Mining Co.**

Officers: Jas. J. Cruse, pres.; J. M. Nilan, v. p.; R. A. Weisner, sec., Helena, Mont.; E. D. Phelan, treas.; L. S. Ropes, cons. engr.

Inc. in Montana. **Cap.** \$1,000,000.

Property: the Rock Rose and Looby mines, Grass Valley district, 4½ miles west of Helena; 6 claims, 3 patented, and 3 claims under option. The ground is traversed by many veins and porphyry dikes. Dandy claim has 117' shaft with 300' drift and crosscut exposes 2 veins, one of silver-lead, the other of gold ore. Galena vein is 6" to 4½' wide, averaging 2½'.

Ore: silver lead carrying \$14.07 to \$57.79 per ton. A total of 196 tons of ore shipped in July, 1906, June, 1907, July, 1908, yielded \$4,234 smelter returns.

Development: by 300' Helena shaft with a 125' drift, exposing ore for 75' in part lead and in part copper ore that carries 4½ to 10% copper. The gold vein is 2-3' wide and reported to average \$25 per ton. The vein is traceable by 6 pits for 378' across the claim.

Equipment: 80-h. p. boiler, compressor, etc. complete. Buildings include engine house, ore sorting house, boarding and bunk houses. The freight rate is but \$1 per ton for team, R. R. and loading. Water is handled by 1-2 hours pumping each day.

The mine is shallow and worthy of development.

ROSE CONSOLIDATED MINING CO.

MONTANA

Address: 1131 W. First Ave., Spokane, Wash.

Officers: S. H. Twedell, pres.-mgr.; Frank Olney, v. p.; P. S. Rose, and C. H. Olney, directors. F. L. Olney, sec.

Cap. \$200,000; par 10c; assessable. Annual meeting May 10.

Property: a gold-tungsten mine, 10 claims, 26 miles E. of Libby, reopened August, 1916.

Equipment: 10-stamp mill and concentrators, to be enlarged, 1919, by addition of Hardinge tube mill and flotation plant.

This is a small mine that can make a profit from its gold, plus a fair amount from tungsten, when the market is favorable.

Production: total about \$25,000 to March, 1919.

Company has no debts, but was idle in 1921.

ROYAL BASIN MINING CO.

MONTANA

Office: Makeever Bros., 170 Broadway, New York, and Journal Bldg., Boston, Mass. **Mine office:** Maxville, Granite county, Mont. Walter Neal, mgr. The Montana Phosphate Co., formed in 1915 to treat phosphate beds near Maxville, is controlled by same interests as Royal Basin.

Cap. \$2,000,000; \$1 par.

Property: the North Star mine of 2 lode claims, 90 acres, in Wymans gulch, within the Missoula forest reserve and 3 miles east of the Drummond branch of the N. P. R. R. Also owns the Northern Bell mine, a silver property near Princeton. Claims show a fissure vein 15' to 40' wide, in 3 upper tunnels, 100' vertically apart. A new lower tunnel cut the vein 800' in and at a depth of 700'. At this point the vein carries concentrating ore 12' wide with a paystreak of sulphide ore, assaying 7½% copper, and 5 to 70 oz. silver, per ton. The smelter returns for over 1,100 tons shipped showed 5.14% copper.

Mine is equipped with a leaching plant using sulphuric acid to get the copper into solution and depositing electrolytic copper as cathode plates in tanks direct from the solution.

Reported leased for 5 years, from April, 1916, to **Northwest Cons. Mines Co.**, Spokane, Wash. No recent returns.

ROYAL COPPER MINING CO., LTD.

MONTANA

Office: Wallace, Idaho. Mine near Belknap, Sanders county, Mont. John H. Nordquist, pres.

Property: 12 claims, patented, near Thompson Falls, shows a vein of about 18' surface width, traced 1,500' on company land, carrying copper and lead carbonates and sulphides, said to average 6% copper and 18% lead, with small values in silver.

Development: by prospect tunnels of 50' and 600'. The property is a prospect on which assessment work only has been done for several years past.

ROYAL MINING CO.

MONTANA

Former Address: Mohawk Bldg., Spokane, Wash. **Mine office:** Potomac, Missoula county, Mont. Letters returned, marked "Gone".

Officers: John H. Wourms, pres.; J. M. Long, v. p.; J. H. Pelletier, sec.; with Sam Seidenfeld and Dennis Reardon, directors.

Inc. Nov. 10, 1916, in Washington. **Cap.** \$1,000,000; \$1 par; 600,000 issued.

Property: 17 claims, 3 patented, 320 acres, 6 miles N. of Clinton, on N. P. R. R. and 4 miles S. of Potomac, Mont., on C. M. & St. P. R. R. Formerly known as the Charcoal, which shipped \$18,000 worth of ore some 20 years ago.

Geology: quartz vein in granite 4' wide, dipping 50° with N.-S. course. Ore assays 150 oz. silver, 6% copper, 20% lead and \$5 gold per ton.

Development: by 2-compartment shaft to 200' depth, and 800' tunnel.

Equipment: includes 600' hoist, boiler, 225 cu. ft. compressor, and quarters for all employees.

Production: shipments totaled over \$40,000 to mid-1918. One car of silver-lead ore shipped in 1919.

RUBY & COLUMBIA MINES CO.

MONTANA

Dead. Property held by **Basin-Montana Mines Co.** (which see), which secured possession after Ruby & Columbia had forfeited all rights for non-compliance with terms of lease.

RUBY GULCH MINING CO.

MONTANA

Address: Zortman, Phillips county, Mont.

Property: in the Little Rockies, Mont., 60 miles from railroad at Malta. Ore occurs in a wide lode of altered porphyry. It contains from \$1 to \$3 per ton in gold and is mined cheaply. In Jan., 1919, 200 men were employed, and the output was \$30,000 per month. Cyanidation is employed at the mill.

RUNNING WOLF MINE

MONTANA

Address: Paris Gibson, owner, Great Falls, or F. C. Whittaker, Stanford, Mont.

Property: iron-bearing claims on Running Wolf and Dry Wolf creeks, 12 miles S. W. of Stanford and 54 miles S. E. of Great Falls, at an altitude of 5,200 and 8,000'. According to L. G. Westgate, in Bull. 715 (1920) of the U. S. Geological Survey, the iron ore occurs in tabular bodies at the contact of porphyry and limestone. Orebodies average 20' in width. The ore is a reddish-gray hematite, assaying from 35 to 68% iron, up to 0.107% phosphorus, and 1.90 to 12.95% silica; and is suitable for steel manufacture. An approximate tonnage of 2,340,000 is estimated.

SACAJEWEA GOLD & COPPER MINING CO.

MONTANA

Letters returned from former address, 11 Broadway, New York. Mine near Helena, Mont. Col. Henry Altman, pres. and gen. mgr.; W. J. Anson, sec.

Cap. \$5,000,000; shares \$10 par.

Property: 47 claims in the Scratch Gravel district, adjoining the Copper-Silver Montana Mining Co. Idle some years, and no data available.

SAGINAW COPPER CO.

MONTANA

Jackson, Beaverhead county, Mont.

Officers: Geo. North, pres.; E. M. Frank, sec.-treas., with Elmer North and Kenneth Campbell, directors.

Inc. Jan., 1916, in Montana. **Cap.** \$125,000; \$25 par.

Property: 5 claims, including the Saginaw mine, in Beaverhead county. shows fissure veins in porphyry, with E.-W. strike, dip 35° and 3' average width. Developed by a 300' incline shaft.

Equipment: includes steam hoist. Shipped 19 cars of ore in 1915, average assay, 11% copper. No figures available since.

ST. JOE GOLD-COPPER M. & M. CO.

MONTANA

Probably dead, as letters sent former office, Wallace, Idaho, are returned unclaimed.

Property: 9 claims, well timbered, on Kelly Creek, near Saltese, 3 miles west of the Monitor mine, and one-half mile from a railroad, showing 2 strong veins.

ST. LAWRENCE COPPER MINING CO.

MONTANA

Office: H. M. Lancaster, mgr., Saltese, Mineral county, Mont.

Officers: Henry M. Lancaster, pres.; S. B. Holbert, v. p.; F. W. Dewart, sec.; N. P. Hyndman, treas., with John Sloan, H. F. McLain and E. N. Ohl, directors.

Inc. Oct. 19, 1917, in Montana. **Cap.** \$1,000,000; \$1 par; 924,505 issued. increased to \$1,500,000 in January, 1920. Annual meeting, September 2. Operating expenses during 1918 were \$81,184.

Property: 8 claims, 1 patented, 160 acres, 5 miles S. W. of Saltese, the nearest rail point.

Geology: claims show quartzite cut by a vertical fissure vein 6' wide.

carrying gold and copper. Ore-shoots are from 85 to 100' long, and carry both sulphide and oxide ore, assaying 8% copper and \$3 gold.

Development: by 3,000' of work including tunnels 748 and 1,360' long, connected by raise and opening mine to depth of 480'. Shrinkage stoping is used.

In 1921, a drift was run easterly on the vein in the lower tunnel, and cut high grade chalcopryrite ore in December. It is considered that only the top of the main orebody has been worked, and the new exploration is to open it beyond a orezoneite dike east of the east end-line of the Silver Lake claim.

Equipment: includes a small compressor.

Production: 1,250 tons in 1917, and 1,500 tons to March, 1919. Eight men were employed during the winter of 1920-'21.

ST. LOUIS MINING & MILLING CO.

MONTANA

Address: Marysville, Mont.

Property: the famous Drumlummon mine, that produced \$20,000,000 in the period, 1885-1895. In 1918 a little ore was extracted from a lower tunnel. Mine reopened 1921.

Equipment: 25-stamp mill and cyanide plant.

ST. PAUL MONTANA MINING CO.

MONTANA

Probably idle, as letters sent to company's office, Maiden, Fergus county, Mont., are returned.

Officers: C. W. Amos, pres., St. Paul, Minn. Wm. Biadin, St. Paul, Minn., sec.-treas., with L. P. Ordway and E. B. Coolidge, gen. mgr., directors. Inc. in Arizona. **Cap.** \$50,000; shares \$100 par; 500 issued.

Property: 2 patented claims, at Maiden, said to show gold ore in contact deposits between porphyry and limestone. Developed by a 450' vertical shaft, with 5,000' of workings. Ore claimed to assay \$4 to \$30 per ton and property is said to have produced \$4,000,000.

Equipment: includes hoist, air-compressor, and 50-ton cyanide mill. Operated under lease at last accounts.

ST. REGIS COPPER MINING & MILLING CO.

MONTANA

Probably dead, as letters are returned unclaimed from company's former offices, Missoula, Mont., and St. Regis, Mineral county, Mont.

Officers: S. J. Wilson, pres.; F. W. Wilson, sec.-treas.

Inc. May, 1901, in Montana. **Cap.** \$300,000; shares \$1 par; in half preferred and half common stock.

Property: 5 claims; also a 15-acre millsite and miscellaneous lands, 180 acres, on the Northern Pacific railway, shows quartzite and shale, with 2 orebodies of 6' estimated average width, carrying chalcopryrite ore said to give average assays of 8% copper, and \$1.50 gold per ton.

Development: by tunnels of 60', 380' and 600'.

SALTESE CONS. MINING CO.

MONTANA

Office: J. R. Bean, sec., Mullan, Idaho.

Officers: G. A. Turner, pres.; O. V. Manning, sec.-treas., with W. H. Smith and H. E. Ferris, all of Spokane, Wash., directors. J. O'Brien, mgr.

Inc. in 1911. **Cap.** \$150,000; 10c par.

Property: 6 claims, 3 miles N. E. of Saltese, acquired from Black Traveler Copper Mining Co. in December, 1917, for \$10,000. Shows 2 parallel veins, one about 6' width, having a strong gossan.

Development: by 2 crosscut tunnels, the upper cutting a vein of 12' estimated width, carrying copper ore, mainly chalcopryrite, giving assays of about 3% with richer streaks assaying up to 32.4% copper and 15.8 oz. silver, with traces of gold. In Dec., 1917, an orebody was cut that carried 4' of ore averaging 4.5% copper, 2 to 5 oz. silver, and \$6 gold per ton. Shipments were to have started in 1919.

Equipment: includes engine, compressor, drills, shops, and living quarters.

SALTESE MINING & MILLING CO.**MONTANA**

Office: 22 Symons Blk., Spokane, Wash. **Mine:** near Saltese, Mineral county, Mont.

Officers: J. C. Johnson, pres.; Wm. Dixon, v. p.; O. V. Manning, sec-treas., with J. B. Ward and G. A. Turner, directors.

Inc. March, 1911, as the successor of the Saltese Cons. Copper Mng. & Mfg. Co. **Cap.** \$1,500,000; shares \$1 par; assessable. Levied an assessment of .02c. per share, Jan. 12, 1914.

Property: 12 claims, 240 acres, east of Mullan, near the National mine in the St. Regis district, about 8 miles N. W. of Saltese.

Development: by 2 tunnels aggregating 1,400'. The lower one, 655' in length, opens a 13' vein, probably the Black Traveler vein, at 460' from the portal, which is said to show 5' of high-grade copper ore. The tunnel was being extended to cut the big iron-capped vein seen on the surface.

Developing with a small force, 1915-16, but nothing heard of operations since. Property considered promising.

SCRATCH SILVER MINE**MONTANA**

Address: H. O. Flickinger, Philipsburg, Mont., who with George Neveling and John Ingman own the mine.

Property: in the Philipsburg district of Granite county. Rich ore, up to 300 oz. silver per ton, has been shipped. Fire destroyed the surface plant in 1920.

SCRATCH GRAVEL CONS. GOLD MINES CO.**MONTANA**

Formerly the Scratch Gravel Gold Mining Co.

Address: Sidney Norman, Spokane, Washington.

Inc. 1920, in Montana. **Cap.** \$2,000,000; \$1 par; 800,000 issued. The transfer with the old company was on a share for share basis. Shares 5c. bid, 7c. asked, 1920, on Butte Stock Exchange.

Property: known as the Head property, 34.7 acres, lies 2 miles N. W. of Helena, on same fissure vein as the Franklin mine belonging to the Cruse estate.

Development: to 500' depth, by 3 incline shafts, 90', 50' and 500', with 800' of drifting. Only high-grade ore is shipped, the low-grade being stored for the mill which was constructed from a plant erected by another company nearby.

Ore reserves were estimated in Jan., 1917, by C. E. Fryberger, as \$944,509 in ore blocked out and \$1,939,311 probable above 500' and down to 600' depth. Rich ore was sent to the smelter occasionally during 1917 and 1918. No work was done by the company during 1919 and 1920, but resumption expected in 1922.

Equipment: steam power, to be replaced by electricity, and \$10,000 of new machinery to be erected in 1922.

Production: \$340,000 in gold from above the 250' level; also \$69,000 by lessees.

SCRATCH GRAVEL GOLD MINING CO.**MONTANA**

Being dissolved. See Scratch Gravel Cons. G. M. Co.

SELWAY-BOND COPPER GROUP**MONTANA**

Letters returned from former address: Herbert B. Selway, or H. A. Bond, Armstead, Beaverhead county, Mont.

Property: 12 claims, 240 acres, situated 1½ miles from Armstead, Mont. Claims cover 4,000' on the course of several E.-W. fissure veins, 3' to 3½ wide that cross beds of quartzite, schist and limestone. Ore carries 3 to 9% copper.

Development: by 130' shaft and several shallow openings, all said to show ore. Two shafts at water level show 3½ to 10% ore. An open-cut has yielded 250 tons of ore. No late returns secured.

SHEEP CREEK GOLD & SILVER MINING CO.**MONTANA**

Address: G. W. Oxcell, pres., Wise River, Mont.

Property: the Sheep Creek mine, in the Vipond section of the Wise River district of Beaverhead county, 3½ miles from the Montana Southern Ry.,

and 65 miles from Anaconda. Ore carries silver and lead, and some gold and copper.

Development: by 2-compartment incline shaft.

Equipment: engine, pumps, hoist, compressor, etc.

SHEILS & IRONSIDE MINING & MILLING CO. MONTANA

Office: Dr. F. A. Ironside, 16 North Main St., Butte, Mont.

Officers: John Sheils, pres.; Stanley Ironside, v. p.; F. A. Ironside, sec.-treas.

Inc. 1913, in Montana. **Cap.** \$500,000; shares \$1 par; 446,000 issued.

Property: 6 claims, 2 patented, 120 acres, situated 13 miles N. E. of Butte, and an equal distance from Boulder, Jefferson county, show a fissure-vein with ore shoots 250' and 90' long occurring in granite. The granite is cut by an almost vertical dike, greatly altered and mineralized, having a maximum width of over 50'. The ore occurs entirely in the dike, not as a segregation, but in quartz veins running with the dike, within it or at its margin. Orebody is 3' to 5' wide and carries silver, lead, copper, zinc and some gold.

Reported on by W. L. Creden, H. D. Morse, C. J. Stone; also by H. S. Morris.

Development: by 3 tunnels, main one 1,850' long, with several stopes, and a 50' winze with 200' of drifting at the bottom, said to have opened rich ore.

Equipment: includes hoist, 3 drills, electric power, and a 100-ton concentrating mill.

Production: for 1915-16 amounted to 476 tons averaging 4.3% copper, 26.6 oz. silver, and \$4.40 gold. Shipped about 40 tons of concentrates monthly in 1917, and until mine was closed, February 1, 1918.

In 1920, mine was optioned to P. A. Danaher and M. L. Leyding of Helena, and high grade ore found 800' below the surface.

SILVER BOW SECURITIES CO. MONTANA

Address: J. J. Harrington, sec., 73 Hirbour Block, Butte, Mont.

Inc. Oct. 2, 1916, in Mont. **Cap.** \$1,500,000; par \$100. Issued \$116,500.

Company was organized to finance the development of the properties of the Tuolumne Mining Co.

Statement of Jan. 24, 1922 shows assets to include 245,269 shares of Tuolumne stock; \$5,000 Tuolumne bonds; cash and accounts receivable \$9,670, with expense for 5 years of \$9,466.

SILVER BUTTE MINES CORPORATION MONTANA

Office: Sherwood Bldg., Duluth, Minn.; W. D. Gibson, gen. mgr., 61 Hirbour Block, Butte, Mont.

Officers: Gust Carlson, pres.; W. D. Gibson, v. p.; John W. Neukom, sec.-treas., with I. Freimuth and Paul A. Gow, directors. C. J. Zachow, asst. sec.

Inc. April 14, 1920, in Delaware. **Cap.** \$1,500,000; \$1 par; 350,000 outstanding.

Is a reorganization of the Butte-Ballaklava Copper Co. Company purchased the bonds of the latter company and foreclosed the mortgage, Oct. 2, 1920. Stockholders of the Butte-Ballaklava Co. were offered an exchange of stock, share for share, on payment of 50c. cash with each share of Butte-Ballaklava. Company owned all but 1,500 shares of the Corbin Copper King Mng Co., which company was dissolved and its holdings, viz., the Hidden Treasure group, transferred to the Silver Butte.

Property: the Ballaklava mine at Butte, and the Hidden Treasure group of claims near Corbin and Wickes, Mont. The Hidden Treasure ground shows 3 orebearing copper veins in quartz monzonite, with pay ore in several faces, from which ore can be shipped when mine is working.

The Ballaklava property includes the Burke and Ballaklava claims, about at Butte and can produce shipping ore from this and the other veins of the property. It is likely to produce considerable tonnage of high grade ore.

Development: the Hidden Treasure shaft is 400' deep, with crosscuts on the 135, 233 and 400' levels, exposing three westward dipping parallel veins; the easternmost, or Duluth vein of the property is not cut. The Chicago vein is opened by drifts on each level and by a 110' tunnel and winze. The vein is 28' wide on the 133' level and smelter returns show 19.6 oz. silver and 8.9% copper. On the 235' level a shoot of 19 oz. silver and 14.1% copper ore is exposed for 50' by drifting. The ore occurs in bands, in a vein 60' wide, on the 400', opened for 80' west, developing 21% ore, with 22 oz. silver. The Butte vein is 5' wide on the 235', is 10' thick on the 400', and well mineralized, but non-commercial. The Boston vein is 18' wide on the 105' level, and 22' wide on the 400' and carries 5% copper ore with 10 oz. silver, but no ore has been mined. The Duluth vein is 5' wide where exposed by open cut work. The shaft is to be deepened, stoping begun and ore shipped, as soon as the market for metal improves.

Reported Oct., 1921, that company had taken over a valuable coal property and railroad line, near Bozeman, Mont.

The Ballaklava property includes the Burke and Ballaklava claims, about 6½ acres in eastern part of Anaconda hill, adjoining Mountain Chief, Modoc and High Ore mines of the Anaconda Copper Co. Property willed to Bishop Carroll of the Catholic Church, who sold it for \$400,000 cash to this company.

Claims form a narrow tract 1,860' long running with the veins on the northeastern slope of Butte hill. The Burke vein crosses the claim of that name and has been worked in the Modoc mine. There are 4 veins, but one of which is generally workable. This vein is generally correlated with the Jessie, but complex geologic conditions led to a lawsuit with the Anaconda Co. for ownership of the rich orebody mined on the 800' level. This suit was settled by a division of the orebody. Nov. 28, 1913.

The Ballaklava shaft is 1,625' deep, with a level at 1,800' driven on a winze. The mine is connected on the 800' level with the Modoc mine of the Anaconda, and on the 1,200' level with the West Colusa. This crosscut is used for drainage.

Equipment: includes a double-drum hoist, operated in counterbalance, driven by a 300-h. p. motor, designed to hoist an unbalanced load of 5 tons, at a speed of 800' per minute, from a depth of 3,000'. There also are a 165-h. p. auxiliary double-drum hoist, good for 1,500', and a 10x12" auxiliary steam hoist, 2 air-compressors, with cross-compound air cylinders, each driven by a 100-h. p. motor, and an electric station pump. The auxiliary steam plant includes a cooling tower for water.

Production: begun April, 1910, was continued until stopped by injunction, granted the Anaconda Copper Co., in August, 1910. During this period shipments to the Pittsmtont smelter (East Butte), were about 125 tons daily, of ore assaying about 8% copper and 12 oz. silver per ton, this being the highest average grade of ore produced by any Butte mine for that year. Producing about 250 tons daily in 1916, mainly from 800', 1,000', 1,200', and 1,600' levels.

Shut down in recent years, but some ore mined on the 2,200' level by a crosscut from the Modoc shaft; a fire at the latter stopped all work.

SILVER CABLE MINING CO.

MONTANA

Address: 116 East Cedar St., Missoula, Mont.

Officers: J. D. Corbett, pres.; J. W. Kennedy, v. p.; Carl C. Mott, sec.-treas., with H. E. Chaney, and W. J. Rhoades, directors.

Cap. \$1,250,000; \$1 par; assessable, 8 mills per share payable April 16, 1921. Listed on Butte Exchange. Annual meeting, first Saturday in July. Shares 5c. bid. 1920.

On Nov. 30, 1919, company had \$355 on hand, having spent \$10,371 and received \$10,000 from assessment No. 13.

Property: 7 claims in east Coeur d'Alene district, just over the Montana line on the eastern slope of Bitter Root Mts., 5 miles from the Northern Pacific R. R.; part of the land lies in Idaho. Said to have a high body of

silver, lead and zinc ore, from 500' to 700' high, proved for over 200' in length, and from 4' to 6' wide. Ore is said to average better than 15% zinc.

Development: by 1,500' tunnel, raises and drift in ore. Reported developing in 1920; 700' new work in lower tunnel was unsatisfactory, but 15' of good ore was opened in crosscut 100' higher, and continued 25' before mine was shut down.

SILVER DIKE GROUP**MONTANA**

Property: claims on Carpenter creek, near Neihart, Cascada county controlled by American Z. L. & Sm. Co., which see.

SILVER FISSURE MINING CO.**MONTANA**

Address: A. W. S. Cochrane, sec., 30 Broad St., New York.

Property: near Polaris, Beaverhead county, Mont., known as the Polaris mine, formerly operated by F. Aug. Heinze, carries silver and gold.

Shut down 1915, but leased to and operated by Silver Fissure Silver Mining Co. (which see), since 1918.

SILVER FISSURE SILVER MINING CO.**MONTANA**

Idle, 1920. **Address:** Seligman & Meyer, 61 Broadway, New York.

Officers: A. I. Seligman, pres.-treas.; J. Blanner, v. p.; D. J. Ferguson, sec., with J. F. Mercer and P. Mangone, directors H. W. Chadwick, asst. sec.; Glen Anderson, mgr., Butte, Mont.

Inc. in Delaware. **Cap.** \$1,000,000; par \$1; all issued. Annual meeting first Monday in November. Bankers Trust Co., transfer agt.

Property: the Polaris mine, 6 patented claims, 150 acres, in Beaverhead county, owned by the Silver Fissure M. Co. Ore reserves, July, 1918, reported as 69,620 tons containing 1,507,300 oz. silver and 1,300 oz. gold. A 50-ton mill, employing chloridizing roasting and hyposulphite leaching was erected during 1918. Small shipments made in 1919. Property is a good one, but its operation is greatly hampered by its remote situation.

SILVER KING MINING CO.**MONTANA**

Address: H. E. Bauman, mgr., Townsend, Mont.

Inc. 1919, in Idaho.

Property: the Jawbone, an old lead-copper-silver mine, in the Hassel district of Broadwater county, said to have produced \$100,000 up to 1919. Development under way from an 800' tunnel in 1919 and 1920. A mill was to be erected to treat the ore, said to be 2'-3' thick all along the tunnel.

SILVER PICK MINING CO.**MONTANA**

Address: Hugh Daly, 73 E. Park St., Butte, Mont. Dave Anderson mgr.

Property: the Julia Silver mine, an old producer near Elliston, Powell county, developed by 400' shaft. The 300' level opened a 4' vein. Reserves are estimated at 300,000 tons.

Equipment: 100 h. p. steam power, hoist of 600' capacity, compressor, etc.

Production: about \$300,000 between 1910 and 1914. Several carloads shipped to East Helena and Anaconda in 1920, ran 54 oz. silver per ton with 4% copper, 8% lead and \$10 gold. 20 men employed.

SILVER ROCK MINING CO.**MONTANA**

Address: Albert Nelson, supt., Deborgia, Mont.

Officers: Lionel C. Simpson, Camden, N. J., pres., Walter J. Clarke of Philadelphia, sec.-treas.

Inc. 1920. **Cap.** \$1,250,000.

Property: the Rock Island mine, 146 acres, 6 miles from Deborgia, Mineral county. Ore carries silver, lead, and copper.

Development: by 900' of old workings, and a new 400' shaft. Reserves are given as 40,000 tons. In 1921, company purchased machinery and was prepared, it is said, to spend \$100,000 on development.

Production: several cars of ore averaged 16.6 oz. silver, 62.8% lead, and 1.6% copper.

SILVER SPRAY MNG. & MLG. CO.**MONTANA**

Address: Henry Auerbach, pres., Dillon, Mont. L. D. Lyons, mine mgr.

Property: the Silver Spray mine, 20 miles S. E. of Dillon, Mont. Shows 6 veins, 2' to 5' thick.

Development: an 80' shaft opens up 3' of shipping ore.

SILVER TIP MINING CO.

MONTANA

Described in Volume XIV. Consolidated with Troy Mng. Co. and J. P. Lead Co., as **Cons. Silver-Lead M. Co.**, which see.

SILVER TRAIL MINING CO.

MONTANA

Address: Basin, Mont.; J. Asher Cowen, v. p.-mgr., Salt Lake City, Utah.

Inc. 1919, in Montana. **Cap.** \$500,000; par \$1.

Property: 5 claims, 3 miles S. of Basin, Jefferson county. Ore carries silver and gold.

Development: by tunnel, one nearly 400' long, being driven to cut the Silver Blue vein, which assays high in silver and fair in gold; 3½ tons shipped from these cuts assayed 112 oz. silver, and 14 tons, 36 oz. silver and \$3 gold per ton.

SMOKEHOUSE MINING CO.

MONTANA

Subsidiary of the **Davis-Daly Copper Co.**, Butte, Mont., q. v.

SNOWSHOE MINE

MONTANA

Address: Libby, Mont. L. H. Faust, State Board of Education, Helena, Mont.

Is an old silver-lead mine that produced \$1,080,000 before shut down by litigation. Has 200-ton mill and full equipment.

SNOWSTORM MINES CONSOLIDATED

MONTANA

Office: Old National Bank Bldg., Spokane, Wash. Operating Dept.; R. E. Walters, asst. mgr.; L. E. Warner, mill supt.; Jack Grills, mine supt., all at Troy.

Officers: Leo Greenough, pres. and gen. mgr.; W. J. Wakefield, v. p.; W. J. Beaton, sec.-treas., with M. D. Hall, James Broad, H. P. Greenough, and R. E. Walters, asst. gen. mgr., directors.

Inc. in 1916. **Cap.** \$625,000; 25c par. Annual meeting third Tuesday in January. Share 9c bid, 1920.

Company was organized to take over the Snowstorm Mining Co. and to acquire under bond and lease the Banner and Bangle claims, at Troy, Lincoln county, Mont. Of the capital stock, 1,500,000 shares were issued to Snowstorm Mining Co. stockholders in full payment for the corporation's assets. Proceeds of sale of 1,000,000 shares not transferred to the former Snowstorm holders has been devoted to developing and equipping the Banner and Bangle property. Payments on this mine are \$100,000 on Nov. 20, 1920; and \$125,000 a year later, with a royalty of 10%.

Property: the Banner & Bangle mine. Also owns the old Snowstorm holdings at Larson, Idaho; and 25 claims, 7 millsites, 2 power-sites, 5 water-rights, and other holdings about 6 miles S. of Troy, Mont. Ore contains lead, silver, and zinc.

Development: at the Banner and Bangle property includes 6 long tunnels. No. 7, over 1,900' long in 1919, is to be the main working adit, and is expected to cut the vein at 2,500' from the portal. Ore reserves are said to be considerable.

Equipment: includes a 6-mile railroad, 1,200-h. p. hydro-electric plant, compressor, and 300-ton concentrating plant, mine change-house, boarding house, bunk-houses, etc.

Production:

Year	Ore milled, tons	Lead concts., tons	Zinc concts., tons	Gold, oz.	Silver, oz.	Lead, lb.	Zinc, lb.
1920....	30,876	3,410	872	272	109,829	3,480,444	605,499
1919....	62,009	4,557	1,848	600	145,577	5,786,555	962,160
1918....	65,342	5,093	3,644	561	164,605	6,060,484	2,474,969
1917....	61,647	2,933	3,150	445	89,980	3,927,559	1,826,903

It would seem as if company has a good mine and equipment, and is making every effort to develop it thoroughly. Profits so far have not been large, and payments due on property are heavy, but dividends are expected in the not far distant future.

Employed about 20 men, 1921.

SOLAR MINING CO.**MONTANA**

Address: A. P. Heywood, Helena, Mont.

Inc. 1920, in Mont. Cap. \$250,000.

Property: Stemwinder mine in Greenhorn district, near Helena, Lewis and Clarke county. Shipped siliceous silver ore in 1919-20.

SOUTH BUTTE MINING CO.**MONTANA**

Address: Butte, Mont. John G. Williams, M. E. Riley and Arthur Howell, directors, at last accounts.

Inc. May 25, 1906, in Minnesota. Cap. \$500,000; shares \$100 par. Company was organized by the Great Northern Railway interests, and has had much litigation, with various individuals and corporations, including the Butte Central Copper Co., East Butte Mining Co., P. D. Morgan, T. B. Thomas, and others, winning practically all of the suits. Property was leased to the Montana Consolidated Mining Co., but nothing of particular value was developed, and the latter-named company was liquidated.

Property: includes the Surprise placer claim, but company's chief asset consists of mineral rights to a narrow strip along the Great Northern right-of-way. Idle at last accounts.

In 1920 company obtained an injunction against Thos. B. Thomas for attempting to patent the Resurrection claim.

SOUTHERN CROSS MINE**MONTANA**

J. C. O'Brien, supt., Southern Cross, via Anaconda, Mont. Owned by Anaconda Copper Co.

Employs 85 men normally and produces 90 tons daily.

SPOKANE-MONTANA MINING CO.**MONTANA**

Officers: J. O. Hamilton, pres., Peyton Bldg., Spokane, Wash., D. E. Burns, v. p.; Fred Ludwein, sec.-treas., with Wm. Gumm and Andrew Kuklo, directors.

Cap. \$1,000,000; \$1 par. Annual meeting October 15.

Property: 2 claims, 2 miles from Basin, Jefferson county, Mont., developed by tunnels on veins in granite. Ore contains galena with gold and silver values.

SPOTTED HORSE MINING CO.**MONTANA**

Address: Maiden, Mont. S. B. Coolidge, mgr.; C. L. Carstens, mine supt.; H. J. Mamill, mill supt.

Inc. in Arizona. Cap. \$50,000; \$100 par.

Property: an old and well known gold mine, 35 acres, 1 mile from Maiden, in Judith mountains. (See Geol. of Judith Mts., Montana, by Weed & Pirsson, U. S. Geol. Survey.)

Development: by 450' shaft. Five distinct oreshoots extend to No. 7 level. Reserves are given as 20,000 tons.

Equipment: the mill contains crusher, rolls, Chilean mill, and Dorr counter-current decantation system of cyanidation, treating 120 tons daily.

Production: monthly output of concentrate is 30 tons, assaying from \$200 to \$800 per ton. Costs are reported as \$2 per ton for mining, and 90 cents for milling. Worked part of 1919 and yielded some ore, 1920-'21.

STEARNS & KING MINE**MONTANA**

Address: G. W. King, Iron Mountain, Mont.

Property: a gold prospect 3 miles N. E. of Cobden, Mineral county, opened by 500' tunnel.

STERLING MINING & MILLING CO.**MONTANA**

Succeeds the Liberty Mining Co. and Mike Horse Mining Co.

Address: Archie McDonald, mgr., Flesher, Mont., or Canyon Creek, Mont. U. J. Jones, supt.

Officers: F. W. Rader, pres., Ellensburg, Wash.; F. J. Sievers, v. p., Pullman; J. P. Clymer, sec.-treas.; U. J. Jones, mine supt.; with Geo. B. Cook and J. P. Clymer, both of Ellensburg, Wash., as trustees.

Property: 21 claims, including the Mike Horse mine, an old silver-lead producer, near Flesher, 50 miles N. W. of Helena, on main divide, Black-foot county. Ore has to be hauled 36 miles to Wolf Creek on the Great Falls branch of the G. N. Ry., at a cost of \$14 per ton.

Development: by over 4,000' of tunnels, etc. No. 3 was in 1.175' by Sept., 1920, and had cut the Mike Horse vein. No 1 and 2 tunnels also cut 6' of ore.

Equipment: 125 h. p. steam plant and a 100-ton mill run one shift, 1919. Shipped several cars lead concentrate, 1919.

SUMMIT DEVELOPMENT CO.

MONTANA

Address: A. J. Reeder, Minneapolis, Minn., or A. H. Jones, supt., Virginia City, Mont.

Property: the Shafter and Marietta gold-silver mines in Summit district, near Virginia City.

SWASTIKA MINING CO.

MONTANA

Address: Philipsburg, Granite county, Mont. W. W. Williams, mgr.

Officers: W. I. Power, pres.; F. R. Andrus, v. p.; C. E. Hansen, sec.; W. W. Kroker, treas.; the officers are the directors.

Inc. April, 1913, in Montana. **Cap.** \$500,000; shares \$1 par; 407,043 outstanding.

Property: 3 claims, 1 patented, known as the old Basin mine, and held under long term option, shows a 4' vein of argentiferous copper ore, oxidized to carbonates near the surface, exposed for 100' on the 150' level.

Development: consists of a 190' shaft, and 200' of drifts. Ore averages 4% in copper, 1½ oz. silver, 50c. gold ton.

Equipment: includes electric hoist good for 500', compressor and pump.

Mine was closed down in 1914, but at last accounts efforts were being made to increase capitalization and resume operations.

SYNDICATE COPPER CO.

MONTANA

Described in Volume XIII. Company dissolved. See Tuolumne Copper Mining Co.

TARBOX MINING CO.

MONTANA

Office: Shoshone Bldg., Wallace, Idaho. **Mine office:** Saltese, Mineral county, Mont.

Officers: Richard Daxon, pres.-mgr. A. H. Fox, v. p.; J. F. Ferguson, sec.-treas., with J. A. Lewis, W. W. Adams, and F. J. Davey, directors.

Inc. in 1890. **Cap.** \$2,000,000; \$1 par; 1,600,000 issued; assessable. Last assessment (No. 40) of 3 mills per share payable July 20, 1921. Annual meeting, third Monday in July. Listed on Butte Exchange.

An option on 60% of the issued shares was given to J. R. Hall during 1920, to net shareholders 27c. per share. The optionee was to spend \$100,000, but abnormal conditions compelled a postponement. Meanwhile, the company is spending \$2,000 a month on development.

Property: 12 claims on Packer creek, 3 miles N. of Saltese, Missoula county. Large bodies of low grade zinc-lead ore occur in the mine. Ore carries galena and zinc blende, copper and gold coming in at 800'. Vein at surface is 10' to 30' wide and filling is quartz and siderite. Examined by F. J. Davey in 1918.

Development: by 800' two-compartment shaft and winze sunk 200' below bottom level. At last accounts the ore shoot on the 1,000' level was 9' wide and had been opened for a length of 160'; one third of the vein is shipping ore. It is estimated by management that 110,400 tons of ore between the 600' and 800' levels, plus that shown by recent development, and 5,000 tons on dumps, will average 2.85 oz. silver, 7.3% lead, and 7.6% zinc. By 1921, a 3' shoot of clean lead-silver ore had been opened on the 800' level.

Equipment: includes sawmill, steam hoist and compressor, gasoline-driven mine fan, pumps, water power plant, living quarters for 50 men (12 employed), and a 150-ton concentrator to be built.

Mine idle from March 15, 1920 to Oct. 15.

TENDERFOOT COPPER MINING CO.

MONTANA

Address: John Whitted, pres. or R. W. Berry, sec., Great Falls, Mont.

Property: 10 mining claims, 4 patented, near Monarch, Mont., containing gold and silver bearing copper ores. Developing only.

THOMAS CRUSE MINING & DEV. CO.

MONTANA

Address: Helena, Mont.

Officers: Richard Cruse, pres.; Carolyn B. Cruse, v. p.; W. J. Cooke, sec.; J. J. Cruse, treas. with C. B. Nolan, E. J. Lange, and E. D. Phelan, directors.

Inc. in Montana. Cap. \$1,500,000; \$1 par; all issued.

Property: the Franklin and Helena mines, in Marysville and Scratch Gravel districts, Lewis & Clark county; also claims on Jackson creek, Jefferson county; and patented oil claims in Carbon county, a total of 1,735 acres. Examined by W. F. Word of Helena. Ores are principally gold and silver bearing.

THREE FORKS COPPER MINING CO.

MONTANA

Probably inactive.

Address: Copper City, Broadwater county, Mont. Herbert G. Dunbar, supt., Three Forks, Mont.

Property: a group of claims, at Copper City, 7 miles north of Three Forks. Developed by 400' shaft. As shaft is in lead material from top down, the lode is said to be 200' wide. Sulphide copper ore appears at 325', or 25' above water level. Company planned extensive prospecting on 400' level.

The ore is somewhat bismuthiferous, assaying up to 20% copper, with small values in gold and silver.

Equipment: includes steam power and an air compressor. No recent returns received.

TICON MINING CO.

MONTANA

Controlled by Jas. A. Murray Estate of Butte, Mont.

Property: 1 fractional claim, about 2 acres, lying between the Bell and Wild Bill mines of the Anaconda and the Speculator and Edith May claims of the North Butte. Mine has a 700' incline shaft on the vein with levels opened at 300', 500', 550' and 600', said to show 4' of good ore in the bottom. Work was stopped by an injunction, secured by the Anaconda Copper Mining Co. Idle since 1916.

TIMBER BUTTE MILLING CO.

MONTANA

Address: W. A. Rossberg, mgr., Miner Block, Butte, Mont.

Is the operating company for mill treating ores from all the W. A. Clark properties at Butte, Mont., handling 1,000 tons daily of zinc ore and as much copper ore.

TREASURE MOUNTAIN MINING CO.

MONTANA

P. S. Rose, pres., Libby, Mont.

Inc. 1920. **Cap.** \$200,000.

Property: adjoins the Lukens Hazel mine, 9 miles S. of Libby, Lincoln county, said to contain lead-silver ore.

TREDENICK DEVELOPMENT CO.

MONTANA

Address: Cooke, Mont.

Operating in summer of 1921.

TRIANGLE MINING & DEVELOPMENT CO.

MONTANA

Letters returned from former office: 8 Allen Blk., Missoula, Mont. Mine office: Clinton, Mont.

Officers: R. B. Hughes, pres and gen., mgr.; Oliver Blood, v. p.; H. Y. Gephart, sec.-treas., with David C. Smith, E. C. Mulrone, F. C. Robb and Geo. E. Sullinger, directors. Henry E. Kuphal, engr.

Inc. Aug. 25, 1906, in Montana. **Cap.** \$500,000; increased later to \$1,-

200,000; shares \$1 par, non-assessable; issued \$665,000. Debentures, \$150,000 6%, \$38,000 issued. Annual meeting, third Monday in February.

Property: 13 claims, 10 unpatented, 230 acres, well-watered and partly timbered in the Wallace district, 2½ miles from a railway, in 3 groups, known as the Triangle group of 8 claims, and the Hill group of 5 claims, 2 miles N. E. of Clinton and 17 miles E. of Missoula. The company also owns land in the town of Clinton.

The claims contain fissure veins cutting granite and altered sedimentary rocks near the contact with a large batholith of granite. The veins show chalcopyrite and bornite associated with hematite, siderite, and quartz in altered granite. The Triangle group shows a 16' vein, opened by a 640' tunnel with back of 450'. At the face the vein is 14' wide and assays 2% copper, ½ oz. silver and 40 cts. gold, while an 8" streak averages 15.04% copper, 3.20 oz. silver and 24 oz. gold and a 4' footwall streak averages 4.65% copper, 12 oz. silver and 80 cts. gold.

Development: by a 140' crosscut and 540' drift tunnels and 40' shaft. Estimated to block out 25,000 tons ore. The Grass Widow claim has 513' of crosscutting and 300', 75' and 100' drifts. The Hill group has a 300' drift tunnel.

Equipment: includes a 40-h. p. boiler and an Ingersoll-Rand air-compressor, besides several mine buildings. Idle since 1917.

TRIUMPH GOLD MINING CO.

MONTANA

Address: Lyman V. Loomis, Philipsburg, Mont., or G. D. Loomis, sec., Philipsburg, Mont.

Property: the Harper mine at Philipsburg, Granite county. Ore carries silver and a little copper and gold. Dumps are said to contain 100,000 tons, assaying 11 oz. silver, with 30c. to 60c. gold and some tungsten.

Equipment: two 40-h. p. boilers, hoist, pump, compressor, etc.

Working at the end of 1920.

TUOLUMNE COPPER MINING CO.

MONTANA

Principal office: 73 Hirbourn Bldg., Butte, Mont.

Officers: Wm. P. Jahn, Milwaukee, Wisc., pres.; Daniel Coleman, v. p.; J. J. Harrington, sec.; Frank K. Wilson, treas.; Paul A. Gow, mgr.; Walter Harvey Weed, cons. engr. **Directors:** Ed. Hickey, Wm. P. Jahn, Frank K. Wilson, Paul A. Gow, John Harrington, F. X. Girard and Dan Coleman.

Inc. June 4, 1906, in Arizona. **Cap.** \$800,000; shares \$1 par. Company reorganized in May, 1916, with capital of \$2,500,000, shares \$1 par; outstanding 1,986,806 shares. A bond issue of \$500,000, 7%, 5 year, convertible into stock at \$2 a share, was authorized Dec., 1919, due March 1, 1925. Listed on Boston Stock Exchange and the New York Curb. State Street Trust Co., Boston, transfer office; Beacon Trust Co., Boston, registrar. Annual meeting, second Monday in March, at Butte, Mont.

Financial statement, years ending Dec. 31:

Year	Revenue	Expenses	Depre. & Dep.	Deficit
1920.....	\$314,798	\$258,994	\$77,466	\$76,511
1919.....	217,586	306,277	76,173	164,864
1918.....	199,557	166,870	97,680	64,993

Year	Property & Assets		Current	Total
	plant	Development etc.		
1920.....	\$3,704,534	\$13,950	\$65,842	\$3,704,534
1919.....	3,626,136	18,000	24,962	3,669,108
1918.....	3,479,586	54,172	3,533,758

Liabilities

Year	Capital	Current	Reserves	Surplus	Total
1920.....	\$1,986,804	\$43,907	\$405,924	\$1,251,498	\$3,704,534
1919.....	1,986,806	21,367	333,458	1,327,477	\$3,669,108
1918.....	1,960,115	364	257,285	1,315,994	3,533,758

Operating expenses for 1921 were \$151,794 of which \$26,624 was charges to mining and \$83,754 to development.

Financial statement for 1921 shows assets, \$3,918,490; acct's pay., outstanding bonds and reserves for depletion and depreciation, \$691, 861; capital stock outstanding, \$1,985,954; surplus, \$1,239,675.

Dividends: 45c per share in 1911, 20c per share in 1913.

History: company was formed to acquire and mine the Tuolumne claim, which carries the Jessie vein. This and other veins were worked from 1909 to 1918, to a depth of 2,680', with a production of 207,969 tons of ore yielding 21,761,190 lb. copper, 658,194 oz. silver, averaging 5.25% copper and 3.11 oz. silver. All work was stopped January 1, 1918, because increased cost of operating and declining grade of ore did not permit sufficient profit.

Following a reorganization of the company in 1916 the Main Range and Colusa-Leonard Extension groups were taken over on very favorable development contracts, and in 1918 all outstanding interests in these groups were acquired and properties deeded to Tuolumne Copper Mining Co.

The Colusa-Leonard Extension group consists of 6 claims—the Maggie Placer, Golden Hematite, Little McQueen, Undine, Snowbird Placer and Syndicate. The property, though practically undeveloped, has a two-compartment shaft 1,200' deep. A connection has been made from this shaft to the Main Range shaft on the 700' level. The property is well equipped, and during 1919 was unwatered and developed on the 1,200' level. The claims contain the westerly extension of the Spread Delight vein at depth, and the Sinbad vein also traverses this tract.

The Main Range group consists of the 7 claims—Sinbad, Main Range Fraction, Spread Delight, Tent Peg, Rory O'More, Kingstella, and Lillie. This property has been partly developed from the Main Range shaft to the 1,200' level. A large orebody varying in width from 10 to 35' and 350' in length has been developed in the Spread Delight vein on the 700' to 1,200' levels. Stopping operations on orebody above the 1,000' level up to Jan. 1, 1921, yielded 89,222 tons which contained 3,750,753 lb. of copper, 787,436 oz. of silver, and 675 oz. gold, yielding \$842,788 in net smelter returns. During the year 1920-21 the Main Range shaft was sunk to the 1,600' level and the vein drifted on for 320'.

Development: includes two 1,200' shafts, about 1,000' apart. The eastern or Main Range shaft has levels at 700, 800, 1,000 and 1,200' depth with drifts on the veins at each level. Considerable ore has been mined from above the 800' level, mainly from the Spread Delight vein, the figures being given in the accompanying table. On the 1,200' level is a 500 gal. motor-driven pump.

Sinking the main shaft to 2,000' was started in Jan., 1921.

On the 800' level the vein was 110' thick and showed a 6-8' ore streak on one wall which has not yet been developed. The main oreshoot in the middle of the vein shows from 15-35' of ore which has been stoped out up to the 700' level.

On the 1,000' level this vein is explored by a 590' drift and the oreshoot was found to be leached and broken by faulting, the ore averaging 15 oz. silver and 2% copper with a 6' band of 70 oz. ore on the sill floor.

On the 1,200' level the Spread Delight vein shows less quartz, and an ore shoot 25' wide.

In 1920 the company operations included 45' of shaft sinking, 1,035' of crosscutting, 799' of drifting, besides station cutting and raises. Returns from all ore mined above the 800' level, up to January 1, 1921, amount to \$842,788.67.

In 1921 new work consisted of 1,875' of drifts and crosscuts, 350' of sinking and 6,500 cu. ft. of stations cut.

Ore assaying 4½% copper and 77 oz. silver per ton and running 15 oz. silver for a width of 15' was opened in the Spread Delight vein on 1,600' level during Dec., 1921. By March, 1922, the shaft had reached a depth of 1,775'.

In addition to the Spread Delight vein, four other large veins have been cut in this property, but are as yet undeveloped. Shipments have been made from the Sinbad vein, which shows a width of 20', and the Rory O More vein 40' wide, shows an ore-shoot 15' in width.

Equipment: the Main Range has a surface plant consisting of large double-drum electric hoist, 2,500 cu. ft. electrically-driven compressor, framing and carpenter shop with framer and saws electrically driven, blacksmith shop, machine-shop, warehouse, boiler plant, change-house, office, 80' head-frame and ore-bins.

Main Range Mine.

	Ore. tons	Copper. lb.	Sil. oz.	Gold. oz.	Aver. Cop. %	Aver. Sil. oz.	Aver. Gold oz.
1916.....	446	22,101	2,346.65	3.323	2.467	5.257	0.0074
1917.....	10,774	424,894	101,519.58	83.810	1.972	9.422	0.0078
1918.....	23,534	1,060,493	189,934.15	177.600	2.253	8.082	0.0075
1919.....	26,515	1,110,286	215,520.00	199.400	2.094	8.128	0.0075

Production for 1st quarter of 1920 was 218,827 lb copper, and 31,519 oz. silver.

Operations in 1919 were interrupted by labor troubles.

The east side holdings of the company embracing 13 claims in the Colusa-Leonard Extension and Main Range groups, or a total of over 80 acres, are on the easterly extension of the copper vein system of the Butte hill. The property adjoins that of the Anaconda, East Butte, and North Butte, lies to the west of the Continental fault, and the extensions of the largest veins of the Butte hill have been proved in this property. Development has shown the existence of large orebodies of good grade, and the policy of vigorous development that has been adopted by the company will, it is believed, result in making another large producer and dividend payer in the Butte district.

Butte Main Range Copper Mining Co.

Officers: J. J. Harrington, pres.; A. F. Rice, v. p.; Frank X. Girard, treas.; Geo. E. Palmer, sec., with M. C. Smetters, Lyman J. Roscow, Herbert M. Fay, and E. P. Pennebaker, directors.

Inc. August, 1912, in Montana. Annual meeting second Monday in March.

Cap. \$1,500,000; shares \$1 par; 38,140 outstanding.

Property: consisting of 37 acres in Butte district has been sold to Tuolumne Copper Mining Co.. Assets of company now consist of 19,070 shares of the capital stock of Tuolumne company.

Colusa-Leonard Extension Copper Co.

Office: 46 E. Broadway, Butte, Mont.

Officers: W. W. McDowell, pres.; Guy W. Stapleton, v. p.; W. E. Reynolds, sec.; Meyer Genzberger, treas., with Jacob Kaufman, directors.

Inc. 1906, in Arizona. **Cap.** \$5,000,000; shares \$5 par; 957,028 shares outstanding.

Property: all property formerly held by company consisting of 43 acres in Butte district transferred to Syndicate Copper Co. for stock of latter company. Syndicate company stock was sold to Tuolumne Copper Mining Co. for 239,257 shares of its capital stock 213,229 shares of block of Tuolumne stock thus acquired have been distributed to stockholders of the Colusa-Leonard Extension Copper Co., and the balance of 26,028 shares, which now constitute the sole assets of the company have been deposited in the First National Bank of Butte, Montana, for distribution to the holders of 104,-112 shares of Colusa-Leonard Extension stock who have not yet participated in the distribution of the company's assets.

Syndicate Copper Mining Co.

All of the capital stock was acquired in 1918 by the Tuolumne Copper Mining Co., the assets consisting of 42 acres in the Butte district were transferred to the latter corporation and the Syndicate Copper Co. was dissolved in January, 1919.

The Tuolumne was financed by bond sales in 1921, enabling it to conserve its ore reserves until copper prices improve.

The Main Range shaft is to be sunk to the 2,400' level and crosscuts driven at 2,200' and 2,400' levels, as geologic evidence indicated that the richer ores of this section of the Butte district are deep seated. At 1,750' the shaft cut a lead of good copper ore.

Management excellent and property very promising.

TWIN CITY MINING & MILLING CO.**MONTANA**

Address: Elliston, Powell county, Mont.

Officers: W. M. O'Connell, pres.; F. B. Hubbard, v. p.; E. J. P. Dwelly, sec.-treas., with P. H. McCauley, J. L. Hurd and John Churchill, directors; Allan McNaughton, gen. mgr.

Inc. in Montana. Cap. \$500,000; shares \$1 par; 300,000 issued. Annual meeting, April 4.

Property: 5 claims, 70 acres, patented, in Elliston district, 8 miles from Elliston, on east side of Telegraph creek. Ore occurs in granite, and management reports 6 veins, of which one is developed by 2 shafts, 185' and 50' deep, and a 250' tunnel with 3 crosscuts. Total workings 525', said to prove vein 18' wide, traceable for 3,000' and proven to 170' depth, carrying 5% copper, 4% lead, 19 oz. silver and \$3 gold per ton. Value is said to increase in depth and sulphide ores expected at about 300'.

Equipment: includes steam power, one 40-h. p. hoist and several buildings. Idle since 1915.

TYLER MINING & MILLING CO., LTD.**MONTANA**

Address: Albert Hausaman, sec., Burke, Idaho.

Cap. \$1,000,000; shares \$1 par; assessable. Two mills per share levied in February, 1920 and again in July, 1921.

Property: 8 claims, 17 miles from Burke, Shoshone county, but on the Montana side of the divide. Ore carries lead and silver and has been opened by over 800' of workings.

TZARENA GROUP**MONTANA**

Owned by J. A. Murray estate, Butte, Mont.

Property: 7 claims, 79 acres, 2 miles S. W. of business center of Butte, and midway between the Gagnon, Bettie and other producing mines of the Anaconda company. Examined by W. H. Weed.

Ground is crossed by the strong outcrop of the Emma or Ancient vein, 80 to 100' wide, which, judging by its geologic and other features, should contain as big and rich orebodies as the Rainbow lode. The eastern claims of property have all the essential characteristics observed on the eastern end of Butte & Superior ground. The country rocks are granite and aplite. Silver-bearing zinc ore should be found.

Development: the Britannia claim has a shaft 400' deep, with temporary hoist and other machinery.

UNITED SMELTING & REFINING CO.**MONTANA**

Absorbed by American Smelting & Refining Co., and company dissolved. Owned East Helena (Mont.) lead smelter, which see.

UNITED STATE CHROME CO.**MONTANA**

Address: O. V. Miller, supt., Contact, Mont

Property: 13 claims, 250 acres, 34 miles up the Boulder river from Big-timber, Sweet Grass county. Ore consists of chromite, occurring in a vein which Professor Clapp of the Montana School of Mines is reported to have said is traceable 30 miles, the outcrop being from 6,700' to 9,200' above the

sea. The ore is 3 to 12' wide, opened by 140' and 160' tunnels to depth of 90'.

Equipment: 10-stamp mill with concentrators erected in 1919; \$13,000 spent on property in 1918. O. V. Miller, superintendent, places reserves at 800,000 tons. The Bonanza claims were sold to Barker & Purdy of Great Falls for \$50,000, and the Miller & Roland group to Gish and Marlow for \$75,000. The latter also took over the Bonanza group later on.

During 1920, company completed mine buildings, etc.

UNITED STATES COPPER MINING CO.

MONTANA

Address: H. V. Edwards, Jr., pres., Gyde-Taylor Bldg., Wallace, Idaho. E. R. Day, sec.

Cap. \$500,000; 10c. par; non-assessable, increased 1920 from \$100,000; 10c. par.

Property: 3 patented claims on Clear Creek, Sanders county, 12 miles from Thompson. A 4 to 40' vein has been traced for 3,000' on the surface, carrying good copper content.

Development: by 200' tunnel on the vein, exposing 2 to 30% ore. A lower tunnel, 1,200' long, to cut the vein at a depth of 350', was to be driven in 1921.

UNITED STATES MANGANESE CORPORATION

MONTANA

Offices: 27 State St., Boston, Mass.; Montana Bldg., Helena, Mont.; and 832 Colorado St., Butte, Mont.

Officers: Austin M. Pinkham, pres.; Ellery C. Wright, v. p.; C. Phipps, treas.; James Quinn, sec. Directors: Frank Eichelberger, Carl J. Trauerman, Harold G. Gallagher, Charles E. Fryberger and Brig.-Gen Henry M. Pellett. Board of managers: Frank Eichelberger and Charles E. Fryberger, mng. engrs., Helena, Mont., and Carl J. Trauerman, mng. engr., Butte, Mont. Transfer agent and registrar, U. S. Corporation Co., 65 Cedar St., New York.

Inc. May 17, 1918, in Delaware. **Cap.** \$7,000,000; shares \$10 par; consisting of 1,000,000 8% preferred, non-cumulative, participating and 600,000 common shares; 40,000 preferred and 500,000 common outstanding. Of the latter, 250,000 shares were set aside for acquiring the 2,500,000 shares (par \$1) of Butte Detroit Copper & Zinc Co. Butte Detroit shares were exchanged at par in U. S. Manganese on a payment of 10 cents cash, i. e., Butte Detroit holders had to turn in 10 shares and \$1 in cash to obtain one share of U. S. Manganese common stock, thus paying \$250,000 cash to convert their stock into that of U. S. Manganese.

Dividends: 2% was paid April 27, 1919; and 2% July 27, 1919, 8% non-cumulative stock.

Business: this is a bonding company ostensibly organized to acquire and develop manganese properties and treat ores of same. Before the plans of company could be fully completed, the armistice was signed and it had to give up its manganese projects. It is at present examining and acquiring meritorious precious-metal properties. It holds 50% of the stock of the Liverpool Silver Mines Co., 51% of that of the Monarch Mining & Power Co., all of the shares and 55% of the bonds of the New York-Montana Testing & Engineering Co., 51% of Butte-Detroit Copper & Zinc Mining Co., and 66 2/3 of \$300,000 bond issue of the Butte Central Mining & Milling Co., all of which are separately described. The outstanding shares of the U. S. Manganese Corporation includes the stock necessary to complete conversion of the Butte-Detroit Copper & Zinc Mining Co. shares.

Company will, it is said, endeavor to develop the field for high-grade manganese ore for dry batteries and chemical uses, a product commanding high prices in a domestic market, consuming 25,000 tons annually.

Property: in taking over the Butte-Detroit, the U. S. Manganese got the Ophir mine, which had been extensively opened to depth of 1,100', showing considerable zinc and manganese ore. (For details of development, see Vol. XIII). The Butte Central M. & M. Co., the operating company

for Butte-Detroit, had an old judgment against it, and late in 1918 the Ophir mine and mill, on which U. S. Manganese depended for its output of manganese, was sold to the Anaconda company for \$57,000 at public auction. By law, the owners of the Ophir were allowed a year for redemption of the mine. According to the Davison Company, formerly of Boston, (out of business 1922) which promoted this bunch of interlocking companies, the Ophir mine contains 1,000,000 tons of black manganese, and pink manganese ore. The Butte-Detroit mill is reported to be capable of crushing 600 tons of ore and concentrating 250 tons daily. Crude ore carries 30% Mn. and concentrate 50%. On a delivery of 100 tons daily at Chicago "a net profit of \$1,570" was expected, basis of manganese at \$1.20 per unit (\$60 per ton).

In January, 1919, it was announced that U. S. Manganese had a contract for the output of the Valley Forge mine in Montana, and the Monarch mine near Elliston, Powell county, Montana, 25 miles from Helena. A mill is being erected at the latter. The company's plans are ambitious, but——

In Oct., 1920, the Federal Govt. awarded company \$21,157 through the War Minerals Relief Act. This was 15% of what was claimed.

VALENTINE MINING CO.

MONTANA

Address: O. A. Olsson, sec., Gyde-Taylor Bldg., Wallace, Idaho.
William Bland, pres., Henderson, Mont. A. L. Thurston, mgr., Deborgia, Mont.

Cap. \$1,000,000; par \$1; assessable; 2 mills per share called in June, 1921.

Property: the Rough Rider and Terra Firma mines, 7 claims, 5 miles from Deborgia, Mineral county, adjoining the old Rock Island mine.

Development: by 600' tunnel and shaft. Prospects at end of 1921 said to be most encouraging.

VALLEY FORGE MINING CO.

MONTANA

Address: S. A. Mendenhall, mgr., Rimini, Mont.

Property: silver-lead-zinc mine in Ten-Mile district, 14 miles W. of Helena. Shipments were 80 tons daily of dump ore in 1920-'21.

VANDOR MINING CO.

MONTANA

Address: E. B. Lindberg, Ringling, Meagher county, Mont.

Officers: J. F. Simmons, pres.-mgr.; J. F. Stuart, v. p.; E. B. Lindberg, sec.-treas., with J. J. Tucker and J. P. Kurtz, directors.

Cap. \$1,000,000; par \$1.

Property: 5 claims, 7 miles S. W. of Ringling, credited with production to mid-1918 of 16 carloads of ore averaging 6½% copper.

VERMILLION SILVER & LEAD MINING CO.

MONTANA

Address: W. A. Kittrell, mgr., Trout creek, Mont.

Property: the Vermillion mine, 6 claims, 12 miles from Trout creek, Sanders county, carrying veins of gold-lead-copper-zinc ore, opened by tunnels. A 100-ton mill is run by water power. Ore shoot 3'-7½' thick and 600' long in main or lower tunnel. Operating in 1920.

WAR EAGLE GOLD & COPPER MINING CO.

MONTANA

Property: 3 claims, 7 miles from Alhambra, in Warm Springs gulch, Jefferson county, Mont., shows strong fissure veins in granite. Mineralization is in bands of sulphide ore in soft altered granite, the ore consisting of pyrite and a little chalcopyrite, whose value is mainly in gold.

Development: by a 300' tunnel, planned to intersect the vein at about 1,500' and give a back of about 500'. Presumably idle, as letters sent company were returned unclaimed.

WAR EAGLE MINING CO.

MONTANA

Address: as below.

Officers: J. C. Arbogast, pres., Harlem, Mont.; Ike Duncan, v. p., Chinook, Mont.; G. M. Everett, sec.-treas., Harlem, Mont.

Property: a gold mine, in the Little Rockies, near Landusky, Mont., that is under development. Has 20 h. p. gasoline hoist.

WESTERN RESERVE MINING CO.**MONTANA****Office:** Youngstown, Ohio. **Mine office:** Basin, Mont.**Officers:** F. S. Merwin, pres.; C. Livingston, v. p.; H. F. Duesinc, sec-treas., with C. J. Burns, J. E. Richardson, A. F. Schontz, E. C. Welch, J. W. Kuhns, directors J. H. Hildebrand, supt.**Inc. in Ohio. Cap.** \$100,000; \$1 par. Annual meeting, February 1. **Transfer office:** Youngstown, Ohio.**Property** 3 claims, at Basin, Jefferson county, developed for gold, silver, lead and copper. The quartz veins in granite strike E. W. and dip N. Pay ore occurs in large and small bodies as shoots and streaks showing sulphides.**Development:** by 2,700' tunnel, greatest depth being 660'.**Equipment:** includes a steam compressor. Plan driving 100' tunnel and erection of concentration plant. Developing in 1916 and 1917. No recent returns.**WESTERN SILVER MINING CO.****MONTANA****Address:** Bert Alley, pres., Butte, Mont.**Property:** the Stanislaus claim in Missoula gulch, in Butte, Mont. Shaft 300' deep, shows 3'-4' ore said to carry 3½ oz. gold per ton and 98 oz. silver per ton.**WESTERN SMELTING & POWER CO.****MONTANA****Office:** c/o. G. L. Tanzer, 601 Eitel Bldg., Seattle, Wash.; H. C. Reagan, supt., Cooke City, Park county, Mont.**Office:** c/o G. L. Tanzer, 601 Eitel Gldg., Seattle, Wash.; H. C. sec.; G. B. Baker, treas., with C. J. Steeple, E. W. Gaylord, Joseph Schlenker, G. M. Moores, and C. A. Follett, directors. W. M. Tanzer, mgr.; F. A. Hancock, supt.**Inc.** 1911, in Washington. **Cap.** \$5,000,000; \$1 par: 2,206,117 issued. Annual meeting, first Saturday in March. Expenses in 1916 were \$89,592; \$57,395 in 1917; \$79,161 in 1918.**Property:** a group of claims on Henderson mountain.**Development:** by tunnels, and a main working adit being driven in 1921. Large orebodies are reported to be ready for mining.

In March, 1919, company reported that a 1,000-h. p. hydro-electric plant, 4 miles from Cooke, lumber mills producing 20,000 board feet daily, and 5-drill compressor at mine were all in operation. The 300-ton modern copper blast-furnace at Cooke City, Park county, was 90% complete by Feb., 1921.

Company is highly optimistic as to the future.

WHITE CHIEF COPPER CO.**MONTANA**

Described in Volume XIII. Absorbed 1918 by the Liberty-Montana Mines Co., which see.

Inc. Sept. 1913. **Cap.** \$1,000,000; shares \$1 par.**WHITEHALL MINING, MILLING & DEV. CO.****MONTANA****Address:** Whitehall, Mont.**Officers:** at last accounts, T. T. Gates, pres.; N. D. Root, v. p.; C. W. Hatch, sec., with Edward Ryan, Jesse Johnson, L. B. Knight, R. Edwards, J. M. Borden and James Ryan, directors.**Inc.** June, 1914, at Whitehall, Mont. **Cap.** \$500,000; shares \$1 par; 200,000 shares in treasury; 250,000 shares were given for the mining property.**Property:** 5 claims, about 3 miles N. E. of Whitehall, Jefferson county, is reported to have an orebody 36' wide from which shipments have averaged \$16 per ton. Idle at last accounts.**WHITLATCH GOLD CO.****MONTANA****Address:** A. R. Shennan, lessee, Box 351, Helena, Mont. Owned by C. W. Young, Chicago, Ill. Worked since 1912 under lease by Sherman Bros. (H. C., A. R. & Wm.), of Helena, Mont.**Property:** the Whitlatch mine, at Unionville, 3½ miles south of Helena, Mont., located in 1864 and operated intermittently to date, has been a good

and profitable gold producer. The veins carry silicious gold ore, containing small silver values, developed by a 500' shaft; recent work is mostly between the 400' and 500' levels; a new shoot was opened at 450' in May, 1919.

Equipment: includes 80 h. p. electric plant, tramway, compressor, pump and hoist. Only 5 stamps of the 20-stamp mill and cyanide plant were worked in 1916, treating both Whitlatch and custom ores. Ore from the 400' level was milled in 1917-18.

Employs 4 men and produces 300 tons a year of high grade gold ore.

WICKES-CORBIN COPPER MINING CO. MONTANA

Address: S. A. Balliet, 21-25 Union Bank Bldg., Helena.

Officers: S. A. Balliet, pres.; A Major, v. p.; L. C. Henry, sec.-treas.; with N. Salvail and T. A. Grimes, directors.

Inc. July 9, 1907, in Montana. **Cap.** 5,000,000 shares; 10c. par; non-assessable; outstanding 3,633,900. Annual meeting, third Tuesday in June.

Property: 7. claims, 3 patented, 140 acres, 20 miles S. of Helena, and a half mile S. of Wicks, Mont. The claims show N.-S. and E.-W. fissure veins cutting granite, aplite, andesite and dacite. Ores carry gold, silver, copper and zinc.

Development: by Bunkerhill tunnel, 1,030' long and Tulare tunnel, 700'; also 220' shaft. Total workings, about 2,500', greatest depth, 350'.

Production: test lot of 31 tons in 1917 returned 4.87% copper, 17.6 oz. silver, and 0.01 oz. gold, equal to \$24.94 per ton. The cost was \$4 per ton. Appears to be a promising property.

WILLOW CREEK MINING CO. MONTANA

Address: Andrew Hedin of Spokane, mgr. and chief owner.

Property: Owns the Mountain Meadow group, 4 miles from Pony, Madison county, Mont., on Willow creek. Mine shows a 12' fissure vein in granite carrying free gold with pyrite and chalcocopyrite, both with gold values, in quartz gangue. Mine development includes 750' crosscut. Property is on vein system of and adjoins the Carney Copper mine and the Reindeer Queen.

Has a small mill. Regarded as promising.

WILSON MINING & SMELTING CO. MONTANA

Address: William Burke, pres. and mgr., Saltse, Mont.

Officers: A. Burke, v. p.; G. W. Dougherty, sec. and treas.; M. Hays and G. Early, directors.

Inc. 1919. **Cap.** \$200,000; par 10c.

Property: 2 groups of claims on Big Sunday, a branch of Silver and Big Thunder Creeks, about 2 miles from Saltse, Mineral county; 6 claims on a lead and silver vein form one group; 8 claims showing a shoot of copper, in the other group.

An assessment to pay for further exploration was levied in March 1918.

Further work is being financed by C. A. Mayer of Watertown, S. D.

Development: by 2 crosscut tunnels, the lower in 500'. Driving will give a depth of 700' below the discovery shaft, which is in ore.

WINDFALL PLACER MINING & DEVELOPMENT CO. MONTANA

Office: Missoula, Mont.

Officers: W. J. Johnson, pres.; Chas. Marsh, v. p.; A. J. Gibson, treas.; A. K. Anderson, sec.-mgr., with Cris Tandberg, directors.

Inc. in Montana. **Cap.** \$1,000,000; \$1 par.

Property: 620 acres of Placer ground and of water rights, dump, and timber lands, of which 300 acres are said to contain gold-bearing gravel, 8 miles from Quartz, Mineral county, and 3 miles from the N. P. and C. M. & St. P. railroads. The district is reported to have produced over \$20,000,000 gold.

Geology: bedrock consists of soft shale, sandstone and quartzite, overlain in places by porphyry, above which is from 15' to 40' of gravel, averaging 30 cents a cubic yard. The gold is high grade, being 984 fine.

Development: ground has been opened by the "booming" system of moving gravel. Dumping facilities are good, there being a 1,200' drop between the upper and lower ends of property.

Equipment: includes a 6,000 board feet sawmill and a 6,400' flume. An average of 300 miners' inches of water is available for 7 months each year. A derrick is employed to lift up to 8-ton boulders; and in 1918 an hydraulic elevator of 5 tons capacity under a 300' head of water was installed.

Production: approximates \$260,000, from 200,000 cu. yd. Costs are estimated at 10 cents a yard.

No recent production figures are available.

WISCONSIN MONTANA MINING CO.

MONTANA

Office: Downing, Wis. **Mine office:** Superior, Mont.

Officers: A. O. Nichols, pres. and gen. mgr.; D. McDonald, v. p.; D. C. Coolidge, sec.; Dr. P. A. Beebe, treas., and R. A. Cleveland, directors. Inc. January 29, 1906, in Wisconsin. **Cap.** \$50,000; shares 5c par. Annual meeting, first Tuesday in February.

Property: Coyote group, 16 patented claims, 320 acres, and 5-acre mill-site, 1 mile from the Missoula river and about 10 miles east of Superior. Claims show fissure veins cutting through limestone, slate and quartz: one reported as 70' wide, with irregular shoots, assaying from 1 to 42% copper, with gold, silver, and lead values.

Development: by 1,300' of tunnel work including laterals. A 3,000' tunnel was planned. Was treating old tailing, 1919.

WOOD PLACER MINING CO.

MONTANA

Address: J. M. Flugstad, sec., Corvallis, Ravalli county, Mont.

Cap. \$25,000; shares \$1 par; non-assessable.

Property: 480 acres of placer ground on Hughes creek, Ravalli county, worked by drag-line scraper. Output in 1918 was \$21,000.

YAHK VALLEY M. & M. CO.

MONTANA

Unknown at last address: S. H. Ehlers, Libby, Mont.

Cap. \$250,000.

Property: a gold mine in Sylvanite district, Yahk Valley, Lincoln county, developed by a 1,000' tunnel.

YELLOWSTONE GOLD MINING CO.

MONTANA

Address: Wm. F. Carr, sec., 305 Waverly Pl., Spokane, Wash.

Cap. \$100,000.

Property: 200 acres of placer ground, in Emigrant district, Park county, about 30 miles S. of Livingston.

YELLOWSTONE MINING CORP'N

MONTANA

Address: W. E. Wholey, mgr., Cooke City, Mont.

Officers: W. E. Wolfenden, pres., Roanoke, Va.; Samuel T. Rhodes, sec., Roanoke, Va.

Property: the Stump mine, 15 claims, 300 acres, patented, in the New World mining district, near Cooke, Park county, containing silver-gold bearing copper and lead ores. Produced about 250 tons of shipping ore in 1919. Active in 1921.

NEBRASKA

OMAHA COPPER AND LEAD SMELTER

NEBRASKA

Owned by the Am. Sm. & Rfg. Co.

Office: 120 Broadway, New York. **Works address:** R. F. McElvenny, mgr., Omaha, Neb.

The lead furnaces have a capacity of 82,000 tons per annum. See A. S. & R. Co.

NEVADA

Nevada is essentially a mining state, as only a very small part of its area is fit for agriculture, while all its many mountain ranges are more or less mineralized. It contains a number of well known mining districts, long famous for their bonanza ores and while many of these districts are regarded as worked out, most of them are still producing. The most remarkable mines are those of the Comstock lode, whose wonderful orebodies were first exploited in 1865 and which are still productive. Goldfield and Tonopah are so recent as to be well known, Eureka, Pioche, Tuscarora and White Pine are but shadows of their former selves, though still producing gold and silver ores. Ely is the States great copper camp with Yerington a smaller, but notable producer.

The metal output of the state for 1920 was from 473 producers and exclusive of the Ely copper ores, the total amount mined was 883,384 tons of ore, an additional 2,597,236 tons came from Ely. Nearly half of the 172,540 ounces of gold produced in 1920 came from the mines of Nye county, but the copper ores furnished 23,009 ounces. Tonopah was the largest silver producer, Nye county yielding 4,903,987 oz.

The metal output for 1921 showed a decline of about 50%. The year was marked by intensive silver mining operations, notably at the Silver Horn, Argentite, Klondyke, Hornsilver, Divide and San Antonio camps.

The metal output of the State for the past three years follows:—

	1921	1920	1919
Gold.....	\$3,340,000	\$3,450,800	\$4,393,900
Silver.....(oz.)	6,681,000	7,745,093	6,863,580
Copper.....(lb)	15,515,000	50,559,763	52,331,175
Lead.....	7,803,000	21,263,700	15,349,370
Zinc....."	10,698,040	9,004,698
Total	\$12,310,000	\$23,879,512	\$23,433,171

ACME CONS. MANGANESE ASS'N**NEVADA**

Address: Schellbourne, Nev. Property: a silver mine in White Pine county.

ADA H. MINING CO.**NEVADA**

Address: Spruce Mountain, via Wells, Elko county.

Operated in 1920. In 1921, lessees made occasional shipments of lead-silver ore.

ADAMS GOLDFIELD MINING CO.**NEVADA**

Property purchased, January, 1916, by the Reorganized Cracker Jack Mining Co., which see. Stockholders of the Adams Co., were permitted to exchange their stock for stock of the Reorganized Cracker Jack Co., remaining outstanding at that time.

ADELAIDE STAR MINES, LTD.**NEVADA**

Liquidated. Fully described in Vol. XI, Copper Handbook.

ADELPHIA MINING & MILLING CO.**NEVADA**

Address: Ed. Arkell, mgr., Reno, Nev.

Property: in the Wedekind district, a few miles from Reno, Washoe county.

AETNA DIVIDE MINING CO.**NEVADA**

Idle. Address: Tonopah, Nev. George W. Allen, of Boston, Mass., president. Sponsored by John E. Allen & Co., 85 Devonshire St., Boston. Inc. July, 1919, in Nevada.

Property: 6 claims E. of the Myra Divide, about 3 miles S. E. of Gold mountain, formerly owned by Onie Dougherty and Dick Finn.

AFTER-ALL MINES CO.**NEVADA**

Address: Tonopah, Nev.

Officers: Hugh H. Brown, pres.; Herman Zadig, v. p.; M. E. Albert sec.-treas., with J. H. Evans and E. A. Keenan, directors.

Inc. March 27, 1917, in Nevada. **Cap.** \$1,000,000; shares \$1 par; 700,000 shares issued; assessable. Annual meeting, April 3rd.

At the time of organization, took over the greater part of the holdings of the **Umatilla-Tonopah Mng. Co.** and the **Montana-Tonopah M. Co.** in Tonopah mining district.

AIREDALE DIVIDE MINING CO.

NEVADA

Office: Tonopah, Nev.

Officers: G. W. Allen, pres.; J. H. Shepard, v. p.; C. R. Evans, sec.; John Barrier, treas.; with Wm. Forman, directors.

Inc. April, 1919, in Nevada. **Cap.** \$150,000; shares 10c par; none issued.

Property: 6 claims, 110 acres, south of the Eureka, South Divide and Hecla, and 2¼ miles S. E. of Gold mountain. Development confined to surface.

The entire capital stock of the Airedale Divide (\$150,000), together with that of the Albany Divide, Hecla Divide, and St. Patrick Divide, was optioned to John E. Allen & Co. Boston Curb brokers.

AJAX DIVIDE MINING CO.

NEVADA

Dead; see Vol. XIV. Surface indications of property were encouraging but, as company had no funds, the only work done was location holes. Stock sold to 60c. on Boston Curb but broke to 1c. when pooled shares were unloaded.

ALADDIN DIVIDE MINING CO.

NEVADA

Address: C. N. Miller, Tonopah, Nev.

Inc. May 27, 1919, in Nevada. **Cap.** 1,500,000 shares; 10c. par; assessable; 700,000 issued.

Officers: C. N. Miller, pres.; Gust Hanson, v. p.; with W. G. Robertson and E. N. Bannon, directors.

Property: 160 acres including Little Belle claims, 3 acres of inside territory adjoining the Gold Reef group; Star section near the Gold Zone shaft, and the Doughboy group, 13½ acres, surrounded by the Knox, Florence, and Smuggler mines. The Doughboy is the main holding. The Mornington placer ground along the Feather river in California, controlled by C. N. Miller and associates, is presumably included.

Development: shaft was started at about 200' from the Knox shaft. A vein was cut at 12' containing ore carrying free gold.

Reported to have acquired the California group of 5 claims in the Katherine district, Mohave county, Arizona adjoining the Katherine mine on the north, Jan. 1, 1922.

ALASKA IMPROVEMENT CO.

NEVADA

Office: Room 302, No. 65 Second St., San Francisco, Cal.

Bonded Rip Van Winkle mine, at Lone Mountain, Elko county, to Lone Mountain Mining Co., in March, 1916. Property produced \$13,813 net to the Alaska Investment Co., making a total of \$42,000 to date.

Operated 1919-20, but no details available.

ALBANY COPPER CO.

NEVADA

Address is care F. Friedrich, Morningstar, Lyon Co., Nev., but mail is returned "unclaimed".

Officers: John E. Lutz, pres., and gen. mgr., 1031 Mills Bldg., San Francisco; with F. Friedrich and Ulrich Keck, directors.

Inc. June 29, 1907, in Nevada. **Cap.** \$200,000; shares 10c. par; non-assessable. Annual meeting, last Tuesday in November.

Property: 700 acres, with 400 acres miscellaneous lands, 3 miles from a railroad, in the Buckskin district, showing orebodies, carrying nickeliferous malachite and melaconite, estimated by management to average 3.5% copper, 2% nickel, 0.2 oz. silver and \$2 gold per ton.

Development: includes 5 shafts, of 30', 37', 54' and 253' and 8 tunnels of 30' to 188' length, with total underground workings of 1,400'.

Equipment includes: a 15-h. p. gasoline hoist, good for 800' depth. Idle for years.

ALBANY DIVIDE MINING CO.**NEVADA**

Address: H. C. Pratt, sec., 85 Devonshire St., Boston, Mass.

Officers: W. E. Clark, pres.; Hon. E. P. Barry, v. p.; Dr. J. Q. Graves, treas.; H. C. Pratt, sec.; with Dr. Jesse L. Adams, O. O. Clark and Hon. Geo. Sengel, directors. C. R. Evans, asst. sec.

Inc. March, 1919, in Nevada. **Cap** 1,500,000 shares: 10c. par. Listed on Boston Curb. Registrar, Old South Trust Co., Boston, Mass. Transfer agent, Hanover Trust Co., Boston. Depositary of Fiscal Agent, Citizens Natl. Bank, Monroe, La.

Property: (1) Albany group, 4 claims in Divide section of Tonopa's district, Nevada. (2) controls through 51% stock ownership, the **Mexarko Mining Co.** of Silver City, New Mexico, that owns the Langston mine, now under lease to Hecla Divide Co. (3) a 51% stock interest in **Gila Monster Mining Co.**, that owns 20 claims 334.72 acres, near Globe, Arizona. See description under above titles.

ALDA DIVIDE MINING CO.**NEVADA**

Office: Goldfield, Nev. E. Carter Edwards, res. agt.

Officers: G. H. Duell, pres.; J. L. Woodward, v. p.; W. E. Edwards, sec.-treas., with William Huggard and E. C. Edwards, directors.

Inc. April, 1919, in Nevada. **Cap.** \$150,000; shares 10c par. **Transfer office:** 66 Broadway, New York City.

Property: 8 claims about 2¼ miles S. W. of Gold mountain. A prospect.

ALKALI MINES CO.**NEVADA**

Mail returned from Eureka, Eureka county, Nev.

Property: the Windfall mine, developed by a 500' shaft. **Ore:** contains gold, silver and lead.

Equipment: includes a crushing plant and 150-ton cyanide plant.

ALLIED DIVIDE EXTENSION MINING CO.**NEVADA**

Office: Goldfield, Nev.

Officers: H. B. Ruhl, pres.; Albert Ninnis, v. p.; B. E. Garnett, sec.-treas., with Gust Hanson, directors. J. K. Turner, cons. eng.

Inc. Nevada. **Cap.** \$150,000; shares 10c par.

Property: a prospect, consisting of 2 claims and a fraction just south of the Allied Divide.

ALLIED DIVIDE MINING CO.**NEVADA**

Office: Goldfield, Nev.

Officers: H. B. Ruhl, pres.; Albert Ninnis, v. p.; B. E. Garnett, sec.-treas., with Gust Hanson, directors. J. K. Turner, cons. engr.

Inc. February 26, 1919, in Nevada. **Cap.** 1,500,000 shares; par 10c Listed on San Francisco Stock Exchange.

Property: 4 claims, southeast of Gold Zone and surrounded by the Liberty Bell, Mammoth, Divide Extension, and East Divide. Is said to be on direct trend of main Divide vein.

Development: 200' shaft sunk on Marquette claim.

Equipment: 20-h.p. gasoline hoist 10x10 compressor, tools etc., purchased from companies at Belleville and Candelaria.

ALLIED MINING & MILLING CO.**NEVADA**

Office: Lewistown, Mont.

Officers and directors: Albert J. Heinecke, pres.; Dave Trepp, v. p.-treas.-mgr., Goldfield, Nev.; E. G. Ivins, sec.

Inc. April, 1919, in Montana. **Cap.** \$500,000; shares 10c par; 2,650,000 shares outstanding.

Property: the old McNamara mine located in 1880, consisting of 16 claims, 300 acres, on N. slope of Palmetto Mountains, in Lida district, Esmeralda county, about 17 miles S. of Silver Peak. Considerable production of lead-silver ore made in early days, Examined by Mark Brad-

shaw and J. E. Spurr. **Geology:** ore occurs in a contact vein between limestone and granite, the reported average content being 5 to 15 oz. silver and from 5 to 30% lead.

Development: by 3 tunnels connected by winzes, with total of 3,000' of workings and greatest depth 250'. Reported that 30,000 tons of milling ore are available.

Equipment: includes 50-ton mill erected in 1920, using rolls, classifiers and concentrating tables.

Developing only, because of low price of lead. Company endeavoring, September, 1921, to raise \$20,000 through sales of stock to double mill capacity.

ALPHA DIVIDE MINING CO. NEVADA

Office: 314 Clay Peters Bldg., Reno, Nev. Alex. S. Proskey, agent.

Property: a group of 5 claims, 2¾ miles N. W. of Gold mountain.

ALPHA MINE NEVADA

Owned by Elko Mining Co., which see.

ALPINE DIVIDE MINING CO. NEVADA

Inc. April, 1919, in Nevada. Cap \$150,000; shares, 10c par.

Property: 6 claims bounded on W. by the Doughboy and Treadwell, 1¾ miles slightly N. E. of Gold mountain. A prospect without known merit.

ALPS MINING CO. NEVADA

Address: Alex. Lloyd, supt., Pioche, Nev. Company controlled by Lloyd and other interests of Salt Lake City, and property acquired May, 1920.

Property: the Alps mine in Pioche district, Lincoln county, 2 miles E. of Pioche, said to have produced \$1,000,000 from gold-silver-lead ore in early days. Three fissure veins occur in quartzite near, or in contact with the Yuba porphyry dike. Are reported to contain 5 to 10 oz. silver to each unit of lead.

Development: by 300' two compartment shaft with levels at 150', 200' and at bottom. Old stopes are reported to extend for several hundred feet to a depth of 225' and to contain fillings of considerable second class ore.

Equipment: includes 32 h. p. gas engine, hoist and 2-drill compressor.

ALTA SILVER MINING CO. NEVADA

Address: 1026 Mills Bldg., San Francisco, Cal.

Officers: Alex. Wise, pres.; R. B. Worthington, sec.

Inc. 1872, in Cal. Cap. \$216,000; \$2 par; all issued; assessable.

Assessments levied have furnished necessary capital for repairs and development work.

Property: in Gold Hill section of the Comstock, Storey county, Nev.

Development: old workings and 2150' shaft said to show gold-silver-lead ore. Drainage connection is made with the Sutro tunnel at 1,100' level. Idle several years.

ALTO DIVIDE MINING CO. NEVADA

See Volume XIV. Absorbed by New Alto Divide Mng. Co., which see.

AMALGAMATED DIVIDE MINING CO. NEVADA

Office: 312 Clay Peters Bldg., Reno, Nev.

Officers: A. G. Miller, pres.; O. J. Clifford, v. p.; A. A. Smith, sec.-treas.; with H. D. Danforth and L. H. Bartholomew, directors.

Inc. in Nevada, 1919. Cap. \$150,000; shares, 10c par.

Property: 34 acres, north of Sutherland Divide Extension and south of Roosevelt Divide; and 80 acres in Ben Hur section. A prospect on the outskirts of the district. Idle 1920.

AMALGAMATED PIOCHE MINES & SMELTERS CORP. NEVADA

Office: 63 William St., New York. Mine office: Pioche, Nev.

Officers: Wm. J. Palmer, pres.; Wm. B. Randall, v. p.; Victor B. Walders, sec.-treas.; Wm. F. Roberts, asst. sec.-treas.; H. S. Van Wagenen, mgr.

Inc. July 27, 1911, in Maine, to take over the properties of the Nevada-Utah, Ohio-Kentucky, and Pioche Cons. companies. It is the operating

company of the Con. Nev-Utah Corp.; property is described under that title. Transfer agent: Security Transfer & Registrar Co., New York.

Cap. \$1,000,000; shares \$1 par.

Operates the Pioche Pacific R. R. and Pioche Water Works, and derives income from lease on the Panaca claim granted the Combined Metals, Inc., which see.

Other lessees are operating on other parts of its property; in so far as mining operations are concerned, the company itself has been inactive since 1917.

AMERICAN-BRITISH CORPORATION

NEVADA

Mail addressed to F. J. Abbott, Eureka, Nev., returned.

Property: 6 claims in the Adams hill section of Eureka district, S. of Bullwhacker and Eureka-Holly properties, purchased in 1920. It is reported that this company is also operating at Lone Mountain, Tonopah, and owns properties in Mexico.

AMERICAN DIVIDE MINING CO.

NEVADA

Address: Allen Case, Tonopah, Nev.

Inc. 1919, in Nevada.

Property: 6 locations adjoining the Rand, and between the Croesus and Mizpah, $\frac{3}{4}$ -mile N. E. of Gold mountain.

AMERICAN MINING & EXPLORATION CO.

NEVADA

Office: Imlay, Nev.

Officers: M. J. Finnigan, pres.; Geo. H. Morgan, v. p.; E. A. Vail, sec.; B. F. Bauer, treas.; H. E. Clement, gen. mgr. Same management as Rye Patch Mines Co.

Inc. Aug. 1917, in Utah. Cap. \$1,500,000; \$1 par.

Property: the Imlay mine, 29 claims and 2 mill sites; also operated the Rye Patch mine, in the Star district, Pershing county, near Imlay, owned by the Rye Patch Mines Co., which see for description and early day operations.

Development: by 200' vertical shaft on the Imlay. Work at the Rye Patch, for a period of about 2 years, was exploratory in character, first by laterals and later by diamond drilling. Results were discouraging, and all work ceased in July, 1921.

Equipment: includes 25-h. p. gasoline hoist, oil-compressor, 100-gal. pump and 50-ton dismantled Imlay mill.

AMERICAN PROSPECTING CLUB

NEVADA

Offices: Room 735, 25 Broad St., New York and care J. B. Kendall, Goldfield, Nevada.

Board of governors: Warren R. Porter, A. G. Raycraft, Louis O'Neal, H. W. Huskey, W. C. Ralston, J. B. Kendall, and L. O'Neill.

Inc. 1919, in Nevada. Cap. 10,000 units of \$100 each.

Company organized to finance and outfit prospecting parties to examine and prospect promising properties in various parts of Nevada. It is proposed to pay prospectors the regular wage of the district and give a bonus for discovery. The Club will also acquire and develop leases in proven areas.

In 1920 company organized the Benton Silver Mines Co. and held option on property in Blind Springs district, Mono county, California, near Benton. Option relinquished in October, and American Prospecting Club ceased field operations to await better times.

AMERICAN STANDARD COALITION M. CO.

NEVADA

Address: Lorin Hall, Salt Lake City, Utah.

Property: controlled by the above, with Willard and John W. Scowcroft, of Ogden, Utah, is at Schellbourne, 40 miles N. of Ely, White Pine county. A 60' vein carrying silver has been traced for 600' on surface. Development by tunnel and some rich ore sacked in 1919. Closed down indefinitely.

ANACONDA DIVIDE MINING CO.

NEVADA

Mail returned from Tonopah, Nev., last known address.

Inc. 1919, in Nevada.

Property: about 90 acres N. W. of North Divide and $2\frac{3}{4}$ miles N. W. of Gold mountain. Joint shaft being sunk with the Nevada Divide, down 75' in July, 1919. A prospect showing favorable looking shear zones.

ANCHOR DIVIDE MINING CO.

NEVADA

Address: Tonopah, Nev.

Officers: J. G. Crumley, pres.; R. W. Piercy treas., with George Wingfield and H. C. Brougher, directors.

Inc. 1919, in Nevada. **Cap.** \$150,000 shares, 10c par.

Property: 4 claims and a fraction adjoining the Rosetta, Black Hawk, Portland, and Hercules, in the southern section of the field; patented application has been filed.

Development: by shaft, 50' deep in July, 1919. **Equipment:** 30-h. p. hoist $9\frac{1}{2} \times 12$ " compressor, etc. Operated in 1920.

ANDES SILVER MINING CO.

NEVADA

Office: 261 Mills Bldg., San Francisco, Cal.; and Virginia City, Nev.

Officers: R. L. Rader, pres.; H. H. Noble, v. p.; Geo. P. Thurston, sec.; Well Fargo National Bank, treas.; Roy T. Kimball, and B. F. Nourse directors; Frank Higginson, supt.

Inc. Dec. 18, 1873, in California. **Cap.** authorized and outstanding, \$100,000; shares \$1 par; assessable. Assessment No. 92 levied in 1921 Registration Security Co., San Francisco, registrar. Annual meeting, 4th Wednesday in January. Stock is listed on San Francisco Exchange.

Property: 2 claims, patented, 22 acres, in the Virginia district, Virginia City, Storey county. Idle in 1920.

ANTELOPE GROUP

NEVADA

Held by Louis W. Trankle, Yerington, Nev. Includes 23 unpatented claims, 430 acres in the Buckskin Range, Douglas county, 16 miles from Yerington.

Geology: the ore-bearing formation is a monzonite belt 4,200' wide, extending N. 7° W., dip 47° to east for $4\frac{1}{2}$ miles, with diorite on the west and andesite on the east. This monzonite is highly altered, showing strong kaolinization and sericitization to depth of 150 feet, deepest working. Surface shows scanty copper carbonates throughout length and breadth, with small streaks of copper sulphide ore near footwall side. Water encountered in lower workings shows strong copper content.

ANTELOPE SPRING MINING CO.

NEVADA

Officers: Wm. H. Fitch, pres.; Gust Holm, v. p.; John W. Geiger, sec. and mgr., Frisco, Utah; Allen C. Eakin treas.; preceding officers, Edith B. Brounzell, Fred Hubbard and E. R. Reitsch, directors.

Inc. April 11, 1906 in Utah. **Cap.** \$300,000; shares \$1 par; assessable; 200,000 issued; 8 assessments levied, amounting to 13c per share.

Property: 17 claims, partly patented, 15 miles from Humboldt House, Pershing county, developed by 3 crosscut tunnels, each reaching the 2 principal oreshoots. **Ore** carries lead, silver, copper, zinc and a little gold. The oreshoots occur on a limestone-shale contact, one shoot carrying zinc sulphide, the other, 20% lead ore containing gold and copper.

Equipment: includes 75-ton concentrating and flotation mill.

Property idle owing to lack of funds.

ANTIMONY KING MINE

NEVADA

Owned and operated by J. M. Pine, Austin, Nev.

Property: 8 miles S. of Austin, in Cottonwood canyon, Battle Mountain district, has been worked intermittently since 1871, and by present owner since 1912.

Ore: antimony, occurs in true fissure vein, filled with white and dark quartz, associated with stibnite and traceable for 900' on the surface. Country rock is a fine-grained silicious limestone, bluish-gray in color, with a little disseminated pyrite. Geology fully described, U. S. G. S. Bull, 594, pp. 75-76

Development: by 250' tunnel and 150' shaft, reported to have opened

up a 6½' vein of shipping ore. The commercial value of these antimony deposits has yet to be proved. Presumably idle.

ANTIMONY & SILVER MINES CO. NEVADA

Address: at last accounts, care J. H. Stallings, gen. mgr., 2176 S. 7 E. St., Salt Lake City, Utah. **Directors:** Judge A. J. Weber, Dr. O. W. French and G. Y. Bullock.

Property: 3 groups, about 400 acres in Galena Canyon, near Battle Mountain, Lander county, said to carry large deposits of milling ore averaging \$20 p. t. in gold-silver and high-grade antimony.

Development: by 1,500' of workings, main tunnel being 350' long.

Equipment: includes 60-ton amalgamation and concentration mill. Presumably idle.

ANTIMONY SYNDICATE NEVADA

Address: Mill City, Nev.

Property: the Black Warrior and Bloody Canyon antimony mines, 2 claims, 40 acres, in Pershing county, Nev. The Black Warrior mine in the Buena Vista district is developed by several tunnels to depth of 150', with total workings amounting to 2,000'. Ore, partly oxide and partly sulphide, occurs in fissure vein in porphyry, with N. S. course and dip of about 80°. **Equipment** consists of 25-ton mill.

Output amounted to \$92,500 in 1915, and \$230,000 in 1916, the ore averaging 62½% in 1915, and 40% in 1916. Production for 1917 amounted to 161¼ tons.

The Bloody Canyon mine in the Star district is developed by 2,500' of tunneling to depth of 300'. See **Pioneer Exploration Co.**

APEX DIVIDE MINING CO. NEVADA

Office: Tonopah, Nev.

Officers: J. G. Crumley, pres.; W. V. Richardson, v. p.; R. W. Piercy, sec.-treas., with H. C. Brougher and George Wingfield, directors.

Inc. March 31, 1919, in Nevada. **Cap.** 1,500,000 shares; 10c par. 750,000 shares in treasury. Listed on San Francisco Stock Exchange.

Property: 13 claims, adjoining North Divide on S. W. and north of Wilson Divide.

Development: shaft was 365' deep in December 1919, and showed seams of talc, of low silver value. Crosscuts totaling 530' have been driven at 350' level.

Equipment: electric hoist and air-compressor, etc.

Operated in 1920.

APEX EXTENSION DIVIDE MINING CO. NEVADA

Address: Tonopah, Nev.

Inc. 1919, in Nevada. **Cap.** \$150,000; par 10c.

Owens 40 acres undeveloped ground.

ARCANE MINING CO. NEVADA

Idle.

Mine office: Pioche, Nev.

Officers: H. W. Rand, pres.; A. M. Cheney, v. p.; S. P. Kinney, sec.-treas.; preceding officers, Frank Holman, Frank Manning, directors, H. E. Freudenthal, res. agt. **Cap.** \$100,000; shares 10c par.

Property: five claims, adjoining the properties of the Ohio-Kentucky and Amal. Pioche, through which the Susan Duster lode of the Ohio-Kentucky extends, with 45° dip to the south. The ore from the lode on the O. K. property is said to have had an average assay value per ton of 7% lead, 20% zinc, 20 oz. silver and \$2.50 in gold.

Development: by 1,200' of underground work. Company had planned to sink a vertical double-compartment shaft to the 650' level, at which depth it hoped to cut the Susan Duster lode, 200' distant from the Arcane-O. K. line. The O. K. company is said to have followed the lode to the property line.

Equipment: power house, 40-h. p. gasoline engine and air-compressor.

ARGENTINE DIVIDE MINING CO.**NEVADA****Office:** 314 Clay Peters Bldg., Reno, Nev.**Officers:** A. S. Proskoy, pres.; A. N. Salisbury, v. p.; H. E. Scott, sec.; E. F. Lunsford, treas., with S. F. Taylor, and L. Little, directors.**Inc.** March, 1919, in Nevada. **Cap.** 1,500,000 shares; \$1 par; 850,000 outstanding. Listed on San Francisco Stock Exchange.**Property:** 2 claims, 28 acres, between the Divide Cons. and Mohawk. Examined, 1919, by A. H. Eftman, who reports that several veins cross the ground, and that pay-ore should be found at shallower depth than in other parts of the district. **Development:** by shaft:**Equipment:** electric and gasoline power, 25 h. p. hoist, and compressor.**ARGENTOR-ROCHESTER MINES CO.****NEVADA****Address:** C. N. Miller, pres.-gen. mgr., Pacific Bldg., San Francisco, Cal.**Property:** north of Rochester Merger group, is a part of the McNamara lease. Ore is quartz containing lead, silver and gold, the latter predominating. Average values of \$18 to \$45 for width of 4' reported, February, 1921. Developed by crosscut, 680' from portal of Stowell tunnel.**ARGENTUM MINING CO. OF NEVADA****NEVADA****Company inactive.** Mines and mill under bond and lease to Candelaria Mines Co., which see.**Property:** includes Northern Belle and Holmes Mines, in camp of Candelaria, Mineral county, Nev., 9 miles from Redlich, on Tonopah & Goldfield R. R. Fully described, Volume XIII.**ARGONAUT HASBROUCK DIVIDE MINING CO.****NEVADA**

Mail returned from Tonopah, Nev.

Inc. 1919, in Nevada. **Cap.** \$150,000; par 10c.**Property:** 60 acres in the Divide district, W. of Kendall Divide. In July, 1919, a 50 h. p. hoist, compressor, and accessories were ordered.**ARGONNE DIVIDE MINING CO.****NEVADA**

Mail returned from former address, Tonopah, Nev.

Officers: Frank Berry, pres.; C. W. Taylor, v. p.; T. A. Frazier, sec.-treas., with Charles Keilhofer, R. W. Cattermole, and H. H. Brown, directors. A. H. Eftman, cons. engr.**Inc.** April, 1919, in Nevada. **Cap.** \$300,000; shares 2c par.**Property:** the Homestake-Gold Wedge group of 7 claims, purchased from Charles Keilhofer and others by a syndicate represented by M. B. Cutter, C. R. Miller, and Barron Hoopes, Jr., of the Tonopah Mining Co. Equipment from the Silver Plume shaft of the Tonopah company was brought to mine.**ARIZONA ANNEX SILVER MINES****NEVADA**

Name changed to Sierra Silver Mines Corp'n, which see. Only information obtainable is contained in a market letter issued by certain Boston brokers which states that geological formation is "identical with that of Arizona Silver." So far as we can find out, Arizona Annex has had only paper or stock selling existence.

Is one of a bunch of 5 or 6 queer companies, all with same promoters, one of whom was arrested for alleged fraud.

ARIZONA DIVIDE MINING CO.**NEVADA****Office:** 15 Broad St., New York.**Inc.** in Nevada. **Cap.** 2,000,000 shares. 10c. par; non-assessable; 1,575,000 outstanding, of which 400,000 are underwritten for benefit of the treasury; 1,175,000 are issued or set aside for the Arizona Central Gold Mines Co., and to acquire property at Divide. As a reserve, 425,000 shares are held in treasury.

Transfer agent: Security Transfer & Registrar Co., New York.

Property: at Divide—the Military group of 5 claims, 1¼ miles S. of the Tonopah Divide. Examined by L. R. Robins and R. C. Knox. Two wide shear-zones said to cross the property, roughly parallel to the course of the Tonopah Divide shear-zone. "The Military is a geological 'gamble' of the same character as other Divide properties."

At Oatman, Arizona—17 acres, surrounded on three sides by the United Eastern. A quartz-calcite vein, 30 to 60' wide, outcrops for 1,000'. A 364' shaft has been sunk on a vein assaying \$5 to \$6 gold per ton. Shaft has a hoist, compressor, etc., adequate for depth of 1,000'.

ARIZONA EXTENSION SILVER MINES CO.**NEVADA**Controlled by **Universal Silvers Co.**

Address: 265 Russ Bldg., Bush St., San Francisco, Calif.

Officers: (same as Arizona Silver Mines Co.), E. S. Van Dyck, pres., F. W. Lockwood, v. p.-supt.; C. D. Olney, sec.; M. E. Pratt, chief eng.

Inc. in 1919, in Nevada. Cap. \$1,000,000; \$1 par. Listed on Boston Curb January 10, 1920.

Property: 8 claims and 3 fractions, 170 acres, between the Arizona Silver, Cons. Silver, Inc., and Silver Reef Mines Co., in Buena Vista canyon, near Unionville, Pershing county. Report by J. S. Coupal on December, 1919, shows that flat bedded limestones between two rhyolite dikes, contain two flat orebodies that are partly developed. A fault-fissure running N. W.-S. E. across the property also shows some good ore.

Development: a dozen short tunnels, and 80' shaft. The total work on orebody, assuming an average thickness of 12", is said to block out 15,000 tons of 12.1 oz. ore.

Lawson, Van Riper and others, were arrested in March, 1920, for alleged fraud in this and allied promotions. See also under **Arizona Silver Mines Co.**

ARIZONA SILVER MINES CO.**NEVADA**

Office: 265 Russ Bldg., San Francisco, Calif. Mine office: Unionville, Nev.

Officers: Edw. S. Van Dyck, pres.-mgr.; F. W. Lockman, v. p.-supt.; Chas. D. Olney, sec.; M. E. Pratt, engr., with A. L. Holbrook and J. J. Lodge, directors.

Inc. April, 1919, in Nevada. Cap. \$1,000,000; \$1 par; 300,000 shares issued; 200,000 shares in reserve. Bond issue of \$200,000 owned by **Universal Silvers Co.** (q. v.) which also owns a stock interest. National Security Co., New York, transfer agents. Annual meeting, first Monday in May. Listed on San Francisco stock Exchange and New York Curb.

Dividends: initial of 3c per share on Dec. 15, 1919.

Property: 8 claims, 2 patented about 120 acres, in Buena Vista canyon, Pershing county, near Unionville, includes the Arizona mine, purchased from the **Sunset Mng. & Devel. Co.**, (q. v.), and together with the Wheeler mine, credited with a production of \$5,000,000 from 1868-1880.

Geology: of the district is fully described in U. S. Geo. Sur. Bull. 414, by Ransome. The ore occurs in a solid blanket vein in limestone, averaging 3' in thickness and consists of quartz and calcite carrying pyrite and stibnite, with silver present as argentite and cerargyrite. About 5,000' of work has been done, almost all of it in ore and report by Chas. D. Wilkinson, engineer for the Goldfield Cons. Mng. Co., made 1918, gives an average assay of 27.3 oz. silver per ton, with 26,600 tons in sight, containing about 728,900 oz. silver.

Equipment: The old stamp-mill has been remodeled, vanners and flotation machines discarded, and ore treated in a 20-ton cyanide unit. Improvements were to have been made during 1920, including the treatment of slimes and sands separately.

Production: \$8,075 in 1919; \$30,400 in 1921, to April.

Boston brokers, who early in 1920 were active in marketing the shares of this and allied companies, were arrested and fined (April 21, 1920) up to \$1,000 each for illegally advertising stocks under the laws of Massachusetts. See **Arizona Extension Silver Mines Co.**

ARROW MINING CO.**NEVADA**Reorganized in May, 1918, as the **Southeastern Mining Co.**, which see.**ARROWHEAD ANNEX MINING CO.****NEVADA**

Address: Divide Brokerage Co., Box 416, Tonopah, Nev.

Officers: J. M. Gilfoyle, pres.; B. D. Luce, v. p.; Pat Mooney, sec-treas., with F. H. Connolly and A. G. Raycraft, directors.

Inc. 1919, in Nevada. **Cap.** \$150,000; 10c par; 100,000 shares offered at 7 cents each

Property: 4 claims, a short distance N. of the Arrowhead Mining Co. ground. In 1919, a shaft was sunk and a hoist erected; operations continued in 1920.

ARROWHEAD BONANZA MINING CO. NEVADA

Address: Tonopah, Nev.

Property: in the Arrowhead district of Nye county.

ARROWHEAD CONSOLIDATED MINING CO. NEVADA

Address: Ely, Nev.

Officers: J. Hy Goodman, pres.; Al. McCloy, gen. mgr.

Property: 1 mile S. of the Arrowhead Mining Co.'s ground, in Nye county. Indications are reported to be good.

Development: by shaft, 215' deep in September, 1920, with lateral work on this and the 115' level. A 4' ore shoot assaying better than \$50 is reported. An 18 h. p. hoist is in use.

ARROWHEAD ESPERANZA MINES CO. NEVADA

A company reported organized late in 1919 to develop claims in the eastern part of the Arrowhead district.

ARROWHEAD EXTENSION MINING CO. NEVADA

Office: 130 Main St., Tonopah, Nev.

Officers: J. B. Kendall, pres.; M. J. McVeigh, v. p.-gen. mgr.; H. B. Chessher, sec.; A. G. Raycraft, treas., with H. D. Budelman, directors.

Inc. 1919, in Nevada. **Cap.** \$150,000; shares 10c par; 100,000 shares offered for sale at 7½c each in Oct., 1920, but not to be released until another 100,000 was sold at 15c or better.

Property: about 100 acres of unpatented ground adjoining the Arrowhead mine on the south and east. Surface showings "pronounced unusually promising by various and reputable mining men." Assays yielded from \$1.20 to \$67.50 and \$71.55 per ton, the second and third sample being taken by W. H. (Bill) Hart and J. B. Kendall, respectively. All reports furnished by company are highly optimistic.

A shaft has been sunk to 150' and vein opened at 55'. Operated in 1920.

ARROWHEAD INSPIRATION MINES CO. NEVADA

Address: McGill, Nev. Max Herman, pres.-gen. mgr.

Property: in Nye county, on road from Tonopah to Arrowhead, shows highly mineralized porphyry carrying gold and silver. Operating 1920. Still a prospect.

ARROWHEAD MINING CO. NEVADA

Office: Tonopah, Nevada.

Officers: R. L. Jones, pres.; Peter Fox, v. p.-supt.; Chas. J. Blumenthal, sec.-treas., with T. F. Ryan, M. L. Davenport and E. Y. Foley, directors. Mark G. Bradshaw, cons. engr.

Inc. Sept., 1919, in Nevada. **Cap.** \$150,000; 10c. par; 750,000 treasury shares. Transfers made at company's office. Listed on San Francisco Exchange. Shares sold at 20c. in January, and but 1c. in December, 1921, compared with 60¢ high and 6¢ low in 1920.

Property: 4 claims in the new Needles district, 60 miles E. of Tonopah. Nye county, and 4 miles S. of Twin Springs on the Lincoln Highway, between Tonopah and Ely. The general formation is andesite and rhyolite, showing 2 ore shoots in a vein 3 to 8' wide, which is faulted 160' W. of shaft. Ore is silver sulphide, reported to average \$24 to \$50, with streaks of higher grade.

Development: by incline 345' deep in September, 1921, with drifts on 4 levels. Small shipments are made periodically.

Equipment: includes 25 h. p. gas hoist. Other improvements, including a mill, are contemplated.

- ARROWHEAD-RICO MINING CO.** NEVADA
Address: E. R. White, Tonopah, Nev. See description in California section.
- ARROWHEAD SILVER KING MINING CO.** NEVADA
Address: Ely, Nev.
Property: a gold-silver mine, operated in 1920.
- ARROWHEAD SILVER SIGNAL MINES** NEVADA
A new company, whose ground, situated between the Arrowhead and Arrowhead Extension, is said to have good surface indications. Operated in 1920.
- ARROWHEAD SYNDICATE MINES CO.** NEVADA
Office: Ely, Nev.
Officers: C. L. Osterlund, pres.-mgr.; Peter Fox, v. p.; with C. B. Nance, J. E. Eudey and J. E. Fleige, directors. C. W. Martin, sec.; C. J. McFadden, treas.
Inc. Dec. 29, 1919, in Nev. Cap. \$150,000; 10¢ par; 480,000 treasury shares. Stock transferred at company's office. Annual meeting, 1st. to 5th. in December.
Property: 4 claims, 80 acres, adjoining Arrowhead Mng. Co. on the S., in Arrowhead (Needles) district, Nye county, 60 miles east of Tonopah. Silver sulphide ores carrying a little gold in quartz veins cutting andesite prevail; formation said to be not unlike Tonopah.
Development: by 200' shaft. Equipped with 15-h. p. hoist.
Work suspended since Aug., 1920, for lack of funds; hopes to resume in 1922.
- ARROWHEAD WONDER MINES CO.** NEVADA
Address: W. H. French, pres., Mills Bldg., San Francisco. Cal.
Inc. 1920, in Nevada. Cap. \$150,000; shares 10c. par. No debts.
Property: 7 claims N. E. of the Arrowhead Mining Co. Small shafts have been sunk on two promising veins, one of which is said to show 2' of \$110 ore at depth of 25 feet. Veins are believed to be extensions of those on ground of Arrowhead Mng.Co.
- ASHDOWN GOLD MINING CO.** NEVADA
Address: Denio, Oregon. Geo. D. Mathewson, lessee, or T. S. O'Brien, Ashdown, Nev.
Property: in Warm Springs district, Humboldt county, 15 miles from Nevada-Oregon line, reported to have 125,000 tons of \$5 milling ore blocked out. Small shipments of gold made in 1917-18. The old mine opened by 10 tunnels. A new mill is reported under construction. Was operating, 1920.
- ASSOCIATED MINES DEVELOPMENT CO.** NEVADA
Office: 617 Pacific Bldg., San Francisco, Cal. C. N. Miller, pres.; E. N. Bannon, sec.
Inc. in Nevada. Cap. \$500,000; shares \$500 par.
Property: at Rochester, Pershing county, includes the Wild-Cat and Tiger patented claims, the Taylor Hill, Colorado and the Plainview-Plainsite group; also a stock interest in the Tohoqua mine, Leadville district, Washoe county, 38 miles N. of Gerlach, on the W. P. R. R. See **Leadville Mines Co.** for description.
- ATLANTA-HOME GOLD MINING CO.** NEVADA
Idle. Address: Delta Bldg., Los Angeles, Calif. Mine address: Atlanta, via Poche, Lincoln Co. Nev.
Officers: F. R. McNamee, pres.; M. Justice, sec.; E. M. Bray, treas.; J. J. Stumenbord, supt.
Inc. 1915, in Delaware. Cap. \$2,500,000; outstanding 500,000 shares. Company was organized to take over the holdings of the Atlanta Cons. Gold Mng. Co.
Property: 11 claims, patented, 180 acres, at Atlanta, Lincoln county, 47 miles northeast of Pioche, shows a contact deposit between porphyry and limestone, said to average \$2 to \$4.50 per ton in gold, and is 50' to 80' wide.

proven for a length of 300' and 200' deep. Ore reserves claimed to be 320,000 tons.

Development: two shafts sunk 300' apart, with drifts and crosscuts totaling 1,600'. **Equipment:** includes a steam hoist and compressor.

ATLANTA MINES CO.

NEVADA

Reorganized 1918, and name changed to Reorganized Atlanta Mines Co., which sec.

ATLANTIC DIVIDE MINING CO.

NEVADA

Mail returned from last known address.

Officers: Wm. Forman, pres.; W. J. Douglass, v. p.; E. Marks, treas.; M. L. Cooper, sec., with Arthur G. Raycraft, directors.

Inc. 1919, in Nevada. **Cap.** \$150,000; 10c. par.

Owens Wedge group of 50 acres.

AUREOLA MINES CO.

NEVADA

Address: P. O. Box 791, Reno, Nev.

Officers: Anthony Elffner, pres.-gen. mgr.; Chas. Madison, v. p.; P. Y. Gillson, sec.-treas., with R. W. Stoddard and M. S. Gillson, directors. A. I. D'Arcy, cons. engr.

Inc. in Nevada. **Cap.** \$100,000; 10c par.

Property: 5 unpatented lode claims, in Mineral county, 5 miles S. E. of Sodaville, the nearest rail point. According to Mr. D'Arcy, the ground shows 7 veins from 1 to 4' wide, in grano-porphry. Veins contain high-grade gold-silver ores. Two test shipments made to Western Ore Purchasing Company ran \$67.61 and \$148.38 per ton, respectively, the gold content averaging 1 ounce to each 20 ounces silver.

AURORA CONSOLIDATED MINES CO.

NEVADA

A subsidiary of the Goldfield Cons. Mines Co.

All operations ceased October, 1918, as company could not make a profit owing to increasing high cost and low tenor of ore. The assets of the Aurora Cons. are to be liquidated and the proceeds applied on its indebtedness to the Goldfield Cons., amounting to \$457,500, December 31, 1918. Mill sold, 1919, to Goldfield Dev. Co. and moved to Goldfield and indebtedness to the Goldfield Cons. at end of year reduced to \$57,698.81, "a figure which represents what the management thinks may be salvaged in the future." Reports in spring of 1921 announce sale of other machinery. Fully described Vol. XIV.

AURORA MINES CO.

NEVADA

Property sold and company out of business. Fully described, Vol. XIII.

AUSTIN DAKOTA DEVELOPMENT CO.

NEVADA

Address: Valley City, North Dakota. **Mine office:** Austin, Nev.

Officers: C. E. Garvin, pres.; A. B. Cox, supt.-v. p.; with C. A. Newman, H. R. Bruns, S. H. Nelson and T. Carter Griffith, directors. F. W. Schlaberg, sec.-treas.; C. F. Littrell, supt.; G. J. Babcock, cons. engr.

Cap. \$1,500,000; shares \$1 par; 1,200,000 shares issued.

Property: 800 acres in the Reese River district, at Austin, Lander county. Ore is gold-silver in chlorite zone, in 2 parallel ledges, each 20' thick and cut by several mineralized dikes in granite. Workings for about 400' expose a quartz vein varying in thickness from 6 to 24", and averaging \$6 to \$7 per ton.

Development: by the X-ray 2-compartment shaft, 330' deep with 2,000' of laterals; the O. K. incline shaft, 350' deep, the 250' Dalton shaft, sunk on a 6' vein of milling ore and the 150' Tesora shaft, sunk about 800' from the Dalton. Operated 1919 and 1920. During 1920, development continued on the 200' and 300' levels, opening an 1,800' oreshoot on the former.

Equipment: pump, 80-h. p. hoist, compressor, and storehouse.

Production: reported to aggregate \$1,000,000.

AUSTIN GOLDFIELD MINING CO.

NEVADA

Owens the Watt mine, operated by H. Lemaire, under lease, at last accounts.

Property: on N. side of New York canyon, Reese River district, Lander county.

Development: 300' inclined shaft with 3 levels. Vein in dark quartzite ranges from 4" to 12" wide and consists of white quartz containing tetrahedrite, pyrite, chalcopyrite, and some blende and galena; dip 25° to 45° N. E.; strike N. 45° W. To end of 1915 over \$15,000 worth of ore shipped by lessees is said to have averaged about \$125 per ton, chiefly in silver.

Equipment: includes a 25-h. p. gasoline hoist.

AUSTIN MANHATTAN CONS MINING CO.

NEVADA

See Austin Manhattan Cons. Silver Mines.

AUSTIN MANHATTAN CONS. SILVER MINES

NEVADA

Formerly the Austin Manhattan Cons. Mng. Co., successor to the Manhattan Silver Mng. Co.

Address: Wm. A. Marshall, res. agt., Austin, Nev.

The Austin Manhattan company purchased the principal mining properties, first operated in the early 60's and credited with a production of \$19,000,000, in and adjacent to Austin, in 1908, and started development work, but on too large a scale commensurate with the limited money on hand. See Copper Handbook, Vol. XI, and Bulletins 208 and 408, U. S. Geol. Survey. Result was a receivership begun in 1911, culminating in a public sale of the property 3 years later. It was purchased by one of the largest creditors. H. C. Fownes, German Nat'l Bank Bldg., Pittsburgh, Pa. who organized the present company after expiration of the redemption period.

Property: 115 claims, 1,200 acres, 73 claims patented, in the Reese River district, at Austin, Lander county, shows in the Lander Hill section, a vein system of 5 fissure veins in granite, or quartz monzonite, N. W.-S. E. strike, dip 25° to 60° N. E. Maximum width of veins is 6'. Ore sulphide of silver, occurs in lenticular shoots. Examined by A. W. Daw, of London.

Development: 6,000' tunnel, shafts and miles of crosscuts and drifts. Mine contains little ore blocked out. Workings are largely caved and inaccessible; but some workings were reopened, 1919-21.

AUSTIN NEVADA CONS. MINES CO.

NEVADA

Successor to Maricopa Mines Co., Arizona, described in Vol. XIV.

Address: H. G. Richardson, pres.-gen. mgr.; Austin, Nev. **Inc. in Nev. Cap. \$3,000,000.**

Property: principal property, 17 claims adjoining the Austin Manhattan group in Lander hill section of Reese River district, Lander county. Two distinct mineralized zones consisting of 12 parallel veins with \$4 to \$15 per ton in gold are known. In addition, reports early in 1921 announced the discovery at surface of a large porphyritic orebody, 100' wide with high gold values and some silver.

Development: by over 3,000' of tunneling. Equipped with a compressor plant. Under operation in 1920.

Company also controls the Prosperity group of 16 claims in the Wickenburg district, Ariz. Six known fissure veins in porphyry, 8' to 30' wide, are developed by 1,800' of workings; chalcocite is the principal mineral. Equipment is on a small scale.

AZALIA MINING CO.

NEVADA

Address: F. M. Berry, sec.-treas., Union Oil Bldg., Los Angeles, Calif.

Officers: F. W. Cole, pres.; S. E. Vermilyea, v. p.; with John Woodson and S. L. Carpenter, directors; Dee W. Minier, supt., at last advice.

Cap. \$1,000,000; shares issued, 700,000.

Property: 4 claims, 8 miles N. W. of Platina, Yellow Pine district, Clark county, covering a vein in limestone, containing zinc-silver ore, for 3,000'. Developed by an 80' incline shaft which passed over the ore said to be 6' thick and faulted at a depth of 30'. Operated under lease by C. E. Cree in 1917.

Company was also developing a group of 9 claims about 1 mile below

the Cerro Gordo mine, in the Cerro Gordo mining district, Inyo county, Calif, where a 750' tunnel was driven to reach the contact. No recent returns.

AZTEC DIVIDE MINING CO.**NEVADA**

Office: State Bank Bldg., Tonopah, Nev.

Officers: W. H. Thomas, pres.; Lowell Daniels, v. p.; W. H. Fording, sec.-treas., with E. C. Simpson and H. H. Atkinson, directors. Rudolph Burton, supt.

Inc. in Nevada, 1919. **Cap.** \$150,000; 10c par.

Property: 100 acres in group of claims lying west of the Hasbrouck Divide. **Development:** shaft sinking was in progress latter half of 1919. **Equipment:** well equipped with hoist and other machinery. A prospect.

AZURITE MINING CO.**NEVADA**

Address: J. W. McFatridge, mgr.-sec.-treas., 941 W. 35th St., Los Angeles, Cal. **Mine address:** Goodsprings, Clark county, Nev.

Officers: A. S. Black, pres. and purch. agt.; T. D. Knights, v. p.; preceding officers, M. P. Erwin, M. M. McFatridge and Samuel Yount, directors.

Inc. Feb. 7, 1911, in Nevada. **Cap.** \$1,000,000; \$1 par; 60,769 issued.

Property: 9 claims 174 acres and a 3-acre smelter site, in the Yellow Pine district, sections 26, 27, 34 in T. 24 S.; R. 57 E., 12 miles from Goodsprings and 20 from Jean on the Salt Lake Route. The mines adjoin the Boss mine on the east. Company bought the Nevada Copper Realty property, February 7, 1911.

Geology: carries plumbojarosite, a very rare mineral, carrying gold and platinum (see U. S. Geol. Survey Bull. 620). Ores carry gold, silver, copper, lead, zinc and platinum, lowest assay at the Azurite copper mine, said to be \$3.60 gold, \$4.50 silver, 27% copper, .03 oz. platinum. Ores occur in replacement orebodies of irregular size and shape, the largest 35x40' and 8 to 10' thick in thick-bedded limestones cut by porphyry dikes.

Development: by 3,160' of workings, including several tunnels, estimated to block out 8,800 tons, of 20% copper ore and 30% lead ore.

Shipments during 1914-'16 returned \$38,000. In 1918-'20 the mine was operated by lessees on a 15% royalty basis.

BALEA GOLD MINING CO.**NEVADA**

Address: Mina, Nevada. J. H. Maller, sec.

Property: in Gold Range district, Mineral county, 9 miles from Mina, developed by 140' shaft to be sunk an additional 200' in 1921.

BAMBERGER EXPLORATION CO.**NEVADA**

Name changed in November, 1919, to Simon Bamberger Co.; owns the Gusset Patch group at Pioche, Lincoln county, leased until February, 1923, to **Black Metals Mines, Inc.**, which see.

BAMBERGER MINES CO.**NEVADA**

Address: Midas, Elko Co., Nev.

Officers: Moses Reinhart (Winnemucca, Nev.), pres.; M. J. Paisley, v. p.; W. F. Boyken, sec.-treas.; with Rich. Weston and W. H. Cooley, directors.

Inc. in Nevada. **Cap.** \$150,000; par 10c.; 750,000 treasury shares. Transfers made at company's office; W. F. Boyken, registrar. Annual meeting, July 1st.

Property: 5 claims, 100 acres, adjoining the Gold Circle Coalition, in northwestern section of the Gold Circle district, Elko county. Ore is quartz, carrying gold and silver, and occurs in a fissure vein, 2 to 6' wide, in rhyolite. Opened by a 100' shaft and 150' tunnel. A production of \$15,000 is reported.

BANKER DIVIDE MINING CO.**NEVADA**

Mail returned from Tonopah, Nev.

Directors: D. J. Fitzgerald, A. H. Keenan, R. F. Wendaver, A. T. Goodin, and E. J. Ramsey.

Inc. 1919, in Nevada. **Cap.** \$150,000; shares, 10c par.

Property: 4 claims W of Royal Divide and about 2 miles slightly N. E.

of Gold mountain, and adjoining the Clinton, Sioux, and Shamrock on the southeast. Is a prospect.

BANNER DIVIDE MINING CO.**NEVADA**

Inc. 1919, in Nevada. Cap. \$150,000; par 10c.

Property: an undeveloped group of 3 claims in the southwestern part of the district. Is a prospect.

BATTLE MOUNTAIN MINES & DEVELOPMENT CO.**NEVADA**

Office: 617 Merritt Bldg., Los Angeles, Cal. **Mine office:** Battle Mountain, Nev., F. E. Perry, manager.

Officers: M. H. Whittier, pres.; F. B. Sutton, sec. Inc. 1916. Cap. \$1,000,000. Is a close corporation.

Property: 20 claims, 9 patented, in Lewis mining district, Lander county, 16 miles south of Battle Mountain. Ore carries silver as stephanite, in shoots in quartz vein. Average value reported as 20 oz. silver and traces of gold and copper

Development: by tunnels, from 700' to 4,670' long with a total of 28,000' of underground work, said to have blocked out 50,000 tons of ore.

Equipment: included 200 h. p. Diesel engine, compressor and 125 ton mill, with flotation unit.

Last report in June, 1919; no work for two years past and sale of equipment and lease of mine is contemplated.

BAY STATE MINING & LEASING CO.**NEVADA**

Address: Sorn Neilson, Pioche, Nev.

Officers: C. P. Tasker, pres.; Sorn Neilson, v. p.-supt.; W. A. Byers, sec.-treas.; with W. A. Shaw and Capt. Hollowell, directors.

Property: Ida May group, including Bertha, Little Ford and Horn Silver claims, in the Jack Rabbit district, Lincoln county. The property has been opened by shafts and tunnel, and a depth of 100' attained. Values of 15% copper, 10 oz. silver and \$2 in gold are reported.

BEAR DIVIDE MINING CO.**NEVADA**

Mail returned from Tonopah, Nev.

Inc. 1919, in Nevada. Cap. \$150,000; par 10c.

Owns 2 claims, and a fraction adjoining Leadville Divide on east. A boom day "wildcat".

BELCHER DIVIDE MINING CO.**NEVADA**

(Originally Gold Mtn. Dev. Co.)

Fully described in Vol. XIV. In July, 1920, was placed on an assessable basis under name of **Reorganized Belcher Divide Mng. Co.**, which see.

BELCHER EXTENSION DIVIDE MINING CO.**NEVADA**

Office: Tonopah, Nev. C. L. Richards, res. agt.

Officers: Andrew Walz, pres.; E. J. Roberts, v. p.; T. J. Lynch, sec.-treas., with Geo. Wingfield and H. C. Brougher, directors. J. G. Crumley, mgr.

Inc. March 29, 1919, in Nevada. Cap. 1,500,000 shares; 10c par; 1,300,000 issued. Listed on San Francisco Stock Exchange. New York Trust Co., registrar, \$51,982 cash on hand July 1, 1919.

Property: 9 claims, 170 acres, north of Revert Divide. An adjoining property, the Belcher Divide, has utilized the deep shaft of the Extension for development purposes.

Development: by two shafts, 110' and 300' deep, total workings, 1,000'. Ore values of \$13 to \$32 are reported, and some shipments have been made to mills in Tonopah. Operated during 1919-'20.

Equipment: good electric hoist, etc. Regarded as an attractive prospect.

BELCHER MINING CO.**NEVADA**

Merged with Jacket-Crown Point-Belcher Mines Co., March 10, 1915, which in turn became a part of the **United Comstock Mines Co.** (q. v.), in 1920.

BELLE-HELEN MERGER MINES**NEVADA**

Formerly **Tonopah Kawich Mng. Co.**

Address: Tonopah, Nev.

Officers: M. M. Green, pres.; W. F. Gray, v. p.-gen. mgr.; Ed. W. McClave, sec.-treas.

Property: is a merger of holdings of the Tonopah Kawich Mng. Co. and of the Pacific States M. & M. Co.; the latter having been dissolved in Oct., 1920. Other property is said to be under option. All situated in Bellehelen district, Nye county, 50 miles E. of Tonopah, and show rhyolite lavas cut by parallel veins. On the Pacific States claims, the Midvale vein shows two high grade quartz streaks, 6" to 18", enclosed by pyritized milling ore; the States has total workings of 2,300', including 2 shafts and a tunnel crosscutting 3 veins at a depth of 360'. Reported, Nov., 1920, that a 1,400' ore shoot is exposed in tunnel, and that "there is nearly \$400,000 worth of positive and probable ore in the mine". Two years ago, total cost was \$35 per ton of ore mined.

Production: total from Pacific States said to have been \$117,000, of which 1,423 tons, averaging \$71.80 per ton, were shipped since 1917. The Tonopah Kawich, operating intermittently has made some shipments.

Operations are carried on both by company and lessees. A 50-ton cyanide mill is being erected.

BELLEVIEW DIVIDE MINES CORPORATION NEVADA

Mail returned from Tonopah, Nev.

Officers: W. J. Douglass, pres.; W. D. Moody, v. p.; J. G. Thompson, sec., with Roger Dougherty, I. S. Thompson, and Harry Powell, directors.

Inc. May, 1919, in Nevada. **Cap.** \$200,000; shares 10c par.

Property: 8 claims and fraction in Bellehelen mining district, Nye county. Has 150' shaft and 50' tunnel. Ore shipped in 1919.

BELMONT BIG FOUR MNG. CO. NEVADA

Address: Carlin, Nev.

Officers: F. W. Spear, pres., P. O. Box 5, Santa Monica, Calif.; P. E. Dairs, v. p. E. E. Kappler, sec.-treas. with Geo. W. Jacobs, W. E. Maul, and Wm. Painter, directors. Frank Fagan, lessee, Carlin, Nev.

Inc. 1916, in Nevada. **Cap.** \$125,000; 10c par; 800,000 shares outstanding.

Property: 16 claims, 320 acres, 7 miles west of Belmont, Nye county. Claims show granite cut by a N. S. fissure vein, which is 20' wide, and dips at 30°. Molybenite occurs disseminated through quartz and averages 2% MoS₂ besides silver and copper values.

Development: 150 and 400' tunnels. Mine operations were resumed July, 1919, under 5-year lease to Frank Fagan on a 20% royalty basis, and continued into 1920.

BELMONT DIVIDE MINING CO. NEVADA

Office: Tonopah, Nev. B. A. Rives, res. agt.

Officers: J. H. Healy, pres.; J. H. Miller, v. p.; Allen Rives, sec.-treas.; with C. T. Stevenson and Zeb Kendall, directors.

Inc. March, 1919, in Nevada. **Cap.** 1,500,000 shares, 10c par, 750,000 shares in treasury; assessable.

Property: Bodie and Mustang claims, 36 acres.

BELMONT MILLING CO. NEVADA

Dissolved February, 1917, and all property and assets taken over by the Tonopah Belmont Dev. Co.

BEN EZRA COPPER & GOLD M. & S. CO. NEVADA

Address: Santa Paula, Calif., or Searchlight, Nev.

Officers: H. P. Balcom, pres.; J. L. Crane, v. p.; A. H. Stovall, sec.; Wm. Mackenzie, treas.-mgr.; with Wm. Schiells, E. A. Chase, Chas. Beckwith and A. Everett, directors.

Inc. Sept. 3, 1909, in Nevada. **Cap.** \$1,000,000; \$1 par; 883,000 outstanding. Annual meeting 3rd Saturday in August.

Property: 15 claims, 10 patented, 300 acres in Nob Hill section of Eldorado mining district, Clark county, 17 miles N. of Searchlight. Ore occurs

in fissure veins in porphyry dike said to be 100 to 150' wide. Values are mainly in silver, with some copper and gold averaging \$15 to \$20 per ton.

Development: by 2,400' of workings, including 660 and 500' adits. A prospect. Idle, 1919-20.

BEN HUR DIVIDE EXTENSION MINING CO. NEVADA

Address: Tonopah.

Officers: Ed Malley, pres.; Ben. D. Luce, v. p.-mgr.; J. Clarence Kind, sec.; Albert Kelly, treas.; with John Barrier, directors.

Inc. March, 1919, in Nevada. **Cap.** \$150,000; par 10c.

Property: 5 claims adjoining the Ben Hur on the W. Has 22 h. p. hoist, compressor, etc.

BEN HUR DIVIDE MINING CO. NEVADA

Officers: C. W. Brandon, pres.; Albert Kelly, v. p.; R. J. Kelly, sec.-treas.; Roger Dougherty and Wm. McKnight, directors.

Inc. March 29, 1918, in Nevada. **Cap.** \$150,000; 10c par; assessable; increased from \$100,000. A 1c assessment levied April 1, 1921. Listed on San Francisco Stock Exchange.

Property: 6 claims in southeastern part of district, near the Chariot and North Ben Hur, and north of Gold Seam; held since 1902 by Watters and Dougherty. Early in 1921, 3 claims adjoining the Golden State group at Klondyke were taken over, and these are being prospected; the Ben Hur hoisting plant was installed for this purpose. Also in 1921, a lease for 3 years was taken on holdings of the Reorg. Divide Junior and arrangements made to work them through the Keystone Divide's 625' shaft.

Development: on the Divide property by a 300' shaft sunk on a quartz vein that assayed from \$4 to \$39 per ton. On the surface, this vein was 25' wide and of great length. Crosscut at 200' was in favorable formation, and the orebody was said to have improved at 250'. On the Klondyke claims, a shaft was down 110', Aug. 1, 1921, and crosscutting was underway.

Equipment: 15-h. p. gasoline hoist, compressor, 2 machine-drills, buildings, etc., good for depth of 700'.

BENTON-RADFORD-SMITH GROUP NEVADA

Address: A. I. D'Arcy, Goldfield, Nev. A. L. Bocherding, mgr.

Inc. 1919, in Nevada. **Cap.** \$40,000. Is an association of 20 members.

Property: placer claims in Tule canyon, Esmeralda county, containing gold bearing gravel at a depth of 20' with some \$6 material at 7'. Ground will be worked by drifting.

BEOVAWE SILVER MINING CO. NEVADA

Address: Beowawe, Nev.

Inc. 1919, in Nevada. **Cap.** \$150,000; \$1 par.

Property: 11 claims near Beowawe, Eureka county, developed by 140 and 180' shafts. From 1917 to Aug., 1919, the mine yielded \$85,000 worth of ore, with two cars ready at that date. No work reported since 1919.

BERRY MINING CO. NEVADA

Address: Midas, Nev. Is a gold-silver mine in Elko county, operated during 1919-20.

BERUNDY TUNGSTEN MINES CO. NEVADA

Address: Mina, Nev.

Officers: L. B. Spencer, pres.-mgr.; C. E. Noble, sec.; with F. J. Siebert, directors.

Cap. \$200,000; 10c par; assessable; 1,300,000 outstanding. Operating expenses for 1918 amounted to \$5,000.

Property: 1 claim, 20 acres, in the Gold Range mining district, Mineral county, 10 miles S. W. of Sodaville.

Ore: occurs as scheelite in a quartz fissure vein in diorite, said to assay 2 to 4% tungsten. **Development:** by 200' tunnel. **Ore reserves:** estimated at 3,000 tons of 2% tungsten ore.

BEST & BELCHER MINING CO. NEVADA

Office: 265 Russ Bldg., San Francisco, Calif. **Mine address:** John Matheson, supt., Virginia City, Nev.

Officers: W. H. Moise, pres.-mgr.; H. Zadig, v. p.; with W. H. Han-
non, S. D. Landecker and H. L. Slosson, Jr., directors. Chas. D. Olney,
sec.

Inc. July 27, 1863, in Calif. **Cap.** \$201,600; par-\$1; 185,151 shares out-
standing and 14,849 in treasury; assessable. Transfers made at company's
office; Registration Surety Co., registrar.

Property: covers 536' on the strike of the Comstock Lode, at Virginia
City, Storey county; is patented and lies between the Gould & Curry and
the Cons. Virginia.

Company is a non-producer and with others on the Comstock Lode, has
been consolidated to form the **Middle Mines Association**, which see.

BETTY O'NEAL MINES **NEVADA**

Office: 68 Devonshire St., Boston. **Mine address:** Wm. B. Cummings,
supt., Battle Mountain, Nev.

Officers: Geo. W. Sias, pres.; Noble H. Getchell, v. p.-mgr., Battle Mtn.,
Nev.; Frank E. Nye, sec.-treas., acting as trustees under an Express Trust,
declaration being executed at Boston, Mass., April 8, 1920.

Cap. \$5,000,000; par \$5; 800,325 treasury shares, of which 600,000 are
held in reserve. Stock transferred and registered at company's office. Annual
meeting in January. Current assets, as of Dec. 31, 1921, were \$70,425,
including \$22,558 cash; liabilities were \$457. Equipment is carried at \$28,403.

Property: 18 claims, 5 patented, 360 acres, in Lewis district, Lander-
county, 12½ miles S. E. of Battle Mtn., Nev. Is an old silver mine pro-
ducing considerable high grade ore 1880-82', idle until 1920, largely because
of litigation. Shows 2 fissure veins, one up to 20' wide on limestone-por-
phyry contact, carries antimonial silver ore, with a little copper. This occurs
in 7 ore shoots, and contains 30 to 83 oz. of silver. Also owns 160 acres of
ranch land below the mill site, and 160 acres in the Reese river section of
Nevada.

Also, the Cash mine of the **Y. P. Mng. Co.** (q. v.), near Prescott, Ariz.,
held under lease and bond.

Development: in Nevada, by 400' shaft and 4 adits; a fifth, the Getchell
drain adit, being driven by present management to connect with shaft, will
be 1,950' long and give a total back of 1,500'; was 1,100' in Dec. 1921. One
highly optimistic report estimates reserves at 779,634 tons of partly developed
ore between upper adit and 165' level, based on 5' average width, with an
average value of \$31.11 per ton (silver at 85c). Workings total 8,000'. The
old 300' shaft was unwatered to 150' level in 1921 and level driven 600'
south, cutting high grade ore in Estella vein.

Equipment: hoist and 300' compressor.

Management has cleaned up and retimbered caved workings and con-
templated erection of a 150-ton mill in 1922. Examined by Frank Oliver,
Leonard D. Sivyver, L. W. Getchell and J. E. Knapp.

BEVIS DIVIDE MINING CO. **NEVADA**

Office: 301 Nixon Bldg., Reno, Nev.

Officers: S. H. Wheeler, pres.; Wm. Woodburn, v. p.; E. H. Mead, sec-
treas., with C. T. Stevenson and F. H. Norcross, directors. Edward Bevis,
supt.

Inc. April 4, 1919, in Nevada. **Cap.** 1,500,000 shares; 10¢ par; assessable;
assessment No. 1, of 1c, levied Jan. 6, 1921. Listed on San Francisco Stock
Exchange. Transfers made at company's office.

Property: 2 claims, 40 acres, S. of the Mammoth and N. of the Giant,
show a "dike" or vein traceable across Zone and Reef groups into this tract,
Equipped with electric hoist and compressor, but development apparently
superficial. Idle, 1919-20.

BIG ACE DIVIDE MINING CO. **NEVADA**

Dead. See Vol. XIV. Property lost through failure to perform assess-
ment work.

BIG BILL DIVIDE MINING CO. **NEVADA**

Office: Tonopah, Nev.

Officers: W. W. Booth, Sr., pres.; W. W. Booth, Jr., v. p.; T. J. Lynch, sec.-treas.; G. W. Burgan, supt.

Inc. June, 1919, in Nevada. **Cap.** \$150,000; par 10c.

Property: 4 claims, 70 acres, adjoining the Apex group, is a prospect.

BIG CASINO LEASING CO. NEVADA

In 1919 operated property of the **Big Casino Mining Co.** under lease, which has presumably been relinquished.

BIG CASINO MINING CO. NEVADA

Address: Morris W. Johnson, pres., 514 Burnham Rd., Mt. Airy P. O., Philadelphia, Pa. **Mine office:** W. W. Wishon, eng., Searchlight, Nev.

Officers: M. W. Johnson, pres.; H. C. Gibson, v. p.; Samuel Rosenbaum, sec.; S. Krelstein, treas., with John M. Sailer, J. H. Shinn, A. M. Townsend, Geo. D. Lewis, W. A. L. Barker and Geo. Flint, directors. Hamilton B. Sharps, mgr., 719 Drexel Bldg., Philadelphia, Pa.

Inc. Sept. 14, 1914, in Delaware. **Cap.** \$1,500,000; shares \$1 par; non-assessable; 1,000,000 shares outstanding.

Property: 10 contiguous lode claims and 2 millsites, situated about 4 miles E. of Searchlight, Clark county, shows a fissure vein, 5' to 8' wide, in andesite and quartz porphyry, near granite porphyry contact, carrying gold chiefly, with lead, copper and zinc, and silver sparingly.

Development: by main shaft, 550' deep, with 6 levels.

Equipment: includes compressor, hoist, pump and 30-ton concentrating plant, with K. & K. flotation unit, installed 1918, by the Big Casino Leasing Co., which at one time operated the property under lease and bond. The mill ran 1 shift 4 days per week only, in 1919, owing to water shortage. Concentrate said to average 4.2 oz. gold; 14.1 oz. silver, 17.9% lead, 5.5% copper, 19.4% zinc.

Property under lease to W. M. Buley, 912 Baker-Detwiler Bldg., Los Angeles, Cal., who in spring of 1921 was reopening the mine, with M. D. Rossiter, supt.

BIG CHIEF CONS. MINES CO. NEVADA

Controlled by Clarence and Frank Berry, 250 First St., San Francisco, Calif. Jerry Coughlan, supt.

Inc. 1919, in Nevada. **Cap.** \$2,000,000.

Property: Missing Link, Rico, Jackson and General Grant group, in Gold Circle district, Elko county. There are two vein systems; ore carries gold in the Jackson and General Grant claims, and silver in the Missing Link. The latter, 12" to 25" wide, is said to show values from \$20 to \$600 and on 3rd level an average of \$100 for a length of 300'. The Jackson vein is 3' to 12' wide, with 2 ore shoots, 185 and 195' long, with a general average value of \$33 per ton reported.

Development: 300' shaft on Missing Link and one of 225' on the Jackson claim; total workings about 1,500'.

Equipment: installed April, 1919. In September, 1921, a 10-stamp mill had been ordered.

Examined by L. K. Kennedy, F. Jost and Frank R. Short, all of San Francisco.

BIG DIVIDE MINING CO. NEVADA

Dead. Described in Vol. XIV.

BIG HORN DIVIDE MINING CO. NEVADA

Office: Tonopah, Nev.

Officers: R. Crumley, pres.; Fred Ames, v. p.; C. F. Pugh, sec.-treas.-mgr., with J. C. Williamson and J. C. McCabe, directors.

Inc. May 20, 1919, in Nevada. **Cap.** \$150,000; 10c par; 750,000 issued.

Property: Golden Star group, 3 claims, E. and S. of Ben Hur Divide. Is one of the many companies organized during the Divide boom.

BIG LEDGE DIVIDE CONSOLIDATED MINING CO. NEVADA

Address: William Oaks, supt., Sylvania mine, via Cuprite, Nev.

Inc. 1919, in Nevada.

Property: 2 claims, S. W. of Telephone Girl Divide, about 3½ miles S. E. of Gold mountain. Also a 5-year lease on the old Sylvania lead-silver mine, 35 miles S. W. of Cuprite, and 50 miles S. W. of Goldfield. Latter property was a good producer, but was idle for many years on account of its isolated position. Examined by D. E. Anderson, R. W. Clapp, R. J. Anderson and W. J. Cooper.

Development: work was started at the Sylvania in August, 1919.

BIG PINE MINING CO.

NEVADA

Formerly operated by Mushett and Wittenberg.

Property: Big Pine claim at Manhattan, Nye county, covering the mineralized schist belt for 1,000'.

Development: the Mushett & Wittenberg 200' vertical shaft, sunk 350' from north end line of chain. Dimensions of the glory-hole show ore equal to 240,000 tons from surface to the 200' level. South of the shaft the known extent of the ore zone to the 200' level is 400' long and 60 to 75' wide, equal to 370,000 tons.

Mill: equipped with a 5x20' tube-mill, plates, classifiers, etc. Heads averaged \$5.60, gold tailing 40c per ton. Tube-mill consumes 170 lb. pebbles per day.

Was producing 1919-20.

BILL NYE MINING CO.

NEVADA

Address: Goodsprings, Nev. W. E. Allen, pres.

A report for the year ending December 31, 1918, showed: receipts, \$2,121; cash on hand, \$1,476; expenses, \$1,225.

Property: the Akron group in Goodsprings district, Clark county, reported held under 3-year lease from November, 1918, with an option to purchase at \$40,000.

Made shipments of lead-zinc ore in 1919.

BI-METALLIC DIVIDE MINING CO.

NEVADA

Mail returned from former office at Tonopah, Nev.

Officers: B. H. Smith, pres.; J. K. Turner and J. M. Gilfoyle, v. p.'s.; Otto Falk, sec.-treas., with H. D. Budelman and W. H. Royston, directors.

Inc. May 5, 1919, in Nevada. **Cap.** \$15,000; shares, 1c par.

Property: the Victor claim and 2 fractions near the Rosetta parallels the Hercules on west, and end-lines the South Divide on north. A promising vein is said to traverse the Victor claim.

BI-METALLIC MINE

NEVADA

Address: P. A. Simon, Mina, Mineral county, Nev. Mine is located at Candelaria, Columbus district, Mineral county, Nev.

Property: 3 claims, 47 acres, unpatented, shows a vein in slate, course of vein is N. 5° W., dip 65°. Ore occurs in shoots and lenses, and is said to average 28 oz. silver.

Development: 2 incline shafts, 280' deep, equipped with gasoline hoist. Mine was operated by leasers, 1917-19. Is a promising property.

BINGO DIVIDE MINING CO.

NEVADA

Mail returned from Tonopah, Nev.

Inc. April, 1919, in Nevada

Property: a group of 2 claims surrounded by the Big Divide, Trilby, Champion and Belmont properties. Is a raw prospect, and probably a company on paper only.

BISCUIT MINING CO.

NEVADA

Property: in Cherry Creek district, White Pine county, an old producer credited with a production of \$1,000,000 in silver. Developed by 1,100' incline shaft.

The mine was reopened in 1919, together with various adjoining properties that have patiently waited for a return of high silver prices.

BLACK DIAMOND COPPER MINING CO.

NEVADA

Dead. Fully described Vol. XIII.

BLACK EAGLE MINING CO.**NEVADA**

Mail returned from Rawhide, Nev.

Property: Black Eagle mine and mill at Rawhide, Mineral county, Nev., said to show gold ore. Treating 50 tons daily at the mill at last reports. Presumably idle, 1918-21.

BLACK FOREST MINING & SMELTING CO.**NEVADA****Address:** Wells, Nev.

Property: in Spruce Mtn. district, Elko county, 58 miles S. E. of Wells. Equipped with small lead smelter, idle since 1909. Shipped oxidized lead ore in 1919.

Claims were "jumped" in September, 1921, and litigation has ensued.

BLACK HAWK DIVIDE MINING CO.**NEVADA****Address:** Tonopah, Nevada. B. A. Rives, res. agt.

Officers: J. H. Miller, pres.; L. B. Spencer, v. p.; with C. B. Burkham, Zeb Kendall and P. H. O'Neill, directors. Allen Rives, sec.-treas.

Inc. April, 1919, in Nevada. **Cap.** \$150,000; par 10c.

Property: 100 acres S. of Anchor group and due south of Gold mountain, 2¼ miles, adjoining the Hercules on south. Is a raw prospect.

BLACK MAMMOTH CONSOLIDATED MINING CO.**NEVADA**

Is a reorganization, Dec. 2, 1920, of the Black Mammoth Mng. Co., stock of which was non-assessable.

Address: I. Salinger, 705 Bank of Italy Bldg., San Francisco. **Mine office:** Manhattan, Nev.

Officers: Mo. Lesser, pres.; H. G. Clinton, v. p.-supt.; I. Salinger, sec.; with Frank T. Torpey and F. Ketelhut, directors. Wayne T. Wilson, res. agt.. Nixon Block, Reno, Nev.

Inc. in Nevada. **Cap.** \$150,000; 10c par; 839,000 shares outstanding; assessable; assessment No. 1, of ½c. was levied Dec., 1920, and No. 2, of ½c. was delinquent July 15, 1921.

Property: 8 claims, 100 acres, in the Manhattan district, Nye county. An 100' (Feb., 1921) shaft uncovered \$25 gold-silver ore. Equipped with electric hoist, compressor, etc.

BLACK METAL MINES, INC.**NEVADA**

Main office: 516 Felt Bldg., Salt Lake City, Utah. **Mine office:** Pioche, Nev.

Officers: W. F. Snyder, pres.; Ed. H. Snyder, sec.-treas. with Willard Scowcroft, R. J. Evans and Geo. W. Snyder, mgr., directors. Jas. Quirk, supt.

Inc. May 5, 1918, in Nevada. **Cap.** \$99,000; shares 10c par; assessable; 990,000 shares outstanding, of which 550,000 are owned by Bristol Silver Mines Co. Two cent assessment levied in fall of 1920 and one of 1c became delinquent Aug. 8, 1921. Stock listed on Salt Lake City Stock Exchange. Annual meeting 1st Tuesday in January.

Property: about 250 acres, N. W. of Pioche, in Jack Rabbit district, Lincoln county, includes 6 claims, and the Gusset Patch group of the Simon Bamberger Co., held under a 5-year lease from February, 1918. A lease on the Dav mine expired when this and other holdings of the Uvada Copper Co. were taken over by the Bristol Silver Mines Co.

Geology: ore occurs in a replacement deposit of irregular dimensions in limestone, the mineralized area extending to depth of 900' and for about 700' on the dip of the bedding, on the 325' level. Values are mainly in silver, with a little copper. The ore is desirable as a smelter flux, as it contains iron and manganese. As shipped in 1920, the silver content was 12 to 15 oz., although one pocket of 285 oz. ore was uncovered.

Development: about 2 miles of workings, including 600' tunnel and 1,200' shaft. Operations of the Black Metals company have been confined largely to the 325' level.

Equipment: includes hoist, 50 h. p. oil engine, drills and compressor. Reported shipping 50 tons daily in 1919, and about the same in 1920. Twenty men employed. Cost of mining stated to have been \$4.15 per ton.

Production: from April, 1918, to November, 1920, totaled 17,602 tons with a net smelter value of \$111,074, including one lot of shipping ore of 54 tons which gave returns of \$17,000. Total to Jan. 1, 1922, about \$190,000.

In spite of apparent prosperity, high costs made operations difficult in 1920. Reported early in 1921 that controlling interest in the Black Metal Mines, Inc., had been acquired by the Bristol Silver Mines Co., and that property was being operated by lessees. By August, 1921, company had resumed operations and weekly shipments of 350 tons were reported.

BLACK METALS MINING CO.

NEVADA

Property: an old silver producer in Black Metal canyon, 3 miles N. of the Exchequer in Cherry Creek district, White Pine county, reopened in 1918.

Production: about 800 tons during 1918.

Operated under lease by F. W. Fletcher.

BLACK MOUNTAIN SILVER MINING CO.

NEVADA

Address: of company and secretary, Box 111, Mina, Nev.

Officers: Louis W. Whiting, pres.-mgr.; Dr. A. E. Sparks, v. p.; W. W. Whiting, sec.-treas.; these comprise the directorate.

Inc. October 14, 1919. **Cap.** 1,500,000 shares; 10c par; 1,046,000 shares outstanding. Transfers made at Mina.

Property: 7 unpatented claims, 110 acres, in Black Mountain district, 2 miles N. of Marietta, Mineral county. The main vein, 5' wide, is described as a contact fissure in diabase and altered sedimentaries, containing shipping ore said to carry 65 oz. silver and 20% lead, with some gold and copper. Still in the prospective stage.

BLACK PANTHER EXTENSION MINING CO.

NEVADA

Address: Woodson & Carson, fiscal agents, 440 Gazette Bldg., Reno, Nev.

Officers: Geo. A. Ferris, pres.-treas.; Jas. D. Finch, v. p.; E. H. Abrams, sec.; with Kit Carson and R. H. McIntosh, directors.

In February, 1920, 20,000 shares were offered at 5 cents each.

Property: 5 claims, 3½ miles N. of Reno, Washoe county, said to carry the extension of the Black Panther vein. Col. Carson is also associated in the management of the Black Panther Mng. Co.

BLACK PANTHER MINING CO.

NEVADA

Office: Gazette Bldg., Reno, Nev.

Officers: J. M. Molina, pres.; H. W. Miller, v. p.; J. A. Molina, sec.-treas.; with A. Marsal (supt.) and E. L. Drappo, directors. Kit Carson, fiscal agt.

Inc. in Nevada. **Cap.** \$150,000; par 10c.

Property: 6 claims in the Peavine district, Washoe county, 3½ miles N. of Reno, shows a mineralized zone between andesite and granite. Chalcocite ore was opened on 165' level, carrying 12% copper, fair silver value, some lead and gold. Developed by a 200' shaft, to be continued to 500'. Equipped with an electric hoist and compressor.

Developing in 1921.

BLACK ROCK MINE

NEVADA

Office: 526 Main St., Racine, Wis. Mine 6 miles east of Yerington, Nev. Property privately owned by Wm. D. Thompson, of Racine, Wis.

Property: 3 patented claims, 52 acres, in Mason district, Lyon county, show 3 parallel fissure veins in quartz-monzonite 2 of which of 6 to 10' average width are traceable 2,600'. Developed by shafts, 80' and 120' deep, showing chrysocolla and chalcopyrite said to give returns averaging 6%-7% copper per ton.

BLUEBIRD CONSOLIDATED MINING CO.

NEVADA

Mail returned from former address, Reno, Nev.

Property: the old Mexican mine at Ellsworth, Nye county, 11 miles W. of Ione and 14 miles N. of the Simon mine. A large production is reported from former operations and dumps are said to contain 17,500 tons of \$39 silver ore. Tailings are said to be worth treating again—the third time. **Development:** by 500' tunnel connecting with old shaft.

BLUE DICK MINING CO.**NEVADA****Address:** Don H. Petty, mgr., Hilltop, Nev., or Battle Mountain, Nev.**Property:** Blue Dick mine at Hilltop, 20 miles S. E. of Battle Mountain, Lander county, reported to be shipping about 10 tons of 42 oz. silver ore daily. An air-compressor and machine drills were installed early in 1919.

Shipments of fluxing ore also made to Mammoth smelter, Kennett, Calif. Operated 1919-20.

BLUE HORSE MINING CO.**NEVADA****Address:** Tonopah, Nevada.**Officers:** J. W. Plant, pres.; W. H. Bissel, v. p.; Frederic N. Lee, sec.; Roy H. Elliott, treas., with J. W. Matson and Geo. K. Allen, directors.**Property:** in the Silverbow district on the W. side of the Kawich range, Nye county, 43 miles E. of Goldfield, shows a vein system in silicified rhyolite. One vein exposed for 1,500' is 4-11' wide, carrying free gold and ruby silver.**Development:** by stripping and shafts 30 to 150' deep. Expenditures to May, 1921, were \$80,000. A pilot mill is in use and sinking of 300' two-compartment shaft underway.**BLUE JACKET DIVIDE MINING CO.****NEVADA****Office:** A. S. Proskey, 314 Clay-Peters Bldg., Reno, Nev.

Organized in October, 1919. Owns 100 acres in N. E. part of district, near Lookout Divide claims.

BLUE LIGHT COPPER CO.**NEVADA****Address:** care C. W. Marsh, pres., Washington, D. C. **Mine office:** Mina, Mineral county, Nev.**Officers:** Henry L. Dollman, v. p.; F. M. Baker, Carson City, Nev., sec.; Wm. C. Osborne, treas.; preceding officers, Chas. N. Van Cleave, Chas. E. Test and Richard Stegemeier, directors.**Inc.** Oct., 1907, in Nevada, as successor of Blue-Light Mining Co. **Cap.** \$2,500,000; shares \$1 par.**Property:** 14 miles from Mina, Mineral county, developed by 600' shaft from which several carloads of rich carbonate ore have been shipped. Shaft reached sulphide zone in 1917, but workings had not yet passed through leached material. Mine is equipped with hoist, buildings, etc. Examined by R. W. Hadden. Idle, 1919-21.**BLUESTONE MINING & SMELTING CO.****NEVADA****Office:** 42 Broadway, New York City. **Mine office:** Mason, Nev.**Officers:** D. M. Steindler, pres.; John Carson, v. p.-mg. dir. with J. B. Woddell, H. M. Marler and M. B. Davis, directors. H. M. Thompson, sec-treas.**Inc.** May 18, 1917, under laws of Maine. **Cap.** \$2,000,000; \$10 par; 100,000 outstanding.**Property:** 440 acres. 380 patented, including the Bluestone mine and a group of 20 claims adjoining the Mason Valley mine in Lyon county. Formerly owned by the late J. D. DeLamar. The Bluestone is the oldest property in the district, claims having been patented previous to 1890.**Geology:** ore is mainly chalcopyrite, associated with considerable epidote, in a garnet-limestone gangue, there being practically no oxidized ores, even at the outcrop. Ore is uniform in character, and after a light roast is well adapted to magnetic separation. Drill-holes proved that ores extend to 750' depth.**Development:** mine has been opened to a depth of 540' and has 2 miles of workings, including a 1,300' main haulage tunnel, cutting an ore-shoot about 300' wide and 500' long at a point 300' below the apex. This shoot is said to carry an 80' paystreak of high-grade ore, ranging up to 20% in tenor, with balance of ore carrying 2.5% copper. Management estimated 1,600,000 tons of ore in sight, averaging 2.6% copper, in 1917.**Equipment:** includes a 50-h. p. hoist, 25-drill electric air-compressor, and 800-ton flotation plant, which supersedes the old magnetic plant.

Company built 2½ miles of railroad from Mason to the mine in 1916.

September, 1919, were suspended in March, 1920.

Production: in 1919, up to time of stopping work, due to the market, monthly output was about 1,750,000lb of copper. Sale of metals during 1919 realized \$494,913; there was a net loss of \$248,601. Operations resumed

A suit brought December 1, 1919, by Martin J. Heller to recover commissions is still pending.

BLUSTER CONSOLIDATED MINING CO.

NEVADA

Mine at Jarbidge, Elko county, Nev.

Officers: T. B. Beadle, pres.-gen. mgr.; Frank Benan, v. p.; Geo. Winkler, sec.; J. D. Goodwin, treas.

Property: the Bluster, or Winkler mine, with 2 principal claims, in Jarbidge district, 2½ miles S. of Jarbidge, shows gold ore in 4' to 7' veins in silicified rhyolite, said to assay \$10 to \$40 per ton. **Ore reserves:** management estimated 100,000 of milling ore, valued at \$12 per ton, blocked out and on dumps, January, 1915.

Equipment: 10-stamp mill, sawmill, aerial tramway, electric power. A cyanide plant treats the tailings.

Idle, 1919-20. Property reported sold, September, 1921, to the **Bonanza Gold Mng. Co.**, of Los Angeles, Cal.

BONANZA DIVIDE MINING CO.

NEVADA

Office: Tonopah, Nev.

Officers: Harry McNamara, pres.; W. A. Nye, v. p.; H. E. Dugan, sec.-treas., with H. C. Price, directors.

Inc. in 1919, in Nevada. **Cap.** \$150,000; shares 10c par.

Property: 4 claims, adjoining Golden State Divide, in Klondyke section of Divide district.

Reported March, 1921, to be under option to **Liberty Divide Mng Co.** A prospect.

BONANZA GOLD MINING CO.

NEVADA

Address: S. A. Bostwick, Los Angeles, Calif., or R. A. Cook, Jarbidge, Nev.

Company reported to have purchased mine of the **Bluster Cons. Mining Co.** (q. v.). It is proposed to electrify plant and to increase size of mill.

BONANZA MINING CO.

NEVADA

No returns received from former mine office, Winnemucca, Humboldt county, Nev. Company was controlled by Chas. Baagoe and D. F. Shiveley at last accounts.

Property: 5 claims, 5 miles from Winnemucca, shows a contact fissure vein 11-22' wide and proved for length of 115', between diorite-porphry hanging wall and lime shale footwall. Development includes 3 shafts, deepest 215' with crosscuts, a tunnel driven east from No. 2 shaft, 37' deep and a winze sunk all in ore. Mine has no equipment.

BOSS EXTENSION MINING CO.

NEVADA

Address: Al E. Buys, gen. mgr., Goodsprings, Nev.

Inc. Nov. 12, 1914, in Nevada. **Cap.** \$1,000,000; \$1 par; 558,500 issued. In December, 1916, company sold 100,000 shares, which were offered to the public at 11 cts.

Property: 3 claims, 60 acres, adjoining the Boss mine and between it and the Oro-Amigo mines in the Yellow Pine district, Clark county. Claims show a porphyry dike, whose mineralized contact with limestone is said to carry platinum-gold ore, like that of the Boss mine.

Development: by 40' shaft and 2 tunnels (250'). No recent returns.

BOSS GOLD MINING CO.

NEVADA

Address: Goodsprings, Clark county, Nev.

Officers: S. E. Yount, pres.; O. J. Fisk, v. p.; Lane C. Gilliam, sec.-treas.-mgr., with N. K. Potter and F. J. Kent, directors.

Inc. 1914, in Nevada. **Cap.** \$1,000,000; \$1 par; 408,500 outstanding. Annual meeting third Wednesday in January.

Financial statement January 1 1918, showed cash in bank, \$3,725; Liberty bonds, \$10,000; due from smelters, \$1,149 Smelter returns; in 1916, \$45,725;

in 1917, \$70,806; in 1918, \$17,546. Revenue from January to June 1919, inclusive, totaled \$15,327. In July there was \$11,096 on deposit plus \$10,000 of bonds.

Dividends: \$8,170 in 1916; \$32,680 in 1917; \$20,425 in 1918.

Property: 5 claims, 85 acres, unpatented, 12 miles W. of Goodsprings, and 3 miles from Platina.

Geology: orebodies consist of oxidized copper ore, mostly chrysocolla and limonite, and of gold-platinum-palladium ore in fine-grained silicious gangue. The later ores contain a small quantity of bismuth plumbogarsite (a hydrous sulphate of iron and lead). The shoots can be mined separately. The orebodies occupy a nearly vertical zone of fracturing in the horizontal strata of dolomite, caused by quartz monzonite porphyry intrusions. The zone is 30' wide on surface, 100' long, with precious metal shoots confined to the 12' resting on the footwall. For further details see "Eng. & Min. Journ." of August 20, 1919.

Development: by tunnels and over 6,000' of workings. Reserves in one shoot, according to W. L. Uglow, were 1,000 to 2,000 tons, averaging 3.46 oz. gold, 6.4 oz. silver, 0.70 oz. platinum, and 3.38 oz. palladium. During first half of 1919, there was 330' of work done.

Production: in 1916, 451 tons copper ore and 295 tons platinum-bearing ore; in 1917, 443 tons of ore yielded 107 oz. platinum (0.24 oz. per ton), and 400 oz. of palladium (0.9 oz. per ton); in 1918, 605 tons copper ore and 90 tons platinum-palladium ore, netting \$6,040; in 1919, two cars of copper ore realized \$1,139, and three cars of platinum-palladium ore \$22,365.

The Overmire mill proved a failure, and the cost of handling the ore was so much higher than expected that the Palau Co. ceased operations early in 1918 and the mill has since been dismantled.

The present management has prospected for new orebodies since 1919, but met with little success.

BOSTON & ELY CONS MINING CO.

NEVADA

A consolidation of the Boston-Ely Mining Co., Smokey Development Co., and Ely Northern Copper Co.

Office: 25 Broad St., New York. **Mine address:** Ely, Nev.

Officers: L. E. Whicher, pres.; C. C. Burger, v. p.; R. M. Atwater, Jr., treas., with W. W. Cohen, W. F. Bartholomew, Geo. R. Presby. H. W. Barrett, W. N. McGill and A. L. Kingsbury, directors. L. J. Corwin, sec. Raymond Guyer, gen. mgr.; S. H. Williams, mgr. at Ely; W. H. Boyle, supt.

Inc. 1919, in Delaware. **Cap.** \$1,000,000; \$1 par; 897,210 outstanding. N. Y. Trust Co., transfer agent; U. S. Corporation Co., registrar. Annual meeting, 3rd Tuesday in February. Stock listed on Boston Curb.

On Dec. 31, 1921 assets were \$1,102,790; including property and improvements, \$797,663; development \$60,541, current \$141,795. There were no current liabilities.

Property: 572 acres in Robinson mining district, White Pine county, about 140 miles from Cobro on the Southern Pacific R. R.

The Boston-Ely ground is 4½ miles from that of the Smokey group, the Nevada Consolidated and Consolidated Copper mines lying between. The Smokey and Ely Northern are 1/3 mile apart. All have rail connection nearby.

The mines had been idle for many years and are fully described in former volumes of this book; Ely No. C. Co., Vol. VIII; Boston-Ely, Vol. XI; Smokey Development, Vol. XI.

Company also owns an interest in the Colonial Silver Mines at Oaxaca, Mex., and in some oil-lands.

Geology: the copper-bearing ores occur in contact deposits between limestone and porphyry, as well as in the porphyry itself.

Development: by 1.230' shaft in the Boston-Ely, which, with drifts and machinery, cost \$180,000; this shaft is 3,000' from the Alpha shaft of Consoli-

dated Coppermines; by 1,800' tunnel in the Smokey, costing \$60,000; by 300' tunnel in the Ely Northern costing \$15,000.

Beginning April, 1920, all effort was concentrated on the Ely Northern, which is developed by 636' tunnel cutting a copper-bearing limonite orebody 420' from portal, and from which a 290' shaft was sunk with levels at 50, 100, 200, and 280'. Workings totaled 2,700' in July, 1921. Vein is 10-15' wide, the ore assaying 5 to 8% copper. By October, 1921, ore reserves were 180,000 tons.

Equipment: at Ely Northern includes semi-Diesel compressor and hoists.

Outlook for company is considered favorable, as indications on the Ely Northern, possibilities in the Smokey, and proximity (3,000') of the Boston-Ely to the Consolidated Coppermines Alpha mine, give it several chances to make a producer.

BOYER COPPER MINES CO.

NEVADA

Address: Boyer, Churchill county, Nev. Arthur Howe Carpenter, cons. engr., 210 Noble Ave., Crafton, Pa.

Property: 49 claims, 1,000 acres, also a 10-acre millsite and 160 acres of placer lands, at Boyer, about 30 miles from Wonder, Nev., and 75 miles south of the S. P. R. R. at Winnemucca, in the copper belt of the Piute mountains, controlled by Crofton Umacke, of Reno, Nev., at last accounts.

Geology: covers a mile of the western end of a contact between whitish andesite and an underlying greenstone, or andesite, which shows copper pyrite peppering the rock. The ore bed has a dip of but 20° and a thickness of 100' and is much altered, the footwall being a hard, silicious band. The lower 30' carries 5% copper, but the orebody developed was figured by Prof. Carpenter and A. H. Carpenter to assay 1.7% copper and about 70 cts. per ton in gold. High-grade ore occurs in small iron-capped veins which extend up through the porphyry and carry a breccia of rock fragments cemented by copper glance and bornite.

Development: by tunnels, now inaccessible. Present company has done about 500' of work on Treasury Box hill and exposed a faulted block of 200' length, 100' width and with 500' depth on the dip, assaying as above. Property promising when railroad facilities are provided.

BRISTOL CONSOLIDATED MINES & SMELTING CO.

NEVADA

Dead. Company owned 21 or more patented claims in the Bristol district, Pioche, Lincoln Co., which in 1911 were transferred to the Day Bristol Cons. Mines Co. See Bristol Silver Mines Co. for later history of property.

BRISTOL SILVER MINES CO., THE

NEVADA

Office: 220 Felt Bldg., Salt Lake City. **Mine address:** Pioche, Nev. C. G. Gilmore, supt.

Officers: W. I. Synder, pres.; W. F. Synder, v. p.; E. H. Synder, sec-treas.; Geo. W. Synder and R. J. Evans, directors.

Inc. 1919, in Nevada, and brought larger part of property of the Uvada Copper Co., then under lease to Black Metals Mines Co. **Cap.** \$100,000; par 10c.; 800,000 issued. Stock is closely held. Company owns 550,000 of 990,000 issued shares of Black Metals Mines Inc., the ground of which adjoins. Ownership of this property, or part of it, has passed through many hands, but Snyder interests have been largely in control. Originally owned by Bristol Cons. M. & S. Co., it was transferred in 1911 to the Day Bristol Cons. Mines Co., and in turn to the Cons. California-Nevada Mng. Co. in 1915. The latter after a very brief struggle went into receiver's hands, and property was acquired by the Uvada Copper Co., which in 1918-19 leased it to the Black Metals Co.

Financial statement: purchase price of holdings, \$96,000; acquisition of new machinery, \$15,000. Indebtedness as of Oct. 1, 1921, \$20,000.

Property: 324 acres, patented, in Jackrabbit district, Lincoln county, 16 miles N. of Pioche, includes Hillside, Gypsy, May Day and 5 other old mines. A series of limestone beds overlying shale and quartzite contains replacement deposits of oxidized and carbonate lead-silver ores, the May Day being

the most important. A typical assay return shows 13 oz. silver, 9% lead, 2% copper and 40c gold, with sufficient iron and lime to make ore desirable as a flux.

Development: by former operators totals several miles including a 3,800' tunnel, to a depth of 700'. Present work began May, 1920, and has been centered on the May Day and Gypsy mines, the workings of which are connected, where a rich ore shoot, 4' wide and 125' long has been opened in the main channel; widths increasing to 30' at junction of cross fissures. An incline has been sunk from the 600' to 900' level and it is proposed to connect the Hillside mine with main workings and to continue tunnel. Much of the exploratory work is being done by lessees. Total cost, including smelting, is about \$12.40 per ton of ore.

Ore reserves: on Oct. 1, 1921, were 50,000 tons, assaying 40c gold, 11 to 20 oz. silver, 7.5 to 16% lead, and 1.7 to 2.5% copper, as compared with 20,000 tons in May, 1919.

Equipment: includes hoist and 2 compressors with 10 drill capacity driven by distillate engines; 9,000' aerial tram connecting mines with the Pioche Pacific Ry. at Jackrabbit; all valued at \$120,000. Company employs 40 men.

Production: in earlier days said to be \$6,000,000; by present management, \$161,000 net in 16 months ended Oct. 1, 1921, and now at rate of about \$10,000 net per month.

BROHILCO SILVER CORPORATION

NEVADA

Address: Dr. W. E. Harrison, Fallon, Nev.

Geo. Edson Porter, pres., M. B. Wilson and W. E. Harrison control the company. C. R. Olson, cons. engr.; Mr. Keith, supt.

Property: 5 scattered groups, 13 claims and fractions in Churchill county, 4½ miles S. E. of Broken Hills, Nye county, and 70 miles S. E. of Fallon, includes the Silver Leaf and Black Reef groups, 1½ miles apart. Gold-silver-copper occurs in veins, 4' wide.

Development: consists of trenching and shallow workings, deepest about 100'. Late in 1921, small shipments of high grade ore were made to the Kansas City-Nevada mill at Bruner (or Phonolite).

BROKEN HILL DIVIDE MINING CO.

NEVADA

Officers: John McGee, pres. and mgr.; J. C. Williamson, sec.

Property: 4 claims, adjoining the Anaconda Divide on N. E., 3 miles N. W. of Gold mountain. A prospect on outskirts of district.

BROKEN HILLS COMBINATION MINING CO.

NEVADA

Address: 317 State Bank Bldg., Tonopah, Nev.

Officer: Wm. Forman, pres.; W. E. Edwards, v. p.; Wm. McKnight, sec-treas.; with Jas. Logan and F. M. Maloney (cons. engr.), directors.

Cap. \$150,000; 10c. par; 750,000 treasury shares.

Property: 6 claims in the Broken Hills district, 15 miles S. E. of Fairview, Churchill county, and N. W. of the Broken Hills Silver Corp. Supposed to cover the extension of the latter's vein system; main vein 7' wide in andesite. Still in a prospective stage, March, 1921, at which time Tonopah brokers were offering first allotment of treasury stock at 7¢. The same offer was being made in June.

BROKEN HILLS MINING CO.

NEVADA

Property now owned by Broken Hills Silver Corp., which see.

BROKEN HILLS SILVER CORPORATION

NEVADA

Successor to Broken Hills Mng. Co., for which see Vol. XIV. An example of what G. G. Rice did with other people's money. Information, from interested sources, is as follows:

Office: 259 North Virginia St., Reno, Nevada. **Mine office:** Broken Hills, Nev.

Officers: Ed. Malley, pres.; G. C. Ross, v. p.; J. T. Goodin, treas.; Eugene Grutt, sec., with C. E. Bingham and Jas. Boyd, directors. J. T. Whitmire, asst. sec.; Wm. H. Kinnon, mgr.; Otto E. Schiffner, supt.

Inc. May, 1920, in Nevada. **Cap.** \$300,000; 10c. par; 1,400,000 issued. The Fidelity Finance & Funding Co. (a Rice organization) of Reno, Nevada, underwrote 2,000,000 treasury shares to net Broken Hills \$380,000.

Financial statement: of April 4, 1921, shows total receipts of \$161,900. Expenditures include part payment for property, \$79,624, and all other, \$82,276, leaving a balance of \$225,147 due on property. The Fidelity company advanced \$13,000 more, but on May 25, declined to carry out contract, leaving treasury without funds and company in debt for labor. Stock sold for 3¢ per share, May, 1921.

Property: the Broken Hills and Cracker Jack groups, 135 acres, formerly owned by Broken Hills Mng. Co., 15 miles S. E. of Fairview and 63 miles S. E. from rail at Fallon, also the Mt. Morgan and Mother Lode groups, 200 acres one mile away, all in the Broken Hills district, Churchill county. The B. H. mine under development since 1913, was acquired, 1920. Reported that mine has 9 veins, 6 under development. Management claimed that Broken Hill vein showed 9' of \$24 ore, the Fidelity vein 6' of \$30 ore; the Belmont Cross 2 to 6' of ore with a 9" rich streak; all on the 150' level. This ore apparently occurs in bunches, since shipments do not confirm these figures.

A report by Thompson says vein was opened for 2,100' in length and 150' depth, yielding 400 tons of 130 oz. silver ore, with \$15 ore on dump and in workings to value of \$101,000.

Development: by 4,500' of work, including Broken Hills, 350' shaft with 5 levels, developing Fidelity, and Broken Hills veins. Also the 150' Belmont shaft, with 850' of work, the 100' Crown Point and 50' Black Dog. Equipped with 2 heavy gasoline hoists.

Production: from 1913 to 1920, inclusive, about \$70,000; 225 tons, sorted ore shipped to Hazen returned 188.8 oz. silver and 19% lead, equal to \$206.43 per ton.

After scandalous stock rigging operations in 1921, the State Corporation Commissioner of California refused to permit stock sales in that State. After Rice quit company, it engaged Wm. H. Kinnon of the Kansas City-Nevada Cons. M. Co. to examine and to take charge of mine. His sampling showed that mine held 7,092 tons of available ore of gross value of \$132,225, with 11,092 tons in stope fills and dumps, valued at \$202,225.

The Kansas City-Nevada Cons. is to treat Broken Hills ore at its Bruner (or Phonolite) 50-ton mill, 12 miles from the mine, on a 50-50 basis under Mr. Kinnon's management.

BROOKLYN MINING CO.

NEVADA

Address: E. S. Shields, sec.-treas., 125 W. Broadway. Butte, Mont. Mine near Contact, Elko county, Nev. S. V. Kemper, pres.; W. A. Kemper, v. p.

Inc. 1898, in Montana. **Cap.** \$500,000; shares \$1 par; 213,000 shares issued.

Property: 7 claims, 75 acres in the Contact district, with ore deposits occurring on the contact between limestone and porphyry. This ore belt is about 18' wide, runs E.-W. for several thousand feet, dips at 75° and is said to contain 8% copper with about 2 oz. silver and \$1 gold per ton.

Development: by 196' shaft with 600' of workings, said to have developed 2,000 tons of ore. Idle for several years, awaiting the advent of railway, which is 40 miles away. Equipped with 25 h. p. boiler, 15 h. p. gasoline engine and hoist.

BROUGHER DIVIDE MINING CO.

NEVADA

Office: Tonopah, Nev.

Officers: H. C. Brougher, pres.; George Wingfield, v. p.; Jas. Grimes, 2nd v. p., with G. A. Kernick and Gust Hanson (supt), directors. E. J. Erickson, sec.-treas.

Inc. March 16, 1918, in Nevada. **Cap.** \$1,000,000; \$1 par; 851,508 outstanding; assessable. Assessments No. 1 and 2, of 2¢ each, levied February

and November, 1921. Transfers made at company's office; Tonopah Banking Corp., registrar. Listed on San Francisco Stock Exchange. Annual meeting, first Monday in April.

Property: 7 claims, 72 acres, lying immediately north of the Tonopah Divide and southwest of the Divide Extension.

Development: since 1918, includes a main shaft of 500', a winze sunk a further depth of 296', and many feet of crosscuts, drifts and raises. Work going on at the rate of about 200' per month.

Equipment: electric hoist, compressor, drills, etc.

BUCK & CHARLEY MINING CO.

NEVADA

Succeeded by Rochester Buck & Charley Mines Co.

BUCKEYE BELMONT MINES CO.

NEVADA

Office: 1055 Spitzer Bldg., Toledo, Ohio, and Tonopah, Nev.

Officers: A. B. Tillinghast, pres.; W. B. Kober, v. p.; W. B. Voorhees, sec.; also directors. E. F. Rowley, treas.; Letson Balliet, mgr.

Inc. 1908, in Nevada. **Cap.** \$2,000,000; \$1 par; outstanding 700,000 shares. Annual meeting, first Thursday in January. Private corporation. Stock unlisted. Is a holding company, operating property formerly owned by Belmont Extension Mng. Co., now defunct, and holding interests in the Buckeye Eagle and Buckeye Tonopah companies. Reported in Oct., 1915, to have taken an option upon a drift gravel property in Plumas county, Cal.

Property: 15 claims, 13 patented, 300 acres, at Tonopah, adjoining the Tonopah Belmont on a portion of the east end line.

Ore: quartz with silver sulphides and gold occurring in fissures in trachyte. Veins strike E. W. and dip 30°. There are two large veins of low-grade ore with several rich stringers. No production to date.

Development: 3 shafts, 125', 900', and 1,234' deep, with 5,000' workings.

Equipment: includes 2 electric hoists of 52-h. p. and 120-h. p., one 40-h. p. gasoline hoist and two 8-drill air compressors.

Idle for a number of years but rumored that work had resumed summer of 1921, to explore for extension of orebody opened on Rescue-Eula ground.

BUCKEYE CONS. MINING CO.

NEVADA

Address: W. O. Woodbury, pres., Reno, Nev.

One of the early day Comstock companies, its mineral holdings reported taken over early in 1922 by Silver Hills Nevada Mines Co., which see.

Property: the Buckeye claim (patented 1869), 200 x 3,000' and several fractions, 30 acres, ¼ mile N. E. of Silver City, Lyon county, covers a part of the south end of the Brunswick-Occidental lode, developed by 650' incline. The orebody occurs in an andesite-rhyolite contact, with commercial gold-bearing ore averaging 14' wide. No work has been done below the 200' level since 1876. Early production is said to be \$1,000,000; lessees are reported to have paid \$200,000 in royalties during past 15 years.

BUCKEYE EAGLE MINING CO.

NEVADA

Tonopah, Nev. Control held by Buckeye-Belmont Mines Co., with same officers and directorate.

BUCKEYE TONOPAH MINING CO.

NEVADA

Tonopah, Nev. Control held by Buckeye-Belmont Mines Co., with some officers and directors.

BUCKHORN MINES CO.

NEVADA

Buckhorn, Nev. Property shut down permanently, Feb., 1916. Plant dismantled. **Address:** George Wingfield, owner, Reno, Nev.

BUCKHORN SYNDICATE

NEVADA

Address: E. B. Bronson, 111 Broadway, N. Y. City.

Property: a group of claims, 30 miles north of the Tonopah-Ely stage road. Shows ruby-silver ore in a deposit in porphyry. Developed to depth of 150' by tunnel and winze. Claims have abundant water and pine timber, and are about 2 miles west of the Stone Cabin Valley.

The Syndicate holds oil leases in Oklahoma.

BUCKINGHAM MINING CO. OF NEVADA.**NEVADA****Address:** Battle Mountain, Nev. C. W. Burge, supt.**Officers:** Axel Johnson, pres.; Robt. F. Schmeiser, v. p.; *Chas. F. Ayer, sec.-treas., 425 First Natl. Bank Bldg., San Francisco.**Inc.** March 10, 1919, in Nev. **Cap.** \$500,000; 25¢ par. Annual meeting, 1st Monday in March.**Property:** 27 claims near Battle Mountain, Lander county, shows 2 veins, 2 to 15' wide, containing gold-silver-lead ores, developed by shaft and tunnel.**BUCKSKIN DIVIDE MINING CO.****NEVADA**

Mail returned from Tonopah, Nev.

Inc. 1919, in Nevada. **Cap.** \$150,000; par 10c.**Property:** 2 claims S. of the Pershing and W. of the Bullion Divide.**BUCKSKIN NATIONAL GOLD MINING CO.****NEVADA****Address:** W. J. Bell, National, Humboldt county, Nev.**Property:** at the S. end of the National gold district. In fall of 1920, property was operated by lessees, who reached a 10' vein by 900' tunnel, about 300' below surface. Ore carries ruby silver and free gold and is said to assay up to \$100. One shipment of 9 tons yielded net return of \$2,898. Work being continued thru 1921.**BUENA VISTA DEL ORO M. & M. CO.****NEVADA****Address:** Unionville, Nev. J. C. Skinner, pres.**Property:** at Dun Glen, Pershing county. Old mines being reopened and operated through Golden Bell 176' level. Claim to have 100,000 tons milling ore blocked out. A 25-ton Gibson mill was purchased, summer of 1920.**BUFFALO VALLEY MINES CO.****NEVADA****Address:** Lovelock, Nev. John T. Reid, mgr.; O. P. Richards, supt., Volney, Nev.**Inc.** Jan. 7, 1916, in Arizona. **Cap.** \$500,000; shares \$1 par; 225,000 shares outstanding; Mines Dev. Co. of Nev. owns 60,000 shares.**Property:** 25 claims, 500 acres, about 18 miles S. of Volney. Ore occurs in a quartz vein in limestone, 1 to 25' wide, with N. S. course, and dip 35° W. Pay-ore occurs in shoots 100' long, said to average \$7.75 in gold. **Development:** by 300' shaft, reported to prove ore reserves of 25,000 tons.

Idle since 1917. Management plans resumption of operations as soon as normal working conditions prevail.

BULLION CONSOLIDATED MINES CO.**NEVADA****Address:** Goldfield, Nevada.**Property:** in Lida (Tule Canyon) district, Esmeralda county, produced some lead-silver ore in 1919-20. Equipped with a concentrating plant, using Herman ball mill.**BULLION DIVIDE MINING CO.****NEVADA****Office:** Tonopah, Nev. Harry Price, res. agt.**Officers:** W. F. Reading, pres.; S. A. Kimmel, v. p.; G. M. Reading, sec.-treas., with G. A. Bartlett, J. P. Bell, Roger Dougherty, directors.**Inc.** March, 1919, in Nevada. **Cap.** 1,500,000 shares; 10c par. Listed on Boston Curb.**Property:** Wonder group, 4 claims, 70 acres. Surface exposure of fissure veins reported to be well mineralized. A prospect of no especial merit.**BULLION GOLD & SILVER MINING CO.****NEVADA****Office:** 265 Russ Bldg., San Francisco, Calif.. **Mine address:** T. F. McCormick, supt., Virginia City, Nev.**Officers:** H. L. Slosson, Jr. pres.-mgr.; H. Zadig, v. p.; with W. H. Moise and J. B. Shaw, directors. Chas. D. Olney, sec.**Inc.** Nov. 1904, in Calif. **Cap.** \$100,000; par \$1; all outstanding; assessable.**Property:** on the Comstock lode, patented, at Virginia City, Storey county, between the Exchequer and Potosi, covers 944' on the strike of the

lode below the Sutro tunnel level. Developed by 2,300' shaft. The ground above the Sutro tunnel was transferred by deed in 1920 to the upper Comstock Mng. Co.

Company is a non-producer and property has been merged with others on the lode into **Middle Mines Ass'n**, which see.

BULLION MINING CO.

NEVADA

Address: Jean, Nev. **Gen. office:** 61 S. Main St., Salt Lake City, Utah.

Officers: F. L. Copening, pres.; R. P. Morris, v. p.; A. O. Jacobson, mgr., with H. W. Pingree and Willard Scowcroft, directors. M. C. Morris, sec.

Stock assessable. Four 1-cent assessments levied in 1918.

Property: at Goodsprings, Clark county, 8 miles from rail.

Ore: occurs in ledges between white and blue lime on bedding plane, carrying lead and zinc, and about 10 oz. silver to the ton.

The mill was closed down September, 1917. Late in 1919 there was a change of control, and operations up to June, 1920 had produced 5 cars of ore from a 4' vein; cars netted \$400 to \$1,250 each.

BULLSHED MINING & SMELTING CO.

NEVADA

Address: 221 I. O. O. F. Bldg., Reno, Nev., or P. O. Box 67, Wells, Nev.

Officers: and directors: C. E. Mack, pres.; Mrs. M. M. Johnson, v. p. & treas.; L. E. Johnson, sec.; Herman Davis, mgr., Clover City, Nev.

Inc. Nov. 29, 1918, in Nevada. Cap. \$10,000; 1c par; assessable; 613,675 issued.

Property: the Bullshead mines, 10 claims, 4 patented, in Spruce Mtn. district, Elko county, 16 miles from W. P. Ry., said to show lead-silver ore in fissure vein in carboniferous limestone cut by igneous rocks. Ores assay 4.8% lead and 28.4 oz. silver. Waste dump samples average 3.1% lead, 15.5 oz. silver per ton.

Development: by 1,900' Scorpion tunnel No. 2 and 4,200' of workings. Reserves were estimated Oct., 1919, at 10,000 tons, worth \$600,000. Development continued until late in 1920, and was resumed in May, 1921. A new tunnel is said to have opened an orebody 2 to 8' wide, assaying 22 oz. silver and 59% lead. Lessees are also operating.

Equipment: complete; a 50-ton smelter was blown-in, Nov., 1919, using fuel consisting of 60% mountain mahogany and 40% coke, but closed down for the winter after making test run. Appears to be a meritorious promotion according to report of Herman Davis.

BULLWHACKER CONSOLIDATED MINES CO.

NEVADA

Address: W. A. Barnes, Eureka, Nev.

Officers: W. A. Barnes, pres.; B. F. Shepherd, v. p.; J. B. Cottle, sec. & treas.; with E. S. McCurdy and Frank Romain, directors.

Inc. 1919, in Nevada. Cap. \$600,000; \$1 par; 35,000 shares issued. Stock listed on San Francisco Stock Exchange.

Property: 111 acres on Adams hill, Eureka district, Eureka county, under same general management as the Eureka Holly which it adjoins on the west. Includes the Bullwhacker and Silver West claims (patented) which, located 1869, produced \$500,000 above the 300' level. Ore is silver-lead in limestone and only high grade was formerly exploited. Stope fills are said to average \$38; there is said to be 35,000 tons of \$20 ore also available.

Development: preparations being made to attack orebody through the Eureka Holly shaft at its 430' level; this will undercut Bullwhacker workings by 100'.

Equipment: complete surface plant; power and air obtained from Eureka Holly; ores to receive treatment in Eureka Holly mill, completed in 1921.

BURLINGTON-NEVADA COPPER CO.

NEVADA

Idle. Property at Mason Pass, a few miles from Yerington, is developed by a 100' shaft, from which ore was shipped to the Mason Valley smelter.

BUTLER DIVIDE MINING CO.**NEVADA****Office:** Tonopah, Nev. C. L. Lisle, res. agt.**Officers:** A. I. D Arcy, pres.; J. K. Turner, v. p.; Ben Gill, sec.-treas., with L. L. Dellinger and Anthony Ellfner, directors.**Inc.** April, 1919, in Nevada. **Cap.** \$15,000; shares, 1c par.**Property:** the Woodbutcher claims, 40 acres, between the Rosetta and Operator mines. Reported to show a number of quartz "blow-outs" on the ground, and that the rhyolite-breccia, the ore-bearing formation, will be reached at shallow depth. A prospect.

In April 1921, company took over the Aureola group of 5 claims in Silver Star district, Mineral county, 5 miles S. E. of Sodaville. There are several parallel veins carrying silver-lead ore, one of which was opened by drift tunnel, 200' long at last report.

BUTTE DIVIDE MINING CO.**NEVADA****Office:** Tonopah, Nev.**Officers:** W. F. Reading, pres.; S. A. Kimmel, v. p.; G. M. Reading, sec.-treas. and supt., with F. G. Corde and F. R. Lewis, directors.**Inc.** April 24, 1919, in Nevada. **Cap.** 1,500,000 shares; 10c. par. Listed on San Francisco Stock Exchange.**Property:** 2 fractional claims, between the Belcher Divide and Revert. **Development:** a shaft 150' deep in August, 1919, cut 5' of \$25,00 ore. Vein has a N. W.-S. E. strike.

A prospect, idle, 1919-1920.

BUTTE & ELY COPPER CO.**NEVADA****General office:** 1604 Alworth Bldg., Duluth, Minn. **Principal office:** 14 West Granite St., Butte, Mont. Mine P. O.: Kimberly, White Pine county, Nev.**Officers:** Jos. B. Cotton, pres.; John D. Pope, v. p.; John W. Neukom, sec. and ass't. treas.; E. R. Grochau, treas.; H. A. Holp, asst. sec.; also directors.**Inc.** July 27, 1905, in Montana. **Cap.** \$500,000; shares \$1 par; stock was made assessable, 1907. Is a subsidiary of the Consolidated Coppermines Co., which owns 422,625 shares. On December 31, 1920, had \$13,640 in cash and \$275,500 in Liberty bonds and notes receivable. Net income for 1920 was \$4,310. Stock is listed on the Butte Mining Exchange. Annual meeting, first Monday in June.**Property:** 12 claims, patented, 210 acres, in the Robinson district adjoining the Nevada Consolidated, White Pine county, includes a valuable water right, 20 miles distant, said to be capable of supplying 2,000,000 gal. daily; also 80 acres irrigable land near water rights.**Development:** 3 shafts, 1 with steam hoist, 310' deep, showing disseminated ore. Mining was suspended late in 1907, but churn-drilling was carried on in succeeding years intermittently, developing several bodies of low-grade disseminated ore, said to show an average of 1½% copper.

In 1916 the Nevada Consolidated Copper Co. mined for account of Butte & Ely 2,218 tons of ore from the Liberty Bell and Westphalia claims. This ore assayed 1,375% copper and yielded 39,777 pounds of electrolytic copper. As the Liberty Pit is extended westward, the above and several other Butte & Ely claims will be stripped and mined on the same terms as apply to mining of Cons. Coppermines Co. ore under its contract with the Nevada company.

BUTTE & YERINGTON COPPER CO.**NEVADA****Office:** care W. E. Wright, sec.-treas., 410 Phoenix Bldg., Butte, Mont. Mine at Yerington, Lyon county, Nev.**Officers:** at last accounts, were W. C. Siderfin, pres.; preceding with Dr. Thos. B. Moore, Dr. Donald Campbell, John D. Pope, and Wm. Mitchell, directors; L. W. Trankle, supt.**Inc.** Jan. 29, 1907, in Montana. **Cap.** \$1,000,000; shares \$1 par; fully paid; issued, \$351,520. Annual meeting, third Wednesday in January.

Property: 2 groups of patented claims, one of 14 claims, about 4 miles east of and across the valley from Yerington and south of the Copper Mountain mine. The land has attractive surface showings, but is without deep development work.

The second group of 9 claims, is in the heart of the camp adjoining the Mason Valley mine and the Yerington Malachite Co's ground. This property is well located and has attractive showings of ore in the tunnels and on the surface outcrops. It has been idle since 1914.

CACTUS CONSOLIDATED SILVER MINES CO. NEVADA

Address: J. P. Kendall, Goldfield, Nev.

Inc. Dec., 1919.

Property: the Cactus View claims adjoining the Cactus Nevada on the N. W. corner. Surface exposures are said to show ore assaying from \$10 to \$900 per ton.

CACTUS LEONA SILVER CORP'N NEVADA

Address: Goldfield, Nev.

Officers: Wm. Koenig, pres.; Chas. J. U. Koenig, v. p.; both of San Francisco. Wm. Koenig is also a director of the Cactus Nevada S. M. Co.; and the superintendency of the two companies is the same.

Property: 5 claims in Cactus Springs district. Nye county, 24 miles E. of Goldfield, and adjoining the Cactus Nevada group on S. E. Main vein is said to be 50' wide at outcrop, and to return values of 20 to 60 oz. silver and \$1 to \$10 in gold.

Development: by a retimbered, old 200' incline. The company began operations, summer of 1920, with working fund of \$50,000.

CACTUS NEVADA SILVER MINES CO. NEVADA

Address: Jos. F. Nenzel, 702 Mutual Bk. Bldg., San Francisco.

Officers: Jos. F. Nenzel, pres.; E. O. Lindblom, v. p.; with J. A. Mackenzie, W. R. Dickinson and William Koenig, directors. W. T. Beane, sec.; John R. Magill, gen. supt.; Sol. Camp, mine supt.

Inc. 1919. Cap. \$1,500,000. Transfer agt., Security Transfer & Registrar Co., New York.

On June 4, 1920 assets were: mining property, \$750,000; equipment, \$15,635; construction and development, \$51,120; stock discount, \$2,715; and cash, \$1,776. Liabilities: capital stock, and accounts payable, \$373.

Property: Bailey group of 7 claims, discovered in 1904, in Cactus Springs district, Nye county, 24 miles E. of Goldfield and 29 miles S. E. of Tonopah. According to J. M. Schumann, ore occurs in fissures and fault planes in andesite, and consists of galena, ruby silver and chalcocite in quartz. Mineralization is described as a zone 50 to 85' wide, traced for 1,400', with principal values on walls. Milling ore is said to run 12 to 15 oz. silver; some of higher grade exposed on 100' level.

Development: by 265' shaft; lateral work is not as yet extensive. Equipped with gasoline hoist.

In November, 1919, it was announced that an Eastern syndicate, headed by Joseph Fynney and Albert H. Cutter of 149 Tremont Street, Boston, had arranged to put up \$280,000 for development and equipment of the property. It was stated that sufficient work has been done to ensure a production of over \$2,000,000 in precious metals for each 100' of depth gained, which is "going some" for a prospect. In March, 1921, Fynney & Cutter were offering the stock at \$1.75 per share. Mine was apparently closed down winter of 1920-'21.

CALAVADA COPPER CO. NEVADA

Address: Suite 926, No. 111 Broadway, New York. **Mine address:** Luning, Mineral Co., Nevada.

Officers: E. B. Bronson, pres.; B. E. Page, Los Angeles, Calif., v. p.; F. C. Hart, sec.-treas.; H. A. Geisendorfer, Luning, Nev., mgr., with H. Richardson, Boston; C. J. Bender, Philadelphia; and W. D. Kent, directors.

Inc. 1913, in Delaware. **Cap.** \$2,500,000; \$5 par; 35,000 shares held in treasury. Security Transfer & Registrar Co., New York, transfer agent.

Up to March, 1919, \$364,044 had been spent on property.

Property: Copper Mountain group, 24 patented and 10 unpatented claims, 500 acres, in Sante Fe district, 8 miles E. of Luning, Mineral county, Nev., on the So. P. R. R., and the Darwin Unit, 9 patented claims, 180 acres at Darwin, Inyo county, Calif.

Geology: copper occurs as oxide and carbonate in vein, 40' to 150' wide, with sulphides at depth, in contact deposit between granite and limestone. Considerable oxidized ore has been developed between the 700' and 1,000' levels, which is sufficiently high-grade to mine and ship at a profit under normal conditions. Ten carloads from development work were shipped which ran from 6 to 10½% copper with small amounts in gold and silver.

Development: 1,000' shaft, Copper Mtn., 100' Cyclone shaft and prospect tunnels. Underground workings total 4,000'. Since February, 1915, 4,900' of work was done, including 300' of shaft sinking from the 700' down; crosscutting and drifting on the 700' and 1,000' levels, and a winze sunk 400' below the 1,000' level. No large body of commercial ore was found.

Equipment: 60 h. p. hoist, air-compressor, mine and office buildings. Plan deepening the main shaft. Temporarily closed down.

CALEDONIA SILVER MINING CO.

NEVADA

Office: 713 Mills Bldg., San Francisco, Calif.

Officers: R. L. Rader, pres.; Geo. P. Thurston, sec.

Inc. 1871 in California. **Cap.** \$300,000; par \$3.

Property: a gold-silver mine at Gold Hill, Storey county. Not operating, 1919-1920.

CALIFORNIA CRUDE OIL CO.

NEVADA

Office: 809 McIntyre Bldg., Salt Lake City.

Officers: Frank B. Scott, pres.-mgr.; Jos. J. La Bee, v. p.; H. F. Cannon, sec.; C. O. Brunner, treas.; F. H. Stewart, supt., with Hy. Lewis, Geo. F. Stickley and Frank Ramsey, directors.

Inc. in Mass. **Cap.** \$2,000,000; \$1 par; assessable: 1,800,000 treasury shares. Transfers made at company's office; L. Wegscheider, registrar.

Company is operating under a 20-years lease from late in 1920, from A. A. Bass, owner, on a 20% royalty basis.

Property: the Silver Bar mine, 12 claims in the Santa Fe district, Mineral county, 30 miles W. of Mina, and 13 miles from Belleville. Surface shows a series of monzonite dikes cutting a dolomitic limestone formation; mineralization occurs along the dikes; a 4" to 4' vein shows gold-silver, with a little copper in quartz. Ore, carrying total of 3,000 oz. of silver and 20 oz. gold, has been shipped; average per ton, 200 oz. silver and 1% copper. Production prior to 1919 said to have been \$30,000.

Development: by 400' tunnel with 135' back, and two shorter tunnels; workings total 700'. Main tunnel is to be extended to 1,000'.

CALIFORNIA DIVIDE MINING CO.

NEVADA

Address: W. V. Richardson, Tonopah, Nev.

Officers: T. L. Oddie, pres.; A. E. Kane, v. p.; W. V. Richardson, sec.-treas., with H. H. Brown and William Cochran, directors Roy Hardy, supt.

Inc. April, 1919, in Nevada. **Cap.** \$150,000, par 10c.; issued 300,000 out of 750,000 treasury stock.

Property: 100 acres south of the Toggery. Had \$30,000 cash in treasury 1920 and was well equipped for sinking to 600' level.

CALIFORNIA-NEVADA MILLING CO.

NEVADA

Address: Rawhide, Mineral Co., Nev.

Officers: W. T. Seymour, pres.; B. Mason, v. p.; Ralph E. Crabtree, sec.-treas.

Cap. \$200,000; \$1 par.

A 25 ton custom cyanide mill it is to be erected at mouth of Rawhide

canyon, 5 miles from Rawhide, 9 miles from Rand and 7 miles from Eagleville. Permission for the sale of stock has been granted by the California Corporation Commission.

CALIFORNIA & TONOPAH MINING CO. NEVADA

Reorganized as New California Tonopah Mining Co., which see.

CALUMET DIVIDE MINING CO. NEVADA

Office: Tonopah, Nev.

Officers: C. R. Evans, pres.; Frank T. Miller, v. p.; G. W. Allen, sec-treas and res. agt., with E. W. Smith and Milton Detch, directors

Inc. April, 1919, in Nevada. **Cap.** \$150,000 10c. par; 250,000 shares issued. Listed on San Francisco Stock Exchange. Last quotations, 1920, were 2c. and 1c. a share.

Property: 4 claims adjoining Gold Seam on W. and Eureka on S., 2½ miles S. E. of Gold mountain.

A part of original equipment was destroyed by fire; report of March 1921, states that mine is to be re-equipped and shaft to be sunk to 300'. See also under **Airedale Divide**.

CAMP BIRD DIVIDE MINING CO. NEVADA

Office: Goldfield, Nev. H. B. Ruhl, agt.

Officers: H. B. Ruhl, pres.; J. W. Morris, v. p.; B. E. Garnett, sec-treas., with W. E. Hill and W B Morris, directors

Inc. in Nevada. **Cap.** \$150,000; shares 10c par.

No information received as to property owned by company.

CANDELARIA MINES CO. NEVADA

Main office: 43 Exchange Place, New York. **Nevada offices:** Reno and Candelaria.

Officers: Chas. D. Kaeding, pres.-mgr.; R. C. Warriner, v. p.; with Frank M. Manson, O. W. Jones and Jos. F. Mann, directors. S. Rossiter, sec.-treas.; J. C. Peebles, asst. sec.-asst. treas., Reno, Nev.

Inc. Jan., 1918 in Nevada. **Cap.** \$3,000,000; \$1 par; issued 2,625,000 shares. Equitable Trust Co., New York, transfer agent. Stock listed on Boston Curb and traded in on New York Curb. Shares quoted at 55c high and 12c low in 1921. Annual meeting 3rd Monday in May.

Property: about 395 acres in the Candelaria district, Mineral county, on a branch of the Southern Pacific R. R., 20 miles long, connecting at Mina with the Tonopah & Goldfield R. R. The company owns outright the Lucky Hill group, Blanch claim and H. & G. millsite of 85 acres, the Lake and Doris Lode mining claims. Also owns under lease and bond the Mt. Diablo group, 115 acres, the Argentum group, including Northern Belle mine, 72 acres, and the Esmeralda Water & Milling Co., which latter supplies the camp with water from the White mountains by a pipe line, 27 miles in length. Workings total over 60 miles.

Geology: a pre-Cambrian complex, consisting of schists and various granite-porphry intrusions, ranging from quartz-diorite to true granite, is overlain by a thick series of Paleozoic beds. These rocks are extensively intruded by dikes and masses of granite porphyry. The vein system is extensive and well defined with outcrops traceable for thousands of feet on the surface, and underground workings proving continuity downward, and large size of oreshoots.

Development: the Lucky Hill mine is partly developed by a crosscut tunnel 350' long, intersecting two veins, whose width is stated to vary from 8' to 40' and by a shaft 300' deep, showing good milling ore to a depth of 60' below the tunnel level, at which point vein dips out of shaft. Clean-up shipments made in 1919.

The Argentum mine has been developed to a depth of 1,460' and from 1878 to 1893 is said to have produced 300,000 tons of \$50 silver ore from a continuous ore shoot. The Mt. Diablo is developed to a depth of 1,000'. **Ore:** the principal value is in silver, occurring as chlorides and bromides with about \$1 gold per ton. Recent developments on the 200' level, on the

Baldwin vein, at the Lucky Hill mine have opened a shoot of shipping ore 4' to 11' wide and 100' long. The Argentum tunnel No. 11 will be the main haulage way.

Reserves: after two years' development, are estimated to be 610,000 tons, Jan. 1, 1922, of which 342,000 is broken ore in fills and dumps, averaging 9.7 oz. silver. The remainder, 268,000 tons, are in place above the 200' level and average 14 oz. silver, plus \$1 gold.

Equipment: Lucky Hill mine is equipped with compressor plant, machine-drills, motor-trucks and 40-stamp mill. Machinery is to be electrified throughout, power being obtained from public service at Mina.

Production: prior to August, 1918, the Argentum and Diablo are estimated to have produced 445,000 tons of high grade ore, and the Lucky Hill, 9,000 tons shipping ore.

In spring of 1921, mines were thoroughly sampled and reserves estimated. In November, arrangement was made with the Rochester Silver Corporation by which funds up to \$200,000 would be advanced for erection of a 300-ton cyanide plant against mortgage notes authorized by Candelaria shareholders. Machinery from Rochester Combined Co. mill will be used, and mill is to be ready to start, June 1, 1922.

CAPITAL DIVIDE MINING CO.

NEVADA

Mail returned from former address: Tonopah, Nev.

Officers: W. J. Tobin, pres.; J. K. Turner, v. p. and cons. eng.; H. J. Coogan, sec.-treas., with P. C. Fisher and J. B. Kendall, directors.

Inc. May, 1919, in Nevada. **Cap.** 1,500,000 shares; 10c par, assessable.

Property: Oplunse group, 3 claims and 2 fractions, bounded by the Policeman on N. W. and Romance on S. Is an undeveloped prospect of merit.

CARRARA MINING, MILLING & LEASING SYNDICATE NEVADA

Dead. Fully described in Vol. XIII.

CARRIE SILVER-LEAD MINES CORPORATION

NEVADA

Address: C. R. Murdoch, First National Bank Bldg., Tonopah, Nev.

Officers: W. W. Travis, pres.; L. A. Rose, v. p.; C. R. Murdoch, sec.-cons. eng.

Inc. in Nevada. **Cap.** \$100,000; 10c par; 500,000 shares issued. Listed on Salt Lake and San Francisco exchanges, and New York Curb.

Property: 5 claims, 10 miles N. W. of Millers and 8 miles from the T. & G. railway. Mine is an old one (1897). A 230' incline, with 3 levels, has opened 2 ore shoots in a granite-lime contact vein; the sulphide zone has not been reached. Assays returned up to 293 oz. silver, 16% lead, 10% copper and \$8 gold.

Equipment: 40-h. p. engine, hoist, compressor, etc.

An advertising campaign to sell stock, at 4 to 7c. per share, was underway in April, 1921.

CARSON FREE GOLD MINING & MILLING CO.

NEVADA

Address: E. E. Roberts, Carson, Nev.

Officers: E. E. Roberts, pres.; B. A. Boucher, v. p.; E. M. Perry, sec.; with Theo. Peterson and R. G. Affleck, directors.

Property: the Lucky Strike gold claims in Muldoon canyon, 1½ miles W. of Carson, Ormsby county. An 80' shaft has shown 18" of rich ore.

CASH BOY CONSOLIDATED MINING CO.

NEVADA

Office: Nixon Bldg., Reno, Nev. **Mine office:** Tonopah, Nev.

Officers: J. H. Goldman, pres.; G. B. Thatcher, v. p.; E. H. Mead, sec.-treas., with E. M. Hall, directors. F. H. Norcross, res. agent; Ben Richardson, supt.

Inc. March 21, 1914, in Nevada. **Cap.** \$2,000,000; \$1 par; all outstanding assessable; assessments 16 and 17, of 1c. per share each, were levied April 15 and August 15, 1921. Stock sold 10¢ high, 3¢ low in 1921. Listed on San Francisco Exchange. Annual meeting, November, 21.

Company is a reorganization of the Tonopah Cash Boy Cons. Mng. Co.

which suspended operations in 1914 with debts of \$3,476, and 76,870 shares in the treasury.

Property: several fractions, patented, 30 acres, at Tonopah, Nye county, adjoins the Tonopah Merger on the W., Tonopah Victor on the S., and Tonopah, Extension on the N. **Ore:** gold-silver occurs in veins in rhyolite.

Development: by 1,646' vertical shaft, with most of the recent work on the 1,527' level, where crosscutting and drifts to the S. disclosed 4 distinct veins carrying ore of commercial grade reported to show higher value with depth. A total of 1,976' of underground work was done from March to November, 1918. In 1920, there were 5 faces in ore on the 1,537' and 1,646' levels. The 1,527' level showed 30 to 36" of \$68 to \$89 ore, and the 1,646' had 1½' of \$33 ore.

Equipment: includes 75-h. p. electric hoist and 3-drill air-compressor.

Production: in 1915, 150 tons, assaying \$15 per ton; from March, 1916, to November, 1918, 1,740 dry tons were shipped having a net assay value of \$13.41 per ton. Shipping 50 tons weekly in 1920, said to have a gross value of \$25 to \$30 per ton.

In March, 1921, suit was filed by the company against Tonopah Extension Mining Co., alleging trespass, and involving the extralateral rights to a "valuable orebody." In December, Tonopah Ex. purchased Cash Boy holdings, paying 100,000 of its shares for 2,000,000 Cash Boy shares. Reported that Cash Boy will not dissolve.

Property is a promising prospect.

CENTENNIAL DEVELOPMENT CO.

NEVADA

Ely, White Pine Co., Nev. Probably dead. See Vol XII.

CENTRAL DIVIDE MINING CO.

NEVADA

Dead. Described in Vol. XIV.

CHALLENGE CONS. MINING CO.

NEVADA

Address: 342 Mills Bldg., San Francisco, Calif.

Officers: Jas. Newlands, Jr., pres.; W. G. Morrow, sec.

Inc. November, 1873. **Cap.** \$50,000; par \$2; 25,000 shares issued. Annual meeting in November.

Property: at Gold Hill, Storey county.

CHAMP D'OR GOLD MINING CO.

NEVADA

A French corporation which owned the Orleans mine at Hornsilver, Esmeralda county, sold in 1921 to **Orleans Hornsilver Mng. Co.** (q. v.), for a price said to be \$40,000. Since 1915, mine had been operated under lease by Orleans Mng. & Mlg. Co.

CHAMPION DIVIDE MINING CO.

NEVADA

Address: Goldfield, Nev. B. E. Garnett, agt.

Officers: F. C. Beedle, pres.; H. B. Ruhl, v. p.; B. E. Garnett, sec.-treas.; with Albert Minnis and F. B. Grube, directors.

Inc. in Nevada. **Cap.** \$150,000; shares, 10c par.

Property: 6 claims adjoin the Liberty, Marne and Pershing groups. A prospect with several shear zones on the claims.

CHARIOT DIVIDE MINING CO.

NEVADA

Office: Tonopah, Nev.

Officers: Wm. Watters, pres.; Zeb. Kendall, v. p.; R. A. Rives, sec.-treas., with A. E. Kane and C. T. Stevens, directors.

Inc. March 18, 1919, in Nevada. **Cap.** 1,500,000 shares 10c par, assessable. Listed on San Francisco Stock Exchange. Sales 2c high 1c low, 1921.

Property: 6 claims, adjoining the Ben Hur on N. E., about 2 miles S. E. of Gold mountain. **Equipment:** hoist compressor, etc. A prospect.

CHARLESTON HILL GOLD MINING CO.

NEVADA

Address: J. P. Clough, National, Nev.

Property: of this company was operated under lease by the Charleston Hill National Mng. Co. in 1914, and under bond and lease in 1917, by the National Leasing Co. (q. v.) a George. Graham Rice promotion, which came

to grief in 1918. In October, 1919, a shipment of 5 tons sent to Selby, averaged \$993.30 per ton. On dumps were 130 tons of \$70 ore.

Reported June, 1921, to have been leased to H. Warren, of Winnemucca, Nev.

CHARLESTON MINING CO.

NEVADA

Address: Goodsprings, Nev.

Inc. August, 1917. One-half of the issued stock is owned by the Yellow Pine Mining Co.

Property: 9 claims, 36 miles from Las Vegas, said to show a 3' vein of lead-zinc ore. Developed by shallow shafts, and worked under lease by Jas. McCoy on a 20% royalty basis, 1918-19.

CHARTER DIVIDE MINING CO.

NEVADA

Address: Tonopah, Nev.

Inc. 1919, in Nevada. Cap. \$150,000, 10c par.

Property: a group of claims, reported by Elftman to show usual surface conditions and to be on direct extension of several veins.

CHEROKEE CONSOLIDATED COPPER CO.

NEVADA

Mail returned from former Salt Lake City address.

Officers: D. W. Jeffs, pres.; W. P. Silver, v. p.; R. T. Thurber, sec-treas., with M. E. King and R. A. Brown, directors, all of Salt Lake City.

Inc. July, 1917.

Property: 4 patented claims and a millsite in Lincoln county, 30 miles S. of Caliente and 6 miles E. of Leight Station on the Salt Lake Route, developed by three shafts, 150, 90 and 250' in depth.

CHERRY CREEK SILVER MINING CO.

NEVADA

Office: 611 Deseret Bk. Bldg., Salt Lake City, Utah. J. H. Moyle, pres. Henry D. Moyle, sec.; O. W. Moyle, treas.; J. W. Walker, mgr., Cherry Creek, Nev. Assessment $\frac{1}{4}$ ¢ per share levied Dec. 1921.

Property: Mary Ann silver mine at Cherry Creek, White Pine county. The mine contains irregular orebodies in fissures in monzonite, with reported ore values of 35 to 100 oz. silver per ton. Developed by 777' tunnel and winzes. Equipped with 35 h. p. gas engine, compressor, etc. Mine was a small producer in 1918 and 1919.

Lease of mine by the Exploration Syndicate No. 2, begun in 1919, has terminated.

CHICAGO-NEVADA TUNGSTEN CO.

NEVADA

Address: care H. M. Byllesby & Co., 208 Lasalle St., Chicago, Ill.

Property: the Ragged Top and Besson group, 11 miles from Toulon, Pershing county, a station on the S. P. R. R., shows tungsten deposits.

Production: 550 tons in May and June, 1916. No recent information.

CHOLLAR GOLD & SILVER MINING CO.

NEVADA

Address: 365 Bush St., San Francisco, Calif.

Officers: Herman Zadig, pres.; A. K. Durbrow, sec.

Inc. Nov., 1904 in California. Cap. \$112,000; \$1 par. Stock listed on New York Curb, but inactive. Annual meeting in January. On San Francisco exchange, sales were 10c. high and 3c. low in 1921.

Property: on the Comstock Lode, Virginia City, Storey county, adjoining Potosi on the N. and Hale & Norcross on the S. Has 700' on the strike of the lode and is developed by an 1,800' shaft. The Chollar and Potosi together are reputed to have produced \$13,985,000 in early days.

Comstock Leasing Co. (q. v.) has purchased for cash the right to operate the Chollar property to a depth of 1,000' for 30 years; this grant includes same arrangement with the Potosi G. & S. M. Co.

The Chollar company which will operate through the Sutro tunnel, was producing in 1919. In 1921, joined other companies in forming the Middle Mines Association, which see.

CHRISTMAS CONS. MINES CO.

NEVADA

Address: Goodsprings, Nev.

Officers: Joseph Doran, pres. and mgr.; Geo. A. Steiner, v. p.-treas.; with Eugene Bernheimer, Arthur P. Wallace and F. M. Steiner, directors.

Property: apparently includes 4 claim groups, Old Christmas, New Christmas, Lead-Vanadate and Mountain Queen, in the Yellow Pine district, Clark county, 9 miles from Jean. The Old Christmas mine is said to have been a producer of silver-lead-zinc ore in former years, but the present interest of the company seems to be in lead vanadate ores found as replacements in limestones. Examined by Hy. M. Adkinson. A prospect.

CHURCHILL MILLING CO.**NEVADA**

Dissolved October, 1917. Plant taken over by Nevada Wonder Mining Co.

CLARKE DIVIDE MINING CO.**NEVADA**

Dead. Described in Vol. XIV.

CLIFFORD SILVER MINES CO.**NEVADA**

Address: Tonopah, Nev.

Property: the Clifford estate reported in January, 1921, to have been purchased by Howard A. Broughton acting for others. Consists of 14 claims, located in 1905, in Bellehelen district, Nye county, 40 miles E. of Tonopah; the BelleHelen Merger mines are about 5 miles south. Said to have produced "upwards of half a million dollars" of silver-gold ore. Property is opened by two 200' shafts and there is a small mill; was producing in 1919. New management is said to contemplate modern surface equipment, to be followed later by the erection of a new mill.

CLINTON DIVIDE MINING CO.**NEVADA**

Mail returned from former address: Tonopah, Nev.

Officers: C. W. Slack, pres.; F. H. Norcross, v. p.; I. Havens, sec.; Edward Strauss, treas., with F. S. Strauss, C. A. Clinton, J. P. Stinson and G. A. Bartlett, directors.

Inc. 1919, in Nevada. **Cap.** \$150,000; shares, 10c. par.

Property: Rex group, 5 claims, 2 miles northwest of Gold mountain, and north of the Sioux Divide,

COALITION DIVIDE MINES & DEVELOPMENT CO.**NEVADA**

Mail returned from former office; J. G. Brown, agt., Tonopah, Nev.

Officers: G. W. Warmoth, pres.; R. I. Pierson, v. p.; Robert McSherry, sec.-treas., with G. D. Olson, J. W. Kraner, E. J. Hoak and J. E. Post, directors.

Inc. in Nevada. **Cap.** \$150,000; shares 10c. par.

Property: 6 claims, near Tonopah; also an old mine, 2 claims in Sante Fe district, near Luning, Mineral county.

C. O. D. CONSOLIDATED MINING CO.**NEVADA**

Organized in 1908 as merger of Goldfield C. O. D. and Gold Bar Mng. companies; Goldfield Cons. owned a 25% interest.

By action of the shareholders, July 15, 1920, this company, together with others, combined its interests with that of the Goldfield Deep Mines Co., which see. The C. O. D. company is fully described in Vol. XIV.

COLORADO-NEVADA MINING & MILLING CO.**NEVADA**

Defunct. Fully described in Vol. XIII.

COLUMBIA DIVIDE MINING CO.**NEVADA**

Office: H. D. King, agt., Tonopah, Nev.

Officers: H. R. Grier, pres.; H. H. Atkinson, v. p.; H. D. King, sec.-treas., with A. I. D'Arcy and H. E. Clark, directors. R. Wilson, supt.

Inc. April, 1919, in Nevada. **Cap.** \$550,000; shares 10c. par.

Property: the Giant King group, 3 claims adjoining Western Divide on N., and Hull City on S., a mile S. W. of Gold mountain. In December, 1919 the Estaleah-Cerbat Silver M. Co.'s property in Mohave county, Arizona, was taken over. The Divide property is a prospect.

COMBINATION DIVIDE MINING CO.**NEVADA**

Office: Goldfield, Nev.

Officers: W. S. Philips, pres.; G. A. Nelson and D. Patterson, v. p.; H. W. Nelson, sec.; also directors. J. A. Patterson, supt.

Inc. 1919, in Nevada. **Cap.** 1,500,000 shares; 10c. par.

Property: 3 claims, 2 miles N. W. of Gold mountain, bounded on north and northeast by the Pyramid and Sunbeam. Developed by a shaft sunk in typical Divide breccia, with yellow jaspers quartz assaying up to \$10.20 per ton at 30' depth.

A report, September, 1920, announces that this company has acquired the Worthington group of 19 claims, in the Freiberg district, Lincoln county; six other claims are under bond and lease. A 12' vein has been opened by several shafts, one of 185'; at depth of 50', ore is reported to assay 12 oz. silver, 15% copper.

A fair prospect.

COMBINED METALS, INC.

NEVADA

Office: 516 Felt Bldg., Salt Lake City, Utah. **Mine office:** Pioche, Nev. **Officers:** E. H. Snyder, pres.-mgr.; J. C. Jensen v. p.; H. S. Wiley, sec.-treas., with W. F. Snyder and Willard Scowcroft, directors, R. T. Godbe, supt.

Inc. 1917, in Nevada. **Cap.** \$50,000; 5c par; assessable; 800,000 issued.

Property, the Panaca group of the Amalgamated Pioche Mines & Sm. Corp. (q. v.), 6 claims, 110 acres, at Pioche, Lincoln county, held under lease. **Ore:** occurs in veins and as a bedded deposit in limestone, averaging 27x90x525'.

Development: by about 4,000' of drifts, crosscuts and raises. Reserves are estimated at 250,000 tons of refractory ore, assaying 0.04 oz. gold, 8.2 oz. silver, 8% lead, 18% zinc, 14.0% iron. This ore cannot be profitably marketed at smelters, and the management contemplates erecting its own plant.

Equipment: includes 200-h. p. steam hoist, 700 cu. ft. compressor.

Production: to Jan. 1, 1922, about \$63,000.

COMMERCIAL MINES AND MILLING CO.

NEVADA

Address: M. T. Kane, Manhattan, Nye county, Nev. Operates under lease the Stray Dog, Indian Camp, Crescent and Riley fractions, also the Eagle mill of 20 stamps and a pebble mill.

COMO CONSOLIDATED MINES CO.

NEVADA

Address: Como, via Dayton, Nev.

Officers: S. F. Taylor, pres.; Gurney Gordon, v. p.-mgr.; W. R. Grant, sec.; J. W. Davey, asst. sec.-treas., with H. G. Humphrey, directors.

Inc. October, 1916 in Nevada. **Cap.** \$1,500,000; \$1 par; issued 1,000,000 Listed on San Francisco Exchange. U. S. Corp. Co., transfer agents and registrar. Annual meeting, October 1. At a special meeting of stockholders held on April 19, 1920, an issuance of 35,000 share 8% preferred stock, at \$10 per share, was authorized, proceeds to be used for purchase of additional property.

254,000 shares were sold at auction in New York, Jan. 12, 1922, for \$21 the lot.

Property: 440 acres at Como in the Silver City, Palmyra district of Lyon county, 12 miles S. E. of Dayton.

Geology: ore is mixed oxide and sulphide, carrying gold and silver, in quartz veins in andesite. Two ore shoots of fair size have been uncovered on the property. The sulphide zone was reached at 300'. Gold and silver are present in equal values; copper and zinc also appear in varying amounts.

Development: by inclined and vertical shafts to a depth of 350'; also a 4,000' tunnel (Boyle), which when extended 600', will give total back of 500 to 700'. In fall of 1920, the management reported reserves of 200,000 tons of \$10 to \$12 ore.

Equipment: complete for mining, and a 100-ton cyanide mill employing crusher, 10-stamp ball-mill, agitators, Oliver filter, etc. A good recovery is made at a cost of \$2 per ton.

Production: reported that bullion shipments of \$25,000 to \$30,000 monthly were made for a few months, summer of 1920.

Operations were suspended indefinitely on September 15, 1920, because of high cost of production.

COMO GROUP MINING CO.**NEVADA**

Address: 20 Fordonia Bldg., Reno, Nev.

Officers: C. P. Ferrel, pres.; W. S. Schuyler, v. p.; W. G. Edwards, sec.-treas., with J. H. Rae, and J. H. Rae, Jr., directors.

Inc. 1919, in Nevada. **Cap.** \$150,000; 10c par.

Property: 6 claims, 120 acres, four adjoining Como Cons. on the east in Lyon county. A strong vein traverses three of the claims for 4,500' and a large quantity of ore is said to be opened.

COMSTOCK DIVIDE MINING CO.**NEVADA**

Address: Tonopah, Nev.

Officers: W. J. Douglass, pres.; W. H. Simmons, v. p.; E. Gregory, sec.-treas., with Jas. Boyd and Wm. Watters, directors.

Inc. April, 1919, in Nevada. **Cap.** \$150,000; par 10c.

Property: the Jim claim and 2 fractions adjoining Wild Horse group, Mizpah, and Rand Divide, a mile N. E. of Gold mountain.

COMSTOCK ELDERADO MINING & MILLING CO.**NEVADA**

Address: Ed. Manning, Reno, Nev.

Officers: C. P. McColm, pres.; J. H. Gray, v. p.; C. C. Bridgeman, sec.-treas., with R. M. Preston and J. Parker Lewis, directors. Carl Stoddard, gen. mgr.

Inc. in Nevada. **Cap.** \$150,000; par 10c.

Property: a lease and bond on the Flora Temple mine in Comstock district, Storey county, adjoining Comstock Silver on the south. Company has also taken over the Rain and Dixen lease and option on the Lager Beer mine, comprising the German, Bell Hill and Sebastopol patented claims, and covering several hundred feet of the Succor vein. Work was begun on the 150' level of the 700' Lager Beer incline which has opened an orebody, 8 to 14' wide, assaying \$8.01 in gold per ton; 7,500 tons are said to be available. This mine is accessible also through the Cook and Gray tunnel, intersecting incline on the 400' level. Flora Temple has not been developed below the 200' level.

Equipment: electric hoist. A 10-stamp mill is contemplated.

The Lager Beer section was taken over under joint agreement with Spearhead G. Mng. Co., by which latter acquires property a few hundred feet to the east.

COMSTOCK EXPLORATION CO.**NEVADA**

Office: 516 Sutter St., San Francisco.

Officers: Dr. R. N. Murphy, pres.; R. J. Kilby, sec.; J. I. Keating, supt.-res. agt.

Inc. April 14, 1920, in Nevada. **Cap.** \$150,000; par 10c.

The property consists of 6 claims at Virginia City, Storey county, and adjoins the Hale & Norcross on the west.

Reported, October, 1921, that suit had been brought vs. Comstock Leasing Co. with claim of extralateral rights.

COMSTOCK EXTENSION MINING CO.**NEVADA**

Address: F. J. De Longchamps, Reno, Nev.

Officers: A. F. Eske, pres.; E. L. Drappo, v. p.; F. J. DeLongchamps, sec.-treas., with H. W. Noble and Angelo Scanavino, directors.

Inc. January, 1921, in Nevada. **Cap.** 1,500,000 shares of which one-half is in treasury. Annual meeting in February.

Property: 12 claims at head of Sullivan canyon, 12 miles S. of Virginia City, shows 2 fissures in andesite, one carrying principally gold, the other silver. Developed by two shafts and tunnel. Lessees were operating late in 1921

COMSTOCK FLORIDA MINES CO.**NEVADA****Address:** G. S. Cjack, gen. mgr. Virginia City, Nev.

Reported that this company, incorporated for \$300,000, is to reopen the Florida mine, worked originally 60 years ago, on the Comstock lode, Storey county. Mine adjoins the Hayward, and is 3 miles S. W. of the United Comstock's Imperial mine. The main vein is said to be 175' wide, and is to be attacked through old tunnels; the ore carries mainly gold, with average value of \$20 per ton. No. 2 tunnel to cut orebody 400' deep was in 170' in September, 1921.

COMSTOCK FRACTURE MINES CO.**NEVADA**

Inc. December, 1919, in Nevada, by C. A. Garrett, T. B. Gordon, Gurney Gordon, F. M. Kleppe, and O. R. Vaughn. **Cap.** \$75,000; 20c. par.

No information has been received as to property.

COMSTOCK & GOLD HILL UNITED MINES CO.**NEVADA****Address:** Virginia City, Nev.

A new 1920 incorporation, reported to have taken over 22 claims near Gold Hill, Storey county, including the Bell (Muhlbeier) group. The claims cover an andesite-diorite contact and adjoin the Crown Point and Kentucky mines; four-fifths of ore value is gold. Some shipments made in 1920, by company and lessees.

COMSTOCK LEASING CO.**NEVADA****Address:** Virginia City, Nev. H. B. Bulmer, mgr.

Property: 2 patented claims on the Comstock Lode, at Virginia City, Storey county, owned under a grant purchase from the Potosi Gold & Silver Mng. Co., and the Chollar Gold & Silver Mng. Co., covering the mineral rights for a depth of 1,000' for a term of 30 years; property then reverting to original owners. Company is defendant in a suit over extra-lateral rights brought by Comstock Exploration Co.

Ore: occurs in fissure vein with diorite foot and andesite hanging wall; veins run N. E.-S. W. and contain gold-silver ores. **Development:** by 2,000' tunnel to depth of 400'.

Equipment: includes electric hoist, 100-ton cyanide mill.

COMSTOCK MIDDLEMINES**NEVADA**

Error for Middlemines Association which see.

COMSTOCK MILWAUKEE MINING CO.**NEVADA**

Incorporated by J. H. Hutchinson, H. H. Haasher and W. E. Lyons, all of Reno, Nev., with capital of \$300,000 to take a lease on the Milwaukee mine, E. of Silver City, Lyon county, and near the Buckeye mine. The Milwaukee is opened by a 350' incline.

COMSTOCK-PHOENIX MINING CO.**NEVADA****Office:** Provo, Utah. Mine at Six Mile Canyon, Virginia, City, Nev.

Officers: O. Raymond Knight, pres.; Geo. H. Drysdale, v. p.-mgr.; with Knight Starr Jordan, J. Wm. Knight, and F. M. Manson, directors. R. E. Allen, sec.-treas.

Inc. 1909. **Cap.** \$1,000,000; \$1 par; all outstanding.

Property: 3 patented claims in the Silver Star district, 2 miles from railroad, on what is believed to be a cross fissure, about 1 mile from the Comstock lode. The main vein has a N. E.-S. W. course. Several distinct ore shoots have been encountered that vary from 1 to 8' in width, and assay up to 50 oz. silver, with some gold.

Development: by 800' shaft, tunnel and raises. One drift on the 800' level extends westward in the direction of the Comstock.

Equipment: electric hoist, compressor, tram and buildings.

Production: shipments from 1909 to 1914 amounted to \$400,000, with net returns of \$250,000. Old company paid dividends of \$102,516. Present company, which is a reorganization in January, 1917, of the old company, has not issued any reports.

Small shipments being made by the company and by lessees operating in old stopes.

Idle, 1919-20.

COMSTOCK RELIANCE CO.**NEVADA**

Address: G. S. Clack, Virginia City, or Reno, Nev., who is also interested in Comstock Florida.

Property: in the Comstock district, Storey county, shows 2 veins, 2 to 4' wide, the widest one said to be the extension of the Hayward ledge. Is developed by 150' shaft and 2 tunnels, 400' and 500' long.

COMSTOCK SILVER MINING CO.**NEVADA**

Office: 310 Reno Natl. Bank Bldg., Reno, Nev. **Mine office:** Virginia City, Nev.

Officers: Frank M. Manson, pres.-treas.; Frank W. Royer, v. p.-cons. engr., with J. W. Manson and A. B. Harlan, directors. J. C. Peebles, sec.; Geo. H. Drysdale, supt.

Inc. April 25, 1919, in Nevada. **Cap.** \$150,000; 10c par; about 500,000 treasury shares; assessable. Transfers made by company at Reno. Stock listed on San Francisco Stock Exchange. Total expenditures to June, 1921, about \$25,000.

Property: 11 claims and fractions, largely patented, S. E. of Gold Hill, Storey county, includes the Overland, Scheels and Underground-Cosmopolitan-Jumper groups, owned or controlled, and embraces the Occidental (Brunswick), Underground and Succor lodes, cutting hornblende-andesite. The ore is quartz carrying gold and silver in a vein, width of 4' and up; the average assay value of milling ore is \$9. In earlier days, these groups have produced about \$1,750,000 in bullion from a comparatively shallow depth.

Development: in addition to old workings including the 550' Overland shaft, present management has sunk a 370' incline on the Cosmopolitan, with total workings of 1,000' to June, 1921. The Scheels group also is under development.

Equipment: includes electric hoists, and on the Overland, a 10-stamp mill, assay office and other buildings.

COMSTOCK SUPERIOR MNG. CO.**NEVADA**

Address: 446 Gazette Bldg., Reno, Nev.

Officers and directors: G. S. Clack, pres.-mgr.; LeRoy Keene, v. p.; O. U. Pryce, sec.-treas.

Inc. June 12, 1919. **Cap.** \$200,000; 10c par; assessable; 200,000 issued. Annual meeting, July 1.

Property: 6 claims, 110 acres, 7 miles S. W. of Virginia City, Storey county, said to show a contact deposit between granite and limestone schist, averaging \$5 gold, 2% copper, and 50 oz. silver. Property adjoins the Southwest Comstock Extension on S. W.

Development: by tunnel and shaft; total workings less than 500'.

Equipment: electric power, 75-h. p. compressor, etc.

COMSTOCK TUNNEL CO.**NEVADA**

Address: Franklin Leonard, Jr., 25 Broad St., New York.

On Sept. 23, 1919, the Protective committee announced that if 80% of the bonds were deposited with the Security Transfer & Registrar Co. of 66 Broadway, New York, as trustee, the mortgage would be extended for 10 years, and bonds stamped accordingly. This would avoid selling the property under terms of the mortgage, but on Nov. 12, the property covered by the mortgage was sold at public auction on behalf of the bondholders' protective committee, consisting of Franklin Leonard, G. B. Burbank, S. F. Gascoigne, L. N. Clark, and D. C. Catlin. On Nov. 26, it was proposed to reorganize as the Comstock Tunnel & Drainage Co.

COMSTOCK TUNNEL & DRAINAGE CO.**NEVADA**

A reorganization of the Comstock Tunnel Co. No information available. See Vol. XIV.

CONFIDENCE DIVIDE MINING CO.**NEVADA**

Mail returned from Tonopah, Nev.

Inc. 1919, in Nevada. **Cap.** \$150,000; par 10c.

Property: a tract of undeveloped ground, 2 claims, adjoining the

Sutherland on south, and capped by wash. A raw prospect, but well located.
CONGRESS COPPER CO. NEVADA

Address: Rumball & Co., 50 Congress St., Boston, Mass. Purchased the Electrolytic and Neversweat mines at Luning, Esmeralda county, in 1917. Both properties are developed and have produced shipping ore. Neversweat mines described in Vol. XIII. Assessment work only done in 1920.

CONGRESS DIVIDE MINING CO. NEVADA

Office: Tonopah, Nev.

Officers: C. A. Gray, pres.; G. A. Barlett, v. p.; H. J. Bartlett, sec-treas., with Zeb Kendall and Roger Dougherty, directors.

Inc. March, 1919, in Nevada. **Cap.** 1,500,000 shares; 10c par. Transfer office, 419 Crocker Bldg., San Francisco, Cal.

Property: 3 claims, north of Calumet and west of Albany and Bulion. Examined by A. H. Elftman. Developed by shaft and levels at 100' and 150'

CONQUEROR CONS. MINING CO. NEVADA

Office: Goldfield, Nev.

Directors: John P. Sweeney, P. J. Somers, Jr., and others.

Property: in northern part of Goldfield district, Esmeralda county, covering a portion of the Columbia Mtn. fault, opened by shafts. First discovered in 1906, and operated 1914-15; inactive for years. Late in 1920, judgment for \$5,411 was secured vs. company by J. P. Sweeney, and re-organization reported underway in May, 1921.

CONSOLIDATED CALIFORNIA-NEVADA MINING CO. NEVADA

Presumably dead.

Inc. 1915, to take over the Day Bristol properties, bought in by bondholders' committee at sheriff's sale in 1915. In Feb., 1916, owing to inability to ship ore already mined and to secure funds from sale thereof, mines closed down and company went into receivers hands, and property taken over by Uvada Copper Co. See Bristol Silver Mines Co., for recent history.

CONSOLIDATED COPPERMINES CO. NEVADA

Office: 120 Broadway, New York. **Mine office:** Kimberly, White Pine county, Nevada.

Officers: Joseph B. Cotton, pres. and gen. counsel; Thomas A. Merritt, v. p.; Robert Linton, v. p.-mgr. dir.; Fred R. Kennedy, sec.; Ernest R. Grochau, treas.; Samuel Brenner, asst. sec.-asst. treas.; E. P. Mathewson, cons. engr.; H. S. Munroe, gen mgr.; E. A. Hewitt, supt.

Directors: (1922) Fred R. Kennedy, E. P. Mathewson, Martin Paskus, Arthur J. Selfridge; (1923) Isaac W. Bernheim, Samuel Brenner, Isidore Hershheim and Robert Linton; (1924) Joseph B. Cotton, Edwin F. Gray, M. A. Lorenzo, Thos. A. Merritt.

Inc. May 20, 1913, in Delaware. **Cap.** \$20,000,000, increased May 3, 1921, from \$8,000,000; \$5 par; privilege of conversion of bonds, issued or to be issued, into stock is allowed; of the old capitalization, \$4,893,875 was outstanding. Bonds authorized \$3,500,000. 1st mortgage 7% convertible, due 1928; \$2,988,600 outstanding December 31, 1919 (\$511,400 converted and retired), redeemable by lot at 110 plus accrued interest on any interest day.

Early in 1921, company undertook to refund its outstanding bonds and replenish its treasury; it authorized a 15-year \$10,000,000 bond issue at 8% and offered \$5,000,000 of these bonds to its stockholders in amounts at par equal to the stock held by each, convertible into stock after August 1. It was provided also that bonds of former issue would be exchangeable par for par for the new bonds. The subscription date was extended to June 20, but apparently company was unable to place this new issue, although stockholders were notified that \$600,000 was absolutely essential to float current indebtedness, meet bond interest and carry properties to July 1, 1922.

Guaranty Trust Co., New York, transfer agent; Bankers Trust Co., New York, registrar. Stock listed on New York Curb. Annual meeting, first Tuesday after first Monday in May.

Company was unable to meet its bond interest due Aug. 1, 1921.

Financial Statement: during the year ended December 31, 1919, copper, gold and silver sold realized \$511,950. There was an operating deficit of \$363,000, and a general company deficit of \$250,420. Combined balance-sheet of Consolidated Coppermines and Giroux Consolidated shows current assets totaling \$2,490,659, and liabilities \$1,763,930. Assets include Liberty bonds and War Savings Stamps, \$480,217; cash, \$109,707; supplies, \$227,578; accounts and notes receivable, \$123,603; metals, \$1,457,944. Notes payable were \$400,000; accounts payable, \$170,027; and advances on copper, \$1,193,904.

At end of 1920, excess of current assets was \$7,199; cash on hand was \$1,045. Receipts for the year totaled \$74,046; bond interest was \$209,202 and general expenses, \$68,124; making a deficit of \$203,280.

Company was unable to meet its bond interest due Aug. 1, 1921.

Property: including 7 claims acquired in 1919, Coppermines company owns in fee 1,151 acres of mining properties and claims, and 619 acres of unpatented lode locations, together with 2,565 acres of ranch lands having valuable water-rights, and 520 acres of other surface lands. A portion of these holdings acquired through stock exchange from the New Ely Central Copper Co. It also controls, through its stock ownership of over 99%, the Giroux Consolidated Mines Co., 2,000 acres of patented mining claims and 1,800 acres of ranch lands, which have valuable water-rights; and through its stock ownership in the Butte & Ely Copper Co., 209 acres of patented mining claims. The total area of claims, exclusive of the Mexican properties, is 3,979 acres of patented mining claims and 4,885 acres of ranch lands, beginning 2 miles west of Ely.

The Sultana mine, the Mexican property of the Giroux company, 11 claims, comprising about 459 acres of mineral lands, includes the San Jose mine, about 1 mile W. of Copete, in the Sierra de Oro, 25 miles E. of Carbo and about 35 miles from Hermosillo. Property shows a contact vein of 50 to 100' width, between limestone and porphyry, opened by 3 shafts, No. 2, the main working shaft, sunk on an incline, 1,200' deep. The San Jose mine shows, in the bottom level, a vein of about 40' width, carrying oxidized ores to shallow depth, succeeded by sulphides. The Mexican property as a whole shows low-grade copper ore with fair gold value. Total production to January, 1908, was \$542,000. Mines have not been in operation for several years, owing to unsettled political conditions in Mexico.

Geology: there are three classes of ore deposits occurring on the Nevada properties (1) chalcocite disseminated in porphyry forming concentrating ore similar to that of the Nevada Consolidated Co., lying in large continuous masses that can be mined at low cost, some by open-pit steam-shovel methods, others by underground methods; and (2) heavy sulphide ore, high in iron and higher in copper than the disseminated ore; and (3) direct smelting ore in fissure and replacement deposits in limestone at or near limestone-porphry contacts.

The porphyry ore is very friable and readily amenable to concentration. The Morris and Brooks orebody has a proven length of over 2,000', a width of 400' and depth of 100' to 175', but drilling has not yet been extended downward to the bottom of the orebody, along the south side. Another large orebody has been proved on the west end of the Liberty Eureka pit on the Ora and adjacent claims. Drilling has disclosed considerable ore in the ground between these two orebodies, and farther east on the Minnesota and adjoining claims drilling and underground work has exposed sulphide ore in the Old Glory mine. However, the lands are so extensive that only a small part of the property has been thoroughly drilled.

Contact and limestone replacement orebodies have been developed only in the Alpha. The ore-bearing zone has been developed for a length of 650' and width of 200' and has been found to extend from the 850' to the 1,550' level, it being the only mine in which deep exploration has been done to explore this limestone-porphry contact. It is considered that the Copper-

mines Co. has several thousand feet along the south contact and a similar length along the north contact, much of which is favorably regarded. Regular shipments of this direct smelting ore were commenced in the spring of 1917, since when 89,924 tons of 7.72% ore have been shipped, yielding 13,205,318 lbs. of copper. It is estimated that over 500,000 tons of 7% oxidized ore are available.

Development: porphyry ores have been developed by over 100 drill holes, totaling 66,936'; also by extensive underground work on the Morris-Brooks, Minnesota, Old Glory, and other claims. The Morris-Brooks mine was opened in 1917, and worked until January, 1919 to test the adaptability of the branch-raise caving system, and to provide ore for the Kimberly mill, wherein experiments were made to determine the best treatment. During this period, 408,590 tons were mined and milled. Future extraction will be by stripping and steam-shoveling. Reserves in this mine have been estimated at over 2,000,000 tons. New work from January, 1919 to May, 1920, was only 119', done solely in connection with ore extraction. The total is 63,496 feet.

The Alpha mine has extensive lateral workings on the 700, 1,000, 1,100, 1,200, and 1,300' levels. The Alpha No. 1 shaft is 1,200' deep, and No. 2 is 1,840', including 400' additional completed March, 1920, and decided upon after the ground had been drilled. During 1919, extensions in the Alpha were 12,671', and during 4 months in 1920, 1,335'; total, 33,552'. Exploration has proved definitely the existence of a series of N. W.-S. E. slip-planes in the altered zone (probably due to faulting), along which commercial bodies of ore are found. These slips have been followed vertically for a distance of 450'. During 1919, and up to May 1, 1920, development continued on the 1,000, 1,100, 1,200 and 1,300' levels. On the 1,000' level new ore was cut 250' W. of any previously found on this level; on the 1,100' level, 8% ore was followed in one drift for 130'; on the 1,200 level, continuous ore, from a few feet to 45' wide, has been exposed for over 300', the longest body of ore yet opened in the mine. The ore discovered in this period carries a copper content of 4% to something over 9%.

Diamond drilling on the 1,300' level of the Alpha mine was initiated in May, 1919, and in 12 months 6,264' were drilled, about one-half in the altered zone and one-half scout holes. The presence of high grade ore to a depth of 1,555' was proven, and every hole encountered commercial ore. Of the 5 holes reported, with depths of 380' to 570', one passed through 33' of 8.09% and a second, 65' of 6.85% ore.

In the Taylor mine, the shaft has been opened to the 250' level, and 1,327' of lateral work was done in 1920 on this and the 150' level. A considerable body of 5% chalcovpyrite was found carrying better than average gold and silver values.

Some work was done at the Pilot mine, in 1918 and 1919; operations ceased January, 1920.

Ore reserves (May 1, 1920):

	Class of ore	Tons	Copper, %
Fully developed porphyry.....		9,870,135	1.41
Partly developed porphyry.....		9,699,000	1.25
Total.....		19,529,135	1.33
Heavy sulphide.....		200,000	3.00
Alpha oxide.....		500,000	8.00

Mine equipment: at No. 2 Alpha shaft includes a 26x48" Allis-Chalmers double-cylinder hoist, capable of handling 5-ton skips in counter-balance to depth of 1,800', at a hoisting speed of 1,500' per minute; also a 20x48" Allis-Chalmers hoist for the cage.

Pumping equipment consists of two pumps of 600 gallons and one of 1,200 gallons capacity per minute at the main pumping station on the 1,200' level. There is also an 800-gal. pump on the 1,400' level.

A three-mile private railway connecting the principal shafts with the

Nevada Northern Railway, has grades averaging about 1.5%. Equipment includes several Porter locomotives of 600 tons tractive power, and sufficient ore-cars for present requirements.

Ore treatment: careful concentration tests were made on the porphyry ores by J. M. Callow, of Salt Lake, whose results were used in re-modeling the old mill at Kimberly. Concentration is principally by flotation. The remodeled concentrator having a capacity up to 1,000 tons per day, was worked until January, 1919. During the last four months of operation, the mill recovered 82.31% from 1.336% ore. Concentrate carried 18.33% copper and 9.39% moisture.

The company employed Frederick Laist of the Anaconda Copper Mining Co., to design reduction works. His conclusions are based on (1) the concentration of 2,000 tons daily of 1.4% porphyry ore; (2) the concentration of 150 tons daily of 2.9% sulphide ore; and (3) the smelting of 150 tons daily of Alpha 7.5% oxide ore. Assuming that these ores can be delivered at reduction works at \$1.10 per ton for the first, \$5 for the second, and \$10 for the third, for a period of not less than 10 years, Mr Laist recommends building a concentrator to handle 2,000 tons daily of porphyry and 150 tons of sulphide; also a 3,000-k. w. power-plant, and a 500-ton reverberatory smelting plant for concentrates and oxide ore. The equipment will include waste-heat boilers, turbo-generators, coal-dust fired reverberatories, and Great Falls converters. These works will be at Kimberly, thus saving the cost of freighting to Ely. The total estimated cost of producing copper is given as 12.35¢ per pound. The cost of the work would be \$2,500,000. In November, 1919, E. P. Mathewson became consulting engineer and director, and has concurred in Mr. Laist's plans. It was hoped to complete the plant by mid-1922, but the necessary funds have not been available.

Direct smelting ores as well as the concentrates from the Kimberly concentrator have been treated at the Steptoe plant of the Nevada Consolidated Copper Co. under a five-year contract made in 1917.

Nevada Consolidated agrees to mine and treat for account of the Cons. Coppermines, from properties at the west end of Liberty Pit, 415,000 tons of ore during the period ending August 15, 1918, and after that date at least 75,000 tons per year. Coppermines company reserved the right to cancel the contract any time after August 15, 1918, upon giving three months' notice.

Production: during 1919, by the company and its lessees from the 3 mines, Morris-Brooks, Alpha and Ora (Liberty Open Pit), was 115,662 tons of ore, yielding 3,897,934 lb. copper, 890 oz. gold, 4,573 oz. silver, 3,473,269 lb. zinc, 53,643 lb. lead and 27,071 lb. manganese. During the first four months of 1920, a total of 912 tons only were mined by lessees. As in other low grade copper properties, operations were much curtailed, and practically ceased on Dec. 31, 1920.

See also supplementary statement under addenda.

CONSOLIDATED CORTEZ SILVER MINES CO. NEVADA

Offices: 80 Maiden Lane, New York City; Russ Bldg., San Francisco; Reno Natl. Bk. Bldg. Reno, Nev.; and Cortez, Eureka Co., Nev.

Officers: F. M. Manson, pres.-treas.; F. C. Hunter, sec.; W. H. Englebright, supt.

Inc. 1919, in Nevada. **Cap.** \$2,000,000; \$1 par; 1,500,000 outstanding, March, 1920. Security Transfer & Registrar Co., New York, transfer agt.

Property: the Cortez group at Cortez, Nevada, in Eureka and Lander counties. The group consists of 49 claims, 38 patented, 790 acres. Company also owns water-rights and millsites formerly owned by the Tenabo Mill & Mines Co. It includes the old Garrison, Mt. Tenabo, St. Louis, Fitzgerald and Arctic mines, which have yielded over 7,400,000 oz. silver and \$500,000 gold from 125,000 tons of ore, since 1864. Milling was stopped in 1892 and all operations in 1895. Lessees extracted the remaining rich ore during 1901 to 1916.

Geology: the orebodies occur as irregularly sinuous replacements of

uplifted limestone, overlaid by massive beds of quartzite, whose outcrop forms cliffs along the mountainside. A porphyry dike deflects one ore-body. See description and illustrations by Emmons, U. S. Geol. S. Bull. 408, p. 103.

Development: by 4,000' Garrison main tunnel, attaining a vertical depth of 800', with 7 levels above, and Arctic tunnel, 2,500' (Nov., 1921), 350' below; total workings are 15 miles. The Arctic tunnel driven to explore orebodies exposed above, has cut two of the secondary fissures in the limestone, containing primary sulphides, and has penetrated the porphyry dike. A raise is being driven to connect with the Garrison tunnel.

Reserves: estimated at 68,000 tons of 17 oz. ore on dumps and in a few blocks underground; also 120,000 tons of tailings, carrying 7 to 10 oz. silver.

Equipment: includes complete mining and milling plant, rehabilitated 1920-21, and a new compressor added.

Management is unusually competent, Mr. Manson being head of the Western Ore Purchasing Co., and chairman of the Rochester Nevada Silver Mines Co. The re-working of old stope-filling and the exploration of 1,400' of virgin ground below the old workings offer excellent speculative possibilities.

CONSOLIDATED IMPERIAL MINING CO.

NEVADA

Address: 342 Mills Bldg., San Francisco, Calif.

Officers: Jas. Newlands, Jr., pres.; W. J. Morrow, sec.

Inc. 1919, in Calif. **Cap.** \$200,000; \$1 par; all issued.

Property: at Gold Hill, Storey county, developed by 600' shaft. Reported active 1919-20.

CONSOLIDATED MAYFLOWER MINES CO., THE

NEVADA

A reorganization of the Mayflower Bullfrog Consolidated Mng. Co., effected 1917.

Main office: Pioneer, Nev.

Officers: John S. Gibbons, pres.; W. J. Tobin, v. p.-sec.-treas. and gen. mgr.; with C. W. Taylor, M. H. Ollmert and W. O. Lamping, directors.

Inc. in Nevada. **Cap.** \$250,000; 10¢ par; assessable; 1,500,000 shares outstanding. Seven assessments, 1¢ per share, levied up to Aug. 20, 1921, beginning with two in 1918. Listed on New York Curb and San Francisco Exchange. U. S. Corporation Co., New York, registrar. Transfers made at main office. Annual meeting, July 18, 1921.

W. J. Tobin, who is also president of the Reorganized Pioneer Mines Co., reports in January, 1921, that the indebtedness of the Cons. Mayflower had been reduced from \$18,000 to \$10,000 in 10 months.

Property: 11 patented claims, 200 acres, in Bullfrog district, Pioneer, Nye county. Oxidized and free-milling ore occurs in veins with N.-S strike and dip of about 20° E., carrying mainly gold with a little silver and copper. The vein is 4' wide, and assays said to average \$8 to \$12 per ton. Examined by J. B. Kendall and R. C. Cameron.

Development: about 3,500' of workings, including 4 shafts, 100' to 530' in depth. In 10 months ending February 1, 1921, development was confined to the 100', 200' and 300' levels in the deep shaft. A crosscut tunnel also has been driven to cut the Starlight vein, said to show 5' of \$11 ore near the surface. Throughout 1921, development was continued in main shaft on all levels, including the 400', and in the Starlight workings. Property has been thoroughly sampled. Reserves estimated to be 80,000 tons of \$10 ore.

Equipment: includes 25 h. p. hoist, 8-drill compressor and 4,000' pipe line. A 15-stamp mill with Wilfley tables has been remodeled and is said to make an 80 to 85% recovery.

Production: prior to 1921, was 10,000 tons averaging \$14 per ton from the 200' and 300' levels. From March 1, 1921, mill has operated intermittently on a one shift basis.

CONSOLIDATED NEVADA-UTAH CORPORATION

NEVADA

Office: 63 William St., New York. Mine at Pioche, Lincoln county, Nev., and Frisco, Beaver county, Utah.

Officers: Victor B. Wallder, pres.; Wm. B. Randall, treas.; Wm. F. Roberts, sec.; Jos. W. Kay, F. A. Dillingham, W. J. Palmer, directors, H. R. Van Wagenen, supt.

Inc. 1913, in Virginia. **Cap.** \$6,000,000; shares \$3 par; issued \$3,936,396; in treasury, \$1,163,604; reserved for bond conversion, \$900,000; authorized bond issue \$90,000, 1st mtge., 6%; issued, \$499,867. Transfer agt., Security Transfer & Registrar Co., New York. Company without funds, and was unable to meet interest on outstanding bonds, May, 1919. Property closed down since 1918. Shares listed on New York Curb. At public auction in New York, on Dec. 10, 1919, 1,200 shares were sold at \$60 the lot, and \$1,400 bonds for \$55 the lot. On Jan. 9, 1921, 300 shares realized \$4 the lot.

Company is a reorganization of the Nevada-Utah Mines & Smelters Corporation, which went into bankruptcy in 1912, and whose holdings were sold under judgment proceedings for \$100,000 to the new company. Stockholders in the old company subscribed 50cts. in cash for each share held, and deposited their old stock, received bonds for the cash paid by them and 200 shares of stock in the new company for each \$100 subscribed.

Property: 3 groups of mines, owned through control of subsidiary companies; the Pioche group at Pioche, including several productive mines that are largely developed; the Imperial group, including the Comet mine, in Frisco district, Beaver county, Utah.

The Amalgamated Pioche Mines & Smelters Corp., organized to operate the properties of the Cons. Nevada-Utah has been inactive since 1917. Part of the holdings are leased to the Combined Metals Inc., and Black Metals Inc.

Fully described in Vol. XIII.

CONSOLIDATED SILVERS, INC.

NEVADA

Controlled by **Universal Silvers Co.**

Address: Unionville, Nev.

Officers: Edw. S. Van Dyck, pres.-gen. mgr.; Marcus Grossbaum, v. p.; Robt. Arnold, sec.-treas., 14 Kilby St., Boston.

Inc. in Nevada. **Cap.** \$500,000.

Property: the Silverton group of 3 claims, 60 acres, in Unionville district, Pershing county, adjoins Silver Reef on W. and Arizona Extension on S., said to show a silver bearing vein, 3-6' wide and covers part of the "Arizona" blanket vein, 3' thick, dipping at 18 to 30° lying limestone, 25' above rhyolites.

In 1922, company was consolidated with Sinclair Silver Consol., as **Consolidated Mining and Refining Co.**

See **Universal Silvers** for general opinion of these queer promotions.

CONSOLIDATED SPANISH BELT SILVER MINING CO. NEVADA

General Office: Marion, Ohio. **Mine office:** 308 State Bank & Trust Bldg., Tonopah, Nev.

Officers: Jules V. Barnd, pres.-mgr.; John Seifert, v. p.; John V. Wilson, sec.-treas.; with John A. Hoover, Frank O'Neill and Hy. G. Mohr, directors, Associate directors: Chas. A. Klunk, S. S. Fox, Hugh Lisse, H. L. Kuenzli, J. F. Ross, Cantwell Lash and F. D. Standish, Chas. Kirchen, cons. engr.; Hugh H. Brown, res. agt., Tonopah, Nev.; E. J. Schrader, supt.

Inc. Oct. 23, 1916, in Nevada. **Cap.** \$1,000,000; \$1 par; 775,000 shares outstanding. Transfers made by company at Tonopah; Nevada First Natl. Bank, Tonopah, registrar. Annual meeting, first Monday in June.

The fourth annual report for calendar year 1919, gives total receipts, \$141,252 and expenditures, \$139,788; under the former, sale of stock accounts for \$116,293. Current assets were \$59,888, and liabilities, \$23,445. A total of \$300,000 is reported to have been expended to date.

Property: 10 claims, 2 patented, 175 acres, formerly known as the Barcelona mine, in Spanish Belt district, Nye county, 7 miles from Manhattan and 50 miles N. of Tonopah.

Geology: country rock is limestone and granite. Ore occurs in fissure veins with N. E.-S. W. strike and dip of 42°. According to official report, 3 breccias have been uncovered, carrying gold and silver values of \$20 to \$30 per ton; the latter largely predominating. In the main Barcelona vein, ore is found in lenses, 1' to 20' wide, 50' to 500' long; ore is banded quartz with sulphides of iron, zinc, copper and lead. The ore is largely of milling grade, but stringers of high grade occur.

Development: by former workings of the Barcelona mine, first opened in 1871, amount to 2,000', including the 250' San Pedro shaft. Present management has driven a 1,280' drainage tunnel, sunk the San Pedro shaft to 535', and made connection with Barcelona workings; total workings, 8,500'. During 1921, the 350' level was opened and work largely confined to this and the 145' level. Probable ore tonnage is placed at 70,000.

Equipment: electric hoist and compressors. A new 50-ton, 10-stamp mill began operations in Sept. 1921. Ratio of concentration is said to be about 30 to 1; 60% of values recovered on tables 35% by flotation.

Property is credited with past (prior to '89) production of \$500,000. Two cars of high grade, of a gross value of \$9,776, were shipped early in 1920. Examinations have been made by Chas. Kirchen, Fred Searles, Jr., S. F. Hunt and E. L. Fletcher.

Apparently a legitimate enterprise, but some claims made for the property are fantastic and the stock sales campaign is weird.

CONSOLIDATED VIRGINIA MINING CO.

NEVADA

See Consolidated Virginia Mng. Co. of Nevada.

CONSOLIDATED VIRGINIA MNG. CO. OF NEVADA

NEVADA

Successor to Consolidated Virginia Mining Co.

Offices: 787 Mills Bldg., San Francisco and Virginia City, Nev.

Officers: Zeb. Kendall, pres.; Victor Etienne, v. p.; A. P. Swain, sec-treas., with H. G. Humphrey and Frederick Vincent, directors.

Inc. November, 1904, in California; reinc. with change of name, Jan. 15, 1921, in Nevada. Cap. \$2,160,000, increased from \$216,000 on reincorporation; par \$1; all issued; assessable. Stockholders of old company received 10 shares of new stock for each share of old. An assessment of 3¢ was levied May 19, 1921. Stock transferred at San Francisco office and by Security Transfer & Registrar Co., New York; registrar, Registration Surety Co., San Francisco. Annual meeting, first Monday in January. Listed on San Francisco Stock Exchange.

Assessments of former company, of 10¢ each, were levied, Jan. 20, 1919; March 15, 1920, and May 19, 1921. In July, 1919 the company was reported out of debt for the first time in 30 years. **Dividends** by former companies amount to \$78,213,600.

The levying of assessments on the stock of both the old and new companies on the same date caused some comment at the time and no explanation of this action has apparently been forthcoming.

During 1919, total receipts were \$310,144, with cash balance of \$192, on Jan. 1, 1920. Net earnings from ore treated were \$216,903. In 1920, revenue from mill was \$259,687, and early in 1921, an available cash surplus of \$75,000 was reported.

Property: a considerable part of the California claim and the Con-Virginia claim, covering 1,310' along the Comstock Lode at Virginia City, under the same management and operated in conjunction with the Ophir Silver, Union Cons., and Mexican Gold & Silver companies, which see.

Development: by 2,900' shaft and several miles of workings. Exploration on 2,700 and 2,900' levels was stopped in 1919, and concentrated on the 2,150' level and above to 1,600'. A rich shoot was opened on the former, and has been followed to 2,250' by a winze, and also for 120' beyond the fault. Eight faces in the mine were yielding \$15 to \$50 ore; and on the 1,650' level there was 11' of \$50 ore in Feb., 1921.

Recent development totals are: 9,200', 3,275' and about 5,000', for 1919, 1920 and 1921, respectively.

The general plan of operation for 1921 is to open the old workings above the Sutro drainage tunnel and block out the large tonnage of low-grade ore remaining from previous work on the East vein and Comstock lode. A considerable amount consists of stope filling. All work below the Sutro tunnel, corresponding to the 1,650' level of the C. & C. shaft, is to be suspended.

Equipment: includes electric and steam power, hoist, compressor, pumps. Ore is treated by Mexican Milling Co., in which the Cons. Virginia has a one-third interest; the cyanide department was enlarged in 1919.

Production: in 1919, was 15,640 tons; in 1920, 17,706 tons of \$20 ore were treated. Gross production during 1921 was \$339,000.

CONSOLIDATED WEST EXT. SIMON MINES CO. NEVADA

Address: Mina, Nev.

Officers: F. J. Solinsky, pres.; J. H. Walsh, v. p.; G. W. Dwight, sec.-treas.; Geo. F. Thompson, mgr.; directors. A. H. Elftman, cons. engr.

Inc. May, 1919, in Nev. **Cap.** \$150,000; shares 10c par; 955,816 outstanding.

Property: Thompson & Walsh group, S. W. of the Simon Silver-Lead, reported to show an outcrop 70' across and to carry extension of the Simon contact, and also the Harvey & Taylor gold vein.

Development: a 200' shaft cut ore at 100' below surface, that assayed 2% lead and 2 oz. silver per ton. **Equipment:** gasoline hoist, etc.

No information since early in 1920.

CONTACT COPPER CO. NEVADA

Address: Hutchinson, Minn., and Contact, Elko county, Nev.

Officers: S. G. Anderson, pres.; Wm. Schultz, v. p.; Sam G. Anderson, Jr., sec.-treas., with J. A. Lindenberg and J. A. Jorgenson, directors.

Cap. \$1,000,000; shares \$1 par.

Property: two groups, the Lucie, 11 patented claims, and the Blue Rock, 8 patented and 5 unpatented claims, at Contact, said to show copper carbonate ore in veins.

Development: the Lucie group has a 145' shaft, said to show ore all the way to the bottom. The Blue Rock has 2 shafts, 50' and 30' deep, both said to show ore. No production to date.

CONTACT SILVER MINING CO. NEVADA

Address: Mina, Nev.

Officers: Fred W. Fall, pres.; Robt. W. Faron, v. p.; R. R. Gamble, sec.-treas.; Ernest Rackliff, mgr., with Frank M. Andrews, directors.

Inc. May 7, 1919, in Nevada. **Cap.** \$150,000; shares 10c par.

Property: 5 claims, 100 acres in Simon (Bell) mining district, 6 miles S. E. of the Simon Silver Lead mine, said to show gold-silver-lead ore in a contact deposit in limestone and andesite. A prospect.

CONTINENTAL DIVIDE MINING CO. NEVADA

Mail returned from former office, Tonopah, Nev.

Officers: U. W. Harwood, pres.; F. J. Reilly, sec.-treas.; with M. A. Mears, directors.

Inc. June, 1919, in Nevada. **Cap.** \$150,000; shares 10c. par.

Property: 5 claims adjoining the Hull city and the Cheyenne. A prospect.

COPPER CANYON MINING CO. NEVADA

Office: 25 Broad St., New York City. **Mine address:** Battle Mountain, Nevada.

Officers and directors: C. C. Burger, pres.; R. M. Atwater, v. p.; L. E. Wicher, treas., E. Sommer Schmidt, gen. mgr., with Wm. W. Cohen, Herman Aaron, C. N. Edge and E. N. Skinner, directors. S. L. Sherman, sec.

Inc. Nov. 4, 1916, in Delaware. **Cap.** \$1,000,000; \$1 par; 900,000 shares outstanding. Calumet & Hecla Mng. Co. owns a considerable interest, said to be 65,000 shares.

Registrar Transfer Co., transfer agt. and registrar. Stock listed on N. Y. Curb. Annual meeting, third Tuesday in February.

Financial statement as of Jan. 1, 1921: assets included—property, equipment and development, \$1,320,580; current, \$69,146; receivable, but not due, \$62,554. Current liabilities were \$4,823. Reserves for depreciation and depletion were \$66,732. Surplus (from sale of stock) was \$380,725. Current assets and liabilities at end of 1919 were \$150,958 and \$9,679, respectively.

Property: (1) Copper Canyon group, comprises 19 patented claims, 160 acres; also 2 unpatented claims and one water right 432 acres total, all in Copper Canyon, Battle Mountain district, Lander county. Formerly owned by the Glasgow & Western Mining Co. Purchase price was paid out of first year's production. First worked in 1882.

Copper Canyon claims show 3 veins, the Virgin, Superior and Estes, varying from 10' to 30' in width; the first two with a N.-S. course and dip of 60° to 80°, have ore shoots about 150' long. The Estes orebody is 100' long, and 20' wide, the ore being a mixed sulphide and oxide, containing enargite, chalcocite, chrysocolla, malachite and cuprite, averaging 5% to 15% copper.

(2) Copper Basin group, 5 miles S. W. of Battle Mountain, and 8 miles N. E. of Copper Canyon, covers a hilly tract showing a small intrusive mass of granitic porphyry cutting shale, quartzite, and limestone, altered by contact metamorphism and showing several faults. This group comprises 27 patented (493 acres) with 95 unpatented claims (1679 acres); also 20 unpatented placer claims of 402 acres, and 17 mill sites, a total of 2,659 acres. The company has 31 claims, 517 acres, under option.

(3) a camp site of 280 acres owned in fee, and 3 water rights.

(4) a gold property, near Copper Canyon, acquired in 1922.

The Copper Basin claims are only in initial state of development. The orebodies are not of conventional disseminated type such as Ely, Ray, Miami, etc., but are richer, thinner vertically and possibly disconnected. They occur mainly in inclined beds of shale and in altered porphyry. The shales alternate with barren quartzite and contact metamorphic rocks. This irregularity, and the permeability of the rocks, greatly affects the susceptibility of the primary sulphide to enrichment.

Development: (1) at Copper Canyon, by 2 old inclined shafts, 200' and 600' deep and a vertical shaft started in 1917. Workings total 3,500', with greatest depth of 570'.

(2) At Copper Basin, comprises the 200' Widow shaft and 2,874' of work; Chase and Goff shaft, 200' deep, with 3,045' of work; Sweet Marie shaft, 295', with 3 levels and 3,976' of work; Contention 130' shaft, with 2,748' of work; Hawkeye tunnel 403' and a 600' water tunnel. Thirteen churn drill holes, aggregating 3,257', show that orebodies average 50' thick and that the enriched zone is 50' to 75' below the surface. All workings total 13,942'.

Ore reserves as estimated May 1, 1921, were 500,000 tons of 2.68% copper ore, and about 1,000,000 tons assaying 1 to 1½%, at Copper Basin; and 200,000 tons of 3% copper ore at Copper Canyon.

Equipment: (both properties) includes a number of small gas hoisting engines, 100' compressor, 250 h. p. distillate engine, etc.

Production: from Copper Canyon mine, 22,487 tons of ore averaging 9% copper and making from April, 1916 to January 1, 1919, about 3,000,000 lb. copper, sold for \$536,699.

Copper Basin is a very promising property, and the Copper Canyon is worthy of further deep development.

Carl O. Lindberg, Ralph Nowland and Augustus Locke, are the consulting engineers of the company.

COPPER METAL MINES CO.

NEVADA

Idle. Mail returned from former address at Goodsprings, Nev.

Officers and directors: S. B. Stewart, pres.; Peter Clegg, v. p.; J. B. Jensen, sec.-treas., at last accounts.

Inc. Dec. 20, 1916. Cap. \$1,000,000; shares \$1 par; 400,000 shares issued.

Property: 11 claims, 220 acres, in Ivanpah district, about 35 miles S. W. of Goodsprings, Clark county only slightly developed and claimed to show a 3' contact vein between granite and porphyry, assaying 6% copper and 6 oz. silver with a trace of gold.

COPPER MOUNTAIN MINE**NEVADA**

Address: Ed. La Patt, Ed. Schultz and Mrs. J. L. Woodward, owners, Goldfield, Nev.

Property: 5 patented, 12 unpatented claims, 340 acres, 18 miles from rail at Nolan, Mineral county, developed by 3 shafts, with over 6,000' of workings, showing copper ore of 4 to 8% tenor.

Production: shipments to September, 1919, amounted to over \$100,000. From 1917, property was under option to Jumbo Copper Mtn. Mng. Co. subsidiary to Jumbo Extension Mng. Co., which is said to have expended \$130,000 in development, but, failing to meet \$50,000 payment, forfeited its equity in property, October, 1919, and it reverted to owners.

COPPER PEAK MINING CO.**NEVADA**

Office: Goodsprings, Nev.

Officers: R. A. Andrus, pres.-treas.; W. E. Allen, v. p.-mgr.; P. H. Springer, sec., with P. S. McClanahan, directors, all of Goodsprings, Nev. Inc. in 1916, in Nevada. Cap. \$1,000,000; \$1 par; outstanding 520,000 shares.

Property: 6 claims, about 120 acres, on the south and east slopes of Olcot Peak, Yellow Pine district, 10 miles N. of Goodsprings, Clark county. **Ore:** is a high grade copper carbonate occurring in chambers and kidneys embedded in limestone. The highest assay of the 5 cars sorted ore shipped was 25% and the lowest was 14% copper.

Development: by 6 adits with total of 600', the longest being 150'. Property has been worked intermittently for a number of years and efforts have been made to finance some consistent plan of development.

COPPER PRINCE MINING CO.**NEVADA**

Office: 53 City and County Bldg., Salt Lake City, Utah. W. W. Barton, sec.

Property: south of Austin, Lander county, developed by 235' tunnel. Six assessments were levied up to July, 1918, but company gives out no report of recent operations. A prospect.

COPPER SHIELD MINING CO.**NEVADA**

Address: Care Dr. C. I. Douglas, 415 E. Third St., Salt Lake City, Utah. **Mine office:** Contact, Elko county, Nev.

Officers Dr. C. I. Douglas, pres.; U. U. Hiskey, v. p.; C. R. Strock, sec.-treas.; H. M. Shields, mgr., and J. A. De Valley, directors.

Inc. 1907, in Nevada. Cap. \$1,000,000; shares \$1 par; issued, 610,000. Annual meeting, second Tuesday in April.

Property: 11 claims, 200 acres, in the Salmon River district, developed by 4 shallow shafts, deepest 73', and several tunnels, with a total of 646' of workings, showing 4 veins in monzonite porphyry dikes in granodiorite, said to carry up to 40% copper and 2 to 6 oz. silver per ton. Oregon Short Line railroad is 37 miles distant Presumably idle.

COPPERSIDE MINE**NEVADA**

Address: Schwartz & Renaux, owners, Goodsprings, Nev. Otto F. Schwartz, mgr.

Property: 60 acres in Yellow Pine district, Clark county, shows a vein said to be from 1 to 8' thick, and to average 25 to 30% copper. With only shallow workings and practically no equipment, the mine is reported to have produced \$17,622 worth of ore in 1917, which netted the owners \$3,940.

Was shipping in 1919, and apparently active in 1920.

CORNFORTH BELLEHELEN SILVER MINE**NEVADA**

See Pacific States M. & M. Co.

CORNUCOPIA DIVIDE MINING CO.**NEVADA**

Main office: 311 Bk. of Italy Bldg., Oakland, Calif. Nevada office: First Natl. Bank Bldg., Tonopah, Nev.

Officers: P. W. Pray, pres.; C. E. Butler, v. p.; W. B. Harrington, sec.; J. C. Downey, treas., with Dr. W. F. Schwarner, directors, all of Oakland.

Inc. May, 1919, in Nevada. **Cap.** \$150,000; par 10c.; non-assessable. Stock sold by permission of the State Corporation Commission of California.

Property: 4 claims, and fractions, 2 miles N. E. of the Tonopah Divide mine, and 3 claims in the W. Divide section, 11 miles from Tonopah. In the former, ore occurs in a shear-zone in rhyolitic breccia, samples returning up to \$5.80; in the latter, 18" to 4' fissures have been followed, showing values of \$10 to \$200, largely in silver.

Development: 2 shafts, 285' and 116', one on each group; each fully equipped with hoist, etc.

CORNUCOPIA MNG. CO. OF NEVADA **NEVADA**

Address: Luning, Nev.

Inc. May 23, 1919, in Nevada, by N. M. Wiley, Francis O'Boyle, and T. R. Pledge. **Cap.** \$150,000; 10c par.

Property: a group of claims in the Simon district of Mineral county, developed by a new 100' shaft in andesite, and an old 75' incline which revealed fair value. Equipped with 6 h. p. hoist. A prospect.

COTTONTAIL MINING CO. **NEVADA**

Address: J. J. Burk, Reno, Nev.

Officers: J. J. Burk, pres.; R. M. Preston, v. p.; A. Hankammer, sec-treas. C. K. Jarvis, supt.

Property: one claim in fee, and 6 under option, on Rebel creek, westerly slope of the Santa Rosa Mtns., Humboldt county, 50 miles N. of Winnemucca. Two drift tunnels, 490' apart vertically, have opened a 5' vein, said to assay \$23 per ton, 4/5 of which is gold. High grade is being shipped. Equipped with a small mill.

COWDEN & DEEGAN MNG. CO. **NEVADA**

Address: D. C. Pomeroy, owner, Denio, Ore.

Property: 5 claims, 3 miles S. of the Oregon line, in Humboldt county, said to show granite cut by a quartz vein 6 to 48" wide, running \$5 to \$40 in gold per ton.

Development: by tunnels to depth of 500'. Estimates give 1,500 tons of ore blocked out. Plan sinking shaft 200' and drifting.

Equipment: includes 24-ton stamp mill. Reported to have produced some high-grade ore.

CRAVEN COPPER CO. **NEVADA**

P. H. Craven, pres. Property near Winnemucca, Humboldt county, slightly developed, said to carry high-grade copper ore. Idle during the war, but operations to be resumed.

CRESCENT DIVIDE MINING CO. **NEVADA**

Address: J. K. Turner, Goldfield, Nev.

According to latest reports, was operating the property of the Silver Coin Mng. Co., which see.

CRESSON DIVIDE MINING CO. **NEVADA**

Office: Goldfield, Nev.

Officers: C. S. Sprague, pres.; J. K. Turner, v. p.; Ben Gill, sec-treas.; with C. A. Leager and L. L. Dellinger, directors.

Inc. April, 1919, in Nevada. **Cap.** \$150,000; shares, 10c par; 750,000 in treasury.

Property: Ideal claims adjoining Reno and Jim's Divide, and 2 fractions 1,500' S. of S. W. corner of Tonopah Divide. An undeveloped prospect, but well located.

CROESUS DIVIDE MINING CO. **NEVADA**

Address: Tonopah, Nev.

Property: an undeveloped tract 3,000' E. of Tonopah Divide, and adjoining the High Divide on the west. A prospect.

CROESUS-EUREKA MINING CO. **NEVADA**

Property sold to Eureka-Croesus Mining Co., q. v.

CROESUS EXTENSION MINING CO.**NEVADA**

Address: R. M. Bradley, Austin, Nev. Company being organized in December, 1919.

Property: 4 claims on Prospect mountain, W. of the Eureka-Croesus.

CROWN CHARTER DIVIDE MINING CO.**NEVADA**

Address: F. C. Beedle, Goldfield, Nev.

Property deeded to Crown Divide Mining Co., which see.

CROWN DIVIDE MINING CO.**NEVADA**

Formerly Crown Charter Divide M. Co.

Office: Goldfield, Nev.

Officers: F. C. Beedle, pres.; H. B. Ruhl, v. p.; B. E. Garnett, sec.-treas., with T. F. Potthoff and A. Ninnis, directors

Inc. 1919, in Nevada. Cap. \$150,000; 10c par. Security Transfer & Registrar Co., transfer agt.

Property: 6 claims, 115 acres, adjoining the Mohawk and Belcher on N. W. and N. E., respectively, and 3,000' N. W. of the Tonopah Divide. Examined by J. K. Turner.

Development: ground contains two well-defined and mineralized veins. The main vein is considered to correspond with the course of the "silver" vein of the Tonopah Divide. Developed by shaft.

Equipment: gasoline hoists, tools, etc., purchased from companies at Belleville and Candelaria, in Nevada. No recent information.

CROWN GOLD & SILVER MINING CO.**NEVADA**

Address: Mills Bldg., San Francisco, Calif.

Inc. Dec., 1919, in Nevada, by Rudolph Danmyer, C. M. Cross, E. A. Judd and V. R. Grant. Cap. \$150,000; 10c par.

No information available as to property.

CROWN MINES**NEVADA**

Address: Golconda, Nev. Owned by Jos. H. Playter, mgr., and Walter G. Urige.

Property: 15 claims about 200 acres, 12 miles S. of Golconda, Humboldt county, said to carry a fissure vein in andesite from 25-60' in width. Ore occurs in shoots, 40-300' long, said to average \$8-\$12 in gold and silver.

Development: by about 2,000' of underground work, including a 700' tunnel, which is being extended to gain further depth. Management reported ore reserves of 150,000 tons, averaging \$6-\$10 per ton in June, 1919. Report of February, 1921, states that "extensive development and "installation of large milling plant" are to begin.

CROWN POINT GOLD & SILVER MINING CO.**NEVADA**

Succeeded by Jacket-Crown Point-Belcher Mines Co., which see.

CUMBERLAND DIVIDE MINING CO.**NEVADA**

Office: Tonopah, Nev.

Officers: T. L. Oddie, pres.; A. E. Kane, v. p.; Warren Richardson, sec.-treas., with D. T. and P. J. Donovan, directors

Inc. 1919, in Nevada.

Property: 4 Keystone claims, 50 acres, next to the Sutherland and N. of the High Divide Annex.

CUNAPAH MINING CO.**NEVADA**

Address: Montello, Nev.

Officers: P. O. Perkins, pres.; S. C. Sherill, v. p.; G. W. Lynch, sec.-treas.; J. M. Bowker, mgr

Inc. 1916, in Utah. Cap. \$50,000; shares, 10c par; 205,000 issued. Listed on Salt Lake Exchange.

Property: 5 unpatented claims in Lucin district, Elko county, Nev., near Utah border. Is in same hill as Salt Lake Copper & Tecoma Consol, mines and shows limestone intruded by porphyry and granite. Ore occurs in "breaks" in limestone near contact.

Development: by 250' shaft and several tunnels, said to show a lead-

silver vein in limestone. Several carloads of ore shipped to June, 1917, averaging 25% lead and 2 oz. silver per ton.

Company installed compressor, hoist and power plant, and was to sink a shaft in 1918. No recent returns.

CUPRITE COPPER CO.

NEVADA

Supposedly dead. No recent returns. Described in Vol. XII.

CUPRITE ESMERALDA SULPHUR CO.

NEVADA

Presumably organized to operate property at Cuprite, Esmeralda county and is apparently intimately connected with the **Cuprite Sulphur Corporation**, which see.

Reported, November, 1921, that John J. Olsen and E. Z. Parker, who had operated under name of J. J. Olsen & Co., had been indicted and convicted in the Federal Court, New York, for misuse of the mails. They have been released under bond. Others are implicated.

CUPRITE SULPHUR CORPORATION

NEVADA

Mail returned from 50 E. 42nd St., New York City. F. S. Taggart, vice-president, at last account.

Inc. 1917 in Delaware. Cap. \$2,000,000.

Property: a sulphur deposit near Cuprite, Esmeralda county. Reported September, 1920, that the promoters had been indicted by a Federal jury in New York, on the charge that mails had been used to defraud. See **Cuprite Esmeralda Sulphur Co.**

CYANIDE MINE

NEVADA

Address: Eureka, Nev. Mine in the Eureka district, Eureka county. Lead-silver ore, carrying gold, was produced in 1919. Operating in 1920.

DAHL PLACERS

NEVADA

Address: Jas. Dahl, owner, Copper Canyon, via Battle Mountain, Nev.

Property: 25 claims, 1,500 acres, 700 patented, at Copper Canyon, Lander county, credited with a production from 1910 to 1919, of \$485,000 in placer gold. Gross earnings in 1918 were \$74,381.

Gravel occurs in small narrow channels of unknown extent.

Development: by 1,500' tunnel and 60' vertical shaft. The giants have a daily capacity of 200 yards. Recent information not available, but presumably operating in 1920.

DANDY DIVIDE MINING CO.

NEVADA

No information obtainable. Probably a "paper" company only.

DARKEY MINE

NEVADA

Owned by W. S. Holmquist and M. W. Johnson. W. S. Elliott, mgr.; Walter Geddes, supt., at last accounts.

Property: 9 claims, 180 acres, in Elko county, about 9 miles E. of Decoy, developed by 65' shaft, shows a blanket deposit of manganese ore, in limestone formation. Owners shipped 562 tons of ore, averaging 45% from Oct., 1916, to March, 1917; shipments continued to June, 1918.

Property leased to W. S. Elliott and W. Geddes, Installed a hoist and shipped from Decoy on the Nevada Northern R. R. Probably idle.

DAVIDSON MINING CO.

NEVADA

Dissolved. Holdings taken over by **Prince Cons. M. & S. Co.**, July, 1918.

DAWN MINING CO.

NEVADA

Address: Goodsprings, Nev.

Inc. by Fred A. Hale, Jr., Albert Munzebrock, N. B. Hunter, H. K. Riddall and S. E. Yount. Cap. \$50,000; \$28,000 outstanding in 1919.

Property: the Midnight group of 3 claims in Yellow Pine district, Clark county. Ore carries carbonates of zinc and lead. Shipping in 1919-20.

DAY BRISTOL CONSOLIDATED MINES CO.

NEVADA

Dead. Property originally owned by Bristol Cons. M. & S. Co., was acquired in 1911, and in 1915 taken over in turn by the Cons. California-Nevada Mining Co. See Bristol Silver Mines Co. for later information.

DAYTON PLACER RECOVERY CORPORATION NEVADA
Dead. Described fully in Vol. XIV.

DEER LODGE GOLD M. & M. CO. NEVADA
Address: Ben L. Corum, sec., Utah Savings & Trust Bldg., Salt Lake City, Utah. W. S. Ramer, pres. Stock assessable and 22 assessments have been levied, the last of 1/3c. per share, on Dec. 5, 1921.

Property: in Lincoln county, Nevada. Except for annual assessment work, company is presumably inactive.

DELAWARE MINING CO. NEVADA
Idle. H. H. Hunter, mgr., Lovelocks, Pershing county, Nev.

Property: 200 acres, in Seven Troughs district, near Vernon, Humboldt county. Ore occurs in veins 5-7' wide, said to average \$18-\$20 per ton.

Equipment: includes the Darby mill $4\frac{1}{2}$ miles from the mine. Management was planning to explore the Delaware veins at depth at last accounts.

DEMIJOHN CONSOLIDATED MINING CO. NEVADA
Offices: 410 Savings & Trust Co. Bldg., Salt Lake City, Utah. Mine at Pioche, Lincoln county, Nev.

Officers: Fred W. Price, pres.; J. Thomas, v. p.; W. M. McCrea, sec.-treas., with Owen A. Bailey, F. E. Parish, O. P. Soule, directors.

Cap. 1,000,000 shares; 10c par; assessable. Assessment No. 9 levied February, 1918. Listed on Salt Lake City Stock Exchange. Sales $1\frac{1}{2}$ c. high, 1c. low, 1921.

Property: 9 claims, 7 patented, 2 miles W. of Pioche, said to show lead-silver-gold ore. The ore is making into the lime from the hanging wall of a fissure 40' wide and varies from 1"-2' in thickness. A selected sample assayed 52% lead, 80 oz. silver and 0.12 oz. gold. The main vein traversing the property has a N.-S. strike and dips to the E. Mineralization, though persistent, is not in commercial quantity, save in narrow streak noted.

Development: 300' shaft, drifts, crosscuts and winzes to the 500' level.

Equipment: hoist, air compressor and all necessary machinery. Small shipments made in 1915. Property closed down and resumption of work indefinite.

DESERT CHIEF CONSOLIDATED MINING CO. NEVADA
A reorganization of the Desert Chief Mng. Co. Merged December, 1919, with other companies to form the Yellow Tiger Consolidated Mining Co., which see.

Inc. in Nevada. Cap. \$1,500,000; par \$1; assessable.

Property: of the Desert Chief Mng. Co. consisted of 30 patented acres in Diamondfield section of Goldfield district, Esmeralda county. Foreclosed on judgments in 1914, but property redeemed and reorganization effected, March, 1915, on an assessable basis.

New company, Desert Chief Consolidated, in 1915 and 1916, acquired properties of the Goldfield Ruby Hills Co. and Black Ants Gold Mng. Co., making its total holdings 130 acres.

Development: 100' shaft only work recorded. H. A. Riedel was president.

DESERT KLONDYKE MINING CO. NEVADA
Address and transfer office: Tonopah, Nev.

Officers: R. H. Tune, pres.; W. Lucot, v. p.; C. N. Miller, sec.-treas.; with A. F. Price and Gerald B. Hartley, directors.

Inc. April, 1919, in Nevada. Cap. \$150,000; par 10c.

Property: Annex and Annex No. 1 claims in Klondike section of Divide district, 6 miles south of Gold mountain.

DETROIT DIVIDE MINING CO. NEVADA

Mail returned from former address: care J. B. Evans, Tonopah, Nev.

Property: 6 claims at Divide, $2\frac{3}{4}$ miles due west of Gold mountain, and also the Carbonate silver-copper mine in the Providence range, near

vein has been opened, showing 3' of \$75 silver and \$15 copper ore. Development is by tunnel, and a compressor plant was at work in December, 1919.

DEXTERETTA MINES CO.**NEVADA**

Probably dead. Formerly held Nevada Mother Lode Co. group at Cherry Creek, near Ely, Nev. See Vol. XIV.

DEXTER-UNION MINES CO.**NEVADA**

Address: Manhatttan, Nev.

Officers: S. R. Moore, pres.; H. H. Brown, v. p.; C. T. Lawrence, sec.-treas., with C. F. Wittenberg and R. Fred Brown directors.

Inc. 1912 in South Dakota. Cap. \$1,000,000; shares \$1 par; 800,000 shares issued.

Property: 16 patented claims, 270 acres, in Manhattan district. Ore contains gold and silver said to average \$15 per ton. Lessees reported to have produced \$40,000 worth of ore from the Union No. 4 claim. Idle for several years.

DIAMONDFIELD BLACK BUTTE REORGANIZED MNG CO.

Office: Goldfield, Nev.

Officers: J. B. Giblyn, pres.; with H. T. Gillman, Bartlet Smith and L. L. Dillinger, directors. Geo. B. Hutchings, sec.-treas., 25 Broad St., New York.

In 1918, control was acquired by former president, C. S. Sprague, but extensive development planned was not carried out. Control now in hands of Mines Selection Co. (q. v.), a holding organization fathered by Weir Bros. & Co.

DIAMONDFIELD DAISY GOLD MINING CO.**NEVADA**

Idle. Address: 61 Broadway, Ney York City.

Officers: Albert J. Seligman, pres.-treas.; C. R. Woodin, v. p.; W. M. Hoagland, sec., with F. E. Horton, directors.

Inc. 1910, in Nevada, as reorganization of the Goldfield Daisy Mng. Co., of Goldfield Nev. Cap. \$1,000,000; shares \$1 par; 850,000 issued. Listed on New York Curb and San Francisco Exchange. Shares quoted at 2c throughout 1920. No sales, 1921.

Property: 3 patented claims, 60 acres, at Goldfield, was under lease to the Justice Gold Mines Co.

DIAMONDFIELD MINING & MILLING CO.**NEVADA**

Merged into the Goldfield Great Bend Mng. Co., in 1915.

DIAMONDFIELD TRIANGLE MINING CO.**NEVADA**

See Reorganized Diamondfield Triangle Mng. Co.

DIVIDE ANNEX MINING CO.**NEVADA**

Company dissolved. See Reorganized Divide Annex Mng. Co.

DIVIDE BOY MINING CO.**NEVADA**

Address: Tonopah, Nev.

Unable to locate officers or holdings, etc.

DIVIDE CHARTER MINING CO.**NEVADA**

Office: Tonopah, Nev. H. H. Brown, res. agt.

Officers: J. E. Adams, pres.; J. H. Miller, v. p.; Allen Rives, sec.-treas., with Zeb Kendall, H. H. Brown, and F. M. Manson directors.

Inc. March, 1919, in Nevada. Cap. 1,500,000 shares; 20c. par, assessable: 750,000 outstanding.

Property: 5 claims, 100 acres, S. of the Kendall and N. of Bonanza group. Samples from outcrops assay up to \$10 per ton. Examined by J. B. Higgins.

DIVIDE CITY MINING CO.**NEVADA**

Office: F. Pittman, agent, Tonopah, Nev.

Officers: J. H. Miller, pres.; Zeb Kendall, v. p.; Allen Rives, sec.-treas.; George Wingfield, J. E. Adams, F. M. Manson, directors.

Inc. March 10, 1919, in Nevada. Cap. 1,500,000 shares; 10c. par, as-

sessable. Listed on San Francisco Stock Exchange. Shares quoted 2c. high and $\frac{5}{8}$ low, in 1921.

Property: 5 claims and 2 fractions north of Tonopah Divide ground; patent applied for in 1920. Developed by 140' shaft.

DIVIDE CITY TOWNSITE CO.

NEVADA

Office: Tonopah, Nev.

Officers: Wm. Watters, pres.; J. H. Miller, v. p.; J. E. Adams, sec-treas.; Allen Rives, asst. sec-treas., with W. J. Douglass and Zeb Kendall, directors.

Inc. March 10, 1919, in Nevada. **Cap.** 350,000 shares; \$1 par; 100,000 pfd. non-assessable, and 250,000 com. assessable.

Property: company is not a mining concern, but owns surface rights for townsite purposes on ground of the Divide City Mining, a portion of the Dividend, Horseshoe, and neighboring properties.

DIVIDE CONSOLIDATED MINING CO.

NEVADA

Office: Tonopah, Nev.

Officers: J. H. Miller, pres.; F. W. Manson, v. p.; J. E. Adams, sec-treas.; with William Watters, Richard Finn (supt.), directors. A. H. Elftman, cons. engr.

Inc. May 28, 1918, in Nevada. **Cap.** 1,500,000 shares; 10c. par; assessable, 750,000 outstanding. Listed on San Francisco Stock Exchange. Stock quoted at 3c. high and 1c. low, in 1921.

Property: the Empire group, 8 claims, 2,000' due N. of the Tonopah Divide, and just N. of the Tonopah Mining Co.'s ground. Reported that two of the master veins of the district cross the ground, while four cross-veins opened in adjoining ground undoubtedly persist into the Empire tract. Parts of the veins are well mineralized, and yield good assays, which indicates that pay-shoots should be found in the underlying breccia.

Development: at a depth of 180', the shaft of the Divide Consolidated was in the typical ore-bearing material of the district, a silicified highly-oxidized rhyolite-breccia, and samples ranged from \$9 to \$48 per ton. The crosscuts from the shaft on the 200' level cut 4 veins, with values, but not in payable quantity. The ground breaks and stands well; little or no timbering being needed, and a 6' round in lateral work is not unusual.

Equipment: 50-h. p. electric hoist, 8 drill compressor, etc. one of the best plants in the district.

DIVIDE CONTACT MINING CO.

NEVADA

Address: Tonopah, Nev.

Inc. 1919 in Nevada.

Property: a group of 4 claims, on outskirts of district and over 3 miles southeast of Gold mountain. A prospect.

DIVIDE EXTENSION MINING CO.

NEVADA

Office: Tonopah, Nev.

Officers: Zeb. Kendall, pres.; F. K. Pittman, v. p.; B. A. Rives, sec-treas., with J. H. Miller and C. T. Stevenson, directors. Edward J. Bevis, supt.; Andrew Walz, cons. engr. in charge.

Inc. February 21, 1918, in Nevada. **Cap.** 1,000,000 shares; 10c par. 800,000 issued. Listed on San Francisco Stock Exchange. Sold 63¢ high, 19¢ low, 1921. Columbia Trust Co., registrar; Registration Surety Co., San Francisco, transfer agt.

Property: 3 claims, 20 acres, adjoins Tonopah Divide on N. Examined in July, 1919, by Andrew Walz. for Hayden, Stone & Co., which bought 40,000 shares. Vein strikes N. 10° E., and is in rhyolite-breccia.

In January, 1920 company acquired an option on the May Day prospect, situated at the summit near the Luning-Rawhide road.

Development: by 425' main (Kendall) shaft, which failed to find extension of Tonopah Divide vein. In May, 1919, a 40' ore zone was located 600' N. of main shaft, on which Caldwell shaft was sunk for 200'. Although "strikes" were occasionally reported, ore was not found in commercial quantity. In March, 1921, discovery of ore shoot, 4' to 8'

wide, 120' long, between 100' and 200' levels was announced, with values from \$25 to \$100, and 495 tons were reported to have yielded \$41,373 gross, up to Aug. 15. Stopping began Sept. 1, and output for month said to be about \$48,000 from 625 tons of ore.

The Kendall shaft is well placed for deep development, and a cross-cut is being driven to cut the Caldwell lode 200' below existing workings, or 420' level.

Equipment: electric hoist, compressor, etc.

DIVIDE FRACTION MINING CO.

NEVADA

Office: Tonopah, Nev.

Officers: M. J. Sullivan, pres.; G. A. Cole, v. p.; H. J. Coogan, sec.-treas., with H. C. Heidtman and F. J. De Lonchamps, directors.

Inc. April, 1919, in Nevada. **Cap.** 1,500,000; 10c par, non-assessable.

Property: 5 fractional claims, adjoining the Toggery and Operator groups.

DIVIDE GOLD DYKE MINING CO.

NEVADA

Office: 206 Clay Peters Bldg., Reno, Nev.

Officers: R. M. Preston, pres.; Charles Kielhofer, v. p.; A. Murtaugh, sec.-treas., with C. F. Stevens and C. W. Skene, directors.

Inc. in Nevada, 1919. **Cap.** \$150,000, 10c par.

Property: 4 claims E. of the Gold Wedge, and 2½ miles S. E. of Gold mountain. A prospect.

DIVIDE LEADER MINING CO.

NEVADA

Office: Tonopah, Nev.

Officers: F. E. Baker, pres.; H. E. Loufek, v. p.; V. M. Place, sec.-treas.

Inc. in Nevada. **Cap.** \$150,000; shares, 10c par.

Property: two groups, one 2¼ miles E. and the other, 2 miles S. of Gold mountain. Surface shows well defined veins.

DIVIDE SYNDICATE MINING CO.

NEVADA

Office: Russ Bldg., San Francisco, Cal.

Officers: W. A. Sherman, pres., Charles Kielhofer, v. p.; F. H. Lathrop, sec.-treas., with William Lichtenberg (supt.), A. A. Heer, directors.

Inc. March 8, 1919, in Nevada. **Cap.** 1,500,000 shares; 10c par; assessable. Listed on San Francisco and Los Angeles Stock exchanges. Transfers made in company's office.

Property: 3 claims, 55 acres, adjoining the Rosetta on the northwest. Tract has several veins on it.

DIXIE DIVIDE MINING CO.

NEVADA

Office: Goldfield, Nev.

Officers: C. S. Sprague, pres.; C. A. Leager, v. p.; Ben Gill, sec.-treas.; with I. K. Turner and B. W. Ward (supt.), directors.

Inc. March, 1919, in Nevada. **Cap.** \$150,000, shares 10c par; 750,000 in treasury; 200,000 issued.

Property: 3 claims and fraction, 50 acres W. of Portland 2½ miles southwest of Gold mountain. A prospect.

DOCTOR DIVIDE MINING CO.

NEVADA

Mail returned from A. K. Warner, res. agt., Tonopah, Nev.

Officers: T. J. O'Donnell, pres.; T. W. Graham, v. p.; G. N. Bachman, sec.-treas., with Chas. Small and A. H. Warner (manager), directors.

Inc. April, 1919, in Nevada. **Cap.** \$150,000; par 10c; 750,000 treasury shares; 100,000 issued.

Property: the Doctor group, 4 claims and fraction.

DOUGHBOY DIVIDE MINING CO.

NEVADA

Inc. 1919, in Nevada.

Owens a group of 5 claims adjoining Treadwell on S. and 1½ miles E. of Gold mountain.

DOUGLASS DIVIDE MINING CO.

NEVADA

Office: Tonopah, Nev.

Officers: N. K. Cooper, pres.; F. B. Caldwell, sec.-treas.

Property: 3 Keystone claims, adjoining Mohawk, Northwest, and North properties. A prospect.

DOUGLASS MINING CO.**NEVADA**

Property: 15 patented (1908) claims, 227 acres, in Silver Star district, Mineral county, 7 miles S. W. of Mina, includes Hardluck, Mary, New Party, Orphan Boy and Snowball; also ½ interest in the Gold Sovereign, 20 acres, and water rights of 80 acres. Claims show quartz-adularia gold-bearing fissure veins in conglomerates, opened by shaft, tunnel and glory holes about 100' deep.

Location originally acquired by company with Mrs. John L. Watson of Portsmouth, Va., apparently in control. Idle since about 1916. Property was disposed of at sheriff's sales to satisfy a mortgage judgment of \$19,509 in favor of the Esmeralda County Realty Co., on Jan. 5, 1922. Reported that company may be reorganized.

DOYLE MINING CO.**NEVADA**

Dissolved June 26, 1917. Was controlled by Atkins Kroll Co. See Vol. XIII.

DROMEDARY HUMP CONS. MINES CO.**NEVADA**

Mine at Fairview, Churchill county. Edward W. Stratton, in charge. Formerly the Dromedary Hump Mng. Co., name changed about 1917, when holdings (one claim) of Fairview Golden Boulder Mng. Co. were absorbed and capital was increased to 2,000,000 shares. The latter received 1,225,000 shares.

Was apparently coming to life mid-summer of 1921, after some years of quiescence.

DUNLAP COPPER MINE**NEVADA**

E. S. Chafey, lessee, Mina, Nev. Property at Mina, Mineral county, owned by Nevada Copper Co., which see.

DUPLEX DIVIDE MINING CO.**NEVADA**

Office: Room 1, Journal Bldg., Reno, Nev.

Officers: A. G. Miller, pres.; W. T. McNeil, v. p.; A. LeCuyer, sec.; C. H. Duborg, treas.; with Gray Mashburn and H. H. Donogh, directors.

Property: 3 claims, 1¼ miles N. of Ben Hur, and the 4 Silver State claims. An undeveloped prospect.

DUPLEX MINING CO.**NEVADA**

Idle. **Office:** 501 P. E. Bldg., Los Angeles, Cal. **Mine office:** Searchlight, Clark county, Nev.

Officers: Geo. L. Craig, Long Beach, Cal., pres.; C. W. Ennis, v. p.; Geo. R. Colton, sec., with G. F. Colton, directors at last accounts.

Inc. May 7, 1915, in Nevada. **Cap.** \$500,000; shares \$1 par. All stock issued is assessable.

Property: 7 patented claims, 101 acres, is a well-known gold mine, with veins in quartz monzonite, carrying gold-silver ores, changing to copper, lead and zinc at depth. Orebodies from 2.5 to 5' in width.

Development: by 600' vertical shaft, a 45° incline shaft 400' deep, and a 74° incline shaft 300' deep, with about 2,500' of underground workings. Assay results from carload lots are 0.9 oz. gold, and 4.9 oz. silver, 8.6% lead, 2.3% copper, 1.3% zinc. Company claims that on the lowest levels the amount of lead is diminishing and copper increasing. The first copper ore mined in commercial quantities in the Searchlight district was shipped from this mine.

During 1920, lessees were shipping selected ores, assaying \$100 to \$200 per ton.

DUPONT COPPER MINES CO.**NEVADA**

Office: N. H. Wheeler, gen. mgr., 10 E. 43rd St., New York City. **Mine address:** Dupont, P. O. Searchlight, Nev.

Officers: S. J. Kistler, pres.; Wm. D. Miller, v. p.; Chas. M. W. Keck, sec.-treas., with C. S. Clark, directors. G. B. Hartley, J. V. Priest, and W. W. Wishon, mining and consulting engineers.

Inc. Feb., 1916, in Arizona. **Cap.** \$2,500,000; \$1 par; 1,500,000 issued.

Security Transfer & Registrar Co., N. Y., transfer office. Metropolitan Trust Co., N. Y., registrar.

Property: the Sazarac group, formerly owned by the Gold Coin Mining Co., defunct 1907, and the Bornite group. These holdings comprise 23 claims, 8 patented, 410 acres, at Camp Dupont, 18 miles from Searchlight, Clark county.

Company also owns a stock interest in the **Queen Calumet Copper Extension Mining Co.** of Bisbee, Ariz.; also options on 30 mining claims, about 600 acres near the Dupont mines, a 51% stock interest in the Assets Realizing Mines Corp'n, California, which see. The entire mill equipment of the **Hartley M. M. & Reduction Co.**, at Mazuma, Nev., a defunct English concern, and "the prospect of obtaining" 44 patented lode claims, developed by 5,000' of tunnel, crosscutting and carrying more than 100 fissure veins yielding 10 to 7,000 oz. silver per ton, and estimated to contain more than two hundred millions of tons of profitable silver-lead ores.

Geology: the Sazarac or Dupont mines show mineralized dikes or veins cutting a quartz-monzonite porphyry, intrusive in a pre-Cambrian granitoid complex, overlain by Tertiary volcanics. A basic granite is cut by great tongues of aplite and pegmatite dikes paralleling the N.-S. vein system.

Ore is a silicified quartz-porphyry with specular and spathic iron and carries copper and gold values. In the N.-S. Sazarac vein, 5' wide, the ore is specular hematite in a silicified quartz-porphyry, the vein being 15' wide on the 200' level. The Bornite is an E. W. vein 5' wide, claimed to average \$15 to \$20 per ton for a length of 100' and depth of 60'. Four per cent. Hill is a stockwerk of veinlets, making a possible disseminated or porphyry orebody. Ore said to assay 10.4 oz. silver, 20.34% copper, and \$6 to \$300 gold per ton.

Development: by a 225' main shaft on the Sazarac, 92 and 111' shafts on the Bornite, and 100' shaft on the Queen claims.

Reported on by Carl Anderson, Walter M. Brown, and by W. W. Wishon in 1916.

In a recent circular, company claims to own, control, or was negotiating for, 4,800 acres in various districts and claimed that ore valued at about \$14,000,000 was ready for milling; also that the future mine possibilities have a valuation in excess of \$58,000,000, and mine and mill equipment is worth \$600,000. This circular claims that when these properties are in full operation the company will produce \$500,000 per month for many years, which is interesting if true.

The Hartley mill was apparently in operation for part of 1920.

DYKE DIVIDE MINING CO.

NEVADA

Incorporated to raise funds to prospect on group of claims situated 3 miles N. E. of Gold mountain. A raw prospect.

EAST DIVIDE EXTENSION MINING CO.

NEVADA

Office: Tonopah, Nev.

Officers: J. H. Miller, pres.; P. H. O'Neil, v. p.; J. E. Adams, sec.-treas.; Allen Rives, asst. sec.-treas., with R. F. Brown, directors.

Inc. March 22, 1919, in Nevada. **Cap.** \$150,000 shares; 10c par; assessable. Listed on San Francisco Stock Exchange.

Property: 9 claims, south of Allied Divide and north of Big Divide.

EAST DIVIDE MINING CO.

NEVADA

Office: Goldfield, Nev.

Officers: Joseph Mayer, pres.; J. K. Turner, v. p.; Ben Gill, sec.-treas.; with C. S. Sprague and C. A. Leager, directors.

Inc. March 30, 1918, in Nevada. **Cap.** \$150,000; 10c par; 1,400,000 outstanding. Transfers at company's office. Listed on San Francisco Stock Exchange. 3c high, 1c low, in 1921.

Property: 10 claims, 160 acres N. W. corner of tract 1,000' from the Tonopah Divide. Examined by Dr. Elftman and J. K. Turner. Property under same management as Alto Divide.

Development: by 400' shaft which entered lower breccia zone at 200'

At 80' from shaft, the E. cross-cut on the 400' level cut a vein 23' wide, assaying \$5.60 per ton. At last report, crosscutting was being continued to reach a rhyolite dike. Total workings, 1,800'

Equipment: suitable for depth of 1,000'.

EASTERN COPPER CO.

NEVADA

Idle. Mail returned from former offices, 805 H. W. Hellman Bldg., Los Angeles, Cal., and 32 Broadway, New York City. **Mine address:** St. Thomas, Nev.

Officers: L. H. Lathrop, pres.; J. K. Turner, v. p.-cons. engr.; C. P. Campbell, sec.-treas.; C. R. Topping, supt., with W. F. Vidal, directors.

Inc. 1917, in Arizona. **Cap.** \$1,500,000; \$1 par; 734,100 shares issued. Stricken from New York Curb, June, 1918. Security Transfer & Registrar Co., New York, and Registration Surety Co., S. F., transfer and registry agents, respectively.

Property: 12 claims, 240 acres, in Gold Butte mining district, Clark county, about 15 miles east of St. Thomas, the nearest railway point. Ore occurs in a fracture zone in limestone and carries copper in the form of chalcocite and malachite.

Report by L. J. Lathrop recommends sinking a shaft. Lessees have shipped surface ore only in past, some of it reported to have carried 29% copper.

Is a prospect which needs deep development.

EASTERN PRINCE GOLD & SILVER MINING CO.

NEVADA

Address: H. F. Earle, sec., Newhouse Bldg., Salt Lake City.

Cap. \$100,000 shares 10c par. Listed on Salt Lake City Exchange, and offered at a cent a share in June, 1919.

Property: 8 claims in Ely district, Pioche, Lincoln county, believed to have extensions of the adjoining Prince Consolidated low-grade, iron-manganese deposits, carrying a little silver, lead, zinc and gold.

EASTERN STAR MINING CO.

NEVADA

Office: Winnemucca, Humboldt county, Nev.

Officers: E. Reinhart, pres.; Chas. F. Spilman, v. p.; L. G. Campbell, sec.-treas.; with Daniel Craig and R. S. Bolam, directors.

Inc. 1911, in Nevada. **Cap.** \$1,500,000; shares \$1 par; outstanding, 1,340,000.

Property: 5 claims, 70 acres, in Gold Circle mining district, Elko county, with a 4½' gold quartz vein, in andesite.

Development: by 280' incline shaft with levels at 75', 160' and 240'.

Equipment: includes two 25 h. p. engines.

Examination and report by a mining engineer estimated 5,000 tons of ore in sight averaging \$20 a ton. Idle.

E. & F. MINING CO.

NEVADA

Idle. **Address:** care Walker Bros. Bank, Salt Lake City, Utah. **Mine office:** Pioche, Lincoln county, Nev.

Officers: A. C. Ellis, Sr., pres.; A. Levy, sec.; Walker Bros. Bank, treas. Arthur Murphv, mgr.

Inc. March 17, 1902, in Utah. **Cap.** \$100,000; shares 50 cts par; assessable.

Property: 12 claims, 11 patented, 240 acres, in the Bristol and Jack-rabbit district, 1½ miles from a railroad. Mine has a 450' incline shaft and 2 tunnels, one of 350', with total workings of 5,000'.

Equipment: includes a 25-h. p. gasoline hoist and necessary mine buildings. Mine produced a little copper ore, with excess of iron, but was shut down 1907. Development work in lower tunnel resumed in 1914. Property operated under lease by Arthur Murphy in 1918, who shipped 7 tons of high-grade ore daily in September, 1919, and opened a new orebody 200' below the tunnel level. **Production:** up to January, 1921, said to be \$250,000 from ore averaging 21% copper, 18½ oz. silver, some lead and gold.

Reported early in 1921 that R. J. Evans, W. A. Clark, Jr., and others,

had purchased property from the Ellis estate; Mr. Evans is said to be a large stockholder in the Bristol mines which adjoin.

ELDORADO DIVIDE MINING CO.**NEVADA**

Office: R. Nenzel, agt. Lovelocks, Nev.

Officers: Rudolph Nenzel, pres.; A. B. Harlan, v. p.; C. H. Jones, sec-treas.; W. E. Sirbeck, V. P. Twigg, directors.

Inc. April, 1919, in Nevada. Cap. \$150,000; par 10c; 750,000 treasury shares.

Property: 4 claims adjoining Frisco Divide and near Ajax Divide. 3 miles S. E. of Gold mountain. Is an undeveloped prospect.

ELDORADO ENTERPRISE GOLD MINING CO.**NEVADA**

E. P. Jeans, pres., Las Vegas, Nev. Company reported to have made a discovery of platinum ore on their property, 1916. No recent returns.

ELDORADO-FLAGSTAFF MNG. & MLG. CO.**NEVADA**

Address: Nelson, Nev.

Officers: C. R. Welch, pres.; Alex Mead, v. p.; G. A. Duncan, sec-mgr.; I. W. Bennett, treas.; with Peter Anderson, Clark Moore and Duane Miner, directors.

Inc. Sept., 1917, in Nevada. Cap. \$500,000; \$1 par; 161,000 outstanding.

Property: 11 patented claims, 173 acres, in Eldorado canyon district, Clark county, carries gold-silver ore in a mineralized dike of monzonite-porphry said to average 70 oz. silver.

Production: about 16,000 tons reported to have averaged \$14 per ton. Was producing in 1918 and apparently active in 1919-20.

EL DORADO GOLD STAR MINING CO.**NEVADA**

Operating claim in Nob Hill section El Dorado mining district. Company offered 40,672 shares for sale, August, 1917, proceeds to pay off \$15,000 due on purchase, and to pay for development. No later returns.

ELECTRIC GOLD MINES CO.**NEVADA**

Address: McLean, via Tonopah, Nev. Sol. Camp, supt. Property controlled through purchase by Frank E. Horton, representing other San Francisco men.

Property: the Weepah group, 6 claims, on S. W. slope of Lone Mts., Esmeralda county, 10 miles S. of McLean. Two vein systems cutting schists and limestone, carrying gold and a little silver, have been traced for 1,500'. Ore is reported to be free-milling with a value of \$12 to \$20 for a 70' width.

Development: by 4 shafts; the deepest, 170', is reported to have uncovered a rich ore shoot, Sept. 1, 1921. Equipped with 15 h. p. hoist.

ELGIN-BELLEHELEN DIVIDE MINING CO.**NEVADA**

Name changed from Silverfields Ajax Mines Co.

Office: F. A. Burnham, Tonopah, Nev.

Inc. March, 1919, in Nevada. Cap. \$150,000; par 10c.

Property: a gold-silver mine at Bellehelen, 30 miles due E. of Tonopah, in which an 18" streak of rich silver ore was found at depth of 120' early in 1919. Second-class ore sent to the West End mill at Tonopah assayed \$84.34 per ton. At Divide, company has 3 claims and 3 fractions.

ELKO MINING CO.**NEVADA**

H. L. Hollis, cons. engr., 1025 People's Gas Bldg., Chicago, Ill.

Property: Alpha mine at Jarbidge, Elko county, contains veins of gold-silver ore in Tertiary volcanic rocks. See Bull. 497, U. S. Geol. Survey, 1912, by F. C. Schrader, for geology, etc. Property under lease with option to purchase, June, 1919.

Development: crosscut tunnel, several hundred feet long.

Equipment: 5-stamp mill.

ELKO PRINCE LEASING CO.**NEVADA**

Out of business. Operated property of the Elko Prince Mining Co. (which see), and when indebtedness to J. N. V. Dorr was paid off, the mine reverted to original owners.

Nev.

Officers: L. L. Savage, pres.; R. P. Jackson, v. p.; Henry E. Haws, sec.-treas., with J. V. N. Dorr and F. F. Sharpless, directors. L. D. Dougan, supt.

Cap. \$1,150,000; \$1 par; 1,108,566 shares issued.

Annual report to January 1, 1920, shows: total assets, \$1,155,116, including cash, \$28,523 and supplies, \$41,154; total liabilities, \$1,282,434; accounts payable, \$4,214 and depletion reserve, \$169,656; general deficit, \$127,320. Income was \$183,515, of which bullion was \$181,177; disbursements were \$171,275, leaving operating profit of \$12,240 and a net deficit of \$112,388 after deducting for depreciation and depletion.

Dividends: begun October, 1917, total about 30c per share, the last of 3½ cents, being paid in Oct. 1919.

Property: 9 patented claims at Midas, Gold Circle district, Elko county, 5½ miles N. E. of Golconda on the S. P. R. R. and 33 miles from Red House on the W. P. R. R. During 1915-18, the Elko Prince was equipped and operated by the The Dorr Co., acting as the Elko Prince Leasing Co., and mine is still operated by the Dorr.

Geology: the prevailing and oldest rock of the Gold Circle district is rhyolite cut by andesite. Deposits occur as fissure or replacement veins and as sheeted zones in rhyolite. The vein filling is mainly quartz and the values are in gold and silver, the gold occurring native or associated with pyrite, and the silver free or as argentite in streaks. The veins run north-westerly with a dip of from about 65° to vertical. The Prince vein developed by drifts and crosscuts is 14-15" wide, with a N. W.-S. E. strike, and dip from vertical to 85° N. E. Values occur as native silver and free gold. The June Bell, a parallel vein to the Elko Prince, is 30" wide and 100' long.

Development: by tunnels, shafts and winzes to depth of 950' During 1918 the drifts on the 300, 600 north and south, 750 and 900' were extended with disappointing results on the lower levels, but opening up promising ore shoots on the 300 and 600' South which were followed downward. During 1920-21, the ore shoot opened on the 600' level was being followed in the N. drift of the 750' level, for a length of less than 100'. The north shoot is 1,500' from the shaft, and an air locomotive is to be used for hauling cars. In July, 1920, a sudden flow of water prevented access to 750' level for some months, involved \$40,000 expense, and curtailed mill operations.

Ore reserves: (Jan. 1, 1921) broken ore, 850 tons; developed ore, 9,956 tons and probable ore, 370 tons; with a total estimated gross value of \$253,324.

Equipment: includes complete mining plant and mill, employing 4' Marcy mill, 5 by 14' tube-mill, Dorr classifier and thickener, Oliver filter, 185-h. p. oil engine, 10,000' water pipe-line, etc., the whole valued at \$214,922, with daily capacity of 55 tons. Transportation from rail is by a Best tractor. Forty men are employed.

Production: in 1920, 12,514 ton of ore milled, yielding \$14.40 bullion per ton. Since Nov., 1915, total output is \$1,570,000 from 82,000 tons of ore.

An excellent description of mine and mill is given in "Trans. Am. Inst. Mng. & Met. Eng." Vol. 60, p. 78, 1919.

ELKORO MINES CO.

NEVADA

Subsidiary of Yukon Gold Co., which see.

Office: 120 Broadway, New York; 582 Market St., San Francisco, Calif. **Mine office:** Donald Steel, mgr., Jabidge, Nev.

Officers: William Loeb, Jr., pres.; W. E. Bennett, v. p. and sec.; O. B. Perry, gen. mgr.; Charles Earl, R. W. Straus, E. L. Newhouse, E. E. McCarthy, F. R. Foraker and Louis Sloss, directors; Leopold Frederick, treas.

Inc. Sept., 1916, in Delaware. **Cap.** \$1,000,000; \$5 par; all issued, and of which Yukon Gold owns 60%. D. A. Crockett, 149 Broadway, New York,

transfer agent; Guaranty Trust Co., of N. Y., registrar. Annual meeting, third Tuesday of January.

Property: 75 lode claims, including the Starlight, the Long Hike and O. K. groups in Jarbidge district, Elko county. In each of these groups strong fault fissures in porphyritic rhyolite show alteration, leaching and replacement in the brecciated vein material and walls. Ore consists of sugary and solid quartz, adularia and silicious rhyolite, carrying free gold, with a little silver.

Development: by 5 adit tunnels, aggregating 5,000', giving a depth of 800' in the Long Hike, 4 adit tunnels, aggregate length 4,000', to depth of 700' in the Starlight, and 2 adit tunnels, 3,000', to depth of 400' in the O. K. mine.

In 1920, no work was done on the O. K. group; 3,723' of extensions were made on the Long Hike; cost of mining and milling was \$5.52 per ton. Ore reserves are estimated to yield a net profit of \$500,000 and including probable ore, \$1,000,000.

Equipment: electric hoist, 2 compressors, pumps, 2 aerial trams; also 100-ton mill employing counter-current decantation system of cyanidation in continuous operation since March, 1918.

Production: in 1919, averaged 112 tons of ore per day; in 1920, output was 41,248 tons of ore averaging \$9.69 per ton with a recovery of 88.64%, and was the largest producer of gold ores in the State for that year. Operating at full capacity during 1921.

ELKTON DIVIDE MINING CO.

NEVADA

Officers: C. H. Church, pres., Tonopah; E. R. Yerington, v. p.; S. C. Jameson, sec.-treas., with F. T. and C. F. Krebs, Will Brougher, and W. E. Casson, directors.

Property: 2 claims at N. end of Divide district, and 3-year lease on a silver-lead claim 2 miles from Reservation, Mountain View district. Mineral county.

ELY AMALGAMATED COPPER CO.

NEVADA

Company controlled by O. Raymond Knight, pres., Provo, Utah, who owns 51% interest.

Inc. 1907, in Utah. **Cap.** \$100,000; shares 10c par.

Property: 6 claims, and a townsite, about 1 mile from the Steptoe smelter, of the Nevada Consolidated Copper Co., at McGill, White Pine county, carries silver-lead ores. Several carloads of ore shipped in 1917. No recent work reported.

ELY BELL MINING CO.

NEVADA

Company dead. Stock worthless. Fully described Vol. XI, Copper Handbook.

ELY-CALUMET COPPER CO.

NEVADA

A company of same name was officially reported defunct in August, 1917. Either its corporate existence did not cease at that time, or another company with this title has been formed.

Address: A. D. Meyers Ely, Nev., who with J. M. Hayden and others apparently hold a lease on the property.

Property: 32 claims, 600 acres, at extreme eastern end of the known copper belt, in White Pine county, one mile N. of Ely, covering a hill of limestone, traversed by E.-W. fault veins of ferruginous quartz, much brecciated, with replacement bodies of ironstone carrying copper.

Development: by a 450' two-compartment shaft and 500' of tunnels, with 1,300' total workings. Zinc-lead-copper ores were being developed summer of 1921.

ELY CONSOLIDATED COPPER CO.

NEVADA

Company inactive. **Office:** 414 Judge Bldg., Salt Lake City, Utah. **Mines:** Ruth, via Ely, Nev.

Officers: at last accounts, S. M. Levy, pres.; D. B. Shields, v. p.; Gideon Snyder, sec.; John Pingree, treas.; with Grant Snyder, directors. C. W. Goddard, assy. engr. and mgr.

Inc. October 2, 1906, in Utah. Cap. \$1,500,000; \$1 par; changed January, 1917, from \$1,000,000, shares \$10 par, assessable, of which 300,000 shares were donated to treasury by incorporators; 887,765 shares listed on Boston Curb. Striken from New York Curb June, 1918. Registrar and transfer agent, United States Corporation Co., 65 Cedar St., New York.

Property: 3 groups, 20 claims, 370 acres, in the Ely district, White Pine county.

The Ely property, 15 claims, about 300 acres is on the south side of the mineral belt, near the Ruth and Jupiter groups of the Nevada Consolidated. Developed by 3 vertical shafts. The 625' Brilliant shaft has silver-lead ore on the 400' level, and near the bottom is said to show a 100' bed of disseminated copper ore, below commercial grade. The American shaft is 500' deep. No work done in recent years, but property held in tact.

ELY COPPER CO.**NEVADA**

Office: 815 Ernest & Cranmer Bldg., Denver, Colo. No representative at Ely, Nev. Idle since 1907. Fully described Vol. XI, Copper Handbook. Unfavorably regarded.

ELY GIROUX COPPER CO.**NEVADA**

Office: 111 Broadway, New York. **Mine address:** Kimberly, Nev.

Officers: Robert L. De Groff, pres.; Wm. S. Woodhull, v. p.; Rosell S. Nichols, sec.-treas.; with Elmer E. Wigg, J. Irwin Mutch and Wm. J. Hoey, directors.

Inc. Dec. 2, 1909, in Nevada. Cap. \$1,000,000; \$1 par; \$611,000 outstanding.

Property: 7 patented claims in Robinson district, White Pine county. Attempts made to raise funds for development, but no work has been done. Idle.

ELY-MIZPAH COPPER CO.**NEVADA**

Property: the Modoc group, near Ely, Nev. Assessment work neglected and property probably forfeited. See Vol. XI, Copper Handbook.

Principal promoter was A. M. Kearns, 1st Natl. Bank Bldg., Denver, Colo.

ELY NORTHERN COPPER CO.**NEVADA**

Merged in 1919 into the **Boston & Ely Consolidated Mining Co.**, which see.

ELY REVENUE COPPER CO.**NEVADA**

Office: 830 Equitable Bldg., Denver, Colo.

Officers: F. C. Goudy, pres.; L. F. Twitchell, v. p.; J. P. M. Humphrey, sec.-treas.; above, with R. E. Sloan and A. E. Reynolds, directors.

Inc. 1907, in Colorado. Cap. \$1,000,000; shares \$1 par. International Trust Co., Denver, registrar. Annual meeting first Tuesday in March.

Property: 132 acres, known as the Revenue group, at Ely, White Pine county, near the Chainman and Altman mines. Idle for several years but reported under bond and lease to S. Herbert Williams, August, 1921.

ELY VALLEY MINING & MILLING CO.**NEVADA**

Dead. Fully described in Vol. XIII. Property now owned by the Silgoled Mining Co. of Nevada, which see.

ELY VERDI COPPER CO.**NEVADA**

Address: Geo. Wingfield, pres., Goldfield, Nev. Mine near Ruth, via Ely.

Directors: S. R. Robert John Berry, of Ely; A. P. Sawyer, and Leslie L. Savage, of Goldfield; M. R. Brown and H. S. Anderson, of Pierre, S. D.

Inc. May, 1912, in South Dakota. Cap. \$5,000,000; shares \$5 par. Is a reorganization of company of same name that was listed on New York Curb in 1909.

Property: a large group of claims south of the Copper Flat steam-shovel pit of the Nevada Consolidated, in White Pine county. Only assessment work being done

ELY WITCH COPPER CO.**NEVADA**

Officers: J. E. Bamberger, pres., 163 So. Main St., Salt Lake City, Utah;

D. M. Hyman, v. p.-treas.; H. Cohen, sec.; Ernest Bamberger, gen. mgr.; preceding with H. G. McMillan and W. W. Armstrong, directors, at last accounts.

Inc. November 22, 1906, in Maine. **Cap.** \$5,000,000; shares \$5 par. Stock listed on Boston Curb, but inactive at last accounts.

Property: 7 claims, 1 fractional, 54 acres, patented, bought for \$275,000, lying in the porphyry zone between the Ruth and Cumberland-Ely mines of the Nevada Consolidated, White Pine county, shows large blowouts of iron-stained porphyry.

Development: by 300' shaft, with levels at 100' intervals, and by tunnels of 1,200', 600' and 1,050', with 3,500' of workings. Development was disappointing, for, while claims cover the main monzonite belt of the district, the underground work on 300' level showed values too low to work. Company was a speculative promotion at time Nevada Consolidated was floated, and proving lean on development, has been idle since.

EMANCIPATOR DIVIDE MINING CO.

NEVADA

Address: Wm. Forman, res. agt. Tonopah, Nev.

Operated by controlling interests of the Webster Mines Corporation.

Officers: W. J. Webster, of Wilmington, Del., pres.; W. C. Rannels, v. p. and gen. mgr.; L. P. Carpenter, sec.-treas. and cons. engr.

Inc. March, 1919, in Nevada. **Cap.** \$150,000; par 10c.; 750,000 treas.-ury shares.

Property: 4 claims, $\frac{3}{4}$ mile E. of Gold mountain, is reported to show two strong dikes or veins, showing values at surface.

Equipment: complete for shaft sinking, etc. Inactive, 1919-20.

EMPIRE-NEVADA COPPER MINING & SMELTING CO. NEVADA

Address: Yerington, Nev. Wm. Gelder, pres.; E. P. Minter, sec.; J. E. Gelder mgr.

Inc. in Arizona. **Cap.** \$5,000,000; shares \$5 par. Property taken over by Walker River Copper Co., under a lease which provides that when the royalties paid amount to \$500,000, the title will pass to the leasing company. The General Development Co. (Lewisohns) is a small stockholder in the Empire Nevada company.

Property: about 500 acres on Copper Flat in 2 groups; 1 about 1 mile W., the other $2\frac{1}{2}$ miles N. W. of Yerington, Lyon county. Ore occurs in bunches and disseminated throughout a body of monzonite-porphry, said to be opened for 3,000' in length and 1,000' wide, carrying copper in the form of silicates, carbonates and oxides, a considerable part of it averaging 2.65% copper.

Development: by 5 shafts from 80 to 160' in depth, several tunnels and open cuts, and also by diamond drilling. Mine is said to have produced about \$500,000 from surface workings. Shipped 6,000 tons of 6% ore to Mason Valley smelter, 1912, and 2,900 tons in 1914. Property has small smelting plant, assay office, hoist, boarding house, etc. The leasing company was producing in 1919 and doing development work at last report.

ESMERALDA COPPER & SILVER CO.

NEVADA

Successor to Esmeralda Copper Co.

Address: Luning, Nev., or 6 Montrose Ave., Verona, N. J.

Officers: Mavor D. H. Slayback, pres.-treas.; Jas Calvert, v. p.-mgr.; J. W. Parker, sec., with J. W. Van Schoick, directors. L. B. Spencer, cons. engr.

Inc. 1907, in Nevada. **Cap.** \$1,200,000; par \$1.

Property: 9 claims, 180 acres, at Luning, Mineral county, in Santa Fe district, developed by shafts and crosscuts, to depth of 300'. Assays reported to average 9% copper and 4 to 5 oz. silver. Stock was offered or sale (1919) below par and on a "liberal payment plan" to furnish funds for further development.

Inactive 1919-20.

EUREKA-CLIMAX MINING CO.

NEVADA

Office: Eureka, Nev.

Officers: Tasker L. Oddie, pres.; M. D. Fairchild, v. p. (Box 8021, Reno, Nev.); John E. Josey, sec.-treas.; with Ed. Malley, and Al. Revert, directors. L. A. Harris, supt.

Inc. 1919, in Nevada. **Cap.** \$150,000; 15c. par; 500,000 treasury shares. Transfers at company office: Registration Surety Co., San Francisco, transfer agt. Stock listed on San Francisco Stock Exchange.

Property: 3 claims, 70 acres, which have produced \$100,000 worth of rich ore, on Prospect Mtn., said to be the high-grade section of the Eureka district, Eureka county. The Deadbroke mine opened by a long tunnel from which some rich ore was produced in the 70's, has been reopened.

In the "Nevada Mining Press" of November 25, 1919; it was advertised that "while the Eureka-Croesus Mining Co. as such owns no interest in the Eureka-Climax Mining Co., those who own the controlling interest in the Eureka-Croesus are largely interested in the Eureka-Climax, and all of its mining operations will be conducted by the technical staff of the Eureka-Croesus. The secretary and treasurer of the Eureka-Climax Mining Co. is assistant secretary and treasurer of the Eureka-Croesus, under whose supervision the accounts and books of the company will be kept, in the office of the Eureka-Croesus Mining Co. at Eureka."

Eugene Davis, formerly of the Eureka-Croesus Mining Co., has taken a large interest in the Eureka-Climax.

EUREKA-CROESUS MINING CO.

NEVADA

Offices: 103 Park Ave., New York City, and Eureka, Nevada.

Officers: Frank L. Torres, pres.; S. Russell Smith, v. p.; Geo. P. Hyde, sec.-treas., with A. P. Entenza of Detroit, directors. John E. Josey, asst. sec.-treas.; G. O. Bradley, cons. metallurgist. **Operating staff:** L. A. Harris, mgr.; C. A. Berryman, supt.

Inc. March, 1917, in Delaware. **Cap.** \$3,000,000; increased Sept. 21, 1920, from \$1,500,000; \$1 par; increase, under the law, to be sold at par only; issued, June, 1921, 1,700,000 shares. On its organization, company issued its entire capital stock, \$1,500,000, in payment for mining claims and \$91,000 cash.

U. S. Corporation Co., New York, registrar and transfer agents. Stock listed on New York Curb and San Francisco Stock Exchange; traded in on Boston Curb. Share range: $\frac{7}{8}$ -2½ in 1918; 1-2¼ in 1919; ½-2 in 1920; \$2 high and 24c. low in 1921.

Statement for Aug. 31, 1920, shows cash and bills receivable of \$21,188; bills payable were \$112,588, of which \$100,000 is for advances made by Eugene Davis and Pres. Torres. Development and exploration costs for year were \$93,904; other operating expenses were \$85,194. Up to June 1, 1920, shipments had shown a gross smelter value of \$311,806.

Property: 13 patented and 8 unpatented claims, total 135 acres, near Eureka, Eureka county, Nev. Claims include 3 old mines worked 1879-1889, one, the Dunderberg, producing 51,268 tons of ore netting \$1,882,933. Prior to 1891, this mine was worked to a depth of 891' below the outcrop, with extensive workings at 550 and 700' in depth. Also the Connolly mine opened by tunnel and an inclined blind shaft 400' deep; this mine produced 4,657 tons of ore netting \$166,794 prior to 1897.

Development: new work by present company includes the 425' vertical Catlin shaft with 7,000' of level work, all above elevation of the deeper levels of old Dunderberg mine. An incline 300' deep extends below the 400' level on a small orebody in Connolly ground. In 1921 company started sinking the Torres shaft from a point on the 400' level, not far from the old Atlas shaft of the Dunderberg. This will, it is said, be extended to get beneath all the old Dunderberg workings.

Detailed examination of all accessible workings, made in mid-1921 by several engineers, showed that various orebodies occur as replacements of limestone along dominant fault fractures, where they are cut by cross fissures. The orebodies now mined are small compared to those formerly

worked and being oxidized to the deepest levels known, only shipping ore can be mined. This ore is accompanied by more or less lowgrade material which cannot be profitably mined under existing conditions, and it is possible that the total amount of such lowgrade ore exposed in old and new workings may be as much as 200,000 tons.

From a detailed study of geological conditions, by various engineers, it is apparent that the orebodies were formed by ascending metal bearing waters of igneous origin; the ore has been oxidized in places by descending surface waters, with very slight local concentration of silver-lead ores; water level has not as yet been reached by any of the Croesus workings, and probably lies much lower than the deepest present levels; oxidized ore will extend to water level and sulphide ores may be expected below water level; workable ore occurs in masses along fissures which form a reliable guide in mine exploration and a comparison of the grade of ore and size of ore-bodies in the uppermost and lowest workings show no appreciable lessening of either value or size. The above conditions indicate that new and deeper work beneath the old stopes may open up a considerable tonnage of commercial ore.

The stock market manipulations of the company's shares have been notorious and many statements issued by brokerage houses concerning the property and company earnings, are unwarranted by the facts. Late in 1921 a reorganization was effected. Company is overcapitalized and mine needs heavy expenditures for exploration. Current shipment cannot meet current expenses for any considerable period and despite the fact that shipments prior to June 1, 1920, totaled 4,800 tons of \$64,47 ore (gross value), the net sum realized was very disappointing to stockholders.

EUREKA DIVIDE MINING CO.

NEVADA

Office: William Forman, agent, Tonopah, Nev.

Officers: J. H. Miller, pres.; F. M. Manson, v. p.; J. E. Adams, sec.-treas.; F. B. Baker, G. F. Sloan, directors.

Inc. March 6, 1919, in Nevada. **Cap.** 1,500,000 shares; 10c par; assessable. Listed on San Francisco Stock Exchange.

Property: 7 claims, between the Calumet and Airedale, in southeastern part of district, developed by 200' shaft, equipped with hoist and other machinery. Is a prospect which has produced some ore from old shaft, and which shows good vein.

EUREKA-HAMILTON MINES CO.

NEVADA

Address: Hamilton, Nev.

Officers: R. G. Ward, pres.; Chas. D. Olney, v. p.; Thos. J. Lynch, sec.-treas.; with J. M. Lynch and H. Z. Peters, mgr., directors.

Inc. in Nevada, 1920. **Cap.** \$1,500,000; \$1 par; 443,484 shares sold and issued. Registration Surety Co., San Francisco, registrar; transfers made, 265 Russ Bldg., San Francisco. Listed on San Francisco Stock Exchange. The California Corporation Commission permitted (Sept., 1920) the sale of treasury stock at 30c per share.

Property: 17 claims, 230 acres, in part patented, on Treasure hill, Hamilton district, White Pine county, adjoining the Eberhardt mine, and 40 miles S. E. of Eureka. Ore occurs as replacements in folded limestone in contact with shale.

Development: by 3 shafts, deepest 240', and the Pocatello 550' tunnel. An orebody, 18' wide and 40' long, is reported to average \$30 per ton. Work during 1921 was confined largely to opening ore above and below the Pocatello tunnel, and in September it was reported that \$270,000 worth had been developed. A 3-drill air compressor and air hoist were purchased. Also reported that a number of plans for refinancing were being considered, one being the purchase of property by the Tonopah Mng. Co.

In spring of 1921, Eureka Hamilton did much advertising with the slogan, "if it's about Hamilton it is so". Property is thought to have merit.

EUREKA-HOLLY MINING CO.**NEVADA**

Successor to Holly Mining Co.

Office: 576 Mills Bldg., San Francisco, Calif.

Officers: B. F. Shepherd, Jr., pres.; W. A. Barnes, v. p.-gen. mgr.; E. W. Choynski, sec.; J. B. Cottle, treas.; with E. S. McCurdy, directors L. Brooke, supt.

Inc. June 26, 1917, in Nevada. Cap. \$500,000; \$1 par; issued \$426,000. Transfer agt. and registrar, Security Transfer & Registrar Co., New York, or company's office. Stock listed on New York Curb and San Francisco Stock Exchange. Annual meeting, 2nd Monday in September. For fiscal year to June 30, 1920, current assets were \$71,978 and liabilities, \$45,697. Total revenue was \$61,021 and net operating profit, \$6,035.

Property: 12 claims, 206 acres, on Mineral Point, Eureka district, contains deposits of lead-silver ore in limestone. There are also 320 acres of ranch and water-rights. Property was the old Idaho mine, acquired in 1917, and reputed to have yielded \$150,000 from surface workings.

Development: by 600' shaft with levels at each 100'; total workings 6,500'. Two orebodies—the east and west—are being developed, consisting of low grade (5 oz. silver, 10% lead) with frequent shoots of high grade ore averaging 20 oz. silver and 40% lead. Latest reports announce the uncovering of new orebodies on 400', 500' and 600' levels. On June 30, 1920, ore reserves were: 60,000 tons milling grade and 3,000 tons shipping grade. Reserves of former increased to between 70,000 and 100,000 tons, January, 1922.

Equipment: 2 semi-Diesel 75 h. p. engines, hoists, air compressor, 50' head-frame, etc. A 25-ton pilot mill put in operation spring of 1921, to be followed by 100-ton reduction plant.

Production: high grade only amounted to a gross smelter value of \$60.-959 for year ending June 30, 1920, or an average of \$62.50 for 975 tons; for year 1920-21, shipments yielded \$77,641. Mine costs were \$8.80; transportation, \$13.81; treatment, \$4.78; total \$27.39 per ton.

Is a fairly promising property sponsored by reputable people. Same management is responsible for operations of Bullwhacker Consolidated, the workings of which are to be tapped through the Holly shaft.

EUREKA KING MINING CO.**NEVADA**

Controlled by Eugene Davis, Room 1111, Canadian Pacific Bldg., Madison Ave. & 44th St., New York City.

Property: comprises a group of claims under the higher part of Prospect Mtn., near Eureka, Nevada, opened by the Eureka tunnel.

Development: is extensive, including winzes, drifts and crosscuts below the tunnel level and stopes, etc., above the tunnel. The orebodies are apparently disconnected replacements of limestone, of irregular shape and size, and are thus far not comparable in extent with those formerly worked in the big mines of the district. As the water level is not yet reached, there is a possibility of finding further orebodies below existing workings, but prospecting will be costly owing to length of tram and working conditions.

Mine regarded as a prospect of doubtful merit.

EUREKA-NEVADA MINING CO.**NEVADA**

Office: 226 Dooly Block, Salt Lake City, Utah. Mine office: Eureka, Nevada.

Officers: W. J. Robinson, pres.-mgr.; Wm. Story, Jr., v. p.; A. G. Burritt, sec.-cons. engr., with A. W. Hyre and Alonzo Billings, directors. G. A. Fletcher, supt.

Inc. July 17, 1917. Cap. \$10,000; shares 1c. par; 800,000 issued. Stock assessable when treasury is exhausted. A \$30,000 8% convertible bond issue, carrying a stock bonus, was authorized Dec. 12, 1921. Stock was donated for this purpose. Annual meeting, second Monday in July.

Property: 6 claims (4 patented) and fraction, 100 acres, on Prospect mountain, Eureka district, Eureka county. Ore occurs in fissure veins and

as a chamber deposit in limestone. Ores are silver-lead, both galena and carbonate; shipping ore said to average \$50 per ton and up.

Development: by 2 tunnels, 1,400' and 1,200', the upper with 450' back and 120' above the lower. Lower tunnel equipped with small compressor. Upper tunnel is in the hands of lessees. Operating 1919-1921.

EUREKA-PRAIRIE MINING CO.

NEVADA

Address: Hugh Leonard, gen. mgr., Eureka, Nev.

Property: a number of mines, including the Marguerita, on Adams hill, Eureka district and county.

Reported, December, 1921, that funds were available for development and equipment.

EUREKA-PRINCE MINING CO.

NEVADA

Office: Eureka, Nev. Controlled by Eugene Davis, 1111 Canadian Pacific Bldg., Madison Ave., at 45th St., New York City. **Officers:** M. H. Briggs, pres.; T. C. LeFevre, v. p.; J. D. Peckner, sec.-treas

Inc. in Nevada, 1920. **Cap.** \$1,000,000; \$1 par; 333,000 treasury shares. Transfers made at company office. Stock listed on San Francisco Stock Exchange.

Property: the old Silver Lick mine, 13 claims (5 patented), on Adams hill, Eureka district, Eureka county. Lead carbonate ores occur as replacements along fractures in flat dipping beds of limestone; low grade ore averages \$17.83 with silver at \$1 per oz.; high grade shipments have returned up to 1.5 oz. gold and 79 oz. silver. Deepest workings, 140', at which level, the ore shoot is reported 3 to 4' wide. Said to have produced \$250,000 prior to 1896.

Company is controlled by Eugene Davis, formerly of the Eureka Croesus company, who will, it is reported, sink the shaft to 500' level in order to prove the downward extension of the ore.

EUREKA SILVER LICK EXTENSION MINES CO.

NEVADA

In reply to an inquiry, we are informed that those in control of this company and of Broken Hills are the same, and it is disquieting to find that the Fidelity Finance & Funding Co. (a George Graham Rice promotion) has been assisting in its stock selling campaign.

Cap. 1,500,000 shares; 325,000 in treasury, May 9, 1921.

Property: in Eureka and Churchill counties, the latter comprises the Westover group of 3 claims, 55 acres, adjoining the Broken Hills, on the W. According to "the very highest geological opinion" this property may prove to contain "the western extension of the Broken Hills vein system," etc.

EUREKA UNCLE SAM CONS. MINING CO.

NEVADA

Office: 321 Monadnock Bldg., San Francisco, Calif. **Mine address:** D. States, supt., Eureka, Nev.

Officers: I. Salinger, pres.; F. T. Torpey, v. p.-mgr.; H. D. Edwards, sec.-treas., with Edwin Shaw and P. E. Ellis, directors. L. E. Rosenshine, cons. engr.

Inc. May, 1920. **Cap.** \$100,000; 10c. par. Stock listed on San Francisco Stock Exchange. California Corporation Commissioner has permitted stock sales.

Property: 5 claims (2 patented) on Prospect Mtn., Eureka district Eureka county, including the Hamburg and Southern Pacific, purchased in 1921. The old Hamburg mine is said to have produced \$3,000,000 above the 425' level. An option is held on 4 other Hamburg claims.

Property said to show extension of Eureka-Croesus ore zone.

Development: by tunnel to cut old workings of Hamburg mine at a depth of 400', reported to be 900' long, Jan. 1, 1922, with 450' to go to reach the 860' Hamburg shaft. The latter has levels at 250, 450, 600 and 800'. Several cross channels, one 7' wide, have been discovered, carrying \$20 milling ore with lenses of high-grade.

Equipment: 4-drill compressor; a 200-ton mill is contemplated.

EXCELSIOR MOUNTAIN COPPER CO.**NEVADA**

Mail returned from former office: Hawthorne, Mineral county, Nev.

Officers: at last accounts, Frank D. Qualey, pres.-gen. mgr.; J. H. Suits, sec.-treas., Lick Bldg., San Francisco; George Brodigan, W. R. Jackman and W. B. Tait, directors. Wm. Winkelman, supt.

Inc. Aug., 1907, in Arizona. Cap. \$1,000,000; shares \$1 par. Annual meeting, June 7.

Property: Qualey mine, 13 claims, 260 acres, 16 miles S. E. of Hawthorne, in Whiskey Flat district, Mineral county, said to have surface showings of copper along a contact between granite and limestone. Has 4 shallow shafts and one 1,500' tunnel, said to show 4% copper ore. Total workings about 3,000' to a depth of 600'.

Equipment: includes 50-h. p. gasoline engine and 6-drill compressor. Property closed down since 1914.

EXCHEQUER GOLD & SILVER MINING CO.**NEVADA**

Office: 265 Russ Bldg., San Francisco, Calif. **Mine address:** Alex Wise, mgr., Virginia City, Nev.

Officers: H. Zadig, pres.; Alex Wise, v. p.; Chas. D. Olney, sec.-treas., with J. W. Davey and R. A. Hardy, directors.

Inc. November, 1904 in California. Cap. \$100,000; par \$1; all outstanding; assessable. Transfers made at company's office; Registration Surety Co., registrar.

Property: covers 400' of the Comstock Lode, Virginia City, Storey county, adjoining the Bullion on the south. Company is a non-producer. Holdings consolidated with those of other Comstock Lode companies to form Middle Mines Association, which see.

EXCHEQUER LEASING & MINING CORPORATION**NEVADA**

Address: C. S. Witmer, sec., 511 12th St., New York City, or J. W. Walker, Cherry Creek Mines, via Cobre, Nevada.

The Exchequer mine, owned by this company was bonded 1918-19 to Exploration Syndicate, but returned to company in 1921. Mine reported late in 1921 to be under lease to A. Z. Smith, et al. A 3 to 4' orebody opened on the 200' level is said to yield silver ore netting \$30 per ton.

EXPLORATION SYNDICATE No. 2**NEVADA**

Office: Room 1927, 25 Broadway, New York, John D. Clarke, treasurer.

In 1919, the syndicate was operating the Mary Ann mine under lease from the **Cherry Creek Silver Mng. Co.** and was reported to have purchased property of the Exchequer L. & M. Corp. The treasurer now (March, 1921) states that both properties have reverted to owners.

FAGAN CONSOLIDATED SILVER MINES CO.**NEVADA**

Address: P. A. Simon, Mina, Nevada.

Officers: P. A. Simon, pres.; E. S. Chafey, v. p.; B. W. Zachau, sec.-treas., with E. S. Mulford and F. M. Manson, directors. E. W. King, supt.

Inc. November, 20, 1919, in Nevada. Cap. 3,000,000 shares; 10c par, 1,500,000 in treasury. Company is a merger of the Norman Silver Mining Co. and Simon Fagan Mines Co. Some of the officers are also directors of the Simon Silver-Lead Mines Co.

Property: the Norman and Fagan groups, 12 claims, 200 acres, in Bell district, Mineral county, 5 miles S. W. of Simon Silver-Lead Mines Co.

Geology: the Norman group has a contact deposit enclosed between limestone, rhyolite and andesite, containing gold-silver-lead ore, said to average \$50 per ton. The Fagan group is on a lime-granodiorite contact like that of the Simon silver-lead mine. The contact is exposed by opencuts and pits for over 1,000' and shows commercial ore at many places; the ore is mainly limonite with 5 to 10% lead in form of carbonate, with 1 oz. of silver per unit of lead.

Development: the Norman has an 80' and 35' shaft, equipped with hoist, etc. Work to be concentrated on the Fagan group and a shaft was sunk

during 1920 to 260' and a new orebody is reported to have been discovered. In 1919, mine produced oxidized lead ore of shipping grade.

FAGAN EXTENSION MINING CO.**NEVADA**

Address: Mina, Nev.

Officers: H. B. Lind, pres.; I. L. Pierce, sec.

Inc. August 22, 1919, in Nevada. **Cap.** \$15,000; shares 1c par; 750,000 in treasury; 750,000 to be used for promotion stock.

Property: about 22 acres, adjoins north end and east sideline of Fagan and Fagan No. 2 claims, in Bell (Simon) district, Mineral county, only slightly developed.

FAGAN JUNIOR MINING CO.**NEVADA**

Address: Mina, Nev.

Officers: Dr. A. S. Abdun-Nur, pres.; J. E. Greenan, v. p.; B. W. Zachau, sec.-treas., with E. S. Mulford, Frank Dunn, F. J. Guirhovien and E. N. Marks, directors.

Inc. December 6, 1919, in Nevada.

Property: 2 claims, in Bell district, Mineral county, adjoining the Fagan on the southeast. The Fagan ore zone is expected to extend into the Fagan Junior.

FAIRVIEW EXTENSION MINING CO.**NEVADA**

Office: 1011 First Natl. Bank Bldg., San Francisco.

Officers: L. D. Gordon, pres.-gen. mgr.; E. B. Cushman, v. p.; H. G. Mayer, sec.-treas.; with J. R. Davis and H. R. Cooke, directors. Gibson Berry gen. supt.

Inc. July, 1919. **Cap.** \$1,000,000; 50c par; 515,000 treasury shares; 500,000 shares owned by **Round Mountain Mng. Co.** taken in exchange for lode rights.

Property: the lode rights of the Shot, Blue Jacket and Alta groups, 14 claims and 2 fractions, 182 acres, contiguous to the Round Mountain and Fairview Round Mountain properties, Round Mtn. district, Nye county. Three claims are patented; patents for others have been applied for. The Blue Jacket group was obtained from the **Round Mountain Blue Jacket Mng. Co.**, the others from the Round Mountain Mng. Co.

The ore occurs in stringers in an E.-W. zone of sheeted and highly silicified rhyolite, with maximum width of 1,000'. On the easterly margin of property, rhyolite contacts with granite, trending N. and S. One stringer has shown values of \$25 to \$50 gold per ton. Blue Jacket group produced \$80,000 prior to 1919. Developed by 100' shaft.

Equipment: 25 h. p. electric hoist and 50 h. p. compressor.

For first 6 months, up to Dec. 31, 1919, operating costs were \$9,558 with a net deficit of \$8,026. The management is the same as that of Fairview Round Mountain and Round Mountain companies

FAIRVIEW RED ROCK CONSOLIDATED MINES**NEVADA**

Office: J. A. Wright, financial agent, Exchange Bldg., Denver, Colo. H. A. Riedel, pres.

Inc. in Arizona. **Cap.** \$2,500,000; \$1 par. Stock offered at 5c per share cash, or 5½c. per share in 10 equal monthly payments, March, 1917.

Property: the Red Rock group, 15 claims, 230 acres, near Fairview P. O., in the Fairview district about 42 miles E. of Fallon, Churchill county, the nearest railroad point. The mine shows 2 parallel contact veins, about 400' apart, between limestone footwall and porphyry hanging wall, said to be from 2-8' wide at surface for about 1,500' and to carry ore averaging \$30 per ton in gold-silver-copper. The veins have an E.-W. strike, dipping at about 65°.

Mine without equipment and property as yet a prospect.

FAIRVIEW ROUND MOUNTAIN MINES CO.**NEVADA**

Main office: 1011 First Natl. Bank Bldg., San Francisco, Cal. **Mine office:** Round Mountain, Nev. **Corporate office:** Tonopah, Nev.

Officers: L. D. Gordon, pres.-mgr.; C. J. Berry, v. p.; H. G. Mayer.

sec.-treas., with Fletcher Hamilton, H. R. Cooke and J. R. Davis, directors. E. M. Erb, pur. agt., San Francisco; Gibson Berry, gen. supt.; R. J. Ledwith, mine supt.; E. A. Michal, mill supt.

Inc. June 25, 1906, in Nevada. **Cap.** \$1,000,000; \$1 par; 952,471 shares issued; 200,000 held by Round Mountain M. Co. Transfers made at company's office; Anglo-California Trust Co., registrar. Annual meeting, 3rd Monday in Feb., at Tonopah. Stock listed on San Francisco Stock Exchange. Sales 12c high; 10c low, in 1921.

Annual report for year ending Dec. 31, 1919 shows; assets, \$1,152,854, including mining properties, etc. \$990,178 bonds, stock and bills receivable, \$114,977; plant, \$24,075; and cash, \$20,790. Bills payable were \$12,500; and depletion reserve, \$93,267. Income from bullion, \$296,466; total operating costs, \$119,811 with net operating profit of \$131,168 after deducting for depletion and depreciation. Per ton costs were; mining, \$3.48; developing, \$4.54; milling, \$2.53; marketing and general, \$3.23; total, \$13.78.

Dividends: 2c in 1918; 14c in 1919; 3c in 1920; total, \$182,289.

Property: 12 claims and fractions, 170 acres, 39 patented, in Round Mountain district, Nye county, includes the Fairview and the adjoining Daisy group, purchased in 1917 from the Round Mountain Mng. Co., for 200,000 shares of Fairview treasury stock.

Ore: occurs in sheeted zones and fissures in rhyolite, the milling ore during 1919 having an average gross value of \$35.86 in gold per ton.

Development: by 500' tunnel to depth of 250', and 270' shaft; total workings over 6,000'. In 1919, work was confined to Fairview claim, which, including shaft, amounted to 3,252'. **Ore reserves:** Jan. 1, 1920 were 4,000 tons.

Equipment: includes 25-h. p. gasoline hoist, compressor, electrical driven 6-stamp amalgamating mill of 50 tons daily capacity, taken over with the Daisy mine.

Production: 1906 to 1916 under former management, was \$85,000; in 1917 (part of year) 1,214 tons, yielding \$20,595; in 1918, 8,807 tons, yielding \$178,801; in 1919, 8,693 tons, yielding \$296,466 in bullion, and representing an extraction of 95.1%. For first 8 months of 1920, a gross bullion production of \$99,500 is reported, with a net profit of \$34,000.

Management is same as that of the Round Mountain and Fairview Extension companies; reported that 400,000 shares of latter have been acquired by Fairview Round Mountain.

FARETTA CINNABAR MINE

NEVADA

See Quicksilver Mines Co.

FARRELL-DIVIDE MINING CO.

NEVADA

Office: 205 Reno National Bank Bldg., Reno, Nev.

Officers: R. C. Harrison, pres.; B. J. Henley, v. p.; F. G. Hobbs, sec.-treas., with B. Sealy and J. R. Farrell, directors.

Inc. in Nevada. **Cap.** \$100,000; shares, 10c par.

Property: 3 claims adjoining the Rosetta, about 1½ miles south of Gold mountain.

FAY EXPLORATION CO.

NEVADA

Address: F. A. Hazard, or J. C. Charles, Fay, via Pioche, Lincoln county, Nev.

Property: an old mine at Fav 25 miles N. E. of Pioche, near the Utah-Nevada line, that yielded \$228,000 in gold. Idle for past 10 years; plant has been dismantled.

FEDERAL DIVIDE MINING CO.

NEVADA

Organized in Nevada to finance the development of 2 claims west of Lookout Divide and 2¾ miles N. E. of Gold mountain.

FEDERAL ELY COPPER CO.

NEVADA

Idle. **Office:** 26 Mining Exchange Bldg., Salt Lake City, Utah. **Mine office:** Ely, Nev.

Officers: J. A. Cunningham, pres., at last accounts.

Inc. 1914, in Utah. **Cap.** \$150,000; 15c par; reduced 1916 from \$5,000,000; shares \$5 par; assessable; 12 assessments levied to March, 1915.

Property: 21 claims, 3 fractional, 400 acres, partly patented, also the Huesser ranch of 600 acres, 15 miles north of Ely, in the Steptoe Valley, White Pine county, bought 1906, and a millsite. Mining lands are the Panama claim, bought 1909, for \$10,000, lying about one-half mile north of the Star Pointer shaft of the Nevada Consolidated; 8 claims north of the Nevada Consolidated; 3 claims between the Cumberland-Ely and Turner-Ely, and the Queen of the West group, in Robinson Canyon. Company is said to have paid \$225,000 for its lands.

Geology: property shows limestone beds dipping to the east said to be underlain by cupriferous monzonite, and to carry 3 parallel shear zones, each about 400' in width, 600' apart, showing a little copper and lead ore. The limestone capping on the Savage claim is said to carry lead ore. Churn-drill borings are said to have given a satisfactory showing of ore, and there also was some test-pitting and surface trenching.

Development: by tunnels aggregating about 1,600' and 4 shallow shafts, 3 said to show copper sulphides at depth of 100', the main shaft said to be near the contact of 3 ore zones, which seems peculiar, if the ore zones are parallel, as claimed.

The Queen of the West shaft shows, at depth of 110', a sulphide ore-body of considerable size averaging 3% copper, 1 to 2 oz. silver and 40 to 50 cts. gold per ton. The Kessler shaft, about 100' deep, near the tunnel, shows lead carbonates of fair tenor. Mine has a small steam plant.

Company has done little save levy assessments for several years, doing barely enough work on the claims to meet annual assessment requirements. Operated by lessees at last accounts.

FIFTY-SIX COPPER MINE

NEVADA

See Wyoming-Nevada Copper Co.

FIVE-TO-ONE MINING CO.

NEVADA

Address: C. R. Mann, Tonopah & Goldfield R. R., Goldfield, Nev.

Company organized by the above, A. B. Drake, A. A. Redmond and Geo. Spangle, to operate claims 1 mile S. of Goldfield, Esmeralda county. A 550' tunnel reported to have cut a 10' vein, September, 1920.

FLORENCE DIVIDE MINING CO.

NEVADA

Office: Goldfield, Nev.

Officers: J. H. Miller, pres.; F. M. Manson, v. p.; J. E. Adams, sec. treas., with Zeb. Kendall and B. F. Baker, directors. E. A. Byler, eng.

Inc. February, 1919, in Nevada. **Cap.** \$150,000; 10c par; assessable, 750,000 outstanding. Listed on San Francisco Stock Exchange. Transfers made at company office.

Property: 4 full claims and a fraction between the Sutherland on N. and Smuggler on S. Outcrops on rhyolite mountain E. of road said to have yielded \$5 to \$8 assays. Sinking was started and machinery erected, June, 1919.

The Florence Divide company in May, 1919, purchased the Witt-Brandon-Taylor-Mechling lease on part of the Red King claim of the Florence Goldfield property at Goldfield. A bonanza was discovered and up to Dec. 31, 1919, lease produced 3,140 tons of \$85.60 ore, yielding a net smelter return of \$217,142, of which 25% was paid to Florence Goldfield as royalty. Lease was renewed on Jan. 1, 1920, but shortly after relinquished.

Early in 1920, the company optioned the Carmen mine in Mexico, formerly held by the Carmen Syndicate of the Proprietary Mines Co. of America.

Mexican property: 136 acres, includes the Carmen, Chonita, Carmen Anexas and Los Angeles mines, Arizpe district, Sonora, 75 miles from Cananea and 15 miles from Nacozari. Seven veins cross property; six are mineralized shear zones in rhyolite: the main vein, 3 to 30' wide, is a contact

between andesite and rhyolite. Silver 20 oz. and better per ton, occurs as argentite accompanied by a little gold in silicified rhyolite.

Development: by 2 shafts, one 150' deep, and several hundred feet of workings. Equipped with steam power hoist, etc.

Examined by N. H. Burley, H. V. Wallace, F. W. Royer and Sill & Sill.

FLORENCE GOLDFIELD MINING CO.

NEVADA

Offices: 25 Broad St., New York City, and Goldfield, Nev.

Officers: L. E. Whicher, pres.; F. Sommer Schmidt, v. p.-gen. mgr.; C. C. Burger, treas.; C. Brown, sec., with R. M. Atwater, Jr., W. W. Cohen, Albert Farjeon, H. C. Quackenbush and S. L. Sherman, directors. E. A. Byler, engr.; R. C. McCarthy, supt.

Inc. April 28, 1905, in South Dakota. **Cap.** \$1,250,000; \$1 par; outstanding 1,150,000. New York Trust Co., New York transfer agents.

This company paid large dividends during the years 1908, 1909, 1910 and 1911. Operations, excepting those by lessees, were suspended at that time.

In June, 1919, the control of the company was bought by L. E. Whicher and associates—the **Florence Goldfield Syndicate**.

During 1920-21, company continued its policy of leasing parts of the mine; an average of 14 working faces were operated, on a 25% royalty, in an area of 10 acres. Among the lessees are several companies with financial backing, but the success of the Florence Divide lease, which in 1919 produced 3,140 tons of \$85.60 ore, yielding \$217,142 net from smelter has not been repeated. Other lessees include the Reorg. Cracker Jack Mng. Co., Sunbeam Divide and Donald & Giles.

An interim report (Nov. 12, 1920) showed receipts from Jan. 1, 1920, \$50,508, of which royalties were \$18,958; cash, \$28,342; loan from syndicate, \$3,000. Development and administration disbursements were \$47,823. Total royalties since new management took possession, July 1, 1919, to date of report, \$61,964.

Property: the property consists of 67.7 acres at Goldfield, Esmeralda county, adjoining the Goldfield Consolidated Company.

Development: the main shaft has been sunk to a depth of 1,200 feet and there are several miles of drifts, levels and crosscuts. There is still a large unexplored territory which is being developed by the company; more recently on the 358' level by a S. E. crosscut to locate a fault zone which is believed to have displaced extension of Goldfield Cons. orebodies. In 1920, company work aggregated 2,655', at cost of \$10.90 per foot.

In fall of 1920, the company offered its stock-holders pro rata right to purchase 100,000 treasury stock, at 12½¢ per share; an underwriting syndicate was formed to assist in the sale of this offering.

FORD DIVIDE MINING CO.

NEVADA

Office: Tonopah, Nev. H. A. Stewart, agt.

Officers: M. J. Sullivan, pres.; H. A. Stewart, sec.; A. G. Raycraft, treas., with G. J. Murphy, directors.

Inc. in Nevada. **Cap.** \$150,000; shares, 10c par.

Property: 4 claims adjoining Treadwell Divide and Rand Divide. A prospect. Idle.

FORT SCHELLBOURNE MINING & MILLING CO.

NEVADA

Office: 521 Felt Bldg., Salt Lake City Utah. **Mine address:** Schellbourne, Nev.

Officers: F. W. Snyder, pres.; Hugh H. Tarbet, v. p.; E. H. Snyder, sec.-treas.; with Howard Phelps and J. E. Hepworth, directors, at last accounts.

Inc. Sept. 27, 1916, in Nevada. **Cap.** \$100,000; 10c par; 650,000 shares issued; assessable. No income, save stock sales.

Property: McMahon mines, 7 claims, 140 acres, in Schellbourne district. White Pine county, 8 miles from Nevada Northern R. R. (Cherry Creek Station). Lands show a fissure vein in a limestone shale contact.

with 15-20' orebody. Ore in streaks carries \$1 gold and 12 oz. silver per ton, in quartz-calcite gangue.

Development: by 500' tunnel with 280' back, and 1,000' of work. Company plans tunnel to cut ore at greater depth.

No production since 1875.

FORTUNA DIVIDE MINING CO.

NEVADA

Address: A. J. Moore, Reno, Nev.

Officers: A. J. Moore, pres.; Frank A. Anderson, v. p.; B. James, sec.-treas., with E. W. Mower, Wayne J. Wilson, directors. Frank Anderson, supt.

Inc. 1919, in Nevada. **Cap.** \$150,000; par 10c; 1,100,000 treasury shares.

Property: 25 acres N. W. of Sutherland Divide and 4 miles N. W. of Gold Mountain. Work commenced in July, 1919.

Also owns 5 claims in Churchill county on which 1,000' of development work disclosed pay ore.

FORTUNA GRUBSTAKE MINING CO.

NEVADA

Inc. 1917, in Nevada. **Cap.** \$500,000; \$1 par; 125,000 shares issued; stock offered at 25c, April, 1917.

Property: in Churchill county, said to show 12" vein carrying lead-silver values. Developed by 350' tunnel. Presumably idle.

FRAVEL-PAYMASTER MINING CO.

NEVADA

Office: c/o Rumball & Co., fiscal agts., 50 Congress St., Boston, Mass.
Mine office: 234 No. Center St., Reno, Nev.

Officers: Jos. G. Ray, pres.; David O. Campbell, v. p.; Chas. F. Dantets, treas., with Geo. H. Allen, Jos. P. Baptiste and John F. Linder, directors. E. S. Johnson, res. agt-mgr.; John Reinmiller, supt.

Inc. 1916 (?) in Maine. **Cap.** \$2,000,000; \$1 par; 1,300,000 shares issued.

Property: 12 claims in Peavine district, Washoe county, adjoining Standard Metals and Peavine Silver Corp., 5 miles N. W. of Reno. Country rock is schist cut by quartz monzonite dikes, near which quartz veins, carrying gold, silver and copper, occur.

Development: by 330' shaft (Oct. 1, 1921), to be sunk to 400'. Reported that an orebody, 2' to 4' wide, had been uncovered for 285' in length on the 200' level; one assay giving value of \$27 per ton.

Equipment: includes 75 h. p. hoist, air compressor, etc.

District is an old one, mines having been first opened in 1867; because of lack of facilities, oxidized zone only was exploited.

PRESNO DIVIDE MINING CO.

NEVADA

Mail returned from Tonopah, Nev.

Property: a tract of undeveloped ground one mile N. E. of Gold mountain. Is a prospect.

FRISCO DIVIDE MINING CO.

NEVADA

Office: H. R. Cooke, agent, Tonopah, Nev.

Officers: R. L. Johns, pres.; M. B. Aston, v. p.; B. A. Rives, sec.-treas.; with Zeb Kendall, and J. E. McCreery, directors. Charles Maher, mgr.

Inc. April 24, 1919, in Nevada. **Cap.** \$150,000; 10c par; 750,000 treasury shares; 147,000 issued. Listed on San Francisco Stock Exchange.

Property: 6 claims, lying N. of the Chariot and Jupiter and 2¾ miles S. E. of Gold Mountain. A. H. Elftman says surface indications are favorable.

GEM DIVIDE MINING CO.

NEVADA

Address: E. P. Esser, res. agt., Tonopah, Nev.

Officers: E. T. Krebs, pres.; O. F. Krebs, v. p.; E. P. Esser, sec.

Inc. May, 1919, in Nevada. **Cap.** \$150,000; 10c par; 750,000 in treasury.

Property: 5 claims W. of Portland Divide.

GEM FIVE MINES CO

NEVADA

Address: J. B. Ratliff and G. A. Goldsworthy, lessees, Lovelocks, Nev.

Property: in the Sunshine district, 20 miles S. of Winnemucca, Pershing county, said to carry a vein of high grade gold-silver ore. Hoist, compressor, etc. installed, shaft sunk 100', and ore shipped in 1919.

GENERAL GRANT MINESee **Big Chief Cons. Mines Co.****NEVADA****GENERAL MINES CO. OF NEVADA****NEVADA****Address:** P. O. Box 835, Reno, Nev.**Officers:** W. G. Humphrey, pres.; J. H. Clemons, v. p.; C. T. Stevenson, sec.-treas.-mgr.; with I. W. Davey and W. H. Moffatt, directors.**Inc.** Nov. 1, 1916, in Nevada. **Cap.** \$3,000,000; par \$1; 1,400,000 outstanding. Company owns all the stock of the **Rochester Octopus Mines Co.** Operating expenses for 1918 totaled \$183,951.

The Octopus mine in the Rochester district, Pershing county, is described separately. The bond on the adjoining property of the Rochester Buck & Charley Mng. Co. (q. v.) was relinquished in August, and that on the Silversides mine, near Luning, Mineral county, in October, 1919. A 200' shaft was sunk on the latter during the option. Company not operating at present.

GENERAL WASHINGTON DEVELOPMENT CO.**NEVADA****Office:** Goldfield, Nev.**Officers:** E. P. Junor, pres.; O. L. Becker; v. p.; H. G. McMahon, sec.-treas.-mgr.**Inc.** March 3, 1917, in Nevada. **Cap.** \$200,000; 10c par; assessable; 720,000 issued.**Property:** 20 acres, patented. Company reports a 10' quartz vein in andesite with gold, silver and copper values. Course N. 20° E., dip 30°.**Development:** 320' shaft. Arrangements have been made to operate the mine through the workings of the Reorganized Cracker Jack Mng. Co., and for the use of the latter company's equipment.

The G. W. Development Co. is a re-organization of the George Washington Mining Co., old stock being exchanged for new upon payment of 1 cent a share. Not operating during 1920.

GIANT DIVIDE MINING CO.**NEVADA****Office:** Tonopah, Nev.**Officers:** J. G. Crumley, pres.; C. E. Oyster, A. E. Kane, v. p.'s.; C. C. Boak, sec.-treas., with F. K. Pittman, directors. R. A. Hardy, cons. eng.**Inc.** March 26, 1919. **Cap.** \$1,500,000; \$1 par. Listed on San Francisco Stock Exchange.**Property:** 3 claims and 4 fractions, 100 acres, patented, 1¼ miles S. of Gold Mountain, adjoining the Silver and Divide Syndicate on N. W. and S. E.**Development:** by shaft to 450', and crosscuts to E. and W.; in latter, at distance of 250', a 25' ledge has been cut. Values thus far found are low, but ledge is believed to be same as on Gold Reef.**Equipment:** complete with 30 h. p. electric hoist, 8"x10" compressor, drills, and camp.

Inactive 1919-20; development resumed in 1921.

GIBRALTAR SILVER HILL MINING CO.**NEVADA****Address:** Room 724, 25 Broad St., New York City.**Officers:** Col. T. J. D. Salter, pres.; C. E. Robins, v. p.; Geo. B. Hutchings, sec.-treas.**Inc.** February, 1920, in Nevada. **Cap.** \$200,000; par 10c; 900,000 shares in treasury.**Property:** the Shea-Putnam group, 8 claims, 140 acres, north of the Gibraltar Silver Mines Co. tract and traversed by the same big vein for 4,500' and by two lesser veins. Principal orebody, 30' wide on surface, said to average \$31.40 (Feb., 1920) in silver and lead. Reported by Chas. D. Wilkinson, Frazier and other engineers, to have very promising vein outcrops; and was considered an attractive prospect.

In spring of 1920, brokers were offering "a limited block" of stock at 25¢ per share. Reports of Dec., 1921, indicate that actual operations were never begun.

GIBRALTAR SILVER MINES CO.**NEVADA**

Address: 80 Maiden Lane, New York City.

Officers: Wm. J. Loring, pres.-managing dir.; R. R. Sherwood, v. p.-treas.; with W. W. Waddell, E. B. Cadwell, E. A. Clark, N. J. Hyman, and H. C. Stimler, directors.

Inc. 1919, in Nevada. **Cap.** \$150,000; 10c par; 500,000 shares in treasury. Corporation Trust Co., New York, transfer agent. Property paid for and company reports a large cash balance in the treasury.

Property: 7 claims in Jett canyon, in the Toyabe mountains, 7 miles due W. of Round Mountain, Nye county, and 45 miles N. of Millers. The outcrop is a precipitous mass 250' high. The main ore showing is where a basal fault along the east side of the range cuts an andesite dike or stock. The vein shows a length of about 1,500' and a width of 60' or more. It consists of highly silicified andesite carrying silver, lead and zinc. The high-grade ore is reported to assay above 30% lead, with a content of 3 oz. silver to each percent of base metal.

Development: by crosscut tunnels and surface open-cuts.

Equipment: compressor, machine drills and camp buildings.

Reported upon by Wm. J. Loring and Chas. D. Wilkinson, who state that the surface values are very good, the vein of large size, very strong and well defined and the geological conditions favorable for making large orebodies.

In mid-1920, the Gibraltar and Toggery Divide companies were supposedly merged to form the **Mines Selection Co.**, stockholders of each company being permitted to exchange their stock for that of new company, share for share, plus fee of 3¢. The Mines Selection Co. relinquished its option on the Gibraltar property in 1920 and took away its equipment. Work was resumed on Gibraltar in 1921, presumably by associates of Col. Salter, who apparently still controls the Gibraltar Silver Mines Co.

GIROUX CONSOLIDATED MINES CO.**NEVADA & MEXICO**

General office: suite 3300, 120 Broadway, New York City. **Mine offices:** Kimberly, Nevada, and Carbo, Sonora, Mexico.

Officers: Albert C. Hubbell, pres.; Henry B. Paull, 1st v. p.; Ernest R. Grouchaus, 2nd v. p.; Joseph B. Cotton, general counsel; Frederic R. Kennedy, sec.; Thomas B. Adams, treas.; foregoing with Samuel Brenner, Albert E. Humphreys, Jr., John D. Clarke, directors. H. T. Munroe, gen. mgr. and Nevada agent. Samuel L. Heslet, Mexican mine agent.

Inc. April 14, 1903, in Delaware. **Cap.** \$7,500,000; \$5 par; issued \$7,207,100. American Trust Co., Boston, registrar, Boston Safe Deposit & Trust Co., transfer agents.

The Giroux is now controlled absolutely by the Consolidated Coppermines Co., through exchange of Giroux stock for that of the Coppermines company. The latter company now owns over 99% of the total Giroux stock outstanding. For description of properties and operations see **Consolidated Coppermines Co.**, and Vol. XI of this Handbook.

GLASGOW & WESTERN EXPLORATION CO., LTD.**NEVADA**

Liquidated. Fully described in Vols. XI, XII, XIII. The Copper Basin and Copper Canyon mines in Nevada were sold to the **Copper Canyon Mng. Co.**, the Adelaide in Humboldt county to Mr. Kierman, Tonopah, and the Montreal property in Beaver county, Utah, to the **Milford Copper Co.**

GLENDALE MINING, MILLING & POWER CO.**NEVADA**

Mail returned from Glendale, Calif. Had a lease on the Piermont mine near Cherry Creek, Nev.

A jitney auto man, named Hart, of Glendale, Calif., ran property, and the result of inexperience was the usual one. J. H. Leishman, Templeton, Calif., was formerly president, acting merely in an advisory capacity in the early days of the corporation. Company practically out of business, with no assets, but a number of unpaid accounts.

GOLCONDA GOLD LEDGE MINING CO. NEVADA

Presumably dead. Address: 909 Sharp Bldg., Kansas City, Mo.

Officers: M. A. Fyke, pres.; W. H. Otto, v. p.; A. C. Sweet, sec.; C. V. Fyke, treas., with F. M. Planck, directors at last accounts.

Cap. 1,000,000 shares; \$1 par.

Property: 8 claims, 2 miles S. of Golconda, Humboldt county, known as Kramer Hill, under lease to Golconda Nevada Mng. Co., at last accounts.

GOLCONDA NEVADA MINING CO. NEVADA

Address: Golconda, Humboldt county, Nev. J. B. Tomlinson, mgr.; had 3-year lease from September, 1915, on the Kramer Hill mine of Golconda Gold Ledge Mining Co.

Equipment: 20-stamp mill for sampling and testing. No recent returns.

GOLD BANK DIVIDE MINING CO. NEVADA

Office: Goldfield, Nev.

Officers: H. B. Ruhl, pres.; Albert Ninnis, v. p.; B. E. Garnett, sec.-treas., with A. B. Garnett and F. C. Beedle, directors.

Inc. 1919 in Nevada. Cap \$150,000; shares. 10c par.

Property: 2 claims and 3 fractions, 80 acres, adjoining the Rosetta, 2 miles south of Gold Mountain.

GOLD BAR DIVIDE MINING CO. NEVADA

Office: Goldfield, Nev.

Officers: H. B. Ruhl, pres.; Albert Minnis, v. p.; B. E. Garnett, sec.-treas.; with A. B. Garnett and T. F. Potthoff, directors.

Inc. in Nevada. Cap. \$150,000; shares 10c par.

Property: 5 claims and a fraction E. of Sutherland and 1½ miles slightly E. of N. of Gold Mountain. Is a prospect only.

GOLD CANYON DREDGING CO. NEVADA

A subsidiary of Metals Exploration Co., California.

Office: 1213 Hobart Bldg. San Francisco. Mine office: Dayton, Nev.

Officers: Bulkeley Wells, pres.; Roy H. Elliott, v. p.; and A. D. Snodgrass, sec.-treas., directors. Gerald H. Hutton, mgr.; W. J. Harvey, supt.

Inc. June 11, 1919, in Nevada. Cap. \$250,000; \$1 par, all issued.

Property: 297 acres of patented placer ground, and 720 acres leased from J. H. Rae on Gold Canyon Creek, between Dayton and Silver City, Lyon county. Also, water rights on Carson river. Gold was discovered in 1859, and ground worked in a small way for years by Rae and King, with total production of \$25,000. Bedrock is at depth of 15' to 40'; 200 acres have been tested. Gravel carries gold and silver; present (1921) estimates give 6,000,000 cu yd. Values said to be 40¢ to 90¢ per yd.

Equipment: includes one 9 cu. ft. electrically driven dredge of 500 h. p. with capacity of 5,000 cu. yd. per 24 hrs; 4,500' of 8" wood pipe and 3,800' of ditch. A spur from the Southern Pacific brings the railroad to within one mile of the dredge.

Production: for 1920 was 225,000 cu. yd. with dredge starting operations Sept. 5th.; cost was 15¢ per cu. yd. Total cost, including boat, to Oct. 30, 1920, was \$255,738.

Reported, December, 1921, that litigation over title of leased ground had begun.

GOLD CIRCLE BUICK MINING CO. NEVADA

Address: Louis Reymond, Midas, Nev.

Inc. July, 1919, in Nevada. Cap. \$150,000; 10c par.

Property: 3 claims in the Gold Circle district of Elko county.

GOLD CIRCLE COALITION CO. NEVADA

Address: Midas, Nev.

Officers: M. J. Paisley, pres.; J. W. Cody, v. p.; J. I. Peterson, sec.-treas., with J. A. Langworth, directors.

Inc. 1919, in Nevada. Cap. \$150,000; shares 10c par.

Property: Golden Fissure group of 3 claims adjoining the Bamberger

property, Gold Circle district, Elko county. Free milling ore occurs in a 3' vein; values are spotty. Developed by shaft and tunnel.

Mine reported sold December, 1920.

GOLD CIRCLE CROWN MINING CO. NEVADA

Address: Wm. Rae, Midas, Nevada. Said to be controlled by Ellis & Snyder of Salt Lake City and Chas. A. Stoneham of New York.

Property: including the Banner claim, in Gold Circle district of Elko county, shows a 3' ore shoot in the Missing Link vein, said to be 150' long. Milling ore yields \$15.75 and highgrade \$50 to \$100. Workings are shallow.

Mine leased to Rae and Hargrove, 1920 and 1921.

GOLD CIRCLE QUEEN MINING CO. NEVADA

Address: Midas, Nev.

Officers: J. E. Pelton, pres.; R. S. Bolam, v. p.-gen. mgr.; L. G. Campbell, sec.-treas.; with G. S. Pelton, directors.

Cap. \$1,000,000, increased to \$1,500,000 in December, 1919; \$1 par; 840,000 outstanding.

Property: 5 claims in Gold Circle district, Elko county. Ore occurs in lodes in shattered rhyolite up to 20' wide; two principal veins developed show values in gold and silver, the latter greatly predominating. Production prior to present ownership said to have been \$45,000.

Development: by 315' shaft and 2 tunnels; total workings about 1,200'. Equipped with small gasoline hoist.

Was operating 1919-20.

GOLD CRATER CONS. MINING CO. NEVADA

Property: in Gold Crater district, Nye county, 30 miles S. E. of Goldfield, was leased in 1914 to Gold Prince Mining & Leasing Co., which see. Thomas D. Murphy of Goldfield was the lessor.

GOLD DEPOSIT MINING CO. NEVADA

Address: Logan, Utah. **Mine office:** Battle Mountain, Nev.

Officers: Robt. Murdock, pres.-treas.-mgr.; John A. Crockett, v. p.; A. S. Cole, sec., with E. S. Larsen and Robt. Murdock, Jr., directors. F. W. Swindlehurst, supt.

Inc. May 27, 1916. **Cap.** \$100,000; 10c par; 600,000 shares outstanding. Annual meeting May 27. Income from ore sales in 1918, \$1,500; operating expenses, \$1,200.

Property: 9½ claims, 10 miles from Battle Mountain, Lander county, shows rhyolite cut by a quartz vein 3-5' wide, said to average \$10 per ton in gold. Developed by 250' tunnel to depth of 150'. Shipment of \$60 ore made in 1918.

GOLDEN CHARIOT MINING CO. NEVADA

Address: Jamestown, Nye county, Nev. Carl Feutsch, pres.

Property: a group of copper claims, situated about 30 miles from Goldfield. Idle at last report.

GOLDEN PEN CONSOLIDATED MINING CO. NEVADA

Holdings sold to **Gold Pen Mines Co.**, which see.

Company was formed in 1915 by Jesse Knight, of Provo, Utah, to purchase the Golden Pen mine at Rand, Mineral county, Nev., for \$150,000.

A peculiar feature of the purchase permitted former owners to retain a pay-shoot 38' long in center of mine. Past record shows rich shipments. See Vol. XII.

GOLDEN STATE DIVIDE MINING CO. NEVADA

Property was an old mine worked by Harry McNamara, who later formed company. In June, 1920, leased under option by Knox Divide Mng. Co., which see. Knox is the operating company, and in August, 1921, obtained stock control, but Golden State still keeps its entity and appears on the listing of the New York Curb.

GOLDFIELD BLUE BELL MINING CO. NEVADA

Address: Austin, Nev.

Officers: D. S. Johnson, pres.; B. W. Ward, treas.; J. M. Hiskey, sec.

Annual statement for 1918 shows: Receipts, \$4,875; expenditures, \$4,922.

Property: 3 fractional claims at Goldfield, under lease to Spearhead Gold Mining Co., Reorganized.; Cotter mines (10 claims) at Golden Arrow, 50 miles E. of Tonopah; Berlin mine (16 patented claims), Berlin; Richmond mine (3 patented claims) 1 mile S. of Berlin; Shamrock mine (10 patented claims), 6 miles N. of Berlin; Downeyville and Sullivan mines (6 patented claims), 5 miles S. of Lodi. The latter were leased to F. H. Lerchen, late 1921.

Development: Cotter 450' deep; Berlin (gold), 364'; Downeyville (silver-lead), 250'; Richmond (gold, silver, copper), 75'; Shamrock (gold, silver), 350'; Sullivan (gold), 100'. The Goldfield (950') is the only mine worked.

Equipment: Berlin has 2 steam hoists, 2 compressors, assay-office, store, machine-shop, complete 30-stamp mill, etc.

A group of mines like these ought to develop something.

GOLDFIELD BULL DOG MINING CO. NEVADA

Office: 351 Bullitt Bldg., Philadelphia, Pa. **Mine office:** Goldfield, Nev.

Officers: N. S. Keith, pres.; A. W. Ott, sec.

Inc. in Wyoming. Cap. \$1,500,000; shares \$1 par.

Property: 4 claims, in Diamondfield district, Goldfield, Esmeralda county, adjoins holdings of the Vernal Mining Co. and is controlled by same interests. Developed by company and lessees. Small shipments made.

GOLDFIELD COMBINATION FRACTION MINING CO. NEVADA

Mail returned from Reno, Nev.

Officers: Geo. Wingfield, pres.; W. E. Zobel, v. p.

Inc. June 10, 1905, in South Dakota. Cap. \$1,000,000; shares \$1 par; 936,617 issued. Listed on San Francisco Exchange; removed from listing on N. Y. Curb, Dec. 2, 1920.

Property: at Goldfield, Esmeralda county.

Beginning with early 1919, property was under 5 years lease to Goldfield Cons., but later in the year was subleased to the Goldfield Development Co. Reported that lease was relinquished.

GOLDFIELD COMBINATION MNG. CO. NEVADA

A Washington corporation which forfeited its charter; its mineral holdings (1 claim), in the Goldfield district, were sold to Goldfield Deep Mines Co., in 1920.

GOLDFIELD CONSOLIDATED EXPLORATION CO. NEVADA

Office: Crocker Bldg., San Francisco, Calif. E. A. Julian, gen. mgr.

Is a subsidiary of Goldfield Cons. Mines Co., formed in 1916 to examine and develop properties submitted for sale. All of capital stock is owned by the parent company.

The balance sheet of the Goldfield Cons. for year ending December 31, 1919, shows its equity in the Exploration Co. to be \$150,000.

Property: claims of Ash Peak Mines Co. (q. v.), in Arizona, and the Surcease mine, Plumas county, Calif. During 1918, many properties submitted company were given consideration, but it has since been apparently inactive.

See Goldfield Consolidated Mines Co.

GOLDFIELD CONSOLIDATED MINES CO. NEVADA

Office: Reno National Bank Bldg., Reno, Nev.

Officers: Geo. Wingfield, pres.; Benj. J. Henley, v. p. W. E. Zoebel, sec.-treas.; E. A. Julian, gen. mgr., with J. H. Carstairs, Wm. Woodburn and S. C. Mitchell, directors. A. H. Lawry, cons. eng.

Inc. November 13, 1906, in Wyoming. Cap. \$50,000,000; \$10 par; issued 3,559,148 shares. Stock listed on San Francisco and Salt Lake Exchanges and New York and Boston Curb. John S. Cook & Co., Goldfield, Nev., registrar. Company office, Reno, transfer agt. Annual meeting, third Monday in March.

Company is a merger of Goldfield-Mohawk, Red Top, Jumbo, Laguna Goldfield, Goldfield and Combination mining companies. In 1911, company

acquired Vinegerone Fraction and the Bull Dog and Jumbo Fractions. Company owns entire stock of the Goldfield Cons. Milling and Transportation Co. and the Goldfield Cons. Expl'n Co. (q. v.); an 87% stock interest in the **Aurora Cons. Mines Co.**, Mineral county, Nev., and an interest by mortgage in the **Dolly Varden Mines Co.**, B. C. All of these companies are described under their own titles.

Company's 483,835 share interest in C. O. D. Cons. Mines Co., 1,499,727 share interest in Goldfield Merger Mines Co., and title to 5 isolated claims, were exchanged in 1920 for 3,559,148 shares of **Goldfield Deep Mines Co.** stock, on payment of a 1c assessment per share. On Sept. 15, 1920 company distributed Deep Mines stock among its stockholders.

Annual report for 1920 shows: total earnings, \$33,455, of which \$20,411 was rentals and royalty. Expenses and losses were \$248,331, including \$18,897 disbursements and \$211,082 depreciation of plant. Assets include: property; \$28,535,856; plant, \$997,934; depletion reserves, \$6,023,248, and current, \$663,409, of which cash was \$292,452. Accounts payable were \$1-171. Surplus was \$627,796. Property assets include Dolly Varden Mines Co., \$181,447 (mortgage); **Ash Peak Mines Co.**, \$90,000 (stock); and equity in **Surcease** mine, \$75,000. See Goldfield Cons. Expl. Co. and also Ash Peak, separately described.

Dividends: total \$29,176,788 or \$8.20 per share, 1907 to 1919.

Aurora Cons. Mines Co. liquidated its indebtedness to Goldfield Cons. to the extent of \$110,237 by transferring all of its assets, of which \$56,704 was current. The plant will be sold.

Property: 26 patented claims, and 1 unpatented claim, 390 acres, at Goldfield with 6 working shafts, Combination, Mohawk, Red Top, Jumbo-Clermont, Jumbo No. 2 and Laguna. Output was from several mines working fissure veins whose stoping width varies from a few feet to as much as 20 or even 30'. In 1916, company adopted a system of leasing outlying parts of its property, and finally in February, 1919, gave Goldfield Development Co. a 5 years' lease on the entire holdings, on a 15% royalty basis. But, operations proving unprofitable, Goldfield Dev. Co. relinquished lease at close of 1920, when Goldfield Cons. adopted policy of leasing small blocks (300x300') to individuals, on royalties of 10 to 20%, depending on ore grade. Among other lessees, the **Silver Pick Cons.** is operating under a 5 years' lease on a portion of Red Top ground.

For complete description of Goldfield Consolidated, at one time, one of the world's greatest gold mines, see Volume XIV.

GOLDFIELD DEEP MINES CO. OF NEVADA

NEVADA

Office: Goldfield, Nev.

Officers: A. I. D'Arcy, pres.-mgr.; Corrin Barnes, v. p.; H. G. McMahon, sec.-treas.; with Benj. J. Henley and Ed. Lembcke, directors. Elmer Burt, supt.

Inc. May 26, 1920, in Nevada. **Cap.** \$900,000; par 5¢; assessable; about \$825,000 outstanding. Transfers made at company's office; registrar, John S. Cook & Co., Goldfield, Nev. Annual meeting, third Monday in June. Three 1¢ assessments have been levied up to September, 1921.

Total revenue, including 2 assessments, up to Sept. 1, 1921, was \$226,734. Expenditures were \$179,739, of which operation cost \$130,054; equipment, \$27,482 and properties, \$22,202. By Dec. 1, additional cash receipts were \$70,000, principally from assessment No. 3.

Property: 36 patented claims, 600 acres, Goldfield district, Esmeralda county, adjoining Goldfield Cons. on N. W.; consists of a consolidation of following properties: Reorganized Atlanta Mines Co., Goldfield Merger Mines Co., Reorganized Blue Bull Mng. Co., C. O. D. Consolidated Mines Co., Goldfield Combination Mng. Co., Milltown Mng. Co., 5 claims of the Goldfield Consolidated Mines Co. and other small parcels of ground in the district.

Shareholders of the Atlanta and Blue Bull had privilege of exchanging share for share without cost to them as trustees of these companies.

had funds to meet bonus of 1¢ per share; in case of Goldfield Merger and C. O. D. Cons. individual shareholders were liable for the bonus exchange. The Milltown and Goldfield Combination properties were purchased for cash; and Goldfield Cons. transferred its stockholdings in the C. O. D. Cons and Goldfield Merger, 483,835 and 1,499,727 shares, respectively, gave deed for 5 claims, and paid \$35,591.48, in exchange for 3,559,148 Goldfield Deep shares.

The consolidation was effected to secure funds for deep mining and sufficient ground to cover "vein system on its dip and strike". Properties may be described in brief, as below:

Atlanta group; 74 acres, includes Atlanta Black Bear, Union Jack claims, and a fraction, adjoining the Florence on E. and the Goldfield Cons. on S. Developed by 1,750' Merger Mines shaft, and 150' deeper by winze. Vein 40' to 100' wide; some medium grade shipping ore, and a shoot, 3' to 15' wide of \$20 ore; but, as a whole, ore is of low grade concentrating tenor. Production, about 1,500 tons.

Blue Bull group; 8 claims, 148 acres, S. of Lone Star Cons. and Merger Mines. There is a 700' shaft, with workings on 500' and 700' levels; commercial ore has been found on the former. Ore is gold, silver and copper.

C. O. D. group; forms compact group of 90 acres adjoining the Atlanta on S. Developed by 500' shaft and several thousand feet of workings. In 1918, lessees claim to have uncovered a 35' vein, with free milling gold value of \$7 to \$15. Said to have produced \$75,000.

Goldfield Combination: 1 claim, centrally located in the Deep Mines consolidated territory.

Goldfield Consolidated: this group of 5 claims, including Goldstone and Wonder, lies between the C. O. D. and Milltown properties.

Goldfield Merger Mines: 7 claims, including St. Ives and Sunflower; covers northerly side of consolidation and adjoins Jumbo Extension on S. Its shaft is 1,750' deep; a winze, 150' deeper, opened veins with shoots of copper-gold-silver ore; 2% copper ore was developed on 1,350' level.

Milltown group: 3 claims, adjoining the Goldstone and Wonder claims, referred to above, on S. and the Yellow Tiger property on W. Developed by shafts, deepest 300'. A big vein is exposed on surface, said to carry values up to \$50.

The more important of these properties are more fully described in Vol. XIV.

Development: additional to old workings noted above, a 3 compartment shaft to be 2,400' deep is being sunk on S. end of Combination claim, and had reached the 1,100' point in Dec. 1921. The management is convinced "that the orebodies of Goldfield will persist to great depth", despite the fact that orebodies of commercial value were not discovered on the 1,750' and 1,900' levels of the Atlanta and Merger Mines. At depth of 1,039', the shaft reached the C. O. D. vein.

Equipment: includes 250 h. p. hoist from the Merger Mines.

Beginning Dec. 1, 1921, company planned to strengthen its cash reserve by sale of surrendered stock at 12½ to 20¢ per share. A newspaper campaign was to be initiated.

GOLDFIELD DEVELOPMENT CO.

NEVADA

Address: P. O. Drawer 119, Goldfield, Nev.

Officers: Corrin Barnes, pres.; A. I. D'Arcy, v. p.; H. G. McMahon, sec.-treas., with Ed. Lembcke and Benj. J. Henley, directors. Elmer Burt, mine supt.

Inc. February 13, 1919, in Nevada. **Cap.** \$200,000, increased from \$125,000 in December, 1919; shares 5c. par; assessable; 1,750,000 shares in treasury. John S. Cook & Co., registrar. Annual meeting, third Monday in February. Cash on hand, March 1, 1921, \$18,000.

The Development Company was organized to operate the holdings of the Goldfield Cons. Mines Co., including the mining property, 1,000-ton mill and railroad in the Goldfield district, Esmeralda county. Part of the ground

was purchased and the balance taken under lease for a period of five years from February 1, 1919, with the privilege of sub-leasing any part or all of the ground. (See Vol. XIV for details); lease however was cancelled at end of 1920.

During time lease was in force, over 30 sub-lessees were at work. From Feb. 1, 1919 to March, 1920, 4,450 tons of ore were shipped having \$75,000 gross value; in June, mill began operations and 4,800 tons were treated, with estimated net profit of \$12,000. Assessments No. 1 and 2, of 3¢ and 2¢, were levied in 1920 (the last on Aug. 7), because of inability to readily sell treasury stock. Between Feb. 1, 1919 and March 2, 1920, disbursements were \$276,901, and receipts, \$278,515; of the latter, \$107,500 was from sale of stock; \$36,000 loans; and \$58,700, sale of supplies. Mill repairs cost \$43,500 and mining operations were \$71,800.

Mill was closed down some months before lease was relinquished. Failure of this first stage in the life of the Goldfield Development Co. is charged to high costs and low grade of the ore.

In October, 1920, it was announced that the Goldfield Development, Co. had purchased the Gold Hill mine for cash, and assessments 3 and 4, of 1c. each, were levied June and Dec., 1921.

Property: 8 claims, 160 acres, in Lida district, 26 miles S. W. of Goldfield, Esmeralda county. A nearly vertical fault fissure vein, 14' to 70' wide, can be followed on surface for 2,000'. Value is in gold, ranging from \$4 to \$10. Ore is porous quartz and iron oxides; country rock, limestone and shale. The Sandstorm-Kendall Cons. Mng. Co., which has an option on adjoining Bonanza group, has taken a lease on 10 acres of G. D. ground.

Development: 2 tunnels, 500' and 700' with backs of 170 and 270', respectively; also an 80' shaft. A new 200' shaft has been sunk, one-half of the expense being chargeable to the S.-K. company. Two ore shoots, 140 and 160' in length, exposed in tunnels, are reported to average about \$10 per ton.

Efforts to find the ore shoots on the 200' level were at first unavailing, because of a fault plane, but report of Dec. 11, 1921, states that W. segment of vein, 23' wide, has been found.

Equipment: includes 15 h. p. gas hoist, small compressor.

GOLDFIELD DIVIDE MINING CO.

NEVADA

Office: Tonopah, Nev.

Officers: H. D. Budelman, pres.; Clarence Waldner, v. p.; W. V. Richardson, sec.-treas., with J. R. Blair and H. H. Atkinson, directors.

Inc. April 28, 1919, in Nevada. **Cap.** \$150,000; 10c par.

Property: 6 claims in the N. E. part of the district adjoining the Mizpah.

GOLDFIELD GREAT BEND MINING CO.

NEVADA

Office: 302 News Bldg., Goldfield, Nev.

Officers: C. S. Sprague, pres.; J. K. Turner, v. p. and gen. supt.; Ben Gill, sec.-treas., with L. L. Dellinger and B. W. Ward, directors.

Inc. May 8, 1915, in Nevada. **Cap.** \$1,500,000; shares \$1 par; assessable; all outstanding. Assessment No. 10, of 1c. was levied March 14, 1922. Stock listed on San Francisco Exchange.

Financial statement for period, Feb. 1, 1916 to March 31, 1918, shows: total receipts, \$90,214, including stock sales, \$1,502; assessments 2 and 3, \$29,073; ore sales, \$59,346. Expenditures for same period, \$84,875, showing an operating loss of \$25,529. Interim reports, March 31, 1918 to Nov. 30, 1920, give total receipts, \$74,103, of which assessments 4, 5, 6 and 7 provided \$56,621 and ore sales \$4,396; there was a debit balance of \$341. For nine months to Sept. 1, 1921, receipts were \$14,727 and disbursements, \$14,656.

Property: 7 patented claims, 112 acres, in Diamonfield section of Goldfield, Esmeralda county. Claims show a quartz vein in andesite, with 28° dip and E.-W. course. Oxide and sulphide ores occur in shoots said to average \$60 per ton.

Development: by 2 shafts, about 400' deep each. The old mine was un-

watered in 1915, and ore shoots on 160' and 236' levels produced \$100,000 gross. Work during past 2 years confined to locating these shoots on the 375' intermediate and lower levels. Prior to April, 1918, 4,630' of new work was reported; since that time about 1,000' additional has been done.

Equipment: 75-h. p. hoist, compressor, pump and an old mill.

Production: from 1916 (4 mos.) to 1918 inclusive 2,621 tons yielded \$62,638 net; in 1919, \$1,103 net; none since to Sept. 1, 1921.

GOLDFIELD MERGER MINES CO.

NEVADA

Described in Vol. XIV.

In early summer of 1920, company became a part of the newly organized Goldfield Deep Mines Co. (q. v.). Outstanding shares of Merger were exchanged, share for share, for stock of new company, plus 1¢ assessment.

GOLDFIELD MINING & ORE REDUCTION CO.

NEVADA

Address: Marvin Arnold, mgr., Goldfield.

Property: 7 claims surrounded by the Trilby, Divide Gold Dyke, Gold Wedge, Calumet, and Argonne.

Development on the Gold Seam group, 7 claims in S. E. part of district. A 200' shaft sunk several years ago showed seams of high-grade ore.

Equipment: 25-h. p. hoist, 4-drill compressor, etc.

From last accounts (Feb., 1921) active operations were to be resumed.

GOLDFIELD ORO MINING CO.

NEVADA

Idle several years. Controlled by New York Oro Corporation, which see.

Address: Goldfield, Esmeralda county, Nev. Ben Gill, sec.

Inc. 1912 in Arizona. **Cap.** 3,000,000 shares; \$1 par; 2,500,000 outstanding.

Property: 33 acres at Goldfield, developed to 800' depth, where \$40 assays were reported. Company also developed Vulture mine in Wonder district.

GOLDFIELD QUARTZ MOUNTAIN MINING CO.

NEVADA

Address: J. F. Hooper, mgr., Goldfield, Nev.

Property: Bell group of 8 claims on Quartz mtn., Nye county, 12 miles E. of Goldfield. A vein, 100' wide, is exposed on surface for 1,400'; 20' of width is iron stained quartz carrying flake gold, with values of \$5 to \$17.

Development: by 2 tunnels. Equipped with 25 h. p. engine and compressor.

Company was financed by Los Angeles men. Corrin Barnes, is consulting engineer.

GOLDFIELD SHALE MINING CO.

NEVADA

Out of business. Property worked by **Spearhead Gold Mining Co.**, which see.

GOLDFIELD SUNRISE GOLD MNG. CO.

NEVADA

Holdings purchased 1918 by **Grandma Cons. Mines Co.**, which see.

GOLDFIELD-TULE CANYON PLACER CO.

NEVADA

Directors: F. M. Field, A. B. Harms, Harry B. Ruhl and F. J. Harms.

Inc. April, 1919. **Cap.** \$150,000; shares 10c par; 750,000 in treasury.

Property: 5 placer claims in Tule canyon, Esmeralda county, 30 miles S. W. of Goldfield. During 1919, \$5,000 was spent in development and water supply.

GOLD MOUNTAIN MINING & MILLING CO.

NEVADA

N. P. Theo, pres., Goldfield, Nev. Is a close corporation.

Properties: about 13 miles from Bonnie Claire and 6 miles from Horn-silver, Esmeralda county, operated under lease by J. W. Crane, at last accounts. Veins contain silver-gold ore carrying copper. Developed by two 240' shafts and connected by a 200' drift. An outcropping oreshoot 20' wide said to have yielded ore assaying from \$100 to \$500 per ton. No recent information.

GOLD PEN MINES CO.

NEVADA

Purchased in June, 1919, holdings of the Golden Pen Consolidated Mining Co.

Offices: 205 Nixon Bldg., Reno, Nev., and 611 Security Bldg., Los Angeles.

Officers: W. M. Wantland, pres.-mgr.; T. L. Lipsett, v. p.; Geo. N. Turner, sec.-treas., with Harry Amman and Edw. F. Wantland, directors. J. Carlton Bray, supt.

Inc. 1919, in Nevada. **Cap.** \$1,500,000; \$1 par; 250,000 shares outstanding.

Property: 14 claims, 200 acres in Rand district, Mineral county, 17 miles from railroad at Nolan, shows a quartz vein in rhyolite and andesite, with N.-E. course and dip of 70° E. Ore is sulphide, contains gold and silver, shipping grade said to average \$366 and milling grade \$20 per ton. **Development:** by 258' vertical shaft, with about 2,000' of workings.

Equipment: 20-ton amalgamating mill and electric hoist; mill first operated April, 1920.

The mine is credited with \$200,000 past production. Small lots of high grade ore shipped in 1919. In Dec., 1919, management reported reserves of 40,000 tons of \$20, and 4,000 tons of \$500 ore. Suits to enforce payment for machinery were brought vs. company in fall of 1920.

GOLD PEN-RAND MINES CO.

NEVADA

Address: Jas. L. Boyd, pres., Reno, Nev.

Officers: Jas L. Boyd, pres.; D. H. Updike, v. p.; Geo. Lewis, sec.-treas.; with A. J. Bovard, gen. mgr., W. H. Thomas and J. Carlton Bray, directors.

Property: in Rand district, Mineral county adjoining Gold Pen mine on S. E., 17 miles from Nolan on railroad shows 12' vein of low grade sulphide ore, with a 10" pay streak. Developed by 300' shaft.

GOLD PRINCE MINING & LEASING CO.

NEVADA

Idle or dead. E. L. Luker, sec.-treas., Grand Island, Neb.

Officers: Dr. A. H. Farnsworth, pres.; Jos. Kotik, St. Paul, Neb., v. p.; Chas. O. Orr, gen. mgr.; with E. L. and E. S. Luker, directors, at last accounts.

Inc. in 1914. **Cap.** \$500,000; shares \$1 par.

Had lease and bond on the Gold Crater mine, formerly owned by the Gold Crater Cons. Mng. Co., about 30 miles S. E. of Goldfield, Esmeralda county.

Ore: gold, milling grade, said to run about \$15 per ton.

Development: by 265' shaft and crosscuts. **Equipment:** a 12-h. p. hoist and small mill.

GOLD REEF DIVIDE MINING CO.

NEVADA

Office: Tonopah, Nev.

Officers: J. L. Ord, pres.; R. G. Williams, v. p. and mgr.; A. H. May, treas.; E. B. Harrington, sec., with F. A. Lindlof and L. M. Messner, directors.

Inc. June, 1908, in Nevada. **Cap.** \$1,500,000; \$1 par; 1,300,000 issued. Listed on San Francisco Stock Exchange.

Property: 5 claims, south of the Gold Zone and 1,500' S. of the Tonopah Divide's eastern end, of the inside properties, originally located 12 years ago. Examined by J. B. Higgins.

Development: by tunnel and 2 shafts. A shaft sunk several years ago opened seams of sulphide ore. A new shaft, started in April, 1919, is 225' deep. This shaft, located on the strike of the Tonopah Divide vein, is in hard rhyolite containing intrusions of breccia slightly mineralized. Indications are considered to be favorable for cutting the Tonopah Divide ledge.

Equipment: electric hoist, compressor, drills, pumps, etc.

Not operating 1919-20.

GOLD RIDGE DIVIDE MINING CO.

NEVADA

Organized, 1919, to finance development of 3 claims and a fraction in Klondike district on outskirts of the Divide district and about 3½ miles W. of Gold Mountain.

GOLDSMITH DIVIDE MINING CO.

NEVADA

Office: Tonopah, Nev. F. K. Pittman, res. agt.

Officers: Herman Albert, pres.; J. M. Fenwick, v. p.; Julius Goldsmith, sec.-treas.; A. I. D'Arcy, cons. engr.; Ivan Arnold, asst. sec.

Inc. April, 1919, in Nevada. **Cap.** \$150,000; 10c par; 750,000 in treasury.

Property: the Gypsy claims, located in 1916, about $3\frac{3}{4}$ miles S. E. of Gold Mountain. Ore of high value is said to exist at surface, from which small shipments were made from tunnel workings. Developed by 2 shafts.

Equipment: 54-h. p. hoist moved from the North Star at Tonopah.

GOLD SPRINGS MINING CO. NEVADA

Address: W. C. McMullen, mgr., Nyala, Nev.

Controlled by Salt Lake City people.

Property: in the Willow Creek section of Nye county. Was operated throughout much of 1921 and produced some concentrate valued at \$100 per ton.

GOLD TOP MINING CO. NEVADA

Address: 519 H. W. Hellman Bldg., Los Angeles, Calif.

Officers: D. L. Keyes, pres.-treas.; John J. Graf, v. p.-mgr.; Walter F. Kean, sec., with W. H. Sexsmith and M. C. Keyes, directors. W. R. Cozart, supt.

Inc. in Nevada. **Cap.** \$500,000; \$1 par; 50,000 shares outstanding.

Property: the Pedro group, 6 claims, 120 acres, in Copper Basin, Lander county, 9 miles from Battle Mountain, developed by 585' tunnel and 135' vertical shaft. Ore occurs in a fissure vein, said to contain gold, silver, and copper.

Equipment: includes steam power, hoist, compressor, drills, pump, and Gibson crushing mill.

GOLD TRAIL DIVIDE MINING CO. NEVADA

Office: Tonopah, Nev.

Officers: Harry McNamara, pres.; W. A. Nye, v. p.; H. E. Dugan, sec.-treas., with A. G. Raycraft and H. R. Cooke, directors.

Inc. April 10, 1919, in Nevada. **Cap.** \$150,000; 10c par.

Property: 8 claims, 130 acres, adjoining south Divide, over 3 miles S. of Gold Mountain. A prospect.

GOLD WEDGE DIVIDE MINING CO. NEVADA

Office: 301 Nixon Bldg., Reno, Nev.

Officers: Wm. Forman, pres.; E. H. Mead, v. p.; P. C. Fisler, sec.-treas.; with F. H. Norcross, directors. W. G. Hellier, supt.

Inc. March 30, 1918, in Nevada. **Cap.** \$150,000; 10c par; 850,000 issued. Listed on San Francisco Stock Exchange.

Property: 4 claims, about $2\frac{3}{4}$ miles slightly S. E. of Gold Mountain, covering a big fault fissure. A 12' vein, giving fair assays, has been opened on surface.

Development: by shaft with a crosscut at 250' level.

Equipment: includes 35-h. p. hoist, compressor, drills, etc.

Idle 1919-'20.

GOLD WEDGE HOMESTAKE MINING CO. NEVADA

Controlled by Tonopah Mining Co. of Nevada.

Office: care C. W. Taylor, pres.; Tonopah, Nev.

Inc. 1918, in Nevada. **Cap.** \$150,000; 10c par; 750,000 outstanding.

Property: 5 claims, in S. E. part of district, between the Gold Wedge and Rosetta. Located during 1902.

Development: a 110' shaft, sunk in 1902 on a gold vein, and 7 shafts, from 35 to 60' deep sunk by lessees.

GOLD ZONE DIVIDE MINING CO. NEVADA

Principal office: 416 State Bank Bldg., Tonopah, Nev. **New York office:** 25 Broad St.

Officers: Wm. Forman, pres.; Geo. B. Hutchings, v. p.; F. A. Burnham, sec.-treas.; with A. M. Page and H. T. Gillman, directors. H. R. Bradley, supt.

Inc. Feb. 21, 1918, in Nevada. **Cap.** \$150,000; 10c par; 1,499,500 issued,

assessable. Annual meeting, first Tuesday in March. Transfers made at New York office; registrar, U. S. Corporation Co., New York. Ten assessments levied to Sept. 15, 1921; total 15¢ per share.

Is a reorganization of the Tonopah Gold Zone Mining Co., whose shares were exchanged, share for share into stock of Gold Zone Divide Mining Co.

Property: 9 claims, 160 acres in Divide district, Esmeralda county, adjoins Tonopah Divide on south. First worked in 1901.

Development: by 900' shaft, with crosscuts to the vein on the 300, 500, 700, 800 and 900' levels. Though the vein as exposed is up to 49' wide and strong, but little commercial ore was found until September, 1921, when work was resumed on the 500' level and above, and uncovered an ore shoot 216' long, 4-7' wide, assaying between \$18 and \$55. Raises and intermediate drifts have been completed to block out ore for shipment. Total workings about 7,500'. Connection with Tonopah Divide has been made on 500' level. Shaft to be continued to 1,000'. Production 1,200 tons of \$20 ore, to mid-summer, 1921.

Equipment: 50 h. p. electric hoist, compressor, etc.

Assessment notices carry brief progress reports, but financial statements are absent.

GOODSPRINGS ANCHOR CO.

NEVADA

Office: 1202 Hollingsworth Bldg., Los Angeles, Calif. Mine at Jean, Clark county, Nev.

Officers: Frank A. Keith, pres.; Philip Wiseman, v. p.; R. I. Rogers, treas.; I. Mattern, sec.; with Seeley W. Mudd, directors. Roy W. Moore, mgr.

Inc. Dec. 20, 1913, in Nevada. **Cap.** \$1,000,000; \$1 par; 550,000 issued. Annual meeting, second Monday in May.

Gross earnings in 1916, \$111,350; in 1917, \$105,589; in 1918, \$71,073. Total dividends to January 1, 1919, \$180,258.

Property: 7 patented and 1 unpatented claims at Jean, said to show lead zinc ore occurring as replacement deposits in limestone, strike N.-S., dip 50°. Developed by 212' winze from a 110' tunnel; greatest depth of workings 400'; total workings, 2,500' of drifts.

Equipment: 15-h. p. oil hoist, 3-drill compressor, 2,000' gravity tram, 50-ton dry mill.

Production: of zinc ore, lead ore and concentrate, on a small scale, was made 1917-18.

Inactive since April, 1918.

GOULD & CURRY MINING CO.

NEVADA

Office: Goodsprings, Nev.

Company formed in 1910 by Jesse Knight and associates to operate the Milford & Addison group, Yellow Pine district, Clark county. Reported April, 1921, that Knight interests no longer control property. Has been a steady small producer for 10 years. See Vol. XIV.

GOULD & CURRY MINING CO.

NEVADA

Office: 265 Russ Bldg., San Francisco, Calif.

Officers: H. L. Slosson, Jr., pres.; Herman Zadig, v. p.; Chas. D. O'ney, sec.; Wells Fargo Nev. Natl. Bank, San Francisco, treas.

Inc. November, 1904, in California. **Cap.** \$216,000; \$1 par; assessable. Registration Surety Co., San Francisco, registrar. Stock listed on San Francisco Stock Exchange.

Property: a famous group of claims covering 613' of the Comstock Lode properties, with a production record of \$15,525,000. Now controlled by Slosson and associates.

Property with others on the Comstock Lode is to form the **Middle Mines Association**, which see.

GOWGANDA COPPER CO.

NEVADA

Probably dead, as letters sent company's officers are returned from Goldfield, Nev.

Officers: C. A. Braconier, pres.; Herman Krieger, sec.; S. H. Thompson, Keese Wampler, and W. H. Brock, directors, at last accounts.

Inc. July, 1913, in Nevada. **Cap.** \$100,000; 10c par.

Property: 9 claims, near Round mountain, Nye county, said to show a deposit of low-grade copper ore. Workings are shallow.

GRANDMA CONSOLIDATED MINES CO.

NEVADA

Address: Goldfield, Nev.

Officers: C. S. Sprague, pres.; J. K. Turner, v. p.-gen. supt; Ben Gill, sec.-treas., with B. W. Ward and L. L. Dellinger, directors

Inc. 1905, in Arizona. **Cap.** \$2,500,000; \$1 par; 1,262,493 issued. From Feb., 1917 to July, 1921, nine assessments of 1¢ per share have been levied. Listed on San Francisco Stock Exchange.

Statement of accounts, May 31, 1918 to Jan. 31, 1921 shows: total receipts, \$61,446, of which assessments (5) were \$51,456, and treasury stock sales, \$3,617. Disbursements include; mine development, \$47,751, and administration expense, \$6,621. For last 5 months of this period, the figures are: receipts, \$11,276, including assessment No. 7 \$10,816; development and administration expenses, \$10,362 and \$1,350, respectively.

Organized to acquire and develop the Grandma claim of the Grandma Mining Co. In 1916 company acquired stock control of the adjoining Goldfield Sunrise Gold Mining Co., and in 1918 final payment was made on the Sunrise property.

Property: at Goldfield, Esmeralda county, shows a quartz lode in dacite with 60° dip and N. W.-S. E. course. Sulphide ore contains gold, silver, and copper. In fall of 1920, a lease on portion of ground of Reorg. Kewanas G. M. Co., touching Grandma on W., was taken.

Development: by shaft 1,018' deep in July, 1921; total advance of workings to this date for 33 months, about 1,800'. Work on 800' level discovered ore running \$17 to \$40, but not continuous. Sinking of shaft was to be resumed to locate E. dipping shale latite contact. Reported that work was suspended, Aug. 1, 1921, because assessment No. 9 had not supplied sufficient funds.

The 3-claim group of the Silver Coin Mng. Co., in the Railroad Sps section of Lida district, Esmeralda county, was acquired in November.

Equipment: includes newly-installed compressor pump.

Future of the company depends on results in the contact area.

GRANDMA MINING CO.

NEVADA

Shareholders could exchange their stock for equal amount in the Grandma Cons. Mines Co. which now owns practically all the stock of the original Grandma company.

GRANITE HILL COPPER MINE

NEVADA

Property: 14 miles N. W. of Reno, Nev., now owned by Nixon-Nevada Mining Co., which see.

GRAY EAGLE MINING CO.

NEVADA

See Jersey Valley Mines Co.

GREAT DANE MINING CO.

NEVADA

Address: H. C. Stimler, agt., Mizpah Hotel, Tonopah, Nev.

Officers: C. L. Putnam, pres.; L. S. McConnell, v. p.; A. C. Kearns, sec.-treas., with H. W. Albert, H. C. Stimler, and L. W. Horton, directors. **Inc.** May, 1919, in Nevada. **Cap.** \$150,000; par 10c; 750,000 shares treasury stock.

Property: 2 claims and fraction, 55 acres, south of the Reno, adjoining the Toggery on W. and 4,000' S. of the Tonopah Divide. Has 3 distinct veins, with 3 prospect shafts. The vein system of Toggery goes through the tract.

GREAT DIVIDE MINING CO.

NEVADA

Is a development proposition organized to finance a promising tract S. of Jim's Divide and a mile S. of the Tonopah Divide.

GREAT WESTERN CONSOLIDATED MINING CO. NEVADA

In 1915, an interest in this company was acquired by the Greenwater Copper Mines & Smelter Co., which see.

Address: Emery W. Elliot, 542 Mills Bldg., San Francisco, Calif. John McGee, supt., Box X, Tonopah, Nev.

Annual statement to Dec. 31, 1920; cash on hand, \$1,372; received from assessments, \$12,947. Mine and general expenses were, \$9,535, as compared with \$21,563 for previous 12 months. Eleven assessments had been levied up to Sept., 1919. Listed on San Francisco Stock Exchange.

Property: 11 unpatented claims, about 300 acres, at Tonopah, Nye county.

Development: by 2-compartment shaft, 1,150' deep, which enters one of the ore-bearing formations at about 1,000'. Considerable exploration work was done on the 860' level, but it is said to have been all in cap rock and commercial ore was not found. Water hindered exploration during the early part of 1917. Management intends to explore the ground thoroughly by crosscutting and drifts. In June, 1918, work was resumed on the 1,100' level and 12' vein intersected about 130' north of the shaft. A new 4-compartment shaft had reached 600' in Aug., 1919, since when no progress report received.

GREAT WESTERN DIVIDE MINING CO. NEVADA

Inc., 1919, in Nevada. One of the many companies organized during the wild days of the Divide boom.

No information as to holdings, etc., obtainable.

GREEN MONSTER MINE NEVADA

Office: Phoebe A. Hearst Estate, 410 Hearst Bldg., San Francisco. Operated by lessees at last accounts.

Property: in Yellow Pine district, Clark county, 16 miles N. W. of Goodsprings. Ore is mainly zinc carbonate with a little lead, copper, and silver. Regular shipments were made 1917-19, but no production figures are available.

Development: by 250' single-compartment shaft with manway, 2 incline shafts, 100 and 255' deep, and 200' winze.

GREENWATER COPPER MINES & SMELTER CO. NEVADA

Principal office: Room 515-E., 30 Church St., New York, c/o W. G. Benham, sec.-treas.

Officers: Chas. R. Miller, pres.; M. R. Ward, v. p.; preceding, with Max E. Bernheimer, Chas. Gold, W. G. Denham, Clyde Milne, Oscar A. Daube, F. I. Mallory, B. H. Campbell and W. H. Drayton, 3rd, directors, at last accounts.

Inc. Dec. 12, 1906, in Delaware. **Cap.** \$25,000,000; shares \$5 par. Was a securities holding company only, and owned stock in a number of Greenwater promotions, all dead, described Vol. VIII, Copper Handbook. Company, on December 31, 1910, had \$144,727 invested in choice bonds, after losing about \$170,000 through the failure of Chas. Minzesheimer & Co., New York brokers, who failed October 15, 1910.

Reorganized October, 1914, and capitalization reduced to \$500,000; shares 10c. par; 3,000,000 issued. Stock listed on the N. Y. Curb. Annual report December 31, 1916, showed cash assets of \$52,630, less expenses and loss of \$4,960, leaving \$47,670 net. Corporation Trust Co., Jersey City, N. J., transfer agents. Annual meeting, second Friday in February.

Property: in August, 1911, company took over the O. K. and Supply groups, gold mine at Dale, Calif. Considerable work was done on the Supply mine. In 1915 a crosscut on the 700' level cut the Armenian and Jeane veins, carrying practically no metal. Two winzes were sunk and drifts extended on the 800-1,100' levels of the Supply vein with negative results.

The value decreased with depth, and on the 1,200' level no pay-ore was found. All development and prospect work gave unsatisfactory results and the property was abandoned in October, 1915.

In November, 1915, the company acquired stock interest in the Tonopah Bonanza Mining Co. and Great Western Cons. Mining Co., at Tonopah, Nev. The cost of shares and assessments in first-named company to end of 1916 was \$31,867, and in latter company \$14,910. For the Ruby claims, also at Tonopah, 125,000 treasury shares at par 10c. each was paid. Due to excessive water encountered and insufficient funds to carry on development, all operations at Tonopah were suspended in 1918.

Holdings described under their respective titles.

GRIMES DIVIDE MINING CO.

NEVADA

Office: Tonopah, Nev.

Officers: J. L. Joseph, pres.; J. G. Crumley, v. p.; E. J. Erickson, sec.-treas.; with C. C. Boak, Gust Hanson, James Grimes and H. C. Brougher, directors.

Inc. March 20, 1919, in Nevada. Cap. \$150,000; 10c par; assessable. All issued. Listed on San Francisco Stock Exchange. Transfers at company office. Had \$56,278 cash in treasury July 1, 1919.

Property: 5 claims, 100 acres, adjoining the Tonopah Divide on southwest side. Originally located 16 years ago and produced some shipping ore.

Development: a 350' tunnel was driven prior to sinking new shaft in 1919. Equipment: complete includes electric hoist, etc.

Patent was applied for in 1920, but no mining operations carried on in 1919-20. Is a promising prospect.

GROOM MINE

NEVADA

Address: Indian Springs, via Las Vegas, Clark Co., Nev. Owners are T. J. Osborne, G. Poncin and Patrick Sheahan, mgr.

Property: in Groom district, Lincoln county, some 60 miles N. of Indian Springs, the nearest R. R. point. Ores are lead sulphide, carrying silver, in limestones and shales; shipping ores assay 35 to 60% lead, and 11 to 22 oz. silver.

Development: by 2 shafts, 170' and 200', and over 500' of drifts.

Production: during 1916, was 1,500,000 lb. of lead and 25,000 oz. silver. Shipments are of record for years 1915, 1917 and 1918. Total production to 1919 said to have been \$250,000.

During 1916, and part of 1917, mine was under lease to Tom McCormac. Was operated 1919-20.

GROOM SOUTH END MINING CO.

NEVADA

Address: Indian Springs, via Las Vegas, Clark Co., Nev.

Officers: Wm. Armstrong, pres.; Chas. Osborne, v. p.; T. J. Osborne, sec.-treas.

Property: 1 claim, 20 acres, adjoining Groom mine, in Groom district, Lincoln county, 60 miles N. of Indian Springs. A 50' shaft was reopened in fall of 1916 on 8' vein. No later information.

GYPSY QUEEN MINING CO.

NEVADA

Offices: 265 Russ Bldg., San Francisco, Calif., and Tonopah, Nev.

Officers: C. F. Wittenberg, pres.; Chas. D. Olney, sec.

Inc. in Nevada. Cap. \$1,500,000; 18 assessments have been levied. Listed on San Francisco Stock Exchange.

Property: 53 acres in Tonopah mining district, Nye county, said to show silver ore. Vein is from 1 to 5' wide. Formation is rhyolite, quartz and trachyte.

Development: by 1,370' shaft. On the 1,350' level a crosscut was run S. E. for several hundred feet. In spring of 1921, company reported to have taken a lease on Montana-Tonopah Mng. Co., adjoining on the west.

HALE & NORCROSS MINING CO.

NEVADA

Address: Virginia City, Nev., or 26 Russ Bldg., San Francisco, Calif.

Officers: H. B. Bulmer, pres.-mgr.; E. L. Lowe, v. p.-sec.; with P. H. Hohnewald, Wm. Turney and R. L. Thurston, directors. Wells Fargo Bank, San Francisco, treas.

Inc. in California. **Cap.** \$112,000; \$1 par; 100,000 issued; assessable Annual meeting 3rd Monday in December.

Property: 1 claim, 400' on the Comstock Lode, at Virginia City, Storey county, developed by 3,200' shaft, and reputed to have produced \$11,486,000 when first operated.

Idle during 1919, but mine was again under development in 1920, and in 1921 was merged with other lode properties to form the **Middle Mines Assoc.**, which see.

HALIFAX TONOPAH MINING CO.

NEVADA

Offices: 1008 Kearns Bldg., Salt Lake City, and Tonopah, Nev.

Officers: F. M. Smith, pres.; Thos. Kearns, v. p.; Geo. C. Ellis, sec.; C. B. Zabriskie, treas.; preceding, directors. B. F. Edwards, gen. mgr., Syndicate Bldg., Oakland, Cal. J. W. Sherwin, supt.

Inc. Sept. 27, 1902, in Utah. **Cap.** \$2,000,000; outstanding, \$1,895,000; shares \$1 par. Stock transferred at company's office. Registrar & Transfer Co., 19 Nassau St., New York, registrar. Annual meeting, second Tuesday in October. Listed on New York Curb and San Francisco Exchange.

Annual statements show: for 1919, receipts, \$68,785 and disbursements, \$73,446; for 1920, the figures are, \$77,841 and \$78,194.

Property: 4 patented claims, 81 acres, adjoining the central portion of the Belmont property on the east. Company also has a lease on the Mizpah Extension property, which is being worked through the Halifax shaft.

Ore: gold-silver, occurring in trachyte. For geology of Tonopah district, see U. S. G. S. Prof. Paper, 42, or Jim Butler company herein.

Development: by vertical shaft, 1,734' deep, with the deeper levels at 1,000', 1,200', 1,400' and 1,700'. The 1,000' crosscut picked up the easterly extension of the Belmont vein and ore shipments were made. After considerable work the vein was lost through faulting. Owing to an excessive flow of water work was stopped until July, 1919, when the water was reported under control and work resumed. During spring and summer of 1920 fairly regular shipments were made to the West End mill from 1,100' and 1,160' levels. Reported, February, 1921, that company operations had ceased; lessees working on 1,000' level.

The West End Cons. Mng. Co. has been in control of operations for several years; a number of the officers are identical.

HAMBURG MINES CO.

NEVADA

Office: 1118 Newhouse Bldg., Salt Lake City, Utah. Mine at Pioche, Lincoln county, Nevada.

Officers: M. C. Godbe, pres.-mgr.; J. R. Cook, v. p.; J. T. Osborne, sec., John Pingree, treas.; above with A. H. Godbe, W. H. Pitts and Murray Shepherd, directors. M. M. Johnson, cons. engr.

Inc. June 1916, in Nevada. **Cap.** \$200,000; 20c par; all issued; 200,000 shares sold during 1920. Listed on Salt Lake Stock & Mng. Exchange.

Dividends: first dividend of 1c paid March 2, 1917, third paid May 21, 1917, making \$24,000 to date.

Property: 4 claims (1 patented), 40 acres, in Pioche district, shows quartzose replacement veins in flat bedded limestones, carrying gold, silver and lead; veins vary from several inches to 5' wide, and are cut by N. S. faults.

Development: by 800' tunnel with 75' winze, drifts and crosscuts. Early operators worked through 130' shaft.

Production: reported to have been \$100,000 in the '80s, and by present management another \$100,000, the ore averaging 14 oz. silver, \$3 gold and 20% lead. Mine was closed down in 1918 when faulting of orebody was encountered; reopened in 1920. Development is to be pushed in current year and old workings leased. A compressor has been installed.

HAMILTON POWER, MINING & TRANSP. CO.

NEVADA

Property: the Grand Prize group, 5 claims and power rights on Illipah

creek in Rocco canyon, near Hamilton, White Pine county. Probably dead. See Vol. XIII.

HAMMOND EXPLORATION CO. NEVADA

Address: Gold Creek, Nev.

Property: in Island Mtn. district, Elko county. Made a small production in 1919.

HANNAPAH DIVIDE EXTENSION MINES CO. NEVADA

Offices: 310 First National Bank Bldg., San Jose, Calif. and 126 Main St., Tonopah, Nev., (care J. C. Kind).

Officers: W. R. Porter, pres.; Louis O'Neal, v. p.; M. J. Rankin, sec-treas.; with F. E. Chapin and D. A. Beattie, directors.

Inc. in Nevada; 300,000 treasury shares offered at \$1 each in Dec., 1919.

Property: 9 claims, 176 acres, in the Silverzone district.

Idle.

HANNAPAH MINE NEVADA

Former address: Care Fred'k E. Brown, owner, Hannapah, via Tonopah, Nevada.

Property: in Silverzone (Hannapah) district, Nye county, 18 miles E. of Tonopah; located in 1902 and developed by 2 shafts, 250' and 300' deep; reported that 8½' of ore carrying 35 oz. silver was exposed on 250' level.

HARMILL DIVIDE MINING CO. NEVADA

Office: Goldfield, Nev.

Officers: G. B. Hartley, pres.-gen. mgr.; Floyd Cable, v. p.; M. B. Hartley, sec.-treas., with W. D. Miller and Thos. Keane, directors.

Inc. April 1, 1919, in Nevada. Cap. \$150,000; 10c par; assessable; 810,000 shares issued. Transfers made at company's office; registrars, Tonopah Banking Corp., Tonopah, Nev. Listed on San Francisco Stock Exchange and traded in on New York Curb.

Property: Chimney and Nieta claims, 14 acres, the south end adjoining east end of Tonopah Divide, in the Divide district, and the Monitor group of 8 claims (acquired in 1920), in Montezuma district, Esmeralda county. The former exposes the familiar Divide formation. The latter covers seven parallel veins and one cross vein, reputed to have produced \$75,000 from 150' shoot to a depth of 80', as replacements in limestone; ore is lead-silver.

Development: 50' shaft on Divide claims; 100' shaft and tunnels on Monitor group, opening an ore shoot, 57' long and 3 to 5' wide. Shaft was being enlarged and sunk in 1921.

The Divide property is apparently idle (1921), and all efforts reported to be concentrated on Monitor group. In May, 1920, certain brokers were accused of "rigging" the market in connection with Harmill Divide.

HARMONY MINES CO. NEVADA

Address: Geo. B. Williams, mgr., Winnemucca, Nev.

Property: in Humboldt county, 3 miles E. of Winnemucca, shows a 4 to 6' vein carrying gold, silver and copper with some antimony. Developed by 200' incline with drifts at 110'. Equipped with gas hoist and 5-drill compressor.

Active late in 1921.

HARNEY GROUP NEVADA

Address: Stindl & Donohue, lessees, Pioche, Nev.

The mine is 1 mile east of Pioche, Lincoln county, and in April, 1919, an orebody 9' wide was cut that consisted of galena averaging \$80 to \$100 per ton. Shipments were made in 1919, but no record is obtainable.

HARTLEY MNG., MLG. & REDUCTION CO. NEVADA

Dead. Plant at Mazuma, Nev., purchased by Dupont Copper Mines Co.

HASBROUCK COMSTOCK DIVIDE MINING CO. NEVADA

Organized 1919, to finance development of a group of 8 claims, 160 acres, lying west of the Hasbrouck Extension and north of Hasbrouck Divide.

HASBROUCK DIVIDE ANNEX MINING CO. NEVADA

Office: 421 Clay Peters Bldg., Reno, Nev.

Officers: A. A. Busey, pres.; A. H. Butler, Jr., v. p.; A. A. Codd, sec.-treas.; with D. E. Kernick and H. H. Blair, directors.

Inc. May, 1919, in Nevada. Cap. \$150,000; 10c par; assessable; 750,000 treasury shares; 815,000 shares issued.

Property: Nonpareil 3 and 4 claims, adjoining Tonopah Hasbrouck and Western Divide. Mine is to be developed through shaft on Kernick Divide, 900' deep, April, 1921.

HASBROUCK DIVIDE MINING CO. NEVADA

Office: Goldfield, Nev.

Officers: J. W. Dunfee, pres.; J. E. Ewing, v. p.; E. Marks, treas.; Clyde Cannan, sec. T. Connolly, mgr.; A. H. Elftman, cons. eng.

Inc. March, 1919, in Nevada. Cap. \$200,000; par 10c; 1,000,000 in treasury; 150,000 issued.

Property: 8 claims, 1 mile due W. of the Tonopah Divide, and adjoining the Tonopah Hasbrouck, developed by 100' shaft with crosscuts and drifts on Hasbrouck vein.

Equipment: complete for 500' depth with electric hoist, compressor, etc.

HASBROUCK EXTENSION MINING CO. NEVADA

Company, as yet, incomplete, but owns a group of 4 claims adjoining the Tonopah Hasbrouck and Hasbrouck Divide on the south.

HASBROUCK MINE NEVADA

Formerly owned by the Hasbrouck Mining Co., but abandoned after doing considerable work and bought at Sheriff's sale by Geo. Kernick, of Tonopah, who organized **Tonopah Hasbrouck Mining Co.**, which see.

HAYSTACK MINES CO., INC. NEVADA

Address: Winnemucca, Nev.

Officers: Pete Egoscue, pres.; F. L. Reber, v. p.; C. T. Smith, sec.; B. J. Loinaz, treas.; with Y. Arrascade, and Jose Ugariza, directors.

Inc. June, 1914, Cap. \$1,000,000; none issued. Annual meeting first Tuesday in January.

Property: 5 claims, 35 miles W. of Winnemucca and 7 miles S. of Jungo. Humboldt county, on the Western Pacific R. R. Ore carries free-milling gold in fissure veins in granite and quartzite, said to average \$22 per ton.

Development: by 3 shafts, deepest 100'. Machinery installed in 1919.

HECLA DIVIDE MINING CO. NEVADA

Address: H. C. Pratt, sec., 85 Devonshire St., Boston, Mass. Company's present operations are confined to its New Mexico holdings and the Nevada property, at Divide, near Tonopah, is idle. The company is described in the New Mexico section of this volume.

HELEN FRACTION DIVIDE MINING CO. NEVADA

Owns a group of claims situated about 1¾ miles S. of Gold Mountain.

HENNESSY DIVIDE MINING CO. NEVADA

Office: Tonopah, Nev.

Officers: W. A. Bradley, pres.; E. R. Bennett, v. p.; L. L. Mushett, mgr.; A. G. Raycraft, sec.-treas., with F. H. Bruce and Agnes Cordingly, directors.

Inc. Feb. 25, 1919, in Nevada. Cap. 1,000,000 shares; 10c par; increased to 1,500,000 in June; 400,000 in treasury. Listed on San Francisco Stock Exchange.

Property: 3 claims E. of the Alto and Harmill, and 800' E. of the Tonopah Divide, developed by 250' shaft, which cut 4' of \$18 ore, also a 4" streak high in silver.

Equipment: 15-h. p. electric hoist, 3-drill compressor, drills, etc.

In July, 1921, a suit to recover ½ interest in the property was decided in favor of company.

HERCULES DIVIDE MINING CO.**NEVADA**

Office: E. J. Erickson, res. agt., Tonopah, Nev. J. W. Hutchinson, manager.

Officers: J. G. Crumley, pres.; A. E. Kane, v. p.; E. J. Erickson, sec-treas., with George Wingfield and H. C. Brougher, directors.

Inc. April 10, 1919, in Nevada. Cap. \$150,000; shares 10c par; 750,000 in treasury. Listed on San Francisco Stock Exchange.

Property: 4 claims, 60 acres, between the Anchor and Argonne, and S. of the Rosetta. Patent was applied for in 1921.

Development: shaft down 280' in December, 1919, and silicified breccia worth \$20 per ton reported cut. Has 30 h. p. hoist, compressor, and other machinery.

HIDER NEVADA MINING CO.**NEVADA**

Address: Fred Redmond, Elks Club, Salt Lake City.

Officers: Fred Redmond, pres.; J. J. Morris, sec-treas., with Mrs. A. F. Pitt, E. O. Lee and T. E. Fitzgerald, directors.

Cap. 1,000,000 shares; 347,980 issued.

Property: about 23 miles south of Battle Mountain, Lander county, said to show several veins carrying copper ore.

Development: by two 125' inclines and a tunnel.

Management shipped some ore from the dumps in 1917.

HIGH DIVIDE ANNEX MINING CO.**NEVADA**

Fully described in Volume XIV. Property taken over, Spring of 1919, by Chas. E. Knox and name of company changed to **Knox Divide Mng. Co.** (q. v.)

HIGH DIVIDE EXTENSION CO.**NEVADA**

Address: 1131 Hearst Bldg., San Francisco, Calif., or Tonopah, Nev.

Officers: W. C. Pitt, pres.; Grant Y. Alexander, v. p.; J. R. Whitmire, sec-treas., with George Woodland and F. T. Martens, directors.

Inc. March 10, 1919, in Nevada. Cap. \$150,000; 10c par; assessable; 800,000 issued. Listed on San Francisco Stock Exchange.

Property: 6 claims, N. of the High Divide.

Development: by 150' shaft sunk in early days. Fully equipped.

HIGH DIVIDE MINING CO.**NEVADA**

Address: E. J. Erickson, res. agt., Tonopah, Nev.

Officers: H. C. Brougher, pres.; Wm. F. Watters and W. J. Douglass, v. ps.; E. J. Erickson, sec-treas., with Roger Dougherty, directors.

Inc. April 13, 1918, in Nevada. Cap. \$150,000; 10 par; 1,250,007 outstanding. Listed on San Francisco Stock Exchange. Annual meeting, first Monday in May. \$50,406 in treasury July 1, 1919.

Property: over 200 acres, 1,300' N. E. of the Tonopah Divide.

Development: by shaft, 230' deep at last accounts.

Equipment: electric hoist and 2-drill compressor.

HILLTOP GROUP**NEVADA**

Formerly operated by Kimberly Cons. Mines Co., of record as having milled and shipped a small tonnage of gold-silver-copper ore, 1915-19.

Property: 18 claims, patented, 360 acres, at Hilltop Lander county, shows gold, silver, copper and lead ore in quartz veins. The vein runs N.-S., dips W., and is said to have been proven for 5,000' in length. A crosscut driven on the 350' level reported to have cut a 12' vein assaying \$9.48 per ton. Developed by 5,000' tunnel and several shafts.

Equipment: included compressor, ½ mile tram and 25-h. p. gasoline engine, 50-ton mill and cyanide plant.

Property sold at sheriff's sale, March 15, 1920.

HILLTOP MILLING & REDUCTION CO.**NEVADA**

Hilltop, Lander county, Nev. Officers and directors: Frank LeBar, pres.; Chas. E. Beach, v. p.; E. Ross Carver, sec-treas. and mgr.

Inc. in Nevada. Cap. \$50,000; shares \$10 par; all outstanding. An-

nual meeting in January. Company operated a 75-ton 10-stamp cyanide plant at last accounts.

HOBART DIVIDE MINING CO. NEVADA

Inc. under laws of Nevada, 1919.

Property: 4 claims adjoining Rex Divide, nearly 2½ miles E. of Gold Mountain.

HOLDEN MINING & MILLING CO. NEVADA

Described in Vol. XIV. Name changed to **Stewart-Tuscarora Mng. Co.**, which see.

HOLLY MINING CO. NEVADA

See **Eureka-Holly Mng. Co.**

HOME RUN COPPER CO. NEVADA

Idle. **Office:** 1118 Newhouse Bldg., Salt Lake City, Utah. Mine in Bristol mining district near Pioche, Nev.

Officers: M. C. Godbe, pres.; E. S. Woodward, v. p.; H. F. Earle, sec.-treas., with A. H. Godbe and Henry Sadler, directors W. H. Pitts, supt.

Inc. 1912. **Cap.** \$100,000; 10c par. Listed on Salt Lake Exchange.

Property: 8 claims, 3 fractions, 180 acres, 9 miles from railroad, in Lincoln county, adjoins the Gypsy mine and is said to carry same fissures. Claims show fissures in limestone expanding into replacement deposits and caves carrying rich copper ores with gold and silver.

Development: by 225' shaft with levels at 65', 90' and 150'. **Equipment:** includes gasoline engine, hoist, compressor, building, etc.

HOMESTAKE CONS. PLACER MINES CO. NEVADA

Office: Reno, Nev. George B. Cole, Wm. Forman, Ed. Malley and Geo. B. Thatcher are principal stockholders. Chas. LaKamp, supt.

Cap. \$175,000; increased April 12, 1920, from \$150,000; par 25c.; assessment: 4c assessment became delinquent Feb. 7, 1921.

Property: placer ground in Copper Canyon, Lander county, held at one time as lode claims, by Glasgow & Western Expl. Co., now liquidated. Title was under litigation for a number of years. Gravel is found in an old channel, 18' wide, with gold values for a depth of 6'. Production for 1921 season said to be \$60,000.

Development: began May, 1920. The channel has been opened by two 50' shafts and drifts. Water for sluicing is obtained by pumps from an old shaft.

HOMESTAKE DIVIDE MINING CO. NEVADA

Office: J. C. McKay, res. agt., Tonopah, Nev.

Officers: J. C. McKay, pres.; Nick Ableman, v. p.; Ben D. Luce, sec.-treas., with Ed. C. Smith, G. W. Quigley and B. D. Price, directors. Homer O'Connell, supt.

Inc. March 24, 1919, in Nevada. **Cap.** \$100,000; 10c par. Listed on San Francisco Stock Exchange.

Property: 3 claims, S. of the Sutherland and 1 mile N. of Tonopah Divide, opened by 200' shaft and adequate machinery erected.

HOMESTAKE MINING CO. NEVADA

Address: c/o J. F. Musselman, Tristate, Nev., via Kingman, Ariz.

Property: 6 claims on the Colorado river, Clark county, immediately across from the Katherine gold camp, Union Pass section, San Francisco district, Mohave county, Ariz.

HONEST ENDEAVOR MINING CO. NEVADA

Was unfavorably regarded and fully described Vol. XIII. Company succeeded 1917 by **Nevada Union Copper Mines Co.**, which see. Stock exchanged share for share.

HOPE CONSOLIDATED MINING CO. NEVADA

Address: Eureka, Nev. J. H. Rogers, pres.-mgr.

Inc. 1918. **Cap.** \$500,000; shares \$1 par.

Property: on Ruby hill, Eureka, Eureka county, developed by tunnel. Prospecting in 1921.

HORNSILVER AMERICAN CO.**NEVADA**

Address: Harry De Votie, Goldfield, Nev., or E. G. Reinert, Opera House Bldg., Denver Colo. **Mine address:** Hornsilver, Nev. Controlled by the above with J. F. Erisman and G. T. Hoffman, both of Denver.

Property: 8 claims in the Hornsilver district, Esmeralda county, 30 miles S. W. of Goldfield, and 1½ miles S. E. of the Orleans mine, shows high grade silver ore. Developed by 2 shafts, 200 and 140' deep. Is well equipped. Said to have produced carload shipments averaging \$70 per ton.

HORNSILVER APEX MINING CO.**NEVADA**

Mine address: Hornsilver, Nev.

Inc. summer of 1921, by E. O. McGrath and H. W. Young, of San Jose, Calif., and M. A. Diskin, Reno, Nev.

Property: 6 claims in Hornsilver district, Esmeralda county, 1½ miles from the Orleans mine and same distance from Hornsilver.

HORNSILVER MAY CO.**NEVADA**

Mine address: Hornsilver, Nev.

Organized in 1921 by W. E. Sirbeck, Ben Gill and J. K. Turner, all of Goldfield, Nev.

Property: the May and May Fraction claims, 27 acres, in the Hornsilver district, Esmeralda county, shows 2 well defined, persistent veins. One traced for 1,000', is opened by 2 shafts, 50 and 70' deep and is 5 to 6' wide. The ore at surface assays \$4.28 in gold and silver.

HORNSILVER NEW ORLEANS MINING CO.**NEVADA**

Mine address: Hornsilver, Nev.

Incorporated late in 1921, by Peter J. Somers and Dr. McCarthy (of Goldfield) to operate an "inside" property in the Hornsilver district, Esmeralda county.

HORNSILVER RED TOP MINING CO.**NEVADA**

Mine address: Hornsilver, Nev.

Organized in October, 1921, by Sol Camp, Harry Ruhl, L. L. Patrick and Del Hammond.

Property: the Jacks group, and options on other claims, in the Hornsilver district, Esmeralda county, 3 miles from the Orleans mine. A 75' shaft and crosscut have uncovered a 4' vein said to carry high grade ore.

HORSESHOE DIVIDE MINING CO.**NEVADA**

Address: Fr. K. Pittman, res. agt., Tonopah, Nev.

Officers: Forest B. Caldwell, pres.; Zeb. Kendall, v. p.; F. A. Burnham, sec.-treas., with T. D. Cummins and Frank Pittman, directors. Frank Helm, mine supt.

Inc. April 7, 1919, in Nevada. **Cap.** \$150,000; 10c par; assessable. Listed on San Francisco Stock Exchange.

Property: 5 claims, 53 acres, adjoining the Hennessy on north. Two N. W.-S. E. and two cross veins said to run through ground. Machinery erected 1919.

HUDSON DIVIDE MINING CO.**NEVADA**

Address: Frank T. Dunn, res. agt., Tonopah, Nev.

Officers: Ben Luce, pres.; Roger Dougherty, v. p.; P. Mooney, sec.

Inc. April, 1919, in Nevada. **Cap.** \$150,000; par 10c; 750,000 shares issued.

Property: 4 claims, one fractional, adjoining Circle and Ben Hur Ex. properties.

HUDSON LEASING CO.**NEVADA**

Operated the Best Chance claim of the Hudson M. & M. Co., in 1919, producing lead shipping and gold-silver milling ore.

HUDSON MINING & MILLING CO.**NEVADA**

Address: Walker Bros., Main & 2 S. St., Salt Lake City, Utah.

Officers: J. R. Walker, pres.; W. H. Royston, v. p.-gen. mgr.; A. H. Jones, treas., with R. J. Kelly and Jos. Wilson, directors.

Inc. April, 1921, in Nevada. **Cap.** \$100,000; par 10c; 500,000 treasury shares.

Property: 17 claims, including the Golden Eagle and Best Chance, at the new camp of Royston, San Antone district, Nye county, 28 miles N. of Tonopah, shows veins carrying high grade silver ore with some lead. One 30" vein said to assay \$92 per ton for a length of 40'. Production prior to 1921, reported to be \$40,000.

A conflict relative to claim titles prevented development for a number of years until interests were consolidated in spring of 1921.

Development: by several shafts, a 300' incline being the deepest, with 600' of laterals.

Company plans to continue shaft and open claims at depth, but in meantime is leasing small tracts. Thirteen lessees were at work in November, including the Hudson Leasing Co. (q. v.) and Betts lease on the Golden Eagle claim.

HULL CITY DIVIDE MINING CO.

NEVADA

Idle. Office: W. J. Gomm, res. agt., Tonopah, Nev.

Officers: L. R. Robins, pres.-mgr.; Herman Dauth, v. p.; W. J. Gomm, sec.-treas., with A. G. Raycraft, Gust Hanson, and T. J. Lynch, directors.

Inc. March 8, 1919, in Nevada. **Cap.** \$100,000; 10c par; 500,000 issued. Listed on San Francisco Stock Exchange.

Property: 9 claims, 2 fractional, S. W. of Reno-Divide, equipped with electric hoist, etc.

HUMBOLDT CONSOLIDATED MINES CO.

NEVADA

Offices: 108 So. La Salle St., Chicago, Ill., and Oreana, Nev.

Officers and directors: C. F. Champion, pres. and treas.; C. J. Hayden, v. p.; L. R. Miser, sec. A. E. Taylor, asst. sec.; J. B. Newman, mgr.

Inc. in Arizona. **Cap.** \$1,500,000; shares \$1 par. Owns entire capital stock of La Toska Mining Co.

Property: La Toska mine, about 360 acres, at head of Wright Canyon, 5 miles from Rycpatch and the same distance from Oreana, both on the S. P. R'y, Pershing county. Claims reported to show gold-silver ore occurring in 2 well defined veins. The main vein 6' wide has limestone hanging wall and rhyolite foot, and carries free gold, as well as silver minerals (bromide).

Development: by 3,000' tunnel. The main vein was cut in 1917, at depth of 1,345' as a result of six years' work and mining on it was begun in 1918, when the management reported that there was an ore shoot 130' long, and was considering erection of a mill. In extending this tunnel, two veins were cut, one at 600' and the other at 1,000'. Development work on the first vein showed 15' of gold-silver ore running \$8 per ton. The other vein is 4' thick including an 18" band carrying \$10 gold and 25 oz. silver. \$73,626 was spent on mine up to 1918, of which \$64,825 was for development work.

No recent returns.

HUMBOLDT COUNTY TUNGSTEN MINES & MILLS CO. NEVADA

Address: care H. M. Byllesby, 208 S. La Salle St., Chicago, Ill. L. A. Savage, mgr.

Property: 5 claims in Mill City district, also a lease on the Ragged Top Tungsten mine near Lovelocks, which was abandoned. Operated a custom mill of 125 tons daily capacity at Toulon, Pershing county. All operations discontinued Dec. 31, 1920.

HUMBOLDT TRINITY GOLD MINING & MILLING CO. NEVADA

Office: Lovelocks, Pershing county, Nev. E. L. Connell, mgr. Not incorporated.

Property: 10 claims, 200 acres, 12 miles N of Lovelocks, said to show gold-silver ore in quartz vein 18" to 24" wide. The ore above water-level at 100' depth is said to assay \$18 to \$25 per ton, with higher value below.

Development: 108' Humboldt incline with drifts on 90' and 55' levels. **Equipment:** included an 11-ton mill, and a 15-h. p. gasoline engine.

No report since 1917.

HUNTER MINE**NEVADA**

Owned by Vulcan M., S. & R. Co., which see.

HYBLA MINING CO. OF NEVADA**NEVADA**

Address: Pioche, Nev.

Reported, February, 1920, to have leased the Ronnow claim of the Stella Mng. Co. (q. v.), in Comet district, Lincoln county.

IDEAL COPPER CO.**NEVADA**

Office: 634 Bridge St., Grand Rapids, Mich. **Mine office:** Luning, Nev.

Officers: S. J. Hufford, pres.; H. D. Keefer, v. p.; Henry Riechel, sec.-treas., with Henry Smith and J. I. Keller, directors.

Inc. Jan. 12, 1915, in Nevada. **Cap.** \$600,000; \$1 par; 4,000 shares issued. Annual meeting, 2nd Tuesday in January.

Property: 16 claims, in 2 groups, 360 acres, about 4 miles from Luning, Mineral county, formerly owned by the Wagner Azurite C. Co. and described in Vol. XI. The Atwood group, which is the principal property, shows a contact zone of about 600' width, traceable 2,000', between an altered granite footwall and limestone hanging, with N. W.-S. E. strike and dip of 50° N. The outcrop carries silver and gold-copper ores with a quartz gangue. The Nevada-Wisconsin group shows several dikes of 50 to 100' width, one said to show 2 to 11% copper sulphide ore.

Development: by 2 tunnels, 1,700' and 350' long, with a total of 2,185' of workings. In 1916, 400' of shaft work was done, also 350' of crosscutting, the work costing \$6,000. No recent operations reported.

Equipment: includes 40-h. p. steam plant with 15-h. p. hoist, 3-drill compressor, 100-ton leaching plant and 10-stamp mill. Owing to excess of lime in the ore, the leaching plant proved a failure.

INDEPENDENT SCHEELITE CO.**NEVADA**

Property: tungsten claim in the Snake Range district, 26 miles from Ely, White Pine county. A 30-ton mill, erected at a cost of \$35,000, made one run, but product was too low-grade and operations ceased.

INDIAN SPRINGS MINING CO.**NEVADA**

Address: 223 Mohawk Block, Spokane, Wash. Mine at Lida, Esmeralda county, Nev.

Officers: A. B. Railton, pres.; H. T. DeMerritt, v. p.; Fred N. Davis, sec.; Thos. R. L. Harris, treas.; Ross C. Craddock, supt., at last accounts.

Inc. Feb., 1911, in Washington. **Cap.** \$1,500,000; shares \$1 par; assessments, 3 mills to April, 1913. Company is a reorganization of the Indian Springs Copper Mining Co.

Property: 8 claims, 100 acres mineral land in Lida valley, or Tule Canyon district, 30 miles S. W. of Goldfield, Nev. Ground shows veins and replacements in massive gray limestone. Vein runs E.-W. has vertical dip and is said to be 70' wide, traceable for 1,000'.

Development: by 100' shaft and 200' tunnel. Presumably idle.

INDUSTRIAL DIVIDE MINING CO.**NEVADA:**

Mail returned from J. G. Thompson, res. agt., Tonopah, Nev.

Officers: W. C. McFarland, pres.; Fred Nielson, v. p.; Albert Erickson, sec.-treas., with L. C. and J. G. Thompson, directors.

Inc. May, 1919, in Nevada. **Cap.** \$150,000; 10c par; 750,000 issued.

Property: the Calico group of 5 claims, 100 acres, adjoining the Rainbow on E. and S. Surface prospects considered good.

INGALLS MINE**NEVADA**

See Vol. XIV. Under option to the Silver Hills Nevada Mines Co. (q. v.) for 2 years, beginning March 12, 1920.

INGOMAR MINE**NEVADA**

Address: 303 Dooley Bldg., Salt Lake City, Utah, and Godsprings, Nev. Owned by Samuel A. Arentz and W. A. Perkins.

Property: 3 claims 10 miles S. of Goodsprings, Clark county, has a

chamber deposit in limestone, dipping 35° S. E. and pitching N. 20° E., with high-grade zinc carbonate and lead sulphide ore.

Development: by incline shafts to 50' depth, and tunnels 200 and 300' long. **Equipment:** includes 2-single-span wire tramways, 1,200 and 1,600' in length, with 2 buckets.

Gross yield for 1918 was \$20,000 from shipments of zinc carbonate ore assaying from 42 to 46% zinc, and free from lead and other impurities. Both lead and zinc ore were shipped in small amounts in 1919. Presumably operated in 1920-21.

INTERNATIONAL DIVIDE MINING CO.

NEVADA

Address: H. J. McSherry, res. agt.-gen. mgr. Tonopah, Nev.

Property: is 3 miles from Tonopah on Silver Bow road and near the Cornucopia Divide. R. E. France is president; no other information available.

INTERNAT'L & INTERCONTINENTAL MNG. & REF. CO. NEVADA

Dead. Was a paper corporation organized 1916 by Raoul Madero, et. al. of Mexico City, to make a market for their holdings. Reported to have had no connection with the companies appearing on the balance sheet of March 24, 1916, as debtors (see Vol. XIII) and was evidently a rank promotion that nobody wants to father.

Stock was stricken from New York Curb, June, 1918; 200 shares were sold at auction in New York City, July 26, 1919 at \$1 for the lot.

INTERNATIONAL PROPERTIES SYNDICATE

NEVADA

Reported operating manganese claims adjoining the holdings of the Manganese Association, Inc., near Las Vegas, Clark county.

INTERSTATE CONSOLIDATED MINES CO.

NEVADA

Address: Franklin Harding, Camp Harding, Goldfield, Nev.

Officers: Franklin Harding, pres.-gen. mgr., J. L. Simmons, v. p.; R. W. Force, sec.-treas., with A. M. Schull and A. C. Frary, directors.

Inc. Sept. 4, 1909, in Arizona. Cap. \$2,500,000; \$1 par.

Property: 41 claims at Camp Harding, Esmeralda county, 12 miles from railroad at Klondyke Sta.

Geology: the Harding group shows copper-silver-gold ore in lime-shale for a considerable distance. The copper-content varies greatly, but hand sorting gives about 10% grade. A carload of ore from near the surface returned 7.1%. The veins dip 45° N. E. and have a strike of S. 68° W. Other claims show copper, lead, and silver ore.

Development: by 127' shaft and tunnels, two being 327' long each. Total workings approximate 5,300'. Developing.

IRISH MOUNTAIN SILVER MINES

NEVADA

Successor to Peerless Mng. Co.

Address: Caliente, Nev.

E. Muir Southers, of Salt Lake City, pres.; Reginald P. Jones, supt.

Property: 23 claims, 360 acres, near Hiko, Lincoln county, said to show a 2½ vein, carrying ore containing silver, lead, and copper. Development is but slight and property a prospect.

IRON CROWN DIVIDE MINES CO.

NEVADA

Mail returned from address: Tonopah, Nev.

Officers: "Diamonfield Jack" Davis, pres.; "Happy" John Barrier, v. p.; Robt. W. Craghill, sec.-treas., with W. J. Douglass, Rice Maupin and J. G. Thompson, directors.

Inc. May, 1919, in Nevada. Cap. \$150,000; 10c par; 750,000 issued.

Property: a group S. W. of Goldsmith Divide, about 3½ miles S. E. of Gold Mountain. Ore was extracted from shallow workings in 1909, but it was too low-grade to ship on account of the low price of silver.

IRONDIKE MINING CO.

NEVADA

Address: care W. R. Smith, Mina, Nev.

Property: 10 claims in Gold Range mining district, Mineral county, about 5 miles W. of Mina, shows fissure veins in limestone porphyry con-

tact. Outcrops said to contain bunches of 1 to 8% copper ore. Developed by 1,100' tunnel with a 400' back. A prospect.

IRON GATE MINE

NEVADA

Address: E. C. Watson, owner, Luning, Nev.

Property: 6 claims (3 patented), 110 acres, in Santa Fe district, Mineral county, between Congress Copper and Pilot Copper properties. Orebodies, carrying silver and copper, occur in bedding planes in limestone near contact with quartz monzonite. A gossan, 10' to 50' wide, is exposed for 2,000', averaging 0.5% and 1 oz. silver.

Development: by 250' incline and 350' tunnel.

IRONSIDES MINING CO.

NEVADA

Officers: W. H. Gable, pres.; J. C. McCreary, v. p., both of Scotts Bluff, Neb.; A. J. Shumway, sec.

Property: near Goodsprings, Clark county, developed by 150' shaft with drifts and stopes from which shipping ore was mined. One shipment to Utah smelters is said to have assayed 15% copper and \$9 gold per ton.

IROQUOIS COPPER CO.

NEVADA

Address: Mina, Nev.

Officers: H. B. Lind, pres.; M. A. Lind, v. p.; J. L. Fenwick, sec-treas.

Inc. in Nevada. **Cap.** \$12,000; par \$1; 8,000 shares issued and owned by the Nevada & Boston Copper Co.

Property: 9 claims adjacent to the Wall Street mine, Santa Fe district, Mineral county, near Luning, covering a contact-metamorphic zone 3,000' long and 50' to 300' wide, of garnetized limestone with porphyry intrusions, but no definite contact; course of zone, N. E.-S. W. This material carries ore in fractures and cross fissures, the garnet material being reported to carry a large body of 1½ to 2% copper ore.

Development: by 1,300' of workings, including the 125' Mary and 325' Mastadon shafts on an 18 to 48" strong vein of oxidized ore.

During 1916-1918, property was worked by lessees who shipped ore that averaged 7% copper, 2 oz. silver and gave a return of \$50,000.

JACKET-CROWN POINT-BELCHER MINES CO.

NEVADA

Merged in 1920 into the **United Comstock Mines Co.**, which see.

JACKSON MINE

NEVADA

Address: Lucin, Utah. Mine under bond and lease to S. F. Hunt of Salt Lake City.

Property: 6 claims in Elko county, 10 miles N. of Tecoma and near the Nevada-Utah line. Ore is lead-silver, which with its high iron content is desired by smelters for its fluxing quality. Up to Aug. 1, 1920, had shipped 2,500 tons of \$20 ore from above the 100' level.

JARBIDGE-BUHL MINING CO.

NEVADA

Address: J. C. Finch, sec., Buhl, Idaho.

Officers: B. R. Tillery, pres.; V. R. Laird, v. p.; J. C. Finch, sec.-treas.; Jesse Deemer, gen. mgr.; with V. R. Laird, R. W. Allred, Geo. C. Beach and H. Coleman, directors. W. H. Hudson, res. agt., Jarbidge, Nev.

Property: 12 claims, including Altitude group, in Jarbidge district, Elko county, between "craters" 1 and 2, at 8,700' elevation. Five veins are reported, one 17' wide; ore is quartz and adularia, carrying gold and a little silver, in fissures in rhyolite. Values, \$14 to \$29, of which gold is 90%.

Development: by shaft, 600' deep, Feb. 1, 1922, with 1,000' of laterals, opening 2 veins converging with depth.

JARBIDGE CENTRAL MINES CO.

NEVADA

Closed down.

Officers: J. P. Duncan, pres.; Angus McDonald, v. p.; W. W. Fisk, sec.; with John MacRae, Ira Brackitt and H. O. Milner, directors.

Inc. Oct. 5, 1911, in Nevada. **Cap.** \$1,500,000; \$1 par; 1,250,000 issued.

Property: 9 unpatented claims in Jarbidge district, Elko county, said

to show a quartz vein in rhyolite, dipping 85° S. W. and pitching S. 32° E. Average gold assay is \$15 to \$20 per ton.

Development: by vertical shaft to 65' and by 2 tunnels 175' and 225' long. Work in 1916 cost \$5,000, done on an option. A prospect.

JEFFERSON GOLD & SILVER MINING CO. NEVADA

Closed down.

Address: C. J. Kanrohat, mgr., Round Mountain, Nev.

Property: the old Kanrohat mine in Jefferson canyon, 8 miles from Round Mountain, Nye county, developed by 4 tunnels to depth of 750'. An orebody 8' wide reported exposed on the bottom level. Ore carries gold and silver.

Reported (March, 1921) that assured and probable ore amounts to 30,-000 tons, with average value, 12 oz. silver and 60c gold; 5,000 tons lower grade on dumps.

Equipment: includes 50-ton cyanide mill.

JERSEY CONS. COPPER & GOLD MINING CO. NEVADA

Office: 272 Grant St., Salem, N. J. **Mine office:** East Ely, Nev.

Officers: R. T. Seagrave, pres.; H. M. Loveland, v. p.; F. Eldridge, sec.; W. L. Bassett, treas., at last accounts.

Inc. Jan. 15, 1917, in Delaware. **Cap.** \$100,000; shares \$1 par; non-assessable; 4,950 issued. Annual meeting 1st Thursday of March.

Property: 15 claims, 300 acres, in the Mizpah district, 5 miles E. of Mizpah, on Nevada Northern railroad, White Pine county. Claims show several fissure veins in granite and contact deposits between granite and rhyolite, one of which is estimated to be 200' wide, carrying mainly bornite and chalcocopyrite ore.

Company re-located above property, formerly owned by Mizpah Cons. Copper & Gold Mining Co., when latter failed to do its annual assessment work for 1915.

Development: by 70' two-compartment shaft, showing a 3' orebody, said to give maximum assays of about 15% copper, 8 oz. silver and \$18 gold per ton, which are not to be considered as average ore values.

JERSEY VALLEY MINES CO. NEVADA

Address: Worcester, Mass. W. Prince Catlin, mgr., Battle Mountain, Lander county, Nev.

Property: in Hill Top district, 23 miles from Battle Mountain, comprises the Jersey Valley group, and the Gray Eagle claims, acquired September, 1913, from the Gray Eagle Mining Co. No recent report.

JIM BUTLER TONOPAH MINING CO. NEVADA

Office: 500 Bullitt Bldg., Philadelphia, Pa. **Mine office:** Tonopah, Nev.

Officers: Clyde A. Heller, pres.; Wm. M. Potts, v. p.; J. K. Kitto, sec.-treas.; R. G. Wilson, asst. sec.-treas.; C. B. Taylor, gen. counsel; C. Ducheneau, auditor; Fred'k Bradshaw, gen. supt.; L. R. Robins, mgr. eng.

Directors: Clyde A. Heller, Wm. M. Potts, Geo. F. Tyler, H. C. Brougher, C. B. Taylor, S. D. Sinkler, T. W. Synnott, M. B. Cutter and Henry C. Gibson.

Inc. Nov. 13, 1903, in Delaware. **Cap.** \$2,000,000; \$1 par; all issued; 281,979 in hands of Trustee for company. Graded in on New York and Boston Curb. Listed on San Francisco Exchange. Transfer agent; company's office; registrar: Fourth St. National Bank, Philadelphia. Annual meeting, last Tuesday in April.

Dividends initial of 10% was paid August 2, 1915. Total distributions to August 1, 1918 were \$1,151,074.

Treasurer's statement for year ending Dec. 31, 1920, shows: receipts, \$184,447, of which, \$123,342 was ore sales. Disbursements were operations, \$102,300; to Belmont Shawmut Mnz. Co., \$31,921; to Belmont Wagner Mng. Co., \$49,307. Cash on hand was \$918, and \$6,266 was due from ore shipped. Net profit for 1920 was \$16,865, as compared with \$28,563 for 1919, after tax deductions.

Report for year ending Dec. 31, 1921, shows; receipts, \$118,157, of which \$69,955 was from ore shipments by lessees. Expenditures were, operations, \$62,104; Belmont Shawmut M. Co., \$16,203; Belmont Wagner M. Co., \$18,609 cash on hand, \$4,997. Net profit for 1921 was \$15,384.

Property: 16 patented, 2 unpatented claims, 241 acres, at Tonopah, Nev.; and the Ophir King group, 91 acres; also owns a one-quarter interest in an option on the Eagle Shawmut mine, California, and Belmont Wagner property, both held by the Tonopah Belmont Dev. Co. and separately described. The Jim Butler has \$495,632 invested in these holdings.

Geology: of Tonopah is complex; a series of volcanic rocks, partly lava flows, partly intrusive sheets and masses of quickly varying thickness overlies one another irregularly. The productive veins are in the Mizpah "trachyte," overlaid by the Midway andesite and intruded by the West End rhyolite. The veins are cut through by the Midway andesite and do not commonly outcrop, but terminate against the Midway andesite at depths up to 1,200'. They are fissure veins which for some distance lie on or in planes of contact between eruptive rocks. Values are in gold and silver. See U. S. G. S. Prof. Paper, No. 42. The company holdings are identical in character to those of its neighbors, the Tonopah Mining and Belmont companies.

Development for 1920 was 1,249', largely in the Wandering Boy mine, to be continued below the 900' level. Operations on the Desert Queen practically abandoned, and exploitation from Wandering Boy ceased in September, except by lessees of which there are 12, including West End Cons. Mng. Co. and New California Tonopah Mng. Co., the latter's lease becoming effective in 1921.

Recent production and costs per ton:

Year	Ore Tons	Value per Ton	Mng. (A)	Dev.	Trmt. Trans.	Gen. Chge.	Oper. Exp.	Total Oper.	Oper. Profits
1920(b)	3,172	\$24.08
1919...	5,711	23.48	\$1.88	\$9.33	\$0.63	\$3.64	\$1.48	\$15.08	\$6.52
1918...	27,688	26.15	2.14	8.21	0.53	3.98	0.89	13.61	10.40
1917...	40,297	26.12	1.79	5.17	0.71	5.33	0.73	11.94	12.39
1916...	46,489	19.78	1.56	4.80	0.83	4.79	0.38	10.80	7.73
1915...	48,533	19.25	1.74	4.29	1.08	5.02	0.28	10.40	7.11
1914...	34,722	21.45	2.14	5.36	1.07	5.58	0.32	12.18	7.13

(A) Deductions by ore purchasers. (b) Complete figures for 1920 not available.

The ore is sold to the Tonopah Belmont Dev. Co. and treated in its mill. In addition to company production, in 1920, the West End company produced 5,896 tons with net value of \$42,051, 50% of which was paid as royalty to Jim Butler; other lessees produced 3,548 tons with a return to company of \$10,135.

Company operations ceased April, 1921, and no production made. West End produced 3,916 tons and other lessees 4,602 tons of \$18.38 ore during 1921, which netted the company \$25,600.

The apex suit of the Jim Butler against the West End Co. for trespass and ore extracted was decided July, 1916, in favor of the West End Co. by the State Supreme Court, and the judgment confirmed June, 1918, by the U. S. Supreme Court. Pending the suit the West End continued to mine ore, but the revenue was impounded, the total amount being \$373,614, from 62,758 dry tons of ore.

Ore reserves are practically exhausted; development by company, or by lessees, has not shown important results; investment in Belmont-Shawmut and Belmont-Wagner was unproductive in 1920, and the outlook is not encouraging.

JIM'S DIVIDE MINING CO.

NEVADA

Offices: Tonopah, Nev., and Mills Bldg., San Francisco, Calif.

Officers: Jas. Grimes, pres.; Chas. Ducheneau, v. p.; Emery W. Elliott, sec.-mgr.; F. B. Mechling, treas., with S. D. Allen, directors. C. N. Chatfield, supt. (address, Pike, Calif.).

Inc. April 10, 1919, in Nevada. **Cap.** \$150,000; 10c par; 750,000 in treasury. Listed on San Francisco Stock Exchange.

Property: 3 claims, between the Cresson, Reno, and Keane, 2,200' S. of the Tonopah Divide.

Development: ore was shipped years ago from shallow workings. A new shaft 100' deep is sunk in breccia on a well mineralized N.-S. vein showing values, but "search for a bonanza" has been unrewarded.

Equipment: head-frame, electric hoist, etc.

In spring of 1921, company purchased, for \$15,000, the Mount Alta gravel mine, 33 acres, in Indian Hill district, Sierra county, near Pike, upon recommendation of Frank L. Sizer. A 3,100' tunnel undercuts the bed rock at a maximum depth of 23' and is "well located with reference to the gravel channel." Channel is wide and fairly regular; gravel is free of cementation and carries a gold value from \$1.50 to \$5.00 per 20 cu. ft. Less than ½ of channel length has been prospected.

JOHNNIE MINE

NEVADA

Address: A. P. Johnson, 207 O. T. Johnson Bldg., Los Angeles, Cal.
Mine address: Johnnie, Nev.

Property: 20 claims, 12 patented, 400 acres, at Johnnie, Nye county, carries a gold quartz vein with 45° dip, running N.-S. through, quartzite and limestone.

Development: by incline shaft 1,100' deep, and 10,000' of workings.

Equipment: distillate engines, 40-h. p. hoist, 10-drill compressor, and 16-stamp mill, of 80-ton capacity, employing amalgamation.

Was operated part of 1919.

JOLY JANE LEASING CO.

NEVADA

Dead. Described in Vol. XIV.

JOSE-DAVIS MINING & MILLING CO.

NEVADA

Addresses: John Etchebarren, Reno, Nev., or Henry Ward, supt., Lovelocks, Pershing Co., Nev.

Property: the Jose-Davis lease of the Shepherder's Dream claim which produced rich gold ore in 1915, and 2 claims adjoining.

Development: by two 40' shafts, and several drifts, reported to have opened 200 tons of rich ore.

A 30-ton Gibson mill was erected at Kodak, on the Southern Pacific, 6 miles from the mine.

The lease was to have expired Feb. 15, 1921, but no recent information is available.

JOYCE MINING CO.

NEVADA

Officers and directors: J. C. Jensen, pres.; A. J. Weber, v. p.; Judge Bldg., Salt Lake City, Utah; J. A. Stallings, sec.-treas., with J. H. Stallings and D. Bianco.

Inc. 1917, in Utah. **Cap.** \$100,000; shares 10c par.

Property: 4 claims, in Galena camp, 12 miles S. W. of Battle Mountain, Lander county, developed by 1,000' of tunnels and drifts, said to show lead-silver ore of shipping grade. Reported (Dec., 1920) that company was to be liquidated.

JULIA CONS. MINING CO.

NEVADA

Address: 315 Bush St., San Francisco, Calif.

Cap. \$550,000; shares \$5 par. Listed on New York Curb, but lifeless.

Property: on the Comstock Lode, Storey county, is practically unworked. Assessments made at intervals. Idle.

JUMBO COPPER MOUNTAIN MINING CO.

NEVADA

See Volume XIV. Was a subsidiary of Jumbo Extension Mng. Co., which sec. Forfeited its equity in property in 1919.

JUMBO EXTENSION MINING CO.**NEVADA****Office:** Goldfield, Nev. **Corporate office:** Phoenix, Ariz.**Officers:** Chas. S. Sprague, pres.; J. K. Turner, v. p-cons. engr.; Ben Gill, sec.-treas.**Inc.** April, 1904, in Arizona. **Cap.** \$1,500,000; par \$1; all issued. Security Transfer & Registrar Co., New York and Registration Surety Co., San Francisco, registrars and transfer agents. Annual meeting, July 18. Listed on New York Curb and San Francisco Stock Exchange.**Dividends:** to June, 1916, totaled \$685,008; none since.

Company's Goldfield property, described in great detail in Vol. XIII, having proved disappointing, an exploration department was organized in 1916, and a year later the Copper Mountain mine was taken over under option and development begun; and in November, 1917, a subsidiary, Jumbo Copper Mountain Mng. Co. was incorporated, after a reported expenditure of \$130,000.

Late in 1921, it was planned to reorganize the parent company, increase the capital to \$2,550,000, and acquire new properties.

JUMBO JUNIOR MINING CO.**NEVADA****Address:** Goldfield, Nev.**Officers:** J. L. McCarthy, pres.; A. I. D'Arcy, v. p.; Floyd Cable, sec.-treas., with Joseph Bruder and H. E. Clark, directors.**Cap.** \$1,500,000; \$1 par. Listed on San Francisco Exchange.**Property:** the Spearhead Fraction claim, 6 acres, located between the Jumbo, Kewanas and Spearhead properties at Goldfield, Esmeralda county, purchased of the the Spearhead Fraction Mining Co.**Development:** was centered on ground below the 880' level and ore was opened a few inches to 24" in width, from which better than \$100 per ton of gold-silver-copper ore was shipped in 1917 and 1918.**JUNE BUG DEVELOPMENT CO., INC.****NEVADA****Office:** Ogden, Utah. **Mine office:** Las Vegas, Clark county, Nev.**Directors:** Lester S. Scoville, pres.; Milton J. West, v. p.-mgr.; Frank L. Scoville, sec.-treas., with John Hochett and Walter B. Scoville.**Inc.** Jan., 1916. **Cap.** \$100,000; shares 10c par; 825,000 issued. Annual meeting, January 4.**Property:** 9 claims, 18 miles N. W. of Las Vegas, in the Goodsprings district, said to show gold, silver and zinc ore. Pay ore occurs in shoots 30' long, 6-10' wide and from 14" to 5' thick, reported to assay 40% zinc, \$1.50 gold and \$4 silver per ton. The ore is a zinc silicate. Veins are in limestone formation.**Development:** by shallow shafts, and about 1,200' of workings. Shipments of 650 tons for 4 months ending June, 1916, returned \$35,000. Three cars of ore shipped in 1917, returned \$2,811. No shipments since.**JUPITER DIVIDE MINING CO.****NEVADA****Address:** R. L. Johns, care P. D. Kahn, 308 Bush St., San Francisco, Calif.**Officers:** R. L. Johnson, pres.; M. B. Aston, v. p.; B. A. Rives, sec.-treas., with J. E. McCreary, C. J. Blumenthal, directors. Chas. Maher, supt.**Inc.** April, 1919, in Nevada. **Cap.** \$150,000; par 10c; 750,000 issued.**Property:** 130 acres, adjoining Chariot Divide on S. E., and about 2¼ miles from Gold Mountain**JUSTICE GOLD & SILVER MINING CO.****NEVADA**

of the Comstock lode. A new shaft is down 350'; crosscutting to locate ore-body found at 200'.

Address: 265 Russ Bldg., San Francisco, Calif.**Officers:** Franklin Leonard, Jr., pres., 25 Broad St., New York City; Jas. Leonard, v. p.; Chas. D. Olney, sec.**Inc.** 1904, in California. **Cap.** \$105,000; \$1 par, reduced from \$5 assessable; last assessment levied Jan. 31, 1921.**Property:** a group in the Gold Hill district, Storey county, at south end

JUSTICE GOLD MINING CO.**NEVADA****Address:** Goldfield, Nev.**Officers:** O. M. Justice, pres.; John La Foe, v. p.; Mrs. A. B. Hays, sec.-treas.; C. W. Hays, gen. mgr., with J. R. West, directors, at last accounts.**Inc.** 1914, in Nevada. **Cap.** \$1,000,000; shares, \$1 par. Stock listed on San Francisco Stock Exchange.**Property:** the Gold Coin Extension claim in the Diamondfield section of the Goldfield district. Company also had a lease on the adjoining property of the Diamondfield Daisy Gold Mining Co., which carried a 2½' vein of gold-copper ore running from \$18-\$39 per ton.**Development:** by 265' Daisy shaft, crosscuts, drifts and stopes. Several carload shipments in 1915 from stope above the 265' level reported to have yielded \$70 per ton. No recent returns.**KANSAS CITY-NEVADA CONS. MINES CO.****NEVADA****Office:** 510 Commerce Bldg., Kansas City, Mo. **Mine office:** Bruner, Nevada.**Officers:** Walter P. Neff, pres.; Geo. A. Metcalf, v. p.; B. H. McGarvey, treas.; R. E. Bruner, sec.; H. W. Bruner, gen. mgr., with R. W. Waddell, E. C. Sooy, Henry Crawford, E. E. Nordquist and Jas. W. Orr, directors. Wm. H. Kinnon, engr.**Inc.** 1915, in Nevada. **Cap.** \$6,000,000; \$1 par; all issued. Company gave 100,000 shares for the property of the Big Henry Gold Mng. Co.; 2,000,000 shares to redeem the outstanding stock of the Phonolite Paymaster Mng. Co., 800,000 shares to redeem the outstanding stock of the Phonolite Silent Friend Mng. Co., and 1,600,000 shares for the Duluth Gold Mng. Co. holdings.**Property:** 25 patented claims, 487 acres, in the Bruner district, Nye county. Ore occurs in fissure vein in andesite and rhyolite, said to carry gold and silver averaging \$20 per ton. A. E. Swain reports that one ore-shoot on the 125' level is over 340' long. Over \$300,000 has been expended on the property to date.**Development:** the Paymaster property has about ½ mile of workings. The 2-compartment shaft is 300' deep.**Equipment:** a 50-ton mill was constructed at Bruner (Phonolite) in 1919, and remodeled in 1921. Water will come across lone valley, a distance of 8 miles.

Company in mid-summer, 1921, contracted with Broken Hills Silver Corp. to treat 50 tons of B. H. ore per day, heads to be maintained at \$25 per ton. Ore is hauled by auto-truck for 12 miles. Net profits to be divided equally between mine and mill. The Broken Hills mine is to be managed by the Kansas company.

KANSAS NEVADA MINING CO.**NEVADA**

Mail returned from Goodsprings, Clark county, Nev.

Officers: Frank Williams, pres.; Jonah Jones, v. p.; A. M. Horter, sec.-treas., with John Williams and Jos. Walter, directors.**Inc.** July 16, 1917, in Nevada. **Cap.** \$1,000,000; shares \$1 par; 706,895 outstanding.**Property:** 3 claims, about 53 acres, 9 miles W. of Goodsprings, show zinc and silver ore in a 4' vein in limestone formation. The vein runs E. W. and dips N. Developed by 500' tunnel to depth of 130'. Small shipments of lead-zinc ore netted \$941 in 1916; \$1,832 in 1917; \$64 in 1918. Inactive 1919-'20.**KATTENHORN MINE****NEVADA****Address:** Albert Kattenhorn, Maysville, via Hilltop, Nev.**Property:** at Hilltop, S. E. of Battle Mountain, Lander county. Ore occurs in fissure vein in quartzite and is highly siliceous.

Shipments during part of 1918 amounted to 100 tons per month, running

up to 35 oz. in silver. In 1919 and 1920, lessees were reported making small shipments.

KEANE DIVIDE MINING CO.**NEVADA**

Office: M. E. Allier, res. agt., Goldfield, Nev.

Officers: Tom Keane, pres.; Chas. T. Allier, v. p.; Floyd Cable, sec.; E. Marks, treas.

Inc. May, 1919, in Nevada. **Cap.** \$150,000; par 10c.; 750,000 issued.

Property: 4 acres west of Jim's Divide and 2,200' S. W. of Tonopah.

KENDALL DIVIDE MINING CO.**NEVADA**

Address: care J. B. Kendall, res. agt., Goldfield, Nev.

Officers: J. B. Kendall, pres.; Del Hammond, v. p.; M. A. Kendall, sec.-treas., with C. A. Hammond, and N. P. and J. Theo, directors.

Inc. April, 1911, in Nevada. **Cap.** \$150,000; shares 10c par.

Property: 6 claims, 1,500' S. E. of Hasbrouck Divide and 4,200' S. W. of Tonopah Divide.

KENNEDY CONSOLIDATED MINING CO.**NEVADA**

Mail returned from Yerington, Nev. Mine at Buckskin, Douglas county, Nev.

Utah people, headed by J. F. Cowan, took over property in June, 1917, from the previous owners, the Kennedy Cons. Gold M. & M. Co., of which W. C. Pitt was president.

Property: 7 claims, 110 acres, patented, in Buckskin district, Douglas county, developed by 3 shafts, 90', 147' and 250' deep and by one 240' tunnel, said to expose some large bodies of ore, mostly sulphides with gold, silver and copper. Water forced a suspension of work below the 250' level, where drifting was under way at last accounts. Mine is 4 miles from Nevada Copper Belt railroad and has power line within 1 mile.

Equipment: includes air-compressor and electric hoist.

KENNETH DIVIDE MINING CO.**NEVADA**

Office: 421 Clay Peters Bldg., Reno, Nev.

Officers: A. A. Codd, pres.; H. F. Bruce, v. p. and cons. engr.; W. H. G. Buck, sec.-treas., with R. H. Bates, and A. A. Busey, directors.

Inc. May, 1919, in Nevada. **Cap.** \$150,000; shares 10c par.

Property: 110 acres N. of Mizpah Divide, and 9,000' N. E. of Gold Mountain. Idle; presumably a prospect.

KENTUCK MINING CO. OF NEVADA**NEVADA**

See Vol. XIV. In 1920 became a part of the **United Comstock Mines Co.**

KERNICK DIVIDE MINING CO.**NEVADA**

Office: care A. A. Codd, Reno, Nev.

Officers: A. A. Busey, pres.-gen. mgr.; H. C. Brougher, v. p.; A. A. Codd, sec.-treas.; H. E. Bruce, supt., with George Wingfield, directors.

Inc. April 5, 1919, in Nevada. **Cap.** 1,500,000 shares; 10c par; assessable; 1,150,000 issued. Listed on San Francisco Stock Exchange.

Company had expended \$38,000 up to spring of 1920; treasury then reported to be well supplied.

Property: Little Zoe group, 3 claims, 40 acres, adjoining Western Divide on N. Revert Divide on S., in Gold Mountain district, Esmeralda county; patent application has been filed. Also has a 3-year lease, beginning June 25, 1920, on 55 acres of the Revert Divide.

Development: shaft down 900', April, 1921, with 2 crosscuts at this level, 475' to N. and 485' to S. W. Reported that veins were cut by shaft at 500' and 750'. Because of water, work at 900' was suspended in September, and crosscutting begun on 500' level.

Equipment: electric hoist of Revert Divide installed, etc.

In addition to Revert lease, it is reported that deep development now under way, will be used to explore the properties of Hasbrouck Divide Annex, Tonopah Hasbrouck and Western Divide companies, of which Mr. Busey is also president.

- KEWANAS EXTENSION MINING CO. NEVADA**
 Inc. 1915, in Goldfield, Nev. Cap. \$1,000,000. Is a small, well located property, 18 acres, adjoining Kewanas on the north and in direct line with its ore zone, as developed on its north drift. It adjoins the Booth mine at Goldfield. Is controlled by the Sprague interests and other California men who have underwritten the stock at 5c. a share. Gave the Reorganized Booth company 25,000 shares of stock for a sideline agreement, thus avoiding litigation.
- KEWANAS MINING CO. NEVADA**
 See **Reorganized Kewanas Gold Mining Co.**
- KEYSTONE CHROME MNG. CO. NEVADA**
 Mail returned from Mina, Nev.
 Inc. June 24, 1919, in Nevada, by J. M. O'Brien, B. E. Bonner, C. H. Goodnight, and Zeb Bonner. Cap. \$100,000; 10c par.
- KEYSTONE DIVIDE MINING CO. NEVADA**
 Office Tonopah, Nev.
 Officers: R. J. Kelly, pres.; George Schmidt, v. p.; Dr. T. A. Musante, sec.-treas.; Wm. Forman, ass. sec., with Ed. Byrne and F. W. Taylor, directors. Jay A. Carpenter, cons. engr.
 Inc. March 2, 1919, in Nevada. Cap. \$150,000; 10c. par; assessable; 750,000 treasury. Listed on San Francisco Stock Exchange.
 Property: 4 claims, S. of the Verdi, W. of the Reorg. Divide Junior, and 700' south of W. end of Tonopah Divide, and the Big Horn group, in Klondyke section, acquired in spring of 1921.
 Development: by 625' shaft on Divide group and by 35' shaft on Big Horn; latter reported to show 5' ledge that carries a fair silver value.
 The Ben Hur Divide is using the Keystone shaft to explore ground of Reorg. Divide Junior M. Co., held under lease.
 Equipment: on Divide group; 30 h. p. electric hoist, 3-drill compressor, etc.
- KICKAPAH DIVIDE MINES CO. NEVADA**
 Office. A. H. Hardy, res. agt., Tonopah, Nev.
 Officers: C. A. Clinton, pres.; Owen Dougherty, v. p.; C. J. Young, sec.; A. G. Raycraft, treas.; Cliff Stewart, auditor.
 Inc. May, 1919, in Nevada. Cap. \$150,000; shares 10c par.
 Property: 7 claims. E. of Lone mountain, which is 4 miles N. W. of Gold Mountain. Three well defined orebodies are said to exist along the vein, assays from 5' of ore cut in shaft returning \$36.10, \$38.30, \$46.15, and \$46.90 per ton, mostly gold.
 Development: 150' shaft, said to show pay-ore. Equipment: complete. Idle 1921.
- KIMBALL LEASING & DEVELOPMENT CO. NEVADA**
 Address: Mr. Kimball, mgr., Tonopah, Nev. A company formed locally by 20 men, and incorporated in spring of 1920.
 In 1920, held a lease on part of Polo claim of the Revert Divide Mng. Co., expended \$10,000 in sinking 160' shaft, etc., without developing commercial ore; lease was relinquished. Rumored that lease has been taken on the 6 claims of the Klondyke Imperial Divide Mng. Co. (q. v.).
- KIMBERLY CONSOLIDATED MINES CO. NEVADA**
 Presumably dead. Fully described in Vol. XIV. Property sold at sheriff's sale, March 15, 1920; for description, see **Hilltop Group**.
- KIMBERLY SHIPPER MINING CO. NEVADA**
 Office: 1337 Roosevelt Ave., Salt Lake City, Utah.
 Officers: W. S. Gilsey, pres.; F. L. Sumpter, v. p.; C. W. Fleck, sec.; Salt Lake City, Utah; C. L. Shelley, treas., with G. H. Gould, directors.
 Inc. in Utah. Cap. \$50,000; shares 5c par.
 Property: 60 acres at Hilltop, Lander county, 20 miles E. of Battle Mountain, shows gold-silver ore. Developed by 800' tunnel and drifts. A shipment in 1915 yielded \$75 per ton. No recent returns.

KINSLEY DEVELOPMENT CO.**NEVADA**

Idle.

Officers: Wm. M. Bradley, pres., Felt Bldg., Salt Lake City; Wm. Pischel, v. p.; Newton A. Dunyon, sec.-treas.-mgr., with B. F. Bauer and Jos. Wirthlin, directors.

Cap. \$10,000, 10¢ par; reduced from \$1,000,000, \$1 par.

Property: 28 miles from Currie, Elko county, on Nevada Northern railroad, shows limestone cut by parallel N.-S. fissures, which carry copper ore at the S. end of the property and lead ore 1½ miles N. Worked intermittently by lessees. Had 3 hoists, compressor and a concentrating mill erected 1909.

KIRCHEN MINES CORPORATION**NEVADA**

Property: St. Patrick group at Luning, Mineral county, sold at sheriff's auction, September, 1918, to satisfy a judgment for \$2,168.

KIRK MINE**NEVADA**

Address: Chas. J. Wilson, owner, Hilltop, Nev.

Property: 2 claims, 40 acres, in Hilltop district, Lander county, developed by 140' tunnel to depth of 70'. Ore is a sulphide, occurring as contact deposit in porphyry and gneiss, with shoots of ore reported to assay 38% antimony.

Gross returns from shipments in 1918 were \$1,400, and expenditure \$900.

KLAMATH MINING & MILLING CO.**NEVADA**

Q. M. Robertson, pres., Klamath Falls, Ore. Holdings in Jumbo district, near Virginia City, said to show 12'-20' ledge developed by crosscut tunnel.

KLONDYKE DIVIDE MINING CO.**NEVADA**

Property: in Gold Mountain district, Esmeralda county, about 3½ miles S. from Tonopah Divide.

Reported (June, 1921) to have been taken over by J. C. Weir, 25 Broad St., New York, for Eastern interests.

KLONDYKE IMPERIAL DIVIDE MINING CO.**NEVADA**

Office: Care R. W. Tucker, res. agt., Tonopah, Nev.

Officers: Thomas Toner, pres.; Chas. Lee, v. p.; R. W. Tucker, sec.-treas.

Inc. April, 1919, in Nevada. **Cap.** \$200,000; par 10c; 1,000,000 treasury shares.

Property: Tucker group, 6 claims, adjoins the Original Klondyke on W. and Golden State on S. A 180' shaft is said to have opened 18" vein, carrying 9 to 19 oz. silver. In spring of 1921, leased to **Kimball Leasing & Devel. Co.**, which see.

KLONDYKE-PORTLAND MINES CO.**NEVADA**

Goldfield, Nev. **Officers:** Peter Felis, pres.; M. F. Hill, v. p.; J. F. Henry, sec.-treas., with J. B. Witt and Mrs. Helen Rosenthal, directors.

Inc. 1915, in Nevada. **Cap.** \$100,000.

Property: 9 claims in the Klondyke district, near Goldfield, Esmeralda county, developed by 3 shafts, showing gold-silver-lead ore.

Reports of March, 1921, were encouraging, but no news since.

KLONDYKE STANDARD DIVIDE MINING CO.**NEVADA**

Address: Tonopah, Nev.

Property: 2 claims in Klondyke section, 6 miles south of Divide mine.

KNOX DIVIDE MINING CO.**NEVADA**

Office: Hugh Henry Brown, res. agt., Tonopah, Nev. Geo. F. Badgett, supt., Tonopah.

Officers: Chas. E. Knox, pres.-gen. mgr.; P. Mooney, v. p.; Mrs. Herman Albert, sec.-treas., with A. G. Raycraft, F. T. Dunn and E. Malley, directors.

Inc. March 20, 1919, in Nevada. **Cap.** \$150,000; 10c par; 1,100,000 issued. Listed on San Francisco Stock Exchange. Transfer agent, Security Transfer & Registrar Co., New York. Reported \$30,000 cash in treasury, July 1, 1919.

Property: the Knox group of 5 claims, formerly in control of High Divide Annex Mng. Co. (see Vol. XIV), adjoining High Divide on N. and

Sutherland on S., in the Divide district, and 4 claims of the Golden State Divide Mng. Co., adjoining original Klondyke on N. in the Klondyke section of the Divide district; all in Esmeralda county.

Bond and lease was taken on Golden State holdings in June, 1920, and it is understood that by August, 1921, Knox had purchased 667,825 of 917,825 outstanding Golden State shares. Thus Golden State still has a corporate existence in which title to property still rests, and trading in its stock continues on the N. Y. Curb. Reported that remainder of Golden State outstanding shares will be exchanged for the Knox group and that final name of company will be Golden State Mines Co., Knox stockholders making exchange of shares, and Knox shares being retired.

Development: on High Divide Annex, shallow shafts only. On Golden State group, an orebody 56' x 9 x 20', with average gross value of \$25 per ton in silver and a little gold was opened at 60' depth. By Sept., 1921, shaft was 130' deep.

Equipment: includes by purchase of defunct Mutual Divide plant, 4-drum compressor, one mile of transmission line etc.

Production: reported that Golden State, under former regime, produced 75 cars of \$20 ore; present management shipped about 1,000 tons to Tonopah mills up to April 1, 1921; shipments interrupted for 4 months by strikes, but since September production is reported to be 100 tons per week.

LADY WASHINGTON CONSOLIDATED CO. NEVADA

Idle. Office: 342 Mills Bldg., San Francisco.

Inc. 1878, in California. Cap. \$100,000; shares \$1 par.

Property: on Comstock Lode, at Goldhill, Storey county, is practically unworked. Assessments made at intervals.

LAFAYETTE MINING CO. OF NEVADA NEVADA

Address: Tonopah, Nev. Controlled by Ed. P. Kimball of Calgary, Canada, Fred Hawkins, and Mark G. Bradshaw.

Property: a silver mine in Esmeralda county, 24 miles S. of Goldfield, developed by 200' shaft with drifts at 100'. Ore said to assay 28 to 52 oz. silver, with some gold. Closed down early in 1920.

LAHONTAN MINES CO. NEVADA

Address: Parker Liddell, Box 414, Reno, Nev.

Officers: B. P. Howell, pres.; M. Eddy, v. p.; Parker Liddell, sec.-treas.

Property: discovered in 1906, formerly that of the Ramsey Comstock Mining Co., in Ramsey district, Lyon county, 15 miles N. E. of Virginia City and 13 miles S. of Clark on the So. Pacific. In 1918, a small output was made and in 1919 shaft was sunk from 330 to 440'. Three levels show from 3 to 8' of gold-silver ore, which averaged \$35 per ton in milling. A 30-ton mill produced \$35,000 worth of bullion which, with shipping ore, gave a total of \$80,000 gross receipts from operations.

After a 2 years' shutdown, mine was unwatered to 2nd level, April, 1921; later, a crosscut on 160' level opened a new vein, 10' wide, showing gold-bearing quartz assaying \$11 per ton.

LAS VEGAS GOLD-SILVER MINING CO. NEVADA

Inc. June, 1919, in Nevada. Cap. \$100,000; shares 10c par.

Property: 23 miles S. E. of Las Vegas, Clark county.

LA TOSKA MINING CO. NEVADA

See Humboldt Cons. Mines Co.

LEAD KING MINING & MILLING CO. NEVADA

Idle. Office: 145 So. State St., Salt Lake City, Utah.

Officers: A. P. Spitko, pres.-mgr.; J. J. Kellogg, sec.

Inc. 1899. Cap. 300,000 shares; 10c par; assessable; 254,000 shares issued. Stock listed on Salt Lake Exchange.

Property: 15 claims, 8 patented, 250 acres, in Duck Creek district, White Pine county, said to carry high-grade galena ore with small values in silver occurring in gray and blue limestone formation. Developed by 700' tunnel.

Shipments: to date total 20 carloads, netting \$23,000.

LEADVILLE DIVIDE MINING CO.**NEVADA**

Dead. Fully described in Vol. XIV. Owned property in Divide district, Esmeralda county and the Tohoqua mine in Leadville district, Washoe county; the latter now controlled by **Leadville Mines Co.** (q. v.).

LEADVILLE MINES CO.**NEVADA**

Office: Box 5021, Reno; and Gerlach, Nev.

Officers: A. A. Codd, pres.-gen. mgr.; F. M. Manson, v. p.; G. V. Ward, sec.-treas.; H. H. Blair, asst. sec.-treas., with T. J. Dunn, directors. Homer J. O'Connell, supt.

Inc. Jan. 3, 1920, in Nevada. **Cap.** \$150,000; 10c par; 750,000 shares in treasury. Initial offering of 50,000 shares at 25c each made in Jan., increased to 100,000 in July, 1920.

Property: the old John Harnan mine, 3 claims, 60 acres, formerly owned by the Tohoqua Mng. Co., in Leadville district, Washoe county, 38 miles N. of Gerlach on the W. P. R. R. Claims show diorite-porphry traversed by 3 quartz veins, carrying silver-lead ore, containing zinc and a little gold; main vein, 3' average width, exposed for length of claims. Mill heads carry about 18 oz. silver with \$25 total value. The Associated Mines Co. holds an interest in the property.

Development: old workings include two 300' shafts, and 1,700' Floyd tunnel, with 300' back and 190' winze. This work developed an ore-shoot 800' long, from above tunnel to bottom of winze. Present management sunk winze to 300' and has followed vein, 1 to 4' wide, for 700' to Jan. 1, 1922 and plans to deepen winze by 200'. Ore reserves as of July, 1920, estimated to be \$250,000, or including probable ore, \$1,000,000.

Equipment: includes 80 h. p. oil engine, 2 semi-Diesel engines (75 and 100 h. p.) 275' compressor, electric locomotive, auto trucks, 7,500 water line and 30,000 gal. tank. The old 50-ton concentrating mill was remodeled and a flotation plant added. Present capacity is 35 tons per day, making 5 to 6 tons of concentrates, with 92% extraction.

Production: in early days, \$205,000 both in shipping and milling ores. An average of 4 carloads of concentrate per month by present management, with a gross value of \$200 to \$240 per ton. A mine fire in December, 1920, caused delay, but total production in 1921, from July 1, was about \$153,000 gross.

LEGITIMATE MINES CO.**NEVADA**

Address: Jarbidge, Nev.

Property: 6 surveyed claims in Jarbidge district, Elko county, one mile E. of Jarbidge. The country formation is rhyolite; ore is gold-bearing. Equipped with 5-stamp test mill, and made a small production in 1919. Reported to be developing, September, 1921.

LE ROY DIVIDE MINING CO.**NEVADA**

No record of officers or holdings obtainable.

LIBERTY BELLE DIVIDE MINING CO.**NEVADA**

Inc. 1919, in Nevada.

Property: 3 claims and fraction adjoining Gold Reef and Alto, about 2,100' S. E. of the Tonopah Divide and Gold Zone mines.

LIBERTY DIVIDE MINING CO.**NEVADA**

Office: Tonopah, Nev.

Officers: Chas. R. Evans, pres.; Milton Detch, v. p.; F. R. Hackley, sec.-treas.; Geo. W. Allen, res. agt., with W. S. Norris, directors.

Inc. April, 1919, in Nevada. **Cap.** \$150,000; 10c par; 750,000 in treasury. Listed on San Francisco Stock Exchange.

Property: 3 claims and fraction, 55 acres, just N. of the Goldfield M. & O. group and E. of Rosetta.

Development: by shaft, down 80' in March, 1921; to be continued to 300' with crosscut to vein of Goldfield M. & O. R. Co.

Equipment: 40 h. p. hoist, etc., destroyed by fire; to be replaced.

Rumored that option has been taken on **Bonanza Divide Mng. Co.** (q. v.) in Klondyke section.

LIBERTY GOLD MINES CO.**NEVADA****Address:** Frank H. Bird, pres.-mgr., Tuscarora, Nev.

Property: 7 claims, 140 acres, in Deep Creek district, Elko county, developed by tunnels to depth of 625'. **Ore:** occurs in a porphyry intrusion. Values are in gold-copper-silver. Reported to have 5,000 tons of \$50 ore available.

LIBERTY GROUP**NEVADA**

Address: Jas. G. Lindsay, owner, Commercial Trust Bldg., Philadelphia, Pa.

Property: a mine at Liberty, 20 miles from Tonopah, Nye county, which was worked in the 70 s, the old workings reaching a depth of 700'. Recent work said to have opened an orebody 10' wide at depth of 60', assaying 60 oz. silver and 6½% lead. Operated intermittently.

LINCOLN DIVIDE MINING CO.**NEVADA****Address:** W. V. Richardson, Tonopah, Nev.

Officers: W. V. Richardson, pres.; A. E. Kane, v. p.; G. A. Reading, sec.-treas., with D. T. Donovan and P. J. Donovan, directors.

Inc. May 19, 1919, in Nevada. **Cap.** \$150,000; par 10c; 750,000 in treasury.

Property: 50 acres, adjoining Florence Divide on N. and 6,000' north of Gold Mountain.

LINCOLN HILL MINING & MILLING CO.**NEVADA****Office:** Lower Rochester, Nev.

Officers: C. D. DeLorme, pres.-mgr.; F. L. Reber, v. p.; F. B. DeLorme, sec.-treas., with John M. Adams and Adam Patterson, directors

Inc. April 8, 1913, in Nevada. **Cap.** \$1,750,000; \$1 par; increased 1917 from \$1,000,000.

Property: Lincoln Hill mine, 2 claims and a fraction, 45 acres, on Lincoln Hill, Rochester district, Pershing county.

Ore: occurs in well-defined fissure veins. Samples from a 40' vein under development in the east end of the tunnel assayed \$62 in gold and silver.

Development: by 1,600' of tunnels, raises and winzes.

Equipment: includes electric power, compressor, power drills, hoist, 2-stamp mill of 12 tons daily capacity. Small tonnage is being treated; one 500 ton lot reported to have averaged better than \$100. Operated 1919-'21.

LITTLE GIANT GOLD & SILVER MNG. CO.**NEVADA**

Successor to Nevada Sheba Silver Mng. Co., as lessee, of holdings of Sheba Gold & Silver M. Co., which see.

Office: Imlay, Pershing county, Nev.

Officers: S. H. Brady, pres.-treas.-mgr.; T. S. Chalmers, v. p.; C. H. McIntosh, 2nd v. p.; J. C. Trantor, (Reno), sec., with Frank Hibbard, W. H. Ferguson and A. Watson Armour, directors.

Inc. 1921, in Nevada. **Cap.** \$250,000; par \$1; 500,000 treasury shares. Had a 3-year lease and option; from the spring of 1921, on property of the Sheba G. & S. Mng. Co.; royalties paid on production were to be applied to purchase price, \$125,000.

Reported, December, 1921, that owning company had declared the lease forfeited.

LODI MINES CO.**NEVADA**

Address: J. L. Joseph, 565 Mills Bldg., San Francisco. **Mine address:** Bruner, Nev. Homer Williams, mgr.

Property: the old Illinois mine, 29 claims, at Marble, in the Mammoth (Lodi Valley) district, Nye county, 45 miles N. E. of Luning, the nearest rail point. Lead ore, carrying silver, and some gold, occurs in a vein in limestone near its contact with granite. Opened first in 1858, the mine is reputed to have been a producer of high grade silver ore; was dormant 1910-1919; in latter year, lessees, including United Lodi Mines Co., made small ore shipments.

Development: by old workings to a depth of 1,000'

Equipment: includes 25 h. p. gas hoist and 25-ton concentrator and

cyanide unit. Also a lead smelter which, erected in 1908, did not prove successful. Water is brought in by a 5-mile pipe line.

Late in 1920, property was taken under lease by **Rural Mines, Inc.**, of Arizona, and a year later was producing shipping ore from 4th and 5th levels, and milling ore from the 7th.

LONE MOUNTAIN DIVIDE MINING CO. NEVADA

Mail returned from Tonopah, Nev.

Inc. April, 1919, in Nevada. Cap. \$150,000; par 10c.

Property: 18 claims west of Apex Divide. Also Lucy mine in Paymaster Canyon, E. of Lone Mountain. No report since late 1919.

LONE MOUNTAIN MINING CO. NEVADA

Operated under bond the Rip Van Winkle mine of the **Alaska Improvement Co.**, which see.

LONE STAR CONS. MINING CO. NEVADA

Office: 10 E. 43rd St., New York. Mine office: Goldfield, Nev.

Officers and directors: N. H. Wheeler, pres.-gen. mgr.; G. B. Hartley, v. p.-supt.; W. D. Miller, sec.-treas., J. I. Wheeler, asst. sec. A. H. Elftman, cons. engr

Inc. April 17, 1912, in Nevada. Cap. \$2,500,000; \$1 par; assessable; all issued. Security Transfer & Registrar Co., New York, transfer agents and registrar. Stock listed on Salt Lake and San Francisco Exchanges. Stricken from New York Curb, October 1, 1918, after a stock-rigging scandal alleged to have been instigated by an officer of the company and a bankrupt brokerage concern. Four assessments, totaling 7¢ have been levied, the last one on March 3, 1920. Annual meeting last Wednesday in April. Reported \$50,000 expended in 1919, no later report available. Shares ranged from 1 to 29¢ in 1918; 6 to 29¢ in 1919; 4 to 8¢ in 1920; 2 to 8¢ in 1921, to November.

Property: 24 claims, 17 patented, 450 acres, in Goldfield district, Esmeralda county, Nevada; and 7 unpatented claims in Indian district, Mono county, California.

Development: at Goldfield, by 252' shaft and 850' drifts and crosscuts on 150' and 250' levels; in California, by 200' shaft. But little progress made from year to year and little commercial ore developed. In early days, property produced \$20,000 to \$30,000; in 1920, lessees mined small amounts of high grade. Not favorably regarded.

Reported on by Emory J. Arnold, A. H. Elftman and M. Duvall.

LONGFELLOW GOLD M. & M. CO. NEVADA

Address: Carman Heights, Gardnerville, Nev.

Officers: W. I. Boardman, pres.; H. H. Fisher, v. p.; E. W. Carman, sec.-treas.-mgr., with Dr. M. A. Albe, J. M. Albe, C. L. Hale and J. R. Miller, directors.

Inc. 1903, in Nevada. Cap. \$1,500,000; \$1 par; 1,325,000 issued.

Property: 8 claims, 150 acres, in Red Canyon district, Douglas county, said to show quartz veins in monzonite averaging \$10 in copper, gold, silver and lead.

Development: by 265' shaft and 845' tunnel to depth of 415'.

Equipment: includes gasoline hoist, compressor, pump, 30-ton mill.

Idle.

LOOKOUT DIVIDE MINING CORPORATION NEVADA

Office: Tonopah, Nev.

Officers: A. T. Wilkinson, pres.; J. M. Fenwick, v. p.; M. J. Gray, sec.-treas., with Julius Goldsmith and P. D. McLeod, directors. J. W. Morris, cons. engineer.

Inc. in Nevada. Cap. \$150,000; shares 10c par.

Property: 5 claims, 2 fractions, 3¼ miles northeast of Gold mountain.

LORING NEVADA MINES CO. NEVADA

Address: Lovelocks, Pershing county, Nev.

Inc. Sept., 1919, by W. A. Huston, A. Bermedetti, and J. C. Foster.

Cap. \$150,000; 10c par

Property: a group of claims in the Loring district.

No other information available.

LORING TREASURE HILL MINES CO.

NEVADA

Dead. See Vol. XIV. Company never incorporated; deal, by which Wm. J. Loring and associates, were to take over the Treasure Hill claims of the Lovelock Willard Mng. Co., did not materialize.

LOUISIANA CONSOLIDATED MINING CO.

NEVADA

Offices: 111 Broadway, New York and 305 Nat'l Bank Bldg., Tonopah, Nev. **Office of president:** 900 Broadway, New York.

Officers: Julius Siegbert, pres.; Herman Rawitser, v. p.; L. A. Dessar, sec.; R. S. Nichols, treas., with Jas. E. Osborn, Wm. V. Creighton and Fred Housman, directors.

Inc. May 17, 1912, in Nevada. **Cap.** \$100,000; 10c par; increased to \$2,500,000; \$1 par; 699,476 shares in treasury, June, 1920. Bonds; \$185,000—10s, and \$65,000—6s, due 1923; \$95,000—10s issued. Annual meeting June 1st. Registrar and transfer agt., Registrar & Transfer Co., New York.

Property: 43 claims, 808 acres; includes Tip-top mine at Mt. Montgomery, Buena Vista (Oneota) district, Mineral county; Southwestern mines in Reveille district, Nye county; and, beginning with 1917, a 20-year operating agreement on Tybo mine and 10-year lease on Diminick mine, in Tybo district, Nye county. Company owns also about 75% stock control of Nevada Sm. & Mng. Corp., which in turn owns about 90% stock control of Tybo Cons. Mng. Co., (Tybo mine); also entire issued capital stock of Southwestern Nevada Mines Co. (Southwestern mine). At Tybo, owners are to receive 30% of profits.

Stockholders in the Nevada Sm. Corp. were permitted to exchange their holdings on a basis of 10 shares of Nevada Sm. for 3 shares of Louisiana Cons.

Geology: the Tip-top group shows 2 contact veins between andesite and rhyolite; 2½' and 6' wide; values in gold and silver. At the Tybo, there is a fissure vein on a limetone-rhyolite contact; ore averages 19 oz. silver, 0.15 oz. gold and 11% lead. The Southwestern mine shows oxidized lead ore, containing silver and a little gold.

Development: at Tip-top, by tunnels; total workings 1,000'. At Tybo, by 400' shaft and winze 100' deeper; workings aggregate 3,200'.

Ore reserves: ore above 120' level of Tip-top exhausted and mine has been shut-down for 3 years. At Tybo, the management estimated (Oct., 1919) 2,000,000 of ore blocked-out.

Equipment: at Tip-top, includes 10-stamp and cyanide mill, of 50 tons capacity. The Tybo mine is equipped with 125-ton concentrator with 3 flotation units, and 125-ton lead smelter with sintering plant.

Production: at Tip-top said to be \$120,000 up to 1918; the Tybo and Southwestern, especially the latter have been small producers for a number of years.

Up to September, 1918, company had expended about \$100,000 on the Tybo mine, and despite glowing press reports, had run into debt, in an unsuccessful attempt to put the property on a profitable basis. Operations were suspended until October, 1919, when new management started sinking to the 600' level.

Mill and smelter began operations late spring of 1920, and in August a first shipment of 5 tons of base bullion was reported, with 20 tons in reserve. In November, plant was said to be too small to earn a profit, and later, after company had endeavored to carry its obligations, S. R. Moore, of Tonopah, was appointed receiver. Liabilities of \$500,000 were reported.

Reported that bondholders had purchased the assets at receiver's sale for \$400,000, Dec., 1921. Company is to be reorganized, former stockholders may receive 16 participation certificates for each 100 shares of old company, plus 20c per share assessments. Plant is valued at \$300,000 and 24,000 tons of \$20 ore is said to be available.

LOVELOCK WILLARD MINING CO.**NEVADA****Address:** Lovelocks, Nev.**Officers:** W. H. Goodin, pres.; O. H. Olesen, 1st. v. p.; L. S. Young, 2nd v. p.-treas.; J. J. Garnier, 3rd v. p.; St. J. L. Thaw, sec.; J. H. Borland, mine mgr.**Inc.** May, 1919, in Nevada**Property:** the Treasure Hill group adjoining the Nevada Honey Bee mine, 6 claims, 10 miles from Lovelocks, Pershing county, reported to carry 3 well-defined veins, the main orebody, 18' wide, giving assays of from \$20 to \$70 in silver per ton. Development is by tunnel. It is a prospect examined by Oscar A. Hershey.

Company has never operated, and will not do so until conditions are favorable. Lessees have made small shipments. Deal by which part of holdings were to be taken over by Wm. J. Loring, and associates, under name of Loring Treasure Hill Mines Co. (q. v.) was not consummated.

LOWNEY MANGANESE ASSOCIATION**NEVADA****Address:** J. M. Carter, supt., Las Vegas, Nev.**Property:** adjoining the holdings of the Manganese Association, Inc., near Las Vegas, Clark county, developed by 60' shaft and 50' drift said to show a lens of ore from 4 to 8' wide, averaging 38-48% Mn. No shipments reported.**LUCKY BOY CONSOLIDATED MINING CO.****NEVADA****Address:** care J. H. Miller, Hawthorne, Nev.**Officers:** O. Raymond Knight, pres.; John H. Miller, v. p. and gen. mgr.; R. E. Allen, sec-treas.. Company controlled by the Knight Investment Co., of Utah. Total dividends paid, \$125,000.**Inc.** in Utah; 2,681,763 shares issued; assessable; assessment of 1c. levied in 1919.**Property:** the Lucky Boy mine, under the town of Lucky Boy, about 5 miles from Hawthorne, Mineral county, shows silver-gold-lead-copper ore in a vein in limestone near granite. Ore contains galena and tetrahedrite with quartz and some calcite, in lenses and shoots, in a vein which runs N. 80°-85° E. and dips 65°-75° S. Geology fully described in U. S. G. S. Bull, 594, p. 153.**Development:** by 1,000' Hubbard shaft with drifts E. and W. at 100' intervals and by a deeper drainage tunnel, 6,200' long.

The big ore-shoot, which produced \$800,000 in 8 months and half as much more in the next year, has been mined out except where narrow. No stoping ore was cut in the lower tunnel, but there is much unworked ground in the mine and much virgin territory in the property.

Equipment: includes air compressor, electric motors, machine drills and useless 10-stamp mill.

Lessees are reported to have mined ore worth \$100,000 during the 12 months ended October, 1919. Their work has not revealed any new orebodies. The Mills property adjoining, and the townsite and water supply of Hawthorne was acquired, a total of 2,000 acres.

For 2 years from October, 1919, company has been reported as about to resume operations, and was preparing to erect a mill. Reports are apparently premature.

LUCKY BOY DIVIDE MINING CO.**NEVADA****Address:** F. T. Dunn, res. agt., Tonaph, Nev. Wm. Farrish, supt.**Officers:** Harry MacNamara, pres.; W. A. Nye, v. p.; H. E. Dugan, sec.; A. G. Raycraft, treas., with L. R. Robins and Wm. Farris, directors.**Inc.** March 31, 1919, in Nevada. **Cap.** 1,000,000 shares; 10c par; assessable. Transfer agt., Registration Surety Co., San Francisco.**Property:** the Todd mines, 23 claims, 460 acres, in the Luning district of Mineral county. Two principal veins; the Nogal shows lead-silver-gold ore in quartz monzonite, a few inches to 2' wide; the other (Red) heavily iron stained quartz, carrying gold and silver, as a replacement in limestone, 3' to 4' wide.**Development:** by 3 shafts, deepest 125', and 5 tunnels, with total workings of 5,000'. Present work largely confined to replacement deposit, in which 7,000 tons of \$25 ore is reported blocked out.**Equipment:** steam power, hoist, aerial tram, orebins, dwellings.**Production:** \$30,000 during past 15 years, under management of R. B. Todd. Shipments made during 1921 to mill of the Tonopah Mng. Co.**The Red vein contains large pockets of powdered red oxide of iron, from which occasional shipments are made to the company's \$60,000 paint plant at Richmond, Calif. This hematite ore is said to carry also \$26 in gold, recovered by cyanidation.****LUNING DIVIDE MINES CO.****NEVADA****Address:** Luning, Nev.**Inc.** May 26, 1919, in Nevada, by G. A. Raymer, W. E. Harris, and S. I. Dillbaugh. **Cap.** \$150,000; 10c par.**LUNING GOLD MINES CO.****NEVADA****Merged early in 1920 into the Luning Consolidated Silver Mines Co. of Nevada, which see.****LUNING-IDAHO MINING CO.****NEVADA****Office:** Reno, Nev. **Mine office:** Luning, Mineral county, Nev.

Officers: Robt. B. Todd, pres. and gen. mgr.; R. G. Withers, v. p.; G. M. Todd, sec.-treas., with M. W. O'Boyle and G. B. Brest, directors.
Inc. April 29, 1910, in Nevada. **Cap.** \$1,500,000; \$1 par; 1,116,533 issued. Operating expenses for 1916. \$20,000; 1917. \$24,505; 1918. \$5,282.

Property: 13 claims, 260 acres, in the Pilot range in the Santa Pe mining district, shows several fissure veins in granite and quartzite, said to carry 2½% copper, 2 oz. silver and about 60c gold per ton.

Development: by shafts, open cuts and tunnels, with about 3,000' of workings to depth of 200'. Longest tunnel driven about 682' across the mineralized zone, is near the hanging wall granite.

Equipment: includes hoists, compressor and drills.

Last shipments made in 1917. Property reported on by M. H. Jacobs, J. C. Skuse, S. B. Parish and Wm. G. Oliver. Operations during 1918-'19 were limited, owing to lack of working capital, but reported to have been resumed in early 1920.

LYNN BIG SIX MINING CO.

NEVADA

Office: 701 McIntyre Bldg., Salt Lake City Utah. **Mine office:** Carlin, Nevada.

Officers: Henry Harker, pres.; R. M. Holt, v. p.-sec.-treas.-mgr.; with L. A. Marks, Swen Nelson and Frank Davis, directors. H. L. Parker, supt.; T. F. O'Brien, asst. supt.

Inc. 1912, in Nevada. **Cap.** \$250,000; shares 25c par; assessable; 800,000 shares outstanding. Assessment 15. of 1c. levied Sept. 3, 1921.

Property: 12 claims (1 patented), 220 acres, in Lynn district, Eureka county, at Goldville, via Carlin. Ore occurs in shattered zones in flat dipping bedded rhyolite, intruded by andesite; the vein filling is an iron stained, silicified rhyolite carrying gold; assay value, \$2 to \$300 per ton.

Development: by inclines, deepest 300' vertically, and 800' tunnel. Reported that 5 mineralized zones, 6 to 35' wide, have been cut.

Equipment: a gasoline hoist and 50-ton amalgamating test mill, increased, 1921, to 100 tons.

Production: milled 1,000 tons; and 10 carload shipments to smelters in 1918 said to have averaged \$80 per ton.

Word is received from the management that a number of precious metals have been discovered; "free gold averaging about \$10 per ton, some platinum, selenium, vanadium, silver and considerable mercury and gallium. Also a brilliant metal which has the appearance of gold; it is heavier than gold and much more brilliant." Also, it seems that there is "enough ore to run at the rate of 100 tons per day for at least 50 years". Confirmation as to the characteristics of this "spirit ore" is given by the assistant superintendent in a letter to the M. & S. Press for April 3, 1921. With such a galaxy of precious things, and in such vast quantities, no further comment is needed.

MacFARLANE DIVIDE MINING CO.

NEVADA

Mail returned from Tonopah, Nev.

Officers: T. L. Oddie, pres.; M. M. Detch, v. p.; O. G. Wolther, sec.; W. V. Richardson, treas., with Joe Loeb, Hector Stewart, and A. E. Kane, directors. J. W. Hanson, supt.

Inc. in Nevada. **Cap.** \$150,000; shares 10c par.

Property: 4 claims N. E. of the Ajax and 2½ miles N. E. of Gold Mountain, near the Myra and Ben Hur.

MacNAMARA CRESCENT DEVELOPMENT CO.

NEVADA

Inc. 1921 in Nevada, to take over assets and liabilities of MacNamara Crescent Mng. Co. **Cap.** \$375,000; par 25¢; assessable. Stockholders of old company, who will receive new stock on a share for share basis, were called to take final action, Jan. 21, 1922.

MacNAMARA-CRESCENT MINING CO.

NEVADA

Offices: 565 Mills Bldg., San Francisco, Calif., and Tonopah, Nev. Ivan C. Arnold, sec.; J. L. Joseph, mgr.

Cap. \$300,000; shares 20c. par; all outstanding; 751,000 shares are held by the MacNamara M. & M. Co. Registrar and transfer agent, U. S. Corporation Co., New York.

Property: 9 claims, 144 acres, at Tonopah, adjoining the West End Cons.

Development: by 1,222' two-compartment shaft. By Jan. 1, 1922, a N. W. crosscut was driven 2,019', with 110' still to go, to cut the Ohio vein of West End Cons. If no ore is found, a 600' N. E. crosscut will be driven.

Equipment: includes 100 h. p. double drum hoist and 50 h. p. compressor. Total expense of development and improvements has been \$129,195.

A special stockholders meeting was called for Jan. 21, 1922, to approve sale of all assets to the MacNamara Crescent Development Co., stock of which is assessable, shares to be exchanged on an equal basis. New company assumes liabilities of old company.

MACNAMARA MINING & MILLING CO.

NEVADA

Offices: 565 Mills Bldg., San Francisco, Calif., and Tonopah, Nev.

Officers: J. L. Joseph, pres., Mark Wulfsohn, v. p.; E. W. Elliott, sec-treas., with S. D. Allen, directors.

Inc. 1914, in California, as a reorganization of the MacNamara Mining Co. **Cap.** \$1,500,000; shares \$1 par; assessable: 435,000 shares in treasury. Transfer office and registrar: 565 Mills Bldg. Listed on San Francisco Exchange; traded in on New York Curb.

Annual statement for year ending December 31, 1920, shows; receipts, \$575,715; disbursements, \$587,134; cash on hand, \$28,627.

The management got into had repute with stockholders because no statements of operations were given out, and they were at a loss to know what had become of the money in treasury. To provide working capital the company was reorganized under its present title and the stock was put upon an assessable basis. Two assessments of 3c. and one of 2c. per share have been levied. The property of the MacNamara Mining Co. was sold to the new company for 1,340,076 shares of the latter, 275,076 shares of which have since been re-purchased. In 1919 company acquired stock control in the MacNamara-Crescent Mining Co., which see. Dividends: paid, \$40,399.

Property: 2 patented claims, 16 acres, at Tonopah, said to have 3 flat dipping quartz veins, not including the Ohio of West End Cons., continuation of which underlies part of MacNamara claims; one vein is of contact type up to 80' in width.

Development: by 800' shaft.

From December, 1912 to 1917, the mill treated 54,000 tons of company ore, assaying from \$7.04 to \$11.08 per ton. The plant was shut-down in 1917, due to lack of development, shortage of money, and low price of silver. Property was not operated in 1915.

In February, 1916, arrangements were made with the West End Cons. Mining Co. by which the MacNamara Company could develop on its side of the property line a body of ore which the West End has exposed in its stopping operations near the line; work to be done through West End workings to avoid the necessity of MacNamara driving a 500' crosscut. The joint exploration was continued during 1916 and 1917. Late in 1917 the mine and mill were reopened. Good developments on the Ohio vein in the West End mine adjoining has led to exploration for this shoot.

In the MacNamara mine much of development and production is in hands of lessees; in 1921, specifically in MacNamara vein and on 725' level.

Equipment: includes 100-h. p. electric hoist, compressor, 10 stamps and cyanide plant.

Production: about 1,500 tons per month. Since closing of the Gold-Field Consolidated mill, the MacNamara has contracted with the Tonopah Divide M. Co. to treat 60 tons of the latter's ore daily; also some from the Hasbrouck and Divide Extension. In spring of 1921, mill was reported to be treating between 2,000 and 2,500 tons per month. According to a 1918 estimate of Wm. B. Fisher, it was then reasonably probable that 100,000 tons of 15 oz. silver ore could be mined.

In a stock selling campaign, in spring of 1920, New York brokers made extravagant claims as to the assets and probable earning powers of the Mac-Namara M. & M. Co.

MAJUBA FRESNO SILVER MINING CO. NEVADA

Address: Imlay, Nev.

Property: in Antelope district, Pershing county, 17 miles W. of Imlay, developed by an 830' tunnel and 84' shaft, both in ore. A few shipments of high grade ore were made in 1921.

MAJUBA SILVER, TIN & COPPER CO. NEVADA

Address: 315 Nixon Bldg., Reno, Nev. G. S. Brown, pres.; Jack Welch, mgr.

Inc. 1919, in Nevada. **Cap.** \$200,000; shares 10c par.

Property: 79 claims, 1,580 acres, in Antelope district, Pershing county, 25 miles W. of Imlay. Estimated reserves in May, 1920, were: 50,000 tons of ore, assaying 3% copper and 2 oz. silver, and a small tonnage of higher grade. Some tin ore has been found.

Development: by tunnels, in upper leached zone; aggregate workings 4,400'.

The Majuba Hill group was under option, 1916-1919, to the Mason Valley Mines Co., which is responsible for existing development. Shipments amounted to about 2,000 tons, yielding 12% copper and 1.4 oz. silver; total expenditures to Jan. 1, 1919, were \$142,509.

MAMMOTH DIVIDE MINING CO. NEVADA

Address: R. K. Brown, res. agt., Tonopah, Nev.

Officers: S. A. Holman, pres.; C. W. Geddes, v. p.; with Wm. A. Kerr, R. K. Brown (supt.), and P. B. Ellis, directors. A. R. Buchanan, sec.-treas. **Inc.** April 18, 1919, in Delaware. **Cap.** \$150,000; 10c par; 1,000,000 issued. Listed on San Francisco Stock Exchange and New York Curb. Annual meeting, last Thursday in October. Security Transfer & Registrar Co., New York, and Registration Surety Co., of San Francisco, transfer agents and registrars.

Property: 4 claims, 50 acres, 2,500' S. E. of Tonopah Divide and adjoining the Gold Reef on S., considered to be well located.

Development: by 100' shaft on Wonder claim, at a point in line with trend of main Tonopah Divide fault-fissure.

Equipment: 30-h. p. electric hoist, compressor, bunk-house, etc.

MAMMOTH GOLD MINING CO. NEVADA

Office: 127 Montgomery St., San Francisco, Cal.

Officers: J. W. Lowe, pres.; Wm. P. Wrixon, v. p.; Leon C. Oosteeje, sec.; E. H. Norman, treas., with E. M. Robitscher, J. C. Romaine and J. H. Wyruck, directors.

Cap. \$100,000 par \$1; assessable; 17,500 shares outstanding. Assessment No. 4 of 2c levied November 1, 1917.

Property: 2 patented claims, 40 acres, in southern part of Manhattan mining district, Nye county, said to show gold-silver-copper ore. Development is by 250' vertical shaft. Idle several years.

MANDALAY MINES CO. NEVADA

Address: J. F. Dwyer, gen. mgr., Jungo, Humboldt Co., Nev.

Property: in Mandalay district, Humboldt county, 3 miles S. of Antelope station on W. P. R. R. An 80' shaft has opened a 4' vein of quartz carrying silver sulphides, with assay value of \$20 to \$75 per ton. Mine has been equipped with hoist and compressor. Total expenditures to Sept., 1920, \$14,000.

MANGANESE ASSOCIATION, INC. NEVADA

Control purchased for \$100,000 in 1918, by Thos. Thorkildson, Trust & Sav. Bk. Bldg., Los Angeles, Calif.

Property: the Three Kids claim, 16 miles S. E. of Las Vegas, Clark county, said to carry the largest known sedimentary deposit of high-grade manganese ore, assays averaging 40% Mn. and 12% SiO₂.

Ore is composed mainly of wad, psilomelane and pyrolusite, occurring in a lenticular mass in lava and outcropping near the base of the foothills.

It is very soft and light and occurs in a stratified deposit, the beds striking N. 50° W., with dip of 15° N. E. The ore exposed in the face of an open-cut 200' long averages 25' in thickness, and the lateral extent of the deposit unknown.

Production: by lessees in 1917 was 6,500 tons. Said to have been 150 tons daily in early 1918. The slump in price and lack of demand resulted in the mine being shut-down in March, 1919.

MANHATTAN BIG FOUR MINING CO. NEVADA

Idle. Harry B. Ruhl, sec. Goldfield, Nev. L. K. Koontz, pres.; J. H. Thatcher, v. p.; C. Wilson, treas., with W. G. Saunders, directors.

Inc. 1906, in Nevada. **Cap.** \$1,000,000; outstanding, \$784,000; shares \$1 par. Listed on San Francisco Stock Exchange.

Property: 60 patented claims at Manhattan, Nye county.

Development: to 500' level by shafts. High-grade ore was extracted by early lessees and the ore remaining is exceedingly low-grade. About the only way to treat it profitably would be to mine the Big Four hill by steam shovels and even this method is uncertain. No news for several years.

MANHATTAN CONS. MINES DEVELOPMENT CO. NEVADA

Address: P. O. Box 921, Tonopah, Nev. **Mine office:** Manhattan, Nev.

Officers: O. I. Stewart, pres.; W. J. Douglass and J. A. Gibbons, v. ps. C. C. Boak, sec.-treas.; with C. F. Wittenberg, A. J. Twilegar and J. H. Miller, directors. M. N. Page, supt.

Inc. 1913, in Nevada. **Cap.** \$1,500,000; \$1 par; assessable; 420,472 treasury shares. Assessment No. 13 of ¼c. levied Sept. 6, 1921. Listed on San Francisco Stock Exchange.

Cash on hand, Jan. 1, 1921, was \$5,276; mine idle for 12 months preceding Mar. 1, 1921, but expenses were \$8,000.

Property: 5 patented claims, 82 acres, in Manhattan district, Nye county. Litigation with White Caps company was settled in 1917, after 5 years. **Geology:** ore occurs as shoots up to 42' wide in contact and chamber deposits in lime-shale.

Development: by 555' shaft and 3,500' total workings. On 3rd level an 8' orebody was opened, and management reports (1921) \$1,000,000 worth of ore blocked out; assay value, \$19 to \$55. Ore said to be free-milling to this level, but carries arsenic below.

Equipment: 50-h. p. electric hoist, 6-drill compressor, and triplex pump. Recent change of officers, reported to be due to dissatisfaction with previous management. Also reported late in 1921 that operations were to be resumed and a chlorination mill of 1,000 tons monthly capacity would be erected.

MANHATTAN COPPER MINING & MILLING CO. NEVADA

See Vol. XIV. Company succeeded the Manhattan Gold & Copper Mining Co. and is owned by the **Cons. Nevada-Utah Corporation**, which see in this book and in Vol. XII.

MANHATTAN DEXTER MINING CO. NEVADA

Address: Manhattan, Nev.

Officers: S. R. Moore, pres.; C. F. Wittenberg, v. p.; C. T. Lawrence, sec.-treas.

Inc. in South Dakota. **Cap.** \$1,500,000; shares \$1 par.

Property: 1 patented claim, at Manhattan, Nye county, has been operated intermittently by lessees.

MANHATTAN MORNING GLORY MINING CO. NEVADA

Property: adjoins holdings of the White Caps Mining Co., near Manhattan, Nye county. Apex suit brought against the latter company decided adversely for the claimants, May, 1918.

MANHATTAN MUSTANG MINING CO. NEVADA

Manhattan, Nye county. Property mostly held by Tram-Chase lessees, who reported mining rich ore, at last accounts.

MANHATTAN RED TOP MINING CO., REORGANIZED NEVADA

Office: 126 Russ Bldg., San Francisco, Cal.

Officers: H. Zadig, pres.; W. E. Colburn, v. p.; C. E. Hudson, sec.-treas.; also directors. N. K. Franklin, supt.

Inc. Oct., 1912, in Nevada, as successor to the Manhattan Red Top. Cap. \$1,500,000; shares, \$1 par; 1,000,000 issued; assessable. Two assessments of ½c each levied December, 1917, and June, 1918.

Property: 60 acres in Manhattan district, Nye county.

Development: by 200' shaft with crosscuts and drifts on the 110' level.

Equipment: 40-h. p. hoist, compressor, electric power, drills, etc.

A prospect whose shares have been extensively traded in on the San Francisco Stock Exchange. Work was discontinued March, 1918, owing to a heavy flow of water and inadequate equipment.

MANHATTAN SUNRISE MINING CO.**NEVADA**

Address: Manhattan, Nev.

Inc. 1917. E. H. Mead, pres.; Wm. Forman, v. p.; John M. Gregory, treas.-sec., with E. C. Smith and Zeb Kendall, directors.

Property: lies east and northeast of the White Caps Extension holdings, near Manhattan, Nye county. No record of operations secureable.

MANHATTAN UNION AMALGAMATED MINES SYN. NEVADA

Is a reorganization of the Union Amalgamated Mining Co., fully described Volume XIII.

Offices: 265 Russ Bldg., San Francisco and Tonopah, Nev.

Officers: C. F. Wittenberg, pres.-mgr.; Jas. H. Forman, v. p.; Chas. D. Olney, sec.; with Wm. Forman, H. H. Brown and J. M. Gregory, directors.

Inc. Nov., 1917. Cap. \$200,000; 10c par; assessable; 1,385,344 outstanding. Four assessments levied to March; No. 5, of 1c., was delinquent July 18, 1921. Stockholders in the Union Amalgamated were given the privilege of exchanging their stock, share for share, upon payment of a 2c per share assessment.

Property: 6 patented claims, 120 acres, on Litigation hill, Manhattan, Nye county, said to show gold-silver ore in fissure veins. Development is by 600' shaft. Equipment: includes 20-ton cyanide mill.

Production: under former management was about 10,000 tons of ore. Mine has been closed down since 1918.

MARICOPA MINES CO.**NEVADA**

See Austin Nevada Cons. Mines Co.

MARIETTA GROUP**NEVADA**

Address: Marietta, Nev.

Property: at Marietta, Silver Star district, Mineral county, 9 miles W. of Belleville. A 3' vein carries silver-lead-gold ore. Operated by lessees at last account.

MARINETTE MINING & MILLING CO.**NEVADA**

Address: P. O. Box 1258, Goldfield, Nev.

Officers: R. H. Tune, v. p.-gen. mgr.; A. J. Padgham, sec.-treas.; with E. E. Nott, Hunter Campbell and L. H. Dappreck, directors.

Inc. Nov. 12, 1918, in Nevada, as a reorganization of the Marinette Nevada Mining Co. Cap. \$1,000,000; 10c par; assessable; about 190,000 issued. Annual meeting, first Tuesday in January.

Property: 9 claims, 8 patented; 180 acres, in Klondyke district, 14 miles N. of Goldfield, Esmeralda county. Ore contains silver chloride in quartz fissure vein, 1 to 4' wide, with N. E.-S. W. course and dip of 30°. Assays said to average \$12 to \$18 in silver-lead.

Development: by 600' incline to a vertical depth of 200', with a total of 1,500' of workings. Management plans development at depth. Shipments were made by former company.

MARINETTE NEVADA MINING CO.**NEVADA**

Succeeded, 1918, by Marinette Mining & Milling Co., which see.

MARNE DIVIDE MINING CO.**NEVADA**

Office: care Hugh H. Brown, atty., Tonopah, Nev.

Officers: H. A. Johnson, pres.; R. Q. McDonald, v. p.; Emil Elkner, sec.-treas., with Wm. R. Bozarth and A. E. Carper, directors, mostly connected with the Tonopah Mining Co.

Inc. April 3, 1919, in Nevada. Cap. \$150,000; shares 10c par.

Property: 7 claims, N. of Champion, 1½ miles S. E. of Gold Mountain; adjoins the Big Divide and Morris on the N. Surface prospects encouraging. Development: by 50' shaft at junction of 3 faults.

MASCOT SILVER MINING CO.**NEVADA**

Address: Pioche, Nev. Organized 1918 by John R. Cook, Judge Chas. Lee Horsey, H. W. Rand, and J. B. Thompson.

Cap. \$1,000,000; \$1 par; 400,000 shares held in treasury.

Property: Boston-Pioche group of 12 claims, formerly known as the Yuba East group at Pioche, Lincoln county, developed to depth of 800'. Returns from ore shipments said to have paid for development work during 1918.

MASON VALLEY-BLUESTONE EXTENSION MINES**NEVADA**

Address: 1014 Boston Bldg., Salt Lake City, Utah.

Officers: C. W. Reese, pres.; A. G. Gutheil, v. p.; G. M. Sullivan, sec.; H. C. Jex, treas., with O. P. Soule, W. E. Evans, and Henry Barney, directors.

Inc. in Utah. Cap. \$100,000; shares, 10c par; 500,000 shares held by Trustee. Listed on Salt Lake Exchange. Is a reorganization of the Mason Valley Extension Mining Co.

Property: 48 acres, 20 patented, in Mason district, near Yerington, Lyon county.

Geology: claims cover contact metamorphic deposits of copper near porphyry, and grano-diorite, the ore occurring in crushed limestone.

Development: by 350' shaft. Management hoped to find the same ore zone as in the Mason Valley and Bluestone mines, at last accounts.

MASON VALLEY EXTENSION MINING CO.**NEVADA**Re-organized under name of **Mason Valley-Bluestone Extension Mines**, which see.**MASON VALLEY MINES CO.****NEVADA**

Successor to Mason Valley Copper Co.

Office: 14 Wall St., New York. Mine office: Thompson, Lyon county, Nevada.

Officers: Wilber Judson, pres.; Theo. Schulze and E. O. Holter, v. p.'s.; Henry E. Dodge, sec.-treas.; preceding with John F. Alvord, C. A. Corliss and C. F. Ayer, directors. Operating staff: A. J. Mc Nab, gen. mgr.; W. R. Cox, supt., of mines; Robert Nesbit, mine mgr.

Inc. Jan. 4, 1907, in Maine. Cap. \$2,500,000; \$5 par; increased March 14, 1910, from \$1,000,000; \$1 par; all issued. Former bonded indebtedness of company paid in full with interest, Mar. 30, 1920.

Guaranty Trust Co., New York, and United States Trust Co., Boston, registrars. Bankers Trust Co., New York, and Boston Safe Deposit & Trust Co., transfer agents. Shares listed on Boston Stock Exchange and New York Curb.

Annual report for year ending December 31, 1920 shows: Current assets, \$777,798, and current liabilities, \$6,133, compared with \$1,310,116 and \$23,549 in 1919. Deficit amounted to \$60,065 in 1920 and \$10,755 in 1919, compared with profit of \$178,202 in 1918 and \$358,277 in 1917. No dividends paid.

Nevada Property: 9 claims, patented, 170 acres, and a fractional claim of 10 acres, known as the Spragg mine, lying south of the Bluestone at Yerington, and about 1½ miles west of Mason. Company also owns a smelter

and 1,320-acre smelter site at Thompson, one mile from Wabuska and on the railway.

California Property: The Gray Eagle property, 14 patented claims, 256 acres, near Happy Camp, Siskiyou county, Cal., was acquired in September, 1916, for 144,250 fully-paid Mason Valley shares, said to be worth \$271,250. The title to the property is in the name of the **Gray Eagle Copper Co.**, all of the stock of which is held by Mason Valley.

Company acquired a bond on the Blue King claims in Plumas county, Calif., 5 miles N. E. of the Walker Mng. Co. property near Genessee and 28 miles from Beckwith. The claims show 3 parallel veins that average 2% copper at the surface.

Option on the Majuba Hill group, Humboldt county, Nev., held since 1916, was relinquished early in 1920; up to Dec. 31, 1918, \$142,509 had been expended in development, and some 2,000 tons of ore produced (see Majuba S., T. & C. Co.). An option on the property of the **Northern Light Copper Co.** (q. v.), Lyon county, Nev., was relinquished at the same time, after about 1 year's work.

At the Mason Valley mine, the Nevada property, an oxidized garnet deposit between limestone and andesite, is partly covered by rhyolitic tuffs. The latter rocks are comparatively soft and have been eroded into steep escarpments and sharp gulches. Ore is of contact metamorphic character, being an altered limestone of 30' average width. Surface ore shows malachite with a little cuprite, succeeded, at about 100' depth, by cupriferous pyrite, largely massive, with copper in the form of chalcopyrite. The mine is said to have some ore averaging 10% copper, but the average is about 3.5% copper. An average analysis shows 16 to 17% iron, 16 to 18% lime, 12% sulphur and 38% silica.

Development at the Mason Valley mine consists of crosscut tunnels driven to the ore-bearing zone with drifts run N. and S. following the general course of the orebodies. Crosscuts have been extended E. and W. from the main drifts. The workings reach a depth of about 550'. The mine has been worked by the shrinkage stope system. A very considerable tonnage of low-grade carbonate and sulphide ores, with a small quantity of high-grade ores has been developed. Actual development work begun March, 1907, and workings aggregated 32,202' on Dec. 31, 1920.

At Gray Eagle, a 10' to 80' vein dips 45° in schist and shows an ore shoot 300' long, carrying \$1.50 in gold and 2½ to 18% copper; ore is pyrite and chalcopyrite. The Blue King claims cover 3 parallel veins, with an average copper content of 2% at surface and some gold and silver.

The Gray Eagle is developed by 8 or more tunnels, 50' to 600' long, and hundreds of feet of drifts. It is proposed to open the Blue King by tunnel and do further prospecting by drill. Development, old and new, totals 8,000', with 7,500' of drilling. As property is 80 miles from a railroad it must await transportation facilities before becoming a shipper.

Ore Reserves: in the Gray Eagle, the management reports the tonnage, as of Dec. 31, 1920, to be 1,045,000 tons of 3.23% and 500,000 tons of 1% copper ore; the former with 50c and the other with 20c in gold per ton. (See other estimates in Vol. XIV.)

Equipment: a 6,250' tramway, with drop of 600', of 100 tons hourly capacity, connects the mine with the Nevada Copper Belt railway, which line connects with the company's smelter, 16 miles distant.

The Wabuska Smelter.

The smelter built at a cost of approximately \$900,000 is about 2½ miles from Wabuska, on the Southern Pacific railway, and about 16 miles from the mine. The plant consists of a sampling mill for custom ores; extensive storage bins, a blast-furnace building, with two blast furnaces of 1,800 tons daily capacity, a sintering plant, and two stands of 12' converters

of the Great Falls type. Reverberatory furnaces are to replace the blast furnaces when the smelter resumes operations.

The smelter was blown in January 16, 1912, and one furnace was in continuous operation to October 20, 1914. Smelting operations were resumed February 13, 1917, and the second furnace put in operation in March. During 1917 the smelter treated 294,958 tons of ore and 13,390 tons of low-grade fluxes, of which 114,273 tons represented Mason Valley ore, amounted to 7,038 tons of blister copper containing 1,037 oz. gold, 46,257 oz. silver, and 13,914,764 lb. copper.

In 1918 the smelter treated 336,694 tons of ore and 11,689 tons of fluxes, 117,251 tons of which was company ore and 788 tons from properties under option, yielding 809 oz. gold; 91,824 oz. silver and 15,475,851 lb. copper.

Average price received for copper sold was 25.01c, compared with 28.09c in 1917. Income from ore sales in 1918 totaled \$1,507,507 and operating costs \$1,246,017.

Only one furnace was operated during the greater part of 1918 and the uncertain copper market caused a closing down of mine and smelter, February 28, 1919. Production for the 2 months of 1919, from 44,543 tons of ore (of which 15,894 came from its holdings), was 2,097,772 lb. copper, 238 oz. gold and 22,409 oz. of silver; the average price received for copper was 18.39¢. Property idle throughout 1921.

Company is in a position to become a steady dividend payer as it has a good plant, strategic location and owns a good mine. If this is done, the smelter will be enlarged by a reverberatory and custom work done. In January, 1920, it cost \$10.50 per ton to ship concentrate from Paxton, Plumas county, California, to the smelter at Wabuska, a distance of 182 miles; but to Utah smelters, a distance of 680 miles, only \$8.80 per ton. Late in 1921, the Interstate Commerce Commission ordered that a rate of \$3.27 per ton on \$100 ore of all classes be established from Western Pacific points to Wabuska, which ensures the resumption of operations at the smelter and may make it an important custom plant.

According to a well known mining engineer, "Mason Valley is both a custom smelting company and a mining corporation. The company boasts of about 1,000,000 tons of ore reserves averaging over 3% copper and 500,000 tons of about 1%. It has no bonded indebtedness, having retired the last of these in the past year out of funds piled up during the prosperity of 1916, 1917, 1918 and 1919. With the bonded indebtedness eliminated, and a strong financial position, having some \$750,000 in the treasury, the common stock new appears in line for distribution of earnings, to say nothing of discounting the intrinsic value of the shares which, according to the ore reserves of the company, is about \$5."

MASON-YERINGTON MINES CO.

NEVADA

Reorganization of the Utah-Yerington Mines Co.

Office: 1014 Boston Bldg., Salt Lake City, Utah. **Mine office:** Mason, Nevada.

Officers: at last accounts, C. W. Reese, pres.; A. G. Gutheil, v. p.; G. M. Sullivan, sec.; H. C. Jex, treas., with S. McCroskey, C. J. Guild and Ross Thompson, directors.

Inc. in Utah. **Cap.** \$1,000,000; 500,000 held by trustee.

Property: E. of the Mason Valley Mines Co., in Mason district, Lyon county, said to show 42" of silver, gold, lead, copper ore, in limestone.

No recent information.

MAYFLOWER BULLFROG CONSOLIDATED MINING CO. NEV.

Reorganized 1917, as Cons. Mayflower Mines Co., which see.

MCCONNELL MINES CO.

NEVADA

Office: care O. H. Sonne, pres., Yerington, Lyon county, Nev. **Mine office:** Mason, Lyon county, Nev.; S. B. Elbert, sec. and mng. engr.; with Mrs. O. H. Sonne and Mrs. S. B. Elbert, directors.

Inc. Sept. 14, 1912. **Cap.** \$500,000; \$5 par; issued, 40,002 shares.

Property: 10 claims, 160 acres, patented, adjoining the Yerington Malachite mine on the west. Claims show limestone, shale and granite with argenterous contact deposits in the contact zone near the grano-diorite. Property has 4 orebodies, 2 developed, averaging 25' in width and carrying about 3.5% copper.

Development: by 400' shaft and 3 tunnels. **Equipment:** includes a 25-h. p. hoist, 7-drill air compressor and 8 buildings.

Production: in 1918, shipments to Mason Valley smelter totaled 3,964 tons ore averaging 3.88% copper, producing 304,332 lb. copper.

Property regarded as good.

McCoy WEST DIVIDE SILVER MINES CO.

NEVADA

Mail returned from Tonopah, Nev.

Officers: Al. McCoy, pres.; G. H. Cook, v. p.; B. E. Garnett, sec.-treas.

Property: 3 claims north of the West Divide Extension.

McDONALD-ELY COPPER CO.

NEVADA

Office: Boston Bldg., Salt Lake City, Utah. **Mine address:** J. P. Turner, supt., Ely, White Pine county, Nev.

Officers: D. C. McDonald, pres. and gen. mgr.; Col. Enos A. Wall, v. p.; Geo. W. Parks, sec., Boston Bldg., Salt Lake City, Utah; Frank Knox, treas., with Frank J. Westcott, Geo W. Lamb and Hon. Thos Kearns, directors. E. P. Jennings, cons. engr. and mgr.

Inc. November, 1906, in Utah. **Cap.** \$1,000,000; \$5 par; issued, \$790,000. Debentures, \$100,000, at 6%, maturing November 15, 1915. Shares were listed on the Salt Lake Stock Exchange, but withdrawn.

Property: 28 claims, patented, 325 acres, 19 claims held under bond and lease. Property, on the lime belt, in the N. E. part of the Ely district, carries 4 contact deposits, between porphyry and limestone, showing prominent iron outcrops. Management estimated veins as 20' wide carrying oxidized ores, assaying 1 to 40% copper, and about 80 cts. gold per ton.

Development: is by the 415' Wall tunnel, showing 21' of heavy iron. The mine as a whole has about 3,000' of workings.

Equipment: includes a 25-h. p. gasoline hoist, 40-h. p. steam hoist, and a 6-drill compressor. A pumping plant and pipe line supply water from a spring at nearby ranch.

An old 50-ton mill, with rolls and cyanide plant, remains from a former ownership. The 100-ton concentrator has a gyratory crusher and 3 sets of rolls. Idle for several years.

M. & D. MINING CO.

NEVADA

Office: 903 Boston Blk., Salt Lake City, Utah.

Officers: U. Terasawa, v. p.-mgr.; P. A. Clark, sec.; S. Samota, treas. H. A. Smith, A. T. Clark and H. A. Smith, Jr., directors.

Inc. Aug. 6, 1916, in Utah. **Cap.** \$10,000; 10c par; assessable. Annual meeting, August 6th.

Property: 17 claims in Eldorado canyon, Clark county, said to carry gold-silver-copper ore. A prospect.

MECCA DIVIDE MINING CO.

NEVADA

Address: Tim Connelly, agt., Goldfield, Nev.

Officers: J. W. Dunfee, pres.; J. E. Ewing, v. p.; Clyde Cannan, sec.; E. Marks, treas., with T. Donnelly, directors. A. H. Elftman, cons. eng.

Inc. March, 1919, in Nevada. **Cap.** \$150,000; shares 10c par.

Property: 32 acres, ¼ mile E. of the Tonopah Divide, adjoining Tonopah Hasbrouck on north.

Development: sank shaft and erected hoist, etc., in 1919.

MENDHA-NEVADA MINING CO.

NEVADA

Mine office: Pioche, Lincoln county, Nev. T. J. Osborne, pres.; M. C. Godbe, sec., Newhouse Bldg., Salt Lake City, Utah.

Cap. \$1,000,000; shares \$1 par.

Property: in Pioche district, Lincoln county, is said to have produced \$500,000 under its former ownership. Reported to have a vein 3 to 15' thick,

averaging 6', practically vertical and showing silver and gold-bearing lead and copper ores on 700' level. Development is by a 900' incline shaft. Was a producer in 1919.

MERCURY MINING CO.**NEVADA**

Address: G. D. Abbott, sec., 1022 Crocker Bldg., San Francisco, Cal.

Mine office: Ione, via Austin, Nye county, Nev.

Officers: C. A. Norris, pres.; F. W. Bradley, v. p.; G. D. Abbott, sec-treas.; Clifford G. Dennis, mgr.

Inc. May 7, 1910, in Nevada. **Cap.** \$1,000,000, all outstanding; shares \$1 par. Annual meeting second Wednesday in January.

Balance sheet for 1920 shows assets: \$1,102,000, of which property and plant is \$1,056,660; supplies, \$2,234; stock \$6,660; consignment account, \$8,760. Liabilities include operating accounts, \$53,651; reserve, \$48,355. Surplus account shows a deficit of \$27,616.

Comparative Operating Statement:

	Gross Earnings	Operating Expenses	Operating Profits
1920.....	\$16,990	\$31,103	\$14,113*
1919.....	32,028	31,089	1,039
1918.....	51,363	51,363	26,702
1917.....	9,704	11,949	2,245*
1916.....	31,099	33,042	1,943*
1915.....	44,127	26,299	17,828
1914.....	16,110	17,868	1,758*

*Deficit.

Property: 10 patented claims near Ione, which show cinnabar ore. Company has one 25-ton Scott furnace.

Production: in 1911-'12, 9,467 tons ore, 2,480 flasks mercury; in 1913, 7,715 tons ore, 1,013 flasks; in 1914, 2,100 tons ore, 384 flasks; in 1915, 5,375 tons ore, 417 flasks; in 1916, 7,314 tons ore, 399 flasks; in 1917, 94 flasks, in 1918, 10,147 tons ore, 775 flasks; in 1919, production was less than half of that for 1918; in 1920, 2,598 tons ore produced 250 flasks.

During 1920, 1,383' of workings were completed and commercial ore was opened, a few inches to 6' wide, for 200'; 3,400 tons of ore in reserve, Dec 31, 1920. Furnace was operated for 3½ months only, closing down because of market conditions.

MERRILL SILVER-LEAD CO.**NEVADA**

Address: J. K. Turner, cons. eng., Goldfield, Nev.

Officers: A. H. Merrill, pres.--gen. mgr.; J. K. Turner, v. p.--cons. engr.; Gordon M. Bettles, sec.-treas.; with L. K. Dellinger and Owen Crawford, directors.

Property: 10 claims, 10 miles S. of Goldfield. A 6' vein crosses the ground for 1,800', and samples have yielded up to 7.44 oz. silver per ton, as well as lead and a little gold. Formation is crystalline limestone. **Development:** by 50' shaft.

Early in 1920 reported that C. E. Greenamyre & Co., New York, were financing this enterprise.

MEXICAN GOLD & SILVER MINING CO.**NEVADA**

Offices: 787 Mills Bldg., San Francisco, Calif. and Virginia City, Nev.

Officers: J. H. Goldman, v. p.; A. P. Swain, sec., with J. P. Fraser, Geo. E. Bennett and C. W. Conliss, directors.

Inc. 1874, in California. Operations under former managements described in Vol. XIII. **Cap.** \$201,600; \$1 par; assessable all issued. Assessments during 1918 amounted to \$56,848. A 10c assessment levied May 25, 1921. Stock listed on New York Curb and San Francisco Exchange.

Property: 600' along the Comstock Lode, bounded on the N. by the Union Consolidated and on the S. by the Ophir Silver, which, with the Cons. Virginia mine are under the same management. For geology see Vol. XIII, and U. S. Geological Survey Monograph No. 3.

Exploration work on the 2,700 and 2,900' levels has been abandoned, and work confined to the 2,000' level and above. This new work has not yet progressed far enough to develop ore.

Production: in recent years amounted to about \$1,500,000 from the 2,200 to the 2,500' levels, the ore averaging \$33 per ton.

Equipment: includes 100-ton all-slime cyanide plant operated under the name of the Mexican Milling Co., which is used by the Cons. Virginia, Ophir Silver, Sierra Nevada, and Mexican G. & S. companies.

MEXICAN MILLING CO.

NEVADA

Offices: 787 Mills Bldg., San Francisco, Cal., and Virginia City, Nev. Is an association of the companies using the mill of the Mexican G. & S. Mining Co.

MIDDLE MINES ASSOCIATION

NEVADA

Address: H. L. Slosson, Jr., pres., Russ Bldg., San Francisco. Alexander Wise, mgr., Thos. F. McCormic, supt.

Is a consolidation of the Best & Belcher, Bullion G. & S. Chollar, Exchange G. & S. Gould & Curry, Hale & Norcross, Potosi and Savage companies, operating jointly to develop the central section of the Comstock lode. The associated companies are separately described.

In mid summer of 1921, Alex. Wise is reported to have taken under option the mineral rights of the entire group and to have interested Philadelphia capital. Albert Burch was retained to investigate the project and is said to have reported favorably after 4 months work, but option was relinquished. In January, 1922, it was announced that D. M. R. Ward, pres. of Tonopah Ext., and associates, were preparing to expend \$150,000 in sampling and examining the mines under guidance of Rogers, Mayer & Ball.

MIDLAND DIVIDE MINING CO.

NEVADA

Address: W. V. Richardson, Tonopah, Nev.

Officers: T. L. Oddie, pres.; A. E. Kane, v. p.; W. V. Richardson, sec.-treas., with D. T. Donovan and P. J. Donovan, directors.

Inc. April, 1919, in Nevada. Cap. \$150,000; par 10c.

Property: 40 acres adjoining California Divide, between the Operator and Portland groups, 9,000' S. of Gold Mountain.

MIDWAY DIVIDE MINING CO.

NEVADA

Office: 206 Nixon Bldg., Reno, Nev.

Officers: Dr. J. L. McCarthy, pres.; R. W. Cattermole, v. p.; J. F. Kunz, sec.-treas., with R. G. Myrtle and R. P. Burris, directors.

Inc. May, 1912, in Nevada. Cap. \$1,500,000; \$1 par; assessable; 468,800 treasury shares issued out of total of 650,000.

Property: 4 claims, 50 acres, adjoining the Dividend and Divide Consolidated.

MILL CITY TUNGSTEN CO.

NEVADA

Address: W. J. Loring, Crocker Bldg., San Francisco, Cal. Thos. Sutton, mgr., Mill City, Nev.

Inc. 1918, in Nevada. Cap. \$500,000; \$1 par. A 75% stock interest is owned by the Pacific Tungsten Co. (q. v.).

Property: a tungsten-bearing group near Mill City, Pershing county, developed by 400' of tunnels and drifts. Ore occurs in a vein said to average 4' in width with good value. Shipments began in 1917 and during part of 1918 were at rate of 30 tons of scheelite per day. Ore was treated in the Pacific mill after October, 1918.

Operations ceased in February, 1919, due to the collapse of the tungsten market. A large sum of money was spent on property to meet war demands; in this connection the Minerals Relief Commission's auditor, in his report on the Pacific company's claims, allowed \$125,000 as valuation of its interest in, and \$6,909 for development of the Mill City company. For other figures see Pacific Tungsten Co.

Presumably idle.

MILLTOWN EXTENSION GOLD MINING CO. NEVADA

Address: Goldfield, Nev.

Inc. 1915 in Nevada. Cap. \$1,500,000; \$1 par; 800,000 shares in treasury at last accounts.

Company was organized to secure title to the Louis Fraction and Milltown Extension claims at Goldfield, which were explored on the 700' level by a crosscut run from the Yellow Tiger Co.'s shaft to the property of the Red Lion Cons. Mng. Co., which lies on the opposite side of Milltown Ext.

The Milltown Extension and the Jerry Johnson Mng Co. each owned a half interest in the Cripple Creek Deep Leasing Co., operating a lease on the Jerry Johnson mine at Cripple Creek, Colo. During the war it was impossible to operate the lease at a profit and it was forfeited after the expenditure of all treasury funds. Property holdings of the company are not favorably regarded.

MILLTOWN MINING CO. NEVADA

Property: 3 claims in Goldfield district, Esmeralda county, taken over in merger formed in 1920, by **Goldfield Deep Mines Co.**, which see.

MINA COPPER SILVER MNG. CO. NEVADA

Address: Mina, Nev.

Officers: A. E. Bettles, pres.; Wm. Bouchard, v. p., and Geo. W. Meyers, sec.-treas.; also directors.

Inc. July 24, 1919, in Nevada. Cap. \$150,000, 10c par.

MINA GOLD MINES CO. NEVADA

Address: Tonopah, Nev.

Officers: P. H. O'Neil, pres.; J. H. Miller, v. p.; J. E. Adams, sec.-treas.; Allen Rives, asst. sec.-asst. treas., and Wm. Watters, directors.

Inc. May, 1919, as a reorganization of the Mineral County Gold Mines & Milling Co. Cap. \$150,000; 10c par.

Property: 2 miles W. of Simon mine, in Bell district, Mineral county, shows a 2 to 4' vein at contact of andesite and lava. Ore is calcite or quartz carrying \$7.50 in gold.

Development: by 200' tunnel and 100' incline shaft. Produced \$4,400 when first opened in 1912, using a crude cyanide plant. Reported in 1921 that mine was to be again operated.

MINA GOLD MINING EXTENSION CO. NEVADA

Same office and directorate as Mina Gold Mines Co. whose property it adjoins.

MINA MERCURY CO. NEVADA

Address: Mina, Nevada.

Property: a quicksilver mine, 15 miles E. of Mina, in Pilot Mtns., Mineral county. Cinnabar ore is said to run about 10% mercury. Four "D" type retorts were installed in 1921, having a capacity of 6,000 tons of ore to produce 4 flasks of quicksilver per day.

MINA REWARD GOLD & SILVER MNG. CO. NEVADA

Address: 223 N. Virginia St., Reno, Nev.

Inc. June 5, 1919, in Nevada, by T. R. Hofer, L. T. Booth, J. J. Rositer, V. S. Andrus, and A. B. Gudmendsen.

Cap. \$150,000; 10c par.

MINERAL BELL MINING CO. NEVADA

Office: 318 Clay Peters Bldg., Reno and Mina, Nev.

Officers: L. Little, pres.; with W. G. Adams, Albert A. Baroni and Tom Sharpe, directors. A. N. Salisbury, sec.-treas.; F. B. House, mgr.

Inc. May 3, 1919, in Nevada. Cap. \$150,000; 10c par; 110,000 shares issued. Annual meeting, first Monday in May.

Property: 11 claims, 200 acres, in Simon (or Bell) mining district, near Mina, Mineral county. Ore: occurs as a contact deposit in lime and rhyolite, said to average \$16-\$18 in lead, silver, gold.

Equipment: burned in 1919, has been replaced, but development work was suspended April, 1920.

MINERAL HILL CONSOLIDATED MINES CO. NEVADA

Mail returned from Mineral Hill, Nev. President's address: Montgomery, Ala.

Officers: Frank Stollenwerck, pres.; S. F. Stollenwerck, v. p.; Daniel Pratt, sec.; J. S. Wilcox, treas, at last accounts.

Inc. 1906, in Arizona. **Cap.** \$1,000,000; \$1 par; 713,000 issued; \$100,000 6% bonds authorized; issued, \$2,500.

Property: 11 claims, 3 patented 135 acres, in Mineral Hill district, Eureka county, Mine discovered 1869 was worked from 1871 to 1887, when it was closed because of the drop in silver; re-opened in 1906. Production of early days estimated to have been \$6,000,000, practically all silver.

Geology: ore occurs in fracture zones, along strike faults in blue dolomitic limestone and carbonaceous shale. Ore carries silver, which occurs as argentite, with some gray copper, galena and gold. There is about 2,000' of underground development. Samples of over 4,000 tons varied from 3.8 to 177 oz. silver and 0.5% to 0.7% lead, averaging 53.5 oz. silver and 0.04 oz. gold.

Was producing in 1919; 6 additional claims were to be patented in 1921

MINERAL ZONE DIVIDE MINING CO. NEVADA

Office: Tonopah, Nev.

Officers: R. M. Hampton, pres.; Bert Allen, v. p.; V. M. Place, sec.-treas., with Henry Hanson, T. F. Bannigan, and H. H. Hill, directors.

Inc. April, 1919, in Nevada. **Cap.** \$150,000; shares 10c par.

Property: 6 claims, 1¼ miles S. of Goldsmith Divide and over 4 miles S. E. of Gold Mountain.

MINERVA TUNGSTEN CORPORATION NEVADA

Office: 330 Investment Bldg., Los Angeles, Cal., and Pioche, Nev.

Officers: Bryant Mathews, pres.; J. B. Van Winkle, v. p.; O. Werner, sec.-treas., with K. G. Gillette, A. M. Chase, and O. A. Knox, mgr., directors.

Inc. 1918, in Nevada. **Cap.** \$350,000; par \$1; 250,000 issued.

Property: 17 claims, 340 acres, in Minerva district, White Pine county, 55 miles S. E. of Ely and 77 miles N. of Pioche.

Examined by F. L. Hess, F. B. Weeks, E. R. Pembroke, J. B. Winwood, J. Nelson Nevius, S. R. Porter, O. A. Knox and M. van Sicklin.

Geology: scheelite ore occurs in a quartz vein in limestone, dipping 55°, with E. W. course and 9 to 50' wide. Shoots are up to 750' long. Ore carries 1 to 4% tungstic acid.

Development: by 100' shaft and tunnels 200 to 350' long. Greatest depth is 150'. Workings amount to 3,000'.

Ore blocked out is estimated at 25,000 tons, with 100,000 tons probable.

Equipment: gas engines, compressor, drills, 3½-mile pipe-line for water, 150-ton gravity concentrating mill, camp for 50 men, auto-trucks, etc.

Not operating, 1919-20.

MINES DEVELOPMENT CO. OF NEVADA NEVADA

Idle for several years past.

Address: Lovelocks, Humboldt county, Nev.

Officers: John T. Reid, pres., treas. and gen. mgr.; Paul G. Reid, v. p., sec. and supt., with R. C. Moore, J. Theis, Peter Anker and W. H. Rawlis, directors.

Inc. Sept. 1, 1904, in Arizona. **Cap.** \$750,000; \$1 par; issued, \$454,000.

Property: 5 claims, 100 acres, in the Juniper Mountain district, said to show various fissure veins along side of quartz porphyry dikes, intrusive in monzonite. Veins run N. 20° W. and are nearly vertical. The vein developed averages 5' wide, is traceable for 2,000' and proven to 170' depth. Small seams of ore found at or near surface show chalcocite, bornite and tetrahedrite, giving average assays of 2% copper, 5 oz. silver and \$1 gold per ton.

Development: by a 500' tunnel.

Company also has some claims under option in the Table Mountain district, Churchill county. Two cars of sorted ore are said to have returned

22 and 26% copper. Mine is remote from rail and only assessment work was done.

Company owns 60,000 shares of the **Buffalo Valley Mines Co.**, which see.

MINES SELECTION CO.

NEVADA-MEXICO

Office: Room 724, 25 Broad St., New York.

Directors: C. L. Despard, W. J. Loring, Fredrick G. Corning and Geo. B. Hutchings, sec.-treas.

Cap. \$300,000; 10c. par.

According to a circular letter, June 15, 1920, sent by Weir Bros. & Co., New York brokers, to stockholders of **Toggerly Divide Mng Co.** and **Gibraltar Silver Mines Co.**, the M. S. Co., is solely a holding and development company organized to take over outstanding shares of the two Nevada companies, 1,300,000 and 1,200,000, respectively, on a share for share exchange basis, plus fee of 3c. per share. The same offer was made on July 7, 1920, to stockholders of the **Nevada Honey Bee Mines Co.**

The letter of June 15, announces also that option on 2/3 control of La Perla Mng. Co. "is to be taken over", but in July, 1921, reported that negotiations are being held in abeyance pending stabilization of the Mexican situation. La Perla mine is advertised as offering a fair chance to recoup losses sustained in Toggerly and Gibraltar.

Company will ultimately take over also the **Orizaba Mng. & Dev. Co.**, now under the control of the **Diamondfield Black Butte Reorg. Mng. Co.**

See all of these properties under individual titles.

MINNESOTA-NEVADA COPPER MINES CO.

NEVADA

Formerly the **Wabuska Copper Mines Co.**

Address: Otto Taubert, Yerington, Nev.

Inc. in Nevada. **Cap.** \$3,000,000; \$1 par.

Property: 600 acres in Douglas county and 160 acres in Lyon county, near Wabuska. The Minnesota group is said to show a contact deposit between limestone and granite of about 20' average width, carrying sulphide ore.

Development: by 2 shafts, 1 of about 500' depth, showing ore said to average better than 3% in copper tenor. Reported that company is developing a large iron-ore deposit. Surveys completed for driving a half-mile drainage and transpiration tunnel.

MINNESOTA NEVADA INVESTMENT CO.

NEVADA

Address: Fairview, via Fallon, Churchill Co., Nev.

Officers: Alf. Patterson, pres.; O. S. Deringer, sec.; M. P. Ryan, treas.; A. A. Day, gen. mgr.; Chas. A. Peet, mgr. engr.

Inc. Aug. 6, 1906, in Oklahoma. **Cap.** \$1,000,000; \$1 par; issued 690,000. Annual meeting, Aug. 6.

Property: 28 claims and 160 acres placer ground, total about 700 acres, on Chalk mountain, 3½ miles N. of Fairview. Claims said to show several orebodies, of which 3 are 6' average width and proven to depth of 126', showing 2% copper, 32% lead, 26 oz. silver and \$8 to \$20 gold per ton.

Development: by 3 shafts, deepest 126'. Company succeeded to the property of the **Corinthian Mining Co.** and **Chalk Mountain Copper Co.** Idle several years.

MIZPAH DIVIDE MINING CO.

NEVADA

Office: Tonopah, Nev.

Officers: J. H. Miller, pres.; F. M. Manson, v. p.; J. E. Adams, sec.-treas., with J. G. Kirchen, P. H. O'Neill, and Allen Rives, directors.

Inc. March, 1919, in Nevada. **Cap.** \$150,000; 10c par; assessable.

Property: 9 claims, 4,500' N. E. of Gold mountain. Has breccia exposures and rhyolite dikes, with N. E. fissures that are to be opened on Boston & Mizpah claims. **Development:** by shaft, machinery erected August, 1919.

MIZPAH EXTENSION CO. OF TONOPAH

NEVADA

Offices: 1513 Walnut St., Philadelphia, Pa., and Tonopah, Nev.

Officers: C. E. Knox, pres.; Lambert Ott, v. p.; C. F. Griffith, sec.; W. P. M. Braun, treas., with J. F. Braun, H. W. Davis, and M. B. Cutter, directors.

Inc. in Delaware. **Cap.** 2,000,000 shares; 1,702,092 issued. Listed on San Francisco and Salt Lake City Exchanges; traded in on New York Curb. Expenses for 1920 were \$2,170 and cash balance Dec. 31, \$1,223.

Property: 24 claims at Tonopah, adjoining the Tonopah Mining and Tonopah Belmont properties on the N. E. Mine under lease to Halifax-Tonopah Mining Co. (q. v.) **Ore:** silver. For geology see U. S. G. S. Prof. Paper 42, Geology of the Tonopah Mining District, by J. E. Spurr.

Development: 1,000' shaft, with a winze from the 1,000' to the 1,340' level. The West End Cons. Mng. Co., which see, controls operations in the Halifax and thus is also the operating company for Mizpah Ext.

MOGUL MINING CO.

NEVADA

Dead. See same title under North Carolina. **Inc.** Oct. 11, 1916, in Delaware. **Cap.** \$1,000,000; \$1 par; 932,500 shares issued. Was listed on New York Curb as a prospect in 1917, and the shares skyrocketed by rank manipulation.

Property: in the Rawhide camp, was sold by the sheriff for debt in 1918, and bid in by former president, Alexander S. Proskey, who organized the Seminole-Regent Mining Co., which see.

MOHAWK DIVIDE MINING CO.

NEVADA

Office: Tonopah, Nev.

Officers: J. H. Miller, pres.; William Watters, v. p.; J. E. Adams, sec.-treas., with A. G. Raycraft and B. F. Baker, directors.

Inc. March, 1919, in Nevada. **Cap.** \$150,000; 10c par; assessable; 750,000 outstanding. Listed on San Francisco Stock Exchange. Transfer office, Tonopah, Nev.

Property: the Stewart group of 4 claims and 2 fractions, 100 acres, N. E. of Divide Consolidated and 3,000' N. of Tonopah Divide. Promising veins outcrop on property.

Equipment: 40-h. p. electric hoist, etc.

Idle.

MONARCH DIVIDE MINING CO.

NEVADA

Mail returned from Tonopah, Nev.

Inc. 1919, in Nevada. **Cap.** \$150,000; shares 10c par.

Property: a group of claims (Sunbeam and others) 2½ miles north of the Tonopah Divide.

MONARCH PITTSBURG MINING CO.

NEVADA

Address: P. O. Box 11, Tonopah, Nev.

Officers: H. C. Brougher, pres.-gen. mgr., 6150 Harwood St., Oakland, Calif.; W. J. Douglass and C. C. Boak, v. p.'s.; E. J. Erickson, sec.-treas.-res. agt.; with E. W. Blair, directors. S. C. Mitchell, asst. sec.-astt.-treas.; John R. Jones, su. t.

Inc. in Nevada. **Cap.** \$1,500,000; \$1 par; fully paid; assessable; assessment No. 16 of 1c per share levied Sept. 21, 1921; total assessments to this date, 16c. Stock transfers made at company's office Tonopah Banking Corp., registrar. Stock listed on San Francisco Stock Exchange. Annual meeting, Jan. 15, 1921.

Balance sheet for 1920 shows: assets, \$1,699,152, of which property is \$1,517,237; plant, \$8,600; treas. stock, \$90,159; and cash \$31. Liabilities include assessments, \$199,078. Surplus account shows a deficit of \$82,163. Operating expenses for 1920 were \$29,029, of which labor was \$15,423.

Property: 3 patented claims at Tonopah, adjoining Tonopah Extension on south and west. Claims show veins with silver ore.

Development: by vertical shaft, 1,100' deep. Geological conditions were so extremely favorable that it was decided to prospect in the extreme western ground; also north of the shaft. Highly silicified West End rhyolite was in the 1,003' drift and soon a typical Extension breccia was cut. Work along the contact for 180' disclosed a vein 43' wide of low value. Work in

1919-20 was confined to the 600' level in an endeavor to find the rhyolite-trachyte contact with the possibility of uncovering the extension of the Ohic vein; total advance, 1,053' in 1919, and 1,291' in 1920. Developments have apparently not been encouraging.

MONITOR-BELMONT MINING CO.

NEVADA

Mail returned from Belmont, Nev.

Officers: G. A. Nelson, pres.; Hugh W. Nelson, sec.-treas.

Property: 33 claims in Belmont district, 51 miles from Tonopah. District first opened in 1864 and yielded over \$15,000,000 of silver to 1885. Mines were then closed until 1906, but it took 8 years to secure title to the present holdings. A mill was erected in 1915 and started treating old dumps in 1916, but closed down in 1917.

Geology: quartz veins and lenses occur in slate and limestone, near their contact with intrusive silicious granite. Intruded rocks have been altered to mica schists and jasperoid, the minerals occurring in the quartz as bunches. Ore is chiefly an argentiferous, antimonial copper ore, with lead and silver chloride, etc.

Development: by three 500' shafts, drifts and crosscuts.

Equipment: hoist, compressor and 120-ton mill, including ten 1,600-lb. stamp with flotation plant.

The mine was under one year lease from August 1, 1918, to the Nevada Wonder Mng. Co., which see. To March 1, 1919, \$85,644 had been expended and further work was done until September, when the lease was relinquished. From reliable information received, we understand that this old mine is not worth further investigation.

MONTANA-TONOPAH MINING CO.

NEVADA

Tonopah, Nev.

Officers: Chas. E. Knox, pres., 300 First Nat'l Bank Bldg., San Francisco; Henry D. Moore, v. p.; M. E. Albert, sec.-treas., with Hugh H. Brown, E. A. Keenan, J. H. Evans, J. M. Wynn and Thos. J. Lynch, directors.

Inc. in Utah, in 1912, re-incorporated Jan. 31, 1912, in Delaware. **Cap.** \$1,000,000; \$1 par; outstanding, 998,942. Listed on San Francisco Exchange. Annual report for year ending December 31, 1920, shows: receipts, \$121,307; disbursements, \$142,108; cash \$15,824.

Dividends: paid to April, 1914, total \$530,000; none since.

Property: 15 claims, about 190 acres, traversed by the Mizpah fault and showing silver ore. In 1916, the greater part of claims were deeded to the After-All Mines Co.

Development: 865' shaft and over 15 miles of workings. Mine was closed down and the 40-stamp mill ceased operating in 1914, due to exhaustion of ore reserves and low price of silver. Since then a number of lessees have been working in the mine, apparently with success. During 1918 a vein 4 to 7' wide was opened up on the Petrovich lease, running from \$250 to \$1,000 per ton, shipments averaging \$400 per ton; production continued through 1919.

Company is one of the oldest in the Tonopah district, and has had a checkered career. In spring of 1921, the property was reported leased to the Gypsy Queen Mng. Co., adjoining on the east.

MONTANA YERINGTON COPPER CO.

NEVADA

Yerington, Lyon county, Nev.

Property: a group of claims said to show orebodies in porphyry with 4-7% copper, unlike other Yerington deposits.

Development: by 420' shaft showing chalcopyrite ore at bottom. The 160' level east was run 500' to daylight, making a main working tunnel. Crosscut on 400' level said to encounter ledge 6-7' thick, showing shipping ore in face. Under option to Geo. Wingfield, in 1913, and Mason Valley Mines Co., in 1914, but was relinquished. Messrs. Archer, Ehrman and Kremmel controlled the company at last accounts.

Output in 1916 was 2,050 tons of 6% ore. Operated by lessees in 1917-18.

MONTE CRISTO MINES CO.**NEVADA**

Inc. 1919, to take over holdings of Chas. Butters Co., Ltd., London.
Property: 700 acres and a millsite in Storey county, near Virginia City.

MONTEZUMA SILVER MINES CORPORATION**NEVADA**

Office: Goldfield, Nevada.

Officers: H. B. Nedham, pres.; J. G. Thompson, v. p.-res. agt.; Joseph Hoover, sec.; Robert Dixon, treas.; Duncan Cameron, asst. treas.; E. S. Giles, mine mgr.

Inc. Oct. 5, 1917, in Nevada. **Cap.** \$1,000,000; par \$1; about 150,000 in treasury.

Property: 9 patented claims, 178 acres, in the Montezuma district, Esmeralda county, about 16 miles S. W. of Goldfield (nearest rail point), and 30 miles S. W. of Tonopah. Properties were operated as individual mines and produced heavily 40 years ago, the ore being hauled by mule teams 200 miles to Austin for smelter treatment.

Of these old mines, the present company is opening the Arizona, Caracas and Bullion. The claims are traversed by 10 veins, 1' to 10' wide, in limestone or at contact of quartz-monzonite porphyry and limestone; the ores, from \$10 a ton up carry silver, lead, copper and gold; value is largely in silver.

Development: prior to resumption of operations by the present company in 1917, 9,000' of development had been performed, the 300' Bullion shaft being the deepest; dumps are said to contain many thousands of tons of milling ore. A new shaft sunk on the Arizona to depth of 400' (July, 1920), is to be continued to 800', and a 200' shaft on the Caracas is being reopened. A small amount of high grade ore was shipped from the Arizona in 1919 and 1920.

MONTGOMERY-SHOSHONE CONS. MINING CO.**NEVADA**

Address: W. G. Benham, asst. sec., 30 Church St., New York City.

A holding company with subsidiaries at one time operating in Bullfrog district, Nye county, all activities suspended March, 1911. Annual statement showed cash on hand. Dec. 31, 1920, of \$180.

MORNING GLORY DIVIDE MINING CO.**NEVADA**

Mail returned from only known address: no information available except that company was incorporated.

MORRILL SILVER MINING CO.**NEVADA**

See Silver Cons. Mines Co.

MORRIS SYNDICATE MINES**NEVADA**

Address: W. C. Losey, Paulsen Bldg., Spokane, Wash.

Property: 6 claims, 23 miles N. E. of Mina, Mineral county, and near the Olympic Mines Co.'s property, a producer.

Geology: shoots 2 to 20' wide reported to occur in contact vein in rhyolite and andesite. Ore said to assay \$30 gold per ton. Developed by 60' shaft.

MT. VERNON M. & M. CO.**NEVADA**

Address: G. A. Bice, pres., Box 166, Sparks, Nev. T. K. Byers, v. p.; S. O. Trescott, sec.-treas., Box 121, Reno, Nev.

Property: 6 claims at Tokop, an old camp with a production record, 30 miles S. of Goldfield, 8 miles E. of Hornsilver, Esmeralda county, and 9 miles from the T. & T. railroad. An 8' quartz vein, carrying at the surface \$30 in gold and 3 oz. silver, has been reopened.

In 1920, company acquired 3 claims in Peavine district, Washoe county, N. of Black Panther Mng. Co. and 4 miles from Reno.

MUNCY CREEK MINING CO.**NEVADA**

Offices: Judge Bldg., Salt Lake City, Utah, and Aurum, Nev.

Officers: C. D. Ray, pres.; S. A. Greenwood, sec., with Jos. Crosby, directors. H. L. Parker, gen. mgr.

Property: 23 claims, a millsite and the Muncy Creek ranch at Aurum, White Pine county.

Ore: in the Grand Deposit mine the main vein shows carbonate zinc ore on the footwall and lead-silver ore on the hanging, with an intervening lens of copper sulphide. Ten known oreshots are claimed to have sampled 6% copper, 8 oz. silver, and 10-60% lead.

Development: by 240' Grand Deposit incline shaft. **Equipment:** includes 25-ton mill, calcining plant, hoist, office and other buildings.

In 1920, company brought suit against claim jumpers, to quiet title, and was successful. Reported that ore reserves amount to 43,000 tons, assaying 5% copper, 10% lead and 4 oz. silver, also 50,000 tons of zinc carbonates; exploitation of latter is contemplated.

MUTUAL DIVIDE MINING CO.

NEVADA

Presumably defunct. Equipment sold to Knox Divide in 1921.

Inc. 1919, in Nevada. **Cap.** \$150,000; 10c par. Security Transfer & Registrar Co., New York, transfer agt.

Property: a group of 5 claims $2\frac{1}{2}$ miles S. of the Tonopah Divide. Was equipped with hoist, etc.

The reputation of this company depends more upon its unenviable record on the Curb rather than its "priceless holdings" in the Divide district. Early in 1920, company was reorganized and became the "Mutual Divide of Massachusetts, Trustees", with alleged holdings of valuable Texas and Indiana oil lands. Gushers were reported and stock was so manipulated that shares of 10c par were selling at \$1-\$2. Geo. L. Ware & Co., a Boston brokerage firm, was the evil genius in this case; the head of the firm was arrested and indicted by the Federal grand jury in October on the charge of misusing the mails in a scheme to defraud, among other things, defaulting on the payment of promised dividends; he was convicted in February 1921.

MYRA DIVIDE MINING CO.

NEVADA

Addresses: 265 Russ Bldg., San Francisco, and c/o A. E. Lowe, res. agt., Tonopah, Nev.

Officers: L. E. Browne, pres.-mgr.; Hermann Zadig, v. p.; Chas. D. Olney, sec., with Edw. S. Van Dyck, E. P. Baker and A. E. Lowe, directors.

Inc. May 3, 1919, in Nevada. **Cap.** \$150,000; 10c par; 750,000 treasury shares. Listed on San Francisco Stock Exchange.

Property: the Shoveler group, 4 claims, 70 acres, purchased in June, 1919, over 3 miles slightly S. E. of Gold Mountain.

In spring of 1920, acquired Good Luck group, 4 claims, adjoining the Silver Reef, in Unionville district, Pershing county. Said to show 1,500' of the Stewart vein (exploited in earlier days) with 3 ore shoots, carrying 20 oz. silver ore; vein width, 2'-10'. Reported to have been transferred to company by the directors without cost to it.

Development: at Divide, by shaft down 200' in 1919. Cut bunches of ore at 16', but is bottomed in andesite. Crosscutting on the 200' level said to show good mineralization. Equipped with hoist.

Old workings on Good Luck total 1,000', largely tunnels; extension of old tunnels to give a 400' back is now in progress. A small amount of ore has been shipped to nearby mill of the Arizona Silver Mines.

NATIONAL DIVIDE MINING CO.

NEVADA

Office: 312 Clay Peters Bldg., Reno, Nev.

Officers: L. H. Bartholomew, pres.; A. G. Miller, v. p.; A. A. Smith, sec.-treas., with S. Mazingo and H. D. Danforth, directors.

Inc. in Nevada. **Cap.** \$150,000; shares 10c par.

Property: 5 claims, nearly $3\frac{3}{4}$ miles S. E. of Gold Mountain, said to show a strong outcrop. Examined by P. R. Whytock.

NATIONAL LEASING CO.

NEVADA

A George Graham Rice promotion which went the way of all things human.

Inc. 1917, in Delaware. Cap. \$2,000,000; \$1 par.

Company had a 5-year lease on property of the Charleston Hill Gold Mining Co., at National, Nev. It was claimed that the gold-bearing vein of the National Mines Co. continued through the National Leasing claims for at least 700', and that a 3,000' tunnel already driven was near the vein. George Graham Rice underwrote 1,000,000 treasury shares and guaranteed to provide \$5,000 per month for development, accepting stock therefore at 15c. per share, less 5%. This money was considered sufficient to do 10,000' of work in 2 years. Only about \$40,000 was actually expended on the property by Rice.

In February, 1918, the Leasing company was unable to meet payments and the lease was forfeited. An attempt was made to reorganize and an option obtained on Las Palmas silver-lead mine at Sonora, Mexico, near the Lampazos Silver property, another promotion under the same management that is now defunct.

Apropos of the stock flotation by another "National Leasing Co." alleged to hold Texas oil and gas leases, the *New York Curb*, under date of Oct. 23, 1920, refers to the defunct Rice project in the following words: "Though the memory of most investors is not very long, the painful memories connected with the fleecing of the public with this original National Leasing Co. will be long enough to keep it clear of any and all new enterprises bearing the same title."

NATIONAL MINES CO.

NEVADA

Office: 1025 Peoples Gas Bldg., Chicago, Ill. Mine office: National, Humboldt county, Nev.

Officers: F. G. Fabian, pres.; L. G. Campbell, v. p.; C. W. Buckley, sec.; E. A. Bern, treas.; H. L. Hollis, cons. engr.

Inc. in Wyoming. Cap. \$1,000,000; \$1 par; 923,558 shares outstanding.

Property: 6 patented claims and a fraction at National, Humboldt county, shows gold-silver ore in quartz fissure veins, traversing a rhyolite-andesite formation. Orebody runs N.-S. and dips 45-70° W. Geology and vein system fully described in U. S. G. S. Bull. 601.

Development: by 10 adits from 150' to 2,500' in length and 3 shafts, 450', 350' and 800' deep. Underground workings total about 7 miles.

Equipment: includes 2 electric hoists, aerial tram, 100-ton mill for amalgamation and concentration of ore. Mill treated 4,463 tons of ore in 1912; 47 tons in 1913; 2,763 tons in 1914; 18,622 tons in 1915; a total production of 36,000 tons, or \$6,000,000, mainly from the National gold shoot, intercepted at depth of 40' below the surface and which averaged \$20-\$30 to the pound.

In June 1917 a lease on company's plant was given the National Leasing Co. to enable it to explore the ground through the National Mines. Payments were not met, and the company recovered its holdings with the aid of a sheriff in February, 1918. Since then operations have been continued by several sets of lessees in a small way, and small shipments of rich ore reported being made.

NATIONAL NEVADA MINING CO.

NEVADA

Address: T. J. Defenbaugh, supt., National, Nev.

Property: lies north of the National mines, Humboldt county, developed by tunnel 800' long in August, 1921.

NATIONAL TREASURE MINES CO.

NEVADA

Office: Boston Bldg., Salt Lake City, Utah. Mine office: National, Nev.

Officers: J. G. McAllister, pres.; Judge H. H. Henderson, v. p.; Dr. L. G. Wheeler, sec.; Robt. Noyes, treas., with John Pingree and Daniel Alexander, directors.

Property: 4 claims to the south of the National mine at National, Humboldt county, developed by 800' tunnel, said to show gold and silver ore in andesite.

NELSON GROUP**NEVADA****Address:** Mountain City, Nev.

Property: in Centennial district, Elko county, 1¼ miles from Mountain City, shows fissure veins, including the Standard, 1 to 3' wide, in granodiorite and limestone. The ore is quartz with sulphides of lead, zinc and copper, carrying good values in silver and gold. Developed by 2 adit levels, 100' apart vertically, with 4,000' total workings. Equipped with 9-stamp mill. Apparently active, 1919-'20.

NENZEL CROWN POINT MINING CO.**NEVADA****Office:** 704 Market St., San Francisco, Calif.

Described in Vol. XIII. Contemplated merger with Rochester Nevada Silver Mines Co. (q. v.) did not become effective. Became bankrupt, November, 1920, and was sold out to satisfy bonded indebtedness. Rochester Silver Corp. (successor to Nevada Silver Mines Co.) owns 1,222,980 shares of 1,720,800 outstanding.

NENZEL DIVIDE MINING CO.**NEVADA****Address:** S. O. Trescott, Box 121, Reno, Nev.

Officers: J. F. Nenzel, pres.; Abraham Wise, v. p.; S. O. Trescott, sec-treas., with J. J. Murphy and S. N. Snyder, directors. J. C. Huntington, cons. eng.

Inc. May, 1919, in Nevada. Cap. \$150,000; shares 10c par.

Property: Tom Boy 1 and 2, Eldorado 1 and 2, and Cresson 1, 2, 3, and 4 claims, S. E. of the Tonopah Divide and S. of the Rosetta. Surface prospects considered good. Company also owns some claims over 3 miles N. E. of Gold Mountain.

NEVADA & BOSTON COPPER CO.**NEVADA****Address:** care H. B. Lind, Mina, Nev.

Owms all the outstanding stock of the **Iroquois Copper Co.** (q. v.) which has title to a copper property in Santa Fe district, Mineral county.

Inc. in Wyoming. Cap. \$2,500,000; par \$1: 1,000,000 shares issued and held intact by three stockholders; 10,000 sold; 1,490,000 in treasury.

NEVADA AUSTIN MINES CO.**NEVADA****Defunct. Address:** W. C. Pitt, Lovelocks, Nev.

Property: a 100-ton cyanide plant at New Pass, 27 miles W. of Austin, Lander county, sold February, 1919, to satisfy a \$30,000 mortgage held by the president, W. C. Pitt.

NEVADA BELLEVUE COPPER CO.**NEVADA****Address:** Contact, Nev.

Property: in the Contact district, Elko county. Oxidized copper-gold-silver ore was shipped in 1918-1919. Apparently active in 1920-'21 also.

NEVADA BIRCH CREEK MINING CO.**NEVADA****Office:** Austin, Nev.**Officers:** J. F. Bowler, pres. and G. L. Belanger, sec-treas.**Inc. Oct., 1919, in Nevada. Cap. 1,500,000 shares.**

Property: 8 claims in Birch Creek district, Lander county, 12 miles S. of Austin. The surface shows a wide contact vein between granodiorite and limestone; the ores assay \$3-\$10 in gold. The ground is being developed by 2 tunnels, 210' and 605' (April, 1921), with intention of erecting mill when sufficient ore is blocked out.

NEVADA BLACK HAWK SILVER MINING CO.**NEVADA****Office:** 232 North Virginia St., Reno, Nevada.

Officers: C. E. Flagg, pres.; Chas. G. Sadlier, v. p.; A. D. Bird, sec-treas.; O. W. Whiting, E. M. and H. M. Hamlin, directors.

Inc. July, 1919, in Nevada. Cap. \$75,000; par 5c; 750,000 shares of promotion stock outstanding.

Property: consists of 6 claims, viz: Black Hawk, Gray Hound, Glance, Glance No. 1, Hamlin No. 1 and 2 with all claims joining. The Black Hawk claim was worked in the 70's and early 80's, and has produced over \$250,000 in silver, lead, and gold. All of these claims have large outcrops,

and samples run as high as \$250 to \$300 per ton. The property is in Silver Star district, Mineral county, adjoining the Endowment mine on the S. and the Silver Gulch Mining Co. on the S. E., 2 miles north of Marietta and 17 miles S. W. of Mina.

Development: by 200' of shaft and tunnel work; 500' of tunnel will crosscut the Black Hawk vein, and Hamlin vein at a depth of 300'.

Assessment work only performed in 1920.

NEVADA BONANZA COPPER CO.

NEVADA

Main office: 159 S. Main St., Salt Lake City, Utah. Mine at Morning-Star City, Lyon county, Nev.

Officers: Freeman Morningstar, pres. and gen. mgr.; Sereno B. Tuttle, v. p.; Walter C. Tuttle, asst. sec.-asst. treas., with Robt. J. Deighton, H. P. Clark, W. D. Mathis, Thos. J. N. Nippur, M. S. Woolley and P. L. Williams, directors.

Inc. 1906. **Cap.** \$2,100,000; \$1 par; 1,448,000 issued.

Property: 12 claims, 7 patented, 250 acres, adjoining the Nevada Douglas, about a third of a mile from Ludwig, on Nevada Copper Belt railroad, in the Yerington district. Three fissure veins are said to cross the property; the Green Dutchman vein being about 5' wide and assaying well in gold and copper. The vein on the Copper King claim has been developed by a 3-compartment, 115' shaft, said to show copper ore its entire depth. No record of recent operations obtainable.

NEVADA-BULLION MINES CO.

NEVADA

Mine near Bullion, Elko county, Nev. Company often called the Bullion-Nevada Mines Co., owns a group of claims adjoining the Nevada-Bunker Hill Mining Co. holdings on the N., and a half interest in the Kerr & Peterson lease on that company's ground.

Development: by a 1,980' tunnel, which will be extended 200' further to cut the vein opened in old mine workings. Lessees were shipping ore, 1916, but property is now tied up in litigation.

NEVADA BUNKER HILL MINING CO.

NEVADA

Address: Box 477, Elko, Nev. Mines at Bullion, Nev.

Officers: J. A. McBride, pres.; W. W. Booher, v. p.; Frederick Davis, sec.-mgr.; John Henderson, treas., with O. T. Williams, S. E. Davis, and G. S. Brown, directors. S. E. Davis, supt.

Inc. April 28, 1905, in Nevada. **Cap.** \$2,000,000; \$1 par; 800,911 shares in treasury, December, 1920. Annual meeting, first Wednesday in May.

Receipts from all sources for 1920 were \$3,965, all expended during year; total outlay has been \$90,000. Including \$600,000 for developed ore, the assets, Jan. 1, 1920, were \$2,095,000; liabilities show \$25,000 accounts payable.

Property: 22 claims, 6 patented, including the Bullion, 320 acres, in Railroad district, Elko county, 28 miles S. W. of Elko. Claims said to show copper-silver ore in porphyry contacts, silicious copper ore in porphyry intrusions, and silver-lead ore in limestone. Property has been reported on by Chas. E. Van Barneveld, H. L. Huston, and by Chas. H. White of Harvard University.

Company has also a bond and lease on the patented Standing Elk, Hoffman and Cleveland mines.

Development: by numerous tunnels and shafts and a deep tunnel 3,410' long, to tap veins at a depth of 500 to 800' below deepest workings, 150' further work expected to bring it to the Tripoli and 600 to 800' further to the Standing Elk fissure. Workings total about 3 miles.

Production: by lessees from workings 800' above main tunnel; prior to 1914, 3,657 tons of ore; 1914 to end of 1919, 8,349 tons of a gross value of \$286,469.

In order to provide funds for further development work, stockholders were asked to return a portion of their holdings into the company treasury or pay 10c. a share assessment before October 1, 1919, but, according to the

1920 annual report, a contract has been made for sale of 200,000 treasury shares for this purpose.

NEVADA-BUTTE MINING CO.**NEVADA**

Probably dead. Martin Benson, pres., at last accounts.

Inc. 1913. Cap. \$1,000,000; shares 25c par.

Property: 15 claims in Dolly Varden and Mizpah districts, Elko county, 75 miles from Ely, said to be on the northern end of a great belt of mineralized porphyry and to carry fissure and contact deposits.

Development: by several shallow shafts, shows mineralization, but property still in prospect stage. Drilling on neighboring areas reported to have shown commercially mineralized porphyry.

NEVADA-CALUMET COPPER CO.**NEVADA**

W. H. Bray, mgr.; F. D. Nowell, pres.; J. A. Beck, v. p.-sec., at last accounts.

Inc. 1913.

Property: the Boyd-Martin group, 30 claims, in heart of the monzonite-porphyry belt of Battle mountain, Lander county, shows copper-stained patches thought to represent the outcrop of a big disseminated glance deposit.

NEVADA-CALUMET COPPER MINING CO.**NEVADA**

Out of business. See Nevada Calumet Mine.

NEVADA-CALUMET MINE**NEVADA**

Address: John L. Washing, 868 Park Ave., Bridgeport, Conn.

Property: 17 claims, patented, 340 acres, 4 miles N. E. of Buckskin and 8 miles N. W. of Yerington, formerly owned by Nevada-Calumet Copper Mng. Co. Property shows diorite porphyry and silicious limestone, and has 3 contact deposits, 3-4' wide, showing cuprite, malachite, azurite, chalcocite, and chalcopryrite, giving assays of 2-4% copper. Reported on by T. M. Hammond and Arthur Prell.

Development: by 2 main shafts, 1,200' apart, No. 2 on the Yellow Metal claims, 60' deep, shows 9' of 2.75% ore. About 300' of work on 400' level, and 225' of laterals on the 500' level, show small bunches and stringers of orc, in a leached zone, with fair indications of workable values at greater depth.

Equipment: includes two 25-h. p. gasoline hoists.

Idle since 1917.

NEVADA CENTRAL COPPER CO.**NEVADA**

Went out of business, January, 1916. Property near Cedar Eureka county, deeded to Mrs G. W. Leighton, who has leased it to local people. For description see Vol. XII.

NEVADA CENTRAL MINES CO.**NEVADA**

Address: Tonopah, Nev. W. H. Knowles, agt.

Inc. in Nevada by a syndicate of San Francisco men.

Property: 9 claims in Hannapah district, Nye county, 20 miles E. of Tonopah, being developed by tunnel to give a 200' back.

NEVADA CHAMPION COPPER CO.**NEVADA**

Inc. 1907, in Arizona. Cap. \$1,500,000; \$5 par. Succeeded 1917 by the Pilot Copper Co., which see.

NEVADA CONSOLIDATED COPPER CO.**NEVADA**

Controlled by Utah Copper Co. through ownership of 1,000,500 Nevada shares.

Office: 25 Broad St., New York. **Operating office:** McGill, White Pine county, Nev. Mine near Ruth, White Pine county, Nev.

Officers: Daniel C. Jackling, pres.; Chas. Hayden, v. p.; W. E. Bennett, v. p.; C. V. Jenkins, sec.-treas., with Stephen Birch, E. A. Guggenheim, Wm. Pierson Hamilton, H. O. Havemeyer, Murray Guggenheim, C. V. Jenkins, J. K. MacGowan, Chas. M. MacNeill, W. Hinkle Smith, R. C. Gemmell and C. B. Lakenan, directors. Arthur J. Ronaghan, asst. sec.

Operating officials: C. B. Lakenan, gen. mgr.; W. S. Larsh, underground supt.; F. E. Grant, shovel-pit supt.; Geo. C. Riser, mill supt.; D. D. Moffatt, cons eng for mills; J. C. Kinnear, smelter supt.

Inc. November 7, 1904, in Maine, as a merger of the Boston & Nevada Copper Co. and White Pine Copper Co. **Cap.** \$10,000,000; \$5 par; \$9,997,285 issued; original cap., \$5,000,000 increased February 5, 1908, to \$8,000,000, and again increased November, 1909, to present figure. A former issue of \$3,000,000 first-mortgage 6% convertible gold bonds, due April, 1918, has been retired. Old Colony Trust Co., Boston, and Guaranty Trust Co., New York, registrars; Boston Safe Deposit & Trust Co., Boston, and D. A. Crockett, 149 Broadway, New York, transfer agents. Shares listed on the New York and Boston stock exchanges. Annual meeting, third Friday in April.

Sales on N. Y. Stock Exchange during 1920 totaled 211,500. The range was 17½ in January and 8 in November. In 1921, the range was 15¼ to 9 for sales totaling 199,900.

*Includes balance from previous year. **Deficit.

An operating loss of \$135,029 is reported for first 6 months of 1921, or a total net deficit of \$285,492, after including shutdown expense and making allowance for outside income.

Dividends: Begun October, 1909, rate 37½c. per share quarterly; paid \$1.50 in 1910 and 1911; \$2 in 1912; \$1.50 in 1913; \$1.12½ in 1914; \$1.50 in 1915; \$6.75 in 1916; \$4.15 in 1917; \$3.25 in 1918; \$1.50 in 1919; \$0.75 in 1920; none in 1921; a grand total of \$46,768,616.

Company absorbed the Cumberland-Ely Copper Co., paying \$7,554,084 cash therefor, August 30, 1910. Shareholders of the Cumberland Ely were given the opportunity of exchanging stock on the basis of 3¼ shares for 1

share Nevada Consolidated. The Nevada Cons. Copper Co. owns all the stock of the Nevada Northern Railway Co., which is capitalized at \$2,000,000. Also owns through purchase and absorption, the physical assets of the Steptoe Valley S. & M. Co., which was dissolved October, 1914.

In February, 1921 company took a 4.45% interest, \$1,780,000 total amount, in the Copper Export Association's \$40,000,000 8% notes.

Property: 106 claims patented, 27 unpatented, in Robinson (Ely) district, White Pine county. Distributed as follows: Copper Flat Group—33 patented claims, covering about 355 acres; 23 unpatented. Ruth Group—57 patented, 705 acres; and 4 unpatented. Veteran Group—14 patented; and 2 outlying patents; also 40 acres for water supply and railroad siding, and 182 acres for dumping overburden. The above does not include acreage occupied by concentrator and smelter, described farther on.

Geology: The geologic features of the property are somewhat similar to those of Morenci, Arizona, and Bingham, Utah. An area of Paleozoic limestones and shales is intruded by a great mass of monzonite porphyry, tilting and breaking the sedimentaries and forcing its way into them in dykes and sills. Alteration of both sedimentaries and monzonite is extensive, and inclusions of great masses of country rock in the intrusive are common.

The main orebodies are found in monzonite porphyry; all of the porphyry area however is not ore bearing. Small bodies of high-grade copper ore are encountered in the sedimentaries near the contact, and occasional occurrences of silver-lead ore are met at some distance from it. These latter are of small importance. In the porphyry, commercial ore occurs at depths varying from 20 to 700' below the surface, and up to 450' thick. Copper occurs as chalcocite, chalcocite coating pyrite, and some chalcopyrite, in seams and disseminated through the mass of porphyry. As the copper content fades out gradually in depth, the bottom limits of pay ore are determined largely by commercial factors. The capping of leached porphyry, is for the most part barren, though there are occasional occurrences of copper carbonates, silicates, oxides, etc., in it. Sufficient carbonate ore was found in the capping of the Copper Flat orebody to supply the smelter with flux. A considerable part of the property is covered with rhyolite, the remains of an extensive lava flow occurring long after the monzonite intrusions. To date, no orebodies have been found in the rhyolite. To the end of 1920, a total of 31,141,633 yards of capping had been removed, leaving 35,842,840 yards in place.

Development: has so far proved the existence of three main orebodies namely: the Copper Flat, Ruth, and Veteran, and several of lesser importance—the Kimbley, Ingersoll, Wedge, and Jupiter.

The Copper Flat, or Eureka orebody the largest and most important, was disclosed in three places known as the Eureka, Liberty, and Hecla pits, and is mined by steam-shovels. These three pits have been consolidated into one. The big pit has roughly the shape of a dumbbell, with the former Eureka and Liberty pits on the east and west end respectively, and the Hecla in the middle. Its longest dimension E.-W. is 4,100' and N.-S. 2,500'. It covers an area of 124 acres and is at its deepest point 250' below the surrounding country. Entrance for trains is had in the northerly part of the Eureka and Liberty ends. These entrances are made from an assembly yard, where ore trains are made up for the Nevada Northern railway which handles them from this point to the smelter, 26 miles distant.

In mining, benches are maintained at about 50' intervals. To loosen up the material ahead of the shovels, 6" holes, placed at proper intervals in the benches, are put down by churn-drills. Nine drills of the No. 5 Keystone type are kept on this work; 1½ in ore, 3½ in waste, and 4 as extras are kept in the pit to minimize the amount of moving. Holes are spaced about 35' apart, 10 or 12' back from the edge of the bank and average 50 to 55'

in depth. They are sprung or chambered by light charges before they receive the blasting charge.

After blasting, the material, ore or waste as the case may be, is loaded into railroad cars by steam-shovels. In this work nine 95-ton Bucyrus shovels, having Vanderhoef 4-cu. yd. dippers, are used. A good general average is 1,200 cu. yd. per steam shovel shift of 10 hours.

Transportation of ore from the pits to the assembly yard, and of waste to the various dumps, is done by 17 saddle-back locomotives, 2 of 85 tons, 2 of 81 tons, 5 of 65 tons, 7 of 45 tons, and one of 35 tons weight. In addition one 56-ton, 6 wheel yard or switch engine is employed in general service. Cars for the transportation of ore from the mines to the mill are furnished by the Nevada Northern railway and are of 55 ton all steel Ingolsby type. There are about 400 of these in service. Overburden is handled with 70 wood and steel dump cars of 18 and 20 yard capacity. Normally, over 10,000 tons of ore and 14,000 yards of overburden are handled daily.

Other pit equipment consists of one 30-ton locomotive type crane, one employes' car used to transport men to and from work; a repair car equipped with tools, compressor, and boiler; ten coaling cars of special design for the shovels; 4 flat cars for transporting drills, casing, etc.; and two powder cars, one a refrigerator used to preserve explosives at the right temperature. Adequate machine, blacksmith, carpenter, engine and car shops with full equipment are maintained.

The Ruth orebody lies about $1\frac{1}{4}$ miles east of the Copper Flat deposit. Here the capping is too deep, from 110 to 540' thick to mine it economically by steam-shovels, hence it is mined by underground methods. The ore zone, roughly oval-shaped, is 1,200 x 1,600' in area, 40 to 310' deep, with an average of 120'.

The Ruth mine is served by two shafts, the Star Pointer—the main working shaft, a 4-compartment vertical, 25'-6"x5'-6" inside dimensions; and the Ingersoll, an incline, 5'x8'-6" inside dimensions. The two shafts are about 2,500' apart, 700' and 550' deep, respectively, and connected on the 500 and 600' levels. To date about $1\frac{1}{4}$ miles of underground workings have been driven, also several thousand feet of churn-drilling.

Ore is mined by the branch-raise caving system, which consists in driving raise series at 25' intervals at right angles to motor haulage-ways. From the branch-raises, finger-raises are put up to open the orebody at $12\frac{1}{2}'$ intervals, both parallel and normal to the direction of the haulage ways. The orebody is undercut at the tops of the finger-raises, caved, and ore drawn off through the fingers and branches to the haulage ways. This method was described by W. S. Larsh in a paper read before the A. I. M. E. of New York, in February, 1918. The advantage of all caving systems is primarily one of cost, but not always of complete extraction of orebodies. In the Ruth mine, where ore-blocks have been completely mined, actual production was 3,747,249 tons of 1.95% copper tenor as against an expected yield of 3,580,757 tons of 2.15% grade.

Late in 1920, an enriched portion of the Ruth orebody, averaging 7% copper, was opened on the 700' level, 50x150x60'; development to define its limits were continued throughout 1921.

Material is moved underground by twelve 10-ton electric mine locomotives of 60 h. p. and 90 h. p., of 250 volt d. c. trolley type. Fifty 88 cu. ft. saddle-back steel cars, holding about 4 tons each are used.

In the Star Pointer shaft, ore is hoisted by a 400 h. p. 550 volt a. c. Nord-

berg hoist in 6 ton self-dumping skips running in balance. The shaft is also equipped with a 200 h. p. geared hoist handling a double deck cage capable of holding 30 men. From the tippie ore is distributed in a 3,000 ton bin by means of chutes, and loaded from the bin into 55-ton railroad cars. A heavy duty hoist and 3,200 cu. ft. compressor were added in 1917. The Ruth mine produced 591,545 tons of 2.195% copper ore in 1916; 991,164 tons of 2.013% in 1917; 1,316,144 tons of 1.87% in 1918; 714,312 tons of 2.04% in 1919; 784,757 tons of 1.76% in 1920. The mine can produce a daily output of 5,000 tons, and the new hoist can handle 6,000 tons from a depth of 600'.

The Ruth is further equipped with two, P. R. E.-2, 3,000 cu. ft. air compressors direct connected to 550 h. p. synchronous motors, 3 phase, 600 cycle, 600 volts. About 80 air drills are in use. Direct current at 250 volts for the underground trolley system is furnished by three 150 h. p. motor-generator sets of the Bullock type. A saw-mill, equipped with timber framing machinery, and handling about a half-million foot, board measure, of timber per month; a blacksmith shop and a small machine-shop are maintained.

Nearly all of the waste, and some of the material for mining is handled through the Ingersoll shaft in a 2-ton capacity skip. Equipment here consists of a 112 h. p., 550 volt a. c. electric hoist.

The **Veteran** mine, taken over from the Cumberland-Ely, west of and adjoining the Consolidated Coppermines Giroux holdings, is not producing, operations at this property having been discontinued indefinitely.

The **Kimbley** orebody has been developed only by churn-drill and the Wedge and Jupiter by underground workings; the latter two are small. No mining is being done at any of these at present.

Ore reserves: extensive churn-drill borings on the Ruth and Eureka have proven a tonnage estimated January 1, 1919, as 68,549,644 tons of ore, averaging 1.57% copper and representing an ore supply of about 17 years, of which about 1/5 is in the Ruth mine. No revision of reserves has been made since.

Comparative Table of Recoverable Developed Ore:

Year ended	Tons	Copper, %	Year ended	Tons	Copper, %
Sept. 30, 1907...	14,432,962	1.97	Dec. 31, 1914...	41,020,296	1.68
Sept. 30, 1908...	20,000,000	1.94	Dec. 31, 1915...	50,525,289	1.65
Sept. 30, 1909...	29,000,000	1.94	Dec. 31, 1916...	67,993,117	1.59
Sept. 30, 1910...	40,360,823	1.70	Dec. 30, 1917...	70,025,322	1.58
Dec. 31, 1911...	40,853,371	1.66	Dec. 30, 1918...	68,549,644	1.57
Dec. 31, 1912...	38,853,551	1.67	Dec. 31, 1919...	66,414,219	1.56
Dec. 31, 1913...	39,108,590	1.65	Dec. 31, 1920...	63,845,631	1.58

The above figures do not include carbonate ores nor the reserves of the Kimbley, Veteran and Wedge groups, aggregating 800,000 tons assaying 2.4% copper.

Churn-drill prospecting from the beginning of operations to end of 1920 totaled 575 holes averaging 366'. In the Ruth the cost of drilling was \$2.213 per foot in 1919.

Electric power is used throughout, current being brought from the Steptoe smelter, at 40,000 volts, and stepped down to 600 volts by seven 200-k. w. transformers in a concrete station at the Ruth mine.

Ore is shipped to the Steptoe smelter, at McGill, separately described below over a 27-mile standard-gauge railway, forming a part of the Nevada Northern railway which has a line 165 miles in length running from the mines and Ely to a junction with the Southern Pacific railway at Cct. station.

It does a general business in addition to handling the traffic of the Nevada Consolidated. In 1920, it carried 2,924,905 tons of ore from all mines in the district, 343,334 tons of commercial freight, and 222,840 passengers.

On Sept. 1, 1920, a trackage right agreement was made with the railway company, whereby Nevada Cons takes over a large part of the equipment and operates its own ore transportation over that part of the railway system, known as the Ore Line.

Mining costs:

Year	Moving overburden, cents per yard	Steam-shovel mining, cents per ton *	Ruth mine, per ton
1920.....	40.47	32.22	\$1.320
1919.....	38.65	31.59	1.350
1918.....	41.20	22.27	1.330
1917.....	34.43	31.32	1.0251
1916.....	30.09	23.70	1.2021
1915.....	28.85	15.24

*Excluding 40c. per ton for prepaid stripping cost.

Reduction works: The concentrating mill and smelter owned by the company are at McGill. The property, which covers 8 square miles, with water rights, is on the eastern side of Steptoe valley, on the slope at the foot of the Schell Creek range, 14 miles N. E. of Ely and 22 miles from the mines, on the Nevada Northern railway. The smelter site proper comprises 320 acres, 1 mile long and ½ mile wide on a hillside with 10% grade, permitting the works to be terraced, and handling material by gravity throughout. Lands carry water-rights to Duck creek, and to the McGill ranch, estimated as capable, jointly, of furnishing water for a 15,000-ton plant.

The mill, about one mile from the smelter, is one of the largest and best in existence. Late in 1917 its capacity was increased from 12,000 to 14,000 tons daily. All main buildings are of steel frame and the plant is built on the unit system. It is nearly a mile from the smelter, and treats the moderately hard silicified, altered porphyry ore, containing tiny specks of chalcocite, pyrite, and some chalcopyrite, averaging 1.5% copper.

The coarse ore bins are of timber, 15' deep, 20' wide and 288' long with a capacity of 5,000 tons. They are built about the center line of the mill and 400' behind the center line of the fine ore bins. The ore is dumped on grizzlies of railroad iron with openings of 13.5".

From the coarse ore bins the ore goes through chutes at the bottom, to twenty-four 60" steel apron-feeders driven at a speed of 2.2' per minute. The full capacity of each feeder is 75 tons per hour. The two feeders in each unit adjoining the center line of the plant can be run at 9' per minute, delivering 700 tons per hour. The feeders, with the exception of these two, deliver to two 60" steel pan conveyors, each 118' long, traveling at a speed of 28' per minute, and with a total capacity for the two 1,700 tons per hour. The high-speed feeders and pan conveyors deliver to two 60" traveling grizzlies of 3.5" openings and having a speed of 40' per minute. The oversize from the grizzlies is delivered to two No. 8 McCully crushers. The discharge from the McCully crushers and the undersize from grizzlies is elevated by two 42" belt conveyors to two screens 6'x14' of ¾" wire, 1"x1½ mesh, inclined at an angle of 36 to 48°. The oversize of these screens is re-ground by two Garfield rolls, 72"x20", set

for a $\frac{3}{8}$ " opening. Four ball-mills were added to the re-grinding plant during 1918. Discharge from the rolls and undersize from the screens is elevated to two horizontal conveyors which distribute to the fine ore-bins by means of two trippers. The new coarse crushing plant was put into commission about mid-1917.

In order to minimize sliming, the flow-sheet is arranged for step grinding. From the fine bins the ore passes by belt feeders over automatic scales to a set of 36"x15" rolls set for an opening of $\frac{5}{8}$ " and run at 85 r. p. m. with water introduced beneath washing to a pair of bucket elevators. The buckets on these elevators are 8"x8"x18" and the elevators deliver to two trommels, 42" diam, by 8' long, having one section of 3/16" and one of 5/16" perforations. The oversize goes to another set of rolls 36"x14" set for a 5/16" opening and driven at 105 r. p. m. The undersize of 5/16" goes to a set of rolls 30"x14", set for a $\frac{1}{2}$ " opening and run at 122 r. p. m. The undersize of 3/16" goes to eight 2 m. m. trommels 36" diam, by 8' long. The oversize of the 2 m. m. screens goes to a fourth set of rolls 36"x15" with an opening of 1/16" and driven at 160 r. p. m. All of the above rolls deliver to the same elevators so that everything must finally pass 2 m. m.

The undersize of 2 m. m. passes to 10 double deck Wilfleys making final concentrates, and middlings to five Wilfleys. The five Wilfleys make final concentrates and send tailings to the re-grinding system. The tailings from ten double deck tables pass to four Steptoe classifiers, having four spigots and an overflow. The overflow is sent to a 50' Dorr thickener, delivering underflow to the slime department and overflow to the reclaimed water system. The first spigot product goes to the re-grinding system after being dewatered. The second spigot delivers to four Wilfleys which make final concentrates and send tailings to the re-grinding system. The third spigot delivers to eight Wilfleys, making final concentrates, middlings to the re-grinding system and tails to waste after being dewatered in Steptoe tanks. The fourth spigot delivers to Callow tanks, delivering underflow to four Wilfleys and overflow to slime departments. These four Wilfleys produce final concentrates and send tailings to Callow tanks delivering underflow to Johnson vanners.

Each unit is equipped with two Hardinge mills 8'x30" direct driven through herringbone gears. The feed to these is delivered at 65 to 75% solid by means of a shovel wheel. The product is delivered by two bucket elevators to four Steptoe classifiers making four spigot products and an overflow. The overflow goes to two 17' Dorr's delivering underflow to the slime department and overflow to 75' Dorr thickeners. The first spigot delivers to two Wilfleys, making final concentrates and sending tailings to the re-grinding system. The second spigot delivers to seven Wilfleys making tailings to waste and sending middlings to six more Wilfleys, making tailings to waste. The third spigot delivers to seven Wilfleys, making tailings to waste and sending middlings to the above mentioned six Wilfleys. The fourth spigot delivers to Callow tanks whose overflow goes to the slime department and underflow to ten Wilfleys, delivering tailings to Callow tanks which in turn deliver underflow to 26 Johnson vanners and overflow to the slime department.

All concentrates except those of the real slime department are delivered to 16 steel tanks of 225 ton capacity, having filter bottoms for suction drying. These tanks are unloaded by a Blaisdell disc excavator into cars below.

All overflows of Callow tanks, Steptoe tanks, and Blaisdell concentrates tanks are delivered to a series of settling ponds from which the underflow is delivered to the slime department (flotation process) and the overflow is pumped to the mill to be re-used. During 1920, substantial improvements in handling of slimes were made, one unit of concentrates with 2,000 ton capacity being so altered as to show a 75% extraction. When completed mill is expected to have a daily capacity of 15,000 tons.

In September, 1919, Minerals Separation brought suit against Nevada Consolidated alleging infringement of its flotation patents; the suit was settled by compromise early in 1922.

Water is secured from Duck creek, which has an average flow of 8,000 gal. per minute, water being collected in the hills in reservoirs and brought by gravity for 9 miles through a 32" iron-banded wooden pipe line and delivered at the highest point of the works under a pressure of 10 to 20 lbs. per sq. in. An electrically-driven pumping plant in Steptoe valley, immediately below the works, has a capacity of about 5,000 gal. per minute. By means of a system of settling tanks, ponds and pumps, approximately 8,000 gal. of water per minute is recovered from mill tailings for re-use. Approximately 4½ tons of fresh water to 1 of ore are used in the process. A supplemental triple expansion pumping engine with 5,000 gal. capacity vs. 480' head was added in 1919.

The smelter is connected with the concentrator by a standard-gauge railway line. The works have about 12 miles of railway track, equipped with 9 small locomotives, a switch engine and 100 cars, and 2 loco cranes. It includes separate buildings for calcining, reverberatory smelting, blast-furnace smelting and conversion, all of steel frame, with corrugated iron sheathing. Each department has independent flues and chimneys.

The roaster building, 328' in length, has 4 floors, with twenty-four modified McDougal roasters, set in 2 rows. Coal is now used for fuel in place of oil. Concentrates are delivered to the calcining building in 10-ton standard-gauge cars entering over a trestle on a level with the feed floor. All the roasters have air-cooled rabbling arms, and center columns supplied with air under a pressure of about 3" of water by a fan of about 120,000 cu. ft. capacity. The roasters are driven by 10 h. p. electric motors. Hot calcines, carrying 6.5 to 9% sulphur, are discharged into hoppers beneath the roasters and trammed directly to the reverberatories, or to nine 150-ton calcine storage bins, built of brick and steel, which serve as a balance-wheel between the roasting and smelting departments. Each roaster discharges gases through a 54" elbow to a brick flue running between the 2 rows. This flue discharges fumes into the main flue, which is in 2 parts, each of 312' square cross-section, permitting either to be cut out for cleaning. The flue is 1,070' long, including the dust chamber, which is 150x50x30', and leads to a brick stack 250' high and of 18' internal diameter at the top. Dust from the flue in the roaster building is piped to the ground floor, for loading into cars, and for about 500' the flue has tracks underneath, permitting the collection of dust from steel hoppers in cars, which are hauled by small locomotives. The copper-bearing feed per roaster-day in 1919 was 64 tons, against 67.2 tons in 1918.

The reverberatory building has five 600-ton furnaces, each 19' wide by 111' to 130' long. The use of oil as fuel was superseded in May, 1918, by pulverized coal. The plant has a capacity of 600 tons of slack coal daily, ground to pass 200-mesh, has lowered costs and given complete satisfaction. In 1920, Bunsen type burners were in use to permit of a closer mixture of fuel and air. A full description of this plant by R. E. H. Pomeroy, was published in Bull. 158 (Feb., 1920) of the A. I. M. & M. E.

The reverberatory furnaces are charged with calcines mixed with limestone dumped through slide-gates, from hoppers, suspended from the charge-floor. Each furnace has 2 tap-holes on one side, from one of which matte is drawn off into matte cars of about 30-ton capacity. These cars are tilted and contents poured into the converters by an electrically-driven mechanism mounted on the car frame. Slag is skimmed twice every shift, the skimmings going to a cast-iron box leading to a lined launder, in which a jet of water granulates the slag and washes it to the dump. Slags carry 50 to 45% silica 6 to 12% calcium oxide, 25 to 35% iron oxide and 8 to 14% alumina. The reverberatory building has a dust chamber of 1,000' square section, 155' long, leading to a 300' brick chimney, 15' in diameter at top.

The converter building is about 600' from the reverberatory furnaces, and receives molten matte from cars, behind and above the converters, the contents being poured into a launder, while the shells remain in position for blast. The building has two 5-motor Shaw electric cranes, each with a capacity of

60 tons besides 2 auxiliaries of 25 tons each. There are 2 of the old stalls with 96x150" shells of the barrel type built for acid linings, but now used with magnesite brick linings. There are also 2 Peirce-Smith barrel-type converters, both originally 25' 10" long by 10' diameter shell. One of these was lengthened to 33' 11". They originally had 30 tuyeres each but these have been increased to 35 and 46, respectively. The blast pressure used is nominally 10 lb. gauge at an altitude of 6,327'. The Peirce-Smith converters produce about 50 and 60 tons of copper per day on 40% matte.

Blister copper is poured into ladles and transferred into a brick-lined steel cylindrical receiver. This is mounted on rollers and rotated on its poured axis by an electrical motor, so that the molten blister copper is poured through a tilting pouring spoon into moulds on a horizontal straight-line chain and sprocket conveyor. These moulds discharge on a submerged apron conveyor which after traveling in water horizontally for a few feet turns on an incline and raises the copper ingots out of the water and lands them on the loading platform. They contain 99.5% copper, weigh about 400 lbs., and, after trimming and being weighed, are shipped in box cars.

The converters slag is taken back to the reverberatory furnaces in 10-ton side-tilting pots operated by compressed air. Flux for the converters consists of concentrator slimes and silicious carbonate ore from the Copper Flat pit, mixed and dried in 2 oil-fired rotary driers at the converter building and handled and charged by boats. The hoods from the converters lead to a balloon flue running along over the charge floor for the extent of the converter building covered by stalls. It is then connected by a circular flue 10' diam. to a brick dust chamber which in turn connects to a brick stack 100' from the ground 10' diameter at top.

The power plant has 4 batteries of two 400-h. p. water-tube boilers each and one battery of two 600-h. p. Stirling water-tube boilers. Two batteries have Foster and 3 others have internal super-heaters, and there is a separate Foster super-heater for the steam supplied by the reverberatory waste-heat boiler plant of ten 400-h. p. boilers. Steam is generated at 160-h. p. pressure, and can be super-heated 100° F. All boilers are fired by Green chain-grate stokers, coal being fed from overhead bins by chutes direct to the stoker hoppers. These are to be replaced by powdered fuel stokers. Each double battery of boilers has a 9x40' steel stack with induced draught, furnished by 5 Sturtevant fans, each connected with a 30-h. p. Sturtevant slide-valve engine, running at 150 to 175 r. p. m. Each battery of boilers is equipped with fuel economizers of about 3,360 sq. ft. heating surface, set between the boilers and the induced draught fan; they are dampered so that they can be cut out for cleaning while the boilers are in service. A 3,000-gal. capacity Kennicott water purifier supplies make-up water for all boilers.

The engine-room, main floor, contains the generating engines, blowers, 3 exciters, and a switchboard, and the basement contains condensers, air pumps and oil filters. The electrical equipment consists of two 1,100-h. p. 22x48x48" Corliss cross-compound engines, with 800 k. w. Bullock a. c. generators mounted on the shafts; two 2,000-h. p. 31x66x48" Corliss cross-compound engines with 1,500-k. w. Bullock a. c. generators mounted on the shafts, and one 2,500-k. w. steam-driven turbo generator. Current is generated at 600 volts and carried to a concrete transformer station, equipped with seven 200-k. w. Bullock water-cooled transformers, stepping the current up to 40,000 volts for transmission to the mine; four 750-k.w. water cooled transformers and four 1,000-k. w. water-cooled transformers stepping current up to 13,200 volts for transmission to the mills; 13,000 and 40,000-volt choke coils and lightning arresters. A 3,000 k. w. turbo-generator was added during 1917, to take care of increased power consumption at the mill.

The smelter blowing plant, in the engine-house, includes a 350-h. p. 14x28x36" tandem-compound engine direct-connected to a No. 10 Connersville blower with capacity of 300 cu. ft. of air per revolution, making 120 r. p. m. This is for the blast furnace. For the converters air is supplied at 10-lb. gauge

pressure by one blowing engine, 16" and 24" diam. steam 34" and 34" diam. air by 48" stroke of 6,000 cu. ft. capacity; one 25" and 54" diam. steam 52" and 52" diam. air by 48" stroke of 12,000 cu. ft. capacity and one 26" and 56" diam. steam, 54" and 54" diam. air by 48" stroke of 18,000 cu. ft. capacity. These are all of the cross-compound steam, tandem, air and steam type. A 20,000 cu. ft. steam driven turbo-blower was added in 1916 to supplement the blowing engine in supplying air for converters, and another in 1920.

A cross-compound air-compressor with steam cylinders 11" and 21" diam. and air 21" and 12" diam. and 18" stroke of 1,080 cu. ft. displacement, compresses air to 100-lb. This was originally for tamping converter linings, but is now used for pneumatic tools of various kinds at the shops and the mill. A 2,000 cu. ft. 2-stage, steam-driven compressor was added in 1916.

In connection with the works are a number of thoroughly appointed shops, including a boiler, machine and carpenter shop, foundry, warehouse and round-house.

The Steptoe works were started in April and the first finished copper shipped in August, 1908. Nearly 1,500 men are normally employed at the plant.

Production:

Year	Tons Milled	Cu. %	% Rec.	Ratio Conc.	% Cu. in Concts.	Net Prod. lb. Cu.	Cost per lb. Cts.	Sell Price Cts.

1914.....	2,640,294	1.48	68.48	6.05:1	6.14	49,244,056	9.82	13.39

Gold and silver extracted during 1920 was sold for \$483,668, compared with \$327,680 in 1919; \$664,429 in 1918; \$767,760 in 1917, and \$801,818 in 1916.

Copper is marketed through the new selling agency of Guggenheim Bros. The property has been splendidly developed, and is being managed with ability and success. Operations during 1919 and 1920 were reduced to 50% of capacity, and in April, 1921, mines and plants were closed down, except for development work at Ruth, for an indefinite period.

NEVADA CONSOLIDATED MINES & SELLING CO. NEVADA

Idle and probably dead.

Officers: Alex. Brown, pres.; Chas. L. Newton, v. p.; C. C. Matthews, sec.; F. G. Carey, treas., at last accounts.

Property: about 1,000 acres, including a gold property formerly owned by the Huntoon Valley Mining Co., 45 miles south of Hawthorne, Mineral county, and copper claims 10 to 20 miles S. W. of Hawthorne, formerly owned by the Walker Lake Expl. Co. The copper property, developed by 3 crosscut tunnels to 440' below the outcrop, was claimed by the company to have a vein carrying disseminated pyrite and chalcopyrite, averaging 2½% copper and \$4 gold. This vein has apparently been lost in the lowest tunnel. Country rock is granodiorite. The mine has 1,500' of workings.

NEVADA CO-OPERATIVE MINING CO. NEVADA

Address: Goldfield, Nev.

Officers: Chas. S. Sprague, pres.; J. K. Turner, v. p. and cons. engr.; P. J. Somers, sec.

Inc. 1913. **Cap.** \$2,000,000; \$1 par; assessable; 1,500,000 shares in treasury. Company is a reorganization of Goldfield Mines Operating Co.

Property: 11 claims, 150 acres, including the Empress, in Gold Mountain mining district, Esmeralda county, 37 miles S. E. of Goldfield, shows 3 well-defined quartz veins from 1-6' wide with numerous quartz-stringers, running N. E. The formation is Cambrian sedimentary rocks, quartz-monzonite porphyry granite rhyolite and basalt

Development: total work to June, 1915, was about 3,000', of which 2,000 is on the Central or Liberty vein. A crosscut tunnel driven 800', exposed ore averaging \$8.17 across a width of 1½'. Drifts run from a raise on the hanging-wall from the 800' level, encountered a quartz vein, assaying \$26.40 gold and 54c. silver per ton.

Equipment: includes several buildings and an old 10-stamp mill. Mine was inactive pending favorable opportunity for refinancing, but resumption reported in September, 1919. Not operating, 1921.

NEVADA COPPER CO.

Company inactive since 1910. **Office:** 572 Bullitt Bldg., Philadelphia, Pa. **Mine office:** Mina, Mineral county, Nev.

Officers: J. H. Whiteman, pres.; P. S. Bickmore, sec.-treas. Company is controlled by the Tonopah Mng. Co.

Property: Dunlap copper mine, 10 claims, 200 acres and millsite in Silver Star district, 10 miles W. of Mina, operated under lease in 1919 by E. S. Chaffee. Claims show quartzite and quartzite-breccia with mineralized zone 700' wide and 2,000' long, carrying ore-bearing reefs with oxides, carbonates and native copper.

Development: by tunnel, etc., mostly in ore. **Equipment:** includes compressor, etc.

NEVADA COPPER HILLS MINING CO.

Idle, and probably dead.

Mail returned both from Philadelphia and Nevada addresses.

Officers: at last accounts, A. H. McCullough, pres.; F. W. Lenhart, v. p.; T. J. Foster, sec.; Chas. Ritter, treas.; Rowland Lea, gen. mgr.

Inc. Oct. 24, 1907, in Nevada. **Cap.** \$1,500,000; \$1 par; issued 745,000. Farmers Savings & Trust Co., Mansfield, Ohio, registrars. Annual meeting, first Monday in December.

Lands: 10 claims, 200 acres, in Mineral county, 9 miles north of Luning. The property is reported, by Mr. Lea, to have replacement ore-bodies in limestone over a width of about 600', with a N.-S. strike, and a dip of 6°.

Ore: oxidized, with occasional native copper and some hornite with chalcopryite in the bottom workings. **Ore-bodies** average 2' thick and 28 of them are opened up for a length of 400' and a depth of 100' according to the company's secretary. Ore is stated to assay 1 to 70% copper, from a trace to 8 oz. silver and from a trace to \$3 gold per ton.

Development: by 225' shaft and a 330' tunnel.

Equipment: includes a 25-h. p. hoist and 6 buildings. Presumably pursuing a "watchful waiting" course and ignores all requests for information.

NEVADA COPPER MINING, MILLING & POWER CO. NEVADA

Office: Tacoma, Wash. Mine at Contact, Elko county, Nev.

Officers: E. F. Messinger, pres., Tacoma, Wash.; Henry Smith, v. p. and gen. mgr., Contact, Nev.; E. S. Price, sec.-treas.; with M. K. Price and C. Smith, all of Tacoma, directors.

Inc. May 5, 1905, in Arizona. **Cap.** \$1,500,000; \$1 par; all issued.

Property: 52 claims, patented, in Contact district, shows Paleozoic sediments cut by granite with ore-bodies along the contact. In 1915 a 100-ton flotation plant was erected, following extensive diamond-drill explorations. Property and geology fully described Bull. 497, U. S. Geol. Survey.

NEVADA CROESUS SILVER MINES CO.

Address: Richardson & Foster, Tonopah, Nev.

First offering of 200,000 shares at 10 cents, November, 1919 to February, 1920.

Property: 7 claims in the West Divide district, 15 miles from Klondyke station on the T. & G. Railroad. Examined by Ross Woodward, who said that encouraging values had been found, particularly on the Mammoth silver lode. From 250' of development, 11 samples ranged from \$8 to \$546 per ton in silver.

NEVADA DIVIDE MINING CO.

Address: Tonopah, Nev.

NEVADA

Officers: John Holst, pres.; Joseph de Forrest, v. p.; P. J. Daube, sec-treas., also directors.

Inc. April, 1917, in Nevada. **Cap.** \$100,000; 10c par.

Listed on San Francisco Stock Exchange.

Property: 6 claims N. W. of Sutherland, about 3 miles N. W. of Gold Mountain. Joint shaft with the Anaconda Divide, in breccia, gave assays of \$1.80 per ton at 65' depth.

NEVADA-DOUGLAS CONSOLIDATED COPPER CO. NEVADA

Office: A. J. Orem & Co., 79 Milk St., Boston, Mass. **General office:** 222 S. W. Temple St., Salt Lake City, Utah. **Mine office:** Ludwig, Lyon county, Nevada.

Officers: H. I. Moore, pres.; James G. Berryhill, v. p.; L. H. Curtis, v. p.; F. M. Orem, sec.-treas.; W. C. Orem, gen. mgr.; with J. J. Corum, A. J. Orem, J. B. Lord, H. Goodacre, F. J. Curtis and J. G. Berryhill, Jr., directors.

Officials: Henry I. Moore, asst. mgr.; G. E. Mainhart, gen. supt.

Inc. March 13, 1915, in Utah. **Cap.** \$5,000,000; \$5 par; assessable; 979,643 issued. Bonds, \$2,000,000; matured May 1, 1919; \$215,100 outstanding. Federal Trust Co., Boston, registrar; State Street Trust Co., Boston, transfer agent. Annual meeting, first Tuesday in May.

The company is a reorganization of the Nevada Douglas Copper Co. at the time of its consolidation with the Moore Mng. Co. The new company assumed liabilities of the old companies. \$535,956 of Nevada Douglas and \$57,000 of Moore Co.; Nevada Douglas indebtedness includes also \$18,100 of 6% bonds which matured in 1913. Nevada Douglas stockholders received share for share in stock of new company and the Moore Co. received 10,000 shares of stock. To date, 10 assessments of 10c. a share have been levied, the last one in September, 1919. The old Nevada Douglas Copper Co. paid a dividend of \$125,000 in 1913.

From the many financial statements issued by A. J. Orem of Boston, it would appear that during 1918, the operating revenue was \$362,466 and expenditures \$432,070, making a loss of \$60,604. In 1919, there was a net deficit of \$181,000. The balance sheet of January 31, 1919, showed current assets, \$478,987, of which \$387,108 was copper in transit; liabilities totaled \$551,910, of which \$151,554 was A. S. & R. Co.'s advances on metal, \$182,818 for Mason Valley company's smelting charges, and \$124,923 for accounts and wages unpaid.

Another analysis said to be by a stockholder, gives a net indebtedness of \$343,669.

The company also owns 88% of the capital of the Nevada Copper Belt R. R. Co., which made a net profit of \$87,417 during 1918, and \$11,102 in the first four months of 1919. The line is 41 miles long.

Property: about 950 acres, with 2 millsites, 80 acres, and miscellaneous lands, including water-rights, giving total holdings of about 1.070 acres on the western slope of the Mason mountains, in the Yerington district, Lyon county. Lands include former holdings of the Ludwig Copper Mng. Co., the Douglas C. Mng. Co., which succeeded the Douglas M. & S. Co., the Nevada Douglas C. Co. and the Moore Mng. Co. Holdings of the Nevada Douglas C. Co. consisted of 4 separate and distinct mines, the old Douglas mine, the Amalgamated group and the Casting Copper mine, being the original holdings of the company, and the Ludwig mine. Country rock consists of limestone intruded by grano-diorite with large contact orebodies and fissure veins. There is also one claim at Buckskin, 7 miles distant, which carries fluxing ore.

The Moore Mng. Co. owned the Moore group of claims, a prospect with about 450' of development work and "considerable oxidized ore blocked out in a way that it cannot be measured." Property of the old Western Nevada Copper Co. (described in Vol. X), which had been under option to the Moore company, was paid for in full by the Nevada-Douglas Cons.

Ludwig mine: is about a mile N. W. of the Douglas. The property comprises 2 mining claims and a 40-acre tract in Smith Valley, on which there is a well and pumping station. The Ludwig was opened 1865, and was a shipper for some years of small quantities of high-grade ore, production including some very handsome malachite and azurite, a portion of which was sold to lapidaries, and considerable bluestone was mined for the old mills of the Comstock that used the Washoe process.

Geology: the ore occurs in a fissure vein with a white limestone footwall and a silicious limestone hanging wall, which changes to a garnetiferous limestone, heavily impregnated with sulphides in places. Where crushing has permitted surface waters to work downward, large bodies of carbonates and copper glance ores are found as replacements in the footwall limestone. The vein proper has an average width of about 30' and has been developed along its course for 1,300' and to a depth of 800' by levels, along hanging wall, every 100'. The orebody on the 700 level is 50' wide and 300' long and runs 6% copper. The shoots, or pipes, of high-grade secondary ore, running from 16 to 30% in copper, form chamber deposits in the limestone near the porphyry contact, proven down to 800' level. Ore reserves were estimated at 200,000 tons of 2% copper ore.

In addition to copper ore, the Ludwig has a very large deposit estimated to contain 15,000,000 tons of gypsum, on the footwall, said to be 3,000' long, 500' wide and 400' deep, which figures seem high. This deposit of gypsum is of commercial value, and some has been mined and shipped.

Douglas mine: this has a typical contact metamorphic deposit in which garnetized limestone carrying copper sulphides and their resultant oxidized ores occur in very irregular orebodies in limestone, which have a tendency towards a horizontal rather than a vertical extension. The mineralized area is about 700' wide and 2,000' long with numerous parallel fissures which seem to control the mineralization. This mine has been developed by a main working tunnel and a deeper haulage tunnel with numerous crosscuts and drifts netting the property. The working tunnel, 4,290', has an average depth of 120' beneath the surface and the ore is in places continuous to the surface. Four 50' winzes show the downward extension of the ore. Claimed to have 75,000 tons of ore blocked out.

The **Casting Copper mine** shows a large area of garnet-epidote limestone constituting low-grade carbonate ore, which will be extensively mined. This mine has a vertical 350' shaft and a 500' tunnel. Claimed to have 100,000 tons blocked out. When shipments were being made to the smelter the ore averaged 5% copper as compared with 3% in the Douglas mine.

At the Amalgamated mine little development work has been done but the surface exposures indicate the existence of similar large contact metamorphic deposits.

Ore reserves: in all properties are estimated at 550,000 tons blocked out, and 2,000,000 tons partly blocked. A report says that "Engineers estimated probable ore several times the latter amount." In May or June, 1919, A. J. Orem said: "I estimate the real values in sight in these properties are worth \$2,000,000, over and above all indebtedness —." In Dec., 1919 he gave the net value as \$1,908,590, less \$125,000 for the flotation plant contemplated. Present ore carries 3% copper, with a fair quantity of high-grade material.

Property as a whole has about 8 miles of workings.

Equipment: includes four 100-h. p. hoists, good for 1,000' depth each, with a 52-drill air-compressor. Electric current is taken from the Truckee River General Electric Co. Water is secured from artesian wells in Smith valley, brought to the mine by a 17,000' pipe-line.

Production: since present management took charge over 31,000,000 lb. of copper realizing about \$5,285,000. Of this the Ludwig yielded 18,587,924 lb. in 7 years. During 1916, ore sent to Utah smelters amounted to 11,135 tons, carrying 7.5% copper. Freight charges were \$8 per ton.

General: in Vol. XIII of "The Mines Handbook," we gave the following opinion: "A 250-ton leaching plant, begun in 1914, was in full operation by September, 1917. . . . This plant cost \$475,000 and is expected to treat ore at cost of \$1.25 to \$1.50 per ton. . . . If the leaching plant is a success it will prove the salvation of the company. The policy of handling the property has not met with favor in the East, as a result, financing and development have been slow. Management is believed to be competent, and mak-every effort to put property on a dividend basis. Estimated that \$1,000,000 has been spent on the property since 1912, of which \$475,000 went to the leaching plant, \$193,000 to offices, shops, buildings, etc., the remainder in development, new property, etc. The year 1918 should show the property's merits."

Then in Vol. XIV, we reported that the plant had been a complete failure and that a change of management had become effective on June 1, 1918. The mines, save the Western Nevada, were then running low on shipping ore, so a development campaign was started at the Ludwig, Casting Copper, and Western Nevada. This resulted in sufficient $3\frac{1}{2}$ to 4% ore being added to yield 250 tons daily for 18 months or more. Some of the largest orebodies ever opened in these mines were uncovered at 800' in the Ludwig and at 400 and 500' in the Western Nevada. Results in the Casting Copper are stated by the assistant general manager, H. I. Moore, to be promising. Late in January, 1919, operating costs were 19c. a pound. On December 1, 1918, metal on hand and in transit totaled 1,200,000 lb., and in that month and January, the yield was between 300,000 and 400,000 lb. There were 160 men employed then. It was estimated in January, 1919, that current assets, etc., were almost sufficient to pay off the floating debt. An assessment of 10c. was urged, also that development and operation be continued. As a neighboring company, the Bluestone had erected and operated a 400-ton oil-flotation plant, it was suggested that Nevada-Douglas do likewise.

In October, 1919, a new scheme for financing Nevada-Douglas was proposed. It includes extending the railroad bonds for 3 years and have holders of the bonds release N.-D. from its guarantee. This would reduce obligations of N.-D. to \$300,000. To take care of this indebtedness and furnish money for working capital, the plan proposed 5-year, 6% bonds amounting to \$1,000,000, secured by N.-D. properties, and increase capital by 300,000 shares.

The plan covers also the formation of a leasing company, with a fully paid capitalization of \$200,000, to operate the Western Nevada mine, under a 10-year lease, and to build a flotation plant, stock to be offered to Nevada-Douglas Cons. shareholders at par.

In February, 1920, the \$1,000,000 bond issue and increase in capitalization was authorized, and leasing company formed; bonds (convertible into stock at par) are sold to Nevada Douglas Cons. stockholders at 90, and old bondholders allowed to exchange old bonds for new at same rate. By July, reported that new bond issue had been sold, and that leasing company contemplated treating Western Nevada ores in Bluestone mill, and erecting a reverberatory furnace to smelt the concentrates.

Nothing has been heard from this company for nearly 2 years. The general feeling towards the property, and apparently towards the management also, is one of doubt.

NEVADA EXTENSION MINING CO.

NEVADA

Mail returned from only known address, Tonopah, Nev.

Property is near the Hecla, Airedale, and St. Patrick groups in the south east part of the Divide district.

NEVADA GOLD MINES CO.

NEVADA

No recent returns. J. S. Madden, Austin, Lander county, Nev., mgr., at last accounts. Inc. 1915, in Nevada.

Property: 16 claims, including the Gold Park, La Crux, San Pedro,

May-Do-So and Cottonwood groups, at Austin, said to show gold-silver-copper ores in well-defined veins. Development was begun in 1915.

NEVADA GOLD MINES CO., LTD.

NEVADA

Mail returned from Spokane office. Mine office: Luning, Nev.

Officers: W. C. Losey, pres.; S. S. Endslow, sec.-treas.

Property: 4 groups of claims, comprising 24 claims near Luning, Mineral county. The Carbonate group is developed by 1,800' of workings to depth of 350', and the Montreal group of 4,000' by workings, said to have disclosed several orebodies containing gold, silver and copper values.

NEVADA GOLDEN DIVIDE MINING CO.

NEVADA

Office: 313 Clay Peters Bldg., Reno, Nev.

Officers: Alex. McIntyre, pres.; Albert Fisher, v. p.; Joseph Johnstone, sec.; George Hall, treas., with George McKenzie, M. C. Kloskey and Charles O'Neill, directors.

Inc. in Nevada. **Cap.** \$150,000; shares 10c par.

Property: 188 acres at Golden, Nye county, and at Divide.

NEVADA HILLS MINING CO.

NEVADA

See Vol. XII. Company reorganized on an assessable basis in 1921, as the Nevada Hills Mng. Co., **Reorganized.**, which see.

NEVADA HILLS MINING CO., REORGANIZED

NEVADA

Is a reorganization of the Nevada Hills Mng. Co.

Office: 225 No. Center St., Reno, Nev.

Officers: E. C. Smith, pres.; Alex. McIntyre, v. p.; F. A. McCafferty, sec.-treas., with R. A. Crider and Jas. Gallagher, directors. Wood Elkins, supt.

Cap. \$125,000; 10c. par; assessable; \$18,400 in treasury. Stock of new company exchangeable, share for share, for old stock, plus a 1c. assessment levied June 25, 1921. Stock is listed on San Francisco Stock Exchange.

Property: the Fairview Eagle mine, about 107 acres, at Fairview, Churchill county. After a profitable career as a gold-silver producer the mine was closed early in 1917.

Former company's operations were quite successful, production for 6 years said to have been \$2,265,000.

NEVADA HONEY BEE MINES CO.

NEVADA

Dead. T. J. D. Salter, Winnemucca, Nev., was president.

Property: in the Loring (Willard) district, Pershing county, 10 miles from Lovelocks, adjoins the Lovelock Willard on the north.

Report, July, 1920, that \$40,000 had been expended on development without finding commercial ore. Enterprise abandoned and stockholders given privilege by Weir Bros. & Co. to exchange their stock for stock in the Mines Selection Co. (q. v.), on a share for share basis, plus a fee of 3c.

NEVADA HUMBOLDT TUNGSTEN MINES CO.

NEVADA

Address: Lovelocks, Nev., or Mill City, Nev. C. J. Jones, H. E. Loufek and P. J. Murrish, incorporators.

Cap. \$1,000,000; \$1 par.

Property: claims 7 miles N. W. of Mill City, Pershing county, show a 6' bed of scheelite with quartz and calcite as a replacement in limestone near a granodiorite contact; can be traced for 2,500'. Main orebody has been developed for length of 700', to depth of 650'. Ore averages 2% tungstic oxide, but carried 4% for length of 120'.

Equipment: a 150-ton mill was completed in 1918, and the first shipment of three carloads of concentrates was made February, 1919. Power and water supplied by the Mill City Development Co., a subsidiary, over a 34-mile power line; the water supply of 250 gallons per min. supplied through a 22,000' pipe line of 6" wire wound redwood pipe carrying water in 2 stages from a 24' well. Two storage reservoirs of 100,000 and 50,000 gal. have been built. Mine worked 7 months in 1919; presumably idle since.

In September, 1919, the company was taken over by the Pacific Tungsten Co. interests.

NEVADA-KATHERINE MINES CO.**NEVADA****Address:** E. A. Shaw, Kingman, Arizona.**Officers:** E. S. Chafey, pres.; Jas. Cashman, v. p.; E. A. Shaw, sec-treas., with A. Adams and J. J. McDonald, directors.**Property:** 4 claims on the Colorado river Clark county, Nev., across from the Katherine gold camp, San Francisco district, Mohave county, Arizona.**NEVADA KEYSTONE MINING CO.****NEVADA****Address:** Goodsprings, Nev.**Property:** a large group in Yellow Pine district, Clark county, 8 miles W. of Goodsprings, reputed to have produced \$1,000,000 in gold prior to 1906. Idle 1906-'13 and after. The country formation is limestone cut by dikes and sills of quartz monzonite porphyry. The ore is an altered porphyry carrying free gold, with a little silver, and has a value of \$18 to \$25 per ton. Developed by glory holes, 3 tunnels, one over 450' long, and an incline from lower tunnel to depth of 1,100'. Equipped with cyanide mill which was treating tailings in 1919.**NEVADA LEAD MINING CO.****NEVADA**

Dead. Utah charter forfeited, and claims abandoned in 1918. See Vol. XIV.

NEVADA LINCOLN MINING CO.**NEVADA**

See Vol. XIII for details. About mid-1918 Frank Wilson, then president, sued company for services rendered and secured judgment by default, and the mine was sold to satisfy the judgment. Wilson bought it, and organized the Nevada Wilson Mining Co., to which the property was transferred. In September, 1919, the Lincoln company started suit against Wilson and his company to set aside the judgment and sale.

Report of May, 1921, announces settlement of suit out of court, and formation of still another company, controlled by Gilbert S. Johnson, Waggoner Bldg., Fort Worth, Texas. Stockholders of Nevada Lincoln will receive 500,000, and those of Nevada Wilson 525,000 shares of new company. Augustus Tilden of Reno, Nev., is attorney.

NEVADA LORING MINES CO.**NEVADA****Address:** T. J. D. Salter, Tom Ward, or J. C. Foster, Loring, via Lovelocks, Nev.**Property:** the Mayday claims in the Loring (formerly Willard) district, Pershing county. In September, 1919, several veins had been uncovered, assaying high in gold and silver.**NEVADA NEW MINES CO.****NEVADA****Office:** 146 No. Virginia St., Reno. **Mine office:** Rawhide, Mineral county, Nev.**Officers:** E. W. King, pres.-gen. mgr., Mina, Nev.; Alex. Boyle, gen. supt.**Inc.** 1912, in Nevada. **Cap.** \$1,200,000; par \$1; 500,000 issued. Transfers made at company's office.

Company took over the property of George Graham Rice's old promotions, the Rawhide Coalition M. Co., Rawhide Queen M. Co. and the Black Eagle M. & M. Co.

Property: 260 acres in Rawhide, Regent district, said to carry free gold and ruby silver, in a 4" vein, opened on the 500' and 600' levels. Developed by 3 shafts and crosscuts to depth of 600'.**Equipment:** includes 10-stamp amalgamation and concentration mill, 35-ton cyanide plant, compressor, and gasoline power.

After the wild boom of 1908 the mines were practically idle until 1912. Worked by lessees from 1912-1916, the production is reported to have been \$800,000 worth of ore averaging \$25 per ton. Company resumed operations in 1916, but operated at a loss and in September, 1917 leased the entire holdings to Salmon, Ross and Flynn, who sank the main shaft to depth

of 1,500'. Lessees have also granted sub-leases, the company receiving royalty on all ores shipped.

During 1918, lessees, or sub-lessees, shipped a small tonnage, and it is reported that lessee shipments in 1920 amounted to \$49,820.

NEVADA OPHIR MINING CO.

NEVADA

Office: 25 Broad St., New York City.

Officers: Walter E. Trent, pres.; C. A. Higgins, sec., with E. E. Rich and Frank V. Sullivan, directors. Supt. Harrington in charge at mine. Inc. 1917, in Utah. Cap. \$100,000; 10c par; 500,000 issued. Registrar & Transfer Co., N. Y. registrar and transfer agent.

Property: 8 claims in Ophir canyon, Nye county, formerly known as the Murphy mine and originally owned by the Twin River M. Co., which was succeeded 1869 by the Cambridge Silver M. Co.

Geology described by Clarence King in a volume of the U. S. G. S. published in 1870. Rich silver ore occurs in a well-defined fissure vein in andesite; a 4' vein averaging \$15 per ton. Orebody ends against a fault.

Development: by 500' and 300' shafts with levels at 100' and 60' intervals, respectively; also by tunnel on 6th level, 700' long in December, 1921, to serve as main working adit and for drainage. Ore reserves are estimated to be \$1,000,000, including 12,000 tons of 14 oz. silver ore on dumps.

Equipment: includes power plant, hoist and 20-stamp mill.

The mine is credited with a production of \$700,000 up to 1868, when the old company went into bankruptcy and the property was sold. Several companies then operated the mine but apparently without success. The Nevada Ophir started work in 1918.

Is regarded as a very promising property.

NEVADA ORE & COPPER CO.

NEVADA

Address: Hawthorne, Mineral county, Nev.

Officers: T. L. Kimmel, pres.; E. M. Freerks, v. p.; J. A. Wright, sec.-treas., with D. D. Ellerbrock and A. W. Beach, directors. H. J. Fick, supt. Inc. 1907, in Nevada. Cap. \$600,000; 30c par; 20,000 outstanding.

Property: 34 claims, 40 acres, near Mina, carrying copper-gold ore in fissure veins. Developed by 560' shaft and 6,000' of workings.

Equipment: includes gasoline hoist and 50-ton cyanide mill. Company has expended about \$120,000 on property.

NEVADA PACIFIC MINES CO.

NEVADA

Probably dead. Address: L. P. Patrick, pres., Goldfield, Nev., at last accounts. Mine office: Mina, Mineral county, Nev.

Property: the Mavflower group in New York canyon, N. E. of Mina, shows copper ore 150' wide, exposed by surface work, from which 15 tons daily were shipped to the Wabuska smelter in 1913. No recent information received.

NEVADA PACKARD MINES CO.

NEVADA

Office: Reno, Nev. Mine at Rochester, Pershing county, Nev.

Officers: Mark Walser, pres.; W. M. Gardiner, v. p.; Frank Margrave, sec.

Inc. 1913 in Nevada. Cap. \$1,250,000; \$1 par; 1,164,492 issued. Stock listed on San Francisco Exchange and Boston Curb. Transfer office: Reno, Nevada.

Dividends, first paid December 20, 1916, amounting to 5c per share; 2nd of 2½c. on September 30, 1918; 3rd of 2½c. on April 20, 1919.

Annual report to June 1, 1918, shows: current assets, \$49,272; liabilities, \$24,188; total earnings, \$235,910; operating profit, \$48,373.

Property: 7 claims, about 130 acres, in the Rochester mining district, said to show ore in silicified schist netted with quartz stringers. It is essentially highly altered sericitized rhyolite, varying from a soft and friable talcose or schistose product to an extremely tough silicified variety. Cerargyrite is the valuable constituent of the ore. Sulphides are not common. Ratio of gold to silver is about 1 to 300. Quartz veinlets are some times high in gold.

Development: by 400' shaft and 5 tunnels, longest over 1,400' Three ore-zones have been opened, and a fourth is indicated. A total of 2,659' of work was done during the fiscal year ending June, 1919, at an average cost of \$31 per foot.

Equipment: is complete including 125-ton mill, with rolls, tube-mills, agitation in cyanide, counter-current decantation, Oliver filters and Merrill precipitation system. Mill feed is about \$9 per ton. Plant is of excellent design and cost \$85,000. Capacity of mill increased to 225 tons, in fall of 1920.

Production: mill treated 32,605 tons in 1916-17, making an extraction of 86.8%, and in 1917-18, 31,390 tons, with an extraction of 88.5%. Output for fiscal year ending June 1, 1918, was 250,378 oz. silver and 357 oz. gold at a total cost of \$5,003 per ton, compared with 339,062 oz. silver and 617 oz. gold and costs of \$5.42 for previous year. Total production to January 1, 1919, was about \$1,000,000. Reported producing 100 tons daily during 1919, to September, when a water shortage forced closing down the mill and curtailing operations. Again in summer of 1920, mill ceased operations for same reason and up to March, 1921, property was practically idle.

Company has had to face many difficulties and has been through much litigation, culminating in October, 1920, when Herman Davis, superintendent, was appointed receiver in a friendly suit involving an indebtedness of \$55,000; Davis died in February, 1921. Frank Margrave, the secretary, succeeded Davis and announced that operations would be resumed.

NEVADA PROGRESSIVE GOLD MNG. CO., INC. NEVADA-CALIF.

Main office: 3204 N. Clark St., Chicago. **Mine office:** Sweetwater, Mineral Co., Nev.

Officers: A. G. Anderson, pres.; Chas. T. Scholz, v. p.; Paul Wohlbruck, sec.; Carl W. Lindeberg, treas.; Niels Buck, trustee, with Isabel Cameron and Nich. Evans, directors. E. F. Hall, supt.

Inc. Sept., 1914, in Nevada. Cap. \$2,000,000; \$1 par \$708,167 in treasury. Bonds: \$300,000-7s, maturing Nov. 1, 1925, authorized; \$40,044 issued, Dec. 31, 1920; each \$100 bond carries bonus of 100 shares of treasury stock. Final payment on properties made in Nov., 1920, and trust deed filed in favor of trustee for bondholders. Assets for Dec. 31, 1920, were \$2,234,133, including plant, \$22,887, and \$496 cash. Liabilities included: loans, \$4,280 and \$59,039, notes payable. Surplus was \$838,927.

Property: 400 acres mineral and 600 acres miscellaneous land, Lyon county, Nev., near Wellington. Also by purchase in 1916 and 1920, the Silverado mine, 9 claims and mill site, of the Columbia Cons. Mines Co. and 13 claims (3 patented) of the Kentucky Cons. Mines Co., both in Patterson district, Mono county, Calif., 7 miles westerly from Sweetwater, Nev. On the California groups, which adjoin, the vein, 2' to 5' wide, is said to carry argentite with a little gold; average value \$15 to \$20; the country formation is andesite. Company also owns power plant on Green Creek.

Development: in California; by 3 tunnels, longest 800' with back of 450'; in Nevada; by 2 shafts, 100' and 300' deep.

Equipment: in Calif.; 10-stamp mill and cyanide department, to be followed by 150-ton cyanide plant when sufficient funds are raised.

Production: in Calif.: \$25,000 from Silverado and \$600,000 from Kentucky, prior to 1916. Present company has shipped, including 1917 and up to Jan. 1, 1921, about \$90,000. The Nevada holdings are inactive.

Examined by T. D. Beniofsky, E. F. Hall and Wm. Kramer.

NEVADA PROTECTIVE MNG. & INVESTMENT CO. NEVADA

Address: E. R. Argersinger, pres.-gen. mgr., or A. J. Canavan, supt., Carson City, Nev.

Property: 2 miles N. of Carson City, adjoins Southwest Comstock Ext. A shaft has been sunk 100' on a granite-limestone contact; ore is said to carry gold, silver, copper and lead. In late 1921, operations were conducted through Southwest Comstock ground. Equipped with 30 h. p. hoist and compressor.

NEVADA QUEEN COPPER CO.**NEVADA**

Office: 464 Mining Exchange Bldg., Colorado Springs, Colo. Mine near Yerington, Lyon county, Nev.

Officers: Duncan Chisholm, pres.; John A. Chisholm, v. p.; R. G. Ridgett, sec.-treas., with Geo. M. Irwin and D. P. Randall, directors.

Inc. Oct. 5, 1906, in Colorado. **Cap.** \$75,000; par 5¢; decreased from \$1,500,000, \$1 par. Is operated as a close corporation. Annual meeting second Monday in October.

Property: 28 claims, patented, 467 acres, lying immediately north of the Nevada Douglas property. Developed by shafts of 186' and 210', showing copper ore said to assay 1.5 to 28%.

Idle for several years, and will remain so until copper market improves.

NEVADA QUINCY MINING CO.**NEVADA**

Address: 303 Judge Bldg., Salt Lake City, Utah.

Property: in Cherry Creek mining district, White Pine county. Company in process of dissolution.

NEVADA RAND MINES CO.**NEVADA**

Address: Box 152, or 11 Fordonia Bldg., Reno, Nev.

Officers: C. G. MacBride, pres.; Dr. C. F. Watkins, 1st v. p.; S. R. Satterthwaite, 2nd v. p.; Wm. V. Rudderow, sec.-treas.-mgr.; J. D. Walker, supt.

Inc. July 8, 1916. **Cap.** \$150,000, increased Aug. 16, 1920, from \$100,000; 10¢ par; 590,200 in treasury. No debts. Annual meeting, 2nd Monday in July.

Property: 7 claims, 110 acres, in Rand district, Mineral county, 17 miles N. E. of Nolan on S. P. R. R. Group shows fissure veins in a mineralized fracture zone, 100' wide, in altered hornblende trachy-andesite; a 240' shoot, from which high grade ore is being shipped, has been opened. Ores are highly silicious, largely oxidized to 250' level, and carry hornsilver, gold and some manganese. Early in 1921, a 75' shoot of primary ore was encountered on 200' level, said to average \$54 for width of 3'.

Development: by 450' shaft, with total workings of 2,500'. Recent work on the 150 and 200' levels, south of the old workings, disclosed a new ore-body from which high grade milling ore has been mined and lesser grade developed. Management plan to explore for primary ore shoot extension. Reserves are estimated to be 30,000 tons of \$15 ore and 1,400 tons \$17 ore on dumps. Production to May 1, 1921, \$50,000.

Equipment: includes 18-h. p. gas. hoisting engine and assay plant. In June, 1919, a 45-ton mill was purchased which it is proposed to move to mine; a cyanide plant is to be added; tests show 96% extraction.

Company appears to have a promising mine in a district that has produced very rich ore, and is following a conservative policy.

Examined by S. E. Montgomery and J. C. Jones of Mackay School of Mines.

Inc. June, 1915, in Utah. **Cap.** \$1,000,000; shares 10¢ par.

Property: in Regent district, Mineral county, Nevada. No recent returns secured.

NEVADA SCHEELITE CO.**NEVADA**

Mail returned from Ely, Nev.

Property: S. E. of Ely, White Pine county, equipped with mill and reported producing tungsten ore during 1918. No production figures obtainable.

NEVADA SHEBA SILVER MINING CO.**NEVADA**

Presumably dead.

Held a lease and option on holdings of the Sheba Gold & Silver Mng. Co., shipped small amounts of ore and concentrate in 1919; became financially involved and forfeited lease about January, 1921. Succeeded as a lessee by Little Giant Gold & Silver Mng. Co., (q. v.) organized by same people.

NEVADA SILVER CONSOLIDATED CO., INC.**NEVADA**

Former office: Wonder, Nev., successor to Vulture-Wonder Mines Co.

Officers: at last accounts, G. H. Manning, pres.; R. V. Ellis, v. p.; N. H. Manning, sec.-treas.; E. S. Cox, asst. sec.; S. H. Brady, mgr.; also directors.

Inc. in Delaware. **Cap.** \$2,500,000; \$1 par; 1,700,000 issued. The New York brokerage firm of Howard A. Riley & Co. was to make a "market" for the stock, but appears to have lost interest in the promotion.

Property: 9 quartz claims, 166 acres, 4 miles N. W. of Wonder, Churchill county. Nearest railroad point is Fallon.

Geology: ore deposition has followed a dike of dense and hard intrusive rhyolite, showing intense silicification. This dike is intruded along the dacite-rhyolite contact, except where quartz-porphry intervenes between it and the dacite. The dike is itself classed as a vein, as it is silicified, and somewhat mineralized. The quartz of the hanging and foot walls carries the best values. Forty-six samples taken from various exposures on the property returned from 0.3 to 13.6 oz. silver per ton.

Development: in 1917 extensive openings were made by lessees, who shipped ore, one lot of 500 tons averaging \$125 per ton. A shaft was down 216' in July, 1917. No recent returns.

NEVADA SILVER CONSOLIDATED MINING CO. NEVADA

Mail returned from only known address, Tonopah, Nev.

Property: 20 miles from Ione, Nye county, N. E. of Tonopah. Formation is said to be almost similar to that at Tonopah and Divide. Veins are fault-fissures, filled with mineralized breccia from which good surface assays are reported.

NEVADA SILVERFIELDS CO. NEVADA

Office: 7 Hanover St., New York. **Mine address:** Battle Mountain, Nev.

Officers: E. N. Breitung, pres.; H. B. Barling, v. p.; C. F. Breitung, sec.-treas.; with C. A. Breitung and H. W. Richter, directors.

Inc. June 27, 1918, in Nevada, and acquired rights to develop, operate and purchase holdings of Silverfields Mng. Co., Ltd., and acquired the Nicklas Mng. Co. by stock exchange, 1 share (par \$5) of Nevada Silverfields for 5 shares (par \$1) of Nicklas.

Cap. \$2,000,000; par \$5; \$1,849,995 outstanding. Company has assumed balance of bonded debt, \$75,000, of the Nicklas company which matured Nov. 1, 1921. Empire Trust Co., New York, transfer agt. Annual meeting, second Monday in March.

Property: Nicklas property, adjacent to that of Silverfields (described under own title), comprises Plumas and other mines, in Galena sub-district, 13 miles S. W. of Battle Mountain, Lander county; 4 claims (2 patented) and 2 mill-sites. The veins occur in sandstones, shales and conglomerates; the Plumas vein, 4' to 6' wide, shows iron stained crushed country rock and quartz, carrying gold, said to average \$10 to \$12 per ton. Other veins carry silver and but little gold.

Development: largely by tunnels, but one shaft is 750' deep; total workings, about 3,000', up to 1919. Proven ore of Silverfields and Nicklas combined amounts to 217,000 tons, of \$12.35 gross value per ton.

Equipment: hoist, experimental mill, etc. A 100-ton mill is in contemplation.

A small production of sulphide ore came from the Nicklas in 1919.

NEVADA SILVER HORN MINING CO. NEVADA

Address: Geo. B. Hutchings, sec.-treas.; 25 Broad St., New York.

Mine office: Pioche, Nev. Frank A. Crampton, mgr.; Thos. H. France, cons. engr.

Inc. in Nevada. **Cap.** \$200,000; par 10¢; \$145,000 in treasury.

Property: Horn Silver group of 5 patented claims and millsite, in new Silverhorn camp, near the Bristol district, Lincoln county, 23 miles N. W. of Pioche. The surface shows a massive quartz vein, reported to be 40' to 200' wide, in shales and limestone cut by porphyry dikes; the vein is said to outcrop 10' to 35' above the surface and to be traceable for 1,800'. Shear zones, occurring at frequent intervals, cover the richest portions of the out-

crop, showing milling ore averaging 15 to 30 oz. silver per ton. It is believed that $\frac{1}{4}$ of the entire body will yield profitable ore of this class. Development: is exploratory only. Assay returns from 500 samples show 0.24 to 134 oz. of silver per ton from width of $1\frac{1}{2}$ to 52', gold value is small.

The discovery of this new silver camp dates back to the fall of 1920 and the Silver Horn boom was well under way early in 1921. The Nevada Silver Horn Mng. Co. is a Weir Bros. & Co. promotion. But little was heard from the new camp during the last 6 months of 1921.

Examined by J. Nelson Nevius, T. H. M. Crampton, and many other engineers.

NEVADA SILVER KLONDIKE MINING CO. NEVADA

Address: Pioche, Nev.

Controlled by Spaeth Mac-Knight & Co. of New York. Maurice J. Fink, gen.mgr.; John Carter Anderson, cons. engr.

Property: the Great Western mine in Stampede gap, Lincoln county, near Pioche, shows a big iron vein in contact with a porphyry dike, developed by a crosscut tunnel. Ore carries lead and silver, with some gold.

NEVADA SILVER MINING & DEVELOPMENT CO. NEVADA

This is a new company operating the Dog group of claims 3,000' S. of the V 7 company in the Reservation district near Schurz, Mineral county.

NEVADA SILVER SHIELD MINING CO. NEVADA

Address: Horse Canyon, via Round Mountain, Nye county, Nev.

Officers: J. L. McCarthy, pres.; C. W. Taylor, v. p.; G. W. Quigley, sec.-treas., with J. B. Witt and John W. Hanson, directors.

Inc. late in 1919. Cap. \$150,000; 10c par.

Property: 8 claims, including the Silver Shield mine in Horse Canyon, opened by two 400' tunnels, one of which to a depth of 160' is said to have revealed 200,000 tons of \$15 to \$18 silver ore.

NEVADA SIMON MINES CO. NEVADA

Mail returned from Tonopah, Nev.

Officers: Lt. Gov. Maurice J. Sullivan, pres.; Al. McCoy, v. p.; A. Shannon, sec.-treas., with H. C. Heidtmann and W. J. Douglass, directors.

Inc. 1919, in Nevada. Cap. \$1,500,000, par \$1.

Property: 7 claims, 2,000' from the Simon mine and on same kind of contact, according to report. One of many new prospects at Mina.

NEVADA SMELTING & MINES CORP. NEVADA

Controlled by and practically merged with the Louisiana Cons. M. Co.

Address: Julius Siegbert, 900 Broadway, New York. Mines near Tybo, Nye county, Nev.

Officers: Max E. Bernheimer, pres.; L. A. Dessar, v. p.; Werner Muel-ler, sec.; A. W. Joseph, treas., with M. Eisenberg, Chas. Lee, L. E. Marsden, N. P. Payne, H. Rawitzer, and C. J. Roberts, directors.

Inc. May, 1906, in South Dakota. Cap. \$5,000,000; shares, \$5 par. Stock stricken from the New York Curb August, 1918. U. S. Corporation Co. New York, registrar and transfer agt. Balance on hand, March 31, 1918, was \$121.

Company realized \$4,090 on 80,000 shares of Greenwater Copper Mines & Smelter Co. stock in 1914, retaining 272,000 out of the 3,058,775 issued shares of the Greenwater Co.; also owns a controlling interest in the Tybo Cons. Mining Co., owning silver-lead-zinc properties at Tybo, Hot Creek district, Nev., operated by the Louisiana Cons. M. Co., which see.

Stockholders of the Nevada S. & M. were given the privilege of exchanging their stock on a basis of 10 shares of Nevada for 3 shares of Louisiana Con. This offer was withdrawn February 10, 1918, after more than 70% of the outstanding stock had been exchanged.

NEVADA STANDARD COPPER CO. NEVADA

Officers: Wilbert E. Marsh, pres., P. O. Box 24, Mina, Nev.; C. E. Korthe, v. p.; L. H. Marsh, sec.-treas., with B. H. Wyant and Matthew W.

King, directors. Marsh sold his majority holdings in the company to G. A. Raessler of Luning in 1919.

Inc. 1912, in Nevada. **Cap.** \$100,000; \$1 par; 6,850 issued.

Property: the Green Mystery group of 11½ claims, the Tray Dollar group of 10 claims and a mill-site, near Luning in Santa Fe district, Mineral county, 8 miles N. E. of Mina, on the Goldfield branch of the S. P. R. R. The Green Mystery claims cover low rounded hills at about 6,000' elevation. The rocks are leached porphyries underlain at 20' depth by low-grade oxidized copper ores. Ore contains bornite, chalcocite and chalcopyrite. Assays reported from 1.1 to 25% copper with small gold and silver values.

Development: by 192' shaft on the Green Mystery claim, which at 45' cut a fault plane fissure that widened to 20' on the 104' level. Crosscutting in 1915 on the 192' level to the north opened up 11' of low-grade copper ore. Management considers it a typical porphyry, or disseminated, copper deposit. There is a bed of copper-bearing conglomerate between porphyry and lime, extending for 4,000' along the contact. An incline sunk to explore this conglomerate is 60' deep with drifts N. & S. for 160'. The Tray Dollar covers several lead-silver veins containing ore assaying from \$16-\$40; a copper-silver contact vein between lime and monzonite is said to assay \$50-\$134 per ton. Developed by 5 tunnels, 50-175' on fissure veins and 335' crosscut to contact vein with 175' further to go to reach the ore-shoots. Property examined by W. R. Brown, W. H. Wiley and C. W. Clark.

Equipment: includes gasoline hoist, pump, blacksmith shop and buildings for men. There are 3 springs, 2½ to 5 miles distant. Report \$25,078 expended on property to March 1, 1919. No salaries paid.

NEVADA SUPERIOR MINES CO.

NEVADA

Probably dead as mine is returned from former office at 625 Dooly Bldg., Salt Lake City. **Mine office:** Jungo, Nev.

Officers: Otto Grantz, pres.; E. R. Reitsch, v. p.; John Geiger, sec., and gen. mgr.; Dr. Allen C. Eakin, treas., with D. R. Peterson, directors, at last accounts.

Inc. 1905, in Utah. **Cap.** \$300,000; \$1 par; assessable; 155,000 shares outstanding.

Property: 21 claims, 420 acres, in Humboldt county, 23 miles from Jungo on the W. P. R. R., shows gold-silver-lead-zinc ore in fissure veins traversing schist and slate. The main orebody from 2-20' wide, strikes N. W. and is said to give average assays of 8.6 oz. silver, 11.2% lead, 1% copper, 8% zinc. Shipments of crude ore made by lessees in 1915 ran \$15-\$24 per ton. Developed by 2 tunnels, 1,000' and 2,500' long, and 330' vertical shaft.

Equipment: includes 75-ton concentrating mill, steam power, compressor, pump and hoist. Company has been inactive since 1913 owing to lack of funds.

NEVADA TRI-METALLIC CONS. MINING CO.

NEVADA

Address: R. C. Miller, supt. Marietta, via Mina, Nev.; or W. M. Gardiner, sec., Reno, Nev.

Officers: J. J. Duffie, pres., 1108 Hearst Bldg., San Francisco, W. R. Berry, v. p.-treas.; W. M. Gardiner, sec., with W. D. Wright and J. N. Morris, directors.

Property: is a consolidation of 2 groups including the Shepherd mine, in the Silver Star district. Mineral county, 16 miles S. W. of Mina. Quartz veins occurring in quartzite and conglomerates are developed by tunnels. Lessees are working the claims and shipping small amounts of high grade ore.

NEVADA UNION COPPER MINES CO. (THE)

NEVADA

Office: 611 Mining Exchange Bldg., Denver, Colo.

Officers: F. D. Goodale, pres.-treas. gen mgr.; M. H. Muller, sec.; Paul Esch, v. p., with Byron Tift, Robt. Kettner, A. M. Goodale, and Henry Truelson, directors.

Inc. June 29, 1917, in Colorado. **Cap.** \$600,000; 10c par; 2,000,000 shares in treasury, July, 1919. Company acquired holdings of the Honest Endeavor Mng. Co., fully described in Volume XIII. The stock of the latter company was exchanged on a share for share basis. In January, 1919, stockholders authorized an issue of \$25,000 five-year 1st mortgage bonds, of which \$5,000 have been placed among the stockholders with a stock bonus of an equal amount and \$4,000 additional had been subscribed at last report.

Property: 12 claims, 200 acres, in Yerington district, 1½ miles from Ludwig, Lyon county.

Development: by several shafts, one 120' deep, and some lateral work. The Union Blue is the principal vein, being described as a porphyry intrusion between diorite walls. On surface between a streak of high-grade ore and one of white talc there is said to be 32' of mineralized diorite-porphyry. In 1919, drifts were run E. and W. on the 120' level with expectation of opening an orebody of commercial size.

Recent report state that property shows 1,000' of development, costing \$60,000, on two principal veins, the Union Blue and Golden Sunset, each more than 30' wide; shipments of 12% copper ore are also reported. Information is in part derived from advertisements appearing February, 1921, offering a limited amount of stock at 5c per share. But reference should be made to what is said in Vol. XIII; 14 years have now passed since operations were first begun and there seems but little to show for them.

NEVADA UNITED MINES CO.

NEVADA

Address: 441 Equitable Bld., Denver, Colo.

Officers: W. J. Chamberlain, pres.; H. F. Crocker, v. p.; R. J. Pitkin, sec.; E. S. Kassler, treas., with H. B. Northrop, F. N. Bancroft, W. G. Boyle, A. G. Bowen and A. G. Burton, directors.

Inc. February 6, 1906, in Arizona. **Cap.** \$3,500,000; \$1 par; 2,962,952 issued.

Property: 50 claims, 38 patented, about 600 acres, in the Ward district, White Pine county, 18 miles from Ely, includes the Ward mine, said to show chamber deposits of lead ore in limestone. Ore contains lead, silver and iron.

Development: by 2 adits, 1,500 and 2,400' long, to 350' depth. In 1919, 1,200' of drifting was done. An estimate of Oct. 1, 1920, gave ore reserves of 200,000 tons averaging 7% lead and 2 to 3 oz. silver. Mining is by caving system and output was about 2,800 tons monthly in 1917. Shipments continued during 1918-'19 and up to Sept. 1, 1920. Because of unfavorable economic conditions, exploratory work only was done in 1921.

Property is now worked by The Ward Leasing Co., successor to Nevada United Mines Leasing Co.

NEVADA UNITED MINES LEASING CO.

NEVADA

Name changed, 1920-21, to The Ward Leasing Co., which see.

NEVADA UNITED MINING CO.

NEVADA

Oliver G. Jennings, pres. and treas., 49 Wall St., New York. An inactive corporation. Fully described in Vol. XI Copper Handbook.

NEVADA-UTAH MINES & SMELTERS CORP.

NEVADA

See Consolidated Nevada-Utah Corporation.

NEVADA VOLCANO MINES CO.

NEVADA

Address: Thomas Harney, Pioche, Nev.

Property: Harney group, 1 mile east of Pioche, Lincoln county, said to show a 9' vein of silver-lead-gold ore, running \$80 to \$100 per ton. Production by company and lessees from 1915 to June, 1919, reported to be \$75,000.

Suit was filed in June, 1919, by Llovd Brothers of Pioche, who claim ownership of the mine by right of prior location.

No recent information.

NEVADA WILSON MINING CO.**NEVADA**

Address: A. L. Haight, Fallon, Nev. Company organized 1918 to operate the Wilson mine, and 2 additional adjoining claims, at Eastgate, Churchill county, 20 miles E. of Fairview. But in 1919, litigation over title begun with former company, settlement was reached in 1921. See **Nevada Lincoln Mng. Co.** for details.

NEVADA WONDER MINING CO.**NEVADA**

Office: 572 Bullitt Bldg., Philadelphia, Pa. **Mine office:** Wonder, Nev.
Officers: Chas. R. Miller, pres.; J. H. Whiteman, v. p.-gen. counsel; with Samuel Bell, Jr., M. B. Cutter, Barton Hoopes, Jr., Jos. W. Murray and Wm. M. Potts, directors. P. S. Bickmore, sec.-treas.; H. C. Carlisle, gen. supt.

Inc. Sept. 19, 1906, in Delaware. **Cap.** \$1,500,000; \$1 par; \$91,513 in treasury. Book value of abandoned property, \$893,953, written off against capital stock; leaving balance of \$606,047.

Dividends: paid at the rate of 10% annually. Last dividend paid May, 1919. Total is \$1,549,002. Transfers made at company's office. Registrar, Fourth St. Natl. Bank, Philadelphia. Annual meeting, 3rd Wed. in March.

Balance sheet for year ending Dec. 31, 1920, shows assets; \$636,457, of which \$169,461 (\$120,000 Peruvian C. & S. Co.) is for stock owned, \$255,000 for demand loans, \$31,086 for cash, and \$56,241 for plant. Current liabilities total \$30,410. Receipts were \$587,774, including \$15,340 for mill products. Income account shows a net loss of \$30,785 due largely to examination and exploration of outside properties.

Property: includes by nearly complete stock control claims of Wonder Extension and Reorganized North Star mining companies and of Hidden Treasure Mng. Corp., etc., amounting to 328 patented and 73 unpatented acres in Wonder district, Churchill county. Also owns plant of the Churchill Milling Co., with capacity of 170 tons.

These mining properties becoming exhausted, all operations ceased in Dec., 1919; during 1920 and before, company has been in search of other properties. A one year lease from August 1918 on holdings of the Monitor Belmont Mng. Co. (q. v.), was relinquished as no ore was found, after expending about \$90,000. An option on the Bell Mountain property in Nevada, was also surrendered; exploration cost \$15,839. Examinations were made of mines in Nevada, Arizona, New Mexico, and California, at cost of \$15,968. Also in 1920, company purchased 200,000 shares of the Peruvian Copper & Sm. Co., property of which is situated in the Youyos district of Peru.

Development: by shaft and winze to depth of 2,000'; total workings, 70,449'. Work done in 1918 aggregated 8,872', in 1919, 4,000'. Results in 1919 were not encouraging, either at depth or in upper levels.

Production:

	Tons	Ag. oz.	Au. oz.	Total Value	Av. Rec. %	Net. Oper.	
						Cost p. t.	Profit p. t.
1919.....	40,570	468,797	5,514	\$ 629,240	\$ 8.11	\$6.38
1918.....	49,710	657,815	5,108	742,306	91.82	10.09	3.62
1917.....	55,800	929,284	7,882	822,940	89.10	10.78	3.97
1916.....	72,241	1,352,615	11,466	1,112,835	92.67	8.90	5.37

During 1920, \$16,376 was obtained from products resulting from mill clean-up.

For more detailed description, see Vol. XIV.

NEVADA ZINC CO.**NEVADA**

G. L. Bemis, Tobar, Elko county, Nev., gen. mgr., at last accounts.

Property: the Polar Star group near Tobar, has a zinc-lead deposit,

40' wide and opened for 600' on surface. Ore said to average from 30-35% zinc and from 4-5% lead. Developed by tunnel and 500' shaft.

During 1917, reported that production amounted to 200 tons per month; in 1918 a small lot of oxidized zinc ore was shipped. No reports since.

NEW ALTO DIVIDE MINING CO.

NEVADA

Office: Goldfield, Nev.

Officers: Joseph Mayer, pres.-mgr.; J. K. Turner, v. p.-cons. engr.; Ben Gill, sec.-treas., with C. A. Leager and Chas. S. Sprague, directors.

Inc. in 1921 to take over holdings of Alto Divide Mining Co., of which the entire (1,500,000 shares) non-assessable stock had been issued and no funds available. **Cap.** \$200,000; par 10c.; assessable; 470,000 treasury shares; shareholders of old company receiving new stock on a share for share basis.

Property: 4 claims, 70 acres, on eastern boundary of Tonopah Divide, Gold Zone and Gold Reef groups, Gold Mountain (Divide) district, Esmeralda county. New company owns also the adjoining Gold Zone Fraction claim.

Development: by a shaft, started in March, 1919, at a point 135' S. of Arkansas claim of Gold Zone, near a prominent outcrop. Was 400' deep, with total workings of 2,050' in April, 1921. All lateral work is on 400' level and a 190' easterly crosscut has exposed a N.-S. vein, which in the S. drift is 10' wide, averaging \$8.60, largely in silver.

Equipment: 50-h. p. motor and 30 h. p. hoist, 6-drill compressor, machines, etc.

The same management as **East Divide Mining Co.**

NEW BONANZA COMSTOCK MINES CO.

NEVADA

Inc. December, 1919, in Nevada, by C. A. Garret, T. B. Gordon, Gurney Gordon, F. M. Kleppe, and O. R. Vaughn. **Cap.** \$75,000; 20c par. No information as to property obtainable.

NEW CALIFORNIA TONOPAH MINING CO.

NEVADA

Formerly the California & Tonopah Mining Co., bankrupt, purchased by Frank Stall from receiver, late in 1919, and company reorganized under new name.

Address: Frank Stall, pres.-mgr., Tonopah, Nev. W. R. McCrea and Joseph Hutchins are other principals.

Property: of record in 1903, comprises 7 claims and 2 fractions, in Tonopah district, Nye county, E. of Jim Butler and S. of Rescue Eula. Is opened by 700' shaft and winze to 950'; shipping ore has been found on 400' and 600' levels by present management, and some shipments are being made. Ground now being explored between 700' and 950' levels. Property fully equipped.

In summer of 1921, a lease was taken on the easterly end of the Wandering Boy claim of Jim Butler Tonopah Mng. Co., operations to be conducted through the latter's shaft.

NEW ELY CENTRAL COPPER CO.

NEVADA

Company's affairs have been liquidated, its charter alone remaining; see Vols. XI and XIII. Entire property owned by **Cons. Coppermines Co.**, which see.

NEW EMPIRE GOLDFIELD MINES CO.

NEVADA

Address: C. D. Terwilliger, Clay Peters Bldg., Reno, Nev.

Officers: C. D. Terwilliger, pres.; Chas. Wittenberg, v. p.; F. M. Manson, treas., with E. Marks, directors.

Inc. 1915, in Nevada. **Cap.** \$1,500,000; shares \$1 par.

Property: 3 claims and a fraction, 50 acres, adjoining the Lone Star on the E. and Commonwealth property on the N. at Goldfield, formerly owned by the Empire Gold Mining Co.

Development: by an old 150' shaft and 150' crosscut said to have disclosed a 16" streak of \$20 ore.

Equipment: includes electric power and 40-h. p. electric hoist. Company is still in existence, but presumably idle.

NEW GOLDFIELD SIERRA MINING CO. NEVADA

Described in Volume XIII. Merged December, 1919 with the **Yellow Tiger Consolidated Mining Co.**, which see.

NEW GOLDFIELD SIMMERONE MINING CO. NEVADA
Inc. 1915, in Nevada.

Property: the Simmerone Fraction at Goldfield, Esmeralda county and a 3-year lease and bond on the adjoining Blue Bull group, worked through the Simmerone workings. The Simmerone, acquired 1914 at sheriff's sale, is developed to 250'. Funds exhausted in 1917 and company presumably dead.

NEW JERSEY MINES CO. NEVADA

Offices: 628 Hudson St., Hoboken, N. J., and Goldfield, Nev.

Officers: Henry V. Broeser, pres.; L. A. Opdyke, v. p.; J. H. Stegman, treas.; Geo. H. Snyder, sec., Jersey City; above, with 14 others form the directorate. Harry Ernest, mgr.

Inc. Jan. 15, 1912, in Nev. Cap. \$1,250,000; \$1 par; outstanding, 1,010,850 shares; assessable 1c par share per year. Registrar & Transfer Co., New York, registrar, 5,000 shares sold for \$29 the lot at public auction in New York on Dec. 22, 1920.

Treasurer's report for year ending March 31, 1917, shows receipts of \$18,017. Disbursements amounted to \$17,672, leaving balance on hand, \$346. No later returns given out.

Property: 5 claims, 3 patented, 53 acres, several miles N. E. of Goldfield, said to show gold-silver ore, but not in commercial quantities.

Development: 507' shaft, with work done in 1916 on the 330' and 400' levels. Idle.

NEW SUTHERLAND DIVIDE MINING CO. NEVADA

A reorganization of the Sutherland Divide Mng. Co., effective Jan. 10, 1920, when 70% of stock issue of old company unanimously voted to change name and to place stock on assessment basis.

Office: Goldfield, Nev.

Officers: C. R. Evans, pres.; J. B. Kendall, v. p. and mgr.; R. W. Cattermole, sec.-treas., with C. H. Webster and F. B. Mechling, directors.

Inc. May 8, 1918, in Nevada. Cap. 1,500,000 shares; 10c par; assessable; 574,800 in treasury.

Stock of old company, 925,000 shares, was exchanged, share for share, for new stock, with initial assessment of 1c per share; Feb. 12, 1920, was final exchange date. Stock in treasury was increased by 260,800 shares; J. B. Kendall was trustee. Assessment No. 2 of 1c was levied, May 19, 1920. All obligations of old company will be paid.

Property: 6 claims, 130 acres, 1½ miles N. of the Tonopah Divide mine. Examined by J. B. Kendall, and A. H. Elftman, who said that outcrops assayed \$2.20 in gold; silver increases with depth; and that sinking should be done to 600'. Ground is crossed by a well-defined vein proved by various opencuts and shallow shafts, from two of which ore was shipped by former lessees; a pit 800' E. of the new shaft now shows \$6.50 ore.

Development: by 900' incline shaft sunk on a fault vein, opened on the 300' level by 30' crosscut and 239' of drifts, and a 25' crosscut on the 400' level, with a 201' drift on the vein. The 400' showed some \$10.55 ore, and narrow seams of rich ore (\$70) were found on the 300' level. This same shaft is said to have produced ore for shipment some 15 years ago, the ground being owned early in 1901 by the South Tonopah Mining Co.; the second mining company to be incorporated in the Tonopah region.

Equipment: 50-h. p. hoist and all the machinery needed for development to depth of 1,000'.

NEW TONOPAH DIVIDEND MINING CO. NEVADA

Office: 219 State Bank Bldg., Tonopah, Nev.

Reorganization of the Tonopah Dividend Mng. Co., involving a change of name and the making of stock assessable, effective March 1, 1921.

Officers: J. R. Cunningham, pres.; J. M. Fenwick, v. p.; E. P. Cullinan, sec.-treas., with Ernest Cole and Herman Albert, directors. W. H. Hart, supt.

Inc. in Nevada. **Cap.** \$200,000 increased April 1, 1919, from \$150,000; 10c par; 1,280,000 issued. Tonopah Banking Corp., Tonopah, registrar. Listed on San Francisco Stock Exchange.

Shares of original company were exchangeable, share for share, for stock of new company, up to May 25, 1921, with payment of 1c per share. Assessment No. 1, of 1c., was levied Aug. 13, 1921.

The Dividend is controlled by H. G. Humphrey, of Reno; Zeb Kendall, George Wingfield, J. H. Miller, and others, all of whom are interested in Divide Extension.

Property: 6 claims, 85 acres, adjoining Tonopah Divide on south, Brougner, Divide Extension and Divide Consolidated, in Gold Mountain (Divide) district, Esmeralda county. Threatened litigation with the Midway Divide was adjusted in April, 1919.

Development: trenching in June, 1919, had exposed the Divide Extension vein, near the joint boundary, where it is joined by an E.-W. vein forming a large fractured area that is enriched to a high degree. At one point assays ranging from \$50 to \$150 were obtained across 12' of this material. The ore is said to contain argentite and stephanite. Opened by 2 shafts, 800' and 400', in search respectively of Victory Divide and Divide Extension veins. Reported that \$150,000 had been expended up to March, 1921.

Equipment: electric hoist, compressor, drill, etc.

NEW TRILBY DIVIDE MINING CO.

NEVADA

Office: Tonopah, Nev.

Officers: D. F. Murphy, pres.; J. M. Fenwick, v. p.; E. Lang, sec., with Owen Murphy and C. J. Morabe, directors. This directorate is the same as that of the Reorg. Rosetta Divide.

Inc. March 28, 1919, in Nevada. **Cap.** 1,500,000 shares; 10c par; assessable. Listed on San Francisco Stock Exchange.

Organized to take over property and equipment of the Trilby Divide Mng. Co. sold out at sheriff's sale. Opportunity was given to stockholders of old company to exchange, share for share, for new stock plus 1c bonus, on or before March 31, 1921.

Property: 4 claims, 50 acres, adjoining the Belmont Divide, the Rosetta and Argonne, in Gold Mountain (Divide) district, Esmeralda county. Examined by A. H. Elftman. Surface exposures said to be good. Developed by shaft, 180' deep, March, 1921, with the usual equipments.

Reported that a property had been acquired at Hornsilver, Esmeralda county, in January, 1922.

NEW TUSCARORA MINING CO.

NEVADA

Address: Tuscarora, via Elko, Nev. **Officers:** W. J. Craig, pres.-mgr.; J. R. Austin, v. p.; W. J. Wolstenholme, sec.-treas., with E. L. Soule, H. S. Barnhart and P. D. Fenkell, directors.

Cap. \$50,000; shares 5c par; 500,000 issued.

Property: 4 claims in the old Tuscarora district, Elko county, Nev., developed by 750' tunnel. Shallow shafts said to show ore with high values in gold and silver.

NEW WILLARD GOLD MINES CO.

NEVADA

Formerly Willard Metals Mng. Co.

Address: E. E. Roberts, pres., Lovelocks, Pershing county, Nev. L. C. Deady and W. J. Beauchamp (mgr.), directors.

Property: 10 claims close to the Shepherder mine in the Loring district. Surface exposures said to be good.

NEW YERINGTON COPPER CO.

NEVADA

Formerly Yerington Copper Co.

Company inactive and winding up its affairs, July, 1919. Property at Yerington, Lyon county, fully described, Volume XIII.

NEW YORK DIVIDE MINING CO.**NEVADA****Address:** Tonopah, Nev.**Officers:** D. S. Dickerson, pres.; M. J. Sullivan, v. p.; H. A. Stewart, sec.-treas., with Joseph Hutchinson and A. G. Raycraft, directors.**Inc.** in Nevada. **Cap.** \$200,000; shares 10c par.**Property:** 5 claims north of Sutherland and about 2 miles north of the Tonopah Divide. Is a prospect.**NEW YORK ORO CORP.****NEVADA****Address:** Geo. A. Manning, Campbell, N. Y.**Cap.** \$10,000,000; par \$1.

A holding company, presumably, organized prior to 1912. In 1914, reported to be forming a consolidation of a number of properties in the Wonder district, Churchill county. Six years later it was announced that additional ground has been acquired and that a large mill would be erected.

The corporation controls also the **Goldfield Oro Mng. Co.** (q. v.). Mr. Manning is president of **Nevada Silver Cons. Co., Inc.**, successor to Vulture-Wonder Mines Co.

NICKLAS MINING CO.**NEVADA**See Vol. XIV; property taken over by **Nevada Silverfields.****NIVLOC MINING CO.****NEVADA**See Vol. XIV; property now controlled by **Nivloc Northern Mines Co.**, which see.**NIVLOC NORTHERN MINES CO.****NEVADA**

Formerly Nivloc Mng. Co.

Address: Silverpeak, Nev.**Officers:** A. G. Cummings, pres.-mgr.; John M. Cotter, v. p.; Fred Remick, sec.-treas., with Hy. Smith and Frank Minner, directors.**Inc.** in Nevada to take over property of the former Nivloc Mining Co.**Property:** the Harry C. Stimler group of 15 claims in Silver Peak district, Esmeralda county, 8 miles S. W. of Silverpeak. A quartz vein, upward of 100' wide, averaging \$10 gold, in limestone, is reported.**Development:** by 440' shaft; total workings, about 1,000'. In Oct., 1920, it was claimed that 1,500,000 tons of milling ore were developed, and that present management contemplated the erection of a 100-ton mill.**NIXON-NEVADA MINING CO.****NEVADA**

Dead; see Vol. XIV. In September, 1920, judgment for \$1,343 was set for \$6,993, paid in behalf of creditors, and were not redeemed by the company. Equipment being salvaged and mines to be abandoned.

Address: W. M. Gardiner, Nixon Bldg., Reno, Nev.**NOME DIVIDE MINING CO.****NEVADA****Office:** Goldfield, Nev. Bert Ward, res. agt.**Officers:** Chas. W. Brandon, pres.; J. W. Van Winkle, v. p.; with J. T. Walters, James Ford and Chas. McCall, directors.**Inc.** May, 1919, in Nevada. **Cap.** \$150,000; par 10c; 750,000 treasury shares.**Property:** 12 claims, 141 acres, next to Marinetta and Yukon Divide.**NONPAREIL MINING CO.****NEVADA**

Mail returned from only known address, Reno, Nev.

Officers: L. T. McAtee, pres.; M. Helliere, sec.**Inc.** 1919, in Nevada.**Property:** Nonpareil group on Lincoln hill, Rochester mining district, Pershing county; mine is credited with a production of \$30,000 in gold.**NORMAN SILVER MINING CO.****NEVADA**Absorbed in November, 1919, by **Fagan Consolidated Silver Mines Co.**, which see.**NORRIS DIVIDE MINING CO.****NEVADA**

Mail returned from only known address, Tonopah, Nev.

Officers: Walter Norris, v. p. and mgr.; J. T. Murphy, v. p.; C. P. Johnson, sec.-treas., with Walter Hogg, and E. Marks, directors.**Inc.** May, 1919, in Nevada. **Cap.** \$150,000; shares 10c par.

Property: adjoins on the west the East Divide Extension, Big Divide, and Marne. The ground is supposedly crossed by the East Divide vein zone for a distance of 1,800'.

NORTH BEN HUR DIVIDE MINING CO.

NEVADA

Office: Goldfield, Nev. B. E. Garnett, agt.

Officers: F. C. Beedle, pres.; H. B. Ruhl, v. p.; B. E. Garnett, sec-treas., with Albert Ninnis and A. B. Garnett, directors

Inc. in Nevada. **Cap.** \$150,000; 10c par: 750,000 in treasury.

Property: 3 claims and a fraction, adjoins the Ben Hur, Chariot, Pershing and Romance group.

NORTH DIVIDE EXTENSION MINING CO.

NEVADA

Address: J. G. Crumley, Erie Main St., Tonopah, Nev. R. W. Piercy, sec.

Company organized by J. G. Crumley to take over property of North Divide Mng. Co., of which he had been a director. Stock in new company was offered to shareholders of old company for 1c per share.

Property: the Moonlight group 6 claims, 120 acres, north of the Apex Divide and west of the Sutherland. Is one of the oldest properties of the district and covers strong veins.

Development: by 3 shafts, 60 to 450' deep, opening 3 gold veins.

Equipment: complete, including new electric hoist. Machinery of old company reported sold to Natural Soda Products Co., operating near Silver Peak. Esmeralda county.

NORTH DIVIDE MINING CO.

NEVADA

Dead; see Vol. XIV. In September, 1920, judgment for \$1,343 was secured against the company, property was sold by the sheriff and has been taken over by the North Divide Ext. Co., which see.

NORTHERN LIGHT COPPER CO.

NEVADA

Property: 6 claims in Lyon county, some 14 miles E. of Yerington. A 360' shaft has opened an orebody averaging 6% copper, with some ore of higher grade.

Property was taken under option by the Mason Valley Mines Co. early in 1919, but relinquished inside of 12 months, after shipping 2,800 tons of 4.8% copper ore; reported that orebody was not of sufficient size.

In August of 1920, company was in litigation regarding title.

NORTH MOUNTAIN MINING CO.

NEVADA.

Controlled by John Dern, 600 Dooly Blk., Salt Lake City, Utah.

Property: Gilligan group, 11 patented claims in the Egan district, near Cherry Creek, White Pine county, first operated in 1870 under management of General Rosencrans.

Ore occurs in veins cutting quartzite, that are from 4 to 5' wide, run E.-W. and dip steeply N. In 1884, a 1,600' tunnel was driven which is reported to have cut the vein 1,100' from the portal at a depth of about 600' on its dip. The demonetization of silver stopped further development until 1918, when operations were resumed.

Lease held by Marion L. Thomas, et al., was relinquished.

NORTH NEVADA MINES CO.

NEVADA

Mail returned from former address, Reno, Nev.

Property: claims at Fairview, and 7 claims on Rebel creek, northern Humboldt county, acquired late in 1919. The latter have 600' of tunnels and other work, ore carrying silver and gold.

NORTH STAR MINING CO.

NEVADA

See Vol. XIV. and Star Gold-Silver Mng. Co. in this volume.

NORTHWEST DIVIDE MINING CO.

NEVADA

Address: Tonopah, Nev.

Officers: William Forman, pres.; W. J. Douglass, v. p.; C. C. Boak, sec.-treas., with W. E. Fuller (supt.) and M. H. Page, directors.

Inc. March 17, 1919, in Nevada. **Cap.** \$150,000; 10c par; 485,000 in treasury; 1,015,000 issued. Listed on San Francisco Stock Exchange.

Property: 5 claims, 74 acres, lying N. of Divide Consolidated, and 3,500' N. of Tonopah Divide. A ledge, 6 to 10' wide, carrying from a trace to \$4 in gold and silver, was opened on 3 levels.

Development: by shaft 300' deep, March, 1921, when operations ceased; reported that leached conditions will necessitate development to greater depth.

OCCIDENTAL CONS. MINING CO.

NEVADA

Address: care R. L. Richie, 116 Ridge St., Reno, Nev.

Inc. in Nevada. Cap. \$1,500,000; \$1 par; all issued.

Property: 5 claims, 74 acres, lying N. of Divide Consolidate, and along the Brunswick, or Occidental lode.

Development: to depth of 450' as compared with 1,000'-1,500' nearby. Ore reserves said to be 350,000 tons of low grade mill ore.

Production: under ownership of the late Senator Fair, mine produced nearly \$2,000,000 to depth of 200'. In year ending Nov. 15, 1892, production was 3,864 tons of ore that averaged \$5.90 gold and \$14.33 silver, or \$20.23 per ton. Mill recovery was but 86.6% of values.

OCCIDENT DIVIDE MINING CO.

NEVADA

Address: P. O. Box 646, Goldfield, Nev.

Officers: R. S. Wilbur, pres., F. E. Schultz, v. p.; R. T. Armstrong, sec.-treas., with H. F. Bruce, cons. engr., and J. R. Richardson, directors.

Inc. in Nevada. Cap. 1,500,000 shares. In August, 1920, 100,000 shares were being offered at 6c, and promotion stock was reported pooled.

Property: 8 claims in West Divide district, Esmeralda county, 5 miles W. of Tonopah, adjoins the West Divide Mng. Co. on the S. Reported that ground covers a series of quartz veins carrying silver, one of which is on the strike of the West Divide ledge; high grade seams assay 60 to 300 oz. silver per ton.

Development: by 70' shaft and tunnels.

OLD IMPERIAL MINING & MILLING CO.

NEVADA

Cherry Creek, White Pine county, Nev. Property advertised as sold for \$125 delinquent tax, January, 1916.

OLD TIMER DIVIDE MINING CO.

NEVADA

Office: Tonopah, Nev. Ben D. Luce, res. agt.

Officers: W. Douglass, pres.; Roger Dougherty, v. p.; B. D. Luce, sec.-treas., with Wm. Watters, and R. Finn, directors.

Inc. April, 1919, in Nevada. **Cap.** \$150,000; 10c par; 750,000 shares in treasury.

Property: the 2 Afterthought claims and 2 fractions, adjoining the Sutherland on north, considered "inside ground," on the trend of well-defined veins.

Equipment: sufficient for shaft sinking and exploration.

OLYMPIC MINES CO.

NEVADA

Address: Ormeo, Mineral county, Nevada.

Officers: E. G. McConnell, pres.; Andrew Carrigan, v. p.; G. L. Panario, sec., 460 Montgomery St., San Francisco, Calif.; Italian-American Bank, San Francisco, treas., with Jas. P. Nelson, directors. R. J. Bonnemort, gen. mgr.

Inc. May, 1916, in Nevada. **Cap.** \$200,000; 10c par; 1,200,000 issued.

Property: the Royal George group of 9 claims, 160 acres, in Bell district, Mineral county, 25 miles N. E. of Mina, and 4 miles N. of Simon Silver-Lead mine. Examined by R. H. Searles.

Ore: gold-silver occurs in a fissure vein, 4' average width, in rhyolite. Mine has a fine orebody, which is unfortunately cut off westward by a fault, displaced segment not having yet been located. See U. S. G. S. Bul. 725 for geological conditions and possible solution for locating the W. segment.

Development: by 225' incline with levels at 100.150 and 200'.

Equipment: includes 25 h. p. engine, compressor, etc. Destroyed by fire on Nov. 21, 1919, the cyanide mill of 70-ton capacity was rebuilt and put

into operation, September, 1920; extraction was 90 to 92%. Water is supplied through a 9-mile pipe line.

Production: up to burning of mill, 35,000 tons of concentrating ore running \$15 to \$20 per ton. Gross returns from shipments in 1918 amounted to \$212,000, mainly in gold.

Net profits from operations have been small, because of expense of exploration and rebuilding mill. On May 1, 1921, ore in sight being exhausted, all work was suspended.

Company is reported to have acquired (1921) holdings of Warrior Gold Mng. Co. (q. v.) in Goldyke district, Nye county, said to have a 2' vein averaging \$30 to \$60 per ton, developed to 200' depth.

ONONDAGO MINES CORPORATION

NEVADA

Dead. Corporation dissolved, February, 1920. Fully described in Vol. XIV.

OPERATOR DIVIDE MINING CO.

NEVADA

Office: Tonopah, Nev.

Officers: Julius Goldsmith, pres.; A. G. Raycraft, v. p.; T. J. Lynch, sec.-treas., with W. W. Kelly and L. Dunn, directors.

Inc. March 8, 1919, in Nevada. **Cap.** \$150,000; 10c par. Listed on San Francisco Stock Exchange.

Property: 4 claims, south of the Toggery Divide, developed by 400' shaft. Has good showing on claims.

Equipment: 37-h. p. hoist, 5-drill compressor, etc.

In spring of 1920, reported that company was to be placed on an assessable basis; no information since.

OPHIR SILVER MINING CO.

NEVADA

Offices: 787 Mills Bldg., San Francisco, Calif., and Virginia City, Nev.

Officers: Zeb Kendall, pres. supt.; H. G. Humphrey, v. p.; Frederic Vincent, 2nd v. p.; A. P. Swain, sec.-treas., with Alex Wise, directors.

Inc. April 30, 1860, in California; reinc. Jan. 26, 1921, in Nevada. **Cap.** \$504,000; 50c par; increased from \$201,600; \$1 par; and made assessable at time of reincorporation; all outstanding. Assessments of 3¢ each levied in May and September, 1921. Listed on New York Curb and San Francisco Exchnge. Annual meeting, Jan 2.

Property: the Ophir mine, 1 patented claim, 40 acres, extending for 675' along the Comstock Lode at Virginia City, Storey county; bounded on the north by the Mexican mine, on the south by the Cons. Virginia and operated under the same management. Ore, as mined, varies from \$15 to \$50 per ton in gold and silver and occurs in veins up to 10' in width.

The company also owns a 1/3 interest in the mill of the Mexican Milling Co., Virginia City.

Development: by 2,900' shaft and several miles of workings. The general plan is to open old workings above the Sutro drainage tunnel, and block out low-grade ore left years ago. Part of the ore consists of stope filling.

In 1919, ore was developed on the 1,800, 1,900, and 2,000' levels; while exploration was done at 1,465, 1,600 and 1,700'. This work continued during 1920, and early in 1921, a drift on the 2,000' level of the Hardy vein, was reported to have encountered 6' of ore, assaying \$30 to \$45.

Production: to date about \$20,000,000. During 1919, output was about \$30,000 per month, with equal value in gold and silver; in 1920, a total of 2,270 tons of ore was sent to the Mexican mill, having a gross value of \$57,956, and netting \$43,283.

ORGANIZERS CONS. GOLD MINES CO.

NEVADA

Office: 2250 Ninth St., Boulder, Colo.

Officers: Fred A. Fair, pres.; Dudley A. Degge, sec.-treas.-mgr., with T. V. Wilson, directors.

Inc. 1914, in Arizona. **Cap.** \$100,000; par \$1; 10,000 shares outstanding.

Property: 4 claims, 3 patented, 60 acres at Montezuma and Wellington.

Lyon county, said to show fissure veins with ore, carrying gold, silver, copper and lead.

Development: by 178' vertical shaft and 200' tunnel.

The company is the successor to the Wellington Association and related string of Colorado and Nevada incorporations, against which a fraud order was issued by the U. S. Postoffice Department in 1909.

Extravagant literature issued in 1914 was evidently put out solely for stock-selling purposes, as the property was not being developed. Unfavorably regarded.

ORIENTAL DIVIDE MINING CO.

NEVADA

Organized by George Wingfield and H. C. Brougner to develop claims near those of Fortuna Divide, over 3 miles N. W. of Gold Mountain.

ORIENTAL MINING CO.

NEVADA

Address: 565 Mills Bldg., San Francisco, Calif., and Tonopah, Nev.

Inc. 1919, by Geo. Wingfield, C. Brougner, and F. E. Ostwald, J. L. Joseph, pres. and mgr. **Cap.** \$300,000; 20c par; 600,000 shares in treasury.

Property: New York-Tonopah group, 80 acres, adjoining the Mac-Namara-Crescent and under same management.

Development: by 850' shaft. **Equipment:** electric hoist and 100 h. p. motor installed in June, 1919.

ORIGINAL BULLFROG MINES SYNDICATE

NEVADA

Dead. A reorganization planned in 1917, to be known as the Reorganized Original Bullfrog Mines Syndicate, did not materialize, owing to disagreement between judgment creditors.

Reported in September, 1921, that claims were to be sold for taxes.

ORIGINAL KLONDYKE DIVIDE MINING CO.

NEVADA

Address: Harry McNamara, pres., Box 474, Tonopah, Nev. Transfer agt., Security Transfer & Registrar Co., New York.

Property: 200 acres in Klondyke district, 6 miles south of Divide, Esmeralda county. Vein said to be exposed for 3,000', and from 2 to 20' wide on surface.

Development: by several old shafts, none below 200'.

Production: old records show that 100 cars sent to smelters carried 2 oz. gold and 40 oz. silver per ton; between Sept., 1911, and July, 1913, a lessee shipped ore valued at \$290,000 gross; and in 1916, company shipped 123 cars of ore averaging \$28 per ton.

In spring of 1921, property was being again operated by lessees and sub-lessees, who were shipping high grade ore in fair amounts.

ORIGINAL MINING CO. OF MANHATTAN

NEVADA

See Vol. XIV. Report of March, 1921, from the secretary states that company is "probably dead as ore is very low grade".

ORIZABA MINING & DEVELOPING CO.

NEVADA

Offices: Goldfield and Orizaba, Nev. Company is controlled by the Diamondfield Black Butte Reorganized Mining Co., which in turn is controlled by the **Mines Selection Co.** (q. v.).

Officers and directors: Chas. S. Sprague, pres.; P. V. Rovianek, v. p.; Ben Gilh, treas.; Harry B. Ruhl, sec.; J. K. Turner, cons. engr., and L. L. Dellinger.

Inc. 1915. **Cap.** \$1,000,000; \$1 par; 715,000 issued; 515,000 shares owned by the Diamondfield Co.

Property: 9 claims, 180 acres, at Orizaba, Nye county, shows veins carrying gold-silver-copper and lead ore. Veins are 2' to 7' wide, and occur on a contact between limestone and granite. The main vein strikes S. 20° E., and dips 70° S. W.

Development: by 1,300' of workings, including 150' shaft.

J. K. Turner reported, November, 1918, no ore in sight; \$6,000 worth of probable ore between the 35 and 65' levels; \$8,500 worth of possible ore from the 85 to 65' level; ore on 3 dumps valued at \$44,730.

Production: Sept. 1913, to April, 1918, amounted to \$22,980 gross and

\$16,156 net, the largest shipments being made when the price of silver was 60c per oz.

Further development, adequate modern equipment, and better railroad facilities are necessary to insure profitable operations. The nearest railroad point is Millers, about 38 miles south.

ORLEANS HORNSILVER MINING CO.

NEVADA

Address: care H. D. King, Tonopah, Nev., and Hornsilver, Nev. Ed. Kitchen, supt.

Officers: A. I. D'Arcy, pres.; R. H. Downer, v. p.-mgr.; H. D. King, sec.-treas., with Geo. W. Young and M. A. Diskin, directors.

Inc. in Nevada in 1921. **Cap.** \$150,000; par 10c. A public offering of 200,000 treasury shares was made in September, 1921, at 25¢ per share, raised later to 35¢. John S. Cook & Co., Goldfield, Nev., registering agent.

Property: the Orleans mine, 5 claims, 120 acres, in the Hornsilver district, Esmeralda county, 28 miles S. of Goldfield, shows a fissure vein, 8' average width, in diorite-lime-shale contact, carrying gold-silver ore. Two ore shoots, 500' apart, are exposed; ore as shipped averages \$21 to \$35, with a silver content of 3 to 6 oz.

Owned and opened about 1912, by the Champ d'Or Gold Mng. Co.; the mine was operated under lease and option by the Orleans Mng. & Mig. Co., of which J. W. Dunfee was the head; beginning with 1915 lease ran for 5 years and was renewed for a second period of 4 years. In 1921 the Orleans Hornsilver company was formed to take over lease with option to buy property for \$40,000. It is reported that former leasing company will receive \$50,000 and 150,000 shares of new company.

Development: by 200' Orleans shaft, and 580' Dunfee 40° incline now being sunk to the 7th level. Work in 1921 on the lowest level has shown the Dunfee shoot to be 130' long, 4 to 15' wide, with an average ore value of \$30 per ton. Ore of lesser grade is said to continue for 170' additional.

Production: by French company, said to be \$280,000 gross, and \$263,000 by lessee company, largely from above 4th level.

ORLEANS MINING & MILLING CO.

NEVADA

See Volume XIV. Was a leasing company operating the Orleans mine of the Champ-d'Or Gold Mng. Co., from 1915; J. W. Dunfee was the active principal. Property sold to Orleans Hornsilver Mng. Co. (q. v.) in 1921.

ORO AMIGO PLATINO MINING CO.

NEVADA

Address: Goodsprings, Nev.

Officers: S. E. Yount, pres.; Geo. A. Fayle, v. p.; H. K. Riddell, sec.-treas. and mgr., with N. B. Hunter, directors, at last accounts.

Inc. Nov., 1914, in Nevada. **Cap.** \$1,000,000; \$1 par; 515,100 shares issued. Listed on Los Angeles Exchange. Annual meeting, January 15th.

Property: 5 claims, 60 acres, in Yellow Pine district, Clark county, about 2 miles N. E. of the Boss mine. Ore carries copper, gold, platinum and palladium, occurring in shoots 6" to 4' wide.

Development: by 2 tunnels, 70' and 150' long, with 1,500' total workings. No recent returns secured.

ORO DIVIDE MINING & DEVELOPMENT CO.

NEVADA

Office: 252 Virginia St., Reno, Nev.

Officers: S. C. Foster, pres.; C. A. Clinton, v. p.; F. W. Collins, sec.-treas., with Lee Henderson, and G. A. Bartlett, directors

Inc. in Nevada. **Cap.** \$150,000; 10c par; 750,000 treasury shares.

Property: 3 claims and 2 fractions, 95 acres, in the N. W. part of the district said to contain a well-defined fracture zone or ledge leading from Gold Mountain to Fox Mountain. **Development:** by 100' shaft.

Equipment: hoist, etc, sufficient for prospect work.

ORO ZONA MINES CO.

NEVADA

Address: Hawthorne, Nev.

Officers: Eugene Grutt, pres.; Emil Grutt, v. p.; John B. Platts, sec.-supt. **Inc.** June 12, 1919, in Nevada. **Cap.** \$150,000; 10¢ par.

Property: the Silver Dollar (old Sunrise) mine, about 20 miles S. of Hawthorne, Mineral county. Shaft sunk to 100' forty years ago has been re-opened.

OVERLOOK DIVIDE MINING CO.**NEVADA**

Office: Fenwick & Co., Tonopah, Nev.

Officers: J. A. T. Wilkinson, pres.; J. M. Fenwick, v. p.; M. J. Gray, sec.-treas., with S. M. Wilson and Elmer Burt, directors.

Inc. in Nevada. Cap. \$150,000; shares 10c par.

Property: 4 claims and a fraction adjoining the Lookout Divide.

OVERMAN MINING CO.**NEVADA**

Office: 342 Mills Bldg., San Francisco, Calif.

Officers: W. G. Morrow, pres.; James Newlands, Jr., sec.

Inc. 1898, in California. Cap. \$230,400; par \$2; 69,089 shares issued. Annual meeting in July.

Property: 20 acres at Gold Hill, Storey county, developed by 1,600' shaft, etc. Ore is gold and silver bearing.

OVERSIGHT MINING CO.**NEVADA**

Address: M. J. Scanlon, attorney, Reno; and Nick Schade, asst, sec., Tonopah, Nev. **Inc.** February, 1920, in Nevada.

Property: 3 claims in Oversight section of Tonopah district, said to be on direct strike of main E.-W. vein system. Shaft down 80' and machinery erected in March, 1920.

PACIFIC STATES MINING & MILLING CO.**NEVADA**

Dead. Dissolved, October, 1920; see **Belle-Helen Merger Mines Co.** for description of property; see also Vol. XIV.

PACIFIC TUNGSTEN CO.**NEVADA**

Office: W. J. Loring, pres.-gen. mgr., Crocker Bldg., San Francisco, Calif. J. H. Bell, supt., Mill City, Nev.

Inc. April, 1917, in Nevada. Cap. \$1,000,000; par \$1; all outstanding. Listed on Boston Curb.

Property: 30 claims, 600 acres, 8 miles N. W. of Mill City, Pershing county, shows a scheelite bed from 1 to 3' in width, with hornfels walls, assaying 2½% tungsten at depth of 120'. In 1919, took over the **Nevada Humboldt Tungsten Mines Co.**, which see.

Development: by 2 shafts and tunnel. Shipments to custom mill at Toulon in 1918 averaged \$50 per ton, leaving a net profit of \$27.50. Mill recovery was about 70%.

Equipment: a 125-ton mill was erected late in 1918 to treat the output of the Pacific Tungsten and the Mill City Tungsten Co., under the same management. There is also a 2-mile, 24" gauge tramway, using gasoline locomotives and 3-ton steel cars.

Production: in 1918 and 2 months of 1919, totaled 12,749 tons of ore producing 581,288 lb. of 70.41% concentrates, or 2.28% tungsten per ton of ore; of this, 380,667 lb. returned \$337,067. During construction of the mill, covering 10 months of 1918, ore shipped to the Humboldt County Tungsten M. & M. Co. mill, at cost of \$7.75 per ton; company's mill ran 3 months, only when forced to close down; during latter period, cost of production was \$12.80 per ton of ore.

According to the auditor of the War Minerals Relief Com., expenditures of this company (in 1918), totaled \$912,755, including property, \$160,948; mine plant, \$161,602; mill, \$121,016; investment in Mill City T. Co., \$131,909; operating costs, \$168,304; administration \$41,544; and bills payable, \$70,700. Receipts were, \$297,597; and deficit was \$615,158. Reported at same time that ore in sight would cost \$11.35 per ton to produce and that \$10 per unit of tungsten is the minimum to make venture profitable: available ore, 32,713 tons carrying 1.57% tungsten gross, 1.14% net. Presumably idle.

PACKARD EXTENSION MINES CO.**NEVADA**

Address: Lovelocks, Nev.

Officers: B. F. Shepher, Jr. pres.; H. E. Woods, v. p.; Ray Stoddard, sec.-treas., Reno, with L. D. Richardson and L. A. Hilborn, directors, at last accounts

Inc. January 6, 1916, in Nevada. **Cap.** \$1,250,000; \$1 par; 750,000 issued.

Property: 5 claims, 90 acres, in Rochester district, Pershing county, adjoining the Nevada Packard ground, shows a shear zone of rhyolite with fissure veins, said to be 3-15' wide, with N. E. strike and dip of from 20-30°. Veins carry silver chloride and free gold. David H. Skea, consulting engineer for the Packard Extension reported that the claims cover the extension of the Packard ore-shoots on their downward rake in a course to the S. W., and that they should be found in Extension ground at a depth of about 250-300'.

No recent information received.

PACKARD NORTH EXTENSION MINING CO. NEVADA

Dead. Described in full in Vol. XIV. See Rochester Combined Mines Co.

PACKARD SILVER MINES CO. NEVADA

Address: H. E. Stewart, Reno, Nev.

Inc. in 1919.

Property: claims adjoining those of the Nevada Packard company at Rochester, Pershing county.

PACK SADDLE GOLD MINES CO. NEVADA

Address: Carson City, Nev.

Officers: E. H. Walker, pres.; H. R. Mighels, v. p.; E. W. Miller, sec.-treas.; W. E. Casson, mgr., with F. M. Baker, directors. Geo. L. Hedges, supt., Schurz, Nev.

Inc. April 11, 1916, in Nevada. **Cap.** \$1,000,000; \$1 par; 665,000 outstanding. Annual meeting in January.

Property: 7 claims, about 120 acres, in Mountain View (Granite) district, Mineral county, four miles from Reservation Station, said to show a large iron-cap or gossan deposit cut by several quartz veins, carrying copper ore with gold-silver values.

Development: by 224' tunnel. Though inactive 1919-'20, company was driving tunnel and developing an 8' vein, in 1921.

PALISADE COPPER CO. NEVADA

Company is controlled in Boston, Mass. Stock listed on Boston Curb.

Property: the old Heckla & Silver King silver-lead mines, 2 claims, patented, at Bullion, Elko county, held under bond and lease. In May, a large body of high-grade copper ore was found in cleaning out an old tunnel; four 40-ton cars of \$50 copper ore was shipped, May 22, 1916. Idle for many years.

PALMETTO CONSOLIDATED, INC. NEVADA

Office: Goldfield, Nev.

Officers: Edw. Cebrian, pres.; Robt. Blei, v. p.; L. Alegria, sec., 57 Post St., San Francisco, Calif. L. D. L. Cebrian, treas.; Clyde P. Johnson and John T. Murphy, mgr., Goldfield, Nev.

Inc. June 26, 1916, in Nevada. **Cap.** \$1,500,000; \$1 par; 1,150,000 issued. Stock listed on New York Curb. Was operated as a close corporation.

Property: 25 claims, 12 patented, about 500 acres, 42 miles S. E. of Goldfield in the Palmetto Mountains, Esmeralda county, credited with past production of \$6,500,000 in silver. Development by shafts, deepest 400'. The mine is said to contain large bodies of ore carrying good values in gold-silver-copper.

Has been idle for 20 years.

PANAMA CANAL MINING CO. NEVADA

Address: 104 E. Holly St., Bellingham, Wash., or Carson City, Nev.

Officers and directors: Lorenz Neber, pres.; Henry Schupp, v. p.; A. C. Muller, sec.-treas.; Geo. H. Cress, mgr.

Inc. March, 1917, in Washington. **Cap.** \$100,000; par 10c. Income from 150 tons of silver ore sold in 1918, was \$3,300.

Property: 12 claims, 224 acres in Voltaire district, Ormsby county; 5 miles from Carson City, developed by 550' tunnel. Quartz veins in granite carry silver ore. Made shipments of silver ore in 1919.

PANTHER CITY MINING CO.**NEVADA**

Office: care M. R. Sanguinet, sec.-treas., 1st National Bank Bldg., Fort Worth, Texas. Wm. Bryce, pres.

Property: 7 patented claims in 2 groups, the Panther City and Olinda, in Salmon River district, Elko county. Ore said to carry copper, silver, and a trace of gold. Management report (Feb., 1921) that development awaits R. R. facilities.

PARAMOUNT COMSTOCK MINES CO.**NEVADA**

Address: Box 698, Reno, Nev.

Officers: Alex. Wise, pres.-supt. (Virginia City, Nev.); R. A. Hardy, v. p.; J. W. Davey, sec.-treas., with F. M. Kleppe and A. E. Kane, directors.

Cap. \$2,000,000; \$1 par; 750,000 shares in treasury. Transfers made at Reno.

Property: in the form of mineral rights on the ground above the 1,000' level of the Best & Belcher, Gould & Curry and Savage properties, next S. to the Consolidated Virginia, Comstock district, Storey county.

A new company and not as yet active.

PATRICK MINING CO.**NEVADA**

See William Patrick Mining Co.

PATSY DIVIDE MINING CO.**NEVADA**

Address: Tonopah, Nev. E. Marks, res. agt.

Officers: Wm. Forman, pres.; W. J. Douglas, v. p.; M. L. Cooper, sec.; E. Marks, treas.; with A. G. Raycraft, directors.

Inc. 1919, in Nevada. **Cap.** \$150,000; par 10c; 500,000 treasury shares.

Property: the Lazy Boy group of 5 claims, near the Myra, in the eastern part of the district.

Inactive in 1921.

PAY DIVIDE MINING CO.**NEVADA**

Office: Tonopah, Nev.

Officers: T. Lindsay, pres.; H. F. Danberg, v. p.; A. G. Raycraft, treas.; D. K. Cain, sec.

Inc. May, 1919, in Nevada. **Cap.** \$150,000; shares 10c par; 750,000 in treasury. Annual meeting in May.

Property: 60 acres, 4,000' N. W. of the Tonopah Divide. Two dikes strike through the ground, and fair assays have been returned from the outcrops.

Development: by 100' shaft, with crosscut at this level to reach mineralized zone exposed at surface. Fully equipped.

PEAVINE SILVER CORPORATION**NEVADA**

Organized, in April, 1921, by J. C. Tranger, of Reno, and Pittsburg associates; A. L. Chappell of the Standard Metals Co. is also interested.

Property: the old Paymaster mine, 2 patented claims in the Peavine district, Washoe county, 5 miles N. W. of Reno, adjoining the Standard Metals on the west. Was a producer of high grade silver ore 40 years ago; recently was under bond to A. L. Chappell, who sank a shaft 160'. Old workings comprise 150' shaft and 250' of laterals, which expose a flat dipping fissure, 20' wide.

Reported that company failed to meet its November 15, 1921, payment and has forfeited its bond on the Paymaster mine.

PEER GOLD MINING CO.**NEVADA**

Address: Clyde Garret, Burney Gordon and Harry Cutlet, chief stockholders, Reno, Nev.

Property: in Pine Nut range at Como, 8 miles south of Dayton, shows wide vein in andesite. High-grade ore discovered in 1916 showed values of \$73 to \$150.

Probably dead. Letters returned

PEERLESS MINING CO.**NEVADA**

Probably dead; see Vol. XIV. Property taken over by Irish Mtn Silver Mines, which see.

PENN-STAR MINING CO.**NEVADA**

Address: Cherry Creek, Nev.

Officers: J. M. Murdock, pres.; Jos. McAneny, v. p.; P. W. Spaulding, sec.-treas.-mgr. (Evanston, Wyo.), with Chas Stahley and A. H. Martin, directors. F. W. Varney, supt.

Inc. in 1921, in Nevada. Cap. \$1,000,000; par \$1.

Property: 9 claims (4 patented) in Cherry Creek district, White Pine county. Ore occurs in shoots in a quartz vein, in a shale country rock. Examined by Wm. Dempster and L. C. Penhoel.

Development: by shaft and 3,500' tunnel; greatest depth of workings, 760'.

Equipment: includes hoist, compressor and 100-ton K. & K. flotation mill. Operated in 1921 to August.

PENNSYLVANIA-TONOPAH GOLD MINING CO.**NEVADA**

Address. J. F. Gaehring, 6729 No. 8 St., Oak Lane, Philadelphia.

Officers: Jno. B. Mayer, pres.; J. F. Gaehring, v. p.; Jno. P. Mayer, treas.; Lewis Dalmos, sec.

Property: the Constellation group of 6 patented claims, 122 acres, in western section of Tonopah district, Esmeralda county.

Idle.

PERSEVERANCE MINES CO., LTD.**NEVADA**

Address: Searchlight, Nev.

Officers: A. M. Buley, pres.; F. E. Sharps, v. p. and mgr.

Is a trust, with \$500,000 capitalization.

Property: 4 patented claims, 80 acres, 10 miles N. E. of Searchlight. Clark county, said to show contact vein in rhyolite-diorite. Ore is quartz with free gold and is said to average \$22 per ton. Reserves, 4,000 tons blocked out.

Development: by 2 tunnels 325 and 375' long.

PERSHING COUNTY MINES CO.**NEVADA**

Office: Oreana, Nev.

Officers and directors: Glenn D. Cook, pres.-mgr.; R. M. Hardy, sec., and F. M. Cook, treas.

Inc. July 2, 1920, in Nevada. Cap. \$250,000; 25¢ par; 615,130 treasury shares. Transfers at company's office. Annual meeting, January 2nd.

Property: 9 claims (2 patented) 149 acres in Arabia (Trinity) district. Pershing county, 4 miles W. of Oreana; includes the old Montezuma and Jersey mines, first worked in the 60's. Fissure veins traverse granodiorite and hornfels; the ore, consisting of the rarer antimony minerals, including bindheimite, occurs in 2 shoots, 2' to 10' wide, 120' and 900' long; an average analysis shows, 0.10 oz. gold, 80 oz. silver, and 28% each of lead and antimony.

Development: by glory hole and 120' incline; total workings, 1,000'. Management reports 1,500 tons blocked out, March, 1921. Prior to 1875, the Montezuma and Jersey mines produced about \$1,000,000 gross; from 1917 on, shipments of old slag and \$90 ore have been made, said to have a gross value of \$80,000. Mine is equipped with 2 small hoists. Early day equipment included a stamp mill, and a smelter at Oreana.

Examined by Waldemar Lindgren, Adolph Knopf, R. A. Lemmon and Philip Wilson.

PERSHING DIVIDE EXTENSION MINING CO.**NEVADA**

Dead. See Vol. XIV for description.

PERSHING DIVIDE MINING CO.**NEVADA**

Dead. See Vol. XIV for description.

PERSHING LEAD-SILVER MINING CO.**NEVADA**

Address: Bert M. Smith, Red River Lumber Co., 335 E. 4th St., Reno, Nev.

Officers: Bert M. Smith, pres.; Wm. A. Kelly, v. p.; Sam Wilcox, sec.; and Owen Coughlin, treas.

Property: at Jungo, Humboldt county, 5 miles S. of Antelope on the W. P. R. R. A vein, from a few inches to 3' wide, shows silver-lead ore with some gold of \$35 to \$40 gross value. Developed by 40' shaft. At last accounts, property was operated by lessees.

PHOENIX DIVIDE MINING CO.

NEVADA

Inc. in Nevada. **Cap.** \$150,000; shares 10c par.

Property: 3 claims, $\frac{3}{4}$ mile N. E. of Sutherland and 7,500' east of north of Gold Mountain.

PIERMONT MINES CO., THE

NEVADA

Address: John N. Popham, 17 State St., New York. **Mine office:** Aurum, Nev.

Property: an old silver mine first worked in the 70's, on the E. slope of Schell Creek range, White Pine county, 27 miles from Ray siding on the Nevada Northern line (Cobre-Ely) and 46 miles from Gold Hill on Western Pacific line in Utah. Ore used to be hauled 160 miles to Austin, Nev. Past production was considerable, unofficial records giving total as \$6,000,000. Mine was closed in 1873, owing to low price of silver and litigation, and only assessment work done since.

Geology: ore occurs in a contact vein between brecciated limestone and porphyry; the vein runs N.-S. and dips W. and is apparently folded near the present face of the tunnel.

Development: by 2 tunnels, and several shallow shafts. The upper tunnel, driven on the vein for 350', has a stope 300' long, 8' wide, and 75' high. This ore-shoot yielded most of the output. The lower tunnel is 382' long; in it the shoot was 260' long, 7' wide, and assays 18 oz. silver and \$2.06 gold per ton. Little stoping has been done. Two winzes, 30 and 60' deep, were sunk from the tunnel to cut the vein on the fold found in the upper tunnel. A sample from the second winze assays \$19.70 per ton. It is now estimated that there is a block of ore developed 800' long, 260 to 300' wide, and 8 to 14' thick, equal to 125,000 tons carrying from 16 to 30 oz. silver per ton.

Under present management, an air plant has been installed and a 300' ore shoot, said to average \$40 per ton, has been developed on S. E. dip of the fold, at an expenditure of \$35,000; no shipments have been made.

An hydro-electric plant, run by water brought a distance of 5,260' and with a head of 498' is to be erected, also a mill.

PILOT COPPER CO.

NEVADA

Presumably dead; see Vol. XIV. Was practically a reorganization of the Nevada Champion Copper Co. In hands of receiver from April, 1913; sold on Dec. 29, 1919, to Theodore Stebbins and A. M. Bennet for \$13,600. Company's debts were about \$13,000.

Address: Theo. Stebbins, 34 Gramercy Park, New York.

Property: the Champion group of 7 patented claims and Anderson group of 5 claims, in Santa Fe district, Mineral county, 4 miles E. of Luning. The orebody, 30' wide and 400' long, occurs in limestone and parallels a quartz monzonite dike. The oxidized zone reaches the 200' level; ore is said to carry 3% copper.

Development: by 450' 3-compartment shaft and 2 tunnels.

Equipment: 18-h. p. gas. hoist, shop, buildings, etc.

PILOT DIVIDE MINING CO.

NEVADA

Office: Tonopah, Nev.

Officers: M. R. Averill, pres.; L. L. Mushet, v. p.; F. R. Goetz, sec.; A. G. Raycraft, treas., with A. J. Cormack and R. D. Frisbie, directors.

Inc. in Nevada.

Property: near the Klondyke Divide, 6 miles S. of Divide. Idle.

PILOT KNOB GROUP

NEVADA

Property: 5 claims in Snake Creek range, 2 $\frac{1}{4}$ miles S. of Osceola, White Pine county, developed by 400' tunnel and 200' shaft.

Ore: tungsten, occurs in quartz veins in limestone formation. Equipment includes a 20-stamp mill.

Uvada Tungsten Co. was organized to take over the property in 1917, but owing to low price of tungsten the lease was allowed to lapse.

PILOT PEAK SILVER MINING CO. NEVADA

Address: Mina, Nev.

Officers: Dr. Frederick Bass, pres.; V. Andrus, v. p.; Chas. Lielich, sec-treas., with Dr. Frank Pache, Chas. E. Bugg, Al W. Drew, and Geo. W. Myers, directors.

Inc. July 30, 1919, in Nevada. **Cap.** \$150,000; 10c par.

PILOT SIMON SILVER MINING CO. NEVADA

Address: Tonopah, Nev.

Inc. June 17, 1919, in Nevada, by J. T. Blake, H. Hamlin, Jr., and Dennis J. Fitzgerald. **Cap.** \$150,000; 10c par.

PIOCHE-BRISTOL MINING CO. NEVADA

Address: 26 Stock Exchange Bldg., Salt Lake City, Utah.

Officers: John Dorius, pres.; C. L. Whitney, v. p.; M. C. Morris, sec-treas., with Frank L. Copening and Seymour B. Robbins, directors. Chas. A. Thompson, res. agt., Pioche, Nev.

Inc. Feb. 19, 1916, in Utah. **Cap.** \$50,000; 5c par; 839,166 issued. Stock listed on Salt Lake Exchange. An assessment of $\frac{1}{4}$ ¢ delinquent Oct. 20, 1920, was levied for development purposes.

Property: 6 claims in the Jack Rabbit district, adjoining the Day Bristol, near Pioche, Lincoln county, said to show lead-silver-copper ore.

Inactive from July, 1917, until fall of 1920, when contract was let for shaft sinking; by March, 1921, a depth of 80' had been attained.

PIOCHE METALS MINING CO. NEVADA

Address: F. B. Cooke, pres., care Columbia Trust Co. Salt Lake City.

Property: 6 patented claims at Pioche, Lincoln county.

Company has been inactive for several years, but in 1920-21 lessees were operating; ore said to assay 0.08 oz. gold, 26 oz. silver, 16% lead and 1.2% copper.

PIOCHE MINES CO. NEVADA

Address: Pioche, Nev.

Property: at Pioche, Lincoln county. A 200-ton mill was to be completed September, 1921, to treat both company and custom ore.

PIONEER CONS. MINES CO. NEVADA

Fully described in Volume XIII. Reorganized as **Reorganized Pioneer Mines Co.**, which see.

PIONEER EXPLORATION CO. NEVADA

Mail returned from Hobert Bldg., San Francisco, Calif.

Reported to have acquired the Bloody Canyon antimony mine at Unionville, Pershing county, operated up to 1917 by the **Antimony Syndicate** and described thereunder.

PIONEER EXTENSION MINES CO. NEVADA

Office: 107 Boston Bldg., Denver, Colo. **Mine office:** Pioneer, Nye county, Nevada.

Officers: H. A. Riedel, pres.; T. S. Ellis, sec.; Col. A. J. Trone, treas-gen. mgr.; Edwin S. Giles, supt.

Inc. in Arizona. **Cap.** \$1,500,000; \$1 par; 400,000 shares in treasury.

Property: the Jolly Jane claim, 20 patented acres, adjoining Pioneer Cons., at Pioneer, developed by 250' shaft. A crosscut was driven from this level through rhyolite to prospect a contact 175' E. of the Jolly Jane shaft.

Beginning with 1916, mine was under 3 year lease to Jolly Jane Leasing Co., now defunct. A prospect.

PITTSBURG-COMSTOCK MINING CO. NEVADA

Office: National Bank Bldg., Reno, Nev. **Mine address:** Virginia City, Nev.

Officers: H. G. Humphrey, pres.; Al. McCoy, v. p.-mgr.; A. E. Kane,

sec.-treas., with E. J. Haug, directors. F. M. Kleppe, asst. sec.; Wm. Sharp, cons.engr.

Inc. 1920, in Nevada. Cap. \$1,500,000 shares.

Property: 5 claims, including the Bright Star, adjoining the United Comstock on the W. and Overman group on the S., in the Comstock district, Storey county. Said to have the extension of the Trojan vein of the Overman group.

Opened by 2 tunnels, 280 and 600' long, with backs of 80 and 480', respectively. The Bright Star vein, operated 40 years ago, is said to have produced \$75,000 from upper tunnel. Present management driving lower tunnel to reach this vein. United Comstock's haulage tunnel passes under corner of the Pittsburg property at 1,400' depth.

PITTSBURG DIVIDE MINING CO. NEVADA

Inc. in Nevada. Cap. \$150,000; 10c par.

Property: 4 claims $1\frac{3}{4}$ miles N. E. of Gold mountain, and adjoining the Treadwell.

PITTSBURG-DOLORES MINING CO. NEVADA

Dead; see Vol. XIV. Reorganized 1918 as the Rockland Mng. Co., which see.

PITTSBURGH-ELY COPPER CO. NEVADA

Mail returned from Ely, Nev., the last address.

Officers: H. P. Harder, pres.; Louis H. Bock, v. p.; J. A. Varney, sec.; Frank Straub, treas., trustee and gen. mgr.

Inc. Dec., 1916, in Arizona. Cap. \$5,000,000; \$5 par; 695,285 shares outstanding at last reports.

Property: 11 claims, 220 acres, including the Keyboard group of 6 claims, 120 acres, near the Keystone mine of the Nevada Consolidated, and a small group near the Cumberland-Ely mine of the same company. Lands show porphyry and limestone, and company reports having copper oxides and sulphides, assaying 3 to 12% copper.

Development: by 2 shallow shafts and tunnels of 160' and 40'.

Equipment: includes a 40-h. p. steam hoist. Inactive, except for annual assessment work, since 1907.

PITTSBURG SILVER PEAK GOLD MINING CO. NEVADA

See Vol. XIV. Company, which also operated in California, is in liquidation, and property abandoned. Address: E. M. Succop, 912 California Bank Bldg., San Francisco.

PLATINO MINES CORPORATION NEVADA

Probably dead. R. Mausard, supt., Goodsprings, Clark county, Nev., at last accounts. Mine about 30 miles from Las Vegas, in the Platino district, is said to carry a 2' vein of copper ore. A winze sunk on vein was reported to have disclosed a body of manganese carrying platinum and gold.

POLARIS GOLD AND SILVER MINING CO. NEVADA

Address: Odd Fellows' Bld., Virginia City, Nev.

Officers: Geo. H. Drysdale, pres.; E. S. Chafey, v. p.; Chas. R. Morris, treas.; G. A. Ballard, sec.

Inc. 1919, in Nevada. Cap. \$150,000; par 10c; 780,000 outstanding. Transfer office, Virginia City, Nev.

Property: situated in Santa Fe mining district, 12 miles north of Luning. Mineral county. Country rock is rhyolite, strongly mineralized, with silver and gold in fracture zones.

Development: by 50' shaft and about 150' of drifting, etc. A 12' vein of \$12 to \$48 ore reported opened in 1919.

POLICEMAN DIVIDE MINING CO. NEVADA

Inc. in Nevada. Cap. \$150,000; 10c par.

Property: 7,000' south of east of Gold Mountain.

POLO DIVIDE LEASING CO. NEVADA

Address: R. O. Post, sec., 1006 Hobart Bldg., San Francisco, or Tonopah,

Nev. Has a lease on property of Polo Divide Mining Co. (q. v.). Assessment No. 1 of 2½ mills was levied Jan. 1, 1921.

Officers: F. L. Sizer, pres.-treas.; W. S. Schuyler, v. p.; R. O. Post, sec., with H. L. Nutting and J. E. Kennedy, directors.

Inc. Aug. 15, 1919, in Nev. **Cap.** \$100,000; par 10c.; 235,700 shares issued, assessable.

Property: 2 claims, 4½ acres, adjoining Silver King mine and Revert claims, in Divide district, 5 miles south of Tonopah, shows vertical fissure vein in porphyry.

Development: by 100' shaft and 250' of workings. No output to date.

POLO DIVIDE MINING CO.

NEVADA

Address: Tonopah, Nev.

Property: in Esmeralda county under lease to Polo Divide Leasing Co.

PORTLAND DIVIDE MINING CO.

NEVADA

Office: Tonopah, Nev.

Officers: J. H. Miller, pres.; W. A. Bradley, v. p.; B. A. Rives, sec.-treas., with Zeb Kendall, S. F. Wittenberg and L. L. Mushett, directors.

Inc. April 7, 1919, in Nevada. **Cap.** \$300,000; 20c par; assessable; 750,000 treasury shares.

Property: 7 claims, near the Operator Divide, showing well-defined contact, and mineralized fissure zones.

POTOSI GOLD SILVER MINING CO.

NEVADA

Address: 339 Bush St., San Francisco, Calif.

Inc. 1904, in California. **Cap.** \$112,000; \$1 par; reduced from \$1,120,000, with shares at \$10 par. Listed on New York Curb.

Property: one of the old mines on the Comstock Lode, at Virginia City, Storey county, which with the Potosi made an early day production of \$13,985,000. Ground covers 700' of the lode, between the Potosi on the S. and Hale & Norcross on the N.

The Comstock Leasing Co. (q. v.) controls this and the Chollar properties, to a depth of 1,000', under a grant purchase covering the right to operate for 30 years. Potosi will carry on its work through the Sutro tunnel.

In 1921, company joined other "Lode" companies in forming **Middle Mines Assoc.**, which see.

POTOSI MINE

NEVADA

Owned by **Empire Zinc Co.** of Colorado, which see.

PRAIRIE FLOWER MINING CO.

NEVADA

Address: Goodsprings, Nev.

Property: 4 patented claims, 60 acres, 4 miles W. of Goodsprings, Clark county, adjoining the Yellow Pine mine on the N. Claims cover a replacement deposit in limestone with an orebody that is 6' wide, dips 40° W. and has a N.-S. course. The ore, which contains carbonates of lead and zinc, is said to assay 15% lead, 30% zinc and 10 oz. silver.

Development: by 200' and 300' incline shafts and 2,500' of workings; 55% lead-zinc ore cut at bottom of the 200' shaft, thought to be the Yellow Pine ore-zone.

Equipment: 18-h. p. hoist, compressor, and distillate engine.

Property, formerly under lease to **Prairie Flower Dev. Co.**, is now leased by the **Yellow Pine Mng. Co.**

PRAIRIE FLOWER DEVELOPMENT CO.

NEVADA

Dead. See Vol. XIV. Company had a lease and bond on holdings of **Prairie Flower Mng. Co.**

PRINCE CONS. MINING & SMELTING CO.

NEVADA

Office: 1118 Newhouse Bldg., Salt Lake City, Utah. **Mine office:** Pioche, Lincoln county, Nev.

Officers: A. H. Godbe, pres.; G. F. Wasson, v. p.; M. C. Godbe, sec.-gen. mgr., with A. Thomas and Fred C. Dern, directors. **Murray Shepherd**, asst.-sec.; J. H. Hedges, mine supt.; **Frank Shepherd**, mill supt.

Inc. 1907 in Utah. **Cap.** \$1,500,000; par 50c; reduced from \$1 par. Oct.

10, 1921, stockholders exchanging share for share; 1,440,000 shares outstanding, Oct. 1, 1921. Prior to December, 1920, capitalization was \$2,000,000; par \$2. **Bonds:** issue of \$300,000 authorized Oct. 10, 1921, secured by mortgage on property convertible at any time into stock at par. U. S. Corporation Co., New York registrar and transfer agent; transfers made also at company's office. Stock listed on Salt Lake Exchange and New York Curb.

On November 26, 1920, company reported its only indebtedness to be a \$20,000 note; cash was \$12,124, with a credit balance of \$6,274.

Dividends: \$124,924 in 1915; \$250,000 in 1916; \$200,000 in 1917. None since.

Property: 386 acres in Pioche district, Lincoln county.

Geology: ground contains large orebodies of iron-manganese, outcropping on surface for 800', having an aggregate thickness of 120', width of 250' and proven for a length of 1,200'. The ore occurs as interbedded deposits in limestone and shale, reported to average 3-4% lead, 34% iron, 13% manganese, 3 oz. silver and some gold, 3% lime, 11% insol. and 14% silica, valued at from \$7.50 to \$9.50 per ton. Owing to large percentage of iron, the ore is especially valuable as a flux to the lead smelters, the iron commanding a bonus over the cost of smelting, with silver, gold and lead values coming in as a profit.

Company also owns the Pioche King group of 9 claims, and about 1,000 acres of patented land at Dry Valley and Bullionville, 12 miles from Pioche, said to contain 110,000 tons of tailings on dumps, showing 5.34% lead, 10 oz. of silver, 0.11 oz. gold per ton, and estimated to average \$5 per ton profit.

A 200-ton oil flotation mill was erected at Bullionville in 1916 to treat these tailings, but did not prove successful. Early in 1920, reported that mill was to be remodeled and tailings treated by lessees.

The Davidson mine, adjoining the Prince, was taken over in July, 1918, and is being extensively developed.

At end of 1920, company was not however sufficiently strong financially to continue development, and thus, with stock non-assessable and none in the treasury, company increased its share capital, and sold 440,000 additional shares to its stockholders for prices ranging between 25 and 40¢. But by Sept. 1, 1921, company was again in financial difficulties and again increased its share capital, at the same time authorizing a \$300,000 bond issue.

When operations were temporarily suspended in August, 1921, for lack of funds, company's indebtedness was \$37,686. Liquid assets were \$26,625. The new shaft is said to have cost \$166,000 down to 833'.

Development: the Prince mine is developed by an old 550' incline, a new 2-compartment vertical shaft, 650' deep in April, 1921, and several miles of drifts. Diamond-drilling discovered an 11' bed of ore at depth of 825', assaying 25 oz. silver and \$3.60 in gold; and a 10' bed of 30¢ zinc ore at 1,075' deep; the latter is immediately above the quartzite which underlies the shale and limestone. Ore in the Davidson, Big and "20" beds is apparently exhausted, or nearly so, but the silver bed opened by the 833' level (August, 1921) and the underlying zinc bed, promise to make the mine a new one.

Equipment: includes 600 h. p. steam power, hoist and compressor, in part moved from old to new shaft; a 9-mile standard gauge railway connecting with the Salt Lake Route from Pioche; and a mill, described above.

Production: in 1920, up to Oct. 31, was 46,688 tons; and total for 1915-1920 is 746,804 dry tons, yielding about 1,806,188 oz. silver, 43,588,850 lb. of lead and \$145,395 in gold. This production came entirely from above the water level and of the most recent shipments, 75% was derived from the Davidson and 25% from the Prince. Smelter returns netted \$3.29 per ton or \$1,516,255, for period 1915-'18, and net profit after charging off losses of Bullionville operations was \$1,604 per ton of ore.

Present management decidedly efficient. Receipts from ore sales had been meeting development costs in spite of low grade of ore. Shaft sinking

was suspended between June, 1920 and March, 1921. Operations were again suspended in August and had not resumed on Jan. 1, 1922.

See *Virginia Louise Mng. Co.* for account of litigation with the Prince Cons.

PRINCESS COPPER CO.

NEVADA

Formerly the Ely Resurrection Copper Co., property deeded to C. W. Freed for judgment of \$13,408.

Address: C. W. Freed, pres., 1007 First Ave., Salt Lake City, Utah.

Inc. 1911. Cap. \$1,000,000; shares \$1 par.

Property: 30 claims, about 550 acres, in the Robinson district, lying a little north and east of Ely.

Mine has 2 short tunnels and a 140' shaft, said to show 18' of ore assaying up to 5% copper, with gold and silver values, and some high-grade ore assaying up to 46% lead and 110 oz. silver per ton, with gold values.

PROSKEY REGENT MINING CO.

NEVADA

Dead. Controlling interest in the property, the Proskey Regent group, acquired by the **Mogul Mining Co.** (q. v.) in 1916; later sold by the sheriff and now owned by the **Seminole Regent Mng. Co.**, which see.

PROVIDENCE EXTENSION GOLD MINING CO.

NEVADA

Office: Morris, Ill.

Officers: I. F. Hatcher, pres.; W. F. Buck, v. p.; G. A. Leach, sec-treas., with O. M. Barker, directors.

Inc. 1908, in Nevada. Cap. \$1,500,000; shares \$1 par; 1,100,000 shares outstanding.

Property: 3 patented claims and a fraction at Seven Troughs, Pershing county, reported by management to show high-grade free-milling quartz ore in fissure veins, 4" to 2' wide and to carry from \$14 upwards in gold per ton. Examined by F. A. Wheeler.

Development: by 170' vertical shaft. Idle since 1917, pending re-financing of the company.

PYRAMID DIVIDE MINES CO.

NEVADA

Office: Tonopah, Nev.

Officers: Harry Dunseath, pres.; S. T. Bentley, v. p.-mgr.; Francis Moore, sec-treas., with T. M. Bentley and E. M. Moore, directors.

Inc. April 8, 1919, in Nevada. Cap. \$150,000; 10c par; 750,000 treasury.

Property: 11 claims, 2½ miles N. of the Tonopah, Divide.

Development: by 75' shaft cutting ore assaying from \$2.65 to \$14.20 per ton, with streaks of higher grade. Equipped with hoist and head-frame.

QUEEN DIVIDE MINING CO.

NEVADA

Office: 109 Russ Bldg., San Francisco, Cal.

Officers: W. F. Sherman, pres.; J. L. Ord, v. p.; F. N. Lathrap, sec-treas., with W. S. Owensby and Charles Kielhofer, directors. William Lichtenberg, supt.

Inc. May, 1919, in Nevada. Cap. \$200,000; 10c par; assessable.

Property: 6 claims, 90 acres, adjoining Divide Syndicate, about 1 mile S. of Gold Mountain. Developed by 50' shaft.

QUEEN REGENT MERGER MINES CO.

NEVADA

Office: 337 Monadnock Bldg., San Francisco, Cal.

Officers: J. D. Brown, pres.; H. B. Wade, sec.; J. E. Kerr, gen. mgr., Wm. P. Miller, cons engr., at last accounts.

Inc. 1911, in California. Cap. \$2,000,000; \$1 par; 761,000 shares issued.

Property: 5 claims, bought June, 1915, for \$60,000, in Rand mining district, Mineral county, 18 miles E. of Nolan, on the E. side of Walker lake. Tract is said to cover 4,000' of the main fissure of the Rand district.

Development: by 500' main working shaft with crosscuts at each 100' and 2 shafts, each 100' deep. Vein on 1st and 2nd levels is 30'-40' wide in places, between andesite footwall and rhyolite hanging wall. On the 2nd level a 4' vein cut at 406' carried sulphides, and an 8' cross vein cut at 460' disclosed copper ore unlike the usual ore of the Rand district and carrying sulphides

with lead-copper ore, the copper content being 7% to 15%. On the 500' level dacite replaced the andesite; about 200' from the shaft the ore changed to heavy blue-black clay and talc. A highly disturbed formation was encountered in which the vein disappeared. Extensive development has so far failed to find the downward extension of the sulphide ore-bodies and all work has been discontinued.

QUICKSILVER MINES CO.**NEVADA****Address:** Winnemucca, Nev.

Controlled by John Ross, Unionville, Nev. Formerly operated by Ruby Silver Mining & Development Co. (Vol. XIII.) M. D. Faretta and Frank Childress are largely interested.

Property: the Ruby or Faretta group, in Jersey Valley, Lander county, 75 miles S.-S. W. of Battle Mountain equipped with 12-retort reduction plant and reported to have several hundred tons of 5% cinnabar ore on the dumps. A small output was reported for 1919. Presumably idle, 1920-'21.

QUO VADIS GOLD MINING CO.**NEVADA****Idle. Address:** Las Vegas, Nev.

Officers: Peter Buol, pres.; C. C. Ronnow, v. p.; Ed. W. Clark, sec.-treas., with F. A. Clark and J. B. Anderson, directors

Inc. Dec., 1915, in Nevada.

Property: the Quo Vadis mine at Las Vegas, Clark county, said to show rich stringers of free milling gold ore in latite and andesite formation. Developed by 300' tunnel and a shallow shaft.

RAINBOW DIVIDE MINING CO.**NEVADA****Office:** Tonopah, Nev. F. K. Pittman, agt.

Officers: R. J. Cunningham, pres.; J. M. Fenwick, v. p.; E. P. Cullinan, sec.-treas., with H. G. Taylor, Ernest Cole, directors. Homer O'Connell, supt. Inc. in Nevada. **Cap.** 1,500,000 shares; 10c par; 750,000 treasury shares.

Property: 2 claims adjoining the Apex on S., and Royal groups on the N.

RALSTON MINING CO.**NEVADA**

Officers: Chas. E. Perry, pres.; Wm. Forman, v. p.; T. A. MacDuff, sec.-treas.; J. H. Evans and R. J. Highland, directors.

Inc. July, 1916, in Nevada. Cap. \$1,000,000; \$1 par.

Property: the K. C., or Gori McBride group, east of the Halifax and adjoining the East End mine at Tonopah. The property was paid for with 601,000 shares at 3c.

RAND DIVIDE MINING CO.**NEVADA****Office:** Lovelocks, Nev. H. E. Loufek, agt.

Officers: J. T. Goodin, pres.; F. E. Baker, v. p.; T. P. Ebert, sec.-treas. Inc. April, 1919, in Nevada. **Cap.** \$150,000; 10c par; half treasury stock.

Property: Little Theresa group, 5 claims, 2 fractions, E. of High Divide, 4,500' N. E. of Gold Mountain. **Development:** by 70' shaft.

RECO DIVIDE MINING CO.**NEVADA****Office:** 25 Broad St., New York, and Goldfield, Nev.

Officers: J. B. Kendall, pres.-mgr.; J. J. Wielip, v. p.; M. A. Kendall, sec.-treas., with T. W. Kendall, and C. B. Higginson, directors. W. C. Ralston, com. eng.

Cap. 2,000,000 shares; 10c par.**Property:** 5 claims north of the Sutherland Divide.

Company is reported to be in search of a promising property. An option on the Paradise Valle mine, in Spring City district, Humboldt county, reputed to have produced \$3,000,000, was relinquished and 17 claims were located to W. of the Paradise. Also reported that a gold prospect at Spanish Flat, 20 miles from Kirby, in same county, was being developed.

RED HILL FLORENCE MINING CO.**NEVADA**

Office: Reno, Nev. **Officers:** Murdo MacKenzie, pres.; H. G. McMahon, v. p.-gen. mgr.; A. H. Howe, sec.-treas., with J. C. Robertson and J. C. Rhodes, directors.

Inc. November 20, 1916, in Nevada. **Cap.** 2,500,000 shares; 10c par; all outstanding; assessable. Stock listed on San Francisco Exchange. Assessments No. 8 and 9, of 1c each, were levied in Aug. and Nov., 1921. Company is a consolidation of the Red Hill Mining, Florence American Mining and Florence Extension Mining companies.

Property: 5 claims, 70 acres, owned outright, and 10 acres held under lease, at Goldfield, adjoining the Florence Goldfield on the S. and W. Ore contains gold, silver, and copper, occurring in a quartz vein in andesite. The property carries the extension of the Florence vein.

Development: by 600' vertical shaft. During 1920-'21 a total of 3,000 linear feet of new ground was opened up by drifts, crosscuts and winzes on the 500' and 600' levels. Work has been confined largely to the 500' level, but, although some milling ore was uncovered, work apparently proved disappointing. Discoveries by the Reorganized Cracker Jack on Florence Goldfield territory, and by the latter company itself, induced management of Red Hill to sink shaft to 800' (June, 1921), and to drive 300' crosscut to open Florence Goldfield vein. Reported that an ore width of 4 to 5', assaying \$6.20 to \$7.40 gold, has been exposed.

Equipment: includes double drum electric hoist and compressor.

Company has a lease on a block of ground at depth of 430' to 650' in the Florence Goldfield mine, immediately beneath the rich ore mined by the Reorganized Cracker Jack.

Company has a speculative chance of finding bonanza ore.

RED LION CONSOLIDATED MINES CO.

NEVADA

Described in Volume XIII. Merged December, 1919, with **Yellow Tiger Consolidated Mining Co.**, which see.

RED METALS CO.

NEVADA

Apparently dead. **Last address:** 16 Washoe Bank Bldg., Reno, Nev. A. W. Holmes, pres.; Geo. T. Milner, sec. and gen. mgr.; Jas Howell, treas.

Inc. May 12, 1910, in Nevada. **Cap.** \$1,000,000: \$1 par; in \$50,000 preferred and \$950,000 common stock; issued, \$1,500 preferred and \$786,200 common stock. Annual meeting, first Monday in June.

Property: 16 claims, 300 acres, on Peavine Mountain, Washoe county. Claims carry lenticular deposits, between diabase and diorite, that are 1 to 12' wide, show copper carbonate and bornite ore, said to average 9% copper, 15 oz. silver and \$4.80 gold per ton.

Development: by tunnel, 1,200' long. The mine was opened 1866, for silver, closed 1877, owing to the low price of that metal, and again re-opened 1908. See Copper Handbook, Vol. XI. Geology of this district is given in the U. S. G. S. Bull. 594, p. 194.

REDMOND CONSOLIDATED MINING CO.

NEVADA

Address: A. A. Redmond, Luning, Nev.

Property: 15 claims, in Santa Fe district, Mineral county, 4 miles from Luning. Five parallel veins occur in lime-shale formation cut by porphyry intrusions. Developed by 300' shaft, with total workings of more than 6,000'. Reported to have produced \$750,000 worth of ore prior to 1915; \$35 average per ton. Was operating summer of 1921.

RED STREAK COPPER MINING CO.

NEVADA

Address: Goodsprings, Nev.

Officers: E. B. Price, pres.; Jos. M. Sanders, sec., with N. B. Price, Jack H. Smith, and John O. Kemple, directors.

Property: adjoins the Copperside mine in the Yellow Pine mining district near Goodsprings, Clark county, said to show 3' of copper-bearing ore. Carload shipments realized \$100 per ton.

The ore has been shown to carry cobalt also, and test shipments were made late in 1921.

RED TOP MINING CO.

NEVADA

Address: N. K. Franklin, supt, Manhattan, Nye county.

Property: developed by 2-compartment shaft, 110' deep, in limestone

formation. **Equipment:** includes pump and compressor.

No recent information.

RENO DIVIDE MINING CO.

NEVADA

Office: 301 Nixon Bldg., Reno, Nev. E. H. Mead, agt.

Officers: S. H. Wheeler, pres.; F. H. Norcross, v. p.; Wm. Woodburn, treas., with G. W. Davey and W. G. Kendall, directors. E. H. Mead, sec.; Ben Richardson, supt.

Inc. March 27, 1919, in Nevada. **Cap.** \$150,000; 10c par. Listed on San Francisco Stock Exchange.

Property: 5 claims adjoining the Grimes on the south.

Development: by 300' shaft. At 10' the shaft entered a crushed and oxidized zone, carrying silver and gold worth \$7 per ton; this oxidized matter has persisted to the present depth.

Equipment: complete electric hoisting plant, etc.

RENO SILVER HILLS MINING CO.

NEVADA

See Vol. XIV. Probably dead, and presumably succeeded by Wedekind Silver Mng. Co., which see.

RENO-YERINGTON COPPER CO.

NEVADA

Officers: E. L. Brown, pres.-mgr., 944 West 6th Street, Reno, Nev.; Victor Cokefair, v. p.; M. C. Brown, sec.; Farmers & Merchants Natl. Bank, treas.; preceding with Walter Harris, O. H. Sonne, Will McDonough, directors.

Inc. Jan. 25, 1907. **Cap.** \$1,000,000; \$1 par; 750,000 outstanding.

Property: 5 claims, about 100 acres, north of the Bluestone mine, at Yerington, Lyon county, said to show sulphide ore in granite with easterly dip, averaging 3% copper.

Development: by 700' tunnel and 100' incline shaft sunk on the contact.

Equipment: includes hoist and buildings.

Mail returned; presumably idle.

REORGANIZED ATLANTA MINES CO.

NEVADA

Consolidated, in 1920, with other properties in Goldfield district under name of Goldfield Deep Mines Co. (q. v.) The Reorganized Atlanta company fully described in Vol. XIV.

REORGANIZED BELCHER DIVIDE MINING CO.

NEVADA

Office: Tonopah, Nev.

Officers: N. M. McCormick, pres.-mgr.; S. E. Jameson, v. p.-supt.; E. J. Erickson, sec.-treas.; with H. C. Brougher and C. L. Richards, directors.

Inc. July 12, 1920, in Nevada. **Cap.** \$200,000; 10¢ par; increased on reorganization from \$15,000, par 1¢; assessable; 639,442 treasury shares. Listed on San Francisco Stock Exchange. Tonopah Banking Corp., Tonopah, Nev., registrar; transfer office, Tonopah, Nevada. Annual meeting, 2nd Wed. of January.

Company is a reorganization on an assessable basis of the Belcher Divide Mng. Co. (originally Gold Mtn. Dev. Co.); stockholders of old company exchanging stock, share for share, for stock of new company. Assessment No. 1, of 1¢, levied July 15, 1920; No. 2, of 1¢, Jan. 12, 1921; No. 3, of 1¢, Aug. 26, 1921.

For year ending Dec. 31, 1920, operating expenses were \$15,862. Current assets over liabilities were \$8,884; cash was \$4,042. Equipment is valued at \$8,789.

Property: 4 patented claims, adjoining the Verdi Divide on the N. W. corner and Victory Divide on west, shows a strong vein with 75% dip.

Development: by shaft, 550' deep, April, 1920, and through shaft of adjoining Belcher Extension (q. v.); recent work confined to shaft sinking and crosscutting on 300' level. Cost of shaft work, \$39.61 per ft.; of drifts and crosscuts, \$12.31. Three shafts were sunk on this ground, all in the foot-wall, several years ago by Mrs. Phoebe Hearst and "Lucky" Baldwin.

Equipment: electric hoist, 6-drill compressor, etc.

REORGANIZED BLUE BULL MINING CO.

NEVADA

Organized in 1912 to acquire title to property of the Blue Bull Mng. Co.

In summer of 1920, was merged with adjoining properties into **Goldfield Deep Mines Co.**, which see. The Blue Bull company is fully described in Vol. XIV.

REORGANIZED BOOTH MNG. CO. OF GOLDFIELD NEVADA

Address: Goldfield, Nev.

Officers: Geo. Wingfield, pres.; W. E. Zoebel, v. p.; C. F. Burton, sec.-treas.

Inc. 1912, in Nevada, as a reorganization of the Booth Mng. Co. Stock was exchanged, share for share, on payment of 1c. **Cap.** \$1,000,000; \$1 par; assessable; 999,957 outstanding. Annual meeting third Monday in December. Listed on San Francisco and Salt Lake City Exchanges; traded in on New York Curb. Stock transferred at company's office. Five assessments, aggregating 7c. have been levied; the fifth, 2c. per share, in January, 1915. Share prices, 2c. low, 22 high, 1918; 9c. low, 40c. high, 1919; 2c. low, 7c. high, 1920; 2c. low, 7c. high, 1921.

Dividends: No. 1, 5c. per share, paid March 6, 1916; No. 2, 15c. on April 6; No. 3, 10c., on April 26; No. 4, 5c., on June 6, making total of \$349,984 for that year. On May 15, 1919, a cash dividend of 5c. per share and a stock dividend of 1 share of Tonopah Divide stock for each 50 shares of Booth stock held was declared payable from proceeds of sale of stock of the Reorganized, Kewanas Mining Co., 250,000 shares of Spearhead Gold Mining Co., Reorganized, and 2,000 shares of Tonopah Divide Mining Co.

For an account of litigation, etc., see Vol. XIII.

Property: formerly owned by the old Booth Mining Co., consists of one claim adjoining the Red Top and Laguna mines of the Goldfield Cons. In September, 1915, all development work was suspended, and it was reported the management would endeavor to purchase another property.

The company is said to have the distinction of being the only non-producing mine that receives an income without incurring the slightest expense for operating.

REORGANIZED CRACKER JACK MINING CO. NEVADA

Address: Goldfield, Nev.

Officers: E. P. Junor, pres.; Geo. K. Cremer, v. p.; H. G. McMahon, sec.-treas. and mgr., with C. H. Shirtz and J. A. Erickson, directors.

Inc. December 18, 1915, in Nevada, as a reorganization of the Cracker Jack Mining Co. **Cap.** \$150,000; 10c. par; assessable; all outstanding. Company being financed by assessments. On December 21, 1915, a call of 1c. per share was made, each stockholder in the old company being required to pay the assessment before receiving share for share of the new company. Listed on San Francisco Exchange. Share prices, 1c. low and 6c. high in 1918; 2c. low and 10c. high, 1919; 3c. low and 25c. high, 1920.

Eleven assessments have been levied, the last, of 1c. per share in October, 1921.

Property: 5 patented claims, 80 acres, formerly owned by the Adams Goldfield Mng. Co., purchased at tax sale in 1916; the Great Western group of 2 patented claims, 30 acres, and several unpatented claims; recently purchased, all in the Goldfield district, Esmeralda county. Also owns by purchase in June, 1921, the Park group of 10 claims at Railroad Springs, 25 miles S. of Goldfield, which shows a well defined, oxidized quartz vein similar to that of the adjoining Gold Hill mine. The Great Western adjoins Goldfield Cons. ground and is purely speculative in value. The Adams group is said to show gold-silver ore in 20' vein in rhyolite.

Development: on the Adams, by 320' shaft, with winze to 440' level and considerable lateral work, of which several thousand feet were performed in 1919 and up to summer of 1920, when work was discontinued. Results have apparently not been particularly favorable on this or on upper levels. At Railroad Sprs., work confined to prospecting.

Equipment: includes electric hoist, compressors and drills.

Company also holds a 5-year lease, ending March 1924, on part of the ground of Florence Goldfield Mng. Co., where extensive developments have

been conducted for 2 years to a depth of 500' through shaft of the Red Hill company. In 10 months ending with October, 1920, the Cracker Jack company operated principally on the Florence lease, with an output of \$15,000 net in gold. Failing to find other orebodies of commercial value, the lease covering ground above the 500' level was relinquished; work below this level will await results of Red Hill company's development.

REORGANIZED DIAMONDFIELD TRIANGLE MNG. CO. NEVADA

Address: Ben Gill, treas., Goldfield, Nev.; J. K. Turner, cons. engr.

Inc. 1917, in Nevada. **Cap.** \$2,000,000; \$1 par. Is a reorganization of the Diamondfield Triangle Mng. Co.

Property: 7 claims in Diamond district, developed by vertical shaft said to show a promising quartz vein.

Idle since 1917, pending re-financing of company. Stockholders invited to exchange their stock, share for share and payment of 1c. assessment.

The probability that this company will again become active is very remote.

REORGANIZED DIVIDE ANNEX MINING CO. NEVADA

Office: State Bank & Trust Co. Bldg., Tonopah, Nev.

Officers: F. W. Taylor, pres.; W. J. Douglass and Walter Rowson, v. ps.; E. J. Ramsey, sec.-treas.; with Kenneth Hauer, directors.

Inc. Oct. 1, 1920, in Nevada, as a reorganization of the Divide Annex Mng. Co. **Cap.** \$150,000; 10¢ par; assessable; assessment No. 1, of 1¢, levied Nov. 3, 1920. Listed on San Francisco Stock Exchange.

Property: 2 claims, adjoining the Tonopah Divide on N., in Gold Mountain district, Esmeralda county.

Development: by 265' shaft, with 400' of laterals on 250' level. Fully equipped. Active development reported, April, 1921.

REORGANIZED DIVIDE JUNIOR MINING CO. NEVADA

Address: W. J. Gomm, sec.-treas., Tonopah, Nev.

Officers: Gust. Hanson, pres.; Wm. Forman, v. p., with H. H. Brown, Fred Mechlin and Jas. Grimes, directors.

Is a reorganization of the Tonopah Divide Jr. Mng. Co., effective June, 1921 at which time shares were assessed 1c. each. **Cap.** \$200,000, increased from \$150,000, and placed on an assessable basis, at reorganization; 10c par.

Property: about 25 acres in the Gold Mtn. (Divide) district, Esmeralda county, between the Keystone D. and Grimes Divide, and adjoining Tonopah Divide on the S. Developed by 168' shaft and a crosscut, exposing a vein with 2½' pay streak, assaying \$5 per ton in gold. Also a 20' vein was opened by 20' shaft. Equipped with hoist.

A 3 year lease has been granted the Ben Hur Divide Mng. Co., which is attacking Divide Junior's ground through shaft of the Keystone Divide at 625' depth.

REORGANIZED KEWANAS GOLD MINING CO. NEVADA

Address: Box 107, Goldfield, Nev.

Officers: A. I. D'Arcy, pres.; Corrin Barnes, v. p.; H. G. McMahon, sec.-treas.

Inc. July, 1913, in Nevada. **Cap.** \$1,500,000; shares \$1 par; all outstanding; assessable; 10 assessments have been levied, the last, of 1¢, in July, 1921. Listed in Salt Lake City and San Francisco; traded on New York Curb. Share prices, 1c to 10c. 1918; 3c. to 8c. in 1919; 1c to 4c. in 1920; 1c. to 3c. in 1921.

Company is a reorganization of the Kewanas Mining Co., which became bankrupt in 1913. As a result of the apex suit filed in 1915 by Reorganized Booth Mining Co., which see, the latter company received 250,000 shares Kewanas stock which was disposed of during 1918.

Property: 2 claims and a fraction, about 40 acres, east of the Laguna group of the Goldfield Cons. at Goldfield.

Development: by means of the winze on the Kewanas ground below an east crosscut into it from the 700' level of the Laguna shaft of the Goldfield Cons. Exploratory work on this level encountered several veins, but ore

was too low grade to be profitably mined. Work was discontinued September, 1920, when a 5 year lease was taken on St. Ives claim of Goldfield Merger Mines, now a part of Goldfield Deep. In 1921, a 575' crosscut driven on the 800' level from Merger shaft failed to find the St. Ives vein, but was reached at a distance of 350' on the 450' level, and showed values from \$4.80 to \$56 per ton in gold. The St. Ives vein has been productive above the 350' level.

A portion of Kewanas ground adjoining Grandma Cons. Mines Co. on E. leased to that company, fall of 1920.

REORGANIZED PIONEER MINES CO.

NEVADA

Address: Goldfield, Nev. **Mine office:** Pioneer, Nev.

Officers: W. J. Tobin, pres.; J. K. Turner, v. p.; Ben Gill, sec.-treas. with E. A. Blakesley, directors.

Inc. May, 1918, in Nev. **Cap.** \$500,000; 10c. par; assessable; 2,250,000 outstanding. Four assessments, of 1¢ each, have been levied, the last in January, 1922. Company is a reorganization of the Pioneer Cons. Mines Co. described in Volume XIII, the new company assuming all obligations of the Pioneer Cons. Stockholders were given the privilege of exchanging their holdings share for share upon payment of a 1c bonus for the new stock.

By March, 1920, entire indebtedness of the old company had been liquidated. Financial statement to Dec. 1, 1920 (10 mos.) shows; receipts, \$11,970, and disbursements \$11,842; of the latter, \$8,926 was for mine development, and \$1,387 for administration.

Property: 12 claims, 10 patented, 180 acres, at Pioneer, Nye county.

Geology: irregular masses of altered and mineralized rhyolite breccia are traversed by small, irregularly intersecting quartz-filled fractures containing gold-silver values. Isolated bunches of quite high-grade ore have been encountered, but not of commercial size.

Development: has made slow progress, but in September, 1921, main shaft reached water level at 800'; crosscuts will be driven N. W. to undercut the old Bonanza stope. Old workings total 15,000', production from which is said to be \$500,000. Lessees are operating in upper levels.

Equipment: includes 60-h. p. engine, 40-h. p. hoist, 5-drill compressor and 10-stamp mill.

REORGANIZED ROSETTA DIVIDE MINING CO.

NEVADA

Company is a reorganization of the Rosetta Divide Mng. Co., inc. Nov. 25, 1918, and described in Vol. XIV.

Office: Tonopah, Nev.

Officers: D. F. Murphv, pres.-gen. mgr.; L. J. Brown, v. p.; J. M. Fenwick, sec.-treas., with Owen Murphv and W. H. Hart, directors.

Inc. July 22, 1920, in Nevada. **Cap.** \$200,000 (increased from \$150,000); 10¢ par; assessable; assessment No. 2. of 2¢ levied Mar. 31, 1921. Listed on San Francisco Stock Exchange.

Property: 4 claims, in the S. E. part of the district, surrounded by Divide Syndicate, Trilby, Argonne, Anchor, and Operator. Examined by A. H. Elftman, who considered that an extension of the Divide fault-vein, 100 to 300' wide, passes through the ground, with numerous cross veins. The formation is well exposed for 1,000'.

In 1921 company acquired property at Hornsilver, Esmeralda county, which shows a wide vein, an ore width of 4' assaving \$30 per ton.

Development: by 315' shaft on Murphv vein and 1,858' total workings.

Equipment: hoist, compressor, etc.

REORGANIZED UNITED MINES CO.

NEVADA-ARIZONA

Address: 405 Hobart Bldg., San Francisco, Calif. **Mine office:** Castle Dome, Ariz. Res. Agent, Harry G. Pray, Clay Peters Bldg., Reno, Nev.

Officers and directors: Fred Lindeman, pres.; W. W. Davis, v. p.; B. W. Lindeman, treas.; K. Van Winkle, sec.

Inc. in Nevada as a reorganization of the Rochester United Mines Co., described in Volumes XII and XIII. **Cap.** \$1,500,000; \$1 par; assessable; 1,012,000 shares issued. Assessment No. 3, of 2½¢, was delinquent Jan. 14 1920.

Property: 21 claims, 240 acres, in Rochester district, Pershing county, Nev., and a lease on 22 claims at Castle Dome, Yuma county, Arizona. Work by this company is reported to have developed 55,000 tons of ore in the Castle Dome, assaying 12½% lead, and 2½ oz. silver per ton.

A 75-ton concentrator was installed early in 1919, and the Arizona property for some time produced 5 tons of concentrate daily. Reported, late in 1920, that company had taken an interest in the Humboldt King mine, Pershing county, Nev. The Nevada holdings are not being operated.

REORGANIZED VICTORY DIVIDE MINING CO. NEVADA

Office: Goldfield, Nev.

Officers: A. I. D'Arcy, pres.; H. E. Clark, v. p.; Andrew Walz, 2nd v. p.; H. B. Ruhl, sec.-treas.; with C. A. Heller, directors. B. E. Garnett, asst. sec.-treas. John Schwebel, supt.

Inc. Jan. 11, 1919, in Nevada. **Cap.** 2,000,000 shares; 10¢ par; assessable; 1,885,000 issued. Listed on San Francisco stock exchange. Transfers made at company's office: Columbia Trust Co., New York, registrar. Company is a reorganization, June, 1921, of Victory Divide Mng. Co., on an assessable basis; stockholders exchanging old stock for new, share for share, plus an assessment of 1¢ payable on July 1st.

Revenue in 1919 was \$89,562, mostly from share sales; expenses were \$44,464; cash on hand at end of year, \$45,098.

Property: 4 claims and 2 fractions, 50 acres, adjoining the Divide Consolidated, Verdi, Brougner and Belcher, shows a well defined vein system faulted on 200' level near shaft. An irregular shoot in winze carries some high grade ore and considerable assaying \$12 to \$15.

Development: by 2-compartment shaft to 200' level from where winze has been sunk to 300' with levels at 200, 250, 310, 360 and 500'; total workings, over 2,000'. Inactive between March and September, 1921; company is now driving N. E. to locate faulted vein segment.

Equipment: includes electrically driven hoist and compressor.

RESCUE-EULA MINING CO. NEVADA

Office: 265 Russ Bldg., San Francisco, Cal., and Tonopah, Nev.

Officers: Chas. D. Laing, pres.; Herman Zadig, v. p.; with J. W. Dorsey, Oscar Daube and W. G. Morrow, directors. Chas. D. Olnev, sec.; J. J. McQuillan, gen. mgr.; H. D. Moore, supt.

Inc. in Nevada. **Cap.** \$1,500,000; \$1 par; assessable; outstanding, 1,421,578 shares. Assessment No. 11 was levied in December, 1918. Stock transferred at company's office; Registration Surety Co., San Francisco, registrar. Listed on San Francisco Stock Exchange and traded in on New York Curb.

One dividend of 2½¢ per share was paid June 8, 1917. On May 31, 1921, liquid assets were \$20,774 and accounts payable, \$1,926. Share prices, low 13¢, high 31¢, in 1920; 13¢ and 23¢, in 1921.

Property: the Rescue, Eula, Last Thought and Maggie May claims, 80 acres, at Tonopah, said to show silver-bearing ore in veins.

Development: by 1,100' shaft, with recent work all below the 900' level. Stopes are 80 to 150' long, with milling ore 2 to 4' wide.

Production: for year ended May 31, 1921, was \$100,509 gross, and \$8,701 net. Value per ton \$25.70, as against \$25.07 in previous year.

RESERVATION HILL M. & M. CO. NEVADA

Address: W. E. Cassan, mgr. Carson City, Nev.

Officers: R. A. Trimble, pres.; W. E. Baldy, v. p.; R. A. McKay, sec.-treas., with H. R. Burlington and J. E. Monahan, directors.

Inc. 1907, in Nevada. **Cap.** \$1,000,000; \$1 par; 788,000 issued.

Property: 2 claims, 35 acres, 1 mile from Reservation station, Mineral county, partly under lease.

Development: by short tunnel and shallow shaft, the latter said to show 18" of ore that assayed high in silver, lead, and gold.

A prospect not being operated 1919-20.

REVELATION DIVIDE MINING CO.**NEVADA**

Mail returned from Tonopah, Nev.

Inc. in Nevada. Cap. \$15,000; shares 1c par.

Property: a group of 2 claims in the northwestern part of district. 3 miles from Gold Mountain.

REVERT DIVIDE MINING CO.**NEVADA**

Office: Tonopah, Nev.

Officers: A. Revert, pres.; B. L. Revert, v. p.; P. Revert, sec.-treas.

Inc. March 26, 1919, in Nevada. Cap. \$15,000; 1c par. Listed on San Francisco Stock Exchange.

Property: 4 claims, 1,200' west of Tonopah Divide, and between which is the Verdi.

Development: by shaft, 400' deep, Dec., 1920. Reported that a 35' quartz vein had been uncovered in a W. crosscut; ore is of nominal value. Three entire claims and greater part of Polo claim are under 3 years lease, from July, 1920, to the Kernick Divide Mng. Co. (q. v.); operations are carried on through the 900' Kernick shaft.

Equipment: hoist and compressor, the latter supplying air to the Verdi Divide.

REVIEW SILVER MINING CO.**NEVADA**

Address: Schurz, Nev.

Property: in the Reservation district, Mineral county. Reported, October, 1921, that a merger had been effected with V-7 Mng. Co., which see.

REX DIVIDE MINING CO.**NEVADA**

Inc. in Nevada. Cap. \$150,000; shares 10c par.

Property: 6 claims adjoining the Ajax over 2 miles S. E. of Gold Mountain.

REX MINES CO.**NEVADA**

Address: Midas, Nev.

Property: the Rex mine, in the Gold Circle district, Elko county, about one mile E. of Midas, shows a fault fissure 5 to 16' wide, between rhyolite and andesite. The ore is a crushed and silicified rhyolite, much oxidized, said to carry \$5 to \$28 in gold-silver per ton. Developed by an incline. In 1919, the ore produced was treated at the Elko Prince mill.

RICHLAND MINES CO.**NEVADA**

Idle. Mail returned from Imlay, Nev.

Officers: John R. Tullis, pres.-supt.; B. J. Sears, v. p.-treas.-mgr. J. W. Ferguson, sec., with F. L. Reber and C. T. Smith, directors. C. T. Smith, res. agent and registrar.

Inc. May 15, 1919, in Nevada. Cap. \$150,000; 10c par; 750,000 shares in treasury. Annual meeting, May 15th.

Property: 4 claims, 80 acres, in Richland mining district, 7 miles N. of Imlay, Pershing county, is said to show veins in granite and shale. The main vein has an easterly course and dips due north; it is reported to be 2' wide and to average \$35 per ton in gold, silver and lead.

Development: by tunnel to cut veins at 100' depth.

RICHMOND-EUREKA MINING CO.**NEVADA**

Controlled by U. S. S. R. & M. Co., which see.

ROBUST GROUP**NEVADA**

Address: L. F. Clar, owner, Manhattan, Nev.

Property: 5 claims in Manhattan gulch, Nye county, developed by shallow shafts. Ore occurs in gravel beds said to average \$8 per cu. yd. in gold and silver.

Equipment: electric hoist and pump. Idle.

ROCHESTER BUCK & CHARLEY MINES CO.**NEVADA**

Successor to Buck & Charley Mng. Co.

Office: 18 Fordonia Bldg., Reno, Nev. Mine address: Winnemucca, Nev.

Officers: Geo. A. Bartlett, pres.; R. A. Preston, v. p.; Frank Reber, sec., with J. W. Davey and Jas. Boyd, directors.

Inc. in Nevada. **Cap.** \$1,000,000; outstanding, \$750,000; \$1 par. Annual meeting, first Wednesday in April.

Property: 8 claims, 150 acres, of Buck and Charley group at town of Rochester, Pershing county, shows contact deposits 6-16' wide between rhyolite and limestone, said to carry gold, silver and some lead ore. Was discovered in 1913.

Development: by 220' tunnel, with 600' of workings.

Equipment: includes electric hoist and air compressor.

A bonded lease on the property held by General Mines Co. was relinquished August 1919. At last account mine was being worked by individual lessees. Mine was a producer, 1918-20.

ROCHESTER COMBINED MINES CO.

NEVADA

Bankrupt, 1920. Included the Packard North Extension Mng. Co. and was itself to have been merged into the Rochester Nevada Silver Mines Co., a plan which however did not materialize. In August, 1920, the entire property, including a 300-ton mill that was never operated, was sold to satisfy a judgment for \$200,000. Officially reported that the Rochester Combined holdings will be redeemed by the Rochester Silver Corp. (q. v.), which now owns a majority of the stock; payment will be made with Rochester Silver treasury stock on basis of \$1.40 per share. Rochester Combined is described in Vol. XIII of this Handbook.

ROCHESTER ELDA FINA MINING CO.

NEVADA

Described in Vol. XIII. Merged into Rochester Nevada Silver Mines Co., now the Rochester Silver Corp., which see.

ROCHESTER HOME TRAIL MINES CO.

NEVADA

Address: 716 Phelan Bldg., San Francisco, Calif.

Officers: G. S. Johnson, pres.; C. C. Higgins, v. p. and mgr.; A. J. Wright, sec.-treas.

Inc. 1916, in Nevada. **Cap.** \$1,000,000; shares \$1 par; 575,000 issued.

Property: in Rochester district, Pershing county, adjoining the Buck & Charley, a small producer. Home Trail is said to have all the "earmarks" and geologic characteristics of the district. Ore opened assays from \$15 to \$75 per ton in silver and gold.

ROCHESTER LINCOLN CONSOLIDATED CO.

NEVADA

Address: Lower Rochester, Nev.

Property: on Lincoln Hill, Rochester district, Pershing county, includes Flunky No. 2. Shipments were being made in 1918.

ROCHESTER LINCOLN HILL G. & S. MINING CO.

NEVADA

Main office: Lower Rochester, Nev. **Eastern office:** 303 Granite Bldg., Pittsburg, Pa.

Officers: John J. Munzer, pres., Pittsburg; E. H. Meyers, treas.; W. H. Stott, sec. Stock of company is closely held. 4 men only meeting the expenses. There are no debts or other incumbrances.

Property: the Abe Lincoln mine, 70 acres, on Lincoln Hill, Rochester district, Pershing county. Four fissure veins in rhyolite, 2½' to 4' wide, are traceable for 500' to 850'; ore is tourmaline-bearing quartz, carrying silver and gold in ratio of 8 to 1, with a value of \$15 to \$25 per ton. For geologic description, see Bull. 580, U. S. Geol. Survey, 354.

Development: by tunnels, etc., totaling 1,600'. Property being developed slowly at present and without incurring indebtedness.

ROCHESTER MERGER MINES CO.

NEVADA

Described in Vol. XIII. Merged into the Rochester Nevada Silver Mines Co., now Rochester Silver Corp., which see.

ROCHESTER MINES CO.

NEVADA

Fully described in Vol. XIII. Merged into the Rochester Nevada Silver Mines Co., now Rochester Silver Corp., which see.

ROCHESTER NEVADA SILVER MINES CO.

NEVADA

Described in full in Vol. XIV. Title changed to Rochester Silver Corporation, which see.

ROCHESTER OCTOPUS MINES CO.**NEVADA**

Controlled by entire stock ownership by **General Mines Co. of Nevada**, which see.

Address: Lovelocks, Nev.

Office: Sam O'Connell, pres.-mgr.; W. E. Wright, v. p.-supt., R. J. Pierson, sec.-treas.

Inc. 1916 in Nevada. **Cap.** \$1,000,000; \$1 par.

Property: 65 acres at Lower Rochester, Pershing county, $\frac{1}{4}$ mile from a railroad, developed by tunnels. Ore is reported to assay 20 to 25 oz. silver and \$2 to \$5 gold per ton. Was a shipper in 1918.

ROCHESTER RAVEN MINES CO.**NEVADA**

Address: Lower Rochester, Humboldt county, Nev.

Officers: J. J. Morley, pres.; Frank L. Reber, v. p.; T. J. D. Salter, sec.-treas. and res. agt., with E. S. Howard, Frank Towelly and C. F. Hardley, directors.

Cap. 1,000,000 shares, 25c par.

Property: 3 claims, in Lower Rochester district, operated at last accounts by lessees who are reported shipping ore with values of \$34 per ton in gold and silver. Said to have shipped \$10,000 gross worth of ore in first few months of 1916. Geologic conditions are similar to those of district in general. During 1920, shaft was sunk 75' exposing vein 9' wide said to carry values of nearly \$25.

ROCHESTER SILVER CORPORATION**NEVADA**

Formerly Rochester Nevada Silver Mines Co.

Office: 310 Reno Natl. Bank Bldg., Reno, Nev. **Mine office:** Rochester, Nev.

Officers: O. W. Jones, pres.; F. M. Manson, v. p.; J. W. Davey, v. p.-treas.; with J. W. Snyder, R. W. Street, E. M. Lyon and Wm. Adams, directors. Executive Com., two vice-presidents and Jay H. Clemons. Fred A. Sawyer, sec.-asst. treas.; J. C. Rix, asst. sec.; C. D. Kaeding, consulting engr.-gen. mgr.; C. A. Bennett, gen. supt.

Inc. May 2, 1919, in Nevada. **Cap.** \$2,000,000; par \$1; \$1,775,079, outstanding, Sept. 30, 1921. Capitalization reduced from \$8,000,000 and change of name necessitated, Feb. 19, 1920, as a result of modification of original plan of consolidation. Under former title, **Rochester Nevada Silver Mines Co.**, a consolidation was effected May, 1919, of **Rochester Elda Fina Mines Co.**, **Rochester Merger Mines Co.** and **Rochester Mines Co.**; the Nenzel Crown Point Mng. and Rochester Combined Mines companies, originally included, refused to join the merger. The proportionate holdings of each shareholder remains the same as under larger capitalization.

The three companies received 937,500 shares of R. S. Corp. stock in exchange for theirs; 437,500 for Rochester Mines; and 250,000 each for Elda Fina and Merger. The scheme of consolidation was effected by dealing directly with individual shareholders who exchanged their stock for that of new company. This consolidation settled serious litigation over apex rights.

Corporation also owns controlling stock interest, 1,222,980 shares, in the **Nenzel Crown Point**, which became bankrupt, November, 1920, and in the **Rochester Combined**, whose property was sold for debts early in 1920; the latter will be redeemed and paid for with Corporation treasury stock at \$1.40 per share. Annual meeting, 2nd Monday in May.

During last quarter of 1919, the gross earnings from bullion were \$199,068; total operating costs, \$127,346, of which, \$33,485 was for stoping; \$24,310 for development; and \$34,508 for milling. Operating profit was \$71,722, and after deducting depreciation and old unpaid operating accounts, \$47,592. Excess of current assets over liabilities, \$142,382.

Balance sheet for year ending Dec. 31, 1920, shows, current assets, \$267,911, including cash, \$62,216; bullion, \$75,015; supplies, \$43,634; and liberty bonds, \$77,590. Liabilities were \$22,493. Total assets were \$1,711,708, and surplus, \$304,889. In same period, bullion sold was \$596,355 and

total operating cost, \$427,084, of which \$105,491 was for mining, \$73,504, development; \$129,663, milling; and \$22,127, administration. Net operating profit before deductions was \$169,271.

At end of third quarter, 1921, current assets were \$274,618, and liabilities \$33,521. Cash on hand was \$68,625 and bullion, \$70,925. Surplus was \$396,812.

A dividend of 5¢ (initial) per share was paid June 20, 2½¢ Sept. 20, and 2½¢ Dec. 30, 1921.

Property: 41 claims (2 patented) in the Rochester district, Pershing county. The 3 merged companies are described fully in Vol. XIII under individual titles and the Rochester Nevada in Vol. XIV.

Geology: in the Elda Fina—a contact deposit between rhyolite and felsite; in the Merger—quartz veins in rhyolite, carrying oxide and sulphide ore; in the Rochester Mines—replacement veins of tourmaliniferous, siliceous silver ore along fissures and shear-zones in sheeted rhyolite. See Bull. 580 U. S. Geol. Survey, 1914, p. 325 and Bull. 735, p. 16, 1922.

Development: the total amount of workings and surface exploration is extensive. In the Elda Fina, by 4 shafts, deepest 190' and by a drift at 500' through Nenzel Crown Point workings; in the Merger, by the Friedman and Pitt tunnels, 1,560' and 900' long, giving backs of 1,200' and 900'. Rochester Mines is the most fully developed, largely by tunnels; total workings cover several miles.

When present management took hold in 1919, but little commercial ore was available and "physical condition of the properties was very poor"; by expenditure of \$57,049 in development, largely on the Rochester Mines, a year's reserve was in sight at end of 1919; extensions of 2,898' being made during last quarter. In 1920, an aggregate of 7,813' was driven on 11 different levels, much of work being preformed on the 500', 600', 700', and 1,200' levels; a ratio of 1' of work to 5 tons of ore produced is maintained. Though little commercial ore is likely to be uncovered at depths of 1,000 or 1,200', development on 500', to 600' and 700' levels, in the west vein is reported to have been very encouraging. On Jan. 1, 1921, 8 months ore was in reserve, some part of previous reserve being written off because unprofitable at the lower price of silver.

For first 6 months in 1921, total advance was 3,031'.

Equipment: all of the mines have hoists, compressors, etc., including electric locomotives for main haulage tunnel and underground water service. Ore from Rochester Mines is handled by 12,000' aerial tram. The corporation uses Rochester Mines remodeled 180-ton cyanide mill, giving an increased saving of 2.5% in gold and 7% in silver. Electric power is available for all operations in the district except during great droughts. Expenditures for construction and equipment were, \$28,840 in 1919, and \$23,581 in 1920.

Production: early records of the 3 properties not complete, but Rochester Mines was the principal producer; for the 12 months ending April 30, 1918, the yield was \$606,541 from 63,541 tons of ore. Over \$3,000,000 produced, 1913-1918.

Since consolidation in last quarter of 1919, mill treated 13,923 tons of ore yielding \$14.30 bullion per ton, at an operating cost of \$9.14 per ton. During 1920 (287 days), 42,820 tons of ore were treated, 5,965 oz. gold and 540,912 oz. of silver being recovered, or an extraction of 91.7% and 82.1%; bullion value, \$13.90 per ton of ore; operating cost \$9.97 per ton. In 1921, for 9 months beginning with March, production was \$449,844 from about 36,300 tons of ore.

Reported late in 1921, that the Rochester corporation had agreed to loan the Candelaria Mines Co. up to \$200,000 for the construction of a 300-ton cyanide mill. The directorates of the two companies are in part the same.

Consolidation of this group, with which additional territory is to be included later, is the best thing that could have been done, settling litigation

centralizing management, operations and treatment of ore. The failure of electric power (80 days) in 1920 somewhat retarded operations, but, beginning with the first dividend, future possibilities seem bright.

ROCHESTER TREASURE MINING CO. NEVADA

Officers at last accounts: J. C. Colligan, pres.; J. W. Kromer, v. p.; John Golden and Harry J. Murrish, directors. J. E. McGovern, sec.-treas.

Inc. April 14, 1913, in Nevada. **Cap.** \$1,500,000; \$1 par; 500,750 issued.

Property: the Old Relief mine, 5 claims, 100 acres in Relief canyon in Rochester district, Pershing county, 4 miles south of Nenzel Hill. **Geology:** a silver-bearing quartz vein 12 to 25' wide, cutting limestone and running S. E., dipping 55° west with a pay shoot 10 by 25'

Development: by tunnels 75 to 450' long. Workings to depth of 300' total 1,000'. See U. S. G. S. Bull. 580, p. 362.

Examined by J. C. Bray. Presumably idle.

ROCHESTER UNITED MINES CO. NEVADA

Fully described in Vol. XIII. Reorganized 1918, as **Reorganized United Mines Co.**, which see.

ROCK HILL PLACER CO. NEVADA

Out of business. See Volume XIV.

ROCKLAND MINING CO. NEVADA

A reorganization (about 1918) of the Pittsburg-Dolores Mng. Co.

Address: L. F. Curtis, trustee in bankruptcy, Reno, Nev. **Mine address:** Yerington, Nev. Chas. Vignos, pres.; Canton, Ohio.

Property: 17 claims, 320 acres, at Rockland, in Pine Grove (Wilson) district, Mineral county, 27 miles S. of Yerington, comprises the claims of the old Rockland mine, discovered in 1868. Ore is quartz, with gold and silver values, occurring in a fissure vein from 1½ to 9' wide, with rhyolite hanging wall and granodiorite footwall. Vein strikes N. E., dips 40° E. and carries pay ore in shoots, 2 to 6' wide and 20 to 100' long, averaging about 0.44 oz. gold and 3.4 oz. silver, value about \$12.

Development: by tunnels and shafts; greatest depth of workings being 1,100' and total workings about 13,000'. Ore reserves estimated to be 3,000 to 5,000 tons.

Equipment: includes 45 h. p. hoist, 400' compressor and 75-ton cyanide plant, making a 92% extraction. Power supplied by Truckee River General Electric Co., in which Rockland has an ½ interest.

Production: for 18 months to Dec., 1916, was 27,268 tons of ore, including some from dumps and tailings, yielding \$230,370. Total to 1921, \$700,000. See under Pittsburg-Dolores in Vol. XIII and XIV for full details.

Present indebtedness, \$55,000 incurred to equip mill with expectation that funds would be raised by principal stockholders. Funds did not materialize and company became bankrupt in July, 1919.

ROMANCE DIVIDE MINING CO. NEVADA

Office: Goldfield, Nev. J. E. Ewing, agt.

Officers: A. H. Elftman, pres.; J. W. Dunfee, v. p.; Clyde Cannon, sec.; J. E. Ewing, treas., with C. W. Taylor, directors.

Inc. April, 1919, in Nevada. **Cap.** \$150,000 10c par; 750,000 treasury shares.

Property: 5 claims adjoining Capital Divide on S. and Pershing Divide on N. E., in the S. E. part of the district.

ROOSEVELT DIVIDE MINING CO. NEVADA

Mail returned from Tonopah, Nev.

Officers: E. S. Berney, pres.; Fred Strassberg, v. p.; Milton Detch, sec.; A. G. Foster, treas. and mgr.

Inc. April, 1919, in Nevada. **Cap.** \$150,000; shares 10c par.

ROSALIND DIVIDE MINING CO. NEVADA

Office: Kind Co. Store, Tonopah, Nev.

Officers: M. R. Averill, pres.; F. J. Klensnig, v. p.; L. M. Kind, sec.-treas., with W. I. Douglass and S. Fox, directors.

Inc. April 9, 1919, in Nevada. **Cap.** \$100,000; shares 10c par.

Property: 6 claims in the extreme N. E. part of the district, nearly 4 miles from Gold Mountain. Geologic indications considered good.

ROSETTA DIVIDE MINING CO. NEVADA

See Reorganized Rosetta Divide Mng. Co.

ROUND MOUNTAIN HOMESTAKE MINING CO. NEVADA

Controlled presumably by Round Mountain Mining Co.

Property: mineral rights to the Dixon Stebbins and Lookout lode claims by transfer from Round Mountain Mng. Co., which received the placer rights of the Homestake group, 71 acres, and 100,000 of R. M. Homestake Mng. Co. shares.

ROUND MOUNTAIN MINING CO. NEVADA

Offices: 1011 First Nat'l Bank Bldg., San Francisco, Goldfield, and Round Mountain, Nye county, Nev.

Officers: L. D. Gordon, pres. and gen. mgr.; J. R. Davis, v. p.; H. G. Mayer, sec.-treas., with W. H. Webber and W. C. Erb, directors. Gibson Berry, gen. supt.; R. J. Ledwick, mine supt.; E. Michal, mill supt.; J. H. Bergin, placer supt.

Inc. March 28, 1906, in Nevada. **Cap.** \$1,000,000; increased to \$1,500,000 in 1914; \$1 par; outstanding 1,358,899. Stock transferred in company's San Francisco office; Anglo-California Trust Co., San Francisco, registrar. Annual meeting, third Monday in February. Listed on San Francisco and Nevada exchanges, and on New York Curb. Company owns 200,000 shares in Fairview Round Mountain M. Co.; 500,000 shares in Fairview Extension Mng. Co.; and 100,000 in Round Mountain Homestake Mng. Co.; interest in the 2 latter obtained in exchange for mineral rights on lode claims.

Dividends: total \$363,965; the last one, 4c per share, was paid in August, 1913.

The following table gives financial results during the past three years, the 1915-16 period being for 21 months

Year	Revenue	Operating profit	Depreciation	Current Assets	Current Liabilities
1920.....	\$106,923	*\$ 15,933	\$40,029	\$ 92,141	\$143,057
1919.....	113,533	9,493	70,069	112,104	124,541
1918.....	98,889	24,646	39,405	100,357	82,886
1917.....	225,586	123,751	28,910	88,027	90,090
1915-'16.....	503,508	100,490	35,631	71,198	140,000

* Deficit.

Assets 1919-'20 include stocks owned; liabilities include notes payable. \$120,000 in 1915-'16, \$90,000 in 1917, and \$60,000 in 1918, \$52,500 in 1919, \$94,500 in 1920.

Revenue includes dividends from Fairview Round Mtn. M. Co. of \$4,000 in 1918, \$28,000 in 1919, and \$6,000 in 1920.

Property: 2,009 acres (347 patented and 280 acres surveyed) in Round Mountain district, Nye county, 70 miles N. E. of Tonopah, the nearest R. R. point, exclusive of property in Jett and Jefferson canyons. Company also owns placer rights to 216 acres.

Geology: claims show large, low-grade, oxidized gold-silver deposits that are replacements along fissures and sheeted zones in rhyolite, with E.-W. strike, dip 15°, average width of lode ore, 8'.

In 1914, company took over the Round Mountain Sphinx M. Co.'s claims, thus ending several years of litigation involving apex rights in Los Gazabo claim.

Development: by 1,000' incline shaft with about 40,000' of workings. Management reports a large tonnage of \$2 to \$7 ore blocked out in the mine. Lode exploration disclosed a large sulphide orebody at 900'. Selective mining raised the grade to \$7.10 per ton in 1916 from \$5.68 in 1915, \$6.57 in 1914 and \$5.28 in 1913. Four year's lode mining indicated that

operations were conducted at a small profit with the 180-ton mill, and not less than 500 tons should be treated daily. These large low-grade deposits are the result of dissemination of gold throughout strongly silicified zones in the rhyolite mass of the mountain. In many places the rhyolite is much altered, and the better parts of this ore yielded \$4 per ton. Enrichments occur throughout and the mass should be profitable, so a large expenditure on its exploitation is justified.

The ore is free milling. Large scale tests were made in 1917. Separate mill runs being tried on ore from separate zones in the mine. Only three were completed as the fourth was too low-grade. A. W. Geiger was in charge of this work. From section 921, there was milled 1,422 tons of \$3.20 ore, of which 78.5% was recovered by amalgamation. A 55 or 60-cent tailing could be depended upon. This section is one of the largest ore-zones in the mine and is favorable for future exploitation. Sections 710 and 473 are too poor for consideration.

The lode mine has been worked largely by lessees during past few years who produced ore yielding \$8,010 in 1917, \$78,207 in 1918, \$112,623 in 1919; ore averaged \$39.53 per ton; the royalties to company amounted to \$1,817, \$17,442 and \$25,350. Company resumed lode mining to a limited degree making extensions of 1,879', and mining 560 tons yielding \$3,232. Including lessees, total advance was 3,965'. In 1920, output by company (to July 1) was 4,513 tons of ore yielding \$21,378 bullion; by lessees, 1,279 tons valued at \$67,352 net, of which \$15,341 was royalties. Extensions in 1920 were 20,006' by company and 2,139' by lessees.

The company's operations for 1918-'20 were mainly confined to placer mining. Company has over 1,523 acres of placer ground and estimates 3,000,000 yards of gravel worth \$1 a yard as available. Two monitors are used, tearing down and sluicing 1,200 to 1,500 yd. a day; main tail race is 5,276' long, lined throughout with 25 lb. rail, with two long laterals. The high-pressure pipe-line is 45,000' long, is spiral steel, commencing with 30" and reducing to 20, 18 and 16"; head 600' with 400 miner's inches of water. Total cost of the Jett Creek pipe-line, water-rights and placer equipment has been over \$200,000. Operations started in June, 1915.

The controlling factor in these placer operations is the water-supply, giving various results in different seasons. In 1916, a shortage of water was aided by teams and scrapers; in 1917, the high-water season lasted 85 days, so a dam was built in Jett canyon, and the waters of Jefferson and Shoshone creeks were purchased; in 1918, the season was the poorest yet experienced, the hydraulic head being only 45% of that in 1917; in 1919, in spite of indications to the contrary, the placer water season was very short, and in 1920, not much better; season of 1921 started a month earlier and proved satisfactory. A new dam has been built to impound flood waters from Jett and Jefferson canyons.

Equipment: other than placer, includes two 50-h. p. hoists, 10-drill compressor, electric power and 180-ton plant, including Huntington and tube-mills. Company also operates the Toquima Stores Co., which carries a complete stock of domestic supplies.

Production: not including that of lessees, shows the following:

Year	Tons	Value	Profit	Yards	Value	Profit
To end of 1916	398,897	\$3,004,229	\$752,934	175,477	\$139,912	\$65,813
1917.....	12,118	78,483	29,773	127,788	140,016	91,016
1918.....	71,367	68,324	19,532
1919.....	560	3,862	15,572*	62,640	46,258	7,787*
1920.....	4,513	21,378	13,938*	64,665	56,277	11,646

* Loss.

The profits do not include royalty or sundry revenue.

For first 6 months in 1921, the bullion yield from lessee operations was \$47,900 and royalties to company, \$11,406.

In 1921, to July 22, 100,000 yards of gravel were hydraulicked giving a head box yield of \$83,000, indicating a final cleanup value of \$116,000.

Company has an efficient management and has made a good record, despite unfavorable conditions. The future depends on its ability to mill a large quantity of low-grade ore at low cost, and on the profits from placer mining.

ROYAL CONSOLIDATED COPPER CO. NEVADA-ARIZONA

Presumably dead. Well described in Vol. XIV, and more fully in Vol. XI, Copper Handbook.

ROYAL DIVIDE MINING CO. NEVADA

Office: Tonopah, Nev.

Officers: J. L. Joseph, pres. and treas.; E. C. Simpson, v. p.; Otto Falk, sec., with Hugh Brown, Joseph Golden, Joseph Seeley, L. Blumenthal and L. H. Norris, directors. Charles Mayote, supt.

Inc. April 10, 1919, in Nevada. Cap. \$300,000; 20c par; assessable. Listed on San Francisco Stock Exchange.

Property: the Ford group and others, 13 claims, 4,500' N. E. of Tonopah Divide.

Development: shaft down 50'.

Equipment: 50-h. p. hoist, 75-h. p. compressor, drills, etc.

RUBY HILL DEVELOPMENT CO. NEVADA

Address: E. O. Holter (pres., Mng. & Dev. Corp.), 60 Broadway, New York. Robert Frese, sec.-treas.

Inc. 1920, in Delaware

Held lease by assignment from the Mining & Development Corp. (q. v.) on mine of the Richmond-Eureka Mng. Co. (controlled by U. S. S. R. & M. Co.) from January 1920, with option until 1922 on 250,000 Richmond-Eureka shares; the M. & D. Corp. to receive 100,000 Ruby Hill shares. Operations including dewatering of Locan 1,200' shaft, and shipment of 1,000 tons of low grade ore, were conducted intermittently until April, 1921, when lease was relinquished.

RUBY SILVER MINING & DEVELOPMENT CO. NEVADA

Dead. Fully described Vol. XIII. See Quicksilver Mines Co.

RYAN DAVIS DIVIDE MINING CO. NEVADA

Letters returned from Tonopah, Nevada.

Officers: Louis O'Neal, pres.; J. B. Davis, v. p.; J. C. Kind, sec.-treas.; with F. E. Chapin and W. R. Porter, directors.

Inc. in Nevada. Cap. \$250,000; 10c par.

Property: a group that adjoins Iron Crown, and another claim near the Hasbrouck; also owns a group of claims at Keeler, Calif.

RYE PATCH MINES CO. NEVADA

Office: Judge Bldg., Salt Lake City, Utah.

Officers: H. A. Smith, pres.; J. E. Ray, v. p.; S. A. Greenwood, sec., with B. F. Bauer, M. I. Finnigan, E. L. Marsh and H. E. Clement, directors. The same in part as those of the American Mng. & Expl. Co.

Property: two old mines (the Alpha and Silver Bell) 17 claims formerly property of Silver Bell and Alpha Cons. Mines Co., in the Star (Rye Patch) district, Pershing county. Has for many years been known as the Rye Patch mine and was for a time under lease to the Rye Patch Mng. & Leasing Co. (described in Vol. XIII), and more recently operated by the American Mng. & Expl. Co. The Alpha and Silver Bell are reported to have produced \$11,000,000.

A quartz-lime ore, carrying lead-zinc, copper and silver occurs in irregular masses in much shattered limestone covering an area 250 x 600'. Early workings comprise several tunnels and extensive stopes. See Am. M. & Ex. Co. for recent activities which however ceased in mid-1921.

RYE PATCH MINING & LEASING CO. NEVADA

Fully described Vol. XIII. See Rye Patch Mines Co.

SAFFORD COPPER CO.**NEVADA****Office:** 67 Milk St., Boston, Mass.**Officers:** Jas. H. Kimball, pres.; Jas. S. Whitelock, v. p.; Owen Goldsmith, treas.; Frank W. Smith, supt.; preceding officers are directors.**Inc.** 1915. **Cap.** \$300,000; \$1 par. Metropolitan Trust Co., Boston. transfer agents.**Property:** claims in Safford district, Eureka county, said to show copper-silver ore in quartz veins from 18"-30" wide, traversing porphyry and rhyolite formation.**Development:** by 2 shafts, 30' and 100' deep, on the Evening Star claim. First shipment in 1917, returned 8.28% copper and 128 oz. silver per ton. Merely a prospect.**SAINT ANTHONY MINES CO.****NEVADA**

Owned by Atolia Mining Co.

Property: Toy tungsten mine and a 75-ton mill at Toy, 21 miles S. W. of Lovelocks. Ore occurs in an 8' vein carrying 3% scheelite. Development fairly extensive; deepest workings 200'.

Property operated on a small scale by lessees during 1918 and yielded 32 tons of concentrate.

Company suspended operations early in 1917 as mine was practically exhausted. Entire equipment offered for sale in December, 1921.

SAINT ANTHONY MINING CO.**NEVADA****Address:** Goodsprings, Clark county, Nev. Jos. Dederichs, gen. mgr. and chief owner.**Property:** 7 claims, 140 acres, in the Yellow Pine district, 2½ miles W. of Goodsprings, Clark county. Ore is said to assay 10% to 18% copper in orebodies up to 15' width. Developed by 2 incline shafts, 240 and 175' deep, located 500' apart.**Equipment:** includes 2 gasoline hoists and an aerial tram 850' long.**Production:** to June, 1915, reported as \$60,000. Reported shipping one car of ore every 6 weeks during 1916, but no recent returns secured.**ST. LOUIS MINING CO.****NEVADA****Address:** 365 Bush St., San Francisco, Calif.**Officers:** W. F. Davis, pres.; A. K. Durbrow, sec.**Inc.** in California. **Cap.** \$108,000; par \$1.**Property:** in Storey county.**ST. PATRICK DIVIDE MINING CO.****NEVADA****Office:** Tonopah, Nev.**Officers:** G. W. Allen, pres.; J. H. Shepard, v. p.; C. R. Evans, sec.; John Barrier, treas., with Wm Forman, directors.**Inc.** April, 1919, in Nevada. **Cap.** \$150,000; 10c par; none issued.**Property:** 6 claims, 100 acres, in the S. E. part of the district, adjoining the Airedale on the south. Surface work only.**SALMON RIVER MINING CO.****NEVADA**Probably defunct. **Former office:** 19 West Granite St., Butte, Mont. Mine near Contact, Elko county. Carries gold and silver-bearing copper ore. Had gasoline power and a small smelter. Not operating, at last accounts.**SALT LAKE TUNGSTONIA MINES CO.****NEVADA****Office:** care Allen T. Sanford, counsel, Boston Bldg., Salt Lake City.**Mine office:** Tungstonia, White Pine county, Nev.**Officers:** L. W. Roberts, pres. and gen. mgr.; Gustav Wissler, v. p.; A. F. Stumpf, sec and treas., with S. T. Merrill and J. A. Rasmussen, directors. William Peterson, cons. eng.**Cap.** 1,000,000 shares; assessable.**Property:** 15 claims adjoining the Shepherd mine, in north end of Snake range, shows a number of veins 1-48" wide, carrying hubnerite ores said to average 2% tungstic acid. The veins occur in granite, near a limestone contact.

Company has a 25-ton mill, using Marcy ball-mill and Wilfley tables. Concentrate is said to contain 71% tungstic oxide.

A lower tunnel is 300' long, and cuts 3 fissure veins.

SANDSTORM-KENDALL CONSOLIDATED MINING CO. NEVADA

Address: Reno, Nev.

Officers: Geo. Wingfield, pres.; W. E. Zoebel, v. p.; H. G. McMahon, sec.; A. I. D'Arcy, mgr.

Inc. in Nevada. Cap. \$1,500,000; \$1 par; assessable outstanding 1,326,724. Assessment No. 16, of 1c, levied Jan. 22, 1921. Listed in San Francisco.

Property: 70 acres at Goldfield developed by shaft to 500' with a winze to the 700' level. Ore carries gold and is a contact deposit between andesite and rhyolite. **Development:** has not shown the existence of important orebodies.

After several years idleness, company has come to life and taken 2 year option on Bonanza group of 7 claims, adjoining the Gold Hill group of the Goldfield Dev. Co. on the W.; also a 10 year lease on part of the Gold Hill group. A 14' to 70' vein showing low grade ore extends from the later into Bonanza ground. A shaft is to be sunk at the joint expense of this company and Goldfield Dev.

SAUNDERS DIVIDE MINING CO. NEVADA

Inc. 1919, in Nevada. **Cap.** \$150,000; par 10c; 750,000 in treasury.

Property: a group of 6 claims in the N. W. part of district, 3½ miles from Gold Mountain.

SAVAGE GOLD & SILVER MNG. CO. NEVADA

Office: 315 Bush St., San Francisco.

Property: about 20 acres, patented at Virginia City, Storey county, on the Comstock Lode between the Gould & Curry on the N. and Hale & Norcross. Covers 771' on the lode and is developed by a 2,400' shaft. Reported to have produced \$20,552,000 from above the 16th level in early days. Assessments are levied from time to time.

Claim forms a part of properties consolidated by the **Middle Mines Assoc.**, which see.

SCOOP DIVIDE MINES CORPORATION NEVADA

Mail returned from Tonopah, Nev.

Property: 5 claims, adjoining Dyke Divide on north, in N. E. corner of the Gold Mountain district, Esmeralda county.

SCORPION MINING CO. NEVADA

Address: 333 Kearny St., San Francisco.

Officers: Herman Zadig, pres.; A. V. Fisher, sec.

Inc. 1889, in California. **Cap.** \$200,000; par \$1.

Property: in Storey county.

SEARCHLIGHT MERCANTILE CO. NEVADA

Address: Searchlight, Nev.

Property: a gold-copper mine near Searchlight, Clark county. Inactive 1919-'20

SEATTLE CONTACT MINING CO. NEVADA

Address: J. V. Marshall, gen. mgr., Contact, Elko county., Nev. T. A. Marshall, pres., L. B. Walters, sec., Seattle, Wash

Property: the Delano mine, 8 claims, very near Contact, shows the Brooklyn contact vein, and the Palo Alto and Blue Bird veins, 150' apart. The latter is a fissure vein, 1-15' wide, in grano-diorite, with high-grade streak mined for 2' to 10' wide, and yielding copper ore.

Geology: and development of this group are fully described by Schrader, Bull. 497, U. S. Geol. Survey, 1912, pp. 119 and 121.

Development: mainly by tunnels and a 170' shaft.

Production: in 1916, 1,950 tons, averaging \$45 per ton, and carrying 18% to 23% copper, 6 oz. silver and 80 cts. gold per ton. Production costs given at \$17.50 per ton. In summer of 1920, reported to be shipping high grade ore; reported also that first dividend has been paid.

SEATTLE MINING, MILLING & POWER CO. NEVADA

Contact, Nevada. Henry Smith, mgr. Company owns the Mammoth mine, covering 12,000' along a contact deposit 20' to 125' wide, reported to show 55' of 5% ore in one face.

Production: in 1916, amounted to 165 tons containing 9.5% copper, 6 oz. silver and \$2 gold, averaging \$43 per ton. No recent returns.

SEMINOLE-REGENT MINING CO. NEVADA

Address: 314 Clay Peters Bldg., Reno, Nev. **Mine address:** Rawhide, Nevada.

Officers: Alexander S. Proskey, pres.-gen. supt.; W. R. Grant, sec.-treas., with S. Frederic Taylor and Dr. Byron E. Eldred, directors.

Inc. Feb., 1919, in Nevada. Cap. \$1,000,000; \$1 par; 400,000 outstanding.

Property: the Proskey Regent group, formerly operated by the Mogul Mng. Co., about 14 full and 3 half claims, 300 acres, 2 miles from Rawhide, Mineral county and 27 miles by wagon-road from Schurz on the Goldfield branch of the S. P. R. R. See both Mogul Mng. Co. (Nev.) and Proskey Regent Mng. Co.

Ore: carrying gold and silver occurs in veins, 1 to 6' in width. Opened by 400' shaft. **Equipment:** includes 125-ton Black Eagle mill, compressors, tools and houses.

The mine is credited with past production of \$150,000. Re-opened late in 1919, and crosscut driven on 400' to cut the orebody. Was operating in 1920.

SEVEN TROUGHS COALITION MINING CO. NEVADA

Dead; see Vol. XIV. Was consolidated, Dec. 1920, with Seven Troughs Mng. Co. under name of **Seven Troughs Reorg. Mines Co.**, which see. The Coalition property was reported sold by the sheriff in November, 1920, to satisfy a judgment in favor of L. A. Friedman, president of the company, for \$51,041; was presumably redeemed.

SEVEN TROUGHS MINING CO. NEVADA

Dead; see Vol. XIV. Consolidated with Seven Troughs Coalition Mng. Co. to form **Seven Troughs Reorg. Mines Co.**, which see.

SEVEN TROUGHS REORGANIZED MINES CO. NEVADA

Is a consolidation of the Seven Troughs Coalition Mng. Co. and Seven Troughs Mng. Co., effective about Dec. 1, 1921. See Volume XIV for description of these companies.

Address: Lovelocks, Nev. John G. Huntington, of Reno, Nev. is cons. engr.

Dividends of former Coalition totalled \$252,533.; last in December, 1915.

Property: the Kindergarten and Wihuja groups, 14 patented claims, 264 acres, and the Fairview mine, 29 miles (26 patented), 2 miles S., all in Seven Troughs (Vernon) district, Pershing county, 32 miles N. W. of Lovelocks. Narrow quartz-filled veins 4" to 30" wide occur in basalt; the ore carries gold and silver in proportions of 1.3 to 1.1. The Kindergarten vein showed an ore shoot 130' long and 2' average width at 212' depth. Rich bunches of ore found in the Fairview mine yielded \$65,000 prior to 1908.

Development: the Kindergarten to a depth of 1,630' by shafts and tunnel; at Fairview, by 2 shafts, deepest 700'. The new company proposes to drive a 5,700' tunnel to cut the Coalition at depth of 1,100' to cost \$200,000.

Equipment: includes hoists and a 10-stamp mill (at the Kindergarten).

Production: of 1915 is the last on record, and consisted of 260 tons of \$15,000 gross value and 4,509 tons yielding \$416,084, from the Fairview and Kindergarten respectively. Except for work of lessees on the Coalition property, the mines have been idle for past 5 years.

SEYLER-HUMPHREY GOLD MINING CO. NEVADA

Address: C. T. Lawrence, agt., Manhattan, Nev.

Officers: F. E. Seyler, pres.; F. G. Humphrey, v. p.; J. C. Humphrey, sec., with C. T. Lawrence, directors.

Inc. 1906, in South Dakota. **Cap.** \$1,000,000; \$1 par; 975,000 issued.

Property: 5 claims, 2 patented, 100 acres, includes the April Fool, War Eagle, Ida and Lottie claims at Manhattan, Nye county. Ore, which occurs in pockets, is said to average better than \$40 per ton.

Development: by tunnels driven towards a lime-shale contact. Operated intermittently by lessees on a royalty basis.

SHAMROCK DIVIDE MINING CO.

NEVADA

Office: Tonopah, Nev. A. H. Keenan, agt.

Officers: M. J. Sullivan, pres.; P. A. McCarron, v. p.; A. H. Keenan, sec.-treas., with Roger Dougherty, and R. F. Wendover, directors

Inc. April, 1919, in Nevada. **Cap.** \$150,000; shares 10c par.

Property: 4 claims, ½ mile W. of Royal Divide and 1¾ miles N. W. of Tonopah Divide.

SHEBA GOLD & SILVER MINING CO.

NEVADA

Office: Houghton, Mich. **Mine office:** Imlay, Nev.

Inc. in Utah.

Property: the old Sheba mine, 43 claims, 8 patented, about 800 acres, in the Sierra district, Pershing county, near Dun Glen and 14 miles S. of Imlay; also a mill site and water rights. In the Sheba vein irregular bonanza ore shoots occurred near the surface in bedding planes in limestone, or between limestone, sandstone and rhyolite, connected with a well defined fissure vein, up to 3' wide, at comparatively shallow depth. The ore is quartz carrying antimonial silver, lead, zinc and copper. Ground is said to show 3 other veins. The Sheba mine was opened in 1860 and is reputed to have produced \$5,000,000 from an area 200 x 300', prior to 1871.

Development: by a 1,480' tunnel cutting the Sheba vein at 800', and at the Mammoth vein by a 520' tunnel with a back of 300'.

Equipment: includes 210' compressor, water power, aerial tram and necessary buildings. A 5-stamp mill was burned in 1920.

Property: was under lease and option first to the Nevada Sheba Silver Mng. Co. (q. v.) to about Jan. 1921, and latter to the Little Giant Gold & Silver Mng. Co. (q. v.), formed by the same interests.

SHEEPHERD MINE

NEVADA

Lovelocks Pershing county, Nev.

Operated under lease by **Jose-Davis M. & M. Co.**, which see.

SHEPHERD SILVER MINING CO.

NEVADA

Mail returned from 1108 Hearst Bldg., San Francisco. B. B. Shepherd, sec.-mgr., Marietta, via Mina, Nev.

Inc. 1919, in Nevada.

Property: 2½ miles from the Silver Gulch mine in the old Black Mountain district, 10 miles S. of Mina. Two 35' shafts and surface cuts have exposed lead-silver ore. A 180' crosscut tunnel driven during 1920 uncovered a 5' vein at depth of 108'; ore is said to range from \$12 to \$800 per ton.

SHIPPER COPPER MINING CO.

NEVADA

Address: Luning, Mineral county, Nev. Frank Everett, pres.; Jas. F. Quinlan, mgr.

Property: 2 claims, 4 miles S. W. of Luning, developed by a 400' shaft, shows a small vein of high-grade copper ore in dolomite, shipments from which are reported to have yielded 8% copper.

SHOSHONE POLARIS MINING CO.

NEVADA

Idle since 1911. See Vol. XII.

SIERRA DIVIDE MINING CO.

NEVADA

Office: 421 Clay Peters Bldg., Reno, Nev.

Officers: A. A. Codd, pres.; H. F. Bruce, v. p. and cons. engr.; W. H. G. Buck, sec.-treas., with Al. Modeen, and R. H. Bates, directors.

Inc. April, 1919 in Nevada. **Cap.** \$150,000; par 10c; 776,200 issued.

Property: 3 claims, 3,000' north of Tonopah Divide, surrounded by Divide City, Horseshoe, Midway, Smuggler, Florence, and Knox. Also owns control of the Morning Glory gold mine at Alleghany, Calif., which ad-

joins Tightner mine and has a complete equipment costing \$50,000, including a 5-stamp mill. Idle.

SIERRA NEVADA MINING CO. NEVADA

Office: 342 Mills Bldg., San Francisco, Calif.

Officers: W. G. Morrows, pres.; W. E. Sharon, v. p.; Jas. Newlands, Jr., sec., with Frederic Vincent and R. H. Morrow, directors Alex Wise, supt.

Inc. Nov., 1904, in California. Cap. \$200,000; \$1 par; assessable, all outstanding. Listed on San Francisco Exchange.

Property: 5,000' at the north end of the Comstock Lode, north of the Union Consolidated mine, in the Virginia mining district, Storey county, credited with a production of over \$1,000,000.

Exploration is being done by tunnel.

SIERRA SILVER MINES CORPORATION NEVADA

Successor to Arizona Annex Silver Mines.

Address: Mill City, or Unionville, Nev. Edw. S. Van Dyck, pres.

A stock, and probably controlling, interest is held by **Universal Silvers Co.**

Property: the old Essex mine at Chafey (Dun Glen) in the Sierra district, Pershing county, 6 miles N. E. of Mill City, shows a vein 6-7' wide, said to be traceable for 3,000', with smaller cross veins. The country rock consists of slates, with interbedded limestone lenses, and andesite flows all cut by diabase dikes. The ore is essentially silver.

The mine originally worked in the 70's, was reopened by present company early in 1921; reported in October that a rich shoot had been uncovered.

SIGNAL DIVIDE MINING CO. NEVADA

Richardson, Woodson & Foster, fiscal agent. Tonopah, Nev.

Officers: G. C. Fetterman, pres.; A. B. Hall, v. p.; Milton Detch, sec.; G. A. Foster, treas.; W. J. Douglass, cons.eng.

Inc. April, 1919, in Nevada. Cap. \$150,000; 10c par; assessable.

Property: 6 claims, north of Sutherland and over 1¼ miles north of Tonopah Divide. Surface exposures said to be favorable.

SILGOLED MINING CO. OF NEVADA NEVADA

Address: Pioche, Nev.

Officers: John W. Hamilton, Jr., pres.; Arthur Reall, v. p.-sec.-mgr.; Walter Pincus, treas., with E. M. Cooper and Wm. J. Yoell, directors.

Inc. 1915, in Nevada. Cap. \$100,000; 25c par; 248,000 treasury shares

Property: Ely Valley group, 9 patented claims, 134 acres, in Ely mining district, near Pioche, Lincoln county.

Ore: occurs in fissure veins and as chamber deposit in limestone, said to average 0.325 oz. gold, 3.05 oz. silver, 9% lead.

Development: by incline shaft to depth of 445', with 4,500' of workings.

Equipment: includes 25-h. p. hoist and compressor.

Management estimates ore reserves at 3,000 tons, with 1,500 tons blocked out.

Inactive 1919-'20.

SILVADA MINES CO. NEVADA

Address: E. S. Chafey, Luning, Nev.

Inc. 1920, in Nevada, by E. S. Chafey, C. C. Boak and B. F. Baker. Cap. \$150,000; 10c par; 750,000 treasury shares.

Property: 9 claims in Santa Fe district, Mineral county, 4 miles E. of Luning. Silver-lead ore occurs in limestone; said to assay \$31 for a width of 11'. Still in exploratory stage.

SILVER BAR MINE NEVADA

See California Crude Oil Co.

SILVER BELL & ALPHA CONSOLIDATED MINES CO. NEVADA

Dead. Described in Vol. XIV. Property taken over by **Rye Patch Mines Co.**

SILVER BELL DIVIDE MINING CO.**NEVADA,**

Inc. 1919, in Nevada.

Property: 4 claims, adjoining Treadwell Divide on east, about 2 miles north of east of Gold Mountain.

SILVER BLOSSOM MINES CO.**NEVADA****Office:** 442 Gazette Bldg., Reno, Nev.

Officers: W. E. Burch, pres.; Edward Bickmore, sec.; L. T. Brockbank, treas.-mgr.; U. G. Johnson, supt.

Inc. July 27, 1920, in Nevada. **Cap.** \$1,500,000; par \$1. Permit for sale of stock in California has been given. In February, 1921, treasury stock was being offered for sale, at 25c. per share.

Property: 8 patented claims, 160 acres, in Peavine district, Washoe county, 19 miles N. W. of Reno, shows 2 veins in diorite, 4' and 11' wide; ore carries copper and silver, with some gold and lead; average value, \$15 per ton, with high grade pockets.

Development: by 80' shaft. **Equipment:** hoist, etc.

SILVER BOW DIVIDE MINING CO.**NEVADA****Office:** Goldfield, Nev.

Officers: S. T. Bentley, pres.; C. H. Ellsworth, v. p.; H. B. Ruhl, sec.-treas., with G. W. Morris and G. M. Bentley, directors.

Inc. April, 1919, in Nevada. **Cap.** \$150,000; 10c par; 750,000 in treasury.

Property: 3 claims N. of Ben Hur, nearly 4 miles S. E. of Gold Mountain. Company also has lease and bond on a developed mine at Silver Bow, that has 800' development tunnel with ore of \$20 to \$48 per ton in sight.

SILVER CARLISLE MINING CO.**NEVADA****Address:** C. Van R. Cogswell, 35 Wall St., New York, or Pioche, Nev.

Officers: Robert Mulford, pres.; Fred. G. Corning, v. p.; C. Van R. Cogswell, sec.-treas., with Sidney Green and Theo. H. M. Crampton, (mgr.) directors.

Property: east of the Silver Peer Mining Co. holdings, at Silverhorn, Lincoln county, 23 miles N. W. of Pioche. See Nevada Silver Horn Co. for geological conditions, etc.

SILVER CENTER MINING CO.**NEVADA.****Address:** 232 No. Virginia St., Reno, Nev.**Officers:** C. E. Flagg, pres.; A. D. Bird, sec.-treas.

Inc. May 3, 1919, in Nevada. **Cap.** \$200,000; 10c par.

Property: adjoins that of the Nevada Black Hawk S. M. Co. in Silver Star district, Mineral county, 17 miles S. W. of Mina. In prospective stage.

SILVER CHIEF MINING CO.**NEVADA****Address:** Nixon Bldg., Reno, Nev.

Officers: D. A. Smith, pres.; W. T. Wilson, v. p.; J. B. James, sec.-treas., with E. H. Smith, and B. S. Gregory, directors.

Inc. 1919, in Nevada. **Cap.** 1,500,000 shares.

Property: 6 claims in the Gillis range, 12 miles N. of Luning, Mineral county, on the Rawhide-Luning road. Claims show granite-rhyolite contact, in which silver ore occurs.

\$30,000 had been expended up to November, 1920; and that \$50,000 worth of milling ore had been mined.

SILVER COIN MINING CO.**NEVADA****Address:** Ben Gill, Goldfield, Nev.

Officers: W. E. Sirbeck, pres.-mgr.; J. K. Turner, v. p.; Ben Gill, sec.-treas., with J. M. Hunker and B. W. Ward, directors.

Inc. January, 1920, in Nevada. **Cap.** \$150,000; par 10c; 750,000 treasury shares; assessable. Stock transferred and registered by company. Annual meeting, 3rd Monday in Feb.

Property: 9 claims in Railroad Spgs. section of the Lida district, Esmeralda county, 23 miles S. W. of Goldfield, and 4 miles E. of Allied M. & M. Co.'s ground. Three veins are shown in a shale-limestone formation, paralleling intrusions of diorite; quartz ore occurs in shoots, carrying gold

and silver, the latter predominating; assay value is said to be \$35 for a width of 3'. Developed by shafts, deepest 100', and tunnels longest 200'. Equipped with 15 h. p. hoist, etc.; a small flotation plant is contemplated.

At last accounts (July, 1920), operations were being conducted by the **Crescent Divide Mng. Co.**

SILVER COMET MINING CO.

NEVADA

Address: Panaca, Lincoln county, Nev.

Officers: at last accounts, E. D. Smiley, pres.-mgr.; M. J. Smiley, sec.; J. W. Baker, treas., with W. A. Burnett, directors, all of Boston, except E. D. Smiley.

Inc. Jan., 1913, in Nevada. **Cap.** \$500,000; \$1 par. Annual meeting in July.

Property: 5 claims, 100 acres, in the Comet district, Lincoln county. **Ore:** gold-lead-silver-tungsten, occurs in nearly vertical fissure veins in quartzite, said to assay \$30 per ton in gold, silver and lead. Developed by 145' vertical shaft, with 950' of workings.

Equipment: includes a gasoline hoist and 50-ton mill completed in 1915; the mill contains a crusher, rolls, mill and magnetic separator. No recent information.

SILVERDALE EXTENSION MINING CO.

NEVADA

Address: Pioche, Nev. Company controlled by Wm. H. Pike et al. of Las Vegas, Nev. Wm. Schauss, supt.

Property: 5 claims, N. W. of the Silver-Dale group, at new camp of Silverhorn, at S. end of Ely range, Lincoln county, 23 miles N. W. of Pioche.

SILVER DALE MINING CO.

NEVADA

Address: Pioche, Nev.

Officers: Peter Buol, pres.; J. L. Whipple, v. p.; C. C. Waring, sec.-treas., with Frank A. Crampton, mgr., and E. C. Marriage, directors. C. W. Geddes, of 25 Broad St., New York, has been active in promoting this and the Silver Peer Mng. Co.

Inc. Feb. 19, 1921, in Nevada. **Cap.** \$200,000; 10c par; 1,200,000 shares in treasury at incorporation. Transfer agt. and registrar, Security Transfer & Registrar Co., New York.

Property: 4 claims, 80 acres, at new Silverhorn camp, Lincoln county, 23 miles N. W. of Pioche, adjoins the Nevada Silver Horn on W. The vein outcrops 20' wide to a height of 10', in a shale-limestone formation; an ore shoot is said to be 400' long. Ore is quartz carrying silver, ranging from nothing to hundreds of ounces per ton. Still in prospective stage, but a depth of 100' has been attained.

SILVER DIVIDE MINES CO.

NEVADA

Office: Tonopah, Nev.

Officers: H. C. Brougher, pres.; J. L. Joseph, v. p.; E. J. Erickson, sec.-treas., with C. C. Boak, Gust. Hanson, (supt.) James Grimes, and W. J. Douglass, directors.

Inc. March 31, 1919, in Nevada. **Cap.** \$300,000 20c par; assessable Listed on San Francisco Stock Exchange.

Property: the Bazaar group of 6 claims, adjoining the Gold Reef and Lincoln county, 23 miles N. W. of Pioche. Gold Zone on the S., 2,200' S. of Tonopah Divide.

Development: by shaft down 400' in 1919, and gasoline hoist erected. A continuation of the Tonopah Divide vein was reported cut on the 400' level. In 1920-21, a new inclined shaft reached a depth of 250', and 800' of drifts were driven on this level to explore a 20' ledge. Patent application has been filed.

SILVER DIVIDEND MINING CO.

NEVADA

Address: Pioche, Nev. Church and Crampton, owners.

Property: N. and W. of the Silver Dale, at the new Silverhorn camp in Lincoln county, 23 miles N. W. of Pioche.

Address: Mina, Nev. Joe Beane, pres.; L. B. Spencer, cons. engr. **Inc.**

SILVER DYKE AND TUNGSTEN MINES, INC. NEVADA

Address: Mina, Nev.; Jos Beane, pres.; L. B. Spencer, cons. engr.

Inc. 1919, in Nevada.

Property: 4 claims in Silver Star (Gold Range) district, Mineral county, 12 miles by road S. W. of Mina. Originally located for its silver and gold in 1915, this property became a tungsten producer under the title Silver Dike Tungsten Mine (see Vol. XIII) and so continued under 2 different operators until November, 1918. In Sept., 1919, a 23' silver vein was opened at surface for 100', with average assay value of \$4.60 in gold and 42 oz. of silver. Orebody occurs in a fracture zone in a shale-limestone formation, intruded by diorite.

Development: by the 375' Silver tunnel, driven by present company; said to have uncovered both silver and tungsten ores, the former running \$29 per ton.

Production figures uncertain, but shipments of tungsten concentrate said to have been fairly large.

Equipment: includes 2 hoists, etc., and a mill, designed for concentration of scheelite, 85% completed. An earlier mill, erected by Atkins-Kroll, former owners was dismantled in 1917.

Early in 1920, reports to the stockholders of the company's activities were published as advertising matter in the "Nevada Mining Press"; in spring of 1921, it was reported that property had been leased.

SILVER DYKE DIVIDE MINING CO. NEVADA

Office: Tonopah, Nev. H. C. Price, agt.

Officers: Harry McNamara, pres.; W. A. Nye, v. p.; H. E. Dugan, sec-treas., also directors.

Inc. 1919, in Nevada. **Cap.** \$150,000; shares 10c par.

Property: 4 claims and fractions adjoining Bonanza Divide.

SILVERFIELDS AJAX MINES CO. NEVADA

Name changed to **Elgin-Bellehelen Divide Mining Co.**, which see.

SILVERFIELDS MINING CO., LTD. NEVADA

Address: C. F. Breitung, sec., 7 Hanover St., New York City.

Inc. Dec. 27, 1906, in Great Britain, as **Golconda Cons. Co., Ltd.** and changed name to present title Feb., 1909. **Cap.** £250,000; shares £1 par; issued. £143,353, fully paid.

The **Nevada Silverfields Co.** (q. v.) was incorporated in 1918 and acquired rights to develop, operate and purchase holdings of Silverfields Mng. Co., Ltd. and acquired the Nicklas (q. v.) Mng. Co. by stock exchange.

Property: 26½ claims, 400 acres, in Galena sub-district, Lander county, 13 miles S. W. of Battle Mountain. Ores carry gold, silver and lead.

Proven ores of this and the Nicklas Mng. Co. combined, amount to 217,000 tons of \$12.35 gross value per ton.

Idle many years.

SILVER GLANCE MINING CO. NEVADA

Address: Louis Sigmund, Goldfield, Nev. **Inc.** in 1919.

Property: 4 claims, 3 miles S. of Redlich station on the T. & G. railroad in Esmeralda county. Limestone, schist-gneiss, and shale are cut by 5 veins, that are from 5' to 14' wide and carry ore assaying from \$2.50 to \$222 per ton in gold, silver and copper. Former owners did 2,000' of stoping from a 60' inclined shaft.

SILVER GULCH MINING CO. NEVADA

Address: H. B. Vandersole, Mina, Nev. C. E. Noble, mgr.

Inc. 1919, in Nevada. **Cap.** \$150,000.

Property: 3 claims in the Silver Star district of Mineral county, 17 miles S. W. of Mina and 10 miles northwesterly of Belleville. Eleven narrow, though rich, silver veins have been exposed. Work was started late in 1919, and a small shipment of 60% lead ore, carrying 200 oz. silver per ton, was made.

SILVER HILL DIVIDE MINING CO.**NEVADA****Office:** Tonopah, Nev.**Officers:** C. O. Rogers, pres.; V. M. Place, v. p.; C. L. Rogers, sec-treas.; also directors.**Inc.** May, 1919, in Nevada. **Cap.** \$200,000; 10c par; 1,000,000 in treasury.**Property:** 7 claims, 8 miles S. W. of Divide and about 2 miles N. E. of Gold Mountain. Said to show ore at surface.**Development:** 335' shaft. Has spent \$30,000 on development.**SILVER HILL MINING CO.****NEVADA****Address:** 333 Kearny St., San Francisco, Calif. and Silver City, Nev.**Officers:** C. A. Torello, pres.; A. V. Fisher, sec.**Inc.** 1872 in Calif. **Cap.** \$108,000; par \$1; 84,897 shares issued. Last dividend of 5c in 1907.**Property:** at Gold Hill, Storey county, was a producer in 1919.**SILVER HILLS NEVADA MINES CO.****NEVADA****Address:** E. P. Esser, Tonopah, Nev.**Officers:** W. J. Loring, pres.; H. C. Stimler, v. p.-mgr.; E. P. Esser, sec.-treas., with E. A. Clark and E. W. Blair, directors. Chas. D. Wilkinson, supt.**Inc.** 1920, in Nevada. **Cap.** \$150,000; par 10¢. Listed on New York Curb and San Francisco Stock Exchange.**Property:** 9 claims of the Ingalls mine, an old silver producer, and the adjoining Jaegers group, 6 claims, in Lida (Tule Canyon) district, Esmeralda county, 37 miles southwest of Goldfield; the Ingalls group is under a 2 year lease and option to purchase, expiring March 12, 1922. A vein that extends for 2,000' across the two groups contains silver-lead ore carrying some gold. The South Silver Hills Mng. Co. had a lease on part of the Ingalls group; lessees work the Jaegers group.**Development:** in early days by numerous shafts and tunnels; deepest workings, 100'. Present management has sunk to 200' level, on which it is exploring the ore shoot which at surface and to depth of 100', was 12' wide and 100' long. Production for past 30 years said to total \$200,000, including \$45,000 worth of ore extracted by lessees, 1917-1919.**Equipment:** 2 hoists, compressor, etc., and 30-ton 8-stamp mill. The remodelled mill was placed in commission on June 1, 1921, and operated intermittently for experimental purposes on \$30 and \$40 ore until October. when a bullion shipment of \$14,000 gross was made, and operations ceased. This was immediately followed by an official statement that during the 18 months' operations, cost of production had exceeded the proceeds from output; that orebodies would not be likely to extend to any appreciable depth and that total available ore in mine had a gross value of but \$25,000. This statement was supplemented by a letter from W. J. Loring in which he says: "Failure of a mining property to realize expectations is, of course, unpleasant, but because one property has failed there is no reason to assume that all chances of finding a property are lost." The Ingalls mine reverted to owners on Dec. 31, 1921.In February, 1922, Silver Hills Nevada was reported to have taken over holdings of the **Buckeye Cons. Mng. Co.** (q. v.), near Silver City, Lyon county. The Silver Hills company being without funds, it was proposed to form a new corporation "Silver Hills Comstock Mng. Co." of same capitalization and to exchange stock on an equal basis plus a 1¢ assessment.

The Silver Hills shares were manipulated up to 65¢ in summer of 1921. by cross sales, enabling the broker who held an option on 453,000 shares to make a profit of \$102,000 from sales of \$271,000 worth of stock, for which the California Commissioner of Corporations revoked the broker's license.

SILVER HORN MINING CO.**NEVADA**

Mail returned from former address, L. R. Thatcher, Elko, Nev.

Property: 4 claims, on which a 70' shaft cut ore running from \$5 to \$40 per ton. Equipped with 25 h. p. hoist and 3-drill compressor.

SILVER HORN MINING & DEVELOPMENT CO. NEVADA

Promoted by J. C. Weir, 25 Broad St., New York. A market letter in April, 1921, invited subscriptions upon an initial 100,000 shares at $7\frac{1}{2}$ ¢ per share.

Property: the Nickel group of 3 claims, in the new Silverhorn camp, near the Bristol district, Lincoln county, 23 miles N. W. of Pioche. It is situated close to the Nevada Silver Horn Mng. Co. (q. v.), and has the same character of ore and formation as the latter.

Early in July, 1921, it was stated that financing of the company was well under way and that an active development campaign was about to be announced.

SILVER KING DIVIDE MINING CO. NEVADA

Address: A. L. McPherson, 341 Bush St., San Francisco, and Goldfield, Nev.

Officers: Jacob Berger, pres.; R. L. Colburn, v. p.; A. L. McPherson, sec.-treas.; Wm. Forman, res. agt., with W. E. Cunningham, directors. Gust Hanson, mgr.

Inc. Feb. 25, 1919, in Nevada. **Cap.** \$100,000; 10c par; 900,000 issued. Listed on San Francisco Stock Exchange.

Property: 3 claims, patented, 40 acres, 2,100' W. of Tonopah, Divide, and adjoining the Mecca and Hasbrouck Extension. Said to show two strong veins.

Development: a 60' shaft sunk on ore, several years ago, gave assays of \$12 to \$35 per ton. In 1919, a new shaft was sunk 215' and a 160' cross-cut at this level was said to have cut the Revert vein, 3' to 4' wide.

Equipment: hoist, compressor, etc., good for depth of 300'.

Reported, March, 1921, that company is in process of reorganization on an assessable basis.

SILVERMINES CORPORATION, THE NEVADA

Office: S. H. Brady, receiver, 805 Alto Bldg., San Francisco.

Inc. in Nevada. **Cap.** \$1,500,000; \$1 par.

Property: owns 85% of capital stock of Southwestern Mines Co., which has 11 claims at Hornsilver, 28 miles S. W. of Goldfield. The company also owns 6 other claims, the townsite of Hornsilver, telephone line to Goldfield and a 150-ton cyanide plant, built, 1917, to treat Southwestern company's ore.

On account of financial difficulties, lease on Southwestern was cancelled, and company ceased all operations, November, 1918; surface equipment, excepting mill and $8\frac{1}{2}$ mile pipe line to Lida, has since been sold. See **Southwestern Mines Co.**

SILVERPAH CONS. MINES CO. NEVADA

Was controlled by Frank D. Qualey, pres. of the Excelsior Mtn. C. Co. L. T. Brockbank, sec., Tonopah, Nev.

Inc. June, 1919, to operate the Silver Hill group in Lone Mountain range, 20 miles from Tonopah, Nye county. Originally worked in the early 70's.

Up to 1919, only prospecting work by shallow shafts had been done, but rich silver ore was reported opened at depth of 65' in ground between 2 shafts. Reported that R. B. H. Morrill acquired the property, Dec. 13, 1921, and that name of company would be changed to Morris Silver Mng. Co.

SILVERPAH EXTENSION MINES CORPORATION NEVADA

Mail returned from last address, Tonopah, Nev.

Inc. Aug., 1919, in Nevada.

Property: 10 claims adjoining the Silverpah Cons. in Lone Mountain district, Nye county. Extension of veins of its neighbor are believed to run through this ground.

SILVER PEER MINING CO. NEVADA

Address: Pioche, Nev.

Officers: Peter Buol, pres.; L. F. Peer, v. p.; C. C. Waring, sec.-treas., with Frank A. Crampton, mgr., and E. C. Marriage, directors. C. W. Geddes,

25 Broad St., New York, has been active in promoting the Silver Peer Mng. Co. and Silver Dale Mng. Co.

Inc. Feb. 25, 1921, in Nev. **Cap.** \$200,000; 10¢ par; 1,200,000 treasury shares at incorporation. Transfer agt. and registrar, Security Transfer and Registrar Co., New York.

Property: 6 claims, 120 acres, at new Silverhorn camp, Lincoln county, 23 miles N. W. of Pioche, adjoins the Nevada Silver Horn on S. E. and is believed to cover extension of Silver Horn orebody. The ore is quartz, or silicified country rock; carrying silver and gold, in an ore zone 40' to 50' wide surrounded by a shale-limestone formation; the silver ranges up to 700 oz. per ton.

SILVER PICK CONSOLIDATED MINES CO. NEVADA

Offices: 265 Russ Bldg., San Francisco, Calif, and Goldfield, Nev.

Officers: Hermann Zadig, pres.; A. S. Wollberg, v. p.; C. D. Olney, sec., with M. Grotzohn, O. A. Newcomer, J. J. McCarthy and Edw. S. Van Dyck, directors. Matt Murphy, supt.

Inc. September, 1911, in Nevada. **Cap.** \$1,500,000; \$1 par; assessable; all outstanding. An assessment, of 1¢, became delinquent Feb. 11, 1922. Transfers made at company's office; registrar, Registration Surety Co., San Francisco. Annual meeting in October. Shares listed on San Francisco Exchange. Share prices, 2c to 10c, 1918; 5c to 15c in 1919; 2c to 26c in 1920; 3c to 15c in 1921.

Property: 5 patented claims, 60 acres at Goldfield, Esmeralda county, being developed by 1,000 shaft on the Deserted claim and a 280' shaft on North End claim. A large body of low-grade sulphide ore is exposed in the Deserted, but there is no quantity of commercial ore yet. Company has taken a 5-year lease from 1919, on south end of Mohawk No. 1 claim, north end of Mohawk No. 2 claim, and north end of Combination No. 1 claim of Goldfield Cons. Mines Co., comprising about 20 acres. In August, 1920, a 5 years' lease was secured on part of Red Top group of the Goldfield Cons., which has a reputed production of \$250,000.

Development: additional to that noted above; the Mohawk lease has been explored on the 118' and 271' levels, but though small shipments have been made, results have been discouraging. Old levels have shown better results and discovery of good ore on 313' level is reported; shipments of \$35 to \$50 ore to the Tonopah Mng. Co's mill at Millers began in February, 1921. Ore of still higher grade was mined from the 265' level in Red Top ground beginning with July.

SILVER PRINCE CONS. MINING CO. NEVADA

Address: Caliente, Nev. R. P. Jones, supt.

Property: a silver-lead mine on Mount Irish, near Hiko, developed by an inclined shaft.

SILVER RANGE MINES CO. NEVADA

Address: Fallon, Nev.

Officers: Chas. B. Hall, pres.-mgr. Geo. Edson Porter and J. W. Martin, of Los Angeles, are stockholders. Ned Schroeraff, supt.

Property: 52 claims in Cox canyon, Silver mtns., Churchill county, 32 miles E. of Fallon. Apparently an old property, reopened late in 1920. Said to show two distinct mineralized zones, one silver-lead, the other copper.

Development: consists of a 70' shaft, with total workings of 5,000'. Reported that pay ore, assaying \$40 in lead and silver for width of 2', has been uncovered.

SILVER REEF DIVIDE MINING CO. NEVADA

Incorporation never completed. This fact did not deter "Diamondfield Jack" Davis from selling shares in California without permission of the Corporations Commission. He was found guilty by the San Francisco court late in 1919.

SILVER REEF MINES CO. NEVADA

Controlled by **Universal Silvers Co.**

Address: Chas. E. Van Riper, 50 Broad St., New York City. Edw. S. Van Dyck, pres.; Unionville, Nev.

Inc. 1919, in Nevada. **Cap.** \$200,000; par 10c; 1,000,000 treasury shares.

Property: 5 claims adjoining those of the Arizona Extension and Cons. Silver, which see, near Unionville, Pershing county. Claims said to show 3 veins carrying 17 oz. silver ore, with 50c. to \$1 gold. Ore reserves were said to be 12,000 tons in sight, with "300,000 tons in the reasonable extensions of known orebodies". It was said company planned to ship ore to the Arizona Silver mill for treatment.

Early in 1920 it was proposed to merge the Silver Reef, Arizona Silver, Arizona Extension and Consolidated Silvers Inc., into the Universal Silvers Co., the "final Silver" of the above named brokerage house. No definite information is obtainable, that available being largely derived from several brokers circulars and advertisements, which do not present facts. The methods pursued in the promotion of these companies is regarded as highly suspicious. See **Arizona Silver Mines Co.**

SILVER STANDARD MNG. & EXTRACTION CO. NEVADA

Address: R. W. Martin, Las Vegas, Nev.

Officers: R. W. Martin, pres.; W. C. Borchers, v. p.; W. E. Ferron, sec.-treas.; with R. T. Leonards and C. D. Breeze, directors. G. A. Duncan, supt.

Property: the Duncan mine, Flagstaff group, Nelson township, and water-rights in Eldorado canyon, Clark county. The Flagstaff property is said to have yielded \$500,000 in silver and gold up to 1915. One shoot was 8' wide and 450' long, and yielded 18,000 tons of \$22.80 ore. Recent development has opened a new 6' vein of high value. Property is fully equipped, and enough ore was said to be available early in 1920 to supply the mill.

No recent information.

SILVER STAR DIVIDE MINING CO. NEVADA

Office: State Bank & Trust Co. Bldg., Tonopah, Nev.

Officers: W. J. Douglass, pres.; Roger Dougherty, v. p.-treas.; Albert Erickson, sec.; with G. H. Lewis (mgr.) and D. Holland, directors. F. H. Nielson, supt.

Inc. May 5, 1919, in Nevada. **Cap.** \$150,000; 10c par. Annual meeting, May 10.

Property: 5 claims, 120 acres, north of Mizpah, contains quartz vein in rhyolite and breccia. Assays said to yield from \$2.50 to \$17 per ton.

Development: by vertical shaft, down 50'.

Equipment: 32-h. p. electric hoist and compressor.

SILVER STATE DIVIDE MINING CO. NEVADA

Office: Tonopah, Nev. H. C. Price, agt.

Officers: Harry McNamara, pres.; W. A. Nye, v. p.; H. E. Dugan, sec.-treas., with H. C. Price and Tim Connolly, directors

Inc. April 24, 1919, in Nevada. **Cap.** \$150,000; shares 10c par.

Property: in the Klondyke district, 6 miles south of Divide, adjoining the Golden State.

SILVER TOP DIVIDE MINING CO. NEVADA

Address: Ed. Bevis, Tonopah, Nev.

Inc. in Nevada. **Cap.** \$150,000; shares 10c par.

SILVER TUNGSTEN MINING CO. NEVADA

Dead. See Vol. XIV for full description.

SILVER WEDGE DIVIDE MINES CO. NEVADA

Dead. Incorporation not completed.

SILVER ZONE DIVIDE MINES CO. NEVADA

Office: Tonopah, Nev.

Officers: James Grimes, pres.; W. J. Douglass, v. p.; E. J. Ramsey, sec.-treas., with F. F. Garside and R. F. Wendover, directors.

Inc. May, 1919, in Nevada. **Cap.** \$150,000; shares 10c par.

Property: 6 claims, adjoining Divide Charter and Banner Divide.

SILVERZONE EXTENSION MINING CO.**NEVADA**

Organized by Geo. W. Quigley, J. W. Hanson and Q. G. Wolther, of Tonopah.

Property: 5 claims, covering 3,000' on a ledge or dike said to assay \$13 to \$147 per ton, mostly in silver.

SILVERZONE MINES CO.**NEVADA**

Mail addressed to J. J. Clark, Tonopah, returned.

Silverzone (Hannapah), Nev.

Inc. 1919, by Wm. F. Gray and J. J. Clark.

Property: the Silver Gance mine, which was worked by "glory hole" years ago. An ore-shoot opened for 150' in length and to depth of 125', said to run \$8-\$10 per ton, with 160,000 tons developed. Company has given leases on parts of its holdings.

SILVERZONE MOHAWK CO.**NEVADA**

Care Wm. F. Gray, Silverzone (Hannapah) P. O., Nevada. This is also a Gray & Clark property.

A new shaft sunk in 1919 is said to have cut 4' of \$30 ore at a depth of 80', with \$445 ore on the hanging wall. On the west end of this group, leased to Chas. Spilman, ore in the old Tripod shaft said to range from \$10 to \$80 per ton.

SIMON DISTRICT

The section in which the Simon Silver Lead mine and its Simonized neighbors are located is part of the old Bell mining district, in which the Olympic or Royal George mine discovered in 1915, has been a gold producer for four years. The Simon mine itself was worked desultorily for thirty years or more for its lead carbonate ores.

In 1919, the opening up of the big orebody of the Simon mine, coming as it did during the extraordinary "boom" at Divide, gave the place a sudden prominence, and started active prospecting operations over an extensive area.

The district covers the foot slope and middle portion of the southern flank of the Cedar mountains, an east-west range, 14 miles long and about 6 miles wide that reaches an elevation of 8,000' above sea level. This range is formed of a granite or grano-diorite core flanked by upturned limestone, of Paleozoic, and later age, cut by dikes and intrusive bodies of quartz porphyry and andesite, the whole capped in part by extrusive lava flows of rhyolite and andesite rocks. Faulting has brought old and new rocks together (see G. R. Stevens, M. & S. Press, Jan. 27, 1917).

In the area covered by mining claims, the feature of chief commercial interest is the contact belt of limestone, baked and altered by the heat of igneous intrusions and more or less mineralized throughout this area of contact metamorphism. The lower foot hill slopes which include the southerly claims of the district are covered by flat lake beds which conceal the rock structure.

At the Simon Silver Lead mine the contact between limestone and quartz porphyry is an irregular one as is that with granite which occurs a short distance east. The claims cover the igneous contacts, as well as various dikes and cross faults. In the underground workings the big deposit of concentrating ore is partly in limestone, partly in rhyolite, the richest or hanging wall streak being on the hanging wall side. Post mineral faulting, cuts off the ore to the west, the surface displacement being 300' horizontally. So far as known the ore occurrence on the various other properties nearby is quite similar.

SIMON ANCHOR MNG. CO.**NEVADA**

Address: Tonopah, Nev.

Inc. May 31, 1919, in Nevada, by J. C. Williamson, F. K. Pittman, and Alfred Boyle. **Cap.** \$300,000; 20c par.

SIMON ANNEX MINING CO.

Address: Tonopah, Nev.

Inc. June 4, 1919, in Nevada, by T. J. Flynn and Ray French. Cap. \$150,000; 10c. par.

NEVADA**SIMON CENTRAL MINING CO.**

Address: C. J. Miller, sec., Journal Bldg., Reno, Nev.

Officers: A. G. Miller, pres.; G. M. Smitten, v. p.; with A. J. Mergen, Peter Demosthenes, and Marle Woodson, directors.

Inc. 1919, in Nevada. Cap. \$150,000; 10c par.

Property: 6 claims in the Simon district.

NEVADA**SIMON CONTACT EXTENSION MINING CO.**

Address: P. O. Box 501, Tonopah, Nev.

Officers: C. C. Boak, pres.; H. O. Hall, v. p.; Thos. H. Griffin, sec.-treas., with A. A. Clute and W. R. McFadden, directors.

Property: 5 claims adjoining the Simon Contact in the Simon district, via Mina, Mineral county.

NEVADA**SIMON CONTACT MINES CO.**

Address: Mina, Nev.

Officers: P. A. Simon, pres. and mgr.; C. C. Boak, v. p.; B. W. Zachau, sec.-treas., with B. F. Baker, A. H. Schwinn, directors. E. W. King, supt.

Inc. April 29, 1919, in Nevada. Cap. \$1,500,000; \$1 par; 500,000 shares in treasury. Annual meeting, first Monday in May.

Property: 6 claims, about 105 acres, adjoins the big Simon mine on N. E. in Simon district, Mineral county, said to show a body of \$40 lead-silver-zinc-copper ore in limestone cut by an alaskite porphyry dike.

Development: by 350' inclined shaft and lateral workings on 250' and 350' levels. Reported that an ore shoot, first opened in the limestone porphyry contact above, had been cut on lowest level, in June, 1920; ore is of milling grade with high grade streaks.

Equipment: gasoline hoist.

Presumably idle; no information since fall of 1920.

NEVADA**SIMON DISTRICT MINES CO.**

Mail returned from Luning, Nev.

Directors: W. G. Zulch, F. T. Dann and A. Shannon.

Inc. May 5, 1919. Cap. \$150,000; 10c par.

Property: in Simon mining district. A prospect.

NEVADA**SIMON DIVIDE MINING CO.**See Vol. XIV. Has consolidated, mid-summer 1921, with Simon Silver Bell Mng. to become the **Simon Merger Mines Co.**, which see.**NEVADA****SIMON DOUGLASS MINING CO.**

Address: Tonopah, Nev. Sponsored by C. N. Miller & Co., of Tonopah.

Officers: C. A. Calhoun, pres.; M. E. Albert, v. p.; H. S. Deane, v. p.; H. B. Smith, sec.-treas., with C. R. Douglass, E. S. Mulford and C. N. Miller, directors. E. S. Chafey, gen. mgr.

Inc. May, 1919. Cap. \$150,000; 10c par; 25,000 outstanding.

NEVADA

Property: Cleopatra group, comprising 3 claims, 60 acres in Simon district, north of the Simon Divide and south of the Fagan group. The massive boulders of lead ore, supposedly from the south extension of the main Simon contact are said to assay \$68 per ton in silver.

NEVADA**SIMON EXTENSION MINES CO.**See Vol. XIV. Title changed to **Simon Sterling Mines Co.**, which see.**NEVADA****SIMON FAGAN HONEYMOON CO.**

Office: Mina, Nev.

SIMON FAGAN MINES CO.**NEVADA**

Absorbed in November, 1919, by **Fagan Consolidated Silver Mines Co.**, which see.

SIMON GOLD MINING CO.**NEVADA**

Address: Tonopah, Nev.

Officers: Dave F. Murphy, pres. and gen. mgr.; Owen Murphy, v. p.; Julius Goldsmith, sec.-treas., with Wm. Davis and Ott Ziegler, directors.

Inc. 1919, in Nevada. **Cap.** \$150,000; 10c par; 750,000 shares in treasury, June, 1919.

Property: Golden Eagle group of 6 claims, 120 acres, 23 miles E. of Mina, 1,200' from the Olympic mine at Omco, Mineral county.

Ore: said to occur in a contact between andesite and rhyolite, with a well-defined fissure vein traceable for 3,000' along a well-mineralized course, and to average \$8.70 per ton.

SIMON JUNIOR SILVER-LEAD MINING CO.**NEVADA**

Address: E. C. Watson, Luning, Nev.

Officers and directors: T. R. Pledge, pres.; E. C. Watson, sec.-treas., with A. C. Bachman, N. D. Marakas, and W. D. Jones.

Inc. May 7, 1919, in Nevada. **Cap.** \$150,000; 10¢ par; 1,084,555 outstanding; assessable. Transfers made at Luning; depository, Reno Natl. Bank, Reno, Nev.

Company has no debts; cash on hand, Jan. 1, 1921, \$1,188.

Property: a group of 9 claims, S. W. of the Simon mine, in Simon district, close in and owned outright. Said to carry a big dike of silicified breccia running \$3 per ton in gold; the material is used for ball-mill pebbles at the nearby Olympic gold mill.

In January, 1921, company purchased a silver-lead prospect in Santa Fe district, Mineral county, 6 miles S. W. of Luning; at surface, ore assays 41 oz. silver and 29% lead.

Development: at Simon, by 2 tunnels, 200' and 100' in length. Idle.

SIMON LEAD MINES CO.**NEVADA**

Name changed May, 1919, to **Simon Silver-Lead Mines Co.**, which see.

SIMON LEAD & SILVER MINES EXTENSION CO.**NEVADA**

Officers: W. J. Douglass, pres.; T. J. Flynn, v. p.; W. O. Dougherty, C. S. McCarthy, Louis Cirac, directors, Ray French, sec.-treas.

Property: 5½ claims, 110 acres, adjoining the Simon mine on the east.

SIMON MERGER MINES CO.**NEVADA**

Is a consolidation in mid-summer of 1921 of the Simon Divide Mng. Co. and Simon Silver Bell Mng. Co., both described in Volume XIV.

Office: Mina, Nev.

Officers: P. A. Simon, pres.; W. J. Douglass, 1st v. p.; C. W. Taylor, 2nd v. p.; C. C. Boak, sec.-treas., with C. F. Wittenberg, directors.

Inc. 1921 in Nevada. **Cap.** 2,000,000 shares, with about one-half in treasury at incorporation. Stockholders of participating companies were to receive 6.5 Simon Merger shares for each 10 shares of old stock held.

Property: the Bell group of 7 claims, 80 acres, side-lining the Simon lead-silver mine on the S., and 4 claims, 3 miles to the S. E., all in the Bell (Simon) district, Mineral county, 22 miles E. of Mina. The latter, according to A. H. Elftman, cover 3,000' of the apex of the S. E. Simon contact, with mineralized outcrop, 40' wide, proved for 1,500', indications which rank second only to those of the Simon mine. Ore occurs in streaks, 4 to 5' wide, said to run 10 to 12 oz. silver, 6% copper and a little lead.

Development: on the 4 claim group, by several shafts, 25 to 150' deep. About 1,000 tons of ore averaging \$40 in silver and copper were shipped in 1918-19. New company is driving a tunnel.

SIMON MINA MINES CO.**NEVADA**

Idle.

Office: 318 State Bank Bldg., Tonopah, Nev.

Officers: J. K. Turner, pres.; C. A. Calhoun, v. p.; L. L. Dellinger, mgr.; Branch H. Smith, sec.-treas., with R. E. Smith, directors.

Inc. May 14, 1919, in Nevada. **Cap.** \$150,000; 10c par; 950,000 shares outstanding. Listed on San Francisco Stock Exchange.

Property: 5 claims covering 3,000' along a limestone rhyolite contact, 1½ miles S. of the Simon mine.

Development: by 280' shaft, at bottom of which \$12 silver-lead ore was encountered in an 80' crosscut.

Equipment: gasoline hoist and buildings.

Control of company is reported to have changed hands.

Examined by F. M. Maloney, formerly of Cerro de Pasco. A prospect.

SIMON SILVER BELL MINING CO. NEVADA

See Vol. XIV. Consolidated in 1921 with Simon Divide Mng. Co., to form **Simon Merger Mines Co.**

SIMON SILVER LEAD EAST EXT. MINES CO. NEVADA

Address: 221 Odd Fellows Bldg., Reno, Nev. **Operating office:** Mina, Nevada.

Officers: C. B. Burkham, pres.; J. M. Andrews, v. p.; Geo. S. Green, sec.; B. F. Baker, treas., with Ernest Rackliff, directors.

Inc. April, 1919, in Nevada. **Cap.** \$375,000; increased from \$250,000; 25c. par; 96,000 shares outstanding. Transfer office: Reno, Nev.

Property: adjoins the Simon property on the east and south. Developed by 2 shafts, 35' and 65' deep, and equipped with gasoline hoist.

Presumably idle.

SIMON SILVER LEAD EXTENSION M. CO. NEVADA

Mail returned from Mina, Nev.

Inc. April 21, 1919, in Nev. **Cap.** \$150,000; 10c par. T. J. Flynn, Chris McCarthy, and A. C. Kearns, incorporators.

Property: the Extension group in Simon district. Work said to disclose ore at places along trend of vein.

SIMON SILVER-LEAD MINES CO. NEVADA

Formerly the Simon Lead Mines Co.

Office: Mina, Nev.

Officers: P. A. Simon, pres.; C. C. Boak, v. p.; B. F. Baker, sec.-treas., with C. D. Kaeding, cons. engr. and Jasper T. Robertson, directors. E. W. King, res. engr.; Leonard F. Barber, met. engr.; Tom McNamara, supt.; H. F. Hilliard, mill supt.

Inc. November, 1919. **Cap.** \$2,000,000, increased from \$1,500,000, April, 1920; par \$1; 1,100,000 shares outstanding. Transfers made at company's office; registrar, Bankers Trust Co., New York. Annual meeting, 1st Monday in May. Listed on New York Curb and San Francisco Stock Exchange.

First annual report, covering 8 months, to Dec. 31, 1919, shows total receipts \$319,624 and disbursements, \$217,871. Total investment is about \$750,000 to Jan. 1, 1922.

Property: 10 patented claims, including the Mammoth, in Simon (officially known as Bell) district, Mineral county, 22 miles east of Mina. Originally discovered 50 years ago, and intermittently worked until real development began in 1919. Examined in 1919 by W. H. Weed.

Geology: claims cover a limestone-porphry contact with irregular intrusions of older andesite and granite. Ore is found in veins which cross all rocks, but in part follow fault contacts. The orebody is a replacement deposit mainly in limestone, and in part in porphyry; it runs E.-W. and dips 60° N. Two shoots of sulphide ore occur, separated by mineralized porphyry. Values fade in footwall limestone, but show high-grade ore against limestone hanging. Shipping ore carrying 15-30% lead, 12-32 oz. silver per ton, and 8% zinc, occurs for a width of 8' or so, in main orebody, and also beyond a cross fault in newly discovered orebody 300' or more to the east of the shaft; yet the value of the mine rests upon the 600,000 tons

and 565' levels, averaging 5 oz. silver, 8% lead and 9% zinc, and estimated to yield a net profit of about \$7.20 per ton.

Development: by the old 230' (4th level) vertical shaft, which has been inclined to follow footwall to 7th level (565'). The S. orebody is crosscut at intervals to sixth level, and N. orebody is crosscut and proven between 4th and 6th levels. Old work totaled about 2,000', increased by January, 1920, to 5,139'. Development in 1920-21 was somewhat curtailed to await completion of mill, but late in 1921, a new ore shoot beyond the W. fault was exposed on the 400' level; 50 tons averaged 0.04 oz. gold, 23.24 oz. silver and 2.9% lead. Surface work shows pay ore at numerous points along outcrop of vein for a distance of 2,300', of which only 700' is explored underground. Ores are largely carbonates down to the 2nd level.

Equipment: includes 60 h. p. gas hoist, 100 h. p. semi-Diesel engine, compressor, pumps, lighting plant, etc. A 38-mile line to Millers has been constructed to supply electric power from the Nevada California Power Co.

A 150-ton mill treating ore by preferential flotation, was completed on Nov. 15, 1921.

The silver lead concentrate averages 35 oz. silver, 50% lead and 8% zinc, the recovery being 80%. The zinc concentrate assays 42% zinc, 6% lead and 5 oz. silver; total recovery of lead and silver is 90%. The mill turns out about 150 tons of silver-lead concentrate weekly and about the same amount of zinc concentrate that is shipped to company's Harbor City smelter, Calif.

Flotation tests, with mill heads assaying 6.46 oz. silver, 9.1% lead, 9.2% zinc and 6.5% iron, gave a lead-silver concentrate carrying 39 oz. silver, 67.6% lead and 9.6% zinc, and a zinc-silver concentrate with 8.2 oz. silver, 3.2% lead and 46.8% zinc; a recovery of 93.9 oz. of silver, 97.3% of lead and 71.3% of zinc.

In mid-1921, company acquired control of a smelting company, to be henceforth known as Kirk-Simon Smelting Co. The plant situated on tidewater at Harbor City, Calif., 18 miles from Los Angeles, has been remodeled to treat the zinc concentrate and manufacture lead-free zinc oxide and lead-silver bullion. Lead concentrate will be shipped to the U. S. S. R. & M. Co.'s Midvale smelter under a 2 years' contract.

It is considered possible that the mine will develop into one of the largest silver-lead properties of this country.

SIMONS JACKPOT MINING CO.

NEVADA

Mail returned from San Francisco address.

Officers: Oscar A. Daube, pres.; P. J. Daube, sec.-treas.; Otto Hiffner, mgr., with Joe de Forrest, directors.

Inc. June 7, 1919, in Nevada. **Cap.** \$100,000; 10c par; all outstanding; 400,000 shares held by president as trustee. Transfer office: Company's office.

Property: 6 claims, 60 acres in Simon district. An undeveloped prospect.

SIMON STERLING MINE CO.

NEVADA

Formerly the Simon Extension Mines Co.; name changed early in 1920.

Address: Mina, Nev.

Officers: P. A. Simon, pres.-gen. mgr.; Geo. S. Green, v. p.; B. W. Zachau, sec.-treas., with W. J. Douglass, B. F. Baker, directors.

Inc. April 21, 1919, in Nevada. **Cap.** \$750,000; shares 50c par.

Property: 4 claims adjoining the Simon Silver-Lead on the N., in Simon (Bell) district, Mineral county, 23 miles N. E. of Luning. Shows a strong vein carrying silver-lead values, with some zinc, in a sheeted zone of breccia; the width varies from a few inches to 2'.

Development: by 180' incline and 150' tunnel driven on fault plant; both in ore. Equipped with hoist.

Company apparently closely allied with Simon Silver-Lead.

SIMON TRIANGLE MINING CO.**NEVADA**

Address: Mina, Nev. and Tonopah, Nev.

Officers: E. S. Mulford, pres.; Geo. F. Thompson, v. p.; C. C. Boak, sec., with A. H. Elftman, J. W. Dunphy, E. S. Chafey and W. J. Douglass, directors.

Inc. May, 1919. Cap. \$150,000; 10c par.

Property: 4 claims in the Simon district, adjoining the Cons. West Extension and said to be on the Simon contact.

SIoux DIVIDE MINING CO.**NEVADA**

Inc. March, 1910, in Delaware. Cap. \$150,000; 10c par; 750,000 in treasury.

Property: 7 claims, 4,500' long, about 2 miles N. W. of Tonopah Divide and N. W. of the Hasbrouck mine.

SMITH VALLEY MINES CO.**NEVADA**

Dead. Company's affairs to be wound up in 1921. See Vol. XIV for description.

SMOKEY DEVELOPMENT CO.**NEVADA**

Consolidated 1919, with Boston Ely Mng Co., and Ely Northern Copper Co. as **Boston & Ely Cons. Mng. Co.**, which see.

SMUGGLER DIVIDE MINING CO.**NEVADA**

Address: Elmer Bisbee, agt., Tonopah, Nev.

Officers: John Miller, pres.; A. F. Price, v. p.; C. N. Miller, sec.-treas. with E. N. Bannon and W. Lucot, directors.

Inc. April 1, 1919, in Nevada. Cap. 1,500,000 shares; 10c par; assessable. Listed on San Francisco Stock Exchange.

Property: the 3 Lone Cabin claims, 4,500' north of Tonopah Divide, said to have one of the strongest fracture systems in the district. Developed by 250' shaft.

No information since spring of 1920.

SOUTH ARROWHEAD MINING CO.**NEVADA**

Mail returned from J. W. Stewart, mgr., Arrow Head, Nev.

Property: in Needles district, Nye county, 60 miles E. of Tonopah. In 1920, reported to have driven an 180' tunnel; some \$30 to \$50 ore has been opened.

SOUTH DIVIDE MINES CO.**NEVADA**

Office: Tonopah, Nev.

Officers: J. G. Crumley, pres.; F. K. Pittman, v. p.; C. E. Oyster, sec.-treas., with L. L. Crumley, and A. H. Elftman (cons. engr.) directors.

Inc. April, 1919, in Nevada. Cap. \$150,000; 10c par; 750,000 in treasury.

Property: 5 claims, in the S. E. part of the district, 2 miles from Gold Mountain, adjoining the Gold Wedge Divide on the south. Work was done several years ago, with fair prospects.

SOUTHEASTERN MINING CO.**NEVADA**

Formerly the Arrow Mining Co., reorganized in May, 1918.

Address: 418 Vermont Bldg., Salt Lake City, Utah.

Officers: Geo. F. Busch, pres.-treas.; Willard Scowcroft, v. p.; J. H. Moss, sec.; M. J. West, supt.

Inc. May, 1918, in Nevada. Cap. 1,000,000 shares; assessable; assessment No. 2, of 1¢, levied March 1, 1921.

Property: 26 claims (18 patented), 500 acres, in Arrow district, Lincoln county 8 miles from Groom and 65 miles N. E. of Las Vegas. Ore occurs in fissure veins in quartzite and lime, said to carry silver, lead and copper.

Development: by 206' shaft, in which pockets of ore, assaying 90 oz. silver, 46% lead and 10% copper were cut. About \$20,000 has been spent on property by previous owners, and \$40,000 more recently.

Equipment: head-frame, gasoline hoist, shaft-house, smithy and shop, tools, dwellings, bunk-house, 2 autos, truck assay outfit, etc.

A prospect that seems to have good indications.

SOUTHERN DIVIDE MINING CO.**NEVADA**

Mail returned from Tonopah, Nev.

Officers: C. P. Campbell, pres.; Wm. Huggard, v. p.; R. H. Tune, sec.-treas.

Inc. May, 1919, in Nevada. **Cap.** \$150,000; par 10c; 750,000 shares in treasury.

Property: 40 acres, patented, about 3 miles south of Tonopah Divide mine.

SOUTH SILVER HILLS MINING CO.

NEVADA

Address: Harry C. Stimler, Mizpah Hotel, Tonopah, Nev.

Officers: Jas. N. Hyman, pres.; Harry C. Stimler, v. p.-gen. mgr.; John S. Turnbull, sec.-treas.; with Geo. Fuss and E. P. Esser, directors. C. D. Wilkinson, cons. engr.

Cap. 1,500,000 shares; 500,000 in treasury. Stock offered at 25¢ per share, April, 1920.

Property: the Cadillac group of 3 claims in Lida (Tule Canyon) district, Esmeralda county, 37 miles southwesterly of Goldfield. Company also had a lease on part of the nearby Ingalls mine of the Silver Hills Nevada (q. v.). Cadillac said to show a strong fissure vein, 4' to 10' wide, for 4,500'; the ore carries gold, silver and lead.

A mill was to have been in operation by June 15, 1920, but no further word from, or about, the company has been received since April of that year.

SOUTHWEST COMSTOCK EXTENSION MINING CO.

NEVADA

Address: Thurman G. Roberts, Virginia City, Nev.

Property: the Roberts and Regan mine in Storey county, 3 miles N. of Carson City, adjoins Comstock Superior and Nevada Protective holdings. A 200' shaft has opened 3' of high grade quartz ore. In Nov., 1920, property was leased to Dickson Bros. who were reported actively operating, April, 1921. Equipped with electric hoist.

SOUTHWESTERN MINES CO.

NEVADA

Idle.

Office: care S. H. Brady, pres.; 805 Alto Bldg., San Francisco. **Mine office:** Hornsilver, Esmeralda county, Nev.

Inc. in Nevada. **Cap.** \$1,250,000; \$1 par. The Silvermines Corporation, a holding company, controls 85% of shares in the Southwestern, and built a 150-ton cyanide plant.

Property: 11 claims, 135 acres, at Hornsilver, 28 miles S. W. of Goldfield, formerly known as the Great Western mine. Claims said to show silver-gold ore with silver predominating, occurring as chlorides and bromides, the gold being free milling. The veins occur in limestone and shales intruded by diorite dikes, the largest vein said to vary from 5' to 20' in width and to traverse the property for 4,000'.

Development: by 900' shaft and 3,000' of lateral workings. The Silvermines Corp. (q. v.) becoming bankrupt in November 1918, its lease on the Southwestern property was cancelled. Recent activities at the Hornsilver camp, particularly in connection with the Orleans mine, have apparently made Southwestern ground of greater potential value. Prospective locaters alleging that assessment work had not been done, controversy over title to claims arose, July 1921.

SOUTHWESTERN NEVADA MINES CO.

NEVADA

Address: Julius Siegbert, 900 Broadway, New York.

A company with holdings in Reveille district, Nye county, of which the Louisiana Cons. M. Co. (q. v.) owns the entire issued capital stock. A small production of oxidized lead ore carrying silver was made in 1918 and 1919; inactive since.

SPANISH BELT EXTENSION SILVER MINING CO.

NEVADA

Address: State Bank Bldg., Tonopah, Nev.

Officers: Warren V. Richardson, pres.; Hugh H. Brown, v. p.; Arthur H. Keenan, sec.-treas.-res. agt.; with M. M. Brown and E. A. Keenan,

Inc. April, 1919, in Nevada. **Cap.** \$1,000,000; \$1 par; 500,000 treasury shares.

Property: the Blizzard group of 3 claims in Spanish Belt district, Nye county, adjoining to the east the holdings of the Cons. Sp. Belt S. M. Co. and said to carry the continuation of the Ernst and Barcelona veins. To be developed in conjunction with the Cons. Sp. Belt.

SPARKS DIVIDE MINING CO.

NEVADA

Inc. 1919, in Nevada.

Property: 2 claims, 3 miles south of Gold mountain and S. W. of the Black Hawk Divide.

SPARTA MINING CO.

NEVADA

Mail returned from Mina, Mineral county, Nev. W. E. Bell, pres.

Cap. \$1,000,000; shares \$1 par.

Property: 19 claims in Gold Range district, with about 300' of development work, said to show 3,000 tons silver-lead ore. Is a prospect.

SPEARHEAD GOLD MINING CO., REORGANIZED

NEVADA

Office: 421 Clay Peters Bldg., Reno, Nev.

Officers: A. A. Busey, pres.; H. Berg, v. p.; A. A. Codd, sec.-treas., with A. H. Butler, Jr., and H. H. Blair, directors.

Reorganized March 25, 1916, in Nevada. **Cap.** \$1,500,000; increased from \$1,000,000; shares \$1 par; all issued; assessable; 15 assessments levied to date, the last of 1c. on Jan. 18, 1922. Listed on San Francisco Exchange. Stock registered and transferred at company's office.

Property: 2 claims, 27 acres, at Goldfield, adjoins the Kewanas, Jumbo Extension and Merger Mines Co. on the east; includes property of former Goldfield Shale Mng. Co. Several years ago lessees sank 4 shafts, 80' to 100' in depth. Mine was worked intermittently until October, 1915, with the idea of continuing the 240' shaft to the shale-latite contact. This formation was cut at 880' and the shaft bottomed at 910'. In sinking, 3 wide quartz veins of no value were passed through. At 910' depth stringers containing chalcocite and chalcopyrite were cut, some said to assay \$30 per ton. During 1918, a total of 2,127' of work was done on the 250, 285' and 910' levels. High-grade ore was encountered in a zone of silicified shale on the 910' level and several raises were driven towards the shale-latite contact, which was reached at 150'. No ore was found.

In 1919, total new work was 2,049' and in 1920, 1,113'. Most of recent development has been on and below 910' level; during 1920, 2 winzes, 250 and 80', sunk from this level, failed to discover ore of commercial value. On Nov. 1, 1921, company suspended all work indefinitely. Mine has been developed for many years and to a depth of over 1,100', but results have been disappointing. Ground will be turned over to lessees.

Company had a lease on the Never Sweat claim of the Goldfield Blue Bull Mining Co. adjoining. Spearhead 450' and 910' levels are headed toward this claim.

In January, 1922, the company joined forces with Comstock-Eldorado company (q. v.) in acquiring 5 patented claims in 2 groups, S. of Gold Hill, in the Comstock district, Storey county. The Spearhead group comprises the Succor and White Lode claims, about 20 acres, a few hundred feet S. W. of the Comstock-Eldorado and Comstock Silver holdings, purchased for \$8,000 and covers some 1,500' of the Succor vein where it connects with the S. E. branch of the Comstock Lode. It is developed to 350' depth by shaft and winze, and by tunnel opening orebodies said to be 40' wide where cross-fissures intersect the Succor vein. Equipment valued at \$10,000 will be moved from the Goldfield property.

SPRUCE MONARCH CONSOLIDATED MINING CO.

NEVADA

Address: B. S. Woodward, mgr., Wells, Elko county, Nev.

Officers: Herbert Badt, pres.; David Neff, v. p.; J. L. Vandiver, sec.; with Samuel Neff and B. S. Woodward, directors.

Property: in Spruce Mtn. district, Elko county, 60 miles southeasterly of Wells and 27 miles S. of Tohar the shipping point on W. P. R. R. First

worked in 1870; idle 1902-18; early production reported to have totaled \$200,-000. Replacement bodies of silver-lead ore occur in fractures and bedding planes in limestone cut by intrusives; ore is largely lead carbonate with fairly high iron content.

Development: by new 2,000' tunnel with 400' back; from which connection has been made with old 300' level, and winze sunk to 500'. A 300' ore shoot, extending from 3rd to 5th level, with widths up to 26', has been opened.

Ore reserves: estimated to be 20,000 tons, assaying 20 oz. silver and 17% lead, and 35,000 tons assaying 10 to 15% lead.

Production: in 1919 not recorded; in 1920, up to Dec. 1, totaled 7,464 tons of ore carrying 22 oz. of silver and 17.7% lead per ton; gross value \$250,000, net \$112,000. Shipments ceased on Jan. 1, 1921, to await more favorable freight rates but were reported to have resumed in September at rate of 200 tons per month.

STANDARD COPPER CO.

NEVADA

Presumably defunct. See Vol. XI (Copper Handbook) for description. Formerly the Union Copper Co.

STANDARD DIVIDE EXTENSION MINING CO.

NEVADA

Inc. in Nevada.

Property: 6 claims north of Sutherland Divide and 2½ miles north of Gold Mountain.

STANDARD DIVIDE MINING CO.

NEVADA

Office: Tonopah, Nev. H.H. Brown, agt.

Officers: J. C. Martin, pres.; G. A. Trubody, v. p.; H. A. Darms, sec.-treas., with Wm. Watters and W. J. Douglass, directors.

Inc. April 11, 1919, in Nevada. **Cap.** \$150,000; 10c par; 750,000 in treasury.

Property: 5 claims, about 110 acres, 2½ miles north of Gold Mountain, adjoining the Sunbeam and the New England shaft.

STANDARD METALS CO.

NEVADA

Office: 805 Arrott Bldg., Pittsburg, Pa. **Mine office:** Gazette Bldg., Reno, Nev.

Officers: Wm. P. Lemley, pres.; B. L. Elliott, v. p.; G. J. Schondel-meyer, sec.-treas.; A. L. Chappell, res. agt.-gen. mgr.; with Walter K. Elder, J. A. Albert, John Lofink, Jr., Hy. A. Dapper and A. A. Lutz, directors. C. A. Neff, asst. sec.-asst. treas.

Inc. April 16, 1916, in Nevada. **Cap.** \$1,500,000; \$1 par; 625,000 treasury shares. Transfers made at Pittsburg office.

Property: 240 patented acres in Peavine district, Washoe county, 8 miles N. W. of Reno, adjoins the Peavine Silver Corp.; first worked in 1867. The main vein, in schists traversed by quartz monzonite porphyry dikes, dips 50° to W. The ores are sulphide, carrying gold, silver and copper, with some lead and zinc; one assay return shows 1.8% copper, 0.07 oz. gold and 24 oz. silver across 7'.

Development: by incline to 300' vertical depth. In early days, an ore shoot, 10' to 50' wide, and 120' long, was exploited in leached zone above 100' level. In sulphide zone on 3rd level, 2 ore shoots, 100' and 130' long, with average width of 15', have been opened. Reported, Sept. 1921, that shaft would be sunk to the 5th level.

Equipment: includes electric hoist, compressor, etc., and 150-ton mill, employing Wilfley tables and flotation plant, making a \$75 to \$200 concentrate; ratio 11:1. Mill completed early in 1920, operated a few days only; after remodelling, operations resumed in April, 1921, on a 20% capacity basis. It is hoped that an average milling grade of \$20 ore will be possible. Concentrate shipments began May, 1921, and up to Aug. 12, totaled about 160 tons with gross value of about \$125 per ton.

STANDARD METALS CORPORATION

NEVADA

Offices: 805 Arrott Bldg., Pittsburg, Pa. Wm. P. Lemley, pres.

Incorporated in Delaware with capital of \$3,000,000 with the intention

of taking over Standard Metals Co., which see, and the Paymaster mine, in Peavine district, Washoe county. Plan abandoned in light of later developments.

STAR GOLD-SILVER MINING CO.**NEVADA**

Formerly North Star Mng. Co.

Addresses: Geo. F. Brown, pres., Brown, Kearn Co., Calif; B. J. Brown, fiscal agt., Yerington, Nev., and W. E. Harry, supt., Mina, Nev. There are 9 directors.

Inc. in Nevada. **Cap.** \$500,000; par \$10; \$200,000 underwritten by Chinese capitalists of California.

Property: 26 claims, including North Star, Midas, Southern Cross, Venus, and Morning Star groups, situated between Stewart Springs and Olympic Mines Co., in Bell district, Mineral county, 20 miles N. E. of Mina. A silver-gold bearing vein was being developed in 1921; assay value \$16 to \$90; shaft 132' deep.

STAR OF THE WEST MINING CO.**NEVADA****Office:** Gazette Bldg., Reno, Nev.

Officers: Robt. B. Todd, pres.-mgr.; M. W. O'Boyle v. p.; G. M. Todd, sec.-treas., with Chas. M. O'Boyle and R. G. Withers, directors.

Inc. April, 1919, in Delaware. **Cap.** \$1,000,000; \$1 par; 500,000 shares in treasury. Security Transfer & Registrar Co., registrar and transfer agents.

Property: 14 claims, 4 patented, in Gold Park district, Nye county, 40 miles S. W. of Austin, the nearest rail point, formerly owned by the Nevada M. Co. Ore occurs in fissure veins in porphyry with N. E.-S. W. course and dip of 45° said to average \$50 per ton in silver and gold. One vein, 15' wide, shows \$15 per ton milling ore and a 2' pay streak. Is an old producer claiming a past production of \$1,000,000.

Development: by more than one mile of drifts and tunnels. Recent work includes two tunnels, one 900' long, with maximum back of 500'. Reported that ore reserves are sufficient to supply mill for 4 years.

Equipment: includes 50-ton mill, employing amalgamation, concentration and flotation; operations began March, 1921, and a small quantity of \$140 concentrate has been shipped. About \$100,000 was expended on plant and development in 12 months ending March 1, 1921. The transportation problem is difficult of solution.

STATES MUTUAL CONS. MINES CO.**NEVADA****Address:** Searchlight, Nev.

Officers: Mrs. V. A. Brewer, pres.-mgr.; J. W. Carnic, v. p.; Robt. McKee, sec., with Geo. Allan and Albert Cappel, directors.

Cap. \$5,000,000; \$1 par.

Property: 140 acres in Campaign copper mining district, Searchlight, Clark county, said to carry a deposit 4,500' long running from 2 to 30% copper. **Development:** by tunnels.

Company announces, March, 1921, that additional holdings comprise 320 acres placer ground, 40 acres of lode claims and 400 acres of oil lands in 2 tracts, all near Searchlight. Pay-as-you-go principle adopted and company has no debts.

STEPTOE VALLEY SMELTING & MINING CO.**NEVADA**

Company dissolved 1914. Property owned and operated by Nevada

Cons. Copper Co., which see.**STELLA MINES CO.****NEVADA****Address:** Pioche, Nev.

A close corporation, the principal owners being, Chas. Culyerwell, Jennie Culyerwell, D. J. Ronnow, Fred Mansir and the Hybla Mng. Co. (q. v.)

Property: is in the Comet district, Lincoln county, 12 miles W. of Pioche. Orebodies occur in shale with porphyry intrusions. Worked on a small scale at shallow depth by lessees, the Hybla M. Co. being one of them. Shipping ore said to average \$124 per ton, mostly in silver, but gold,

copper, lead and zinc values are also present. Developed by incline and 200' tunnel. Reported that owners have received royalties of \$10,000 up to June 1, 1921.

STERLING DIVIDE MINING CO. NEVADA

Office: M. E. Scott, res. agt., Reno, Nev.

Officers: Capt. A. S. Proskoy, pres.; H. E. Scott, sec.; A. N. Salisbury, treas. Inc. April, 1919, in Nevada.

Property: 5 claims, $\frac{3}{4}$ mile N. E. of the Ben Hur.

STEWART-TUSCARORA MINING CO. NEVADA

Formerly Holden M. & M. Co. (Controlled by Stewart Mng Co.)

Addresses: J. E. Harrington, pres., 1465 Broadway, New York, and Tuscarora, Nev.

Officers: J. E. Harrington, pres.; Nash Rockwood, dir. and counsel. David J. Cook, gen. mgr.

Inc. 1916, in Nevada. **Cap.** \$500,000; \$10 par. **Property:** a 10-yr. \$175,000 lease and bond on 2 claims of the Tuscarora-Nevada Mng. Co. and the Nevada rights of the Holden patents for concentrating and reducing ores. The mine is said to contain between 400,000 and 600,000 of \$14 mill ore.

A 50-ton mill, completed in 1919, was destroyed Nov., 1919, by fire; reported that new 250-ton mill is to be built in 1922.

SULTANA SILVER MINES CO. NEVADA

Address: A. F. Price, sec., 412 No. Center St., Reno, Nev., or C. N. Miller, P. O. Box 1137, Tonopah, Nev.

Cap. \$1,000,000; \$1 par; 750,000 issued.

Location: via Black mountain district, Mineral county, 15 miles W. of Belleville on S. P. R. R. (Keeler branch) and 4 miles from Marietta. Accessible by good road from Tonopah via Candelaria, and 30 miles from Mina, the nearest supply point.

Property: 3 claims, 60 acres, covering 2,000' on outcrop of strong vein, running N. W.-S. E. on south slope of Big Elephant mountain in Excelsior range. Ore: argentiferous galena with silver sulphide. The mine is in the heart of district, extending for 8 miles from Foster mine on east end of Excelsior range to Borax (F. M.) Smith mine on west. The range shows limestone intruded by quartz-porphry, the silver-bearing rock of the region.

Mine reported on by J. Young Anderson and A. F. Price.

Development: old workings at 5 places along the vein to depth of 135' and a 100' shaft show the vein to have 3 to 5' of ore that carries 60 to 250 oz. silver. An 8' width of vein in shaft samples \$96.80 in gold, silver and lead. Water is obtainable at Marietta.

In mid-1921, company was advertising in the public press for lessees.

SULTAN MINE NEVADA

Address: Henry Robbins, owner, Goodsprings, Nev.

Property: in Yellow Pine district, Clark county, said to show a replacement orebody in limestone. Minerals are zinc and lead carbonates, the ore averaging $1\frac{1}{4}$ oz. silver to each 1% lead. Surface outcrops are said to be extensive.

Equipment: includes 50-ton dry concentrating plant, separating the lead, making a 35% lead and 40 oz. silver concentrate. Tailing carries 15% zmc, 4% lead and 4 oz. silver per ton.

Was a small producer in 1919.

SUNBEAM DIVIDE MINING CO. NEVADA

Office: Tonopah, Nev.

Officers: W. E. Sirbeck, pres.; A. B. Hall, v. p.; Arthur Woods, treas., Milton M. Detch, sec., with F. F. Garside, directors.

Inc. April 12, 1919, in Nevada. **Cap.** \$150,000; 10c par; assessable; 550,000 issued. Assessment No. 1, of 1¢, was payable March 15, 1921, and

No. 2 of 16 was levied in November. Listed on San Francisco Stock Exchange.

Property: 7 claims, $2\frac{1}{4}$ miles north of the Tonopah Divide.

Development: by 150' shaft, sunk on a rhyolite dike. Assays showed rock to carry from \$1 to \$2.80 per ton, but stringers at 120' returned from \$17 to \$96 per ton. At 150' the stringers assayed \$133, and 12" vein \$10.50 per ton. Fully equipped.

In spring of 1921, company secured leases on portions of ground of the Florence Goldfield (q. v.) and Jumbo Extension (q. v.) at Goldfield. By August, discovery of an ore-body 4' wide on the Florence was reported.

SUNNY DIVIDE MINING CO.

NEVADA

Office: Room 1 Journal Bldg., Reno, Nev.

Officers: A. G. Miller, pres.; C. H. Duborg, v. p.; with G. H. Kent, W. T. McNeil, and O. J. Clifford, directors. Chas. T. Miller, sec.-res. agt. Inc. in Nevada. **Cap.** \$150,000; 10c par; 800,000 treasury shares.

Property: 7 claims, $1\frac{1}{4}$ miles S. W. of Tonopah Divide, and adjoining the Aztec Divide on the south. Company also advertised its ownership in 9 claims in the So. Arrowhead district, Nye county.

SUNSET MINING & DEVELOPMENT CO.

NEVADA

Office: 265 Russ Bldg., San Francisco, Cal. **Mine office:** Unionville, Pershing county, or Rhyolite, Nye county, Nev.

Officers: Edw. S. Van Dyck, pres.-treas.; Herman Zadig, v.p., with O. A. Newcomer, directors. Chas. D. Olney, sec.; F. W. Lockman, mgr.

Inc. Dec. 9, 1912, in Nevada, as a reorganization of the Tramps Consolidated Mining Co., Bullfrog Sunset Mining Co. and Denver Bullfrog Annex Mining Co. **Cap.** \$5,000,000; \$1 par; issued, 1,750,000; Stricken from New York Curb August 1, 1918. Security Transfer & Registrar Co., New York, transfer agent and registrar.

Property: 20 acres, patented, in the Bullfrog district, Nye county, said to show ore occurring in fissure veins in rhyolite, with dip of 30°. Veins vary from 6' to 20' in width.

Development: by 5,000' of tunnels. During 1918 the Denver shaft was deepened to 700' and a drift run on a quartz vein, assaying \$11.20 per ton.

Late in 1918, the Arizona mine in Unionville district, Pershing county, was taken over and drained by tunnel to 400' level. This property prior to 1880 had a production record of \$5,000,000 gross. A 35-ton flotation mill was completed by Feb. 1919. In April, suit was brought against the company's officers for cancellation of sale of property to the Arizona Silver M. Co. (q. v.); the contention being that the Arizona mine had been developed and equipped at a cost of \$40,000, raised by assessments levied on stock of the Sunset company. The officers of the two companies are identical.

SUNSHINE MINES CO.

NEVADA

Address: Winnemucca, Nev., or O. W. Jones, (pres. of Rochester Silver Corp.), Reno, Nev.

Property: claims in Pershing county, 17 miles S. of Winnemucca, shows fissure veins in limestone containing quartz ore carrying argentiferous lead carbonate. Developed by 100' tunnel, with an 80' back, and winze to the 180' level. Equipped with compressor and drills.

SUPER SIX MINING CO.

NEVADA

Address: Nat P. Wilson, 1440 Stanley St., Los Angeles, Calif, Rapp Bros., also of Los Angeles, are said to be interested.

Property: the Frisco and other claims at the new camp of Royston, San Antone district, Nye county, adjoins the Hudson company on the S. A vein, 5' wide, has been cut by a tunnel; ore is silver. Developed also by 2 shafts. Claims are operated largely by lessees.

SUTHERLAND DIVIDE ANNEX MINING CO.

NEVADA

Office: Goldfield, Nev.

Officers: H. B. Ruhl, pres.; F. C. Beedle, v. p.; B. E. Garnett, sec.-treas., with T. F. Potthoff, and A. B. Garnett, directors.

- Inc. April 1919, in Nevada. **Cap.** \$150,000; 10c par.
 Property: 4 claims adjoining the Sutherland Divide on the north.
- SUTHERLAND DIVIDE EXTENSION MINING CO. NEVADA**
Address: T. O. Ward, res. agt., Reno, Nev.
Officers: Jos. McEachin, pres.; R. G. Ward, v. p.; T. O. Ward, sec.-treas.; above, with T. J. Lynch and F. P. Dunn, directors.
- Inc. March, 1919, in Nevada. **Cap.** \$10,000; 1c par; 500,000 in treasury.
 Property: about 75 acres, adjoining the North Divide on the north.
- SUTHERLAND DIVIDE MINING CO. NEVADA**
 See reorganized company, the **New Sutherland Divide Mining Co.**
- SYNCLINE GOLD-SILVER-COPPER MINING CO. NEVADA**
 Mail returned from mine address, Lida, Nev.
Officers: L. Kershaw, pres., Tacoma, Wash.; H. C. Peet, v. p.; L. E. Campbell, sec.-treas. and gen. mgr., with F. A. Campbell, B. A. Howes, E. P. O'Leary, E. B. Campbell and E. C. Peet, directors.
- Inc. June 4, 1910, in Nevada, as successor of Washington-Nevada Mining & Milling Co. **Cap.** \$1,000,000; shares \$1 par; issued \$799,420. Annual meeting, first Monday in January.
Property: 11 claims, 3 patented, 57 acres, with 120 acres mill and smelter sites, 30 miles S. W. of Goldfield and 10 miles from a railway, in the Lida district. District shows Cambrian limestone and shale, cut by quartz monzonite capped by volcanic rocks. The ores occur as impregnations and veins. The claims are reported by the management to carry 12 deposits, 4 under development of 4 to 20' average width, traceable 5,000', carrying a sulphide ore, said to give assays of 8.7% copper, 17 to 19% lead, 11% zinc, 11 oz. silver and \$1.90 gold per ton.
Development: by 9 shafts, of 31 to 120' depth, and by 6 tunnels of 12 to 140' length; the tunnels are not being used.
Equipment: includes a 15-h. p. gasoline hoist and 5 mine buildings. The management planned deepening the main shaft to 200' at last report.
- TALAPOOSA COMPANY NEVADA**
Office: Fernley, Nev.
Officers: Winfield Scott Proskoy, pres., 2 Wall St., New York; Wm. H. Ferguson, cons. engr.
Cap. \$1,500,000; \$1 par; 600,000 treasury shares. U. S. Corp. Trust Co., New York, registrar and transfer agt. Listed on New York Curb.
Property: 18 claims and fractions, 290 acres, in Talapoosa district, Lyon county, 14 miles S. of Fernley on the S. P. R. R. District known since 1864 but no record of early production. Three, or more, parallel quartz veins, 4' to 20' wide, outcrop prominently in rhyolite cut by altered andesite dikes; ore values, largely silver, ranges from \$1.64 to \$196.10 per ton for many assays. Developed by shafts, 100' maximum, and 2 tunnels; equipped with hoists.
 Property is said to have been under present control since 1905, and that \$100,000 has been expended. Is being operated to some extent by lessees, who are reported, Dec. 1921, to have opened a high grade ore shoot. Most of information is obtained from market letters and "review" of Irving K. Farrington & Co., of New York, which has been assiduously boosting Talapoosa for a year past.
 Examined by Robt. W. Betts and J. L. Kelly.
- TEACUP MINING CO. NEVADA**
Address: McGill, or Cherry Creek, Nev.
Officers and directors: Geo. Granopolus, pres.; J. M. Lockhart, v. p.; H. J. Mueller, sec.-treas.; J. W. Wenzel, mgr.
 Inc. June 27, 1919, in Nevada. **Cap.** \$1,000,000; \$1 par; assessable; 322,500 issued. Operating expenses for 1918 averaged \$5,000 per month.
Property: 22 claims, 2 patented, 440 acres in Cherry Creek district, White Pine county, shows two veins under development. The Teacup, worked since 1868, lies along a contact between lime and shale, is from 4 to 12' wide, runs N.-S. and dips 45° W. The Exchequer is a fissure vein in

quartzite, is 4 to 11' wide, and runs S. 70° W., crossing the Teacup vein 675' S. of shaft. Claims cover 5,000' along strike of Exchequer vein and 3,000' on the Teacup.

Development: by a 1,000' shaft and a 450' incline; a total of 4,000' of workings. A crosscut on 900' level intersects the Exchequer vein.

Equipment: includes 60-h. p. gasoline hoist, assay-office and buildings; compressor, 7,250' tramway, and 100-ton mill.

Mine is credited with past production of 3,000,000 oz. silver, and management reports reserves of 100,000 tons, running 14 to 27 oz. silver.

TECHATTICUP MINE

NEVADA

Address: C. L. Dennison, lessee, New York. Owned by Wharton Estate, Philadelphia, M. A. Newman, supt., Nelson, Nev.

Property: 9 claims, 8 patented, 1 mile E. of Nelson, in Eldorado Canyon district, Clark county, said to show a quartz vein in monzonite, dipping 10 to 80° and pitching E. W. Ore is a sulphide.

Development: by 600' incline shaft, and 3,000' of workings.

Equipment: 25-h. p. gasoline hoist, 3 compressors and 50-ton cyanide mill.

Production: in 1916 was 7.676 oz. gold and 58,393 oz. silver. Operating, but no record available; in 1919, was the largest producer of the district.

TECOMA CONSOLIDATED MINING CO.

NEVADA

Fully described in Vol. XIV; property taken over by Utah Zinc Co., which see.

TELEPHONE GIRL DIVIDE MINING CO.

NEVADA

Office: Tonopah, Nev. H. R. Cooke, res. agt.

Officers: J. J. McGregor, pres.; E. B. Ingram, v. p.; James Moffatt, sec.; James Monahan, treas., and directors.

Inc. in Nevada. **Cap.** \$150,000; 10c par; 750,000 in treasury.

Property: 6 claims in the extreme S. E. part of the district, 4 miles from Gold Mountain and N. E. of the Ajax mine.

Mail returned from Portland, Ore., address.

TENABO MILL & MINES CO.

NEVADA

Fully described in Vol. XIII. Property acquired in 1920 by Consolidated Cortez Silver Mines Co., which see.

THOMPSON-WALSH MINES CO.

NEVADA

Address: Mina, Nev.

Officers: J. H. Walsh, pres.; G. F. Thompson, v. p.; G. W. Dwight, sec.-treas.

Inc. June, 1919, in Nevada. **Cap.** \$150,000; 10c par; 702,000 shares outstanding.

Property: adjoins Cons. West Extension on W., developed by 40' shaft.

THOMSON DIVIDE MINING CO.

NEVADA

Office: Tonopah, Nev.

Officers: J. D. McLeod, pres.; Wm. E. Watters and W. J. Douglass, v. p.'s; E. J. Erickson, sec.-treas., with Hugh Sutherland, directors.

Inc. May 14, 1919, in Nevada. **Cap.** \$300,000; 20c par; assessable. Listed on San Francisco Stock Exchange.

Property: 7 claims, 90 acres, adjoining Belcher Extension, Royal and Pay Divide properties. Is about 4,500' N. W. of Tonopah Divide. Patent application has been filed. Fully equipped.

THOUSAND MEMBER GOLD MNG. ASSOCIATION

NEVADA

A get-rich-quick scheme fostered, if not fathered by the G. S. Johnson Co., in 1914, in an attempt to sell Eastern Star Mng. Co. stock.

TIGER MINING CO.

NEVADA

Mail returned from Lovelocks, Nev. Not incorporated.

A. L. Towne, mgr.; G. E. Pitt, supt.

Property: 4 claims, 80 acres, 9 miles E. of Lovelocks, Pershing county, said to carry a 4' vein with gold, silver and copper. Owners claim to have 2,000 tons of ore blocked out. An 18-ton concentrating mill installed, May, 1919.

TODD MINING CO., R. B.**NEVADA**

Merged early in 1920 into the **Luning Consolidated Silver Mines Co.** of Nevada, which see.

TOGGERY DIVIDE MINING CO.**NEVADA**

Officers: T. J. O'Donnell, pres. Ernst & Cranmer Bldg., Denver; F. S. Hutchins, v. p.; Darwin S. Root, sec.-treas. (Room 1517, 25 Broad St., New York), with J. W. Graham, G. W. Bachman, E. B. Caldwell, directors.

Inc. April 19, 1919, in Nevada. **Cap.** \$150,000; 10c par. Listed on San Francisco Stock Exchange. Corporation Trust Co., New York, transfer agent.

Balance sheet of April 15, 1921, shows assets of \$247,184, of which \$29,357 was charged to profit and loss account.

Property: 12 claims, 200 acres, adjoining the Gold Zone on north, and 1,800' south of Tonopah Divide. Located in 1902 by James Grimes. Many strong dikes or iron-stained fracture ledges of appreciable silver value are said to traverse claims. Examined by A. H. Warner.

Development: by 4 shafts, deepest 325'. All surface work had shown minimum assays of 1 oz. silver per ton. At 135' in main shaft, ore carrying free gold was opened.

Mine shut down early in 1920, dismantled and machinery junked. A reorganization on an assessable basis did not materialize, and in June, 1920, a circular letter from Weir Bros. & Co., 25 Broad St., New York, reported merger of Toggery Divide and Gibraltar Silver Mines Co. in the **Mines Selection Co.** (q. v.). Stockholders of each company to exchange their stock for stock in new company, share for share, plus a fee of 3¢. See Vol. XIV for complete description of Toggery Divide.

TOGGERY EXTENSION MINING CO.**NEVADA**

Office: Reno, Nev. James Boland, res. agt.

Officers: W. A. Hooton, pres.-mgr.; J. R. Chamberlain, sec.-treas.; with James Boland and R. G. Withers, directors.

Inc. June, 1919, in Nevada. **Cap** \$150,000; 10c par; 750,000 issued.

Property: 2 claims, 600' N. of Myra Divide. Lease held by company (or its president) on the Toggery Divide was relinquished.

Probably dead.

TOHOQUA MINING CO.**NEVADA**

Property: acquired by Leadville Divide Mng. Co. and later by **Leadville Mines Co.**, which see.

TOMBOY DIVIDE MINING CO.**NEVADA**

Dead. Had been a company "on paper" only.

TONOPAH BANKERS DIVIDE MINING CO.**NEVADA**

Officers: A. W. Copps, pres.; W. P. O'Meara, v. p. and mgr.; F. W. Gillette, sec.; Thomas Normile, treas., with F. C. Jordan and P. C. Thorn, directors.

Property: 4,500' north of Tonopah Divide; with the High Divide Annex, High Divide, Harmill, and Hennessy ground in between.

TONOPAH BELMONT DEVELOPMENT CO.**NEVADA**

Office: 500 Bullitt Bldg., Philadelphia, Pa. **Mine office:** Tonopah, Nev.

Officers: C. A. Heller, pres.; W. M. Potts, v. p.; C. B. Taylor, gen. counsel, with H. C. Brougher, M. B. Cutter, J. C. Fraley, S. Deas Sinkler, G. Wilson, asst. sec.-asst. treas.

Operating officials: Frederick Bradshaw, gen. mgr., G. H. Garrey, cons. geologist; Albert Silver, supt. of milling; Herman Dauth, mng. engr.; L. R. Robins, mine supt.; W. H. Royston, mill supt.; Fred Steen, auditor.

In. 1902, in New Jersey. **Cap.** \$1,500,000; \$1 par; increased, 1906, from \$1,000,000, but \$500,000 was later cancelled, leaving \$1,500,000 outstanding. Stock transferred at company's main office. Fourth Street National Bank, Philadelphia, registrar. Annual meeting, last Tuesday in May, at Camden,

N. J. Listed on Philadelphia Stock Exchange, and traded in on New York and Boston curbs.

The company controls three subsidiaries, namely the Belmont Surf Inlet Mines, Ltd. of British Columbia, in which it invested \$1,294,101; the Belmont Shawmut Mining Co., California, \$743,850; and the Belmont Wagner Mining Co., Colorado, \$797,770. The total sum is \$2,835,721, and the first-named company has repaid all loans advanced. Details of these companies will be found under their respective titles.

Comparative general balance sheet; years ending on March 1, 1918, and December 31 from then on:

Deductions include dividends and administration, taxes, etc. (a) Deficit.

(b) Includes dividends from Belmont Surf, in which the Belmont Devel. interest is 80%.

The net income for last quarter of 1920 was \$117, 275, and available resources on Dec. 31 totaled \$352,235. The total net for 1921 to Sept. 30, was \$299,155, and resources on Dec. 1, were \$563,998. The net earnings of Belmont Surf Inlet for 9 months of 1921 were \$8,318 and a \$50,000 dividend was paid to the parent company. A 4 months' labor strike at Tonopah made a substantial cut in 1921 earnings; the expense involved does not show in the above figures. No returns have come recently from the Wagoner or Tonopah Placers.

Dividends: 20c. in 1906; 20c in 1907; none in 1908-09; 15c in 1910; 90c. in 1911; \$1 in 1912; \$1.10 in 1913; \$1.10 in 1914; 50c in 1915; 50c in 1916; 50c in 1917; 35c in 1918; 25c in 1919; 10c in 1920; 10c in 1921; and 5c in 1922, to Jan. 2; a total of 44 distributions, equal to \$10,418,063.

Property: 11 claims, 161 acres, adjoining the Montana Tonopah and Tonopah Mining properties on the east at Tonopah; and control of the sub-

sidiaries mentioned. In October, 1919, 360 acres of land, said to contain coal and indications of oil, near the Walker river, were purchased.

Geology: the Tonopah district is made up of a thick series of rhyolitic and andesitic rocks, which is faulted in a very intricate manner, together with the accompanying veins. The deposits are quartz veins, in part filled and in part replacement, intersecting the earlier andesite and to some extent entering into the underlying rhyolite. Principal ore minerals are argentite and polybasite, with small amounts of pyrite, chalcopyrite, galena, zinc blende and gold. Veins vary in width from 3' to 25'. The principal producer of the Tonopah Belmont has been the Belmont vein, cut off near 1,500' depth by the Mizpah fault; the veins now producing are not as productive as they were.

Company has also an investment in the Esmeralda Power Co., and, according to rumor, a substantial interest in the Tonopah Divide. An option on the Berry property in the Flowery district has been relinquished.

Development: by 3-compartment vertical shafts, 1,127' and 1,718' deep. The advance for 1919 and 1920 was 5,284' and 8,149', respectively, as compared with 9,263' for 10 months in 1918. Total workings, 37 miles. Due to strikes and scarcity of labor, unfavorable operating conditions existed throughout last 2 years.

Development early in 1920 was largely between the 7th and 11th levels; later, the 550' intermediate level was opened, and work extended down to 13th level; in 1921, the 14th level was included, and it was reported that the 1,100 and 1,200' levels had opened ore of good milling grade.

Ore reserves: (January 1) in 1921 were 124,757 tons; 1920, 112,133 tons; 1919, 82,798 tons. Estimates naturally depend upon prevailing silver prices, labor conditions, etc.

Equipment: includes a 60-stamp cyanide mill, which started operations in July, 1912. For a detailed description of this plant see Trans. A. I. M. E., August, 1915. To treat custom ore, this plant was enlarged in November, 1917, and recently has been treating 50 tons daily of Tonopah Divide ores. During 1920, an additional cyanide unit for the treatment of concentrate was installed, operations beginning in August; results are said to be satisfactory. The plant at Millers was closed during 1918, and has since been largely dismantled.

An electric haulage system was installed on the 10th level in 1919.

Production:

	Tons Milled	Value p. ton	Oper. Costs Mine	Extr. Costs Mill	Extr. %	Profit p. ton	Production—Oz.	
							Gold	Silver
1920....	131,303	\$13.70	\$5.28	\$3.18	92.22	\$ 4.13	13,744	1,296,389

1914....	172,398	21.08	4.35	3.05	94.45	8.83	44,465	4,251,746
1913....	60,359	24.21	4.35	3.66	94.43	12.42	38,371	3,826,399
1912....	87,349	20.84	4.85	3.36	14.31	45,069	4,535,762

*10 months.

Gross value of production to Dec. 1, in 1921, was about \$1,680,000.

To offset the decreasing production of the original claims at Tonopah, the company has been branching out, acquiring new properties, thus making the company a permanent organization independent of the life of the Tonopah mines, the end of which is now visible.

To meet a lower grade of ore and the increase in smelter and freight charges, treatment of concentrate on the ground has been adopted; 312 tons thus treated show a saving of \$20.66 per ton as compared with cost of ship-

ping concentrate to the smelter; the extraction was 96% plus that from the retreatment of tailing.

The indications that the closing years of this property will not be without profit, seem fairly bright.

TONOPAH BONANZA MINING CO.

NEVADA

Address: 365 Bush St., San Francisco, Calif., and care John McGee, Box X, Tonopah, Nev.

Assessment No. 5 of 1c levied May, 1918. Cash on hand, July 30, 1919, \$3,201.

An interest in this property was acquired, 1915, by the Greenwater Copper Mines and Smelter Co., which see.

Property: 15 claims, 380 acres, at Tonopah, Nev., increased 1916 by acquisition of the Desert King Mining Co.'s property, 40 acres, adjoining on the S. E. The claims, which lie in the western section of the district, had a 2-compartment shaft, 1,100' deep, when new company took over the property and some crosscutting had been done on the 600' level, but no commercial ore developed. During 1918 about 600' of crosscutting was done on the 1,637', but no ore was found and all work was suspended in October.

No recent information.

TONOPAH DIVIDE JUNIOR MINING CO.

NEVADA

See Vol. XIV. Reorganized in 1921, and assumed name of **Reorganized Divide Junior Mng. Co.**, which see.

TONOPAH DIVIDE MINING CO.

NEVADA

Office: Tonopah, Nev.

Officers: H. C. Brougher, pres. gen. mgr.; W. J. Douglass, v. p.; E. J. Erickson, sec.-treas., with E. W. Blair, and Clyde A. Heller, directors. E. B. Paxson, asst. sec.-asst. treas. William Watters, supt.; G. H. Garrey, cons. geologist.

Inc. June 3, 1912, in Nevada. A reorganization of the **Tonopah Gold Mountain Mining Co.** Cap. \$1,250,000; \$1 par; 1,014,800 issued. Listed on San Francisco Stock Exchange and New York Curb. Annual meeting, first Wednesday in March. Tonopah Banking Corporation, registrar; transfers made at company's office.

Financial statement: balance sheet of Dec. 31, 1921, shows assets of \$1,074,471, including \$804,823 for property and equipment and \$26,945 cash. Surplus was \$59,671 compared with \$6,042 at end of 1920.

Income account shows net ore recovery of \$301,863 and \$3,033 miscellaneous earnings. Expenses were \$198,176, including \$73,916 for mining and development, \$98,460 for treatment and transportation, and \$10,382 general. Net profit was \$101,559, after depreciation of \$5,160. The 1920 net was \$10,897.

Property: 14 claims, patented, 160 acres, in the center of the Divide district, on the eastern slope of Gold Mountain.

Geology: the Divide vein, as the main ore fissure of the mine is called, is a shear-zone in the Divide breccia, a rock formed of rhyolite fragments. The vein is large, varying from 15 to 30' across and has sharp walls. A vertical post-mineral slip runs with the vein, but crosses it, and is accompanied by many sympathetic minor slips with all sorts of strikes and dips. This fracture has been followed by the mine levels, which accounts for some apparent irregularities of the orebody. The 2 ore shoots are often bounded by clay seams, but in places the values fade out into the wall rock. At one place the ore is 90' across, though it does not generally exceed 20 to 25' in width. The outcrop is a soft altered rhyolitic breccia, stained with red and yellow iron oxides, without conspicuous quartz, and of rather unattractive appearance, although a red seam carries horn silver. A rhyolite dike intersects the vein at a small angle at the northwestern end of the 365' level.

A second mineralized zone known as the Gold Veins, outcrops on the property and was mined in former years. It runs E.-W. and would intersect

the Brougner vein to south, if not faulted. A crosscut to the Gold Veins shows two normal faults running north 75° west and with steep south dip, bringing down the overlying formation.

The gangue of the Divide ore is a kaolinized rhyolite breccia, in which scarcely any silicification can be noted. On the 165' level an oxidized molybdenum mineral powellite, a molybdate of lime, constitutes an important portion of the gangue, but this material decreases with depth.

Development: by a 1,229' shaft with main levels at 165, 265, 370, 480, 585', 800' and 1,000'. Two pay shoots, 8 to 30' wide and 75 to 100' long, have been uncovered in the mineralized zone which has been explored for over 1,000' horizontally. Development is going ahead throughout mine down to the 1,000' level, but in 1921 much of the work done was above the 585' level. Advance in 1919 was 4,605'; in 1920, 6,849'; in 1921, 3,369' total workings, Jan. 1, 1922, 17,796'. These figures do not include 3,000' of workings on the Gold Veins, which it is planned to develop at depth from the main shaft in 1922. Development in 1921 was much handicapped by 3 months' labor trouble.

Including development, cost at mine in 1921 was \$5.79 per ton, compared with \$11.17 in 1920. Shaft sinking cost \$31.16; drifts and crosscuts, \$9.40; and raises, \$9.39, per foot.

Ore Reserves: on July 1, 1919, the then manager unfortunately reported that, although development was not sufficiently advanced to measure ore reserves, "as a matter of speculation" the mine could produce 330,000 tons of \$27.60 ore, silver at \$1.30 to yield \$9,108,000 gross. This was followed on Dec. 31, by a report of E. A. Julian, consulting engineer, estimating reserves to be 52,000 tons of "developed and probable first class ore, averaging 20 oz. of silver and 0.08 oz. gold, to yield a gross value of \$1,385,000, with silver at \$1.25." A substantial check of these latter figures was made by J. H. Farrell on October 21, 1920, who reported the then reserves to be 53,158 tons of \$21.78 ore (silver at \$1.00) or a total of \$1,158,733.

Although new estimates were not made, for 1921 the indications are that reserves both of shipping and milling have been considerably increased.

Equipment: all machinery is motor-driven (with three 50-k. w. transformers), and includes a large hoist at surface, auxiliary hoist at 370 ft. depth, one 350 and one 1,200 cu. ft. compressor. Plant includes assay office, houses, etc. for 100 men and complete outfit for extensive operations. A 75 h. p. hoist was added in 1921.

Production: ore shipments to the Goldfield Consolidated mill began in October, 1918, and continued at rate of 220 tons per week until January, 1919, when shipments were transferred to the MacNamara mill at Tonopah. Beginning with Nov. 1, 1920, all shipments have been made to the Tonopah Belmont mill.

Company is endeavoring to develop to a point when erection of mill might be warranted; and present policy is to only make sufficient shipments to meet expenses. Ore is drawn from all parts of the mine and as much as possible from development on 4 upper levels and connecting raises. Official figures are as follows:

Year	—Per Ton—						Total
	Tons	Value	Loss	Extr	Cost	Profit	Profit
1921.....	12,763	\$26.48	\$2.72	\$23.76	\$15.52	\$8.24	\$105,167
1920.....	9,989	26.65	2.69	23.96	22.85	1.11	11,088
1919.....	9,612	29.35	2.82	26.53	20.22	6.31	60,541
1918 (3 mos)....	788	20.89	2.28	18.61	17.98	0.63	1,245

It is the company's announced plan to continue shaft to the water level. This will not only determine if workable orebodies exist at greater depth but may supply the water needed for milling purposes. With a mill of its own, company should be able to decrease total costs and enable it to mine

and treat the "large tonnages of \$8 to \$15 ore" already developed and make available 22,346 tons of \$8.73 ore now in stock pile. At present time only high grade ore is shipped, and the cost is \$7.71 p. t. (1921) for haulage and treatment.

The controversy brought on by the apparent discrepancy in estimates of ore reserves, had a most disastrous effect on share prices and knocked the bottom out of the Divide "boom" but the possibilities of the mine are not yet fully known and under the present management it is expected to eventually become a dividend payer.

TONOPAH DIVIDEND MINING CO.

NEVADA

See **New Tonopah Dividend Mining Co.**, a reorganization which became effective March 1, 1921.

TONOPAH EAST END DEVELOPMENT CO.

NEVADA

Address: E. P. Cullinan, sec., Tonopah, Nev.

Inc. in South Dakota. **Cap** 1,500,000 shares.

Property: east of Mizpah Extension at Tonopah. Idle several years.

TONOPAH EXTENSION MINING CO.

NEVADA

Office: 30 Church St., New York. **Mine office:** Tonopah, Nev.

Officers: M. R. Ward, pres.; W. A. Mitchell, v. p.; with S. A. Brown, C. M. Schwab and W. R. Rose, directors. W. G. Benham, sec.-treas.; J. G. Kirchen, gen. mgr.

Inc. 1902, in Arizona. **Cap.** \$2,000,000; \$1 par; outstanding 1,292,801.

Original capital of 1,000,000 shares was increased June, 1915, to 2,000,000 and issue authorized of 156,294 shares for acquiring Tonopah Merger and 173,074 shares for Tonopah Victor Co. U. S. Corporation Co., New York, transfer office and registrar. Annual meeting in May. Listed on San Francisco Stock Exchange and traded in on the New York Curb.

Comparative General Balance Sheet, year ending March 31:

Assets—

1915.....	1,289,817	1,341,620	662,269	50,140	596,892

Due to labor troubles April to August and to heavy development costs, indications are that the 1921-22 fiscal year will not be as profitable as usual.

Dividends: (calendar year) 15% in 1905; 15% in 1906; 5% in 1912; 15% in 1913; 20% in 1914; 32½% in 1915; 47½% in 1916; 25% in 1917; 5% in 1918; 30% in 1919; 15% in 1920; 20% in 1921, and 5% on Jan. 1, 1922, total of \$2,878,434.

Property: 647 acres in the Tonopah mining district, Nye county, adjoins Tonopah Mining Co. on the W. and West End Cons. Mining Co. on the N.

During the fiscal year 1910-11 the company acquired the properties of the Red Rock Cons. Mining Co., McKane Mining Co. and Pittsburg Tonopah Extension Mining Co. and in June, 1915, properties of the Tonopah Merger Mining Co. and the Tonopah Victor Mining Co.

The Sully claims of 77 acres were bought for \$10,000 in 1916 and in 1920. the patented Accidental claim was acquired from the Iowa Tonopah Mng. Co. for 10,000 Tonopah Extension shares.

Early in 1921, litigation involving extralateral rights and alleged trespass began between Tonopah Ex. and the Cash Boy Cons. Mng. Co., the latter being the plaintiff in the first instance, followed in August by a counter suit brought by Tonopah Ex. Then in December it was announced that the Cash Boy mine had been purchased by Tonopah Ex. for 100,000 shares of its stock, or on basis of one share for 20 Cash Boy shares, and equivalent to about \$145,000 based on market value of Tonopah Ex. shares. The Cash Boy property of 30 patented acres is nearly surrounded by holdings of the purchaser, and has been developed to a depth of 1,700'. See under its title for complete description.

Geology: ore carries silver and gold in quartz veins in rhyolite, trachyte and volcanic breccia. The ore minerals are argentite, stephanite, polybasite, some proustite and pyrrargyrite. There are 5 main veins, from N. to S., the Merger, O. K., New Victor, Lower Contact, and Murray, of which the Murray is the most important, showing a stopping width of 14'. The veins strike N. 45° W., S. 70° W., and N. 70° W., with dip 20 to 70°, growing steeper with depth. The orebodies occur in shoots ranging in width from 3-60', with a maximum length of 600' for any single shoot.

Development: by 3 vertical main working shafts, the No. 2, McKane and Victor, 1,440', 1,650' and 1,880' deep, respectively. No. 1 shaft has been idle in recent years. The Vic'or and McKane are to be the principal operating shafts, as the known orebodies reached by No. 2 are about exhausted. Extensions during recent years, ending March 31, were 13,967' in 1916; 12,017' in 1917; 10,993' in 1918; 10,322' in 1919; 5,941' in 1920 and 9,114' in 1921. Total workings 31 miles. In addition, 595' of drilling was done in 1920 and 305' in 1921.

For the 2 year period ended March 31, 1921, the known orebodies reached by No. 2 shaft were practically exhausted. At the Victor shaft, the Murray and Merger veins were developed particularly on the 1,680' and 1,760' levels and the former being the main producer. Two new veins, Deming and Anchor were discovered. No production was made from the deepened McKane shaft, work here consisted of establishing levels and improving the general mine ventilation by connections with other workings. During latter part of 1921 and early 1922, reports indicated that the deep workings at the Victor shaft have proved most satisfactory. Ore is extracted by overhead stoning and subsequent waste filling. Because of the character of the orebodies, no attempt is made to estimate ore reserves.

Equipment: at the mine includes two 150 h. p. hoists, duplex and quintuplex pumps, 2 compressors of 1,700' capacity and tramway from mine to mill. The new double drum hoist at the Victor shaft has a capacity of 8 tons when in counter-balance at a speed of 1,000' per min. from a depth of 3,000'. All machinery is electrically driven. The 50-stamp cyanide mill has a capacity of 400 tons. In 1917 an auxiliary 500 k. w. power plant was added. This is to generate electricity when the Nevada-California Power

Co's supply fails. A 500-gal. p. m. turbine pump was installed on the 1,680' level in 1920 and a 200 h. p. compressor added; the compressor plant is now centralized at the Victor shaft.

Production (year ending March 31):

Year	Tons		Extr. %	Oper. Mine	Cost p. Mill	Ton Total	Metal Sold—Oz.	
	Milled	Value Per Ton					Silver	Gold
1921..	89,022	\$15,591	92.01	\$6.44	\$4.36	\$10.80	1,057,082	10,571
1920..	70,611	16,676	92.00	5.51	4.20	9.71	788,246	7,615
1919..	114,921	15,449	93.05	4.80	3.68	8.49	1,367,440	13,143
1918..	110,188	12,543	90.51	5.26	3.38	8.64	1,169,671	11,809
1917..	109,402	17,107	4.90	3.62	8.82	1,882,402	18,052
1916..	91,981	18,038	92.39	4.61	4.48	9.59	1,106,519	20,576
1915..	71,882	19,966	89.57	5.19	3.75	9.39	1,790,032	17,585

Milling cost includes that of marketing.

The Tonopah Extension is in much better physical condition than it was some years back and should continue to pay regular dividends. Management is capable and careful.

TONOPAH GOLD HILL DEVELOPMENT CO. NEVADA

Offices: 300 Call Bldg., San Francisco, and 505 State Bank & Trust Bldg., Tonopah, Nev.

Officers: W. T. Moran, pres.; J. Neriega, sec.; J. C. Allen, supt. Annual meeting, in May. Three assessments of 1c each have been levied, last July 19, 1921.

Property: 12 claims in the Lone Mountain district, Esmeralda county, 14 miles northwesterly of Goldfield. Reported to have an orebody, 7' x 160', on the 538' level averaging \$19.70 in gold silver and lead.

Development: by 2 shafts, 650' and 100' deep. It is said that development was first begun 9 years ago, its cost being borne by individual stockholders.

Equipment: 40 h. p. hoist, compressor and small test mill. Reported that a reorganization with change of officers took place in summer of 1921, and that work was to be resumed.

TONOPAH GOLD MOUNTAIN MNG. CO. NEVADA

Reorganized in May, 1912, as the Tonopah Divide Mining Co., which sec.

TONOPAH GOLD ZONE MINING CO. NEVADA

Reorganized as Gold Zone Divide Mining Co., of the Divide district, which sec.

TONOPAH HASBROUCK EXTENSION MNG. CO. NEVADA

Office: Tonopah, Nev. P. J. Somers, res. agt.

Officers: P. J. Somers, pres.; Jos. F. Ford, v. p.; B. J. Byrne, sec.; Geo. K. Ford, treas.

Inc. May 4, 1918, in Nevada. **Cap.** \$150,000; 10c par.

Property: 4 claims adjoining the Hasbrouck mine on west.

TONOPAH HASBROUCK MINING CO. NEVADA

Office: 421 Clay Peters Bldg., Reno, Nev.

Officers: A. A. Busey, pres.-gen. mgr.; A. H. Butler, Jr., v. p.; A. A. Codd, sec.-treas.

Inc. Feb. 6, 1918, in Nevada. **Cap.** 1,500,000 shares; 10c par; assessable; all issued. Four assessments, of 1c each, have been levied, the last Jan. 6, 1922. Listed on San Francisco Stock Exchange. Transfers made at company's office.

Property: 6 claims (4 patented), 115 acres, includes the old Hasbrouck mine (q. v.), in Gold Mtn. district, Esmeralda county, 3,000' W. of the Tonopah Divide, between which are the Hasbrouck Annex, Kernick, and Verdi.

Development: a 200' shaft, sunk about 16 years ago, opened 10 to 25' of milling ore. A tunnel driven on the vein somewhat later yielded 1,000 tons of ore, and a recent extension of the tunnel cut another vein. The ore is in rhyolite. During 1919, the old shaft was sunk to 360', 1,000' of old workings reopened and 1,100' of new work performed; since then, work has been continued on the 200' and 360' levels and in tunnel, but considered of more importance is the crosscut being driven from the Kernick (q. v.) shaft, on the 900' level.

Equipment: hoist, 4-drill compressor, etc.

The company was a producer in 1919.

TONOPAH KAWICH MINING CO.

NEVADA

Name changed to **Belle-Helen Merger Mines Co.**, which see.

TONOPAH MIDWAY CONSOLIDATED MINING CO. NEVADA

Address: Tonopah, Nev.

Officers: H. C. Brougher, pres.-mgr.; R. P. Stenson, v. p.; E. J. Erickson, sec.-treas.; W. Brougher, R. B. Govan, W. J. Douglass, C. C. Boak, directors; W. J. Douglass, supt.

Inc. in Arizona; reorganized 1915, in Nevada. **Cap.** \$1,500,000; \$1 par; assessable; 141,660 treasury shares. In November, 1921, assessment No. 9, of 2c per share, was levied; total assessments 12c per share. Annual meeting, in February. Listed on San Francisco Exchange.

Balance sheet of Dec. 31, 1920, shows; assets, \$1,600,519, of which property is \$1,378,367; equipment, \$22,826. Liabilities include assessments, \$100.-324. The net loss for 1919 and 1920, was \$47,164. Operating expense for 1920 was \$61,499. There was received from lessees, etc., \$87,693; cash on hand, Jan 1, 1921, \$977.

Property: 5 patented claims, 50.58 acres, in Tonopah district, said to show silver and gold ore. The quartz vein in trachyte dips 45° and pay ore occurs in shoots. Five veins have been opened on the 600 and 800' levels. During 1918 work was confined to the 600' level. The S. crosscut from No. 2 shaft was advanced 700' and connection made with the Tonopah Mining Co.'s workings on the Last Chance vein. This vein on the Midway is said to be from 6-45' in width and in places runs as high as \$384 per ton.

Developments by 2 shafts, 1,600' and 835' deep. In 1919 work was largely confined to the 800' and 1,200' levels; in 1920, main shaft was sunk 270' to the 16th level and crosscuts were driven, 1921, to cut the vein system of the Tonopah Extension. On 600', 700', and 1,200', low grade ore only has been found. Old (835') shaft given over to lessees. Ore shipments were \$3.-814 in 1920.

Equipment: hoist, compressor, etc.

Threatened litigation with the Tonopah M. Co. over the Last Chance vein has been amicably settled, the Midway receiving \$34,527 in cash and a vertical side-line agreement which will obviate future apex claims.

TONOPAH MINING CO. OF NEVADA

NEVADA

Office: 572 Bullitt Bldg., Philadelphia, Pa. **Mine office:** Tonopah, Nev.

Dividends: 1905, 75% of capital stock; 1906 and 1907, 120%; 1908, 50%; 1909, 130%; 1910, 150%; 1911 and 1912, 160%; 1913, 145%; 1914, 100%; 1915, 90%; 1916, 60%; in 1917, 60%; in 1918, 37½%; in 1919, 30%; in 1920, 5%; and 10% in 1921. The total paid is now \$15,025,000.

Property: 160 acres at Tonopah, Nye county, adjoins Tonopah Extension on the east and north and Jim Butler Tonopah Mng. Co. on the north. Also owns controlling interest in the Tonopah & Goldfield R. R. Co., 55% in the Eden Mining Co. of Nicaragua, control of the Tonopah Nicaragua Co., and 83⅓% in the Tonopah Placers Co. of Colorado. Also owns 75% of the capital stock of the Esmeralda Power Co. and 78% of the Mandy Mng. Co., owning property in the Schist and Flin Flon lake districts of Manitoba. Also controls the Nevada Copper Co. For descriptions see under respective titles.

For geology of the Tonopah district see Tonopah-Belmont Mining Co., and Tonopah Extension.

Development: to a depth of 1,500', chiefly through the Mizpah Desert Queen, Silver Top, and Red Plume shafts. In 1916 the Red Plume shaft was shut down and the hoist moved to the Sand Grass, which is 1,500' deep and is connected with the 1,170' level of the Merger shaft. The Mizpah shaft is bottomed at 1,500'.

Workings total about 11 miles, of which, 4,619' was performed in 1918, 3,804' in 1919, and 6,648' in 1920. No large orebodies have been disclosed, but small ore tonnages continue to be found, notably in the Mizpah section on 4th and 5th levels; the Silver Top section has yielded a small amount of ore; the Sand Grass section has been practically abandoned. Medium grade milling ore was drawn from the Mizpah stopes during 1919 and 1920, and some dump ores were found to be of commercial grade, but nothing more may be expected from the latter source. Development in 1919 was much curtailed because of labor troubles, but has been pushed since then with the hope that ore shoots may be located. Ore reserve figures are not given because of the impossibility of estimating small irregular tonnages. On Jan. 1, 1921, 150 tons per day for 4 months were actually in sight, but during the year large bodies of medium grade ore were opened in the Mizpah section of the mine.

Equipment: includes 100-stamp cyanide mill at Millers, 12 miles from the mine and complete mining plants. The mill was closed down for some time, but was re-opened Feb. 15, 1920, the contract with the Belmont mill for treating company ores not being renewed.

Production:

Year	Tons	Value	Extrac., %	Cost
1920.....	63,566	\$15.93	90.2	\$10.02
1919.....	41,298	18.74	6.37
1918.....	157,182	9.91	91.4	7.85
1917.....	109,835	14.85	91.9	9.16
1916*.....	81,782	15.65	90.1	8.71
1915.....	136,246	13.66	7.78
1914.....	143,432	16.25	8.51

* Nine months.

During 1919, the entire mine output was shipped to the Belmont mill; in 1920, company mill treated 54,024 tons mine ore, 6,979 tons dump ore and 4,806 tons custom ore; total, 65,809 tons; the recovery per ton was, 0.135 oz. gold and 11.71 oz. silver. Reported that production for 1921 was at rate of 1,200 to 1,600 tons per week.

The productive life of the Tonopah property is fast nearing an end. To counteract this and to make a permanent dividend-paying organization, new properties have been, and are being, acquired. There is no doubt that the plan is succeeding. The management is thoroughly experienced and capable.

Company reported at various times to be investigating properties in the Jarbidge district, Elko county, and in the Palmetto and Hornsilver districts, Esmeralda county.

TONOPAH NORTH STAR TUNNEL & DEV. CO. NEVADA

Office: 265 Russ Bldg., San Francisco, Cal. **Mine office:** Tonopah, Nev.

Officers: H. Zadig, pres.; J. J. McCarthy, v. p.; C. D. Olney, sec., with O. A. Newcomer, and R. L. Colburn, directors. A. E. Lowe, supt.

Inc. 1912, in Nevada. **Cap.** \$1,500,000; \$1 par; 1,320,000 shares outstanding. Assessable. Assessment No. 14 of 1¢ was levied in November, 1921. Company's San Francisco office, transfer agent; Registration Surety Co., San Francisco, registrar. Annual meeting in August. Listed on San Francisco Exchange.

Property: 5 claims, Ivanpah, Elaine, Pyramid Fraction, Crosscut and Crosscut Extension, 46 acres in Tonopah, said to show gold and silver ore.

Development: by shaft, 1,250' deep; lateral workings total about 5,000'.

Soon after reorganization the company struck a shoot which yielded some hundred of tons of shipping ore in 1913 and 1914, but the shoot proved of limited extent and shipments declined. Development is hampered by lack of funds.

In 1920, rich ore was found between the 950' and 1,050' levels, and development on these and on 700' level was continued throughout 1921. Reported that shipments for 1920 averaged 3 cars per month of \$30 ore, increased to 5 cars per month of the same grade in 1921.

TONOPAH ORIENTAL MINING CO.**NEVADA****Address:** Tonopah, Nev.

Property: in the Tonopah district, Nye county close to the Esmeralda county line. Includes the New York claim, developed by a 900' shaft, title of which has been in dispute.

TONOPAH-RAND MINING CORP.**NEVADA****Address:** Box 988, Tonopah, Nev.

Officers and Directors: M. T. Severson, pres.-mgr.; A. M. Hardy, sec.; B. B. Brown, treas.

Inc. June 26, 1919, in Nevada. **Cap.** \$250,000; par 5¢; 2,465,000 treasury shares. Annual meeting, last Monday in June.

Property: 21 claims, 400 acres, in the Tonopah district, Nye county, 3 miles N. of Tonopah. Reported to show 8 N. and S. veins in a limestone-shale formation, with value in gold and silver. Development thus far nominal.

TONOPAH 76 CONSOLIDATED MINING CO.**NEVADA****Address:** L. S. Reese, Box 374, Reno, Nev.

Officers: Mark R. Averill, pres.; W. J. Harris, v. p.; L. S. Reese, sec.-treas., with H. E. Reid and H. H. Atkinson, directors.

Inc. 1911, in Nevada. **Cap.** \$1,800,000, increased from \$1,500,000. April 11, 1921; \$1 par; 300,000 treasury shares. Annual meeting, 2nd Monday in January. Listed on San Francisco Stock Exchange.

Property: 6 patented claims and fractions, about 60 acres, in Esmeralda county, ½ mile W. of Tonopah.

Development: by vertical shaft 300' deep. The West End Cons. is now exploring 76 ground through the 800' level of the West End workings; such work being paid for with 76 stock at 10¢ per share; the cost has varied between \$11 and \$15 per foot.

TONOPAH VICTOR MINING CO.**NEVADA**

Out of business. Property acquired by **Tonopah Extension Mining Co.**, Tonopah, Nev., which see.

TONOPAH WESTERN CONS. MINING CO.**NEVADA****Address:** 85 Devonshire St., Boston, Mass.

Officers: Robt. H. Gross, pres.; F. W. Paine, v. p.; W. S. Rooney, sec.-treas., with B. W. Turner, Oscar Rohn, Wm. P. Everts, and Frank Price, directors.

Inc. in 1916.

Property: 500 acres, between the holdings of the Tonopah Bonanza Mining Co. on the north and the Great Western Cons. Mng. Co. on the south.

TOO CLOSE MINING CO.**NEVADA****Address:** P. O. Box 315 Winnemucca, Nev.

Officers: A. L. Waggoner, pres.-engr.; J. D. Varger, v. p.; J. E. Ward, sec.; First National Bank, Winnemucca, treas.

Inc. April 26, 1919, in Nevada. **Cap.** \$100,000; 10¢ par; 400,000 shares in treasury. Annual meeting, second Tuesday in July.

Property: 10 claims, 200 acres, 2 miles N. of Winnemucca, Humboldt county. Ore occurs in veins and lodes in diorite and granite formation. Narrow veins in quartzite and limonite said to assay better than \$50 per ton in silver, gold and lead, with a trace of copper.

Development: by tunnels with 600' of workings. Several small shipments made. Work continues intermittently, the last reported Dec., 1920.

TORPEDO DIVIDE MINING CO.**NEVADA****Office:** 205 Nixon Bldg., Reno, Nev.**Officers:** Wm. Watters, pres.; J. L. McCarthy, v. p.; J. F. Kunz, sec.-treas., with Roger Dougherty and Richard Finn, directors. A. I. McGill, directors**Cap.** \$1,000,000.**Property:** 125 acres in the White Pine district, White Pine county, 3 miles S. W. of Hamilton. Silver-lead ores occur as replacement in limestone within an E. W. mineralized zone, said to be 3,000' wide. There is a 250' shaft.**TRILBY DIVIDE MINING CO.****NEVADA**See **New Trilby Divide Mng. Co.** Original company sold by sheriff, and new company organized to acquire holdings, March, 1921.**TRINITY DIVIDE MINING CO.****NEVADA**

Mail returned from Tonopah address.

Officers: F. E. Baker, pres.; H. E. Loufek, v. p.; V. M. Place, sec.-treas.; with J. G. Huntington and H. H. Hunter, Jr., directors.**Inc.** May, 1919, in Nevada. **Cap.** \$150,000; shares, 10c par.**Property:** 3 claims, one of the outsiders, 4 miles S. E. of Gold Mountain and 1½ miles S. of the Goldsmith Divide.**TUNGSTEN COMET MINING CO.****NEVADA****Address:** Panaca, Nev. E. D. Smiley, pres.**Property:** in Lincoln county, shows a vein up to 9' wide, said to carry tungsten, lead, silver and gold. Developed by 500' shaft; equipped with hoist and compressor, etc.**TUSCARORA-NEVADA MINES CO.****NEVADA**Bankrupt. **Address:** J. E. Harrington, chairman of Reorg. Committee, 1465 Broadway, New York. Henry Stanley Haskin, receiver; \$150,000 receiver's certificates authorized; 95,000 issued; \$600,000 claim against company allowed by Court.**Property:** leased August 18, 1915, for ten years to Jas. E. Harrington of

the Stewart Mining Co. of Idaho, and part of property transferred to Stewart Tuscarora Mng. Co. (formerly Holden M. & M. Co.) in 1917.

The mortgage held by the Dexter Tuscarora Cons. G. M. Co. on the Dexter group of this company has been foreclosed and the property purchased by the mortgage holders for account of the reorganization committee. This includes 17 claims and the Jack Creek power plant, all under bond and lease for \$175,000. Ore in sight and old stope filling were estimated to total 400,000 tons assaying \$14 per ton, largely in silver. A concentrator erected in 1919 to treat this ore was burned in November, 9 days after completion.

UMATILLA-TONOPAH MINING CO. NEVADA

Office: 265 Russ Bldg., San Francisco, Calif. **Mine office:** Tonopah.

Officers: Herman Zadig, pres.; A. S. Wollberg, v. p.; C. D. Olney, sec., with R. L. Colburn and S. D. Landecker, directors. A. S. Haskell, supt.

Inc. in Nevada. **Cap.** \$1,500,000; \$1 par; assessable. Assessment No. 12, of ½¢, levied Sept. 17, 1920. Company office, transfer office. Registration Surety Co., San Francisco, registrar.

Property: 8 claims, 80 acres, in Tonopah district, Nye county, developed by 1,200' shaft. Greater part of mineral holdings deeded to After-All Mines Co., in 1916.

Inactive, 1919-'20.

UNEVIDA GOLD MINING CO. NEVADA

Described under Utah mines.

UNION AMALGAMATED MINING CO. NEVADA

Fully described in Vol. XIII. Reorganized December, 1917, as **Manhattan Union Amalgamated Mines Syndicate**, which see.

UNION CONSOLIDATED MINING CO. NEVADA

Offices: 261 Mills Bldg., San Francisco, Cal., and Virginia City, Nev.

Officers: R. L. Rader, pres.; J. R. Pereira, Jr., v. p.; Geo. P. Thurston, sec., with Fred. Vincent and A. P. Swain, directors.

Inc. Nov., 1904, in California. **Cap.** \$200,000; shares \$1 par; all outstanding; assessable. Last assessment, the 45th, of 10 cents, called October 31, 1919.

Transfer office: 381 Bush St., San Francisco, Cal. Registration Surety Co., San Francisco, registrar. Annual meeting, third Thursday in November. Listed on San Francisco Exchange. Removed from New York Curb listing Jan. 13, 1921.

Gross earnings for 1916 were \$378,818, less \$164,727 for operating charges.

Property: 600' along the Comstock lode at Virginia City, north of the Mexican mine and south of the Sierra Nevada mine.

Development: on the 2,700' and 2,900' levels was abandoned, following a change in management. The ore in sight on the 2,600' level was extracted and the water allowed to rise to 2,100'. Exploration is being conducted on the 1,630' level; a crosscut, 610' Nov. 1, 1921, is being driven to reach the lode.

Production: during recent years about \$1,000,000, the ore averaging \$30 per ton. Was producing 1918-'19, but apparently not in 1920-'21. Total production approximately \$4,000,000.

UNION COPPER CO. NEVADA

Yerington, Nev. Title changed to Standard Copper Co., in 1912.

UNION DIVIDE MINING CO. NEVADA

Office: Tonopah, Nev. F. K. Pittman, res. agt.

Officers: J. B. Hutchinson, pres.; A. S. Haskell, v. p.; J. T. Wall, sec-treas.; above with Frank K. Pittman and Peter Halloran, directors.

Inc. April, 1919, in Nevada. **Cap.** \$150,000; 10c. par; assessable, 750,000 in treasury.

Owens 4 claims adjoining the Signal and north of the Sutherland.

UNION MINES CO. NEVADA

Mail returned from Union, Nev.

Officers: W. P. Fairman, pres.; E. T. Comfort, sec.; L. R. Thatcher, mgr. A. close corporation and prefers not to have us publish information.

Operates a silver-lead mine, 35 miles S. of Palisade, Eureka county, Nev.

UNIONVILLE MINING CO.

NEVADA

Address: J. A. Spiker, pres.-mgr., Unionville, Nev. Stock is closely held. Property cost \$53,000, fully paid.

Property: at Unionville, Pershing county, said to show 5 fissure veins in rhyolite. During 1920, one 2' vein was attacked by 3 tunnels opening vein for 500' with a 200' back; a small high grade shoot of \$35 ore was exposed. The ore is treated in a 5-stamp mill and concentrator, in part salvaged from Seven Troughs. A cyanide mill is in contemplation. Producing in a small way, since 1919.

UNITED COMSTOCK MINES CO., THE

NEVADA

A subsidiary of Metals Exploration Co., Calif.

Office: 582 Market St., San Francisco. **Mine office:** Gold Hill, Nev.

Officers: Blkeley Wells, pres.; H. G. Humphrey and Roy H. Elliott, v. ps.; with R. A. Hardy, (mgr.) and Rufus Thayer, directors. A. D. Snodgrass, sec.-treas.; W. L. Reid, met.

Inc. 1920, in Nevada. **Cap.** \$7,000,000, increased from \$5,000,000 about Jan. 1, 1922; par \$1. Annual meeting 2nd Wed. in May. Company is a merger of the Jacket-Crown-Point-Belcher Mines Co., the Kentuck Mng. Co. of Nevada, and other Comstock lode companies which have been inactive in recent years. Details of the merger have not been as yet announced.

Property: embraces 13 early-day mines, viz., the Alpha, Challenge & Confidence, Globe, Imperial, Jacket-Crown Point-Belcher (Yellow Jacket, Crown Point and Belcher), Kentuck, Knickerbocker, Overman, Segregated Belcher and Trojan groups, in the Gold Hill section of Comstock district, Storey county. Ground covers 5,000' along the Comstock lode from the Globe on the S. W. to the Alpha-Exchequer boundary line. Company owns also a mill-site in American Flat and 100 acres of placer ground. The Jacket-Crown Point group comprises the bonanza mines that made the fortunes of Flood, Mackay, Lucky Baldwin and D. O. Mills, it is said that production from 3,200' of the Lode has been over \$118,000,000.

The Comstock Lode, described in Monograph 3, U. S. Geological Survey, is a great fissure vein, 4 miles long, filling a fault plane in the andesite-diorite rocks of Mt. Davidson, near Virginia City. The ore is quartz, carrying silver and gold, the former largely predominating, and occurs in shoots up to several million tons in extent. In the Crown Point, the bonanza ore shoot was 360' long and 90' wide in the Imperial, vein widths of 65' to 270' are found and in the Overman a 76' width is reported. Much of ore today is of milling grade only.

Development: in early days, very extensive to a maximum depth of 2,900'. Present company will make use of 4 old shafts, Belcher, Yellow Jacket, Knickerbocker and Imperial, the latter having been sunk recently to 650'; principal development, however, to be by new 8' x 8' adit tunnel, 9,585' long, with portal in American Flat, which, entering lode at Knickerbocker shaft, will connect with other shafts, giving maximum back of 650'. Begun in Oct., 1920, and, driven from 7 headings, it was 85% complete by Nov. 1, 1921, including the 3,025' from portal to the Knickerbocker shaft.

Ore reserves are estimated to be 4,000,000 tons of \$6 ore. 1/3 gold, largely in the Imperial group above the 400' level. Old dumps and stope-filling are expected to yield ore of milling grade.

Equipment: includes electric hoists, etc. A 2,500-ton mill, employing all sliming cyanidation process, and to cost \$1,500,000, will be completed about mid-1922; it is believed that an average extraction of 94% will be possible. Tunnel driving is aided by mechanical shovels and haulage is by electric motors. A 2-mile connection has been made with the Virginia and Truckee R. R. It is estimated that working costs can be kept down to \$3 per ton.

UNITED COMSTOCK PUMPING ASSOCIATION NEVADA

Operates electrically-driven pumps to drain the lower levels of the North-end mines on the Comstock Lode at Virginia City, owned and operated by the Sierra Nevada Mining Cons. Virginia Mining, Mexican Gold & Silver Mining, and Union Cons. Mining companies.

The lower levels were completely re-opened to the 2,900' level in September, 1917, after being filled with water for 33 years. Expenses incurred are apportioned among the mines.

The system comprises 3 Riedler pumps on the 2,000', 3 centrifugals on the 2,310', 3 vertical centrifugals on the 2,500', and 2 vertical centrifugals on the 2,700 and 2,900' levels.

UNITED LODI MINES CO. NEVADA

Perhaps dead. In 1919, had a lease on holdings of Lodi Mines Co. and made a small production.

UNITED METALS CO. NEVADA

Office: 417 Clay Peters Bldg., Reno, Nev.

Officers: A. N. Salisbury, pres.; M. Woolever, v. p.; E. E. Granger, sec-treas.-mgr., with E. F. Lunsford and W. F. Gates, directors.

Cap. \$150,000; 10¢ par; 630,000 treasury shares. Transfers made at company's office. Annual meeting, April 23.

Property: 60 acres of lode claims, including the old Emma mine, and 160 acres, agricultural land in the Peavine district, Washoe county, 5 miles N. of Reno, and midway between the Black Panther and Standard Metals holdings. The ground is said to show 3 principal veins, 4 to 10' wide, in quartz monzonite with value in gold and silver. The Emma was worked 40 years ago through a 300' shaft. Developed by 2 other shafts, 70 and 80'.

Is a prospect and company seeking financial assistance.

UNITED MINING CO. NEVADA

Probably dead. Letters returned from former mine office: Carson City, Nev.

Officers: H. D. Cowden, pres. and gen. mgr., Bloomington, Ill.; R. H. Hingston, treas. and gen. supt.; F. W. Boston, sec.; L. B. Perry, asst. sec.

Inc. 1905, in Nevada. Cap. \$3,000,000; shares \$1 par; 500,000 preferred and 2,500,000 common; issue \$1,876,150.

Property: 34 claims, 680 acres, in the Delaware district, 12 miles from Carson City, Washoe county.

Reported in 1915 that the Nevada mine was abandoned and stockholders given shares in the Boston American Mining Co., Wash., an equally unpromising and doubtful proposition. It is evident from the literature sent out by these companies that the management preferred to mine the public instead of its mines.

Management reported, January, 1916 "property is not working now, as we are looking for some process that will enable us to handle our ores and have our own plant."

U. S. SMELTING REFINING & MINING CO. NEVADA

See under United States section for general statement. Company holds stock control of the **Richmond-Eureka Mng. Co.**

UNITED STATE TUNGSTEN CORPORATION NEVADA

Dead. See Vols. XII and XIV.

UNIVERSAL SILVER CO. NEVADA

Address: Edw. S. Van Dyck, pres., Unionville, Nev.

Cap. 10,000,000 shares; 5,025,874 outstanding; assessable. Two assessments of 1¢ each have been levied; No. 2 for the purpose of taking up Arizona Silvers \$200,000 bond issue.

In first 18 months of company's existence, total receipts were \$50,000. Expenses were: organization, \$10,000; operating, \$20,000; investment in Sierra district, \$6,000; in Arizona Silver, \$15,000. All in "round numbers".

This company is the "final silver" promotion of Chas. E. Van Riper,

the brokerage house responsible for Arizona Silver Reef, Consolidated Silvers, etc. Exact information is all but unobtainable, as the promoters of all these companies are apparently disinclined to give any real information.

Property: the Inskip group of 6 claims in the Unionville district, Pershing county, east of the Arizona Extension claims. The tract is said to show 4 to 8' of milling ore opened on the 70' level. A company report states there is "a considerable quantity of ore ready for extraction and treatment", at the Arizona Silver mill. A tunnel to give back of 200' is being driven. Also claims in the Sierra district, 20 miles from Unionville, which will eventually it is said, be operated by its subsidiary, the Sierra Silver Mines Corporation, which see. Company also said to own controlling interest in Silver Reef, Arizona Extension, Cons. Silver and a stock interest in Arizona Silver and Arizona Annex. See our opinion under **Arizona Silver Mines Co.**

UPPER COMSTOCK MINING CO.

NEVADA

Address: Box 698, Reno, Nev.

Officers: Chas. E. Knox, pres.; J. B. Humphrey, v. p.; A. E. Kane, sec-treas.; with J. W. Danut and F. M. Kleppe, directors. Alex Wise, mgr., Virginia City, Nev.

Inc. May 17, 1920, in Nevada. **Cap.** \$150,000; par 10¢; 500,000 treasury shares. Transfer made at company's office. Annual meeting 4th Tuesday in May.

Property: by deed from the Bullion Gold & Silver Mng. Co. (q. v.), comprises that part of Bullion ground which lies above the Sutro tunnel, in the Comstock district, Storey county, between the Potosi and Exchequer; deed covers ground above the Sutro tunnel only. Property idle for several years past and present company does not contemplate immediate operation.

UTAH-YERINGTON MINING CO.

NEVADA

Reorganized as the **Mason-Yerington Mines**, which see.

UVADA COPPER CO.

NEVADA AND UTAH

Address: W. F. Snyder, Pioche, Lincoln county, Nev.

Inc. 1915 (by F. C. Richmond, pres., Richmond Machinery Co., 117 W. Second St., Salt Lake City, Utah.) to take over property of the Cons. California-Nevada Co., succeeding Day Bristol Cons. Mines Co. **Cap.** \$600,000; \$1 par. Initial dividend of 1c a share paid September, 1916, equal to \$6,000.

Company apparently operated for about one year; then in 1918-'19 property was under lease to Black Metals Mines Co. until the larger part was purchased 1920-'21 by the **Bristol Silver Mines Co.** (q. v.). See Vol. XIV for complete description of Uvada.

UVADA TUNGSTEN CO.

NEVADA

Organized 1916, by A. V. Taylor, Dooly Block, Salt Lake City, to take over the Pilot Knob group near Osceola, White Pine county, said to show quartz veins in limestone, overlying quartzite, underlain by granite, but owing to low price of tungsten the property was allowed to revert to original owners in 1917.

VERDI DIVIDE MINING CO.

NEVADA

Office: Tonopah, Nev. and Reno, Nev. Paul Revert, agt.

Officers and directors: A. Revert, pres.; B. L. Revert, v. p.; and P. Revert, sec-treas.

Inc. March 21, 1919, in Nevada. **Cap.** \$15,000; 1c. par. Listed on San Francisco Stock Exchange.

Property: 6 claims, adjoining Tonopah Divide on its west end. This tract was located 18 years ago, and a 240' shaft sunk.

Development: a new shaft was put down to 300' in 1919, and an electric hoist and compressor installed. Careful sampling of 100 tons of ore on the dump show it to average \$25 per ton, indicating that the old shaft and workings are worth reopening.

VERNAL DIVIDE MINING CO.

NEVADA

Property: near Verdi Divide, west of Tonopah Divide.

VERNAL MINING CO. OF GOLDFIELD NEVADA
Main and transfer office: 351 Bullitt Bldg., Philadelphia, Pa. **Mine office:** Goldfield, Nev.

Officers: Meyer Schamberg, pres.; N. S. Keith, sec.-treas.
Inc. 1904, in Arizona. **Cap.** \$1,500,000; \$1 par; increased, 1915 from \$1,000,000.

Property: 2 claims, in Diamondfield district, Goldfield, adjoins Goldfield Bull Dog Mng. Co. and is controlled by same interests. Developed for a few hundred feet, partly by lessees. Has shipped in a small way.

VETA GRANDE MINING CO. NEVADA
Address: E. J. Roberts, pres.-mgr., 747 Mills Bldg., San Francisco, Calif. Mine near Carter Station, Douglas Co., Nev. San Francisco men are said to be in control of company.

Property: 9 claims, in the Gardnerville district, Douglas county, 14 miles S. E. of Minden, covers 4,500' on the strike of a quartz fissure vein, 20 to 40' wide, in andesite. The ore carries silver, with a value of \$20 per ton and up.

Development: by old workings to depth of 250', including a tunnel said to be 1,400' long. Present management began July 1, 1921 to restore these former openings.

VICTORIA COPPER MINES CO. NEVADA
Mail returned from Goldfield address.

Property: the Victoria mine, an old copper producer.

VICTORIA NEVADA MINING CO. NEVADA
Address: Pioche, Nev.

Officers: Edw. P. Donohue, pres.; Chas. Stindt, v. p.-mgr.; R. H. Nix, sec.; M. L. Lee, treas.

Inc. 1919, in Nevada. **Cap.** \$300,000; \$1 par.

Property: 4 claims, adjoining Amalgamated Pioche at Pioche, Lincoln county.

VICTORY DIVIDE MINING CO. NEVADA
Reorganized, summer of 1921, on an assessable basis. See Vol. XIV and

Reorg. Victory Divide Mng. Co.

VICTORY GOLD MINES CO. NEVADA
Address: H. W. Robinson, Lovelocks, Pershing county, Nev.

Officers: W. H. Schewan, pres.; H. W. Robinson, v. p.; W. C. Van Huit, sec.; R. J. Pierson, treas. and B. B. Goodman, directors.

Property: a group of claims in the Loring district, Pershing county.

VINDICATOR DIVIDE MINING CO. NEVADA
Office: 155 Main St., Tonopah, Nev. F. T. Dunn, agt.

Officers: A. J. Rigali, pres.; D. W. Ryan, v. p.; P. E. Brown, sec.-treas., with W. H. Hart (supt.) and E. J. Robertson, directors.

Inc. in Nevada. **Cap.** \$150,000; shares, 10c. par.

Property: 5 claims, 60 acres west of the Hasbrouck groups and 1¼ miles west of Tonopah Divide. Also owns 4 claims in Lone Mountain district.

VIRGINIA LOUISE MINING CO. NEVADA
Address: 1203 Hibernian Bldg., Los Angeles, Calif., or Pioche, Nev.

Officers: Chas. Lee Horsey, pres.; J. D. Thompson, v. p.; C. A. Thompson, sec.-treas.; L. G. Gillett, supt.

Inc. 1912. **Cap.** \$1,500,000, increased, Dec. 20, 1921, from \$1,000,000; par \$1; 1,112,000 shares issued. Shareholders were permitted to subscribe to 100,000 shares of the increase at 25¢. Bond issue, \$60,000—6's, June 7, 1920, may be retired summer of 1921. Transfer office at Los Angeles. Listed on Los Angeles Stock Exchange.

Property: 1 patented claim, adjoining Prince Cons. M. & S. Co., in Ely mining district, 4 miles S. W. of Pioche, Lincoln county. Two claims adjoining on W. were acquired in 1920.

Ore occurs as a blanket deposit. Five veins have been opened varying from 5 to 80' in thickness, and said to carry low-grade silver-lead ore with a

high excess of iron and manganese, making a desirable smelter flux. Litigation with the Prince Cons. during 1917-18 terminated in favor of the Virginia Louise, the latter obtaining a judgment of \$27,334 for trespass. A compromise was effected whereby the Prince Cons. dismissed the apex suit filed against the Virginia Louise and granted the right to ship ore over its private railroad at the rate of 50c. per ton in return for the dismissal of the trespass judgment.

Development: by 600' shaft and 7,900' of drifts and raises. Ore blocked out is estimated as equal to 3 years' supply at 100 tons per day, and an equal quantity probable ore.

During 1918 the property was entirely re-equipped, development work resumed and shipments commenced in September to the Midvale smelter in Utah at the rate of 50 tons daily. Total tonnage shipped was 5,447 dry tons. In October, 1919, daily shipments were 100 tons.

During 1920, extensions were made on 1st, 2nd and 5th levels, and total ore shipments were 37,887 tons. Reported that shipments will continue at 125 tons per day, of which 50 tons will be fluxing ore. Equipment for larger tonnage is contemplated. Reserves estimated at 1,318,750 tons possible ore, not including that on the 833' level, or the zinc ore found by diamond drilling.

VULCAN MINING, SMELTING & REFINING CO. NEVADA

Office: 708 First Nat'l Bank Bldg., Denver, Colo.

Officers: H. Ornauer, pres.; E. E. Whitted, v. p.; A. E. Brooks, sec.; O. L. Dines, treas., with H. C. James, Tyson S. Dines and I. M. Herbert, directors.

Inc. in Wyoming. Cap. \$2,500,000; \$1 par; 2,000,000 outstanding.

Property: Hunter mine, 16 patented claims, 132 acres, in the Hunter district, White Pine county, about 30 miles from Ely, the nearest rail point, shows copper, silver and lead ores occurring in fissure veins in monzonite and limestone. Developed by 300' and 500' shafts, and tunnel, with a total of 2,000' underground workings.

Equipment: includes hoist, compressor and steam power. Mine is operated by lessees who made a small production in 1915 to 1918, and in 1920. Company has been inactive since 1912.

V 7 MINING CO.

NEVADA

Address: W. E. Casson, sec., Carson City, Nev. G. L. Hedges, mgr.

Property: 5 claims in the Reservation district near Schurz, Mineral county. A 3' vein, a contact between lime and granite, carrying silver-lead ore, has been opened to a depth of 100'. Late in 1921, company was reported to have effected a consolidation with **Review Silver Mng. Co.**

VULTURE-WONDER MINES CO.

NEVADA

Title changed to **Nevada Silver Consolidated Co.**, which see.

WALKER RIVER COPPER CO.

NEVADA

Offices: 402 Madison Ave., New York, and Yerington, Nev.

Officers: R. M. Atwater, Jr., pres.; W. M. Sanders, v. p.; with J. H. Susmann, C. N. Edge, H. B. Lake, J. A. Martin and W. J. Hand, directors. C. E. Brady, sec.; C. S. Dodge, treas.; J. E. Gelder, mgr.

Inc. June, 1915, in Nevada. **Cap.** \$12,500,000; \$5 par; outstanding 675,000 shares. Transfer office: Company office; registrar, Registrar & Transfer Co., New York. Annual meeting, 2nd Monday in April.

Property: 15 claims, 250 acres, including millsite, near Yerington, Lyon county, being developed in conjunction with the Empire Nevada mine of the Empire Nevada C. M. & S. Co., held under a perpetual lease. Title will pass to the Walker River Co. when royalties paid amount to \$500,000. Claims show a low-grade copper deposit said to cover an area 1,000 by 4,800' so far as drilled.

Ore is said to assay 3% Cu.; 0.5% S.; 72% SiO₂; 5% Fe₂O₃; 11% Al₂O₃; 2% CaO; 1% MgO.

Development: by 350' vertical shaft. During 1918, \$36,000 was expended in

dian:and-drilling on the Empire Nevada, said to have proved the orebody to extend to 500' depth. Present work is by quarrying.

Ore reserves: management claims 550,000 tons of 2% ore proven by drilling and surface and underground work.

Equipment: includes 25-ton leaching plant, built to use the Midland ferric chloride process, but changed 1920 to leaching with precipitation on scrap iron, and increased the capacity to 50 tons. Plans call for a 2,500-ton plant, after experimental work is completed.

Production: total output to date 32,861 tons representing a gross value of \$615,550. Shipments during 1918 averaged 4.16% copper.

Drilling and metallurgical experiments were continued to mid-1920; presumably inactive since. Examined by Louis A. Wright and John H. Banks.

WALL STREET COPPER CO.

NEVADA

Address: A. H. Howe, Reno, Nev.

Inc. 1916 in Nevada. **Cap.** 100,000 shares divided equally between C. R. Evans and A. H. Howe.

Property: 14 claims (2 patented) in the Santa Fe district, Mineral county, 7 miles E. of Luning, includes the old Wall Street and Turk mines. Record of property dates back nearly 40 years, and lessees are known to have shipped ore averaging 17.5% copper and 7.5 oz. silver. Operations of present company began March, 1916. Copper carbonate ore occurs in a brecciated zone in silicious limestone near its contact with quartz monzonite; the ledge with 8' average width is said to outcrop for 3,000'. The shipping ore, 50% of the total, ranges between 8 and 10% copper.

Development: by 2 shafts, 428' and 200', and tunnels; lateral workings total 11,000'. Reported to have 70,000 tons of ore carrying 3% copper and 1 oz. of silver per ton in dump and stope-filling, with 60,000 tons possible ore of same grade in place. Between March, 1916, and December, 1918, gross production was \$1,243,000; operations ceased because of unfavorable copper market.

Equipment: includes 2 hoists, etc.; drilling was by hand.

WARD LEASING CO.

NEVADA

Successor to Nevada United Mines Leasing Co.

Address: Julius Goldsmith, Tonopah, Nev. S. B. Elbert, mgr. Operating under lease the property of the Nevada Mines Co., which see, for details of lessees' activities.

WARMACK GOLD MINING CO.

NEVADA

Mail returned from Chicago address.

Officers: J. T. Cawthorn, pres.; Harry Warren, v. p.; Winnemucca, Nev.; S. C. McIntyre, sec.; also directors. G. R. Stevens, supt., Golconda, Nevada.

Inc. March 31, 1916, in Arizona. **Cap.** \$200,000; shares \$1 par; non-assessable; all issued. Annual meeting, April 15.

Property: 945 acres of placer ground, 12 miles S. of Golconda, Humboldt county. Examined in May, 1912, by J. A. St. Clair, editor of "Inside Investments." Gravel available estimated at 22,000,000 cu. yd., with a probable gold value of 61 cts. per yard. Gold in the disintegrated quartz formation said to be triangular."

If even one quarter of the above value actually occurs it is good ground, and it is hoped the owners will find it true.

WARRIOR GOLD MINING CO.

NEVADA

Address: Olympia Mines Co., Omco, Nev.

Company is understood to have been organized by R. J. Bonnemort on behalf of the Olympic Mines Co. (q. v.), which is reported to have exercised its option on property in July, 1921.

Property: the MacNamara group in the Goldyke district, Nye county, 32 miles N. E. of Luning. Ore is gold-bearing and is said to average \$30 per ton.

WASHINGTON GOLD QUARTZ MINING CO. NEVADA

A reorganization of the Randolph Mining Co.

Office: 26 Liberty St., New York City.

Officers: Jas. W. McCoy, pres.; G. G. Wolf, v. p.-treas.; with Frank Lindley, Frank W. Donaldson, A. S. Terrill, Geo. N. Neise, directors. W. H. Tice, sec.; J. K. Turner, mgr.

Inc. October 30, 1917, in Nevada. Cap. \$1,000,000; \$1 par; 713,400 issued. Listed on New York Curb. U. S. Corporation Co., registrar and transfer agent.

Property: 9 claims in Gold Mountain district (not the Gold Mountain of Divide district), 9 miles from Bonnie Clair, Esmeralda county. Ore: lead sulphide and carbonate occurs in veins 5-15' wide said to carry gold and silver. There are 3 veins crossing the ground, most of the work being done on the Butte Goldfield.

Development: workings of old company total 2,200' and production was considerable. New York comprises a 400' shaft and 725' tunnel; a second tunnel was driven during 1920, and new equipment installed.

WASHINGTON MONTEZUMA MNG. CO. (THE) NEVADA

Office: Postal Telegraph Bldg., Chicago. Mine office: Goldfield, Nev.

Officers: R. H. Kiehm, pres.; John J. Sullivan, v. p.; Gustave Schulz, treas., with Jos. C. Mullin and A. F. Kane, directors. John M. Zamecnik, sec., 4625 N. Knox Ave., Chicago.

Inc. in Arizona. Cap. \$1,500,000; \$1 par; 1,500 treasury shares. Transfers made at company's office. Annual meeting, March 21.

Property: 2 patented claims, 40 acres, in Montezuma district, Esmeralda county, 8 miles N. W. of Goldfield. Gold ore occurs in a 45' quartz vein in a limestone formation. A 200' shaft has shown values from \$11 to \$22 for widths of 4' to 10'; equipped with hoist, etc.

WASHOE COPPER CO. NEVADA.

Presumably idle.

Officers: Wm. H. Butler, pres., 27 Pine St., New York; Percival S. Jones, v. p.; S. A. Cunningham, sec.-treas., with B. J. Dwyer, Robt. W. Schuette, P. P. Brady and Geo. J. Gould, Jr., directors.

Inc. September 28, 1917, in Delaware. Cap. \$3,000,000; \$1 par; 1,108,335 shares outstanding. Listed as a prospect, but stricken from New York Curb, May 6, 1920, at company's request. Registrar & Transfer Co., New York, registrar and transfer agent.

Property: about 695 acres at Copperfield, Washoe county, near the holdings of the Nixon-Nevada and controlled by same interests.

A syndicate was formed in April, 1918, to underwrite a block of stock, sufficient to finance running a 1,000' tunnel and equipping the mine, which plans apparently did not materialize.

WATERVILLE MINING & MILLING CO. NEVADA

Office: Nelson, Clark Co., Nev.

Officers: Dr. Roy W. Martin, pres.; F. A. Wait, v. p., with M. E. Fisher, Jas. German and Harry Dale, directors.

Property: in Eldorado canyon, near Nelson. A small mill installed 1919.

WEDEKIND SILVER MINING CO. NEVADA

Successor to Reno Silver Hills Mng. Co.

Address: C. H. Dennison, mgr., Reno, Nev.

Property: the old Wedekind silver-lead mine, in Peavine district, Washoe county, 4 miles N. E. of Reno. Ore is found in shoots and chambers in mineralized zones in altered andesite; lead carbonates and sulphides carry silver and gold; silver also present as chloride. Old workings reach depth of over 200'. Property said to have produced \$500,000 prior to 1896. Equipped with small mill, etc.

Reported, October 1921, that work was being pushed on the 100' level in a vein 3 to 6' wide.

WEDGE COPPER CO.**NEVADA**

Address: Luning, Nev. H. H. Hunter, managing director, Lovelocks, Nev. Mark Walser and H. O. Howard, directors. Knud Freitag, cons. engr.

Inc. March, 1916, in Nevada. **Cap.** \$1,000,000; \$1 par.

Property: 6 claims, 8 miles from Luning, Mineral county, developed by crosscut tunnel cutting copper ore at 800' depth. Said to show 2' of 2% ore in a 6' vein.

Company reported consolidated with adjoining properties and flotation plant erected in 1918, but no confirmation available.

WELL-EMMA MINES CORP.**NEVADA**

Address: H. P. Kervin, Silver City, Nev., or M. A. Diskin, Reno, Nev. **Officers:** Wm. Woodburn, pres.; C. P. Stout, v. p.; M. A. Diskin, sec-treas.; H. P. Kervin, cons. engr.

Property: in the Silver City district, Lyon county, adjoining the Buck-eye mine, reputed to have a production record of \$1,000,000; is said to cover extension of the Brunswick-Occidental lode

Development: by 200' shaft, with 3 levels working. Reported to have produced \$21,500 worth of ore from 100' level, up to March, 1921.

WEST ARROWHEAD MINES CO.**NEVADA**

Address: R. L. Sloan, sec., Main St., Tonopah, Nev., or Arrowhead, Nevada.

Property: in the Needles district, Nye county, 60 miles E. of Tonopah. Developed by 100' shaft; equipped with 25 h. p. hoist.

WEST DIVIDE EXTENSION MINING CO.**NEVADA**

Office: Tonopah, Nev.

Officers: J. F. Good, pres.; R. C. McCarthy, v. p.; J. W. Dunfee, v. p.; W. A. Wright, sec.-treas., and H. C. Kane, directors.

Property: 2 claims adjoining those of the West Divide Mining Co.

WEST DIVIDE MINING CO.**NEVADA**

Office: Tonopah, Nev., care of Allan Rives.

Officers: L. L. Patrick, pres. and mgr.; H. B. Ruhl, v. p.; with K. M. Patrick and Al. McCoy, directors. Edw. Bevis, mgr.

Inc. May, 1919, in Nevada. **Cap.** \$150,000; 10c par. Listed on San Francisco Stock Exchange.

Property: 5 claims, in the West Divide district, 5 miles W. of Tonopah Divide on west slope of Lone mountain. The main vein trends N. E.-S. W., and dips E. It has been opened by trenching for a length of 2,000' and shows a width of 2 to 7'. An east vein also opened by a surface trench, shows ore running 98.8 oz. silver per ton.

Development: by 60' shaft, and 150' tunnel (145' level) driven some years ago. During 1920, the tunnel was continued to undercut ore found in shaft; some was uncovered and will be followed by a winze.

Equipment: includes a complete plant for sinking.

WEST END CONSOLIDATED MINING CO.**NEVADA**

Office: Syndicate Bldg., Oakland, Calif. **Mine office:** Tonopah, Nev.

Officers: F. M. (Borax) Smith, pres.-treas.; J. F. Carlston, v. p.; G. C. Ellis, sec., with L. W. Bennett, R. P. Jennings, C. P. Murdock and R. L. Oliver, directors. J. W. Sherwin, gen. mgr.; H. D. Budelman, mine supt.; C. E. Waldner, mine engr.; F. C. Ninnis, mill supt.; J. R. Blair, auditor.

Inc. May 2, 1906, in Arizona. **Cap.** \$10,000,000; \$5 par; 1,788,486 shares outstanding. Listed on San Francisco Exchange and New York Curb. Registrar & Transfer Co., New York, transfer agent and registrar. Annual meeting, in May.

Financial Statement.

Year	Cash on hand	Revenue	Disbursements	Dividends	Balance
1920.....	\$17,839	\$1,686,075	\$1,471,263	\$216,819	\$15,772
1919.....	253,907	1,310,248	1,383,777	162,539	17,839
1918.....	47,656	2,030,897*	1,466,949	357,697	253,907
1917.....	130,772	1,204,442	1,198,134	89,424	47,656

* The apparent revenue is swollen by inclusion of bullion coming from custom ore treated in mill as well as the sums received in settlement of the dispute with the Jim Butler company.

Net operating profit (estimated) for 1921 was \$650,000 compared with \$572,054 in 1920.

Assets and Liabilities.

Year	Cash & Bullion	Property	Invest.	Other Assets	Total Assets	Surplus
1919..	220,839	6,104,276	1,157,941	267,132	7,750,188	957,030
1920*	\$248,811	\$6,104,276	\$ 573,123	\$288,449	\$7,214,689	\$ 443,095
1918..	530,743	690,330	390,363	1,611,448	1,409,868
1917..	346,734	530,680	700,986	1,578,400	1,006,024

* To April 1st; and after segregations of California and Honduras properties to new corporations. On Dec. 31, bullion was \$119,993 and loans receivable, \$435,025.

Dividends: in 1913, 5c.; in 1914, 15c.; in 1915, 10c.; in 1916, 5c.; in 1917, 5c.; in 1918, 20c.; in 1919, 10c.; in 1920, 15c.; none in 1921; total, \$1,520,213. In addition, a stock dividend was distributed on May 1, 1920, of one share (\$1 par) each of West End Chemical Co. and West End Opoteca Mines Co. for every outstanding share of West End Cons.

Property: 10 patented and 7 unpatented claims, 184 acres, in the Tonopah district. In the settlement of the suit of Jim Butler vs. West End, concerning apex rights on the Fraction vein, begun in 1914 and ending in 1918 in favor of West End, the latter is given the right to extract such ore from Jim Butler ground, proceeds of which are equivalent to the amount of the Jim Butler trespass. Also, company has leases on portions of Jim Butler and Mizpah Extension territory. For a number of years company has had a stock interest in, and controlled the development of, the Halifax-Tonopah Mng. Co. Reported to own also a 350,000 share interest in the Santa Rosa Mng. Co., of California. For description of these companies see under separate titles.

In mid-1921, company acquired by purchase the Mable group in the Hawthorne district, Mineral county, adjoining the Old Garfield mine on the W. and 20 miles N. W. of Mina with Acme, 6 miles away, the nearest rail point. There are 3 parallel gold-silver bearing veins opened by tunnel, shaft and winze to depth of 335', said to have produced ore to value of \$20,000 net since 1919. Reported that the Garfield with an early day production of many millions is under option.

Development: by 3 shafts, deepest 1,212', with 14 miles of workings. In 1917, extension amounted to 7,625', also sinking the Ohio shaft to 1,212'. A new vein in trachyte was found on the Ohio 500' level. During 1918, results in the Ohio were good, reserves increasing to 82,000 tons worth \$2,000,000. During 1919, work was divided between the Ohio and West End veins; the former was developed down to the 800' level and the latter produced most of the ore. This work was continued through 1920, and, in addition, stopes were opened on the Ohio and some work was performed on the Fraction vein. Extensions in 1919 amounted to 6,128' at cost of \$9.75 per foot; ore reserves at end of 1919 estimated at 125,000 tons, or

probably over \$2,500,000 gross value. The per ton operating profit was \$10.19 in 1920; \$9.94 in 1919; \$8.01 in 1918.

Work on Halifax-Tonopah for 1919 showed a net loss of \$60,247, but conditions, both on this and the Mizpah Ext. property, showed considerable improvement in 1920, and in 1921, a large orebody was opened on the Halifax 800' level between West End and Ohio shafts and extending down to the 900' level.

Equipment: includes hoists, buildings, compressors, etc., and stamp-mill and cyanide plant. The daily capacity of the mill was originally 100 tons, but has been increased to 225 tons. Total cost of plant is more than \$170,000.

Formerly, a considerable tonnage of custom ore was treated, but beginning with April 1920, mill was devoted to West End and Halifax-Tonopah production.

Production:

Year	Ore Treated	Extraction %	Gross Value	Silver oz.	Gold oz.	Cost per ton
1920.....	53,517	91.06	\$1,212,810	974,422
1919.....	33,140	91.40	780,786	580,445	6,115	\$13.60
1918.....	50,195	91.97	990,185	826,577	8,676	11.72
1917*.....	45,910	92.69	721,937	677,117	7,161	10.69
1916.....	61,535	91.22	1,319,651	1,351,658	14,752
1915.....	56,976	90.92	958,657	1,210,038	13,219

*From 1917 on, these figures refer to company ore only.

Former holdings, viz., 2,200 acres at Searles Lake, Calif., under lease from U. S. Government, and mine at **Opoteca**, Honduras, taken over April, 1920, by two new corporations, the **West End Chemical Co. and West End Opoteca Mines Co.**, which see under these titles. West End Cons. stockholders received one share (\$1 par) of each new corporation for each share of West End Cons. held. The original plan, calling for the formation of 3 companies, was amended Feb. 7, 1920, and thus the West End Cons. will continue to own and operate Tonopah property.

Disbursements by the West End Cons. on account of these properties were: Searles Lake, \$74,592 in 1918 and \$321,817 in 1919; Opoteca, \$33,953 in 1918 and \$86,527 in 1919.

It is generally believed that the West End mine at Tonopah has ore reserves sufficient to operate the mill for a number of years, and that in addition it has virgin territory yet to be explored. With silver at existing prices, the outlook seems bright.

WEST END EXTENSION MINING CO.

NEVADA

Idle.

Officers: Franz Sigel, pres.; Frank S. Harris, v. p.; Daniel O. Hulse, sec.-treas., with M. T. Rowland and Jas. M. Satterfield, directors, at last accounts.

Inc. in Delaware. **Cap.** \$1,000,000; issued \$600,000; \$1 par; U. S. Corp., New York, transfer agent and registrar. Report for year ending December 31, 1919, shows an indebtedness of \$2,100.

Property: 4 claims, the Bank group, 70 acres, at Tonopah; adjoins West End Cons. on the north and Tonopah 76 on the west.

WESTERN DIVIDE MINING & MILLING CO.

NEVADA

Office: 421 Clay Peters Bldg., Reno, Nev.

Officers: A. A. Busey, pres.; A. H. Butler, Jr., v. p.; A. A. Codd, sec.-treas.; with W. A. Muller, Jr., and H. H. Blair, directors.

Inc. February 12, 1919, in Nevada. **Cap.** \$150,000; 10c par. Listed on San Francisco Stock Exchange.

Property: 7 claims, 119 acres E. of the Hasbrouck Annex and 1,500' S. W. of Tonopah Divide; in process of patent.

Development: includes an old 900' tunnel, which cut a vein at a point 700' in. Well equipped.

Reported that this and adjoining properties are to be explored through deep shaft of Kernick Divide (q. v.), of which A. A. Bussey is also president.

WESTERN MINERALS DEVELOPMENT CO. NEVADA

Office: 24 E. 2nd. St., Reno, Nev. **Cap.** \$1,000,000; par \$1.

January Jones of Reno in a circular letter to his clients on April 24, 1920, invites subscriptions to preorganization stock, at 10¢ per share, in this company. Its purpose is three-fold, to acquire, develop and promote mines; to develop the production of oil; and to return large profits to the stockholders. Nothing has recently been heard of, or from, the Western M. D. Co. Enough said.

WESTERN MINES DEVELOPMENT CO. NEVADA

Out of business. Fully described in Vol. XIII.

WESTERN ORE PURCHASING CO. NEVADA

Address: F. M. Manson, Reno, Nev. Company operates a 900-ton sampler at Hazen; also has plants at Goldfield, Nev., and Murray, Utah. Is well and favorably known.

WESTERN SILVER MINES CO. NEVADA

Office: Dooly Blk., Salt Lake City, Utah.

Officers: I. M. Howell, pres.-mgr.; A. R. Irvine, v. p.; W. G. Howell, sec.-treas., with David Neff and J. A. Spencer, directors. C. F. Williams, Elko, Nev., resident agent.

Inc. 1917 in Nev. **Cap.** \$1,500,000; \$1 par; 600,000 shares outstanding March, 1919. Stock offered at 50c. in 1918 to provide capital for 500-ton mill and further development.

Property: 10 patented claims, includes the Moho mine, in Silver Star district, Mineral county, 12 miles S. W. of Mina. Gold-silver-lead ore occurs in fissure veins in andesite, and is said to assay \$9.

Development: 5,000' of workings to depth of 360'. Management reports ore reserves of 200,000 tons.

WEST SPANISH BELT SILVER MINING CO. NEVADA

Property adjoins holdings of the Cons. Spanish Belt Silver Mng. Co. on the west in Spanish Belt district, Nye county, said to be explored through workings of that company.

WEST TONOPAH MINING CO. NEVADA

Office: 301 Nat'l Bank Bldg., Tonopah, Nev.

Officers: M. R. Ward, pres.; R. E. Mulcahy, v. p.; J. A. Perrv, sec.-treas., with A. Hamilton, F. S. Glover, C. W. Buthmann and E. C. B. Adams, directors; J. G. Kirchen, mgr.; H. L. Williams, supt.

Inc. in Nevada. **Cap.** 1,000,000; \$1 par; all issued; assessable. Listed on San Francisco Exchange. Annual meeting, first Tuesday after first Monday in January.

Property: 7 patented claims, 123 acres, in Esmeralda county. **Geology:** quartz vein in trachyte and rhvolute, dipping 65 to 70°, with E. W. course. Ore contains gold and silver.

Development: by 1,100' shaft; on 950' level, an 800' crosscut reaches the vein.

Equipment: 75-h. p. hoist, compressor, 75-h. p. triplex pump. Work temporarily suspended because of heavy flow of water.

WHALE MINING CO. NEVADA

Dead. Fully described in Vol. XIV.

WHITE CAPS EXTENSION MINES CO. NEVADA

Address: J. G. Kirchen, Tonopah, Nev. **Mine office:** Manhattan, Nev.

Officers: J. G. Kirchen, pres.; J. H. Miller, v. p.; A. G. Raycraft, sec.-treas., with Hugh H. Brown and W. L. Mangum, directors.

Inc. 1917, in Nevada. **Cap.** \$200,000; 10c par; assessable; 1,595,005 issued. Listed on New York Curb and San Francisco Exchange.

Property: 13 claims, in Manhattan district, Nye county, said to show ore

deposits occurring as chimneys in limestone, with 50° dip. Ore carries gold and a trace of silver.

Development: by vertical shaft to depth of 400'.

Equipment: includes 50-h. p. hoist, compressor, drills and pumps.

Is in development stage, but is backed by strong interests and regarded as promising. Inactive, 1919-20; awaiting developments in neighboring mine.

WHITE CAPS MINING CO.

NEVADA

Offices: Tonopah and Manhattan, Nev.

Officers: John G. Kirchen, pres.; H. R. Cooke, v. p.; A. G. Raycraft, sec.-treas., with C. J. Blumenthal and W. L. Taylor, directors. R. L. Taylor, supt.; H. A. Burk, mill supt.

Inc. June, 1915, in Nevada. **Cap.** \$200,000; 10c. par; 1,915,300 shares issued; assessable. Assessment No. 8, of 2c. per share, levied April 25, 1921; total to this date, 16¢. Listed on New York Curb and San Francisco Exchange. U. S. Corporation Co., New York, transfer agent and registrar.

Balance sheet of April 30, 1918, shows assets: property and equipment, \$560,477; accounts receivable, \$25,953. Liabilities show surplus, \$108,288; current liabilities, \$181,918. Net income from ore sale amounted to \$110,254; expenditures were \$269,111, including depreciation, \$25,752, litigation, \$14,730; operating deficit, \$35,380.

Property: 3 patented claims and 4 unpatented near Manhattan, Nye county, formerly owned by the Dexter White Caps M. Co. and the milling plant of Assoc. M. Co. paid for with 1,295,000 shares of treasury stock. In August, 1917, holdings of the White Caps So. Extens, were obtained for \$6,500 cash and 50,000 shares of treasury stock.

Geology: ore is a replacement of limestone by quartz, containing pyrite, realgar, orpiment, and stibnite along old fault-planes. Later faulting is very common and complex. Ore is hard to reduce and requires an oxidized roast prior to cyanidation. Company has experienced considerable difficulty in getting good extraction of the gold. Deposit is fully described in 'Economic Geology' of Jan., 1921, by H. G. Ferguson.

Development: by 800' shaft, with levels at 210, 310, 435, 550, 650 and 800'. East orebody has been developed on the 8th level, and new tonnage blocked out, estimated at 17,500 tons of \$18 ore. The West, and other, orebodies uncovered at 550' are being explored on 8th level.

Litigation with Manhattan Cons. settled in 1917; that with Manhattan Morning Glory in May, 1918.

Equipment: includes hoist, 2 compressors, drills, sinking and station pumps, 100-ton milling plant with crushers, rolls, trommels, 7-hearth Wedge roasting furnace, tube-mill and cyanide plant. A 100 h. p. hoist was added in 1920; the addition of a flotation plant is contemplated.

Production: 8,480 tons in fiscal year ending April 30, 1918, averaging \$13 per ton and in 3 following months \$81,540 worth of ore was shipped. For 6 months ending June, 1920, 1,420 tons were shipped, averaging 1.06 oz. gold and 26.8% arsenic.

Company has had a rather unhappy career with finances, litigation, and treatment problems, but seems to be improving slowly and surely. The presence of arsenic in the ore is one of the troubles. In January, 1920, mill was closed down and ore was being shipped elsewhere for treatment.

Development during 1920 and early 1921, has apparently met with fair success. Milling operations were resumed in July, 1921.

WHITE PINE COPPER CO.

NEVADA

Address: 602 Kearns Bldg., Salt Lake City, Utah., or Schellbourne, Nev.

Officers: John F. Cowan, pres.; W. Snyder, v. p.; Shand Smith, sec.-treas., with C. W. Knudson and F. B. Stephens, directors.

Inc. November, 1918, in Utah. **Cap.** \$1,000,000; \$1 par; assessable; 600,000 shares issued. Authorized bond issue, \$300,000; \$200,000 outstanding.

Property: 10 claims 186 acres, at Aurum, White Pine county, developed

by 1,500' of workings to depth of 250'. Ore occurs as chalcopyrite in fissure veins in shaly limestone, said to average 5% copper and 4 oz. silver.

Equipment: includes 1,400' aerial tram.

Expenditures for development work amounted to \$36,000 in 1918 and \$14,000 in 1919. During 1920, property was under lease, and a small shipment made.

WHITE PINE MINING CO.

NEVADA

Address: C. H. McCarter, 407 Sansom St., Philadelphia.

Officers: M. S. Lewin, pres.; D. M. Hewey, v. p.; C. H. McCarter, sec.-treas.; also directors

Inc. Aug. 5, 1915, in Nevada. **Cap.** \$1,000,000; \$1 par; 725,000 issued. Annual meeting, first Wednesday in January.

Income from ore sales in 1916 was \$18,000 and expenses \$47,000.

Property: the Green Monster Extension at Goodsprings, idle at present. Mine examined by J. M. Nevius, O. B. Suhr and F. A. Crampton.

Production: in 1915, 10 tons of copper and 35 tons zinc ores.

WHITE PINE SILVER MINES CO.

NEVADA

Address: Web. Greene, sec., care Fritsch Loan & Trust Co., 201 Felt Bldg., Salt Lake City, Utah.

Officers: August Vogeler, pres.; Arthur Robinson, v. p.; W. H. Penney, treas.; L. R. Nelson, mgr.

Inc. 1918, in Utah. **Cap.** \$100,000; 10c par; 500,000 shares in treasury.

Property: 3 claims, 8 miles E. of Lovelocks, Pershing county, which Pine county, developed by tunnel and shaft said to show copper, lead, and silver running from \$16 to \$80 per ton.

WILLARD METALS MINING CO.

NEVADA

See *New Willard Gold Mines Co.*

WILLARD MINES CO.

NEVADA

Idle, at last accounts.

Officers: F. H. Bird, pres.; J. T. Goodwin, v. p.; R. Nenzel, sec.; V. A. Twigg, treas., with L. A. Friedman and D. C. Wheeler, directors. H. H. Hunter, mgr. and supt.

Inc. in Nevada. **Cap.** \$1,000,000; \$1 par; outstanding, 662,000. No bonded indebtedness. Annual meeting, third Wednesday in January.

Property: 3 claims, 8 miles E. of Lovelocks, Pershing county, which shows a vein carrying pay ore in shoots.

Development: by several shafts, deepest 50', and a 70' tunnel. Shipments averaged \$54 per ton in gold and silver.

Property in a district that was feverishly active in 1915, but the temperature subsided in 1916. See Nevada Honey Bee and other mines of Loring (formerly Willard), Nevada.

WILLIAM PATRICK MINING CO.

NEVADA

Address: Manhattan, Nev.

Officers: Wm. C. Houppert, pres.-mgr., Otto Johnson, v. p.; W. P. Socwell, sec.-treas., with Wm. E. Osborn and W. A. Bastian, directors.

Inc. December 26, 1917, in Nevada. **Cap.** \$100,000; 10c par; 847,000 issued.

Property: 2 patented claims, 40 acres, near Manhattan, Nye county, said to show free-milling ore in quartz vein with E.-W. course and dip of about 35°. Pay-ore occurs in shoots assaying from \$2-18 per ton in gold. Developed by 169' shaft and crosscuts. Ore is mined by glory-hole method.

Equipment: includes 25-h. p. electric hoist, pump, tramway, 35-ton mill.

Management reports 1,200 tons of ore on dump, assaying about \$8 per ton, and 20,000 tons of ore blocked out.

The mine was closed down December, 1918, but was to be re-opened when conditions returned to normal.

WILSON DIVIDE MINING CO.

NEVADA

Office: Tonopah, Nev.

Officers: J. R. Cunningham, pres.; J. M. Fenwick, v. p.; E. P. Cullinan,

sec.-treas., with M. J. Fitzgerald and T. M. Sheets, directors. Homer O'Connell, supt.

Inc. April 2, 1919, in Nevada. **Cap.** \$150,000 shares; 10c par. Listed on San Francisco Stock Exchange.

Property: 4 claims, 75 acres, over 1 mile from Tonopah Divide and adjoining the Mohawk Divide. A shaft had been sunk to 400' up to April, 1920.

WILSON SILVER MINES CONS. CO.

NEVADA

Main office: Goldfield, Nev. **Agent's office:** A. P. J. Theo, 15 William St., New York City.

Officers: J. B. Kendall, pres.; N. P. Theo. v. p.; M. A. Kendall, sec.-treas

Inc. in Nevada. **Cap.** \$2,000,000; \$1 par. Traded in on New York Curb.

Property: 18 claims, 16 patented, 300 acres, in Esmeralda county, 5 miles from McLean on T. & G. R. R. Silver-lead ore occurs in a replacement deposit in limestone and is reported to carry from 50-300 oz. silver and 70-80% lead per ton.

Development: by 3,000' of old workings, with reserves estimated at 10,000 tons blocked out, valued at \$500,000, and 20,000 tons of ore on the dumps. Past production given as \$325,000 net.

Treasury stock was offered the Eastern public June, 1919, to provide funds for necessary equipment. A similar offering, at \$1.35 per share, was made one year later; the advertisement announces that estimated ore reserves are \$16,830,000 and 40,000 tons of \$35 ore on dumps; that daily earnings from manufacture of "Silica Whiting" from limestone on property were expected to be \$1,600; and that a 160-ton plant had been bought. With such assets, funds to erect the desired 500-ton mill should surely be forthcoming.

WINNEMUCCA MOUNTAIN MINING CO.

NEVADA

Address: Winnemucca, Nev.

Officers: H. A. Swanson, pres.; with W. G. Adamson, sec.-treas.

Cap. \$2,000,000; \$1 par; outstanding, 1,200,000; no bonded indebtedness. 2,000 shares sold for \$3 the lot at public auction in New York on Dec. 16, 1920.

Property: 25 claims, 2 patented, 7 miles from Winnemucca, Humboldt county, including 9 claims owned by the Winnemucca and Bonanza companies now merged with the present organization. The claims show a N. E.-S. W. fissure vein, traceable through the property for 3,000'. This vein cuts shale intruded by dikes of diorite and andesite. The orebody varies from 3' to 30' in width, and ore carries gold and small silver values. Dumps contained 3,000 tons of \$15 ore.

In July, 1917, company purchased 6 potash-bearing claims in Coal Canyon, 8 miles from Lovelocks, for \$100,000.

Development: by 5,000' of tunnel work. The working tunnel, 425' long, enters a fault-zone at a point 29' below an ore-shoot 175' long and 30' wide. The work defines 15,000 tons of indicated ore said to average \$15 per ton. In 1917 a shaft was sunk below 300' tunnel-level and good ore was reported. The mine was taken over by W. G. Adamson, under lease, in 1919, who is reported drifting and crosscutting 175' below the old tunnel-level.

Equipment: includes electric hoist, compressor and a 50-ton cyanide mill. Property is a prospect.

WOLFTONE EXTENSION MINING CO.

NEVADA

Mail returned from former address: V. J. Bonaby, sec., 110 Sutter St., San Francisco, Cal.

Dividends paid in 1914 amounted to \$2,820.

Property: in Manhattan district, Nye county; includes the Sunrise and African claims said to show 12 parallel quartz veins, 2 to 12" wide, supposed to be feeders to the main orebody that should be found in the limestone. Ore from a shaft on the Sunrise reported to have yielded \$18 gold per ton.

WOLVERINE COPPER CO.**NEVADA**

Probably defunct. Last address: E. S. Deardorf, mgr., Winnemucca, Nevada.

Property: 15 claims, 300 acres in Harmony or Sonoma Mts., 5 miles S. E. of Winnemucca, Humboldt county, shows 5 veins carrying copper ore with silver and gold values.

Development: by a 65' shaft. Equipment: includes gasoline hoist.

WONDER DIVIDE MINING CO.**NEVADA**

Office: Goldfield, Nev.

Officers: D. S. Ward, pres.; Joseph Bruder, v. p.; F. E. O'Neal, sec. and supt.; E. Marks, treas., with L. F. Detweiler, directors.

Inc. March 21, 1919, in Nevada. **Cap.** \$150,000; 10c. par. Listed on San Francisco Stock Exchange.

Property: 2 claims, adjoining the Mammoth Gold Reef and Silver Divide, developed by 50' shaft.

Equipment: electric hoist and compressor installed.

WYOMING MINING & MILLING CO.**NEVADA**

Not incorporated. **Address:** W. S. Bennett, mgr.-treas., Cody, Wyo.

Company is a syndicate of five members who put up \$75,000 for development and equipment; they are, W. S. Bennett, E. P. Bowman, D. H. Wilson, Fred. A. Whitney and Martin L. Pratt. Operations begun in 1918.

Property: 16 claims, 2 patented, includes the old Argus silver-gold mine at Taylor, White Pine county, 16 miles S. of Ely. Orebody is a contact deposit in limestone, dipping 40° with an E. course and is from 7-40' thick. Silver occurs as chloride and ore assays \$26 per ton. Said to have an early day production of 2,000,000 oz. of silver.

Development: to a depth of 300'. In 1919, 60,000 tons of ore were reported blocked out. In addition, there are said to be 20,000 tons of dump ore carrying 265,000 oz. of silver, and 18,000 tons of tailing assaying 6 oz. silver and some gold.

Equipment: 25-h. p. gasoline hoist and a 100-ton cyanide plant erected in April, 1919.

Reported that syndicate secured control, March, 1920, of additional property at Hamilton, White Pine county. Following a period of idleness, work was resumed at Taylor in Aug. 1921; 40 to 50 tons of ore, largely from dumps, are treated daily.

WYOMING-NEVADA COPPER CO.**NEVADA**

Address: C. T. Smith, supt., Humboldt, Nev.

Officers: Fred. C. Fisher, pres.

Property: includes the old Fifty-Six copper mine in the southern end of the Eugene Mtns., W. of Mill City, Pershing county, said to be the first quartz mine located in Nevada, having been staked out in 1856.

YANKEE DIVIDE MINING CO.**NEVADA**

Mail returned from both Divide and Tonopah, Nev.

Officers: Hon. C. R. Evans, pres.; G. H. Howard, v. p.; C. P. Johnson, sec.-treas., with J. W. Crane and J. T. Murphy, directors.

Inc. April, 1919, in Nevada. **Cap.** \$150,000; shares, 10c par.

Property: 1 claim, 3 fractions in the S. E. section of the district adjoining the Liberty, Bingo, Champion and Gold Seam. Said to show veins carrying good ore.

Equipment: includes hoist and electric compressor.

YELLOW ASTER DIVIDE MINING CO.**NEVADA**

Property: over 3 miles S. E. of Gold Mountain.

YELLOW JACKET G. & S. MNG. CO.**NEVADA**

Property sold to and company merged with Jacket-Crown Point-Belcher Mines Co., March 10, 1915, for 360,000 common and 12,000 preferred shares of the new corporation. In 1920, the latter was merged into the United Comstock Mines Co., which see.

YELLOW PINE EXTENSION CO.**NEVADA**

Main office: Goodsprings, Nev.

Officers: A. J. Robbins, pres.-gen. mgr.; E. B. Critchlow, v. p.; Reynolds Robbins, sec.-treas., with A. J. McDermott and G. A. Fayle, directors.

Inc. in Utah. Cap. \$100,000; 10c par; assessable; 575,000 issued.

Property: 12 claims. 190 acres, in Yellow Pine district, Clark county, said to show a chamber deposit in limestone, dipping 45° W., with N. S. course. Ore shoots are 2 to 8' wide and 10 to 40' long. Ore contains carbonates of zinc and lead, with some copper and silver; zinc content is 35%.

Development: by 800' incline shaft, 200' tunnel and total of 4,500' of workings. During 1918 about 500' of drifting was done.

Production: to 1917 about \$100,000, average in 1916 being \$25 per ton. In 1918 output was 250 tons. Small shipments of lead zinc ore were made in 1919; apparently idle, 1920 and 1921.

YELLOW PINE MINING CO.

NEVADA

Main office: Goodsprings, Nev.

Officers: J. F. Kent, pres.; C. W. Kent, v. p.; C. K. Barnes, sec. gen. mgr.; S. E. Yount, treas., with S. H. Westfall, directors.

Inc. 1905, in Nevada. **Cap.** \$1,000,000; \$1 par; all issued. No bonded indebtedness. Stock transferred and registered, 431 Security Bldg., Los Angeles, Cal. Listed on Los Angeles Stock Exchange. Annual meeting in January.

Financial statement for year ending January, 1921, shows: gross receipts, \$390,841; total expenditures, \$245,907.

Dividends: in 1918, \$300,000; in 1919, \$150,000; in 1920, \$90,000; total, \$2,610,000.

Property: 13 patented claims, 240 acres, in Yellow Pine district, Clark county, 4½ miles N. W. of Goodsprings, and 12 miles W. of Jean, nearest rail point. In 1917, the Charleston claim, held under lease, was turned over to the Charleston Mining Co. (which see), the Yellow Pine retaining a half interest in the new company. Company also has a lease on the adjoining Prairie Flower ground. In 1921, property of the Fayle estate at Jean and Goodsprings was purchased for \$25,000.

Ore occurs as replacement deposits in limestone, and averages 30% zinc, 14% lead and 14 oz. silver. The main deposit dips about 30° W. and strikes N. S. Faulting is frequent, and oxidation continues to present depth. Lead increases, and zinc decreases at depth. The property is of interest because of a small amount of platinum found in some of the ore.

Development: by 900' incline and winze, 100' deeper, total workings, 29,000'. New work in 1920 amounted to 3,062'; the body of zinc carbonate ore opened on upper levels was cut at 1,000' depth.

Equipment: includes 50-h. p. oil engine, hoist good for depth of 2,500', compressors, generator, 4½ miles of tramway from mine to mill, 12 miles of 36" gauge railway with Shay locomotive between Goodsprings and Jean on the Salt Lake Route; 120-ton wet concentrator using jigs and tables. The mill, strictly speaking, is a separator rather than a concentrator. The ore is a high-grade silver-lead-zinc material, and in the treatment at this plant no rejection is made, all products of the mill being shipped. In 1919 a calciner was added to eliminate moisture and carbon dioxide in the zinc carbonates. Additional equipment was secured through the Fayle purchase.

During 1920, company cooperated with U. S. Bureau of Mines in erecting testing plant for investigating the chloride volatilization process and its effect upon zinc concentrate.

Production	Ore. Tons	Lead. %	Zinc %	Silver. oz.	Total Cost
1920 (11 mos.).....	15,419	\$16.00
1917.....	19,976	14.85	29.1	7.55	12.348
1916.....	20,581	10.5	30.4	4.53	9.919
1915.....	16,136	10.2	31.8	5.40

No figures of total ore production available for 1918-19, but total shipments of ore and concentrates was 19,366 in 1918 and 11,279 tons in 1919. Total ore production to Dec. 1, 1920, is 153,575 tons; active operations began about 1911.

Operations were suspended from March to August, 1919, on account of fire, which destroyed much of the plant, since re-built. The Yellow Pine is well managed and should pay dividends for a long while. Mine was again shut down Dec. 1, 1920, because of high costs and low prices of metals.

YELLOW TIGER CONSOLIDATED MINING CO. NEVADA

Formerly Yellow Tiger Mng. Co.

Office: Goldfield, Nev.

Officers: H. A. Riedel, pres.; with H. G. McMahon and A. I. D'Arcy, directors. G. B. Bettles, mgr.

Cap. \$450,000; shares 10¢ par; assessable; 1,764,176 shares in treasury. Assessments are limited to 2¢. per share per annum; four of 1¢ each have been levied, the last in Nov., 1921. Stock is listed on San Francisco Exchange. Share prices were 3¢ high and 1¢ low in 1921.

From Dec. 8, 1919 to June 1, 1921, total receipts, including assessments 2 and 3, were \$45,129; expenditures were \$44,331, including \$25,645 at the mine and \$7,121 for property purchase.

Property: 350 acres, next south of the Goldfield Consolidated and E. of the Columbia Mountain fault, including ground of the Red Lion Consolidated Mines Co., Desert Chief Consolidated Mining Co., and the New Goldfield Sierra Mining Co., absorbed in December, 1919.

Desert Chief is described under its title; see Vol. XIII for the other two. The Yellow Tiger has a 750' shaft; the ore carries gold and copper. Since consolidation, company has done a small amount of prospecting only on its holdings in Goldfield district.

Company also has acquired for a stock consideration the Sterlag group of 6 claims in Stonewall Mtn. district, Nye county, 14 miles southeasterly of Goldfield. The vein, 7' to 22' wide, is in a lime-porphry contact: the ore is quartz with an average value of \$21, largely in silver. Developed by 240' shaft, and tunnel to cut vein at depth of 400 to 500'. Operations, suspended, Sept., 1920, for lack of funds, were resumed in 1921 and by Feb. 1922, tunnel was in 1,000'.

YELLOW TIGER MINING CO. NEVADA

Reorganized as Yellow Tiger Consolidated Mining Co., which see.

YERINGTON BULLION MINING CO. NEVADA

Idle, and mail returned from former address, Ludwig, Lyon county, Nev.

Officers: A. I. Schmidt, pres.; J. A. Knox, sec.-gen. mgr.; J. M. Moyle, mgr.-treas., preceding with J. A. Sisk, E. W. Brush, F. S. Stanley and Henry Hertz, directors. W. F. Pflegler, supt., at last accounts.

Inc. May 31, 1909, in Nevada. Cap. \$2,500,000; \$1 par; 1,000,000 shares preferred stock, fully paid; 300,000 shares issued; 1,500,000 shares common or promotion stock; assessable, 1,275,759 shares issued.

Property: 56 mining locations, 1,120 acres, 2 miles N. of the Nevada Douglas property in Yerington district, developed by 400' main working shaft and 2 tunnels 300' long, E. and W. of the shaft on the 300' level, showing a deposit of sulphide ore with gold and copper values.

Equipment: includes a smelter, 2 hoists, compressor and tools.

Company apparently without funds and its literature of a suspicious character.

YERINGTON CONSOLIDATED COPPER CO. NEVADA

Office: 312 McCormick Bldg., Salt Lake City, Utah. Mine office: Mason, Lyon county, Nev. Officers: F. J. Hagenbarth, pres.; John Dern, v. p.; M. B. Johnson, sec.

Inc. February 11, 1907, in Utah. Cap. \$100,000; 10¢ par; assess-

February 23, 1918. Debentures, \$100,000. at 6% authorized. Annual meeting, second Monday in July.

Property: 14 claims, patented, in 2 groups, known as the Copper King and Copper Deposit, the former, lying between the Bluestone and Mason Valley mines, developed by a 70' shaft and 2 tunnels of 500' and 600', showing carbonate ores. Worked in a small way by lessees in 1918.

Inactive during 1920.

YERINGTON MALACHITE COPPER CO. NEVADA

Idle.

Office: 414 Judge Bldg., Salt Lake City, Utah. **Mine office:** Yerington, Lyon county, Nev.

Officers: W. F. Snyder, pres.; Grant Snyder, v. p.-gen. mgr.; Gideon Snyder, sec.-treas., with S. M. Levy, Geo. N. Snyder and W. F. Snyder, directors.

Inc. October, 1906. **Cap.** \$5,000,000; \$5 par; assessable; issued 666,333 shares.

Property: 11 claims, patented, adjoining the Mason Valley mine show 3 mineralized zones of 20 to 150' width, proven on surface for a distance of 2,000'. Orebodies are fissure veins in limestone, carrying oxidized ores to a depth of about 100', below which ore minerals are mainly chalcopyrite, associated with epidote and garnet.

Development: by numerous short tunnels, shafts, etc., totaling 3,800', on the vein with the Mason Valley workings. Ores as mined average about 6% copper. An examination, 1917, reported to have revealed 800,000 tons of 2% oxide ore to a depth of 100', where the sulphide zone commences.

Equipment: includes a 125-h. p. motor, steam hoist good for 600' depth and compressor. There are several mine buildings.

Production: was begun May, 1912, and company shipped ore returning 174,407 lb. copper to the Mason Valley smelter in 1913. No later output until 1919, when small production was made.

YERINGTON MINES & EXPLORATION CO. NEVADA

Office: Yerington, Lyon county, Nevada.

Officers: C. S. Durand, pres.; B. F. Kurz, v. p.; V. B. Durand, with W. S. Weaver and Wm. Cramer, directors

Inc. February 27, 1909, in Nevada. **Cap.** \$1,000,000; \$1 par; issued \$875,000. Annual meeting, first Monday in March.

Property: 24 claims, including the Effie May group of 2 gold claims, the Copper Flat group of 10 copper claims, and the Mohawk group of 12 gold-copper claims, the latter two situated 8 miles N. W. of Yerington. All 3 groups are on or near the Nevada Copper Belt Ry.

The **Mohawk** group is developed by 3 shafts, 115', 125' and 130'. Shipments have shown from 2 to 6% copper and ½ oz. of gold.

In 1921, operations were confined to deepest shaft on the Mohawk; ore assayed up to 7.8% copper and \$3.20 gold.

The **Copper Flat** group is developed by about 20 pits and shallow shafts, deepest 60'. Shipments in 1917 averaged 6.46% copper.

The **Effie May** group is a gold prospect developed by a 135' shaft, with about 2,000 tons of ore blocked out; a mill run on 30 tons yielded \$705.

YERINGTON MOUNTAIN COPPER CO. NEVADA

Offices: 302 Natl. Bank Bldg., Tonopah and Golconda, Nev.

Officers: J. G. Kirchen, pres.-mgr.; E. M. Kirchen, v. p.; H. Perry, sec.-treas., with H. J. Toner, W. A. Krasselt, H. R. Cooke and E. J. Haug, directors. W. L. Taylor, supt.

Inc. February 10, 1912, in Nevada. **Cap.** \$3,000,000; \$1 par; issued \$2,300,000. First Natl. Bank of Tonopah, Nev., and U. S. Corporation Co., New York, registrars and transfer agents. Listed on New York Curb and San Francisco Exchanges.

Property: 90 acres in Klondyke section of the Divide district, 6 miles N. W. of Schurz and 12 miles E. of Yerington, shows fissures in granodiorite, that run N. 40° E., and dip 65°. Ore minerals are mainly chalcocite,

with chalcopryrite, chrysocolla, malachite, cuprite and occasional native copper. Ore assays $4\frac{1}{2}$ to 8% copper, 2 to 4 oz. silver and 80c. to \$2 gold per ton.

In July, 1916 company purchased the Adelaide mine, near Golconda. Humboldt county, from the Glasgow & Western Expl. Co. This mine shows a contact deposit in limestone and granite, opened by a 300' shaft and 1,450' of tunnels, with a total of 6,500' of openings. In 1917, the ore-body on the 200' level was 20' wide, and monthly shipments were 200 tons of 5% ore.

In 1918 a group of five gold-silver claims 100 miles N. W. of Tonopah was acquired.

Development: at the Yerington by a vertical 300' main shaft, and 1,200' of tunnels, with about 8,000' of openings. The Azurite tunnel was driven from the other side of the mountain to cut ore exposed in the Levine tunnel and at 400' greater depth. Tunnel discloses ore in bunches and streaks. The Beach tunnel yielded a good grade of shipping ore of about 5.5% copper.

Equipment: includes gasoline hoists, 2 compressors, pumps, etc.

Production: in 1916 was from 400 to 600 tons per month. All work was temporarily suspended February, 1918, on account of heavy flow of water in lower workings. Suspension of operations continued 1919-'21.

YUBA LEASING & DEVELOPMENT CO. **NEVADA**

Out of business. Formerly at Pioche, Lincoln county.

YUKON DIVIDE MINING CO. **NEVADA**

Mail returned from Tonopah, Nev.

Inc. 1919, in Nevada.

Property: 90 acres in Klondyke section of the Divide district 6 miles, south of Divide mine.

ZANZIBAR MINING CO. OF NEVADA **NEVADA**

Idle.

Address: P. O. Box 374, Reno, Nev.

Officers: J. M. Short, pres.; L. S. Reese, sec.-treas.

Company is a reorganization of the Zanzibar Mng. Co., effective Oct. 30, 1919.

Property: 2 claims between the White Caps and White Caps Extension at Manhattan, Nye county, developed by 400' shaft.

NEW JERSEY

There were but six companies engaged in mining iron ore and one producing zinc mine in the state in 1919. Production was 404,428 tons iron ore in 1919 and 431,567 tons in 1920.

BALBACH SMELTING & REFINING CO. **NEW JERSEY**

Office: 580 Market St., and Works, 111 Passaic Ave., Newark, and on Newark Bay, N. J. Purchase and sales depts: 280 Broadway, New York City.

Officers: Archibald R. Watson, pres.-treas.; Julian B. Beaty, v. p.; E. E. Dieffenbach supt., with W. I. Cooper and E. T. Villareal, directors: F. Schmutzer, sec.

Inc. 1891, in New Jersey. **Cap.** \$1,000,000; \$100 par; in 500,000 preferred and \$500,000 common stock; 3,900 preferred and 3,900 common shares issued and outstanding.

Works: at Newark comprise a lead desilvering plant, a copper smelting plant; gold, silver and platinum refinery; copper sulphate plant. The metallurgical practice of the works ranks high. The lead refinery, with a capacity of 6,000 tons per month, erected at Newark Bay, went into operation in July, 1913. Company does a custom business in ores, bullion, residues, blister copper, etc., containing gold, silver, platinum, copper and lead.

Company also owns real estate in the vicinity of Newark Bay, valued at \$750,000 to \$1,000,000.

IRVINGTON SMELTING & REFINING CO. NEW JERSEY

Address: Charles Engelhard, treas., 30 Church St., New York Works at Irvington, N. J.

Officers: Chas. Engelhard, pres.; C. Blair Mitchell, v. p.; C. W. Baker, v. p.; F. Coesier, sec.

Property: is an electrolytic smelter and refinery for gold, silver, platinum and copper ores.

NEW JERSEY ZINC CO. NEW JERSEY

See full description in United States section.

Company not only owns the Franklin Furnace, N. J., mines, but has holdings in various states and is, therefore, grouped with the Am. Smelting & Refining, U. S. Smelting and other large companies with widely scattered holdings.

NORTH JERSEY STEEL CO. NEW JERSEY

Address: Dover, N. J.

Inc. 1920 by H. M. Roche, Jesse C. Stoddard and E. E. Yensel. **Cap.** \$500,000.

Property: formerly owned by the Beach Glen Iron Mng. Co.

Under development and a concentration mill with capacity of 75 tons crude ore an hour, installed in 1921.

ORFORD NICKEL-COPPER REFINERY NEW JERSEY

Property of International Nickel Co., 43 Exchange Place, New York. Plant at Bayonne, N. J., treats nickel-copper matte from Sudbury smelter. A. J. Wadhams, supt. of plant; H. W. Walter, asst. supt.

PERTH AMBOY SMELTER NEW JERSEY

Office: 120 Broadway, New York. **Works address:** J. F. Austin, mgr., Maurer, N. J. Owned by American Sm. & Ref. Co.

Has 900-ton copper-lead smelter, 360-ton lead refinery 270-ton electrolytic copper refinery, and a 50-ton tin smelter and refinery, near Perth Amboy, employing about 2,000 men.

RARITAN COPPER WORKS NEW JERSEY

Works address: E. C. Clark, supt., Perth Amboy, N. J.

Operates a copper refinery; described under International Smelting Co.

REPLOGLE STEEL CO. NEW JERSEY

Office: 120 Broadway, New York City. S. H. Bell sec.-pur. agt., Wharton, N. J.

Inc. Oct. 30, 1919 in Delaware. **Cap.** 500,000 shares, no par value; 250,000 shares issued. Stock listed on N. Y. Stock Exchange. Empire Trust Co., transfer agent; U. S. Mortgage & Trust Co., registrar.

Company controls through stock ownership the Wharton Steel Co., which see.

THOMAS IRON CO. NEW JERSEY

Office: Hokendauqua, Pa. **Mine office:** Wharton, N. J.

Officers: W. A. Barrows, Jr., pres.-mgr.; Fred R. Drake, v. p.; with Ja. Samuel Krause, Edwin Thomas, Andrew D. Chidsey, J. Mark Mauser, Thos. E. Ritter, directors. Oliver T. Case, sec.-treas.; L. H. Stone, supt.

Inc. April 4, 1854, in Pennsylvania. **Cap.** \$2,500,000; \$50 par; Authorized bond issue, \$1,000,000; 596,500 issued. Net income for 1920 amounted to \$23,235. **Dividends:** 3% July, 1920; 3%, Feb., 1921. Stock transferred at company office.

Property: Richard iron mine at Wharton, Morris county. Ore magnetite (Fe₃O₄) occurs in lenses in gneiss, and averages 58% iron. The mine is worked by back stopping and shrinkage methods.

Development: by vertical shaft to depth of 1,400', with 10,000' of workings.

Equipment: includes 200-h. p. electric double drum hoist, two electric

compressors of 800 and 2,800 cu. ft. capacity and 1,000-ton magnetic conc. mill.

Production: to 1918, 3,000,000 tons. Mine was not operated in 1918.

Company operates five blast furnaces at Alburtes, Helertown and Hokendauga, Pa., producing 131,631 tons pig iron in 1920.

Operations since 1920, seriously hampered by unsatisfactory labor conditions and low market prices.

UNITED STATES METALS REFINING CO.

NEW JERSEY

Subsidiary of the **American Metal Co.**, which sec.

Works address: R. W. Deacon, gen. supt., Chrome, N. J.

Operates a custom copper smelter and refinery.

WHARTON STEEL CO.

NEW JERSEY

Controlled through stock ownership by **Replogle Steel Co.**

Address: 111 Broadway, New York City and Wharton, N. J.

Officers: J. L. Replogle, chairman, Wm. H. Brevoort, pres.; I. Townsend Burden, v. p.; Ernest Hillman, v. p.; L. K. Diffenderfer, treas., with Leroy W. Baldwin, J. J. Flannery, L. E. Waring, J. R. Flannery, and Chas M. MacNeill, directors. S. H. Bell, sec.

Cap. \$10,000,000; \$100 par; \$3,145,000 issued. Bonds authorized and outstanding, \$3,000,000. Annual meeting, 3rd Friday in February.

Property: 29 mines, covering about 5,000 acres in Morris county, New Jersey, including the Scrub Oaks mine of the old Andover Iron Co., 3 miles W. of Dover, first opened in 1868; prior to 1881 had produced 56,000 tons iron ore, but little activity thereafter until 1917. Main, or Replogle, orebody is of familiar lenticular shape in gneiss; has been explored to depth of 1,240' and exposed for 2,500' in length on first level; estimates give 27,000,000 tons probable ore. Ore is magnetite and martite disseminated in feldspathic gangue, high in silica, low in phosphorus, with a 36% iron content. The Brevoort vein in same mineralized belt parallels the Replogle 400' away.

Development: operations confined to Replogle mine. Present management has done considerable drilling, main shaft enlarged to 4 compartments and opening of 2nd level begun. In October, 1920, there were 300,000 tons broken ore in stopes.

Equipment: includes 2,500-ton concentrating mill, blast furnaces, sintering plant, etc.

Production: 156,981 tons in 1918; 25,987 tons in 1919.

Company also owns the Wharton & Northern R. R. Co.

NEW MEXICO

The metal production of New Mexico for 1921 was the lowest known for many years, the total value being but \$2,685,000, compared with \$11,934,992 in 1920, a decline of 77% in one year. This compares with \$11,500,000 in 1919, \$28,625,000 in 1918 and a record of \$34,986,765 in 1917. The big decline in 1921 was due to the suspension of operations at Chino.

The gold output declined from \$480,302 in 1920 to \$184,000 in 1921; silver from 768,042 ounces to 671,000 ounces; copper from 54,400,691 lb. to 14,460,000 lb.; lead from 2,869,525 to 500,000 lb. and zinc from 10,013,580 lb. to 20,000 lb.

ADMIRAL GOLD AND COPPER MINING CO.

NEW MEXICO

Idle. Mail returned from former office, Tusas, Rio Arriba county, N. M.

Inc. 1900, in New Mexico. **Cap.** \$500,000; shares \$1 par.

Property: 8 claims, 160 acres, in the Bromide district, shows 3 fissure veins carrying silver copper and gold ores, opened by 3 shafts, deepest 150', inactive owing to lack of funds.

ALHAMBRA MINING CO.

NEW MEXICO

Defunct. Silver City, New Mexico.

AMERICAN COBALT CORPORATION **NEW MEXICO**

Address: Box 74, Tyrone, New Mexico.

Officers: Albert A. Leach, pres.-mgr.; Simon H. Casey, v. p.; Francis I. Leach, sec.-treas., with A. W. Casey and Peter M. Shelley, directors.

Inc. in New Mexico. Cap. \$100,000; \$25 par; 2,000 shares outstanding. Operated as a close corporation.

Property: 28 claims, 12 miles N. W. of Tyrone, in Bullards Peak mining district, Grant county, surrounding the Black Hawk mine. Ore occurs as native silver and arsenical nickel cobalt in a net work of fissure veins 18"-3' wide, in granitic gneiss, running as high as \$400 per ton.

Development: by shafts to depth of 200'. Management plans extensive prospecting and development work. Property examined by W. H. Weed.

AMERICAN EXPLORATION & MG. CO. **NEW MEXICO**

Presumably dead. Fully described in Vol. XIV.

AMERICAN GOLD, COPPER M. & SM. CO. **NEW MEXICO**

Company was forced into receivership and properties were purchased by George Heineman, of 1524 Poplar St., Kansas City, Mo., at receivers sale. Awaiting final decision of court.

AMERICAN SILVER CORPORATION **NEW MEXICO**

Office: 200 Fifth Ave., New York City.

Inc. 1920 in West Virginia, to acquire property at Socorro M. & M. Co. Cap. \$3,000,000. Company paid off the indebtedness of the Socorro Co. and receivership expenses. Stockholders in the old company received two shares of American Silver for 5 shares of Socorro stock. Reported 130,690 shares sold for \$100 the lot at public auction in New York on January, 1921. Empire Trust Co., registrar.

Property: 66 claims, partly patented, over 1,200 acres, including the Cooney, Peacock, Little Charlie, Independence, and Fluoride groups, sometimes known as the Silver Bar mine, in the Cooney district of the Mogollon mountains, 85 miles N. E. of Silver City, the nearest rail point. The Fanny is the principal mine, it having yielded \$4,869,000 in gold and silver; followed by the Cooney with \$1,700,000 in copper and silver. See account by D. B. Scott in Bull. A. I. M. & M. E. February, 1920.

Geology: the property shows porphyry and andesite, carrying the Fanny fissure vein of 5 to 10' average width, with a paystreak of about 3' average and 30' maximum width, having numerous narrow feeders, some of which carry high value gold. Ores include slightly auriferous and strongly argentiferous chalcopyrite, bornite and chalcocite, claimed to carry increasing silver values at depth, and the east vein has been said to show native copper at depth of 600'.

Development: 3 mines—the Fanny, Johnson and Cooney. The Fanny has a 1,200' shaft, and the Johnson, a mile west, has 400 and 450' incline shafts. The Fanny is the largest mine of the district and the chief producer. There are also various tunnels on the several groups with an approximate total of 30,000' of workings.

Equipment: includes hoists, compressor, aerial tram and 250-ton mill, with ball-mills and cyanide plant. The power plant has four crude oil engines developing 960 h. p.

The old mill was destroyed by fire in October, 1917; late in 1918, the new plant was put in operation, but was closed April 1, 1919. Operations suspended, August, 1920, after 2 months of development work under new management.

ANDERSON-APACHE COPPER CO. **NEW MEXICO**

Dead. Former address: Hachita, Hidalgo Co., N. M.

Fully described Vol. XIV.

ANIMAS PEAK GOLD MNG. CO. **NEW MEXICO**

Probably dead. Formerly held property at Hillsboro, Sierra county, N. M., once owned by the defunct Hillsboro Cons. Mng. Co. of odious fame.

ANITA COPPER CO. **NEW MEXICO**
Address: Geo. W. Foreman, v. p.-gen. mgr.; Lordsburg, N. M.

Inc. 1921 in California, to absorb **Octo Mining Co.**, which see. District Court at Lordsburg gave judgment by default in an action for \$28,000 owed by Octo Co.

ATWOOD COPPER CO. **NEW MEXICO**
 Name changed to **Boston-Emerald Mining Co.**, which see.

AUSTIN-AMAZON COPPER CO. **NEW MEXICO**
Offices: 116 Texas Bldg., El Paso, Texas; Room 4 Porterfield Bldg., Silver City, N. M. **Mine address:** Tyrone, N. M.

Officers: Chas. E. Davis, of El Paso, pres.; M. W. Porterfield, sec-treas., with John M. Wiley, managing director, C. H. Leavell and V. C. Moore, directors.

Inc. Dec. 1, 1916, in New Mexico. **Cap.** \$1,500,000; \$1 par; 1,070,000 outstanding. El Paso Bank & Trust Co., registrar and transfer agents. Stock formerly traded in on N. Y. Curb. Annual meeting, second Tuesday in March.

Property: 14 claims, 275 acres, in Burro Mtns., Grant county, 6 miles W. of Tyrone.

Ore: chalcopyrite occurs in contact and quartz veins, running N. E.-S. W. through monzonite (quartz-diorite), and said to average 6% copper. A N.-S. mineralized shear zone, in places 150' wide, is said to traverse several claims.

Development: 3,000' of shafts, drifting, etc. Over 30 shallow openings show ore. Management planned sinking to 700' level, in 1917-18, but due to war conditions, high costs, etc., the property was closed down January 1, 1918.

Equipment: includes 18-h. p. gasoline hoist and compressor. Shipments to October 1st, 1917, 137 cars of 6.26% copper ore.

AZTEC COPPER CO. **NEW MEXICO**
Office: 707 Colorado Bldg., Washington, D. C. **Mine office:** Organ, Dona Ana Co. N. M.

Officers: Gen. H. H. C. Dunwoody, pres. and mgr.; C. C. Clements, v. p.; B. K. Roberts, sec-treas, with Col. M. C. Wyeth, C. F. Humphrey and Admiral C. H. Davis, directors.

Inc. in Arizona. **Cap.** \$1,000,000; \$1 par; 600,000 shares issued.

Lands: 4 claims, 6 acres, in the Organ Mountain mining district, about 12 miles by good road southeast from Las Cruces. Claims cover the mineralized limestone porphyry contact worked by the Modoc mine. Developments are on the Orejon claim, opened by a 140' 45° inclined shaft, sunk on a 12 to 18" vein, reported to carry copper silver, lead and zinc ore, averaging \$40 per ton. No recent reports available.

AZTEC MINE **NEW MEXICO**

Mine at Baldy, Elizabethtown district, Colfax county, was operating throughout 1919, with regular monthly shipments of gold bullion and occasional shipments of concentrates carrying high gold contents.

Has a 10-stamp amalgamation-concentration mill.

AZURE MINING CO. **NEW MEXICO**
Office: 170 Broadway, New York City. **Mine office:** Tyrone, Grant county, N. M. Louis Kahn, pres.; M. D. Rothchild, sec-treas.

Inc. 1890, in New York. Is operated as a close corporation.

Lands: 110 claims, 1,800 acres, near the Burro Chief group of the Chemung Copper Co. Company sold 73½ acres, 1909, to Mangas Development Company.

Geology: the Burro Mountain property shows monzonite, quartz-porphry and granite, with fissure veins in granite and disseminated ore in porphyry, there being 7 orebodies with 2 under development. The Santa Fe vein is from 15 to 75' wide, averaging 40' and is traceable for 6,000'. This vein is developed by a 417' shaft, having 5 levels with 15,500' of workings

showing gem turquoise as well as copper ore. The old turquoise mine has 2 tunnels and large open-cast workings.

Besides the Santa Fe vein, the property has disseminated ore, one ore-body on the contact between granite-porphry and monzonite-porphry being 152' thick, developed for 500' in length and carrying 2½% copper present as disseminated particles of chalcocite. Property has been explored by churn drills and diamond drilling.

The mine was at one time the largest turquoise property in the world, systematic mining having begun in 1891. Gem production has practically ceased and the property is considered valuable for its copper ore alone.

Company also owns the Tres Hermanos zinc mine in the Tres Hermanos district, 23 miles S. of Deming, Luna county, N. M., said to show oxidized ores carrying zinc-lead-silver values.

Ore: occurs as blanket and chamber deposits in limestone, 2-5' wide, reported to assay from 30-35% zinc, 30-40% lead, and 6-8 oz. silver. Developed by several vertical shafts, from 30-100' deep.

Equipment: includes compressor and 20-h. p. gasoline hoist.

Production: in 1915, mainly from development work, was 720,000 lbs. zinc, 300,000 lbs. lead and 2,000 oz. silver.

BATTLESHIP MINING & MILLING CO. NEW MEXICO
Probably dead. See Vol. XII. Former office: 412 Mack Bldg., Denver, Colo. Mine near Lordsburg, Hidalgo county, N. M.

BENNETT-STEPHENSON M. & M. CO. NEW MEXICO
Officers: O. Jolliffe, pres.; Jas. C. White, v. p.; C. B. Gill, treas.; J. L. McCullough, sec. Annual meeting, April 7th, at Las Cruces. Controls, through stock ownership, the **Organ Mountain Mining Co.**, which see. Fully described, Vol. X.

Mines were under lease until 1921 to Phelps Dodge Corp.

BETHLEHEM COPPER CO. (INC.) NEW MEXICO
Dead; former address: Steins, N. M.
Fully described Volume XIV.

BITTER CREEK MINING CO. NEW MEXICO
Address: Taos, New Mexico.

Officers: Fred S. Lewis, pres.; Wm. T. Hinde, v. p.; Condon C. Lowe, sec.-treas.-mgr., with Wm. McKean, and Alvin Burch, directors. L. O. Haberstick, supt., Red River, N. M.

Inc. July, 1916, in New Mexico. **Cap.** \$1,000,000; 425,070 shares outstanding, March, 1919. U. S. Corporation, New York, registrar and transfer agents. C. W. Galvin & Co., 80 Pine St., New York City, selling agents.

Property: 5 claims, 100 acres, known as the Hub mines, at Red River, Taos county, said to show telluride ore in fissure veins in andesite. Values are gold and silver.

Development: by prospect shaft and several shallow tunnels. Plan continuing the Dorothy tunnel. Company purchased an additional claim, 20 acres, in 1918, said to show a 150' body of quartz and quartz-porphry ore, assaying from \$1-\$7 in gold, to be developed by crosscut tunnel.

BLACK COPPER CO. NEW MEXICO
Probably dead. See Vol. XIV.

BLACK HAWK CONS. MINES CO. NEW MEXICO
Formerly **Black Hawk Mining & Milling Co.**

Office: 611 First Natl. Bank Bldg., Milwaukee, Wis. Ira L. Wright, mgr., Silver City, N. M.; Wm. Downie, supt., Vanadium, N. M.

Officers: Wm. Krasselt, pres.; Theo. Millver, v. p.; John Camm, v. p.; J. F. Gerdis, sec.; G. H. Cheyne, treas., with Frank Boutin and J. P. Fetsch, directors.

Inc. May, 1919 in Delaware. **Cap.** \$1,500,000; \$1 par. Reorganized June, 1921 in Colorado. **Cap.** \$1,500,000; \$1 par; assessable; 1,350,000 shares outstanding. Operating loss for 1919-1920 was \$62,514.

Property: two groups, a total of 370 acres of mineral land in the Hanover-Santa Rita district, Grant county, New Mexico. Also 8 claims, 90 acres, in Bullards Peak district N. W. of Burro mountain, comprising all holdings of Black Hawk M. & M. Co.

The Hanover comprises two groups, one on each side of the A. T. & Santa Fe. R. R. line at Hanover junction. There are seven shafts. This is a young mine with promising orebodies and is in a district that has been productive for half a century. Mine idle during most of 1920.

Development: in 1920 on the Lucky Bill totaled 2,000' on the 200 and 300' levels, opening up considerable low grade oxidized copper.

Equipment: hoists, air-compressors, buildings, etc.

Production in 1919 and 1920, was 3,922 tons of ore, containing 1,434,699 lb lead, 10,477 oz. silver, 149,903 lb. zinc and 63,427 lb. copper, all from the Lucky Bill claim. The Black Hawk group, S. W. of Silver City, is idle. It yielded bonanza silver ore in former years, but is not in shape for economic working at present.

BLACK HAWK MINING & MILLING CO. NEW MEXICO

Fully described in Volume XIII. Holdings purchased in May, 1919 by the Black Hawk Consolidated Mines Co., which see.

BLACK RANGE TUNNEL & MINING CO. NEW MEXICO

Address: E. D. Randolph, sec.-gen. mgr., 219 Main St., Lafayette, Ind.
Officers: H. E. Black, pres.; A. O. Behrn, v. p.; W. C. Mitchell, treas., with T. F. Gaylord, B. L. Phillips and Martin Hardsocg, directors; C. B. Hullinger, supt., Choloride, Sierra county, N. M.

Company presumably a reorganization of the Black Range Copper Mining Co. and Black Range Reduction Co. (see Vol. X), both now dead.

Property: the Silver Monument mine, showing a vein of silver-copper ore.

Development: 2,300' tunnel and shaft. Main vein has apparently not been found. Equipped with steam plant compressor and a 25-ton concentration mill. Actively developing, 1919-'20.

BONNEY CONSOLIDATED COPPER CO. NEW MEXICO

Office: Lordsburg, Hidalgo county, N. M.

Officers: D. L. Hill, pres.; H. W. Peak, v. p.; R. S. Spann, sec.; J. P. Porteus, supt.

Inc. 1919, in Texas. Cap. \$2,000,000; \$1 par. Company reports that it is an unincorporated association, operating under declaration of trust, without personal liability, in any event, of the trustees or of any stockholder.

Property: Bonney mine group, property of Tyndale Copper Mining Co., El Dorado group, Manilla group, Misers Chest Extension group and others, in all about 750 acres, located in Virginia district, about 5 miles S. W. of Lordsburg. The Bonney Mining Co., on September 15, 1918, refused to extend the lease on the property held by the Lawrence Mining Co., and accordingly the mine was operated by the Bonney Mining Co. until January, 1919, when the copper market was demoralized. Property was purchased in July, 1919, by D. L. Hill, of Lordsburg, N. M., who consolidated it with adjoining mineral ground, under the present title.

Geology: veins are strong, well-defined fissures, 4-20' wide, which below water level, carry sulphides well disseminated through quartz gangue. Country rock is andesite, with monzonite, diorite and rhyolite.

Ore: of the Bonney mine occurs as chalcopyrite, bornite, chalcocite and some covellite, carrying gold, and silver values in five fissure veins in andesite. Veins are located in isolated hills, 4 miles N. E. of Pyramid Peak; but entirely separated therefrom. Shipments of 2,077 tons from 500' level gave average smelter returns of .664 oz. gold, 4 oz. silver and 5.2% copper.

Development: at Bonney mine, by 3 shafts, 500, 400 and 300' deep; 500' of raises and 4,500' of drifts and crosscuts. Company has opened 1,400' on main vein and 600' on 500' level. New work during 1919-20 amounted to 1,000'.

Ore reserves: broken ore 22,000 tons; blocked out 21,000 tons.

Equipment: includes 205 h. p. boiler, steam and gas hoists, compressors, air and steam pumps, water works, machine shop, power plant, dwellings, concrete office, etc.

Production: for 16 months prior to January, 1919, company shipped 12,671 tons of ore to Copper Queen smelter, Douglas, Ariz., containing 1-882 oz. gold, 50,732 oz. silver and 898,421 lb. of copper all valued at \$286,056. No shipments were made during 1919-20.

BONNEY MINING CO.

Dead. See Vol. XIV.

NEW MEXICO

BOSTON & BRICE COPPER CO.

NEW MEXICO

A reorganization of the Jarilla Consolidated Copper Co. Mine at Brice, Otero county, N. M.

Officers: at last accounts, E. E. Locklin, pres.; W. W. C. Spencer, treas.-gen. mgr., with Clinton Gowdy, G. E. Moffett and John Colthrop, directors.

Inc. 1917, in New Mexico. **Cap.** \$2,000,000; \$1 par; issued, 1,000,000. Annual meeting, first Monday in May.

Property: 40 claims, about 800 acres, in Jarilla (Silver Hill) district, Otero county, carrying sulphide ore in contact deposits between limestone and monzonite porphyry. Vein said to be 3 to 30' wide, 300' to a half mile long, and proven to 170' depth, averaging 3 to 5% copper, 2 oz. silver and \$1 gold per ton.

Development: by 5 shafts, deepest 172', and the Harvey tunnel, 165' long.

Company is a merger of and holds the properties formerly owned by the Eureka Mines Cons Co., Boston Jarilla Copper Co., Amarillo Mining Co. and Eureka Placer Mining Co., whose combined capitalization of \$8,000,000 was reduced to \$2,000,000. No recent report obtainable.

BOSTON EMERALD MINING CO.

NEW MEXICO

Formerly known as the Atwood Copper Co. **Address:** J. Tangye, supt., Lordsburg, New Mexico.

Property: the Atwood mine, near Lordsburg, Hidalgo county, reported owned by H. V. Snell, of Globe, Ariz., and Morningstar & Augustine, of Lordsburg, N. M.

Development: by shaft, said to show vein of good grade of milling ore. Shipments made to El Paso smelter.

BOSTON-HECLA MINING CO.

NEW MEXICO

Office: 40 Court St., Boston, Mass. **Mine office:** Lordsburg, N. M.

Officers: R. E. Candruff, pres.-treas.; J. B. Piscopo, v. p.; D. W. Taylor, sec., with R. S. Fisher and M. W. Lawlor, directors.

Inc. April 18, 1918, in Arizona. **Cap.** \$2,000,000; \$1 par; 1,000,800 shares outstanding. Equitable Trust Co., Boston, Mass., transfer agent.

Property: 9 claims, 3 patented, 120 acres, about 3 miles S. W. of Lordsburg, Hidalgo county, between the 85 and Octo mines.

Ore: sulphide occurs in quartz-fissure veins in andesite and diorite, reported to assay 0.04 oz. gold, 2.17 oz. silver and 2.6% copper. Orebody reported to be 20-125' wide, with E.-W. course and dip of 70°.

Development: by 300' shaft. **Equipment:** includes 40-h. p. hoist and compressor.

Property has been examined by O. H. Reinholt, San Diego, Calif. and J. T. Bickle, Globe, Ariz.

BUFFALO-NEW MEXICO MINES CO.

NEW MEXICO

Office: 430 Brisbane Bldg., Buffalo, N. Y.

Officers: J. F. Rooney, pres.; D. W. Haist, v. p.; C. H. Reeser, sec.-treas.; R. P. Kelly, supt.; R. H. R. Rochester, cons. engr.

Inc. 1910, in Arizona. **Cap.** \$1,000,000; \$1 par; 650,000 shares outstanding.

Property: 17 unpatented claims, 277 acres, at Red River, Taos county,

said to show a "quartz porphyry vein," 18-20' wide in andesite and rhyolite with gold and silver values.

Development: by 200' shaft and 600' of workings. A 2,300' tunnel, being driven to drain the mine and cut several other veins, is 700' completed.

Equipment: includes 60 h. p. steam boiler and steam compressor.

BURRO MOUNTAIN COPPER CO. NEW MEXICO

Out of existence. Property originally acquired from the Southwestern Copper & Iron Co., now a part of **Phelps Dodge Corp.** (q. v.) and operated as **Burro Mtn. Branch.**

BURROS DEVELOPMENT CO. NEW MEXICO

Probably dead. Fully described Vol. XIV.

B. V. N. MINING CO. NEW MEXICO

Probably defunct. **Last address:** Pinos Altos, Grant county, N. M.

Fully described Vol. XIV.

CALUMET-NEW MEXICO MINING CO. NEW MEXICO

Office: 154 W. Randolph St., Chicago, Ill. **Mine office:** Silver City, New Mexico.

Officers: Alex. McCallum, pres.; Alpheus McCallum, v. p.-treas.; J. A. Pement, sec.; A. W. McCallum, asst. sec.; J. A. McCallum, supt., with Jacob Ehrenberg, directors.

Inc. in New Mexico. Cap. \$1,000,000; increased to \$1,350,000 common and \$150,000 8% cumulative pfd.; \$1 par; 1,024,770 outstanding.

Property: three groups in Magdalena district, 12 claims, 10 patented, 240 acres, 2 miles from a railroad and 5 miles from Magdalena reported to show ore assaying 3 to 21% copper, 3 to 97 oz. silver, 0.06 to 0.96 oz. gold, and a lead maximum of 24%.

In Pinos Altos district company has 3 deeded claims, and 3 claims under option, 120 acres; 7 shipments from there assayed between 0.20-1.26 oz. gold, 7 to 19 oz. silver, 9 to 43% lead and 3 to 38% zinc.

Development: by tunnels with 3,000' of openings at Magdalena; by 2 shafts and 3,000'-4,000' of drifts and stopes at Pinos Altos.

Equipment: includes hoisting plants, blacksmith and machine shops, dwellings and a concentration and a flotation mill near Pinos Altos with a capacity of 1,500-3,000 tons per month.

Shipments made to El Paso smelter in 1920. Management awaiting better metal prices before resuming work on an extensive scale.

C. & O. MINING & MILLING CO. NEW MEXICO

Mail returned from former address: Pinos Altos, Grant county, N. M.

Probably dead. Fully described in Vol. XIII.

CARIBEL MINING & MILLING CO. NEW MEXICO

Address: H. L. Pratt, mgr., Red River, N. M.

Company was said to be operating a mine near Red River, Taos county, in 1918.

CARLISLE MINING CO. NEW MEXICO

Out of business. Fully described in Vol. XIV.

In February, 1918, company filed petition in bankruptcy, giving liabilities as \$116,473 and assets as \$43,829.

Property: the Carlisle group at Steeplerock, N. M., was turned back to owner, G. H. Utter and is described under that name.

CHAMPION COPPER CO. NEW MEXICO

Offices: 7 Government St., Kittery, Me. **Mine address:** Copper Hill Box, Dixon, Taos county, N. M.

Officers: R. J. Burton, pres.; Benj. B. Earl, v. p.; Arthur M. Cripps, sec.-treas.; preceding, with E. J. Quiry, directors. Jas. A. Burton, gen. mgr., Dixon, N. M.

Inc. July 7, 1911, in Maine. Cap. \$400,000; increased March, 1919, from \$200,000; shares \$1 par; changed in 1918 from 2,000,000 shares, 10c par. Listed on Boston Curb. Annual meeting first Tuesday in March. Commonwealth Trust Co., Boston, transfer agent.

Report issued March 1, 1918, shows assets of \$20,336 cash, \$2,742 in accounts receivable, \$26,913 as equipment and development, and \$150,008 as mining property. No later report.

Property: 468 acres, made up of 15 claims, on Copper Hill, in the Copper Mountain district of Taos county, 9 miles east of Embudo, the nearest railroad station, and 25 miles N. E. of Taos, 2 potash claims of about 40 acres, a mile from the mine, and 85 acres in the Big Bug mining district of Arizona. The potash claims, the Arizona property, and ten claims of about 200 acres, were purchased in 1917. The remainder of the property was acquired at foreclosure sale 1914, for \$15,499. Mine is said to have 8 practically parallel veins of 18" to 20' width, between a schist footwall and quartzite hanging wall, the ore carrying cuprite, malachite and chrysocolla, succeeded at depth by chalcocite and gray copper: ore carries silver and gold, with chalcopyrite beginning to show in lower workings, all in a quartz gangue.

Development: includes shallow shafts and surface cuts on several claims, a 250' shaft on the Champion, a 180' shaft sunk on a 4' vein in the Oxide mine, and a 500' tunnel, which has stoping ore and cuts a 45° blanket vein. Report for 1917 showed 200' of stoping and drifting, 930 tons hoisted and a yield of 67 lb. per ton milled.

Equipment: includes 2 horizontal boilers 54"x14", two engines, one 80-h. p. the other 40-h. p. gasoline hoist, 2 compressors and several drills. A 1,000' ground tram leads from the mouth of the Champion tunnel to orebins. A 15,300' gravity pipe line of 7" spiral steel riveted pipe conveys water from spring to reservoir at mill.

In May, 1918, company tried the Greenawalt process of leaching and electrolysis, thus saving, it was reported, 98% of all ore values. A plant capable of 60 tons per day was installed early in 1919.

About 40 men were working on the potash claims (1921), pending final decision in suit over ownership.

CHICAGO COPPER MINING CO.

NEW MEXICO

Dead; formerly operated near Oscuro, Lincoln county, N. M. Property described in Vol. XIII.

CHINO COPPER CO.

NEW MEXICO

Office: 25 Broad St., New York. **Mine office:** Hurley, Grant county, N. M.

Officers: Charles M. MacNeill, pres.; Daniel C. Jackling, v. p. and managing dir.; Charles Hayden, v. p.; C. P. Jenkins, treas.; with A. Chester Beatty, Sherwood Aldrich, W. Hinckle Smith, R. A. F. Penrose, Jr., John M. Sully, (gen. mgr.), directors; A. J. Ronaghan, sec.; John Ridgway, asst. sec.; Chadbourne, Rabbit & Wallace, gen. counsel. R. C. Gemmell, and H. G. S. Anderson, asst. gen. mgrs.; Horace Moses, mines supt.; O. F. Riser, mill supt.; G. L. Webster, cashier; D. D. Moffat, cons. engr. for mills. Guaranty Trust Co. of New York and Old Colony Trust Co., Boston, registrars; Bankers Trust Co., New York, and American Trust Co., Boston, transfer agents.

Inc. June 9, 1909, in Maine. **Cap.** \$3,500,000; \$5 par; increased to \$4,000,000, June 30, 1911; and again increased to \$4,500,000. April 2, 1912; 869,980 issued. Bond issues have been retired. Annual meeting, third Friday in April. Listed on New York and Boston stock exchanges. Range of shares during 1920 was \$41½ high and \$16¾ low; a total of 448,500 changed hands in New York. Price range in 1921, up to June 15, \$27¼—\$19½.

With the A. S. & R. Co. and Ray Consolidated, Chino Copper owns the Gallup American Coal Co., capitalized at \$4,000,000, and operating at Gallup, New Mexico.

In fall of 1920, company took a 3.68% interest, \$1,464,000 total amount, in the Copper Export Associations \$40,000,000 8% note issue; the associate companies agreeing to transfer 400,000,000 lb. of copper to the Association.

* Deficit.

Reports for first half of 1921 showed income account, \$85,801; plant shut-down expenses, \$200,478; operating loss, \$357,745.

Dividends: initial in June, 1913, \$2.25 being paid in that year; since when \$2.50 per share in 1914; \$3 in 1915; \$8.25 in 1916; \$9.90 in 1917; \$4.50 in 1918; \$3 in 1919, and \$1,125 in 1920. Dividends were passed in last quarter of 1920 and first of 1921. The total is \$29,991,709.

Property: 214 mining claims (3,604 acres) at Santa Rita, of which 183 claims (3,151 acres) are patented. Also 120 acres of agricultural land adjacent to the mining claims. The mill-site at Hurley, including water-rights and residue-disposal area, totals 10,891 acres.

The property is the old Santa Rita del Cobre mine, which is the oldest copper mine in New Mexico, and the second oldest in the United States, having been opened, 1804, by Spaniards. The property was worked by an American named Pattie, in 1822 and to 1827. It was in possession of a Frenchman from 1828 to 1834, when an American called McKnight, began operations which ceased in 1836. From 1840 to the late fifties, it was in possession of a Spaniard. In 1851 Santa Rita was the headquarters of the American Commissioners of the Boundary Survey. Some time before 1860 four Americans attempted to operate the property. In 1862 Gen. Sibley, of the Texas Confederate force, held the mine. In 1873 M. B. Hayes, acting on behalf of Denver people, succeeded in purchasing the claims, attempting to perfect the title by obtaining U. S. patents, although patents had been refused by the Commissioner of the Land Office in 1870. Hayes' application was turned down in April, 1873. Between that date and the final decision of the Secretary of the Interior in November, 1873, title was obtained by Hayes from the surviving heirs of the original Spanish estate and final U. S. Patent was obtained to the claims covering the Santa Rita del Cobre Grant. Title was acquired by the Chino Copper Co. from the Santa Rita Mining Co., since dissolved.

Geology: Santa Rita is situated in the Central mining district, Grant county, New Mexico, on a branch of the Santa Fe system which connects at Whitewater with the Deming-Rincon division of the same railroad. The orebody and town of Santa Rita are located in a distinct basin and the rocks exposed in the district may be roughly divided as follows: 1. sedimentary; 2. intrusive; 3. extrusive. The sedimentary formation, of which there is a large area in comparison with the intrusive exposures, consists of limestones of more or less purity, and belonging to the sub-carboniferous and carboniferous series, there also being some isolated exposures of Devonian rocks. These beds vary from nearly pure limestones, through cherty limes and shaly limes, to shales. A considerable area of Cretaceous sandstones and shales is exposed through faulting, the former converted into quartzite in the immediate neighborhood of the intrusives. The principal intrusive rocks in the Santa Rita basin are grano-diorite, a quartz-monzonite porphyry, and another of distinct porphyritic texture which may be classed as andesite. This latter rock intrudes the two general types as also the sedimentaries, in sills, lacoliths and dikes. The boundary forming the S. E. side of the Santa Rita basin is composed of two flows,

the principal one being rhyolite and rhyolite tuff overlaying an older flow which is of an andesite nature.

The grano-diorite is intrusive into and across the edges of the sedimentary series, which form a syncline dipping to the south from the northerly bordering ridges toward the lowest point of the basin. The area within the basin has been strongly faulted in wide zones and in two general directions. The intersections of the numerous faults have resulted in a roughly circular shear zone that has a diameter of $\frac{3}{4}$ of a mile. This zone has been the depository of the valuable copper minerals, chalcocite, cuprite and native copper. Bornite, chalcopyrite and cuprifera pyrites are also found, but to a much lesser extent than the previously named. There also occurs in small restricted areas, malachite and azurite with a very limited amount of chrysocolla.

Development: the old workings, which were very extensive, have been practically eliminated by the steam-shovel operations.

Recent work:

Year	Churn-drilling feet	Overburden moved cu. yd.	Ore mined tons	Ore reserves tons	Copper content per cent	Cost of mining p. t.
1920...	2,522,135	2,332,730	105,689,247	1.530	94.73¢
1919...	924	3,161,381	2,243,346	94,781,525	1.620	92.26
1918...	15,020	3,264,556	3,749,238	96,552,026	1.630	92.81
1917..	22,425	3,712,414	3,607,825	62.93
1916..	13,161	3,564,623	3,216,065	95,555,843	1.656	50.04

Some portion of ore mined is sent to stock piles; a very small amount is shipped direct to smelter.

Equipment: consists of 10 steam-shovels, 27 locomotives, 155 dump cars, of 6 to 20 cu. yd. capacity. Company operates about 24 miles of track, giving access to the pits. There is also a primary crushing plant, equipped with 48"x60" jaw crusher, together with bins for handling and breaking up coarse material loaded by shovels.

Mill: the concentrating plant at Hurley, 9 miles from the mine on the Santa Rita branch of the Santa Fe railway, with original capacity of 5,000 tons per day, was started in October, 1911, but is now equal to 11,000 tons daily, due to improved metallurgical methods, and addition of 2 units, making 7.

The mine has a coarse-crushing plant, consisting of gyratory crushers, 72"x20" Garfield rolls, producing a maximum size of $\frac{3}{4}$ ". The mill is equipped with 16"x42" rolls for preliminary grinding and Garfield Chilean mills for final grinding. Roughing treatment consists of Garfield tables, followed by Wilfleys and Richards-Janney classifiers and Isbell vanners. Part of the enlarged mill was set aside for treating 500 tons of partly oxidized ore daily. A 5,000-ton tailing retreatment plant will start as soon as preliminary tests are satisfactory. There are several million tons of material awaiting treatment.

Graphic metallurgical control at the works is described by H. M. Merry in Bull. 153, September, 1919, of A. I. M. & M. E. By means of large wall-charts a daily record of essential data is kept, such as weight of ore milled, assays of headings, tailings, and concentrates, screen analyses, costs, and price of copper. Such presentation is necessary at any plant, or mine, so results may be seen at a glance.

Power plant includes twelve 445-h. p. Heine boilers, three 1,250 k. w. generators, direct-driven by Nordberg Corliss engines, and one 2,000 k. w. Allis-Chalmers turbo-generator set. Primary water is secured from the Apache Tejo Spring, $3\frac{1}{2}$ miles south of Hurley, from underflow of White-water draw, Cameron Creek draw and Whiskey Creek draw. There is also

in use a storage reservoir below the mill, the dam forming this reservoir having been built out of mill tailings and having storage area of nearly 3,000 acre feet. Coal is obtained from the mine in the Gallup field of New Mexico.

Settlement at Hurlley includes in addition to mill and accessory buildings, office building, store, school, shops and dwellings, town having population of about 3,500 people. Town of Santa Rita, on company ground, has population of over 4,000.

Operations suspended on April 1, 1921, to await improved market conditions. Figures for first quarter of 1921 are: 330,607 tons of ore mined, assaying 1.536% copper; 345,660 tons of 1.69% copper ore treated; net production 8,570,034 lb. of copper at cost of 14.56c.; net operating loss, \$53,136. Net production for 2nd quarter of 1921 after smelter deductions was 567,248 lb. with an operating loss of \$120,119. Copper is marketed through the new agency of Guggenheim Brothers.

Both property and management are regarded as exceptionally good, and the stock as a very high-grade investment.

CHINO DEL NORTE COPPER CO. NEW MEXICO

Address: C. W. Hoyt & Co., 79 Milk St., Boston, Mass. Mine address: Geo. E. Coxe, gen. mgr., Hanover, N. M.

Officers: Wm. A. Ulman, pres., 233 Broadway, New York City; with Elmer E. Fox, Mesheck Frost, H. O. Bursom, Geo. E. Coxe, Clarence W. Hoyt, F. Greer Dodd, directors. John H. Leddy, sec.-treas. Wm. H. Janney, cons. engr.

Inc. in Delaware. Cap. \$3,000,000; \$1 par. Stock offered at 50c in 1920.

Owns its properties through ownership of capital stock of El Norte Copper Co., of New Mexico, the operating company. Properties were paid for partly by 110,000 shares, \$1 par, of preferred stock of the El Norte Copper Co.

El Norte Copper Co.

All the common stock and all but 11,000 shares of preferred stock of this company, held by Chino Del Norte Copper. The El Norte owns the New Mexico holdings.

Property: 4 separate tracts, 29 claims, 600 acres, and 17 more claims under option near Fierro and Hanover in the Central mining district, Grant county. Tracts cover contact deposits, in part covered by gossan, extensively mined for iron ore.

Development: by 130' Mockley shaft, showing 12' vein with 8 to 12% copper ore; also the Rattler tunnel and workings and several shallow shafts mostly sunk by former owners to get out very high grade oxidized ores, and not carried below water level. Examined by D. C. Sutton. Idle, 1921.

CLEVELAND & WEATHERHEAD CO. NEW MEXICO

See under Deadwood Mining & Milling Co. Described in Vol. XIII.

CLEVELAND-MINE NEW MEXICO

Owned by Empire Zinc Co., of Colorado, which see. Closed down permanently, 1919.

C. O. D. LEASING CO.**NEW MEXICO**

Idle for many years. Probably out of business.

Mine: at Lordsburg. Hidalgo county, N. M. Described in Vol. XII, 1916.**CO-OPERATIVE MINING CO.****NEW MEXICO****Office:** Lordsburg, N. M.**Officers:** E. H. Taber, pres.-gen. mgr.; C. A. Ball, sec.-treas.; D. W. Taylor, asst. sec.; H. C. Walter, v. p.-mgr.**Inc.** 1919, in New Mexico. **Cap.** \$250,000; \$1 par; increased to \$500,000, June, 1921.**Property:** a lease and option on 8 claims, 160 acres, (in Gold Hill district, Grant county, said to show argentiferous lead sulphide in 4' fissure vein in monzonite. A body of native silver ore, found 150' from the surface, was said to assay \$1,000 per ton. The Yankee Girl claim, purchased 1919, has 3 feet of 15 oz. ore which is being developed.**Development:** by 200' incline shaft and 250' of workings. Company estimates reserves at 5,000 tons.**Equipment:** 10-h. p. hoist and an 80-ton mill with flotation unit reported in operation, May, 1921, and making a recovery of 91%.

Shipments made during 1921 to El Paso smelters totaled 600 tons and returned \$34,200, or an average of \$57 per ton. One shipment ran 68.5 oz. silver, 9% lead and \$1.75 gold, or \$169 per ton. Reported to have shipped 100 tons in November, 1921.

COPPER BELT SILVER & COPPER MNG CO.**NEW MEXICO****Office:** 108 W. 1st St., Magdalena, N. M.**Officers:** Hoy Bonnett, pres.-mgr.; J. A. Houghton, v. p.; S. G. Pollack, sec.; W. H. Johnson, treas.**Inc.** in Colorado. **Cap.** \$175,000; 5c par; selling at 8 cents, May, 1921.**Property:** 13 claims, unpatented, 245 acres, 2½ miles N. W. of Magdalena, Socorro county, said to show silver-copper ore with some gold.**Development:** mainly assessment work consists of open-cuts with several crosscuts, 200' in length and a 295' double compartment shaft. Equipped with hoist and blacksmith shop.

Reported on, December, 1920, by Paul B. Moore, who recommends a thorough diamond drill exploratory campaign.

CORONA LEAD & SILVER MINING CO.**NEW MEXICO****Address:** Santa Fe, New Mex. **Mine address:** Corona, N. M.**Officers:** Ashley Pond, pres.; R. L. Stevens, v. p.; Jas. A. French, sec.-treas., with G. H. McMillan, Francis C. Wilson, Geo. Z. Mellen and L. A. Atkinson, directors. Geo. Z. Mellen, supt.**Inc.** April, 1919. **Cap.** \$250,000; 25¢ par; 600,000 shares issued, averaging 9¢ per share.**Property:** 11 claims, 2 patented, 170 acres in Gallinas Mtns., Red Cloud mining district, Lincoln county, held partly under lease and bond and partly by location. Ore occurs as lead carbonates and massive galena in fissure veins, 1-8' wide in quartzite, ore averaging 28% lead, 3% copper and 4 oz. silver.**Development:** by 210' shaft and about 500' of workings said to block out 160 tons of ore, averaging 35% lead.**Equipment:** includes 150 cu. ft. compressor, gas hoist, drills, 3-ton truck and 5 buildings.**Production:** in 1920 was 400 tons, containing 15,745 lb. copper, 196,120 lb. lead and 1,348 oz. silver.

Management planned 1,500' of drifting on 200' level and installing larger hoist in 1921.

COSSACK MINING CO.**NEW MEXICO**

Dead. Formerly operated near Bland, N. M. Described in Vol. XIV.

CUCHILLA COMPANY**NEW MEXICO****Idle.** **Address:** c/o Stephen B. Davis, Jr., East Las Vegas, N. M.**Property:** 1,500 acres of mineral land between the towns of Lucero and

Guadalupita, Mora county, N. M., slightly developed by tunnels and shafts. Company has been inactive since 1916.

DEADWOOD MINING & MILLING CO. NEW MEXICO

Address: Mogollon, Socorro county, N. M. Earl C. Cleaveland, gen. mgr., P. O. Box 1098, El Paso, Texas.

Inc. in New Mexico.

Property: the Deadwood and Sunburst mines and mill, near Mogollon, showing the Queen, Deadwood and Confidence-Last Chance veins which average 8-10' in width, extend for 2,500' through the claims and carry gold-silver ore.

Development: by 500' shaft and about 500' of workings.

Equipment: includes 60-ton mill with concentration and cyanide equipment, oil engine, electric hoist, etc.

Production: 44,000 tons of ore since 1905, yielding \$325,000.

Property is under option to the **MoGollon Mines Co.**

DIVIDEND MINING & MILLING CO. NEW MEXICO

Defunct and stock valueless. Mine near Estey, Socorro county, N. M. See Vol. XIII.

DONNA DORA MINING CO. NEW MEXICO

Organ, Dona Ana county, N. M. Reorganized as Mineral Hill Mining Co., described in Vol. XIII.

DUNCAN MINING & MILLING CO. NEW MEXICO

Defunct.

Address: C. C. Royall, receiver, Silver City, N. M.

Erected an 80-ton cyanide mill, 1919, but plant closed down December, 1920, and sold at public auction, July 2, 1921. Indebtedness of company given as \$142,706. Fully described in Vol. XIV.

ECLIPSE MINING & MILLING CO. NEW MEXICO

Dead or dormant. Last address: Duncan, Ariz., and Steeplerock, N. M.

Officers: Geo. W. Trimble, pres.; Ben. F. Barbour, sec.-treas. and mgr. with W. C. Downey, Wm. O. Olsen, Chas H. Lee, Morgan M. Wilson and C. R. Meyer, directors.

Inc. in Arizona. Cap. \$1,000,000; shares \$5 par; 106,000 shares issued; Annual meeting, first Wednesday in January. Is the successor to the Shamrock Mining & Milling Co., described in Vol. XII.

Property: 24 claims, 480 acres in Steeplerock mining district, Grant county, said to show a fissure vein in andesite, from 6-8' wide with S. E.-N. W. course. Ore is silicious and reported to assay 1.16 oz. gold, 15.1 oz. silver and 6.84% copper.

Development: by several tunnels and shafts.

ECONOMIC MINING & MILLING CO. NEW MEXICO

Dead. Fully described in Vol. XIII.

EDISON MINING & MILLING CO. NEW MEXICO

Probably dead. Mail returned unclaimed from former address, Red River, Taos county, N. M.

EIGHTY-FIVE EXTENSION COPPER CO. NEW MEXICO

Mines at Lordsburg, N. M.

Officers at last accounts: Lester B. Doane, pres.; L. D. McClure, v. p. and gen. mgr.; De Witt Murray, sec.; C. C. Faires, treas., with E. K. Davis, directors.

Inc. in Arizona. Cap. \$5,000,000; \$1 par; 2,000,000 shares paid for property are being held in escrow; 400,000 shares offered the public at 50c each, April, 1917.

Property: 600 acres adjoining the 85 Mining Co.'s ground at Lordsburg, shows several veins along a dike reported to be 75' wide and traceable for 600'. Ore is silicious and carries gold, silver and copper values.

Development: by 310' vertical shaft, 265' air shaft and the Hart shaft 125' deep, with about 1,700' of openings. The management (or perhaps we should say the promoters) claimed to have 463,460 tons of ore in sight aver-

aging \$13.50 per ton, giving the property a valuation of \$6,284,517. This estimate is based on a report by J. L. Wells.

Production: to date 149 cars of ore shipped in former years from the Atwood mine, which netted leasers \$40,965.

Property may have merit, but the statements above are in our opinion, not warranted by facts.

EIGHTY-FIVE MINING CO.

NEW MEXICO

Company dissolved. Fully described in Vol. XIV. Property sold to Calumet & Arizona Mng. Co., which see.

EL CENTRO MINING & MILLING CO.

NEW MEXICO

Address: Lordsburg, Hidalgo county, N. M.

Officers: E. S. Eno, pres.; Geo. M. Peck, v. p.; R. F. Fitz, sec.-treas., P. O. Box 275 Los Angeles, Cal., with Henry Muntz, Alfred Cole, D. D. Culver and J. A. Rovelstad, directors.

Inc. Nov., 1914, in Arizona. **Cap.** \$200,000; \$1 par; outstanding 100,000. Company in 1915, bought the Last Chance mine, owned by the Sutton Consolidated Mining Co., and claimed to have produced \$135,000 in the past.

Property: 4 claims, 2 patented, 68 acres, in the Pyramid mining district, 8 miles south of Lordsburg, said to show shoots 9-30' wide of silver-copper ore in a fissure vein in andesite.

Ore reserves: claimed to be 10,000 tons of ore, assaying \$4 to \$12 per ton.

Development: 275' vertical shaft with 2,000' of workings. Mine idle in 1915-1916, but present management resumed operations, 1917. During 1919-'20 mine was operated under lease by Pyramid Mng. Co. In July, 1921, new interests were reported operating the mine.

EL CLIFF MINING CO.

NEW MEXICO

Probably dead. Mine at Hermosa, N. M. See Vol. XI, Copper Handbook.

EL NORTE COPPER CO.

NEW MEXICO

George E. Coxe, mgr., Fierro, N. M.

Is the operating company for Chino del Norte Copper Co., which see.

EL PASO MINING & MILLING CO.

NEW MEXICO

Dead. Formerly operated near Pinos Altos, N. M. Described in Vol. XIV.

EMPIRE ZINC CO.

NEW MEXICO

Described in Colorado section of this book.

ERNESTINE MINING CO.

NEW MEXICO

Absorbed, June, 1915, by Mogollon Mines Co., which see.

EXCELSIOR MINING & DEVELOPMENT CO.

NEW MEXICO

Probably dead. See Vol. X.

FLAG TUNNEL MINING CO.

NEW MEXICO

Idle and probably dead. **Former address:** Taos, N. M.

Officers: Jose Montanar, pres.; R. F. Oakley, sec.; W. T. Hinde, treas.; L. C. Haberstich, supt.

Inc. March, 1919. **Cap.** \$1,000,000; \$5 par; 7,000 shares outstanding.

Property: 4 claims, about 80 acres and a tunnel site, 200 acres in the Keystone mining district, Taos county, said to show gold tellurides in several veins.

GARNET COPPER CO.

NEW MEXICO

Idle several years.

Address. Ohaysi, N. M.

Officers: James H. Parker, pres., and C. Jungk, sec.

Inc. in New Mexico, in 1916. **Cap.** \$60,000; shares \$1 par.

Company operated the Garnet, Mae Belle, James Fisk and Shoo Fly mines at Ohaysi, Otero county, N. M.

Development: deepest shaft is down 450'. The deposit occurs in garnet-lime zone of altered sedimentaries at porphyry contact, and ore con-

tains copper and gold. Ore was sent to the El Paso smelter. No recent returns received.

GIANT COPPER CO.**NEW MEXICO**

Officers: F. R. Jones, pres., El Paso; J. L. Burnside, v. p.; D. C. Crowell, sec.-treas.; F. P. Jones, T. L. Lowe, J. Agee, T. W. Carter D. C. Crowell and D. T. White, directors, at last accounts.

Inc. 1917, in New Mexico. **Cap.** \$3,500,000; \$1 par; 620,000 issued.

Property: 61 claims in the Burro Mountain district, N. M. including those of National Copper Co.

GOLD BELL MINING CO.**NEW MEXICO**

Dead. See Vol. XIV.

GOLD BUTTES MINING & MILLING CO.**NEW MEXICO**

Office: Duncan, Ariz.

Officers: G. F. Fraser, pres.; Daniel Fraser, v. p.; John Evans, sec.-treas.; A. Fraser, mgr., with W. Hutchins and M. C. Tilletson, directors.

Inc. Dec., 1915, in Arizona. **Cap.** 750,000 shares; par \$1.

Property: 920 acres, divided into 3 groups in the vicinity of Twin Peaks, Steeplerock district, Grant county, N. M., about 20 miles N. E. of Duncan, Ariz. The properties are (1) the Rival Extension group of 9 claims, located on the Rival lode, showing a low grade gold ore; (2) the Twin Peaks group of 26 claims, said to contain gold sulphides; (3) the Dark Thunder group of 120 acres reported to have shipped 30% copper with some silver and gold. Company also owns 50,000 shares of the Rival Mining Co.

Development: at the Rival Extension and Twin Peaks. by a 265' shaft and 4,000' of workings; the Dark Thunder has been prospected in several places.

GOLD & COPPER DEEP TUNNEL M. & M. CO.**NEW MEXICO**

Office: Beaver Falls, Beaver county, Pa. **Mine office:** Elizabethtown, Cofax county, N. M.

Officers: A. T. McIntyre, pres.; G. E. Dachtler, v. p.; W. H. Martin, sec.-treas.; W. P. McIntyre, gen mgr. and supt., with J. M. Richards, directors.

Inc. Oct. 10, 1900, in New Mexico. **Cap.** \$500,000; increased 1912 from \$200,000, shares \$1 par; 282,894 issued. Annual meeting third Tuesday in July.

Property: in the heart of Cimarron range, on the west slope of Baldy mountain, 12,500' high, comprises 12 claims, 260 acres, in the Moreno district, 18 miles from the St. L. R. M. & P. R. R. at Ute Park. Orebody a contact between slate and monzonite, is developed by 2 shallow shafts and a 2,300' crosscut tunnel, planned to penetrate the mountain with a final length of 3,500', cutting 2 bodies of low-grade copper ore. Also said to carry a deposit of molybdenite. Total underground work, 4,400'.

Equipment: includes a 12-h. p. gasoline air compressor and 10 buildings; 20-ton stamp-mill. See U. S. Geol. Survey Prof. Paper, 68 p. 95, for geology of this district.

GOLDEN LINK CO.**NEW MEXICO**

Dead. Property sold. See Vol. XII and XIII.

GOLDEN LINK MINE**NEW MEXICO**

Address: Leach & Leach, owners, Cliff, N. M.

Property: 8 claims, about 8 miles S. E. of Mogollon, N. M. Contains gold bearing fissure vein in rhyolite with ore shoot 500' long and 3' wide, opened for 400' high. Ore is free milling and has averaged 1.5 oz. gold and 6 oz. silver per ton.

Development: by 3 tunnels, of 120, 65 and 100' in length and by 25' shaft.

Equipment: 50 h. p. hydraulic power plant running 5-ton mill.

GRANT COUNTY COPPER CO.**NEW MEXICO**

Address: H. T. Link, mgr., Las Cruces, N. M.

Company said to be developing a body of zinc ore. 1½ miles north of

Santa Rita. Mining is by tunnels. A 50-ton mill was constructed in 1919, and was producing a good grade of zinc concentrate at last account.

GREAT EAGLE FLUORSPAR CO. NEW MEXICO

Address: Lordsburg, N. M.

Officers: Merton Wentworth, pres.; Alford Roos, v. p.-mgr.; Cyrus Goodrich, sec.-treas. J. Hibbs, supt.

Inc. Sept., 1920, in New Mexico. **Cap.** \$100,000; all issued.

Property: the Great Eagle mine on the banks of the Gila river, 31 miles N. of Lordsburg, reported to be the largest fluorspar mine in the west. Ore occurs in a fault breccia in granite with streaks 25 by 1,000' long and 20' wide.

Development: by 300' tunnel to depth of 175'.

Equipment: includes 500' compressor, 150 h. p. engine, pump, hoist, and 150-ton concentrator. Reserves reported as 60,000 tons, averaging 60% fluorspar.

GREAT EAGLE MINING CO. NEW MEXICO

Fully described in Vol. XIV. Holdings taken over in 1920 by **Great Eagle Fluorspar Co.**, which see.

GROUNDHOG MINE NEW MEXICO

Mine in Grant county, produced 3,169 tons of silver-lead-copper ore in 1918 and 518 tons in 1919. Closed down in 1920.

HANOVER BESSEMER IRON & COPPER CO. NEW MEXICO

Fully described under its own title in Vol. XIV. Substantial stock interest owned by the **U. S. Smelting, Refining & Mining Co.** (q. v.), which is in charge, also, of mining operations.

Shipments in 1920 amounted to 244,240 tons, netting the company \$36,106.

HANOVER COPPER CO. NEW MEXICO

Address: Hanover, Grant county, N. M. **Geo. A. St. Clair**, pres., **Duluth, Minn.**; **F. T. Walker**, mgr.

Inc. 1909. **Cap.** \$50,000; shares \$10 par.

Property: 18 claims, north of the Chino Copper property. Mine has shafts 70', 100' and 150' deep and tunnels 40' and 60' long, showing copper and zinc ores. Equipped with hoist and compressor.

Shipped zinc carbonate ore during 1919.

HANOVER MINES NEW MEXICO

Owned by **Empire Zinc Co.** of Colorado, which see.

HARDSCRABBLE MINING CO. NEW MEXICO

Company defunct; holdings taken over by the **U. S. Copper Co.**, which see. See Vol. XIII.

HECLA DIVIDE MINING CO. NEW MEXICO

Office: 85 Devonshire St., Boston Mass. **Nevada Address:** 321 State Bank and Trust Bldg., Tonopah. **Mine office:** Silver City, N. M.

Officers: **Luke B. Colbert**, pres.; **Frank A. Cashman**, v. p.; **Harold C. Pratt**, sec.-treas.; with **Geo. W. Allen** and **Wm. Forman**, directors. **P. R. Whytock**, mine engr.; **F. H. Davis**, supt.

Inc. April 3, 1919, in Nevada. **Cap.** \$150,000; 10¢ par; assessable; outstanding, \$72,504. Two assessments levied up to March, 1921. **Transfer agt.**, Metropolitan Trust Co., Boston; registrar, Old South Trust Co., Boston.

Financial statement: Dec. 31, 1920, shows: assets: cash, \$23,147; property, \$182,117; administration, \$13,467; development, \$28,314; total, \$249,523. Liabilities; capital stock, \$72,504, capital receipts, \$105,245; surplus is \$71,435.

Property: (1) control of a property near Pinos Altos, N. M. (2) ownership of 4 claims in Divide section, near Tonopah, Nevada.

New Mexico Property: 27 claims, about 500 acres, covers course of proposed Boston tunnel and embraces several old developed mines, including (a) Langston-Silver Hill mine, held by lease from **Mexarko Mng. Co.** q. v.; (b) Arizona claim; (c) Manhattan group, 10 claims. (d) Boston group. These contiguous claims extend for a distance of about 2½ miles

along the line of the proposed tunnel. The tract shows diorite rocks, cut by quartz monzonite, traversed by 10 fissure veins, containing complex lead-zinc-copper ores with gold and silver values. In the Langston vein the ore varies from 16" to 6' wide and is said to average \$10.20 gold and 5.66 oz. silver per ton with 1% copper, 7.15% lead and 11.2% zinc. Ore mined, it is said, has averaged \$30 per ton.

Development: about 16,000' of old underground work, mostly from shafts on rough mountain sides. The new tunnel will be beneath the Silver Hill mine at 2,900' from the portal and at 800' in depth.

Equipment: adequate and to be supplemented by 150-ton K. & K. flotation mill in 1922.

According to J. H. Shockley, this new Boston tunnel, to be driven beneath the old workings, will open up 675,000 tons of \$30 ore with 1,250,000 tons possible ore 1,000' beneath tunnel.

The Nevada property was drilled in 1919, but work suspended 1920, as the New Mexico property was already developed.

The New Mexico property has merit and when tunnel is completed should become a good producer of milling ore.

HECLA MINING CO., THE

NEW MEXICO

Office: 652 South Spring St., Los Angeles, Calif. **Mine address:** Lordsburg, N. M.

Officers: R. E. Vandruff, pres.; John W. Wilson, v. p.; W. G. Wilbern, sec.-treas.; O. H. Reinholt, cons. engr.; Franklin W. Smith, of Bisbee, Ariz. geologist; E. K. Davis, gen mgr.

Inc. Oct. 17, 1916, in Nevada. **Cap.** \$850,000; shares \$1 par; treasury reserve, \$200,000; balance used, partly to pay for property and equipment and partly for development. No indebtedness.

Property: 9 claims fully paid for and another, the Bonnie Jean, under option, about 140 acres lying between the 85 and the Octo mines, 3 miles S. W. of Lordsburg, in Hidalgo county, and 2 miles from the S. P. R. R.

Geology: similar to that of the 85 and Octo mines. Country rock is diorite-porphry. General geology fully described by Lindgren in Prof. Paper 68, U. S. Geological Survey. Outcrops conspicuous and form landmarks, such as Lee's Peak, 500' from the Hecla, frequently mentioned by Lindgren. Gangue very silicious and ore is therefore in demand, for fluxing the basic ores from Bisbee. Sulphides found near the surface. Many mineral varieties occur, but main values lie in copper, gold and silver contents, said to average over \$30 a ton before the rise in metal prices.

Development: includes two 300' and several shallow shafts. One of the deeper shafts was to be enlarged, retimbered and deepened. The topography does not lend itself to successful tunnelling.

Equipment: includes 250-h. p. boiler plant, 40-h. p. hoist, 700 cu ft. air-compressor, pumps, etc. No returns received. Presumably idle.

HEMBRILLO COPPER MINING CO.

NEW MEXICO

Dead; formerly held property in Socorro county, N. M. See Vol. XIII, for full description.

HERMOSA COPPER CO.

NEW MEXICO

Property sold in 1919, and company out of business.

HILLSBORO DEVELOPMENT CO.

NEW MEXICO

Operating the Bonanza mine in Hillsboro, or Las Animas district Sierra county. Has 20-stamp flotation mill. Shipped some gold-silver bearing copper ore to El Paso in 1919.

HOP CANYON MINING & SMELTING CO.

NEW MEXICO

Office: 154 West Randolph St., Chicago, Ill. **Mine address:** Magdalena, Socorro county, N. M. **Registered office:** Oseuro, N. M.

Officers: Alpheus McCallum, pres.; A. Bement, v. p.; E. G. Raffety, treas.; A. B. Wilson, sec., with A. W. McCallum and Alexander McCallum, directors. J. A. McCallum, supt.

Inc. April, 1906, in New Mexico. **Cap.** \$1,000,000; shares \$100 par; 8,852 shares outstanding.

Property: 11 claims, 220 acres, 3 miles from Santa Fe R. R., in the Magdalena mining district, shows a shear zone in rhyolite running N. 25° W., with steep dip N. E. Surface shows thin seams of oxidized ore, developed by 1,550' crosscut tunnel together with shafts and open pits of about 4,000'. Company has expended almost \$71,000 on development work. Ore claimed to range from 2.50-47.35% copper, 1.2-219.7 oz. silver and 0.02 oz. to 1.15 oz. gold per ton.

ILLINOIS & SARATOGA MINES

NEW MEXICO

Address: C. T. Brown, Socorro, N. M. Mine at Kingston, Sierra county, N. M. Idle many years.

JACK MINING & MILLING CO.

NEW MEXICO

Idle and probably dead. The property was known as the Roosevelt group, a former gold mine in Gold gulch, Santa Rita mountains, near Bayard, a few miles S W. of Santa Rita. The ore deposit was said to show both silver-lead and molybdenum.

JACKS PEAK TRAMWAY & MNG. CO.

NEW MEXICO

Office: Dalhart, Tex. **Mine address:** Ancho, N. M. H. E. McMullan, pres.-gen. mgr.; A. C. Johnson, sec.; Max K. Smith, supt.

Cap. \$300,000; no bonded debt.

Company has iron ore properties and operates an 8-mile 36" tramway, to connect with the E. P. & S. W. R. R., completed Nov., 1920. Earnings are put back into development and construction work.

JARILLA CONSOLIDATED COPPER CO.

NEW MEXICO

Dead. Reorganized under name of **Boston & Brice Copper Co.**, which see.

JARILLA COPPER SYNDICATE, INC.

NEW MEXICO

Address: Brice, via Oro Grande, Otero county, N. M. Fully described in Vol. XIII.

JOHNNY BULL MINE

NEW MEXICO

Property: 3 patented claims, south of Steins Pass, between S. P. and E. P. & S. W. R. R., on western slope of Peloncillo range, shows a contact deposit between limestone and a N.-S. monzonite dike. The ore is said to average 5% copper and to run high in lime and iron.

Development: includes 2 old shafts, 100' and 150' deep, with 1,000' of work, exposing 2 parallel veins, each 20' wide. Property was formerly owned by the Johnny Bull Copper Mining Co., whose charter was forfeited in 1902.

Production: about 225 tons of 5% ore has been mined to date yielding gold and silver also.

Idle since the death of the owner, W. H. Henry, in 1919.

JUMBO MINING CO.

NEW MEXICO

Probably dead.

Office: Deming, N. M. C. W. Lininger supt.

Officers: J. J. Hvatt, pres.; C. J. Kelly, v. p.; E. L. Foulks, sec.-treas.

Inc. 1917. **Cap.** \$250,000; shares \$1 par; 50,000 treasury shares offered, October, 1917.

Property: in Cook mining district, 25 miles north of Deming and near the Graphic and the Cook Peak mines. Claims show four strong parallel fissure veins in andesite porphyry.

Development: by 250' shaft showing 2' vein said to carry high-grade silver-lead ore.

Equipment: 50-h. p. boiler, compressor, 50-h. p. oil engine and 8x10" steam hoist. No recent returns.

KELLY MINE

NEW MEXICO

Owned by **Empire Zinc Co.** of Colorado, which see.

KING & QUEEN COPPER CO.**NEW MEXICO**

Office: 111 S. Second St., Albuquerque, N. M.; also Trust Bldg., El Paso, Texas.

Officers: J. O. Hamilton, pres.; J. R. Fisk, v. p.; W. K. Ramsey, sec-treas.; H. F. Perry, supt.

Inc. 1907, in New Mexico. Cap. \$1,000,000; shares \$1 par. El Paso Title Co., El Paso, Texas, registrar.

Property: 14 claims, about 260 acres, 8 miles S. W. of Steins Pass, near the King Kendall and Johnny Bull mines, shows limestone cut by a large N.-S. dike of monzonite porphyry with ore occurring in contact metamorphic deposit of altered garnetiferous limestone. Ore carries a little bornite, chalcopryite, pyrite, and on the Queen claim, some chrysocolla. It is low-grade, carries zinc and lead, and is hard to concentrate.

Development: by shallow workings showing ore said to average 3½% copper. Property has been worked by lessees for 5 or 6 years. Shipments made to El Paso smelter, 1920.

KING COPPER CO.**NEW MEXICO**

See same title under Arizona.

LA LUZ COPPER CO.**NEW MEXICO**

Dead. See Vol. XII.

LAKE VALLEY SILVER MINES CO.**NEW MEXICO**

Address: Lake Valley, New Mexico. Stauber & Wright, lessees.

Property: a group of 2 claims, at Lake Valley, Sierra county, credited with production of 5,000,000 oz. of silver prior to 1893. Ore occurs in pockets, or chambers in a bed of limestone overlain by shale. The manganese oxides occur as manganite, pyrolusite and wad.

Development: by several shafts to water level, or 150' depth. The mine was reopened in 1917 and to end of 1920 produced 4,676 tons of manganese ore and 94,495 oz. silver, with gross value of \$121,379. Deficit for same period was \$1,824.

LAS ANIMAS PEAK GOLD MINES CO.**NEW MEXICO**

Mail returned from former office: 1516 No. American Bldg., Chicago, Ill. Mine office: Hillsboro, N. M.

Officers: Hon. E. W. Kirkpatrick, pres.; R. Liebman, v. p.; C. B. Van Deman, sec.-mgr.; W. A. Nason, treas., with L. E. Marvin, W. McCarty Moore and J. H. Palmer, directors. E. B. Van Deman, supt.

Inc. 1914, in Arizona. Cap. \$1,000,000; shares \$1 par; 450,000 issued Annual meeting, third Wednesday in January.

Property: 12 claims, unpatented, 240 acres, 4 miles N. of Hillsboro, Sierra county, shows gold-silver ore in a fissure vein, said to be 3-12' wide, striking N. and dipping 70°. Developed by several shafts to depth of 435'.

Equipment: includes 50-h. p. steam hoist, pump, compressor and mill.

Property was a good producer under former owners, the Philadelphia M. & M. Co., which went into bankruptcy in 1907. Litigation followed and mine remained idle until acquired by present company in 1914. Probably dead.

LAST CHANCE MINE**NEW MEXICO**

See El Centro Mining & Milling Co.

LAWRENCE MINING CO.**NEW MEXICO**

Dead. See Vol. XIV.

LITTLE HATCHET MINING CO.**NEW MEXICO**

Address: Hachita, N. M.

Officers: F. W. Lincoln, pres.; J. M. Bader, v. p.; A. E. Bader, sec.-treas. Cap. \$150,000; stock offered at 25¢.

Property: about 399 acres, 11 miles S. W. of Hachita, Grant county, includes the Monte Cristo, Liberty and Vindicator mines, containing copper, gold, and silver. Sinking of 3 shafts is in progress, showing good ore. Equipment installed, 1921.

LONE MOUNTAIN SILVER MINES CO.**NEW MEXICO**

Address: D. A. Richardson, First Natl. Bank Bldg., El Paso, Tex.

Dead. Formerly owned claims near Silver City. See Volume XIV.
LUCKY GROUP **NEW MEXICO**

Presumably idle. Property fully described in Vol. XIII.

MAMMOTH MINING & MILLING CO. **NEW MEXICO**

Probably dead; formerly at Pinos Altos, Grant county, N. M. See Volume XIV.

MANGAS DEVELOPMENT CO. **NEW MEXICO**

Office: Silver City, N. M. **Mine office:** Tyrone, Grant Co., N. M.
Officers: J. E. Saint, pres.; G. A. Kaseman, v. p.; M. W. Porterfield, sec.-treas., with W. C. Porterfield and R. P. Barnes, directors.

Property: 37 patented claims, in the Burro Mtn. district, adjoining holdings of the Phelps Dodge Corp., and fully described in Vol. XIII.

Drilling operations to be resumed as soon as conditions justify.

MEMPHIS MINING CO. **NEW MEXICO**

Office: 204 Mills Bldg., El Paso, Texas. **Mine office:** Organ, Dona Ana county, N. M.

Officers: J. I. McCullough, pres.; W. N. Small, v. p.; Jas. C. White, sec.-treas. with T. S. Semple and Chas. E. Head, directors.

Inc. 1911, in Arizona. **Cap.** \$1,000,000; shares \$1 par; 650,000 shares outstanding.

Property: 5 claims, 100 acres, consisting of the Old Memphis mine, Contention and Copper Bow group.

Development: by 4 shafts with about 2,000' of workings. Past shipments said to have averaged 10% copper, 6 oz. silver, and \$3 gold per ton.

Property was under lease to Phelps Dodge Corp. at last account.

MEMPHIS RED RIVER MINING CO. **NEW MEXICO**

Address: Box 487, Raton, N. M.

Officers: H. B. Pooler, pres.; W. D. Kershner, v. p.; W. G. Hughes, sec.-treas. J. M. Clarke, F. B. Evans, F. T. Divers, Chas. Frazer, Thos. Gable and J. Kastura, directors.

Inc. June, 1914, in New Mexico. **Cap.** \$300,000; \$1 par.

Property: 4 claims, patented, 70 acres, in Red River mining district, Taos county, showing a quartz vein 3-6' wide containing gold and silver sulphides surrounded by porphyry.

Development: by tunnels 300', 225' and 175' long. Underground workings total 1,100'. Reserves estimated at 5,200 tons of \$12 ore.

Equipment: includes 25-ton mill, with a flotation unit, 6 miles from mine. Management expected to erect mill at mine early in 1921, and to resume development work.

Production: 300 tons of \$17 ore up to 1917, when operations were suspended.

MERRY WIDOW MINE **NEW MEXICO**

Operated under lease by Radium Treatment & Sanatorium Co., Silver City, N. M. Owned by Otto Forster and Jack Grissom, Silver City, N. M.

Property: 32 claims, about 640 acres, in White Signal district, Grant county. Ore occurs in a fissure vein in granite porphyry carrying gold, bismuth, copper and tobernite. Developed by shafts to depth of 200'.

MEXARKO MINING CO. **NEW MEXICO**

Is a subsidiary of the Albany Divide Mining Co., which owns 51% of the stock.

Office: Merchant's Bank Bldg., Ft. Smith, Ark. **Mine office:** Silver City, N. M.

Officers: W. E. Clark, pres.; H. C. Pratt, sec., J. I. Groves, treas., with J. L. Adams, O. O. Clark, Geo. Sengol and W. H. Emrick, directors.

Cap. \$1,000,000.

Property: the Langston mine in Pinos Altos district, 7 miles from Silver City, Grant county, said to cover the Langston vein for a length of 1680'. The vein carries gold, silver, lead, zinc and copper, samples averaging \$30 per ton. Mine is leased on a graduated royalty of 15% to 50% of net returns, by the Hecla Divide Mining Co., which see.

Development: by 200' shaft, with levels at 100' and 200', and drifts on the 200' level north for 500' and south for 950'. Mine will be opened by a deep tunnel.

Equipment: hoist, compressor, air drills and flotation plant to be installed according to the plans of the operating company.

MINERAL HILL MINING CO. NEW MEXICO

Dead. See Vol. XIII.

MINERAL MNG. & MLG. CO. NEW MEXICO

J. O. Seth, agent, Santa Fe. N. M. Jas. B. Johnston, supt.

Cap. \$50,000. Reported operating in Taos county.

MISER'S CHEST SYNDICATE NEW MEXICO

Idle. Organized by Silver City men to operate the Miser's Chest mine adjoining the Bonney ground at Lordsburg. Developed to depth of 450', opening up a vein of copper sulphide ore. Twelve carload shipments reported made to El Paso smelter in 1920.

MOFFETT CONS. MINES CO. NEW MEXICO

Property: Virginia mine, in Kingston mining district, Sierra county, said to show a vein 6' wide, containing ruby and hornsilver. A 400' adit was being driven (1921) and equipment installed.

MOGOLLON MINES CO. NEW MEXICO

Address: Sidney J. Kidder, gen. mgr.; C. A. Botsford, supt., Mogollon, Socorro county, N. M.

Officers: Frank H. Hitchcock, pres.; O. F. Weber, v. p.; Alfred Levinger, sec.; J. W. Hoban, treas., all of New York City, with J. U. Sebinus, and F. W. Vellacott, directors.

Inc. Dec. 6, 1912, in Maine. **Cap.** \$3,000,000; \$5 par; \$1,778,410 outstanding. New York Trust Co., New York, registrar. Annual meeting, second Monday in October.

Operations for six years (1915-1920), showed a profit of \$105,974 of which \$77,771 was distributed in dividends. Last dividend distributed in 1915.

Operating loss for 1920 was \$8,279. Balance of quick assets, Dec. 31, 1920, was \$136,115 and working assets (supplies) \$92,260.

Property: 16 claims, 12 patented 216 acres, at Mogollon. In 1915, management absorbed the Ernestine Mining Co., which was organized November, 1902. During 1918, company acquired options on both the Confidence and Deadwood mine, adjoining properties in Mogollon.

Ore: gold and silver sulphide, in quartz veins in andesite and rhyolite, said to average \$12 to \$15 per ton. Main vein, known as the Last Chance, strikes S. E.-N.-W.; dips 60 to 70° and is 10 to 26' wide.

Development: incline shaft 980' below main tunnel, which is 2,972' long; greatest depth of workings, 1,780'; workings total 34,465'. Shrinkage stoping is used. Main workings are on Last Chance and Top claims.

Equipment: includes electric hoist, compressor, oil engines, electric power, 40-stamp mill and cyanide plant, capacity 160 tons daily.

Production:

Yield

	Ore treated, tons	Gold, oz.	Silver, oz.
1920.....	41,895	6,094	324,968
1919.....	42,756	5,962	301,874
1918.....	38,566	4,312	203,560
1917.....	52,222	6,460	344,691
1916.....	44,904	7,171	371,350

During 1918 plant operated at only part capacity due to water shortage and influenza epidemic; during 1919 and 1920, normal operations were maintained. Property now (1922) operating at full capacity, producing 150 tons daily, and reported making good profits.

MOLYBDENUM CORPORATION OF AMERICA NEW MEXICO

Address: 212 Empire Bldg., Pittsburg, Pa.

Office, D. C. W. Co., Inc., Weir, Kan.

mgr.: M. B. Rapp, v. p.; Wm. H. Weis, treas.; J. S. Crawford, sec., with Marx Hirsch, C. W. Savery and E. A. Howell, directors.

Inc. 1920 in Delaware, to take over holdings of the R & S. Molybdenum Mines Co. **Cap.** \$5,000,000; \$5 par.

Property: about 250 acres near Questa, Taos county. Ore is found as veinlets in altered limestone and monzonite-porphry. The property is described in E. & M. Journal, Dec. 13, 1919 and in Economic Geology for Nov., 1920.

Development: by 600' of tunnel work, claimed to have proved a considerable amount of 1% ore. **Equipment:** includes the old Trinidad concentrator with flotation unit, making an 85% concentrate, which is shipped to the company's ferro-molybdenum plant at Washington, Pa. Output for 1919 and 1920 amounted to 3,889 tons of ore, with a recovery of 196,647 lb. of concentrate, running 80% molybdenum sulphide. Receipts for same period were \$145,553; expenditures, \$153,625; deficit, \$8,071.

MONITOR SILVER, LEAD & ZINC M. & M. CO. NEW MEXICO

Dead. Former office, McLaughlin Bldg., Santa Fe. N. M. Described in Vol. XIV.

MONTCLAIR MINING CO. NEW MEXICO

Address: C. W. Mitchell, agent, Silver City. N. M. J. E. Moss, supt.

Inc. 1920 in Delaware. **Cap.** \$200,000.

Property: Cora Miller mine, 16 miles W. of Tyrone, reopened in 1920 and reported under development.

A 35-ton cyanide mill installed and 3 shifts employed, April, 1921.

Produced 2,877 oz. silver from 122 tons of ore in 1920, at a loss of \$23,525.

MONTE RICO MINING & MILLING CO. NEW MEXICO

Office: 428 Washington Trust Bldg., Washington, Pa. **Mine office:** Lordsburg, Hidalgo county, N. M.

Officers: Lawrence R. Boyd, pres.; F. B. Theakson, v. p.; James V. Boyd, sec.-treas.

Inc. in Arizona. **Cap.** \$500,000; \$1 par.

Property: 9 claims, 120 acres, in Virginia district, 4 miles S. W. of Lordsburg. Said to show diorite cut by andesite with a mineralized dike, carrying azurite and malachite, succeeded at depth by chalcopyrite. Developed by 840' tunnel.

Mine was closed in 1916 due to litigation, which was settled in 1921 when work was resumed. Fully described in Vol. XIII.

NATIONAL COPPER CO. NEW MEXICO

Dead. Fully described in Vol. XIII.

NATIONAL GOLD & SILVER MINING CO. NEW MEXICO

Offices: Unity Bldg., Chicago, Ill.

Officers: M. R. Sherman, pres.; S. W. Winn, sec. Is a close corporation. **Cap.** \$3,000,000.

Property: 10 claims, including the Beck mine, 2 miles from Steins, Hidalgo county, developed by 2 miles of workings with a 300' shaft, showing a 12-18" vein of gold-silver ore. Vein strikes N. 70° E. and dips steeply northwest.

Equipment: includes 5-drill compressor, hoist, 50-ton mill, blacksmith shop, offices and dwellings.

Mine was worked steadily for several years, and shipments are made at various times to the El Paso smelter.

NEVADA HILLS MINING CO. NEW MEXICO

In liquidation. Former address: Gage, Luna county, N. M.

Property: 8 claims, purchased in 1916 for \$15,000, in Victoria mining district, near Gage, said to show a vein 20' wide of tungsten ore in lime formation with quartz gangue, opened on the 40' level. Developed by 2 shafts, 130' and 90' deep. The property was formerly worked for silver

NEW MEXICO TIN & METALS CO.**NEW MEXICO**

Property: near Cave City and on Taylor Creek, Socorro county, embraces placer and lode claims. Developed by 250' tunnel in altered rhyolite showing small veins of hematite and cassiterite.

Geologic features described by Hill in Bull. 725-G, p. 353, of the U. S. Geol. Survey, 1921.

NEW MEXICO ZINC & COPPER CO.**NEW MEXICO**

Address: J. L. Terry, mgr., Hanover, N. M.

Officers: Judge W. H. Winter, pres.; H. O. Bursum, v. p.; J. A. Macdonald, sec.-treas.

Property: 1,200 acres, includes the Mountain Home zinc mines, 11 patented claims, 211 acres, and the Copper Flat group, 52 unpatented claims, covering the extension of the first named group. Holdings are West of Phelps Dodge and Empire Zinc lands, near Hanover.

Geology: contact deposits, shear zones and fissure veins in contact metamorphic areas of altered limestone near monzonite dikes and granitic intrusives masses.

No recent returns received. Probably idle.

NOVEMBER MINING CO.**NEW MEXICO**

Dead. Formerly operated 12 miles south of Steins Pass.

OAKS CO., THE**NEW MEXICO**

Address: Alma, Socorro county, N. M. W. J. Weatherby, pres.-gen. mgr.; H. A. Hoover, sec.

Dividends: four 1% dividends were paid on pfd. stock, Dec. 1, 1916; Jan. 1, Feb. 1, March 1, 1917. On April 1, 1917, a 1¼% dividend was declared, payable quarterly on preferred stock.

Operations for 5 years (1915-1920) show a loss of \$36,285.

Property: the Pacific, Hub and a portion of the Johnson groups, 500 acres, in the Cooney, or Mogollon district, about 80 miles from Silver City, the nearest railway point. Also has a bond on 300 acres additional, including the Eberle, Deep Down, Maud S., Deadwood and McKinley groups. Company installed a compressor at the Deep Down mine in 1918.

The Maud S. has produced silver-gold ore worth \$800,000. The Pacific mine has yielded silver-gold ore to value of \$200,000, mostly from above the 250' level.

The company owns the Oaks tunnel, which starts at Mineral creek and will crosscut the Gray Hawk, Socorro, Pacific and other veins in its 9,800' length. It will be used as a main drainage and haulage tunnel for the district. Shipments made to the Socorro mill.

OCTO MINING CO.**NEW MEXICO**

Mine at Lordsburg, Hidalgo county, N. M.

Officers: E. W. Smith, pres.; W. T. Bill, v. p.; F. E. Sanford, sec.; J. W. Wilson, treas.; O. H. Reinholdt, cons. engr., with G. W. Foreman, managing director.

Inc. Nov. 15, 1912, in Calif. **Cap.** \$500,000; \$1 par; issued, 430,000.

Property: 25 claims, 125 acres, 3½ miles S. W. of Lordsburg, N. M., and 2 miles from the S. P. Rv. Geology is similar to that of the Eighty-Five and Hecla mine adjoining and is fully described in U. S. Geo. Survey, Prof. Paper.

Ore: contains copper, silver, and lead. Shipments were said to have netted \$28 per ton.

Development: by several old and a 3-compartment shaft, which was deepened to 310' in 1920.

Equipment: includes 40-h. p. hoist, 6-drill compressor, 200-h. p. boiler plant, etc.

The Anita Copper Co., organized in May, 1921, to absorb the Octo Mining Co., secured a judgment by default for \$28,000 against the Octo in December, 1921.

ORGAN MOUNTAIN MINING CO.**NEW MEXICO**

Office: 204 Mills Bldg., El Paso Tex. **Mine office:** Organ, N. M.

* The property, consisting of 340 acres, is located 12 miles N. E. of Las Cruces, N. M., and was owned by the **Bennett Stephenson M. & M. Co.** The mine is credited with a production of about \$1,000,000, mainly in lead, zinc, silver and copper. Shipped 2 cars of ore 1919.

The American S. & R. Co. had a lease, which was given up. The Phelps Dodge Corporation took a 5 year lease, which expired in 1921. The Company is fully described in Vol. XIII.

ORGAN ORE CO.**NEW MEXICO**

Address: Organ, N. M.

Officers: W. W. Cox, pres.; J. D. Isaacks, v. p.; L. B. Bentley, sec.-mgr.; Gus. Manasse, treas., with C. T. Seale, directors. L. B. Bentley, mgr.

Inc. April, 1919, in New Mexico. **Cap.** \$50,000; \$10 par; \$30,000 outstanding. Annual meeting July 8th.

Property: the Torpedo mine, about 96 acres, near Organ, Dona Ana county, N. M. Ore occurs in quartz filled fissures from 10-40' wide, following the porphyry dikes and as contact replacement deposits in limestone and dolomite along a monzonite contact. Assays said to average 8% copper and 3 oz. silver.

Development: includes steam hoist and pump; a 150-ton mill under construction in 1921.

Production: for 1919 and 1920 amounted to 433,520 lb. copper and 1,844 oz. silver. Operating loss was \$1,960. Company reports ore reserves at 600,000 tons averaging 4-5% copper per ton.

ORO IRON CO.**NEW MEXICO**

Idle.

Address: Ohaysi, Otero county, N. M.

Officers: Winchester Cooley, pres.; T. M. Wingo, sec.; J. H. Parker, gen. mgr.; Edward Salvesson, supt.

Cap. \$20,000; shares \$1 par.

Property: the Cinco de Mayo, Iron Duke, Iron King, Iron Queen, Iron Mask and Laura claims at Ohaysi, developed by surface workings showing hematite and magnetite iron ores.

Equipment: compressor and 5 drills. No recent returns received.

OTERO COPPER CO.**NEW MEXICO**

Dead. Formerly held property near Brice, Otero county, N. M. See Vol. XIII.

OZARK SMELTING & MINING CO.**NEW MEXICO**

Office: 601 Canal Road, Cleveland, Ohio. **Mine office:** Magdalena, Socorro county, N. M. Philip Argall & Sons, of Denver Colo., cons. engrs; Smelter: Coffeyville, Montgomery county, Kans.

Officers: Geo. A. Martin, pres. and gen. mgr.; P. H. Argall, mgr.; L. P. Pressler, supt.; W. S. Stevens, mill supt.; W. E. Corts, smelter supt. The company is a subsidiary of the Sherwin-Williams Paint Co.

Property: includes the Graphic mine, 30 claims, 227 acres, with total holdings of 800 acres in the Magdalena district, showing limestone, shale and quartz, carrying contact ore deposits between limestone and schist, of about 50' proven width, 500' length, and known depth of 500'. The upper workings show large quantities of lead and zinc carbonates, ores being mainly smithsonite and sphalerite, with some cerussite and argentiferous galena, and occasional cuprite and native copper. Ores are mainly low in grade, with principal values in zinc. The ore-shoot, of about 500' length on the 7th, 8th and 9th levels, is about 100' wide on the 9th level.

Development: is by a 300' shaft, and two 1,500' crosscut tunnels, with about 8 miles of workings, the lower levels showing a slightly argentiferous sulphide complex of zinc, lead and copper.

Equipment: 150-ton mill treats low-grade complex zinc-lead-iron sulphide ore by froth flotation process, using it as an adjunct to older methods of concentration. A 50-ton mill does dry concentration on ores above 20 mesh, and wet concentration on ores below that size. Electric power is used.

Production: mainly zinc ore, is shipped to the works at Coffeyville, for the manufacture of lead and zinc oxides, as the base for pigments, of which the Sherwin-Williams Co., in control of this corporation, is one of the largest American manufacturers.

Mill produced a considerable amount of zinc concentrates and lead-zinc sulphide and carbonate, also shipping zinc carbonate ores direct to smelters from the mine, 1920-'21.

PECOS COPPER CO.**NEW MEXICO**

In liquidation. Fully described in Vol. XIV. Holdings purchased in 1918 by Pecos Mines Co., which see.

PECOS MINES CO.**NEW MEXICO**

Address: Goodrich, Lockhart & Co., 17 East 42nd St., New York City.

Company in 1918 purchased holdings of Pecos Copper Co., which in 1904 had succeeded the Pecos River Mng. Co.

Property: 15 claims, 573 acres, all patented and 238 acres including valuable coal veins and placer ground, in the Hamilton district, 12 miles from Santa Fe. Holdings include water rights to the Pecos river for 2½ miles, with 2,000 h. p. available for development.

Lands show lower carboniferous limestone. The property carries a contact "vein," vertical, 200' wide, outcropping for 750' and lying alongside an altered schistose diorite. The band of shipping ore is 9' wide with further width of concentrating material. The ore, being complex, is difficult of treatment.

Development: includes 370' Evangeline shaft. Report by W. E. Burlingame, in 1907, claims 168,304 tons blocked out on four levels. Lessees accomplished much new development and in 1917, ore reserves were reported to be more than double those of 1907, the pay streak having averaged 50' in width.

Equipment: includes a 165-h. p. steam plant, with 2 hoists, 1 good for 600' depth; and a 3-drill compressor.

Operations suspended, May, 1921.

PERCHA MINING CO.**NEW MEXICO**

Mine in Kingston district, Sierra county, was developing with small force steadily in 1919. Produced several cars of lead-copper-silver ore.

PHILADELPHIA M. & M. CO.**NEW MEXICO**

Dead. See Las Animas Peak Gold Mines Co.

PINOS ALTOS M. & M. CO.**NEW MEXICO**

Dead. Fully described in Vol. XII.

PINTADO CONSOLIDATED COPPER CO.**NEW MEXICO**

Dead. See Vol. XIII.

PROGRESS MINING CO.**NEW MEXICO**

Address: L. A. Hohstadt, Douglas, Ariz.

Officers: L. A. Hohstadt, pres.-treas.; John F. Hohstadt, v. p.; Albert Sames, sec., with C. F. Hanson, directors.

Inc. May, 1916, in Arizona. **Cap.** \$1,000,000; \$1 par; 785,325 shares issued. Stock transferred at company office. Annual meeting 2nd Monday in May.

Property: 8 claims, 152 acres, in process of patent, at Steeplerock, New Mexico, adjoining the Carlisle mine on the N. W., shows quartz monzonite with chalcopyrite stringers and veins. Ore contains copper, gold, silver, lead and zinc.

Development: by 105' shaft. Closed down since 1918.

PYRAMID MILLING CO.**NEW MEXICO**

Described in Vol. XIV. Operated a lease on the Last Chance mine of the El Centro M. & M. Co., which see.

RADIUM TREATMENT & SANATORIUM CO.**NEW MEXICO**

Operates the Merry Widow mine, which see.

R. & S. MOLYBDENUM MINES CO.**NEW MEXICO**

Fully described in Vol. XIV. Company succeeded the Western Molyb-

denum Co. in 1918 and was itself succeeded, 1920, by the Molybdenum Corp'n of America, which see.

RED PEAKS COPPER CO.**NEW MEXICO**

Mail returned marked "Out of business," in 1921. Former address, Norton, N. M. Fully described in Vol. XIV.

REPUBLIC MINES CO.**NEW MEXICO**

Mail returned unclaimed from former office: 526 Exchange Bldg., Denver, Colo.

Mine is located at Lucero, Mora county, N. M. Property and operations are fully described in Volume XII and XIII.

REPUBLIC MINING & MILLING CO.**NEW MEXICO**

Out of business. Fully described in Vol. XIV. Property sold early in 1920 to the **Empire Zinc Co. of Colorado**, which see.

RIVAL MINING CO.**NEW MEXICO**

Office: Bisbee, Ariz.

Officers: J. M. Ross, pres.; Arthur Notman, v. p.; R. A. Ziesemer, sec-treas., with E. E. Elinwood, J. F. Frazer, L. R. Budrow, M. J. Cunningham and Robert Rae, directors.

Inc. March 13, 1917, in Arizona. **Cap.** \$500,000; \$1 par; 275,000 issued. Annual meeting first Monday in March. 25,000 shares sold for \$70 the lot in New York on Dec. 8, 1920.

Property: 1 claim, 20 acres, in Steep!erock district, Grant county, N. M.

Geology: quartz vein in andesite, with 70° dip and N. W.-S. E. course.

Ore: carries gold and silver.

Development: by 500' shaft, and about 2,000' of workings, which gave encouraging showings.

Equipment: includes hoist, 50 cu. ft. compressor and 100 h. p. gas engine.

Idle since 1919.

ROCKY MOUNTAIN MINES CO.**NEW MEXICO**

Office: care G. L. Brooks, pres., Albuquerque, N. M. Mine at Cerrillos, Santa Fe county, N. M. H. O. Brooks, sec. and mill supt., and E. L. Grose, directors.

Inc. April 4, 1913, in N. M., to work the Tom Payne mine and other properties. **Cap.** \$1,000,000; \$1 par; 470,000 issued.

Property: 9 claims, 100 acres, in the Cerrillos district held under lease and bond. Claims show orebodies in zone of crushed monzonite and andesite, averaging 2-5' in width. Vein said to be continuous for 700'.

Development: by former companies, includes 3 shafts, 60 to 175' deep, and 3 drift tunnels, 317, 450 and 550' long, said to show ore carrying 0.30% copper, 8% lead, 14% zinc, 3 oz. silver and \$0.03 gold per ton.

Equipment: includes a 12-h. p. hoist, several buildings and concentrator with crusher, 4 Wilfley tables, 2 slime tables. Smelter, 6 miles from the mine, has not been operated by present company. Lead concentrate is shipped to Illinois smelters and zinc concentrate to Kansas and Oklahoma plants. Temporarily closed down.

ROMAHO MINING CO.**NEW MEXICO**

Address: J. P. Mack, gen mgr., Columbus, N. M.

Property: 8 claims, including the Waterloo mine, in Tres Hermanos district, N. W. of Columbus, developed by 90' shaft and said to show gold-silver-copper bearing ore.

Equipment: includes 50 h. p. hoist and 500 cu. ft. compressor. Reported developing, 1920-'21.

ROMERO MINING CO.**NEW MEXICO**

Address: H. C. DeBaca, Las Vegas, N. M.

Company is out of business. Fully described in Vol. XIII.

ROPER GROUP MINING CO.**NEW MEXICO**

Address: Room 306, 20 Broad St., New York. B. Labows, mgr., Lake Valley, N. M.

Officers: Stephen Thurber, pres.; S. Bendheim, v. p.; Bernard Labows, sec.-treas.-mgr.; with Joseph Heilig, B. Garr, C. H. Harris, R. H. Holley, T. P. Fisher, C. C. Carmany and J. G. Millbourn, directors.

Inc. in Delaware. Cap. \$1,000,000; \$1 par; 150,000 shares in treasury. Security Transfer and Registrar Co., New York, registrar and transfer agent. Stricken from listing on New York Curb, March, 1921.

Property: 14 claims, 225 acres, in Lake Valley mining district, Sierra county, about 7 miles from Lake Valley, said to contain silver and lead ore in a vein 2½'-7' wide in andesite and extending 6,000' on surface. The district is located between two old producers, the Bridal Chamber and the Graphic mines, which are 25 miles apart.

Development: 2 shafts, 175' apart, one 525', and the other 200' deep, with some lateral workings. Some diamond-drilling has been done. Extensive development was being done 1919-'21.

Equipment: includes 2 boilers, one 40 h. p., the other 100-h. p. a hoist with 800' of cable, compressors, 5 pumps and necessary buildings. Over \$400,000 is said to have been spent on the mine.

Company reported to have taken over the Bully Boy and Webster mines in Bullion canyon, Piute county, Utah, in 1920.

RUBY SILVER MINING CO.

NEW MEXICO

Address: Lordsburg, N. M.

Officers: L. P. McHalfey, pres.; R. L. McGaugh, of Brownwood, Texas, v. p.; H. B. Elfe, sec.-treas., with L. A. Kimbrough, directors.

Inc. 1920 in New Mexico. **Cap.** \$500,000; \$1 par; 200,000 shares outstanding.

Property: 9 claims, 160 acres, 13 miles N. E. of Lordsburg, N. M., in the Gold Hill mining district, said to show sulphide ore in quartz veins, 4"-2½' wide, averaging \$8 gold, 90 oz. silver and 20% lead. Adjoins Co-Operative Company's holdings.

Development: by 3 shafts and 800' of workings to depth of 230'. A 60-h. p. hoist and compressor were to be installed and development carried down to 600' level in 1921.

SACRAMENTO COPPER CO.

NEW MEXICO

Address: 310 Two Republics Bldg., El Paso, Texas. **Mine office:** D. C. Sutton, mgr., Tularosa, N. M.

Officers: Ed. Mechem, pres.; Eli Knight, v. p.; R. B. Rawlings, sec.-treas., with W. P. Stiles, T. J. Stafford and J. M. Gale, directors

Inc. March 28, 1916, in New Mexico. **Cap.** \$750,000; 50c par; 250,000 issued.

Property: 54 claims, 1,080 acres, 6 miles N. E. of Tularosa, N. M., covering Copper Basin, at head of Coyote creek, at base of White Mtns.

Development: by 200' incline shaft and various test pits and cuts. The whole area is to be explored by drilling before mine equipment is ordered. It is said that at a depth of 100' copper ore was cut and 34' of ore passed through, assaying 1 to 7%; at 400' there was 10' of 2 to 9% ore.

SAN LAZARUS MINES CO.

NEW MEXICO

Idle, or dead. Former address: 2837 Henepin Ave., Minneapolis, Minn. Mine near San Pedro, Santa Fe county, N. M. Property is fully described in Vol. XIII.

SANTA FE GOLD & COPPER MINING CO.

NEW MEXICO

Office: 11 Broadway, New York City. **Mine office:** San Pedro, N. M.

Property: 279 acres of patented mining claims in Santa Fe county and 31,594 acres of miscellaneous grazing lands comprising the San Pedro grant in Santa Fe, Sandoval and Bernalillo counties and in addition 300 acres of grazing lands comprising the Canon del Agua grant in Santa Fe county.

Is a Lewisohn company, operated while high metal prices prevailed, but whose diminished reserves probably do not warrant working under present operating costs. Fully described in Vol. XIII.

ton of San Francisco, D. A. Richardson, El Paso, Tex., and E. C. Bradford of Douglas, were the incorporators. Jas. E. Suits, sec.

Inc. 1916, in New Mexico. **Cap.** \$1,000,000; par \$1; 900,000 issued.

Property: the Doran group, 3 claims, the Ruddle group, 5 claims and a group of 35 claims located in 1916, on the outskirts of the Chino Copper Co. holdings. Company held the Ruddle group under bond and lease, presumably relinquished, and put up a number of buildings on that tract which holds a vein containing copper ore, 21 cars shipped to El Paso smelter by former operators averaging about 6% copper. The Doran group and adjacent claims cover a belt of disseminated copper ore partially explored by churn drilling, 1916-'17.

Company ran out of funds in 1917 and promoters held most of the stock; no work has been done since and company dormant. Present status unknown. Ground considered worthy of further churn drill exploration.

SAVANNA COPPER CO.

NEW MEXICO

Address: Henry Hovland, Lonsdale Bldg., Duluth, Minn. Mine near Pinos Altos, N. M. I. J. Stauber and I. L. Wright, lessees.

Inc. September 16, 1908, in Arizona. **Cap.** \$2,000,000; \$10 par. The company was a merger of the **Copper Gulf Mining Co.** and **Comanche Mining & Smelting Co.** and holding all but 320 shares, or 99.36% of the Co., owning in fee simple all property formerly owned by the Comanche Mining & Smelting Co. and holding all but 320 shares, or 99.36% of the stock issue of the Copper Gulf Mining Co. In January, 1919, the company had 149,000 shares of full-paid stock outstanding. Cash balance, February 1, 1919, was about \$10,000.

Property: 17 claims 16 patented in the Pinos Altos district, 4 patented claims in the Anderson district, and 1 patented claim in the White Signal district. The claims in the Burro Mountain group sold January, 1916, to Phelps, Dodge & Co., for \$700,000, constituted the principal and most valuable holdings. The Comanche group comprised 43 claims. The Copper Gulf group consisted of 1,440 acres. The Jenne group of 4 claims, patented 1910, on the Gila river, 35 miles N. W. of Silver City, is not worked owing to its inaccessibility, and development on the Chloride Flat property has been confined to assessment work.

SEÑORITO COPPER CORPORATION

NEW MEXICO

Office: 34 Pine St., New York. **Mine office:** Señorito, Sandoval Co., New Mexico.

Officers: H. B. Walmsley, pres.; W. E. Greenawalt, v. p.; J. A. Kern, sec.; H. W. Webb, treas. J. T. McLaughlin, supt.; with Francis Wilson, directors.

Inc. November, 1916, in New Mexico. **Cap.** \$1,250,000, in \$1,000,000 common shares at \$1 par, and \$250,000 cumulative 8% pfd. shares at \$10 par, convertible on call at par to common. All common shares are outstanding and 4,100 shares of pfd. are outstanding. Common listed on New York Curb. Empire Trust Co., New York, transfer agent. Annual meeting in November at Santa Fe.

Property: 22 claims, 400 acres, in the Nacimiento district, Jemez mountains, 2½ miles from Señorito, N. M. The most important mines are the Eureka mine, consisting of Conglomerate No. 1 and Conglomerate No. 2 beds, and the Copper Glance mine.

Development: considerable tunnelling, etc., exposing a large deposit of low-grade ore. A U. S. Geological Survey report in 1910 said that the ore of the Copper Glance claims consisted of sulphides, carbonates and silicate of copper in white to reddish sandstone or grit. The orebeds aggregate about 100' thick. The average ore will probably be low grade, which also applies to the Conglomerate claims. Management reports about 800-

000 tons of ore in place and several thousand tons on dump running up to 6% copper in the carbonate ore, also, high grade sulphide ore.

Equipment: includes, a sintering plant, a 50-ton smelter, sawmill, power-plant and necessary buildings.

Leaching trials were made on the ore in 1915 by W. E. Greenawalt of Denver, producing copper at under 5c per lb. including mining and milling. Company does not claim to be able, under existing costs, to attain this result. The property was sampled in Oct., 1916, by R. S. Ransford for J. G. White & Co. Late in 1917, a group of strong interests agreed to drill and explore the entire ore beds in consideration of their being granted an option on 501,000 shares, representing control of the company. Exploration commenced in April, 1918, and later it was announced that property contained approximately 3,300,000 tons of ore. Property apparently has considerable merit.

SHERIFF MINING CO.

NEW MEXICO

Dead. Formerly mined manganese ore near Rincon. See Vol. XIV.

SIERRA CONSOLIDATED MINING CO.

NEW MEXICO

Out of business. Property taken over by **Statehood Mines Co.**, both of which companies were reported forced into bankruptcy through incompetent management and spectacular get-rich-quick financing. Mine then operated by the Snake and Opportunity Mines Co., which see.

SILVER GLANCE GROUP.

NEW MEXICO

Address: Joseph Oliver, owner, Box 112, Fairview, N. M.

Property: 200 acres, at Mineral Creek, Apache mining district, Sierra county, said to show veins containing 10% copper, and 20 oz. silver per ton. Property is developed by 150' shaft and about 400' of tunnelling.

SILVER SPOT MINES CO.

NEW MEXICO

Address: Silver City, N. M. R. I. Kirchman, pres.; Frank Light, sec-treas.

Inc. 1919 in New Mexico.

Property: on Boston Hill, developed by shafts to depth of 150'. Work discontinued December, 1920, owing to large flow of water and lack of funds.

SNAKE AND OPPORTUNITY MINES CO.

NEW MEXICO

Address: Jones & Baker, 50 Broad St., New York City, N. Y. **Mine office:** Hillsboro, N. Mex.

Officers: E. F. Carlson, v. p.; E. L. Kerstetter, sec.-treas.; N. C. Sheridan, mgr.

Inc. June, 1919, in Delaware. **Cap.** \$1,000,000; \$1 par; 1,000,000 shares outstanding. Company is controlled by the Mines Holding and Operating Corporation of New York, through ownership of 650,000 shares of stock.

Property: 28 claims, 5 patented, about 400 acres, near Hillsboro, Sierra county.

Operated 1918-19 and shipped one car of gold ore. Mine closed down in 1920 and equipment moved to the Midnight mine in Idaho, owned by the same interests.

SOCORRO MINING & MILLING CO.

NEW MEXICO

Property acquired, 1920, by **American Silver Corp'n**, which see.

STATEHOOD MINES CO.

NEW MEXICO

Preceded by the Sierra Consolidated Mining Co. and then taken over by the **Snake and Opportunity Mines Co.**, which see.

STEEPLE ROCK DEVELOPMENT CO.

NEW MEXICO

Out of business. Formerly at Steeple Rock, N. M.

Property: the Carlisle and Jim Crow groups, 33 claims, sold to George H. Utter, in 1914, who sold it 1915 to H. K. Welch and S. McKeever, of New York, who organized the Carlisle Mining Co. which went into bankruptcy 1918. See Utter, Geo. H.

SUNSET COPPER CO.

NEW MEXICO

Probably dead. See Vol. XIII. Former address, care L. M. Stiles, pres., Box 393, El Paso, Texas.

SUSQUEHANNA MINING CO.**NEW MEXICO**

Address: C. J. Plankenhorn, sec., Williamsport, Pa. Company succeeded **North American Copper Co.**, described in *Copper Handbook*, Vol. XI.

Property: 9 claims, patented, in the Pryamid and Virginia districts, near Lordsburg, containing copper, silver and iron. Part of property has been worked by lessees in recent years, but no reports received. Fully described in Vol. XIII.

TAOS MINING CO.**NEW MEXICO**

Dead. Former address: Twining, N. M. See Vol. XIV.

TEXAS CANYON MINING & MILLING CO.**NEW MEXICO**

Office: C. S. Cleaver, 5427 University Ave., Chicago, Ill. **Mine office:** J. S. Dodd, supt., Organ, N. M.

Officers: E. H. Bickford, pres.; C. S. Cleaver, sec.; H. R. Gottman, treas.; also directors.

Inc. January, 1917, in New Mexico. **Cap.** \$100,000; \$100 par.

Property: 8 claims in Texas canyon, Organ mountains, 7 miles E. of Organ, Dona Ana county, N. M. Examined by C. M. Becker.

Development: by short tunnels. Ore averages 0.43 oz. gold, 14.05 oz. silver, and 2.3% copper. Faulting is evident through the property. Not enough work done to place any value on mine. No returns securable.

TORPEDO MINE**NEW MEXICO**

Owned and operated by **Organ Ore Co.**, which see.

TRI-BULLION SM. & DEV. CO.**NEW MEXICO**

Office: 45 William St., New York. **Mine office:** Kelly, Socorro county, N. Mex.

Officers: J. O. Wall, pres.; S. W. Traylor, v. p.; with G. C. Van Tuyl, Jr., W. B. Nash, H. V. M. Dennis, Jr., J. M. Henderson, A. S. Somers, S. F. Dominick, Gustavus Taylor and Frank Coenen, directors; D. O. Deyer, sec.-treas.

Inc. 1903, in Arizona. **Cap.** \$5,250,000; shares \$5 par; in 50,000 participating cumulative 4% stock with 1,000,000 common; issued 6,700 shares preferred and 999,900 shares common. Empire Trust Co., New York, transfer office. Bankers Trust Co., registrar. Stricken from listing on N. Y. Curb January, 1921.

Property: about 115 acres, at Kelly, N. M., including the Nit and Silver Bell groups acquired in 1912. The Nit mine adjoining the Graphic, has an underground connection with the Waldo mine of the Ozark Smelting & Milling Co. The workings of this mine disclose a 50' vein of 4.7 to 6% copper ore, 454' E. of the 215' shaft, in a crosscut from the bottom of a 45' winze sunk from the bottom level. Company owns also 2 copper and lead claims about 150 acres, known as the Starlight group, in the Stanley Butte district, Ariz.

Income in 1919 from royalty on 808 tons of ore shipped by lessees was \$6,066.

The Tri-Bullion Co., suffered a loss of over \$32,000 from embezzlement by its former treasurer in 1913-15.

TULAROSA COPPER CO.**NEW MEXICO**

Office: Tularosa, N. M. **Mine office:** Bent, Otero county, N. M.

Officers: E. P. Kern, pres.; H. E. Forrester, v. p.; G. B. Kent, sec. and gen. mgr.; W. F. Drake, treas., with J. A. Thatcher, A. J. Merrill and P. M. Linch, directors.

Inc. March 5, 1905, in New Mexico as successor of Tularosa Mining & Milling Co. **Cap.** \$5,000,000; shares \$5 par; issued, \$3,500,000. Stock listed on New York Curb. Registrar & Transfer Co., New York, transfer office.

Property: 807 acres, 307 acres patented, at Bent, on the Tularosa river. Mine is 12 miles N. E. of Tularosa on the E. P. & S. W. R. R., about 100 miles N. E. of El Paso, Texas.

Geology: the property is underlain by a flat sheet of diorite resting on quartzite and covered in general by the basal sandstone of the Red Beds of the region. This diorite outcrops at the Virginia mine, as the company's workings are called and dips gently in every direction away from this point. The ore is found in the uppermost part of the diorite which is much altered to a depth of 35 to 55' below its surface. This ore bed shows lenses of glance, 2 to 18" wide, running in all directions, which together with stringers and veinlets of ore, make a stockwerk proved to be ore-bearing over an area 200' wide and about 1,200' long. The altered rock between the lenses also carries disseminated copper glance and the ore as a whole averages 2½% copper; 30 to 55' below the diorite surface, the rock is fresh except along fractures; stringers of ore occur, however, at depths of several hundred feet.

Development: at the Virginia mine there is an open pit 60 to 120' across and 35' deep which is opened on the richest part of the deposit. The first level corresponds to the bottom of the pit; the 2nd level is 25' deeper. These workings are said to block out 85,398 tons of ore in an area of 105x180' in extent. Twelve diamond-drill holes from 88 to 400' deep prospect the ground, and the results form the basis for an estimate of 800,000 tons of indicated ore of an average value of 2½% copper.

Property was to be drilled in 100' squares and the limits of the orebody fully determined. One drill-hole encountered 136' of ore at a depth of 300'.

Equipment: includes a 12,000' ditch, hydro-electric plant, and concentrator of 300 tons capacity.

In a circular published by New York brokers it is stated that Tularosa has all the potent essentials to make just as great and valuable a property as Chino, Ray, Inspiration and Miami and is today practically the one big undeveloped porphyry copper area that shows the existence of a wonderful orebody that needs only development, which was being aggressively pushed.

Compared with other deposits of similar character, this one is, in our opinion, small and the ore bed thin, averaging perhaps 35', while the ore reserves are not large enough to compare with those of any of the copper porphyries. The property does not warrant a large mill.

The orebody may, however extend over a greater area, and a drilling campaign should be made. The new parties in control have had wide experience in mining and possess ample means to test the property thoroughly.

Idle since 1917.

TULLOCH GOLD & COPPER CO.

NEW MEXICO

Company dissolved and property fully described in Vol. XIII. D. H. Tulloch, owner, Deming, Grant Co., N. M. Developing and reported to have struck radium bearing ore.

TUSA PEAK GOLD & COPPER MINING CO.

NEW MEXICO

Office: Portage, Wis. Mine and mill at Tusa, Rio Arriba county, N. M. R. H. Owen, pres.; R. J. Rosenfeld, sec.-treas.

Mine has been closed down since 1910. See Vol. XIII for full description.

TYNDALE COPPER MINING CO.

NEW MEXICO

Inactive or dead. Described in Volume XIII.

Property operated by the Bonney Consolidated Copper Co., which see.

TYRONE-EL PASO COPPER CO.

NEW MEXICO

Address: 1115 N. Kansas St., El Paso, Texas. **Mine office:** Tyrone, N. M.

Officers: R. M. Dudley, pres.; T. Lia, v. p.; N. F. Work, sec.-treas.; with J. F. Ross, J. H. Maxey, R. K. Bell, H. L. Watson, J. B. DuBase and P. J. Mortinez, directors.

Inc. Nov. 31, 1917, in New Mexico. Cap. \$1,500,000; \$1 par.

Property: 23 claims, 400 acres, 2 miles S. of Tyrone, N. M., said to

show disseminated copper-silver-sulphide ore in porphyry, assaying 3.4% copper and 2 to 6 oz. silver per ton.

Development: by 260' shaft. No recent returns received.

UNITED STATES COPPER CO.

NEW MEXICO

Address: Jas. W. McAlpine, Altos, N. M. Jos. T. Janes, supt., Pinos Altos; Wm. P. Fletcher, supt., Hanover, N. M.

Officers: J. W. McAlpine, pres.-treas.; Jos. T. Janes, 1st v. p.; Chas. D. Rones, v. p.; Wm. P. Fletcher, sec., with N. A. Karsten, directors.

Inc. April, 1911, in New Mexico, as a reorganization of the **Philadelphia Copper Mines Co.** **Cap.** \$1,500,000; \$1 par; all outstanding. El Paso B. & Tr. Co., registrar and transfer agent.

Property: totals about 417 acres divided into 2 groups, the first at Hanover, in the Central mining district, consisting of about 79 acres, 7 claims, 2 of which are the townsite of Hanover, the remainder known as the Philadelphia mine; the second group, 9 miles distant, 21 claims, 338 acres at Pinos Altos known as the Hardscrabble mine. Company also owns the Russel Davidson sawmill near the Pinos Altos property.

Development: at Hanover, by 2 main shafts, north, No. 1, and south, No. 2, 200' and 712' deep, respectively, together with some minor shafts, and about 4,625' of workings. Developing with a small force.

Equipment: includes 2 hoists, each capable of reaching 2,500' depth. steam plant, compressor, pump and sawmill.

Production: from both mines about \$201,000 from development and from upper levels by previous operations. Management has made progress in mine development so that the future seems to promise success.

UTTER, GEO. H.

NEW MEXICO

Office: 1834 E. 2nd St., Long Beach, Calif. **Mine office:** Steeplerock, N. M.

Property: the Carlisle, East Camp, Jim Crow, and Summit group of mines in Steeplerock district, N. M. acquired from the Steeplerock Development Co., which is out of existence.

The Carlisle Group.

Consists of 3 patented claims and millsite, in the Steeplerock Mining district, Grant county, N. M. 15 miles N. E. of Duncan, Ariz. The ore is free-milling gold and silver down to 300', where it changes, to base ore carrying galena, sphalerite and chalcopryite with small amounts of gold and silver.

Development: by 500' shaft with winze to 600' level, showing a hanging wall vein of concentrating ore, for 200' in length and 25' in width.

Equipment: includes a 75-ton concentrator and flotation mill.

Production: in 1918, totaled 2,500 tons yielding 50% lead, 10% zinc, 4% copper, 80c to \$2 gold, and 13 oz. silver per ton. Also produced 175 tons of complex zinc-copper ores. Not operated in 1919, but kept unwatered, and part leased to Eastland and others, who opened some good ore. Output in 1920 amounted to 467 oz. gold, 1,284 oz. silver, 1,400 lb lead and 300 lb. copper. Pumps pulled January 1, 1921 and mine workings allowed to fill with water.

East Camp Group.

Consists of 8 claims, patented, 118 acres, Grant county, 18 miles N. E. of Duncan, Ariz. On one of the claims two quartz veins join. The Nugget mine, of this group was operated in 1918.

Development: by shafts, 200 and 300' deep and some tunnels. Veins from 3-12' wide contain gold and silver. Property was worked in the 70s, but most of the old workings are now caved.

Jim Crow-Imperial Mines.

Consists of 8 claims, patented, 123 acres, 11 miles N. E. of Duncan, Ariz., but in the Steeplerock mining district, Grant county, N. M. The mine contains a fissure vein with many branches in quartz rock. The

vein, about 4' wide carries ore said to assay 0.65 oz. gold and 10 oz. silver per ton.

Development: by four shafts, two of which are 100' deep, the third 200' deep and the last 300' deep, and 2,000' of drifts. **Equipment:** includes 25 h. p. hoist, compressor, 2 gas engines of about 50 h. p., etc.

Production: mine was idle from 1896 to 1914; previous production estimated at \$50,000 in gold and silver. Ore shipped in 1915, averaged 0.9 oz. gold and 45 oz. silver per ton.

Summit Group.

Consists of 10 claims, patented, 180 acres, 16 miles N. E. of Duncan, Ariz., in Steeplerock mining district, Grant Co., N. M. Mine shows 2 fissure veins running through the property N. E.-S. W.

Development: by 2 tunnels, 120' and 470' long, a 264' shaft and total workings of 2,000'. Owner reports 2 oreshoots 12'-50' in width, assaying \$7 to \$8 gold and silver per ton.

The Apex and Ballali gold-silver mines, the former 1½ miles N. W. of the Carlisle, and the Norman King mine, are operated under 2-year lease by Geo. F. Utter. The Minneapolis mine in Gold Hill mining district, developed by 100' shaft, is under option to Thos. A. Lister Lordsburg, N. Mex. The Huedo mine, 18 patented acres, 500' from Fierro R. R. station, developed by 50' shaft in magnetite, containing 5% copper, is not operating. by 50' shaft in magnetite, containing 5% copper, is not operating.

VICTORIA MINING AND SMELTING CO. NEW MEXICO

Bankrupt. Holdings bought by C. J. Boyd of Los Angeles at sheriff's sale, December, 1915.

VICTOR SMELTING & MINING CO. NEW MEXICO

Address: Gage, N. M. Company is a close corporation.

Officers: J. T. Duryea, 437 E. 162nd St., New York, pres. N. J. Welsh, manager.

Property: 9 claims, 8 patented, 136 acres, in Victorio mining district, Luna county, 3½ miles south of Gage. Mine was operated by the Hearst-Haggin interests in 1880-1890, and purchased by present company in 1907; worked intermittently since by leasers. Management describes property as having two veins systems, the primary system being fissures in limestone, paralleling and dipping toward a N. E.-S. W. fault fracture; these are connected with the fault fracture and with one another, irregularly, by a secondary system of veins which strikes N.-S. and dips east. Ore assays 20-25% silica, 20-25% iron and 7-10% lime.

Development: by 300' vertical shaft, 100' incline shaft, and about 4,000' of workings. Company plans to sink a new vertical shaft 500' or 400' below present deepest workings. **Equipment:** includes 2 hoists and compressor.

Production: 452 tons in 1919 and 833 tons in 1920, having gross value of \$27,840. Operating loss for 1920 was \$4,500.

VOLCANO MINES CO., THE NEW MEXICO

Office: Silver City, N. M.

Officers: C. W. Mitchell, pres.; C. C. Royall, v. p.; Jackson Agee, treas.; T. C. McSherry, sec.; with Edw. F. Potter, directors.

Inc. 1921, in New Mexico. **Cap.** \$2,000,000; \$1 par; 750,000 shares issued for property and services; of 1,250,000 treasury shares, the sale of 750,000 has been authorized. Transfer agent, New York Trust Co., registrar Bankers Trust Co.

Cash and assets on hand, Feb. 15, 1922, total \$71,216, with no debts. Stock listed on N. Y. Curb. Sales, April, 1922, at 50c.

Property: 27 claims plus 12 under option in Kimball district, Grant county, 4 miles N. of Steins on S. P. R. R. The main vein is a fault fissure between diorite porphyry and rhyolite; it is reported to be 10' to 50' wide and to outcrop for 7,500'. The ore consists of quartz, and included wall rock, and the rich pay shoot recently opened (1922) is on the footwall side. The value is entirely in silver. A second parallel vein, 1,000' E. of the Volcano, also shows commercial ore.

Development: by 300' shaft, with 3 levels opening an ore shoot 100' and 400' long on the 100 and 300' levels, respectively. Official estimates of ore reserves give 112,000 tons positive and 316,000 tons probable ore.

Equipment: includes gasoline hoist, etc., installed April, 1922. Electric power is transmitted from Steins, and a 100-ton cyanide plant is contemplated, to handle the large amount of lower grade ore. **Production:** five cars shipped early in 1922 averaged 38.57 oz. silver and \$2.58 gold per ton, or \$41.15 p. t.

Discovered in 1882, the old Volcano mine is said to have produced several hundred thousand dollars worth of silver, treating oxidized ore in a 10-stamp mill with pans.

WELCH GROUP

NEW MEXICO

Owned by Empire Zinc Co. of Colorado, which sec.

WESTERN MINING & DEVELOPMENT CO.

NEW MEXICO

Probably out of business. See Vol. XIII.

WESTERN MOLYBDENUM CO.

NEW MEXICO

Property acquired in Nev., 1918, by the R. & S. Molybdenum Mines Co., which was succeeded in 1920 by the Molybdenum Corporation of America.

WHITE OAKS MINES CONSOLIDATED, INC.

NEW MEXICO

Mine office: White Oaks, N. M.

Company's officials reported some years ago that "internal dissension arose in the White Oaks Co.'s management, and rather elaborate plans for reopening the mines have apparently been abandoned." Fully described Vol. XIII.

ZORO GOLD & COPPER CO.

NEW MEXICO

Address: G. E. Moffett, supt., Alamogordo, N. M.; E. M. McClintock, pres., El Paso, Texas.

Inc. 1916, in New Mexico. **Cap.** \$250,000; shares \$1; par; non-assessable; 140,000 issued.

Property: 3 claims, 55 acres, in Silver Hill district, Jarilla mountains, Otero county, N. M., said to show a contact deposit in limestone. Ore carries 2.5% copper, 0.1 oz. gold and 1 oz. silver.

Development: about 1,200' of tunnels.

Production: lessees in 1916 mined ore which contained 120,000 lb. copper. No later returns available.

NEW YORK

Among the states of the Union, **New York** ranks higher in value of mineral products than in area. Iron mining is its chief metal mining industry, seven companies having 1811 employees, producing ore valued at \$5,264,443 in 1919. Iron ore production was 871,495 tons in 1919 and 920,009 tons in 1920.

CANOPUS IRON CORPORATION

NEW YORK

Offices: Garrison, N. Y., and Phillipstown, Putnam county, N. Y. J. G. Pearse, supt.; E. Maltby Shipp, cons. eng.

Inc. in New York. **Cap.** 100,000 shares; \$10 par. Listed on New York Curb, but stricken from list on October 21, 1919. U. S. Corporation Co., transfer agents.

Property: corporation owns in fee the minerals under 140 acres, with the surface in fee of 40 acres, at Phillipstown, Putnam county, N. Y., 3 miles from the Hudson river and from rail, and 49 miles from New York. Examined by G. O. Angell, who endorsed reports of the above named officials.

The ore is magnetite, and deposit outcrops for 2,200', varying from 40 to 180' in width. A 2,000-ton shipment averaged 64% iron, 3.27% silica, 0.27% sulphur, and 0.11% phosphorus. Concentrates from low-grade ore contain from 66.01 to 68.95% iron, 2.12 to 4.75% silica, 0.138 to 0.16% sulphur, and 0.025 to 0.037% phosphorus.

Development: in shaft at depth of 165' the orebody is 25' wide, but a thickness of at least 75 to 100', is expected, as magnetic needle readings indicate 180 to 190' in width. Company assumes an average width of 50' at 400' depth, with reserves estimated at 6,000,000 tons. The Forest of Dean mine, due west, has been mined to 1,100' in depth and has shipped ore for over 100 years. Equipment and houses are being erected.

With iron ore at 12c per unit 60% shipping ore is said to be worth \$7.20 per ton. Freight to eastern Pennsylvania furnaces is given as \$2.25 per ton, while mining and placing ore on cars or boat is \$1.70, making total cost of \$3.95. On this basis a profit of \$292,500 per annum (300 days) is calculated, or a return of 29.25% on capital. The company's shares were extensively traded in on the New York Curb, and the property well advertised, but thus far the share market seems to have received more attention than the mine.

CHATEAUGAY ORE & IRON CO.**NEW YORK**

Address: Lyon Mountain, Clinton county, N. Y. Jos. R. Linney, mgr.; Chas. W. Carpenter, purch. agent.

Property: at Lyon Mountain, Clinton county, in the Adirondack Mtns. Ore is a standard low phosphorus, assaying 28% iron, .007% phosphorus, .09% manganese. Open pit and under ground methods used.

Equipment: includes magnetic concentration mill.

Production: was 78,597 tons in 1919 and 93,842 tons in 1920.

DOUGLAS, LACEY & CO.**NEW YORK**

Company was notorious promoter of numerous mining and oil ventures and was in hands of a liquidating organization, known as the Amalgamated Properties, Inc., at last accounts. Mr. Stevens' opinion of this firm and their clever scheme for obtaining money from small investors is fully described in Vol. X, under the title given above and that of the Amalgamated Gold & Copper Co. of Arizona.

GRANT MINE**NEW YORK**

Mine near Carmel, Putnam county, N. Y. The orebody consists of a complex of arsenical sulphides, carrying copper, quicksilver, gold and iron. The crude ore is estimated to have a gross value of about \$25 per ton, but, on account of its refractory nature, has no present commercial value, and cannot be utilized without special metallurgical treatment. Closed down for several years.

HYATT ORE CORPORATION**NEW YORK**

Address: Hyatt, St. Lawrence Co., N. Y.

Property: 3 miles W. of Edwards, near the holdings of the Northern Ore Co. A 320' shaft said to have opened 15 to 20% zinc ore, carrying pyrite.

Equipment: a 100-ton concentrator was erected in 1920 and operated to end of October.

MATHESON LEAD CO.**NEW YORK**

A subsidiary of National Lead Co., which see.

NEW YORK PYRITES CO., INC.**NEW YORK**

Address: Fred T. Rubidge, mgr., 41 Broad St., New York City. O. F. Pattberg, supt., Gouverneur, N. Y.

Inc. 1917, in New York. Cap. \$100,000; \$100 par; all outstanding.

Property: near Gouverneur, St. Lawrence county, contains iron sulphide averaging 25% sulphur.

Development: by 125' shaft and 1,500' of workings. Equipped with electric power 2-ton hoist, 800' compressor, pump, 250-ton mill using wet concentration method and producing a 44% sulphur concentrate. Company began operations in 1919, and treated 47,000 tons of ore in 1920.

NICHOLS COPPER CO.**NEW YORK**

Office 25 Broad St., New York. **Works office:** Laurel Hill, Queens county, N. Y. **Employs** about 1,500 men.

Officers: C. W. Nichols, pres.; J. B. F. Herreshoff, v. p.; J. A. Church, Jr., sec.; Walter C. Bennett, treas.; M. E. Harris, auditor.

Inc. May, 1905, in New York. **Cap.** \$10,000,000; reduced 1912 to \$7,000,000; \$1,000,000 preferred stock issued 1914: shares \$100 par; bonds authorized, \$3,000,000 20-yr. 6% gold debentures, dated Sept. 1, 1912; \$2,970,900 outstanding. Is the successor of Nichols Chemical Co.

Dividends: to Oct., 1914, at rate of 6% per annum, paid quarterly on common stock; then a break of 2 years, with a disbursement of 4% in December, 1916.

Works: the Laurel Hill plant includes a smelter and electrolytic refinery with steam and electric power.

The smelter has a Herreshoff water-jacket blast furnace of 600 tons rated daily capacity.

The electrolytic plant is operated on the series system, and has 550 tanks. Anodes are cast. The final product is cast mainly into wire bars. This company enjoys a deservedly high reputation for the purity of its product and the efficiency of its metallurgical practice. Is the second largest electrolytic refinery plant in the world; capacity about 45,000,000 lb. of copper per month.

The works do a very extensive custom refining business, treating mainly ore and matte from outside producers in the smelter, and Western blister copper in the electrolytic plant. The works handle all the bessemer copper from the Phelps-Dodge properties, and from the Old Dominion, Calumet & Arizona, Granby and Ducktown companies, and others. The mining properties at Capelton, Quebec, were taken over by the Albert Copper Co.

NORTHERN ORE CO.

NEW YORK

Address: Edwards, St. Lawrence county, N. Y.

Officers: T. I. Crange, pres.; W. R. Wade, mgr.; S. A. Brown, mine supt.; O. Cozzens, mill supt.

Inc. in New York and operated as a close corporation.

Property: Brown mine, 650 acres near Edwards, located along a belt of limestone at the contact with gneiss. The formation is cut by various veins and lenses of zinc-pyrite ore. Four of these orebodies, being developed and worked, carry 15 to 20% zinc.

Development: by 900' vertical shaft and 800' incline (dip 50°), connected on the 400' level.

Equipment: includes hydro-elec. power with auxiliary steam-elec. generating plant of 500 h. p. Each shaft is equipped with hoisting plant and ore bins. Surface tramping to the concentrator is done with a gasoline locomotive. A central electrically driven compressor supplies air for both mines. The concentrating mill consists of standard crushing and tabling machinery. The mixed zinc-pyrite concentrate made on the tables is separated into a high-grade zinc blende concentrate and pyrite, both of which products are shipped. The table concentrates assay 32% zinc, and the electric machines' product 49% zinc. The pyrite concentrate contains 43% sulphur.

Production: about 12,000,000 lb. zinc annually, with total output to date of 80,000 tons zinc concentrate and 30,000 tons pyrite.

RAMAPO ORE CO.

NEW YORK

Address: Sterlington, N. Y.

Property: formerly owned by Sterling Iron & Ry. Co., includes the Scott and Lake mines near Sterling Lake, Orange county, developed by 400' vertical shaft and crosscuts.

ST. LAWRENCE PYRITES CO.

NEW YORK

Offices: 41 Broad St., New York, and DeKalb Junction, St Lawrence county, N. Y.

Officers: Rudolf Metz, pres.; F. T. Rubidge, v. p. and gen.mgr.; W. J. Kingsbury, sec.; R. M. Atwater, Jr., treas.; O. F. Pattberg, supt.

Property: located in DeKalb Twp., St. Lawrence county, includes the Stella mines, and is one of the four largest pyrite mines in the U. S.

Ore: pyrite, occurring in lenses or veins in gneiss and schist. The orebodies strike and dip in the same general direction as the gneisses, strike N. E., and dip 20° to 30° N. W. The walls are not sharply defined; the average assay is about 21% sulphur.

Development: by 2 shafts 1,600' apart on parallel deposits. The north shaft, the Stella, is idle; here the orebody extends 400' along the strike, averages 10' in thickness and has been worked to a depth of 900' on the dip. The operating shaft, the Anna, opened by levels 50' apart vertically, has an orebody opened for 1,500' on the strike, and average thickness of 20'. The ore is put through a crusher at the shaft before sending to the mill.

Equipment: includes a 700-ton mill with gyratory crushers, trommels, rolls, jigs, and tables. In cold weather the concentrates, to prevent freezing, are dried in a Ruggles-Coles cylindrical dryer. Concentrate assaying 44% sulphur, is sold to sulphuric-acid manufacturers and to paper mills. Power is electrical, obtained from a hydro-electric company for about \$30 per h. p. per year. The property was thoroughly described in E. & M. Journal, April, 1913, p. 689.

Production: approximately 150,000 tons ore per year, yielding about 60,000 tons concentrates.

ST. NICHOLAS ZINC CO.

NEW YORK

Practically dead. **Former office:** 37 Wall St., New York City.

Inc. in Delaware. **Cap.** \$1,000,000; \$1 par. Stockholders authorized the issuance of \$70,000 five year 1st mortgage 6% bonds, June, 1918. The company came to grief in 1918 and the president, W. J. Pierce, leased the holdings to the **Summitville Ore Concentrating Co., Inc.**, presumably without consulting the wishes or interests of the stockholders. The Summitville company of which Pierce was an officer, filed an execution for \$44,616 against the Nicholas property with the Sheriff of Sullivan county on March 14, 1918, and despite the efforts of a Stockholders Protective Committee, with offices at 2711 Grand Central Terminal Bldg., New York City, the Leasing company seems to have retained ownership of the mine.

Property: owned 1,050 acres between Summitville and Mamakating, Sullivan county, 90 miles N. W. of New York City.

Geology: fissure vein in sandstone or "grit" beds, which have been fitted to form the Shawangunk range. Fissure dips with slope of hill and bedding of the grits to N. W. about 45°. Ore is chiefly lead and zinc sulphides, with a little copper.

Development: upper workings opened vein 300' below its outcrop and lower tunnel 800' lower, a total of 1,100'. Vein is from 1 to 8' thick and ore 8" to several feet, averaging 2' in upper workings.

Kirby Thomas, who reported on the mine in 1916, estimated 8,000 tons of developed ore, 10,000 tons of probable ore and 58,000 tons of prospective ore.

Equipment: 100-ton concentrating mill erected April, 1917.

SUMMITVILLE ORE CONCENTRATING CO., LTD. NEW YORK

Address: Samuel Droshnicop, pres., 530 McDonough St., Brooklyn, N. Y.

Property: owns the former holdings of the St. Nicholas Zinc Co., at Summitville, Sullivan county, originally taken over early in 1918 under a leasing agreement.

Through clever manipulation the minority stockholders of the old company were eventually deprived of their property. No report issued and presumably no work being done. No shipments of silver-bearing lead ore made in 1919, according to the U. S. Geological Survey. See St. Nicholas Zinc Co.

TOTTENVILLE COPPER CO., INC.**NEW YORK**

Leo Lowenstein, pres.

Works at Tottenville, Staten Island, N. Y. Has an extensive copper refinery for the production of ingot copper, brass, and bronze alloys, and white metal.

Annual capacity, 200,000,000 lb. Brand is known as "C. T. C." copper,
WILLIAMS HARVEY CORP. **NEW YORK**

Subsidiary of Williams Harvey & Co., Ltd., of England.

Works address: Mill Basin, Jamaica Bay, Brooklyn, N. Y.

Office: 111 Broadway, New York.

Officers: Edward J. Cornish, pres.

Incorporated in U. S. about 1916. National Lead Co. and Simon I. Patino, of Bolivia, each own $\frac{1}{2}$ of the capital stock. By this arrangement, National Lead, which had been buying \$10,000,000 worth of tin per year, acquires "the best smelting talent in Europe and also an immediate connection with the tin producers on the west coast of So. America."

Company operates a tin smelter in Brooklyn, erected 1917-18, with a capacity of 10 tons of tin per day. Smelting began November, 1918.

WITHERBEE, SHERMAN & CO. **NEW YORK**

Offices: Port Henry, N. Y., and 2 Rector St., New York City. Mine office: Mineville, N. Y.

Officers: Lewis W. Francis, pres.; Moses Taylor, v. p.; Geo. C. Foote, v. p.-mgr., with W. C. Witherbee, E. S. Peasley, C. H. McCullough, directors. R. E. Rogers, sec.-treas.; A. M. Cummings, supt.

Founded: 1849. Inc. 1901. Cap \$3,000,000; \$100 par; all outstanding; no funded debt. 9,990 shares owned by Lackawanna Steel Co. Regular dividends paid. Annual meeting, 1st Wednesday in March.

Property: magnetite mines in Essex and Clinton counties, and 4 mills (dry magnetic concentration) with a total annual capacity of 1,000,000 to 1,250,000 tons per year, the concentrates averaging 64-66% iron.

Company also owns 7,500 acres of ore land on the north shore of Cuba, which are not being operated (1919).

NORTH CAROLINA**ASHBORO COPPER MINING CO.****NORTH CAROLINA**

Dead. Formerly operated the **Scarlett mine**, N. of Ashboro, Randolph county, N. C., which see. Described in Vol. XII.

BLUE WING MINING CO.**NORTH CAROLINA**

D. M. Hill, sec., 60 Federal St., Boston, Mass.

Company voted to sell all its assets and go out of business, 1917. Fully described in Vol. XII.

CAROLINA CHROME CO.**NORTH CAROLINA**

Company operated chrome deposits at Webster, Jackson county, during 1917-'18.

CAROLINA COPPER CO.**NORTH CAROLINA**

Office: 15 Atwater St., West Detroit, Mich. Mine near Cullowhee, Jackson county, N. C.

Officers: at last accounts, Lewis C. Waldo, pres. and treas.; S. H. Knight, v. p.; Geo. E. Berriman, sec., with S. H. Knight, Geo. W. Clark and F. W. Olds, directors.

Inc. Oct. 12, 1901, in Michigan. Cap. \$2,500,000; \$25 par; issued, \$1,585,000.

Property: 1,450 acres, freehold, including the Wayehutte mine, shows 4 veins, 27' estimated average width, carrying mainly chalcopryrite, with estimated average values of 3% copper, 4 oz. silver and \$1 gold per ton, opened by a 55' shaft and a 200' tunnel. Lands also include an undeveloped water power. Regarded as promising if worked under proper direction.

CAROLINA MINERALS CO.**NORTH CAROLINA**

Operated the old Iola mine near Candor, Montgomery county in 1920.

COPPER KNOB MINE**NORTH CAROLINA**Owned by **Monaton Mining Co.** which see.**CULLOWHEE MINING & REDUCTION CO. . NORTH CAROLINA**

Idle. Cullowhee, Jackson county, N. C.

Officers: at last accounts, S. B. Ezell, pres.; D. D. Davies, v. p.; Thos. A. Cox, sec. and managing director; Chas. Davies smelter supt.**Inc.** 1905, as successor of Cullowhee Copper Co.**Property:** 1,300 acres, 12 miles from Sylvia, nearest rail point, shows a considerable body of sulphide ore, claimed to average about 5% copper and \$4 gold per ton, probably correct for small lots of ore, but cannot be realized from a large tonnage.**Equipment:** includes hoists and air compressor, with steam and water power, latter with a plant 3 miles from works. The 30-ton smelter, near Sylvia, blown in January, 1909, with semi-pyritic smelting, suspended operations late 1910, and probably will remain idle until rail connections are secured.

Lessees reported an output of 17 tons of matte from the old slag dump in 1919, yielding 3,334 lb. copper, \$20 gold and 19 oz. silver.

GARDNER-HILL MINING CO.**NORTH CAROLINA**

Company's gold-copper property, 9 miles from Greenboro, N. C., reported sold May, 1919, to H. K. English, of Knoxville.

GOLD HILL CONSOLIDATED CO.**NORTH CAROLINA****Office:** Room 309, No. 42 Broadway, New York. Mine at Gold Hill Rowan county, N. C.**Inc.** as successor of Gold Hill Copper Co., a notorious promotion of the late Walter George Newman known to have caught many Wall Street operators. New company, under same management, became bankrupt and property sold at auction, January 27, 1910, for \$45,000. Company does not own the adjacent Union Copper mine.**Property:** consisted of 1,050 acres in Rowan and Stanley counties, the Gold Hill mine, where gold was discovered in 1799. Gold quartz veins were discovered 1831, and in 1845 this mine was the largest gold producer in the United States.**Development:** by 2 shafts of 615' and 830', and 2 lesser shafts. The mine was operated in 1913 and part of 1914. Shipments to the Perth Amboy smelter returned 1.5% copper and about \$3 gold per ton, with small silver values. Copper occurs in minute particles of chalcopryite in hard quartz schist and recovery by wet concentration is not commercially profitable.**Equipment:** includes ten 100-h. p. boilers and a 10-stamp mill.

This company and its companion, the Union Copper Mining Co., enjoyed decidedly checkered careers. Operations conducted on a considerable scale, 1901-1903, were unsatisfactory and failed to show up the much advertised orebodies. A receivership ensued which was ended early 1906, but a receiver was again appointed, August, 1906, for the old company, on the application of Newman, on claims aggregating \$352,000. In June, 1915, the Court again appointed a receiver for the property, which has been shut down and apparently abandoned by the company.

Mr. Newman evidently used this property solely for stock-jobbing purposes. The mine is considered worked out and low grade, but worthy of some drilling in depth. At best the company could never have paid honest dividends on its capitalization, and under the late management was not regarded as worthy of any confidence whatever.

MOGUL MINING CO.**NORTH CAROLINA**

Dead. See same title under Nevada.

Property: had a 10-year lease on the Mint Hill mines, Union county, 18 miles from Charlotte, N. C., which was relinquished, 1917. Also controlled the Proskoy-Regent mine at Rawhide, Nev., by ownership of the Proskoy-Regent Mines Co. See **Seminole-Regent Mining Co., Nevada.**

MONATON MINING CO.**NORTH CAROLINA**

Hopkins, Ashe county, N. C. D. W. Lloyd, mgr., Garren, N. C. Owns the old Copper Knob mine, 160 acres, freehold, also 90 acres miscellaneous lands, said to show a 30" fissure vein in hornblende slate, carrying carbonate and sulphide ores, mainly bornite. Carload shipments to A. S. & R. Co. of N. J. said to have averaged \$15 per ton in gold, silver and copper. The slate wall rock also carries metal. Property was opened 1880. Has steam power, hoist, 2-drill air compressor and a 5-stamp mill.

NORTH CAROLINA TIN CO.**NORTH CAROLINA**

Address: Lincolnton, N. C.

Inc. 1918, to develop property of the U. S. Tin Co., near Lincolnton.

RICH COG MINING CO.**NORTH CAROLINA**

Property: a gold quartz mine, at Eldorado, Montgomery county, under development since 1919.

SALISBURY COPPER CO.**NORTH CAROLINA**

Former address, Gold Hill, Rowan Co., N. C. Mr. T. B. Brown, pres., writes us regarding company. "Dead, buried, all funeral expenses fully paid. No flowers."

SCARLETT COPPER MINE**NORTH CAROLINA**

Address: Frederick R. Thorns, owner, 112 Duane St., New York City, R. I. Dickens, supt., Ashboro, N. C.

Property: at Ashboro, Randolph county, N. C., formerly operated by the Ashboro Copper Mining Co.

Ore: is a sulphide, carrying principally copper and zinc, with iron, alumina, a trace of silver and gold, and occurs in contact and fissure veins, running N. 40° E., with dip of 35°. Pay shoot reported to be from 2 to 5' wide.

Development: by 120' vertical shaft and several tunnels, longest 220'.

Equipment: includes 25-h. p. hoist, compressor, pump and steam power. Prospecting and development work only done since 1917.

TWIN-EDWARDS COPPER MINE CO.**NORTH CAROLINA**

Greensboro, Guilford county, N. C. Inc. Sept., 1912. Cap. \$100,000; shares \$100 par.

Owns sundry old properties, including the Twin mine, with an 18' vein, which was worked previous to the Civil War. Property shut down many years, but company understood to be only dormant, not dead.

UNION COPPER MINE**NORTH CAROLINA**

Office: care Alfred Rossiter, administrator, 60 Broadway, New York. Mine address: Gold Hill, Rowan county, N. C.

Lands: 550 acres, freehold, about 15 miles from Salisbury, in Rowan and Cabarrus counties, well watered and timbered. The property has schist, carrying 5 veins with average strike of N. 20° E. and practically vertical dip, and 2' to 20' width. Three veins carry copper ores, the other 2, reported to carry silver and gold ores, respectively, are but slightly developed. The copper veins are mineralized zones carrying lenticular shoots of ore, longest about 100' in length.

In 1916, No. 7 and 12 shafts were unwatered to 140' and work started on a shoot of 3% copper ore, which is 5' wide and exposed for 250'. From December, 1916, to April, 1917, ore was shipped from shaft and dumps. Three drill holes near the Big Cut and No. 5 shafts cut 4% sulphide ore.

Development: is on the Big Cut copper vein, trenched at intervals for a distance of about 1 mile, and having 10 shafts, deepest 650'; these shafts show a vein 20' in width. The Big Cut vein shows oxidized ores and a little native copper in the upper workings, succeeded by chalcopyrite, with quartz gangue. Sampling by Dr. A. R. Ledoux, many years ago gave average of 4.40% copper, .4 oz. silver and 40c to \$1.20 gold per ton. No. 7 shaft, of 200' depth, shows a vein 4" wide at surface and 3 to 4' wide on the bottom level, where the ore is claimed to average 4.5% copper. There are 14 shafts all

told, and about 5,000' of workings. The property has been claimed, in the press, to have produced about \$1,000,000 worth of gold in early days.

One vein is said to carry zinc ore of low value, but is little developed.

Equipment: machinery plant is extensive and includes a small experimental flotation plant.

Buildings include a machine shop, smithy, engine-house, boiler houses, office buildings, 50-room hotel, dwellings and stable.

OREGON

Oregon is not a great metal-producing State, possibly because its mining districts are as yet but slightly developed, owing largely to inadequate transportation facilities. Most of the mines are in Baker county, whose ore deposits yield 90% of the gold and most of the other metals mined in the state.

There are only about a hundred producing metal mines in Oregon; six of these produce 80 per cent. and one of them 25 per cent. of the total value of the metals produced. These six mines are those of the Baker Mines Co., Cornucopia Mines Co., Homestead-Iron Dyke Co., and the Commercial Mining Co., all in Baker county, and the Queen of Bronze Mining Co., in Josephine county. The only placer mine in this group is the Power River Gold Dredging Co.

In 1921, the mines of the State yielded \$775,194 in gold, 43,120 ounces silver, 274,000 lb. copper, and 350 lb. lead, the total value being \$852,614, as compared with \$1,502,465 in 1920. The companies are described in alphabetical sequence.

ALICE MINE

OREGON

Owner: Gustav Pinson, Prairie City, Ore.

Property: 2 claims near Prairie City, Grant county, said to show irregular deposits of soft gold-silver ore in fissure vein. Orebody dips 50° E.

Development: by 180' tunnel.

ALMEDA MINES CO.

OREGON

Offices: 1014 Board of Trade, Portland, Ore., and Opera House Block, Grants Pass, Ore. Harry Sordy, supt., Merlin, Josephine county, Oregon.

Officers: S. C. Spencer, pres.; L. E. Crouch, 1st v. p.; Nat P. Ellis, 2nd v. p.; H. E. Thurman, sec.; C. M. Huddle, treas.

Inc. July 28, 1916, in Oregon. **Cap.** \$3,500,000; shares \$1 par; 3,000,000 shares common, 500,000 shares preferred. Successor to Almeda Consolidated Mines Co. Annual meeting, second Tuesday in April.

Property: 17 lode claims, 340 acres, also 500 acres placer ground, in Josephine county, about 26 miles from Grants Pass, and 17 miles from Merlin, nearest railway station on the Southern Pacific, with daily stage line to Almeda. Lands include a 200-acre town site.

The quartz claims are in three groups known as the Almeda on the north side of the river and the Rocky Gulch and Rand groups on the south side of the river.

The Almeda group consists of 3 claims developed by 5 tunnels and a 535' shaft, with about 2 miles of underground workings. Orebody estimated by the management to show approximately 2,000,000 tons blocked out for production.

Considerable development work has been done on the Rocky Gulch and Rand groups by tunnels and crosscuts. The main vein is said to be 10' to 20' wide on the slate hanging wall, ore being strongly auriferous and slightly argentiferous chalcopyrite. Paralleling the main vein is a body of low-grade ore 20 to 30' wide, highly silicious, mainly chalcopyrite with occasional bornite, giving promise of greater values at increased depth.

Equipment: consists of a 100-ton blast furnace for matting, distillate engines to develop 225 h. p., compressors, motors, boilers, complete laboratory and all necessary buildings. The 17-mile mountain road from Merlin to

the mine is in good condition and motor trucks operate over it the entire year.

Owing to litigation between factions of the stockholders and the directorate, only a limited amount of development work has been done since 1916.

AMALGAMATED MINES CO.

OREGON

Office: Baker, Ore.

Officers: W. F. Downie, pres.; W. Burnham, sec.; G. J. Burnham, treas.

Cap. \$1,500,000; \$1 par; all issued.

Property: 21 quartz claims in Eagle Creek district, Baker county.

AMERICAN ALMADEN QUICKSILVER & GOLD MNG. CO. ORE.

Mail returned from last address: 100½ Fourth St., Portland, Ore.

Officers: W. B. McKinney, pres., E. N. Wheeler, sec.-treas.

Cap. \$1,500,000; \$1 par; all issued.

Property: 3 claims, 11 miles from Howard, in the Ochoco district, Crook county, developed by tunnels. Ore contains cinnabar in altered andesite.

AMERICAN EXPLORATION CO.

OREGON

Company dissolved, 1918, and holdings taken over by the John Hampshire Co. See Vol. XIV.

ANCIENT RIVER GOLD MNG. CO.

OREGON

Address: J. S. Taylor, mgr., Rogue River, Oregon.

Property: J. I. Wade, pres.; J. S. Taylor, v. p.-treas.; F. J. Neff, sec., with Edw. Clausen and F. M. Cummings, directors.

Inc. April, 1920, in Oregon. Cap. \$50,000; \$1 par; 34,000 outstanding.

Property: 28 acres placer ground, freehold, in Rogue River Valley, Jackson county. The old Rogue River channel is reported to be 350-500' wide, with 18-20' of gravel running \$3-\$20 per cu. yd. in platinum arsenide and iridium.

Equipment: includes electric line, 75 h. p. pump, motor giant and piping. Developing.

BAKER MINES CO.

OREGON

Described in Vol. XIII. Consolidated with Cornucopia Mines Co., which see.

BALD MOUNTAIN MINING CO.

OREGON

Property sold to Ibez Co. and company dissolved in 1916.

BEN HARRISON MINE

OREGON

Address: W. O. Fellows, Sumpter, Ore.

Property: 10 claims, 7,000' above sea level, in Grant county, 23 miles by road west of Whitney, and 28 miles by road from Sumpter, the nearest railroad stations. Ore occurs in the Ben Harrison vein, strike N. 3° E., dip 67° E., which varies in width from 18" to 21', with an average stoping width, where opened, of 77". The vein is a brecciated replacement in granodiorite. Ore minerals are pyrite, stibnite, chalcopyrite, sphalerite, pyrargyrite, and stephanite, with gold of about equal value to the silver in the ore.

Development: by adits, the lowest at the 600' level. Several hundred feet of drifting has been done on the various levels and in 1915 there was said to be above the 500' level, 87,000 tons of ore blocked out on 3 sides, with an average value of \$10 per ton.

Equipment: includes 100-ton flotation mill, tube mill, classifier, elevators and settling tanks.

See Mineral Res. of Ore. Vol. 1, No. 4, p. 29. Production figures not available. Operated one shift daily to October, 1920, when labor trouble caused shut-down.

BLACK BUTTE QUICKSILVER MINING CO.

OREGON

Defunct. Described in Vol. XIV.

BLUE BIRD MINING CO.

OREGON

Office: 67 N. Third St., Portland, Ore.

Officers: at last accounts, S. M. Carter, Blue River, Ore., pres.; F. W. Brooke, sec.; C. Mareo, treas.

Cap. \$100,000; \$1 par; fully issued.

Property: Blue Bird mine, 7 unpatented claims, in Sec. 28, T. 15 S., R. 4. E., 6 miles from Blue River. Linn county, said to carry a deposit of oxidized ore, containing gold and silver values and some iron pyrite. Developed by 500' and 220' tunnels and several crosscuts. Is a prospect.

BLUE MOUNTAIN MINES CO.

OREGON

Address: Baker City, Ore. **Mine address:** Bourne, Ore.

Property: the E. & E. mine, long owned by Bourne Mng. Co., transferred, 1919, to the E. & E. Mng. Co. and full control taken over by present company in June, 1921. Mine is on the same line as the Columbia, Taber Fraction, Golconda and North and South Pole. Operated continuously in 1921.

Equipment: installed 1919-'21 is complete and includes a new mill.

BLUE MOUNTAIN MINING CO.

OREGON

Office: C. L. Arzeno, pres., gen. mgr., 9 E. Fifth St., Covington, Ky.

Mine office: Sumpter, Baker county, Ore.

Inc. in Arizona. Cap. \$2,000,000; \$1 par; 1,373,999 issued. Authorized \$50,000 6% bonds; \$47,500 outstanding. Annual meeting fourth Friday in April. In May, 1919, the Imperial Eagle M. Co. was organized to liquidate the outstanding bonds and other indebtedness of the Blue Mountain company and will eventually take over its holdings.

Fully described in Volume XIII.

BLUE RIBBON MINES GROUP

OREGON

Y. B. Tardiff owner, Pendleton, Ore.

Property: 4 unpatented claims, 1 mile E. of the Buffalo-Monitor group in Granite district, Grant county, said to carry 4' quartz vein in slate and granite, the ore assaying \$18 per ton in gold and silver.

Development: by 1,030' tunnel and 1,635' of drifts with 500 tons of ore reported blocked out. Expended \$1,200 in 1918.

BOLEN CREEK MINING CO.

OREGON

Address: P. J. Neff, Medford, Ore.

Inc. Nov., 1919, in Arizona. Cap. \$150,000.

Property: a gold placer on Sucker creek, in Holland district of Josephine county, 30 miles W. of Medford. Mine is fully equipped.

BOSWELL MINING CO.

OREGON

Geo. S. Barton, sec.-treas.

Inc. 1921 in Oregon.

Property: the Boswell mine, 108 acres, on Sucker creek, Holland district, Josephine county, 45 miles S. of Grants Pass, credited with gold production of \$46,000 from shallow workings. The purchase price was \$150,000. Ore occurs in a quartz vein, 2-4' wide, with well defined walls of greenstone. The vein is opened to depth of 76', strikes E.-W. with dip of 75-80° N.

Equipment: includes 3½' Huntington mill and cyanide plant, 7x9" crusher and 8,008' tramway.

Production: mill started April, 1921, and to July had shipped 2,500 oz. gold bullion. Tailings are being treated with a reported 95% recovery.

BOULDER CREEK GOLD MINING CO.

OREGON

Mail returned from former office: 80 Sixtieth St., Portland, Ore.

Officers: R. D. Hewitt, pres., Agness, Ore.; John Gardner, sec.-treas. **Cap. \$25,000; \$100 par; \$21,076 outstanding.**

Property: an extensive bar known as the Star group of mining claims, about 240 acres, in Sec. 25, T. 34, R. 13 W., Ophir district, Curry county, on which \$4,800 has been spent in the following improvements: 4,800' ditch, saw-mill, dam, 1,000' of piping and 800' pipe giant. Results of operations not reported.

BRADEN MINE

OREGON

Operated by C. R. Ray, of Medford, Ore., at last accounts.

Property: S. E. ¼ section 27, T. 36 S., R. 3 W., 3 miles from Gold Hill

Jackson county, opened up about 30 years ago. Largest production for any one year was \$30,000 in 1907.

ORE: gold in 2' vein, N. 30° E., dip 25° S. E. Vein filling is quartz and sulphides. Ore assays about \$9 gold per ton.

Development: several thousand feet of drift tunnels, longest over 1,200'. For geology, see U. S. G. S., Bull. 546, p. 39.

BRIGHT CARBONATE MINING CO.

OREGON

Office: 118 East Webb St., Pendleton, Ore. Geo. Darveau, pres.; John Seibert, sec.-treas.

Cap. \$60,000; par \$1; all outstanding.

Property: 3 claims in the Greenhorn range, Grant county, at an elevation of 7,250', is reported to carry a quartz vein in granodiorite, containing mainly gold and silver values. Mine but slightly developed and still in the prospect stage.

BUFFALO MONITOR MINE

OREGON

Operated under lease by Buffalo Development Co., Granite, Ore., at last accounts.

Property: about 5 miles from Granite, in Grant county, reported to have 3 veins, carrying pyrite, chalcopyrite, tetrahedrite, galena and stibnite; the main or Monitor vein is said to be 50' wide.

Equipment: includes compressor and air drills.

Has been a steady producer.

BURNT RIVER DREDGING CO.

OREGON

Mail returned from former address: 506 Oregonian Bldg., Portland, Ore. O. E. Tisch, pres.; D. D. Wallace, sec.-treas.

Cap. \$250,000; par \$1; 39,125 outstanding.

Property: 680 acres, known as the Pomeroy dredging ground 8 miles S. of Durkee in Baker county.

CALIFORNIA MINE

OREGON

Operated by A. Walker and H. P. Campbell.

Property: 18 miles from Glendale, said to show a vein 4' in width and averaging \$23 in free gold. The ore is white quartz with some pyrite.

Development: by 651' crosscut at depth of 300', with 230' of drifts.

Equipment: 2-stamp sampling mill.

CANYON MOUNTAIN MINING CO.

OREGON

Address: Jackson Chambers, pres., Canyon City, Ore.

Cap. \$1,000,000; \$1 par; 876,392 issued.

Property: Mountain View mine, 1¼ miles S. E. of Canyon City, Josephine county, said to carry free milling gold. Developed by 500' tunnel. Inactive since 1914.

CHETKO COPPER CO.

OREGON

Idle and probably dead. Mine near Kerby, Josephine county, Ore.

Officers: C. W. Evans, pres. and gen. mgr.; C. C. Hicks, v. p. and supt.; A. E. Shepard, sec.-treas.; Theo. R. Heintz, mgr.

Inc. Aug. 10, 1905, in Arizona. **Cap.** \$1,000,000; \$1 par; issued 730,516.

Property: 36 claims, 720 acres, fairly timbered, and 2 water rights, in Curry county about 70 miles from Grants Pass, the nearest railroad point. Said to show 8 orebodies, one reported by company as of 240' average width, traceable 1¼ miles, carrying native copper in schist, also covellite, bornite and chalcopyrite, of 9% average copper tenor, with \$4.75 gold per ton.

Development: by shafts of 45', 34' and 80', and by 6 tunnels, of 30 to 230' length, with 969' of workings, estimated by company to show 600,000 tons of ore, with 115,000 tons blocked out for stoping, which figures are regarded as excessive. Closed down, 1918.

COLUMBIA GOLD MINING CO.

OREGON

Operated the Columbia gold mine, near Sumpter. Company sold its entire property 1917. Fully described in Min. Resources of Oregon, Vol. 2, No. 4.

COMMERCIAL MINING CO.**OREGON**

Mail returned from former address: 214 Chamber of Commerce Bldg., Portland, Ore.

Cap. \$1,750,000; \$1 par; 1,666,000 issued.

Property: the Rainbow mine covering the Rainbow vein, a brecciated zone, 5'-50' wide, made of rock fragments cemented by quartz.

Development: by 400' shaft with 1,700' of drifting on vein, on 200' level.

Equipment: 15-stamp mill, with tube mill, Dorr classifier and thickener, etc. The mill is reported to make a recovery of 95%. (See Min. Resources of Oregon, December, 1916, Vol. 2, No. 4, p. 66.)

Production: previous to 1911, the mine produced \$242,000. During 32 months ending December 1, 1915, the U. S. Sm. M. & R. Co extracted 95-747 tons of ore averaging \$12 per ton and representing \$1,083,360 in bullion. The mine was productive until closed down and dismantled in 1918.

CONTINENTAL MINING CO.**OREGON**

W. W. Robbins, pres.; E. J. River, sec.-treas., 1308 Sixteenth St., Spokane, Wash.

Property: 23 miles from Sumpter, Baker county, said to show a vein 18-36" wide with 4-16" of high-grade gold-silver ore.

Developed to depth of 400'.

Equipment: includes 20-ton flotation plant and air-compressor. Developing.

COPPER DYKE MINING CO.**OREGON**

Office: Homestead, Ore.

Officers: Wm. S. Kuhn, pres., Amer. Nat'l Bank Bldg., San Francisco, Cal.; A. S. Humphreys, sec.-treas. Herbert Stone, mgr.

Inc. Oct. 13, 1917, in Washington. **Cap.** \$100,000; par 10c; none issued.

Property: MacDougal group, 80 claims 19 patented, 1,600 acres on Snake river, 5 miles N. of Homestead, Baker county, said to show a fissure vein in porphyry, with strike N. 20° W., dip 75° E., containing copper, silver and some gold. Copper occurs as chalcocite and bornite. Mill ore runs 3 to 6% copper, shipping ore 20 to 50% copper.

Development: by 200' incline shaft and 6 tunnels having a total length of 3,340'. **Equipment:** includes steam power, air compressor, etc.

Geology fully described in Min. Res. of Oregon, Vol. 2, No. 4, p. 146.

Shipments made to Tacoma smelter in 1919.

COPPER KING MINING CO.**OREGON**

H. W. Webber, mgr., Placer, Ore.

Property: 8 claims, near Placer, Josephine county, under development, 1918-19, and shipments made to Tacoma smelter.

COPPER SYNDICATE, THE**OREGON**

Address: Geo. Handy, Spokane, Wash.

Property: 6 claims, and a bond on 7 others adjoining the Iron Dyke mine in the Iron Dyke district, Baker county. A branch of the Oregon Short Line runs 400' from the tunnel. Ore carries silver, copper, and a little gold.

Development: by 1,500' of tunnel, crosscuts, and winzes. The crosscuts passed through a large lens of ore in three places in a distance of 800'. It is 20' wide, assaying \$27 per ton. A winze is being sunk on this body at 400' from the tunnel portal, at a depth of 200'.

CORNUCOPIA MINES CO.**OREGON**

Officers: Robt. M. Betts, pres.-mgr., Cornucopia, Ore.; J. P. Walsh, v. p.; W. H. Richardson, sec.-supt.; Jos. B. Thomas, treas., 132 E. 19th St., New York City.

Cap. \$1,000,000; \$10 par; all outstanding.

Property: the Union-Companion mine at Cornucopia, Baker county, Ore., 25 miles from a railroad. Gold was discovered in this district in 1880 and in 1895 the Union-Companion claims, although but slightly developed, were sold for \$60,000, and a 20-stamp mill built.

The vein is said to be traceable on surface for 6,800' with strike of N. 20° E., dip of 45° W., and 2-5' wide, maximum width 20'. Wall rock is granodiorite and schist. Vein material is massive white quartz containing 3 to 5% of pyrite, which carries the gold. There is some silver sulphide present also appreciable quantities of chalcopyrite, arsenopyrite, and blende. Ore ranges in value from \$10 to \$20 per ton. Company also owns the Last Chance mine at Cornucopia, formerly operated by the Baker Mines Co.

Development: by incline shafts, with the 800' the lowest level, said to show 4 ore-shoots having an average width of 3' and an aggregate length of 1,200'.

Mill: 20 stamps, weight 850-lb. each, making 98 drops per minute through 7". Ore is crushed in a 4-lb. KCN solution. Stamp duty is 4½ tons per stamp. Fine grinding is done in two 5'x22" tube mills, each driven by a 75-h. p. motor. The cyanide plant is equipped with Dorr thickeners, 3 Pachuca tanks, and 2 continuous revolving drum filters. An extraction of 87 to 89% of gold and silver is obtained. Average consumption of supplies per ton of ore is cyanide, 1.4 lbs.; lime, 3 lbs.; zinc dust, 0.9lb. Power is furnished by the company's hydro-electric plant, 2 miles from the plant. Current is transmitted at 6,600 volts and transformed to 2,200 volts for use. Cost of treatment is said to be \$2 per ton. Company did extensive experimental work on its low grade ores, and erected an additional 20-stamp mill with 125-ton cyanide plant. Both mills are operated 12 hours daily.

Production: estimated at 41,000,000 oz. in gold annually up to time of the war. Operations have since been curtailed. See Min. Res. of Oregon, Vol. II, 4, p. 74.

DOROTHEA GOLD MINES CO.

OREGON

Address: 122 Oregon Terrace, Medford, Ore.; and J. F. Reddy, Grants Pass, Ore.

Officers: J. F. Reddy, pres.; Lincoln McCormick, sec.; Mary F. Reddy, treas.

Inc. 1916, in Oregon. **Cap.** \$50,000; \$1 par; all issued.

Property: 200 acres, 120 patented on Coyote creek, Josephine county, Ore. Claims show a contact deposit between serpentine and diorite; the mineralized zone is 2 to 12' wide dipping 20°, with N.-S. course, the ore containing 30% chromic oxide. Ore shoot is said to be 200' long and 5' wide, and to average \$5 per ton.

Development: by 500' crosscut tunnel and 300' drift on vein, workings amounting to 1,000' to depth of 170'. Reserves given by company as 8,000 to 10,000 tons.

Equipment: includes a 5-stamp mill and concentrator, expected to make a 65% concentrate. Concentration of low-grade chrome ores is increasing, as less than 40% grade has a narrow market.

ELDORADO COPPER MINING CO.

OREGON

Address: Andrew Laidlaw, Columbia Bldg., Spokane, Wash.

Incorporators: Andrew Laidlaw, S. W. Miller, C. P. Ritter, F. W. Beyer and Henry Banfield.

Inc. 1916, in Washington. **Cap.** \$2,000,000; \$1 par. Company organized to take over the Banfield mine, 32 miles east of Riddle, Ore., on the S. P. railway. The price is said to have been \$300,000 partly in stock.

Property: 9 claims, formerly owned by the Douglas-Umpqua Mng. Co., said to show nine veins, 3 of which have been developed. Ore estimated to average 4% copper with slight gold and silver values.

Development: by 6 tunnels, lowest 900' below surface, with about one mile of workings, estimated by management to block out 300,000 tons of ore. This is an old mine which has been under development for 16 years.

EMPIRE GOLD DREDGING & MINING CO.

OREGON

Office: 250½ Third St., Portland, Ore.

Officers: W. F. Burrell, pres.-mgr.; O. L. Kennedy, sec.-treas.; Chas. H. Timms, supt.

Cap. \$100,000; \$100 par; \$72,000 issued.

Incorporated to rework placer ground in John Day Valley and Canyon Creek, Grant county, credited with past production of \$15,000,000 in gold.

Equipment: 6 cu. ft. bucket dredge. Is a small producer that operated throughout 1920.

EQUITY COPPER & GOLD MINING CO.

OREGON

Mine P. O.: Prairie City, Ore.

Officers: Rev. W. J. Hughes, pres.-treas.-gen. mgr.; C. F. Godwin, v. p.; Mrs. Kate Palmer, sec., with E. T. Johns, E. J. Hughes, August J. Smith and H. J. Smith, directors.

Inc. 1901, in Oregon. **Cap.** \$150,000; 10c par. Paid one dividend of \$3,000.

Property: 6 claims, unpatented, 88½ acres, with a 5-acre millsite in the Quartzburg district, 7 miles N. of Prairie City, Grant county. Reported to show several veins, 3 of which are developed by tunnels and are traceable ½ mile. The sulphide ore is estimated by company to average 1.5 to 3% copper with lead, zinc and silver values.

Development: by 3,000' of tunnels to depth of 375'. **Equipment:** includes 5-stamp amalgamating and concentrating mill, crusher, tables and 3 slime tables.

Total output to date \$125,000. Mine worked in a small way by lessees from 1903-1914. Greater depth and more adequate equipment necessary.

EUREKA MINING, SMELTING & POWER CO.

OREGON

Idle. Address: W. E. Howard, sec., 1708 Cedar St., Spokane, Wash.

Property: 40 claims, patented, at Imnaha, Wallowa county, Ore. Secretary reports, property idle for many years, awaiting railway facilities.

FLAGSTAFF MINE

OREGON

J. H. Sullivan, supt. Baker, Ore., at last account.

Property: in Virtue district, 6 miles N. E. of Baker, Baker county. **Ore:** occurs in quartz fissure veins, with values in small high-grade shoots. The main or Big Ledge vein, 5-8' wide, runs N. 15° W. with dip of 60° E., and is said to average \$16 per ton in gold.

Development: 5,000' of workings with 760' three-compartment shaft.

Equipment: 20-stamp mill, cyanide plant, steam power.

Property controlled in Boston, operated intermittently by lessees.

FREELAND CONS. MINING CO.

OREGON

Dissolved, March 25, 1914. Fully described in Vol. XII. Property reported taken over by Cons. Copper M. & P. Co., also defunct.

GIRAFFE MNG. & MLG. CO.

OREGON

Officers: at last account, G. Cartright, pres.; A. O. Weatherman, sec.; Grace Nichols, treas.

Cap. \$150,000; \$1 par; 75,000 issued.

Property: 7 gold claims in Mormon Basin, Baker county, said to show ore occurring in a narrow mineralized porphyry dike cutting argillite, with intrusive bodies of serpentine and dikes of basalt. At 85' depth, gold bearing ore assaying about \$4 per ton was reported cut.

Development: by shaft and tunnel.

GOLCONDA MINE

OREGON

R. J. Rowan, lessee.

Property: 2 chrome claims, 6 miles N. E. of Takilma, Josephine county.

Ore: occurs in lens shaped masses in serpentine, 33' thick with N. 15° E. course and dip of 65° E. As usual, with chrome deposits, they are irregular in shape and variable in quantity, but geologic conditions are considered favorable.

In 1918, property was equipped for extensive development, and a production of 5,000 tons of concentrates annually was contracted for with the Atlantic Ore & Alloys Co. of Philadelphia.

Production: 2,000 tons of ore averaging 40% chrome oxide in 1916. In

1918 shipments amounted to 450 tons in May; 1,035 tons in June, and 1,500 tons in July. No recent returns.

GOLD & PLATINUM MINES CO.**OREGON**

Office: Grants Pass, Ore. I. F. Peck, pres.

Inc. 1916. Cap. \$1,000,000; \$1 par.

Property: 1,280 acres of placer claims on Cave creek, Josephine county, for which dam, flume, sluice-boxes, etc., have been constructed.

GOLD BAR MINE**OREGON**

Property: placer claims in the Agness district, Illahe, Curry county. Worked intermittently since 1856. Reported sold 1918, to Seattle, Wash. people, who were said to be operating 3 giants and a steam-shovel. Bed-rock is black shale; gravel is 9' thick with 4' of overburden. Yields have been fair. Property has plenty of water for washing.

GOLD CREEK MINING & MILLING CO.**OREGON**

Address: Salem, Ore.

Officers: Otto Hansen, pres.; W. I. Staley, sec.-treas.

Inc. in 1902. Cap. 3,500,000 shares: \$1 par.

Property: 17 claims, 16 miles N. E. of Gates, on S. P. R. R., N. Santiam district, Marion county, said to show massive pyrite, chalcopyrite, galena, and sphalerite, in a vein in andesite.

Development: 1,500' crosscut tunnel and 1,000' of drifting on orebodies.

GOLDEN CHARIOT MINING & MILLING CO.**OREGON**

Mail returned from former address: Sumpter, Ore.

Officers: Chas. Weidemann, pres.; O. E. Conner, Jr., mgr.; Rose Rennekamp, sec.

Inc. in Oregon. Cap. \$350,000; \$1 par.

Property: 400 acres at 4,500' elevation, 2½ miles from Sumpter, is said to show a fissure vein in limestone. The gold-bearing ore is reported to occur in shoots, 6' wide on the 210' level.

Development: to 300' by vertical shaft, to be sunk another 200'. Core drilling to 500' below 210' level; winze below reported in free milling ore.

Equipment: includes 50-h. p. friction hoist, steam-driven compressor, and pumps.

GOLDEN EAGLE MINING CO.**OREGON**

Office: The Dallas, Ore., J. S. Fish pres.; J. C. Hostetler, sec.-treas.

Cap. \$441,000; \$1 par.

Property: 8 claims in Greenhorn district, Baker county, Ore. Past production, \$75,000. Claims said to show a number of non-persistent fissures; only three of them ore-bearing. No. 2 vein has been followed to depth of 200', and besides free gold, the ore contains some galena and copper.

Development: by tunnels aggregating 2,600', to depth of 175'; also shaft 75' below lowest tunnel. Work to be resumed.

GOLDEN GATE MINING CO.**OREGON**

In 1917 mine was closed down and equipment sold. Described in Vol. XIV.

GOLDEN RULE CONSOLIDATED M. & M. CO.**OREGON**

Office: W. C. Winslow, attorney, Salem, Ore. Cap. \$500,000; shares 5c par.

Property: 26 claims, 15 miles S. E. of Disston, Bohemia district, Lane county, Ore. Idle.

GOLDEN STANDARD MINING CO.**OREGON**

Probably dead. Described in Volume XIV.

GOLD HILL MANGANESE CO.**OREGON**

Last address: Grants Pass, Ore.

Out of business. Described in Volume XIV.

GOLD HILL QUARTZ MINING CO.**OREGON**

Officers: C. R. Ray, pres.-treas.; E. W. Liljegren, sec., at last report.

Cap. \$60,000; \$100 par.

Property: some claims, 2 miles S. E. of Gold Hill, Jackson county, Ore. Little has been done, save assessment work.

GOLD QUARTZ & PLACER ASSOCIATION**OREGON**

Address: Jacksonville, Oregon.

Property: the Gold Coin quartz mine and the Pearce and Bowden placer tract. A lower drift was to be extended 800' early in 1922 and a steam shovel added to present "grant" equipment at the placer field.

GOLD REEF MINING CO.**OREGON**

Office: 957 Stuart Bldg., Seattle, Wash. Mine address Cornucopia, Ore.

Officers: R. H. Parsons, pres.-treas.; Henry C. Field, v. p.; W. H. Habernal, sec.; R. G. Amidon, gen. mgr.

Inc. in Oregon to take over holdings of Queen of the West Mines Co. under bond and lease. **Cap.** \$100,000.

Property: 11 claims in the Cornucopia district, Baker county, developed by 2 tunnels cutting the Queen of the West vein on the 50 and 600' levels. The main tunnel is being continued 800' to cut the Red Cross vein. Geology described in Min. Res. of Oregon, 1916, Vol. 2, No. 4, p. 186.

Equipment: 10-stamp mill and concentrator, with 60-ton cyanide plant. Mine and mill are connected by 3,600' aerial tramway.

GOLD RIDGE MINING CO.**OREGON**

Address: Medford, Oregon.

Property: 8 claims and 120 acres patented ground, 2½ miles from Gold Hill station, on the Southern Pacific R. R.

Development: about 1,100' on three tunnels, opening a small vein of blue quartz carrying pyrite and calcite. The vein runs N. E.-S. W. and dips 75° N. It lies between slate and porphyry and is broken by small faults. The values run from \$1 to \$9 per ton, for a length of 90' along the lower or No. 4 tunnel, but specimen ore carries high values.

GOLD STANDARD MINING CO.**OREGON**

Office: Ashland, Ore.

Officers: P. S. Casey, pres.; F. G. McWilliams, sec., at last report.

Cap. \$82,000; par \$1.

Property: 30 acres, 2½ miles W. of Jacksonville, Jackson county, Ore. Vein supposed to be extension of adjoining Opp mine. No recent returns.

GREENBACK GOLD MINING & MILLING CO.**OREGON**

Address: Placer, Josephine county, Ore. Mr. Childers, mgr. Owned by R. C. Robinson, Parish, N. Y.; and leased to W. L. Holmes of Buffalo, and H. L. Holmes of Geneva, N. Y., at last account.

Property: 1½ miles N. of Placer, which is 8 miles from Leland (nearest railroad), in Greenback district, said to show a vein of quartz, calcite, and pyrite in greenstone, cut off by serpentine to the east. Ore averages 20" in width, assaying \$8 per ton in upper levels.

Development: since 1897 opened by 12 levels to 500' vertical depth. Above No. 9 most of the ore has been stoped. A winze opened the ore below No. 9.

Equipment: largest plant in southern Oregon, consisting of 40 stamps (motor driven), 3 crushers, 12 concentrators, cyanide annex, 7,000' aerial tram, and compressor.

GREYBACK COPPER MINES**OREGON**

Address: Selma, Ore. John Hampshire, mgr.

Property: 20 claims, 13 miles E. of Selma, in the Waldo district, Josephine county, Ore., purchased in June, 1917, by Twohy Bros. Co., railroad contractors of California and Oregon.

Development: 700' of tunneling has, it is said proved existence of a large copper deposit.

HAMILTON MAMMOTH MINES, INC.**OREGON**

Reported to have purchased the Belle of Baker & Red Fox properties near Sumpter, in July, 1921.

HECLA CONS. MINING CO.**OREGON**

Former address, Baker, Ore. Probably dead. Described in Volume XIV.

HEPPNER MINING CO.**OREGON****Office:** Heppner, Ore. **Officers:** D. B. Stalter, pres.; J. O. Hager, sec.; S. A. Wright, treas.**Cap.** \$1,000,000; 10c par; \$97,458 issued.**Property:** 13 claims, in New Eldorado district, Grant county, about 18 miles from Austin, the nearest shipping point. Claims show over a dozen quartz veins from 1-20' wide, that carry free gold and some pyrite near the surface. No recent returns.**HIDDEN TREASURE GOLD MINING CO.****OREGON****Officers:** F. T. Kelly, pres.; N. M. Kelly, sec.**Cap.** \$1,250,000; \$1 par; 1,090,600 issued.**Property:** known locally as I. X. L. mine, 11 claims, near Greenhorn, Grant county, reported to show 3 veins carrying gold ore. Developed by 2 shafts. Idle since 1915.**HIGHLAND MINE****OREGON**See **National Mines Co.****HOMESTEAD-IRON DYKE MINES CO., INC.****OREGON**

J. R. Buchanan, gen. mgr., care of Goodrich, Lockhart Co., No. 60 Broadway, New York. D. M. Goodrich, pres.; Charles C. Goodrich, sec.-treas.

Cap. 1,000 shares, all issued.Operates property of **Iron Dyke Copper Co.**, which see.**HYDRO SIXES MINES CO.****OREGON****Office:** 57 Post St., San Francisco, Cal.**Officers:** W. J. Bell, pres.; G. W. Root, sec.; C. J. Pease, treas.**Cap.** \$70,000; \$1 par; all issued.**Property:** 1,200 acres placer ground between Otter and Elephant Rock Creek, just below the forks of Sixes River, Curry county. Company uses water under 150' head, from Big Otter Creek.

Employed 50 men at last accounts. Company spent \$100,000 improving and equipping property. Probably idle.

IBEX COMPANY**OREGON****Address:** Sumpter, Ore.**Property:** the Ibox and Bald Mountain properties near Granite Creek, Cracker Creek district, Baker county, 8 miles N. W. of Sumpter, Ore.**Development:** the work done in the past 15 years consists of about 8,000' of tunnels, etc., with 3,000' of it on the gold bearing vein. The vein averages 5' in width, but has a maximum of 25'. It occurs entirely in argillite, contains sulphides, and is generally low-grade.**IMNAHA MINE****OREGON****Property:** 25 miles N. of Homestead and 40 miles E. of Joseph, the Railroad terminus. Developed by 4,000' of tunnels, etc. Vein said to be 3½' wide. Reserves estimated at 50,000 tons of gold ore.**Equipment:** 10-ton mill driven by water-power. No recent returns.**IMPERIAL EAGLE MINING CO.****OREGON****Address:** 9 E. 5th St., Covington, Ky. **Mine office:** Sumpter, Ore.**Officers:** C. L. Arzeno, pres.-mgr.; Fred B. Salmar, v. p.; Alvin Davidson, sec.-treas., with B. Moeller, Chas. J. Summers, John Arzeno, Robt. Voigt and J. J. Luckey, directors. Alfred Heisler, supt.Inc. May 8, 1919, in Oregon to take over the holdings of the Blue Mountain Mining Co. and the Imperial Mining Co. **Cap.** \$500,000; 2,000 7% pfd. shares, par \$100 and 300,000 com. shares, par \$1, increased May, 1920, to \$250,000, 7% pfd., \$100 par and \$500,000 common, \$1 par; \$478,400 subscribed to, \$191,100 pfd. and \$274,788 com. issued. Company reported \$179,225 accts. and bills receivable and \$6,271 accts. payable, March 1, 1921. Annual meeting, second Tuesday in March.**Property:** a lease on the Imperial Eagle group, 23 patented claims, 225

acres, and Blue Mountain group, 450 acres, in Cable Cove district, Baker county, 10½ miles N. W. of Sumpter.

Ore: occurs in fissure veins in diorite, running E.-W. and dipping in opposite directions. Values are mainly gold, silver, and lead, with a little copper and zinc. Mill ore said to average \$9, and shipping ore \$30 to \$80 per ton. Reserves were estimated by management at \$67,364 tons opened up, valued at \$670,000.

Development: by 16 tunnels to depth of 690' with about 15,000' of workings.

Equipment: amalgamating-concentrating mill of 125 tons daily capacity, steam power, 6-drill compressor being installed.

Shipped to Tacoma smelter in 1919. Mine was closed down during 1920, but operations were resumed in summer of 1921. Company will eventually absorb the Blue Mountain M. Co.

IMPERIAL MINING CO.

OREGON

Described in Volume XIII. Reorganized 1919, as **Imperial Eagle Mining Co.**, which see.

IRON DYKE COPPER CO.

OREGON

Office: Homestead, Baker county, Ore.

Officers: F. F. Curtze, pres.; F. A. Brevelier, sec.; A. A. Claus, treas.; J. R. Buchanan, mgr.; Thayer Lindsley, cons. engr.

Inc. in Pennsylvania. Cap. \$500,000; par \$1; 380,000 issued. Eric Trust Co. holds title by trust deed and bond. Worked by Homestead-Iron Dyke Mines Co., Inc., a Goodrich-Lockhart subsidiary.

Property: a copper deposit discovered 1897, about 2,000' from railroad at Homestead. Lower tunnel, 300' above town, is about 1,300' long, cutting the orebody at 800' in and connected by raise with 3 tunnels above. The mine has several thousand feet of workings. The lower tunnel shows massive chalcocopyrite and pyrite ore about 6' wide, said to extend upward to the upper tunnel. Ore said to contain \$2 to \$3 gold, 3 oz. silver and 4% copper per ton. Reserves said to be proven by diamond drilling, are estimated to amount to 500,000 tons of a gross value of \$10,000,000.

Reopened 1915, after years of idleness, and is largest copper producer of the State. A wide body of 4% ore, with good precious metal content, was opened at a depth of 850'. Late in 1920, it was reported that a large body of 5% copper and \$6 gold ore had been opened.

Equipment: includes a 125-ton concentrating plant erected in 1916, using flotation with 93% recovery. Concentrates aggregate about 800 tons a month. About 90 men employed.

Mine is a steady producer and apparently has a promising future. Shipments were discontinued, January, 1921, owing to low price of copper and the closing down of the smelters, but development work is to be continued.

JOHN HAMPSHIRE COMPANY

OREGON

Address: John Hampshire, Grants Pass, Ore. **Mine address:** Waters Creek, Oregon.

Inc. 1918. Succeeds the American Exploration Co. and owns holdings of the Waldo Sm. & Ref. Co. and the Takilma Sm. Co.

Property: Queen of Bronze mine and Waldo mine, near Takilma, Waldo district, Josephine county. Geology fully described in Min. Res. of Oregon. Bull. 2, No. 4, 1916, pp. 184-230.

Equipment: includes smelter with 125-ton water jacket blast furnace and 50-ton waldo mill. Both properties are old and regular producers. Shipments made to the Tacoma smelter in 1919, said to average 8½% copper in 1919.

KOEHLER MINE

OREGON

Address: A Koehler, Baker, Ore.

Property: in the Virtue district, 4½ miles from Baker, was a producer of high-grade antimony ore in 1915. Has a well-defined vein, up to 10' in width, carrying massive and disseminated stibnite, together with gold values.

Output to date is said to be \$15,000, and mine still contains considerable ore.

LA BELLEVUE MINE **OREGON**

Address: T. S. Kennerly, mgr., Prairie City, via Granite, Ore.

Is an old mine, reopened 1921, with a large body of low grade gold ore milled in new plant, under construction late in 1921.

LAST CHANCE MINE **OREGON**

Owned by **Cornucopia Mines Co.**, which see.

LEWIS & CLARK M. & M. CO. **OREGON**

Officers: Mann Palmer, pres., Silverton, Ore.; Geo. Cusiter, sec.; Thos. Skaife, treas.

Cap. \$100,000; shares 10c par; 710,000 issued.

Property: 5 claims in North Santiam district, Marion county, about 18 miles N. E. of Gates, on a branch of the S. R. Ry. Developed by tunnel said to show veins 1-5' wide in andesite. Ore contains copper and iron sulphides, gold and silver in zinc.

Working on a small scale.

LINCOLN MINES CO. **OREGON**

Office: Albany, Ore.

Officers: A. M. Hammer, pres.; J. D. McLain, sec.; J. McChesney, treas., all of Albany.

Cap. \$250,000; \$25 par; all issued. Is the successor of the Albany M. & M. Co.

Property: 8 claims, known as the Albany mine, in Quartzville district. Linn county, about 23 miles from Gates. **Ore:** lead-zinc sulphides with gold values occur near the surface in veins in andesite. Veins are said to be shear zones up to 50' wide with lenses of sulphides on the foot or hanging walls and distributed through the zone.

LISTEN LAKE GOLD MNG. CO. **OREGON**

Officers: F. W. Thomas, pres, Fargo, N. D.; C. I. Flynn, sec.

Cap. \$500,000; \$10 par; all issued.

Property: 4 quartz claims and the McNamee placer about 6 miles from Austin on the Sumpter Valley railroad, in Greenhorn mining district, Baker county, Ore.

Development: by 120' shaft, under water below 10' from surface.

LLANO DE ORO MINES **OREGON**

Address: Geo. M. Esterly, owner, Waldo, Ore.

Company purchased the holdings of the Waldo Corporation, January, 1921, representing an investment of \$406,901, which includes original purchase price of property, \$140,000 development work and equipment installed.

Property: includes the Cameron, Simmons and Logan placer mines covering 4,200 acres in Waldo district, Josephine county, which carries auriferous gravel 10' to 25' deep that lies on a bed rock of conglomerate and sandstone with some serpentine. Gravel worked thus far is reported to have yielded 12½c. per cu. yd.

Equip. ment: consists of 3 ditches, delivering 12,996" of water, 25 miles in length, 6 giants and hydraulic plant. A tail-race, 9,200' long, connecting tunnel with present workings is nearly completed and is expected to allow the handling of 20,000 yds. per day at a cost of ½¢ per cu. yd.

Annual output averages \$45,000 in gold dust and \$10,000 in platinum. The gravel handled in 1920 averaged 84½¢ per cu. yd. Considered a valuable property.

LOTZ-LARSEN MNG. CO. **OREGON**

Anderson Bros., Vancouver, Wash., fiscal agents.

Officers: Wm. La Force, pres.; H. H. Lotz, sec.; A. C. Larsen, treas.

Property: 25 claims, 550 acres, in Santiam district, Marion county, 15 miles from Gates on the C. & E. R. R.

Development: by tunnels, longest 700', said to expose an orebody 12'

wide, assaying 2% copper and 12 oz. silver per ton. A 4-mile road has been completed and milling machinery installed.

LUCKY BART GROUP**OREGON**

J. H. Beeman, Gold Hill, Jackson county, Ore., owner and mgr.

Property: 11 claims, partly patented, 220 acres in Sardina mining district, near Gold Hill, said to carry veins averaging 2' in width. Ore is free milling, running from \$5-\$100 and said to average \$50 per ton. Developed by 2,000' tunnel to depth of 190'.

Equipment: includes 40-h. p. steam plant, 10-stamp concentrating mill. Concentrates said to average from 3-5 oz. gold and silver. Mine has been operated more or less regularly for many years.

MANGANESE METALS CO.**OREGON**

Inc. October, 1917.

Property: Tyrrell mine on Lost Creek, 5 miles S. E. of Lake creek. P. O., Jackson county. Exploratory work reported to have exposed a face of ore averaging 20% manganese for 10' in height and 150' in length. Ore occurs as manganite and psilomelane disseminated through a bed of volcanic tuff breccia from 3-100' thick, lying between flows of basalt.

Equipment: includes 20-ton concentrating mill, concentrates produced said to average 45% Mn. The shipping point is Eagle Point, 17 miles distant.

Early in 1918 Victor Rakowsky took a lease on the Tyrrell and adjoining prospects, but extensive churn-drilling failed to prove sufficient ore of commercial grade to warrant erection of the proposed 500-ton mill.

MANGANESE ORE MINING CO.**OREGON**

Address: Terre Haute, Indiana.

Has built and operates an electrically driven gold dredge of drag type, near Gold Hill, on Rogue river.

MEDFORD MINING & MILLING ASSOCIATION**OREGON**

Address: Medford, Oregon.

Officers: C. C. Clark, pres.; M. P. Schmitt, sec.-treas., with Etha Wall, directors, all of Medford.

Property: the Norling gold mine on Jackson creek, 3 miles west of Jacksonville, shows free gold and pyrite in quartz vein in andesite, the ore-body assaying \$9 to \$18 per ton.

Development: by adit tunnel, started 1905 and only recently reopened.

MILLIONAIRE MINING CO.**OREGON**

Address: 327 N. Oakdale St., Medford, Ore.

Officers & trustees: Chas. Knight, pres.-treas.-mgr.; S. E. Heberling, v. p.-sec. Robt. Lightbody, supt.

Inc. under common law. **Cap.** \$1,500,000; \$1 par; 300,000 in treasury. Operating expenses for 1920 amounted to \$4,000 per month.

Property: 807 acres, in Blackwell Hill district, 11 miles N. W. of Medford. The mine is an old gold producer. Sulphide ore occurs in a fissure vein in slate, 1-4' wide with dip of 85°, averaging \$20 per ton in gold.

Development: by 400' shaft and 6,000' of workings. Management estimates ore reserves at 400,000 tons.

Equipment: includes electric hoist and compressor. A 60-ton mill was in steady operation, 1921. Management plans doubling capacity of the mill and further development at depth, in 1922.

MOUNTAIN GEM MINING & DEVELOPMENT CO.**OREGON**

Address: Joseph, Ore.

Officers: Harry Dawson, pres.; T. F. Tomkins, sec.-treas.

Cap. \$200,000; 10c par; \$124,211 issued.

Property: the Gem mine, 11 claims in Wallowa district; 10 miles from Joseph, Wallowa county. Ore occurs in contact zone between grano-diorite and limestone with calcareous schists, the values being in pyrite, chalcopyrite and molybdenite.

Development: by crosscut tunnel.

MYRTLE GOLD MINE**OREGON**

Address: Frank Hobart and B. W. Fowler, owners, Selma, Josephine Co., Ore.

Mine, 9 miles below Selma, has a 3' vein opened by 400' drift and shows \$50 ore with 100 tons on the dump. New equipment planned for 1922.

NATIONAL MINES CO.**OREGON**

Address: Baker, Ore. Formerly owned by Highland Gold Mines Co. and worked by Highland Dev. Co.; latter company dissolved January, 1917. Mine sold to National Mines Co. in February, 1920.

Property: 6 claims, in Rock Creek district, Baker county, Ore., 14 miles from Haines, the shipping point. Claims show 4 ore shoots carrying lead-silver-gold values.

Development: by 6 tunnels with about 5,000' of work.

Equipment: 100-ton mill, including flotation plant, in which average recovery has been 2 oz. silver and 0.25 oz. gold per ton. Tailings reported to contain \$1.80 to \$2.20 per ton in gold and silver.

Production from 1905 to Apr., 1914, was 6,322 tons of ore and concentrates, yielding \$311,552. Reported shipping ore and concentrates.

NEW ELDERADO MINING & REDUCTION CO.**OREGON**

Office: Austin, Ore.

Officers: E. B. Reed, pres.; E. H. Saxe, sec.-treas.

Cap. \$100,000; \$1 par; 1,750 issued.

Property: known as the Pioneer, on the south slope of Greenhorn range, New Eldorado district, Grant county, said to show grandiorite cut by coarse-grained dikes of grano-diorite porphyry. The altered zone carries veins of bluish quartz from a few inches to 5' wide, containing gold, a little antimony, blende, and low silver-gold values.

NORTH FAIRVIEW MINING CO.**OREGON**

Address: Herbert Leigh, 38 E. 6th St., Eugene, Ore.

Officers: G. W. McQueen, pres.; Herbert Leigh, sec.; Darwin Bristow, treas.

Cap. \$300,000; par 10c; all issued.

Property: 15 claims N. of Fairview mountain, ½ mile from Bohemia, Lane county.

Geology: a mineralized fracture zone in andesite, 12' wide, said to have been traced for over a mile.

Development: 2 tunnels, one 300' long, 100' below outcrop; the other 150' long with depth of 450'. No recent returns.

OAK MINE**OREGON**

Address: G. A. Baker and Geo. Buell, owners, Grants Pass, Josephine county, Ore. Mine is 6 miles E. of Hugo, in Grants Pass district. **Ore:** main vein is gold-bearing; also several small copper veins.

Development: by tunnel with total of 800' of workings. Equipped with 20-h. p. gas engine and compressor.

OGLE MOUNTAIN MINING CO.**OREGON**

Office: 1003 Main St., Oregon City, Ore.

Officers: J. B. Fairlough, pres.; W. J. Wilson, sec.-treas.

Cap. \$1,000,000; \$1 par; all issued.

Property: 22 claims, 14 miles from Gates on the S. P. R'y, in the Ogle Creek mining district, Clackamas county. Ore is low-grade and occurs in a well-defined fissure vein about 5' in width. The average value is \$5 per ton.

Development: by 1,460' tunnel driven 560' below the two old tunnels to cut the downward extension of the vein. Several small veins have been cut, but contain only low-grade ore.

Production reported for 1919.

OLD GLORY GOLD MINING CO.**OREGON**

Cap. \$1,000,000; shares \$1 par; 604,200 issued.

Property: the Old Glory mine, 4 lode and 2 placer claims. on Silver

creek in western Josephine county, said to show a large lode of low-grade copper ore carrying gold and silver values. Probably idle.

OLIVE CREEK MINING CO.**OREGON**

Idle. Office: Baker, Ore.

Officers: Thos. M. Tobin, pres., 9332 So. Chicago Ave., Chicago, Ill.; S. A. Tobin, sec.; A. J. Weckler, treas.

Cap. \$1,000,000; \$1 par; all issued.

Owns the Olive Creek and Quartz gulch placers in Greenhorn mining district, Grant county, Ore.

OPHIR MAYFLOWER MINE**OREGON**

Idle. Address: A. J. Champion, Howard, Ore.

Property: 8 miles from Howard, in Ochoco district, Crook county, Ore., 41 miles from railroad at Redmond.

Geology: the rocks are andesite, occurring as flows interbedded with tuffs and breccias. Mineralization is in wide fracture zones of altered rock.

Development: by 1,400' crosscut tunnel, and one 200' above. Drifts follow the fracture zones. Ore is 1 to 6' wide and 70' long; shipments averaged \$70 gold. A second shoot, 20' long and 4' wide, averaged \$125 per ton. The values in the lower tunnel only carry about \$3 per ton.

Equipment: includes a small amalgamating-concentrating stamp-mill.

OPP MINE**OREGON**

Address: J. W. Opp, Jacksonville, Ore.

Property: 373 acres, situated 1½ miles W. of Jacksonville, Jackson county, Ore. There are 3 main veins from 2 to 4' wide, occurring in shale and andesite. Two ore shoots, one 300', the other 150' long, carry free gold with pyrite, the ore averaging \$5 per ton.

Development: by 18 adits, with 7,000' of workings. One crosscut is 850', another 550' long.

Equipment: 3,600' tram, 6-drill compressor, 20-stamp mill, 125-ton cyanide plant, etc., credited with past production of \$100,000.

Mine reopened July, 1921.

OREGON GOLD MINES CO.**OREGON**

Last address: 1208 W. Monroe St., Chicago, Ill.

Inc. in Arizona. Cap. \$2,000,000; \$1 par; 1,657,436 issued. Is a re-organization of the American Gold Fields Co.

Property: the Granite Hill mine, 9 miles N. E. of Grants Pass, Josephine county, active from 1902 to 1907 and credited with a production of \$75,000.

Ore: quartz carrying chalcopyrite, galena and pyrite with gold values, occurs in veins in tonalite and greenstone. Main vein said to average 5' in width and ore treated in 1907 averaged \$5 per ton.

Development: by 430' vertical shaft with total of 12,000' of workings, now under water.

Equipment: includes 20-stamp mill, compressor, steam hoist, 5 machine drills and 150-h. p. electric motor. Idle since 1907.

OREGON-IDAHO INVESTMENT CO.**OREGON**

Mail returned from Baker, Ore., and company presumably out of business. See Volume XIV.

OREGON PITTSBURGH MINING CO.**OREGON**

Address: 307 Bessemer Bldg., Pittsburg, Pa. Mine address: L. H. Van Horn, mgr., Gold Hill, Ore.

Officers: W. H. Stroup, pres.; I. C. Palmer, sec.-treas., with J. C. Rimlinger, A. J. Gould, and F. N. Callback of Pittsburg, Samuel Stone and Herbert Shear, directors.

Cap. \$3,000,000.

Property: the Sylvanite, Cheney, Simmons and other groups, covering the Sylvanite and Cox Lyman veins, first-named formerly owned by Sylvanite Mining Co. The Sylvanite vein runs N. 22° E., dips at 65° E.

and has an average width of 40'. It lies between a fissile porphyry and limestone, and contains gold and tungsten.

Development: at the Sylvania mine by 3 tunnels. The Haff crosscut tunnel cuts the Big, or Sylvania vein, at 630' from portal and a drift run for 375' on this vein shows it to average 40' in width, much of it of low grade ore but including bunches of high grade. A 120' crosscut from the Haff tunnel also opens the "Blind" and "Scheelite" veins. The 1,330' Doan tunnel is 64' lower and 350' below the apex of the vein.

Described in Eng. & Mng. Jour., Oct. 21st, 1921.

OSCAR CREEK CONS. MINING CO.

OREGON

Office: 1st Nat'l Bank Bldg., Grants Pass, Ore. **Officers:** Chas. Burkhalter, pres.-treas.; A. H. Gunnell, sec.

Cap. \$250,000; \$1 par; all issued.

Property: the Jewell & Moore group of 5 placer claims, 3 patented, also 3 additional unpatented claims and 92 acres of dump ground, 2 miles E. of Murphy and 10 miles S. of Grants Pass, Josephine county. Credited with past production of \$40,000.

Equipment: includes 3 miles of ditches and 300' flume line.

PACIFIC MOLYBDENUM MINES, INC.

OREGON

Address: J. B. Philips, mgr., Greenhorn, Baker county. Mine reported to show an 8' vein of molybdenum, running from 20 to 25%.

PEARL MINING CO.

OREGON

Office: Central Point, Ore.

Officers: W. C. Leever, pres.; J. W. Merritt, sec.-treas.

Cap. \$4,400; \$20 par; all issued.

Property: the Buzzard mine, 10 quartz claims, in Elk Creek mining district, 27 miles N. E. of Trail, Jackson county. The ore deposit occurs in a N. W.-S. E. shear zone in andesite; the ore contains complex sulphides and is handjigged before shipment, 4 tons returning \$2,100.

Development: by 1,600' crosscut tunnel, total work 3,000', to depth of 400'.

POWDER RIVER GOLD DREDGING CO.

OREGON

Office: 433 California St., San Francisco, Cal. **Operating office:** O. E. Coombs, supt., Sumpter, Ore. Hammon Eng. Co., managers, San Francisco.

Officers: W. P. Hammon, pres.; R. K. Barrows, v. p.; F. J. Mott, v. p.; A. E. Boynton, sec.-treas., with A. L. Dahl, directors.

Inc. Oct. 18, 1911, in California. **Cap.** \$500,000; \$1 par; all issued. Annual meeting, fourth Monday in October.

For year ending Sept. 30, 1920, gross revenue was \$174,251, of which \$92,003 was net profit, over dredging cost of \$82,248.

Dividends: aggregate \$1.55 per share, or \$755,000 to Dec. 30, 1920. A liquidating dividend of 2¢ per share is paid monthly.

Property: about 1,500 acres placer ground, near Sumpter, Ore., half of which is considered payable. The gravel channel is from 300 to 2,000' wide; it will average 1,000' wide, 18 to 20' deep, and the pay gravel rests on a soft, decomposed rock called "clay webfoot." Dredge digging may be termed tough, and as a result, the bucket-lips wear out in 5 months' use.

Equipment: consists of a dredge in Oregon that has yet from two to three years' work. A boat in Colorado, after digging 864,375 yds. of 7.69 cent gravel in 1919, at a loss of 3.18 c., was sold to Benjamin Griffith for \$160,000, plus \$24,000 for supplies and was later resold to Mark G. Evans. The dredge was idle during the winter of 1919-'20 to May 15, due to shortage of electric power.

Production: from Oregon properties, yielded \$2,748,791 to Dec. 31, 1920. Results for the past 3 years, ending September 30, are:

Year	Yards	Yield per yd., c.	Cost per yd., c.	Daily yardage	Daily hours
1919-'20.....	1,472,319	11.84	5.59	5,729	20.35
1918-'19.....	1,805,582	12.90	6.73	4,960	19.38
1917-'18.....	1,783,180	13.06	7.97	4,885	19.28

QUEEN OF BRONZE MINE

RED BOY MINES CO.

Stock worthless as property was sold for \$34,500 at sheriff's sale in 1916 and bid in by bondholders.

Reorganized June, 1916, as **Red Boy Mng. & Dev. Co.**, which see.

RED BOY MNG. & DEV. CO.

Idle. Address: Fremont, Neb.

Officers: Ray Nye, pres.; L. A. Peckham, sec.; Paul Colson, treas.

Inc. June, 1916. Cap. \$250,000; \$1 par; all issued. Is a reorganization of the Red Boy Mines Co.

Property: the Red Boy mine in Granite district, Grant county, credited with past production of \$800,000. (The geology is fully described in Mineral Resources of Oregon, Vol. 2, No. 4, pp. 188-191.)

RED, WHITE AND BLUE MINE

Owned by Geo. H. Bodfish, Malheur, Oregon. Property at Malheur said to show a quartz vein, 8 to 10" wide carrying gold values that average \$5 to \$8 per ton. Developed by 134' vertical shaft and equipped with steam hoist, pump and 6-stamp concentrating mill.

SAMPSON CO., LTD.

Promoted 1910 by F. Wallace White, 115 Broadway, New York, who is under indictment (since December, 1918) for misuse of the U. S. mails, charged with misappropriation of \$120,248 received from the sale of the valueless stock of the Sampson Co., Ltd.

Cap. \$2,000,000 in bonds and \$7,000,000 in stock.

Property: reported that company owned the Cracker-Oregon and Sampson groups on the North Pole Columbia Lode, Baker county, which are slightly developed prospects of doubtful value.

It is said that White bought control of the practically defunct Sampson Gold M. Co. for \$5,000 and later sold the property to the Sampson Co., Ltd., for 200,000 shares of stock and a \$100,000 cash compensation in the form of a promissory note, which he subsequently paid to himself out of the proceeds of stock sales. He repeatedly organized companies with valueless or mythical holdings and sold them to the Sampson So., Ltd., for large sums, payable to himself in cash and stock, thus keeping control of the Sampson Co.

According to report, White is one of the most dangerous and brazen "fleeceers of innocent investors" known, who worked his game openly and undisturbed under various names for eight years from a New York office. At last report he was under indictment and a fugitive from justice. The widely distributed stocks and bonds are valueless.

SANGER GOLD MINES CO.

Idle. Office: J. K. Romig, sec., Baker, Ore. F. W. Paine, pres., at last report.

Inc. in Oregon. Cap. \$2,000,000; \$1 par; 1,295,146 issued.

Property: 600 acres of quartz and placer claims on W. side of Eagle

Creek, in an area which has produced about \$1,500,000, but where since 1900 there has been little work done.

Geology: quartz veins in a black clay slate. Ore contains 3% sulphides and is considered to be similar to many California gold quartz veins. Owing to older slates being fractured, cut by dikes, etc., prospecting is difficult.

Development: by tunnels and an incline shaft 400' deep. In upper workings the vein shows ore 15" wide, worth \$20 to \$25 per ton; in the lower, below the zone of oxidation the ore is 24" to 48" wide, and assays \$12 per ton. In 1916 several open cuts and short tunnels were driven to pick up the extension of the vein. Idle since that year.

SHORTY HOPE M. & M. CO.

OREGON

Address: H. S. Sanford, pres., Ashland, Ore.

Cap. \$1,000,000; par \$1; 784,498 issued.

Property: 4 miles up Wagner creek from Talent, in Ashland district, Jackson county.

Development: by 1,480' tunnel. **Equipment:** 10-stamp mill driven by water power.

Work appears to have been spasmodic, but results were not without promise.

SILVER KING MINING CO.

OREGON

Address: Albany, Ore., or I. J. Langmack, Gerlinger Bldg., Portland, Oregon.

Officers: J. J. Langmack, pres.; E. E. Williams, v. p.; Wm. S. Risley, sec.-treas.

Inc. March, 1909. Reorganized and capital reduced under Oregon Blue Sky Law, June, 1914. Present capital, \$500,000; \$1 par.

Property: 12 claims covering 4 veins on Little North Santiam river, near Elkhorn, Oregon, in the Cascade Mts., 75 miles from Portland, and 17 miles from railroad. The veins occur in and follow shearing zones, and carry ore with gold, silver, lead, and zinc.

Development: by 2 shafts, 2 prospect tunnels, and a number of open-cuts on veins. The main working tunnel, over 1,000' long, will be driven to cut the principal vein of the group at about 1,050' from portal, at depth of over 900' on vein below the prospect tunnels. Tunnel will drain mine and permit extraction of ore by gravity system. Average of samples from prospect tunnels show; gold, \$1.20; silver, 15 oz.; lead 3 to 4%; and zinc 3 to 4%.

Equipment: a water power plant of 200 h. p. capacity, was installed early in 1921.

SIXES MINING CO.

OREGON

Office: 625 Market St., San Francisco, Cal.

Officers: L. R. Eccles, pres.; C. B. Edington, sec.; John Pingree, treas.; W. A. Bechtel, S. F. mining agent.

Inc. in Utah. **Cap.** \$1,125,000; \$5 par; 157,900 issued; assessable. Assessment of 20c. per share levied March, 1918.

Property: an option on placer claims, 300 acres, owned by the Divilbiss family, on the Sixes River, Curry county, 11 miles from Port Orford. Ground contains considerable black sand which holds both gold and platinum, about 10% of the gravel value said to be in the platinum. Three distinct gravel channels are known, one of which is to be dredged, the others hydraulicked. For sluicing a 4½ mile flume is available.

SNOW CREEK MINING CO.

OREGON

Officers: Fred D. Smith, v. p.; Bath, N. Y.; C. H. McColloch, sec.; R. J. Davison, treas.-gen. mgr.; with J. H. Bowlby, directors.

Inc. June 25, 1914. **Cap.** \$200,000; \$1 par; outstanding, 132,000 shares.

Property: 5 claims, 85 acres, including the Snow Creek mine, formerly owned by Oregon Mines Exploration Co., near Greenhorn, Baker county. Ore carries gold, silver, lead in contact deposit, 3' to 8' wide; country rock is diorite and slate. Ore extracted in the past is said to have assayed \$12 per ton in gold and silver and 5% lead.

Development: 225' vertical shaft and tunnels, aggregating 1,315'. The shaft is being drained and an 800' tunnel driven to cut the orebody. Claims to have 9,400 tons of ore blocked out.

Equipment: includes 10-stamp mill. Total output to date about \$40,000.

Title was obtained by present company under foreclosure of mortgage.

SUMPTER GOLD DREDGING CO. OREGON

Address: Sumpter, Baker county, Ore.

In November, 1919, company purchased a boat from the Powder River Gold Dredging Co. for \$160,000, arranged for electric power, and started dredging in the spring of 1920.

SUMPTER VALLEY SMELTER CO. OREGON

Address: 412 Symons Bldg., Spokane, Wash. **Works office:** Sumpter, Ore.

Officers: J. A. Gyllenberg, pres.; J. L. Magney, v. p.; Geo. P. Larsen, sec., with R. W. Street, directors.

Inc. Feb. 10, 1920, in Wash. **Cap.** \$500,000; \$10 par; 30,000 issued. Bonds authorized, \$150,000; outstanding, \$55,000.

Property: the old Sumpter smelter, owned free and clear of all indebtedness. The smelter has been equipped with electric power and management expects to commence operations by September, 1921.

Also the Monumental mine, 3 miles from Granite, a property operated and equipped with 20-stamp mill in 1878; reopened 1899 by an English syndicate; acquired 1900 by Portland Reduction & Mng. Co., and now controlled by Sumpter Valley Smelter Co.

Development: 5,000' of tunnel work and raises, said to block out 16,570 tons of ore on 4 veins. On No. 3 vein, deepest level is said to block out 6,800 tons of \$40 ore, 900 tons of \$80 ore and 20,742 tons of \$10 ore.

SYLVANITE MINING CO. OREGON

See Oregon Pittsburgh Mining Co.

Property: a group of claims, 2 miles N. of Gold Hill, known as gold producers for many years. Silver-gold bearing ore, running \$20-\$50 per ton, was reported opened up on the 600' level in 1920 and a small concentrator was to be erected.

TAKILMA SMELTING CO. OREGON

Office: 301 Mining Exchange Bldg., Colorado Springs, Colo.

Inc. in Colorado. **Cap.** \$250,000; \$10 par. Owned a controlling interest in the Waldo Smelting & Mining Co. Fully described in Vol. XIII. Holdings sold to John Hampshire Co., which see.

THREELODES MINING CO. OREGON

Officers: C. E. Wickstrum, pres.; N. L. Townsend, sec., George Lindley, treas.

Cap. \$350,000; 35c par; all issued.

Property: 9 claims, and 9 others bonded, 2 miles W. of Gallice, Josephine county, said to have been exploited in recent years for tin, tungsten molybdenum and platinum.

Probably dead.

TRI-STATE CHROME CO. OREGON

Dead. Was controlled by Walter J. Nicholls, Sherwood Bldg., Spokane, Wash.

Acquired Jupiter mill between Canyon City and Prairie City, Grant county, early in 1918 and reported to have produced 40% chromium concentrate.

Company ceased operating at end of the war.

TROUT CREEK M. & M. CO. OREGON

Office: Canyon City, Ore.

Officers: O. J. Darst, pres.; F. S. Slater, sec.-treas.

Cap. \$100,000; \$1 par; all issued and paid up.

Property: the Bullion Quartz mine near Burns, Harney district, said to show granite cut by large porphyry dikes. The ore carries gold, silver, lead and zinc.

Development: by tunnels and shaft. Shipments were made to Utah, in 1916, by way of Crane, 32 miles from the mine. Idle several years.

UNITED COPPER CO.**OREGON**

Office: 418 New York Bldg., Seattle, Wash.

Officers: Wm. Reinecke, pres.; H. H. Startzman, sec.; W. M. Cowley, treas. **Cap.** \$2,000,000.

Property: the Copper King mine, 18 miles east of Leland, Greenback district, Jackson county, said to show a fissure vein in andesite. Ore contains chalcopyrite reported to average 4% copper. A concentration mill was erected in 1916, and work continued until war conditions stopped operations.

UNITED COPPER GOLD MINES CO.**OREGON**

Idle: **Office:** Murphy Blk., Salem, Ore. Mine at Selma, Ore.

Officers: W. S. Low, pres. and gen. mgr.; E. O. Moll, v. p.; Daniel Webster, sec.; C. E. Lebold, treas., with W. C. Buckner, James Greig and H. Neugabauer, directors.

Cap \$500,000; \$1 par; issued 219,654.

Property: 11 claims, in Illinois district, about 12 miles N. W. of Selma, Josephine county.

Geology: ore occurs in serpentine near porphyry and diorite contacts. A dark gossan sometimes stained with copper is underlain at 15' depth by ore carrying 18% copper and 5 to 10 oz. silver and upwards of \$1 gold, according to management.

Development: amounts to 1,000', with a 500' tunnel and 200' crosscut, exposing 1,000 tons of ore. Property is 34 miles from S. P. R. R. Is regarded as a prospect which might be worked on a large scale were railroad transportation nearer.

UNITED GOLD MINING CO.**OREGON**

Office: 505 Hyde Block, Spokane, Wash. A. B. Lee, pres.

Inc. in Washington. **Cap.** \$1,000,000; \$1 par; 568,050 issued.

Property: the Cougar mine, 3 miles N. of Granite, Grant county, formerly owned by the Cougar Gold M. & M. Co.; also the Independence mine, 17 miles from Sumpter, Baker county.

Geology: at Cougar mine country rock is a black, silicious, and semi-slaty argillite. Gold occurs in pyrite and ore is not easily amenable to treatment. Three shoots of ore have been exposed.

Development: at Independence, by tunnels. The Cougar has been a small producer.

UNITED STATES METALS CO.**OREGON**

Address: 412 Symons Bldg., Spokane, Wash. **Mine address:** P. H. Miller, supt., Huntington, Ore.

Officers: Geo. Kienzle, pres.; W. B. Diehl, v. p.; K. H. Blaess, sec. & treas., with C. N. Newton, P. H. Miller, Arthur King and Alphonse Thibault, directors.

Inc. March, 1920 in Wash. **Cap.** \$150,000; 5¢ par; 483,000 shares issued. Annual meeting last Saturday in February.

Property: the Bay Horse mine, 5 claims, 3 patented, 100 acres in Snake River canyon, at Bayhorse on the Huntington-Homestead branch of the Oregon Short Line, held under 4-year lease and bond from 1920, on a 15% royalty basis.

Ore occurs as a copper and lead sulphide in a fissure vein in andesite, 10-40' wide, with E.-W. course and dip of 70°; metallic value is practically all silver, averaging \$36 per ton with copper 1% and lead 1%. Ore is mined for width of 20'. The upper drift is 240' long with 250' back.

Management plans installing electric power and compressor and driving tunnel another 1,500'. Company also controls the Blue Ribbon silver-gold mine in the Sumpter district and expects to resume shipments from both mines to the Tacoma and Sumpter smelters in 1922.

UTAH QUICKSILVER CO.**OREGON**

Described in Volume XIII. Succeeded 1918, by Rainier Mercury Co., which was reorganized 1919, as **War Eagle Mng. Co.**, which see.

VANGUARD GOLD-COPPER CO.**OREGON**

Probably dead. Mine near Kerby, Josephine county, Ore. C. E. Phillips, mgr.

Inc. 1910. Cap. \$1,000,000; shares \$1 par.

Property: 7 miles W. of Kerby, said to carry gold-copper ore. Idle

VESUVIUS MINES CO.**OREGON**

Office: Eugene, Ore. Mine office: Bohemia, Ore.

Officers: W. E. Powell, pres.; F. J. Hard, sec.-treas.-mgr.

Inc. in Oregon. Cap. \$6,000,000; \$1 par; 2,000,000 shares in treasury March, 1921.

Property: 50 claims, including the Vesuvius, Oregon, Colorado, Riverside and Utopian mines, 50 miles S. E. of Eugene, Bohemia district, Lane county.

Geology: andesite flows interbedded with andesite tufts, traversed by a fracture zone in which the ore occurs. Gold, silver, galena and chalcopryrite, are the ore minerals.

Development: by 20,000' of workings with 3 tunnels, the main one 2,000' long, said to disclose 18" to 36" of ore which assays from \$7.50 to \$20.64 per ton.

Equipment: includes a 10-stamp mill with tables for treatment of gold ores, steam plant, saw mill, electric light plant, store and hotel. Concentrating plant for copper bearing ores to be installed.

VINCENT CREEK GOLD & COPPER CO.**OREGON**

Probably dead. Former address: Austin, Grant county, Ore.

Officers: Burton Miller, pres.-gen. mgr.; Ernest Blackwell, v. p.; Nellie H. Miller, sec.-treas., and J. S. Edwards, directors.

Inc. Dec. 5, 1907, in Oregon. Cap. \$200,000; \$1 par; issued 100,002 shares.

Property: 6 claims, 100 acres, in the Greenhorn district, 5 miles N. W. of Austin, on the S. V. R. R., shows a strong vein, traceable 1,500', said to average 15' in width and 3.5% copper. The country rock is greenstone and copper mineral chalcopryrite.

Development: by a 25' shaft and 215' tunnel being driven 600' with back of 400'. In February, 1916, a 20' vein of copper ore was opened in this tunnel. There are 3 buildings. Mine has no power equipment.

VIRTUE MINES DEVELOPMENT CO.**OREGON**

Address: Baker, Ore.

Officers: J. K. Romig, pres.; M. Boswell, sec.-treas. at last report.

Cap. \$1,500,000; \$1 par; 1,384,075 issued.

Property: 16 claims and placer ground, a total of 400 acres in the Virtue district, Baker county. From 1878 to 1898 the gold yield was about \$2,189,000, the largest production being \$259,000 in 1898. Mine was idle for nearly 15 years, but in 1917 it was reported working and electric power was installed. In 1920 the mine was worked by lessees.

Claims said to show quartz veins in serpentine striking N. W., dipping 45° to 80° S. W. and averaging 14" in width. Ore carries gold and a little pyrite and chalcopryrite.

Equipment: includes hoist, boilers, 20 stamps, vanners, cyanide plant and electric power.

WALDO CORPORATION**OREGON**

Described in Vol. XIV. Holdings purchased by Geo. M. Easterly, January, 1921, and name changed to Llano de Oro Mines, which see.

WALDO MINE.**OREGON**

Described in Volume XIII. See John Hampshire Co.

WALDO SMELTING & REFINING CO.**OREGON**

Office: 301 Mining Exchange Bldg., Colorado Springs, Colo. Mine office: Takilma, Josephine county, Ore.

Inc. Dec. 3, 1901, in Colorado. Cap. \$3,000,000; par \$100.

Property now owned by John Hampshire Co., which see.

WALLOWA COUNTY MINING & DEV. CO.**OREGON****Address:** J. A. Burleigh, Enterprise, Ore.**Officers:** Jesse Walker, pres.; J. A. Burleigh, sec.; G. W. Williams, treas.**Cap.** \$200,000; \$1 par; all issued.**Property:** 14 claims, on Lick Creek, Wallowa county, said to show a 2' vein in greenstone, limestone and argillite, cut by aplite dikes. **Development:** by 125' shaft. Probably idle.**WAR DANCE MINING ASS'N. LTD.****OREGON****Address:** Andrew Prader, mgr., Ontario, Malheur Co., Oregon.**Property:** War Dance mine, developed to depth of 500' by 12,000' of workings, said to show galena sulphide ore in a fissure vein in granite, running as high as 65% lead and 100 oz. silver per ton.**Equipment:** includes compressor and fuel oil engine. Management reports \$30,000 expended in exploration work.**WAR EAGLE MINING CO.****OREGON****Address:** Box 986, Medford, Ore.**Officers:** C. M. Kid, pres.; A. L. Hill, sec.-treas.; Sam Bertelson, v. p.**Inc.** 1919 in Oregon, to acquire holdings of the **Rainier Mercury Co.****Cap.** \$600,000; \$1 par; 305,001 shares outstanding. Ore sales in 1920 amounted to \$2,700 and expenses were \$5,000.**Property:** Bertelson group, 32 claims, 640 acres, formerly owned by the **Utah Quicksilver Co.**, 12 miles N. of Gold Hill, Jackson county. **Ore:** occurs in a fissure vein in serpentine and granite and is generally low grade. A 5' vein averages 1½% cinnabar, with estimated blocked out reserves of 25,000 tons, containing as by-products, arsenic, silver, gold, nickel and cobalt.**Development:** by 160' shaft and 2 tunnels, 260' long.**Equipment:** includes two 12 pipe retort furnaces, gas-hoist, compressor, pump, crushing mill, 25-ton Scott furnace, 6-ton retorts, etc.**Production:** August 1, 1918, to Jan. 15, 1919, amounted to 17,425 lb. of metal. In 1919, output was 60 flasks, with total production to 1921 of 42,-375 lb., or 565 flasks.

Management plans further development and installing a new furnace in 1921.

WEST COAST MINES CO.**OREGON****Officers:** W. J. Zimmerman, pres.; W. M. Cake, sec.; W. W. Elmer, mgr.**Cap.** \$1,500,000; \$1 par; 890,000 issued.**Property:** the Champion, Helena, and Musick mines, 47 claims, 12 miles S. E. of Disston, Bohemia district, Lane county. Mines under lease to H. C. Mahon, of Portland, at last accounts. The Champion is said to have yielded \$1,700,000; the Helena, \$150,000, and the Musick, \$180,000.**Development:** by tunnels: In the Champion the main lode is 3' wide and at 200' in depth and below, the principal ore minerals are pyrite, chalcopyrite, sphalerite, and galena. The other mines contain similar complex ores.**Equipment:** includes 3,000' aerial tram, 20 stamps, concentrators and hydro-electric power plant.**WEST SIDE GOLD & SILVER MINING CO.****OREGON****Address:** R. Baird, sec. and mgr., Yamhill, Ore.**Officers:** J. A. Simmons, pres.; G. W. Perkins, v. p.; R. Baird, sec.; W. G. Busbee, treas., with C. C. Laughlin, N. H. Perkins, H. C. Gist, directors.**Inc.** April, 1900, in Oregon. **Cap.** 1,000,000 shares; 1c par; 814,307 outstanding. Annual meeting, first Monday in January.**Property:** 3 patented claims, about 57 acres, at Greenhorn, Baker and Grant counties, under lease and bond to R. Baird, at last accounts. Minerals are gold, silver, copper, lead. A number of veins cutting through greenstone and schist run at right angles, the N. S. veins dipping E., and E. W. veins south.

Alteration and faulting are considerable. Ores contain free gold sulphides in quartz and dolomite; cinnabar is also reported. Shipping ore is said to average about \$60 per ton and milling ore \$20.

Development: by several shallow shafts, comprises about 1,000' of workings, greatest depth being about 40'.

Equipment: includes a small steam pump. About \$10,000 spent in development to 1917. No recent returns.

WHITED MINING CO.

OREGON

Address: Alfred Whited, Unity, Ore.

Inc. Nov., 1916, in Oregon. Cap. \$15,000; \$1 par.

Property: 8 claims situated 5½ miles south of Unity, Baker county. Two veins show shoots of gold-bearing quartz, the largest one along the hanging wall of a porphyry dike.

Development: includes 2 crosscut tunnels with drifts on the veins.

Equipment: 10-stamp mill with amalgamating plates and Wilfley tables. Was a small producer in 1919.

PENNSYLVANIA

The state had five iron ore producers and but one lead-zinc mine operating in 1920. Iron ore production was 627,167 tons in 1919 and 734,383 tons in 1920.

AMERICAN VANADIUM CO.

PENNSYLVANIA

Described in Volume XIII.

Merged 1919 into the **Vanadium Co. of America**, which sec.

AMERICAN ZINC & CHEMICAL CO.

PENNSYLVANIA

Subsidiary of **American Metal Co., Ltd.**, 61 Broadway, New York.

Office: Oliver Bldg., Pittsburgh, Pa.

Officers: C. M. Loeb, pres.; Otto Sussman and B. N. Zimmer, v. ps.; Julian B. Beaty, sec.-treas.; with L. Vogelstein, B. Hochschild and H. V. Putzel, directors.

Cap. \$2,500,000; par; \$100; all issued and owned by A. M. Co. Annual meeting, 1st Wednesday in March.

Works: at Langeloth, Pa., includes a zinc smelter with capacity for treatment of 7,000 to 8,000 tons of zinc ores monthly, and production of 3,000 to 4,000 tons of spelter. Company also owns a sulphuric acid plant with a capacity of 7,000 to 8,000 tons monthly. This property represents an investment of over \$4,000,000, and may be divided into the following sub-heads:

1. Zinc smelting plant. This consists of eight blocks of two furnaces each, each block containing 912 retorts, making a total capacity of 7,296 retorts. Each block is equipped with waste-heat boilers: the furnaces are fired by gas-producers, one producer to each block. The smelting plant has complete accessories, such as power-house, two steam-turbine generator units of 2,000-k. w. each, up-to-date machine-shop, carpenter-shop, and pottery plant.

2. Sulphuric-acid works. This department has a chamber-capacity of about 8,000 tons of 60° B. acid monthly, and also has a contact plant for the conversion of about 3,500 tons of 60° acid into 66° acid. The raw material used is zinc-sulphide ore, for the roasting of which four Hegeler kilns are available. The sulphuric acid plant is one of the most modern in the country, and can be expanded for the production of other acid-products whenever desired.

3. Coal mine. The company owns coal-mining rights over an area of 2,450 acres of the Pittsburgh and Rooster veins. It was estimated that there was a coal reserves in this tract of over 18,000,000 tons, from which about 10% has been mined. The mine is equipped to produce about 50,000 tons of coal monthly. The coal mine is subject to a mortgage of \$392,000, against which there was on deposit with the Colonial Trust Co., of Pittsburgh, on October 31, 1921, a sinking-fund credit of \$9,252.

4. The Langeloth Townsite Co. was incorporated for the purpose of taking over a block of real estate adjacent to the works of the American Zinc & Chemical Co., embracing about 400 acres, with the idea of developing it into a modern industrial town.

5. For the convenience of the workmen, the company operates a general store under the name of Langeloth Mercantile Co.

6. By-products plants. The company owns and operates:

(a) A zinc-oxide plant with a capacity of about 500 tons monthly. (b) A zinc-dust plant which produces from 150 to 200 tons monthly. (c) A zinc-sulphate plant which has been running only intermittently owing to lack of demand for this material.

CORNWALL IRON MINES

PENNSYLVANIA

Address: Cornwall, Pa.

These mines in Lebanon county are operated by the **Bethlehem Steel Co.** (q. v.). They yielded several thousand tons of pyritiferous magnetite in 1921, which was concentrated, the pyritic concentrate containing 2.96% copper and 32.87% sulphur.

DONORA ZINC CO.

PENNSYLVANIA

Is a part of the American Steel & Wire Co., a subsidiary of the United States Steel Corp'n.

Works: at Donora, near Pittsburgh, Pa. Plant includes bins of 20,000 ton capacity, crushing plant for ore that requires reduction, 6 Hegeler 7-hearth roasting furnaces, mixing house, 10 Hegeler furnaces, each containing 912 distillation retorts, pottery, power plant, sulphuric acid, muriatic and zinc oxide plants. Furnaces are fired by producer gas. In 1920, additions were made to the zinc refinery and erection of a sintering plant was begun.

E. & G. BROOKE IRON CO.

PENNSYLVANIA

Address: Birdshoro, Pa. **Mine address:** St. Peters, Pa.

Operating staff: M. T. Hoster, supt.; J. Burke, engr.

Property: the French Creek mine opened 1725, reopened 1914. Orebody is a replacement of pre-Cambrian limestone near a dike of hornblende diorite or French Creek granite. magnetite occurs in chimney or lens dipping 43° and 600' long.

Development: 1,200' incline shaft to vertical depth of 830', with seven levels. Average assay of 35,000 tons ore, is iron 56.98%, phosphorus 0.027, sulphur 2.82, silica 7.46, alumina 1.36, lime 3.32, magnesia 1.26, manganese 0.1, copper 0.18. Ore is sintered on Dwight Lloyd machine removing sulphur, before going to furnace at Birdshoro, 15 miles from mine. **Reserves:** 400,000 tons.

EAGLE METALLIC COPPER CO.

PENNSYLVANIA

Inactive. **Address:** care H. D. Deshler, Belvedere, N. J. **Branch office:** 208 Haas Bldg., Allentown, Pa. **Mine office:** R. F. D. 3, Fairfield, Adams county, Pa.

Officers: at last accounts, F. H. Cuyle, pres.; Dr. P. A. Stem, v. p.; A. L. Wickert, sec.; Thos. Zellner, treas.; Owen H. Nagle, gen. mgr., with A. V. Diefenderfer, directors.

Inc. 1903, in New Jersey. **Cap.** \$500,000; \$1 par, and reinc. Dec. 9, 1910, in Pennsylvania; \$150,000 in treasury after raising \$60,000 to build a smelter in 1911.

Property: 500 acres in Jacks Hollow, on the Maryland border, one-half mile from and crossed by the Western Maryland railroad, near Charman.

Development: by open-quarry work from pit 200' across, connected with smelter by 750' aerial rope tram. The mine is apparently a large open-cut filled with water. Careful examination of exposed rock and surface material said to show no indication of copper whatever. It is also reported that a pile of crushed ore in smelter bins, 1915, did not contain the minutest particle of mineral. Samples of matte from furnace said to run 2% copper, which evidently came from the pyrite used for flux.

Equipment: includes a 250-h. p. steam plant, 150-h. p. engine and a 2½" core drill, with office and laboratory. Smelter built in 1911

EASTERN MINING & MILLING CO. PENNSYLVANIA

Address: Phoenixville, Chester Co., Pa.

Property: an old lead mine, reopened in 1919, and on which a 100-ton concentrator was erected. Galena concentrate averages 80.2% lead and 8 oz. silver and sphalerite concentrate, 60% zinc and 3.6 oz. silver. Only development work done in 1920-21.

KEYSTONE METALS REDUCTION CO. PENNSYLVANIA

Office: Farmers Bank Bldg., Pittsburgh, Pa. I. N. Goff, gen. mgr. Reduction plant at Cheswick, Pa.

Inc. 1920 in Delaware.

Company's reduction works treat carnotite, vanadium, radium and uranium ores from their own claims at Polar Mesa, Utah, and from other properties.

NATIONAL COPPER MNG. & DEVEL CO. PENNSYLVANIA

Out of business. See **Eagle Metallic Copper Co.** Property, described in Vol. XII, is now owned by H. D. Deshler.

NEW JERSEY ZINC CO. (OF PA.) PENNSYLVANIA

Subsidiary of New Jersey Zinc Co.

Works addresses: Palmerton and Freemansburg, Pa.

Company operates a zinc smelter at Palmerton. Mining property described under New Jersey.

PENNSYLVANIA SMELTING CO. PENNSYLVANIA

Works address: Carnegie, Pa. Controlled by **Hercules Mining Co.**, Idaho.

Company operates a lead smelter, containing two furnaces, with annual capacity of 60,000 tons. The refinery treats lead bullion from the smelter at Northport, Wash., owned by the Hercules Company, through its subsidiary the Northport S. & R. Co.

UNITED M. M. & COPPER SM. CO. PENNSYLVANIA

See description under Maryland.

VIRGIN COPPER CO. PENNSYLVANIA

Last address: 12 West Bldg., York, Pa. **Mine office:** Charmian, Franklin county, Pa.

Officers: John H. Dechert, pres.; Chas. E. Wills, v. p.; Clarence A. Wills, sec.; Harry S. Wiest, treas.

Property: about 1 mile N. of Charmian, in the Blue Ridge mountains, near the Maryland state line, shows ore carrying native copper, with silver and gold values said to give assays of \$25 to \$600 per ton.

Development: by 215' shaft sunk at 47°. Four diamond drill-holes, of 165 to 800' were bored, 1907.

Equipment: includes small hoist and compressor. Is considered an unpromising venture. Idle.

SOUTH CAROLINA

HAILE GOLD MNG CO. SOUTH CAROLINA

Property under lease to Kershaw Mng. Co., which see for description.

KERSHAW MINING CO. SOUTH CAROLINA

Lessee of Haile Gold Mng. Co.

Address: R. L. Pellet, mgr., Kershaw, S. C., or J. H. Watkins, 200 Fifth Ave., New York City.

Inc. 1917.

Property: the old Haile gold mine, in Lancaster county, near Kershaw, worked steady for many years for its gold ores, and operated 1915-18 for pyrite.

Geology: rocks of the region are sericite and quartz-schists, formed from old volcanic tuffs and porphyry. Pyritization is widespread and deep-seated, the whole series of schists being more or less impregnated with

pyrite, but along certain zones this mineralization is highly intensified, the schists in some bands holding so much pyrite that the rock runs 25 to 30% sulphur; wide belts carry 15 to 20% sulphur, and in a few spots pyrite occurs in lenses around which the schists are folded. The gold values vary with pyrite content.

Development: by extensive workings, open-pits, a 100' shaft and 28 drill-holes, which prove the existence of a large quantity of ore carrying 25% sulphur.

Equipment: complete mining plant and 300-ton mill with crushers, rolls and jigs, producing a concentrate containing 47% sulphur.

SOUTH DAKOTA

Metal mining in the State is practically restricted to the gold mines of the Black Hills, in which silver and tungsten are important by-products. A little lead, tin, and various rare minerals of chemical importance are also mined.

According to the U. S. Geol. Survey, the gold mines of South Dakota produced 1,572,989 tons yielding \$5,712,853 in 1921, compared with \$4,339,000 in 1920 and \$4,862,586 in 1919; \$6,563,337 in 1918; and 68,000 oz. of silver, compared with 115,500 in 1919 and 159,202 oz. in 1918. The ores shipped to smelters contained only nominal quantities of lead and copper.

The Homestake and Trojan companies were the only large operators in 1919 and 1920.

Our thanks are due to Mr. Otto Ellerman, State Inspector of mines, for information concerning the mines described herein.

AMERICAN MINERALS CO.

SOUTH DAKOTA

Address: Chas. L. Cabrera, gen. mgr., Keystone, S. D. Wm. Friedman pres., 111 W. Monroe St., Chicago, Ill.

Inc. as a Common Law company, operating under a Deed of Trust.

Property: 116 claims covering 2,376 acres in the Black Hills district, partly owned in fee simple, by location, or held under lease and said to contain mica, lithia, tin, tungsten, with a possibility of gold, silver and copper. Company also reported to own mills at Hill City, Custer and Keystone and a mica factory at Lead, S. D.

Preferred stock was offered for sale at \$10 per share with a bonus of 10 shares of common stock, par \$1, in Nov., 1920, by Sutt & Darbyshire, Inc., brokers, 139 S. Third St., Philadelphia.

AMERICAN MINING CORPORATION

SOUTH DAKOTA

Mail returned from Deadwood, S. D. Owns the Bismark mine at Flatiron, a gold-silver-tungsten producer. Mill and cyanide plant on the ground. Idle.

AMERICAN TIN & TUNGSTEN CO.

SOUTH DAKOTA

Address: 50 Broadway, New York City.

Officers: Simon Lederer, pres.; Samuel Lederer, v. p.; Robt. S. Williams, sec.; Chas P. Bland, treas.

Inc. Jan., 1917, in Delaware. Cap. \$1,500,000; par \$1; 1,200,000 issued. Listed on New York Curb.

Property: the old Harney Peak tin mines and claims, in Pennington county, under lease to National Tin Corporation, this company to get 25% of net profits as royalty.

Stockholders were offered new stock at the rate of 5 shares of American Tin and a cash payment of \$1.25 for one share of Natl. Tin, the old stock to be turned in and the new stock issued a year later. Management does not report to what extent this offer was accepted by old stockholders.

ANACONDA GOLD MINING CO.

SOUTH DAKOTA

Address: 837 Plymouth Bldg., Minneapolis, Minn. **Mine office:** Roubaix, S. D.

Officers: Martin H. Brede, pres.-mgr.; Daniel Lynch, v. p.; D. H. Dreesen, treas., with Adolph Carlson, G. G. Gustafson, Andrew Erickson, Theo. Mahn, O. H. Carlson and G. A. Matison, directors. C. D. Applin, sec.

Inc. in South Dakota. **Cap.** \$1,500,000; \$1 par; half common and half preferred stock; 512,541 shares issued.

Property: 34 claims, patented 600 acres, in Roubaix district, near Deadwood, carries gold-quartz ore in 4 fissure veins running N. W.-S. E. and dip of 50° N. and said to average \$8 per ton.

Development: 340' shaft and a 3-compartment shaft, down 135', to be sunk to 700' depth.

Equipment: steampower, hoist, compressor, pump, sawmill, etc. Work was resumed in February, 1822,, sinking shaft No. 2; buildings erected.

ANCHOR MTN. MNG. CO.

SOUTH DAKOTA

Address: Thos. Bolger, mgr., Galena, So. Dakota.

Property: near Galena, Lawrence county, said to show 3 large veins of gold bearing ore of \$8 to \$14 grade. Development by tunnels.

Company recently added to its holdings and plans erecting a 150-ton ball mill with cyanide plant, in place of its old 10- stamp mill. The new mill will be on Butcher gulch, near its confluence with Bear creek. Operated only part of time during 1921.

BISMARCK MINING CO.

SOUTH DAKOTA

Ed. Manion, supt., Deadwood, S. D.

A gold mine at Flatiron, adjoining Wasp No. 2 mine, near Deadwood, Lawrence county. Operated intermittently by lessees. Treated 5,120 tons of gold-silver ore, valued at \$18,864 in 1918 and shipped 30 tons of tungsten ore worth \$2,282. Ore treated in Bismarck mill of 50-ton daily capacity in 1918, but idle since.

BLACK HILLS COPPER CO.

SOUTH DAKOTA

Idle. Office: Rochford, Pennington county, S. D.

Officers: E. A. Hoffman, pres.; George M. Thresher, sec.; John H. Kerr, treas.

Inc. June 2, 1900, in South Dakota. **Cap.** \$2,000,000; shares \$1 par.

Property: 27 claims. 510 acres, in the Hornblende district, shows fissure veins in slate, with gossan capping, carrying carbonate and oxide ores.

Orebody is said by company to average 20' width, and to be more than a mile in length, opened by incline shafts and crosscut tunnels, giving a total of about 1,200' of underground openings. Ores average, 1.5 to 3% copper, with small values in gold, silver and nickel. Has steam power, with 60-h. p. hoist, good for 1,500, and 4 power drills. Property considered of doubtful value.

BLACK HILLS MILLING CO.

SOUTH DAKOTA

Address: 412 Tabor Opera House Bldg., Denver, Colo. **Mine address:** Hill City, S. D.

Organized 1921 by Denver capitalists.

Property: 16 claims, in Black Hills mining district, 4 miles south of Hill City, contains vertical lode 16' wide, proven for 2,500'. **Development:** by shafts and drifts, said to show 300,000 tons of possible ore. Samples show \$9.19 per ton in gold and tests show 91.4% recovery.

Equipment: 10 stamp mill, 100 h. p. boiler, hoist, compressor and all necessary buildings.

BLACK HILLS TUNGSTEN M. & M. CO.

SOUTH DAKOTA

Dead. Property sold at sheriff's sale, August, 1917, to Elkhorn Tungsten Co., which see.

BLAND COPPER MINES

SOUTH DAKOTA

Address: Custer, So. Dakota.

Under development 1919. Idle since.

CAPITAL GOLD MINING & MILLING CO.

SOUTH DAKOTA

Address: R. M. Harrop, pres.-gen. mgr., Omaha, Neb. **Mine:** at Deadwood, S. D.

Reorganized 1917 in S. D. **Cap.** \$1,500,000.

Property: 60 acres, in Deadwood Gulch, adjoining the Trojan mine and 1½ miles west of the Homestake said to carry ore assaying from \$3 to \$12 per ton for 110' in width. Diamond drill work is planned.

CALABOGA MINE**SOUTH DAKOTA**

Address: Merritt, So. Dakota.

Is a lead-silver mine equipped with a concentration mill operated 1917. Only development work done since.

CLOVER LEAF MINING CO.**SOUTH DAKOTA**

Address: Mrs. Wibaux, owner, Roubaix, S. D.

Mine under option, 1922, to E. W. Talbot and associates of Deadwood, S. D. **Property:** 800 acres on Elk Creek, 8 miles S. E. of the Homestake, was idle for 17 years, but is credited with production of several million dollars in gold up to 1904. Diamond drilling underway and workings being unwatered.

COLUMBIA MINING CO.**SOUTH DAKOTA**

Idle. Address: care Richard Blackstone, Keystone, S. D.

Inc. in South Dakota. **Cap.** \$500,000; 300,900 shares issued.

Property: a group of claims at Keystone, Pennington county. Gold silver ore worth \$65 per ton said to have been shipped, from a quartz vein in diorite and schist, strike N. 56° E. dip 80°.

Development: 225' shaft and 300' drifts. Produced in 1917. Idle since.

CUMBERLAND MINES CO.**SOUTH DAKOTA**

Address: W. Goff Black, or E. B. Miller.

Property: the May Day and Cumberland mines, the former closed down several years before purchase by present owners, early in 1921. Shipments in August were 200 tons and 4 drills at work Sept., 1921.

CUSTER PEAK COPPER CO.**SOUTH DAKOTA**

Office: Roubaix, S. D. Burt Rogers, sec., Black Hills Trust & Sav. Bank Bldg., Deadwood, S. D. D. Grupe, pres.; John O'Brien, v. p.-supt.; with John Plunkett, directors.

Cap. \$1,500,000; \$1 par; assessable; 100,400 shares outstanding.

Property: the Jungle mine at the southeast base of Custer Peak, showing a porphyry dike cutting schist with 5' of copper ore on both walls. The Jungle mine was acquired in 1918.

Development: includes 65', 90' and 300' shafts, showing a 12' vein of 4% copper ore. The older holdings of the company, 1½ miles from the Jungle mine and S. W. of Deadwood, are said to carry average values of \$6 per ton in oxidized ore to depth of 100', changing below to pyrite and chalcopyrite, showing on the 200' level, a vein of 85' width, assaying about 1% copper with \$1.60 in gold.

Equipment: includes hoist, 50-ton dry concentrator, air compressor, pump and steam power. Developing since 1919.

CUTTING MINING CO.**SOUTH DAKOTA**

Address: Deadwood, S. D.

Officers: Burt Rogers, pres.; J. M. McDonough, sec.

Property: adjoins the Homestake on the W., near Central, Lawrence county. Several veins have been opened by tunnels and a 500' two-compartment shaft.

Equipment: includes electric power, single-drum hoist, pumps and compressor.

Company did some development work in 1921, but suspended work in August owing to heavy inflow of water. Property to be reopened, 1922.

CUYAHAGO MINING CO.**SOUTH DAKOTA**

Address: Keystone, S. D.; J. H. Snyder, v. p.

Property: the Spokane Pyrite mine. In 1917 the shaft was sunk to 200'. Ore containing 43% sulphur and some copper was shipped to Cleveland, Ohio for chemical purposes. Good gold ore was opened and a hoist and additional boilers installed. Presumably idle since 1918.

DAKOTA CONTINENTAL COPPER CO.**SOUTH DAKOTA**

Idle. Mine address: Hill City, So. Dakota. Office: 300 Commonwealth Trust Bldg., Harrisburg, Pa. Company is a reorganization of the Continental Copper Mining & Smelting Co.

Property: near Sheridan, Pennington county, S. D., in the Black Hills, known as the Dakota-Calumet, or Lillian property, 52 claims, patented, 179 acres.

Claims show quartz schist with a pyrrhotized zone, from 50' to 200' wide, traceable one-half mile. The mineralized zone shows bands of nearly pure pyrrhotite, with occasional traces of copper. At boundary between oxidized and unaltered material, a little copper is occasionally found, as a secondary concentration. Small amounts of rich ore were found at the surface and down to 25-30', but property is valueless as a copper mine. Extensive diamond drilling and exploration work prove a large amount of pyrrhotite available for acid making. A body of gold quartz ore of commercial grade was cut in diamond drilling and one shipment was made in 1918.

Development: includes an 850' shaft, 1,170' crosscut tunnel and 9 drift tunnels.

Equipment: includes 300-h. p. steam plant, with hoist good for 1,200', 7-drill compressor, all necessary shops and an old smelter of no present value.

Company had a bond on the Golden Summit gold mine, 4 miles E. of Hill City and diamond drilled property in 1918.

DEADWOOD-HEIDELBERG DEV. CO.**SOUTH DAKOTA****Address:** Deadwood, S. D.

Officers: John Treber, pres.; H. S. Vincent, v. p.; Jacob Goldberg, treas., A. T. Roos, mgr., with B. Stewart, Jim Hogarth and Geo. Porter, directors. A. T. Roos, sec.

Inc. June, 1914, in South Dakota, by the Deadwood Business Club, in an attempt to promote the mining interest of the section. **Cap.** \$125,000; 25c par; 295,000 issued. Annual meeting in June.

Property: 9 claims, unpatented, 185 acres, on Two Bit Creek, Lawrence county, shows gold ore in contact deposit between shale and porphyry. The orebody is reported to be 20' thick, 6 to 15' wide, 200 to 300' long, with N. E. course and dipping W. Milling ore averages \$5 per ton. Ore reserves said to be 5,000 tons.

Development: 7 tunnels, 65-380' long, with deepest workings at 193' from surface; total development, 2,000'.

Production: 180 tons, averaging \$20 per ton. Management plans sinking to the contact of the shale and underlying quartzite. Inactive and no production since 1918.

DEADWOOD LEAD & ZINC CO.**SOUTH DAKOTA****Address:** Deadwood, S. D.

Property: in Spruce gulch, near Deadwood Lawrence county, under development by tunnels.

Ore: complex sulphide carrying gold-silver-lead-zinc values. A 10-stamp concentrator will be supplemented by flotation machines used on tailings. Concentrates showed \$25 p. t. in gold, \$15 in silver, 22% lead and 8% zinc.

Was the only producer of lead-silver ore in South Dakota during 1919.

EAGLE BIRD MINING CO.**SOUTH DAKOTA****Address:** Deadwood, S. D.

Property: on Squaw Creek below the Trojan mill. A 1,500' tunnel was being driven at creek level in 1921 which will give a depth of 400' beneath the orebody that outcrops on the claims. Has electric power and compressor.

ECHO MINING CO.**SOUTH DAKOTA**

Address: Deadwood, So. Dakota, or W. L. Mason, gen.-mgr., Manchester, N. H.

Officers: Dr. Henry H. Jewell, pres.; Dr. Andrew J. Pitman, v. p.; L. B. Snelling, sec.; Judge Geo. A. Wagner, treas., with Herbert W. Lake, Dr. John J. Gailey, John S. Rand and Burt Rogers, directors.
Inc. 1892, in South Dakota.

Property: 62 acres, in the Maitland district, 4 miles N. W. of Deadwood, Lawrence county.

Development: by 400' vertical shaft, and several tunnels. About 100' E. of the shaft a pyrite vein was cut showing 4' of lead-silver-gold bearing ore.

Equipment: includes a special electric power line to shaft house, 25-h. p. electric hoist, air compressor and sinking pump.

Operations were suspended in 1920.

ELKHORN TUNGSTEN CO.

SOUTH DAKOTA

Address: care C. W. Crosby, sec.-mgr., 3310 Harrison Ave., Kansas City, Mo. **Office:** Hill City, S. D.

Officers: Arthur G. Wiedmann, pres.; Dr. E. R. Curry, 1st v. p.; Dr. W. J. James, 2nd v. p.; A. A. Anderson, supt.

Inc. Feb., 1917, in Arizona. **Cap.** \$2,000,000; \$1 par; all outstanding. Company purchased the property of the old Black Hills Tungsten Mining & Milling Co. at sheriff's sale, August, 1917.

Property: 361 acres near Hill City, Pennington county, shows quartz vein dipping 70°, said to contain tungsten as wolframite. Developed by shaft and equipped with electric and steam power and a concentrator.

Idle since 1918, but plans to sink shaft and recommence operations, 1922.

ELK MOUNTAIN M. & M. CO.

SOUTH DAKOTA

Probably idle. **Address:** Lead, S. D.

Operated the Slavonian group near Crown Hill and treated the ore in the Deadwood Standard mill during part of 1917; estimated production 3,120 tons of ore valued at \$9,215.

FIRST NATIONAL GOLD MINING CO.

SOUTH DAKOTA

Address: Hill City, S. D.

Property: the Summit mine, operated under lease 1920-21.

FREMONT FRACTION

SOUTH DAKOTA

Address: Jas. T. Street & Sons, 822 W. Main St., Lead, S. D.

Property: 1 claim in Whitewood mining district, near Lead, Lawrence county. Vein runs S. E.-N. W. dips 80°, and averages 3' in width. Assays average 49.6 Mn., 1.82% Fe., 3.76% Silica, 0.0039% Phos.

Development: by 160' shaft and 145' tunnel. The ore is hand-sorted. Produced 31.2 tons of ore in 1918, at a cost of \$1,500 and valued at \$1,670. No shipments made.

Mine examined by State Mine Inspector Ellerman.

GLENDALE MINING & MILLING CO.

SOUTH DAKOTA

Formerly the Otho Development and Power Co.

Succeeded by King Mica Co., which see.

GOLD DOLLAR MINE

SOUTH DAKOTA

Address: Trojan, S. D.

Mine is in Crown Hill district, Black Hills, S. D. Leased to Coleman, Madill, and others at last accounts.

Property has been a gold producer, whose ore was treated in the Mogul mill near Deadwood. Idle since 1918, but is to be reopened in 1922.

GOLDEN CREST CONS. MINING CO.

SOUTH DAKOTA

Address: Jas. D. Hardin, Deadwood, S. D.

Inc. 1921 in S. D., to succeed the Golden Crest Mng. Co. **Cap.** \$1,000,000.

Property: 12 patented and 8 unpatented claims, 275 acres, in Two Bit district, Lawrence county, 5 miles E. of Deadwood. **Ore:** occurs in fissure veins in porphyry, varying in size up to 15' and carries gold, silver, lead. Mine worked about 1902; reopened and sampled in 1917, and some development work done in 1918.

Development: by 9 shafts, greatest depth 335', with about 6,000' of drifts.
Equipment: includes electric double-drum hoist, 10-drill compressor, pumps, 40 stamps, 200-ton cyanide mill, Moore filter, etc.

Under development 1921, and completely re-equipped with mining and milling machinery.

GOLDEN CREST MINING CO.**SOUTH DAKOTA**

Banbrupt. Property bought in by Jas. D. Hardin and associates in 1921 and fully described under Golden Chest Cons, Mng. Co.

GOLDEN FEATHER GOLD MNG. & MLG. CO.**SOUTH DAKOTA**

Address: Deadwood, S. D.

Property: in the Two Bit district, adjoining Monarch mine. Company has a new 19-stamp mill that will be ready for operation, 1922. Development work done in 1921.

GOLDEN REWARD CONSOLIDATED GOLD M. & M. CO.**S. D.**

Office: 475 Fifth Ave., New York. **Mine office:** Deadwood, Lawrence county, S. D.

Officers: C. T. Tegethoff, pres.; Harris Franklin, v. p.; with R. W. Goelet, Henry de Forest, W. B. Devereaux, Walter Luttgen, Ed. de Witt and W. A. Harriman, all of New York, directors. W. J. Johnson, sec.; N. E. Franklin, asst. sec., Deadwood; Henry Schnitzel, gen. mgr.; F. R. Baldwin, gen. supt.

Inc. June 25, 1896, in South Dakota. **Cap.** 1,000,000 shares; \$10 par; 841,793 shares issued to June, 1916. Stock transferred at company's office. Annual meeting 1st Tuesday in August at Deadwood, S. D.

Property: 442 patented claims, 3,391 acres at Terry in, Whitewood and Bear Butte mining districts, near Deadwood, includes the Union and Astoria mines. Ore occurs as contact deposit in shale, carrying gold-silver values and 75% silica. Pay ore occurs in shoots from 5-100' long, said to give average assays of \$5 per ton.

Development: by several tunnels and vertical shafts from 100-350' deep, with about 15 miles of workings.

Equipment: includes electric power, electric double-drum hoist, compressor, 150-ton cyanide plant, 100-ton filter and 75-ton roaster. The furnace was stopped in July, 1916, for further investigation of the blue ore, which does not give high recovery. Average gold extraction is 75-55%. Experiments failed to show a higher extraction and practically all work was stopped in April, 1918, owing to high costs and low grade ore.

Ore reserves: estimated by management June, 1916, at 2,000,000 tons.

Production: in 1911-12, \$323,846 from 52,583 tons; in 1913, \$423,840 from 53,712 tons; in 1914, \$369,182 from 51,355 tons; in 1915, \$484,995 from 58,837 tons; in 1916, \$311,204 from 52,204 tons; in 1917, \$198,040 from 33,328 tons; in 1918, \$36,589 from 6,542 tons.

Operations suspended since April 1918. Company is inactive and non-productive.

GOLD KING MINING CO.**SOUTH DAKOTA**

Developing, at last account a gold-silver property on Silver creek, near Rochford, Pennington county.

Equipment: includes boilers, hoist and compressor, installed in 1918.

HIDDEN TREASURE MINING CO.**SOUTH DAKOTA**

Trojan, Lawrence county, S. D. Described, Vol. XIII.

HILL CITY MINING & DEVELOPMENT CO**SOUTH DAKOTA**

Letters returned from former address; Hill City, Pennington county, South Dakota.

Officers: John Wise, pres. and gen. mgr.; with J. W. Stoner, and Albert Booth, directors; E. A. Schillman, sec.-treas.

Inc. 1911, in South Dakota. **Cap.** \$500,000; \$1 par; 300,000 issued. Annual meeting, March 9.

Property: 11 claims, 6 patented, 220 acres in Burnt Fork gulch, 3 miles

north of Hill City. **Ore:** gold, in fissure vein, in schist; strike N. S., dip 80°. Said to have an average width of 16'.

Development: by shafts, deepest 200'. **Equipment:** includes double-drum hoist, compressor and a 10-stamp mill. No recent returns and probably dead.

HILL CITY TUNGSTEN PRODUCERS CO. SOUTH DAKOTA

Formerly at Hill City, S. D. Described Vol. XIII.

HOMELODE MINING & MILLING CO. SOUTH DAKOTA

Formerly at Silver City, Pennington county, S. Dak. L. A. Richards, gen. mgr.; L. L. Farnam, supt.

Property: shows quartz veins, 1' to 2' wide, opened up by 200' adit and 50' winze. Ore varies from 12" to 18" and is 150' in length; values are mainly in gold and antimony. Another vein ¼ mile E. and 24" wide, contains more zinc than No. 1. At camp No. 2, a 4 to 6' quartz vein carrying gold-silver values is developed by 300' shaft with 500' of drifting.

Equipment: includes three 100-h. p. boilers and an amalgamating mill, equipped with crusher, slow-speed Lane mill, tables and classifiers. Concentrate shipped reported to carry 2-4 oz. gold, and 6-10 oz. silver, principally as arsenopyrite. No production since 1917.

HOMESTAKE MINING CO. SOUTH DAKOTA

Main office: 910 American National Bank Bldg., San Francisco. **Eastern office:** 15 Broad St., New York. **Mine office:** Lead, South Dakota.

Officers: Edward H. Clark, pres.; Frank G. Drum, v. p.; Fred Clark, sec.; Louis T. Haggin, treas.; preceding, with Harry L. Tevis, Thos. Turner and Richard A. Clark, directors. B. C. Yates, supt.; R. G. Wayland, asst. supt.; C. W. Merrill and Allan J. Clark, cons. metallurgists.

Inc. Nov. 5, 1877, in California. **Cap.** \$21,840,000; increased March 25, 1913, to \$25,116,000 by payment of 15% stock dividend; shares \$100 par. Columbia Trust Co., New York, transfer agent; Union Trust Co., New York, registrar. Annual meeting, third Tuesday in March, in San Francisco. Listed on New York Stock Exchange since 1879.

Sales on N. Y. Stock Exchange during 1920 totaled 9,154 shares; the range was \$71 high in January and \$45 low in October. In 1921, sales totaled 18,600 shares, with range between \$61 and \$49.50.

(a) Including salaries, legal, general, etc.; bills payable; taxes; property purchased; interest. (b) profit and loss account.

Taxes are high; in 1914 amounting to 16c per ton of ore milled; 15c in 1915; 16c in 1916; 18c in 1917; 21c in 1918; 34c in 1919.

Dividends: have been paid monthly almost continuously since Jan., 1879; were suspended in May, 1907, as result of a fire in the mines, and resumed January 25, 1908; continued to December, 1909 inclusive, when they were suspended owing to labor troubles at the mines; resumed in March, 1910. Paid 50c per share per month to September, 1919, a total of \$41,927,559. Monthly dividend payments were resumed in 1921 with a first payment of 25c per share, May 25. Total disbursements to Aug., 1921, amount to \$42,178,719, or \$190.28 per share.

Property: 468 claims, about 3,723 acres in the Whitewood mining district, Lawrence county. The towns of Lead and Deadwood and the settlements of Blacktail, Terraville and Central City have grown up around the mines and mills.

The first claims acquired by the company were the Grant and Old Abe, located by J. B. Pearson, December 11, 1875. In the Fall of 1876, representatives of Haggin and Hearst bought these claims, and the Homestake Mining Co. was incorporated. In July, 1878, the first and only assessment was levied, \$1 per share; it furnished the \$200,000 required to build the 80-stamp Homestake mill. In 1899, company acquired the **Highland Mining Co.**, an adjoining property of about 73 acres; also the Black Hills Canal & Water Co., owning 40 miles of ditches, flumes and pipe-lines, with reservoirs, improvements and water rights covering the water supply of Deadwood and Lead districts.

According to Wright & Hosted the rocks in and near the Homestake mine may be classed under three broad groups; (1) Tertiary intrusives and extrusives; (2) Cambrian conglomerate, quartzite, and dolomite, or "flat formation." (3) pre Cambrian (Huronian) slates, schists, quartzites, limestones, and intrusives. This last group is locally termed the "vertical formation." The pre-Cambrian rocks have been uplifted and dynamically

metamorphosed, making the group a series of plunging, tilted folds. The axes of the folds strike N. 60 deg. W. to N. 35 deg. E., and axial planes dip steeply to the east with few local exceptions. The relation of the other groups to the pre-Cambrian is best shown by the accompanying section.

The ore has been found to be associated with the folding, so that the problem in the district has resolved itself into one of working out the location and exact structure of the major folds and then the location and structure of the minor or drag folds.

The ore varies considerably in composition in different portions of the deposit, but that of the deeper levels, the unoxidized ore, usually contains either chlorite or ferruginous hornblende (cummingtonite), with quartz, carbonates of lime, magnesia, iron, arsenopyrite, pyrite and pyrrhotite. Ferrous minerals predominated and this has been an important factor in determining the metallurgical treatment. In the upper oxidized parts of the deposits the ore is dark red, but deeper, in the sulphide zone, is greenish-blue to blue-black. Sulphides vary in amount from 3 to 5%, and even as high as 10% or more of the ore. In the sulphide zone the distribution of gold is uniform and averages \$4 to \$4.50 per ton. Over 60% of the ore is free milling. Secondary enrichment has not resulted in the formation of any particularly rich zones.

Development: 6 shafts; 4 in the footwall, one in the hanging, and one in the lode; depths January 1, 1917, were:

Ellison	B. & M.	Golden Prospect	Golden Star	Old Brig	Golden Gate
2,195'	1,700'	1,100'	1,400'	800'	800'

The 1,850' and 2,000' levels of the Ellison shaft will eventually be connected with the B. & M. shaft, through which outlet the bulk of the ore will be hoisted to surface. The B. & M. shaft is equipped with loading pockets at 800, 1,000, and 1,550', a hoist and skips, which will dump into N. 8 Gates crushers, and their product carried by a belt-conveyor system to smaller gyratories. Total cost of sinking at the Ellison shaft is said to have averaged \$60.64 per ft. There are in all about 130 miles of workings. Underground work during 1916 amounted to 24,381'; 19,320' in 1917; 7,354' in 1918; 5,770' in 1919; 7,737' in 1920. The Ellison shaft is being electrically equipped.

Ore Reserves: are large and sufficient to supply the reduction plants for many years. Broken ore in stopes at end of 1920 was 1,935,965 tons compared with 1,537,965 tons at end of 1919.

Ore treatment: the metallurgical equipment at the Homestake is one of the most modern and efficient in the country, and has been fully described in the technical press. The treatment problem is simple, the ore crushers well, averaging 4.7 tons per stamp daily. Amalgamation in battery and on plates is followed by cyanidation of sands and slimes separately. There are 1,020 stamps employed in six different mills, the pre-war cost being 26c per ton. During 1920 a total of 920 stamps were in operation treating 4,200 tons per day.

Mills: at the south side—3 stamp-mills (660 stamps) with 36,356 sq. ft. of amalgam plates; 1 regrinding plant, with independent cone system, and 540 sq. ft. of amalgam plates; 4 batteries of cones for classification; 3 clarifying tank houses; 1 sand plant. The mills are the Amicus, Golden Star, Homestake and Pocahontas. In 1915 the Pocahontas mill was completely rebuilt. The Amicus mill was remodeled in 1917.

At the north side—2 stamp-mills (300 stamps), the Monroe mill and Mineral Point mill; 2 tank-houses; 2 cone-houses; 1 sand plant. Ore supplied to these mills is usually drawn from the upper levels of the mine, and is partly oxidized.

A 5-stamp crushing and concentrating mill was built, 1916, for treating tungsten ores. It contains an amalgamation plate, cone classifiers, two Deis-

ter and one Wilfley tables for cone products, two small ball-mills for grinding middlings, and another Deister table to concentrate the ground product. Tailing passes to the cyanide plants. This mill has operated continuously on ore averaging 2% WO₃, yielding concentrate carrying 54%. Net sales of wolframite were \$229,916 in 1916; \$226,535 in 1917; \$167,468 in 1918; \$6,515 in 1919.

At Deadwood—A slime plant, treats the slime from both south and north side mills. At all the mills the stamps weigh 1,000 lb. and drop 10", making 88 drops per minute; Homestake order of drop is 1-3-5-2-4 or 1-4-2-5-3. A 25-h. p. back-gearing motor drives each 10 stamps. Ratio of water to ore is large being 10 or 12 tons of water to one of ore. A minimum of about 50,000 tons of water per day is used, most of it from Spearfish Creek and its tributaries, being conveyed over 20 miles in ditches and vitri-field pipe, and costing 10¢ per ton of ore stamped.

Inside amalgamation is practiced, quicksilver being fed to the mortar. Chuck-blocks are cleaned in rotation, at intervals of about 2 weeks; outside plates, except those of the fourth row, are cleaned and dressed daily. Fourth row plates are dressed at 2-day intervals. Amalgam is retorted three times each month. Oil-fired retorts are used, the resulting bullion being melted in coke-fired furnaces.

A 250-ton ball-mill was put into operation in 1920.

Regrinding is done in tube-mills. In cyaniding the usual methods are closely conformed to. A recovery is made of about 94% of the value in the ore: 72% by amalgamation and 22% by cyanidation.

A new 2,000-ton mill known as the South mill, is under construction at East Lead, east of the Ellison hoist, on the south side of the slope above the No. 1 cyanide plant. The general dimensions of the main building of the South mill, are 150x160', the classification annex will be 70x70' and the slime settling annex 100x40'. The general metallurgical scheme involves stage reduction, amalgamation after each reduction and the separation of sand from slime, with cyanide treatment of each product in existing plants.

Preliminary to treatment, the ore will be run through the crushers and over a tramway to the mill bins. It will be crushed by 120 stamps weighing 1,550 lb. each and then discharged through 2-mesh screens. The oversize from the stamps will then pass to six 5x10' Allis Chalmers rod mills with individual motor drive and in closed circuit with Dorr classifiers. The fine sand and slime from the stamps will by-pass these machines and unite with the classifier overflow.

At this stage the ore will go through an amalgamation process, four 4½x12' silver-plated copper plates being provided for each grinding unit. Suitable classifiers and two 5x14' tube mills will be used to control the final sizing of the tailings passing from the plant.

Power and equipment: company has hydro-electric plants at Spearfish and Englewood. Power equipment includes a steam-driven electric generating station at Lead, maximum capacity 4,000 k. v. a. The company operates its own machine shops, carpenter shops and foundry. Power used is about 1.15 k. w. hr. per ton of ore treated.

The Homestake Mining Co., has long been known for the way in which it has looked after the welfare of its 1,864 employees. In 1914, it completed a recreation building containing a theatre with seating capacity of 1,000, library, swimming pool gymnasium bowling alleys, billiard and amusement rooms. Wages are from \$4 to \$5 per day underground and from \$3.75 on the surface.

Production: to Jan. 1, 1920, \$164,023,965, exclusive of wolframite. Recent production has been:

Year	Ore milled tons	Recovered per ton	Total cost per ton
1920.....	1,274,944	\$3.4591
1919.....	1,192,588	3.6443	\$3.330
1918.....	1,628,630	3.633	2.700
1917.....	1,677,623	3.946	2.900
1916.....	1,600,220	4.0813	3.110
1915.....	1,573,822	4.0848	2.6561
1914.....	1,587,774	3.8797	2,9155
1913.....	1,540,961	4.0148	2.7258

Costs for 1920 were high owing to flooding of the mine, (done to put out fire) and to consequent shut down. Costs for 1921 were about \$2.60 per ton.

At the end of 1918 the mines and mills were operated at only 77 per cent capacity. Production continued steadily during 1919, until September 25, when a fire was discovered on the 800' level, and it was found necessary to flood the mine to the 600' level. During October and November operations were necessarily curtailed, but they were resumed December 1.

IMPERIAL COPPER CO. SOUTH DAKOTA

Idle. Property in Custer Peak district. Described in Vol. XIII.

IRON HILL MINING CO. SOUTH DAKOTA

Property: the old Iron Hill silver mine, in Carbonate district, Lawrence county, A 1,300' drainage adit, called the Elder tunnel, was completed in 1920, cutting the lode at 300' in depth and the entire mine unwatered and development work begun.

IRONSIDES MINING CO. SOUTH DAKOTA

Address: Central City, S. D.

Property: a gold-silver mine under development in 1919, but idle since.

KING MICA CO. SOUTH DAKOTA

Address: Keystone, S. D.

Is successor of Otho Development Co., which succeeded Glendale Mng. & Mfg. So.

Property: a gold-silver mine and 700 acres of mineral land, situated 3 miles from Keystone.

Reopened 1921 and being worked 1922 for mica.

LAUREL GROUP SOUTH DAKOTA

Owners: August Peterson, Nemo, S. D. E. A. Skalinder, Joe Kellar, Deadwood, S. D.

Property: 4 unpatented claims, 60 acres, in Greenwood mining district, Lawrence county, developed by 495' tunnel and 90' shaft, said to contain free milling gold and silver, assaying \$2.40 to \$10 per ton. Expended \$12,000 during 1918. No record of latter work.

MALONEY-BLUE LEAD COPPER M. & S. CO. SOUTH DAKOTA

Mail returned from former addresses: 215 Ry. Exchange Bldg., Chicago, Ill., and Hill City, S. D.

Officers: M. T. McCaskey, pres.-mgr.; F. A. Poor, v. p.; J. G. Thomas, sec.; R. N. Baylies, treas.

Inc. 1899, in South Dakota. **Cap.** \$750,000; \$1 par; 670,000 outstanding.

Property: 23 patented claims, 340 acres, near Keystone, Pennington county, shows copper ore in limited amount.

Worked by lessees in 1918, who are reported to have shipped 580 tons to the Omaha smelter, averaging 4.46% copper and 1.38 oz. silver, valued at \$8,202.

Probably dead.

MOGUL MINING CO. SOUTH DAKOTA

Address: Terry, S. D.

Inc. 1905, to take over holdings of the Horseshoe Mining Co. Union Trust Co., Pittsburgh, transfer agt.

Company treated ore from its own mine and other companies, and

operated the mine of the **Ofer Mng. Co.** at Trojan, Lawrence county. A 1,200' tunnel on the Ofer mine was completed in 1918 and 33,750 tons of ore shipped to the Mogul plant returned \$169,974.

Equipment: includes 1,600' aerial tramway and a complete cyanide mill.

Production: treated 59,384 tons in 1912, valued at \$242,567; 5,593 tons in 1913, valued at \$44,117; 21,770 tons, in 1914, valued at \$141,298; 37,419 tons in 1915, valued at \$161,605; 38,671 tons in 1916, valued at \$189,935; 35,980 tons in 1917, valued at \$187,317 and 33,750 tons in 1918, valued at \$169,975. All work was suspended October, 1919.

MONTEZUMA & THE WHIZZERS MINE **SOUTH DAKOTA**

Idle since 1918. **Address:** John Tait Milliken, Natl. Bank of Commerce, St. Louis, Mo.

Property: 150 acres, on the divide between Deadwood and Whitewood Canon, and on Deadwood Creek and West Gold Run, near Lead City, S. D. Property shows Algonkian schists, slates and quartzite, and carries a strong gossan, of 45' estimated average width, traceable 3,000'. Spiegel No. 1 formerly the Whizzers, and Brownie No. 5, carry 2 parallel quartzite reefs, with chalcopyrite in a gangue of hornblende schist, ores assaying 1 oz. silver and \$1-\$2 gold per ton.

Development: by 2 tunnels, one 650' long, which have produced about 50,000 tons of low-grade fluxing ore, sent to smelters at Deadwood and Rapid City. A 22' winze, below the water-level, gave picked samples, assaying \$16.80 gold per ton.

The Montezuma claim, near West Gold Run, has 2 short tunnels, showing ore assaying up to 1 oz. silver and \$53.70 gold per ton. Though low in average grade, the property has an enormous tonnage, but needs big capital to develop. Examined and reported favorably on by Geo. Huston, of Mullan, Idaho, and Nicholas Treweek, of Salt Lake City.

Property acquired in 1917 by J. T. Milliken, of St. Louis, Mo., who also developed the Oro Hondo nearby.

NATIONAL TIN CORPORATION **SOUTH DAKOTA**

Address: 50 Broadway, New York City.

Officers: Simon Lederer, pres.; Henry E. Vaughan, v. p.; Fred A. Travis, treas.

Inc. March, 1919, in Delaware. **Cap.** \$1,000,000; 50c par; amount outstanding not divulged. Stock listed on New York Curb and quoted at \$7.50 in October, 1919; at \$13 in January, 1920 and at 50c in 1921. Security Transfer & Registrar Co., registrar and transfer agents. Company has a 20-year lease on the mines and mill of the American Tin & Tungsten Co., the latter company to receive 25% of the net profits.

Property: a 20-year lease on mines and mills of the American Tin and Tungsten Co., the old Harney Peak Tin Co. property, 41 claims and a mill-site on the Keystone branch of the C. B. & Quincy R. R. at Keystone, Pennington county.

Ore: occurs as scattered grains of mineral in quartz veins and pegmatite dikes, the tungsten as wolframite and ferberite, the tin as cassiterite. In the Cowboy mine the cassiterite occurs in lenticular quartz mica veins, 12"-2' wide, with strike N. 54° W. and dip of 67° N. E. Stopping operations between the 200 and 250' levels claimed to have broken 6,000 tons of 1.98% ore. The Mohawk mine is developed by a 100' shaft, said to show a 3' lense of 2% ore at 40' depth.

Development: by vertical shaft being sunk to depth of 500'.

Company expected to start shipments in 1921, when adequate shipping facilities had been arranged for. The mine has been worked intermittently, possibly due to lack of enthusiasm on the part of American T. & T. stockholders to take up Natl. stock and supply necessary working capital. High grade ore said to average \$100 to \$500 per ton; medium grade \$9 to \$30 and low grade ore \$3 to \$6 per ton.

Operations resumed in first part of year and then suspended; at the

Boon mine, operations were resumed late in the year. The 250-ton concentrator was not operated.

Is regarded as of doubtful merit and stock selling appears to take precedence over mining.

NEW GOLDEN WEST MINES CO.

SOUTH DAKOTA

Mine near Rochford, Pennington county, S. D. Described in Vol. XIII.

NEW PURITAN MINING CO.

SOUTH DAKOTA

Address: Lead, South Dakota.

Officers: Wm. J. McGoffin, pres, and mgr.; L. Herseth, v. p.; P. A. Gushurst, sec.; W. C. Nissen, treas., with S. Ruud, W. Worth, and A. Randall, directors.

Inc. 1915, as a reorganization of the Puritan Mining Co. **Cap.** \$1,500,000 shares; \$1 par; non-assessable; 200,000 shares issued. Annual meeting in June.

Property: 60 patented acres, in Whitewood mining district, Lawrence county, shows an orebody, 28' thick in quartzite, carrying gold ore said to assay \$3.60 per ton. Developed by several shafts to depth of 190'.

Equipment: includes a steam hoist, 6-drill compressor, pump, and a 250-ton concentrating mill with cyanide unit.

Property has been idle for several years, owing to litigation.

NEW SILVER QUEEN MINING CO.

SOUTH DAKOTA

Address: Robt. Scholt, mgr., Galena, S. D.

Property: in Galena district, Lawrence county, in operation since 1917.

Development: by 3,800' tunnel. Shipped 144 tons of lead-silver ore valued at \$1,995 in 1917, and 57 tons, valued at \$2,093 in 1918. Some ore shipped in 1920, but none in 1921, awaiting erection of a mill.

Electric power and equipment installed in 1921, and development continued.

NORTH HOMESTAKE MINING CO.

SOUTH DAKOTA

Address: A. Maitland, Negaumee, Mich., pres. and controlling owner; A. F. Maitland, v. p.; T. C. Jates, sec.

Inc. in South Dakota. **Cap.** \$6,000,000; \$5 par; 1,000,370 shares outstanding.

Property: 77 patented claims, 1,100 acres at Maitland, Lawrence county, shows veins of quartz and sulphide ore, carrying gold and silver values.

Development: by 750' vertical shaft and 600' drift on the 600' level with crosscuts E. and W. for 200' and 100', respectively.

Equipment: includes 125-ton cyanide mill, electric power, 4 electric pumps, 2 compressors and hoist. Mine is credited with a production of \$1,500,000 under former management. Development work carried on intermittently during past 5 years has so far failed to disclose new orebodies of commercial grade.

Work suspended in September, 1916.

OFER MINING CO.

SOUTH DAKOTA

Dead, or inactive. **Address:** Deadwood, S. D.

Property: in Bald Mtn. district, near Trojan, Lawrence county, operated until October, 1919, by Mogul Mining Co., was purchased in 1920, by Trojan Mining Co.

OLAF SEIM MINE

SOUTH DAKOTA

Idle. **Address:** Olaf Seim, owner, Deadwood, So. Dakota.

Property: 1 mile from Deadwood, Lawrence county, adjoining the Montezuma and the Whizzers on the north, carries pyritic ore high in sulphur. Operated during part of 1918.

Production 1,150 tons averaging 38% sulphur. During 1918, 916 tons shipped returned \$7,200.

ORO HONDO MINE

SOUTH DAKOTA

Address: Estate, John T. Milliken, care Natl. Bank of Commerce, St. Louis, Mo. John Tait Milliken, cons. engr., Colorado Springs, Colo.

Property: at Deadwood, So. Dakota, is said to show replacement deposits in schist.

Development: by 2,200' vertical shaft. Did about 2 miles of diamond drilling, 1916, presumably in search of southerly extension of the Homestake orebodies. Idle since 1917.

PURITAN MINING CO.

SOUTH DAKOTA

Address: Deadwood, So. Dakota. Described in Volume XIII.

See **New Puritan Mining Co.**

RARE METALS CO.

SOUTH DAKOTA

Address: Custer, S. D.

Officers: Frank Hitch, pres.; W. N. Hunter, v. p.; Chas. Eastman, sec-treas.; Jos. R. Bland, chief engr.

Operated a small concentrating mill at Custer, Custer county, equipped for treatment of tin, tungsten and vanadium-bearing ores and the refining of mica ore. Idle since 1919.

RATTLESNAKE JACK MINING & MILLING CO. SOUTH DAKOTA

Address: Galena, Lawrence county, S. D. Owned by C. B. Harris of Galena, and William Sansome of New York.

Property: several claims, including the Rattlesnake Jack mine near Galena, said to show gold ore assaying \$15 to \$20 per ton.

Development: 200' shaft and tunnels. A 10-stamp mill and cyanide plant, completed in August, 1915, ran for several months, when a shutdown was made to build a tailing dam; resumed operations in January, 1916, only to close down in April, due to disagreement between the owners.

Reported that 1,670 tons of silver-gold ore treated in 1916, yielded \$14,270. Daily tonnage treated averaged 60 tons when the mill was running. Idle since 1916.

SPOKANE LEAD CO.

SOUTH DAKOTA

Address: Hermosa, S. D.

Property: at Hermosa, Custer county, 7½ miles S. of Keystone, developed to depth of 200' with levels at 60', 100' and 200'.

Ore: silver-lead. **Equipment:** includes 100-ton concentrator, installed 1918.

Production: in 1918, 102 tons of concentrate, containing 13.25 oz. silver and 35.74% lead per ton and valued at \$4,428. Several carload shipments of concentrate made in 1919.

TIN BOOM MINE

SOUTH DAKOTA

Address: Mills Bros., Hill City, S. D.

Property: located ½ mile W. of Hill City, produced 400 lb. of concentrate, carrying 60% tin from 4 tons of ore, in 1918. Assessment work only being done.

TITANIC GOLD MINING CO.

SOUTH DAKOTA

Probably dead. No operations since 1914. Formerly worked mine near Deadwood.

TROJAN MINING CO.

SOUTH DAKOTA

Office: Deadwood, S. D. **Mine office:** Trojan, S. D.

Officers H. W. Seaman, pres.; G. M. Curtis, v. p.; A. G. Smith, treas., all of Clinton, Iowa. F. M. Clark, sec.; H. S. Vincent, mgr.; above are the directors. C. E. Dawson, asst. mgr. and purch. agt. H. Slaughter, mine supt.; N. P. Goodrich, mill supt.

Inc. 1911, in South Dakota. **Cap.** \$3,000,000; par \$1; outstanding 1,000,000. Annual meeting in June.

The company publishes no financial reports.

Property: 220 patented claims, 2,100 acres in Bald Mtn. district, Lawrence county. Ore-bodies are flat deposits and vertical between porphyry shale and quartzite, carrying refractory values in gold and silver. Company acquired the Ofer Mining Co. property in 1920.

Development: by 308' Foley shaft and Portland, Decorah, Empire and Eagle adits, the Portland being main outlet.

Equipment: 7 electric hoists, 370 h. p., three compressors, 1,100 cu. ft. capacity, and 2 gasoline locomotives. Mill equipment is for cyaniding. Capacity 400 tons daily. Crushing is by Chilian and tube mills, filtration by Oliver machines.

Production: total to Jan. 1, 1921, 823,166 tons ore mined, 13,515 tons custom ore; also 13,648 tons shipped to smelter; total value \$3,620,672.

WASP No. 2 MINING CO.

SOUTH DAKOTA

Out of business. Mill wrecked, 1918. Fully described in Vol. XIV.

TENNESSEE

Tennessee produced 283,792 tons of iron ore in 1919 and 375,538 tons of iron ore in 1920. The state contains the important Ducktown district whose mines yielded 16,727,803 lb. copper, \$5,830 gold and 110,719 oz. silver in 1920. Most of the output of 3,957,000 lb. lead and 38,434,000 lb. zinc produced in 1920 came from the Embree & Mascot Mines.

The Union Zinc, Tennessee Zinc and Grasselli Zinc properties were idle in 1920.

AMERICAN BALLAST CO.

TENNESSEE

A subsidiary of the Amer. Z. L. & Sm. Co., and described under that title in the U. S. section of this book.

AMERICAN ZINC CO. OF TENNESSEE

TENNESSEE

Address: Mascot mine, Mascot, Jefferson Co., Tenn. A subsidiary of the American Z., L. & Sm. Co. and described under that title, in U. S. section of this book.

Address: O. C. Burrell, mgr., Mascot, Tenn.

Inc: Feb. 24, 1911, in Maine. **Cap.** \$10,000; \$1 par, all owned and issued by A. Z. L. & S. Co.

Principal mining operations of the Tennessee Co. are at Mascot, Knox county, where the company owns 2,400 acres, and in Jefferson county, adjoining Knox on the east, where company owns 400 acres of land.

Mining methods at the Mascot mine are described by H. A. Coy and H. B. Henegar in the Sept., 1917, Bulletin of American Institute of Mining Engineers. Costs totaled 70¢ per ton.

From the east to west the ore development as now shown is 7,900' in length. There has been blocked out 4,000,000 to 5,000,000 tons of ore, which will average 4% zinc.

CHATTANOOGA COPPER CO.

TENNESSEE

Reorganized as the Ocoee Copper Co., which see.

COPPER PYRITES CORPORATION

TENNESSEE

Office: 522 Fifth Ave., New York City. **Mine office:** Isabella, Tennessee.

Officers: Wm. Young Westervelt, pres.; Roger L. Wensley, v. p.; J. N. Bailey, sec.-treas., with F. M. Kirby, S. W. Mudd, C. W. Wilhelm and M. G. Taylor, directors.

Inc. March 17, 1919, in New York. **Cap.** \$203,000, in 20,000 preferred and 300 common shares; par \$10; all outstanding. To end of June, 1919, company had spent over \$200,000 for a 25-year lease from June 29, 1916, and development of its property.

Property Sec. 16, comprising 640 acres of School land, in Ducktown mining district, Polk county, showing $\frac{3}{4}$ of a mile of gossan outcrop. Diamond-drilling of the southern end gives assurance of approximately 1,500,000 tons of ore averaging over 45% iron, 29% sulphur and 1% copper. Management anticipates 12,000,000 to 13,000,000 tons of this grade ore.

Development: shaft A had been sunk 250', to October, 1919, and 1,200' of work done on two levels.

Equipment: includes steam hoist, air-compressor and $\frac{1}{2}$ mile broad-gauge railway, connecting with the L. & N. R. R. at McHarg Siding. Com-

pany plans erecting a differential flotation mill to make 18% copper concentrate and a de-coppered pyrrhotite concentrate. Tests show latter will contain between 90 and 95% sulphide of iron, which can be used in the production of sulphuric acid, and a high-grade, low phosphorous iron ore.

Property was under lease to the Tennessee C. and C. Corp., for 6 months ended March, 1921, during which time 19,818 tons ore were mined, and 539' of extensions were made on the two levels.

DUCKTOWN SULPHUR, COPPER & IRON CO., LTD. TENNESSEE

Office: 1 Gresham House, Old Broad St., London, E. C., Eng. **Mine office:** Isabella, Polk county, Tenn.

Officers: J. G. Gordon, chairman and managing director; L. G. Mortimer, managing director preceding, with H. G. Palmer, Edward Dexter and Col. H. B. Mortimer, directors; J. W. Felstead, sec.; William Young Westervelt, 522 Fifth Ave., New York, cons. engr. Executives at the mine: W. F. Lamoreaux, gen. mgr.; J. H. Taylor, asst. gen. mgr.

Inc. in Great Britain, Feb. 16, 1891. **Cap.** £75,000; shares £1 par; in £74,800 ordinary shares and 200 founders' shares. Increased 1907, to £200,000 shares, increase subscribed to by the old stockholders at par, except £48,799 ordinary shares sold to the public at 25s. Stock is fully issued and fully paid. Profits are divisible on the basis of 7% plus one-half of the net remaining profits, to ordinary shares, balance of profits going to founders' shares. £83,900 first mortgage, 6½%, debentures outstanding, July 1, 1919, against which a general reserve fund of £55,000 has been accumulated.

Recent Dividends:

	Ordinary	Founders'			Ordinary	Founders'			
	Shares	Shares			Shares	Shares			
		£	s	d		£	s	d	
1907.....	82½%	249	3		1912.....	10%	29	19	5
1908.....	55%	108	18		1913.....	12½%	54	18	11
1909.....	10%	16	0	8	1914.....	12½%	54	18	11
1910.....	10%	21	17		1915.....	13¾%	9	9	10
1911.....	10%	28	4	5	1916.....	20%	129	17	3

Total dividends paid to all classes of shares, £558,063. Of this, £363,547, amounting to 375 5/6% on shares outstanding at the times of payment, was paid to the ordinary shares, and £194,506, amounting to 97.253% was paid to the founders' shares, the latter constituting the world's record for profitable copper mining investment. On the 74,800 ordinary shares, from 1895 to 1907, inclusive, 293%, or £229,636, was paid.

Property: nearly 7,000 acres, bought for £68,057, includes the Mary, East Tennessee and Isabella mines, which are active, and the Calloway and Cherokee mines, which are idle. Country rocks consist largely of very tough highly metamorphosed, silicified mica schists, of ancient origin. The ores are exclusively sulphide, averaging about 2½% copper and containing minute quantities of gold and silver, sufficient, however, to be appreciable in the matte.

The **Mary** mine, which is the principal producer, has three shafts, the Gordon 1,180' deep being now the main working shaft. The richest ore in the mine is on the lower levels. The workings blocked out 1,500,000 tons, averaging 1.8% copper and 16% sulphur with an additional amount of indicated ore of similar grade making a total of 3,000,000 tons.

The **East Tennessee** mine did not commence to produce until 1910. The Thomas, or operating shaft, 700' deep, has 2 compartments and yields about 30 tons per diem of ore containing 3% to 5% copper and 8% sulphur. Reserves scattered through old mine, between 5,000 and 10,000 tons contain at least 2.5% copper and 8% sulphur, and there are prospects of considerable further developments of rich ore.

The **Calloway** mine, now idle, contains between 10,000 and 20,000 tons of further developments of rich ore.

The **Calloway** mine, now idle, contains between 10,000 and 20,000 tons of 2% copper ore immediately below the third level, with possibility of further developments in depth.

The **Cherokee** mine shows extensive outcrop on the continuation of the orebody of the School property and it is anticipated that it will yield four million to five million tons of ore averaging 1% copper, 29% sulphur and 45% iron.

The **Isabella** mine has thus far yielded but a few thousand tons of ore a year. The ore, averaging about 0.8% copper and 29% sulphur, has as yet been used for little else than experimental purposes. 5,600' of systematic diamond-drilling, however, has already revealed over 2,500,000 tons of average ore with like amount anticipated making 5,000,000 tons in all, so that doubtless the property will, eventually, be worked on a considerable scale for acid and iron manufacture.

Smelter: the company's smelter, and headquarters are located at Isabella, on the company's private standard-gauge railway, about 2½ miles from the Mary mine. The plant contains two 500-ton, sectional water-jacket blast furnaces, operated by induction motor Connorsville blowers of 300 cu. ft. per revolution aggregate capacity, charged by a Freeland patent electrical charger and served by an electrical traveling crane for the matte and belt bucket elevators for the granulated slag. Since 1902, when heap-roasting was abandoned, semi-pyritic smelting, introduced into this country from Tasmania by this company, has been employed. A small percentage of coke and cold blast of from 20 to 30 ozs. is used. The product of the fusion is a matte containing 12 to 15% copper, and disposes of the non-metallic matter in the ore in a slag containing 0.2 to 0.3% copper. The matte is treated in a basic lined converter together with the concentrates from the flotation plant mentioned below. Blister copper is produced which is refined by the Nichols Copper Co., New Jersey.

A 300-ton differential flotation plant finished 1921, produces an 18% copper concentrate and a nearly pure pyrrhotite by-product.

In 1905, investigations were undertaken to determine the possibility of making sulphuric acid from the smelter fumes. In 1906, an experimental contact plant was erected, but proved unsuccessful, and in 1908, work on the present chamber acid plant was commenced. This plant, which cost over \$600,000, was put into operation in less than a year from the time of breaking the ground for its erection, and has since been producing from 40 to 50 thousand tons per annum of 60° Beaume sulphuric acid. It was the first acid plant to successfully convert sulphuric gases from pyritic smelting into concentrated acid.

The credit for the successful development of the company is due primarily to the chairman and managing director, Mr. Gordon, himself a technical man, to the consulting mining engineer, Mr. Westervelt, who developed the mines, and to the former manager, Mr. W. H. Freeland, who developed the pyritic smelting process employed.

Production:

Year	Pounds Copper	Tons 60° B. Sulphuric Acid
1920.....	6,210,823	37,490
1919.....	5,290,000	20,735
1918.....	5,252,000	35,000
1917.....	5,593,000	32,900
1916.....	5,129,000	†41,000
1915.....	5,500,000	41,000
1914.....	5,862,000	46,900
1913.....	5,811,000	48,800
1912.....	5,213,000	48,100
1911.....	5,040,000	45,600
1910.....	4,409,000	46,800

† 11,000 tons contained 95% to 97% acid:

Copper production for first half of 1921 was 3,453,885 lb.

Company is managed with commendable financial probity, technical ability of a high order, and is heartily endorsed as worthy of confidence and investment.

EAST TENNESSEE MINING & DEVELOPMENT CO. TENNESSEE

See Southern Zinc & Mng. Co., Inc.

EAST TENNESSEE ZINC CO. TENNESSEE

Address: M. Casewell Heine, atty., 140 Nassau St., New York.

Inc. in New Jersey, and registered in Tennessee. All stock owned by M. C. Heine.

Property: 173 acres, 2 miles from Newmarket, on the Southern railway, reported to show zinc blende ore occurring in joint planes and fractures in limestone beds.

Development: by drilling claimed to have proven about 6,722,000 tons of ore. Work on the property includes an open quarry pit 75' deep with 5 tunnels running from it.

Equipment: includes 100-ton concentrator, 540' cable tram and 25-h. p. hoist.

ELENOR MANGANESE CO. TENNESSEE

Address: R. B. Hayes, pres., Masontown, Pa.

Inc. 1919. Cap. \$15,000.

Property: bought in 1919 from A. H. McQuenn, is near Butler, Johnson county.

EMBREE IRON CO. TENNESSEE

Property: the Embree lead-zinc mine in Washington county. The ore is concentrated at the mine, the concentrates averaging 41.31% zinc and 62% lead. A producer since 1919.

KALBFLEISCH CORPORATION TENNESSEE

Property: near East Chattanooga, Hamilton county, was the only producer of bauxite in Tennessee during the year 1920.

MASCOT MINE TENNESSEE

Address: Mascot, Jefferson county, Tennessee. See American Zinc Co. also under Tennessee.

MAX MINING CO. TENNESSEE

Braemer, Tenn.

Prospecting for manganese on Little mountain, Carter county, where 15% ore is found that shows manganese minerals in grains and lumps in a clay bed.

OCOEE COPPER CO. TENNESSEE

Address: J. I. Carter, gen. mgr., Volunteer Bldg., Chattanooga, Tenn.

Officers: J. I. Carter, pres.; John Stagmaier, 1st v. p.; G. H. Miller, 2nd v. p.; S. E. Whitaker, sec., P. B. Carter, treas., with R. B. Davenport, W. S. Palmer, J. C. Vance and W. H. Weatherford, directors. L. W. Hope, supt., Ducktown, Tenn.

Inc. 1917, in Tennessee. Cap. \$1,250,000; shares \$10 par; 70,000 shares in treasury to be sold to secure capital for development; 55,000 shares paid to Chattanooga Copper Co. for its holdings. Practically a reorganization of that company, the officers and directors remaining the same.

Property: 120 acres in northern part of Ducktown copper district, Polk Co., surrounded on 3 sides by the holdings of the Tennessee Copper Co., and the Ducktown Copper, Sulphur & Iron Co., adjoins the East Tennessee mine on the east, owned by the last named company. Several diamond-drill holes prove that the ore deposits of that mine extend downward on their dip beneath the land of the Ocoee Copper Co., and that the ore is identical in character, mineral association and occurrence with that of the East Tennessee mine. Ore was found in the drill holes at depths of 685 to 1,085'. Ownership of surface carries ownership of all beneath the surface, as Tennessee does not have an apex law. Diamond drill records said to indicate an orebody assaying 4.53% copper, that is 290' long, 415' in depth and 55' thick, equal to

about 340,000 tons, allowing $\frac{1}{3}$ for waste. Development will add to this figure.

Development: by 7 x 15' shaft, 1,200' deep. A 200' crosscut reaches ore-body previously cut by diamond-drilling.

Equipment: includes two 150 h. p. boilers, hoist, and compressor. A 300-ton differential flotation plant and installation of electric power planned.

The property has attractive possibilities and is under conservative management.

SCHOOL MINE

TENNESSEE

Operated under lease by **Copper Pyrites Corporation**, which see.

SOUTHERN AGRICULTURAL CHEMICAL CORP'N

TENNESSEE

Subsidiary of **Tennessee Copper and Chemical Corp'n.** and described thereunder.

SOUTHERN MANGANESE CORP'N

TENNESSEE

See description under Alabama. Operates several manganese mines and is the largest producer of manganese ore in Eastern Tennessee.

SOUTHERN ZINC & MINING CO., INC.

TENNESSEE-VIRGINIA

John H. Caldwell, receiver, Bristol, Tenn.

Officers: E. L. Patton, pres.; Geo. F. Reynolds, v. p.; J. E. Kingsland, sec.-treas., with S. V. Fulkerson, Horace D. Fry, Kirby Thomas and H. G. Peters, directors.

Inc. in Delaware. **Cap.** \$1,600,000, in \$600,000 7% cum. pfd., and \$1,000,000 common stock; shares \$10 par; full paid; non-assessable.

Property: mineral rights of Fall Branch and Arcadia mines, 1,125 acres; the Fall Branch property, 225 acres, is in the S. W. corner of Sullivan county, Tenn., 7 miles S. W. of Fordtown; the Arcadia property is in Sullivan county, Tenn., and Scott county, Va., about 12 miles N. of the Fall branch property.

Ore carries zinc in Knox dolomitic limestone; said to be in the same ore-bearing zone as the Mascot and Bertha mines. Prospecting has shown 4 parallel veins. No. 1 vein is opened by a system of open cuts and a 127' incline shaft that has exposed the ore for 300' along the strike. The greater part of this work was done under lease by the East Tennessee Min. & Dev. Co., which built a mill prematurely and exhausted its funds. A rough estimate of ore in No. 1 vein gives 188,000 tons of 4% zinc ore above the 100' level. Veins 4, 5 and 6 parallel No. 1, but have had no systematic development.

Mill: 100-ton capacity, equipped with "Clifford" dry process system. J. H. Banks states: "I consider this a very promising zinc property and can unhesitatingly recommend its further development." No work done in recent years owing to litigation with general creditors.

TENNESSEE COPPER AND CHEMICAL CORP'N

TENNESSEE

General office: 61 Broadway, New York. **Corporate office:** Millbrook, New York.

Officers: Adolph Lewisohn, pres.; Sam A. Lewisohn, v. p.; E. H. Westlake, v. p.-treas.; F. M. Loper, sec.

Directors: Jules S. Bache, J. Parke Channing, Wm. B. Joyce, H. M. Kilborn, Adolph Lewisohn, Sam A. Lewisohn, F. M. Loper, J. H. Susmann, Richard Sutro, Martin Vogel and E. H. Westlake. Annual meeting, fourth Thursday in April.

Inc. Oct. 11, 1916, in New York, to re-finance and take over control of Tennessee Copper Co. (see below), through stock ownership. Stockholders of old company were given privilege of converting stock share for share, and of subscribing for an equal additional amount of the new stock at \$16 per share.

In August, 1919, company organized the Southern Agricultural Chemical Corp., capitalized at \$1,000,000, to handle a fertilizer business and thus afford an output for a large part of acid and in 1920 organized the Southern Agricultural Tank Line, with \$1,000,000 capital, to provide cars for acid, acid phosphate, etc.; entire share capital of each subsidiary is issued and held by mother company.

Capital: 800,000 shares; no par value; increased May 29, 1919, from 400,000 to provide funds for the fertilizer manufacturing business. Holders of voting-trust certificates were given right to subscribe for 100% of their holdings at rate of \$12.50 per share, the stock subscribed for to be issued to the voting trustees, who will issue additional certificates under the agreement of October 30, 1916. The issue was underwritten by J. S. Bache & Co. and Adolph Lewisohn & Sons at \$1.50 a share. By this issue about \$4,400,000 additional capital was secured. Trust expired Oct. 30, 1921 and the 800,000 shares were listed on the N. Y. Stock Exchange. Sales were \$7.75, Oct. 1921, compared with \$13.25 in 1920.

Columbia Trust Co., N. Y., transfer agent; Empire Trust Co., N. Y., registrar.

A report of operations for 1920 states that 10,358,237 lb. of copper, 333,629 tons of sulphuric acid, 55,586 oz. of silver, and 237 oz. of gold were produced, and that a deficit of \$285,889 was incurred, compared with a deficit of \$675,379 in 1919. In balance sheet of T. C. and C. Corp'n the Tenn. C. Co. and So. Ag. Chem. Co. are included from 1919 on and the So. Ag. Tank Line in 1920; years end with Dec. 31st.

According to the Boston News Bureau:

"Through a steady increase in the production of sulphuric acid in the past half dozen years, Tennessee Copper and Chemical Corp'n has become more of a manufacturing enterprise than a straight copper mining company. The company has capacity for 20,000,000 lb. of copper and 330,000 to 335,000 tons of sulphuric acid a year. It has always been a relatively high cost copper producer, its cost in 1914 being 12c per lb.; 1913, 10.53c; 1916, 14.36c and in 1920, 19.14c.

In the current year Tennessee Copper will produce 8,130,000 lb. of copper and 236,707 tons of sulphuric acid. In the eight months ended Aug. 31, 1921, the company earned net profits of \$41,489, or 5c per share on the 794,224 shares outstanding.

This, of course, was a period when copper operations did not return a new dollar for an old and the profit came from the sulphuric acid end of the business.

Tennessee Copper has no direct funded obligations, but a subsidiary has \$1,141,500 first mortgage 6% bonds outstanding, due 1925. No dividends have been paid on the stock since May, 1918, and it is rather more speculative than the average run of copper shares."

Tennessee Copper Co., Tennessee.

Subsidiary of Tenn. Copper & Chemical Corp. Same directorate.

Office: 61 Broadway, N. Y. Mine at Copperhill, Polk county, Tenn.

Operating officials: J. N. Houser, gen. mgr.; M. A. Caine, asst. mgr.

Inc. April 24, 1899, in New Jersey. Cap. \$6,875,000; shares \$25 par; \$5,000,000 issued. State Street Trust Co., Boston, and Equitable Trust Co., New York, registrars; Old Colony Trust Co., Boston, and National City Bank of New York, transfer agents. Annual meeting, fourth Thursday in April.

Authorized bond issue, 1915, \$3,000,000; first mortgage 6% 10-year convertible sinking fund gold bonds; \$1,326,000 outstanding, and \$1,000,000 pledged to Tennessee Chemical as collateral. This issue enabled the company to retire the 800,000 outstanding bonds of the first issue, December 1, 1915.

Financial results:

* Loss.

Property: 12,640 acres of mineral and timber lands, in the Ducktown district. Ore was discovered and mining first begun in 1850, and the mines were operated regularly by a New York company previous to the Civil War, and during the earlier part of the war, under compulsion by the Confederate Government to supply copper for munitions. Company owns the Burra Burra, London, and the Eureka mines. Company also holds under lease 270 acres, including the Polk County mine. The Eureka was formerly operated under lease for iron ore by the Virginia Iron, Coal & Coke Co.

Near Bartow, Florida, company has acquired a phosphate rock property.

Geology: property shows pre-Cambrian metamorphosed mica-schist, carrying several lines of mineralization with lenticular orebodies. Four deposits under development, show extensive gossans, originally having a little rich sooty glance ore under the gossan, which was mined out many years ago.

The lenses range 30 to 150' in width, 500 to 2,000' in length, and are of unknown depth. The ore consists of a massive mixture of pyrite and pyrrhotite, with a little chalcopyrite, in a gangue of various metamorphic minerals and quartz, ore ranging from 1.2 to 3% copper, 40% iron, 27% sulphur and 15% silica, with minute quantities of gold and silver. The ore is excellently adapted to smelting, giving very clean slags.

Development: recent work is summarized in the following table:

Year	All Mines	Dev. Cost *	Drilling	Cost p. ft.	Ore Reserves
1920....	7,650'	\$0.400	2,079'	\$3.50	3,533,134 tons
1919....	4,775'	0.314	2,708'	3.33	3,512,550
1918....	2,858'	0.202	3,579'	2.54	3,480,911
1917....	3,107'	0.139	3,351'	2.31	3,485,713
1916....	2,991'	0.187	4,090'	2.00	3,372,305

* Per ton mined.

The Burra Burra mine, which is the largest mine and main source of ore, is operated through a 1,768' main central shaft, sunk at 75' in the footwall, having its first level 170' below the collar, with succeeding levels at 100' intervals.

The main orebody of the Burra Burra is 1,200' long and averages 60' wide on the third level. The McPherson orebody farther north is developed by a drift from the third level of the main shaft, connecting with the McPherson shaft, now down to the eighth level. This shaft is 2,200' N. E. of the main shaft and facilitates working the McPherson orebody which is about 900' long with an average width of 25'. The Hiwassee shaft, 900' S. W. of the main Burra Burra shaft, is sunk to the third level, showing a comparatively small orebody, of about 200' length and 12' average width. Haulage underground is by electric locomotives, and loading of skips in shafts is done from two pockets.

Both in 1919 and 1920, development was pushed to the utmost and totaled 9,790' in the Burra, including 177' in the main and 471' in the McPherson shaft; the latter has reached the 14th level and connections will be made with the main and London shafts. The grade of ore on 10 and 12 levels is said to be better than expected. Broken ore reserves in the Burra were 170,000 tons on Jan. 1, 1921; production was 266,128 tons of ore in 1919 and 322,603 in 1920; a large portion of the 1920 output was handled by mechanical loaders, which proved a success.

The London mine has an 850' shaft, sunk at an incline of 75°, with 7 levels opened, developing an orebody of 25 to 75' width and about 600' length, ranging 2 to 4% in copper tenor. **Development:** in the London was curtailed in 1919, but pushed in 1920; total for 2 years was 2,345'. Production in 1919 was 81,126 tons of ore and in 1920, 82,693 tons at total cost of \$2,4831 p. t. Ore reserves on Jan. 1, 1921, were 9,100 tons of ore.

The Polk County mine has a 485' vertical shaft, with 5 levels opened, developing an orebody of very irregular shape, up to 120' maximum width, of about 2% average copper tenor. Development in Polk county mine was 230' in 1920 and production 21,374 tons of ore at cost of \$2.59 per ton for mining and 12c. per ton for development.

The Eureka mine, idle since 1912, has a shaft 165' deep, at which point the first level will be opened. Diamond-drill borings have shown an ore-body of 20 to 165' width, about 1,000' length, and it is estimated that this mine has 2,500,000 tons of ore developed that average 44% iron, 30% sulphur and about 1% copper. Because of ore shortage, company leased property of Copper Pyrites Corp'n for 6 months beginning August, 1920, and extracted 19,818 tons of ore high in sulphur.

Smelter: at Copperhill, 1 to 5 miles from the mines of the company, was designed and built by J. Parke Channing. The ore bins have storage capacity for 10,000 tons of ore, 800 tons of coke, and necessary fluxes and

furnace products requiring re-treatment. Charges are drawn from the bins into cars of 44 cu. ft. capacity, hauled by electric locomotives over 4 tracks that run under the bins and circle around the furnaces, so that a train loaded on any track may go to any furnace and return to the bins.

The furnace building of steel has space for 7 blast-furnaces, but only 5 are in use each having an oval settler lined with firebrick. Slags skin into pots of 105 cu. ft. capacity which are hauled by the electric locomotives. Coal dust pulverizing and firing equipment was erected in 1918.

The converter department has two 40-ton electric traveling cranes taking matte from the settlers to the converters. Two 12' basic lined converters of the Great Falls type were installed in 1916 to replace the old ones, also a copper-casting machine.

Hot converter slag is poured into the blast furnace settlers, by reason of which the only converter slags requiring re-smelting are the skulls forming in the ladles. Converter bars average 99.4% copper. Copper is cast in 210-lb. pigs and sent to the Baltimore Copper Smelting & Rolling Co. for electrolytic refining, which affects the saving of the very small gold and silver values contained. The finished electrolytic copper is marketed through Adolph Lewisohn & Sons, Inc.

Leaching of flue-dust is being tried, mainly with the idea of securing data for subsequent treatment of ore in the Eureka mine. Slag granulation was adopted in 1919.

The company operated a quartz quarry at Austral, Tenn., 35 miles N. of Copperhill, on the Louisville & Nashville railway. Equipment of the quarry consists of a boiler, air-compressor and rock drills. Beginning with 1919, the use of Austral quartz was abandoned and a better grade from elsewhere substituted.

The smoke damage situation is complicated by the location of the works, which are in the extreme S. E. corner of Tennessee, winds carrying the bulk of the fumes into the State of Georgia, by reason of which the State authorities of Georgia brought suit against the Tennessee Copper Co. and the Ducktown Sulphur Copper & Iron Co. in the Federal courts, and the latter decided that the smelters must cease operations or stop the fumes by using them for a sulphuric acid plant. This undertaking proved much more difficult than was anticipated by reason of the intermittent and varying nature of gas supply from the blast furnace tops.

The No. 1 acid plant cost about \$1,600,000 and was put into full operation early in 1908, with a rated capacity of 120,000 tons yearly of 60° Beaumé chamber acid. With the completion of the No. 2 acid plant in July, 1916, the company had 2 large lead chamber plants for the manufacture of 60% acid, with an estimated capacity of 300,000 tons per year. No. 1 was overhauled by July, 1917, while considerable improvements were made in 1918. There are also plants for concentration of sulphuric acid to 66° and 97½%, and for manufacture of nitric acid.

As the furnace gases contain sulphur dioxide, sulphur trioxide, carbon dioxide, oxygen and nitrogen in considerably varying percentages, new methods of control were found necessary to maintain the volume of sulphurous gases suitable for making sulphuric acid by the chamber process. After some experimentation the problem was solved by equipping one of the smaller and three of the large blast furnaces with tight tops, above the charge floor, to exclude atmospheric air, these being connected with a dust chamber, where most of the solid matter is precipitated from the gas, the dust chamber being so constructed as to conserve the heat of the gases sufficiently to concentrate the acid in the Glover towers. There are 2 octagonal Glover towers of 30' diameter and 50' height with suitable nitre plants at the foot of each. After passing through the towers the gases are conducted through very large lead flues of 200 sq. ft. sectional area, which deliver the fumes to the chamber system containing 4,600,000 cu. ft. of chamber space. In a general way the chamber plant is of conventional

design, yet the enormous quantities of fume received and acid produced have brought about developments that were new to the industry, among the most notable being the size of gas connections, acid lines, acid coolers and fans, which are all on a scale never before known. The discharge from the chamber plant is conducted into 11 Gay-Lussac towers, which are of a gigantic size, the three latest and largest being octagonal of 36' diameter and 65' height. In 1919, one Gay-Lussac tower in plant No. 1 was replaced by one of modern design. This acid plant is the largest and most complete in existence.

A 10 year contract for the sale of its entire sulphuric acid output to the International Agricultural Corp. expired on Dec. 31, 1920 and a portion of the production was released the previous year. New 3-year contracts with this and other fertilizer companies have been made at much higher prices.

In part agreement with company's statement of May 29, 1919, it has undertaken the manufacture of acid phosphate and other fertilizers through the medium of the **Southern Agricultural Chemical Corp.** A 100,000-ton acid phosphate plant was erected at Atlanta, Ga., and placed in operation November, 1920.

Production:

Year	Ore smelted, tons	Copper, ore lb.	Oper. per ton cost	Production Acid, tons	Copper, lbs.	Cost p. lb., c per lb..	Received c.
1920.....	404,060	25.64	\$4.88	333,629	10,474,881	20.80

1912.....	444,289	29.80	3.27	192,084	13,252,634	11.00
1911.....	436,285	31.65	3.44	13,808,940	10.88

Copper per ton refers to Tennessee ore only; total copper figures include copper from a small tonnage of custom ores.

Low-grade copper ores are treated profitably at other points, but in nearly all other cases, they contain considerable gold and silver, which are lacking in the case of the Tennessee. This company has shown both courage and ability in the installation of its acid plant, by virtue of which a very serious handicap has been turned into a permanent source of large revenue.

TENNESSEE MANGANESE CO.

TENNESSEE

Address: D. C. Campbell, pres., Knoxville, Tenn.

Cap. \$20,000; increased 1918 to \$200,000.

Property: mines at Sevierville, Sevier county, and Knoxville, Knox county. A 10-ton electric furnace erected 1920 is in operation at Cleveland, Tenn.

TEXAS

Apart from the great sulphur and oil deposits, the mineral production of the State is small; silver is the principal metal produced and nearly all comes from the Presidio mine. Some of the copper deposits (red beds) are said to be worth exploitation. Production for 1920 was 520,000 oz. of silver, about normal. Small shipments of copper, gold, lead and zinc ore are made intermittently to the El Paso smelter, from the Van Horn and Sierra Blanca districts, but there are only 2 regularly producing metal mines, viz., the Shafter mine of the Presidio Co. and the Chisos a quicksilver mine.

AMERICAN SULPHUR ROYALTY CO.**TEXAS****Address:** Houston, Texas.

Has a royalty share in the production of the **Freeport Sulphur Co.**, which see.

BIG BEND MINING CO.**TEXAS**

Idle. Is a quicksilver property, near Terlingua, Tex., operated in 1918-19, under lease by the **Study Butte Mng. Co.**, which see.

CHISOS MINING CO.**TEXAS**

Howard E. Perry, pres.-gen. mgr., Terlingua, Brewster county, Texas. Property is at Terlingua, 108 miles S. E. of Marfa on the S. P. R. R. Cinnabar ore occurs as replacement deposits in limestone and shale. In the lower limestones the ores are generally in nearly vertical calcite veins, or in lodes of friction breccia. For geology, see *Texas Bull.* 405, 1909.

Development: by shafts. The mine, which is the biggest producer in the district, had a record-breaking year in 1915, producing 1,200 flasks of mercury in November and December. Yearly output not available. Produced 500 flasks per month in 1918, with a smaller output in 1919 and 1920.

Equipment: includes an 18-ton shaft furnace.

COLQUITT-TIGNER QUICKSILVER MINE**TEXAS**

Located in Brewster county. Idle several years.

CONSOLIDATED KANSAS CITY SM. & REF. CO.**TEXAS**

Subsidiary of the **American Smelting & Refining Co.**

Owms the El Paso smelter at El Paso, Texas, described under that title

ELLIS MINE 34**TEXAS.**

Now owned by **Mariscal Mining Co.**, which see.

EL PASO SMELTER**TEXAS**

Owmed by the **Cons. Kansas City Sm. & Ref. Co.**

Is a subsidiary of the **American Smelting & Refining Co.**

Address: Kuno Doerr, gen. mgr.; N. A. Ferguson, bus. mgr.; J. Heggie, supt., El Paso, Texas.

The smelter proper occupies 43 acres out of an 1,100-acre tract of land which is traversed by the **Sante Fe, El Paso & Southwestern** and the **Southern Pacific** railways.

The monthly average of cars of ore that is brought to the smelter from the surrounding mines has never been less than 1,600. Often it has run as high as 2,300 cars per month and in a few instances even larger amounts of ore have been handled in a month.

Three **Godfrey** lead roasters and 12 mechanical roasters average from 1,200 to 1,500 tons daily. There are 6 lead furnaces with an annual capacity of 380,000 tons of ore and 8 copper furnaces, of which 4 are reverberatories, with an aggregate capacity of 1,200,000 tons of ore per annum. Four converters, having a total annual capacity of 88,000 tons, treat the blister copper.

An interesting mechanical feature is the 90' craneway span over which two 60-ton cranes are operated. The new converter stack is 300' in height, is 16' in diameter and was built of concrete. The smoke and escaping gases reach this stack through a steel "Balloon type" flue 4,400' long.

The El Paso smelter is a city within itself, with stores, fire station, church, an electric light plant that could light a city of 50,000; parks, water works and office buildings. A portion of the grounds were used in 1916-17 by United States troops as a military post. The hospital has a number of ever-ready beds and a resident physician. The smelter owns and operates a complete railway system, and more than 7,000 people who live in El Paso look to it for support.

FREEPORT SULPHUR CO.**TEXAS**

Address: 61 Broadway, New York City, and Freeport, Tex.

Inc. 1912 in Texas. Is a subsidiary of the **Freeport Texas Co.**, a holding company owning the entire capital stock, \$200,000.

Property: 8,677 acres of real estate, including 500 acres of sulphur deposits, near the mouth of Brazos river, Brazoria county.

Geology: sulphur occurs in pockets, cavities, and as streaks impregnating gypsum, or a formation in which gypsum predominates. The bed is about 1,000' from the surface.

Development: by wells drilled to the sulphur bearing formation. **Process:** the sulphur is extracted from the rock by the well-known Frasch process. Steam is made in boilers and used in water-heaters each capable of heating 1,000 gals. of water a minute and from 60 to 336° F. under a pressure of 100 lbs. This superheated water is forced down in the wells to the formation, the sulphur melts, and rises to surface, where it cools. Sulphur is pure and is mostly used in the paper pulp industry, the remainder being used for sulphuric acid manufacture.

Equipment: includes 4 plants aggregating 23,800 h. p., complete with oil storage, 4½ mile oil pipe line canal from river, pumping plant, water purification plant, compressors, and large battery of boilers. Company also operates an asphalt plant at Freeport.

Production: 420,484 tons in 1918; 103,275 tons in 1919 (to May 1st).

HAZEL MINING & MILLING CO.

TEXAS

Officers: at last accounts, John V. Hughes, Dallas, Tex., pres; G. G. Wright, v. p.; C. F. Freeman, Dallas Tex., sec.; R. B. Stichter, treas. **Directors:** J. V. Hughes, T. J. Oliver, G. H. Cox, C. A. Culters, C. F. Freeman, Milton Parks and G. G. Wright.

Property: the Hazel Silver mine, in Diablo mountains, 15 miles N. E. of Van Horn, Culberson county, shows a fissure vein that yields chalcocite ore with barite gangue. Shipping ore said to average 10% copper and 50 oz. silver per ton.

Development: includes 700' shaft and extensive workings at various levels. Mine was worked for 10 years by H. G. Clifford, of El Paso, and A. C. Schriver, of San Antonio, producing \$500,000, but was shut down in 1895. A dry concentrator was erected to treat the old dumps, said to contain about 100,000 tons of \$15 copper-silver ore, but was unsatisfactory and has been converted into a wet concentrator.

Reported that the Sutton Steele & Steele Co., of Dallas, had taken over the mine and would install a cyanide mill. O. W. Steele, mgr. Idle 1920-21.

MARIPOSA MINING CO.

TEXAS

Terlingua, Tex.

F. M. Dancy, pres., Philadelphia, Pa.

Property: adjoins the Terlingua mine. **Ore:** occurs in fissure veins outcropping over a wide area. The mine, at one time the largest producer in the country, is being developed at depth. In 1919, production was practically from surface workings.

Equipment: two 10-ton Scott furnaces, with a capacity of 100 flasks quicksilver per month and the 50-ton Terlingua furnace held under lease. Dumps said to have 32,000 tons containing \$241,000 in mercury. Idle 1921.

MARISCAL MINING CO.

TEXAS

Address: W R. Wyatt, supt., McKinney Springs, Tex.

Property: the Ellis mine, 5 patented quicksilver claims, 103 acres, in Brewster county, developed by 250' shaft and 200' tunnel.

Production: 41,400 lb. quicksilver in 1918.

Mine purchased by present company in 1919 and erection of 50-ton furnace is planned when development indicates sufficient ore reserves.

PECOS MINING CO.

TEXAS

Idle. James Dougherty, of Van Horn, Tex., principal shareholder.

Property: the Pecos mine, 3 miles N. E. of the Hazel silver mine in Culberson county, 19 miles from Van Horn, shows a N. E.-S. W. vein in brown igneous tuffs, traceable 2 miles across the mountains to the Red Maverick mine.

Development: by a 105' shaft with a level at 90', showing seams a few inches thick of copper-silver ore, said to assay 70% copper; the seams in

places aggregate 2' in thickness. The mine was first operated in 1888, abandoned after working and relocated 1903, by George Briggs and T. R. Owen, forfeited by technicality of Land Commission and located by J. Y. Canon.

PRESIDIO MINING CO.**TEXAS**

Office: 406 Balboa Bldg., San Francisco, Cal. **Mine office:** Shafter, Tex.

Officers: W. S. Noyes, pres. and gen. mgr.; L. M. Doherty, sec.; F. C. Handy, supt.

Inc. 1883 in California. **Cap.** \$150,000; shares \$1 par; all issued. Last div. 1905.

Property: the Shafter or Presidio mine, 1417-28 acres at Shafter, Presidio county, has a production record of over \$7,500,000 since 1883. **Ore:** carries silver mainly as chloride. The mine was once known as the Bullis, and has an interesting history.

Development: by about 20 miles of workings.

Equipment: includes 1 mile aerial tram, a 15-stamp 100-ton mill and a cyanide plant.

The cyanide mill is equipped with 2 tube mills, filter, Pachuca tanks, Dorr thickener and 250-h. p. oil engine.

Production: 500,000 fine oz. in 1920. Is practically the only silver producer in Texas.

Little information is available concerning operations.

The sixth rehearing in litigation with Wm. S. Noyes, et. al. over alleged wrongful conversion of money, etc., which has been going on for 20 years, was ordered in 1920.

RAINBOW MINING CO.**TEXAS**

Address: Terlingua, Tex.

Property: a prospect adjoining the Chisos mine, under development at last account.

SHAFTER SILVER MINE**TEXAS**

Owned by the **Presidio Mining Co.**, which see.

SHERIDAN MINING CO.**TEXAS**

Idle. Mine near Burnet. **Address:** Dr. O. F. Gober, Temple, Tex.

Inc. in Texas. **Cap.** \$200,000.

Owens a copper-molybdenite property in the Llano district, Burnet county, on which about \$40,000 had been spent prior to 1917.

STUDY BUTTE MINING CO.**TEXAS**

W. D. Burcham, mgr., Terlingua, Texas.

Property: a lease on the Big Bend quicksilver mine, 5 miles E. of Terlingua, Brewster county. Ore occurs in fissures filled with calcite and cinnabar and occasional impregnations, in a flat lying rhyolitic intrusion 500' thick covered by 50' of limestone shale.

Equipment: includes power plant, 50-ton furnace and oil-engine. Was a steady producer throughout 1919. Additional depth necessary to maintain past production.

TAMA SILVER MINING CO.**TEXAS**

Was reported developing a group of claims in the Quitman district, El Paso county. The ore is silver-lead and occurs in replacement deposits in limestone.

Idle and probably dead.

TEXAS ALMADEN MINING CO.**TEXAS**

Out of business. Had lease on the Texas Almaden quicksilver mine at Terlingua, unwatered to 150' level and under development, 1918-19. Equipped with 50-ton furnace. The lease was relinquished at end of 1919.

TEXAS COPPER & REFINING CO.**TEXAS**

Letters returned from former address: 527 Cooper Bldg., Denver, Colo. **Officers:** W. P. Dietz, pres.-treas.; Wm. Shubert, Jr., v. p.; K. M. Shubert, sec.

Property: reported to own 1,200 acres of copper-bearing land in Hardman county, at last account.

TEXAS DEVELOPMENT & MINING CO.**TEXAS**

Idle. Former address: Nocagdoches, Texas.

Reported to own a copper mine near Ruhle, where a mill was to have been built.

TEXAS GULF SULPHUR CO.**TEXAS**

Office: 41 East 42nd St., New York, and Gulf, Texas.

Officers: W. H. Aldridge, pres.; T. Schulze, v.-p.; with C. F. Ayer, E. C. Bacon, H. B. Baruch, J. A. Black, and T. Cochran, directors. H. F. J. Knobloch, sec.-treas.; F. V. Munster, asst. sec.-treas. Charles Biesel, gen. mgr., in Texas.

Inc. Dec. 23, 1909, in Texas. Cap. \$6,350,000, decreased 1920 from \$7,600,000. Was originally \$3,000,000. Shares \$10 par; all issued. No funded debt. Annual meeting, fourth Tuesday in November. Stock listed on New York Curb. Bankers Trust Co., transfer agent.

Financial statement for 6 months ended June 30, 1921 showed gross income, \$2,678,328; expenditures, \$1,523,926; surplus for period, \$1,154,402; total surplus, \$5,449,362. Current assets, \$7,250,000; current liabilities, \$252,900.

Property: 3,000 acres of sulphur-bearing land at Gulf, Matagorda county, Texas. Drilling in 1918 and 1919 revealed over 10,000,000 tons of sulphur-bearing rock.

Equipment: works cost over \$3,500,000, including 10-mile railroad spurs and sidings, and 10,000 h. p. steam boiler plant.

Production: since March, 1919, at the rate of over 2,000 ton of sulphur daily.

UTAH**Production: of the State:**

Year	Gold	Silver, oz.	Copper, lb.	Lead, lb	Zinc, lb.	Total value
1921	\$1,794,000	12,366,000	34,534,000	89,782,000	\$22,595,000

Dividends distributed totaled \$29,339, 451 in 1917; \$19,511,745 in 1918; \$11,225,763 in 1919; \$11,597,966 in 1920. The total to end of 1920 was \$224,449,725.

For a detailed description of the ore deposits of Utah, the reader is advised to secure a copy of Professional Paper 111, published by the U. S. Geological Survey in 1920.

ACME MINING CO.**UTAH**

Officers: Edw. Southwick, pres.; Jacob Evans, v. p.; H. Gardner, sec.-treas.; with John F. Bradshaw, Wm. E. Trinnamen, and Jas. Trinnamen, directors.

Inc. 1919, in Utah. Cap. \$100,000; par 10c.

Property: located in American Fork canyon.

ADAH COPPER CO.**UTAH**

Address: St. George, Washington county, Utah,

A. H. Dahle, pres., at last accounts.

Inc. 1916, in Utah. Cap. 600,000 shares; 2¢ par.

Property: the Burg mine, in Harrisburg district, Washington county, 10 miles E. of St. George.

ADDIE MINING CO.**UTAH****Address:** 333 Judge Bldg., Salt Lake City, Utah.**Officers:** G. C. Lambert, pres.; H. B. Cole, sec.**Inc. in Utah. Cap.** \$30,000; 10c par; assessable.**Property:** 5 silver-lead claims in Tintic district, Juab county, developed by tunnel and two shafts. When reopened in 1920, it was rumored that control had changed hands.**ALBERTA MINING CO.****UTAH****Office:** American Fork, Utah.**Officers:** Ammon Mercer, pres.; S. H. Roundy, v. p.; Jas. L. Mercer, sec., with M. F. Cowley, Nelson McCarty and David Davis, directors.**Inc. May, 1917, in Utah. Cap.** \$30,000; shares 3c par; 500,000 shares held in treasury.**Property:** 15 claims in Silver Lake mining district, said to carry good values in gold, silver, copper, lead and molybdenum. Developed by 135' tunnel. A prospect. Operations suspended 1918, pending better general financial conditions.**ALBION CONS. MNG. CO.****UTAH****Address:** 135 So. Main St., Salt Lake City, Utah. **Mine address:** Alta, Utah.**Officers:** Geo. H. Watson, pres.-mgr.; Herman Bamberger, v. p.; with Jesse Knight, J. Wm. Knight, R. E. Allen, and Hugh Trenholm, directors. Rob. F. Marvin, sec.-treas.Company is a consolidation of the **Albion Mng. Co., Alta Germania Mines Co., and Mineral Flat Mng. Co.** Basis of exchange was $3\frac{1}{4}$ shares of A. M. Co., $6\frac{1}{4}$ shares of A. G. M. Co., or $3\frac{1}{4}$ shares of M. F. M. Co for 1 share of Albion Consolidated.**Inc. 1919, in Utah. Cap.** \$100,000; 10c par; assessable; 810,000 shares issued. Listed on Salt Lake Exchange. Quotations: 4c to 22c in 1919. Original companies are fully described in Vol. XIII.**Property:** about 581 acres, in Alta-Cottonwood district, adjoining the South Hecla on the S., includes the Wellington mine of the Albion group, formerly owned by the Wellington Mng. Co. and credited with a \$1,000,000 production from shallow workings. By the merger the three contiguous properties are brought under one management and apex litigation obviated.**Development:** by a 700' shaft and several thousand feet of workings. Also by an 8,000' tunnel driven from the Quincy tunnel of the South Hecla, cutting formation 1,400' deep; reported early in 1921 that a 5 to 20' fissure had been uncovered. Holdings taken over in October, 1921 by **South Hecla Mines Co.**, which see.**Equipment:** includes 2 power houses, and a 30-ton concentrator, which produces concentrate running 35% lead and 30% zinc.**ALBION MINING CO.****UTAH**Fully described in Vol. XIII. Merged 1919 with adjacent companies to form Albion Cons. Mng. Co., which was succeeded by **South Hecla Mines Co.** in October, 1921.**ALPINE GALENA MINING CO.****UTAH**

Owned and operated by Alpine and Provo men.

Property: in Alpine Canyon, near Bingham, contains ferruginous lead ore in bunches in black limestone.**Development:** by incline shaft and 312' tunnel.**ALTA CONSOLIDATED MINING CO.****UTAH****Office:** 801 Walker Bank Bldg., Salt Lake City, Utah. **Mine office:** Alta, Utah.**Officers** R. S. Lewis, pres.; J. D. Lewis, sec.-treas.-gen. mgr., with John Dorius, directors.**Inc. Aug., 1911. Cap.** \$1,000,000; increased from \$600,000, March, 1921, to which it had been increased from \$300,000 in 1913; \$1 par; \$690,000 issued; assessable; last assessment, 2¢ a share, delinquent March 19, 1921.

Transfers made in company office. Stock listed on Salt Lake Exchange. Annual meeting first Tuesday after first Monday in Feb.

Share prices: 10-36¢ in 1918; 8 to 35¢ in 1919; $\frac{3}{4}$ to 16¢ in 1920; 3¢ highest in 1921, to June 1st.

Financial statement: for 1920 shows: receipts, \$47,914, of which \$38,724 is assessments; expenditures, \$47,691, accounts and notes payable being \$29,452. Company practically out of debt.

Property: 17 claims, 120 acres in the Alta mining region. Little Cottonwood district, Salt Lake county, in the heart of Alta's mineralized zone, includes several old mines, yielding argentiferous lead and copper sulphides. Ores occur as bedded tabular replacement deposits adjacent to crosscutting fissures and are parallel to the bedding and fissure intersections. The Braine fissure, the most important ore-bearing channel of the camp, known for 2 miles, is explored on Alta Consolidated ground for 800'. The existence of crosscut fissures and a porphyry dike are favorable geologic features. Ore occurs at contact between flat dipping quartzite and limestone.

Development: several thousand feet of tunnels and shafts. All 1919-21 work has been driving a drainage tunnel 300' below the Silver King adit. In 1920 the main, or Silver King tunnel, 300' below the Brooklyn tunnel follows the Braine fissure. Drifts east and west from this tunnel have raises to reach the ore.

Work was largely confined to Hoboken fissure, in opening 20' bedding of carbonate ore which was not found to be of commercial grade in quantity; total footage about 1,000'.

Reported that Alta Prince (q. v.) brought suit for trespass, Oct., 1920.

ALTA COTTONWOOD MINING CO.

UTAH

Address: Salt Lake City, Utah. A. O. Jacobson, pres.; Franklin Webb, v. p.; Val. S. Snow, sec.-treas., with J. C. Wood and R. S. Lewis, directors. Inc. 1915. **Cap.** \$250,000; shares 25c par.

Property: 28 claims, 18 patented, known as the Argenta group, located in the Big Cottonwood district, 7 miles southwest of Park City. Claims adjoin the Maxfield mine on the south and the Cardiff on the north.

ALTA DIVIDE GOLD MINING CO.

UTAH

Officers: A. F. Ellgren, pres.; L. H. Hardy, treas.; A. Y. Hardy, sec.; with C. W. Knudsen, and E. M. Tyson, directors.

Inc. April 22, 1916, in Utah. **Cap.** \$100,000; shares 10c par; 600,000 shares in treasury.

Property: 34 unpatented claims, in Big and Little Cottonwood districts, near Alta, shows gold values in a vein up to 30' wide in a shale quartzite contact.

ALTA-GERMANIA MINES CO.

UTAH

Fully described in Vol. XIII. Merged 1919 into Albion Cons. Mng Co., which see.

ALTA-MICHIGAN MINES CO.

UTAH

Office: 135 So. Main St., Salt Lake City, Utah. **Mine office:** Alta Utah.

Officers: same as South Hecla Mines Co.

Inc. in Utah. **Cap.** \$100,000; 10¢ par; assessable; outstanding, 25,713. Fourth assessment of 1¢ per share levied April 15, 1921. Listed on Salt Lake Exchange. Share prices $2\frac{1}{2}$ ¢ to 8¢ in 1918; $\frac{1}{2}$ to $9\frac{1}{2}$ ¢ in 1919; $\frac{3}{4}$ to 13¢ in 1920; $2\frac{1}{2}$ ¢ highest in 1921, to June 1st.

Financial statement: to Dec. 31, 1920, shows: resources of \$114,302, including treasury stock, \$60,070, mines, etc., \$16,270, development, \$30,371, and cash, \$70.

Property: 17 acres, in Little Cottonwood district, said to show silver-lead-copper-gold ore. Development work is carried on through the Quincy tunnel level of the South Hecla mine. Ore shipments were made in 1918.

ALTA MINING & DEVELOPMENT CO.

UTAH

Address: 102 Mercantile Annex, Salt Lake City, Utah.

Officers: Chas. A. Walker, pres.-mgr.; J. R. Walker, v. p.; H. M.

Chamberlain, sec.-treas., with Walter C. Lewis and John M. Moore, directors.

Inc. June 29, 1906, in Utah. **Cap.** \$600,000; shares \$1 par; 326,500 held in treasury. Annual meeting 1st Monday in January. Columbia Trust Co., Salt Lake City, Utah, transfer agent.

Property: about 160 acres in the Alta Cottonwood district, at the head of Little Cottonwood, canyon, includes the townsite at Alta between the Wasatch mines and the South Hecla.

Idle for several years.

ALTA PRINCE MINING CO.

UTAH

Officers: J. S. Johnson, pres.; T. St. Leger Atkins, sec.-treas., 417 Continental Bank Bldg., Salt Lake City.

Cap. 1,000,000 shares, par 25c; 30,000 shares in treasury.

Property: 2 claims, patented, at Alta, Salt Lake county, between the Michigan-Utah and the Prince of Wales Mining Co.'s property. **Development** tunnel 1,065' at 500' depth. No recent information. In fall of 1920, suit for \$360,000 for trespass was brought vs. the Alta Consolidated. Surveys have been made but matter was still pending in July, 1921.

ALTA STAR MNG. CO.

UTAH

Address: Salt Lake City.

An assessable company doing assessment work on claims. Last assessment $\frac{1}{2}$ c, delinquent Nov. 27, 1921.

ALTA SUPERIOR M. & M. CO.

UTAH

Office: Provo, Juab county, Utah.

Officers: A. E. Ahlander, pres.; N. A. Nelson, sec.

Inc. March, 1909, in Utah. **Cap.** \$50,000; shares 5c par; assessable. Previously known as Mineral Flat Extension M. & M. Co.

Property: 2 miles S. of Alta, Little Cottonwood district, Utah, showed 3' vein of copper ore, also silver-lead ore.

Development: by tunnel and shaft with drifts on vein.

Reported, June, 1919, to show good ore in the 530' tunnel.

ALTA TIGER MNG. CO.

UTAH

Address: 420 Boston Bldg., Salt Lake City. **Mine address:** David Phillips, mgr., Alta, Utah. J. E. Phillips, pres.; Daniel Phillips, v. p.; A. T. Sanford, sec.-treas.

Inc. 1915. **Cap.** \$7,000; divided into 700,000 shares; assessable; with 20,000 remaining in the treasury. Last assessment, of $\frac{1}{4}$ c. delinquent, July 9, 1921. Listed on Salt Lake City Exchange. Shares sold $\frac{1}{4}$ to 1c in 1920.

Property: the Tiger patented claim, 6 acres and an interest in the Highland Chief claim, in the Alta-Cottonwood district, north of the town of Alta. In September, 1921, company cut 10" of high grade silver-lead ore, in a raise 65' up on No. 1 fissure between black and gray limestone. Ore runs \$3 gold; 20.8 oz. silver, 20% lead. The mines lie between the Emma and Flagstaff.

ALTA TUNNEL & TRANSPORTATION CO.

UTAH

Office: 602 Newhouse Bldg., Salt Lake City, Utah.

Officers: F. V. Bodfish, E. M., pres.-mgr.; V. E. Lollin, v. p.; John Cain, sec.-treas., Frank B. Cook, v. p.; Herman Johnson, supt.

Inc. Sept., 1911, in Utah. **Cap.** \$1,500,000; \$1 par; 1,040,000 issued; assessable; last assessment of 1c., delinquent August 1, 1921. Shares varied from 5 to 12 $\frac{1}{2}$ c. in 1918; 5 to 20c. in 1919; 4 $\frac{1}{4}$ to 13c. in 1920; 10 $\frac{1}{2}$ c. highest in 1921, to June 1st.

Property: owns or controls under leases, 330 acres, the Lucky Dutchman group of 16 claims and the old Alta tunnel ground. Ore occurs in replacement deposits in limestone with stringers of ore said to assay 9.7% copper, 21% lead, and 13 $\frac{1}{2}$ oz. silver per ton.

Development: by 3,600' tunnel from Big Cottonwood creek. This prospects the Prince of Wales fissure zone at depths of 1,000' to 1,800'; at the 2,650' point, a shale-limestone contact has been followed for 1,000', then raising 100' into an overthrust fault, encountered an orebody 4-8' thick, on

bedding plane. This new ore body found October, 1921, yielded to Dec. 31, 1921, 500 tons of ore that averaged 37.7 oz. silver per ton, and 23.22% lead, with gross value of \$24,860 and net value including mining costs, \$13,565. During January, February, 1922, 17 carloads were shipped to smelters.

Equipment: 50 h. p. motor and compressor, drills, a 10' fan for ventilating purposes, a 2-mile power line, boarding house and other buildings.

ALTA-UTAH MINES CO. UTAH

Address: 135 So. Main St., Salt Lake City Utah.

Officers: G. H. Watson, pres. and gen. mgr., Alta, Utah; H. Bamberger, v. p. Robt. F. Marvin, sec.-treas.

Company was reorganized late in 1917.

Financial statement: received March, 1921, shows total resources of \$103,065, of which mines and plant is \$40,000 and treasury stock \$60,000; bills payable were \$2,650.

Property: an old mine in the Cottonwood district, near the South Hecla. Developed by tunnels, one in 400', and another 200'. The latter shows high-grade ore. No. 3 tunnel yielded a carload of 3% copper and 15 oz. silver ore.

Holdings taken over in October, 1921 by South Hecla Mines Co.

ALUMINUM POTASH CO. OF AMERICA UTAH

Address: 514 Templeton Bldg., Salt Lake City, Utah.

Officers: G. M. Winkelman, pres.; J. Stokes, Jr., v. p.; H. O. Pack, sec.; Homer McCarty, treas., with G. C. Shipp, Geo. H. Blood, and W. P. Hauerbach, directors.

Inc. March 24, 1919. **Cap.** \$3,000,000; \$100 par. Operating expenses reported as \$30,000 for 3 months in 1919.

Property: 15 acres in Marysvale district, Piute county, said to have one of the best alunite deposits in the state. Company claims reserves of 60,000,000 tons of ore assaying 10% potash, and 37% alumina.

AMERICAN CONSOLIDATED COPPER CO. UTAH

Office: Judge Bldg., Salt Lake City, Utah.

Officers: F. W. Spencer, pres.; Tom Morrow, v. p.; A. E. Owen, sec.-treas., with Carl Sanders and Roy Spencer, directors.

Inc. 1907. in Utah. **Cap.** \$600,000; \$1 par; changed to 1,000,000 shares; 10c par, October, 1917. Stock listed on Salt Lake Stock Exchange. Prices, 3-14c in 1918; 3½-8c in 1919; 1¼ to 4¼c in 1920; high in 1921 to June 1st, 2½c.

Property: 19 claims, 1 patented, in Big Cottonwood district, adjoins the Cardiff and Howell on the west.

Development: several tunnels, longest 2,200', driven to cut Silver King & Garfield fissures, showing heavy mineralization. Samples said to assay 48% zinc, with lead, gold and silver values.

Equipment: includes compressor, drills and mine buildings. Operations resumed December, 1914, after an idleness of several years. Late in 1918, reported, following 2½' of vein matter and some shipments made. During 1919 and 1920, operations have been intermittent. Property reported sold in 1921 to American Metal Mining Co., which see.

AMERICAN CONS. MINES CO. UTAH

Is a merger of the Earl & Eagle and Bog mining companies.

Address: 323 Judge Bldg., Salt Lake City, Utah.

Officers: Geo. H. Wood, pres.; C. D. Ray, v. p.; P. Bowman, sec.; G. J. Field, treas., with Franklin Hardinge, Jos. C. Lynch and Geo. E. Hemphill, directors.

Inc. 1918. **Cap.** \$1,500,000; \$1 par; outstanding 1,000,000 shares; assessable. Assessment No. 5 called in November, 1920. Listed on Boston Curb.

Property: 22 claims, 400 acres, of merged companies and the Silver Dipper group of 4 claims, acquired in 1920, in American Fork district, Utah county. The veins carry silver-lead and silver-copper ore. Company also

owns 6,000 acres of oil land under lease and some in fee in San Rafael swell, Nequoa, Circle Cliffs and Huntington fields, Utah.

At the I. X. L. mine in the Mt. Baldy district, operations in the Danielson tunnel along lime-quartzite contact, show ore running 57 oz. silver per ton with 21% lead.

Development: mainly by tunnel with total workings of 4,000'. The Earl & Eagle tunnel is over 2,000' long. The Bog tunnel, 600' long, yielded some shipping ore in former years. Some shipments made in 1920 of ore averaging 45% lead and 15 oz. silver from a 2' pay streak.

AMERICAN COPPER MINING & MILLING CO. UTAH

Office: Lehi City, Utah. J. N. Butt, pres.; Charles Anderson, v. p.; A. O. Slade, treas.; preceding officers, Howard Murdock and Chas. Herron, directors; William Asher, sec.

Inc. Aug. 1912. **Cap.** \$100,000; shares 10c par. An assessment of 1 mill called March, 1914. Property is in Tooele county, but as officers do not reply to letters, no details of the company's holdings are available.

AMERICAN EAGLE COPPER CO. UTAH

Officers: F. R. Meadows, American Falls, Idaho, pres.; S. H. Cotterel, v. p.; H. P. Huey, sec., with Henry Miller and Mr. Sparks, directors.

Property: 10 claims, about 200 acres, 2 miles E. of Farmington and 15 miles N. of Salt Lake. The ore carries copper, silver and gold.

Development: by 130' tunnel.

Although additional information is not forthcoming, it is known that assessment No. 1, of ½¢, was levied on April 7, 1921.

AMERICAN FLAG MINING CO. UTAH

Office: 602 Newhouse Bldg., Salt Lake City, Utah. **Mine office:** Park City, Summit county, Utah.

Officers: Geo. H. Rathman, pres.

Inc. 1902, in West Virginia. **Cap.** \$500,000, increased to \$1,000,000 on re-incorporation in Nevada, 1910; shares \$1 par; assessable: 650,000 shares issued.

Property: 22 claims, 300 acres, N. of the Ontario and E. of the Silver King Coalition mine, Park City, Summit county. Past production given as \$500,000 of gold and silver. Two fissures in quartzite cross the claims.

Development: by 1,100' shaft and over 5,000' of workings.

Leases on property held by Park City Mines Co., in 1917, and U. S. S. R. & M. E. Co. in 1920, have lapsed.

AMERICAN FORK EXPLORATION CO. UTAH

A merger of the Wild Dutchman M. & M. Co., and the Fissure Expl. Co.

Dead; described in Vol. XIV. Held a lease on mine of the Pacific Gold M. & M. Co. by inheritance from the Fissures Expl. Co., but itself became defunct in 1919.

AMERICAN LEASING CO. UTAH

Address: C. B. Ferlin, American Fork, Utah.

Property: by lease, the Live Yankee and Silver Wave groups, and holdings of the Belorophon Mng. Co. (q. v.), in American Fork district, Utah county.

Development: in addition to the Belorophon 800' tunnel, lessee is driving the Holden tunnel to open properties at depth. Reported mid-1920 that milling ore, 8 to 15' wide, was uncovered and a year later high grade ore was said to have been found on the Silver Wave. In a drift through the Globe property the Leasing company found 7-8' of ore.

Equipment: lessee owns a 50-ton concentrating mill from which shipments have been made, since 1918. Concentrate is said to run \$70 to \$130 per ton in silver and lead. Company is the heaviest shipper of the American Fork district.

AMERICAN METAL MINING CO.**UTAH**

Address: E. W. Coombs, 276 S. 10 E. St., Salt Lake City, Utah. **Office:** Roy Spencer, sec., 359 S. State St., Salt Lake City.

Officers: E. W. Coombs, pres.; W. J. Coombs, v. p.; M. C. Iverson, treas., with Wm. S. Theobald and Lee Lovinger, directors.

Inc. in Utah. **Cap.** \$100,000; assessable; $\frac{1}{4}\%$ levied, May and Nov., 1921. Last delinquent Feb. 3, 1922.

Property: the holdings of the American Cons. Copper Co. and lease and bond on strip 160' wide of Victor Mines ground. Ground shows strong fissure veins, hitherto explored only in quartzite, whereas this new company will develop these silver-copper veins in limestone, by drift and work from Victor Mines tunnel 550' from company's line.

AMERICAN MINES SYNDICATE**UTAH**

Office: Houghton, Mich. **Mine office:** Eureka, Juab county, Utah.

Officers: Walter Fitch, pres.; J. H. Rice, v. p.; Wm. P. Seager, treas.; preceding officers, Cecil Fitch and Exilda Fitch, directors.

Inc. 1907, in Arizona. **Cap.** \$100,000; shares \$100 par; paid in, \$80 per share; issued, \$86,350. Is a holding company, controlling the Chief Consolidated Mining Co. through ownership of 361,000 shares.

AMERICAN MINING CO.**UTAH**

Mail returned from Salt Lake City.

Officers: A. A. Crome, 1st v. p. and gen. mgr.; Wm. Crome, sec.-treas.

Inc. 1896, in Utah. **Cap.** \$50,000; shares 10c par; assessable; all issued; 28 assessments levied to end of 1918. Annual meeting 3rd Monday in May.

Property: 10 patented claims, on Scott Hill, in Big Cottonwood district, 5 miles from a railroad. Ore occurs as sulphides in lime. Orebody is from 2" to 2' wide and average assays run from 5-18% copper, 10 oz. silver and \$3.50 gold.

Development: about 2,000' of shafts and tunnels.

Property reported under lease and bond, in 1918, for \$100,000.

AMERICAN STAR MINING CO.**UTAH**

Office: 403 Dooly Bldg., Salt Lake City, Utah. **Mine office:** Eureka, Juab county, Utah

Officers: Imer Pett, pres. and gen. mgr.; Myron K. Billings, v. p.; J. R. Brain, sec.-treas., with Jas. P. Graves and Thos. P. Billings, directors.

Inc. 1909, in Utah. **Cap.** \$1,000,000; shares \$1 par; issued 704,500 shares.

Property: 2 claims, 15 acres, between the Victoria and Chief Consolidated mines, and touching the Plutus on the east and Eagle & Blue on the west. Mine has about 1,000' of workings, made from the 900' level, 1,000' from the 1,350' level and about 2,100' from the 1,875' level of the Eagle & Blue Bell mine, through which development is being continued. Workings show an ore channel of about 60' width. Property considered promising.

ANCHOR MINING CO.**UTAH**

Idle several years. **Office:** Calumet, Mich.

Officers: John D. Cuddihy, pres.; F. W. Taylor, sec.-treas., and Henry L. Baer, directors.

Inc. June, 1908, in Michigan. **Cap.** \$150,000; shares \$25 par; issued, 1,800. Annual meeting, second Tuesday in June.

Lands: 9 claims, patented, 131 acres; in the Snake Creek district, one-half mile south of Daly-Judge mine, Park City. Company is the successor of the Wolverine Mining Co.

ANTELOPE & PRINCE OF WALES MINING CO.**UTAH**

Not incorporated. Controlled by Walker Bros., of Salt Lake City. **Cap.** 1,250,000; shares \$1 par; 400,000 shares held in treasury.

Property: 9 claims, patented, in the Alta-Cottonwood district, cover a mile of the Prince of Wales fissure, worked years ago to a depth of 900', and said to have produced \$1,000,000 from one shoot alone being the "bone of contention" in a celebrated lawsuit in the seventies.

Development: 930' incline shaft and 600' "Annie" tunnel. In 1915 lessees continued the tunnel several hundred feet, cutting the vein 140' below bottom of shaft. Vein where cut is said have shown good ore containing silver chloride and galena. Company planned to continue the work of the lessees.

Claims were being tapped (1921) 900' below the Annie by another tunnel driven by the **Alta T. & T. Co.**, which see.

ANTELOPE STAR CONSOLIDATED MINES **UTAH**

Inc. March, 1917, in Utah. **Cap.** \$300,000; shares 10c par. Is a consolidation of several properties in Mineral Mountain range, 9 miles S. E. of Black Rock, Millard county. Is said to be a reorganization of the Antelope Star Mining Co. (q. v.). A $\frac{1}{2}$ c assessment was levied, fall of 1920; others, 1c delinquent March 26, $\frac{1}{2}$ c. delinquent, Nov. 23, 1921.

The incorporators are: Leo Neilson, Logan; Darby Crandall, New York; W. R. Hensleigh, V. L. Arnold and Chas. M. Morris.

ANTELOPE STAR MINING CO. **UTAH**

Office: 618 Newhouse Bldg., Salt Lake City, Utah.

Officers: Chas. M. Norris, pres.; H. L. Parker, v. p. and mgr.; V. L. Arnold, sec.; L. J. Brattager, asst. sec., with W. N. Williams, B. L. Rich, and Leo Nielson, directors.

Inc. in Utah. **Cap.** \$250,000; 25c par; 50,000 shares in treasury. Stock listed on Salt Lake Exchange.

Property: 9 claims and a millsite, about 200 acres, 20 miles N. E. of Milford in Millard county, said to have a 5' fissure vein of milling ore assaying 8-10% lead. The orebody is leached at surface and contains barium, lead, silver, copper and iron.

Development: by 373' tunnel, 65' shaft and about 800' of drifting and raises. Promoted by Woolley Bros., Salt Lake City.

APEX STANDARD MINING CO. **UTAH**

Officers: Lewis Merriman, pres.-mgr., Eureka, Utah; Frank Kimball, v. p.; S. S. Pond, sec.-treas., with F. W. Brock and Hugh Hefferman, directors.

Inc. 1917, in Utah. **Cap.** \$1,000,000; issued, 500,000 shares. Cash on hand March, 1919, \$15,000.

Property: 20 claims, 400 acres. S. of the Tintic Standard, East Tintic district, Juab county.

Development: by 900' shaft at which depth a 250' crosscut reached mineralized ground. Reported, February, 1921, that work was being continued on this level. In June, 1921, it was stated that the company had acquired control of the Tintic Zenith and Tintic Union mining companies, and at the same time had taken over other property.

ARGONAUT MINING & SMELTING CO. **UTAH**

Address: 310 Kearns Bldg., Salt Lake City, Utah.

Officers: Wm. Chipman, pres.; Hugo B. Anderson, v. p.; J. Tracey Wootton, sec.-treas.; J. H. Wootton, mgr., with John Hower, directors.

Inc. February, 1917, in Utah. **Cap.** \$50,000; shares 5 cts. par; assessable; \$15,000 shares outstanding. Annual meeting, 2nd Tuesday in January.

Property: 7 claims, 140 acres, in American Fork canyon, claimed to carry a fissure vein of lead sulphide and iron carbonate, with a 4" shoot of lead ore, assaying about \$25.

ARROWHEAD MINES CO. **UTAH**

Officers: H. D. Chase, pres., 76 G St., Salt Lake City, Utah; Chas. A. Root, v. p.; G. Alma Gardner, sec.-treas.; A. J. Hoban, managing director, with J. A. Reeder, H. Mann, R. M. Usher, Chas. Anderson and W. J. Allen, directors. J. H. Nelson, supt.

Cap. \$10,000; shares 10c par; assessable. Stock listed on Salt Lake Exchange.

Property: the General Connor mine, 9 claims. 1 patented, near Marys-

vale, Piute county, said to show a 15' fissure vein of free milling ore, with a 16" streak averaging \$18-\$20 in gold and silver.

Development: by 95' shaft, 225' tunnel, winzes and crosscuts. Ore reserves estimated at \$275,000. Five men employed.

No recent information.

AUSTIN MINING CO.

UTAH

Address: C. W. Earl, supt., Lehi, Utah. Other officials and stockholders are John F. Bradshaw, Jacob Evans, J. C. Jensen and Edward Southwick. Shares assessable; 1c. a share levied, Dec. 23, 1921.

Property: in Silver Lake district, Utah county, 15 miles E. of American Fork, reported to show both lead and copper ore. Older workings total 700'; present management drove a 300' drift from the Earl-Eagle tunnel, in 1920.

BANKERS MINES CO.

UTAH

Officers: J. A. Maxfield, Maxfield Apts., Salt Lake City, Utah.

Officers: Noble Warrum, pres.; J. A. Maxfield, v. p.-sec.; A. D. Williams, treas., with M. B. Connell, B. Y. Golding and Aquilla Nebeker, directors.

Inc. November, 1916. **Cap.** 1,000,000 shares; 10c par; 500,000 shares in treasury.

Property: 39 claims, about 780 acers, adjoins the Logger mine in Big Cottonwood Canyon, and is near the old Maxfield mine. Developed by a tunnel which is expected to cut the Logger vein at 900' in.

BAV STATE MNG. & DEV. CO.

UTAH

Address: American Fork, Utah county, Utah.

Officers: Geo. B. Tyler, pres. and mgr.; J. H. Wootton, v. p.; J. W. Storrs, sec.-treas., with A. Chipman and E. J. Bennett, directors.

Cap. \$1,000,000; shares 5c par; assessable; last assessment. No. 5, of $\frac{1}{2}$ c called June 14, 1917. Stock listed on Salt Lake Exchange. Price range $\frac{1}{2}$ - $1\frac{1}{2}$ c in 1918, $\frac{1}{4}$ - $\frac{1}{2}$ c in 1919, $1\frac{1}{4}$ - $1\frac{1}{2}$ c in 1920, $3\frac{3}{4}$ - $38\frac{1}{2}$ c in 1921. Financial statement from April 26, 1917, to October 12, 1918, shows total receipts of \$12,361; of which \$392 was from ore sales, and \$11,490 from assessments. Cash on hand, Oct. 12, 1918, was \$210.

Property: at American Fork canyon, 22 claims, unpatented, 18 miles from the railroad. Company claims to have 1,000 tons of ore on the dump averaging 5 to 8% lead and 8 to 10 oz. silver, and 210 tons of ore averaging \$75 per ton.

Development: is by tunnel with about 1,200' of workings.

No recent report.

BEAVER-BUTTE COPPER CO.

UTAH

Office and mine: Beaver, Beaver county, Utah. Sherman McGarry, supt.

Inc. 1909, in Utah. **Cap.** \$50,000; shares 10c par; assessable. Property idle from 1912-1914, owing to lack of capital, but development work was resumed in summer of 1914, and property reported under lease to Senator A. B. Lewis, representing Eastern capitalists, 1916.

Property: 15 claims, unpatented, in the Newton district, 8 miles from a railroad, show gold-silver ore and are believed to carry the continuation of the Sheep Rock ledge.

Development: by a 150' two-compartment shaft, crosscuts and drifts. Company claims to have 2' of \$10 ore on surface and 19' of \$8 ore on the 150' level with 1' of \$18 ore along the footwall side. Planned installing an electric hoist and drifting on the 150' level. See Beaver Gold Mines Corp. and remember what happened to shareholder of Majestic Mines. No returns, 1917-1921.

BEAVER COMBINATION MINING CO.

UTAH

Former address: 312 McCormick Bldg., Salt Lake City; M. B. Johnson, sec. Company merged into **Moscow Silver Mines Co.**, which see.

BEAVER COPPER CO.**UTAH**

Office: 609 Newhouse Bldg., Salt Lake City, Utah. Mine at Milford, Beaver county, Utah.

Officers: W. J. Dooley, pres.; Blaine Grey, v. p.; S. S. Pond, sec.; A. J. McMullen, mgr., with Chas. A. Weaver, F. J. Baker, and Fred Kuster, directors.

Inc. 1907, in Utah. **Cap.** \$100,000; 10c par; assessable; assessment of $\frac{1}{4}$ c., levied Feb. 3, and $\frac{1}{2}$ c. Sept. 1921 and Feb. 9, 1922. 173,900 treasury shares. Annual meeting, third Monday in March. Listed on Salt Lake Exchange.

In 1919, the company absorbed the Beaver Lake Metals Co. and the Utah-United Copper Co. All machinery and other equipment has been moved to the Utah United property because the officers believe that group offers the best chance to develop a producing mine with the limited funds on hand.

Property: 31 claims, 600 acres, in the Beaver Lake district, showing fissure veins in monzonite, contact deposits between monzonite and limestone and replacement orebodies in lime. The ore is complex, containing copper, and lead sulphides with gold-silver values.

Company owns oil rights on 2,560 acres and has made a filing on an additional 2,560 acres of oil lands in Emery county.

Development: by a 470' incline shaft with about 1,600' of workings, late in 1919 the east drift on 470' level cut 6" of ore containing 6% of zinc, 11% of lead, and 19 oz. silver per ton.

Also did 600' of drifting on the 470' level and in 1922 started crosscut north to reach Wasatch fissure. Lessees are operating a portion of the ground.

Equipment: includes hoists, compressor, and pump.

Prospecting outcrop of fissure, on shale-monzonite contact disclosed silver-lead ore at several points, on which work is being done, 1922.

BEAVER GOLD MINES CORP.**UTAH**

Dead. See Vol. XIV. for full description.

BEAVER HORSESHOE GOLD MNG. CO.**UTAH**

Probably dead. Fully described in Vol. XIV. Formerly operated near Beaver City.

BEAVER LAKE METALS CO.**UTAH**

Described in Volume XIII. Merged with **Beaver Copper Co.**, which see.

BEAVER MINES CO.**UTAH**

Office: 222-23 Continental Bank Bldg., Salt Lake City, Utah. Mine address: Marysvale, Piute county, Utah.

Officers: A. H. Cutright, pres. and mgr.; Geo. R. Raymond, v. p.; W. E. Kilburn, treas.; A. Maxwell, sec., and Alex. Beckstead, directors.

Inc. Dec. 17, 1910, in Utah. **Cap.** 1,000,000 shares, 1c each; issued 859,000 shares. Annual meeting, second Saturday in January.

Property: 11 claims, 220 acres, in the Ohio district, 5 miles from D. & R. R. R. Claims carry copper-bearing gold-silver ores in fissure veins in andesitic porphyry. There are 7 veins, 2 developed by crosscut tunnels, 725' and 72' long. Mine had only a prospecting outfit. No recent report; presumably idle.

BEAVER RANGE MINE CO.**UTAH**

Address: Black Rock, Millard county, Utah.

Officers: John B. Taylor, pres. and gen. mgr.; W. W. Moody, v. p. and supt.; R. B. Graff, sec.-treas.

Inc. July, 1916, in Utah. **Cap.** \$100,000; shares 10c par.

Property: 10 claims, in the Mineral Mountain range, 10 miles S. E. of Black Rock on the Salt Lake R. R. Claims are in limestone near quartzite and said to carry copper and lead ore, in three prominent N. S. fissures.

Development: over 1,500' of tunnel and shaft work. Main Chicago tunnel in over 300' and expected to cut the shoots which show lead ore on the surface. No recent report. One of the many companies which appear to be afraid to answer letters of inquiry.

BECK TUNNEL CONSOLIDATED MINING CO. UTAH

Merged April, 1916, with the Colorado Mng. Co. and now called the Colorado Cons. Mines Co., which see.

BEE BEE MINING CO. UTAH

Office: 409 Kearns Bldg., Salt Lake City, Utah. **Mine office:** Goldstrike, Washington county, Utah.

Officers: H. G. Snyder, pres.; John A. Bryson, v. p.; Robt. L. Judd, sec.-treas., with E. J. Lund and Thos. Marloneaux, directors; S. F. Snyder, supt.

Inc. April 13, 1915. **Cap.** \$100,000; shares 10c par, issued \$70,000. Assessment of 4/10c per share levied, August, 1916.

Property: 3 claims, unpatented, in the Goldstrike mining district, Washington county, claimed to show 20,000 tons of \$10 to \$35 free milling ore in fissure vein. No recent report. Probably idle.

BELOROPHON MINING CO. UTAH

Address: A. T. Sanford, Boston Bldg., Salt Lake City, Utah. C. B. Ferlin, mgr.

Cap. \$100,000; shares 10c par; 960,000 shares issued.

Property: 250 acres adjoining the Live Yankee group on the north in American Fork canyon, Utah. The Live Yankee and other veins are said to cross the claims. **Ore:** occurs in fissures in quartzite and in contact between lime and quartzite, carrying gold, copper, silver and lead.

Development: by 800' tunnel.

Beginning with 1918, property has been under lease to its manager, operating under name of American Leasing Co., which see.

BEN BOLT MNG. CO. UTAH

Delbert B. Hughes, sec.-treas., 339 W. 2nd South St., Salt Lake City Mining property in the Tintic district.

In March, 1918, company called an assessment of 1/4c per share. Assessment No. 3 of same amount levied Aug. 8, 1921.

BIG COTTONWOOD BONANZA MINING CO. UTAH

No information about the company obtainable save that assessment of 1/5c. a share became delinquent, Oct. 12, with sale day, Oct. 25, 1921.

BIG COTTONWOOD CONSOLIDATED MINING CO. UTAH

Officers: W. G. Romney, pres., 271 4th Ave., Salt Lake City; E. J. Jeremy, v. p.; C. E. Robertson, sec.-treas., 777 7th Ave., Salt Lake City; with Jas. A. Stanley, W. H. Hurd, and H. J. McKean, directors.

Inc. in Utah. **Cap.** \$250,000; 25c par; approximately 700,000 shares issued; assessable; last assessment, of 1c., was delinquent April 4, 1921. Listed on Salt Lake City Exchange. Share prices 4-5c in 1919; 1 1/2-1c in 1920; 3 1/4c to June 1, 1921.

Treasurer's report for 1920 shows total expenditures of \$20,487, with a cash balance of \$2,499.

Property: 84 claims, including 23 of the Copper King Mining Co., total 1,400 acres, of which control was acquired in 1920, in Big Cottonwood district, Salt Lake County.

Development: 135' incline shaft with 210' of workings from which 50 tons of sorted silicious copper ore was shipped before work was stopped. Development is now concentrated on a lower tunnel, driven 926' in 12 months ending July, 1920, and 3,388' long, November 1921, with 120' to go to cut the Copper King fissure. Development has been carried on in a quiet way for about 7 years. Operated in winter 1921-22.

Equipment includes electric driven 6-drill compressor, drills, etc.

BIG COTTONWOOD CONSOLIDATED MINING CO. UTAH

Fully described in Vol. XIV. In August, 1920, was consolidated with

the Reed's Peak Mng. Co., with title of **Reed's Peak Cons. Mng. Co.**, which see

BIG COTTONWOOD COPPER & GOLD MINING OO. UTAH
Mail returned, 1919, from former mine office at Brighton, Salt Lake county, Utah.

Officers: Col. Nicholas Treweek, pres. and gen. mgr.; W. Mont Ferry, v. p., 164 E St., Salt Lake City; J. Leonard Burch, sec.-treas., with J. E. Galligher and John S. Bransford, directors, at last accounts.

Inc. in Utah. Cap. \$1,500,000, increased 1906 to \$3,750,000; \$5 par. Is operated as a close corporation.

Property: 140 acres, adjoining the Great Western Mining Co., on the southeast, and carrying same ore zone, near the head of Big Cottonwood canyon, and also in the Snake Creek district.

Development: by a shaft, showing ore assaying up to 8% copper, with small gold and silver values, and a long tunnel with about 2,000' of workings. Mine apparently has considerable bodies of sulphide ore, averaging about 5% copper and \$2 per ton in combined gold and silver values.

BIG FOUR EXPLORATION CO. UTAH

Property reported sold early in 1918 for \$35,000. No details. Company was described in Vol. XIII.

BIG HILL MINING CO. UTAH

Address: Room 12, Knight Bldg., Provo, Utah.

Officers: O. Raymond Knight, pres.; Harvey Cluff, v. p.; R. E. Allen, sec.-treas., with J. W. Knight, and W. L. Burnhall, directors. R. L. Anderberg, asst. sec.

Inc. June 15, 1899, in Utah. **Cap.** \$100,000; 10c par; issued, 565,000 shares; assessable. Annual meeting, 1st Monday in June. Listed on Salt Lake Exchange.

Property: 3 patented claims, 60 acres, in Tintic mining district. is a prospect. Reported, July, 1920, that an assessment of 1c would be levied, company's obligations settled and work indefinitely suspended: shaft then 600' deep.

BIG INDIAN COPPER CO. UTAH

Office: Provo, Utah. Col. C. E. Loose, pres.-gen. mgr.; J. T. Farrer, v. p.; P. G. Peterson, sec.-treas and supt.; Niels C. Christensen, metallurgist. Col. Loose and Senator Smoot are the principal owners.

Inc. in Utah. Cap. \$10,000; shares 1c par; 185,000 taken by insiders. 700,000 issued for property; 100,000 shares offered the public in 1917 at \$1. Increased 1918, to \$750,000; shares, 50c par.

Property: 21 claims, 11 patented, about 350 acres, 38 miles S. E. of Moab and 60 miles from the D. & R. G. railway at Crescent, San Juan county, Utah. Claims are said to show copper ore occurring disseminated through sandstone with sulphides appearing at 100' depth.

Company started operating a 300-ton leaching plant to use the sulphur dioxide process to treat a large tonnage of 3% ore, in November, 1917. Water is piped from La Sal ranch, 7 miles distant.

Reported, in 1919, that property had been leased for 3 years to the **Buena Vista Co.** (q. v.), but, by June, 1921, lease had been relinquished. Mill has been operated experimentally, but no production is recorded.

BIG KING MINING CO. UTAH

Described in Vol. XIV. Bought by **Cottonwood King Mng. Co.**, which see, by exchange of stock.

BINGHAM AMALGAMATED COPPER CO. UTAH

Fully described in Volume XIII. Succeeded by **United Bingham Copper Co.**, which see

BINGHAM ANACONDA COPPER CO. UTAH

Mail returned. 1918, from former address, 11 Main St., Salt Lake City, Utah. Mine in Markham Gulch, Bingham, Utah.

Officers: E. McCarrick, pres.; B. B. Gray, v. p.; P. L. Meyers, sec.-treas.; above, with A. Gustaveson and R. E. L. Collier, directors.

Cap. \$1,000,000; shares 10c par. Owns a group of claims in Bingham district. Probably idle.

BINGHAM ANNEX MINING CO.

UTAH

Address: Milando Pratt, sec., 1005 E. 9 S St., Salt Lake City. No information available as to the company, or its property, except that assessment No. 1 of $\frac{1}{4}$ c., was levied Aug. 2, 1920, and the last for same amount, Jan. 29, 1921.

BINGHAM CENTRAL MINING CO.

UTAH

Idle. At Bingham Canyon, Salt Lake county, Utah. This company and the Bingham Standard Copper Co. were controlled by the Bingham Central Standard Copper Co., which sold its stock holdings, 1909, to Utah Metal Mining Co., receiving stock in latter company which is now controlled by Utah Metal & Tunnel Co., which see. Described Vol. X.

BINGHAM CENTRAL STANDARD COPPER CO.

UTAH

Organized as a holding company controlling, through ownership of practically entire stock issues, the Bingham Central Mining Co. and Bingham Standard Copper Co. Sold these subsidiary stocks, 1909, to the Utah Metal Mining Co. for 300,000 shares of latter, which was escrowed until 1911 and extended upon payment of 10,000 additional shares until November 8, 1912, and subsequently to January 1, 1914, to permit building by Utah Metal Mining Co. of a \$150,000 aerial tramway from the western end of the big tunnel to the International smelter at Tooele. On release of escrow, 1914, company was to be wound up, but prevented by minority stockholders, who attempted to recover property, claiming irregular disposition of the company's assets. Stock valueless.

BINGHAM COALITION MINES CO.

UTAH

Address: 102 Exchange St., Portland, Me. **Mine office:** Bingham Canyon, Utah.

Officers: Geo. F. Fowler, pres., Springfield, Mass.; H. P. Sweetser, treas.; A. T. Hastings, mgr.

Inc. 1916, in Maine. **Cap.** \$1,000,000 increased 1916 to \$1,500,000; \$1 par. Bonds, \$150,000. Stock listed on New York and Boston Curbs. State Street Trust Co., Boston, and Registrar & Transfer Co., New York, registrar and transfer agents.

Property: is a merger of the Butler Liberal, Red Wing, and Massasoit properties, about 50 claims in Markham and Freeman gulches. The claims carry the Florence Erie, Julian, Red Wing and other fissures, all of them good producers in the upper levels.

Development: by crosscut tunnels with about 5 miles of workings cutting the above named fissures (veins) containing lead ores with silver, copper, and gold values. **Equipment** includes 200-ton Red Wing mill.

Production: in 1917 was 127 oz. gold, 29,249 oz. silver, 57,684 lb. copper, and 1,625,830 lb. lead.

Some shipments are recorded for 1918, but no recent information available.

BINGHAM COPPER BOY MINING CO.

UTAH

Out of funds and idle several years, with no sale or market for the stock, so far as known. See Vol. XI, Copper Handbook.

BINGHAM EMPIRE MINES CO.

UTAH

Officers: O. Raymond Knight, pres.; J. A. Kauffman, v. p.; with Otto E. Parsons, W. Lester Mangum, Knight S. Jordan, Geo. A. Storrs and Amanda M. Knight, directors. R. E. Allen, sec.-treas.

Inc. July 31, 1915, in Utah, for development of property in the Bingham district. **Cap.** \$10,000; shares 1c par; 217,000 shares in treasury.

Property: 1,450 acres, includes claim groups formerly owned by Bingham Black Diamond and Bingham Midway mining companies in Midway and Settlement canyons, Tooele county. Acquired in 1919-20, the former

company receiving 120,000 shares of Bingham Empire stock and the latter, 90,000 shares. Bingham Midway ground shows limestone and quartzite cut by porphyry dikes and 3 fissure veins; ore is lead-silver-gold; see Vol. X for description of old company.

Development: by 2 tunnels on Bingham Midway. Tunnel No. 2 gives a back of 1,200' in one and 1,800' in another of the veins. Developing early in 1920.

BINGHAM GALENA MINING CO.

UTAH

Formerly **Silver Shield Mng. & Mfg. Co.**, other acreage added when name was changed.

Mine address: Eugene Grutt, supt., Bingham Canyon, Utah.

Officers: R. E. Miller, pres.; Geo. N. Lawrence, sec.; H. H. Calvin, v. p.; Chas. W. Lawrence, A. C. Christensen, Allen T. Sanford, Isadore Gauchet and J. S. Dixon, directors. O. F. Brinton, cons. engr.

Cap. \$1,000,000; par 25c.; changed Oct. 3, 1921, from \$1 par; 3,465,000 shares in treasury.

Silver Shield stockholders received 300,000 shares of new company on share for share basis, and 120,000 shares were paid for the other 2 tracts. Bingham Galena assumed entire indebtedness of the Silver Shield company.

Property: 485 acres in West Mountain (Bingham) district, Salt Lake county, includes 320 acres of the Silver Shield, 27 acres of **New York-Bingham Mng. Co.** and the Bully Boy group, adjoining U. S. S. R. & M. Co.'s holdings. The orebodies occur in fissures in limestone, and along limestone contacts; the ore value is mainly in silver-lead, but some gold and zinc are present.

Reported October, 1921, that company would use its new treasury stock to acquire the Lost Packer mine, Custer Co., Idaho. See **Lost Packer Co.** for description.

Development: by shaft and 8,000' tunnel with 540' back. Workings total 10,000', largely in Silver Shield territory, and are connected with Niagara tunnel of U. S. S. R. & M. Co., in which Bingham Galena owns operating rights.

In spite of extensive workings, property is still in development stage as evidenced by repeated assessments of former Silver Shield company, No. 53 of 3c. being levied October, 1920. Silver Shield was a small producer in 1918.

Equipment: said to be complete.

Company contracted with George Graham Rice, of the Fidelity Finance and Funding Co., and of unsavory reputation to underwrite 467,100 shares, at a maximum price of 75c per share. Permit was issued on June 18, 1921, by the Utah State Securities Commission over the protest of the Utah Chapter of the Am. Mining Congress and others. The Commission took the ground that the permit would be revoked in case improper methods were used. That this is somewhat dangerous ground to stand upon is voiced editorially and otherwise by the technical journals.

In July, the Corporations Commission for California began proceedings to prevent Rice and his brokers from selling Bingham Galena stock in that state without a license; his official statement is a scathing indictment of Rice and his ways.

A market letter, June, 1921, announced that 200,000 shares at 25c had been over-subscribed. In October 1921, shares were sold at 6c. after a high of 38c.

BINGHAM MINES CO.

UTAH

Office: 60 Congress St., Boston, Mass. **Operating office:** 404 Dooly Blk., Salt Lake City, Utah; Joseph Hyland, supt., Lark, Utah.

Officers: Jas. P. Graves, pres.; Henry N. Sweet, v. p.; M. K. Billings, sec.; Thos. S. Woods, treas., with Alfred B. White, Arthur W. Chesterton

and Fred H. Williams, directors. Imer Pett, asst. treas.-gen. mgr.; Thos. P. Billings, gen. supt.; Fred R. Sands, purch. agent.

Inc. April 6, 1908, in Maine. Cap. \$1,500,000; \$10 par; 95,153 shares outstanding. No funded debt.

Is a reorganization of the **Bingham Consolidated Mining & Smelting Co.**, stock being exchanged, share for share, on payment of \$3.50. Controls about 97% of the outstanding stock of the **Eagle & Blue Bell Mining Co.**, a dividend payer, of Eureka, Juab county, Utah; also controls the **Yosemite Mines Co.**, of Bingham Canyon, Salt Lake county, Utah. Purchased the entire capital stock of the **Victoria Cons. Mng. Co.** in 1915 and the property was conveyed to the Bingham Mines Co. in November, 1917. The Victoria property consists of 49 acres mineral land at Eureka, adjoining the Eagle and Blue Bell. Controls American Star Mining Co., adjoining Chief Cons. property, Eureka, Utah.

Registrars: First National Bank Boston, and Chase National Bank, New York **Transfer agents:** Federal Trust Co., Boston, and Guaranty Trust Co., New York Stock listed on Boston Stock Exchange and New York Curb. Sales in 1919 at \$10¼; \$6¼-\$10¾ in 1920, \$8-\$10½ in 1921, to June 1st. Annual meeting, third Wednesday in April, at 120 Exchange St., Portland, Maine.

Company has liquidated its bonded indebtedness of \$1,480,790, besides having paid for the property of the Victoria Cons. Mng. Co.; and in Dec., 1920, repurchased 38,290 of its own shares at \$10. in order to reduce its capitalization.

Comparative Balance Sheet:

X After deducting a \$4,961 loss on sale of U. S. bonds.

Dividends: initial dividend of 50c and Red Cross dividend of 25c a share, paid July 2, 1917; 50c paid October 5, 1917; 5 dividends of 50c, or \$2.50 in 1918 and 3 dividends to October 1, 1919, or 75c.; none in 1920. Total is \$675,000.

The **Bingham Mines Co.** made an excellent showing on its operations in Utah in 1921. In the first eight months, with August estimated, the company's profits and its equity in those of the Eagle & Blue Bell company have been at the annual rate of \$228,594, or \$2.29 per share, before allowance for depletion, depreciation, and taxes, and \$49,975, or 41c. per share, after these charges. The physical condition of both the Eagle and Victoria properties is better than ever before. Recent development at the latter has disclosed an orebody containing high silver content which has been proved to extend continuously from the 1,350' to the 1,700' level, running from 4 to 14' wide. This is one of the best orebodies recently opened in the Tintic district. In the past twelve years the Bingham Mines Co. has paid off \$1,500,000 of indebtedness, purchased two properties for over \$1,000,000, and paid dividends of \$675,000. with a net increase of only \$54,510 in capitalization.

Property: the Dalton & Lark and Commercial mines, 63 claims, patented, 481 acres mineral land, in the Bingham district, and 605 acres non-mineral lands.

Development: at Dalton & Lark and Commercial mines is extensive, there being many miles of workings. New work in the first named in 1921 amounted to 1,732', compared with 1,296' in 1920 and 1,358' in 1919. The Commercial mine has not been worked since 1915. It is considered that a large quantity of ore will be developed in the Brooklyn, Lead Mine and Lark veins below the Mascotte tunnel. Lessees extract ore from old workings in the Dalton & Lark and Commercial and shipped 6,764 tons during 1920, yielding the company a royalty of \$64,915. In 12 years to 1920, lessees have produced 1,768 oz. gold, 647,029 oz. silver, 4,623,683 lb. lead, and 8,306,976 lb. copper.

During 1919, company work was mainly, and in 1920 entirely, confined to the Brooklyn vein; an orebody, 350' x 110' x 6' has been opened. Ore blocked out above the Mascotte tunnel has been depleted.

Equipment: at Dalton & Lark—225-h. p. hoists, 14-drill compressor, shops, etc., and spur line with electric locos connecting with the D. & R. G. At Commercial, hoist, 10-drill compressor, and other machinery, all electrically driven.

Production: of Dalton & Lark, exclusive of lessees:

Year	Ore, tons	Gold oz.	Silver, oz.	Lead, lb.	Copper, lb.
1921.....	24,073	1,655	69,488	157,136	245,417
1920.....	16,307	1,928	82,214	311,289	479,242
1919.....	22,895	1,481	90,198	82,955	494,367
1918.....	31,670	1,501	113,432	432,157	753,641
1917.....	25,776	1,872	139,241	679,007	1,681,848
1916.....	27,710	1,900	154,036	736,992	1,502,865
1915.....	44,975	3,399	188,216	1,221,219	2,244,078
1914.....	49,867	3,613	188,905	1,110,762	3,738,773
1913.....	38,988	2,995	179,117	1,122,955	2,745,818
1912.....	49,987	3,731	225,763	1,427,780	3,777,320

Company is in hands of engineers who have made splendid progress in handling difficult financial and mining problems.

The Dalton & Lark mine was operated at a loss of \$21,645 in 1921 and the operating deficit at the Commercial was \$1,032. Lease ore yielded \$2,097 and operating expenses were \$4,029.

Eagle & Blue Bell Mining Co.

Subsidiary of Bingham Mines Co.

Office: 60 Congress St., Boston, Mass. **Operating office:** 404 Dooly Block, Salt Lake City, Utah. **Mine office:** Eureka, Juab county, Utah.

Officers: Jas. P. Graves, pres.; Henry N. Sweet, v. p.; Imer Pett, asst. treas.-gen. mgr.; Thos. S. Woods, treas.; Myron K. Billings, sec., with Fred H. Williams and John H. Gibson, directors. Wm. Owens, mine supt. Duncan MacVichie, directors. Myron K. Billings, sec. Wm. Owens, mine supt.

Inc. Sept., 1898, in Utah. Cap. \$250,000, increased, March, 1910, to \$1,000,000; \$1 par; issued 893,146 shares.

In March, 1910, issued 644,347 shares of new stock at 50c to take up a floating debt of \$269,925 and put \$50,000 in the treasury, for working capital. Is controlled through stock ownership, by Bingham Mines Co. First National Bank, Boston, registrar; Federal Trust Co., Boston, transfer agent. Stock is listed on the Boston Curb. Annual meeting, first Saturday after first day of October.

Financial Statement, years ending December 31:

Year	Gross Earnings	Expenses at mine	Freight, treatment etc.	General	Net Profit	Divi'ds.
1921....	\$633,315	\$166,970	\$329,241	\$40,064	\$97,040*	\$44,675

1917.....	264,933	86,534	178,399
1916.....	67,580	67,580

Dividends: 20 cents in 1913; 15 cents in 1914; 15 cents in 1915; 10 cents in 1916; 40 cents in 1917; 30 cents in 1918; 10 cents in 1919; 35 cents in 1920; and 5 cents on April 28, 1921; total to that date, \$1,607,662.

Property: 18 patented claims, 83 acres, includes a 9-acre millsite carrying the water right to a spring having a flow of about 60 gal. per minute. Lands lie between the Centennial-Eureka, Victoria and Chief Consolidated mines, on the Victoria-Grand Central ore zone, in the Mammoth Limestone.

Geology: chamber deposits in limestone, carry silver-lead ores containing gold and some copper. The lime is cut by numerous fissures, at all angles, with mainly vertical dip, carrying pipes, shoots and erratic deposits of ore at the intersections of fissures and bedding planes, in massive blue limestone. The mine has considerable bodies of silicious copper ore, lead sulphides and carbonates. Pay shoots vary from 6 to 100' in width. Average assays of dry ore: 0.230 oz. gold; 12.99 oz. silver; 0.31% copper; lead ore assayed: 0.13 oz. gold, 16.81 oz. silver and 17.05% lead.

The mine workings indicate 4 separate ore channels striking northerly and southerly, and occasionally joined together by immense ore deposits made along easterly and westerly cross faultings. The ore occurrence shows

a great similarity throughout, giving the zone a width of over 600', but each channel apparently has its characteristic mineral association.

History: according to C. H. Blanchard, pres. of the D. & B. Mines Co., ore was discovered by 30' shaft, and mill erected before ore development warranted, with consequent abandonment. Relocated several times, and property developed by 1,200' tunnel, that eventually found downward extension of ore-shoot cut by shaft. Profitably worked till panic of '93; later reopened and all ore in sight taken out and mine was idle until sold to Bingham Mines crowd who sank deep winze from tunnel; extracted all ore in sight and ran into debt for \$300,000; Hornblower & Weeks assumed debt, taking company notes, and installed Imer Pett as manager and Wm. Owens as supt. New management followed for 800' a thin, iron-stained seam on the 1,000' level and found immense body of pay ore, making it one of the big mines of Tintic.

Development: has been extensive in the last few years; the 3-compartment shaft is 2,018' deep.

Two main deposits supply most of the output. One of these is the 1,550' orebody, which, although irregular in occurrence, extends up to 1,350' and down to 1,845'. Stopping is over 900' long. The other orebody is in the North Extension claims, and is found mainly below the 1,000' north drift. Stopping on this ore is also extensive, but its full size is not yet known. Because of adverse conditions during 1919, ore of relatively higher grade was extracted, and development curtailed. In 1921, the main orebody, which has yielded largely from the 1,350', 1,450' and 1,550' levels, was cut on the 1,700'. A new shoot was opened in 1920 above the 1,350' level, and development begun on the 2,000' level. New work in 1920 and 1919, totaled 6,162' and 5,748', respectively, as compared with 5,519' and 4,783' for 1918 and 1917.

Equipment: includes a 300-h. p. double-reel hoist, good for 2,200' depth, a 100-h. p. tubular boiler and a 4x6" electric triplex pump. The mine was electrically equipped throughout and a 250 h. p. air compressor installed in 1916. Electric power is supplied by the Utah Power & Light Co.

Production:

	Ore, tons	Gold, oz.	Silver, oz.	Lead, lb.	Copper, lb.
1921.....	26,554	3,654	518,532	1,985,934	2,235

Victoria Consolidated Mining Co.

Owned by Bingham Mines Co. Mine at Eureka, Tintic district, Juab county, Utah.

Property: the Snowflake and Victoria mines, 8 patented claims, 49 acres, at Eureka, which contain chamber deposits of silver-lead ore in limestone. The ore shoots and streaks are of variable size, up to 100' in width. Copper, occurring as chalcopyrite and tetrahedrite is found with the galena.

Development: includes 1,200' shaft with several thousand feet of workings. Has compressor, 112 h. p. hoist, and uses electric power. Property is operated through No. 1 shaft of the Eagle & Blue Bell. New work in 1918 amounted to 2,313', opened a disappointing tonnage of new ore.

In 1919, operations were conducted on a smaller scale with extensions of 1,817' only, compared with 3,452' in 1920 and 5,910' in 1921. In September, 1921 company broke all records by shipping 18 cars, 900 tons of \$30 ore in one week. Gross receipts in 1921 were \$664,174; net proceeds, \$164,042.

Production:

Year	Ore, tons	Gold, oz.	Silver, oz.	Lead, lb.	Copper, lb.	Net profit
1921.	26,562	1,961	482,540	5,464,571
1920.	12,068	1,504	183,063	1,540,022	9,787	\$82,981
1919.	3,346	385	47,961	544,418	10,489	13,061

1917.	13,543	2,875	338,751	515,993	119,553	122,297
1916.	7,339	1,894	79,047	657,416	15,261	35,451
1915.	3,071	248	17,985	232,016

Yosemite Mines Co.

Subsidiary of Bingham Mines Co.

Property: 66.43 acres, patented, in the West Mountain mining district, Bingham Canyon, Utah.

Development: by the Yosemite shaft connecting with the Mascotte tunnel on the 2,200' level and the 1,650' Paradox tunnel. In 1920 new work totalled 1,314'. The annual report for 1918 says: "The results so far attained in the development of this property are by no means satisfactory." In 1919, results were a little more promising, and the 1,100' level was extended to cut the Cluster ore shoot, but disappointment followed in 1920.

Production:

Year	Ore, tons	Gold, oz.	Silver, oz.	Lead, lb.	Copper, lb.	Net smelter return
1921....	281	11	2,014	76,068	949	\$1,763

BINGHAM-NEW HAVEN C. & G. MNG. CO.**UTAH**

Absorbed by the **Utah Metal & Tunnel Co.**, and property described thereunder.

BINGHAM STANDARD COPPER CO.**UTAH**

Described in Vol. XI of Copper Handbook. See **Bingham Central Standard C. Co.**

BINGHAM-TOOELE MINING CO.**UTAH**

Address: H. L. Dodd, sec., 307 Utah Svgs. & Trust Co., Salt Lake City, Utah.

Officers: S. D. Huffaker, pres.; H. L. Dodd, sec.-treas.; M. T. Awoki, supt., Box 136, Bingham, Utah.

Inc. May 27, 1915, in Utah. **Cap.** 100,000; 10c par; assessable; assessments of 0.3c were levied May 3, and Nov. 3, 1921.

Property: 13 claims, 187 acres, in Middle Canyon, Tooele county. Company is driving a tunnel, 1,750' long, May, 1920, in the hope of finding orebodies. Is a prospect.

BIPONT SILVER MINING CO.**UTAH**

C. A. Phillips, pres., Spokane, Wash.; J. B. Randall, sec., Oakley, Utah. Company was organized in 1918, to take a \$250,000 bond and lease on 55 claims, including the Bipont mine, 20 miles from Oakley and 2 miles from the Idaho-Nevada line. Reported that over 100,000 tons of rich silver-lead ore was available and company would build a mill.

BLACK JACK CONSOLIDATED MINING CO.**UTAH**

Merged, 1917, with **Empire Mines Co.**, which see.

BLACK ROCK COPPER MINING & MILLING CO.**UTAH**

Address: Frisco, Beaver Co., Utah. Walter James, gen. mgr.

Property: 11 claims, in Beaver Lake district, 14 miles north of Milford, developed by 250' shaft and a drift on the 180' level, exposing a vein in limestone, said to show copper values; 4' of rich copper-silver ore was cut.
BLANDING IRRIGATION CO. UTAH

Acquired control October, 1921, of Dream mine, near Moab, one of the oldest mines of Blue Mountain district, and said to have 60,000 tons of ore in sight. New owners are to drive a 1,000' tunnel to crosscut vein at 700' depth.

BLUE RIBBON GOLD MINING CO. UTAH

Address: Minersville, Utah.

Officers: W. B. Seymour, pres.; L. Shaw, v. p.; Fred. R. Pryor, sec.-treas., with J. H. McOmie and Clara D. Smith, directors, at last accounts.
Inc. Feb., 1915, in Utah. Cap. \$100,000; shares 10c par; issued \$60,460.

Property: 8 claims in Jarloose mining district, 6 miles E. of Minersville, Beaver county, Utah.

Ore: gold in shoots in vein 6' to 12' wide, between well-defined walls of rhyolite. Average assay said to be \$9.40 per ton.

Development: by 50' shaft.

BOG MINING CO. UTAH

Described in Vol. XIII. Consolidated, 1918, with the Earl & Eagle Mng. Co., to form the **American Cons. Mines Co.**, which see.

BOLEY MINING CO. UTAH

Office: Newhouse Bldg., Salt Lake City, Utah.

Officers: E. G. Jensen, pres.; J. A. Stallings, treas.; Chas. Read, v. p.; J. H. Woodmansee and J. C. Jensen, directors. Arnold Herlin, sec.

Cap. \$100,000; 10c. par.

Property: 5 claims, in American Fork mining district, adjoining the Texan, Whirlwind and Miller Hill properties. Mine is to be developed at a depth of 1,000' by the Texan Mining Co.'s 1,300' tunnel. Is a prospect.

BONNEVILLE MINING CO. UTAH

Office: 11 Knight Blk., Provo, Utah.

Officers: O. Raymond Knight, pres.; J. Wm. Knight, v. p.; R. E. Allen, sec.-treas., with W. L. Mangum and Geo. A. Storrs, directors.

Inc. June 10, 1910, in Utah. Cap. \$100,000; 5c par; 2,000,000 shares outstanding; assessable to 50% of capital stock. Annual meeting, 2nd Thursday in August. Transfers made at company's office.

Property: in Utah county, between Springville and Provo.

Development: by a 5,100' tunnel driven some years ago. In March, 1920, company was exploring ground by drilling horizontally from tunnel.

No orebodies have ever been discovered; mine was closed down (1921) and practically abandoned.

BOSTON ACME MINES CORPORATION UTAH

Edward Wischmeyer, Jr., pres.; Harry Niles, v. p.; M. K. Tavenner, sec., all of Baltimore.

Said to have a three-quarter interest in the Boston-Utah Mng. Co. In 1918 an attempt was made to acquire control of the Morgan-Crescent Mng. Co., which company claims the Boston Acme Mines Corp. did not live up to the contract and has forfeited all rights on Morgan-Crescent.

BOSTON-DEEP CREEK MINES CO. UTAH

Mine address: Gold Hill, Tooele county, Utah.

Property: 12 claims, 240 acres, contains silver-lead ores. Reported under option, 1921, for \$200,000 to Philadelphia capitalists. Patrick Conley of St. Paul, awarded 1/6 interest in property by Nephi Courts, 1921.

BOSTON DEVELOPMENT CO. UTAH

Office: 502 Boyd Park Bldg., Salt Lake City, Utah.

Officers: F. H. Vahrenkamp, pres. and gen. mgr.; Thos. Austin, v. p.; Richard Winder, treas., with S. S. Stillman and B. F. Fitzgerald, directors; R. B. Garff, sec.; A. Boulais, supt.

Cap. \$500,000; shares \$1 par; assessable.

Property: the old Maxfield mine on N. side of Canyon, in Big Cottonwood district, 3 miles north of the Cardiff mine, taken over on a \$250,000 bond and lease, 1914. The Maxfield mine, discovered in 1872, is one of Utah's well-known early day mines, and is credited with a production of over a million dollars in gold, silver, copper and lead. The present management is said to have spent \$70,000 in 1915, in unwatering and equipping the mine.

Ore: above the water level is silver-lead carbonate; below, it is galena, containing gold, silver and copper. Orebodies vary in width from 6" to 24'.

Development: mainly by tunnels. The mine is about worked out above the main tunnel, which was driven north and west, a total of 4,000'. New management planned systematic development work, including the sinking of the 1,900' incline shaft.

Equipment: includes 2 air compressors, pumps and electric power.

Production: shipped steadily in 1916. Ore from 1,800' level averaged \$50 a ton. In 1917, 700 tons of \$65 ore was shipped and in 1918, a little ore was shipped. More recent information not available.

BOSTON & TINTIC MINING CO.

UTAH

Described in Volume XIII. Merged, 1917, with **Empire Mines Co.**, which see.

BOSTON-UTAH MINING CO.

UTAH

Geo. T. Stenhouse, mng. director. Control held by St. Petersburg, Fla., capitalists.

Property: in the Morgan mining district, the supposed northerly extension of the Park City ore zone, shows native copper in fissure on a contact between flat dipping limestone beds and a granite hanging wall. See **Boston Acme Mines Corp.**

BRANBORG MINING CO.

UTAH

Idle. Office: Judge Bldg., Salt Lake City, Utah.

Officers: J. C. Barnard, pres.; D. C. Dart, v. p.; L. R. Waldrop, sec.; J. W. McKinney, F. W. Price, directors.

Inc. April, 1915. Cap. 500,000 shares; 10c par.

Property: 11 claims, 220 acres, located at Big Cottonwood. A prospect.

BREWER GOLD & COPPER MINING CO.

UTAH

Office: 212 Utah Savings & Trust Co. Bldg., Salt Lake City, Utah.

Mine office: Ibapah, Tooele county, Utah.

Officers: J. P. Gardner, pres.; S. W. Morrison, v. p.-treas.; H. B. Windsor, sec.; John Mortimer, asst. sec.

Inc. Feb. 16, 1907, in Utah. **Cap.** \$50,000; shares 10c par; assessable; 4 assessments have been levied.

Property: 11 claims, 6 patented, on Dutch mountain, in the Clifton district, less than 5 miles to loading station on the Deep Creek railroad. In operation, May, 1917. No later information. Same interests control the Garrison-Monster, 3 miles away and activities are centered on it for the present.

BROADWATER MILLS CO.

UTAH

Company dissolved, mill dismantled. Described in Vol. XIII.

BUENA VISTA CO.

UTAH

Address: 4 E. 43rd St., New York.

Officers: Jos. E. Barlow, pres.; C. C. Nolle, v. p.-treas. and mgt., care Big Indian Mine, Moab, Utah; A. M. Cheney, sec., with N. C. Christensen, and C. A. Dowell, directors.

Inc. 1918, in Utah. **Cap.** \$1,000,000; \$1 par; 600,000 outstanding. Annual meeting, first Tuesday of December.

The company was organized to buy, or lease, and operate mining properties, in particular properties, where it is possible to use the processes owned by the Metallurgic Improvement Corporation, 4 E. 43rd St., New York. A lease was acquired on the Big Indian Mine in San Juan county, Utah, with

the special object of making a commercial demonstration of the Christensen Lixiviation process.

After many delays, beginning with 1918, mill, with a daily capacity of 8,000 lb. of copper, was expected to be in operation, April, 1921. Reported however that lease on Big Indian was relinquished in June.

BULLION BECK & CHAMPION MINING CO. **UTAH**

Fully described under own title in Vol. XIV. Subsidiary of the U. S. Smelting and Mining Co., which see.

BULLION COALITION MNG. CO. **UTAH**

Address: Salt Lake City, Utah.

Assessment of 2c. a share delinquent, Dec. 27, 1921.

BULL VALLEY GOLD MINES CO. **UTAH**

Office: 410 Felt Bldg., Salt Lake City, Utah.

Officers: M. R. Evans, pres.; Willard Scowcroft, v. p.; N. A. Robertson, sec.-treas., with M. P. Braffet and R. G. McQuarrie, directors.

Inc. 1913. **Cap.** \$100,000; shares 10c par.

Property: 16 patented lode claims, 295 acres, 1 millsite, and one placer claim, 35 acres in Goldstrike district, near Enterprise, about 40 miles from Modena, on Salt Lake Route.

Ore: free milling gold quartz found in fissure veins, 3' wide, along porphyry dike in lime, quartz, andesite and rhyolite formation, said to run as high as \$50 per ton.

Development: several thousand feet of workings, including 2 tunnels, 500' and 705' long, at last accounts. **Ore reserves:** estimated at 10,000 tons milling ore in sight, valued at \$20 per ton. **Equipment:** 3-stamp, 10-ton mill.

Production: consisted of several high-grade shipments in 1915. Company does not reply to requests for information.

A part of holdings were under lease to the Goldstrike M. & L. Co. (q. v.), and in August, 1921, entire property was reported to be under option to sell for \$105,501.

BULL VALLEY HASSIAMPPIE GOLD MINING CO. **UTAH**

Address: Goldstrike, Washington county, Utah.

Officers: J. D. Alsop, pres.; Ren Bryson, v. p. and supt.; J. A. Bryson, sec.-treas., with H. J. Burgess, A. B. Hemenway, A. F. Miles, W. E. Ayer, directors.

Inc. July 28, 1913, in Utah. **Cap.** \$100,000; shares 10c par; outstanding, \$70,500. Annual meeting, first Monday in July.

Property: 3 claims, 60 acres, unpatented, adjoining Bull Valley Gold Mines Co., in the Goldstrike mining district, covers a large belt of porphyry and quartzite. **Ore:** gold in fissure vein, 17' wide, with 80° dip, said to assay from \$1.20 to \$14.60 per ton.

Development: several tunnels and shallow shafts.

Property is still in the development stage. This is one of the many Utah companies who shun publicity—in this book.

BURGOMASTER ORE CO. **UTAH**

Address: C. C. Roshaven, mgr., Zenith, North Dakota.

Property: 120 acres, south of Atlas mine in the Star district, Beaver county, said to show silver ore. Developed by shaft to depth of several hundred feet.

Dormant; and likely to so continue throughout 1922.

CABIN MINING CO. **UTAH**

Address: Alta, Utah.

Property: in Little Cottonwood district, Salt Lake county, just N. E. of Alta, adjoining the Wasatch mine. Silver-lead ore occurs in a bedded deposit in limestone, associated with a strong fissure. Production reported in 1919.

The Wasatch Mines Co. brought suit for trespass in 1920, alleging illegal extraction of ore beginning with 1917.

CALDO MINING CO.**UTAH**

Address: J. M. Callow, pres., care General Engineering Co., Salt Lake City, Utah.

Company had a lease on the dump of the Horn Silver mine at Frisco, Beaver county, Utah, said to contain 200,000 tons of silver, lead, zinc tailings, and operated a 200-ton flotation mill. Operations on the Horn Silver dump have been completed and the company is inactive.

CALIFORNIA COMSTOCK CONS. MNG. CO.**UTAH**

Described in Vol. XIII. Property sold to Silver King' Cons. Mng. Co., which see.

CALUMET MINING CO.**UTAH**

Probably dead. Mail returned from Lund, Utah, marked "not operating here any longer".

Property: 19 claims, 30 miles N. W. of Lund, developed during 1917. Management estimated 2,000 ton of 30% lead and 2 oz. silver ore available above 75' level. Shipments in August, 1917, yielded \$3,000. Production to September, 1917, was about 700 tons.

CANTON MINING CO.**UTAH**

Probably dead. See Volume XIV.

Property: consisted of 500 acres in Alta-Big Cottonwood district, Salt Lake county, adjoining the Cardiff, etc., with 3,000' of tunnel work.

CAPITOL MINING CO.**UTAH**

Address: Charles Smith, supt., Milford, Utah.

Property: 2 claims, 3½ miles S. W. of Milford, Utah. A 4 to 8' vein in limestone and porphyry has been followed by an incline, 182' deep, March, 1921. The ore occurs as a pay streak averaging \$2.20 gold, 10 oz. silver and 28% lead.

CARBONATE CONSOLIDATED MINES**UTAH**

Address: Woolley Brothers, brokers Newhouse Bldg., Salt Lake City.

Officers: Leo Neilson, pres.; D. A. West, sec.-treas.

Inc. in Utah. **Cap.** \$1,000,000; \$1 par; 600,000 issued. Listed on Salt Lake Exchange, but no quotations given.

Property: 19 claims in Big Cottonwood district. Surface workings said to have yielded \$1,250,000 years ago. According to report all litigation has been settled, and development work will be started when funds are on hand.

CARBONATE HILL MINING CO.**UTAH**

Address: First National Bank Bldg., Ogden, Utah.

Officers: Jas. T. Finlen of Butte, Mont., pres.; Oscar A. M. Olsen, v. p.; Wade M. Johnson, sec.-treas., Ogden, Utah.

Inc. 1896, in Utah. **Cap.** \$1,000,000; par \$1.

Property: in the Argenta district, Morgan county, 6 miles N. of Peterson, covers small shoots of silver-lead ore as bedded deposits in limestone, overlying shales and quartzite. The mine has been something of a producer in the past and shipments average 2.7 oz. silver, 16.9% lead, 33.4% iron and a little zinc.

Development: by 3 tunnels.

Property was under bond and lease to the **Utah Silver Lead M. Co.** (q. v.). Company dormant, but taxes paid for 1922. Wade M. Johnson, Ogden, Utah, is interested.

CARBONATE KING MINING CO.**UTAH**

Mail returned from last known address.

Officers: M. J. Dooley, pres.; J. F. Free, v. p.; F. E. Harding, sec.-treas., of Salt Lake City.

Cap. 1,000,000 shares; 10c par; 400,000 in treasury.

Property: the Hetty Green, Schindler, Ethelwin and Pinky claims, in Ophir camp, near Hidden Treasure mine.

Development: 200' inclined shaft on Hetty Green vein. Property is still in prospect stage. No recent report.

CARDIFF MINING & MILLING CO.**UTAH**

Office: 1105 Newhouse Bldg., Salt Lake City. **Mine office:** Alta, Utah.
Officers: Ezra Thompson, pres.-gen mgr.; Lynn H. Thompson, v. p.; J. D. Murdoch, sec.-treas.; with F. W. Price and T. A. Reamer, directors. Jas. H. Doran, supt.

Inc. 1906, in Utah. **Cap.** \$500,000; \$1 par; assessable; all issued. Last assessment of 1c per share delinquent June 1, 1914. Listed on Salt Lake Exchange. Shares \$1.95 to \$5.10 in 1918; \$1.50 to \$2.95 in 1919; \$1.05 to \$1.80 in 1920; 82c to \$1.72 in 1921.

Revenue in 1919 was \$246,697, and expenses were \$125,806.

Dividends: initial of 25c Oct. 15, 1915; 25c June 1, Sept. 1, and Dec. 1, 1916; 25c Aug. 1, 1917; 20c Oct. 1, 1918; 15c Dec. 24, 1919; 15c Dec. 18, 1920. The total is \$165 per share or \$875,000.

Property: 14 claims, patented, 18 miles from railway, in the Alta Cottonwood district, 26 miles from Salt Lake City, includes the Mountain Chief group, N. W. of the Columbus Rexall.

The Cardiff is now one of the richest silver-lead mines of Utah. After being idle for years, a new prospecting tunnel was started in 1914. This tunnel cut a bedded orebody, averaging 10' thick, on a limestone-quartzite contact, at a point where it was intersected by a fissure vein. The orebody was opened for a length of 235' and for 795' on its dip (22°). New orebodies on the same contact were cut at intersections of other fissures. One orebody found 800' S. of the main working winze is 5 to 9' wide and is continuous for over 200' along its strike.

Development: by main haulage tunnel, and an 1,180' inclined shaft, which follows the ore down along the limestone bedding plane. A new 225' shaft follows a quartzite-limestone contact. Recent production has come from the 6th, 8th and 9th levels. In Nov., 1921 richest ore ever found in mine was opened on 1,100' level, and on 600', ore 4' to 15' wide was proved by raise to go up nearly 250'.

Equipment: includes compressor, drills, electric power, dwellings, machine and blacksmith shop.

Production: in 1919 was 6,520 tons of ore yielding 102,043 oz silver, 3,111,000 lb. lead, 106,982 lb. copper, and 952,917 lb. zinc; during 1920-1921, 50 to 60 tons daily of \$50 ore. No shipments are made during the winter months, but ore is stored.

CARISA GOLD & COPPER MINING CO. OF MAINE**UTAH**

Fully described in Vol. XII. Property at Mammoth is now part of the holdings of the **Empire Mines Co.**, which see.

CARNATION MINING CO.**UTAH**

Address: T. E. Wessel, mgr., Fish Springs, Juab county, Utah.

Property: a silver mine near Fish Springs, and 65 miles from Oasis, nearest shipping point. Ore cut in 1921, ran 35% lead and up to 250 ounces silver.

CEDAR RIDGE MINING CO.**UTAH**

Owens 5 claims, about 65 acres, adjoining the Lake View mine on N. E. Promontory Point, Boxelder county, Utah. Mail returned, 1919, from Promontory Point.

Samples had good zinc values for length of 1,500', the ore showing 11.7% zinc for 60 samples cut at regular intervals along workings.

CEDAR TALISMAN CONS. MINES CO.**UTAH**

Offices: 515 Newhouse Bldg., Salt Lake City and Milford, Beaver county, Utah.

Officers: S. S. Pond, pres. and mgr.; F. B. Sherwood, v. p.; Geo. Baglin, sec.-treas., with H M Chamberlain, Geo. Lynch and G. L. Bemis, directors.

Inc. March, 1909, in Utah, as a merger of the Cedar Mining Co. and the Talisman Mining Co.: latter company described in The Copper Handbook, Vol. XI. **Cap.** \$500,000; shares 50c par; assessable. The 10th assessment was levied on March 15, 1917, of 1c a share. All outstanding. Stock transferred at company office. Listed in Salt Lake City. Shares quoted on Salt Lake Exchange at $\frac{1}{4}$ c to 2c, Jan. 1921.

Financial statement, January 1 to April 30, 1916, showed profit of \$2,851. At this time management changed and in report May 1, to September 16, an operating loss was given of \$8,193 on this period, or net loss of \$5,341. Management has been changed again and reports are not available.

Property: 13 claims, 8 patented, 250 acres, in the Star mining district, Beaver county, Utah. **Ore:** carbonate of lead, copper, and zinc, containing gold and silver.

Development: several thousand feet of shafts and underground workings, the lowest on the 1,000' level of the incline, or main working shaft. On 300' level drift is out 267' and will be driven 200' further. Previous to the consolidation the two properties are said to have had a total net production of \$130,000, but for years they have not shown a production of any importance. Company claimed 50,000 tons mill ore on dump and blocked out, that will average 8% lead, 14% zinc, 7 oz. silver. In July, 1917, the property was leased for 2 years to H. S. Joseph, who started shipping 12% lead and 10 oz. silver ore in August. Shipments for 1918 totaled 200 tons. No recent information.

CENTENNIAL-EUREKA MINING CO.

UTAH

Fully described in Volume XIII. Properties absorbed December 31, 1917, by U. S. S. R. & M. Co., which see.

CENTRAL STANDARD MINES

UTAH

Address: Provo, Utah.

Officers: Thos. F. Pierpont, pres.; Willard Scowcroft, v. p.-treas.; J. C. Deal, sec., with J. W. Knight, A. Hedquist, L. N. Ellsworth, and J. W. Smith, directors. J. W. Taylor, supt.

The same management is in charge of the Copper Leaf Mng. Co.

Cap. \$100,000; shares, 10c par; issued, 700,000 shares.

Property: 16 claims, 5 patented, in East Tintic mining district, entirely surrounded by holdings of Chief Cons.

Development: by 600' shaft, sunk to this depth in fall of 1920. Ore of commercial value not as yet found. Equipment includes an electric hoist.

Litigation, with Chief Cons. over the ownership of claims, begun a few years ago, has been settled.

CHIEF CONSOLIDATED MINING CO.

UTAH

Company managed by the American Mines Syndicate (q. v.), which holds a 361,000 share interest.

Office: Newhouse Bldg., Salt Lake City, Utah. **Mine office:** Eureka, Juab county, Utah.

Officers: Walter Fitch, Sr., pres.; Thos. Carmichael, sec.-treas.; Cecil Fitch, v. p.-gen. mgr.; with J. Fred Johnson, J. H. Rice, Wm. M. Bradley and Exilda Fitch, directors.

Officials: J. F. Johnson, gen. mgr.; Paul Hilsdale, supt.

Inc. Feb. 16, 1909, in Arizona. **Cap.** \$1,000,000; shares \$1 par; non-assessable; issued, \$884,032. Walker Bros., bankers, Salt Lake City, registrar. Transfers made at company's office. Has about 1,900 shareholders. Stock listed on Boston Curb. Annual meeting, third Tuesday in February, at office of company, Tucson, Ariz.

Dividends: 1913, 20%; 1914, 10%; 1915, 10%; 1916, 20%; 1917, 35%; 1918, 45%; 1919, 32%; 1920, 40%; 1921, 20%; 5c in Feb., 1922; total to date \$2,092,524.

Comparative Balance Sheet:

Property: patented claims, 2,018 acres and 3,304 acres unpatented, in the Tintic and North Tintic mining districts. Also owns the entire capital stock of the **Little Chief M. & M. Co.**; acquired the **Grand Central** mine in 1922 from company of that name. Company owns the mineral rights under the city of Eureka, the **Little Edgard Mining Co.** (entire stock issue) and the **Deprizim** group. In 1916, purchased control of the **Homansville Mng. Co.** and **Baltimore Cons. Mng. Co.**, the last four groups comprise about 600 acres. Company also controls the **Plutus Mining Co.**, owning 14 adjoining claims and the **Eureka Lilly** which adjoins the Tintic Standard. In 1921, control of the **Apex Standard Mng. Co.** and of the **East Tintic Cons. Mng. Co.** was acquired.

Company owns a continuous strip extending along the mineralized zone for $3\frac{1}{2}$ miles east from its mine, covering $\frac{2}{3}$ of the mineralized district.

In 1919, the Tintic Standard started suit against the Chief Consolidated to determine ownership of the White Wing No. 5 claim. Litigation with the Central Standard has been settled. See Vol. X, The Copper Handbook, for further details as to property holdings.

The Eureka lands carry about 4,000' of the strike of the Victoria ore channel, which has an extreme width of about 400', the Victoria ore channel being on the Mammoth-Grand Central ore zone, and parallel to the Centennial-Eureka zone. The Victoria ore channel has a practically N.-S. strike, the ore occurring in pipes and shoots in nearly vertical lime beds.

Development: by 5 shafts with total workings, including those of Plutus, of 190,158', of which 41,323' was done in 1921 and 23,802' in 1920. A new concrete lined shaft, No. 2, 1910' deep, was completed in 1920 and the Water Lily shaft was bottomed at 1468' in Nov., 1921. Connections have been made with older workings on the 1,000 and 1,800' levels and drifts started on the 1,442' level.

During 1920, development and ore extraction were carried on in all levels from the 800' to the 2,000'. Work in area contiguous to No. 2 shaft showed two ore leads of good grade and permanency. Certain portions of the mine are operated by lessees. The Grand Central mine started shipping ore, Dec. 30, 1921.

Equipment: the plant has three 150-h. p. boilers, with mechanical stokers, a hoist and 2 air compressors. The double-cylinder hoist has 6' balanced drums, $1\frac{1}{8}$ " steel cable, and operates 2 triple-deck cages in balance, carrying 1-ton cars, to depth of one-half mile. Buildings include a power plant, housing the boilers, hoists and air compressors; a machine

shop, carpenter shop, and a smithy, all of steel frame. Late in 1919 there were 450 men employed.

In 1922, company bought a limestone quarry in which there is 175,000 tons of marketable limestone.

Production:

	Ore, tons	Copper, lb.	Lead, lb.	Zinc, lb.	Gold, oz.	Silver, oz.	Value Net

1911.....	8,063	825,551	389	306,362	117,583
1910.....	8,841	800,802	584	531,483	217,059

Average gross value per ton of ore in 1921, was \$41.89 gross, \$23.24 net; in 1920 was \$47.29 and \$27.21; in 1919, \$55.57 and \$36.78; in 1918, \$45.07 and \$28.49; in 1917, \$40.12 and \$25.93, respectively.

For 1920, the average gold content was 0.0541 oz. and 31.81 oz. silver; lead averaged 14.03% in lead ores and 15.24% in zinc-lead ores. Zinc content was 33.86% in zinc ores and 19.11% in zinc-lead ores. Average price received for metals in 1920 was 18.38¢ for copper, 7.67¢ for lead, 107.7¢ for silver.

In 1921, the average gold content was .0467 oz.; silver, 34,977 oz. lead in lead ores, 16.47% and copper or copper ores, 1.32%. Average price received for metals in 1921 was \$20.67 per oz. gold; .99¢ per oz. silver; .04¢ per lb. lead and .1283 per lb. copper.

Chief Consolidated is a valuable property, the largest silver producer in Utah, and is under excellent management.

CHRISTMAS MINING CO., INC.

UTAH

Address: 802 S. 2nd West St., Salt Lake City, Utah.

Officers: Thos. H. Hazel, pres.-treas.; C. F. Kabisius, v. p.; J. H. Snyder, sec., with A. Johnson, and C. F. Adams, Jr., directors.

Inc. April 21, 1891, in Utah. Cap. \$10,000; 5c par; outstanding, 170,000 shares; assessable. Last assessment, No. 18. 1/2c a share, was called March 20, 1919.

Property: 12 patented claims, 4 miles from Gold Hill, Tooele county, said to show fissure veins in limestone and porphyry, with gold, silver, copper and lead ore.

Development: 150' vertical shaft with 100' of workings. Inactive since 1918 for lack of funds.

CITY ROCKS MINING CO.

UTAH

Office: Houghton, Mich.

Officers: N. W. Haire, pres.; John Edwards, v. p.; Jas. P. Edwards, sec.-treas.; L. M. Cleaves Byers and Jos. Busch, directors.

Inc. 1906, in Utah. Cap. \$1,000,000; \$5 par. Property consists of shareholdings in the Michigan-Utah Cons. Mines Co., received for lands sold in 1912.

CLEMENTINE MINING & MILLING CO.

UTAH

Address: M. C. Morris, sec.-treas., 2403 S. 7 E. St., Salt Lake City, Utah. Wm. H. Evans, pres.

Inc. in Utah.

Property: 11 claims, 3 patented, on north side of Little Cottonwood

canyon. Salt Lake county, shows a quartz fissure vein, 14' wide, carrying gold and some copper. An 18" streak of pay ore was opened in November, 1921.

Development: by 800' crosscut tunnel and 100' shaft sunk on vein. Is a prospect.

CLEVELAND MINING CO.

UTAH

Idle. **Address:** Samuel McIntyre, Jr., pres.; 404 McIntyre Bldg., Salt Lake City.

Inc. Jan. 12, 1892. **Cap.** \$500,000; \$5 par; fully issued. Is controlled through stock ownership by **Mammoth Mng. Co.** (q. v.). Property at Eureka, Juab county.

CLIFF MINING CO.

UTAH

Former address: First Nat'l Bank, Milwaukee, Wis. **Operating office:** 414 Judge Bldg., Salt Lake City, Utah. **Mine office:** Ophir, Tooele county, Utah.

Officers: A. G. Kern, pres.; Grant Snyder, v. p.-mgr.; J. A. Stewart, sec.-treas., with A. D. Thompson, Frank Adams, Geo. Swift and E. McVicker, directors. A. H. Williams, supt.

Inc. May 31, 1906, in Maine. **Cap.** \$3,000,000; \$10 par; all outstanding.

Dividends: to 1916, \$90,000.

Property: in the Ophir district, contains silver-lead-zinc ore as replacement deposits in limestone.

Development: by tunnels, with several miles of workings.

Equipment: includes electric power and one-mile aerial tram.

Does not reply to requests for information. Presumably idle.

CLIPPER MINING CO.

UTAH

Successor to Mohawk Mining Co.

Inc. July, 1916, by T. J. Yates, J. S. Barlow, John Russon, Dr. G. N. Curtis and J. A. Dalton, all of Salt Lake City.

Property: 7 claims, near Tecoma, Boxelder county, Utah, shows 2 veins exposed throughout property, carrying silver-lead and zinc ores.

Development: by an 80' shaft with 100' of drifting. Is a prospect only.

No recent report.

COIN SILVER MINING CO.

UTAH

Address unknown, but assessment of 1/2¢ per share advertised in Salt Lake papers as delinquent, Oct. 29, 1921.

COLORADO CONSOLIDATED MINES CO.

UTAH

Office: Provo, Utah.

Officers: O. Raymond Knight, pres.-mgr.; J. William Knight, v. p.; R. E. Allen, sec.-treas., with J. S. Smith, K. S. Jordan and A. M. Knight, directors. Controlled by Knight Investment Co.

Is a consolidation of the Beck Tunnel Cons. Mng. Co. and Colorado Mng. Co.

Inc. April, 1916. **Cap.** 2,500,000 shares; 10¢ par; stock in old companies exchanged share for share. Listed on Salt Lake Exchange.

Shares sold at 2¢ to 4¢ in January, 1922.

Balance sheet of Dec. 31, 1920, shows: assets, \$256,649, including property, \$69,092; treasury stock, \$50,000; accounts, \$28,342; and cash \$3,373. Liabilities, notes, \$6,469. Deficiency is \$91,540. Receipts for 1920 were \$163,566 and disbursements, \$160,643.

Dividends of \$675,000 have been paid by the Beck Tunnel and \$2,600,000 by the Colorado Cons.

Property: 28 claims, near the Sioux mines, in the Tintic district, Utah county, contains large deposits of low-grade ore carrying silver-gold, lead and copper values.

Development: main shaft is 2,000' deep and will be sunk to water level. In 1919, the 1,900' level was being explored; no ore has been found to date on this level.

At the close of 1919, exploratory work was discontinued, but lessees continue to operate. Production in 1919 was \$107,435.

COLORADO MINING CO.

Merged April, 1916, with the **Beck Tunnel Cons. Mng. Co.** and now called the **Colorado Cons. Mines Co.**, which see.

COLUMBUS EXTENSION MINING CO.

Consolidated with **Rexall Silver & Copper Mng. Co.** to form the **Columbus-Rexall Con. Mines Co.**, which see.

Described Vol. XII.

COLUMBUS-REXALL CONS. MINES CO.

Is a consolidation of the **Columbus Extension** and **Rexall Silver and Copper Mng. Co.**, described in Vol. XII.

Office: 309 Kearns Bldg., Salt Lake City, Utah. **Mine office:** Alta, Utah

Officers: M. R. Evans, pres.-mgr., with S. G. Saville, Francis Critchlow, John Zink, Herman Harns and A. E. Evans, directors. Chas. M. Evans, supt.

Inc. July 15, 1915, in Utah. **Cap.** \$600,000; \$1 par; 586,234 shares issued; assessable. Columbia Trust Co., N. Y., registrar and transfer agts. Annual meeting, 1st Monday in June. Listed on Salt Lake City Exchange. Shares jumped from 13c in July to \$2 in September, 1917. Prices in 1918 were \$1.05 high, 25c low; in 1919, 45c high, 23½c low; in 1920, 71-31½c; in 1921, 42-24c; in 1922, 15¼ to 30c in January. An initial dividend of 2½c a share was paid December 30, 1918. In March, 1921, an amendment to company's constitution was adopted giving a wider scope to its possible operations.

Property: 14 patented claims, 112 acres, in the Little Cottonwood district, Salt Lake county; 11 other claims are in process of patent. Ore is silver-lead with copper and occurs in 2 principal fissures, No. 8 and No. 10, on a limestone-quartzite contact.

Development: through the Howland tunnel, 1 mile long, of the Wasatch Mines Co., from which extensions were made both into Columbus and Rexall ground. An orebody was cut at a point 5,000' from the tunnel portal at depth of 1,350'; the ore occurs in limestone, near the quartzite contact. This orebody yielded 1,900 tons of ore, assaying 13.9% copper, 3.8% zinc, 0.37 oz. gold, and 32.9 oz. silver per ton.

During 1921, work was confined mainly to the No. 8 workings, 160' to 300' above the main tunnel level. Connections have been made with the Cardiff on the 600 and 800' levels. Most of the ore mined comes from No. 10 workings, 70' below the main tunnel. Reported that the "ore-making" zone is 900' long and 400' on the dip. Ore reserves of \$250,000 are estimated.

Equipment: includes tramway and motors.

Production: about 250 tons per month of \$40 ore, net value. Since consolidation, Aug. 1, 1917, output to March 26, 1920, amounted to \$276,215. Total output in 1919 was 1,337 tons with \$39,688 gross; and more than 60 cars were shipped in 1920. Some of the later shipments showed 52 oz. silver, 21% lead and 4.42% copper.

Present company is reported to have expended \$275,000, including the liquidation of a \$33,000 indebtedness of former companies.

COMMONWEALTH MINES CO.**UTAH**

Address: Wm. M. Bradley, Box 948, Salt Lake City.

Officers: Wm. M. Bradley, pres.; C. N. Strevell, v. p.; W. T. Atkin, sec.-treas., with Dan Livingston, and B. F. Bauer, directors.

Inc. Nov., 1906, in Wyoming. **Cap.** \$600,000; \$1 par.

Property: the Commonwealth mine, 7 claims, in the Star district, adjoining Lady Bryan and Progressive mines. Claims show Topache limestone with intrusive sheets of altered green porphyry, cut by fissures, with more or less mineralization along fissures and outward along certain limestone beds. Lead ore was produced from surface workings and the Nellie claim has copper sulphides in its bottom workings.

Development: by a 1,400' tunnel, with back of about 300'. Said to have opened ore assaying up to 4% copper, 20% lead and 60 oz. silver per ton.

Equipment: includes gasoline power and an air compressor. Develop-

ment shows but little ore, mostly low-grade, and claims are not especially promising, according to geological reports.

Five additional claims have been acquired. Shipments were made in 1917 and 1918.

CONGOR GOLD & COPPER MINING CO.

UTAH

Office: 506 Auerbach Bldg., Salt Lake City, Utah. Mine near Bingham Canyon, Salt Lake county, Utah.

Officers: Glen R. Bothwell, pres. and gen. mgr.; R. C. McConaughy, v. p.; Frank E. Loose, sec., with E. F. Jenkins and C. G. Hall, directors, at last accounts.

Cap. \$1,000,000; shares \$1 par.

Property: 10 claims, 150 acres, adjoins the United Bingham C. Co. on the north, in Bingham Canyon, Salt Lake county, Utah. Developing 3' vein from 4,000' tunnel of Montana Bingham Co., working about 100' from face of tunnel. Mine reported to have about 100,000 tons of ore exposed, running from \$6 to \$50 per ton and averaging \$14.

Company had a contract with the Montana Bingham Consolidated Mining Co., shipping its ores through the Miller Ore Transportation tunnel of that company to the Denver & Rio Grande railroad tracks at a cost of 25c per ton of ore and 12½c per ton of waste.

Some shipments recorded for 1918; no information since.

CONKING MINING CO.

UTAH

Mine office: Park City, Summit county, Utah.

Officers: Wm. C. Hall, v. p.; Geo. A. Lund, sec.; J. Leonard Burch, treas.; preceding, and Margaret Treweek, directors.

Inc. Sept. 17, 1908, in Utah. **Cap.** \$500,000; shares \$1 par; assessable. Is a close corporation, with 25% of stock owned by Silver King Coalition Mines Company.

Property: 2 claims, 2 miles from a railroad, shows gold, copper and lead ores, developed by a 1,000' tunnel on the lands of the Silver King. Company brought suit against the Silver King Coalition Mines Co. for illegal extraction of \$575,000 in ore from Elephant stope, and in January, 1919, the Circuit Court of Appeals at St. Louis decided in favor of plaintiff, awarding damages of \$542,000, with accrued interest, approximately \$600,000, thus sustaining the lower court. In Feb., 1921, after a 14 years' fight, the U. S. Supreme Court reversed the decree of the Appellate court.

CONSOLIDATED ORES CO.

UTAH

Owned vanadium-uranium claims in Brumley ridge district, near Moab, acquired in 1919 by York Metal & Alloys Co., York, Pa.

COPPER BUTTE MINING CO.

UTAH

Idle. Office: Richfield, Sevier county, Utah. Wm. Johnston, pres.; Alfred J. Bird, sec.-treas.

Property: is a copper prospect on Gold mountain, in the Kimberly district, Piute county, Utah. Developed by a short tunnel showing a 6' vein of low-grade silver-bearing copper ore. Company claims to own a large deposit of alunite, a potash ore.

COPPER LEAF MINING CO.

UTAH

Officers: I. C. Deal, of Provo, Utah; J. E. Maver, of Salt Lake City; J. W. Taylor, mgr., of Eureka; T. F. Pierpont and Alex. Hedquist, of Provo.

Inc. 1916, in Utah. **Cap.** 600,000 shares; \$1 par. Cash on hand, Jan., 1919; reported as \$19,000.

Property: several claims in the Tintic mining district.

Development: by 1,250' shaft from which exploration has been done from the 1,000 and 1,200' levels to find the continuation of the Tintic Standard orebody. The management is the same as that of the Central Standard.

COPPER MOUNTAIN MINE

UTAH

Owned by Samuel Newhouse, Newhouse Bldg., Salt Lake City, Utah.

Property: 7 patented claims, 125 acres, in Beaver Lake mining district, Beaver county, Utah.

Geology: ores containing gold, silver, iron and copper occur as con-

tact deposits in E.-W. shoots with a dip of 70° to the north between a monzonite footwall and a limestone hanging wall. Ore carries copper oxide with lime and iron, the average of carload shipments being 4%.

Development: by a shaft 100' vertical, then 150' incline and 620' of drifts. Mine is worked by overhead stoping.

Equipment: 15-h. p. gas hoist.

Some shipments were made in 1916, 1917 and 1918. Lease to A. J. McMullen has expired and property idle in spring of 1921.

COPPEROPOLIS MINING CO.

UTAH

Address: N. A. Dunvon, mgr., Tooele county, Utah.

Authorized by Utah Corp'n Commission, 1921, to sell 50,000 shares at 5¢.

Property: 12 unpatented claims in Blue Ledge district. Shipments of selected ore in 1917 reported to have returned 60% copper, 65 oz. silver and \$12 gold per ton. **Development:** by tunnels.

COPPER QUEEN MIDLAND MINING CO.

UTAH

Address: Grantsville, Utah.

Officers: John P. Anderson, pres.; E. T. Woolley, v. p.; Mrs. Anna Erickson, sec.-treas., with Gustave Anderson, and O. W. Anderson, directors. Inc. June, 1907, in Utah. **Cap.** \$125,000; 25c par; issued 380,000 shares.

Property: 15 claims, unpatented, in Clifton mining district, Tooele county, and 6 miles S. E. of Gold Hill; said to show several promising veins with gold-silver values in lead and copper ore.

Development: 6 incline shafts from 50' to 205' deep, two tunnels, 620' and 125' in length. Total workings about 1,850' are mainly result of assessment work. About 30 tons of \$50 ore was shipped in 1918.

COPPER RANCH CONS. MINING CO.

UTAH

Office: 130 South, on West Temple, Salt Lake City, Utah.

Officers: D. L. Evans, pres., Malad City, Ida.; Jos. Pingree, sec.-treas.; A. F. McCulley, v. p.; D. E. Kirk, and E. V. Kessler, directors.

Inc. Sept., 1917, in Utah.

Property: the Copper Ranch mine, 10 claims, located next to Milford Copper Co. ground, 7½ miles west of Milford. Mine operated during 1916-17 by lessees who produced 100 cars of ore netting \$32,368 smelter returns. Orebodies in sight reported sufficient for regular shipments for several years. Ore carries 5 to 25% iron with a little copper; desirable for fluxing purposes.

Development: by 300' incline shaft with drifts and crosscuts on ore.

Equipment: motors, hoist and compressor.

Shipments are recorded for 1918; no information as to later activities.

COPPER RANCH MINING CO.

UTAH

Presumably dissolved.

Former officers: Moses Thatcher, former pres.; C. L. Rood, v. p.

Inc. in Utah. **Cap.** \$500,000; shares 50c par.

Property: a mine near Milford, sold Aug., 1917, for \$57,000 to D. L. Evans, of Malad City, Jos. Pingree and A. F. McCulley, of Milford, Utah. This amounted to 13c. per share of Copper Ranch stock. (See Copper Ranch Consolidated.) The company and its property are described in The Copper Handbook, Vol. XI, 1914.

COPPER ZONE MINING CO.

UTAH

Address: C. L. Richards, Logan, Utah.

Officers: W. W. Wiscourt, pres.; J. R. Richards, v. p. and supt.; Geo. T. Hyde, sec.-treas.

Inc. in Utah. **Cap.** \$100,000; shares 10¢ par.

Property: 8 unpatented claims, in T. 35 S. R. 15 W. in Bullion canyon, Pinto Iron Mtn. district, 12 miles from Beryl, in Iron county, said to show very rich silver ore. Developed by a tunnel with ore cut on 200' level. Is a prospect.

Company has spent \$84,000, developing the property during past seven

years. Property to be equipped with electrically driven machinery, early 1922.

Financed mainly by Charles L. Richards of Logan, Utah.

COTTONWOOD ATLANTIS MINING CO. UTAH

Office: 314 Felt Bldg., Salt Lake City, Utah. **Mine office:** Alta, Utah.

Officers: Samuel Neff, pres.; R. O. Dobbs, v. p.-sec.-gen. mgr.; David Neff, treas., with J. M. Rumsey and R. C. Middlewood, directors.

Inc. July, 1915, in Utah. **Cap.** \$100,000; 10c par value; 900,000 shares issued. Transfers made at company's office. Annual meeting in May.

Property: 6 claims, 50 acres, in the Little Cottonwood district. One which carries lead, silver, gold and copper, occurs in shoots at the intersection of two orebearing fissures with a thrust fault contact having a limestone footwall and a quartzite hanging wall. This contact courses South 15° East and dips 25°. The developed portion of the Atlantis property was sold to the Louise Mining Co. in November, 1917; the management of both companies is the same.

COTTONWOOD KING MINING CO. UTAH

Office: 502 Boyd Park Bldg., Salt Lake City, Utah.

Officers: A. Anderson, pres.; A. L. Thomas, Jr., v. p.; H. H. Harris, sec.-treas., with H. P. Hucy, G. H. Webb, C. R. Halstead and J. W. McLaughlin, directors. A. B. Gattrell, mgr.

Inc. July 2, 1915. **Cap.** \$150,000; shares 10c par; 150,000 shares in treasury. Assessments of ½¢ delinquent Aug. 26 and Dec. 3, 1921. Listed on Salt Lake Exchange. Shares sold for ¼ in 1920; no sales, 1921; 1¢ asked 1922.

Property: 28 claims, 560 acres, and a bond and lease on the Giles property of 31 claims, located between Big Cottonwood and Park City, Utah. It adjoins the Daly Judge and Silver King Coalition.

All the property of the Big King Mining Co., bought, 1917, by exchange of stock share for share, property 52 claims, 1,040 acres, adjacent to Cottonwood King ground.

Development: 2,100' of tunnels and 187' shaft with 500' of workings. Management states that on account of faults, 600' of development done in 1916-17 proved disappointing. In 1918 the Sunnyside tunnel was advanced 100'. Development was continued during 1919 and 1920 but apparently with disappointing results.

COTTONWOOD METAL MINING CO. UTAH

Office: 401 Hooper Bldg., Salt Lake City, Utah.

Officers: W. M. Ferry, pres.; E. E. Watrous, v. p.; S. J. Truman, sec.-treas., with E. P. Watrous, and H. R. Watrous, directors.

Inc. in Utah. **Cap.** \$100,000; 10c par; assessable; 205,000 shares paid for property and organization expenses. The balance is to provide funds for development work. Assessments, of ½c, May 31 and 1c Nov. 28, 1921. Listed on Salt Lake Exchange. Shares sold 1-3½c in 1918; 6c in 1919; 1¼-2c in 1920; ¼c in 1921, to June 1st.

Property: 38 full claims, 760 acres, known as the Watrous group, in the Big Cottonwood district, said to be crossed by six large fissures which cut the series of sandstone, shale, quartzite and limestone. These fissures run N. 35°-40°E., dip 60° to the N. W., and are cut by E. and W. fissures. Ore-bodies are found at these intersections especially in the soluble white lime. The deposits of the district are bedded deposits by replacement.

Development: by 1,376' tunnel that has cut 4 fissures. It is the plan of the company to continue the tunnel to cut all the fissures. The Silver King fissure should be reached within 200'; work was continued during 1921.

Equipment: 4-drill compressor, blacksmith shop, and houses.

Management frankly states that property is a prospect, and that they will spend the money in honest development.

Examined, Aug., 1920, by A. D. Knowlton, who advises strongly "the continuance of the tunnel to intersect the Silver King fissure."

CREEDMOOR MINES CORPORATION**UTAH****Address:** Manhattan Bldg., Duluth, Minn.**Officers:** W. D. Williams, pres.; R. A. Casson, treas.; C. J. Bonner, sec.; with Lloyd Davie, Milford, Utah, directors.**Inc. Aug., 1915, in Utah. Cap.** 1,000,000 shares; 500,000 outstanding.**Property:** 7 claims, 120 acres, in Star district, Beaver county, Utah, said to show silver-lead ore.**Development:** open-cuts and shallow shafts. Some ore shipped from mine under former ownership.**CREOLE COPPER MINES CO.****UTAH**

Mail returned from Atlas Bldg., Salt Lake City Utah.

Officers: H. A. Pederson, pres.; H. Brellean, sec.; B. H. Goddard, mgr.**Inc. 1917. Cap.** \$250,000; shares, 15c par.**Property:** 10 claims, 6 patented, 75 acres in Lincoln mining district, Beaver county, shows gold-silver-copper-lead ore in a contact deposit between granite and limestone. Deposit has an E. W. course and dips E. 38°. Average assays said to be 12% copper, 5% lead, 17 oz. silver and \$1 to \$5 gold per ton.**Development:** 400' incline shaft and 200' tunnel, with total workings, about 2,500'. Management claims to have large bodies of ore blocked out for shipping when copper prices warrant and some ore was shipped in 1918.**Equipment:** includes compressor and hoist.

No recent reports.

CREOLE MINING CO.**UTAH**

Was a leasing company. Fully described in Vol. XIII.

CROESUS MNG CO.**UTAH**Succeeded by **Eureka Croesus Mining Co.****CROFF MINING CO.****UTAH****Officers:** R. R. Tanner, supt., Beaver, Utah; G. P. Norton, sec.**Cap.** \$1,000,000; shares \$1 par; 295,000 shares and \$7,354 in treasury, January, 1916. Listed in Salt Lake City.

Shares 1½¢ in 1920; ½¢ to 2¼¢ in 1921.

Property: 5 patented claims, in Lincoln mining district, 12 miles east of Milford, Beaver county, Utah. Ore is found along the contact of lime shale hanging-wall and limestone footwall and varies in width from 6" to 3'. It is said to carry silver, lead, copper and gold.**Development:** by 240' incline shaft, also 665' of tunnels and drifts. Have proven ore shoot on 150' level.

Three carloads of ore shipped, 1917, assayed 13% lead, 6 oz. silver and \$2.80 gold per ton.

Equipment: includes a gasoline hoist and air-compressor. No recent report.**CROWN POINT MINING CO.****UTAH****Officers:** Jos. Worthlin, pres.; J. F. Greer, sec.-treas.; John Roundy, gen. mgr., Provo, Utah, with F. D. Kimball and Jos. Berry, directors.**Inc. 1907, in Utah. Cap.** \$100,000; 10c par; assessable. Shares quoted Jan., 1922, at 2 to 3½c. Listed on Salt Lake Exchange.**Property:** 8 claims, 5 patented, in Tintic district. Ore: silver-lead. Development by 1,000' shaft and 4,100' of tunneling. Workings totaled 6,875', Sept., 1919. **Equipment:** includes a hoist and compressor. Funds for development raised by assessments.

Was reported developing on the 1,000' level in 1921.

CUPRIC MINES CO.**UTAH****Address:** Herman G. Vetterlein, pres., 56 N. 6th St., Philadelphia.**Inc. May 11, 1908, in New York. Cap.** \$100,000; par 10¢; assessable; 74,788 shares issued.**Property:** the Cupric, or Iron Devil mine, 16 claims, patented, in the Frisco district, Beaver county, adjoining the Peacock mine, at the east end of White mountain and 2 miles S. E. of Newhouse. The mine is near

the igneous contact, dikes and tongues of monzonite invading the limestone; there are numerous mineralized fissures carrying chalcopyrite, pyrite, specular hematite and magnetite with garnet, tremolite, muscovite, etc.

Development: by 2 old incline shafts and 425' two-compartment vertical shaft, sunk near the main tunnel of the Cactus mine. Equipped with gasoline hoist.

D. & B. MINES CO.

UTAH

Officers: C. H. Blanchard, pres., 766 First Ave., Salt Lake City; Wm. H. Dickson, v. p.; A. C. Ellis, sec.; with Pat Donnelly, and Chas. P. Brooks, directors, all of Salt Lake City. L. H. Farnsworth, treas.

Inc. in Nevada. Cap. \$200,000; shares, 10¢ par; outstanding, 1,130,000 shares; listed on Boston Curb.

Property: 63 claims, in the North Tintic mining district, said to have gold, silver, lead and copper ore. The claims are in 2 groups, the D. & B. group of 30 claims has a 200' shaft and several hundred feet of workings. The K. & K. group has a 90' and also a 200' shaft. Property is a prospect. The stock has been profusely advertised by Orem & Co., Boston, Mass.

DALY JUDGE EXTENSION MINING CO.

UTAH

Address: Park City, Utah.

Officers: Mrs. Clarissa Whitehill, pres.; E. Waddanfs, v. p.; S. L. Radon, sec.-treas.; with S. Lewis, and Henry Spriggs, directors.

Inc. in Utah. Cap. \$600,000; shares 10¢ par.

An assessment of ¼¢ was payable Sept. 25, 1920.

Property: 8 claims, 140 acres, partly patented, at Park City developed by 700' tunnel and 2 shafts, said to show copper-lead-silver ore in fissure veins.

DALY-JUDGE MINING CO.

UTAH

Reorganized in 1916 as the **Judge Mining & Smelting Co.**, which see.

DALY MINING CO.

UTAH

Office: 1102 Deseret Bk. Bldg., Salt Lake City, Utah.

Officers: Geo. W. Lambourne, pres.-gen. mgr.; S. G. Taylor, treas.; W. A. Dunn, asst. sec.

Inc. in Utah. Cap. \$4,000,000; \$20 par; 150,000 shares issued; assessable. Listed on Salt Lake Exchange. Shares sold at \$2 to \$4 in 1920; \$1.50 to \$2.50, 1921; \$1 bid, \$3 asked, Jan., 1922.

Dividends: paid \$2,925,000 to 1897. Dividends resumed in 1917, when \$60,000 was paid; in 1918, \$75,000; in 1919, \$97,500; in 1920, \$30,000. The grand total is \$3,187,500.

Property: in Uinta district, Summit county, 8 claims and an interest in 14 claims of the Ontario Silver Co. claims; also an interest in 17 claims of the Daly West Co., and 195½ acres owned jointly with the Ontario Silver Mng. Co., total acreage 316, of which all are patented.

Ore: silver-lead-gold and copper in fissure veins in quartzite. The property is an old one, and at last accounts had 2,300' of shafts and much unexplored ground between the surface and 1,700' levels. Work has been carried on intermittently during the past few years. Ore assays from 45 to 80 oz. silver, 8 to 15% lead, and \$0.75 to \$1.50 gold per ton; shipments are about 500 tons monthly of ore of this character.

Production: in 1921, was 903 tons of ore yielding \$37,752.

During 1920, interest of former president, said to be about ¾, taken over by those in control of Daly-West, Park-Utah and Judge M. & S. Co.

DALY WEST MINING CO.

UTAH

Property transferred early in 1922 to Park City M. & S. Co. for 250,000 shares of latter company's stock. Company affairs to be wound up.

Office: 1101 Deseret Bank Bldg., Salt Lake City, Utah. **Mine office:** Park City, Summit Co., Utah.

Officers: G. W. Lambourne, pres.; Geo. G. Brooks, v. p., with H. M. Stonemetz, N. C. Fox and O. N. Friendly, directors. S. G. Taylor, treas.; A. H. Peabody, sec. Operating officials: O. N. Friendly, gen. supt.; G. R. McKee, mine supt.

Inc. Feb. 14, 1902 in Colorado. Cap. \$5,000,000, increased from \$3,600,000 in 1918; shares \$20 par. National City Bank, Salt Lake City, and Ist. Nat'l. Bank, Boston, registrars. American Trust Co., Boston, transfer agent. Annual meeting 2nd Tuesday in May. Stock listed on Boston and Salt Lake exchanges. Sales, \$1.60 to \$4 in 1921.

In 1920, ore sales returned \$615,464; other income totaled \$6,810, and dividends which with balance on hand, Jan. 1, 1920, equalled \$140,258. Expenditures, were \$623,995, leaving balance on hand, January, 1920, \$164,253.

Dividends: 30¢ quarterly reduced to 15¢ in 1913; nothing paid from 1914-1919; 90¢ in 1920; total to end of 1920, \$6,831,000.

Company has a fifth interest in the Little Bell Cons. Mining Co., a third interest in Silver Lake Water Co.; 50,000 shares of Thompson-Quincy Cons. Mng. Co.; 60,717 shares of West Ontario Cons. Mng. Co.; 17,000 shares of Daly Mng. Co. (q. v.).

Property: the Daly West and Quincy mines with 50 claims, patented, 250 acres in the Park City district. The ores are a complex mixture of argentiferous lead, zinc and iron sulphides, occurring in fissures, and as replacement deposits in limestone. Ore comes from Daly vein, opened by 1,185' of work; Middle vein by 220' and Back vein, 2,121'. The three principal veins are of 4 to 6' minimum and up to 40' maximum width. Upper workings are practically worked out, lower workings show concentrating ore.

Development: from Judge M. & S. Co. levels, 2,810'; from Daly West levels 3,530'. The main shaft is 2,300' deep, and the mine has about 16 miles of workings, an average of nearly 1 mile of new ground being opened yearly. Connection was made, October, 1909, with the 3-mile Ontario drainage tunnel, on the 2,100' level for the use of which company pays \$750 monthly rental. In 1919, lease of the Ontario S. M. Co. on upper 1,500' of mine ceased, and company in 10 months made total extensions of 4,928', largely on 500', 900', 1,100' and 1,400' levels; in part through Judge workings. Exploration opened two new orebodies on upper levels. The work in 1920 was similar in character. Some portions of mine are leased to individuals.

Equipment: includes hoists and air-compressor. The 350-ton concentrator was destroyed by fire December, 1913. A new 600-ton mill was built and went into commission January, 1915. Plant includes a flotation unit with capacity of 30 tons of dry slime per day. Mill closed down after completion (late 1918) of crosscut connecting mine with the Judge concentrator.

Production: the metal recovery since incorporation of company is as follows:

Year	Silver, oz.	Gold, oz.	Lead, lb.	Copper, lb.	Sold for
To 1919.....	26,045,487	21,817	250,108,000	17,598,060	\$16,485,493
1919.....	187,098	163	1,060,000	130,010	179,910
1920.....	505,506	241	3,364,606	341,465	615,464

The ore production for 1921 was 7,510 tons yielding \$253,019; for 1920, 22,000 tons; for 1919, 4,789 tons with net smelter value of \$31.55 per ton, of which 1,546 tons were produced by lessees; concentrate and tailing shipped amounted to 1,347 tons and sold for \$21.38 per ton.

Property, though an old one, has much new territory yet to be prospected and the known ore shoots give indications of going to greater depths.

The present management took control March 1, 1918; for several years previous to this time the mine had not been operated to best advantage, and only such development work done as was necessary for immediate ore extraction. The new management decided on a more aggressive line of development work and also to mill the ore at the Judge Mng. & Smg. Co.'s plant; this necessitated the driving of a 1,000' crosscut.

Dividend passed on April 1, 1921, because of market conditions; cash balance reported to be \$145,000.

DAYS FORK MINING CO.

UTAH

Office: 608 Boston Bldg., Salt Lake City, Utah.

Officers: Henry Harker, pres.; M. T. Ellison, v. p.-mgr.; E. O. Lee, sec.-treas., with H. E. Booth and B. H. Cannon, directors.

Inc. April, 1911, in Utah. **Cap.** \$60,000; 10c par; 475,000 shares outstanding.

Property: 5 claims, 85 acres, in Big Cottonwood mining district, said to show gold, silver, and copper ore in fissure veins. **Development:** about 1,000' of tunneling. Is a prospect.

DEEP CREEK COPPER KING CO.

UTAH

Mail returned, 1919 from former address, Gold Hill, Tooele county, Utah.

Property: 10 claims in Deep Creek district, extending south from the Western Utah Copper claims.

Development: by 100' shaft said to be sunk on copper-silver-lead ore. Probably idle.

DEEP CREEK COPPER M. & M. CO.

UTAH

Office: 501 Boyd Park Bldg., Salt Lake City, Utah.

Officers: R. C. Navlor, pres.; J. Pingree, treas.; A. L. Thomas, Jr., sec., with A. Winzell, L. Housekeeper, I. A. Powell and W. T. Smith, directors.

Property: 10 claims, in the Deep Creek district, Tooele county, said to show lead-silver-copper ore.

Development: by shallow shaft on the Moonlight claim.

DEER TRAIL MINING CO.

UTAH

Mine address: T. A. McCaskill, gen. mgr., Marysvale, Utah.

Office: 321 Felt Bldg., Salt Lake City, O. J. Salisbury, pres.

Property: the Deer Trail gold mine in Mt. Baldy district, Piute county, near Marysvale. According to the U. S. Geol. Survey, this was practically the only real gold mine operating in Utah in 1920. The ore contains gold, silver and lead.

Development: by tunnels, one over 2,200' in length.

Equipment: includes 100-ton mill employing concentration and cyanidation. About 80 men employed.

Production: in 1918-19 averaged 10 to 12 carloads a month.

DELSA MINING CO.

UTAH

Property about 6 miles from Santaquin, reported operated under lease by G. M. McLean in 1917. Ore occurs in veins, 1-2' wide, carrying silver-lead-zinc. Developed by tunnel, 500' long at vertical depth of 300'. Probably idle.

DESERET MOUNTAIN MINES CO.

UTAH

Office: 409 Atlas Bldg., Salt Lake City.

Officers: W. Mont Ferrv, pres.; D. H. Livingston, v. p.; Wm. D. Livingston, sec.; S. J. Truman, treas., with J. W. Mellen, J. H. Turner and I. D. Wines, directors. D. E. McPherson, supt.

Cap. 1,000,000 shares; 500,000 reserved for treasury.

Property: 12 claims, 250 acres in the West Tintic mining district, Juab county, said to show a contact vein, between limestone and porphyry, 12' wide, carrying copper ore that assays better than 3%.

Development: by 300' new incline shaft and an old shaft 218' deep, drifts, stopes and raises. Plan continuing shaft to 500' level. The 300' level crosscut cut the vein in 1917, but owing to war conditions, mine was shut down until early in 1919, when shaft was unwatered to the 300' level, and development work resumed.

No recent information.

DETROIT COPPER MINING CO.

UTAH

Samuel A. King, pres.; Judge Bldg., Salt Lake City, Utah.

Inc. Jan. 1916, in Utah. **Cap.** \$1,000,000; shares \$1 par; 400,000 in treasury. Held 5-year \$100,000 bond and lease, from November 24, 1915, on 40 claims, locally known as Ibex mine, and owned by Ibex Gold Mng. Co.

Company described in Vol. XIII. Property is now held under bond and lease by the **Monarch Cons. Mines Co.**

DEWEY SILVER AND COPPER CO.**UTAH**

Mail returned, 1918, from former address: Lorin Hall, Brigham City, Utah.

Property: 5 claims, 5 miles N. of Brigham City, Boxelder county.

Development: by tunnels, ore occurring in limestone. Surface ore said to contain up to 60% lead with some silver and copper. Probably idle.

DIAMOND QUEEN MINING CO.**UTAH**

Address: Richard Campbell, supt., Eureka, Utah.

Property: in Eureka district, 3½ miles S. of Silver City, Juab county.
Development: by 180' shaft.

Equipment: 60 h. p. boiler, compressor, hoist and buildings. Work paid for by assessments.

DRAGON CONSOLIDATED MINING CO.**UTAH**

Office: care Knight Investment Co., Provo, Utah. Mine near Tintic, Juab county, Utah.

Officers: O. Raymond Knight, pres.; J. Will Knight, v. p.; R. E. Allen, sec.-treas.; with L. E. Ritter, directors.

Inc. April 8, 1911, in Utah. **Cap.** \$2,000,000; \$1 par; issued 1,875,000. No funded debt. Stock listed on Salt Lake Stock & Mining Exchange. Shares sold at 5 to 10¢ in Jan. 1922.

Receipts for 1920 were \$105,608; of which about \$73,000 was from sale of fluxing ores; disbursements were \$78,674. Gross earnings for 1921 were \$61,636, operating expenses \$60,852 and net income, \$784. Dividends were \$37,500.

Dividends: initial of 1¢ a share declared February 20, 1917, and continued quarterly during 1917 and 1918; 2¢ in 1920.

Property: 28 claims, patented, 122 acres, comprising the Dragon and Governor groups in Tintic district. The Governor group has 2,000' or more of the big Iron Blossom fissure in limestone, from which the great production of that and the Sioux mines has come. The Dragon group shipped 100 tons per day of iron ore to the U. S. smeltery, for a long time. The Governor ground had a rich orebody of copper-silver ore developed by drifts from the Iron Blossom on the 300', 600', 800' and 1,000' levels, showing a 20' vein with 0.5 to 10% copper and 20 to 50 oz. silver. Part of the property is worked through the Black Jack shaft of the Empire Mines Co. In the tunnel connecting the workings with the Iron Blossom property, large bodies of low-grade ore were encountered in 1915.

Low grade ore has in former years been sent to Tintic Milling Co., also a Knight enterprise, but, from 1918 on, the latter, under a lease, has been operating a part of the Dragon mine. Total advance in 1920 was 440', including 240' by lessees.

Production: 1,743 tons in 1914, yielding 44,006 oz. silver, 135,814 lb. copper, 57,552 lb. lead and 432.27 oz. gold; 7,804 tons in 1915, yielding 102,143 oz. silver, 490,750 lb. copper, 14,766 lb. lead and 2,559 oz. gold. In 1916 and 1917, silver-copper-lead milling ore was shipped to the Tintic Milling Co.; in 1918, iron fluxing ore was shipped for 10 months, and some silver-lead ore produced. Reported to be shipping 260 tons daily during 1919 with net returns of \$86,231 including returns from ore shipped by lessee.

In 1920, the U. S. S. R. & M. Co. had a lease on the iron orebodies, mining from 50 to 100 tons daily for flux for its smelter at Midvale. Operations ceased at end of 1921, due to oversupply.

DRY CANYON CONSOLIDATED MINING CO.**UTAH**

Address: Gisborn, Tooele county, Utah.

Officers: C. J. Garber, pres.-treas.; L. L. Travis, v. p.; J. E. Darmer, sec., with V. C. Anderson and Violet S. Scribner, directors.

Inc. 1900, in Utah. **Cap.** \$100,000; shares 5c par; assessable; 1,800,000 shares outstanding. Annual meeting January 15.

Property: 29 claims, 12 patented, 400 acres, in Dry Canyon, Ophir mining district, Tooele county, said to show a complex ore containing gold, silver, copper, lead, and zinc.

Development: by tunnels, with a total of over 8,000 of workings.

Production: during 1918 produced steadily, smelter returns paying all expense of development work.

No recent information.

DUGWAY COPPER MINING & SMELTING CO. UTAH

Office: 54 East 4th South St., Salt Lake City, Utah. **Mine office:** Clover, Tooele county, Utah.

Officers: O. F. Peterson, pres.-treas.-gen. mgr.; P. C. Kittle, v. p.; A. V. Peterson, sec. with A. E. H. Peterson and H. B. Windsor, directors.

Inc. June 13, 1902, in Utah. **Cap.** \$30,000; shares 10c par; assessable; issued, \$22,506. Annual meeting, third Tuesday in July.

Property: 6 claims, patented, 118 acres, in the Dugway district, 43 miles from a railroad. Shows an ore zone, reported by company, to be 300' long on the 200' level, containing a number of orebodies that carry chalcocopyrite, hornite and argentiferous galena, giving assays of 1 to 15% copper, up to 30% lead, up to 7% zinc, up to 66 oz. silver, and \$1.60 gold per ton.

Development: by a 333' incline shaft, with about 1,000' of workings, showing considerable ore. Idle for several years.

DUGWAY SMELTING CO. UTAH

Office: 203 Atlas Block, Salt Lake City, Utah.

Officers: A. L. Thomas, Jr., pres.; K. D. Kuhre, v. p.; C. S. Goddard, sec.-treas., with E. R. Hardy, and C. G. Adams directors.

This proposed company, with its offer to assist the public to get-rich-quick is presumably dead and ought to be. See Vol. XIV for details.

DULUTH & UTAH DEVELOPMENT CO. UTAH

Property sold to Bullion Coalition, and proceeds distributed. Company presumably dissolved. Fully described in Vol. XIII.

DUTCHMAN COALITION MINES CO. UTAH

Address: Harry W. Holden, American Fork, Utah.

Officers: N. Salmensen, pres.; Jos. R. Haas, v. p.; Harry W. Holden, sec.-treas.

Incorporation pending. **Cap.** \$10,000; par 1c.

Property: 5 claims in the American Fork district, Utah county includes the Wild Dutchman mine said to have produced 7,900 tons of high grade silver-lead ore prior to 1880. The ore occurs in bunches in a bedded vein, 20' wide, in limestone.

EAGLE & BLUE BELL MINING CO. UTAH

A subsidiary of **Bingham Mines Co.**, and described thereunder.

Shares listed on Salt Lake Exchange, sold at \$2.05 in 1920 with \$2.25 bid, Jan., 1922. Company to be dissolved, 1922.

EAGLE COPPER MINING CO. UTAH

Mine office: Santaquin, Utah county, Utah.

Officers: Armon Cravens, pres.; S. W. Higginson, v. p.; C. E. Snell, sec.-treas.; L. F. Peterson, supt

Inc. May, 1907, in Utah. **Cap.** \$1,000,000; shares 10c par. Last assessment of $\frac{1}{2}$ c delinquent, April 11, 1914.

Mine on Mount Nebo, east of Santaquin, has shipped a little high-grade lead and copper ore. Developing with a small force at last accounts. No recent information.

EARL & EAGLE MINING CO. UTAH

Described in Vol. XIII; merged with **American Cons. Mines Co.**, which see

EAST ANTELOPE MINING CO. UTAH

Address: 135 E. Broadway, Salt Lake City, Utah.

Officers: John Matson, pres. and mgr.; John W. Chase, v. p.; H. E. Giers, sec.-treas.; with N. P. Hansen, and A. C. Nebeker, directors. C. W. Pettit, supt.

Cap. \$100,000; 10c par; assessable; last assessment, $\frac{1}{2}$ c a share, delin-

quent September 15, 1919. Listed on Salt Lake Exchange. Shares quoted $\frac{1}{4}c$ to 5c in 1920; $\frac{3}{4}c$ in 1921; $\frac{1}{4}c$ Jan., 1922.

Property: 11 claims, unpatented, on Mineral Mountain, Millard county, adjoins Keno and Antelope Star mines.

Development: by 400' tunnel with drift on limestone quartzite contact; 800' of work in 1916-1917, showed excellent ore in small amount in west drift. No recent information.

EAST CARBONATE MINING CO.

UTAH

Property: in South Fork of Big Cottonwood canyon. Is an old company doing slight development yearly. Judgment for \$701 was given against it in Nov., 1921, for money due for driving a tunnel through the property.

EAST CROWN POINT MINING CO.

UTAH

Address: Provo, Utah.

Officers: R. A. Badger, pres.; Chas E. Zabriskie, mgr., with Frank D. Kimball, C. E. Huish and W. A. Beesley, directors. H. C. Jex, sec.

Inc. 1907, in Utah. **Cap.** \$100,000; shares 10c par; assessable. Listed on Salt Lake Exchange. Shares sold $1\frac{1}{4}$ -6c in 1920; $1\frac{1}{4}$ - $2\frac{1}{4}$ in 1921; 2c in January, 1922.

Property: 9 silver-lead claims in Tintic district, Juab county, Utah.

A 2-compartment shaft begun in fall of 1920, but apparently to cover assessment work only. Reported that claims are in process for patent.

EAST HECLA MINING CO.

UTAH

Address: care J. B. Taylor, 336 E. 8th St. South, Lake City, Utah.

Officers: J. B. Taylor, pres.-gen. mgr.; E. J. Broberg, v. p.; W. Hansen, Jr., sec.-treas.; D. J. Cook, supt.

Inc. in 1916, in Utah. **Cap.** 1,000,000 shares; 10c par.

Property: a group of claims at Alta, adjoining the South Hecla mine, said to show a prominent outcropping vein and about 3' of ore in a shaft sunk on it. Ore carries copper lead, silver and gold values.

Development: a tunnel, 250' long, being driven to cut the downward extension of the vein beneath a 75' shaft, that shows copper ore.

Idle for several years, but company not dead and assessment work performed. Management doing exploration work at last accounts.

EAST STANDARD MINING CO.

UTAH

Officers: Fred C. Allen, pres.; Isaac Isaacson, v. p.; M. C. Morris, sec.-treas., with J. Frank Quist, and Gus Wickman, directors.

Inc. 1919, in Utah. **Cap.** \$100,000; 10c par; 600,000 issued.

Property: 9 claims, adjoining the Tintic Standard on N. E. in East Tintic district, Juab county, formerly known as the White Track. Management states that a shaft will be sunk to 1,000' depth. Shaft was reported to have reached 260' in January, 1921.

EAST TINTIC COALITION MINING CO.

UTAH

Address: Provo, Utah.

Officers: John M. Bestelmeyer, pres.; H. G. Blumenthal, v. p.; A. Bestelmeyer, sec.-treas., with D. R. Beebe, and H. C. Hicks, directors.

Cap. \$75,000; shares 5c par. Listed on Salt Lake Exchange. In July, 1919, company stated that it had \$26,312 in cash and no debts. Shares are assessable; last assessment of $\frac{1}{2}c$ was delinquent Aug. 20, 1921. Shares quoted 1c in 1921.

Property: 3 patented claims, located just W. of the Eureka Bullion, said to have gold-silver-lead ore.

Development: 225' tunnel, and two incline shafts, one 142', and one 127' deep. In July, 1919, started work on a new shaft, which had reached 200' in May, 1920. Is a prospect.

Equipment: includes a head-frame, electric hoist, compressor and drills.

EAST TINTIC DEVELOPMENT CO.

UTAH

Property bought, 1916, by Eureka Lilly Mining Co., which see.

ELDORADO GOLD MINING & MILLING CO.

UTAH

Address: Don Maguire, mgr. and principal owner, Ogden, Utah.

Property: 900 acres, said to show silver-lead-zinc ore in limestone-quartzite contact. Copper ores occur in granite. Shipments in 1912 ran 37.5% lead, 10 oz. silver and \$2 gold. Mine is said to show 40,000 tons of 15% zinc ore and 100,000 tons of silver-lead ore.

Development: includes 1,400' tunnel. Planned mine development and installation of a new tramway. No recent report. Probably idle.

EMERALD MINING CO.**UTAH**

Mine office: Mammoth, Juab county, Utah. H. C. Hoffman, pres.-gen. mgr.

Inc. 1896, in Utah. **Cap.** \$300,000; shares \$1 par; assessable, fully issued. Assessment of 1c delinquent Dec. 15, 1921. Listed on Salt Lake Exchange. Shares sold at 1-15c in 1920; 1-13c in 1921; 1-3c Jan., 1922.

Property: 4 claims and additional land, bought, 1910.

Development: 1,100' shaft, with about 4,000' of workings, on a narrow but rich vein, carrying copper, silver and lead ores. A 4' vein between well defined walls, showing heavy iron mineralization and sugar quartz was opened in a 700' winze.

Company has levied assessments for years and been regarded as the "wildest of wildcats," but is now in favor and may repay stockholders for their blind faith and yearly contributions.

Reported to look promising on 1,000' level and during 1920 and into 1921, a drift was driven on this level for 350'.

EMMA CONSOLIDATED MINING CO.**UTAH**

A rank promoter of the notorious promoter, George Graham Rice.

Former officers: G. G. Rice, pres.; Wm. Barret Ridgely (deceased) former v. p.-treas.; Judge H. D. Rummel, 2nd v. p.; I. H. Weinberg, sec.; J. J. Beeson, gen. mgr

Inc. 1917, in Delaware. **Cap.** \$3,000,000; \$1 par; 2,668,693 issued. Was the holding company, owning more than 98% of the outstanding capitalization of Emma Copper Co. and over 80% of Old Emma Mines Co. Also bought the lease on Old Emma Mines Co. ground from the Old Emma Leasing Co. (now dissolved), which ran until September, 1917.

Emma Copper Co.

Controlled through ownership of over 98% of outstanding capitalization by the Emma Cons. Mng. Co.

In 1918 Emma Cons., after shipping a few hundred tons of ore went into the hands of a receiver, and in 1919, the Emma Silver Mines Co. was formed as a reorganization of the Emma companies, assuming their debts and assets.

EMMA SILVER MINES CO.**UTAH**

Address: F. B. Cook, sec., 125 Main St., Salt Lake City. **Mine address:** Alta, Salt Lake county, Utah.

Officers: C. S. Burton, pres.; J. E. Galogher, v. p., 101 W. 2nd St., South, Salt Lake City; Frank B. Cook, sec.-treas., with J. Herlihy of Salt Lake Hardware Co., and A. L. Hoppaugh, Kearns Bldg., Salt Lake, directors. M. M. Johnson, Cons. engr.; Dave J. Lemmon, supt.

Inc. 1919, in Utah. **Cap.** \$5,000,000; \$1 par. Registrar and transfer agent, U. S. Corporation Co., New York. Listed on Salt Lake Exchange, and New York Curb. (Mar. 10, 1920). Assessment No. 1 of ¼ cent a share delinquent Dec. 10, 1921.

The financial statement for fiscal year ending Sept. 30, 1921, shows total receipts of \$161,107, including ore sales, \$49,658; from reorganization, \$101,716; 100,000 treasury shares, \$7,130. Expenditures were \$11,981.

Company is the offspring of **Emma Cons., Old Emma Mines Co. and the Emma Copper Co.**, which were controlled by Emma Cons. In 1918 Emma Cons., which had been fostered by George Graham Rice, went into the hands of a receiver and one of the results was the formation of the Emma Silver Mines Co. Shareholders in the Old Emma companies were given the "privilege" of exchanging one share of old stock for three of

new on payment of 10c a share on the old stock or one share of new for one of the old with no assessment; receiving 20c a share cash for each of the old. Some of the shareholders of Emma Cons. had paid as high as \$3.75 a share for this stock in 1916; it afterwards fell to a few cents per share.

The new company after paying all debts of the old company is said to have started business with \$100,000 and 1,000,000 shares of stock in the treasury and no debts. As there are many who still have faith in the unexplored part of the property, it is hoped that the new management will bring this old and much abused mine into the productive class.

Property: included 11 claims in Little Cottonwood district and the adjoining Vallejo and Joab Lawrence groups, bought 1915 in exchange for 352,000 shares of stock. Two adjoining claims were purchased from the Tipperary Mng. Co. early in 1920.

History: the Old Emma mine was a famous early-day producer, having shipped over \$3,000,000 worth of lead-silver ore in the 60's and 70's, from above the 300' level. It was sold to the Emma Silver Mng. Co., for \$5,000,000 and soon afterwards the orebodies appeared worked out, or cut off by a fault. After vain attempts to find the orebodies below the fault, the mine lay idle until 1915.

Chas. S. Herzig made a geological study of the property with the deduction that it contained a faulted portion of the Old Emma bonanza orebody, whereupon diamond drilling was started. Under direction of J. J. Beeson, geologist, the Emma vein was located, 1916, at about 250' below where it had been cut off by the fault, and the displaced segment of the orebody opened up.

Development: by 1,700' tunnel, 400' shaft and drifts on several levels.

Former management diamond drilled in 1917 in hopes of locating the downward extension of 4 other orebodies, all presumably cut off by the Montezuma fault. In November, a mineralized zone 50' wide was passed through assaying a few ounces of silver.

During 1919-20, the larger part of work was done along the Montezuma fault; total extensions were 781'; diamond drilling amounted to 671'. A joint report by Beeson and Johnson recommended temporary suspension of operations below tunnel level because of pumping expense and to confine work to locating faulted segments of orebodies above tunnel.

Production: \$3,825,000 up to August, 1919, according to Beeson; of this amount, \$273,742 net worth of (10,362 tons) ore was shipped between Jan. 1, 1917, and August, 1918. Development having been neglected, shipments ceased until November, 1919; in following 12 months, the mine yielded 1,484 tons; in 1921, 473 tons.

Reported Dec. 1921, that 4' of ore was cut in 800' crosscut from point 1,200' from portal of Bay City tunnel.

EMPIRE MINES CO.

UTAH

Address: Knight Investment Co., Provo, Utah.

Inc. 1907, in Utah. **Cap.** 3,000,000 shares; 5c par. Listed on Salt Lake Exchange.

Shares sold 2½c to 5½c in 1921, and 2½ to 12c in 1920.

Is a merger of the Black Jack, Boston & Tintic, Central Mammoth, Lower Mammoth, Garnet, Old Colony and Eureka, Manhattan and Opex Consolidated mining companies, all controlled by the Knight Investment Co.

In April, 1917, the property of the Carisa Gold & Copper Mng Co. of Maine at Mammoth, Utah was bought for \$115,000.

Property: over 700 acres in the Tintic district, Utah, east of Silver City and south of Eureka.

Practically all the work done since the consolidation has been carried on through the Lower Mammoth shaft, the main work late in 1919, being on the 1,800' level, where a 3' vein of good copper ore was cut in Black Jack group.

Some shipments of iron and silver-lead ore were made in 1918. All

work temporarily suspended in mid-summer of 1920.

ETTA MAY MINING & MILLING CO.

UTAH

Charter reported forfeited, April 4, 1921. See Vol. XIV for details.

EUREKA BULLION MINING CO.

UTAH

Address: J. M. Bestelmeyer, mgr., Provo, Utah.

Officers: H. C. Hicks, pres.; J. M. Bestelmeyer, v. p.; August Bestelmeyer, sec.-treas., with N. C. Hicks, and H. G. Blumenthal, directors.

Inc. 1916, in Utah. **Cap.** \$50,000; shares 5c par; assessable. Assessments of $\frac{1}{2}$ c delinquent Sept. 3, and Nov. 5, 1921. Listed on Salt Lake Exchange. Shares sold at $4\frac{1}{2}$ c in Jan., 1922.

In January 1920, company formed the Tintic Silver Mining Co., with a capital of \$150,000.

Property: 7 patented claims and 2 unpatented claims formerly owned by the Grutli Mining Co., were bought at sheriff's sale 1916 for \$8,960. Claims are in the East Tintic district, W. of the Tintic Standard property, and are said to show a 50' vein on surface with a limestone porphyry contact.

Development: by 900' shaft reported to show quartz in a cave 150' long, 50'-75' high and 75' wide at 500', with manganese. A drift on the 800' level is said to have opened a 4' vein of ore in June, 1919, with assays 9 to 20% lead, 23 to 70 oz. silver, and about \$2 gold per ton. A winze, 600' from shaft, was sunk to depth of 400' from the 9th level to reach two intersecting fissures, and drifts have been driven on 925 and 1,150' levels; on the latter, a second cave was encountered. Reported (May, 1921), that a 3' vein was uncovered on the 925' level from which a 40-ton ore shipment averaging \$2.40 gold, 60 oz. silver and 2.5% lead was made.

Equipment: includes compressor, 60 h. p. steam boiler, hoist, etc.

EUREKA-COTTONWOOD MINING & SMELTING CO.

UTAH

Address: B. A. M. Froiseth, 855 Sherman Ave., Salt Lake City.

Officers: B. A. M. Froiseth, pres.; Percival O. Perkins, v. p.; and R. J. Froiseth, sec.-treas.

Inc. Jan. 7, 1918. **Cap.** \$25,000; 5c par; 300,000 shares issued.

Property: 2 patented claims in Big Cottonwood district, Salt Lake county, $\frac{1}{2}$ mile N. E. of the Cardiff mine, showing lead-silver ore. Developed by shafts and tunnels.

Reported in March, 1921, to be awaiting funds.

EUREKA CROESUS MINING CO. OF NEW YORK

UTAH

Controls or owns the Eureka Utah Mining Co. of Salt Lake City.

Address: Frank L. Torres, pres., 103 Park Ave., New York.

Cap. \$1,500,000; shares \$1 par.

Property: the Huebner mine, at Eureka, Juab county, Utah, has shipped some high-grade lead-silver ore. Reported in 1919, that a 250-ton mill would be erected.

No recent information.

EUREKA HILL MINING CO.

UTAH

Office: Deseret National Bank Bldg., Salt Lake City, Utah. **Mine office:** Eureka, Juab county, Utah.

Officers: Moylan C. Fox, pres.; Waldemar Van Cott, v. p.; Jas E. Berkley, sec., with Ed. W. Packard, directors. Jackson C. McChrystal, managing engr.; Chas. Baker, supt.

Inc. Nov. 12, 1875, in Utah. **Cap.** \$1,000,000; shares \$100 par. Is a close corporation, credited with having paid \$2,000,000 in dividends. Paid \$1 dividend, Nov. 15, 1921. Annual meeting third third Tuesday in February.

Property: 5 claims, 27 acres, patented, also a 25-acre millsite and 150 acres miscellaneous lands in the Tintic district, adjoins the Bullion-Beck and Centennial Eureka. The Eureka Hill mine has a 1,500' main working shaft and about 30 miles of workings. Ore bodies are lenticular deposits, carrying cuprite, malachite and enargite with average values of about 1.4% copper, 6% lead, 25 oz. silver, and \$3 gold per ton. Mine worked for 45 years, but shut down 1911, and only old workings mined by lessees since

then. Produced many millions of silver-lead ore from above 1,000' level. Deep development in future will be from adjacent mines.

Reported in summer of 1921, that L. E. Riter et al. had leased a large block of Eureka Hill ground to be worked through the Centennial-Eureka shaft.

In recent years company's revenue has come from royalties from leasers in the mine and from rentals and sale of water.

Old tailing dump at mill containing 180,000 tons, leased on royalty, 1921.

EUREKA KING MINING CO.

UTAH

Directors: Ray Van Cott, Judge Bldg., Salt Lake City; Geo. M. Chiulos, A. E. Moreton; Geo. B. Bywater and F. J. Sylvester.

Property: in Tintic mining district. In June 1919, merged into the Tintic Paymaster Mines Co. (q. v.). Eureka King has not been dissolved, but conveyance of its properties has been duly completed.

EUREKA LILLY MINING CO.

UTAH

Subsidiary of Chief Cons., 1921.

Office: Judge Bldg., Salt Lake City, Utah. **Mine office:** Eureka, Utah.

Officers: W. I. Snyder, pres.; Thos. Barrett, v. p.; Grant Snyder mgr, with Willard Scowcroft and J. W. Knight, directors. Gideon Snyder, sec-treas.

Inc. 1907, in Utah. **Cap.** \$1,300,000; 10c par; all outstanding; assessable; last (No. 17) assessment of 1c., levied May 9, 1921. Listed on Salt Lake Exchange. Company formed to take over holdings of the Lilly Mining Co. Shares sold 5c. to 35c. in 1920; 5 to 13½c in 1921.

Property: Eureka Lilly mine 8 patented claims, in the East Tintic mining district, adjoining the Tintic Standard mine on the west and including the Ralph mine of the East Tintic Dev. Co., bought in 1916, from which considerable high-grade silver-lead ore was mined years ago.

Development: by 1,840' incline shaft which passes through broken limestone to depth of 1,200', where it enters the underlying quartzite, the ground is cut by N. 10° E. and E.-W. fissures, and ore occurs at intersections. On the 1,400' level these fissures have so far shown no large bodies of commercial ore. Shaft deepened 200' to the 1,840' level in 1920 and drift driven to intersect ore shoot opened in Tintic Standard vein on 1,640' level. On the latter, ore was followed for length of 250'. In 1921, work mainly on 500 and 1,400' levels, latter showing ore assaying 33 oz. silver, \$12 gold and 26% copper, while the 500' shows 18' of ore.

Produced over \$150,000 worth of ore running 42% lead and 31 oz. silver per ton, from above the 200' level.

Because of financial conditions, all work was suspended at the end of 1920, but was resumed in June following. All indebtedness on property has been paid.

EUREKA METALLURGICAL CO.

UTAH

Address: Eureka, Utah.

Officers: M. M. McChrystal, pres.; R. V. Smith, v. p. and gen. mgr.; Thos. McCormick, treas.; Judge E. Pike, sec.; above, with J. Westerdahl, directors. C. M. Oakes, asst. mgr.

Inc. 1917, in Utah. **Cap.** \$500,000; shares \$1 par.

The company was organized to conduct a general metallurgical business, on the strength of patents of R. V. Smith for treating carbonate lead-zinc ores by flotation. Operates a small mill at Eureka.

Reported that company has succeeded in obtaining financial assistance to carry on experimental work.

EUREKA MINES CO.

UTAH

Mine address: John H. McChrystal, supt., Eureka, Utah.

Office: 722 Kearns Bldg., Salt Lake City.

Officers: Wm. R. Wallace, pres; Jackson C. McChrystal, v. p.-gen. mgr.

J. E. Berkley, sec.; H. J. Wallace, treas., with John H. McChrystal, directors.

Inc. 1916. in Utah. **Cap.** \$100,000; shares 10c par; 850,000 shares outstanding. Listed on Salt Lake Exchange. Sales 3¢-18¢ in 1920; 3 to 8¢ in 1921.

Property: in the Tintic district, is bounded by the Chief Consolidated, Gemini, Centennial, Eureka and Eagle and Blue Bell mines.

Ore: silver-lead of milling grade, averaging about 6 oz. silver and 4% lead with occasional zones of enrichment.

Development: mine has been opened up through the deep workings of the Gemini on the 900' to 1,500' levels. Work by the company and lessees was continued on the 1,100' and 1000' levels, respectively, during 1920-21, and good ore opened on the 900' and 1,000' levels. Shipments October, 1921, ran 30 to 40 oz. silver and 10 to 20% lead, ore coming from east drift on 1,000' level.

EUREKA OPHIR CONS. MINING CO. UTAH

Address: John W. Cairns, pres.-mgr., Gisborn, Utah, or H. P. Stone, treas., Warren, Pa.

Cap. 300,000 shares.

Property: 4 patented claims at Dry Canyon camp, Rush Valley district, Toole county, Utah. Two parallel veins with replacement orebodies in limestone at and near a dike contact, show 4' copper-lead-silver ore in 10' vein at bottom of shaft.

Development: by shaft to 375' level; in 1913, shipments of 50 tons of ore per month were made from this and the 200' level averaging 8% copper, 10% lead and 15 oz. silver. When property was under bond and lease, some years ago, to the Mineral Devel. Co., \$26.92 ore was shipped from 200' level. In Sept., 1921, property was refinanced and a campaign of development started.

Mine has produced \$175,000 and leasers royalties of \$11,000 have met all expenses, no assessments being levied in 20 years operations.

EUREKA SILVER MINING CO. UTAH

Address: Alma Eldridge, sec., 212 Atlas Bld., Salt Lake City, Utah.

Assessment of ½c. per share delinquent, Jan. 9, 1922.

EUREKA STANDARD MINING CO. UTAH

Address: F. G. Richmond, mgr., Salt Lake City.

Property: 14 claims, about 280 acres, in the East Tintic district, formerly known as the Montana group. Shows several large outcrops.

Development: by 500' 3-compartment shaft. Work on property was resumed in 1919, and a 1,500' shaft started.

Assessment work only performed, 1920-'21.

EXCELSIOR IRON CO. UTAH

Address: J. R. Walker, 321 Felt Bldg., Salt Lake City, Utah.

Property: a large iron ore deposit in Iron Co., Utah, reported under option for \$4,000,000, August, 1921.

FALK MINING CO. UTAH

Address: K. H. P. Nordberg, pres., Box 203 Sandy, Utah. Alma E. Malstrom, v. p.; Hyrum A. Nordberg, sec.-treas.; with Alma Francom, and Kristina Nordberg, directors.

Inc. 1913, in Utah. **Cap.** \$100,000; shares, 10c par; 200,000 treasury shares.

Property: 8 unpatented claims, 160 acres, in Free Coinage district, North Willow Canyon, Tooele county, 8 miles S. W. of Grantsville, said to show veins with lead, silver, gold, copper ore.

Development: by several tunnels and 120' shaft. Property is a prospect, idle for some time, but management attempting to sell stock to enable company to resume work.

In October, 1921, property was examined by J. T. Breckon, M. E..

who reported that a body of gold-silver-copper ore had been cut that averaged \$27 per ton.

FARRAGUT MINING & MILLING CO.

UTAH

Address: care Ashby S. Thatcher, Boston Blk., Salt Lake City.

Property: the Admiral Farragut group of claims in the North Tintic district, near Eureka, developed by a 265' shaft, which was to be sunk to 500'. No recent returns; probably idle.

FEDERAL MINING & MILLING CO.

UTAH

Out of business. Former address: Stateline, Iron county, Utah. I. C.

Clark, mgr. See Vol. XIII.

FERBER COPPER CO.

UTAH

Dead. See Vol. XIII of this work.

FISSURES EXPLORATION CO.

UTAH

Company no longer in existence. Entire stock issue owned by American Fork Exploration Co., which see.

FLORENCE MNG. & MLG. CO.

UTAH

Address: Marysvale, Utah. J. A. Fitzpatrick, gen. mgr.; W. A. Fitzpatrick, sec.-treas. Operates a 100-ton potash plant, built in 1918. The mine supplies alunite from which the potash is derived.

Mill was in use by other companies for experimental purposes during 1919.

FLUORITE MINES CO.

UTAH

Address: Box 425, Salt Lake City.

Officers: Leo H. Crane, pres.; E. W. Crane, Jr., v. p.; A. R. Sorensen, sec.-treas., with Mrs. E. W. Crane, Jr. and Mrs. A. R. Sorensen, directors.

Inc. Jan. 25, 1921, in Utah. Cap. \$100,000; par 10c; 600,000 treasury shares; assessable.

Property: 2 unpatented claims, and bond and lease on 4 patented claims, on Wildcat Mt., Tooele county. A fissure vein in limestone is reported to show silver-copper ore, with a fluorspar gangue. Opened by 100' incline, and equipped with gasoline hoist and compressor.

FORTUNA GOLD QUEEN MINING CO.

UTAH

Mail returned from B. F. Capper, pres., 333 Judge Bldg., Salt Lake City, Utah.

Property: 3 claims at Fortuna, Beaver county, said to show free gold in 8' quartz vein in limestone and porphyry. Opened by tunnels and 200' shaft. Equipped with gasoline hoist. Closed down. No recent returns.

FORTUNA INDEPENDENCE MINES CO.

UTAH

Inactive. **Address:** E. C. McGarry, pres., 1388 S. 9th E. St., Salt Lake City, Utah.

Property: 8 claims in Fortuna district, Beaver county, and 2 claims in Grand county, held under bond and lease. Ore occurs in intrusive rocks, porphyry and trachyte predominating. Mine is developed by 165' shaft and 400' adit, said to show an oreshoot 18" wide and exposed for 135', giving assays of \$20 gold and 3-5 oz. silver. Management planned extending the adit to 800' in 1917. Five-stamp mill built in 1917, at company's Henry mountain property, 85 miles S. of Green River station. No recent returns.

FORTUNA MINING & MILLING CO.

UTAH

Inactive and property sold to Montana Bingham. See Vol. XIII.

FREE COINAGE MINING & MILLING CO.

UTAH

Letters neither answered nor returned from office: 69 Commercial Bldg., Salt Lake City, Utah. Mine near Alta, Salt Lake Co., Utah. L. A. Evans, pres.; D. H. Wenger, sec.-treas.

Inc. 1896, in Utah. Cap. \$125,000; shares 25c par; assessable, with 2 assessments levied.

Property: 4 claims. 3 patented, in Little Cottonwood canyon, 2 miles from a railroad, developed by shaft and tunnels, showing lead and copper ores.

FREE GOLD MINING & MILLING CO.**UTAH**

Officers: Ephriam Jensen, pres.-treas.; L. C. Cluff, sec.; with E. R. Ellerbeck. A. Szizek, Jos. S. Wells and E. V. McCune, directors.
Inc. 1901, in Utah.

Property: a group of claims in Farmington canyon, Davis county, shows silver-lead ore with some gold. Is a prospect. Company dormant since 1915.

GALENA PARK MINING CO.**UTAH**

Address: Milford, (or Newhouse), Utah.

Officers: F. W. Thackwell, pres.; W. J. Critchlow, v. p.; S. C. Powell, sec.; J. E. Beesan, treas.

Inc. Sept., 1919, in Utah. **Cap.** \$125,000; par 10c.

Property: in Beaver Lake district, Beaver county, is being developed by a tunnel following a fissure toward an old shaft from which ore was mined in early days.

GARDEN CITY MINING & SMELTING CO.**UTAH**

Address: Victor Lensky, pres., Ogden, Utah.

Officers: above with S. C. Powell, v. p.; T. M. Cain, 2nd v. p.; P. A. Patterson, sec.-treas. all of Ogden and J. Morrison, Garden City, directors.
Inc. January, 1922, in Utah. **Cap.** \$125,000; par 25c.

Property: in Rich county, Utah.

GARFIELD CHEMICAL & MANUFACTURING CORP'N**UTAH**

Subsidiary of the American Smelting & Refining Co. and Utah Copper Co., operated under joint agreement.

Address: Garfield, Utah.

Officers: C. W. Whitley, pres.; C. M. MacNeill, v. p.; R. C. Gemmill, v. p.; J. M. Bidwell, sec.-treas.

Treats concentrate from the Utah Copper Co. and the custom ores from scattered points in Utah. To supply sulphuric acid for leaching copper ore and other purposes, a 150-ton acid plant costing nearly \$500,000 was erected late in 1916. Fumes from the smelter supply the sulphur.

Equipment: two 20' Herreshoff roasting furnaces of 50-ton capacity each, brick-lined steel flue, pyrite burners, Glover tower, lead-lined acid chambers, and two Gay-Lussac towers. Both 66° and 98° B. acid are made. Leaching and flotation plants nearby will consume most of the acid.

Operated for 11 months in 1920 and produced 25,844 tons of 60-degree acid, of which Utah Copper Co. used 22,298 tons; at beginning of 1921, the latter was using entire production of plant.

GARFIELD SMELTING CO.**UTAH**

Office: 120 Broadway, New York. **Operating office:** 714 McCornick Blk., Salt Lake City, Utah; J. M. Bidwell, mgr., of Utah Dept. **Works office:** Garfield, Salt Lake Co., Utah; A. H. Richards, mgr. Entire capital stock owned by American Smelters Securities Co.

Operates a copper smelter with an annual capacity of 2,100,000 tons; fully described in Vol. X.

GARRISON-MONSTER MINING CO.**UTAH**

Office: Utah Sav. & Trust Co., Salt Lake City, Utah. Mine near Gold Hill, Tooele county, Utah.

Officers: J. P. Gardner, pres.; J. S. Garrison, v. p.; H. B. Windsor, sec.; S. W. Morrison, treas.

Inc. June, 1906, in Nevada. **Cap.** \$1,000,000; \$1 par; assessable; last assessment (No. 15), of 1/2¢, levied in July, 1920. Is a merger of the Garrison G. & C. Mng. Co. and the Monster Mng. Co.

Property: 26 claims, patented, on Dutch mountain, in the Deep Creek district. 40 miles from Wendover, on Western Pacific railroad. A branch line to the district was completed in 1917, reducing transportation costs materially. The Garrison Monster company built a loading station at Garrison station on its spur from the Deep Creek line. Mine has over 3,500'

of workings and is said to show considerable bodies of silver-lead ore. Work was resumed in 1917.

During both 1919 and 1920, a few ore shipments were made. Company developing known orebodies by tunnel to make possible the exploitation of ore by gravity.

The **Brewer G. & C. Mng. Co.** is under same management.

GEMINI MINING CO.

UTAH

Office: 723-4 Kearns Bldg., Salt Lake City, Utah. **Mine office:** Eureka, Juab county, Utah.

Officers: E. W. Packard, pres.; Jackson C. McChrystal, v. p. and gen. mgr.; J. E. Berkley, sec.; E. O. Howard, treas., with W. Van Cott, directors, John H. McChrystal, supt.

Cap. 5,000 shares, \$100 par. **Dividends:** to 1918, totaled \$482 per share. In 1916, \$16 per share was paid and in 1917 \$20 per share.

Property: the Gemini is a silver-lead mine with accessory copper ore, in shoots. There are 3 fissure veins, in an ore-channel about 450' wide, cut transversely by a number of cross-fissures, making a rather complex system of orebodies, the main fissure of 15 to 20' width, having a S. E. dip, with ore-shoots raking to the north. Ore in the upper workings averages about 12% lead and 40 oz. silver, while the bottom level, at 1,600', shows a 20' vein carrying argentiferous 3% copper ore.

Development: by 1,700' shaft and a 300' winze, equipped with electric hoist. The adjoining Ridge & Valley mine is operated through the Gemini shaft, and workings of Eureka Mines Co. are connected with those of the Gemini. Mine management of the 3 companies is the same.

Early in 1920, reported that ore had been uncovered on 1,700' level west of the main fissure. Mine is operated in part by lessees.

Production: in 1919 was 7,804 tons of ore, yielding 143,983 oz. of silver and 1,499,820 lb. of lead. Gross profit was \$201,577, and expenditures \$222,538. No figures available for 1920-'21.

The Gemini has been a regular producer since 1886. Management, like many in Utah, extremely reticent about giving any information.

GENERAL EXPLORATION CO.

UTAH

Alfred Frank, gen. mgr., Newhouse Bld., Salt Lake City, Utah.

Officers: Alfred Frank, pres.; E. L. Newhouse, Jr., v. p.; C. G. Bamberger, sec.-treas. (all of Salt Lake City), with John MacGinniss, of Butte, directors.

Inc. in Utah, in June, 1915. **Cap.** 10,000 shares; \$1 par; 7,500 out-

Company operated the Ohio Copper Co., property until it was taken over by the reorganized Ohio Copper Co. of Utah. Royalties aggregating upwards of \$500,000 were paid, and lessees are said to have made large profits.

GENERAL EXPLORATION CO.

UTAH

Address: Providence Bldg., Duluth, Minn.

Officers: Hansen Evesmith, pres.; Wm. O. Pealer, v. p.; M. W. Eve-smith, sec., with E. I. Bricker, U. L. Yynott, and E. J. Hansen, directors.

Inc. July 21, 1903, in Minnesota. **Cap.** \$100,000; \$50,000 in preferred, and \$50,000 in common stock; outstanding, \$50,000, and \$300 preferred.

Company is an exploration and holding company interested in the St Croix and other companies in Star and South Star districts, Beaver county.

GETHIN LEROY UNITED MINES CO.

UTAH

Office: 517 Atlas Bld., Salt Lake City, Utah.

Officers: A. S. Fowler, pres. and treas.; Jas. Moffat, sec., with Given Fowler and Loris Pratt, directors.

Cap. \$1,000,000; \$1 par; 750,000 issued. Paid a dividend of 1c per share, November, 1913.

Property: in Silver Islet district, Tooele county, 15 miles north of Wendover. Company has made several shipments of silver ore, but ran out of money and leased mine; lessees are said to have shipped 500 sacks of ore in January, 1906.

Property reported sold in August, 1917, to satisfy a judgment for \$3,616 in favor of E. Hanson. No later information.

GINZA COPPER CO.

UTAH

Idle. Mine near Kelton, Boxelder county, Utah. Operations stopped in 1915 after considerable prospecting had failed to locate ore of commercial grade. Described Vol. XI, Copper Handbook.

GLEN ALLEN MINING CO.

UTAH

Address: Box 88, Park City, Utah.

Officers: J. B. Allen, pres.-gen. mgr.; W. F. Normandy, v. p.; J. S. Grace, sec.; Prince Francesco Rospigliosi, treas., with S. A. King, Russel Schuller, Nash Rockwood and R. H. McNeill, directors.

Inc. May 31, 1918, in Utah. **Cap.** \$2,000,000; \$1 par; assessable; issued 1,730,799 shares. Annual meeting in June. Secretary acts as transfer agent.

Property: 10 claims, patented, in Glencoe canyon, 3 miles S. E. of Park City, including the old Glencoe mine, a silver-lead producer. Also controls by stock ownership the Second Ontario Mining Co., which owns 12 claims. Veins carry complex ore carrying gold-silver-lead-zinc-copper and iron, one vein opened for 1,500' said to show 30,000 tons mill ore.

Development: 200' vertical shaft and a 2,250' tunnel, with total workings of 3,500'. Management claims 50,000 tons ore blocked out with average assays of 10% lead, 10 oz. silver, 16% zinc and $\frac{1}{2}\%$ copper.

Equipment: includes 50 h. p. hoist and 6-drill compressor. A 225-ton concentration mill with flotation unit was completed in 1921. Although comparatively high in silver and lead, the zinc content has made the ore undesirable for smelting, but differential flotation is expected to solve the problem. Tests have shown a 90% recovery. Examined by J. S. Weeks and Frank D. Pagliuchi.

In November, 1921, foreclosure proceedings were begun by Prince Rospigliosi, under \$300,000 mortgage notes, dated Sept. 8, 1920.

GLENWOOD MINING CO.

UTAH

Office: 1102 West Seventh South St., Salt Lake City, Utah.

Officers: E. P. Mowers, pres. and gen. mgr.; N. W. Sonnedecker, v. p.; M. L. Grovenor, sec.-treas.

Inc. Feb. 21, 1901, in Utah. **Cap.** \$30,000; shares 10c par; assessable; increased 1912, to \$125,000, shares 25cts. par.

Property: 8 claims, patented, in Big Cottonwood district, 6 miles from a railroad, opened by shafts and tunnels, with about 1,600' of workings. No recent information.

GLOBE CONS. MINING CO.

UTAH

John Cleghorn, pres.-gen. mgr., Boston Bldg., Salt Lake City. Utah.

Shares are assessable; $\frac{1}{2}\%$ assessments became delinquent on July 30, and Nov. 14, 1921.

Property: located in American Fork Canyon, said to show limestone cut by fissure veins with lead-silver ore.

Developed: by tunnels—main tunnel had a length of 800' early in June, 1919. Management claims to have a good tonnage of milling ore. Reported to have cut full face rich copper-gold-silver ore, November, 1921, in Read & Benson lime beds, by crosscut driven from Holden drainage tunnel. Ore is in Silver Wave claim, leased by **American Leasing Co.**

GODIVA MINING CO.

UTAH

Office: 735 Kearns Bldg., Salt Lake City, Utah. Mine office: Eureka, Juab county, Utah.

Officers: E. W. Packard, pres.; J. C. McChrystal, v. p. and gen. mgr.; J. E. Berkley, sec.; E. O. Howard, treas.

Cap. \$1,000,000; \$1 par. In 1919, 144,000 treasury shares offered to public at 30c. Financial statement for 1918 showed receipts from ore sales, \$49,260; expenditures included \$20,502 paid lessees and \$14,029 for development. Cash on hand, January 1, 1919, \$4,112. Shares are assessable; 1c assessment became delinquent on August 1, 1921.

Property: 64 acres of patented claims in Tintic district. Only leasing done for some years, company not operating on account of settlement of estates.

Development: by 1,200' shaft, with a winze 150' below that level. New work in 1918 amounted to 1,057'. Good lead-silver ore is said to have been opened on the 1,300' and 1,350' levels.

Equipment: 250-h. p. hoist, compressor, 100-ton concentrator, ore bins, buildings, etc.

From 1908 to April 1, 1917, production was 13,701 tons of crude ore and 2,861 tons of concentrate, worth \$805,687. In 1916 zinc and silver-lead ores yielded \$93,000, mostly from 700' level. In 1918, ore mined totaled 1,800 tons, average value, \$37.13 per ton.

Rumored late in 1920 that property had been sold, but confirmation is lacking.

GOLD BOND MINING & MILLING CO.

UTAH

Idle. **Last address:** 27 Latimer Block, Salt Lake City, Utah.

Officers: A. A. Crome, pres.; Walter Crome, v. p.; Wm. Crome, sec.-treas., with W. C. Howe and C. F. Stanley, directors.

Inc. 1898, in Utah. **Cap.** \$25,000; 5c par; assessable; 200,000 shares outstanding.

Property: 2 unpatented claims, 4 miles from a railroad, Tooele county, shows a contact fissure vein, traceable on surface and carrying streaks of copper, gold, silver ore in limestone formation. Assays average 4% copper. Is merely a prospect reported to have good showings. Developed by a shallow shaft and 120' tunnel, with about 300' of workings. No recent information.

GOLD CHAIN MINING CO.

UTAH

Provo, Utah. **Mine office:** Mammoth, Juab county, Utah.

Officers: C. E. Loose, pres. and gen. mgr.; J. T. Farrar, v. p.; P. G. Peterson, sec.-treas., with G. Simmons and John R. Turloes, directors. W. D. Loose, supt.

Inc. Dec., 1910, in Utah. **Cap.** \$250,000; shares 25c par. Listed on Salt Lake Exchange.

Dividends: to date, \$130,000. Company absorbed the Ajax Mining Co., said to have paid upwards of \$1,000,000 in dividends.

A dividend of 1¢ per share declared at end of 1920.

Property: the Gold Chain group and Ajax mine in the Tintic district. Development on the 1,500' level opened an orebody averaging 15 to 20 oz. silver, 40 to 50% lead and \$2 to \$3 gold per ton.

Development: new work in 1919, was being done from the 1,800' level of the Empire Mines Co.

Operations were entirely in the hands of lessees in 1920.

Equipment: hoist, 17-drill compressor, and electric motors.

Mine is operated jointly with the Ophongo, and equipment is under joint ownership.

GOLD CROWN MINING & MILLING CO.

UTAH

Address: Milford, Beaver county, Utah.

Officers: A. L. Cullimore, pres.; C. G. Johnson, v. p.; S. L. Swanson, sec.-treas.; James Kirk, mgr.; W. E. Yardley, asst. mgr.

Cap. \$10,000; shares \$1 par.

Property: 7 claims and lease on another in Star district, Beaver county. Some rich lead-silver ore opened. Reported in May, 1919, that nine cars

of ore had been shipped, mainly from 300' level, said to assay 20-25% lead and 45 oz. silver.

Small ore shipments were continued during 1920 and early in 1921.

GOLDEN EMMA MINING CO.

UTAH

Geo. F. Busch, pres. and mgr., 426 Vermont Bldg., Salt Lake City.

Cap. \$1,000,000; shares \$1 par.

Property: 30 claims, under development in 1918. No recent report.

GOLDEN REEF CONS. MNG. & DEV. CO.

UTAH

Address: 22 Keith Emporium Bldg., Salt Lake City, Utah.

Officers: D. P. Rohlfing, pres. and mgr.; Leon Sweet, v. p.; H. S. Young, sec.-treas., with L. Simons, J. Rosenberg, C. B. Stewart and David Spitz, directors.

Cap. \$100,000; shares 10c par; 800,000 shares outstanding.

Property: about 750 acres, in Beaver county, about 5 miles N. of the Horn Silver mines, developed by a 2,000' tunnel and a 450' double-compartment shaft with four levels.

Work was resumed in November, 1919, after a shutdown of several months. No recent report.

GOLDEN RELIEF MINING CO.

UTAH

Address: Provo, Utah. Ben. H. Bullock, mgr.

Property: located in Santaquin district, was under development in the fall of 1919. No later report.

GOLD HILL MINES DEVELOPMENT CO.

UTAH

Main office: 425 Atlas Block, Salt Lake City, Utah. Mine office: American Fork, Utah.

Officers: Theo. Nicholes, pres. and gen. mgr.; A. J. Weber, v. p.; H. J. Fitzgerald, sec.-treas.

Inc. July, 1916. Cap. \$1,000,000; par \$1; 300,000 in treasury; 290,000 sold. Increased 1916 from \$50,000; 10c par; assessable.

Property: 9 claims in American Fork district, Utah county, on Miller Hill. Ledge said to show copper ore, with lead, gold and silver.

Development: by 3 short tunnels, lowest driven to open ore found in upper tunnel.

GOLD SPRINGS MNG. CO.

UTAH

Defunct many years ago.

GOLDSTRIKE BONANZA MINING CO.

UTAH

Probably dead, see Goldstrike Con. Both companies described in Vol. XIII.

GOLDSTRIKE CONSOLIDATED MINING CO.

UTAH

Dead. Mail sent Rolla E. Clapp, pres., returned, from former office, 603 Newhouse Bldg., Salt Lake City. Described in Vol. XIII.

GOLDSTRIKE MINING & LEASING CO.

UTAH

Mail returned, 1919, from former address, 603 Newhouse Bldg., Salt Lake City, Utah.

Officers: H. G. Snyder, pres.; E. J. Lund, v. p.; Rolla E. Clapp, sec.-treas., with Clyde McQuarrie, Louis R. Lund and H. A. McQuarrie, directors. Inc. April 16, 1915. Cap. \$100,000; shares 10c par.

Property: lease Nos. 1 and 2 on Hamburg claims of Bull Valley Gold Mines Co., 3 claims of the Herd Girl group, Last Chance and Cripple Creek groups in Goldstrike district, Washington county, Utah. Said to show gold ore occurring in fissure vein, 4' wide and averaging from \$7 to \$20 per ton. Ore reserves: 10,000 tons blocked out, according to published reports.

Development: 500' adit, at depth of 300' with several winzes, drifts and upraises.

Equipment: two 3-stamp mills of 20 tons daily capacity, 20-h. p. engine and compressor.

No recent report, probably idle. The Goldstrike district had a boom several years ago, but is at present inactive.

GRAND CENTRAL MINING CO.**UTAH****Office:** Provo, Utah. **Mine office:** Mammoth, Juab county, Utah.**Officers:** Jos. T. Farrar, pres.; H. L. Holbrook; v. p.; Preston G. Peterson, sec.-treas., Col. Edwin C. Loose, gen. mgr.; W. D. Loose, supt.**Inc.** Feb., 1902, in Colorado. **Cap.** \$600,000; increased 1909 from \$250,000; shares \$1 par, non-assessable; issued 600,000. Stock listed on Salt Lake Exchange.**Dividends:** in 1914, 15c per share; in 1915, 2½c; in 1916, 8c; in 1917, 16c; in 1918, 12c.; in 1919, 4c; in 1920, 7c; in 1921, 1c to Jan. 21; 1¼c No. 75) on Dec. 20; total, \$1,895,000.**Property:** the Grand Central is the deepest mine of the Tintic district. It adjoins the Centennial Eureka and is opened to the 2,600' level, carrying a main ore channel the full length of the property. The orebody is 200' wide in places and of low average grade, though it is the largest orebody in the Tintic camp. In 1920, mine was producing from the 540' to the 2,100' levels. Mine reopened and regular shipments begun Dec. 29, 1921. Seventy leasers at work, 1922. Shipments, about 200 tons weekly. Mine sold to Chief Cons., 1922.**Equipment:** includes hoist, tramway, electric power and a compressor, installed 1920.**Production:** about \$10,000,000 to date.**GRAND RIVER PLACER CO.****UTAH****Office:** 201 Felt Bldg., Salt Lake City, Utah.**Officers:** O. W. Kumrow, pres.; Leo Erdman, v. p.; W. H. Penner, sec.-treas., mgr.**Inc.** 1918, in Utah. **Cap.** \$100,000; shares 10c par; 300,000 shares issued; 700,000 in treasury; assessable; a 10c assessment became delinquent, August 5, 1921. Annual meeting, first Monday in July.**Property:** 3,000 acres of placer ground, at Grand River, Grand county, Utah. Gravel runs from 80 cents to \$7 per cu. yd. Equipped with a Mitchell amalgamator of 35 tons capacity. Expended \$6,000 in 1918. No production reported.**GRANITE COPPER CO.****UTAH****Address:** Beaver, Beaver county, Utah.**Officers:** A. L. Fotheringham, pres. and mgr.; Jos. McEwen, v. p.; J. F. Tolton, sec.-treas., at last accounts.**Cap.** \$1,000,000. Shares, \$1 par.**Property:** the King of the Hills mine in the Mineral range between Milford and Beaver, has a 2' vein, carrying high-grade silver-lead ore with some copper.

Opened by a 250' shaft and 1,100' tunnel. About \$25,000 has been spent on the mine. No recent report, probably idle.

GRANITE MINING & MILLING CO.**UTAH****Address:** Santaquin, Utah.**Officers:** F. O. Ryland, pres.; Jos. Tietjen, v. p.; Jas. Goodall, sec.; C. A. Lindstrom, treas.-supt., with T. B. Heelis, R. J. Armstrong and Jos. Crook, directors.**Property:** 12 claims, unpatented, near Santaquin, includes the Granite mine. Claims show limestone with ore-bearing fissures, carrying replacement deposits of copper and silver-lead ore developed by 1,000' tunnel. No recent report, probably idle.**GRATER CONS. MINES CO.****UTAH**Reorganized as **Mutual Metal Mines Co.**, which see.**Address:** 201 Ness Bldg., Salt Lake City, Utah.**Inc.** Feb., 1919, in Utah. **Cap.** \$1,500,000 \$1 par; over 1,000,000 treasury shares. Assets, Jan. 1, 1921, \$25,000. Reorganized and capitalization reduced July 12, 1921.**Property:** 76 claims in Big Cottonwood Canyon. Company plans driving a 5-mile tunnel to unwater mines and cut mineral bearing fissures of

Carbonate Cons., Cardiff, Prince of Wales, and several other companies. The project has merit and is certainly ambitious.

GREAT COPPER KING MINING CO.

UTAH

Inc. Aug., 1904 in Utah. Cap. \$50,000; shares 10c par; issued, \$47,500; assessable; last assessment 1/10 ct. delinquent March 7, 1914.

Property: 10 claims, unpatented, including 4 claims, 1 fractional, held under bond and lease, near the mouth of Little Cottonwood canyon, 7 miles from Alta.

Development: by shallow shafts and a 300' tunnel with about 800' of workings, showing auriferous and argentiferous copper and lead ores. Ore occurs in fissure veins as contact deposit in granite and quartzite.

Samples taken from main tunnel on 300' level said to assay from 19-33% copper. J. E. Smith, a director, was developing property under contract in 1916. No later information.

GREAT DIVIDE MINES CO.

UTAH

Property purchased by the **Homestake Tunnel & Copper Co.**, which see. **Office:** 521 Atlas Block, Salt Lake City, Utah. John B. Taylor, supt.

Inc. Aug. 15, 1903, in Utah. Cap. \$2,000,000; \$5 par.

Property: 108 claims, mainly patented, 1,735 acres, 600 considered as well mineralized, with 160 acres mill and smelter sites, lying on the Tooele side of the Oquirrh mountains and on the summit of the range, west of the holdings of the Utah Consolidated. Property shows Cambrian quartzite, monzonite-porphyr and altered limestone, with a number of fissure veins and contact deposits between limestone and quartzite. Claims cover 11,600' on the westerly course of the mineralized limestone beds of Bingham. This tract is 2 1/6 miles from E. to W. and 10,800' N. S., and contains the apexes of many ore-bearing fissures, and the westerly extensions of the ore-bearing limestone bed worked in the Utah Consolidated, Bingham New Haven, Utah Apex and Yampa Mines.

Development: includes the 400' Homestake tunnel in Pine Canyon, 525' North tunnel at 6,600' elevation, and the 2,457' Spring tunnel. These tunnels are prospect work only, but ore is cut in the last named at 1,050' and shows a 5' width for 40' along the drift and in a 25' raise. A vertical E. W. fissure 100' wide is also cut at 2,250' from the portal and shows kidneys and stringers of silver-lead ore.

Equipment: includes a 35-h. p. electric plant, with a 1-drill compressor, and there are 10 buildings, including a small power house, 2 smithies, a bunk house, stable and dwellings. Electric current is taken from the Telluride Power Co., over this company's private line from the sub-station at Bingham.

GREAT WESTERN GOLD & COPPER CO.

UTAH

Merged with Mountain Lake Mining Co. and Thor Mining Co. under title of **Great Western Mines Co.**, which see.

GREAT WESTERN MINES CO.

UTAH

Office: Knight Bldg., Provo, Utah.

Officers: O. Raymond Knight, pres.; J. W. Knight, v. p.; R. E. Allen, sec.-treas., with Jas. H. Movle, W. I. Snyder, R. A. Brighton and K. S. Jordan, directors.

Inc. 1916, in Utah. Cap. \$300,000; 10c par; increased in 1920 from \$150,000. Listed on Salt Lake City Exchange. Company is a merger of the Great Western Gold & Copper Co., Mountain Lake Mining Co., and the Thor Mining Co., all described in Vol. XI, Copper Handbook.

Property: 98 claims, in the Big Cottonwood and Snake Creek districts, in Salt Lake and Wasatch counties.

Ore: gold, silver, copper and lead, mainly in contact deposits; no estimate of ore in sight.

Development: 500' of shafts, 8,500' of tunnels, 350' winzes and raises, and 2,000' of crosscuts. Ten cars of copper ore said to have been shipped from the property. Company has a transportation agreement with the Snake-

Creek Mining & Tunnel Co., a subsidiary of the Judge Mining & Smelting Co., for use of the 14,500' tunnel.

GREEN MOUNTAIN MINING & MILLING CO. UTAH

Probably idle. No 1917-19 returns secured.

Officers: Dr. R. S. Millbee, Marshfield, Wis., pres.; Dr. H. H. Millbee, v. p.; A. E. Goodell, sec.; S. Amberson, treas., with B. S. Rich, directors.

Inc. 1915, in Utah. **Cap.** 1,500,000 shares; 100,000 issued.

Property: Green Mountain group in Miners Basin, Grand county, Utah, 35 miles S. E. of Cisco, on the D. & R. G. R. R., formerly owned by the Green Mountain G. & C. Mining Co., and fully described in Vol. XI. Copper Handbook.

Ore: gold, silver and copper, low-grade ore said to average about \$8 per ton; also said to show some high-grade ore. Developed by Dewey cross-cut tunnel.

Equipment: 30-h. p. gasoline engine, 2 sets of power drills, compressor and pumps.

GRIGGS-HUISE LEASING CO. UTAH

Dead. Former address: Thos. O. Keefe, supt., Eureka, Utah.

GRUTLI MINING CO. UTAH

Described in Volume XIII. Reorganized, November, 1917, and now known as the Eureka Bullion Mng. Co., which see.

HANAUER SMELTING WORKS UTAH

At Salt Lake City, Utah. Absorbed by American Smelting & Refining Co., and plant dismantled.

HELLGATE MINING CO. UTAH

Address: Dr. Hugo Rettich, pres., 52 W. 68th St., New York City. E. O. Leatherwood, v. p.

Inc. Feb. 5, 1916, in Utah. **Cap.** \$150,000; par 25¢.

Property: the Hellgate, No. 2, 3 & 4 claims between Superior and Peruvian gulches, in heart of Alta Cottonwood camp. Cardiff fissure said to cross claims. But little work done, 1918-1920.

Property drained by Wasatch Mines Co. drain tunnel. The Frederic, Crown Prince, Alaska and Alaska Extension, above the Hellgate group, are owned by Dr. Rettich personally.

HIGHLAND BOY GOLD & COPPER MINING CO. UTAH

Controlled by Utah Cons. Mining Co., and described under that title.

HINMAN MINING CO. UTAH

H. W. Hinman, pres., F. G. Morse, sec., 168 S. Main St., Salt Lake City, Utah.

Property: the old Pocahontas lead-silver mine, 6 claims, located 6 miles from Gold Hill. A tunnel was driven to get under the ore disclosed in the 130' incline shaft above, and some ore was shipped in 1918.

HOMESTAKE T. & C. CO. UTAH

Address: John B. Taylor, 678 E. So. Temple St., Salt Lake City, by whom company is controlled.

Officers: J. H. Hurd, pres.; John B. Taylor, v. p.-mgr.; Walter A Cook, sec.-treas.

Inc. 1906, in Utah. **Cap.** \$100,000; shares \$5 par; assessable; fully issued. Is a close corporation, with only 5 stockholders. The Western Mining & Milling Co. (q. v.) is a subsidiary.

Property: 30 claims, in Pine Canyon, West Mountain section, Tooele county, with water rights, tunnel rights and franchise for a deep tunnel from Pine Canyon into the Bingham district; also several hundred acres of bench lands, and an 800-acre smelter site, 4 miles from the International smelter. Claims show bedded veins with lead and copper ores.

Also owns by later purchase, property of the Great Divide Mines Co. Homestake holdings were under bond and lease for 12 months ending July 1, 1919. No later information.

HOPE OF ISRAEL MINING CO. UTAH

Ben H. Bullock, pres., Provo, Utah; Noro A. Bullock, sec.-treas.

Inc. 1918, in Utah. **Cap.** \$50,000; shares 1c par.

Property: at Santaquin, being developed by tunnel said to have opened up low-grade lead-silver-copper ore.

HORN SILVER MINES CO.

UTAH

Office: 27 Cedar St., New York. Operating office: McCornick Bldg., Salt Lake City, Utah. Mine office: Frisco, Beaver county, Utah.

Officers: Jacob Neadle, pres.; Alex. B. Simonds, v. p.; M. S. Hirschberg, sec.; Harvey N. Wadham, treas., with Geo. A. Critchlow, A. B. Simonds, Jacob Neadle, W. R. Britton, Chas. Brenneman, S. T. Perrin, H. N. Wadham and H. S. Young, directors. Wm. H. Hendrickson, mgr.

Is a reorganization of the Horn Silver Mining Co., which was incorporated in 1879 in Utah, with capital of \$10,000,000; shares \$25 par. Stock in old company exchangeable for stock in the new on an equal basis.

Inc. Oct. 17, 1917. **Cap.** \$400,000; \$1 par; all issued. Bankers Trust Co., New York, registrar. Annual meeting 3rd Thursday in August. Listed on New York Curb, but not on quotation sheets or lists.

Dividends: old company paid \$5,642,000 in dividends up to 1907. Three dividends of 5c each were paid in 1916, two by the former company and one by the present. Two 5c dividends were paid in 1917, and one of same amount in 1918. None since. Statement for 1919 (last issued) shows receipts from ore shipments \$149,668, compared with \$181,235 in 1918; miscel. income, \$4,345, compared with \$4,513; operating expenses, \$151,739, against 1918 figure of \$147,864; general expenses, \$41,581, compared with \$20,383; net profits, \$2,071, compared with \$33,371 in 1918; \$27,283 in 1917 and \$62,798 in 1916.

Property: 19 claims, 9 patented. The mine is extensively developed, and has been a large producer of zinc, lead, silver and gold, with some copper as a by-product. The old bonanza ores extended down to depth of about 800', with silver ores on the footwall and copper ore on the hanging. Main orebody was lost at 900' and present company's main object is to find its extension below that level.

Development: by 1,200' shaft and considerable work done on the lower levels. Last report for year 1919 shows 1,704' of work on all levels. The north 900 and 1,000' levels show shipping ore. In addition the low grade ores and tailings are estimated at 180,000 tons and carry workable values.

Production: in 1916, 16,567 tons of ore were shipped, made up of 8,504 tons lead-silver ore, 3,986 tons zinc-lead, 102 tons zinc, 1,237 tons copper and 2,739 tons old slag. In 1917, output was 11,736 tons of ore, consisting of 10,507 tons lead ore, 131 tons zinc ore and 1,098 tons copper ore. In 1918, 12,528 tons, consisting of 11,712 tons lead ore, 170 tons copper and 646 tons lead concentrates.

In 1919, company shipped 19,469 tons lead, zinc and copper ore, and 1,816 tons lead concentrate, for which it received \$149,668; most of the ore came from above the 700' level. No official report was issued for 1920, but it is understood that ore shipments of 1,000 tons per month were made during at least part of the year; and in 1921 some shipments of milling ore were made to the Tintic Milling Co.

HORN SILVER MINING CO.

UTAH

Reorganized, 1916, as **Horn Silver Mines Co.**, which see.

HOWELL MINING CO.

UTAH

Office: 209 Felt Bldg., Salt Lake City, Utah.

Officers: T. L. Walden, pres.-mgr.; M. J. McGill, v. p.; J. H. Deming, sec.-treas.; with Jas. Burke and T. H. Paull, directors.

Inc. in 1910. **Cap.** \$600,000; \$1 par; 555,000 shares outstanding. Assessments of 1c a share levied March and Sept., 1921, and No. 13, Jan. 1922. Listed on Salt Lake Exchange. Shares sold 3½-17c in 1918; 7-12½c in 1919; 4½-11c in 1920; 6¾-12c in 1921 to June.

Property: an old mine, formerly known as the Baby McKee, 7 patented claims, in the Alta-Cottonwood district, about 25 miles S. E. of Salt Lake City, adjoins the Cardiff property on the east. Claims cover strike of

Howell vein, said to be traceable on property for over a mile, with strike N. E.-S. W. and 4' width. Country rock is quartzite and limestone. **Ore:** silver, copper, lead, zinc and antimony, said to average \$20 to \$50 per ton.

Development: 150' of shafts, and over 1,800' of tunnels. The main tunnel is in about 2,000'. It will have a back of 300' below old workings in the Baby McKee fissure and is reported to have cut streaks of good ore in fall of 1920. Shipments were made prior to 1910. Development work only is being done; several small fissures have been cut.

IBAPAH GOLD MINING CO.

UTAH

Property: the Queen of Sheba mine, in the south end of the Deep Creek country, Beaver county, Utah, an old gold mine credited with a production of \$80,000. Mine shows vein 5-18' wide. Pay ore occurs in shoots assaying from \$10-\$13 per ton.

Development: by an 1,187' main tunnel, several short tunnels and a 376' raise.

Equipment: includes a small mill.

Worked under a 3-year lease from 1914 by C. E. Johnson. No later information.

IBEX GOLD MINING CO.

UTAH

A Knight Investment Co. property.

Address: Knight Blk., Provo, Utah.

Officers: O. Raymond Knight, pres.; Reed Smoot, v. p.; R. E. Allen, sec., with W. Lester Mangum, J. Wm. Knight and C. E. Loose, directors.

Property: the Ibox mine, 40 patented claims, in the Detroit (Joy) district, Millard county, 35 miles from Oasis, located nearly 40 years ago. Claims cover 2 horizons of limestone, both cut by porphyry dikes and intrusives. Ore occurs in veins and bedding offshoots, (the veins being 25-100' wide), and carries 2-20% copper, up to 3 oz. silver, and \$1 to \$20 gold per ton.

Development: by 2 shafts, 500' and 600', and a tunnel.

A former company failing in winter of '94-'95, Jesse Knight took the property up in 1906 and did some work. Idle from 1907 to Nov. 24, 1915, when property was leased to the Detroit Copper Mng. Co. for 5 years under a \$100,000 bond. In 1919, the lease was taken over by the **Monarch Cons. M. Co.**, which see.

IMPERIAL LEAD MINING CO.

UTAH

Office: 406 Hooper Bldg., Salt Lake City.

Officers: W. Mont Ferry, pres.; J. H. Turner, mgr.; Frank Jardine, supt.

Assessments on shares were levied summer of 1920 and in January, 1921.

Property: in West Tintic district, Tooele county, said to show a 6' vein of lead-silver ore, assaying 40% lead and 10 oz. of silver.

Shipments are reported for 1918-'19, attaining a substantial tonnage in 1920. Operations largely suspended in December, but were to be resumed early in 1921.

INDEPENDENCE MINING CO.

UTAH

Address: A. G. Mattson, Eureka, Utah.

Officers: A. G. Mattson, pres.; P. J. Fennell, v. p.; Harold Shriver, sec.; Robt. Kallander, treas., with W. F. Shriver and Enoch Newman, directors.

The last assessment, $\frac{1}{2}$ c a share, was delinquent March 1, 1921.

Property: a group of claims near the Copper Leaf, in the Tintic district. Company bought the old mill and other equipment of the Bullion Beck & Champion Mining Co. at Eureka. A shaft is being sunk and electrically-driven machinery erected. Shaft had reached 300' in April, 1921. Company spent \$28,000, and owed \$10,000 at last account.

INDEPENDENCE SILVER MINING CO.

UTAH

Address: O. Holm, pres., St. Paul, Minn. **Mine address:** Edward Bardsley, mgr., Milford, Utah.

Property: 12 claims in Beaver Lake district, 6 miles west of Reed station on the railroad, and near Milford, is being developed by new 100' shaft.

sinking to 500' depth; produced 145 tons of lead-silver ore in Aug., 1921, from 35' level.

Mine equipped, 1921, with machinery.

INDIAN PETE MINING & MILLING CO.

UTAH

Address: Hans C. M. Christensen, sec.-treas., 109 South West Temple St., Salt Lake City.

Assessment No. 12 of $\frac{1}{2}$ ¢ per share levied Oct. 15, 1921; No. 13 of $\frac{1}{2}$ ¢, Nov. 15, 1921.

INDIAN QUEEN CONSOLIDATED MINING CO.

UTAH

Office: Provo, Utah. **Mine office:** near Newhouse, Beaver county, Utah.

Officers: O. Raymond Knight, pres.; L. N. Morrison, v. p.; R. E. Allen, sec.-treas.; K. S. Jordan, gen. mgr.; J. W. Knight, directors.

Inc. 1907, in Utah. **Cap.** \$150,000; shares 10c par. Listed on Salt Lake Stock Exchange.

Property: 39 patented claims in Newhouse district.

Development: by 3 tunnels, 4,700', 300' and 200' long, respectively; also prospect tunnels and shafts.

Equipment: includes compressor, drills, blower and electric power. Part of the mine has been worked by lessees.

Shipments of lead-silver-gold ore were made in 1918.

INTERMOUNTAIN MINING & INDUSTRIAL ASS'N

UTAH

Thos. B. Crawford, sec., Ouray, Colo.

Inc. 1905, in Arizona. **Cap.** \$5,000,000; par \$1.

Property: Mystic Shrine group of claims, at Bingham, which adjoins property of Utah Copper Co. Evidently idle and for sale.

IOWA COPPER MINING CO.

UTAH

Address: Park City, Utah.

Officers: L. R. Perry, pres., Forrest City, Iowa; D. G. Scott, v. p.-gen. mgr.; R. T. Kimball, sec.-treas., with J. Carson and D. E. King, directors. Dave Scott, supt.

Cap. \$100,000; 10c par; 750,000 issued; assessable; last assessment, 1c per share, levied June, 1920. Ore sold, 1917, was valued at \$5,740, and in 1918, at \$2,277.

Property: 4 patented claims, and 2 unpatented claims, 180 acres, in Big Cottonwood district, 1,000' N. W. of Silver King Coalition.

Development: by tunnel, with 200' incline in ore and several hundred feet of workings, mainly along a limestone quartzite contact.

In 1917 a compressor and other mining machinery was installed. Several shipments were made, yielding as high as \$900 per carload. Company is working only 3 or 4 men, and shipped 125 tons in 1919. Reported November, 1919, that during the past year, \$2,500 had been spent on new equipment, and 550' of new work done.

In 1920, a crosscut was driven on the 200' level. No recent information.

IRON BLOSSOM CONSOLIDATED MINING CO.

UTAH

Office: 11 Knight Bldg., Provo, Utah.

Officers: O. Raymond Knight, pres.; J. Wm. Knight, v. p.-gen. mgr.; R. E. Allen, sec.-treas., with A. M. Knight, directors. Frank Birch, asst. mgr.

Inc. Nov. 7, 1899, in Utah. **Cap.** 1,000,000 shares; 10c par; assessable; all outstanding. Listed on Boston Curb and Salt Lake City Exchange.

Balance sheet for Dec. 31, 1920, shows: assets of \$1,336,563, including \$1,156,206 for property and plant, \$53,500 for notes, \$110,072, cash, and \$12,000, Liberty bonds; liabilities include \$1,098,806 for depletion, accounts and notes, \$13,751, and \$122,305, surplus. Receipts were \$387,152, of which ore sales were \$359,642; expenditures \$403,156, covering \$95,566 for operations, \$171,158 to lessees, and \$50,000, dividends. Net operating loss of 1920 was \$3,400.

Dividends: \$400,000 in 1913; \$330,000 in 1914; \$350,000 in 1916; \$250,000 in 1917; \$75,000 in 1918; \$50,000 in 1919; \$50,000 in 1920; $2\frac{1}{2}$ ¢ a share or \$25,000, Dec. 20, 1921. The total is \$3,310,000, or \$1.30 per share.

Property: 15 claims, patented, 147.75 acres in the Tintic mining district, Juab county, Utah. The Iron Blossom mine is in limestone cut by a large fissure vein on which the orebodies are aligned.

Development: property is opened to a depth of 2,200' with about 12 miles of workings.

The future of the mine, apparently, depends on the development of the unexplored ground for only a limited supply of ore is available in the old mine and most of the ore now being shipped is mined by leasers. Diamond-drilling for 1,300' on the 1,900' level failed to disclose anything of value.

Company work in 1919 and 1920 was confined to the 1,700, 1,800 and 2,185' levels, but results were not satisfactory. In first half of 1921, good copper-silver ore was found above the 600' level, but development work is much curtailed.

Production: in 1918, amounted to 684,275 lb. copper, 624,547 lb. lead, 386,093 oz. silver, and 1,406 oz. gold. This ore is treated by the Tintic Milling Co.

All production, 1921, from lessees' operations.

IRON KING MINING CO.

UTAH

Address: Eureka, Juab county, Utah.

Officers: Col. C. Edw. Loose, pres.; Reed Smoot, v. p.; P. G. Peterson, sec., all of Provo, Utah. B. F. Grant in charge for A. S. & R. Co.

Cap. \$2,000,000; \$1 par; increased from \$1,000,000, July, 1917; assessable. Assessments of 1¢ a share have paid for development work. Listed on Salt Lake Exchange.

Property: 400 acres in Tintic district, near Eureka. Mine developed by shaft, 1,400' deep, July, 1919, and a 3,500' tunnel, planned to be driven 6,000'. The shaft will be sunk to the 2,000' level. The mine is said to show 100,000 tons of iron ore blocked out and ready for stoping. Mine closed down in 1912, owing to inability to market the iron ore at a profitable figure, was reopened in April, 1917. Development in 1920 was performed on the 1,000' and 1,565' levels.

Shipments of iron ore, for fluxing purposes, made possible by the new Goshen Valley R. R., began April, 1920, at rate of one car per day; the ore comes from above the 350' level. Reported early in 1921 that iron-orebodies were under lease to the A. S. & R. Co., and 500-ton shipments made weekly until November. Total shipments for 1921 were 509 carloads.

Equipment: a compressor and an electrically-driven double-drum hoist.

JAY HAWKES MINING CO.

UTAH

Dead. See Vol. XIV of this Handbook.

JEANNETTE COPPER MINING & MILLING CO.

UTAH

Address: via Vernal, Utah.

Officers: J. T. Fitch, pres.; F. B. Hammond, v. p.; C. R. Jones, sec-treas., with G. A. Storrs and W. H. Griffin, Jr., directors.

Cap. \$200,000; shares 20c par.

Property: 34 unpatented claims in the Uintah basin, Utah, 55 miles S. of Rock Springs, Wyo.

Development: by 1,000' of tunnels and shafts, costing \$10,000. Ore contains up to 20% copper and good gold and silver contents. Shipments were made in 1916. Mine idle, 1916-20, until June when resumption of work was reported; presumably idle again. Due to a long haul, this venture is not likely to be profitable, unless ore is treated on the ground.

JOE BOWERS MINING CO.

UTAH

Office: 600 Dooly Bldg., Salt Lake City, Utah. **Officers:** John Dern, pres., Jas. F. Dunn, v. p.; A. Reeves, sec-treas., with G. H. Dern and Chas. E. Wild, directors.

Inc. June, 1898, in Utah. **Cap.** 700,000 shares; \$1 par; assessable; 547,442 shares outstanding. Listed in Salt Lake City. Annual meeting first Monday in April.

Property: 2½ claims, patented, 40 acres in the Tintic district, show silver-lead ore.

Is an old time producer, \$41,924 worth of ore being shipped 1899-1900. Not operated, 1921.

JOY MILLING CO.**UTAH**

Address: H. Green, sec., 205 Scott Bldg., Salt Lake City, Utah. Assessment No. 4 levied April 9, 1920.

JUDGE MINING & SMELTING CO.**UTAH**

Office: 1101-3 Deseret Bank Bldg., Salt Lake City, Utah. Mine P. O. Park City, Summit county, Utah.

Officers: G. Lambourne, pres. and gen. mgr.; M. C. Fox, v. p., with Wm. M. Bradley, Otto Ludeking, all of Salt Lake, and Adolph G. E. Hanke, of Cincinnati, O., directors. S. G. Taylor, treas.; A. H. Peabody, sec.

Operating staff: O. N. Friendly, gen. supt.; John Elsworth, supt. of mills. Inc. 1901, in New Jersey, as the Daly Judge Mining Co. Reorganized March 27, 1916, under present name. Cap. \$300,000; shares \$1 par; increased March, 1916 to \$500,000; 480,000 shares issued. Stock listed on Salt Lake Exchange. Annual meeting 3rd Tuesday in May.

Dividends: 100% in 1916, the same in 1917; 50% in 1918; two of 12½% in 1919; 37½% in 1920.

Income Account to Dec. 31st:

Year	Ore sales	Total Inc.	Expenses	Taxes, etc	Div'd	Deficit
1916....	\$839,435	\$2,212,271*	\$1,861,138X	\$39,750	\$435,000	\$123,617
1917....	953,729	992,863	884,905	49,408	480,000	421,450
1918....	701,401	1,090,342	865,533	46,468	240,000	61,659
1919....	711,847	724,898	526,741	61,951	60,000	s-76,206
1920....	675,677	984,924	842,089	49,914	180,000	87,079

* Includes \$1,320,000 for sales of stock; X includes \$1,310,180 paid for

Snake Creek M. & T.; s-surplus.

The company is a consolidation of the Daly Judge and Snake Creek Mng. & Tunnel companies. In May 1920, joined the Daly West and Park Utah Mng. companies in purchase of 76,000 shares, or control of the Daly Mng. Co., which see. Recently the same interests acquired control of the Daly West and Park Utah companies and all these mines are operated under same management.

Company's mine and 500-ton concentrator are just above Park City near the portal of the principal mine tunnel. The electrolytic zinc plant is 2½ miles from the town. The Daly, Daly West and Judge mines are connected underground and all mill ore is hauled for 1½ miles to concentrator at mouth of Judge tunnel.

The Park City district which lies near the summit of the Wasatch range, has yielded \$150,000,000 in silver-lead ores since 1870. The ores occur as lode deposits and closely associated bedded deposits in two N. E.-S. W. parallel zones adjacent to diorite porphyry. The bedded deposits mined to about 1,000' depth, are massive, granular sulphides replacing the limestone beds in two of the calcareous formations of the Quartzite series. The ore-bodies vary from a few inches to 10' thick, 500' to 800' long and at most 200' on dip.

The lode deposits cut both the bedded rocks and the porphyry, are as much as 30' in width, of steep dip and carry ore to greatest depth mined. At the Judge property 3 main fissure lodes the Daly, Back and Middle veins are worked. The ores are complex, containing galena zinc blende, chalcopryrite and tetrahedrite, with values in silver, lead, zinc and a little copper, in quartzite and jasper gangue.

Both smelting and milling ore are mined in the Judge group, the shipping ore carrying about 30 oz. silver, 50c gold, 16% lead, 1.25% copper, 8.25% zinc and 7.75% iron, compared with the concentrating ore with 14.5 oz. silver, 40c gold, 10% lead, 0.75% copper, 12.5% zinc and 5% iron. This mill ore makes a 4.5 into 1 lead concentrate and a 3 into 1 zinc concentrate.

Property: company has valuable holdings, about 2000 acres patented ground, covering 11,000' of a fissure vein system, in Park City district.

Development: to 2,500' level by main drainage tunnel. New work in 1918 amounted to 5,761' of which 10.98% is on the Daly vein, 64.65% on the Back vein, 24.37% on the Middle vein. The depth ranged from 300 to 1,400'. In 1917, the development definitely established the existence of an ore zone not previously known containing one of the largest deposits of shipping ore ever found in the mine.

Property of **Snake Creek Mng. & Tunnel Co.**, comprised 750 acres of patented mineral and 320 acres of other lands. A 14,500' drainage and transportation tunnel begun in 1910 and completed in 1916, serves this and adjoining properties. Tunnel has back of 2,800' at face, and is deeper at other points. In 1914, suit was brought by an irrigation company to prevent mining company from utilizing 4,500 gal. p. m. water; case now in U. S. Supreme Court.

Mine operations in 1921, opened a new orebody above the 900' level of the old Judge mine 4-5' thick, that averaged 35 oz. silver and 35% lead. At 8,000' from portal of the Ontario lower drain tunnel, a crosscut on the 1,800' level shows 5'-27' of shipping ore in several shoots, one over 300' long. Development work 1920, totaled 2,793'.

The concentrator and electrolytic zinc reduction plant are quite fully described by A. B. Parsons, Mng. & Sci. Press, Jan. 20, 1921; by L. W. Chapman, Chem. & Met. Engrg., March 20, 1920 and Geo. C. Heikes in E. & M. J., Dec. 11, 1920.

Equipment: includes 400-h. p. electric hoist and compressor.

The 450-ton wet concentrating plant with flotation unit for treatment of slimes, makes a zinc and lead product. There is also an electrolytic plant producing 12 to 15 tons daily of 99.95% zinc.

Production:

	1916	1917	1918	1919	1920	
Crude ore sold, tons....	4,164	7,247	9,633	7,075	9,150

1920....	483,390	650	7,877,121	2,664,005	359,186	969,123

Company is ably managed and has a very promising future.

JULIAN MINING & MILLING CO.

UTAH

Dead. Described Vol. XIII. Formerly operated at American Fork.

KEARNS-KEITH MINING CO.

UTAH

Out of business, property conveyed to the **Silver King Coalition Mines Co.**, of Park City, which see.

KENNEBEC CONSOLIDATED MINING CO.

UTAH

Address: 1105 Newhouse Bldg., Salt Lake City, Utah.

Officers: Ezra Thompson, pres.; Jas. D. Murdoch, sec., with A. T. Sanford, Shand Smith, W. G. Craig, Lynn H. Thompson and P. S. Keogh, directors.

Inc. in 1901. **Cap.** \$400,000; shares 1c par; 63,390 shares in treasury.

Company is a reorganization of the Kennebec Mining Co., effective Oct. 4, 1917; stock exchanged on equal terms and new company assumed obligations of old.

On the basis of 3c per share on their holdings, shareholders subscribed to a loan bearing 8% in June, 1917.

Property: 30 patented claims, about 400 acres, in the South Fork of the Big Cottonwood district, adjoins the Cardiff on the east and north and the Wasatch Mines and Columbus Rexall on the north.

Development: by a 700' incline shaft, a 3,000' lower tunnel and an upper tunnel.

Property is an old-time, but very small silver-lead producer. Inactive for some time, but in June, 1919, company levied an assessment of 3c per share to provide money for resumption of work. Last assessment, of 2½c. levied Feb. 21, 1921.

KENNEBEC MINING CO.

UTAH

Company reorganized in October, 1917, under name of Kennebec Consolidated, which see.

KENO M. & M. CO.

UTAH

Controlled by Knight Investment Co., Provo, Utah. **Mine office:** Frisco, Utah.

Officers: O. Raymond Knight, pres.; R. E. Allen, sec.-treas.; Knight Starr Jordan, gen. mgr.; R. S. Andrew, supt.

Inc. March, 1907. Cap. 500,000 shares; 10c par. Stock listed on Salt Lake Exchange.

Property: located in the Antelope mining district, Millard county, is in the development stage.

KENTUCKY-DOUGLAS MINING CO.

UTAH

Mail returned, 1918, from former address, care Roger Traweck, sec., 62 W. 3d St. N., Salt Lake City.

Officers: E. S. Holt, pres.-treas.; Thos. E. Brooks, v. p.; with T. S. Fowler, directors.

Inc. 1916, in Utah. **Cap.** \$1,000,000; \$1 par; 600,000 paid for property, 400,000 in treasury.

Property: 10 claims, in Silver Islet district, western Tooele county, said to show silver-lead ore in veins and deposits in limestone. at and near porphyry contacts.

Development: 150' crosscut tunnel, expected to cut vein at 250'. Is a prospect. Presumably idle.

KEYSTONE EXTENSION MINING CO.

UTAH

Mine near Bingham, in West Mtn. district, Salt Lake county, Utah. Company inactive for some time owing to heavy flow of water in mine workings. Property covers about 3,000' of the Keystone vein outcrop and shows ore said to average \$14 per ton in gold, silver, lead and copper values, from surface down to bottom of 165' shaft.

Development: by inclined shaft with drifts on vein, opening up stopes from which shipments have been made. The Montana Bingham Consolidated Mining Co. was to open the ground by its deep tunnel thus eliminating pumping costs and heavy wagon-haul charges on ore shipped.

KEYSTONE METALS REDUCTION CO.

UTAH

Office: Farmers Bank Bldg., Pittsburgh, Pa. I. N. Goff, gen. mgr.

Mine address: Polar Mesa, Grand Co., Utah.

Inc. 1920 in Delaware.

Company owns carnotite claims on the Colorado-Utah line. Uranium, vanadium and radium custom ores are also sent to the reduction plant at Cheswick, Pa. for refining.

KEYSTONE MINING CO.

UTAH

Offices: 163 S. Main St., Salt Lake City, Utah, and 32 Broadway, New York.

Officers: H. G. McMillan, pres.; Ernest Bamberger, v. p. and treas., with John Dern, E. O. J. Hanke, C. W. Saacke, Alfred Frank, John McGinnis, directors. L. B. McCornick, sec.; Herbert Cohen, asst. sec.; J. L. Tilton, asst. sec.

Inc. Sept. 12, 1902, in Wyoming. **Cap.** \$1,000,000; shares \$1 par; outstanding \$900,000; assessable last assessment 2c. December, 1915. Transfer

office: J. L. Tilton, 32 Broadway, New York. Empire Trust Co. New York, registrar. Listed on Salt Lake Exchange and on New York Curb as a prospect.

Property: 16 patented claims, 66 acres, in Uinta mining district, 3 miles S. W. of Park City, said to show silver-lead ore.

Development: 225' vertical shaft and 700' tunnel, work of former years. After settlement of litigation present company began active development through the Kearns-Keith shaft, June, 1920, and discovery of orebody, carrying 35-40% lead and 15 to 20 oz. silver was reported.

The property was rehabilitated in 1916, compressor and motor installed and exploration started. A suit against the Kearns-Keith Mng. Co. and the Silver King Coalition Mines Co., asking \$1,500,000 damages for alleged unlawful extraction of ore was pending, June 1916, but in December, 1919, the Silver King Coalition announced that this dispute had been settled.

KING COPPER MINING CO.

UTAH

Controlled by the Baileys of Salt Lake City. Property, located on the divide between Emigration and Red Butte canyon, 12 miles E. of Salt Lake City, shows 6' vein of copper carbonates on contact between quartzite and blue limestone. Is developed by 300' tunnel, principally in sandstone. Ore said to carry \$14 in gold, copper and silver.

KING DAVID MINING CO.

UTAH

Address: Provo, Utah. **Mine office:** Frisco, Beaver county.

Officers: O. Raymond Knight, pres.; David Evans, v. p.; R. E. Allen, sec.-treas.; K. S. Jordan, gen. mgr.

Inc. 1908, in Utah. **Cap.** \$500,000; shares 50c par; assessable; 67,000 issued. Shares listed on Salt Lake City Exchange.

Property: 63 claims, patented, 940 acres, adjoining the Horn Silver mine, and supposed to carry the extension of the Horn Silver vein. Claims are well mineralized. **Ore:** mainly silver-lead bearing, with small quantities of zinc and copper. **Development:** by 800' 3-compartment shaft and several prospect tunnels and shafts. Present work consists of drifting, sinking and diamond-drilling.

Equipment: includes two 80-h. p. boilers, a double-drum hoist, 5-drill air compressor, 14 machine drills, generator, blower and steel head-frame. Inactive 1919-1921.

KING OF THE HILLS MINE

UTAH

Address: Milford, Beaver county, Utah. Mine in Granite district, 25 miles N. E. of Milford, reported to have a 14 to 18' contact metamorphic vein of copper-lead ore in limestone, cut by porphyry.

Development: by tunnels. Equipped with concentrating mill, making a product carrying 10% copper, 42% lead and 10 oz. silver.

KING WILLIAM MINING CO.

UTAH

Office: 546 E. First South St., Salt Lake City, Utah. **Mine address:** Eureka, Juab county, Utah.

Officers: at last accounts; Chas. H. Blanchard, pres. and gen. mgr.; F. G. Morse, v. p.; W. A. Wright, sec.; N. G. Hall, treas.

Inc. 1907, in Nevada. **Cap.** \$1,250,000; \$1.25 par.

Property: 2 claims, patented, 16 acres, surrounded by the holdings of the Eagle & Blue Bell, Centennial-Eureka and Grand Central.

Development: is through the Eagle & Blue Bell workings, on the 500' and 1,000' levels, corresponding with the 1,400' and 1,900' levels of the King William. There are several shallow shafts.

In October, 1916, the mine was sold by the sheriff to a company that has 1,000,000 shares, on which an assessment of $\frac{1}{2}$ c each was levied. There is no information from the mine for 1917-21.

KNIGHT INVESTMENT CO.

UTAH

Offices: Knight Blk., Provo, and 817 Newhouse Bldg., Salt Lake City, Utah.

Officers: O. Raymond Knight, pres.; J. Wm. Knight, v. p.; R. E. Allen,

sec.-treas.; with Amanda M. Knight, W. Lester Mangum and Knight Starr Jordan, directors. R. S. Anderberg, asst. sec.

Controls 22 properties, ranging from prospects to successful dividend paying mines. The operating companies are as below:

Utah: in Tintic district, Big Hill Mng., Colorado Cons. Mines, Dragon Cons. Mng. Empire Mines, Ibex Gold Mng. Iron Blossom Cons. Mng. Swansea Cons. Mng., and Tintic Central M. & M. Co. In other districts; Bonneville Mng., Bingham Empire Mines, Great Western Mines, Indian Queen Cons. Mng., Keno M. & M., King David Mng., Miller Hill Mng. and North Bingham Cons. Mng. Also, Tintic Drain Tunnel, Tintic Milling and Utah Ore. Sampling companies are part of the organization.

Arizona: Bullion Mines Co.

Colorado: Rico Cons. Mines and Rico-Wellington Mng.

Nevada: Comstock-Phoenix Mng., Ely Amalgamated Copper and Lucky Boy Cons. Mng.

Company also operates the Knight Woolen Mills, Spring Canyon Coal, Eureka Hill R. R. Co., and other enterprises.

Each individual company is described under its title.

LADY BRYAN MINING CO., THE

UTAH

Address: Chas. T. Birchard, 18 Fremont St., Boston.

Officers: Ellery C. Wright, pres.; Chas T. Birchard, sec.-mgr.; J. Frank Batchelder, treas., with John Thomson, directors.

Inc. in Utah. Cap. \$1,000,000; par \$5; 80,816 treasury shares; assessable. Transfers at company's office. Annual meeting 1st Tues. in June.

Property: 5 claims, (2 patented) the Lady Bryan mine, in Star district, Beaver county, S. of the Moscow. Formation is limestone in contact with quartz monzonite, with silver-copper ore occurring as replacements in E. W. fissures. Some bismuth appears and ore is high in iron, making it desirable for fluxing.

Development: by 510' shaft. **Equipment:** gasoline hoist and 2 compressors.

Mine was something of an early-day producer and a former company is reported to have made shipments subsequent to 1910.

LAKEVIEW MINING CO.

UTAH

Office: Ogden, Utah. Mine office: Promontory Point, Utah.

Officers: W. H. Wattis, pres.; L. F. Farr, sec.-treas., with C. L. Farr and Jas. Wotherspoon, directors.

Inc. March 9, 1915 in Utah. Cap. \$50,000; shares 5c par; assessable; all issued to officers of the company. Annual meeting, March 9.

Dividends: to May, 1916, amounted to \$124,000.

Property: 15 claims, unpatented, 235 acres, at Promontory Point, Box-elder county, 3 miles E. of Saline on the S. P. R. R., shows zinc-lead ore in a contact deposit between limestone foot and shale hanging-wall. The ore-zone runs 35° W. and dips 35° N. E. Pay shoots are from 1'-20' wide and from 52'-250' along the strike. Assays reported to average 32% zinc, 5% lead, 2% iron, 16% insoluble.

Development: to 1,000' below the outcrop by 5 adits, from 250'-350' long. Zinc ore as shipped averaged 32%, and lead ore 26%.

Equipment: includes 600' tram and oil-driven Chicago Pneumatic compressor of 187 cu. ft. capacity.

Production: to July 1, 1917, 279 cars realized \$352,471, mostly from zinc carbonate ore.

Lessees shipped several hundred tons of lead-zinc ore in 1918.

The mine made quite a remarkable record. Located January 27, 1915, work was commenced March 9, with a small force and by December, 1915, all debts were paid, the mine was developed, equipped and shipping, a \$70,000 dividend paid to stockholders and a cash surplus remained in the treasury. Mine developed into a lead property with depth, sulphides replacing oxidized ore. Property examined and sampled by Pierre Peugeot, July, 1917.

In July, 1919, mine was again being operated in a small way under management of W. H. Wattis; company had approximately \$20,000 in the treasury.

Early in 1920, a shaft was reported to have reached 450', but work apparently ceased with the fall of metal prices.

LAST CHANCE MINING CO.**UTAH**

Address: Newhouse Bldg., Salt Lake City, Utah.

Officers: Jas. A. Hauerbach, pres.; F. O. Horn, sec.-treas

Cap. \$25,000; 10c each; assessable; 200,000 shares issued. Company is reported out of debt and amply financed.

Property: 1 patented claim adjoining the Cardiff, in the Big Cottonwood district, near Alta.

Development: 400' tunnel and 150' winze. Ore is said to assay 60-70% lead, and 50-75 oz. silver. Employs 3-4 men steadily on development.

LA VORE GOLD MINES CO.**UTAH**

Idle for past 5 years. **Address:** W. Scowcroft, Ogden, Utah. Mine is near St. George, Utah.

Officers: Willard Scowcroft, pres.; R. G. McQuarrie, v. p.; D. H. Morris, sec.-treas., with Irvine McQuarrie and Herrick McQuarrie, directors. Inc. 1915, in Utah. **Cap.** \$100,000; shares 10c par; 60,000 issued.

Property: 10 claims in the Goldstrike district, Washington county, said to show a vein 11' wide, averaging \$5 gold per ton.

LEHI-TINTIC MINING CO.**UTAH**

Address: J. S. Card, sec., 417 Boston Bldg., Salt Lake City, Utah.

Officers: Chas. Zabriskie, pres.; W. H. Trask, Jr., v. p.; Geo. B. Doyle, treas., with Geo. Klenke, and J. A. Barclay, directors.

Cap. 1,000,000 shares; 974,000 issued; assessable; assessment No. 37 of 1c., was levied in Sept., 1920. Assessments in 1921, ⅓c., June 14; ½c., August 14; 1c., Nov., 12.

Property: 12 claims in the Tintic district, about 4 miles from Eureka, shows silver-lead-gold ore in fissure vein.

Development: by 2,100' tunnel. Equipped with compressor and steam power. Reported early in November, 1917, that the tunnel had cut the Empire vein, assaying 28% lead, 6 oz. silver, and \$2 gold per ton. During 1919, development was performed on the 900' level, and a small output of lead ore was reported. In 12 months ending Sept., 1920, 1,900' of new work was performed, but ore of commercial grade and in sufficient amount apparently not discovered. Sterling Talmadge, geologist, concludes that upper workings are valueless and recommends opening lower vein at depth. By March, 1921, a shaft was 340' deep. A deep-shaft hoist has been added to the equipment.

Control of company is in dispute, and court on Sept. 26, 1921 ordered Nicholes fraction to surrender possession of mine to Chas. Zabriskie and others.

LEONORA MINING & MILLING CO.**UTAH**

Office: 18-20 E. First South St., Salt Lake City, Utah. **Mine office:** Milford, Beaver county, Utah.

Officers: John Matson, pres.-mgr.; B. H. Goddard, v. p.; H. E. Giers, sec.-treas., with L. H. Stohr and J. W. Chase, directors; C. W. Pettit, supt.

Inc. Dec. 19, 1903, in Utah. **Cap.** \$130,000, increased from \$100,000, January, 1920, shares 10c par; assessable. Listed on Salt Lake Exchange. Share sales varied, ¼ to 2c in 1919; 1 to 9c in 1920; 1 to 2¼c in 1921, to June.

Property: 13 claims, in the North Star district, near Milford, shows fissures in limestone carrying replacement deposits of gold, silver, zinc and lead ores.

Development: by tunnels of 1,500', 500' and 300' and new shaft 145' deep, being sunk, 1921. During 1920, 400' of extensions were made and ore was uncovered in a winze, assaying 7 oz. silver and 6% lead. Prospecting on

surface has opened a promising east-west fissure. A large body of 20-35 oz. siliceous ore was cut in 1921, and shipments started.

Equipment includes electric hoist and air compressor.

LION HILL CONSOLIDATED MINES CO.

UTAH

Described in Volume XIII. Property acquired in December, 1919, by the **Ophir Metals Co.**, which see.

LITTLE BELL CONSOLIDATED MINING CO.

UTAH

Office: Newhouse Bldg., Salt Lake City, Utah. **Mine office:** Park City, Summit county, Utah. Solon Spiro, pres and gen. mgr.; S. M. Bamberger, sec.; Joe Kemp, supt.

Inc. 1902, in Wyoming. **Cap.** \$1,500,000; shares \$5 par; non-assessable; fully issued. Began payment of 5c quarterly dividends, November, 1909, and up to and including September 2, 1910, had paid 4 quarterly dividends of \$15,000 each. Shares listed on Salt Lake Stock Exchange; 20% of stock owned by Daly West Mng. Co.

Property: 30 claims, patented, in Park City district. **Development:** extensive showing deposits of lead-silver ore.

Equipment: includes steam power, with hoist and air compressor. Electric power is taken from the Knight plant at Provo. The old 100-ton mill of the Fortuna Mining Co., at Bingham Canyon, was bought 1910, and re-erected at Park City.

Practically idle for 8 years, until August, 1920, when 700' shaft, etc., were leased to **New Quincy Mng. Co.** (q. v.)

LITTLE MAY MINING & MILLING CO.

UTAH

Office: 135 E. Broadway, Salt Lake City, Utah. **Mine office:** Silver City, Utah. Chas. Johnson, supt.

Officers: John Matson, pres.-mgr.; B. H. Goddard, v. p.; H. E. Giers, sec.-treas.; with W. B. Scoville, and V. P. Felt, directors

Assessment: No's 4, 5 and 6, $\frac{1}{2}$ c each, made in 1921. Accounts for 1920 show—\$11,064 received, including stock sales \$8,324 and loans from banks, \$2,500. Expenses were \$10,247 including labor, \$5,930, machinery, \$1,216 and \$1,000 paid bank on note. This compares with receipts in 1921 of \$19,180 from assessments, \$6,000 borrowed, \$942 from ore shipments, miscellaneous, \$1,187, a total of \$27,309 and disbursements of \$25,369. Cash on hand January 1922, \$1,939.

Property: in Silver City section of Tintic district, S. of Iron Blossom Cons. and S. E. of Dragon Cons. The Cornucopia and Treasure veins are said to cross the claims.

Development: for 1921, 335'. Work was begun June, 1919 and workings totaled 780' up to end of 1921. Shaft is 260' deep. Drifting on 200' level opened the Cornucopia fissure for 240'. The vein in rhyolite shows 6-12' of sulphide ore assaying \$1.60 gold, 9 oz. silver and 13.5% copper. In July a 5-car shipment was reported.

Equipment: includes power, compressor, pumps and various buildings.

LITTLE VALLEY MINING CO.

UTAH

Owned 9 claims in compact group N. and E. of the Lakeview property, Promontory Point, Boxelder county, Utah. Mail returned, 1919, and company probably idle.

LOG CABIN MINING CO.

UTAH

Address Salt Lake City, Utah.

Assessment of $\frac{1}{4}$ c. a share levied August, 1921. Sale day, Oct. 20, 1921.

LOGGER MINING CO.

UTAH

Officers: R. D. Maxfield, pres.-mgr.; Jas. Marlow, v. p.; D. J. Bloem, sec.-treas., with J. M. Hamilton, and Henry Erickson, directors.

Inc. July, 1915. **Cap.** 1,000,000 shares; 1c each. Stock listed on Salt Lake Exchange. Quoted $1\frac{3}{4}$ -2c in 1919; $\frac{3}{4}$ -4c in 1920; $\frac{3}{4}$ -1 $\frac{1}{4}$ c. in 1921, to June.

Property: the Logger mine in Big Cottonwood canyon, adjoining the Maxfield mine, shows a 1' fissure vein, developed by a 475' adit, a winze

sunk on the vein from the 200' point and a crosscut at 350' from portal, exposing ore. Assays said to return \$16.47 gold 13.4 oz. silver and 11% copper.

A lower tunnel was started 100' below upper tunnel, 1916, and is reported to have cut the vein seen above with several other small veins of ore, assaying from \$50-\$240 per ton in copper, gold and silver. Development work was resumed in 1919.

No more recent information.

LOUISE MINING CO.

UTAH

Address: 314 Felt Bldg., Salt Lake City. Mine address: Alta, Utah.

Officers: Samuel Neff, res.; R. O. Dobbs, v. p.-sec. and gen. mgr.; David Neff, treas.; with J. M. Rumsey and R. C. Middlewood, directors.

Inc. Nov. 16, 1917, in Utah. Cap. \$100,000; 10c par; assessable; outstanding 780,000 shares.

Assessment No. 6, of 1½c, levied July 15, 1920; last of ¾c, became delinquent June 1, 1921. Trial balance of Dec. 31, 1920, shows \$87,560 for mining property and \$32,029 for development.

Property: 8 patented claims, 75 acres, in the Little Cottonwood mining district at Alta, includes the Moltke group and a portion of Cottonwood-Atlantis (q. v.) holdings.

Development: by 3 adits, 1,200', 800' and 450' long, with total workings of 4,500'. Small tonnage of oxidized ore is developed in upper adits. Company plans (1921) to continue work on lower levels to cut ore zones found above.

Equipment: includes a compressed air unit.

Production: for 1919 is reported, but presumably small.

LOWER MAMMOTH MINING CO.

UTAH

Merged, 1917, with Empire Mines Co., which see. Stockholders receive 15 shares of Empire for every 100 of Lower Mammoth held.

LOWLAND TUNNEL WATER & TRANSPORTATION CO

UTAH

Office: C. L. Whitney, sec., 26 Stock and Mining Exch. Bldg., Salt Lake City. Mine office: Starr, Utah.

Officers: Louis Fugal, v. p.-mgr.; C. L. Whitney, sec.-treas., with Geo. F. Wasson and D. H. Livingston, directors.

Inc. Nov., 1912, in Utah. Cap. 1,000,000 shares 1c par; 350,000 issued. Assessments of ½c per share, levied Aug. and Dec., 1921.

Property: 36 unpatented claims, 700 acres, in Nebo mining district, Juab county, said to carry gold-silver-lead-copper-zinc-iron ore. Formation is quartzite, lime and granite.

Ore: occurs as a contact deposit and in fissure veins, running N. S. with dip of from 40-90°.

Company was organized to drive a 10,000' drainage and transportation tunnel into the Mt. Nebo mineral belt to serve 11 companies operating in that district and to develop its own mineralized ground. After idleness of 3 years operations resumed December, 1920; tunnel was in 700' early in 1921.

LUCIN COPPER CO.

UTAH

Address: 314 Kearns Bldg., Salt Lake City.

Officers: R. W. Powers, pres.; D. J. Wheeler, v. p.; G. S. Norris, sec.-treas., with Franklin Riter and V Erquiaga, directors.

Property: near Lucin, Boxelder county, said to have a promising showing of ore.

LUCKY BOY MINING & MILLING CO.

UTAH

E. E. Lowry, pres.; Ira Griffiths, sec.-treas.

Inc. April 20, 1916. Cap. \$50,000; shares 10c par; assessable; 25,000 shares outstanding.

Property: 6 claims, in Clear Creek mining district, Boxelder county, said to show copper-silver-gold ore. No recent information.

LUCKY STAR COPPER MINING CO.

UTAH

Mail returned; last address, care N. J. Nielson, sec.-treas., Dugway, Tooele county, Utah.

Officers: G. N. Strike, pres.; J. T. Aydelotte, v. p., with Israel Larson and Peter Sacos, directors.

Cap. \$500,000; shares 10c par. 275,000 in treasury.

Property: Lucky Star mine in Dugway district, 45 miles from rail at Faust, developed by 260' incline shaft with drifts on ore 5' thick, for length of drift, said to assay 9% copper and 15 oz. silver per ton.

Company was developing and made one shipment of copper sulphide ore in 1918; no later report.

MAJESTIC COPPER MINING & SMELTING CO.

UTAH

Office: 53 State St., Boston, Mass. John M. Dick, president. To all practical intents and purposes this company was succeeded 1904, by Majestic Copper Co., which was succeeded, 1908, by Majestic Mines Co. Majestic Copper M. & S. Co., however, is still in existence, though practically the entire stock issue, and a large majority of the bonds, are owned by the Majestic Mines Co. Very fully described in Vol. IV, of the Copper Handbook.

MAJESTIC MINES CO.

UTAH

Office: 342 Exchange Bldg., Boston, Mass. **Mine office:** Milford, Beaver county, Utah.

Officers: John M. Dick, pres.; H. M. Inman, v. p.; D. J. Flanders, sec.-treas.; J. A. Bailey, G. F. Kellogg, John Muller, R. H. Phillip, E. M. Southworth and John Freeland, directors; Alex. D. Moffat, mine mgr.

Inc. May 18, 1908, in Maine, practically as successor of Majestic Copper Co. and Majestic Copper Mining & Smelting Co. **Cap.** \$5,000,000; shares \$5 par; assessable; issued, 808,795 shares.

Stocks of both companies were exchanged share for share for stock of the Majestic Mines Co. on payment of 15c a share; bonds of the Majestic Copper Mining & Smelting Co. were exchanged for stock of the Majestic Mines Co., giving 900 shares of new stock for each \$1,000 bond.

The result of the reorganization was as follows; all floating indebtedness of the operating company has been liquidated; \$868,500 of the \$1,000,000 outstanding bonds have been purchased and are now owned by the Majestic Mines Co.—practically 87%—which gives the Majestic Mines Co. control of the situation.

Assessments of present company have been as follows: 15c in 1908; 5c in June, 1910; 10c in April, 1911. Assessment, 10c per share, was payable April 25, 1919. Shares listed on Salt Lake Stock Exchange, Boston and New York Curb. 500 shares sold at auction for \$9 the lot, October, 1921 in New York. Federal Trust Co., transfer agent; State Street Trust Co., registrar. Boston, Mass. Annual meeting third Tuesday in March.

Property: 120 claims, 2,450 acres, in 8 groups, also an 80-acre smelter site, and 800 acres miscellaneous lands. The groups, located in 5 different districts of Beaver county, are the O. K., Old Hickory, Harrington-Hickory, Vicksburg, Hoosier Boy, Southern States, Larkspur, Copperfield and Treasurer, said to have about 100 orebodies, carrying copper, gold, silver platinum, lead, cobalt, bismuth, vanadium and uranium. The company has platted the town site of Lewisville, where the smelter was located, and the property is served by the Salt Lake Route.

Development: there are 18 shafts, 100 to 600' deep, with a total of 6 miles of workings. The Old Hickory and O. K. mines yield copper ores, the others silver-lead ores. Recent work has been on the Old Hickory group of 9 claims, and in July 1919, rich copper ore was reported on the 400' level.

The **O. K. mine**, 7 claims, formerly the principal producer, has a 500' three-compartment shaft, with a vein up to 20' in width, development being mainly on the 300' and 400' levels. This mine had over 500,000 tons of low-grade ore blocked out in what apparently was a stockwerk, up to 250' in width, carrying stringers of high-grade ore.

The **Harrington-Hickory** group of 27 claims, partly fractional, shows numerous fissure veins, intersected by cross veins, both approximately

vertical, and in addition has a series of bedded veins, presumably, following bedding planes, dipping at 30 to 35°, giving 3 separate intersecting systems of orebodies. Development is by a 600' two-compartment vertical main working shaft, with drifts on the 500' level, where there is a body of high-grade ore, assays from which have given 1% copper, 37 to 55% lead, 18 to 22 oz. silver, and about \$1 gold per ton.

The **Vicksburg** group of 4 claims, a lead-silver mine, formerly worked for gold, has 3 practically vertical fissures, of 2 to 20' width, with mineralized cross-fissures, developed by a 200' 2-compartment working shaft, a 150' incline shaft and numerous shallow shafts and pits. It is said that high-grade ore has been encountered at a depth of 150' in this mine. Worked by lessee and 20% royalty paid to company on gross proceeds.

The **Hoosier Boy**, a silver-lead mine is about 3 miles from the Horn Silver mine. An 800' shaft has been sunk and considerable work done at 200', 400', 600' and 800' depth.

Equipment: includes 6 gasoline and 1 steam hoist. Electric power, for fighting and pumping is taken from the Beaver River Power Co.

Mines closed down from August, 1914, to May, 1915.

Production: in 1916 was about 6,500 tons of ore, yielding 350,065 lb. copper, 294,678 lb. lead, 257,476 lb. zinc, and 18,680 oz. silver. Produced about 600 tons per month, 1917.

The O. K., operated by lessees, produced some copper ore and heavy shipments were made from Old Hickory, in 1918. Company reported inactive, 1919, but shipments were apparently being made early in 1920.

MAJOR EVANS MINING CO.

UTAH

Mail returned, 1918, from former address, 440 Boston Bldg., Salt Lake City, Utah. C. B. Felt, pres.; R. Leo Bird, sec.

Inc. 1915, in Utah. **Cap.** \$100,000; 10c par; assessable: treasury, 440,000 shares.

Property: 42 claims in American Fork mining district, said to show copper-lead-silver ore. Is a prospect. Probably idle.

MAMMOTH COPPER MINING CO.

UTAH.

Office: 219 Judge Bldg., Salt Lake City, Utah. Edward Bardsley, pres.; B. D. Lyon, sec.-treas.

Inc. in Utah. **Cap.** \$10,000; issued, \$6,000; shares 1c par; assessable. A 10c assessment was delinquent, March, 1921. Listed on Salt Lake Exchange.

Owens 240 acres in Millard county, 15 miles from Milford, said to show a vein of copper ore in monzonite. Development is surficial only, and property is but a prospect. No recent returns.

MAMMOTH MINING CO.

UTAH

Office: 404 McIntyre Bldg., Salt Lake City, Utah. **Mine office:** Mammoth, Juab county, Utah.

Officers: Samuel McIntyre, pres. and gen. mgr.; Samuel McIntyre, Jr., v. p. and supt.; Col. R. M. Wilkinson, sec., with Earl McIntyre, and R. E. Marks, directors.

Inc. 1881, in Utah. **Cap.** \$10,000,000; shares \$25 par. Reincorporated Dec. 5, 1906, in Nevada. **Cap.** \$1,000,000; \$2.50 par; assessable; decreased, 1920, to \$40,000; 10c par. Last assessment (No. 2) of 5c was payable March, 1919. Controls the Cleveland Mining Co., through ownership of 70% of capital stock. Annual meeting, first Tuesday in February.

Dividends: 5c per share in 1913, 5c in 1915, 25c in 1916, and \$1 in 1917; total to date, \$2,820,000.

Property: 19 claims, in Tintic district. Mine opened about 1870, is developed extensively and has a 2,300' main shaft, the deepest in the Tintic camp. Irregular shoots and chimneys of gold, silver, and copper ores occur.

Equipment: includes complete plant, installed in 1910.

Production: 36,000 tons in 1914; 26,000 tons in 1915; 36,000 tons in 1916;

24,000 tons to July, 1917; about 18,000 tons in 1918. Dumps said to contain over 250,000 tons.

Shipments from dumps were made mid-summer of 1920 and ore shipments began later, but by April, 1921, operations had practically ceased.

MAMMOTH No. 2 MINING & MILLING CO.

UTAH

Idle. Office: 204 McIntyre Bldg., Salt Lake City, Utah. Mine at Mammoth, Juab county, Utah.

Officers: Wm. H. McIntyre, pres.; Samuel McIntyre, v. p. and treas.; W. P. Jennings, sec.

Inc. 1900, in Utah. Cap. \$300,000; \$1 par; reduced in 1920 to \$15,000; par 5c; assessable; fully issued.

Property: 2 claims, patented, adjoining the Mammoth Mining Co., shows lead and copper ores.

MARTIN GOLD AND SILVER MINING CO.

UTAH

Address: C. F. Johnson, 201 Ness Bldg., Salt Lake City, Utah.

Property: 9 claims, unpatented, located on west side of Thaynes canyon, near Park City.

MARY ELLEN MINING & MILLING CO.

UTAH

Address: American Fork, Utah.

Officers: W. C. Boley, pres.; T. S. Priday, v. p.; J. W. Storrs, sec.-treas.; with R. C. Boley and T. M. Allman, directors.

Inc. 1909, in Utah. Cap. \$100,000; 10c par; assessable; 650,000 issued.

Property: 7 claims, 125 acres, in American Fork district, Utah, said to show a vein in quartzite and limestone. Ore: is partly sulphide, and contains lead, silver, and gold.

Development: by tunnels totaling 700'. Idle for 3 years, but work resumed in 1917. No report since.

MASTER KEY MINING CO.

UTAH

Address: 1014 Boston Bldg., Salt Lake City, Utah.

Officers: A. G. Gutheil, pres.; C. W. Reese, v. p.; G. M. Sullivan, sec.-treas., with A. J. Mooney and Henry Barney, directors.

Inc. Feb., 1915, in Utah. Cap. 1,000,000 shares of no par value; assessable; 500,000 held by Trustee.

Property: 7 claims, 5 patented, 123 acres, 8 miles W. of Milford, Star district, Beaver county.

Geology: ore occurs in bedding planes and fissures in limestone dipping N. E., the Mowitza shale-contact carrying the large orebodies, which extend along the bedding into the Red Warrior limestone. Company expected to cut ore horizon at depth of 250'. Hoosier Boy fissure intersects it. Is a prospect. No recent report.

MAY DAY MINING & MILLING CO.

UTAH

Address: 600 Dooly Block, Salt Lake City, Utah. Mine office: Eureka, Juab county, Utah.

Officers: John Dern, pres.; G. H. Dern, v. p.; A. Reeves, sec.; W. S. McCornick, treas., with J. C. Dick, directors.

Inc. 1896, in Utah. Cap. \$200,000; shares 25c par; assessable; all outstanding. Stock transferred at company's office. Annual meeting, first Monday in April. Listed on Salt Lake City Exchange.

Last assessment, of 2c., became delinquent, April, 1921. Dividends total \$300,000.

Property: 6 claims, 5 patented, 60 acres, in the Tintic mining district, said to show zinc, silver and lead ore in limestone.

Development: by 1,100' vertical shaft and 1,500' tunnel. The mine has been practically out of ore several times; at one time the supply was so low the stock dropped to 1c per share; the larger part of its dividends has been paid since then.

Beginning with 1920, mine has been developed through the Yankee Cons. 1,800' shaft, but apparently without significant results. Work is financed by assessments.

Equipment: includes 50-h. p. electric hoist and compressor, capacity 250 cu. ft.

Production: since 1907, when present management took hold, gross value of output is \$833,725. During 1920, 109 tons of ore yielded \$6,456.

METAL STATES MINING & MILLING CO. UTAH

Address: care Jesse F. Cannon, 743 S. 3 E. St., Salt Lake City, Utah.

Officers: Jesse F. Cannon, pres.; Henry Schepper, v. p.; E. S. Fisher, sec.

Inc. 1919, in Utah. **Cap.** \$100,000. Company was organized to develop copper-gold claims in the Dugway district, Utah.

MICHIGAN-UTAH CONSOLIDATED MINES CO. UTAH

Office: 411 Felt Bldg., Salt Lake City, Utah. **Mine address:** Wm. C. Stewart, mine supt., Alta, Utah.

Officers: Norman W. Haire, pres.; H. R. MacMillan, v. p. N. A. Robertson, sec.-gen. mgr.; L. H. Farnsworth, treas.; with Frank B. Cook, C. A. Gillette, and W. J. Halloran, directors.

In April, N. A. Robertson was appointed general manager under supervision of directors acting through an executive committee comprised of the general manager, R. A. Brown, cons. engr., and W. J. Halloran, chairman.

Inc. April 26, 1915, in Utah, as a reorganization of the Michigan-Utah Mining Co. **Cap.** 1,500,000 shares; 25c par; assessable; 1,328,255 shares issued. Listed on Salt Lake Exchange. Columbia Trust Co., registrar. Annual meeting, 2nd Monday in February. The City Rocks Mng. Co. (q. v.) became a shareholder in exchange for property sold.

Assessment No. 3 of 2½c, levied Aug. 10, 1920; **No. 4**, 2c, and **No. 5**, 1½c, Nov. 1921. Share sold for 9-23c in 1918; 8-15c in 1919; ¼-9c in 1920; ¼-3¼c in 1921, to June.

Gross earnings in 1917 were \$226,408; all from ore sales.

Property: 72 claims, 42 patented, 1,200 acres, including a millsite, in the Big and Little Cottonwood mining districts. Claims show Paleozoic sediments cut by granite, the ore occurring in fissure veins in limestone, and as contact metamorphic deposits between limestone and granite, having a general strike of N. 65° E., and a dip 32°. There are 5 distinct and parallel veins showing average widths of 2½' and traceable 5,000', reported to carry copper, lead, zinc, silver and gold values, averaging \$25 per ton. Ores are carbonates at and near surface, succeeded below by sulphides.

Development: principally by tunnels, all workings being in the oxide and carbonate zones, but sulphides are proven to occur in depth by workings of the nearby Wasatch Mines Co. Total underground openings aggregate over 50,000', about one-half being tunnels, drifts and crosscuts that are all in ore, raises and winzes aggregating 10,500' additional. Ore is transported by aerial tramway to Tanners flat, 5 miles from the mine, thence by narrow-gauge railway to Wasatch, where connection is made with the Salt Lake & Alta standard gauge road which runs to the Midvale smelter. The tram has a maximum capacity of 200 tons daily.

The Copper Prince tunnel has been driven under property about 2,000', exposing several large orebodies.

Equipment: includes two 90-h. p. hoists, and everything necessary for mining 150 tons daily. Air is supplied by the Wasatch Power Co. from Little Cottonwood creek.

Buildings include machine shop, carpenter shop, several dwellings and a smithy, located underground as a measure of protection from snowslides, which are of frequent occurrence in this region.

Production:

Year	Gold Oz.	Silver Oz.	Copper Lb.	Lead Lb.	Receipts Net
1915.....	67	43,146	99,066	515,296	\$29,901
1916.....	154	90,816	364,685	916,851	130,342
1917.....	227	148,318	384,906	1,865,379	244,125

The mine was worked continuously throughout 1918, and in July 1919, production was about one car of ore daily, the company, like many others, being short of miners.

Production for 1920 not reported, but shipments made, summer of 1921, although work is principally confined to development. Tram terminal has been connected by spur to the new Little Cottonwood Transportation Co.'s R. R.

Part of the property was operated under lease by the Triangle Mng. Co., a close corporation, which in 1919 became bankrupt.

MIDVALE LEAD SMELTER

UTAH

Address: C. E. Allen, gen. mgr., Newhouse Bldg., Salt Lake City; J. C. Brumblay, field representative. **Works address:** W. A. Howard, mgr., Midvale, Utah. Plant includes a lead and zinc concentrating mill; both mill and smelter treat custom ores.

Owned by U. S. Smelting, Refining and Mining Co., which see for more complete description.

MIDWEST DEVELOPMENT CO.

UTAH

Address: Salt Lake City, Utah.

Officers: Geo. S. Silsby, pres.; A. W. Larson, R. V. Smith and Albert W. Hahn, directors.

Inc. 1921 in Utah.

Property: a lease and bond on the Old Miller and other claims in American Fork district. Development begun, September, 1921. Shipments of carbonate ore made late in 1921.

MILFORD COPPER CO. OF UTAH

UTAH

Office: Newhouse Bldg., Salt Lake City, Utah. **Mine office:** Milford, Utah.

Officers: Alfred Frank, pres.-mgr.; E. L. Newhouse, Jr., v. p.; H. A. Frank, sec.-treas.; J. H. Greenwood, supt., with O. Brodbeck and C. W. Saacke, directors.

Inc. Feb. 3, 1917, in Utah. **Cap.** \$500,000; \$1 par; all issued. Transfer office 52 William St., New York. U. S. Corporation Co., New York, registrar. Stock listed on Salt Lake Exchange. Annual meeting, January 15. Earnings at rate of \$100,000 per year.

Property: 18 patented claims, 300 acres, at Milford, Beaver county, Utah, known as the Montreal mine, being one of the properties developed extensively by the defunct Glasgow & Western Exploration Co. In February, 1916, mine was leased by Alfred Frank and others, who eventually organized the Milford company.

Geology: contact deposit in limestone and quartz-monzonite. Orebody 10 to 50' wide, dips 45°, and has an irregular course. Ore is partly sulphide and averages 2.5% copper, 0.75 oz. silver, 0.01 oz. gold, 15% silica and 37% iron.

Development: by tunnels and shafts to 400' depth, workings amount to 3,000'. Ore reserves estimated at 30,000 tons copper ore. In addition 200,000 tons of iron ore, with small values in silver and copper, have recently been opened up.

Equipment: 8x10" air-hoist and 10-drill compressor.

Production: ships 100 tons daily to Murray smelter, Utah, which needs the ore as a flux.

MILFORD MAGNOLIA MINES CO.

UTAH

Address: R. B. Garff, pres., 219 Colfax Ave., Salt Lake City; H. A. Smith, C. I. Goff, A. F. Judd, and John Clayton, directors.

Inc. 1919, in Utah. **Cap.** \$10,000; shares 1c par.

Property: the old Magnolia group of 9 claims, 12 miles S. W. of Milford, which contain lead-silver ore.

Development: by 125' and 150' shafts when the company acquired the property (1919). Company sank the 125' shaft to the 200' level on which exploration work exposed 4' of high-grade lead-silver ore.

MILLER HAMILTON MINING CO.

UTAH

See under Nevada.

MILLER HILL MINING CO.

UTAH

Office: Knight Block, Provo, Utah. **Mine office:** American Fork, Utah county, Utah.

Officers: O. Raymond Knight, pres.; J. Wm. Knight, v. p.; R. E. Allen, sec.-treas.

Cap. \$100,000; shares 10c par; assessable. Shares listed on Salt Lake Exchange. In September, 1917, 25,000 shares of stock were offered for sale at 50c a share. Assessment of 2c per share was called November 12, 1917. Shares sold from 2 to 15½c. in 1918; 1½ to 4c. in 1919; 1-3c. in 1920; 1½-5c. in 1921 to June.

Property: 33 claims, 30 patented, adjoining the Mineral Flat mine, developed by 2,200' tunnel with about 2,400' of workings.

Property was worked in 1918, but is now idle.

MILLER MINES DEVELOPMENT CO.

UTAH

Dead; see Vol. XIV for description.

Office: 804 Newhouse Bldg., Salt Lake City, Utah.

Officers: J. H. Leavell, pres.; G. H. Ryan, v. p.; H. W. Ragland, sec.-treas.; with M. P. Kirk, and L. D. Foreman, directors. J. C. Fitzgerald, supt.

Inc. in Utah. **Cap.** \$1,000,000; 10c par; 543,500 issued.

Held a 5 year's lease and bond on property of Miller M. & S. Co. (q. v.). Lessee company failed in 1918, and lease forfeited.

MILLER MINING & SMELTING CO.

UTAH

Office: 406 Dooly Block, Salt Lake City, Utah. W. A. Wilson, gen. mgr. F. De P. Foster, pres., 44 Wall St., New York.

Property: Miller mine, 11 claims, 10 patented, 70 acres, at Miller Hill, in American Fork district, 50 miles from Salt Lake City.

Geology: replacement deposit in upper Cambrian limestone. Orebody said to be 600' long and of good width. Ore carries lead and zinc carbonates, and is reported to assay 0.73 oz. gold, 20.7 oz. silver, 43.95% lead, 17.2% iron, and 6.1% zinc.

Development: by tunnels 300 to 1,200' long to depth of 400' with total underground workings of about 15,000'.

There seems little likelihood of opening other replacement orebodies and future possibilities apparently depend upon fissures in underlying quartzite.

Production: estimated to be \$3,000,000, from 1870 when this old mine was discovered, up to 1919.

A 5-years' leased held by the Miller Mines Dev. Co. was forfeited in 1918. Production by lessees negligible. Property under lease and bond, for \$150,000, to A. W. Hahn, et al., but idle during 1920.

MINERAL FLAT EXTENSION MINING & MILLING CO.

UTAH

Name changed to Alta Superior Mining & Milling Co., which see.

MINERAL FLAT MINING CO.

UTAH

Fully described in Volume XIII. Consolidated with Albion Cons. Mining Co., which see.

MINERAL LANDS CO.

UTAH

Idle. **Office:** 102 Exchange St., Portland, Me. Carl W. Smith, treas.

Inc. 1913, in Maine. **Cap.** \$100,000; \$5 par. Company owns large interest in Bingham Coalition Mines Co., also Vespasian-Hoogly group or claims in Markham gulch, Bingham, and other mining interests.

MINERAL MOUNTAIN MINING CO.

UTAH

Address: Tecoma, Nevada.

Officers: G. Austin, pres.; F. Litz, v. p.; E. B. Whipple, sec.; C. F. Whipple, treas.

Inc. March, 1908, in Utah. **Cap.** \$100,000; shares 10c par; 632,000 is-

sued; assessable to 1c yearly; assessment No. 4, levied July 2, 1919, 1c a share.

Property: 13 unpatented claims, 250 acres, in Lucin district, Utah, 6 miles from Tecoma, Nevada, said to show contact and fissure veins in limestone, quartzite and granite. Shoots are from 12 to 24" wide. Ore carries lead carbonate, silver, and gold.

Development: by 350' shaft and 350' tunnel.

MINERAL POINT COPPER MINING CO.

UTAH

Address: Andrew Madsen, mgr., Logan, Utah.

Property: claims in East Paradise canyon, near Logan, developing 1921, by 282' upper and 100' lower tunnels, both showing a vein of high grade copper ore and 20' of gold bearing quartz.

MINERAL RANGE GOLD MNG. CO.

UTAH

Address: J. L. Craig, sec., 353 W. 2nd S. St., Salt Lake City, Utah.

Assessment No. 9 of 1 mill per share levied March 30, 1921.

Property: a silver-lead mine in Star district Beaver county. Idle several years.

MINERALS PRODUCTS CORPORATION

UTAH

Address: Marysvale, Utah. N. Touroff, supt.

Is a subsidiary of the Armour Fertilizer Works.

Property: alunite bearing claims, 9 miles S. W. of Marysvale.

Equipment: includes aerial tram 6,200' long, 600-h. p. steam plant and 50-ton mill to extract potash from the alunite, which is a hydrous sulphate of aluminum and potassium. In October, 1918, reported as shipping 600 tons of potassium sulphate per month; plant in operation part of 1919; all operations ceased Jan. 1, 1921.

MONARCH CONS. MINES CO.

UTAH

Address: 631 Judge Bldg., Salt Lake City, Utah.

Officers: Joshua Greenwood, pres., 1150 Herbert Ave., Salt Lake City; W. T. Goslen, v. p.; with M. K. Parsons, M. P. Broffet, J. M. Hayes, directors.

Inc. in Utah. Cap. \$2,000,000; shares \$1 par; issued 800,000 shares.

Company has a bond and lease on the property of the Ibez Gold Mining Co., which see, formerly held by the Detroit Copper Mining Co.

MONARCH MINES CO.

UTAH

Title changed from Plentiful M. & M. Co., 1916.

Address: American Fork, Utah.

Officers: Chas. Ohran, pres.; F. W. Wright, v. p.; with W. A. McBride, E. J. Seastrand, and J. A. Kauffman, directors. J. Watt Storrs, sec.-treas.

Inc. June, 1915, in Utah. Cap. \$30,000, increased March, 1916, to \$40,000; increased November, 1917, to \$62,500; shares 5c par; 600,000 issued; assessable.

Property: 9 claims, 186 acres, near American Fork, Tooele county, in Lakeside mountains, shows galena and carbonate ore in fissure vein cutting blue and gray limestone, with N.-S. strike and dip of 70° W. Pay ore reported to have been cut in 1916, at 140' depth in a 40' vein of lead carbonates. A 2½' streak is said to assay 78% lead and 10 oz. silver.

Development: by 3 incline shafts, deepest 193'. **Ore reserves:** 100,000 tons estimated as blocked out.

Equipment: includes 2 motor trucks. Company does not reply to requests for information.

MONETAIRE MINING CO.

UTAH

Office: 405 Newhouse Bldg., Salt Lake City, Utah.

Officers: D. J. Williams, pres.; N. V. Jones, v. p.; B. F. Cummings, sec.-treas.; with W. H. King and D. W. Cummings, directors.

Inc. Sept. 19, 1912, in Utah. Cap. \$250,000; shares 25c par; assessable; 885,000 shares outstanding. Annual meeting third Tuesday in January.

Property: 2 patented claims, 6 acres, in Little Cottonwood mining district, said to show lead-zinc ore, with some molybdenum, in fissure veins in

limestone and quartzite. Veins strike E. W. and dip almost vertical. Ore shipped said to have returned \$17 per ton. No recent shipments reported.

Development: 127' vertical shaft and tunnels, with about 1,000' of workings. Claim to have 20,000 tons of ore blocked out.

Equipment includes an electric hoist.

MONO DEVELOPMENT CO.

UTAH

Mail returned from Salt Lake City. J. H. Cook, pres., Salt Lake City, Utah. Mine at Dry Canyon, near Ophir, Salt Lake County, Utah. Stock assessed $\frac{1}{4}$ c a share.

Property: a group of claims, 300 acres, noted in 1872-3 for its high-grade silver ore. Claims are near the following producing mines; Mono Brooklyn, Thad Stevens, Kearsarge and Eureka Ophir. A new wagon road was built October, 1917, from Dry Canyon to the railway; heretofore ore was hauled 9 miles to Stockton.

Development: by 2,500' tunnel. Idle.

MONTANA-BINGHAM CONSOLIDATED MINING CO.

UTAH

Office: 401 Dooly Bld., Salt Lake City, Utah. **Mine office:** Bingham Canyon, Utah. Imer Pett, gen. mgr.; T. P. Billings, engr.-gen. supt.; Harry Bowman, mine supt.

Officers: H. H. Green, pres.; Chas. E. Adderley, v. p.; J. R. Brain, sec.-treas., with Frank Thornberg, A. G. MacKenzie, A. L. Headberg and Harry Bowman, directors.

Inc. July, 1910. **Cap.** \$3,000,000; \$1 par; issued, 2,491,996; assessable. An assessment of 10c a share, levied March, 1918; one of 3c in November, 1918; a third, 2c in May, 1919; and a fourth of 2c on April 20, 1920, netted \$49,576. Annual meeting, first Tuesday in March. Owns 165,000 shares of United Bingham C. Co. stock.

Debentures: \$200,000, 6%; \$178,600 outstanding; due June 1, 1918; extended to June 1, 1919; Utah Savings & Trust Co., Salt Lake City, trustee for bondholders.

Financial statement Dec. 31, 1920, shows fixed assets of \$3,404,266; investment in U. B. C. Co., \$54,300; cash, \$20,510, with total current assets, \$29,602. Current liabilities were \$8,809, and include unpaid bond interest. During this year final payment of \$25,000 made on purchase of mine from Fortuna M. & M. Co.

Income statement for year ending December 31, 1921, shows; total income, \$88,199, of which net ore sales were \$80,195. Operating expense, including \$12,660 for prospecting and developing, was \$84,320. Net operating profit was \$3,878, but net loss was \$7,138, after deducting bond interest, etc. Surplus shows a decrease of \$94,012; credits include \$49,576 from assessment, and debits, \$36,376 for depreciation and \$85,699 for stock discounts.

Profit and loss statement for 1918 shows a charge of \$10,000, "special compensation to president—for surrender of life position in Honolulu, for loss through sacrifice sale of personal effects and property, and to cover expenses of moving to Salt Lake City," he also received 50,000 shares of capital stock as part compensation.

In 1919, a committee representing the minority stockholder's interest was "instrumental in causing the cancellation of the contract which employed the president and general manager for five years with a salary of \$15,000 per annum; for two years and \$25,000 per annum for three years thereafter, of which contract a little than more one year had run; also has been instrumental in causing economies in the overhead expenses of the company to the extent of several hundred dollars per months."

This controversy continued into 1920, and on July 1st suit by stockholders was filed for an accounting against the directors.

Property: consists of 335.5 acres, patented, in the West Mountain mining district (Bingham), Salt Lake county, Utah, comprising the Fortuna group of 23 claims, 170.8 acres, underlying the town of Bingham; (2) the Ed-

group of 23 claims, 170.8 acres, in the Keystone and Dalton gulches, and the Thrush claims, 6.2 acres, underlying the town of Bingham; (2) the Eddie group of 4 claims, 50.3 acres in Bingham Canyon; (3) leases and options on the Valentine patent and Tiewaukee group, 10 claims, 114 acres, in Bingham Canyon.

The Montana-Bingham Transportation & Drainage tunnel over 5,540' long, enters the mountain in the N. W. corner of the Eddie group, within 50' of the D. & R. G. railway, and runs S. E. through the Eddie group, then through the United Bingham Copper Co. group and the Congor G. & C. Mng. company's ground to the Fortuna group. This tunnel crosscuts, nearly at right angles, the Eddie and the Cleveland veins of the Eddie group, the Copper Gance and Manifay veins of United Bingham group, the veins of the Congor group, the Chester and Virtick veins of the Keystone Extension Co's group and the Sierra Grande, Fortuna and Mayflower veins of the Fortuna group. The three last named veins, are cut 470' vertically or 1,400' on the dip, below the lowest of the 3 long drift tunnels of the old Fortuna mine, but the S. rake of the orebodies opened in the old mine, carries them 1,700' or more south of this tunnel. Extensive lateral development was done to block out ore. The Mayflower vein at this horizon shows an oreshoot estimated by the manager to be 700' long, 22' thick, and 1,400' on the dip, equal to 1,500,000 tons of 2% ore with an equal amount between the M. B. tunnel and the Mascotte (of the Ohio Co.), 475' vertically, or 1,000' on the dip below it.

Geology: the Fortuna group, the most important holding of the company, shows an intruded sheet of monzonite-porphry in tilted series of quartzite and limestone beds, traversed by four nearly parallel veins following the strike and dip of the monzonite sheet or of the quartzite bedding, occasionally cutting across and accompanied by some fracturing and crushing. These veins are 2 to 25' thick and carry streaks and shoots of pyrite with varying copper value as chalcopyrite and chalcocite. Southern workings have shoots of silver-lead ore and in Eastern end of workings, lenses of ore occur that are 20'-50' thick and carry 2% copper.

These veins are opened by the 4,200' Keystone tunnel and 3 other tunnels comprising the old workings of the Fortuna mine.

Tiewaukee mine: 10 claims, 114 acres, is explored by a main tunnel, 1,000' long, cutting several bedded veins, large stopes of old workings north of it, contain much milling ore. Pillars left in stopes show 18.9% lead, 6% copper, 27 oz. silver per ton. Tiewaukee shaft is 90' vertical, connecting with a drift from the main tunnel, while shaft continues as an incline on the bedded vein.

The Valentine mine: also in Bingham Canyon, has been an irregular shipper from an orebody assaying 4% copper. It has a 500' tunnel and 225' shaft, cutting a vein of silver-copper ore.

Company has contracts with United Bingham C. Co. and will receive 10% of net proceeds on all ore shipped through the tunnel; from Keystone Extension Mng. Co., 25c per ton of ore and 12½c per ton for waste; from Bingham-Congor C. Co., 15c p. t. of ore or waste; from Congor Gold & Copper M. Co., the same as from Keystone; also an agreement with Col. E. A. Wall to handle Starless ores when drift from tunnel has been extended on one of Montana-Bingham veins into Starless ground; 300,000 gallons water per day is flowing from tunnel, which is valuable for milling etc.

Development: totaled 1,718' in 1920, largely below M. B. tunnel, and included sinking incline to 260' depth. Two separate ore shoots of high copper content were developed. Arrangements have been made to exploit property through the Mascotte tunnel.

Production: Nov., 1918, to July 9, 1919, was 1,547 tons of ore yielding \$20,720 net smelter returns. About half of this ore was mined by leasers.

Work was resumed in June, 1919, after a shutdown of four months.

Shipments for 1919 totaled 4,763 tons of ore containing 220 oz. gold; 14,667 oz. silver; 99,051 lb. lead; 358,212 lb. copper, all of a gross value of \$110,390. Operations for 1919 resulted in an expenditure of \$15,829 over and above ore returns.

Shipments for 1920 were 4,434 tons containing 349 oz. gold, 12,663 oz. silver, 16,278 lb. lead and 750,210 lb. copper, with a gross value of \$108,121. Lessees shipped 815 tons and royalties to company were \$4,827. In December, 1921, 60 men were working and shipments of 100 tons per day were made of fluxing ore low in copper.

MONZONITE SILVER & COPPER CO.

UTAH

Idle. **Officers:** S. S. Pond, pres. and gen. mgr.; D. Rigby, sec.; Geo. Baglin, treas.

Cap. \$50,000; shares 5c par; assessable. In treasury, Jan., 1916, 400,000 shares; bills receivable and cash, \$2,500. Stock listed in Salt Lake City.

Property: 7 unpatented claims, near Milford, Beaver county, 6 miles from the railroad, surrounded by the Leonora, Hoosier Boy and Paloma Extension mines. Ore: silver and copper.

Development: 100' shaft with 50' of crosscutting. Is a prospect.

MORGAN ARGENTINE MINING CO.

UTAH

Office: 22 E. Broadway, Salt Lake City, Utah. Mine near Peterson, Morgan county, Utah.

Officers: Herbert Pembroke, pres.-gen. mgr.; A. B. Pembroke, sec.-treas.

Inc. 1900, in Utah. **Cap.** \$5,000; shares 1c par.

Property: 15 claims, 10 patented, 300 acres, in Argenta district, shows fissure veins in limestone carrying silver-lead and copper-gold ore.

Machinery was added, and development work started in 1917 and continued in 1918, 1919 and 1920.

MORGAN CRESCENT MINING CO.

UTAH

Mail returned from Geo. T. Stenhouse, gen.-mgr., Morgan City, Utah.

Property: in Morgan district, Morgan county, 1 mile N. of Morgan City, shows a vein, 4-12' wide, in limestone, free from igneous disturbance. The ore, in part replacement, is largely limonite carrying copper, silver and gold, some of which was shipped in 1918 for fluxing purposes.

MORGAN-GALENA MINING CO.

UTAH

Address: 417 Kearns Bldg., Salt Lake City, Utah.

Officers: J. W. Rozzelle, pres.-treas.; A. H. Levine, v. p.; J. H. Ritchie, sec., with F. H. Ashihira and Frank Troxler, directors.

Inc. Oct., 1916, in Utah. **Cap.** \$100,000; shares 10c par; 500,000 issued.

Property: 6 claims in Morgan county, Utah, said to contain fissure veins in porphyry carrying 37% lead ore with some gold-silver values. Development by shafts and tunnels. Is considered a good prospect. No recent report, probably idle.

MOSCOW MINING & MILLING CO.

UTAH

See Vol. XIV for description. Company merged into **Moscow Silver Mines Co.**, which see.

MOSCOW SILVER MINES CO.

UTAH

Company is a merger, March, 1920, of Moscow Mng. & Mlg. Co., Red Warrior Mng. Co. and Beaver Combination Mng. Co.

Office: 312 McCormick Bldg., Salt Lake City. **Mine address:** Robt. Sherwood, mine mgr., Milford, Utah.

Officers: Fred J. Leonard, pres.; F. J. Hagenbarth, v. p.; M. B. Johnson, sec.-treas.; Garret S. Wilkins, gen. mgr.; with Angus Buchanan, directors.

Inc. 1920, in Utah. **Cap.** \$2,500,000 par \$1; 2,100,000 shares issued to merger companies, 1,000,000 to Moscow, 600,000 to Red Warrior and 500,000 to Beaver Combination.

Dividends: in recent times, up to September, 1917, Moscow has paid \$108,000 to shareholders.

Property: 3 adjoining groups, 640 acres, in Star district, Beaver county, 8 miles from Salt Lake Route.

Moscow: 7 claims, including Moscow mine, one of the oldest in district, having been worked over 30 years ago. Ground covers $\frac{1}{2}$ mile of the strike of an ore zone, 50 to 60' wide; ore mainly silver-lead, with some copper and zinc.

Red Warrior: N. and W. of Moscow, including property of Mowitza Mng. Co. purchased in 1917, shows orebodies along the bedding planes of limestone, one of which is 6' thick, 50' long, and proven for 600' on dip. Ore similar to that of Moscow, copper apparently increasing with depth; one average assay showed 21% lead, 1% zinc, 18 oz. silver and 25¢ gold per ton.

Beaver Combination: lies E. of Red Warrior and N. E. of Moscow.

Development: at the Moscow, by tunnels and shaft to 1,400'. The Red Warrior is opened by 800' shaft with levels at 500 and 675', and by 3,000' of old workings, or 7,000' total. Mine was operated from 1870 to 1889, and reopened 1907. The Beaver Combination is opened to a depth of 400'.

The Moscow and Red Warrior are more fully described in Vol. XIV of this Handbook.

Equipment: includes hoist good for 1,500', 3-drill compressor, etc.

Production: was considerable in early days from the Moscow and Red Warrior. Shipments from the former had been fairly consistent up to September, 1917, when operations ceased; the latter was a small producer in 1917 and 1918.

MURRAY LEAD SMELTER

UTAH

Owned by the American Smelting & Refining Co.

Office: 120 Broadway, New York. **Operating address:** J. M. Bidwell, mgr., 714 McCornick Bldg., Salt Lake City. **Works address:** W. W. Norton, supt., Murray, Utah.

Its annual capacity is 700,000 tons.

MUTUAL METAL MINES CO.

UTAH

Successor to Grater Cons. Mines Co.

Address: 201 Ness Bldg., 30 W. Second St. S., Salt Lake City, Utah.

Officers: Chas. E. Steed, pres., Hyrum Neilson, v. p.; B. D. Field, sec.-treas., with Jos. E. Flint and Chas. E. White, directors.

Inc. July 12, 1921 in Utah. **Cap.** \$150,000; par 10c.; 472,960 shares issued; assessable. Assessment of $\frac{1}{2}$ c. per share levied in 1921. Operating expenses for 1921, \$11,000. Treasury stock sold at \$1 per share, 1922.

Property: 76 claims, unpatented, in Big Cottonwood district, Salt Lake county, contains silver-lead deposits of carbonate and sulphide ore on the Logger contact fissure between limestone and porphyry. Company also owns tunnel and water rights for deep transportation tunnel near Park City.

Development: by 2,400' tunnel, giving depth of 1,900'; 1,200' of this work was done in 1921.

Equipment: includes compressor and electric power. Mine is not yet a producer, though ore assaying \$60 to \$100 per ton has been found.

NAILDRIVER MINING CO.

UTAH

Address: 163 So. Main St., Salt Lake City, Utah. **Mine address:** J. D. Fisher, supt., Park City, Utah.

Officers: W. Mont. Ferry, pres.; Herbert Cohen, sec.-treas.

Inc. Oct. 2, 1902. **Cap.** \$600,000; shares \$2 par; assessable; 287,450 shares issued. Stock listed on the Salt Lake Exchange. A $\frac{1}{3}$ share interest is held by the Ontario Silver Mng. Co.

Property: 13 claims in Park City mining district, Summit county, shows silver-lead-gold-copper ore.

Development: to depth of 900' by shaft and drifts; additional depth of 400' attained through Ontario workings. An orebody, 3-4' wide, uncovered on the 700' level has been followed to 500' and 900' levels. Up to August, 1919, mine worked mostly by lessees.

Production: was reported to be 500 to 600 tons of ore in 1918; small shipments in 1919 until mine reverted to company, since when it has been a steady shipper; during 1920, said to be about 20 tons of ore per day. One shipment carried 31 oz. of silver and 11% lead per ton.

Examined by Fred. R. Weekes.

NATIONAL RADIUM MINES CO.

UTAH

Henry Schwartz, Denver, Colo., pres., at last accounts. Inc. in Colorado. Cap. \$400,000.

Property: in Green River district, Emery county, shows uranium and vanadium ore in a 5" vein, said to run as high as 20% uranium. Developing in 1916. No recent returns. Probably idle.

NEBO SILVER-LEAD MINING CO.

UTAH

Company was operating a property near Mono, Utah, reported to show ore which assays about 60% lead and 8 oz. silver per ton.

NEVA MINING CO.

UTAH

Office: 400 Boyd Park Bldg., Salt Lake City, Utah. **Mine office:** Brighton, Utah.

Officers: A. H. Rock, pres.; C. E. Cole, v. p.; Walter Steadman, sec. Inc. 1906, in Utah. Cap. \$75,000; shares 15c par; last assessment, of 2 mills, delinquent, Aug. 12, 1921. Stock is listed on Salt Lake Exchange. Sales $\frac{1}{4}$ low, 1c high, 1918; $\frac{1}{4}$ - $\frac{1}{2}$ c in 1919; $\frac{1}{2}$ c-1 $\frac{1}{2}$ c in 1920; $\frac{1}{4}$ c in 1921 to June.

Property: 5 unpatented claims, adjoining the Cardiff on the W. show silver-lead-gold ore in a fissure vein, running E. W. along a quartz-lime contact and said to give assays of 45% lead, 30 oz. silver and 0.1 oz. gold. Developed by incline shaft and tunnel. Operations were resumed in 1915 and shaft sunk to intercept the Cardiff contact lode.

Property in dispute with the Cardiff M. & M. Co. was won by the Neva, and is considered valuable. Operations are carried on by small assessments.

NEW ENGLAND GOLD & COPPER MINING CO.

UTAH

Address: Geo. F. Bradstreet, 120 Tremont St., Boston.

Dead; Fully described in Vol. XIV. Company lost its charter in 1914 and went into hands of receivers; mortgage held by trust company has not been foreclosed and bonds authorized by the New England company are under option to the Utah-Boston Development Co., incorporated in 1920 in Maine, and organized to take over the New England holdings at receiver's sale, subject to exploratory work now under way. None of the rights under the Utah-Boston charter have as yet been exercised.

NEW QUINCY MINING CO.

UTAH

Office: 202 Atlas Bldg., Salt Lake City. **Mine address:** E. A. Taylor, supt., Park City, Utah.

Officers: W. S. McCornick, pres.; W. R. Hutchinson, v. p.; A. L. Thomas, sec.; Herman Bamberger, treas., with F. J. Hagenbarth, Geo. W. Morgan, G. L. Bemis and M. B. Johnson, directors. W. B. Cole, supt.

Inc. June, 1915. Is a reorganization of the Thompson Quincy Mining Co. Cap. \$125,000; shares 10¢ par; 200,611 treasury shares; assessable; with assessments not to exceed 3c during the first year. Last call due Feb. 23, 1921. Exchange of stock made on a share-for-share basis, calling for distribution of 1,055,958 shares. Stock is listed on Salt Lake Exchange. The New Quincy Co. assumed the obligations of the Thompson Quincy.

Annual report for 1920 shows receipts totaling \$16,109, of which \$419 was from ore sales and \$10,514 from assessments. Disbursements were \$13,580, of which mine expense was \$10,142. Cash on hand, Jan. 1, 1921, was \$2,528. Note indebtedness totals \$40,840, largely in favor of Daly West.

Property: 140 patented acres in Park City district, with rights of way and easements from the Daly West, Daly and Ontario companies. The claims supposedly carry the extension of the Quincy orebody of the Daly West mine. Developed by a 625' two-compartment vertical shaft. a

crosscut tunnel through the Little Bell mine, cutting a contact vein, said to carry ore assaying up to 20% lead, 160 oz. silver and \$2 gold per ton, and through the Ontario drain tunnel No. 2, which was extended to the Quincy mine by the Ontario company.

On April 1, 1918, Daly West shaft was closed. In August, 1920, company obtained a lease on the 700' shaft and buildings of Little Bell Cons. (q. v.), purchased new electric compressor and hoist, and started work on 700' level. Reported that 2' of 50 oz. silver ore had been found in winze below the 700' level. Four shipments netted company \$6,163, ore running 55.3 oz. silver, 18.1% lead, 1.12% copper, 12.1% zinc, 42.1% insoluble, netting \$48 per ton.

NEW STOCKTON MINING CO.

UTAH

Office: J. C. McLain, sec., No. 11 E. First South St., Salt Lake City.
 Mine office: at Stockton, Utah.

Officers: F. M. Currier, pres.; R. A. Dunham, v. p.; W. Z. Harrison, sec.-treas., Hess Bldg., Salt Lake City. W. A. Wilson, cons. engr., 406 Dooly Block, Salt Lake City; C. B. Kennedy, W. D. Kimball and M. M. Ferguson, directors. Assessment of 2¢ per share made Dec., 1921.

Property: the old Ben Harrison mine at Stockton showing a vein with one to two feet of ore, which averages 10% to 45% lead, 5 to 40 oz. silver and 60c. to \$7 gold per ton.

Development: by shaft with main work on 200', 500', 700', and 850' levels.

Production: \$70,000 in 1913-1914. As shipped the ore has averaged \$12 to \$15 per ton with silver-gold-lead values. In 1917 lessees shipped ore averaging 45% lead and 35 oz. silver per ton. Was a producer in 1918.

NEW UTAH BINGHAM MINING CO.

UTAH

Successor to Utah Bingham Mng. Co.

Described in Vol. XIII. Property and assets acquired by **New York Bingham Mining Co.**, which see.

NEW YORK-BINGHAM MINING CO.

UTAH

Acquired property and assets of New Utah Bingham Mining Co.

Office: Kittery, Me. Office of treasurer: 920 Broadway, New York.

Mine office: Michel Gibbons, mgr., Bingham Canyon, Utah.

Officers: T. B. Becher, pres.; with F. T. Bellows; J. W. Thompson, E. S. Burns and H. F. Hoevel, directors. H. A. Bellows, treas.; R. L. Reich, sec.

Inc. Nov. 19, 1918, in Maine. Cap. \$200,000; 20¢ par; 73,648 shares outstanding, March, 1920. Overdue bonds of old company outstanding are being refunded; \$11,000 in March, 1921. Stock was exchanged share for share. Annual meeting, 3rd Monday in November. On Oct. 31, 1920, current assets were \$1,408, and liabilities, including bonds, \$12,199.

Property: 20 claims, 19 patented, 130 acres adjoining the Telegraph of the United States Mining Co., in Bingham Canyon, Utah. Claims cover about 3,000' along the footwall portion of the Jordan limestone ore-bearing zone of Bingham. The large orebodies of this district are found in fissures within the limestone, or along limestone contacts, and the Jordan belt is the most productive of the 3 belts known in the camp; 16 fissure veins have been opened. Before the company acquired the property a number of promising veins carrying ore in the porphyry, but too narrow to be valuable, had been exposed. These veins pass into the limestone and are expected to have large orebodies at the contact. Ore is mainly silver-lead.

Development: consists of about 15,000' of work, mainly by 3 tunnels. In the Turngren tunnel, over 1,300' long, 8 veins from 1 to 4' thick have been cut, 7 showing ore and 2 of them worked. These two veins run north, are parallel and contain high-grade ore in the Spanish mine and along the outcrop in the company's ground. The Harrison tunnel, 600' long, is in quartzite and will crosscut the Rough and Ready veins, which are opened by 3 other tunnels higher up the mountain, all showing ore. Work on these

veins has been discontinued and all work concentrated on the Giant Chief.

The Giant Chief vein is a fault fissure, developed by a 200' shaft from which further exploration is being conducted on the 150' level; 600' of drifts and crosscuts driven in 1915 from this point have at 800' depth in the sulphide zone cut 7 fissures encountered in the higher workings. These veins carry oxidized mineral matter, surrounded by a soft lime, and show porphyry mineralized with iron pyrites. A small vein of carbonate ore, running nearly 50% lead, has been opened; the Bonanza tunnel was driven 977' along the Giant Chief vein, and across it to reach the ore, 150' deeper than where first opened.

The Kilkenny shaft is 284' deep. In 12 months ending with October, 1920, lessees advanced 500'; no work by company.

Equipment: includes compressor, 180-h. p. electric plant, taking current from the Utah Power & Light Co., hoist and all necessary buildings.

Production: by lessees during year ending Nov. 15, 1920, amounted to 400 tons of ore yielding \$18,613 of which company received 25%.

Property is well adapted for tunnel work, has large blocks of virgin ground and is considered promising. Company is an intermittent producer and hopes to meet development costs largely from royalties.

Reported that 27 acres were sold to the new Bingham-Galena Mng. Co.

NEW YORK BONANZA MINING CO.

UTAH

Park City, Summit county, Utah.

Reported, September, 1919, sold to the Naildriver Mining Co.

Old company described in Copper Handbook, Vol. XI.

NIAGARA MINING CO.

UTAH

Is controlled by United States Smelting, Refining & Mining Co., which see.

NORTH BECK MINING CO.

UTAH

Address: E. J. Raddatz, mgr., 19 Haxton Place, Salt Lake City, Utah.

Property: in northwestern part of Tintic, adjoining Centennial-Eureka, and Gemini.

Development: by 1,600' shaft. A leached zone was opened at 1,200'. Mine is fully equipped.

Drift on 1,600' level driven from bottom of shaft, 1921-'22.

Management does not reply to requests for information.

NORTH BECK MINING CO. OF SPANISH FORK

UTAH

Officers: M. K. Nebo, pres.; S. N. Nelson, v. p.; H. A. Gardner, sec.-treas., 1134 Bueno Ave., Salt Lake City, with B. H. Brown, W. A. Jones, Edward Money, and R. H. Andrus, directors.

Inc. 1919, in Utah. Cap. \$10,000; 1c par.

Property: a group of silver-bearing claims in Spanish Fork section, Utah county.

NORTH BINGHAM CONSOLIDATED MINING CO.

UTAH

Office: Provo, Utah. Mine near Bingham Canyon, Salt Lake county, Utah. O. Raymond Knight, pres.; Wm. W. Matthews, v. p.; R. E. Allen, sec.-treas., with J. Wm. Knight, directors.

Inc June, 1907, in Utah. Cap. \$100,000; shares 10c par; assessable. Is controlled, through stock ownership, by the Knight Investment Co.

Property: 6 claims, in Barney Canyon, has a very wide ore zone, said to show leached ore carrying traces of copper and up to \$2.80 gold per ton.

Development: includes a tunnel of about 1,000', and a 2-compartment shaft. Property is considered a good development proposition. Idle.

NORTH SCRANTON MINING CO.

UTAH

Address: H. B. Merrihew, Box 355, Lehi, Utah.

Officers: H. B. Merrihew, pres.-mgr.; B. C. Lott, v. p.; F. R. Heidebreich, sec.-treas., with D. H. Cox, directors.

Inc. May, 1905, in Utah. Cap. \$100,000; shares 10c par; assessable; 421,000 issued.

Property: 10 unpatented claims, 200 acres, on west slope of Tintic

range, in North Tintic district, Utah, $3\frac{1}{2}$ miles by good road from railroad. Group shows outcrops of silver-bearing zinc-lead ore in a well-defined fissure in dolomitic limestone. Ore consists of 6 to 8" streaks, reported to carry 23% lead and 6 oz. silver per ton.

Development: by 2 tunnels and winzes with total workings of 2,300'. Tunnel No. 1 exposes 18% zinc ore at depth of 40'. Tunnel No. 2 shows ore assaying 74% lead and 54 oz. silver, at depth of 75'. While not in commercial quantity, this ore warrants further development to reach the main fissure. The fissure has been followed down for 200'.

Is a prospect. Assessment work only done during past 5 or 6 years.

NORTH STANDARD MINING CO.

UTAH

Office: 404 Walker Bldg., Salt Lake City. **Mine address:** J. H. Manson, mgr., Eureka, Utah.

Officers: Dr. C. F. Wilcox, pres.; J. H. Manson, v. p.; John Dorius, sec.-treas., with Frank L. Copening and L. A. Marks, directors.

Cap. \$100,000; par 10¢; assessable; first assessment levied October, 1919, and two, of 1¢ each (Nos. 8 & 9), in 1921. Stock is listed on Salt Lake Exchange.

Property: 22 claims, north of the Tintic Standard, at Eureka, Juab county.

Development: in year ending April, 1920, a 2-compartment shaft was sunk 525', with 1,925' total workings. By March, 1921, shaft had reached 1,100' and a N. E. drift started to cut intersection of 2 fissures uncovered on 500' level.

Equipment: includes electric hoist, and a compressor.

OGDEN-TINTIC LEASING CO.

UTAH

Has a lease on part of property of Tintic Central Mining & Milling Co., which see.

Company probably dead; Tintic Central property reported taken over by Knight Investment Co.

OHIO COPPER CO. OF UTAH.

UTAH

Office: 15 Broad St., New York. **Operating office and concentrator:** Lark, Utah.

Officers: Chas. A. Kittle, pres.; E. S. Hooley and Alfred E. Cortis, v. ps.; with J. H. Flagler, Hubert E. Rogers, A. R. Peacock, Hugh Aiken, St. John Wood and Jas. A. Heitzmann (sec.-asst. treas.), directors. S. K. Kellock, treas.-asst. sec.

Inc. Nov., 1916, in Maine, as a reorganization of the Ohio Copper Mining Co., formerly the Ohio Copper Co. **Cap.** \$3,500,000, increased from \$3,000,000, Sept. 10, 1919, which had been increased from \$2,500,000 on Jan. 3, 1919; par \$1; 2,225,625 shares issued; 1,000,000 shares retained in treasury to provide for converting \$1,000,000 7% ten-year bonds and to retire \$250,000 three-year notes. New York Trust Co., transfer agent; Columbia Trust Co., New York, registrar.. Listed on Salt Lake Exchange and on Boston Curb. Price range 70¢ to \$1.05 in 1918; 35¢ to 50¢ in 1919; 5¢ in 1920. 50,000 shares sold for 11¢ each at public auction in New York on Dec. 31, 1920.

Balance sheet as of December 31, 1918, shows; total assets, \$2,676,732, which includes: property, \$2,096,793; stocks and bonds of Bingham Central Ry., \$327,820; current, \$118,108; prepaid insurance, interest, etc., \$21,087; general profit and loss-deficit, \$112,925. Liabilities show: capital stock, \$2,225,625; 3-year convertible 7% notes dated September 20, 1918, \$250,000; current, \$156,389; sundry reserves, \$44,718.

Profit and loss statement shows: total value metals produced, \$817,210; cost of production, \$941,745; operating loss, \$124,535; rents, interest received, etc., \$2,999; miscellaneous expenses, \$18,764; profit and loss deficit, 1918, \$140,300. Deficit, December 31, 1918, \$112,924. Fire loss, due to burning of the mill, is given as \$104,233.

Revenue in 1919 was \$188,599 from concentrates sold, and expenses were \$230,386.

For detailed history of old company and the plan of reorganization, see Vol. XIII of the Mines Handbook.

Property: 14 claims, patented, 120 acres, bounded on the N. and W. by holdings of the Utah Copper Co., on the E. by the Montana Bingham Cons. M. Co., on the S. by United States Mining Co., and on S. W. by the Boston Consolidated. The Mascotte tunnel, owned by the Bingham Central railway, a subsidiary company, charges toll on all ore hauled to the mills.

Geology: property carries a belt of quartzite 500' wide carrying 2 parallel veins known as the What Cheer and All's Well. These veins are more than 500' apart, and separated by mineralized quartzite which constitutes the main orebody of the property, the ore averaging 1.015% copper. The quartzite, which adjoins the laccolithic mass of monzonite-porphry of the neighboring Utah Copper and Boston Consolidated properties, is much shattered and broken, with ore disseminations and impregnations along shatter and cleavage planes, ore in the brecciated material being chiefly chalcocite and chalcopyrite, associated with pyrite, readily amenable to concentration, and lying above the level of the Mascotte tunnel.

Estimates of ore developed vary greatly, the former management claiming that ore had been developed under about 5 acres, the "porphyry" orebody being estimated as 400' wide, 1,000' long and 600' deep. One estimate gave 3,746,165 tons of ore developed with 9,738,690 tons of probable ore and the average tenor probably about that of the ore milled, or 1.01% copper. Proven ore reserves July 31, 1919, were 6,000,000 tons of 0.8% copper, with another large block of ore not yet fully developed that averages 1% copper.

The 14,000' single track Mascotte tunnel, connecting with the shaft at depth of 1,100', cares for the large volume of water coming from the workings. Ore is blocked out in 100' squares, with extensive development on the 3rd, 5th and 7th levels, and the caving system is used in extraction. Ore is sent from the upper workings, through chutes, to a 4,000-ton ore-bin, 20' wide and 200' long, extending over both tracks; loaded in about 4 minutes from the bins into trains of 18 to 20 five-ton double-bottom steel cars, and hauled by electric locomotives to the concentrator at Lark.

The mill: at Lark, 3,200' from the mouth of the Mascotte tunnel. On August 10, 1918, fire destroyed the mill. It was rebuilt and operations were again started, October 1, and by February 23, 1919, the 5-unit flotation mill was completed.

Production: in 1918 was 3,362,119 lb. copper, compared with 5,279,259 lb. in 1917. In 1918, there was also produced 5,290 oz. silver and 731' oz. gold.

Output in 1919 was 1,012,920 lbs. copper, 1,149 oz. silver and 96 oz. gold.

On March 10, 1919, all operations were suspended due to the depressed copper market, and had not been resumed up to September, 1921.

OHIO COPPER CO.

Succeeded by Ohio Copper Mng. Co., and in turn by Ohio Copper Co. of Utah, which see.

OHIO COPPER MINING CO.

Property sold at foreclosure sale, August, 1916, to representatives of bondholders' committee and company reorganized as Ohio Copper Co. of Utah, which see. Also see Vol. XII.

O. K. EXTENSION MINING & REDUCTION CO.

Office: 609 Newhouse Bldg., Salt Lake City, Utah. **Mine office:** Milford, Beaver county, Utah.

Officers: A. J. McMullen, pres. and gen. mgr.; S. S. Pond, v. p.; Chas. A. Weaver, sec.-treas., with R. H. Greenhalgh, directors.

Inc. Nov. 1899, in Utah. **Cap.** 300,000 shares; 3c par; assessable; issued, 125,000. Annual meeting, second Tuesday in October.

Assessment No. 19, ¼¢ per share, delinquent Jan. 3, 1922.

UTAH

UTAH

UTAH

Lands: 6 claims, 3 patented, 120 acres, near the Majestic mine, in the Beaver Lake district, show monzonite and quartz-porphry, carrying 2 fissure veins, of 5 to 24' estimated average width, traceable 150'. Opened by 7 pits and shafts of 15 to 510' depth, and a 150' tunnel, with 1,045' of workings, showing chalcopryrite estimated to average 2% copper. Inactive except for annual assessment work.

O. K. SILVER M. & M. CO.

UTAH

David Keith, gen. mgr., Kearns Bldg., Salt Lake City, Utah. Thos. Kearns, pres.; W. G. Lamb, sec.-treas.

Inc. 1909, in Utah. **Cap.** \$100,000; shares 10c par; assessable; assessment No. 18 of 1/2c per share levied Nov., 1920. Stock listed on Salt Lake Exchange.

Property: 33 claims in Erickson mining district, Indian Springs (near Tintic Jn). Tooele county.

Development: by a 280' incline shaft, reported all in ore running better than 186 oz. silver and \$4.70 gold per ton.

Production: in 1916, 5 cars of ore shipped netted \$30,000. No recent report.

OLD EMMA LEASING CO.

UTAH

Dissolved April, 1917. Assets consisting of 416,667 shares of Emma Cons. Mines Co. stock were distributed to stockholders at ratio of 3 shares of O. E. L. for 1 share of Emma Cons. Was a George Graham Rice promotion.

OLD EMMA MINES CO.

UTAH

Successor to Old Emma Mng. Co.

Emma Consolidated Mining Co. owned 80% of the outstanding capitalization.

Property was leased for 14 months from July, 1916, to Old Emma Leasing Co., which was dissolved in April, 1917. Lease sold to Emma Cons. Mining Co. Company went into hands of receiver in 1919. Property now controlled by Emma Silver Mines Co., which see.

OLD EVERGREEN M. & T. CO.

UTAH

Address: H. G. McMillan, gen. mgr., 649 E. South Temple St., Salt Lake City, Utah.

Officers: Hy Cohen, pres.; H. G. McMillan, sec.-treas., with Herbert Cohen and Z. H. Farnsworth, directors.

Cap. \$300,000; shares \$1 par; all outstanding.

Property: 12 patented claims, 3 miles N. E. of Alta, in the Big Cottonwood district. Mine is an old-time producer of gold-copper ore, with 2,700' drainage and transportation tunnel. Idle.

OLD SUSAN MINING CO.

UTAH

Mail returned, 1918, from former address, 411 Felt Bldg., Salt Lake City, Utah.

Officers: W. H. Simmons, pres.; P. F. Thompson, v. p.; E. D. R. Thompson, sec.-treas.-mgr., with F. A. Druehl, directors.

Inc. 1899, in Utah. **Cap.** 400,000 shares; 10c par; 257,572 shares outstanding. Annual meeting, first Monday in January.

Property: 3 patented claims, 25 acres in Tintic mining district. Juab county, shows gold-silver lead ore in fissure veins in porphyry and monzonite. Developed to depth of 300' by 1,500' tunnel. The mine, at last accounts was worked by lessees on a royalty basis.

ONTARIO SILVER MINING CO.

UTAH

Offices: 163 So. Main St., Salt Lake City; Room 1208, 32 Broadway, New York. **Mine office:** Newton A. Dunyon, gen. supt., Park City, Utah.

Officers: J. E. Bamberger, pres.; D. M. Hyman, v. p.; Ernest Bamberger, treas.-gen. mgr., with N. A. Dunyon, Wm. C. Osborne; P. L. Benjamin. L. E. Bamberger and Walter Linforth, directors. Herbert Cohen, sec.; J. L. Tilton, New York, asst. sec.

Inc. Dec. 15, 1876, in California. **Cap.** \$15,000,000; \$100 par; all issued. Stock is listed on New York Exchange. Transfer office, J. L. Tilton, asst.-

sec., 32 Broadway, New York. Central Union Trust Co., New York, registrar. Annual meeting, third Monday in January. 103,120 shares sold on N. Y. Stock Exchange during 1921, the range being \$6 high and 3½ low, compared with \$9½ high in 1920 and \$5.37 in Jan., 1922.

The annual report, Dec. 31, 1920, shows total receipts \$585,180, including \$551,369 from ore sales; disbursements \$426,854. Cash in bank was \$40,765; bills receivable, etc., \$65,871; stocks and bonds \$517,146.

Dividends: \$14,932,500 to end of 1902, then a break without disbursements until, 1918; \$1.00, or a total of \$150,000 in 1918; \$75,000, or 50¢ a share on Jan. 5, 1919; none since. Total \$15,157,500.

Property: the Ontario mine, 800 acres, patented, at the head of Little Cottonwood canyon; also owns a 57% interest in the Weber Coal Co., 811 acres coal land; 75,000 shares of New Quincy Mining Co. stock, and ½ interest in Naildriver Mining Company, and Silver Lake Water Co.

The Ontario is an old and famous silver-lead mine in which the ore occurs in a great pipe and chamber deposit in limestone. Ore shows an increase in zinc content at depth. Mine was once the largest silver producer in Utah.

Development: about 60 miles of old workings, includes two tunnels and a shaft 2,000' deep. From the 900' level to surface, mine is worked by lessees.

In December, 1915, the manager decided to re-open the Ontario mine below the 1,500', or drain tunnel No. 2 level. The old workings were unwatered to the 1,700' level and work was done on the 500, 1,000, 1,500 and 1,700' levels in 1916, on company account.

Shaft caved in badly in November and the lower levels were flooded, but by May, 1917, re-timbering and unwatering had been accomplished.

Ore extraction is mainly from workings between 1,500 and 2,000' levels where low-grade ore is mined. Silver-chloride ore 12-18" wide and running over 200 oz. was recently cut above 500' or Union tunnel level. Management is hunting oreshoots beyond Ontario fault.

During 1919, work was largely done below the 1,500' level; orebodies of small size, but good grade, were opened between the 1,500' and 1,700', and on the 1,800' levels; total extensions, 3,311'. In 1920, the 2,000' level was unwatered after 20 years flooding, but mining operations were confined to the levels above 1,800'; workings for the year totaled 5,087'.

Equipment: includes 3½-mile power line, 2 electric pumps, hoist, compressor, and 100-ton mill.

Production: about \$35,000,000; ore sales in 1918 were \$573,070; \$284,379 in 1919; \$551,369 in 1920.

Stock believed to have a speculative value in addition to its liquidation value of about \$4 per share.

OPEX CONSOLIDATED MINES CO.

UTAH

Is a part of Empire Mines Co., which see.

OPHIR CENTRAL MINES CO.

UTAH

Office: 1609 Walker Bank Bldg., Salt Lake City.

Officers: W. S. Elliott, pres.; John F. Bauchelle, v. p.-treas.-mgr.; W. E. Rhoten, sec., with F. M. Wichman, Andrew Hexem and Oscar H. Upwall, directors.

Inc. Dec. 18, 1919, in Utah. **Cap.** \$1,000,000; par \$1; 351,838 treasury shares; assessable. Transfers made at company's office. Annual meeting, 2nd Monday in December.

Property: 21 claims (15 patented), 328 acres, in Ophir district, Tooele county, S. of Ophir Hill Cons. Silver-lead-copper ore occurs in chamber deposits in limestone, said to average \$40 per ton in value; 1 oz. of silver is present for each unit of lead, and copper content is 1½%.

Development: by drilling for 12 months to May, 1920. Now sinking 2-compartment shaft. Total expenditures have been \$30,000.

Equipment: 100-h. p. electric hoist and a compressor.

OPHIR HILL CONSOLIDATED MINING CO.**UTAH****Office:** Ophir, Tooele county, Utah.

Officers: Wm. A. Clark, pres.; W. C. Siderfin, sec.; M. H. Hartman, gen. mgr., with Chas. W. Clark, directors. A. G. Swanson, mine supt.; F. Wellenger, mill supt.; E. Bowman, engr. Company is owned by Senator Clark and managed as a close corporation.

Property: one-half mile north of Ophir, carries the 5' Top-vein, the 20' Big vein, the Middle vein 10', the Copper vein 8', and the Blue vein, 6' thick and from 10'-100' wide.

Ore: contains argentiferous galena, with pyrite, averaging 6% lead and 6 oz. silver per ton; some copper is also present. Ore occurs as replacements in argillaceous limestone and shale, in 3 clearly defined shoots, known as the Wild Delirium, Miner's Delight and Western Slope.

Development: an 1,800' incline shaft, with the usual levels and stopes, also a transportation tunnel nearly 1 mile long, through which all ore is taken. This tunnel intersected the vein on the 1,300' level; it also drains the mine at depth.

Equipment: includes a steam plant, not operating, and a hoist; there is a gravity tramway from the mine to the 200-ton mill.

Production: averages about 200 tons daily of lead-silver ore, with a little gold and 2½% copper. Concentrates run about 10-20 oz. silver and 10-12% lead per ton. The property is an excellent one. A branch of the Salt Lake Route known as the St. John & Ophir R. R. Co. was built to the property in 1912.

In 1919, mine produced 33,895 tons of ore, yielding \$705,856 gross, or \$155,633 net. Ore contained 373,435 oz. silver, 6,595,743 lb. lead and 210,241 lbs. copper. The net proceeds for 1920 were \$138,909, and improvements cost \$129,180.

Took lease and bond, Oct., 1921, for \$115,000, on **Ophir Coalition Mines Co.** property, consisting of 12 patented and several unpatented claims adjoining Ophir Hill Cons. on the west and south.

OPHIR KING GOLD MINING CO.**UTAH**

Mail returned from Ophir, Tooele county, Utah.

Inc. November, 1917, in Utah. **Cap.** \$10,000; shares 2c par; assessable.

Lands: 30 acres, patented, 9 miles from railroad, adjoining the Ophir Hill and Cliff Mining Co.'s properties carry auriferous and argentiferous copper and lead ores. Mine has 400' tunnel, with some crosscutting and several shallow shafts. Property and equipment were sold at sheriff's sale in November, 1914, to John B. Holmes, for \$1,750, to satisfy a judgment obtained by Holmes.

OPHIR METALS CO.**UTAH****Address:** W. B. Farmer, Hampton Falls, N. H.**Offices:** 1609 Walker Bldg., Salt Lake City and 53 State St., Boston.**Inc.** 1919, in Utah.

Property: 13 claims, patented, 146 acres, and 27 unpatented claims, that of the Lion Hill Consolidated Hill Mines Co., 640 acres in the Ophir section of the Tintic district, carrying silver-lead ore in fissure veins in limestone.

Development: by over 5,000' of shafts, tunnels, and drifts. A 1,500' tunnel is being driven about 500' below old workings, to prospect Buckhorn and Cliff limestone horizons.

OPHIR QUEEN MINING CO.**UTAH**

S. Crawford, Cedar River, Mich., controls property.

OPHIR SILVER MINES CO.**UTAH****Mine address:** Sol. Snider, supt., Ophir, Utah.

Officers: Guy R. La Coste, pres.-gen. mgr., 309 Felt Bldg., Salt Lake City; H. W. Lane, v. p.; Ira C. Tichenor, sec.; E. W. Toole, treas., with L. F. Adamson, directors.

Inc. Nov., 1919, in Utah. **Cap.** \$100,000; par 10c; 250,000 shares in treasury.

Property: 15 claims, in Ophir district, Tooele county, adjoining the Ophir Hill property, said to show well-defined veins of silver-lead ore. Previous development, mainly tunnels, is estimated to have cost \$30,000. Work in 700' lower tunnel suspended and an upper exploratory tunnel begun to open Buckhorn fissure had advanced 175', April, 1921.

Examined by F. M. Wichman.

OPHIR-UTAH MINING CO.

UTAH

Idle. **Address:** G. G. Schliep, pres., 361 E. 3 S. St., Salt Lake City. C.

L. Olson, sec.-treas. Mine near Ophir, Tooele county.

Inc. Feb. 13, 1909, in Utah. **Cap.** \$250,000; 25c par.

Lands: 7 claims, 9 miles from railroad, show copper and lead ores.

Has several buildings and a hoist.

OPOHONGO MINING CO.

UTAH

Office: H. T. Hatfield, sec., Room 211, Felt Bldg., Salt Lake City, Utah.

Officers: Wm. Hatfield, pres. and mgr.; C. E. Loose, v. p.; H. T. Hatfield, sec.-treas..

Inc. 1908, in Utah. **Cap.** \$250,000; shares 25c par; assessable. Shares are listed on the Salt Lake Stock Exchange.

Dividends: three 1c and two 2c declarations in 1911-12, and one of 2c on January 30, 1913 a total of \$80,907 to 1916. Assessments levied 1919-'20; No. 5, ¼c, Sept., 1921.

Property: 3 claims, patented, in the vicinity of the Gold Chain and Empire mines.

Development: by shafts and tunnels, with over 2,000' of workings, to depth of 1,800'. The mine is operated jointly with the Gold Chain, with which it is connected on the 300' level, and hoisting is through the Black Jack shaft. The 450' level shows an 18' orebody, said to give assays up to 10% copper and \$60 gold per ton. The 700' level shows this same ore shoot. Present development is mainly in the winze below the 1,800' level, down 75' in favorable ground.

Equipment: owned jointly with the Gold Chain, includes an air compressor.

Production: has been intermittent since it began in 1909.

ORPHAN BOY MINING CO.

UTAH

Idle. Milford, Utah.

Officers: James R. Craig, pres.; W. D. Williams, v. p. and mgr.; Chas. A. Doe, sec.-treas., with M. R. Williams and P. J. Evans, directors.

Property: in Star district, 20 miles S. W. of Milford, Beaver county, Utah, shows limestone, cut by quartz monzonite, with ore in veins and replacements. There are 11 claims, adjoining the Red Warrior and Mowitza mines, developed by 500' shaft with 1,200' of tunnels and workings from which considerable high-grade ore has been shipped. Vein, though narrow, has bodies of lead-carbonate ore carrying a little copper. Presumably doing only annual assessment work.

OSBORN CONSOLIDATED MINING & MILLING CO.

UTAH

Dead. Described in Vol. XIII.

OXFORD CONSOLIDATED MINING CO.

UTAH

Eureka, Utah. James Crooks, pres.; Geo. W. Owen, sec.-treas.; C. H. Spriggs, mgr.

Inc. June, 1909, in Utah. **Cap.** \$25,000; shares 5c par; assessable.

Lands: 9 claims, patented, show copper and lead ores. Levied an assessment of one-half cent, early 1911, to pay indebtedness incurred through litigation. No work has been done since patent to property was issued.

PACIFIC GOLD MINING & MILLING CO.

UTAH

Office: American Fork, Utah.

Officers: J. L. Craig, pres.-mgr.; Jas. Chipman, Jr., v. p.-treas.; H. C. Johnson, sec., with C. F. Muller, A. K. Thornton, directors.

Inc. 1900, in Utah. **Cap.** \$100,000; shares 10c par; assessable; 400,000

shares outstanding. Annual meeting, first Monday in February. Financial statement for 1920 showed balance in bank, \$320; receipts from assessments were \$7,198 and expenditures \$7,399. Assessment 58, of 1¢, levied Nov. 17, 1920.

Property: Blue Rock group, 7 patented claims, 120 acres in American Fork mining district, shows quartzite and limestone, carrying several fissure veins varying in width from 17" to 15'. Veins strike N. 30° E. and dip 50° N. W.

Ore: lead-silver sulphide, estimated by management to average 50% lead, 25 oz. silver, .02 oz. gold, 1.5% zinc, 15% iron, 0.1% copper, 22% sulphur.

Development: by 3 tunnels, 300', 700' and 1,000' long with about 5,000' of workings.

Work in 1921 on a strong fissure 1,100' from portal of main tunnel, 400' below surface, opens 4' vein, on which a 400' drift and 75' raise is in milling ore, some of which was extracted and stored.

Equipment: includes a hydro-electric-generating plant, installed in Dec., 1916, at a cost of \$20,000. A 200-ton mill, constructed during 1917, treated about 70 tons per day in 1918, concentrates netting \$37 per ton.

Lease formerly held on company's property by American Fork Exploration Co., through stock ownership of the Fissures Exploration Co., relinquished in 1919. Both of these companies are now defunct, but apparently left debts which creditors were endeavoring to collect from the Pacific company; the decision of the lower court is in favor of defendant.

PALOMA EXTENSION MINING CO.

UTAH

Office: 222 Judge Bldg., Salt Lake City, Utah. Lorin Hall, pres.; Willard Scowcroft, v. p.; John W. Scowcroft, sec.-treas.

Inc. in Utah. Cap. \$50,000; shares 5¢ par; assessable; last assessment, 1¢ a share, delinquent, September 13, 1919; 700,000 shares outstanding.

Property: 300 acres in Star mining district, Beaver county, shows N. E. fissures carrying silver-lead-copper ore. These fissures cross contacts between limestone beds running N. and dipping E., quartzite that runs E. and dips N., and a granite or quartz monzonite. Ore occurs where the contacts are crossed by the fissures.

PALOMA GOLD AND SILVER MINING CO.

UTAH

Office: Judge Bldg., Salt Lake City, Utah. **Mine and works:** Moscow, Beaver county, Utah.

Officers: M. P. Braffet, pres.; H. W. Lane, v. p., with W. Scowcroft. H. B. Cole and B. F. Caffey, directors; J. H. Braffet, sec.-treas.; C. J. Graff, supt.

Inc. in Utah. Cap. \$100,000; shares 10¢ par; assessable; last assessment 1¢ levied September 17, 1918. Stock is listed on the Salt Lake Exchange. Prices varied between ¼ and ¾¢ a share in 1918; ½-3¢ in 1919; ½¢ in 1920; ¼-2¢ in 1921.

Property: 14 claims in Star district, near Moscow, said to cover 3,000' along a limestone-monzonite contact intersected by 2 fissure veins, carrying silver, lead and copper ore.

Development: by 500' of trenching in 900' incline shaft, with development work in progress on 900' level in May, 1919.

Production: over 200 tons of ore in 1917 and a small output for 1918 are reported.

No recent information.

PANAMA MINING & MILLING CO.

UTAH

Mine address: Fred McCoy, mgr., Castleton, Grand Co., Utah.

Office: Grand Junction, Colo.

Officers and Directors: J. W. Hoke, of Palisade, pres.; Chas. Tharp, of Palisade, v. p.; C. N. Nelson, sec. and H. R. Post, treas., both of Grand Junction, Colo.

Inc. 1921 in Utah. **Cap.** \$100,000; par \$1.

Property: 300 acres, at 10,300' elevation in La Sal mountains, Grand county, shows granite and monzonite. Claims are 50 miles S. E. of Cisco and 6 miles from the Utah-Colorado line. Said to have a good showing of high grade silver-copper ore. In 1918, former company started a 2,400' tunnel to cut a big dike of porphyry containing disseminated copper ore said to carry 2½% copper. In 1921, a vein of high grade ore was cut and shipments started.

PARK CITY KING MINING CO.**UTAH**

Officers: Thos. Marioneaux, pres., Kearns Bldg., Salt Lake City; Frank Barnes, sec.-treas.; Sam'l Dowse, supt., with D. M. Griffith, directors.

Inc. May, 1917, in Utah. **Cap.** \$100,000; shares 10c par; 625,000 shares in treasury.

Property: 60 acres, adjoining the Silver King on the W. at Park City, said to carry 3 fissure veins, showing copper and silver values.

Development: by 600' tunnel.

Reported, March, 1921, that reorganization was in contemplation, but in mid-summer property was under bond and lease to I. C. Thoresen, et al.

PARK CITY MINES CO.**UTAH**

Company defunct. See description in Vol. XIV. of the Mines Handbook. John Pingree, former sec., 189 First Ave., Salt Lake City, Utah.

Lease on American Flag mine, with purchase option of \$250,000, forfeited in 1917.

Company owned \$34,000 bonds and 65,000 American Flag shares.

PARK CITY MINING & SMELTING CO.**UTAH**

Officers: G. W. Lambourne, pres. & mng. dir.; Moylan C. Fox, v. p.; D. C. Murphy, sec.

Inc. 1922, in Colorado. **Cap.** \$7,500,000; \$5 par.

The company will acquire the Daly West Mining Co. of Park City, by exchange of stock, share for share, as already authorized by that company, and the Judge Mining & Smelting Co. will be united to transfer its holdings on an equitable basis.

PARK UTAH MINING CO.**UTAH**

Mine address: Geo. D. Blood, gen. mgr.; Paul Hunt, supt., Park City, Utah.

Office: Deseret Nat'l Bank Bldg., Salt Lake City, Utah.

Officers: G. W. Lambourne, pres.; W. M. Bransford, v. p.; Geo. W. Blood, gen. mgr., with M. C. Fox, J. S. Bransford, Frank Pingree, and Otto Ludeking, directors. W. A. Dunn, sec.; S. G. Taylor, treas.

Inc. 1917. **Cap.** \$1,250,000; \$1 par; outstanding, 854,000 shares. Dividend of 5¢ a share, or \$50,000, paid Dec. 15, 1921.

Development: crosscutting N. and S. from the Ontario drain tunnel at about 10,000' in from the portal, which is the 1,500' level. Management is trying to solve the problems of the Frog Valley and McHenry faults.

Work to the S. opened a big fissure in June of 1920 with 3' of good silver ore, 450' in length; ore is of milling grade but includes high grade streaks; shipments made at rate of 2,000 tons a month, average \$45 to \$50 per ton.

Company is controlled by Judge interests.

PATHE MINING CO.**UTAH**

Address: American Fork, Utah.

Officers: John E. Berg, pres.; L. A. Anderson, v. p.; Boise A. Wells, second v. p.; S. L. Anderson, sec.; S. T. Shelley, treas., with W. F. Anderson and Abner Chipman, directors.

Inc. March, 1917, in Utah. **Cap.** \$10,000; shares 1c par.

Property: the Silver King Nos. 1 and 6 claims in American Fork district. No recent information; probably idle.

PENNUVA COPPER CO.**UTAH-NEVADA**

Office: 226 Dooly Blk., Salt Lake City, Utah.

Officers: J. R. Austin, pres.; G. D. O'Connor, v. p. and mgr.; F. L. Hummel, sec.-treas.; W. N. Beatty and W. R. McPherson, directors.

Inc. 1916, in Utah. Cap. \$25,000; shares 5¢ par; outstanding, \$22,500, assessable. In December, 1919, the State Securities Commission granted company permission to sell 68,000 and in February, 1921, 20,000 treasury shares.

Property: 21 claims, unpatented, 385 acres, situated on Promontory point, next to the Lakeview and 2 miles from Saline St'n. on the S. P. R. R.

Company holds also 5 years' bond and lease on the Black Devil group of 10 claims in Silver Zone district, Elko county, Nevada, near Proctor and 23 miles W. of Wendover on the W. P. R. R.

Development: at Saline, Utah, by 200' shaft and 260' of drifts in quartz vein showing chalcopyrite-bornite ore in bunches, assaying 20-45% copper; at Proctor, Nevada, by shallow shafts and tunnel in quartz fissure in limestone, carrying silver values. A hoist has been installed, and a new adit started. Still in prospective stage.

PERUVIAN CONS. MINING CO.

UTAH

Office: 53 S. West Temple St., Salt Lake City. Henry Welling, pres.; J. P. Clays, sec.

Property: a group of claims near Alta, near South Hecla mines, from which company shipped 11 cars of \$18-\$25 lead-silver ore during summer of 1919.

Property reopened, 1922.

PHOENIX MINING CO.

UTAH

See **Utah Apex Mining Co.**

PINE CANYON & BINGHAM TUNNEL CO.

UTAH

Office: 121 N. W. Temple St., Salt Lake City, Utah.

Officers: J. B. Moreton, pres.; Richard Savage, v. p.; Homer Benton, 2nd v. p.; Louis Levine, sec.-treas.

Inc. July 28, 1916, in Utah. Cap. \$1,500,000; \$1 par; 800,000 issued and in secretary's hands.

Property: 42 claims, 150 acres patented, covering apex of mountain, W. of Bingham, shows two N. E.-S. W. fissures, a bedded contact deposit and the Star vein, in quartzite carrying limestone beds and cut by Bingham monzonite porphyry.

Company owns, 2,000' tunnel running from Pine Canyon toward Bingham. Portal of the tunnel will be 1½ miles from the International smelter at 5,600' elevation. The Great Western tunnel at an elevation of 7,300' is between the Great Divide group and the Star group, half way up the mountain side between the Nancy Hanks and the portal of the new Pine Canyon tunnel. Company does not reply to requests for information.

PINION QUEEN MINING CO.

UTAH

Mine address: John Westerdahl, supt., Eureka, Utah.

Address: Provo, Utah. **Mine office:** Dividend, Utah.

Officers: E. J. Raddatz, pres.-mgr.; J. William Knight, v. p.; J. C. Deal, sec.-treas., with Andrew Sutherland, supt., and Wm. Scowcroft, directors.

Property: 16 claims, in East Tintic district.

Development: by 800' shaft and 400' of drifts up to March, 1921.

PITTSBURGH CONSOLIDATED MINING & MILLING CO.

UTAH

Address: P. S. Keogh, pres.; 208 Walker Bank Bldg., Salt Lake City.

Described in Vol. XIV. Reorganized, November 1920, as Pittsburgh Silver Mng. Co., which see, which took lease and bond for \$150,000 on company's Alta property.

PITTSBURGH RADIUM CO.

UTAH

Address: Pittsburgh, Pa. **Mine address:** Yellow Cat, via Thompsons, Grand county, Utah.

Officers: W. J. Stevenson, pres.; J. H. Fuller, of Cleveland, v. p.; E. H. Beckstrand, of Univ. of Utah, v. p., Edwin N. Ohl, sec. together with Henry Fitzpatrick and J. L. Fonter, all of Pittsburgh and Alfred A. Cohen of New York, directors.

Inc. 1920, in Utah. Cap. \$500,000; \$1 par. Is the operating company for

the National Vanadium Products Co., a Delaware corporation, which owns all the stock.

Mining property: a group of carnotite claims at Yellow Cat, south of the Rio Grand Western R. R. at Thompsons and 20 miles north of Moab, Grand county, Utah.

Owns the Overland mills at Denver, remodelled in 1921 to treat 120 tons of caronotite and 500 tons vanadium ore monthly. Electric furnaces are used and ferro-vanadium produced.

Operated and employed 18 men at mine during 1921 after 2 years suspension of work.

PITTSBURGH SILVER MINING CO.

UTAH

Is a reorganization, or successor of the Pittsburgh Cons. Mng. & Mlg. Co.

Mine address: W. K. Yorston, mgr. American Fork, Utah.

Officers: A. D. Myers, pres.; Heber M. Wells, v. p.; Jos. H. Bigger, sec.-treas.

Inc. 1920 in Delaware. **Cap.** \$1,250,000, divided into \$250,000 "silver ore certificates" and 1,000,000 shares of \$1 par. Certificates are secured by ore in the mine, and it is provided that holders will receive 40% of net profits until repaid; holders receive also equal amount in stock.

Property: the Pittsburgh mine 9 claims, 8 patented, in both Salt Lake and Utah counties, mainly on the American Fork side of the Divide. Ore occurs in fissure veins.

Development: on the Pittsburgh fissure, by 3 tunnels from American Fork canon. A 500' upper tunnel is credited with a production of 11,000 tons under former management. Operations were resumed in 1914 after an examination of the property by J. Benton Leggatt. No. 2 tunnel a 12' orebody of solid lead-zinc sulphide is said to be exposed at a vertical depth of 800' to 900'; reopened and work resumed Oct. 1921.

In 1915 the 3 tunnels were connected and drifts run along the several fissures. A fourth tunnel, started to tap the Pittsburgh fissure 150' lower than No. 3, will be driven 1,200' and is to serve as a means of transportation.

Equipment: necessary buildings erected 1921. Has a 6,000' tramway of 150 tons per day capacity, mining machinery, etc. A mill will be erected 1922.

PLANETARY MNG. & MLG. CO.

UTAH

Inactive. **Address:** T. E., Weyher, sec., 210 Judge Bldg., Salt Lake City, Utah.

Cap. \$10,000; shares 10c par; assessable; reduced from \$500,000 in November, 1917.

Property: claims near the old Century mine, N. W. of Kelton, Boxelder countv, Utah. Development work is continued by assessments.

PLUTUS MINING CO.

UTAH

Controlled through stock ownership by Chief Consolidated Mng. Co.

Address: Eureka, Juab county, Utah.

Inc. 1907, in Utah. **Cap.** \$100,000; shares 10c par; fully issued; assessable. Last assessment of 1 ct. per share delinquent December 6, 1921. Absorbed the Tetro Mining Co., January, 1909. Shares are listed on the Salt Lake Stock Exchange.

Property: 14 claims, patented, including the Tetro group of 3 claims, from which the Tetro Mining Co. paid \$18,000 in dividends. Mine carries auriferous and argentiferous lead and copper ores, developed by a 600' shaft, about 3,700' of tunnels, and 1,250' of other workings. Is being developed by Chief Cons. Mining Co. from its 1,900' shaft; during 1920, exploratory work was done on 1,750 and 1,000' levels.

POLE STAR COPPER CO.

UTAH

Officers: Vandergrift Bldg., Pittsburgh, Pa. and Newhouse Bldg., Salt Lake City, Utah.

Officers: P. S. Chambers, pres.; D. A. Rees, v. p.; A. E. Custer, 2nd v. p.; F. A. Duerr, treas.

Inc. Nov., 1916, in Delaware. Cap. \$1,500,000; shares \$1 par. Statement rendered March 20, 1917, showed cash on hand and accounts receivable, \$125,402.

Property: 15 claims, 5 patented, about 230 acres, in the Clifton or Deep Creek mining district, Tooele county, Utah, 167 miles S. W. of Salt Lake City. Gold Hill is the post office address, about 2 miles south.

Geology: country rock is monzonite with porphyry intrusions. East and west veins traverse the claims and are in turn cut by N.-S. dikes, the rich ore occurring at these contacts. Veins are said to be 4-12' wide and ore to average 5-7% copper, 49 oz. silver, \$4.65 gold, with about 12½% bismuth.

Development: by 9 shafts, 5 tunnels, several drifts and open cuts. Main vertical shaft is 336' deep. In 1918 company was doing prospecting work on the 336' level; no later report.

Equipment: includes 2 gasoline hoists, compressor, etc.

Literature sent out from Pittsburg is suspiciously lurid, though mine may have merit and officers be reputable.

PRICE MINING CO.

UTAH

Office: Room 1 Mackintosh Block, Salt Lake City, Utah.

Officers: F. W. Price, pres.-mgr.; M. R. Evans, v. p.; J. H. Woodmansee, sec.-treas.

Inc. April, 1915. Cap. \$250,000; shares 25 cts. par; assessable; last assessment, ½c a share, delinquent, Aug. 2, 1921; 700,000 issued. Stock is listed on the Salt Lake Exchange. Shares sold 1-3¼c in 1918; 1¼-10c in 1919; 5-10½c in 1920; 4¼-5c in 1921.

Operating expenses in 1916 were \$8,000.

Property: 17 claims, 300 acres, 120 patented, in South Fork canyon, Alta-Cottonwood mining district, considered to carry the Cardiff contact, which is intersected at right angles by several fissure veins. Samples taken from first fissure crossed, assayed 34% lead, 20% zinc, 9% copper, and 300 oz. silver per ton. The streak of ore is 4" to 16" in width. No work has been done on it.

Development: by 1,400' tunnel to depth of 600'. Company actively pushing development 1921-22, driving tunnel and raising 125' on fissure in quartzite carrying high grade streaks, to reach limestone-shale contact, where large orebodies are likely to occur.

Equipment: includes an electric compressor.

PRINCE OF WALES MINING CO.

UTAH

Address: Walker Bros., Salt Lake City, Utah.

Property: at Alta, 60 acres, was closed down, 1914, when a snowslide destroyed its equipment. Mine has 950' incline shaft from which \$2,000,000 worth of ore was mined, 1870-1875, until the influx of water stopped operation. Alta T. & T. Co. tunnel will entirely drain the ground.

Partly reopened, July 1917, and 19 tons of \$100 ore shipped, and in 1918 several carload shipments of ore made.

Company inactive, 1919-21. Reopened, 1921.

PROGRESSIVE MINING CO.

UTAH

Office: 229 South West Temple St., Salt Lake City, Utah. Mine near Milford, Beaver county, Utah.

Officers: L. B. Bohn, pres.; I. Lessing, v. p. and mgr.; C. T. Mixer, sec.-treas. and cons. engr., Box 56, Salt Lake City; preceding, with F. J. Nichols, C. C. Crimson and Jas. Barrett, directors.

Inc. Aug. 20, 1906, in Utah. Cap. \$250,000; shares 50c par; assessable; fully issued. Total assessments to date, \$10,000.

Property: 6 claims, 80 acres, patented, in the Star district, 8 miles from a railway, carrying argentiferous copper and lead ores. The mine has a 150' incline shaft, with about 1,000' of workings, developing a 3' vein, said to carry ore assaving up 8% copper, 35 oz. silver and \$1 gold per ton. A few small shipments have been made.

Mine was under lease in 1916, but presumably idle from 1917 up to present time.

PROMONTORY MINING CO.**UTAH**

Described in Volume XIII. Name changed to **United Promontory Mining Co.**, which see.

PROVO MINING CO.**UTAH**

Address: Room 312, Dooly Block, Salt Lake City.

Officers: F. L. Cowan, pres.; A. H. Williams, v. p.; Jas. W. Wade, sec.-treas., with Wm. Merea and L. H. Stohr, directors.

Inc. Feb. 28, 1887, in Utah. **Cap.** \$100,000; 10c par; assessable; 837,440 issued. Listed on Salt Lake Exchange. Shares 1¼ to 6¢, 1921. Assessment No. 7 of ¼c a share, levied Aug. 1921.

Property: 3 patented claims at North Tintic, adjoining the Tintic Standard. Lead-silver-zinc ore occurs in pockets. Development by 300' shaft. As company was without funds, control passed to a new syndicate late in 1919, who paid 9c. a share for the stock.

QUADMETAL MINES CO.**UTAH**

Address: 41 Broad St., New York. Mine office: 414 Judge Bldg., Salt Lake City.

Officers: R. F. Robertson, pres.; H. A. Stoneham, v. p.-sec.-treas., with Chas. A. Stoneham, W. I. Snyder, and Grant Snyder (gen. mgr.), directors. **Cap.** \$1,000,000; \$1 par; issued 600,000 shares; assessable.

Property: 8 claims, patented, near Frisco, Beaver county, contains silver-lead ore in fissure veins, dip 80° N. The Carbonate and Rattles ore-bodies from which \$900,000 worth of high grade silver ore was once shipped, vary from 20' to 40' in width and from 100' to 200' in length.

Development: by 700' vertical shaft with drift on vein 10'-25' wide, of low grade ore containing masses of galena and quartz in winze below 700' level.

Equipment: includes a 50-h. p. electric hoist, compressor, and 150-ton flotation mill.

The mine was worked for several years previous to 1884 and reported to have produced \$960,000. The present management started operating its mill late in 1918, and during 1919 was operated in part on custom ores.

In 1921, shipments made from the 700' level netted \$1,700, \$2,800 and \$3,700 per carload of 50 tons.

QUEEN ISABELLA MINES CO.**UTAH**

Officers: Alex. Caldwell, pres., Eureka, Tooele county, Utah; Alex. Ray Irvine, v. p.; S. R. Thurman, sec.-treas., with Daniel Caldwell and Bert Thurman, directors.

Inc. 1916, in California. **Cap.** \$50,000.

Property: 14 claims adjoining the Sharp mine, Tintic district, and carrying the extension of the Sharp vein. The Sharp mine while under 2-year lease and bond to Mr. Alex. Caldwell produced 15 carloads of silver-lead ore, netting \$15 to \$20 per ton. At last accounts, 1918, the company was planning to give a lease on the property.

QUEEN LEASING CO.**UTAH**

Mail returned from Alta, Utah. Col. C. R. Greene, mgr. Has a lease on part of the Cardiff mine.

QUEEN OF SHEBA MINING CO.**UTAH**

Owned by J. W. Lawton, Chicago, Ill.

Property: near Ibapah, in the Deep Creek district, about 29 miles S. W. of Gold Hill, includes the old Queen of Sheba mine. Ore carries free milling gold in a quartz vein said to be from 14'-25' wide.

Development: by 1,080' tunnel and a 276' raise, driven in 1914.

Equipment: includes 10-stamp mill and 1,700' aerial tram. The mine is credited with past production of \$150,000. Operated by lessees in 1917.

No recent information.

RARUS MINING & SMELTING CO.**UTAH**

Address: P. O. Box 40, Salt Lake City.

Officers: Henry Tattersall, pres.-supt., E. Tattersall, v. p.-treas., Thos Adams, sec., Geo. Hohnberg and Jas. T. Gardner, directors.

Property: in Snake Creek district, Wasatch county.

RAYMOND-ILLINOIS MINING CO.

UTAH

Office: 312 McCornick Bldg., Salt Lake City, Utah. Mine is at Eureka, Juab county, Utah.

Officers: F. J. Hagenbarth, pres. and mgr.; J. M. Wheeler, v. p.; J. C. Lynch, treas., and Thos. Kearns, directors; M. B. Johnson, sec.

Inc. 1905, in Utah. **Cap.** \$450,000; shares \$1 par; assessable. Assessments of one-half cent a share fell due May 7, and June 29, 1917.

Property: 15 patented claims, in the Tintic district, shows fissures and replacements in limestone. Developed by about 1 mile of tunnels and a 1,500' vertical shaft, which as yet have shown but little ore. The bottom workings are wet. Diamond drilling was done, 1909-10, from the bottom of the shaft. Idle since 1914.

RED BELL MINING CO.

UTAH

Office: 519 Newhouse Bldg., Salt Lake City, Utah.

Officers: S. A. Parry, pres.; M. E. Price, v. p.; H. H. Harris, sec.-treas. **Inc.** Nov., 1916. **Cap.** 800,000 shares; 10c par; 340,000 shares in treasury.

Property: 16 claims in Big Cottonwood canyon, about 1 mile E. of the Old Maxfield mine, reported to have produced rich silver-lead ore.

Development: by 150' tunnel, said to have penetrated a 12' porphyry dike carrying lead, iron and copper. Started making shipments in 1918.

No recent information.

RED CLOUD MINING CO.

UTAH

F. N. Leonard, mgr. Property at American Fork includes the Eudora, First Chance, and Red Cloud claims and 2 millsites.

Development: by 675' tunnel in quartzite, said to show 5' of silver-lead ore. In June, 1919, was preparing to ship ore.

No later information.

RED WARRIOR MINING CO.

UTAH

See Vol. XIV for complete description. Company absorbed. March, 1920, by **Moscow Silver Mines Co.**

REED'S PEAK CONS. MINING CO.

UTAH

Is a merger (1920) of Reed's Peak Mng. Co. and Big Cottonwood Cons. Mng. Co.

Office: 919 Boston Bldg., Salt Lake City.

Officers: J. F. Dunn, pres.; Frank Andrew, v. p.; W. J. Bardsley, sec. with Harold C. Fabian and Paul Keyser, directors.

Assessment of 1¢ a share levied July 1921. Shares sold 1¢-1½¢ in 1921.

Property: 30 claims on South Fork, Big Cottonwood district, Salt Lake county, 12 miles from a R. R. Silver-lead ore occurs in fissure veins in limestone and quartzite; gold and copper are also present.

Development: on what was formerly called the Big Cottonwood Cons. (11 claims), includes the Victor tunnel, which aggregates 2,200' in length; property is still a prospect.

The Reed's Peak group is opened by 2,100' of tunnel and drifts, driven to explore at depth of 800' the Birthday fissures, Nos. 1 and 2, said to have been productive on upper levels. Company still doing development work in tunnels; no ore encountered yet.

Equipment: includes a compressor, etc.

REED'S PEAK MINING CO.

UTAH

See Vol. XIV for complete description. Merged into the Reed's Peak Cons. Mng. Co., which see.

REPUBLIC MINING CO.

UTAH

Address: 422 Dooly Bldg., Salt Lake City.

Officers: Thos. Weir, pres.-mgr.; John Weir, v. p.; J. M. Burt, sec.-treas.; Elizabeth P. Weir and Robt. E. Mark, directors.

Inc. May 6, 1900, in Utah. **Cap.** \$50,000. 5¢ par; 228,321 treasury shares;

assessable. Transfers made at company's office. Annual meeting, 1st Monday in May.

Property: 22 claims (21 patented), 352 acres, in Tintic district, Juab county, formerly owned by Trepine Mng. Co. and transferred to present company in 1919. Ore returns average 9.27 oz. silver and 4.75% copper, with a little gold.

Development: by 290' shaft, with 1,740' of total workings.

Has been inactive for past 3 years.

RETTICH GROUP

UTAH

Address: Dr. Hugo Rettich, owner, 52 W. 68th St., New York City.

Property: in the Little Cottonwood, or Alta district, between the two groups owned by the Wasatch Mines Co., embraces the Frederic, Crown Prince, Alaska and other claims.

Development: includes the 230' Frederic and the Crown Prince shafts, also the Frederic or Alleghany tunnel, in which a 1,000' raise was made, 1921-22.

REVELATOR CONS. MINING CO.

UTAH

Address: Salt Lake City.

Inc. 1921, in Utah. **Cap.** \$300,000; par 50¢; 100,000 in treasury; assessable. Levied $\frac{3}{4}$ ¢ April, 1914; $\frac{1}{2}$ ¢ in 1919; $\frac{1}{2}$ ¢ in Oct. 1921, delinquent Dec. 5.

Property: John the Revelator mine. near Park City. on which work has been done at intervals since 1914. Mine shows gold-copper ore in limestone-quartzite contact fissure, from which considerable ore has been shipped.

Development: by tunnel and incline. On 300' level, 2"-10" of \$175 ore was cut.

REVENUE CONSOLIDATED MINING CO.

UTAH

Address: John B. Taylor, 678 E. S. Temple St., Salt Lake City.

Property: 66 claims, 22 patented, 1,320 acres in Pine Grove district, T. 28 S. R. 16 W. on west side of Wah Wah Mtns., 20 miles S. W. of Frisco or Newhouse, stations on Milford branch of Salt Lake Route. Elevation 7,500' at mine camp. Peaks 3,000'-4,000' higher.

Geology: claims cover quartzite beds, overlain by 600' of green shales. capped by 5,000' of thickly bedded limestone, intruded by thin dikes and a boss of yellowish decomposed porphyry. These beds dip eastward into the mountains at 20° to 40°, the west slope of the range being of similar structure, with igneous rocks forming the east side. A strong E. W. fault runs through the center of the property, dislocating the beds 1,000' to the east, on S. of fault, and ending in a porphyry intrusion. Ores are lead and silver bearing and occur in fissure veins in quartzite. Four parallel N. W.-S. E. veins north of Pine creek are 3'-6' wide, have smooth walls, quartz filling and carry galena of concentrating tenor, with occasional masses of shipping ore. There are several other undeveloped parallel veins, but all end at the shale belt. South of the fault a parallel 6'-20' vein represents the probable faulted continuation of the Cliff vein north of the fault.

Development: active in 1904-05; work was resumed 1913, but stopped 1914. It comprises the 500' Buckbee and 600' Southside tunnels, 125' Cliff shaft with 200' drift work, 130' Tasor shaft and various lessor openings. The Revenue tunnel is to crosscut all these veins in depth and supply the mill.

Equipment: includes 300 cu. ft. compressor, steam engine, etc. Property promising, but idle, pending financing.

REXALL SILVER & COPPER MINING CO.

UTAH

Consolidated, 1916, with Columbus Extension Mng. Co., and now known as Columbus-Rexall Cons. Mines Co., which see. Described Vol. XII.

RICHMOND & ANACONDA CONSOLIDATED MINING CO. UTAH

See Uncle Sam Consolidated Mining Co.

RIDGE & VALLEY MINING CO.**UTAH**

Address: 723 Kearns Bldg., Salt Lake City, Utah. **Mine office:** Eureka, Juab county, Utah.

Officers: Wm. R. Wallace, pres.; Jackson C. McChrystal, v. p.-mgr.; J. E. Berkley, sec.; Herbert S. Auerbach, treas.; J. H. McChrystal, supt., with Sarah H. McChrystal, directors.

Cap. \$1,000,000; originally \$150,000, increased 1915 to \$500,000 and in 1916 to present amount; par, 50c.; issued 500,000 shares.

Property: 39 claims, 443 acres, adjoining the Gemini property, and operated through the Gemini shaft for many years. Ores carry lead-silver-copper-gold values.

Development: by 1,800' shaft, and extensive workings. Recent development work on the 1,800 foot level is claimed to be satisfactory. In 1918 4,000 tons of ore shipped sold for \$14,721, giving net profits of \$4,240.

The output of 1919 was 6,447 tons of ore, producing 105,011 oz. of silver and 2,044,280 lb. of lead. Gross profit was \$181,602 and disbursements \$167,024. A part of the mine is operated by lessees.

ROB ROY MINING CO.**UTAH**

Address: P. T. Farnsworth, 164 E. S. Temple St., Salt Lake City.

Mine near Beaver City, Utah, at mouth of Indian Creek Canyon. T. P. Farnsworth, Salt Lake City, owner. Developed to depth of 300'. Mine has produced very rich gold ore, but was closed down several years ago when the vein was cut off by faulting. Tunnel was to be driven south in hopes of finding orebody. No recent report, probably inactive.

SACRAMENTO MINING CO.**UTAH**

In liquidation. Glenn R. Bothwell, pres.

Declared a dividend of 0.9c. a share, payable August 1, 1919.

Property: located in Mercur district, paid out \$308,000 in dividends before closing down in 1912. At that time there remained \$10,000 in the treasury and the 1919 dividend was paid from this fund.

ST. CROIX CONS. MINES**UTAH**

Organized in August, 1917, to continue work of St. Croix Mines Co.

Address: 223 Fergusson Bldg., Duluth, Minn., and 261 Broadway, New York City. **Mine address:** Milford, Utah.

Officers: M. J. O'Brien, pres.; A. D. MacIntyre, v. p.; W. M. Evered, sec.-treas., with David Graham, L. Davis, M. J. Filiatraut, and H. G. Midgough, directors.

Inc. 1917, in Utah. **Cap.** \$600,000; \$1 par; outstanding, 500,000 shares. Listed on New York Curb; 120,700 shares traded in 1919 at 50c. to \$1 a share.

Transfer agt., Security Transfer & Registrar Co., New York.

Property: 6 claims, 1 patented, about 90 acres, in Star district, Beaver county, 4 miles from Milford, shows 5 contact deposits between porphyry and a so-called white and blue lime. Copper-lead ore occurs as "chimneys," and shipments have run as high as \$75 per ton.

Development: by 300' shaft and 400' tunnel, opening ground to depth of 500'. Workings total 1,500'.

Equipments: 35-h. p. gasoline hoist, and 4-drill compressor.

Production: intermittent since 1870; recent production about 250 tons annually.

Company hopes to become active with improved industrial conditions.

ST. CROIX MINES CO.**UTAH**

Successor to St. Mary Mng. Co.

Office: 601 Providence Bldg., Duluth, Minn. **Mine office:** Milford, Utah.

Officers: Hansen Evesmith, pres.

Inc. March 10, 1915, in Utah. **Cap.** \$1,000,000; 25c par; non-assessable.

Is a holding company having part of stock of St. Croix Cons. Mines.

ST. MARY MINING CO.**UTAH**

Described in Volume XIII. Superseded by **St. Croix Mines Co.**, which see.

ST. PATRICK MINING & MILLING CO.**UTAH**

Office: 855 Sherman Ave., Salt Lake City, Utah. **Mine office:** Hughes Canyon, Salt Lake county, Utah.

Officers: D. A. Buck, pres.; Franklin J. Webb, v. p.; B. A. M. Froiseth, sec.-treas.

Inc. March 17, 1906, in Utah. **Cap.** \$50,000; 20c par; issued 180,000 shares.

Property: 6 claims, unpatented, 7 miles from railroad, in Big Cottonwood mining district, opened by shaft and tunnel, with about 750' of workings, showing gold and silver-copper ore. Annual assessment work only being done.

Funds for development are apparently lacking.

SALT LAKE COPPER CO.**UTAH**

Office: 11 Broadway, New York.. **Operating office:** McIntyre Bldg., Salt Lake City, Utah. **Mine office:** Lucin, Boxelder county, Utah.

Officers: Frederick Lewisohn, pres.; Walter Lewishon, v. p.; E. C. Westervelt, treas.; other directors, S. W. Peck, E. H. Westlake, E. J. Macnamara, O. B. Van Sant and E. B. Corbet, mgr.

Inc. October 10, 1906, in Maine. **Cap.** \$2,200,000; shares \$10 par. Registrar, Equitable Trust Co., of New York.

Property: 108 claims, known as the Copper Mountain mine, at an elevation of 7,200' above sea level, in the Newfoundland district.

The Copper Mountain mine has a number of tunnels and shafts, the 1,500' main tunnel having a back of about 400'; a 500' tunnel planned to be driven 1,200', to enter the hoped-for sulphide zone, has not realized expectations. The mine has upwards of 2 miles of workings, and is estimated to have in sight and blocked out, 75,306 tons of copper ore of 1.1% average tenor. For the last few years the mine has been worked by lessees. Approximately 3,000 tons ore, assaying ¼% copper and 45% excess iron were shipped in 1918.

Lessees reported operating summer of 1920.

SANTA MARIA GOLD & COPPER MG. & REDUCTION CO. UTAH

Office: P. O. Box 517, Ogden, Utah. **Mine office:** Utah Hot Springs, Boxelder county, Utah. Don Maguire, pres. and mgr.

Inc. 1907, in Utah. **Cap.** \$500,000; shares; \$1 par.

Property: includes mill and smelter sites in the Sierra Madre district, a very rugged section of the Wasatch mountains. Land carries 7 fissure veins, practically parallel with a strong cross-fissure, and a contact deposit. The veins range from 12 to 70' in width, and ore contains chalcopyrite, associated with pyrite and occasional small amounts of galena, ore being mainly of concentrating grade.

Development: by the 2,000' Clara Belle tunnel, cutting 3 veins, and planned to cut 5 more, with backs of 200 to 1,800'. The mine has about a mile of workings showing ore developed regarded as sufficient to warrant a mill.

Equipment: includes a power house, air compressor, smithy and boarding house. Idle several years.

SANTAQUIN CHIEF MINING CO.**UTAH**

See Vol. XIV for description. Company absorbed by Santaquin Cons. Mines Co., which see.

SANTAQUIN CONS. MINES CO.**UTAH**

Is a consolidation of Santaquin King and Santaquin Chief mining companies.

Office: 219 Ness Bldg., Salt Lake City.

Officers: E. J. Shields, pres.; H. L. Pratt, sec.-treas.-mgr.; J. A. Ferraro, v. p.

Inc. 1918, in Utah. **Cap.** \$150,000; par 10c; assessable 1,125,000 treasury shares. An assessment of ¼c was levied in May, 1919.

Property: 13 claims in Santaquin district, Utah county 65 miles S. of

Salt Lake City, 7 miles from R. R. Shows limestone cut by well defined fissure vein carrying zinc-lead-silver ore.

Development: on King ground by tunnels with total workings of 550'. A winze has exposed 2' of ore, assaying 35-40% zinc and a little lead. A 150' tunnel on the Chief shows small bunches of lead ore, 600' lower than King workings.

Company reports "no indebtedness and no funds;" development to continue.

SANTAQUIN KING MINING CO.

UTAH

Fully described in Vol. XIV. See Santaquin Cons. Mines Co., into which it has been merged.

SCOTIA MINING CO.

UTAH

Address: Jas. S. Morgan, 1425 Roosevelt Ave. Salt Lake City.

Officers: Willard E. Weihe, pres.; Alvin A. Beesley, v. p.; Jas. S. Morgan, sec.-treas., with Harmel L. Pratt, Francis M. Bishop and Orton G. Pratt, directors.

Cap. \$500,000; 10c par; 200,000 shares issued.

Property: in Honeycomb Gulch, of Big Cottonwood, shipped a few carloads of lead-silver ore in 1918.

Company is handicapped by lack of funds.

SCRANTON LEASING CO.

UTAH

Mail returned from Eureka.

Address: care Wade & Funkel, Scranton mine, Eureka, Utah. Operates under lease the Scranton mine at North Tintic, Utah. Produces lead and zinc ores from new discovery on surface and from Magazine tunnel. Employs 52, men.

In 15 months to July, 1917, the output was 6,000 tons, containing 20% lead and 32% zinc. Shipments were made in 1918.

SCRANTON MINING & SMELTING CO.

UTAH

Offices: McIntyre Bldg., Salt Lake City and Scranton, Tooele county, Utah.

Officers: T. G. Wolf, pres.; H. A. Knapp, treas., with B. H. Throop, all of Scranton, Pa., R. J. Deighton, sec.-mgr., and Win. H. Bramel, Salt Lake City, directors.

Cap. \$30,000; shares \$1 par.

Property: in the North Tintic district, is an old producer of silver, lead and zinc ore. The company operated the mine until 1915, and the stopes were pretty thoroughly worked out.

SECRET MINING & MILLING CO.

UTAH

Offices: 618 Newhouse Bldg., Salt Lake City and Alta, Utah. Reported "dead" in Copper Handbook, Vol. X. Reorganized and rejuvenated in 1915.

Officers: R. W. Clough, pres.; W. M. Minor, v. p. and treas.; H. S. Harper, sec., with E. R. Phelps and W. H. Clough, directors.

Inc. about April, 1906, in Utah. **Cap.** \$300,000; increased in 1915 to \$600,000; shares \$1 par. In 1919, increased number of shares to 1,000,000; par 10c. Listed on Salt Lake Exchange. Share sales 1c, 1918, and ¼c in 1920.

Property: 15 claims, 300 acres, 100 patented, at Alta, Little Cottonwood mining district, adjoining the Albion on the S. E., said to show lead-silver ore. Country rock is quartzite.

Development: by tunnels; reported in April, 1916, that an 80' tunnel would be extended to cut the surface showings at a depth of 800'. The company is also reported as having obtained the right from the Albion to drive a crosscut into Secret ground from a point 2,500' in from the portal of the Albion tunnel. An upper tunnel is in 500'. Workings total 700'. No orebodies large enough for production have been found. In May, 1919, work was again resumed after a period of idleness. Property is in the speculative class.

SELLS MINING CO.**UTAH.**

Address: Continental Bank Bldg., Salt Lake City, and V. S. Snow, supt., Alta.

Officers: Geo. H. Watson, pres.-mgr.; John Zinc, v. p.; R. F. Marvin, sec.-treas., with W. H. Weyher and V. S. Snow, directors

Inc. 1914, in Utah. **Cap.** 1,000,000 shares; 15c par. Assessment No. 4 of 1c a share levied, 1919. Last assessment, 2c a share, delinquent October 18, 1919.

Listed on Salt Lake City Exchange. Shares 8½ low, 21 high in 1918; 4 low, 13½ high in 1919; 1½ low, 23½ high in 1920; 1¾ low and 6¼ high in 1921 to June.

Property: 16 claims, 6 patented in the Alta-Cottonwood mining district, 8 miles from a railroad, said to cover 1,800' to 3,000' along the mineralized zone passing through the South Hecla property which adjoins on the west.

Ore: carries silver lead, zinc and copper, in fissure veins in limestone and in contact deposits between limestone and granite; veins strike N. E.-S. W.

Development: about 5,000' of workings from the Dwyer tunnel of the South Hecla company and the Lexington tunnel.

Gross output for 1919 was \$10,940, and total expenses, \$35,080, leaving a net deficit of \$24,140. Early in 1920 a 125' raise above the tunnel level, opened ore in the Skipper fissure, said to sample \$14.50 gold and 240 oz. silver per ton, with 4% copper. This orebody proved small.

Geo. H. Watson and Co. took option on 412,446 shares treasury stock, Dec. 1920, after shareholders had privilege of subscribing for stock at 3c a share. The property has since been consolidated with **South Helca Mines Co.**

Production: about \$200,000 to end of 1921. Shipments run about \$30 per ton, in silver, copper, lead and bismuth.

Is a speculative mining venture that has promising ground.

SELMA MINES CO.**UTAH**

Office: 414 Judge Bldg., Salt Lake City, Utah. **Mine office:** Knightsville, Juab county.

Absorbed White Star Mining Co., also of North Tintic, late 1921, Selma giving 2 shares for each 3 shares White Star stock held.

Officers: W. I. Snyder, pres.; J. C. Jensen, v. p.; with R. A. Brown, C. J. Peterson and E. T. Walton, directors. Cora V. Thompson, sec.

Inc. Dec., 1909, in Utah, as successor of Selma Consolidated Mining Co. **Cap.** \$50,000; shares 5c par; assessable, except 50,000; 740,000 outstanding. Assessments No. 21 and No. 22 of half cent a share, levied in May and Oct., 1921.

Property: 34 claims, unpatented, near the Lehi Tintic mine, supposed to carry the Northern extension of the mineral zone of the Colorado mine, 2 miles from a railway. The property has a lime-porphry contact, with 3 principal fracture zones carrying silver-lead-copper ore.

Development: by 250' three-compartment shaft, and tunnels showing leached ground with occasional bunches of good ore. The old company expended about \$75,000 on development. Workings total 2,650', including tunnels 80, 900, and 1,400' long, opening ground to depth of 1,000'. **Equipment:** includes electric power and electric hoist.

SEMINOLE COPPER CO.**UTAH**

Address: F. L. Wilson, Brooks Arcade Bldg., Salt Lake City, Utah.

Property: adjoining that of Western Utah Copper Co., near Gold Hill, Deep Creek district, Tooele county. Ore deposits said to be numerous and varied in character; tungsten ore was opened to depth of 135', and melvdenite was also developed. The 50-ton mill was enlarged in 1918. Operated intermittently.

SHEEP ROCK MINING & MILLING CO. UTAH

Office: W. A. Wilson, 406. Dooly Block, Salt Lake City, Utah.

Officers: W. A. Wilson, pres. and treas.; C. W. Morse, v. p.; C. Browne, sec., with W. B. and F. B. Eiseman and L. A. Jeffs, directors.

Inc. Sept. 4, 1893, in Utah. Cap. \$100,000; 10c par; 450,000 issued.

Property: 10 patented claims, 177 acres, in Newton district, Beaver county, which show a fissure vein in rhyolite. Ore contains gold and silver, with quartz and manganese gangue. Alunite is also found on the property.

Development: by 300' shaft and 1,000' tunnel. Equipment: 25-h. p. electric hoist and compressor.

In development stage. No recent work done.

SILVER CONTACT MINING CO. UTAH

Address: P. O. Box 606, Salt Lake City.

Officers: C. G. Ballantyne, pres., 24 E. First North St., Salt Lake City; S. B. Robins, v. p.; Paul Luff, sec.; H. P. Huey, and Frank Newton, directors.

Authorized 1921 by Utah Corp. Commission to sell 100,000 shares at 5c to net company 3¼ cents.

Property: 3 claims on S. side of American Fork canyon.

Development: by incline shaft, sunk 1920, on silver-lead ore and a new tunnel, 150' lower to cut ore at 700' in.

SILVER FLAT MINING CO. UTAH

Presumably dead. Property: the old Nebraska mine in Delta Creek, Silver Lake section, American Fork, Utah, shows silver-lead ore in fissures in limestone cut by porphyry dikes.

Ore: complex silver-copper-lead, high in zinc.

Development: by 1,200' of tunnels. No recent information.

SILVER HILLS MINING CO. UTAH

Address: L. M. Francis, sec., 539 Koneta Ct., Salt Lake City, Utah.

Assessment No. 2 of 3 mills per share, levied January 30, 1922.

SILVER KING APEX MINING CO. UTAH

Officers: J. C. Thoresen, pres.; J. F. Tyler, v. p.; L. H. Gray, sec.-treas., with Roland Williams, P. G. Bosley, John D. Winward and Jos. Lapish, directors.

Inc. Sept., 1921, in Utah. Cap. \$50,000; par 10c.

Property: a lease and bond on Paul Jones, Nelson, Farragut, and Toga claims in Cottonwood district, Salt Lake Co., Utah. Incorporators include above and Dr. Geo. J. Field, A. L. Burns, W. T. Smith, S. C. Hatch, L. H. Gray, H. L. Wilkins, H. C. Jex, and E. Carlgren, all of Salt Lake City, and Chas. Osborn of Moulton, Idaho.

SILVER KING COALITION MINES CO. UTAH

Office: Kearns Bldg., Salt Lake City.

Mine address: M. J. Dailey, mine mgr.; Forrest Mathez, supt., Park City, Utah.

Officers: Moylan C. Fox, pres.; W. Mont Ferry, v. p.-mgr.; dir.: F. J. Westcott, sec.; W. S. McCornick, treas., with Henry Newell, Jas. Ivers, Jr., Thos. F. Kearns, David Keith, and W. J. Halloran, directors.

Inc. May 20, 1907, in Nevada. Cap. \$6,250,000; \$5 par; all issued. Annual meeting, third Monday in May. Transfer agent; F. J. Westcott, Salt Lake City. Registrar: Utah Savings and Trust Co., Salt Lake City. Stock listed on Salt Lake City and Boston Stock Exchanges.

Financial statement of Dec. 31, 1920, shows; total income, \$1,056,042 of which \$1,006,687 was for ore sales and \$36,724, royalties. Expenses include: \$594,944 at mine; \$18,020, administration and \$31,988, legal. Net operating profit was \$411,089, and \$358,360 after depreciation. Current assets over liabilities, \$795,427 and surplus Jan. 1, 1921, was \$511,766.

The mine produced \$25,000,000 from 1892 to 1912.

Dividends: to May 1921, \$4,888,292, exclusive of \$10,675,000 paid by original Silver King Mining Co. No dividends were paid between this date

and Jan. 1, 1918, pending decision in the Conkling case. In 1921, dividends Nos. 25 and 26 of 15c each were declared, latter payable Jan. 2, 1922.

The mine is electrically equipped, and company owns a 600-ton mill. A flotation section, which started operating December 5, 1915, is said to give an increased saving of from 10% to 15% silver and 10% lead. Company employs 400 men.

Mill was destroyed by fire in January, 1921. A new mill using gravity concentration and flotation, with 450-ton capacity was completed, Jan., 1922.

Production: at end of 1921, varied between 1,500 and 3,000 tons per month. In 1919, production was 54,513 tons of ore, of which 11,037 tons were shipped, the remainder producing 8,423 tons of concentrate; total yield was 528,328 oz. silver, 14,587 oz. gold, 10,862,687 lb. lead and 145,176 lb. copper. Of the shipping ore, 207 tons were produced by lessees.

In 1920, shipping ore amounted to 14,517 tons, sold for \$807,862 and 25,103 tons milling ore, producing 4,568 tons concentrate, sold for \$198,825. Lessees produced 1849 tons of ore from abandoned stopes, sold for \$116,958, with royalty to company of \$36,724. Total ore mined 41,470 tons, yielding 629,929 oz. silver, 1,386 oz. gold, 10,604,453 oz. lead and 230,619 lb. copper.

The company is a consolidation of many noted Park City properties.

Property: 327 patented claims, about 2,341 acres, covering 19,000' along the strike of the ore zone at Park City, 35 miles S. E. of Salt Lake City, consists of 9 mining claims besides the holdings of the following mining companies; Silver King, Union, Park City, Fairview Alliance, Woodside, Mass., Jupiter, Kearns-Keith, Crescent, Apex, Boss, Baltimore, St. Louis-Magnolia, Pinyon Ridge, Odin, Belmina and Uintah Treasure Hill Coalition.

Ore: silver-lead-zinc sulphide ore occurs in fissures and large replacements in limestone and quartzite. For geology see U. S. G. S. Prof. Paper No. 77.

Development: by 2 shafts to depth of 1,300' and over 100 miles of workings. One of the main workings is the 3-compartment Silver Hill winze sunk from the Alliance tunnel level, at a point 8,500' from the portal; the collar of the winze is 1,600' from surface. In 1917 extensive development was done N. W. of the shaft, towards Thayne canyon, and large orebodies found in the Park City limestone.

Exploratory work on the M. L. M. ore shoot on the 1,300' and 1,450' levels proved very satisfactory as 3' of highgrade silver-lead ore was opened on latter level. The O'Brien fissure was cut in 1921 and the development indicated that it is one of the most productive ore channels of the camp; there is 3,500' of virgin ground on the strike of this fissure.

The Conkling Mining Co. brought suit for \$575,000 against the company for alleged illegal extraction of ore. Judgment was rendered in favor of the Coalition Co.; the Conkling Co. appealed the case to the Circuit Court of Appeals, which reversed the former decision. The Coalition Co. then filed a petition for a rehearing in the Circuit Court of Appeals. On October 20, 1919, the U. S. Supreme Court issued a writ of certiorari to the Silver King Co. Argument was heard on Jan. 19, 1921, and on Feb. 28, the Supreme Court reversed decision of the Circuit Court and relieved Silver King from paying about \$706,800.

Litigation with the Keystone Mng. Co. was settled in December, 1919.

SILVER KING CONS. MINING CO. OF UTAH UTAH

Offices: Newhouse Bldg., Salt Lake City and Park City, Utah.

Officers: Solon Spiro, pres.; R. P. Morris, v. p.; D. L. Wertheimer, treas., with H. A. Lee, Sherman Fargo, Wm. C. Kennett, Jr., and Herman Harms, directors. G. W. Browning, sec.; N. N. Blye, supt.; Harry A. Lee, cons. engr. and asst. mgr.

Inc. 1902, in Wyoming, as the Silver King Cons. Mng. Co., re-incorporated Feb. 24, 1908, in Utah. **Cap.** \$700,000; increased Sept. 12, 1912, from \$500,000; increased January 31, 1918, to \$1,000,000; increased Nov. 30,

1920, to \$1,250,000; \$1 par; assessable: issued January 1, 1921, 850,537½ shares. Empire Trust Co., New York, transfer office. Metropolitan Trust Co., New York, and Columbia Trust Co., Salt Lake City, registrars. Annual meeting, last Saturday in February. Stock listed on New York Curb and Salt Lake Exchange; 250,000 additional shares listed Jan. 13, 1921, on New York Curb. Assessments of 10c a share delinquent Oct. 22, 1921.

Shares sold 93c to \$2.05 in 1920; 39.5c to \$1 in 1921.

Annual report for year ended January 1, 1921, shows balance, January 1, 1920, \$32,987; ore sales, \$26,305; convertible notes, \$152,600; total receipts, \$253,876. Disbursements were \$216,053, leaving a balance, Jan. 1, 1921, of \$37,823.

Dividends: year ended Jan. 31, 1914 \$308,791, derived from judgment paid by co-tenant; 1914, \$251,033; 1915, \$255,032; 1916, \$294,561; 1917, \$383,287; 1918, \$70,000; none in 1919 and 1920; total, \$1,562,705.

In December, 1917, company purchased, for \$300,000, the entire property, 135 acres of the California Comstock Cons. Mng. Co.; it is located in Thaynes Canyon and comprises the "western territory" of the Silver King Cons. At time of purchase, this property was developed by a 450' 3-compartment shaft and equipped with a 150-ton mill.

Property: 1,211 acres near Park City, adjoins Silver King Coalition on the west, and covers a mile of the westerly extension of the ore-bearing veins of Park City. **Ore:** carries lead, silver, gold and copper in replacement deposits in limestone and quartzite. For geology of the district, see U. S. G. S. Prof. Paper No. 77.

Development: in 1916, company began work on the Spiro tunnel, a 14,000' adit, to open up 1,200 acres of new territory, covering south-western extension of vein system from which the Silver King Con. and Silver King Coalition derived their ores. This tunnel, 8'x8' in section, is on company ground and will serve for drainage, transportation and development. By July, 1921, the breast was at 14,400'. The distance driven in 1918 cost \$30,487 per foot, compared with \$21,618 per foot for 5,000' driven in 1917. In 1919 and 1920, the advance made was 2,622' and 2,487', respectively, at an average cost per foot for the 2 years of \$39.96. The cost of the tunnel was estimated at \$400,000.

In 1921, drifts were run on ore channels at 13,000' from tunnel portal and at levels 275' above the tunnel, ore "bedding out" from a fault fissure. The main tunnel was extended through the D. & M. fissure and underneath the newly acquired California Comstock ground.

The **California Comstock** shaft has recently been unwatered to the 450' level; in 1918 the 250' level was worked, but the grade of ore mined there showed little or no profit under the existing conditions. The 150-ton mill was remodeled and put in operation; a 10,200' tramway was built in 1916 to convey ore to the mill and railroad, and a flotation mill, initial capacity 70 tons daily, was installed.

Production, years ending January 31 until January 31, 1917, when fiscal year was made to agree with calendar year:

	Ore, tons	Lead, lb.	Silver, oz.	Gold, oz.	Copper, lb.	Net value
1920....	438	234,509	12,721	27	1,375	\$ 26,305
1919....	1,352	742,944	34,020	51	13,465	62,248
1918....	4,901	2,433,365	206,357	200	107,456	275,971
1917*....	10,260	5,016,627	451,627	403	248,771	642,467

* February 1 to January 1, 1918.

Two 10c assessments were levied, April 6 and June 16, 1921. The management was bitterly attacked at time of first assessment and not perhaps without some cause. It would seem that with little commercial ore in sight, company's other resources should in former years have been conserved.

Mining operations at King Con. ceased in April, 1920, California Comstock was inactive throughout the year.

SILVER MOON MINING CO.

UTAH

Address: Mrs. Rachel Crome, 923 Third Ave., Salt Lake City, who holds control.

Officers: A. L. Headbug, pres.; Wm. Crome, sec.-treas.

Inc. Jan. 29, 1912. **Cap.** \$10,000; shares 2c par; assessable. Last assessment levied August 15, 1919. In treasury, May, 1916, 200,000 shares and \$780 in cash; no debts.

Property: 7 unpatented claims in the Big Cottonwood district.

Ore: carries silver, gold, lead. Little development has been done.

SILVER PEAK MINING CO.

UTAH

Officers: J. R. Rickards, mgr., Cedar City, Utah; R. B. Shepard, pres., 408 State St., Salt Lake City; T. F. Jennings, sec.-treas., Garfield, Utah.

Inc. July, 1915, in Utah. **Cap.** \$10,000; shares 1c par; 600,000 issued.

Property: the Blair mine, 6 claims, 120 acres, unpatented, near Pinto, in Pinto Iron mining district, Iron county shows a contact deposit 8-10' wide, carrying copper-lead ore with gold-silver values.

Development: 200' shaft and 2 others. Dumps show 100 tons of \$8 to \$300 ore. Company doing assessment work only.

SILVER REEF CONS. MINES CO.

UTAH

Controlled by The Alvarado Mining & Milling Co.

Address: 347 Madison Ave., New York City, or care of Frank C. Morehouse, 681 So. Catalina St., Los Angeles, Calif.

Officers: Frank C. Morehouse, pres.; A. J. McQuatters, v. p. Richard F. Parker, sec.-treas., with Alex. Coldbath, and Thomas Homer, directors.

Inc. 1918, in Utah. **Cap.** 1,000,000 shares, all issued. An assessment of 1c was levied, April, 1919.

Property: 61 claims (21 patented), 1,080 acres, one mile from Leeds, in Harrisburg (Silver Reef) district, Washington county, covering about 2 miles in length on each of the two principal ore bearing sandstone beds, locally called reefs, known as the Buckeye and White reefs, and embracing the Barbee and Walker group, and former holdings of Stormant, Christy and Leeds Mining companies, all early-day producers. Also, mill sites and water rights. Oxidized silver ore, with some copper, occurs as impregnations in the White sandstone whose copper content ranges from 0.5 to 3% in certain beds.

Silver was first discovered in this district in 1875 and up to 1888, when operations practically ceased, produced between \$8,000,000 and \$15,000,000 of high grade and milling ore; the latter is estimated to have averaged 25 oz. silver per ton.

Development: by this company begun July, 1920, has reached 300' below lowest levels of old workings and is reported to have opened considerable high grade and a large tonnage of 25 oz. ore. A large tonnage of ore, assaying 8-16 oz. silver and 1-2% copper, is said also to be exposed in old workings.

Equipment: includes 3 electric hoists; erection of mill at an early date is planned.

Controlling interest in company has been purchased for cash by Alvarado M. & M. Co. (which see in Mexican section of this volume.)

SILVER SHIELD MINING & MILLING CO.**UTAH**

Fully described in Vol. XIV. Succeeded by the **Bingham Galena Mng. Co.**, which see.

SILVER SIDE MINING CO.**UTAH**

Address: American Fork, Utah.

Officers J. E. Beveridge, pres.; A. O. Jacobson, v. p.; W. Holmes, sec.-treas., with H. P. Huey and M. M. Beaver, directors
Inc. 1916, in Utah. **Cap.** \$50,000; shares 5c par.

Property: 5 miles up American Fork canyon, is said to show silver-lead ore in contact deposit between limestone and quartzite.

Development: by tunnels and shallow shaft. No recent information.

SILVER TIP GOLD & SILVER MINING CO.**UTAH**

Address: J. R. Jones, mgr., Kelton, Boxelder county, Utah.

Inc. 1921, in Utah.

Property: a group of claims, 30 miles north of Kelton on S. P. R. R., developed by 100' incline shaft in 1921. Ore, at 50' depth, was 2'-3' wide averaging 1.4 oz. gold, 71 oz. silver and 3.1% copper.

SINCLAIR CONSOLIDATED SILVER, INC.**UTAH**

Address: C. S. Cresser & Co., fiscal agents, 83 Pine St., New York.

Inc. 1920, in Delaware. **Cap.** \$1,000,000; non-assessable. National Security & Transfer Co., New York, registrar and transfer agent. Shares offered at 20c in March, 1920.

Officers: Salvatore Bonomolo, pres.; Col. Weatherly, v. p.; W. G. Stoddard, treas.; M. E. Schek, sec.; with Ronald Ridgway and B. J. Boernerwald, directors.

Property: 10 claims in the Pinto district of Iron county, Utah, at the mouth of Chloride canyon. The vein runs S. E.-N. W. and dips 85° S. Silver-lead ore from the outcrop shipped to the Silver Reef mill is said to have yielded \$75. per ton. Examined by E. J. Eddards.

Company prospectus contains this literary gem: "The formation of Chloride Canyon belongs to the miocene and quaternary ages, with paelozoic intermingled. The porphyry lies on the east and has been wholly undisturbed, while the rhyolite on the west seems to have had some heavy movements. The porphyry is magnificent, granite porphyry."

Only surface work has been done so far; tunnels are to be driven.

A market letter of July 2, 1920, announces that 4 claims were acquired in the Alta district and that a new directorate had been elected. The "wide publicity campaign" contemplated was not apparently continued. for no other information has been received.

SIoux CONS. MNG. CO.**UTAH**

Succeeded by **Sioux Mines Co.**, which see.

SIoux MINES CO.**UTAH**

Is a reorganization of Sioux Cons., fully described in Vol. XIII.

Address: Provo, Utah.

Officers: Reed Smoot, pres.; K. S. Jordan, sec., with Jesse Knight, W. Lester Mangum, and R. L. Anderberg, directors.

Inc. 1917, in Utah. **Cap.** \$100,000; par 10c; all outstanding.

Property: 6 patented claims, 47 acres, in Tintic district, said to show silver-lead ore.

Development: by shaft to the 1,000' level. During 1919 and 1920, operations were conducted through the 1,700' level of the adjoining Iron Blossom; a good showing was encountered in virgin territory, but no commercial ore developed.

Inactive in 1921.

SOFFE SILVER MINING CO.**UTAH**

Letters returned unclaimed in May, 1917. Probably dead.

Directors: J. C. Soffe, pres., W. R. Soffe, v. p.; J. W. McKinning, sec.-treas., with W. J. Soffe, mgr.; A. J. Shulson, at last accounts.

Inc. May 7, 1916, in Utah. **Cap.** \$10,000; shares 1c par.

Property: 12 claims, unpatented, in Erickson mining district, Tooele county, 30 miles west of Faust Station on Salt Lake Route. Claims show high-grade silver-gold ore.

SOUTH CARDIFF MINING CO.

UTAH

Address: George N. Lawrence, pres., 420 Boston Bldg., Salt Lake City; W. H. King, v. p.; Allen Sanford, sec.-treas., with George A. Steiner, directors.

Inc. April 9, 1916, in Utah. **Cap.** 1,000,000 shares; 450,000 in treasury.

Property: 10 claims, 160 acres, in Cottonwood district, adjoining the Cardiff, Howell & Monte Cristo, and the Canton Mining Co., holdings, is supposed to carry extension of Cardiff fissure. No recent information; Probably idle.

SOUTHERN PACIFIC GOLD & COPPER M. & M. CO.

UTAH

Office: Walker Bank Bldg., Salt Lake City, Utah. Mine near Ogden, Weber county, Utah.

Officers: H. T. Strauss, pres. and gen. mgr.; W. C. Kellerman, sec.

Inc. July 20, 1903, in Utah. **Cap.** \$1,000,000; shares \$1 par; assessable; issued 792,593. Shares are listed on the Salt Lake Stock Exchange.

An assessment of 3¢ per share became delinquent March 5, 1921.

Property: 12 claims, unpatented, 240 acres, 3 miles from a railway and about 8 miles north of Ogden, in the Sierra Madre district, reported to carry 25 orebodies in contact deposits between quartzite and gneiss. The main vein of about 50' width, shows some oxidized ores, but mainly auriferous sulphides, including covellite, bornite and chalcopyrite, with some molybdenite, in a 6' vein.

Development: by two incline shafts on the Wizard claim, and a main tunnel in 500' in June, 1919, with about 1,000' of workings, said to show ore assaying up to 15% copper, 37 oz. silver and \$1.60 gold per ton. Company plans driving the tunnel an additional 200'.

Work was underway in December, 1920, but no details available.

SOUTHERN SWANSEA MINING CO.

UTAH

Mine office: Silver City, Juab county, Utah.

Officers: Geo. Jones, pres.; Geo. A. Shepard, v. p.; Richard B. Shepard, treas.; Emma C. Shepard, sec., 408 S. State St., Salt Lake City. R. E. Jones, supt.

Inc. July 31, 1907, in Utah. **Cap.** \$10,000; shares 1c par; issued, \$8,500; assessable; last assessment, one mill a share, delinquent Sept. 1, 1920.

Property: 12 claims, unpatented, south of the Swansea mine and supposed to carry an extension of the Swansea vein, showing porphyry, quartzite and lime, with a fissure vein of 12' estimated average width, traceable 1 mile, carrying auriferous and argentiferous oxidized and sulphide ores of copper and lead, developed by a 200' shaft.

SOUTH HECLA EXTENSION MINING CO.

UTAH

Company fully described in Volume XIV.

Holdings, acquired October, 1921, by South Hecla Mines Co., on a basis of one share for eight old shares.

Property comprised 37 acres, on which there was little development work save that through the Quincy tunnel of the So. Hecla Mine.

SOUTH HECLA MINES CO.

UTAH

Address: 135 S. Main St., Salt Lake City, Utah. **Mine address:** Alta, Utah.

Officers Geo. H. Watson, pres.-gen. mgr.; Geo. F. Wasson, v. p.; Robt. F. Marvin, sec.-treas., with J. Will Knight, and A. B. Watson, directors.

Organized Oct., 1921, as a consolidation of South Hecla Mining, Albion Cons., Alta Utah and South Hecla Extension.

Cap. \$500,000; 10c par; \$237,400 outstanding. The South Hecla received 4 shares of new stock for 1 share of old; Albion Consolidated share for share; Alta Utah 1 new for 2½ old shares; South Hecla Extension, 1 new for 8 old shares. Shares offered at 12½c., Nov., 1921.

Property: covers about 1,400 acres, patented, in one contiguous block, extending across the Alta divide, down into the American Fork district, with a production record to 1921 of about \$4,000,000.

The South Hecla group comprises 41 claims, patented, 550 acres, at Alta, in the Little Cottonwood district. Claims carry 8 well-defined ore-bearing fissures in granodiorite and limestone, running N. 70° E., dipping 70° N., also contact deposits between limestone and granite.

Company also owns over a 7/8 interest in 1,600 acres of oil lands situated in the San Rafael Swell, Emery county, Utah, on which drilling was begun in 1921.

Development: at various properties is very extensive, aggregating 50,000' of workings. Tunnels said to block out ample ore and to furnish water for a large mill. The eastern workings show shipping ore running about 5½% copper, 30% lead, 12 oz. silver, 20% iron, 20% sulphur. The western workings yield ore said to vary from \$15 to \$25 per ton. For more complete details of recent operations, see individual descriptions of companies noted above, and described under old titles in this volume.

In 1921 work in the South Hecla exposed the intersections of several well marked fissures with the "thrust contact" and overthrust fault whose quartzite hanging wall had been found to determine the existence of the large orebodies cut in the Cardiff and more recently, in the Columbus Rexall Mines. This fault, running N. 70° E., is cut at an angle of 60°-70' by several cross fissures.

Where the Wedge "fissure" or vein, intersects the "thrust contact", an enormous shoot of clean sulphide ore of shipping grade occurs. Similarly in the Quincy tunnel, an orebody was found where the Rustler fissure cuts the thrust fault, the ore, which is the probable downward extension of the "Rustler orebody," being 1,200' beneath the surface, and 800' below the old Rustler workings. This newly opened ore averages 35 oz. silver, 16% lead, and \$2 gold per ton. The "Thrust Contact" extends south into the Louise property, where it is cut by several fissures and continues into the Mineral Flat tract of the South Hecla Mines Co. Until this new Rustler discovery, work was mainly on the Kate Hayes orebody which is 900' long, and on the two ore shoots in the Wedge fissure.

In the Wasatch (the old Columbus Cons.) workings, the Braine fissure intersected the thrust contact at 70°, and in December, 1921, good ore was found where this intersection was opened by workings on the main drainage tunnel level 500' below the outcrop.

Equipment: includes a 60-h. p. electric plant, with a 10-h. p. hoist good for 200', and three compressor plants. Buildings include a shop building, housing smithy, machine and carpenter shops, with a 3-story boarding house and 5 dwellings.

SOUTH HECLA MINING CO.

UTAH

Consolidated late 1921, with Albion Cons. Mng., Alta Tunnel Mng., and South Hecla Extension Mining companies to form South Hecla Mines Co., shareholders of So. Hecla Mining Co., getting 4 new shares for each old share.

Office: 135 So. Main St., Salt Lake City, Utah. **Mine office:** Alta, Salt Lake county, Utah.

Officers: Geo. H. Watson, pres.-gen. mgr.; Herman Bamberger, v. p.; Robt. F. Marvin, sec.-treas., with A. B. Watson, and H. C. Edwards, directors.

Inc. Sept. 14, 1910, in Utah. **Cap.** \$500,000; \$1 par; assessable; issued \$262,920. Geo. H. Watson & Co., registrar. Annual meetings: second Wednesday in September.

Listed on Salt Lake Stock Exchange. Shares, 63c low, \$1.30 high, 1918; \$1.30-2.70 in 1919; 65c-\$1.30 in 1920; 52c-65c in 1921.

Company was organized as a merger of the South Columbus Consolidated Mining Co., and Alta & Hecla M. & M. Co., and holds properties

formerly held by the Bingham-Centennial, Alta-Quincy, Columbus Wedge, Ivanhoe and Liburn mining companies. Company exchanged stock on the basis of 1 share of South Hecla for 5 shares of South Columbus, and 1 share of South Hecla for 5 shares of Alta-Hecla.

Assets as of March 15, 1921, totaled \$2,355,781, including property, \$203,020; development, \$1,827,710; treasury stock \$200,000; discounts, \$64,610 and investments, \$47,900. Liabilities include surplus, \$36,524; profit and loss, \$1,815,119. Two dividends of 15c each, last September, 1919; total \$78,888.

Property is described under **South Hecla Mines Co.**

Production: company in 1916 shipped 7,962 tons of ore containing 267 oz. gold, 164,619 oz. silver 1,236,357 lbs. lead, 55,366 lbs. copper, 738,473 lbs. zinc and 782,059 lbs. iron. Lessees marketed 1,097 tons of ore containing 34 oz. gold, 16,493 oz. silver, 218 lbs. lead, 5,361 lbs. copper, 157,854 lbs. zinc, and 47,089 lbs. iron. In 1918, combined output by company and lessees was 9,232 tons ore, yielding 165 oz. gold, 112,920 oz. silver, 238,985 lb. lead, 577,773 lb. copper, 137,556 lb. zinc, and 4,261,888 lb. iron.

In 1919, the output was 7,634 tons of ore yielding 106 oz. gold, 71,200 oz. silver, 41,786 lb. lead and 361,385 lb. copper. In 1920, production was 3,581 tons of ore, 161 oz. gold 56,542 oz. silver, 329,836 lb. lead and 12,395 lb. copper. Bad roads and labor shortage reduced the 1920 production.

SOUTH IRON BLOSSOM MINING CO.

UTAH

Robinson, Juab county, Utah. George Jones, pres.; T. L. Schofield, sec.-treas.

Inc. 1908, in Utah. **Cap.** \$100,000; shares 10c par; assessable; outstanding 241,000. Listed in Salt Lake City.

Property: 4 claims in the Tintic mining district, showing silver-lead ore.

SOUTH PARK MINING & DEVELOPMENT CO.

UTAH

Officers: O. A. Relf, pres.; J. Tracy Wootton, sec.-treas.

Inc. May 24, 1916. **Cap.** \$50,000; shares 5c par; assessable; \$3,000 issued. Last assessment, $\frac{1}{2}$ c a share, delinquent, September 27, 1919. Listed in Salt Lake City.

Property: 17 claims, 14 patented, in American Fork mining district, said to show iron carbonate containing silver and lead.

Development: by tunnels, crosscutting the formation. Work has usually been suspended during the winter months, and resumed in May. At that time in 1919 main tunnel had a length of 700', and a drift was started on an orebody showing 450' from the portal.

In fall of 1920, tunnel was being continued.

SOUTH STANDARD MINING CO.

UTAH

Address: 422 Judge Bldg., Salt Lake City.

Officers: E. J. Raddatz, pres.-treas.; W. I. Snyder, v. p.; Orson P. Rumel, sec.

Cap. 1,300,000 shares; assessable; last assessment $\frac{1}{2}$ c a share, was levied in June, 1919. Listed on Salt Lake Exchange. The United Tintic Mines Co. and Tintic Tunnel Co. were consolidated with S. S. Mng. Co.

Property: 47 claims, in Juab and Utah counties, includes the Montreal Tintic Combination and Bullock groups, of the United Mines and holdings of Tintic Tunnel Co.

Reported, in 1920, that a deep shaft was to be sunk; no recent information.

SOUTH STAR MINING CO.

UTAH

Address: Chas. L. Alexander, pres.-mgr., Fergus Falls, Minn.

Officers: above with C. W. Cockroft, v. p.; L. C. Alexander, sec.-treas. and L. Davie, directors.

Inc. July 15, 1915, in Utah. **Cap.** \$100,000, 25c par; issued 200,000.

Property: 7 unpatented claims, about 90 acres, in South Star district, Beaver county, said to show copper, silver-lead ore in a contact deposit

in limestone. Only surface development work has been done. Idle, except for assessment work.

SOUTH UTAH MINES & SMELTERS

UTAH

Office: 165 Broadway, New York. **Mine office:** Newhouse, Beaver county, Utah.

Officers: Hugo Hoffstaedter, pres.; V. Morrison, sec.-treas., with Louis N. Kramer, E. P. Earle and Samuel Newhouse, directors; W. L. Heidenreich, gen. mgr.

Inc. Oct. 21, 1909, in Maine, as successor of Newhouse Mines & Smelters. **Cap.** \$4,300,000; shares \$5 par; issued 676,200 shares. **Debentures:** \$919,000 of 6%, 20-year income bonds, convertible into stock at par, remaining from a \$1,500,000 bond issue put out by the Newhouse Mines & Smelters. Interest on bonds is said to be payable annually, but only if and when earned, and then out of net profits of the year's operations. None paid to date.

The old company defaulted in interest on its bonds, and the property was bought for \$500,000 under foreclosure, old shareholders being given stock share for share, plus a payment of \$1 per share for new stock. The reorganization brought about \$600,000 into the treasury, of which all but about \$200,000 was required to liquidate the floating debt of the old company. Current assets as of June 30, 1920, were \$78,713, and liabilities, \$2,508; accumulated deficit for this date was \$201,655.

Listed on Boston Stock Exchange and on New York Curb. Equitable Trust Co., New York transfer agent; Empire Trust Co., New York, registrar. Annual meeting, third Monday in October, in Augusta, Me.

Property: the Cactus mine, 13 claims, with miscellaneous holdings, including the Midvale placer, 168 acres, water rights at Wah Wah springs, mill, town sites and grazing lands, total holdings of 7,882 acres.

The Cactus mine shows monzonite-porphry country rock, near a limestone contact, and ore is essentially an irregular mass of brecciated monzonite, carrying copper impregnations, including some oxidized ores in the upper workings but at depth mainly chalcopyrite, associated with pyrite. There is about 168,000 tons of developed low-grade ore scattered about the mine. Much of this ore will assay only 1.05%, while some of the smaller blocks consist of 1.75% ore. Such material can be profitably handled in the company's mill with flotation units, but as there seems to be no chance of finding additional orebodies it will not pay to reopen the mine and remodel the mill.

Development: by two working shafts of 600' and 900' depth, with levels at 100' intervals, and connected on the 600' level with a 6,300' main haulage tunnel. The mine has upwards of 4 miles of workings.

Equipment: includes 200-h. p. steam plant, with a 150-h. p. hoist good for 600', and a 40-drill air compressor, both operated electrically. There also is an auxiliary electric hoist on the second level.

The mine and mill are connected with the Salt Lake Route.

Mill: the 1,000-ton mill contains three 10x24" crushers, 4 sets of rolls, 1 Huntington mill, 22 Harz jigs, 58 tables, 8 slimers, 16 Callow tanks, settling tanks and classifiers.

The old tailings were treated by Utah Leasing Co. on a royalty basis. In 1914 a \$175,000 flotation plant was built for this purpose. The tailings were exhausted in 1919.

Litigation with Utah Leasing Co. was decided in favor of lessor by U. S. Circuit Court of Appeals early in 1920.

Production: from 1906 to mid-1914, amounted to 22,412,082 lb. copper; 146,148 oz. silver and 6,443 oz. gold. Mine will not be reopened, but the company is free from debt and has about \$65,000, in the treasury, in addition to the mine and mill equipment at Newhouse. It is on the lookout for mining properties worthy of development.

STAMPEDE MINES CO.**UTAH**

Mail returned from A. T. Burton, sec., Beaver City, Utah.

Officers: B. F. Caffey, pres.; Archie MacFarland, v. p.; A. T. Burton, sec.-treas., with Sam. Glaser and R. H. Strickland, directors.**Inc.** 1916, in Utah. **Cap.** \$100,000; shares 10c par; assessable; 800,000 issued.**Property:** 14 claims, 250 acres, in Lincoln or Jarloose district, Beaver county, Utah, said to show fissures in limestone, dipping 40° and pitching N. 70° E. Sulphide ore reported to contain 0.09 oz. gold, 25 oz. silver, 21.5% lead and 2.46% copper. Shoot occurs at junction of 2 fissures. **Development:** shaft, down 235' in November, 1918, cut ore whose persistence in depth is a favorable indication.**Equipment:** 6-h. p. gasoline hoist, 140 cu. ft. compressor, etc. **Production:** 21 tons in 1916. A small mine with possibilities. Rail and smelter facilities nearby.**STARLESS MINE****UTAH.****Office:** care Col. Enos. A. Wall, owner, Salt Lake City, Utah. **Mine office:** Bingham Canyon, Utah.**Property:** 8 claims patented, 160 acres, lying N. E. of the holdings of the Utah Copper Co., is developed by an incline shaft and numerous tunnels, longest 2,000', with crosscuts and upraises, aggregating 10,000'.**Development:** said to block out 800,000 tons of 1 to 2% copper ore.**Equipment:** includes a hoist.

The 125-ton mill, idle, though it was enlarged and remodeled 1910, at a cost of \$50,000, is equipped throughout with machinery of Col. Wall's own design, comprising Wall corrugated rolls, Wall steel rolls for middlings, 3 sets of jigs, 2 tables for concentrates, 2 Wilfley tables and washers, of trough form, with valves and sprayers, concentrates being discharged through the bottom and sands from the top.

STIBNITE MINING CO.**UTAH****Address:** H. C. Baker, 2421 Washington Ave., Ogden, Utah.**Officers:** H. C. Baker, pres.; A. M. Miller, v. p.; G. M. Flowers, sec.-treas., with Leroy Buchmiller and H. J. Craven, directors.**Inc.** April, 1917, in Utah. **Cap.** \$100,000; 10c par; 800,000 issued.**Property:** 686 acres, patented, 4 miles N. of Bingham, in Wasatch Range, Boxelder county, Utah.**Development:** by 2,452' adit, total openings 4,315' to depth of 800', showing various types of ore deposits in limestone, quartzite and shale, the ore containing lead and antimony. Reserves are estimated at 126,000 tons. Antimony ore mined in 1916 was 67 tons, assaying 66% metal.**Equipment:** compressor, 6,200' tram, 125-ton concentrating plant. Flotation was to have been added in 1918. No recent information, probably inactive.**STOCKTON STANDARD MINING CO.****UTAH****Address:** W. N. Gundry, 523 Atlas Bldg., Salt Lake City, Utah.**Officers:** C. F. Buehner, pres.; E. V. Anderson, v. p.; W. N. Gundry, sec.-treas., with F. Salzner, A. McCune, A. P. Davidsen, and W. F. Glissmeyer, directors.**Inc.** May 16, 1916, in Utah. **Cap.** \$10,000; 1,000,000 shares 1c par; assessable, not more than 1c. per year; issued 700,000 shares.**Property:** 13 claims, 5 patented, 240 acres, in Rush Valley district, Tooele county, said to show a vein of silver-lead ore.**Development:** by 200' shaft, with 450' drift in which a N.-S. fissure has been cut showing silver-lead ore for 60'. In 1918 \$2,000 was spent by the company.

Reported in 1921 that gas hoist had been installed and shaft, to be sunk to 400', had reached 300' in July.

SWANSEA CONSOLIDATED MINING CO.**UTAH****Office:** Knight Bldg., Provo, Utah.

Officers: O. Raymond Knight, pres.; R. E. Allen, sec.-treas.

Inc. in Utah. **Cap.** \$100,000; shares 10c par; 999,798 outstanding; assessable. Listed on Salt Lake Exchange.

Owens 145 acres in Tintic mining district, said to show silver-lead ore. Property closed.

Reported that the Tintic Mfg. Co. (q. v.), also a Knight company, had reopened shaft, June, 1921, to the 500' level. Ore reserves of milling grade are said to be exposed.

SWANSEA EXTENSION MINING CO.

UTAH

Has passed on. Described in Vol. XIII.

SWASTIKA MINING CO.

UTAH

A. H. McKnight, pres.-mgr.

Operates a property in Honeycomb gulch, near Alta, formerly owned by Bishop L. G. Hardy, of Salt Lake City. Reported to have opened a large deposit of low-grade ore by several thousand feet of workings.

SYNDICATE MINING & MILLING CO.

UTAH

In May, 1919, property and assets of the **Syndicate Mining Co.** were transferred to this company; stockholders received share for share in the deal.

Address: Santaquin, Utah county, Utah. **Benj. H. Bullock,** pres.-mgr., Nora A. Bullock, sec.-treas.

Inc. 1919, in Utah. **Cap.** \$25,000; in 1,250,000 shares par 2c. Listed in Salt Lake City. Assessable. Assessments of 1½ mills each, delinquent August, and Oct. 27, 1921.

Property: 10 unpatented claims, near Santaquin, said to show a 20' vein containing ore with gold, silver, and copper. The vein fissures are in limestone and orebodies are expected at vein intersections.

Development: Late 1921, tunnel was 2,145' long with face 800' below surface, and company driving adit on promising vein in S. E. fissure. Property is a prospect, in which ore in commercial amount has not yet been found, though surface croppings are promising.

TALISMAN CONSOLIDATED MINING CO.

UTAH

Address: P. O. Box 1065, Salt Lake City. **Mine office:** W. W. Crone, supt., Milford, Utah.

Officers H. S. Joseph, pres.; S. S. Pond, v. p.; H. W. Brock, sec.; L. B. McCornick, treas., with L. B. Merriman and M. J. Morris, directors.

Inc. July 7, 1917, in Utah. **Cap.** \$100,000; shares 10c par; assessable; 300,000 issued.

Property: 20 claims; also Cedar Talisman and Empire mines under lease for 2 years, total 450 acres, in Star district, Beaver county, Utah.

Geology: fissures and contact deposits in limestone. Orebody is from 1 to 5' wide and ore said to assay 10% lead, 15 oz. silver, and 10% copper, with some zinc and gold.

Development: by incline shafts 200 and 1,000' deep. Workings total 5,000'. Reserves consist of 1,000 tons of high-grade and 40,000 tons of low-grade ore, the latter in the leased mines. No recent information, probably idle.

TAR BABY MINING CO.

UTAH

Office: 523 Atlas Block, Salt Lake City, Utah. **Mine office:** Alta, Salt Lake county, Utah.

Officers: J. M. Matsen, pres. and gen. mgr.; J. W. Brewer, v. p.; W. N. Grundy, sec.-treas.; Geo. W. Morgan and R. W. Savage, directos; H. D. Greene, supt.

Inc. 1911, in Utah. **Cap.** 500,000 shares, increased June, 1916, from 400,000; 20c par; outstanding, 483,000 shares. Listed on Salt Lake City Exchange. Shares 1½c. low, 5¼c. high in 1918; 2c.-7½c in 1919; 1-6c. in 1920; ¾-2¾ in 1921, to June. Assessment No. 24, of 1c. levied Jan. 3, 1921; No. 25, 1c. delinquent Nov. 2, 1921.

Property: 6 claims, in the Alta-Cottonwood district, on the south fork of Big Cottonwood.

Development: by 2 tunnels, one 2,200' long, projected to cut the Cardiff limonite-quartzite contact. Extensions for year ended June 1, 1920, totals 800'. No ore in commercial amount has yet been found.

TECOMA CONS. MINING CO.

UTAH

Address: 1407 Walker Bank Bldg., Salt Lake City. C. S. Woodward, manager.

Cap. \$100,000 common stock, 10c par; and \$40,000 preferred stock, \$1 par. Listed on Salt Lake Exchange.

Property: 8 claims in Lucin mining district, Boxelder county. Ores carry gold, silver, lead, copper and zinc.

Mine is an old time lead-silver producer. Lessees were operating during 1918 and shipped oxidized copper and some lead ore.

TEXAN MINING CO.

UTAH

Office: 400 W. 7th South St., Salt Lake City, Utah.

Officers: Chas. Tyng, pres.; Frank Nelson, sec.

Inc. in Utah. **Cap.** \$1,000,000; shares \$1 par; outstanding, 825,000. Listed in Salt Lake City. Share prices 1c-8c in 1918. No quotations, 1919-'20.

Property: 200 acres in American Fork district, said to show silver-lead-copper-gold ore. A tunnel was driven over 1,000' in the Texan mine, while the Miller Hill tunnel is in 2,100'; both tunnels are in quartzite. No commercial orebodies have yet been found. Probably idle.

THOMPSON-QUINCY CONSOLIDATED MINING CO.

UTAH

Reorganized 1915, as **New Quincy Mining Company**, which see.

THOR MINING CO.

UTAH

Merged, 1916, with **Great Western Gold & Copper Co.** and **Mountain Lake Mining Co.**, with title of **Great Western Mines Co.**, which see.

THREE KINGS CONS. MINING CO.

UTAH

Formerly the Three Kings Silver Mining Co.

Mine office: David Erickson, supt., Park City, Utah.

Office: 616 Newhouse Bldg., Salt Lake City.

Officers: J. R. Elliott, of Pittsburgh, pres.; W. J. Burton, v. p.; P. J. Mackintosh, sec.-treas.-mgr., with W. A. Stewart and G. F. Campbell, directors.

Inc. May 13, 1914, in Utah. **Cap.** \$250,000; 25¢ par; 147,500 shares issued; assessable. On August 1, 1920, the cash on hand was \$7,682.50; receipts from assessments, fire insurance, etc. \$22,151, making a total of \$29,834. Disbursements, labor, office and general expense, etc., \$24,426; cash on hand July 31, 1921, \$3,454; notes receivable, \$1,954; total \$5,408. Total assets of company \$248,538; liabilities, capital stock, \$250,000; net deficit, \$1,462.

Property: the Nelson and Mineola groups, 156 acres, in heart of Park City, showing usual geologic conditions of that camp, with fissures carrying silver-lead ore.

Development: by shaft to 700' depth. Most recent development said to have opened a vein from 1' to 3' in width and assaying more than \$40 per ton. In 1920 and 1921 the mineral bearing limestone was explored by diamond drilling from the 625' level. A crosscut on 700' level uncovered 7 fissures, 2 of which are being further developed, by upraising to the ore-bearing limestone beds.

Equipment: includes electric hoist and compressor driven by 75-h. p. motor. Examined by Robert Linton. Management is confident of finding commercial ore.

THREE KINGS SILVER MINING CO.

UTAH

Name changed to **Three Kings Cons. Mining Co.**, which see.

TINTIC BULLION MINING CO.

UTAH

Officers: John M. Bestelmeyer, pres., Provo, Utah; T. Nicholes, v. p.;

H. C. Hicks, sec.; August Bestelmeyer, treas., with Samuel Bennett, directors.
 Inc. 1919, in Utah. **Cap.** \$75,000; 5¢ par.
Property: located in East Tintic mining district, adjoining Eureka Bullion.

TINTIC CENTRAL MINING & MILLING CO. UTAH

Mine address: Silver City, Utah.

Office: Provo, Utah.

Officers: O. Raymond Knight, pres.; R. E. Allen, sec.-treas.

Inc. June, 1907, in Utah. **Cap.** \$50,000; 5¢ par; assessable; all issued.
 Last assessment (No. 27), of ½¢, delinquent May 7, 1920. Stock listed on Salt Lake Exchange.

Property: 20 claims, covering ground adjacent to the Iron Blossom in the Tintic district and supposedly carrying the extension of the ore-bearing fissures of that mine. These fissures are in limestone and are cut by porphyry, carrying irregular orebodies.

Development: includes a 1,038' shaft with extensive workings on the 870', 920' and 1,020' levels. Recent work has been performed through the Iron Blossom mine, consisting of over 2,000' on the 1,700' level.

Inactive since March, 1920.

TINTIC CHIEF MINING CO. UTAH

Office: Provo, Utah.

Officers: H. C. Hicks, pres.; J. M. Bestelmeyer, v. p.; August Bestelmeyer, sec.-treas., with E. A. Peay, and N. C. Hicks, directors.

Inc. July, 1919, in Utah. **Cap.** \$75,000.

Property: located in Tintic mining district, Juab county.

TINTIC COALITION MINES CO. UTAH

Address: Eureka, Utah.

Officers: Frank Thornburg, pres.-treas.-gen. mgr.; Jas. H. Worrall, v. p.; Gordon Thornburg, sec., with Mrs. Ione Thomas and Herbert A. Coster, directors.

Inc. in Utah. **Cap.** \$1,000,000.

Property: 15 claims, 300 acres, in south end of Tintic district, 3½ miles S. of Silver City, reported to show 2 fissure vein systems in porphyry, with veins 5 to 12' wide. Ore is silver-lead-zinc.

Development: by 150' shaft, 1,900' tunnel, with a 600' back, and numerous smaller workings. Production by former owner said to be \$40,000.

During first half of 1920, Salt Lake market letters were offering shares at 12½¢; these offers abruptly ceased.

Examined by A. P. Mayberry.

TINTIC COMBINATION MINING CO. UTAH

Consolidated with Tintic Empire and Bullock M. & M. companies to form United Tintic Mines Co. in 1911, which in 1918, was itself consolidated with the **South Standard Mng. Co.**

TINTIC CO. UTAH

Office: 665 Fifth Ave., New York.

Officers: E. B. Schley, pres.; Kenneth B. Schley, v. p.; E. Richter, sec.-treas.; C. G. Raynor, asst. sec.-treas.

Inc. 1903, in Maine. **Cap.** \$2,700,000; shares \$3 par; issued \$2,091,249. Original cap., \$3,000,000; shares \$5 par, increased, 1906, to \$4,000,000, with an outstanding issue of \$3,500,000 stock in 700,000 shares of \$5 par, which was first reduced 1909, to \$2,100,000, by cutting the par value from \$5 to \$3 and was immediately thereafter increased to present amount of \$2,700,000.

Bonds: \$500,000 authorized, at 6%, convertible into stock, of which \$422,900 is outstanding, this bond issue having been made to liquidate a floating debt. The company is a securities-holding corporation only, and was the parent company of the Tintic Mining & Development Co., Yampa Smelting Co. and West Mountain Tramway Co.

TINTIC-DAVIS MINING CO.**UTAH**

C. M. Morris, pres., 813 E. 1 S., Salt Lake City; Geo. H. Taylor, mgr. Inc. in 1919.

Property: located in North Tintic mining district, adjoins Chief Cons. In October, 1919, machinery was added, and a head-frame built. Details of operations not available.

TINTIC DELAWARE MINING CO.**UTAH**

Address: Holbrook Blk., Provo, Utah.

Officers: Jos. Hatch, pres., Heber, Utah; R. Jones, v. p.; Chase Hatch, sec.; J. A. Holdaway, treas.; with J. H. Ekker, W. R. Wherritt and E. W. Murdock, directors.

Inc. in Utah. Cap. \$100,000; increased June, 1919, to \$200,000; 10¢ par; stock made assessable, fall of 1920. Listed on Salt Lake Exchange.

Property: 21 claims in West Tintic district, Juab county, 25 miles from Jerico. shows zinc-lead-silver ore. Development underway.

TINTIC DELMAR MINING CO.**UTAH**

Office: Snow Bldg., Provo, Utah. **Mine office:** Eureka, Juab county, Utah.

Officers: Lewis Merriman, pres.; Andrew Madsen, v. p.; Harvey Cluff, sec.-treas., with C. W. Reed and T. Boardman, directors.

Inc. March 27, 1909, in Utah. Cap. \$100,000; shares 10¢ par.

Property: 20 claims, partly patented, in the North Tintic district, on which limestones occur with geologic conditions like those of Centennial Eureka mine.

Development: by 350' tunnel, to be extended to crosscut formation, which shows stringers of quartz carrying ore said to give good assay values in silver, lead and copper where two large cross breaks intersect. A 114' winze encountered fissures opened by a drift, 100' below the tunnel, reported to show ore carrying 300 oz. silver, some gold, lead and a little copper in a shoot encased in low-grade ore.

Property reported on favorably by C. A. Porter of the Utah Copper Co. and by Prof. J. E. Tallmadge. No recent report of operations received. Is a promising mining gamble.

TINTIC DRAIN TUNNEL CO.**UTAH**

Address: Provo, Utah.

Officers: O. Raymond Knight, pres.; R. E. Allen, sec.-treas., with J. S. Smith, E. F. Birch, Henry Barney, A. M. Knight, K. S. Jordan, and J. K. Jordan, directors. Listed on Salt Lake Exchange.

Organized in September, 1917, to drive a 5½ mile adit from Goshen valley to a point near Silver City, for drainage of adjacent mines and sale of water for irrigation. In September, 1919, tunnel was in 3,400' and advancing about 10' daily—no timbering required at that time. Company owns 300 claims along the right-of-way.

By mid-summer of 1920, tunnel length was 7,000' and ventilating-shaft started; work was then suspended until February, 1921.

TINTIC EASTERN MINING CO.**UTAH**

Address: S. S. Pond, sec., 609 Newhouse Bldg., Salt Lake City, Utah.

Above named sued company in 1921 for recovery of 200,000 shares stock and \$5,000 alleged due for services as general manager.

TINTIC EMPIRE MINING CO.**UTAH**

Address: H. J. Fitzgerald, 409 Atlas Bldg., Salt Lake City, and Eureka, Utah.

Officers: Theo. Nicholes, pres.; L. E. Chipman, v. p.; H. J. Fitzgerald, sec.-treas.; with H. E. Phelps, and Orsen Keeler, directors.

Cap. \$125,000; 10¢ par; 625,000 issued. Assessment ½¢ a share delinquent Nov. 12, 1921.

Property: is in the North Tintic mining district, near Eureka, between the Lehi-Tintic and the Tintic Paymaster. A shaft was started in September, 1919, and was 100' deep in January, 1920, and 280' tunnel driven: 36%

lead and 7 oz. silver ore was uncovered on the surface. Equipment being installed.

TINTIC INDIAN CHIEF M. & M. CO.**UTAH**

Address: Oran A. Lewis, mgr., Spanish Fork, Utah.

Officers: Oran A. Lewis, pres.; Mark L. Halsfa, v. p.; Laura Lewis, sec. treas., with Perry P. Fuller, J. W. Lewis and Wayne Nevis, directors.

Inc. February, 1920, in Utah. **Cap.** \$10,000; 1¢ par; 500,000 treasury shares. Annual meeting in February.

Property: 22 claims, 440 acres, in South Tintic district, 5 miles from the Salt Lake Route, shows silver-copper-lead ore, with some gold in a limestone-porphry contact; assay value \$22. Is a prospect.

TINTIC MAYFLOWER MINING CO.**UTAH**

Address: H. G. Snyder, 934 Hollywood Ave., Salt Lake City.

Officers: H. G. Snyder, res.; J. C. Anderson, sec. treas.; with J. Wm. Knight and W. L. Brimhall, directors.

Property: adjacent to the Tintic Standard. An assessment of ¼¢ per share was levied, March, 1921.

TINTIC MILLING CO.**UTAH**

Address: Provo, Utah.

Officers: O. Raymond Knight, pres.; J. S. Smith, mgr.; R. E. Allen, sec. treas.; T. P. Holt, gen. supt.

Inc. in Utah. **Cap.** \$750,000; par 25¢; increased, in 1920, from \$30,000 with share of 3¢; assessable.

The total revenue in 1920 was \$640,519; operating expenses were \$558,588 and depreciation, etc., \$49,661.

The purpose of the company is to provide a process and a mill for treating low-grade ore of the locality, hitherto found valueless. The mill employs the Holt-Dern and Knight-Christensen roasting furnaces and leaching.

The mill is situated in the Tintic district on the Eureka Hill. D. & R. G. and Los Angeles & Salt Lake railroads and was originally built to treat the refractory, low-grade silver-copper-gold ores of the Knight mines. Operations began February, 1916, mostly on ores from the Iron Blossom and Dragon Cons., but were not completely satisfactory until 1917. About \$50,000 of bullion is produced monthly, and up to March, 1920, plant had treated 250,000 tons of ore. Ore is handled from 20 different properties; some custom ores are treated.

The Holt-Dern and Knight Christensen roasting furnaces and leaching are employed and briefly the process is: crusher, 4 sets of rolls, 11 roasting furnaces; leaching tanks, and scrap iron precipitating boxes. The charge for roasting is a mixture of oxide and sulphide ores and coal dust. In 1920, an electrolytic section was added for the precipitation of lead. Plant is described by T. P. Holt in the Mining and Scientific Press, for April 24, 1920.

TINTIC MINING & DEVELOPMENT CO.**UTAH**

Property sold to **Utah Cons. Mining Co.**, and company dissolved. Described in Vol. XIII.

TINTIC PAYMASTER MINES CO.**UTAH**

Office: 414 Judge Bldg., Salt Lake City.

Officers: W. I. Snyder, pres., Eureka, Utah; J. W. Knight, v. p.; H. G. Snyder, sec. gen. mgr., with W. Scowcroft and R. E. Allen, treas., directors.

Inc. 1919, in Utah. **Cap.** \$1,000,000; 50c. par; issued, 600,000 shares; assessable; assessments Nos. 6, 7 and 8 of 1c. each levied, 1921.

Property a consolidation of about 1,700 acres, including the Eureka King, located in the Tintic mining district, between the Lehi Tintic and the Selma.

Development: on the Eureka King, by a 500' shaft. Mine was actively developed during 1920 until December, when all work was suspended.

Equipment: electric power, 52-h. p. motor-driven hoist, 46' head-frame,

52-h. p. 5-drill compressor, automatic bucket dump, and all surface accessories.

TINTIC PEERLESS MINING CO.**UTAH****Address:** Silver City, Utah.**Officers:** Perry B. Fuller, pres.-mgr.; Frank S. Allen, v. p.; Robt. A. Wilkins, sec.-treas.; with E. Frank Bird and Hyrum Madsen, directors.**Inc.** January, 1920, in Utah. **Cap.** \$10,000; par 1¢; assessable; 600,000 treasury shares. Annual meeting, November, 15.**Property:** 34 claims, 702 acres, in Juab and Utah counties, 1 mile S. of Diamond City. Gold-silver-copper ore occurs in fissures in monzonite. Is a prospect.**TINTIC PRIZE WINNER MINING CO.****UTAH****Address:** Springville, Utah.**Officers:** H. Straw, pres.; Edw. Bingelson, v. p.; W. B. McPherson, sec.-treas., with Mel Chase, and Earl Bissell, directors.**Inc.** July, 1919, in Utah. **Cap.** \$100,000; par \$10.**Property:** in Tintic district, Juab county.**TINTIC QUADRANGLE MINING CO.****UTAH****Officers:** Geo. Horton, pres.; Samuel Bennett, v. p.; Geo. F. Tilson, sec.-treas., with C. S. Goddard and Geo. Horton, Jr., directors.**Inc.** about Oct., 1919. **Cap.** \$100,000; par 10c.**TINTIC SILVER MNG. CO.****UTAH****Address:** August Bestelmeyer, sec.-treas., Provo, Utah.**Officers:** H. C. Hicks, pres.; J. W. Lamb, v. p., with August Bestelmeyer, W. O. Dennis, J. D. Boyd and John M. Bestelmeyer, directors.**Inc.** 1920, in Utah. **Cap.** \$150,000.**Property:** 10 claims in Tintic district.

Development work started late 1921.

TINTIC STANDARD MINING CO.**UTAH****Office:** 422 Judge Bldg., Salt Lake City, Utah. **Mine office:** Eureka, Juab county, Utah.**Officers:** E. J. Raddatz, pres.-treas.-gen. mgr.; W. I. Snyder, v. p.; L. H. Stohr, sec., with Willard Scowcroft, and Ira I. Travis, directors. John Westerdahl, supt.**Inc.** Oct. 2, 1907, in Utah. **Cap.** \$1,300,000; \$1 par; assessable; issued, 1,175,000. Has levied 19 assessments of ½c. each up to 1916. Stock listed on Salt Lake Exchange. Annual meeting, January 10.**Dividends:** initial of 20c. paid June 23, 1917, and 40c. during that year; 47c. in 1919; 40c. in 1920; 10c. in 1921 (2Q), with total of \$1,547,432. None for last half, 1921.

Balance sheet of March 30, 1921, shows total assets of \$2,492,721; includes property, \$1,234,145; plant, \$599,029; Goshen Valley R. R. \$342,720; and current, \$191,493. Liabilities include accounts payable, \$61,955 and earned surplus of \$1,201,632.

Property: 95 claims, 1,760 acres, of which 15 claims, 300 acres, are patented, covers a long stretch on the ore zone. In November, 1919, company started suit against the Chief Cons. concerning ownership of the White Wing No. 5 claim.**Geology:** mine shows limestone, quartzite, and porphyry, carrying fissure veins with N.-S. strike and dip of 55° E. in limestone. Ore comes from a north-south fault fissure at contact of shale with underlying quartzite.**Ore:** a fine-grained aggregate of galena and tetrahedrite, plus a little pyrite, in barite and quartz, and is reported to assay from a trace to 50% lead, 1 to 105 oz. silver, and \$1 to \$15 gold per ton. The management reports the main orebody as 200' wide.**Development:** one 1,450' three-compartment main working shaft, and about 8,000' of drifts, etc. The second shaft, 1,700' south of main shaft is

also 1,450' deep and connects with the other. Both shafts show shipping ore. Ore developed is on the 1,250 and 1,350' levels.

Equipment: includes a 100-h. p. steam plant, with an 80-h. p. double-cylinder, hoist, good for 1,500' depth. Also double-drum hoist with 300-h. p. motor and an 800 cu. ft. compressor with 150-h. p. motor.

Production: in 1919, about 50,000 tons of ore. Total from 1915-'18 inclusive, 58,495 dry tons that yielded 1,900,000 oz. silver, 7,900,000 lb. lead, 750,000 lb. copper, and 1,582 oz. gold.

In 1920, 73,848 tons of ore of assay value of \$3,544,335 and a net smelter value of \$1,655,923 were shipped. During first quarter of 1921, 24,566 tons were produced, having an assay value of \$812,577 and a net smelter value of \$355,679; these latter figures do not apparently cover any ore shipments to mill, although it was reported in July that most of output was being treated there.

Seems to be a worthy enterprise.

A 9-furnace 200-ton mill using Holt-Dern wasting and leaching process was completed in 1921, at Warm Creek, near Goshen on the D. & R. G. R. R. Mill produces about 100,000 ounces silver per month.

TINTIC STAR MINING CO.

UTAH

Jesse M. Harms, mgr.

Inc. 1918, in Utah. **Cap.** \$100,000; 10c par.

Property: 4 miles S. E. of the Tintic Delaware near Dunbar, Juab county, said to show copper-silver ore.

TINTIC TUNNEL CO.

UTAH

See Vol. XIV. Consolidated with **South Standard Mng. Co.**, which see.

TINTIC UNION MINING CO.

UTAH

Address: H. G. Snyder, 414 Judge Bldg., Salt Lake City.

Officers: Lewis Merriman, pres., Ogden, Utah; W. I. Snyder, v. p.; H. G. Snyder, sec.-treas., with Gideon Snyder, and J. W. Scowcroft, directors.

Inc. 1919, in Utah. **Cap.** \$1,000,000; 50c par. Last (No. 2) assessment, of $\frac{1}{4}$ ¢, levied April 27, 1921.

Property: 22 claims, located in southern part of East Tintic district. Company plans exploration work.

TINTIC WINCHESTER MINING CO.

UTAH

Mail returned from L. N. Ellsworth, Tintic, Eureka county, Utah.

Officers: G. F. Tilson, pres.; William Haws, v. p.; L. N. Ellsworth, sec.-treas., with S. Trotter and H. B. Cole, directors.

Inc. Dec., 1919, in Utah, to engage in general mining business.

TINTIC ZENITH MINING CO.

UTAH

Address: A. W. Larsen, Eureka, Utah.

Lewis Merriman, pres.-gen. mgr., holds controlling interest. An amalgamation with Tintic Union and Apex Standard was proposed late, 1921. Geo. A. Udall, and A. W. Larsen, of Eureka, reported as stockholders.

Property: located in eastern part of Tintic mining district, Juab county.

TINTIC ZINC CO.

UTAH

Has passed away. Described in Vol. XIII.

TOM MOORE GROUP

UTAH

Office: 159 South State St., Salt Lake City, Utah. **Mine office:** Bingham Canyon, Salt Lake county, Utah. A. M. Surbaugh and Thos. Moore Surbaugh, owners.

Property: 39 claims, 22 patented, 715 acres, with direct rail connection, in the N. E. part of the Bingham camp.

Development: by 16 shallow shafts and short tunnels, principal work being by the Highline tunnel, with another tunnel driving at lower depth. The mine carries gold and silver-bearing lead and copper ores, with small quantities of native copper, in quartz. Owners do not care to have output or other details made public, and returned letters unopened. Probably idle.

TOOELE GOLD HILL M. & M. CO.**UTAH****Address:** Peter Clegg, Tooele, Utah.**Officers:** Peter Clegg, pres.; C. W. Bailey, v. p.; T. S. Marks, sec.-treas., with W. Carder and J. Donovan, directors.**Inc.** April 7, 1917, in Utah. **Cap.** \$50,000; shares 10c par; 222,500 issued.**Property:** 6 claims, patented, 110 acres, in Clifton district (Deep Creek), Tooele county, said to have a contact deposit in granite and limestone. Ore carries gold, silver, copper and lead.

Prospecting in August, 1917; no news received since then.

Presumably inactive.

TOOELE SMELTER**UTAH****Works address:** A. B. Young, supt., Tooele, Utah. **Operating office:** J.

O. Elton, mgr., Kearns Bldg., Salt Lake City.

A lead and copper smelter owned by International Smelting Co. and described thereunder.

TREPHINE MINING CO.**UTAH**

A. P. Hanson and Robt. E. Mark, owners of majority of outstanding stock, called a meeting of stockholders October 6, 1919, at 902 Kearns Bldg., Salt Lake City, to elect officers to wind up affairs of company. They claim that no annual meeting has been held, nor officers elected since company was incorporated in 1899. The charter and franchise of company were revoked by State in April, 1910, for failure to pay annual license tax for 1909.

Property and assets sold to Republic Mng. Co. (q. v.) in October, 1919.**TRIANGLE MINING CO.****UTAH**Went into receiver's hands, Jan., 1919. N. W. Haire, receiver, 411 Felt Bldg., Salt Lake City, Utah. **Mine address:** Alta, Utah.**Officers:** Howard C. Fields, pres.; Wm. C. Stewart, v. p.; Irma R. Fields, sec.-treas.; Howard H. Fields, mgr., with Harry A. Marsh and Wm. C. Lidvall, directors.**Inc.** July 15, 1917. **Cap.** \$25,000; shares \$1 par; 6,201 outstanding. Operated as a close corporation. Annual meeting, first Saturday in September.**Production:** in 1915 was 2,000 tons; in 1916, 5,000 tons averaging \$25 per ton.**TUNNEL HOLLOW MINING CO.****UTAH****Address:** Frank De More, Morgan City, Utah.**Property:** 13 claims in Morgan county, 4½ miles E. of Morgan City. Small lenses and bunches of black copper oxide, carrying native silver, are found interbedded in sandstone.**Development:** by 120' incline and 570' tunnel; total workings about 900'. Equipped with gasoline hoist.**UNCLE SAM CONSOLIDATED MINING CO.****UTAH****Office:** 600 Dooly Block, Salt Lake City, Utah. **Mine office:** Eureka, Juab county, Utah.**Officers:** Hon. John Dern, pres.; G. H. Dern, v. p.; Frank D. Kimball, treas.; Fred. C. Dern, sec.; J. C. Dick, gen mgr.; W. P. Carter, supt.**Inc.** June 29, 1900, in Utah. **Cap.** \$750,000; shares \$1 par; assessable; increased August 21, 1912, from \$500,000; 365,080 shares issued. The company formerly owned a 50% stock interest 400,000 shares, in the May Day Mining & Milling Co., which stock was distributed 1910, to shareholders, as a stock dividend. The Richmond & Anaconda Cons. Mng. Co., adjoining, was absorbed 1912, by the Uncle Sam.

Shares are listed on the Salt Lake Exchange. Annual meeting, first Monday in June.

Regular dividend rate was 2cts. per share monthly, changed June, 1910, to 2 cts. quarterly, with an extra dividend of 3 cts. December, 1910; dividends for 1910 having been 19 cts. per share; total dividends to April, 1913, were \$470,000; none since. Assessment of 1c. a share was delinquent on April 22, 1920.

Property: 4 claims, patented, in Tintic district, including the Humbug mine, which is the principal property, producing mainly auriferous silver-lead ore of both smelting and milling grades. A good orebody was developed in the western part of the property. **Equipment:** is electrical.

Production: in 1916 was 290 tons of ore; in 1917 and 1918, lessees were responsible for a small output, the latter realizing \$5,487. No production in 1920.

Company is expending all energies in development work.

UNEVIDA GOLD MINING CO.

UTAH

A. B. Lewis, pres.; W. S. McCornick, treas., 205 Center St., Salt Lake City; W. C. Ralston, Jr., sec.-mgr.

Inc. May 14, 1917, in Delaware. **Cap.** \$7,500,000; \$1 par; non-assessable; 3,370,000 shares and \$12,500 cash in treasury, October, 1918. Debts amounted to \$89,000.

Company controlled several miles of alluvial and gravel ground along Carson river in Nevada from which it was proposed to recover the amalgam lost from the old Comstock mills; also reported to have mining properties in Beaver county, Utah and in Idaho. Details of company, organization and operations not obtainable, save in January, 1919 company brought suit against two former directors and others, charging them with having induced owners of leases under which company operated, to cancel and transfer them to Comstock Lode Recovery Corp.

UNION CHIEF MINING CO.

UTAH

Office: Newhouse Bldg., Salt Lake City, Utah. **Mine address:** Albert N. Larson, Santaquin, Utah.

Officers: G. L. Bemis, pres.-mgr., Santaquin, Utah; Geo. Baglin, sec. **Inc.** 1903, in Utah. **Cap.** 1,000,000 shares; par 10c; assessable; assessment No. 10, or ½c., was levied May 2, 1921. Listed on Salt Lake Exchange Shares sold ¾-4c. in 1918; and up to 8c. in 1919; 3-13c. in 1920; 3½c. in 1921 to June.

Expenditures for 1920 were \$10,283, leaving an unpaid indebtedness of \$863 on Dec. 31.

Property: 18 claims, 6 patented, 370 acres, in Santaquin mining district, shows lead-silver ore in vein reported to be about 6" wide.

Development: over 8,000' of tunnels and drifts. Reported to have found high-grade ore at 550' depth in 1916, but as only picked samples seem to have been assayed, no averages can be given. Equipped with electric power line and compressor.

In 1920, 754' of development was done at a cost of \$10.03. No well-defined orebody was found, but 200 tons of ore, averaging 20 oz. silver an' 25% lead, were extracted.

UNITED BINGHAM COPPER CO.

UTAH

Office: 508 Continental Bank Bldg., Salt Lake City.

Officers: L. A. Marks, pres.; G. R. Bothwell, v. p.; F. R. Snow, sec.-treas., 252 Canyon Road, Salt Lake City, with P. E. McConaughy, and W. P. Davis, directors.

Inc. 1919, in Utah. **Cap.** \$100,000; 10c par; issued 900,000 shares.

Company is the successor of Bingham Amalgamated Copper Co., described in Vol. XIII. The new company was organized in order to make the stock assessable. Old stock was exchanged for new on payment of 1c. a share. An assessment of 1c. was levied June 21, 1920.

Property: 22 claims, 300 acres, patented, known as the Illinois and Copper Glance groups, carrying 7 mineralized veins. The principal orebodies exposed in the Bingham Amalgamated are on the same vein as the Congor orebodies and of about the same character of ore. Vein is 15 to 40' thick, developed for several hundred feet in depth, but the water and high cost of wagon haul stopped further development. In a tunnel on the west side of the property a 20' vein shows streaks of good ore all through it. The Montana Bingham tunnel cuts this vein about 100' deeper, 3,948' from the

portal, and opened it for 100'. Samples taken from this vein said to run from 3.2-6.5% copper, 7 oz. silver, \$1.20 gold and 25% iron. Development work resumed the latter part of 1915 after an idleness of several years.

The Illinois has a 640' copper ore, with occasional assays up to 40%, the streak of about 5% copper ore, with occasional assays up to 40%, the average of 50 assays being 2.8% copper, 2 oz. silver and \$2 gold per ton. The Copper Glance group has a 1,400' tunnel, in McQuire gulch. Mine has a total of 2,450' of workings.

In summer of 1917, company mined ore from a raise at the East end of the 300' level. A trial shipment of 90 tons in June, yielded \$25 per ton, the ore carrying 4.73% copper, 2 oz. silver, \$1 gold, and 26.4% iron and 35.6% insoluble. The shaft, flooded in July was reopened later. Recent work has been on a small scale on the 400' level, east side; some ore was shipped in 1918.

Mine has been idle since early in 1920.

UNITED PROMONTORY MINING CO.

UTAH

Office: 72 West Second So. St., Salt Lake City.

Officers: B. D. Siegfus, pres., 560 12 E. St., Salt Lake City; A. L. Burns, sec.-treas.; W. E. Siegfus; A. H. Hash, O. P. Peterson, T. W. James, and W. C. Smaltz, directors.

Inc. in Feb., 1915, in Utah. Cap. \$7,000; 1c par; 100,000 treasury shares; assessable; assessment No. 6, of 1½ mills, levied Jan. 24, 1921. Annual meeting first Thursday in January. Company's name was formerly Promontory Mining Co.

Property: 14 unpatented claims, in Boxelder county, Utah, 7 miles N. of Promontory, on the S. P. R. R., shows vein 20' thick in limestone-porphyr contact.

Development: 1,200' including 90' shaft, and two tunnels, 200' and 450' long. Upper level showed some high-grade copper-silver ore. Company has been developing the mine for about 8 years, spending \$3,000 in 1918.

Reported Jan., 1921, that lower (450') tunnel would be extended.

Equipment: includes a compressor.

UNITED STATES METALS REDUCTION CO.

UTAH

A close corporation, controlled by a Pittsburg syndicate. A 15-ton plant, 15 miles from Castleton, and 50 miles from Cisco, was built in 1918, to treat radium bearing ores. The company owns 37 claims.

No recent information.

UNITED STATES SMELTING CO.

UTAH

See Vol. XI for individual description and under U. S. S. R. & M. Co. in Vols. XII and XIII. Was merged with latter company, December, 1917.

UNITED TINTIC MINES CO.

UTAH

Described in Vol. XIII. Company was a consolidation of Tintic Combination, Tintic Empire and Bullock M. & M. companies. Reported in 1916 that company had become a part of the Tintic Tunnel Co., but this merger did not apparently materialize. In 1918, it was consolidated with South Standard Mining Co., which see.

UTAH & EASTERN COPPER CO.

UTAH

Idle. Office: 127 Church St., New Haven, Conn. Operating office: 508 McCornick Bldg., Salt Lake City, Utah. Mine office: Dixie, Washington county, Utah. Works office: Shem, Washington county, Utah.

Officers: Louis E. Stoddard, pres.; T. W. Farnam, sec.-treas.

Inc. 1901, in West Virginia. Cap. \$1,500,000, increased later to \$3,500,000; shares \$5 par, in \$2,000,000 preferred and \$1,500,000 common stock.

Property: 11 claims, patented, 220 acres, and a 40-acre smelter site, including the old Dixie mine, in the Tutsagubet or Cave Springs district, near Green river.

Geology: 5 replacement deposits in limestone, 1 of 40' estimated average width, carrying cuprite, azurite, and massive malachite ores, said to give average assays of 15% copper.

Development: by a 775' blind shaft, sunk from the breast of a 225' tunnel. This tunnel caved, 1905, and it was necessary to run a new tunnel of 800', to reopen the mine. Old workings said to show about 100,000 tons of ore.

Equipment: includes a small gasoline plant. The company has 2 smelters. 1 worthless; the new smelter has a 100-ton water-jacket blast furnace, with water power, secured from the Santa Clara river, 2 miles distant, and a small auxiliary steam plant. The smelter is at Shem, about 50 miles from Acoma, or the Rio Grande Western railroad, the nearest shipping point, and transportation for 14 miles of the distance is by traction engine.

Production: 1,448,597 lb. copper in 1904; 400,166 in 1905, and 391,779 in 1907. Property considered promising but is handicapped by lack of rail transportation. Worked by lessees, who have shipped several cars of 30% ore.

Letters returned unanswered, and no recent report received.

UTAH-APEX MINING CO.

UTAH

Office: 10 Post Office Square, Boston, Mass. **Mine office:** Bingham Canyon, Utah.

Officers: R. F. Haffenreffer, Jr., pres.; J. J. Murphy, v. p. and treas., with N. P. Duvally, sec.; G. F. McGahey and M. W. Sangy, directors. **Operating staff:** V. S. Rood, gen. mgr. J. A. Norden, asst. mgr.

Inc. May, 1902, in Maine, as a merger of the Copperfield Mining Co. and York Mining Co. **Cap.** \$3,000,000; increased 1906, from \$2,500,000; \$5 par; issued 528,200 shares; \$359,000 unissued. State Street Trust Co., Boston, transfer agent. Federal Trust Co., Boston, registrar. Listed on Boston Stock Exchange and on New York Curb.

For fiscal year ending August 31, 1920, gross receipts from ore sales, royalties, etc., were \$1,263,981. Expenses including litigation, taxes, depreciation, etc., \$1,224,277, leaving a net profit of \$55,285. At close of fiscal year, current assets, cash and liberty bonds were \$621,535, against current liabilities of \$77,501, leaving working capital of \$544,034.

Dividends: initial quarterly dividend, 12½c., paid Oct. 1, 1915; 75c. in 1916; 50c. in 1917; 50c. in 1918; none in 1919; 25c. in 1920.

Property: 34 claims, 244 acres, includes the York and Copperfield groups, together with the Dana, Petro, Highland Boy Consolidated groups, comprising 23 mines in Carr Fork, Bingham and West Mtn. districts, next to the Utah Consolidated on the south and west. Company owns the Phoenix Mining Co.

Geology: the claims show a great thickness of quartzite beds at times limey, and containing 2 well defined, persistent limestone strata, called the Highland Boy and Yampa beds, which dip at about 45° into the hill and are cut by dikes of monzonite porphyry. These rocks are cut and faulted by fissure veins and lodes, containing large orebodies and ore deposits also occur in the limestone beds near the veins. The Dana-Leadvile lode is the lead carrier; the Highland Boy vein carries copper ores; the Petro vein yields copper and lead ores.

Development: by over 20 miles of openings, with main working shaft, 2,400' deep. The tunnels, known as the Parnell, Minne Smilax, Andy, Andy No. 2 and Parvenu, are spaced at 200' vertical intervals, and are connected by incline blind shafts, with electric hoists, on the Parnell vein.

The Parvenu tunnel, which is the principal working, is about 1 mile in length, cutting the Parnell vein with a back of about 2,200'.

Ore reserves are estimated at over 200,000 tons, assaying 0.03 oz. gold, 3.5 oz. silver, 11% lead and 8% zinc. Present indications show that new ore will maintain, if it does not increase reserves.

On the 1,300 and 1,400' levels the Parvenu orebody is very rich. On the 2,000' level a rich orebody was cut in 1920, and mine can produce 1,000 tons daily.

Mill: treats about 300 tons per day and has oil flotation plant.

Equipment: includes two 15-drill air compressors and 2 electric hoists, 1 of which is a double-drum hoist installed at the 7th level station in the Parvenu tunnel.

Production, years ended August 31:

Year	Ore Tons	Gold, Oz.	Silver, Oz.	Lead, Lbs.	Copper, Lbs.
1920.....	109,578	2,732	352,663	22,300,652	788,142
1919.....	93,571	3,353	290,527	22,887,788	635,268
1918.....	181,869	6,171	641,551	42,811,805	1,427,576
1917.....	118,748	3,551	396,989	24,414,451
1916.....	189,331	4,924	620,022	37,304,675	2,355,475
1915.....	170,573	4,000	560,000	32,000,000	2,400,000

Zinc produced in 1919 amounted to 7,671,742 lb. and 9,496,169 lb. in 1920. Company is largest lead producer of Utah and normally employs 500 men.

The Utah Apex won in 1921 its various suits against the Utah Cons. for value of ore extracted from its ground. The suits involved ownership of orebodies of lead and silver ore in the Highland Boy and Yampa limestones in the Bingham district, where the two companies joined holdings.

When the Haffenreffer regime came into control of Utah-Apex about two years ago, the company began intensive development of its property underground. It opened a very high grade ore body on the 18th level. The ownership of this vein was immediately disputed by Utah Consolidated on the theory that it was found in the so-called limestone bed and therefore was part of an orebody which apexed in its (Utah Consolidated's) property.

The Utah-Apex Mining Co., however, under the guidance of geological experts, determined that not only had it been mining within its own borders, but it had the apex on its own property of the two veins in dispute, Highland Boy and Yampa, and that Utah Consolidated had itself been mining and had taken huge tonnages of ore from these veins.

Utah-Apex immediately entered suit against its neighbor—made the former plaintiff the defendant and claimed damages of \$2,500,000.

The question at issue was whether the limestone beds which traverse the Bingham mining district for miles constituted separate and distinct lodes. The Utah Consolidated Co. maintained that they were; that it held apex rights to the orebodies which Utah Apex Mining Co. was then and had been mining for some years. It also contended that these lime beds did not necessarily need to be ore bearing; the mere fact that they seemed at intervals to maintain their formation and semi-regular size indicated that they constituted veins, the apex rights to which Utah Consolidated professed to have, and any mining thereon constituted violation of apex rights, or in other words, illegal extraction of ore.

The Utah Apex company on the contrary, denied that the Yampa limestone bed is sufficiently altered or generally mineralized to justify its designation as a vein or lode. It asserted that the orebodies in controversy are closely associated with distinct fissure veins which were the source of mineralization of their particular bodies; and that these veins, together with all their orebodies, including those held in controversy, are situated vertically beneath the surface of mining claims owned by the Utah Apex company. In other words, the Utah Apex company denies that the Utah Consolidated company has extralateral rights which will include orebodies in dispute, and asserts that they belong to the Utah Apex company by virtue of ownership of the overlying surface.

The question was whether or not the Yampa limestone bed is sufficiently mineralized to constitute a vein or lode within the contemplation of the mining statute. The lower court found that the Yampa limestone bed does not constitute a lode.

The United States District Court made its final decision Dec., 1921 in favor of the Utah-Apex, awarding a total of \$1,154,928. This includes \$948,340, representing ores unlawfully extracted by the Utah Consolidated from Utah-Apex ground, and interest amounting to \$206,587. This case has since been appealed to the U. S. Supreme Court.

UTAH BALTIMORE CONSOLIDATED CO.**UTAH**

Mail returned, 1918, from former address. J. P. Evans, pres., 408 S. 13 E. St., Salt Lake City, Utah; J. M. Williams, v. p.; C. A. Doe, sec.-treas.; J. T. White, W. D. Williams, directors.

Inc. in 1916. **Cap.** \$1,000,000; shares 5c par; no indebtedness.

Property: 10 claims, 5 in Beaver county, known as the Mollie Pitcher group 5 in the Rocky district, known as the Bill Williams group. Mollie Pitcher group has a 100' shaft in vein of copper ore said to be 60' wide and of shipping grade. Loading station on R. R. about a mile from mine. Probably idle.

UTAH-BOSTON DEVELOPMENT CO.**UTAH**

Address: Robert M. Hampton, Tonopah, Nev. Henry M. Adkinson, mng. director, Walker Bros. Bank Bldg., Salt Lake City, Utah.

Inc. 1920, in Maine. **Cap.** \$500,000; par \$1.

Property: 50 acres, includes the old Nast mine, in West Mtn. district, Salt Lake county, adjoining Utah Copper Co. on the S. W. Was formerly owned by the New England G. & C. Mng. Co., now dead. A porphyritic rock is cut by 3 fissure veins of 30" average width, showing ores carrying 30% lead, 10% zinc, 15 oz. silver and \$4.50 gold, with a small copper content.

Development: by 1,600' Nast and 1,670' Benton tunnels, and 2 shafts, with 6,000' total workings. Prior to 1907, property was a considerable producer, and on the active list up to 1912, when operations ceased. Working a few men, 1922.

Equipment: includes a steam plant with 2 hoists, and a concentrating plant.

UTAH CENTENNIAL MINING CO.**UTAH**

Address: Pleasant Grove, Utah.

Officers: J. E. Thorne, pres.; L. L. Nelson, v. p.; D. Noble, sec.-treas.; J. W. Thorne, J. E. Thorne, C Thorne and L. L. Nelson, directors.

Inc. 1907. **Cap.** \$1,000,000; shares 5c par; outstanding, 250,000 shares; assessable; last assessment, \$5 per 1,000 shares, called in May, 1919. Annual meeting in April.

Property: 10 claims in American Fork Canyon, American Fork district. Fissure vein carries gold, silver, lead, copper ore. Developed by a 450' tunnel and reported to have struck a few inches of high-grade silver-lead ore. Property is a prospect undergoing development.

UTAH-COLORADO MINING & MILLING CO.**UTAH**

See this title under Colorado.

Address: Wm Penn Hotel, Denver, Colo., and 411 Bonfils Bldg., Kansas City. Chas. E. Havenner, pres.

Company has large holdings in Utah and in Colorado.

UTAH CONSOLIDATED MINES CO. OF TINTIC**UTAH**

Office: 425 Atlas Bldg., Salt Lake City. T. R. Cutler, pres.; H. J. Fitzgerald, sec.-treas.

Inc. in Utah. **Cap.** \$1,000,000; \$1 par; all issued.

Property: 100 acres in Tintic mining district, shows silver-lead ore. Presumably idle.

UTAH CONSOLIDATED MINING CO.**UTAH**

Office: 25 Broadway, New York. **Operating office:** 608 Dooly Block, Salt Lake City, Utah. Mine office: Bingham Canyon, Utah.

Officers: R. H. Channing, Jr., pres.; Adolph Lewisohn, v. p.; with Sidney Chase, J. S. Dunstan, H. H. Anthony, J. W. Allen, Maxwell Woodhull, directors; A. H. Melin, sec.-treas.;

Operating staff: Frederick Cowans, gen. mgr.; A. S. Winther, supt.; T. S. Van Wagoner, purch. agt.

Inc. March 4, 1903, in New Jersey. **Cap.** \$1,500,000; shares \$5 par; all issued.

Is a reorganization of Utah Consolidated Gold Mines, Ltd., a British corporation that in turn succeeded the Sevier Gold Mines, Ltd., October,

1896. Property of the Utah Consolidated Mining Co. is 2,490 shares of the 2,500 shares of the capital stock of the **Highland Boy Gold & Copper Mining Co.**, of New Jersey, the latter corporation holding direct title to the Utah properties. The company also owns 8,250 shares of the **Anaconda Copper Mng. Co.**, stock derived from sale of Internat'l S. & R. Co.

Shares are listed on the Boston and Salt Lake Stock Exchanges. Price range, \$7 to \$10 in 1918; \$7½ to \$12¾, 1919; \$2¼ to \$9¾ in 1920; \$3½ to \$4 in 1921, to September, 1½, Dec. 1921. Transfer agent, International Trust Co., Boston. **Registrar:** Old Colony Trust Co., Boston. Annual meeting, first Tuesday in April.

In February, 1921 company took an 0.34% interest, \$136,000 total amount in the Copper Export Association's \$40,000,000 8% bond issue.

Litigation: The litigation between the Utah-Apex and Utah Consolidated mining companies, both of Bingham Canyon, Utah, consists of six suits; but, as the same fundamental question is involved in each, it was decided by mutual consent that the court should try two of the cases, decision on which would govern the rest.

The U. S. District Court, in October, 1920, decided five of the cases in favor of the Utah-Apex, and in one unimportant case the opinion of the court was that the Utah-Apex had not proved its contentions.

In the accounting stage of the case, which followed, the court awarded the Utah-Apex the sum of \$1,154,928.98 besides costs. In the meantime, the Utah Consolidated appealed on one case (the Yampa) which governs three others; and on Nov. 14, 1921, the U. S. Circuit Court of Appeals confirmed the decision of the trial court. On Feb 1 the Utah Consolidated filed a bond with the American Surety Co. of New York as surety for \$1,300,000, covering damages and costs, this bond serving as a supersedeas on the Utah Consolidated's appeal to the Supreme Court in the Highland Boy case.

Property: 46 claims, patented, 393 acres, known as the Highland Boy group, in Carr Fork canyon, 2½ miles from Bingham canyon. The Highland Boy mine was a considerable producer of silver-lead ore. 1870-90.

In 1915 the Bingham Copper Boy group adjoining the Utah Cons. on the north was purchased for \$18,747. Property promising but undeveloped. In 1918, the Yampa mine, 51 acres, adjoining on the north, was purchased from the Tintic Mining & Dev. Co. for \$100,000. In 1918, took option on Utah Lead & Copper Co.'s group of 85 acres pat'd, north of U. C. holdings.

Geology: the Highland Boy group, the original property, has 6 ore deposits which are replacements of limestone beds 150 to 300' thick, with quartzite above and below. These beds dip from 25 to 45° N. and the rocks are cut by a series of porphyry dikes that are nearly vertical and run N. E. The ore deposits form well-defined shoots with E.-W. strike and N.-E. pitch. They are large, varying up to 100' in width and 100 to 200' in length, and are separated by barren limestone; the largest orebody so far developed is said to be 320' in extreme horizontal width and 340' in length. An ore-shoot carrying galena was found in the lower workings in an extension of the Yampa limestone. The predominant ore of the mine carries chalcopyrite, with some bornite and chalcocite, associated with pyrite in a limestone gangue.

Development: the Highland Boy mine is opened by a main shaft 1,600' deep, and 7 tunnels, of 1,000 to 2,600' in length. No. 7 tunnel, 700' below the crest of the mountain, is 2,600' in length and is the main haulage way, all tunnels being connected, and ore milled, through chutes, to this tunnel. There are 2 blind shafts, deepest 500' starting from the 700' level, with large electric hoists, raising ore to that point for extraction by the electric haulage plant in No. 7 tunnel. The ore breaks easily and is extracted by the top-slice caving system, mainly on contract.

New openings totalled 29,206' in 1917; 21,067' in 1918; 17,407' in 1919; 10,412' in 1920.

About one-third of the 1919 extensions were made in upper limestone on 1,200', 1,300', 1,500' and 1,600' levels in main orebody, which has a length of 1,100' on the 1,200' and 1,500' on the 1,600' level, with an average width of 4' and an average assay of 2.18% copper, 0.05 oz. gold and 0.85 oz. silver; this body has been cut also on the 1,800', where it is 6' wide. The vertical shaft from the 1,300' level was sunk to 2,000' and at the 1,600' level, 2 orebodies were uncovered in the Highland Boy limestone.

In 1920, the vertical shaft was sunk to the 2,400' level and raised from the 1,300' to the 900' level (Craig tunnel) and main shaft was carried through to the surface. Work in the Highland Boy limestone was disappointing.

In 1918, an option was taken on adjoining property of the Utah Lead & Copper Co. Exploration work is being done in this ground from the 1,300 and 1,500' levels.

Ore reserves:

	Cop. Ore		Sil. Oz.	Gold Oz.	L'd. Ore		Lead %	Silver Oz.	Gold Oz.	Cop. %
	Tons	%			Tons	%				
1920.....	815,000	1.96	0.57	.40
1919.....	848,000	1.94	0.66	.040	38,400	15.70	5.36	.060	0.90	
1918.....	277,939	2.33	0.78	.048	29,591	15.93	5.23	.058	0.8	
1917.....	141,000	1.76	0.65	.05	31,000	14.90	4.96	.06	0.61	
1916.....	180,000	1.77	0.69	.048	23,400	16.03	5.62	.038	0.81	

Lead ores are involved in suit with Utah Apex and thus no figures are given for 1920.

A 4-mile aerial tram connects the mine with a 1,000-ton concentration and flotation mill, situated within a few hundred feet of the International smelter. The mill, begun in 1920, will treat low grade copper ores with a concentrating ratio of 7 to 1. A subsidiary aerial tram conveys mining supplies across Carr Fork canyon.

While the great orebodies of the mine are worked out the property is far from exhausted, and development work is encouraging.

UTAH CONSOLIDATED MINING & MILLING CO. UTAH

Idle. **Office:** 424 Atlas Bld., Salt Lake City, Utah. **Mine office:** Mammoth, Juab county, Utah.

Officers: S. S. Jones, pres.; H. S. Cutler, v. p.; Hart J. Fitzgerald, sec. treas.; preceding, with Hon. Reed Smoot, A. N. Holdway and Hugh J. Cannon, directors, at last accounts.

Inc. March 10, 1907, in Utah. **Cap.** \$250,000; shares 25c par; non-assessable. Shares listed on the Salt Lake and San Francisco Exchanges. Shares sold at 3/4c to 2/4c in 1921.

Property: 6 claims, patented, in Tintic district, near the Sioux Consolidated and Colorado mines, developed by a 500' shaft, with 2 levels opened. Part of the property is worked by lessees, who secure a small production. No recent report.

UTAH COPPER CO. UTAH

Office: Deseret Bank Bldg., Salt Lake City, Utah. **Mine office:** Bingham Canyon, Salt Lake county, Utah. **Works office:** Garfield, Utah.

General office: 25 Broad St., New York City.

Officers: Chas. M. MacNeill, pres.; Daniel C. Jackling, 1st v. p. and managing director; Chas. Hayden, 2nd v. p.; with Spencer Penrose, E. A. Guggenheim, H. F. Guggenheim, W. C. Potter, Stephen Birch, W. P. Hamilton, R. C. Gemmell (asst. managing director and gen. mgr.), W. Hinckle Smith, J. K. MacGowan, R. A. F. Penrose, Jr., Thos. Cochran and Theo. Schulze, directors.

W. E. Bennett, v. p.-asst. sec.; C. V. Jenkins, tres.; A. J. Ronaghan, sec.; J. W. E. Ridgway, asst. sec.-asst. treas.; D. A. Crockett, asst. treas.; L. S. Cates, asst. sec.; Chadbourne, Babbitt & Wallace, gen. counsel.

Operating officials: L. S. Cates, asst. gen. mgr.; H. B. Tooker, traffic mgr.; C. T. S. Parsons, cashier; J. D. Shilling, gen. supt.; J. D. Shilling, Jr., supt. of mines; D. D. Moffatt, cons engr. of mills; F. G. Janney, gen.

supt. of mills; Roy Hatch, supt. Arthur plant; H. C. Goodrich, chief engr. of mines and milling.

Inc. June 4, 1903, and reorganized April 30, 1904, in New Jersey. Cap. \$25,000,000; shares \$10 par; originally, \$4,500,000; capital successively increased October, 1905, to \$6,000,000; February, 1907, to \$6,600,000; January, 1908, to \$7,500,000; January, 1910, to \$25,000,000; issued, \$16,244,900. The new stock issue, 1910 amounted to \$8,282,240, of which \$3,100,000 in stock was given for the property of the Boston Consolidated Mining Co.; \$4,445,120 or 445,512 shares, were given for 1,000,500 shares of Nevada Consolidated Copper Co.; \$734,370, or 73,437 shares, were sold for cash, at a premium of 400% for \$50 per share, and 275 shares were issued for the conversion of \$5,500 of bonds at par. Shares are listed on the New York, Boston and Paris Stock Exchanges. D. A. Crockett, 120 Broadway, New York, and American Trust Co., Boston, transfer agents; Guaranty Trust Co., New York, and Old Colony Trust Co., Boston, registrars. Annual meeting, fourth Friday in April.

Range of shares during 1920 was \$80¾ high and \$44½ low. Sales on N. Y. Stock Exchange totaled 552,800 during 1920; range in 1921 was high \$66½ and low \$41½, with sales of 801,900 shares.

In February, 1921, company took an 8.2% interest, \$5,280,000 total amount, in the Copper Export Association's \$40,000,000 8% bond issue.

In 1921 there was a deficit after dividends of \$1,714,318 first quarter, and \$1,256,475 for second quarter.

Comparative General Balance Sheet: Utah Copper Co. and Bingham & Garfield Ry. Company.

Holdings.

The company controls the Nevada Consolidated Copper Co., owning slightly more than 50% of the outstanding stock, having exchanged its own stock on the basis of 1 share of Utah for $2\frac{1}{4}$ shares of Nevada. The company owns, through stock ownership, the Bingham & Garfield Railway Co., described later. During 1910 the Utah Co. absorbed the Boston Consolidated Mining Co. and the Shawmut Consolidated Copper Co.

History: The mining property now embraced in the holdings of the Utah Copper Co. had been known to be copper-bearing for many years, but was supposed to be too low-grade to pay and was not taken up for active development until the organization of the original Utah Copper Co. in 1903. Previous to that time, any work done was in hunting for the rich copper fissures and fault planes. In the spring of 1903, the Utah Copper Co. acquired control of the property, and began the construction at Copperton of a 300-ton experimental concentrating mill.

Property: the Utah Copper Co. has the second largest developed ore-body in the world, being only exceeded by that of the Chile Copper Co. The entire mineralized area of the property is covered by a thickness of about 115' of low-grade and oxidized material that cannot be profitably treated by standard methods of concentration. At the inception of development, it was determined to remove the oxidized over-burden entirely, leaving the sulphide ore uncovered, so that it could also be handled by steam shovels at a very low cost. This work, commenced August, 1906, has been prosecuted vigorously so that by the end of 1920, there had been removed from the property 53,044,034 cubic yards of capping and 90,476,900 dry tons of ore.

The largest amount of capping and ore ever handled in one day was 84,229 tons, and the maximum ever handled in any one month was 2,526,858 tons. The daily output increased from 300 tons a day in July, 1904, to an average of 37,500 tons daily in 1917, with a record of 47,000 tons of ore.

Geology: orebodies consist of an altered silicious porphyry, containing small grains of sulphides, very uniformly disseminated throughout the mass, both in fracture seams and in the body of the rocks, and the ore averaging about 1.37% copper, 0.10 oz. silver and 0.012 oz. gold. The primary copper mineral is chalcopyrite, but as a result of the oxidization of this mineral and the secondary deposition of others, practically all of the sulphide minerals of copper are now present, the predominating one being chalcocite. There are three zones in this deposit, as follows: the oxidized zone, about one-tenth of which contains carbonates of copper in sufficient quantity to render the material payable by leaching with a dilute solution of sulphuric acid; second, the zone of secondary enrichment, in which is found all of the concentrating sulphide ore of commercial value; and third, the zone of primary material, which is too low-grade to be profitable by any methods of handling and treatment now known.

Total area of lode mining claims in Bingham is 851 acres, lying on both sides of Bingham canyon above the town, and including the mine; within the boundaries of this tract development has shown that at least 226 acres contain mineralized porphyry of commercial value. The entire porphyry area has not yet been developed, and the maximum thickness of the orebody in the 226 acres has not been fully demonstrated; but calculations show that previous to January 1st 1920, there had been developed in

the property, 454,607,700 tons of ore, averaging 1.355% copper, of which quantity 270,000,000 tons were classed as fully developed, and 184,607,700 tons as partly developed. There was mined from the entire property prior to January 1, 1921, a total of 90,476,900 tons of ore, averaging 1.374% copper; total reserves remaining, 364,130,800 tons averaging 1.35% copper.

Development: in making the calculations to determine the tonnage of ore and its average assay, there were used 113,274 assays, representing 34,490' of diamond drill and churn drill holes, 291,449' of drifts, raises and winzes, and 140,565 linear feet of steam shovel cuts, or a total of 466,504' of development work. The orebody, as at present developed, has a maximum length of a little over one mile, and a maximum width of more than one-half mile. Further development of the property will undoubtedly add materially to its ore reserves.

The total area of land other than lode claims owned by the company, December 31, 1920, is 11,204 acres, consisting of 1,201.87 acres near the mouth of Bingham Canyon, part of which was formerly used in connection with the operation of the Copperton plant, 675.69 acres in Utah and Davis counties, and 9,326 acres at the Magna and Arthur plants. The lands to be used solely for impounding tailing from the concentrating plants aggregate about 6,000 acres.

The porphyry deposit on the westerly side of the canyon is worked by steam shovels. There are 19 steam-shovel levels from Sub "A" to "V" inclusive; intermediate levels "B," "C," "D" and "E" have also been cut out. The main level is called "A" and the one below, it, Sub "A." Each of these levels above "A" is connected with the bottom or main level, with standard gauge tracks constructed on maximum 4% grades, so that the steam-shovels load the ore directly into railroad cars which are hauled by 50-ton saddle tank and 76-ton side tank engines to the main yard and assembled into trains to be transported to the mills. From Sub "A" to "V" level, the difference in elevation is 1,446', and from Sub "A" level to the top of the mountain it is 1,600'. The high face of the ore extending from "A" to "F" level, across which the intermediate levels have been cut out, has a vertical height of about 240'. From "F" to "V" level the difference in elevation between the levels varies from about 68' to 100', depending upon certain topographical conditions which control the elevations of the stripping lines extending from the steam shovel levels to the waste dumps.

No work has yet been done on the easterly side of the canyon except development by drifts, raises, cross-cuts and churn drill holes, with a small amount of underground stoping.

Equipment: at the mine at the end of 1920 included 94 4-yard narrow gauge dump cars; 95 6-yard standard gauge wooden dump cars; 110 12-yard all steel Oliver dump cars; 50 30-yard all steel Clark dump cars; 6 narrow gauge 4-wheel flat cars; 4 narrow gauge 8-wheel flat cars 8 standard gauge flat cars; 21 standard gauge steam shovels; 45 standard gauge switching locomotives; 8 narrow gauge switching locomotives; 1 engine tender; 3 passenger coach; 1 combination crane and shovel; 1 wrecking crane; 2 Jordan Spreaders; 1 tool car; 4 Star and 7 Keystone drills, and 7 air compressors, having a combined capacity of 12,000 cubic feet of free air per minute.

The stripping is removed from the ore and carried to waste dumps in adjacent gulches, and the ore loaded into railroad cars to be transported to the mills. The rock is broken by blasting before removal by the steam shovels, holes being bored by piston drills operated by air. The holes are sprung and prepared ahead of the steam shovel operations, and are loaded and shot at such times as are required by the individual shovels on the different levels. An average of 1 pound of powder has been required to break down about 5 tons of rock ready for the steam shovel to load. There are 52.87 miles of standard-gauge track in and around the mines, 2.61 miles of narrow-gauge

and 1.57 of three-rail track, a total of 57.05 miles, all owned by the Bingham & Garfield Railway Co.

The shovels and locomotives at the mine are operated by steam, but extensive use is made of electric power received from the Utah Power & Light Co. Buildings at the mine include machine and carpenter shops, car repair shops, compressor buildings, storehouses, office buildings, club house, boarding houses and other minor structures.

Mills: company had three mills, one at Bingham canyon, now dismantled, and two at Garfield, 20 miles from the mine. The 900-ton Copperton mill at Bingham canyon, the first concentrator put up by the company, is fully described in Volume VIII, Copper Handbook. It was closed permanently August 1, 1910, and all machinery that was suitable was sent to the Arthur mill for use there.

The finely disseminated copper glance necessitates fine crushing with the formation of slime and a tailing loss of about 0.25% copper. Concentration is about 18 into 1.

Magna Plant.

The Magna mill was the first large plant of the porphyry copper concentrators to be built and is located near Garfield, 4 miles E. of the Garfield smelter, and about 1 mile E. of the Arthur mill of the Utah Copper Co. It is connected with mine and smelter by the Bingham & Garfield, and the Denver and Rio Grande railways.

The main building is 500'x600', and contains two 10,000-ton units of 6 sections each, each unit being 300'x500' in size and the whole mill occupying a site of about 20 acres. Milling was begun in June, 1907, with two sections and the consecutive sections were put into service as finished, the twelfth, or final section of the mill, being started in November, 1908.

In 1918 the Magna mill treated an average of 18,150 tons daily. It is divided longitudinally into three departments for coarse crushing, fine crushing and concentrating work. Additions to this plant have increased its capacity to 20,000 tons daily.

Coarse Crushing Department: consists of 2 units, having a capacity of 24,000 tons of about $\frac{1}{2}$ " size per 24 hours. Ore is received from the mine in 69-ton drop-bottom steel cars and is discharged into a 12,000 ton bin from which both 8" oversize and $2\frac{1}{4}$ " undersize are delivered to units Nos. 1 and 2.

Unit No. 1 is equipped with two No. $7\frac{1}{2}$ gyratory crushers and 4 sets of 54"x20" Garfield rolls; and unit No. 2 with two No. $7\frac{1}{2}$ gyratory crushers, 4 sets of 72"x20" and 4 sets of 54"x20" Garfield rolls, and 4 screening towers with 16 Mitchell vibrating screens. Each unit is equipped with four 36", one 42" and two 30" belt conveyors to distribute ore in fine bins, and with a 15-ton, 3-way motor crane.

Fine Crushing and Concentrating Departments.—The fine bin (13,000-ton capacity) is equipped with twelve 72" steel apron ore feeders, each supplying one of 12 similar sections. Each section consists of: Two $37\frac{1}{2}$ " x15" Garfield rolls and one 24" elevator equipped with 6 Colorado impact screens for dry crushing to approximately 10 mesh; three 6' Chilean mills, twelve 4'x12' Garfield roughing tables, four No. 5 Wilfley finishing tables, two 36" elevators, one 8' primary and one 6' secondary drag classifiers and three 7'x10' tube mills for wet grinding to approximately 48 mesh; four 5-compartment Richards-Janney classifiers, 20 Callow settling cones and ninety-six 6' Johnston vanners. Five-ton, 15-ton and 50-ton, 3-way motor cranes serve the rolls and Chilean mills, elevators and tube mills respectively.

Miscellaneous buildings at the Magna plant consist of machine shop, boiler shop, blacksmith shop, carpenter shop, tin shop and electric shop, all thoroughly equipped for making any necessary repairs. Pump stations, a large warehouse, transformer houses, ice house, main office, time office, dormitory, mess-houses and cottages for officials also exist.

The Leaching Plant.

This plant, located near the Magna mill, completed during 1917, treats the oxidized and partially oxidized capping overlying the sulphide ore, which carries approximately 15 pounds of copper per ton, of which about 12 pounds are soluble in sulphuric acid.

Ore from the mine at Bingham is discharged in crusher building where it is reduced to 15% on $\frac{1}{2}$ " mesh screen by two No. 6 Gates gyratory crushers, style "K," and two 72"x20" Garfield rolls. A noticeable feature in the crushing plant is the absence of any elevators; all intermediate crushing products being handled on incline conveyors.

The crushed ore is charged from loading bridge into twelve 100'x50'x18' deep mastic lined concrete leaching vats equipped with suitable filters in bottoms.

The vats of ore are leached in rotation with a sulphuric acid solution containing a maximum of 1½% free acid.

The leaching solution is handled and circulated by means of 6" centrifugal antimonial lead pumps and air lifts. The leaching solution, containing from .2% to .3% free sulphuric acid, and the copper, in the form of sulphate, is run to three 7'x10' tube mills, placed in series, where the copper is precipitated on scrap iron. The cement copper is discharged into settling launders, drained and shipped in cars to the smelter. The solution before wasting is circulated through precipitation launders for final cleaning. The tailing is discharged from the vats by an unloading bridge equipped with a 10-ton grab bucket into 30-yard dump cars and hauled away by locomotives to the waste dumps.

Arthur Mill

The Arthur mill was built by the Boston Consolidated Mining Company at a cost of upwards of \$1,500,000. It was remodeled to a capacity of 7,800 tons of ore daily in 1916, by replacing the Nissen stamps with rolls and Chilean mills to correspond to the practice at the Magna mill. Later additions have increased this capacity to 16,000 tons daily.

The ore is brought to the head of the primary crushing department by railroad cars of 69 tons capacity, which are spotted on a car dumper by a mule haulage system; this equipment having a capacity of 30 cars per hour.

The railroad delivers the railroad cars in the electric mule haulage yard which is constructed on a 1.50% down grade. The car riders uncouple the cars and drop them down the grade beyond the mule pit, where they are spotted on the dumper by the mule haulage system. The loaded car, as it is spotted on the dumper, kicks off the empty car which runs down a grade back of the dumper and up a kick back track, where it reverses its direction and continues on down into the empty yard located opposite the car dumper and mule haulage tracks. Four men are required to ride these cars from the mule haulage tracks across the dumper and back again.

The dumper discharges over a grizzly which separates in plus and minus 6" product, the over-size going to a No. 27 gyratory crusher, the largest type made. The undersize and crusher product are conveyed to the secondary coarse crushing department by two 60" conveyors, fed by four 60" pan feeders. The above department contains a 60-ton crane, with 10-ton auxiliary hoist.

The secondary coarse crushing plant consists of three No. 8 gyratory crushers, six sets of 72"x20" Garfield roughing rolls, two elevators, twelve conveyors for circulation and transporting the ore to the fine crushing department, and 25-ton crane. The capacity is 16,000 tons of approximately $\frac{3}{4}$ " size. Adjacent to this department is a 9,000-ton coarse ore bin, with overhead tracks, which is used when the primary crushing plant is down for repairs. This bin has six conveyors and one hundred and two steel apron feeders for transferring the material to the secondary coarse crushing department.

The fine crushing department has a 12,500-ton capacity ore bin, equipped with 26 steel apron feeders. In this department the ore is crushed dry to approximately 10 mesh by 25 sets of 37- $\frac{1}{2}$ "x15" and 1 set of 54"x20" Garfield rolls. Screening and circulation is done with the help of 63 impact screens, 6 whip-tap screens, 6 Mitchell vibrating screens and 13 elevators. It is then crushed wet to approximately 48 mesh by 26 Chilean mills and twenty-eight 7'x10' tube mills; 26 elevators; 26 drag classifiers; fifty-two 4-compartment and fifty-two 5-compartment Richard Janney classifiers. The concentrate department has Garfield roughing tables, No. 5 Wilfley finishing table and two-hundred-eight 6' vanners.

Miscellaneous buildings at the Arthur plant consist of substations, machine shop, boiler shop, oil house, compressor building, warehouse, carpenter shop, foundry, pattern storage building, general offices, telephone and emergency hospital building, dormitory, mess house, lumber shed, heating plant, assay office, time office, scale house, and houses for officials.

Initial Water Supply: Water sufficient for all mill operations can be received from either of two separate sources of supply known as the main supply and the auxiliary or emergency supply.

The main water supply is brought through the Utah and Salt Lake canal from Utah Lake, 40 miles from the plant; 100 sec. ft. is delivered through this canal to pumping station No. 2, in the Magna mill yard at the canal terminus. The equipment in this plant consists of two 10,000 gal. and one 5,000 gal. capacity single stage centrifugal pumps, all pumping direct into the Magna 5,500,000 gallon concrete-lined reservoir above the Magna mill through 700 ft. of 30" wooden stave pipe against a 30' static head; three 5,000 gal. and one 3,000 gal. capacity single stage centrifugal pumps, all pumping direct to the Arthur mill, 2,000,000 gallon reservoir through 6,300 ft. of 30" and 42" wooden stave pipe lines against a 135' static head. The capacity of this plant is 25,000 gallons per minute for Magna mill and 18,000 gallons per minute for the Arthur mill, a total of 43,000 gallons per minute.

The auxiliary or emergency supply consists of numerous springs located at pumping station No. 1 and a system of storage lakes located approximately 6 miles East of the Magna plant; the water is delivered to pumping station No. 1, which is also located at the Magna plant. The equipment in this plant consists of three 10,000 gal., two 5,000 gal., two 4,500 gal., one 3,500 gal. and one 2,500 gal. capacity single stage centrifugal pumps, all pumping direct to the Magna plant reservoir against a 235' static head; and one 3,000 gal. and two 1,500 gal. capacity, two stage centrifugal pumps, all pumping direct to the Arthur mill reservoir. The capacity of this plant is 61,000 gallons per minute. Under this system, water can be relayed from the Magna plant reservoir through pumping station No. 2, to the Arthur plant reservoir.

It is believed that the water supply for the Utah Copper Co. for milling purposes is such as to make practically impossible any combination of circumstances that would necessitate the closing down of the mills or even any reduction in their capacity because of water shortage.

Bingham & Garfield Railway.

Inc. July, 1908, in Utah. Cap. \$6,515,000; \$100 par. Controlled by the Utah Copper Co., through ownership of the entire share capital.

The mileage at the end of the year 1920 is shown in the table below:

Main line and branches between and in the vicinity of

Garfield and Bingham.....	34.49 miles
Yard and siding tracks, including all the terminals.....	50.91 "
Additional tracks leased to Utah Copper Co.....	48.87 "

Total length of tracks..... 134.21 "

Production from Concentrates:

Year	Tons Treated	—Cost per Ton—			% Cu.	% Rec'd
		Mine Cts.	Mill Cts.	Total Dollar (a)		
1911.....	4,680,801	44.79	41.68	1.1725	1.51	69.53

(a) Includes transportation, all fixed, general and maintenance charges.

(b) After making allowances for smelter deductions, and crediting value of gold and silver recovered, but not including miscellaneous income, (c) Excluding Federal taxes, and without credit for gold, silver or miscellaneous income. In 1919, ore delivery cost 30.40¢ per ton and in 1920, 25.91¢.

Copper is sold through the new selling agency of Guggenheim Bros. Precious metals in 1919 were 28,907 oz. gold and 263,721 oz. silver and in 1920; this production was 27,411 oz. gold and 257,516 oz. silver.

Monthly Output: gross

Dec.....	7,717,050	9,005,501	13,217,178	16,211,895

Production for 1921 was copper 24,513,894 lbs., gold 7,043 oz.; silver, 66,388 oz.; lead 22,380 lb.

Total amount of capping removed in 1920 was 2,938,299 cu. yds. The total area upon which stripping operations have been conducted was 261.68 acres and the actual area stripped was 146.34 acres.

The average cost of mining concentrating ore, including the proper apportionment of all fixed and general charges for the year 1920, Federal charges excepted, was 48.23¢ per ton, of which 12.50¢ represents charges for stripping. The actual direct cost was 35.73¢ per ton, 24.52¢ representing all charges at the mine and 11.21¢ the fixed and general charges.

Utah Copper suspended all operations on April 1, 1921, but because of its strong financial condition, it has continued to make disbursements to its stockholders, though on a reduced scale, and in spite of a shut-down expense of about \$100,000 per month.

Utah Copper is still the brightest star in the Hayden-Stone-Jackling galaxy, and its aggressive and brilliantly competent management promises to keep the company in its present enviable position.

UTAH IDAHO MINING CO.

UTAH

Mine address: Oakley, Idaho.

Officers: Ephraim Jensen, pres.-treas., F. E. Cluff, sec.; J. A. Kaufman and T. H. Southwork, directors.

Inc. in Utah. Cap. \$50,000; par 20¢.

Property: in N. W. corner of Boxelder county, Ashboro distric, Utah, shows silver ore in replacement deposits in limestone. In December, 1921, compressor and power plant were erected, and development work started. Mine adjoins the Vipont, an old producer.

UTAH LEAD & COPPER CO.

UTAH

Address: care H. M. Stonemetz, v. p., 53 State St., Boston, Mass.

Mine office: Bingham Canvon, Utah.

Officers: Carl Brandt, pres.; Harry M. Stonemetz, v. p.; J. P. McDonough, sec.; J. H. Turnbull, treas., with Geo. E. Davis, directors.

Inc. Dec. 24, 1912, in Maine, as the successor of the Bingham Copper Co. Cap. \$500,000; shares \$1 par; outstanding, 262,000 shares. Debentures \$100,000, 6% convertible; outstanding, \$37,750. Federal Trust Co., Boston, transfer agent; Paul Revere Trust Co., registrar.

Property: 13 claims, patented, about 102 acres, on the eastern slope of Carr Fork Canvon. Company also owns a one-half interest in the Diamond Extension, and one-half in the Diamond claims adjoining.

The property shows 3 fissure veins, several bedded deposits of silver-lead ore and a fissure vein of copper ore of less promise. A big outcrop near the W. end line is said to have yielded considerable high-grade gold and silver ore with lead carbonates, to former owner.

Development: by 2 tunnels, longest 1,200', and 2 shafts on the Venice claim. There are about 3,000' of workings, showing ore below commercial tenor generally, but with occasional streaks of ore assaying up to 70% lead and 15 to 30 oz. silver.

Equipment: includes a small air compressor.

Property has been under option since 1918, to the Utah Cons. Mng. Co., which see.

UTAH LEASING CO.

UTAH

Office: Room 707, Utah Savings & Trust Co. Bldg., Salt Lake City, Utah. Mine office: H. H. Adams, supt., Newhouse, Utah.

Officers: V. P. Strange, pres.; J. C. Dick, v. p.; D. R. Pingree, sec.-treas., with Herbert Salinger and F. W. Royer, directors. R. P. McDonald, auditor.

Inc. in Utah. Cap. \$30,000; shares 10¢ par; assessable; 250,000 issued. Assessment of 1¢ a share due Dec. 19, 1921.

Dividends: \$25,000 in 1916; \$47,500 in 1917; \$22,500 in 1918.

Property: a lease from South Utah Mines & Smelters, on about

1,000,000 tons of copper-gold-silver tailing at the old Cactus mine, New-house, Utah.

Equipment: one 20-ton steam shovel, 750-ton plant including two 8'x48", and one 6'x48" Hardinge mill, 2 Dorr classifiers and 2 Minerals Separation flotation units.

Electric power is obtained from the Beaver River Power Co., at 44,000 volts, stepped down to 2,200 and 4,400 volts.

Production: feed to the plant assays about .52% copper, which is claimed to be the lowest head assay in the country; concentrate assays 21% copper, 0.07 oz. gold, 2 oz. silver. In 1915, 15,530 tons ore milled produced 86,941 lb. of copper; in 1916, 160,420 gave 1,286,011; in 1917, 207,270 gave 1,575,347; and in 1918 205,000 tons ore gave 1,489,851 lb. copper.

In May, 1919, the Cactus tailings were exhausted, after 700,000 tons had been treated in 3½ years, and early in 1920, company was defeated by the lessor in a suit involving water supply.

UTAH METAL & TUNNEL CO.

UTAH

Mine office: Bingham, Utah.

Office: 85 Exchange St., Portland, Me.

Officers: Jas. E. Rothwell, v. p.; W. E. L. Dillaway, treas.-sec., with Walter B. Farmer, Wm. H. Coolidge, Henry G. Lapham, and L. E. Stoddard, directors. W. H. Hendrickson, mgr.

Inc. May 4, 1914, in Maine. **Cap.** \$800,000; \$1 par; increased from \$500,000 to \$725,000, to purchase **Bingham-New Haven C. & G. Mng. Co.**, again increased in April, 1919, to \$800,000; 750,000 shares issued; 50,000 set aside for conversion of \$375,000 7% ten-year bonds, of which \$261,000 have been issued. Bond issue was authorized April, 1919 to take over the outstanding and due bonds of Utah Metal Mng. Co., at par for old and 95% for new bonds. During 1919, 50,000 treasury shares were sold at \$4 per share.

Commonwealth Trust Co., Boston, Registrar & Transfer Co., New York, transfer agents. International Trust Co., Boston, and Empire Trust Co., New York, registrars. Annual meeting, first Monday in May. Company acquired **Bingham-New Haven C. & G. Mng. Co.**, by exchange of share for share.

Listed on Boston Stock Exchange; traded on New York Curb. Stock sold at \$1 to \$10.50 in 1915. Price range \$1¼ to \$3 in 1918; \$1 to \$5¼ in 1919; 42¢ to \$3 3/16 in 1920; \$0.95 to \$2.87 in 1921; \$1 in Jan., 1922.

Company is a reorganization of the **Utah Metal Mining Co.**, itself a consolidation of the Bingham Central, Bingham Standard, and Bingham Metal companies.

A dividend of 50c. per share was paid in August, 1916; 80c. in 1917.

Comparative Balance Sheet, years ending December 31:

Assets.	1920	1919
Property account.....	\$1,759,996	\$1,773,754
Prepaid accounts.....	1,646	1,521
Cash.....	55,587	96,410
Supplies.....	40,241	51,665
Accounts receivable.....	6,323	22,137
Total.....	\$1,863,793	\$1,945,487
Liabilities.	1920	1919
Capital stock.....	\$750,000	\$750,000
Bonds.....	261,000	261,000
Accounts payable.....	7,519	19,601
Surplus.....	845,274	914,886
Total.....	\$1,863,793	\$1,945,487

Gross income in 1920 was \$295,327, of which \$271,003 was from ore sales. Expenses were: mining, \$70,792; on surface, \$59,368; smelter, \$101,674; taxes and administration, \$40,631; bond interest, \$18,079; and development \$58,262; total expenditures, \$348,806. An operating loss of \$53,479 and total net loss after depreciation of \$69,672.

The apex rights controversy with the Utah Cons. Mng. Co., begun in 1917, was settled out of court early in 1919, resulting in Utah Metals receiving additional mineral ground and in disposing of certain claims for trespass. Company now has unrestricted right to follow all "beddings" found on westerly part of Bingham New Haven region, downward beneath Utah Cons. ground, regardless of apex.

Property: is extensive, covering 3,539 acres, including 139 acres timber land in Bingham district, adjoining holdings of Utah Cons. and Utah Copper Co. (Boston Con.), and extending across the range to Middle Canyon, on the Tooele side. The company drove a transportation and drainage tunnel, the Big Tunnel, 11,500' through and 2,300' below the crest of the range, from near Tooele to Bingham Canyon (Carr Fork). This gives direct short transportation to Tooele and Garfield and develops a large flow—2,000,000 gals. per day—of water, part of which is sold to the Utah Copper Co., the company having an income of \$25,000 a year from this.

The Bingham or Carr Fork holdings include the Bingham Central & Bingham Standard groups, an area in which the various mineral bearing limestone beds of the camp are cut by the Saginaw-Burning Moscow and Nast veins and crossed by the Old Jordan fault. The claims on the Tooele side show similar limestones, cut by fissures, but the development work there has not thus far shown commercial orebodies, as it has on the Bingham side.

In November, 1914, the company started crosscut exploration from the jig drainage tunnel at 8,200' from the Tooele portal. In March, 1915, 1,300' from the Bingham portal, the latter work encountered mineralized ground, and on upraising 70', an orebody 25' thick was cut. Drifting disclosed a second orebody E. of and above the first, and later a third orebody, already opened and mined by the Bingham New Haven Co., was cut. At present there are 10 productive orebodies on the combined properties.

The transportation tunnel is 8x9' in the clear, double-tracked, with ½% grade. It develops the mineral bearing limestone and veins at depths of 375 to 900' below any other workings.

Development: is by two main tunnels, one the Big Tunnel is a 11,490' transportation and drainage tunnel driven from the Tooele side. A second tunnel called No. 3, is 4,000' long and cuts through B. & N. H. ground.

The ground already opened, and the orebodies found, indicate the existence of similar other deposits. A large amount of mill ore has been developed.

Equipment: includes a 450-ton mill using the Callow system of flotation. Operations during 1919 were largely confined to development work awaiting lower costs and higher metal prices; this policy was continued in 1920, mainly in ground acquired from Utah Cons. In latter year, extensions amounted to 4,311', costing \$58,262.

Development: of Bingham New Haven ground, includes tunnels with a blind shaft starting 900' from the portal of the lowest tunnel, there being a vertical distance of 1,200' between the highest and lowest workings. Mine has several miles of workings with an aerial tram, connecting with loading bins on the Copper Belt railroad.

Equipment: includes electric power, air compressor and 450-ton mill, equipped with jigs, Wilfley and Deister tables, vanners and ball mill for fine grinding.

Some portions of property are operated by lessees, and company expects to finance itself from royalties and sale of ore from development, in immediate future.

Estimates of ore reserves are not made public, or are impracticable, but management is apparently convinced that more extensive exploration will discover "more and richer ore".

Production:

	Ore, Tons	Lead, Lbs.	Copper, Lbs.	Gold, Oz.	Silver, Oz.	Gross Value
1920.....	10,181	2,390,602	159,229	24	84,605	\$ 271,003
1919.....	1,173,366	64,246	291	32,702	94,521
1918.....	1,187,114	207,059	940	61,502	190,516
1917.....	5,348,610	659,127	4,612	242,003	884,688
1916.....	71,402	6,301,670	1,761,520	17,934	388,757	1,499,268
1915.....	9,860,089	2,873,815	16,914	475,894	1,386,845

Average metal content of ore shipped in 1920 was 0.96% copper, 14.54% lead, 8.74 oz. silver and 0.07 oz. gold.

In October, 1917, a five years' contract was arranged with the International Smelting Co. for Utah Metal ore.

The Bingham-New Haven property includes 26 claims, 500 acres adjoining the Utah Consolidated on the S. E.

The ores are chalcopyrite, galena and sphalerite and the main supply is from 8 limestone beds, which strike E. W. and dip N.

UTAH METAL MINING CO.

UTAH

See Vol. XI for description. Is now the Utah Metal & Tunnel Co., which see.

UTAH MINERALS CONCENTRATION CO.

UTAH

Dead. Former address, H. Atkinson, mgr., Eureka, Juab county, Utah, with A. W. Parshall, supt.

Owned 250-ton custom concentrating mill for local ores. Company in hands of receiver in 1917, and presumably defunct.

UTAH MINING CO.

UTAH

Mine address: Fish Springs, Juab county, Utah; A. F. Rynders, sec, 77 R. St., Salt Lake City.

Property: old Utah mine, 25 miles S. of Gold Hill, a large producer of high-grade silver ores in former days. The old dumps are estimated to contain 200,000 tons of ore. Present company has built a 200-ton mill to treat this ore. Details of operation not available.

UTAH MINING, MILLING & TRANSPORTATION CO.

UTAH

See Vol. XIV for description. Went into hands of a receiver several years ago and its affairs are wound up.

UTAH NATIONAL MINES CO.

UTAH

Dead. See Vol. XIV for complete description. Company defaulted in payment of taxes, a receiver was appointed and company's affairs wound up; property reverted to original owners.

UTAH-OREGON MINES CO.

UTAH

Address: Price, Utah; John C. Forrester, pres. Levied an assessment of 1c a share, and expected to start operating its milling plant to treat a large tonnage of free-milling gold ore late in 1919.

Does not reply to requests for information.

UTAH ORE SAMPLING CO.

UTAH

Office: 820 Newhouse Bldg., Salt Lake City, Utah.

Officers: O. Raymond Knight, pres.; E. P. Ellison, v. p.; R. E. Allen, sec.-treas., with J. W. Knight and W. Lester Mangum, directors. E. G. Jensen, gen. mgr.; Frank Burgner, lencer. supt. at Murray.

Inc. Dec., 1909, in Utah. Cap. \$300,000; par \$1; 215,000 issued.

Company owns and operates two ore-sampling mills at Murray and one at Silver City, with combined daily capacity of 1,000 tons of ore.

UTAH PLACER MINING CO.

UTAH

Address: Box 204, Garfield, Utah.

Officers: Harry Grass, pres.; Theo. Peterson; v. p. H. J. Butcher, sec.-treas.-mgr.; with Ed. Helmerich, G. C. Phillips, F. T. Toms and Ed. Pearce, Jr., directors.

Inc. Feb. 19, 1917, in Utah. **Cap.** \$100,000; 10c par; 650,000 treasury shares; assessable. An assessment of $\frac{1}{8}$ c was levied April 20, 1921.

Property: 2 groups of 3 claims each, 880 acres, on Grand river, Grand county, between 7 and 22 miles S. of Cisco. Lower group is said to show 2,000,000 yards of bench gravel on sandstone bedrock with 28' average depth; carrying \$1 in gold and 46c in platinum per yd. Gravel of upper group reported to show from 20 to 80c gold per yd. and some platinum.

Idle 1918-21, except for assessment work.

UTAH-RELIANCE MINING CO.

UTAH

Office: 408 South State St., Salt Lake City, Utah. **Mine office:** Ibapah, Tooele county, Utah.

Officers: J. G. Bywater, pres.; D. B. Ralls, v. p.; Richard B. Shepard, sec.-treas. and gen. mgr., with W. A. Langford and Samuel Divett, directors.

Inc. 1908, in Utah. **Cap.** \$5,000; shares 1c par; assessable; issued, \$3,000, fully paid.

Property: 6 claims, unpatented, 120 acres, about 45 miles from a railway, showing porphyry and limestone.

Development: by a 175' tunnel and a 100' shaft, latter showing ore assaying up to 16% copper, 4 oz. silver and 40c gold per ton.

Company doing assessment work only.

UTAH REVENUE MINES CORPORATION

UTAH

Address: 527 5th Ave., New York

Inc. in Delaware. **Cap.** \$4,000,000; par \$1; outstanding, 3,000,000 shares. Holds 220,000 shares of capital stock of East Hecla Mining Co.

Property: 66 claims, 22 patented, about 1,320 acres, in Pine Grove Canyon, Beaver county; also 13 claims, unpatented, 200 acres, in American Fork district. The Pine Grove group shows quartzite cut by fissure veins with lead-silver-gold ore. There is a series of parallel and intersecting fissures caused by strong E.-W. faulting.

Development: several tunnels, longest about 600', and shafts, deepest 200', said to show considerable ore mainly concentrating. Most of this work was done several years ago.

UTAH SILVER LEAD MINES CO.

UTAH

Mail returned from Walker Bank Bldg., Salt Lake City. J. H. Garrett, mgr.

Cap. \$250,000; 25c par; issued 600,000 shares.

Assessment of $\frac{1}{2}$ c a share, delinquent Oct. 13, 1921.

Property: 11 claims, 7 patented, in Morgan Argenta district, 7 miles from U. P. R. R. in Morgan county, said to have yielded lead-silver ore to value of several hundred thousand dollars in earlier years.

Present management has a bond and lease on property, from the Carbonate Hill Mng. Co., royalty paid to be applied on purchase price.

Development: Silver Zone and Blacksmith tunnels and extensive old workings now caved; new company has advanced the Silver Zone tunnel several hundred feet, and while doing this work shipped about 1,000 tons of ore assaying from 15.4% to 26% lead and from 3 oz. to 6.7 oz. silver. Management estimates 10,000 tons ore blocked out in this tunnel by present work. On the opposite side of the mountain from the Silver Zone tunnel, the Blacksmith tunnel, driven 1,000', will tap the Silver Zone deposit several hundred feet below present workings, and will be the main haulage tunnel of the mine.

Company sold \$25,000 stock in 1918, to provide money for a 4,000' aerial tram from Blacksmith tunnel to a place down the mountain where it will be possible to load ore on wagons.

UTAH SILVER REEF MINING CO.

UTAH

Controlled by The Alvarado Mng. & Mfg. Co., address, 347 Madison

Ave., New York City, or Frank C. Morehouse, pres., 681 So. Catalina St., Los Angeles, Calif.

Officers: Frank C. Morehouse, pres.; A. J. McQuatters, v. p.; Rich. F. Parker, sec.-treas.; with Alex. Coldbath and Thos. Homer, directors.

Inc. 1920, in Delaware **Cap.** \$1,000,000; par \$1; 150,000 shares issued.

Property: 114 claims, 2,300 acres, in Harrisburg district, Washington county, adjoining Silver Reef Cons. Claims cover about 4 miles of the ore-bearing sandstone (or reef) and include several mines that were early-day producers; ore exposures show 8 to 25 oz. of silver.

Reported September, 1921, that active development is contemplated in near future.

UTAH STANDARD MINES CO.

UTAH

Address: H. C. Hansen, Logan, Utah.

Officers: H. C. Hansen, pres.; Oscar Borkman, v. p.; O. W. Hansen, sec.-treas.; with A. W. Hyer, Chas. G. Hyde, Wm. Cook and Chas. W. Hansen, directors.

Inc. Sept. 19, 1916, in Utah. **Cap.** \$10,000; par 1c; 416,601 treasury shares; assessable, but only when sanctioned by 2/3 of outstanding shares. Transfers made at Logan. Annual meeting, 2nd Monday in June.

Property: 18 claims, 360 acres, in Cache county, 3 miles E. of Hyde Park and 6 miles N. of Logan, show silver-lead ore, in fissure veins and in limestone-quartzite contact, said to assay 75% lead, 25 oz. silver, \$2 gold and 5% copper.

Development: by 2 tunnels, 200 and 1,000' long, with maximum back of 250'.

Mine in development stage; \$4,000 expended in 1920.

UTAH STEEL CORPORATION

UTAH

Address: Midvale, Utah. M. S. Rosenblatt, gen. mgr.

Inc. 1914, in Utah. **Cap.** \$5,000,000, increased from \$2,500,000, Sept. 3, 1921; 50,000 shares preferred, par \$100 and 50,000 shares common, par \$100. New preferred stock offered at par, with bonus of one share common.

Company produced 6,000 tons steel monthly in 1921. Ore comes from mines in Iron county, 21 miles from Lund. Plant to be enlarged to yield 30,000 tons steel monthly, 1922, and railroad built from Lund to mines.

UTAH-UNITED COPPER CO.

UTAH

Absorbed by **Beaver Copper Co.**, which see. Described in Vol. XIII.

UTAH ZINC CO.

UTAH

Office: 312 Dooly Bldg., Salt Lake City. **Mine address:** A. A. Wetterstrom, mine supt., Tecoma, Nev.

Officers: F. C. Richmond, pres.; Jas W. Wade, v. p.-mgr.; L. D. Foreman, sec.; M. L. Sowles, treas.; with A. L. Hoppaugh, directors.

Inc. Dec. 1919, in Utah. **Cap.** \$400,000; \$1 par; 200,000 treasury shares; assessable. Bonds \$250,000 authorized, increased in January 1921 from \$125,000; \$60,000 outstanding. Transfers made at company's office; McCormick & Co., Salt Lake City, registrar. Annual meeting 3rd Sat. in January. Assessments of 10c a share, delinquent, Dec. 19, 1921, and March 11, 1922.

Company owns a zinc-oxide plant at Murray, Utah, 6 miles S. of Salt Lake City, erected at a cost of \$400,000 and ready to operate in fall of 1920. The Wetherill process is in use and present capacity is 40 tons per day.

Properties: a silver-lead-zinc mine under lease from the Tecoma Cons. Mng. Co., in the Tecoma district Elko county, Nev., 2½ miles from Tecoma on the S. P. R. R. Was first opened in 1860, and is said to have produced \$1,000,000 of high grade silver-lead ore. Orebodies occur as replacements in limestone, and silver-lead ore carrying 30% lead with 8 oz. of silver, 3' wide, is said to be exposed.

Present management is particularly interested in the lead-free zinc carbonate ores, averaging 20% zinc, which occur in connection with the silver-lead deposits.

Development: by tunnels, 650' and 850', with maximum back of 500'; total workings, 3,000'.

Company is also operating in the Erickson district, Tooele county, Utah, and, among other custom ores, will receive shipments of lead-free oxidized zinc ores from mine of the Scranton Leasing Co. at North Tintic, Utah.

Although advertised as buyers of zinc carbonate ores, production of zinc-oxide has not as yet begun.

UTANA MINING CORPORATION

UTAH

Address: F. H. Evers, sec., 201 Felt Bldg., Salt Lake City, Utah. Assessment of 1c a share levied Jan. 3, 1922.

VALDASIA MINING CO.

UTAH

Officers John W. Robinson, pres.; E. de Larry, v. p.; Patrick T. Henry, sec.-treas., with Wm. Shea, directors.

Inc. in Utah. **Cap.** \$25,000; 1¢ par. Columbia Trust Co., Salt Lake City, registrar and transfer agent.

Property: 22 lode claims, 2 patented, 400 acres, in Ohio mining district, Piute county, 5 miles S. W. of Marysville.

Development: by 400' shaft, 355' and 600' tunnels, said to expose 3 quartz veins. The main tunnel is to be lengthened to 1,200'.

VALLEY VIEW MINING CO.

UTAH

Address: 4725 S. State St., Murray, Utah. Albert Glover, Jr., sec. Sandy, Utah. Levied an assessment of \$2 per 1,000 shares. February 17, 1919.

VERDUN MINING CO.

UTAH

Address: Box 1, Park City, Utah.

Officers: W. J. Buck, pres.; J. L. Kearns, sec.; R. T. Kimball, treas., with C. F. Wherrit, and Geo. Evans, directors.

Inc. 1917, in Utah. **Cap.** \$50,000; 5c par; issued 400,000 shares.

Property: 5 claims and lease and bond on three others in Park City district, said to show silver, copper, gold ore in a contact deposit, assaying 2% copper, and 2½ to 12 oz. silver per ton.

Development: 250' tunnel. Property is a prospect.

VICKSBURG GOLD AND COPPER CO.

UTAH

Mail returned from Milford, marked "Out of business." Mine was leased June, 1916, to United States Mines Operating Co.

Property: 5 claims in Star district, near Milford, Beaver county, covering 4,000' of limestone belt cut by ore-bearing fissures.

VICTOR CONSOLIDATED MINING CO.

UTAH

Inactive. **Mine office:** Eureka, Juab county, Utah.

Officers: J. S. Wells, pres.; A. W. McCune, v. p.; J. A. Groesbeck, sec.; W. S. McCornick, treas., with J. H. Brown, directors. Vivian McCune, gen. mgr.

Inc. 1903, in Utah. **Cap.** \$375,000; shares 50c par; all issued; assessable, with 5 assessments levied and fully paid. Stock is listed on the Salt Lake Exchange. Prices: 3-3¼c. in 1918; 3-10½c. in 1919; 3-3¼c. in 1920; 2-2¾ in 1921, to June.

Property: 5 claims, 38 acres, patented, including the Victor and Boss Tweed mines, carrying gold and lead-silver-bearing copper ore, developed to depth of 800'. The mine has been in the hands of lessees since 1909. Shipments reported to run 7% copper and 8 oz. silver per ton. No recent report.

VICTORIA CONSOLIDATED MINING CO.

UTAH

Owned by Bingham Mines Co., which see.

VICTORIA GOLD MINING CO.

UTAH

Care Mrs. R. S. Robertson, sec.-treas., 1706 E. 2nd South St., Salt Lake City, Utah. Dr. A. A. Kerr, pres.; E. W. Hall, v. p.

Property: 8 claims, patented, near Gemini mine at Tintic.

Development: 600' incline shaft and 400' tunnel opening up a large body of mangiferous iron ore carrying lead values.

Stockholders' meeting was held in December, 1918, for the purpose of increasing company's capitalization. In 1919, E. J. Raddatz obtained an option on the property and work was reported resumed with a few men.

Reported, fall of 1920, that drifting from bottom of shaft had begun.

VICTOR MINING CO.**UTAH**

Address: 168 K. St., Salt Lake City, Utah.

Officers: C. R. Greene, pres. and gen. mgr.; Lee Case, v. p.; C. Fred Greene, sec.-treas., with E. C. Davies, Jr., directors.

Inc. in Utah. Cap. \$20,000; 5c par. Listed on Salt Lake Exchange.

Property: adjoins the Cardiff in the Alta-Cottonwood district. After driving a crosscut work was stopped owing to war conditions. In 1919, the company started development work through the Victor crosscut, to be continued (1921) to cut the limestone-quartzite contact.

Property: examined by J. Fewson Smith, R. M. Crocker and H. Hirst.

VIPONT MINING CO.**UTAH**

Address: W. A. Wilson, sec.-treas., 406 Dooly Block, Salt Lake City, Utah. **Mine address:** Oakley, Idaho.

Property under bond and lease to **Vipont Silver Mng. Co.**, which see for description.

VIPONT SILVER MINING CO.**UTAH**

Mine address: Frank Wardlaw, gen. supt., Oakley, Idaho.

Property: 52 patented claims, 920 acres, in Ashbrook district, N. W. corner of Boxelder county, held under bond and lease from Vipont Mng. Co. (q. v.), includes the old Vipont mine. The ore is a replacement deposit in siliceous black limestone, carrying native silver and sulphide, the latter predominating; ore is largely of milling grade. Mine has been known for over 50 years and has been a considerable producer.

Development: by a 1,600' main adit and total workings of 10,000'. In 1921, new tunnel was 650' long and expected to cut mineralized zone April or May, 1922, at 700' depth, connecting with shaft being sunk from "A" level.

Ore Reserves: said to have a large tonnage of ore, assaying 20 oz. silver and \$1.80 gold per ton.

Equipment: includes 300-h. p. engines, compressor 4,200' aerial tram, etc. A flotation mill, built in 1919, is being enlarged to 175-tons daily capacity in 1922. Electric power is used; 250 men employed, 1921.

Production: in 1918, test shipments were made; none in 1919, as mill was under construction. Production for 1920 was approximately \$500,000.

VOLUNTEER MINING CO.**UTAH**

Letters returned from last address. Milford, Beaver county, Utah.

Officers: W. C. Albertson, pres. and gen. mgr.; W. H. Havenor, v. p.; S. G. Cole, sec.; H. E. Havenor, treas., asst. sec. and engr., with Geo. Havecamp, directors, at last account.

Inc. in Utah. Cap. \$50,000; shares 10c par; non-assessable; issued \$25,550. Annual meeting, second Monday in May.

Property: 6 claims, unpatented, 600 acres, in the North Star district, seven miles from the Salt Lake Route. Claims show contact deposits between limestone and intrusive porphyry. The mine has only two 12' pits and a 70' tunnel. Company reported in 1916-17, operating a lease on the north end of the Lakeview Mining Co.'s property. No later information.

WASATCH BONANZA MINING CO.**UTAH**

Officers: Burdell Davis, pres., Provo, Utah; Wm. Davis, v. p.; Brigham Johnson, sec.-treas.; J. M. Buckner, Geo. A. Storrs, directors.

Inc. May, 1916, in Utah. Cap. \$10,000; 1c par.

Property: 4 claims, the Mavflower group in Decker Canyon, near Charleston, Wasatch county, Utah. No recent information.

WASATCH MINES CO.**UTAH**

Office: 713 Judge Bldg., Salt Lake City, Utah. **Mine office:** T. W. Blake, supt., Alta, Salt Lake county, Utah.

Officers: A. H. Cowie, pres.; A. C. Ellis, Jr., v. p.; W. O. Williams, sec.-treas., with H. G. Williams, W. S. Cooper and L. K. Cowie, directors.

Inc. Feb. 8, 1913, as a merger of the Columbus Consolidated Mining Co., Flagstaff C. M. Co., and Superior-Alta Mining Co. **Cap.** \$1,000,000; shares \$1 par; issued 358,905 shares; assessable, limited to two 5c levies a year. Consolidation of these properties was effected on the basis of 160,000 shares for Columbus Consolidated Co., 100,000 shares for Flagstaff Co., and 40,000 shares for Superior-Alta. Stock is listed on the Salt Lake Stock Exchange. McCornick & Co., Salt Lake City, registrar. Annual meeting, second Thursday in June.

Property: 60 claims, 40 patented, about 900 acres, and millsites at Tanner's Flat and at the mouth of Little Cottonwood canyon, on the E. flank of the Wasatch mountains.

Geology: claims show a number of fissure veins cutting through limestone, shale and quartzite; also numerous bedded and contact deposits between limestone and quartzite. The bedded deposits contain the principal orebodies, which range from 30 to 100' in width, several hundred feet long, and carry up to 11% copper, 18% lead, 15% zinc, 66 oz. silver and \$4 gold per ton. Outside of the shoots the ore is generally pockety and mainly below payable tenor.

The Flagstaff group carries several ore channels, one of which is traceable 2,000' and developed by 5,000' Tom Moore tunnel. This tunnel also cuts 6 smaller veins and has a 450' crosscut to the N. E., with about 13,000' of workings. Other workings include the 500' Burgess tunnel, 1,200' Burnswood tunnel, 1,200' Flagstaff tunnel, and the 700' Flagstaff shaft. The mine was a notable producer of silver-lead carbonates in early days.

The Columbus Consolidated group shows a vein, known as the Braine fissure, of about 12' average width, opened by 2 tunnels, 1,250' apart, on practically the same level.

Development: by long drainage tunnel costing several hundred thousand dollars and about 3 miles of workings, all above the tunnel level. Work above the tunnel level proved disappointing and the management has concentrated all energy on the deep drainage tunnel, which will make deep mining easy and profitable: the tunnel is from a few hundred up to 1,500' below other properties in the district.

In 1920, a crosscut was driven from drainage tunnel for 500' to intersect the Cardiff contact; from here a 140' raise connects with the Columbus 400' level, unwatering the workings. Reported that good ore was exposed at the contact.

Company, in June, 1920, sued the Cabin Mining Co., alleging that ore to the value of \$15,000 had been illegally extracted by the latter from Wasatch ground.

A Pelton water wheel works under a head of 494', developing 660-h. p. which is transformed into electricity and carried to the mine by a 4½-mile transmission line. At the mine there are four 25-h. p. hoists good for 600' each, 10-drill Nordberg and two 5-drill Ingersoll-Sergeant air compressors, a machine shop and a sawmill.

The 150-ton concentrator is equipped with a Gates gyratory crusher, 2 sets of Rogers rolls, six 3-compartment jigs and 7 Wilfley tables, the mill putting about 4 or 5 tons into 1. A cyanide unit was installed in 1915.

Small shipments were made in 1918 and 1919, but in 1920 only development work done; shipping regularly for first time in 1922.

Production:

	Gold, oz.	Silver, oz.	Lead, lb.	Copper, lb.	Zinc, lb.
1921.....	11.84	20,082	62,160	54,881	73,708

The gross yield was \$23,536, with total expenditures, \$25,244.

Company derives sufficient funds to cover operating expenses from the

sale of electric power and compressed air to most of the mines in the district.

WASATCH UTAH MINING CO.**UTAH**

Dead. Company probably out of business as mail was returned, 1919 from former addresses: Kearns Bldg., Salt Lake City, and mine office, R. D. No. 4, Sandy, Utah. Fully described in Vol. XIV.

WEDGE GOLD MINING & MILLING CO., THE**UTAH**

Mine address: Marysvale, Utah.

Office: M. L. Grovenor, 1134 W. 7th South St., Salt Lake City, Utah.

Officers: E. P. Mowers, pres.-gen. mgr.; N. W. Sonnedecker, v. p.; M. L. Grovenor, sec.-treas., with E. J. Schenck and K. D. Schenck, directors.

Cap. \$300,000; shares \$1 par; all outstanding. Assessment No. 2, of $\frac{1}{2}\epsilon$ levied Dec. 10, 1920.

Property: near head of Bullion canyon, 10 miles S. W. of Marysvale, Piute county. Mine contains a gold-bearing quartz fissure vein in latite; dip 15° S. E., strike N. E.-S. W. Orebody varies from $\frac{1}{2}$ " to 20" in width. Mine has been developed and worked chiefly under lease. Workings include a shaft 400' adit and 200' of drifts. Shipments are of high-grade ore only.

Shipments of very rich gold ore were made by lessees in 1918 and 1919. No information since 1920.

WESTERN MINING & MILLING CO.**UTAH**

Is a subsidiary of the Homestake T. & C. Co., which see.

Officers: J. H. Hurd, sec., 219 Douglas Ave., Salt Lake City. Controlled by John B. Taylor, 521 Atlas Block, Salt Lake City, Utah. E. D. Haskins, v. p.

Inc. 1897, and reorganized 1905 in Utah. **Cap.** \$300,000; shares \$1 par; assessable, with 2 assessments levied; issued \$200,000. Is a close corporation, having only 9 shareholders.

Property: 20 claims, 19 patented, 215 acres in the Pine Canyon section of the Bingham district, on the western slope of the Oquirrh Mountains. The claims are developed by numerous tunnels, and show the same limestone beds, cut by mineralized fissures, which have made the bonanza orebodies of the Utah Cons. and other properties on the east side of the range.

WESTERN MONITOR MINING CO.**UTAH**

Address: Salt Lake City, Utah. Assessment of $\frac{1}{2}\epsilon$ a share delinquent, Oct. 10, 1921.

WESTERN PACIFIC COPPER CO.**UTAH**

Office: care Wilson Bros., Brooks Arcade, Salt Lake City, Utah. **Mine office:** Callao, Juab county, Utah.

Officers: E. J. Yard, pres.; Jackson H. McChrystal, v. p. and gen. mgr.; Elroy M. Clark, sec.-treas.

Property: 320 acres, adjoin the Western Utah Copper Co. in the Willow Springs division of Deep Creek district, Tooele county, just over the Juab county line.

Development: by a shaft and 2 tunnels, 400' and 1,200' long, developing ore averaging 13% copper, 23% lead and 22% iron, with small silver and gold content. In 1914 a rich strike was reported in a south drift run from the bottom of the 250' shaft. The vein is said to be 15' wide and a 100-ton sample ran 24.4% copper. Occasionally small shipments of ore have been made.

Equipment: includes steam plant and air compressor.

WESTERN PACIFIC MINES CO.**UTAH**

Property: 12 claims at Crater Island, 25 miles S. of Lucin, said to show a 5' copper-gold-silver vein. Developed by several shafts, deepest 80'.

Examined, 1919, by A. G. Burritt, Salt Lake City.

WESTERN UTAH COPPER CO.**UTAH**

Office: Boston Bldg., Salt Lake City, Utah. **Mine address:** Owen F. Britton, Gold Hill, Utah.

Officers: Edward W. McDuff, pres.; Louis Lescault, v. p.; Frank G. Rowley, treas., Room 92, 15 State St., Boston, Mass.; Geo. R. Ramsbottom, sec., with Thos. H. Tarbox, Chas. G. A. Pfitsch, Wm. K. Tooele, Lucius H. Newell, Geo. A. Cumming and Max Wunsch, directors. Duncan MacVichie and Sam M. Soupcoff, cons. engr.

Inc. 1906 in Nevada. **Cap.** \$2,500,000; \$1 par; all issued. Guaranty Trust Co., New York, transfer agent; Bankers' Trust Co., New York, registrar.

Property: 5 groups of claims, a mill site, and 360 acres ranch land, a total of 716 acres, covering the Gold Hill, Yellow Hammer, Calaveras, Tuolumne, and Ochre groups, and the Redding Springs ranch, valuable for water.

The properties are situated in the Clifton district, Tooele county, reached by the Western Pacific and Deep Creek railroads, about 167 miles S. W. of Salt Lake City. Examined in 1917 by F. R. Weekes.

Geology: the Gold Hill claims cover a granite-limestone contact, with replacement deposits in limestone, 10-80' wide and 300' long. See "Economic Geology" for June, 1918.

Development: 700' Gold Hill shaft recently sunk from 300' level. Ore on 300' level assays about 5½ oz. silver, 13% lead, and 2% copper. On the 700' level, the vein is 62' wide. Ore is mined by shrinkage stopes, 300' to 150' levels.

The Calaveras and Yellow Hammer groups commenced shipping in 1919. The product from these groups is gold-copper-silver ore, with considerable tungsten.

A 100-ton mill, erected at Gold Hill, a mile from the Gold Hill and 3 from the Yellow Hammer mine treats low grade ore. Smelter shipments averaged about 100 tons ore daily during 1919 and 1920.

Production: shipments of 300 tons a day were made in 1921, ore being largely scorodite, containing 2-3% lead and a few ounces of silver. Company has contract for 100 tons daily of silver-lead ore to A. S. & R. Co.

WESTERN UTAH EXTENSION COPPER CO. UTAH

Address: A. E. Custer, mgr., Walker Bank Bldg., Salt Lake City, Utah, or Gold Hill, Utah.

Officers: P. S. Chambers, pres.; D. A. Rees and A. R. Custer, v. p.'s; F. A. Duerr, sec.-treas., with John Pingree, directors. C. L. Glass & Co., Pittsburgh, Pa., fiscal agents. B. T. Haywood, supt.

Inc. in Delaware. **Cap.** \$2,500,000; \$1 par. Stock transferred at company's office.

Financial statement for year ending June 24, 1918, showed total assets of \$2,652,441, of which property and development comprised \$2,518,615.

Property: 15 claims, about 250 acres, at Gold Hill, Utah, adjoining the Western Utah Copper mine, in the Clifton district, Tooele county. Examined in 1917 by F. R. Weekes. Mine is said to contain a well defined fissure in limestone and granite, over 5,000' long.

Development: by 2,500' tunnel work and 300' Mogul shaft, with good ore in drift on vein on 300' level.

WESTERN ZINC CO. UTAH

Probably dead. Was organized to operate a lease on the Lakeview Mining Co.'s property on Promontory Point, Utah, in 1916.

WEST MERCUR MINES CO. UTAH

Mine permanently closed and equipment removed. **Address:** E. J. MacNamara, pres., 11 Broadway, New York.

WEST TOLEDO MINES CO. UTAH

Office: 146 S. West Temple St., Salt Lake City. **Mine office:** Alta, Utah.

Officers: A. L. Hurley, pres.; J. A. Foley, v. p.; E. W. Hulse, sec.-treas., with A. O. Jacobson and P. M. Magregor, directors. J. A. Foley, mgr.

Cap. \$50,000; 10¢ par; outstanding 452,000 shares; assessable. Assessment No. 13, of 1¢, levied March 10, 1921. Listed on the Salt Lake Stock

Exchange. Shares 2c-11c in 1918; 3c to 14c in 1919; 2½-12c in 1920; 1¼-5c in June; 1¢ in Sept., 1921.

Property: 11 claims in the Little Cottonwood district, Salt Lake county.

Development: chiefly by the Superior and Frederick tunnels which are to be extended to cut several known mineralized veins. The Frederick tunnel is over 3,000' long. Grade of ore so far found is reported to be low. Property is in a line with Cardiff and South Hecla in both of which the overthrust contacts have proven ore bearing.

WHIRLWIND CONSOLIDATED MINING CO.

UTAH

Office: 400 W. 7th St., Salt Lake City, Utah; Harry Kreuse, supt., American Fork, Utah.

Officers: Chas. Tyng, pres.-mgr.; Frank K. Nelson, sec.

Inc. April 24, 1916, in Utah. **Cap.** \$250,000; shares 25c par; 800,000 shares issued. Listed on Salt Lake Exchange. Shares 1c-5c in 1918; ¾c-2¼¢ in 1919; ¼¢ in 1920; ¼-¾¢ in 1921. Assessment, 3 mills a share, delinquent Nov. 15, 1921.

Property: 7 claims, unpatented, 110 acres, in the American Fork mining district, adjoining the Miller Hill on the West, 20 miles from a railroad, said to show silver-lead ore.

Development: by 2 tunnels; one 1,000' long was reported to have cut some lead carbonate ore at 760' in.

Installation of machinery and power was planned and stock offered public for 7c a share in May, 1916. No recent information, presumably inactive.

WHITE STAR MINING CO.

UTAH

Dead. Merged with Selma Mines Co., Sept. 1921, shareholders receiving 2 shares Selma stock for each 3 shares White Star stock held.

Officers: J. C. Jensen, pres.; P. A. Sorensen, v. p.; Emma C. Shepard, sec.; Bernard Rich, treas., and Harry Rich, directors.

Inc. 1898, in Utah. **Cap.** \$30,000; shares 10c par; assessable; with several assessments levied.

Property: 4 claims, patented, 80 acres in Tintic district, 3 miles from Eureka, the nearest rail point. The mine has a 100' shaft and 100' tunnel.

Company optioned a new property in the North Star district, Beaver county, on which a compressor, hoist and other electrically driven equipment were installed, 1917.

The White Star mine in the Silver Island district, Western Tooele Co., is near the Kentucky-Douglas, Western Utah and Gethin Leroy mines.

WIG MOUNTAIN MINING & MILLING CO.

UTAH

Officers: George A. Storrs, pres., American Fork, Utah; George A. Brown, v. p.; J. W. Storrs, sec.-treas., John Curzon, and Jos. Thurgood, directors; F. Jardine, supt.

Inc. May, 1916. **Cap.** \$1,000,000; shares 1c par.

Property: the Jumbo group, 7 claims, on Wig mountain. Is a lead-silver prospect which was being developed in August, 1917. No recent returns received.

WILSON CONSOLIDATED MINING CO.

UTAH

Offices: 208 Brooks Arcade Bldg., Salt Lake City, Utah, and Wendover, Tooele county, Utah. Clyde H. Wilson, pres.; Frank L. Wilson, sec.-treas.

Property: located in the Clifton section of Deep Creek district, Tooele county, 45 miles from Wendover, was the only mine in the U. S. which shipped bismuth ore in 1914. Reported to have shipped one 25-ton lot of 8% bismuth ore carrying gold and silver. Ore was hand jigged to bring shipment up to 20%.

WILSON'S BINGHAM CONS. MNG. CO.

UTAH

Address: Robert E. Mark, sec., Room 902, Kearns Bldg., Salt Lake City, Utah.

Shares made assessable by stockholders vote, Nov. 21, 1921; assessment of ½c a share delinquent, Dec. 22, 1921.

WOLF MOUNTAIN COPPER CO.**UTAH****Office:** C. A. Harker, 705 Eccles Bldg., Ogden, Utah.**Officers:** C. A. Harker, pres.-treas.; P. M. Parry, v. p.; with C. R. Cole, R. A. Eliason, and A. A. Allen, directors. S. A. Holmes, sec.**Inc.** Jan. 31, 1914, in Utah. **Cap.** \$100,000; 10c par; assessable; 502,594 shares issued. Assessment No. 9, ½c a share, called, August, 1919.**Property:** 640 acres, in Paradise district, 19 miles S. of Hyrum, Cache county, said to show a N.-S. fissure vein in quartzite, 45' wide, dipping 37°, and carrying ore assaying 4½% copper, 1 oz. silver, and .01 oz. gold per ton. Examined by W. F. Mitchell, Don Maguire, J. T. Bacon and J. G. Lind.**Development:** by four tunnels totaling 930' of work; 33,000 tons of ore reported blocked out.

Small shipments of copper ore made in 1918; no later information; presumably inactive.

WOODLAWN COPPER MINING CO.**UTAH****Office:** Room 404, Boston Bldg., Salt Lake City, Utah. Mine near Brighton, Salt Lake county, Utah.**Officers:** H. W. Lawrence, pres.; E. S. Hills, v. p.; George N. Lawrence, sec.-treas.; W. J. Lawrence, mgr., with C. R. Long, directors.**Inc.** 1899, in Utah. **Cap.** \$700,000; shares 10c par; assessable. Listed on Salt Lake Exchange. Assessment No. 4 of 1c. levied Oct., 1921.**Property:** 7 claims, patented in the Big Cottonwood district, 18 miles from a railroad, show lead, zinc, silver and copper ore, whose value is mainly in lead.**Development:** to 700' level, by main tunnel, 1,650' long. There are also several shorter tunnels. Various fissures cut by the main tunnel are explored by drift raises, etc., and good ore sacked and shipped.

During 1920, ore was followed on the 700' level, 200' below the main tunnel, and 3-6" of 405 oz. silver ore cut in fissure No. 2, in raise between 500' and 600' levels.

Production: was reported for 1918, 1919, 1920 and 1921. Bonanza ore reported, 1921, 3,929 lbs. yielding \$698, and ore shipments started.**WOODMAN MINING CO.****UTAH**

Mail returned from Gold Hill, Tooele county, Utah.

E. F. Woodman, pres.; T. J. Midgley, sec.**Property:** the Frankie group, 2½ miles S. of Gold Hill, said to show low-grade copper ore.**Ore:** occurs in a granite-limestone contact, and the ore will, it is said, average 2% copper, \$1.20 gold, 2 oz. silver.**Development:** by extensive tunnel work and a shaft. In 1918, production was about 2,000 tons, and net production about \$30,000; company was a producer in 1919 also.

Company also owns the Cane Springs mine S. W. of Gold Hill, and the Alverado group E. of the town. In both groups a gold-bearing calcite vein occurs in the granite-limestone contact. The two mines have, it is said produced \$270,000. Seven men are employed at the Cane Springs mine.

YANKEE CONSOLIDATED MINING CO.**UTAH****Office:** 308 Newhouse Bldg., Salt Lake City, Utah. **Mine office:** Eureka, Juab county.**Officers:** A. W. Vosburg, pres.; G. L. Bemis, v. p.; A. E. Canfield, sec.-gen. mgr. Lew Merriman, supt.**Inc.** July 8, 1898, in Utah. **Cap.** \$1,000,000, increased in 1908 from \$500,000; shares \$1 par; assessable; all issued; listed in Salt Lake City. Has paid dividends of \$192,500; last dividend paid in February, 1913, 1c. per share.**Property:** 134 acres on Godiva Hill, Tintic district, includes the Yankee, Mountainview and Lakeview mines, lying between the Beck Tunnel and Uncle Sam Consolidated on the south and May Day on the north.

Ore: silver-lead-zinc with some gold. Country rock is limestone and porphyry. For geology of Tintic District, see U. S. G. S., Folio No. 65.

Development: by tunnels and shafts, deepest 1,800'. Recent work has been mainly on the 1,500' level. Lessees are working part of the property Company does not reply to requests for information.

Shipments amounted to about 2,000 tons of ore in 1916; 1,500 in 1917 and in 1918, about 300 tons in first half of 1919.

No recent returns.

YELLOW CIRCLE MINING CO.

UTAH

Address: Howard W. Balsley and John Hill, Moab, Utah; or C. W. Wright, mgr., Cane Springs, Utah.

Company owns a number of carnotite bearing claims showing unusually rich uranium content.

Property: in operation during summer of 1921 and shipping ore to Keystone Metals Reduction Co. of Pittsburg, Pa. A carload shipped in Jan. 1922, averaged 5% uranium oxide, returning \$8,000, or at rate of \$3.75 per pound for uranium content.

YELLOW JACKET MINING CO.

UTAH

Address: F. B. Cook, sec., Columbia Trust Bldg., 125 S. Main St., Salt Lake City, Utah.

Assessment No. 2 of 1/10 of a cent per share levied, Dec. 29, 1921.

YOSEMITE MINES CO.

UTAH

Controlled by **Bingham Mines Co.**, which see.

ZUMA MINING & MILLING CO.

UTAH

Address: Eureka, Juab county, Utah.

Officers: P. J. Fennell, pres.; W. F. Shriver, v. p.; F. D. Kimball, treas.; H. D. Shriver, sec., with Jas. Knowles and Rasmus Nelson, directors. A. C. Nebeker, supt.

Inc. 1907, in Utah. **Cap.** \$500,000; shares 50c par; 698,514 shares outstanding; assessable; last assessment, delinquent, March 28, 1921. Reported August, 1919, that company had spent \$70,684 since starting operations, May 1, 1916. For the fiscal year ended July 14, 1920, total disbursements were \$27,733; total indebtedness on this date was \$22,309. Stock listed on Salt Lake Exchange.

Property: 6 claims, 4 patented, in the East Tintic district, near the Crown Point and Iron King mines, said to carry gold-silver-lead-zinc ore.

Development: by 1,200' shaft and a 300' winze from the 500' level, also 1,000' of tunnels. Extensions for 12 months up to July, 1920 were 898', confined to the 800' level.

Equipment: includes hoist, engine, and compressor.

VERMONT

No gold, silver, lead, copper or zinc ore, was mined in 1920, or 1921.

Production for the State in 1918 amounted to 49,772 tons copper ore yielding 4.02 oz. gold, 3,440 oz. silver and 1,116,384 lb. copper; in 1919, 22,320 tons yielded 18.24 oz. gold, 2,214 oz. silver and 582,561 lb. copper.

ELY COPPERFIELD ASSOCIATES

VERMONT

Address: 30 E. 42nd St., New York. **Mine office:** West Fairlee, Vt.

Officers: H. W. Bennett, pres.; W. L. Hogg, v. p.; Tom W. Bennett, sec.-treas.; above are the directors. K. A. Schliefer, mgr.

Inc. March 1, 1917. **Cap.** \$250,000; \$100,000 pfd.; \$150,000 common stock; \$100 par; non-assessable; all outstanding.

Statement of February, 1919, gives \$80,000 gross earnings during previous 6 months, and operating expenses of \$75,000.

Property: the Copperfield or Ely mine, 1,200 acres at West Fairlee, Vt. This is the deepest mine in the State, discovered in 1821, and known for many years as the Vermont copper mine. Geo. Westinghouse acquired it

in 1899, and the present company bought it from the Westinghouse estate in 1917.

The ore consists of magnetic pyrite and chalcopyrite occurring in lenticular masses in hard quartz-mica schist. The orebody last worked by present management being 10' to 20' thick, 50' to 100' long, and opened for 500' on its dip. The average assay was 4½% copper. The low grade material on the dumps said to assay 1.5-2% copper.

Development: by 4,500' inclined shaft. A 100-ton flotation plant was erected in 1917-'18.

Production: 350,000 lb. of copper in 1918. The mine is idle at present and full of water, awaiting better prices and demand for copper.

ORANGE COUNTY COPPER MINE

VERMONT

Address: Strafford, Orange county, Vt. J. B. Reynolds, mgr. and principal owner, 55 N. Main St., Rutland, Vt. Lovat Fraser, engr.

Property: mining rights on 900 acres, near the Elizabeth mine, 13 miles from the Boston & Maine railway. Tract carries a lenticular orebody, conforming to dip of the country rocks, which include gneiss, under garnetiferous mica-schist and above hornblende-schist, with strike of west of north, and average dip of about 45°. The lens, of 40' extreme width, but not mineralized for the full width, is traceable 4,000' on the property. Ore carries chalcopyrite, disseminated in massive pyrrhotite, averaging 2% copper.

Development: by 110' incline shaft, with about 70' of laterals on the 100' level.

Equipment: includes steam boilers, a 3-drill air compressor and several mine buildings. Geology is described, Bull. 455, U. S. Geol. Survey. Idle.

PIKE HILL MINES CO.

VERMONT

Address: Corinth, Orange county, Vt.

Officers: John H. Allen, pres.; John J. Coakley, sec.-treas.; with C. A. Andrews, George Marshall and D. S. Conant, directors; H. G. Hunter, mgr.

Inc. Jan. 9, 1906, in Vermont. **Cap.** \$200,000; \$100 par; outstanding, \$160,300.

Property: 186 acres, freehold, in the Corinth district, 14 miles from the Boston & Maine railway, shows mica-schist carrying lenses of chalcopyrite disseminated in pyrrhotite, of 2% estimated average copper tenor. The mine was worked in a small way at intervals during the nineteenth century.

Development: by 500' incline shaft and tunnels.

Equipment: hydro-electric power and 100-ton flotation plant.

Production: 131,911 lb. fine copper in 1905; 304,377 lb. copper and 1,698 oz. silver in 1906; 425,367 lbs. copper and 2,292 oz. silver in 1907. Inactive from November, 1907, until October, 1915, when experiments with the flotation process were started. Shipments from October, 1915, to January, 1916, about 210 tons, claimed to run 10% copper and 1 oz. silver per ton. In 1918, mine produced 509,654 lb. copper and 2,056 oz. silver.

The mine was closed early in 1919, after some concentrates had been shipped.

VERMONT COPPER CO.

VERMONT

Office: 50 E. 42nd St., New York. **Mine office:** South Strafford, Orange county, Vt. A. Heckscher, pres.; G. E. Parks, sec.; N. O. Lawton, gen. supt.

Inc. 1906, in Arizona. **Cap.** \$1,000,000. Is successor of Elizabeth Copper Co., and later took over the Strafford Mining Co. and the Sharon Power Company. On account of low price of copper, operations ceased May 1, 1919, and company was put in hands of Ralph E. Pierson, Bethel, Vt., as receiver.

The property was purchased at bankruptcy sale, February, 1920, by the Anahma Realty Corp., 50 E. 42nd St., New York City, and presumably controlled by Heckscher interests.

Property: the Elizabeth and Foster copper mines, 9 miles from Pompanoosuc, Windsor county and 10 miles from Sharon, the nearest rail sta-

tion. The Elizabeth mine was opened 1793, to get pyrrhotite with which to make coppers and at one time had quite an extensive plant for roasting the ore, leaching and making coppers. Early in the nineteenth century the Vermont Coppers Co. operated the mine and is said to have made as much as 6,000,000 lb. of copper yearly, beginning with a small incidental production of copper about 1830, when it was found that the ore carried an average of about 3% copper as chalcopyrite disseminated in pyrrhotite. Six different smelters have been built on the property at various times, the last one in 1916, for pyritic smelting.

Geology: a lens of pyrrhotite ore, wedging out at the bottom, and followed by another lens, occurs in foliated quartz mica-schist. The orebody has been mined for 700' and opened up for more than 2,000' in length, ranging from 15' to 60' in width. Management estimates upwards of 500,000 tons of ore in sight, consisting of pyrrhotite carrying chalcopyrite, and with average assay of 2¼% copper. Diamond-drill borings, made 1909-1916 show ore in new lens at 250' depth below the present workings.

Development: by 800' tunnel with back of 225', and an 810' inclined blind shaft, with over 3,000' of drifts. The dumps carry about 50,000 tons of discarded ore, a large part of it said to average 1.75% copper.

A 500-h. p. hydro-electric power station on the White river, transmits current 9 miles to the mine and works. There also is a small steam plant and an air compressor at the mine. Electric haulage is used underground.

After an idleness of several years the property was reopened in 1916, the smelter remodelled for pyritic smelting and the mill equipped for flotation work. Metallurgically, the smelter operated successfully under the supervision of Prof. George A. Guess of the University of Toronto, but operations were discontinued on account of the cost and trouble of hauling fuel and flux to the smeltery.

The flotation process worked successfully on this ore. The ore is a heavy pyrrhotite carrying disseminated chalcopyrite and assays about 2.25% copper. The mill produced concentrates assaying 18 to 22% copper, with tails running from 0.2% to 0.3%. The daily capacity of the mill is 200 tons. Hard-inge mills are used for grinding and Callow cells for flotation.

Production: in 1918, 300,000 lb. copper, and 35 oz. silver.

VIRGINIA

ALLEGHANY ORE & IRON CO.

VIRGINIA

Address: care H. B. Spackman, pres., Buena Vista, Va.; Arcade Bldg., Philadelphia, Pa.; and Coatesville, Pa. The Lukens Steel Co. owns entire capital stock.

Inc. 1902 in Va. **Cap.** \$1,000,000 6% pfd. and \$2,000,000 com.; par \$100; \$875,000 pfd. and \$1,225,000 com. outstanding.

Property: iron ore mines at Oriskany, Va., having an annual output of 125,000 tons. The iron furnaces have an annual output of 80,000 tons.

AMERICAN RUTILE CO.

VIRGINIA

Address: 622 F. St., N. W. Washington, D. C. W. M. Slater, pres.

Inc. in Virginia. **Cap.** \$100,000; \$100 par; issued \$97,500.

Property: 550 acres at Roseland, Nelson county. The rock is composed of feldspar, quartz and hornblende. As mined, it contains 4% rutile and 4% ilmenite. Open-cut methods are used.

Equipment: includes power and milling machinery to handle about 100 tons daily, also a 2,500' aerial tram. The mill is equipped with crushers, stamps, Dorr classifiers, tables, and a magnetic separator.

Production: 260 tons of rutile concentrate in 1918 was sold for \$39,150, and 444 tons ilmenite concentrate for \$11,100; in 1919 (to August) output was 102 tons of rutile concentrate carrying 94-96% titanic oxide, valued at \$20,400, and 106 tons ilmenite concentrate, carrying 48-50% titanium oxide, valued at \$2,120.

ARMINIUS CHEMICAL CO., INC**VIRGINIA**

Operated by the Grasselli Chemical Co.

Office: 1400 Guardian Bldg., Cleveland, O. **Mine address:** T. McGovern, mgr., Mineral, Louisa county, Va.**Officers:** E. R. Grasselli, pres.-treas.; E. W. Furst, v. p.; E. R. Bailey, sec.**Cap.** \$10,000.**Property:** an iron pyrite mine, showing a large lens of pyrite in ancient schistose rocks.**Equipment:** 350-ton concentrating mill, steam power, hoist, compressors.**BERTHA MINERAL CO.****VIRGINIA**

Subsidiary of the New Jersey Zinc Co.

Office: 160 Front St., New York. **Mine addresses:** W. O. Borchardt, supt., Austinville, Va.; L. B. Womelsdorf, supt., Cartersville, Ga. and Angel, Ala.**Officers:** same as parent company.**Property:** at Austinville, Wythe county, shows a disseminated deposit in limestone of zinc, lead and iron sulphides. Is equipped with a concentrator and zinc oxide furnaces.

Company also controls and operates surficial barytes deposits at Cartersville, Georgia and Angels, Alabama.

CABIN BRANCH MINING CO.**VIRGINIA**

Described in Vol. XIV. Closed down and equipment removed.

CRIMORA MANGANESE CORPORATION**VIRGINIA****Office:** Widener Bldg., Philadelphia, Pa. and Crimora, Augusta county, Va. Controlled by United Chemical & Industrial Co.**Directors:** Geo. C. Allen, pres.; Geo. Burnham, Jr., v. p.; Walter Whetstone, sec.-treas.; A. M. Yonge, gen. mgr.**Inc.** Sept. 29, 1914, in Virginia. **Cap.** \$1,000,000; shares \$100 par; all outstanding. **Transfer office:** Security Transfer & Registrar Co., New York. Annual meeting, last Monday in September.**Bonds:** authorized and issued \$500,000 1st mtge, 6% sinking fund gold bonds, due 1929.**Property:** 946 acres, including the Crimora mine, 2 miles east of Crimora station, on the Norfolk & Western R. R. The mine was first opened in 1867 and acquired by present company in 1914. Deposit consists of manganese-ore masses of various sizes scattered through a clay basin, ½ mile long, several hundred yards wide and 200' deep. The ore is hard and consists of psilomelane and pyrolusite. Percentage of ore to clay varies considerably, from 2 to 20% of ore to the clay by volume. Ore assays 42 to 48% manganese. (See U. S. G. S. Bull., No. 427, pp. 58-61, pp. 101, 270.)**Development:** formerly by underground workings, now done with two No. 36 Marion steam-shovels. Management claims 1,000,000 tons ore proven, with probable reserves of 3,000,000 tons.**Equipment:** electric power, and a 200-ton mill, which started operating in June, 1916. Management anticipated a yearly production of 15,000 to 25,000 tons ore.

The property was closed down, March, 1919; operations were reported resumed, April, 1920. No production figures available.

Company was awarded \$76,616, or 16% of their original claim, December, 1920, by the War Minerals Relief Commission.

In August, 1919, A. W. Blakemore, of 40 Central St., Boston, attorney for the minority bondholders committee advertised that those who wished to know what was being done and to understand the effect of the injunction against the present management, should communicate with him.

DURGY MINE**VIRGINIA**

Being operated by T. G. Pool and associates of Virgilina, Va.

Property: 1,500 acres in Person county, North Carolina, shows copper ore occurring as chalcocite and bornite in a fissure in greenstone schist.

Development: by 515' shaft is reported to have blocked out 100,000 tons of 2% copper ore.

Equipment: includes hoist, compressor and pump with steam, air and electric power. Company reports having built 4½ miles of standard gauge railroad to property, and plans drawn for a 200-ton flotation plant.

GOONEY MANOR COPPER CO., INC.

VIRGINIA

Address: Front Royal, Warren county, Va.

Officers: Hugh E. Naylor, pres., gen. mgr. and purch. agt.; Lewis E. Cooper, v. p.; S. M. Chiles, sec.; Geo. H. Bowman, treas.; preceding officers, H. C. Sheetz, N. S. Waller, S. R. Millar, J. S. West, A. J. Sager, H. R. Kern, directors.

Inc. July 12, 1909, in Virginia. **Cap.** \$500,000; shares \$100 par; issued 3,763. Annual meeting, third Thursday in July.

Property: 84 acres, 5 miles south of Front Royal, reported to carry a fissure vein in porphyry and contact deposits between limestone and porphyry, with generally N. E.-S. W. strike and dip of about 55°. Main orebody is reported to average 7' width, and to be traceable 800', carrying a little malachite near surface, with chalcopyrite at depth, averaging 5% copper, 1 to 6 oz. silver and \$2.50 gold per ton. Orebodies apparently are lenticular.

Development: by a 40' open cut, a 65' tunnel and by shafts of 250 and 228' without laterals, estimated by the company to show 35,000 tons of ore.

Equipment: includes a 150-h. p. steam plant, with a 50-h. p. hoist good for 800' depth, a 1-drill air compressor, ½ mile standard railroad, 3 complete quarry plants and pumps for water supply. Buildings include a smithy engine house, tool house and dwelling.

A 120-ton mill for crushing alumina was erected in 1917, equipped with crushers and 4 screens.

HELEN ZINC CO.

VIRGINIA

Idle. **Address.** S. L. Boggs, Ivanhoe, Virginia.

Property: a zinc mine and small mill near Ivanhoe, Wythe county.

HIGH TOP MINING CORPORATION

VIRGINIA

Is successor of the High Top Copper Mining Co. of N. J.

Mine address: Elkton, Rockingham county, Va.

Property: about 1,000 acres in Greene county, Virginia, 10 miles from Elkton, on the Norfolk & Western railway.

Development: by 140' shaft, with a 30' crosscut said to show 8' of rock dotted with bornite and chalcocite, giving assays as high as 7% copper. There also is a 55' shaft and several shallow pits and open cuts, proving mineralization of the outcrop 3 miles or the entire length of the property. According to J. Boardman Cann, the only money spent on the property since the company acquired it, was for the limited amount of exploration work noted above, plus considerable stripping, open cut and quarry work in an endeavor to prove that the tract is underlain by a mineralized stratum 60' thick, carrying bornite. Property shows spots and bunches of copper ore and a few tons of selected ore have been shipped, but the mineralized zone as a whole is considered too lean to work at a profit. The property has been visited by various geologists and described in official government reports and the guarded warning given therein should be heeded.

Idle.

HOLLOWAY MINE

VIRGINIA

Idle. Owned by Wm. M. Pannebaker estate, Virgilina, Va.

Property: the old Holloway or Eustis mine, 3½ miles S. of Virgilina, Halifax Co., Va., on a spur of the Southern railway. Has a 460' shaft, and levels at about 70', 140', 190', 290', 390' and 445'. The vein is strong, persistent and 3 to 33' wide, owing to lenticular expansions. The ore is chalcocite in quartz with epidote. About 20,000 tons of hand-picked ore have been shipped; 6,000 tons shipped about 1900, said to have averaged 12%

copper. Is described in detail by Weed in Bull. 455, U. S. Geol. Survey, p. 79, also in Virginia Geol. Survey, Bull. 14, p. 114.

IRISH CREEK TIN MINES, INC.**VIRGINIA**

Address: Wiley S. Young, treas., 200 Causeway St., Boston, Mass. Geo. W. Schultz, supt., Montebello, Nelson county, Va.

Inc. Sept., 1918, in Massachusetts. Cap. \$100,000.

Property: 300 acres at Irish Creek, Rockbridge county, said to show tin, wolframite, and silver, in a fissure vein in granite. Greatest depth of development is but 40'. **Equipment:** includes 100-ton mill.

Reported in March, 1919, that according to an examination by the U. S. Bureau of Mines, the orebodies are so far disappointing, both as to size and metal content. Of 19 samples taken, 14 gave blank returns, and the remainder, an average of less than 1.5% tin.

KAY MINE SMELTING CO.**VIRGINIA**

Officers: at last accounts, Z. L. Kay, pres.-gen. mgr.; J. R. Willbourne, v. p.; H. P. Wilder, sec.; H. J. Watkins, treas., and Jas. S. Sebree, directors.

Inc. Aug. 8, 1905, in South Dakota. Cap. \$1,000,000; \$1 par; 525,000 shares paid Z. L. Kay for property; 200,000 issued.

Property: 261 acres, comprising the Kay farm at the N. end of the Virgilina district, 9 miles from South Boston, in Halifax county, Virginia. The tract shows lenticular quartz veins enclosed in schistose rocks formed from old volcanic tuffs and andesite of the type characteristic of the Virgilina district. Veins consist of white quartz and carry primary copper glance below the water level with carbonates, oxides and some native copper in the oxidized zone. One vein varies from 3 to 6' in width and is said to be traceable 1 mile. A recent report tells of 2 veins 10' wide. The future of the entire district, including this property depends upon the use of some cheap method of concentration, which flotation may supply.

In July, 1917, 9 tons sent to Pueblo, Colo., carried 8% copper.

MT. TORY PRODUCTS, INC.**VIRGINIA**

Formerly Mt. Tory Mining Co.

Address: Lyndhurst, Va.

Officers: C. B. Cochran, pres.; C. D. Michalson, v. p.; G. G. Luhman, sec.-treas.; W. D. Cochran, asst. sec., with L. E. Melrin and C. L. Iverson, directors.

Inc. in South Dakota and Virginia. Cap. \$1,500,000; \$10 par.

Property: 8,975 acres in Augusta county, Virginia, said to have a deposit 200' deep, and of variable width, proven for length of 3,000'; manganese ore averages 42 to 45% manganese; manganiferous iron ore 10% iron and 38% iron.

Development: mainly by 7 open cuts, 150' to 900' long, and average width of 45'. Company claims 2,000,000 tons ore blocked out.

Equipment: includes steam hoist, and a mill, also hydraulic system for stripping overburden.

Output to date, 950' tons ore. Company claims to have spent \$30,000 in 1918, preparing for 1919 operations, but work ceased on account of signing of Armistice. In March, 1921, mine and mill were reported in operation. The War Minerals Relief Commission awarded the company \$11,008, or 25% of the original claim, December, 1920.

NORFOLK SMELTING CO., INC.**VIRGINIA**

Subsidiary of International Minerals and Metals Corp. (q. v.).

General office: 61 Broadway, New York. **Works address:** C. T. Barron, mgr., West Norfolk, Va.

Officers: Otto Frohnknecht, pres.; Jas. C. Colgate, v. p.; Benrio Elkan, 2nd v. p.; Jas S. Dennis, sec., with Edw. W. Harden, directors. H. Scherf, treas.

Inc. in New York. Cap. \$100,000; \$100 par. Annual meeting, 2nd Monday in January.

Virginia Smelting Co., which see, for general description. Smeltery treats copper ores and other copper bearing material, and produces blister copper which goes to Eastern refineries and casting copper for the trade. Capacity is 500 tons of ore per day, with a maximum production of 1,000 tons of blister, or casting copper per month.

ROANOKE ORE & IRON CORPORATION **VIRGINIA**

Address: E. E. Francy, pres., 315 Stephen Girard Bldg., Philadelphia, Pa.

Capital outstanding, \$1,220,000. Par, \$1. U. S. Corporation Co., New York City, registrar and transfer agent.

Company, through a subsidiary corporation had a 99 year lease on the Catawba iron property, 8,000 acres of iron, coal and timber land in Roanoke and Botecourt counties, Virginia, the tract being 11 miles long and including the old Harvey iron furnace erected in the 18th century.

Stock originally offered at 70c., boosted on Curb to \$1.50, was handled by Bergman, alias Morton, and The Caraher Co., Inc. Was a rank speculation in which the shareholder had little chance. Very unfavorably regarded.

SEABOARD COPPER CO. **VIRGINIA**

Idle. **Former office:** 77 South Market St., Boston, Mass. **Mine office.** Virgilina, Halifax county, Va.

Officers: Geo. R. Leghorn, pres.; Edward L. Pond, sec.

Inc. July, 1902, in New Jersey. Cap. \$300,000; shares \$1 par.

Property: the Dorothy and Bailey mines, 135 acres, in the Virgilina district, 3 miles from the Southern railroad, shows an 8' fissure vein in schist, carrying bornite ore, estimated to average 3 to 4% copper, with combined gold and silver values of \$1 to \$1.20 per ton.

Development: by shafts of 30', 265' and 115', and by 2 tunnels, of 165' each, with a total of 840' of workings. The ore occurs in well-defined shoots; the proportion of shipping ore is small, but mine might be profitably worked if flotation is used.

Equipment: includes a 275-h. p. steam plant, with a 25-h. p. hoist, good for 500' depth, and a 5-drill compressor. There is a 100-ton mill and buildings include an engine house, bunkhouse and office. Company inactive since 1904, but still alive.

SULPHUR MINING & RAILROAD CO. **VIRGINIA**

office: Virgilina, Halifax county, Va.

Officers: S. D. Crenshaw, pres.; A. R. Ellerson, v. p.; Thos Armstrong, sec.-treas.; P. H. Haskell, supt.; Mineral, Louisa county, Va.

Property: a pyrite mine whose ore carries low copper content. Has 600' shaft with steam power, compressor, etc. Ore treated in 500-ton concentration mill. Company makes cement copper from its mine and seepage waters, but is primarily a producer of pyrite for sulphuric acid plants. Is controlled by Virginia-Carolina Chemical Co.

In August, 1919, the mill was making over 100 tons of concentrate daily. Little development was done in 1919, all the ore coming from old pillars as the deposit is nearly exhausted.

UNITED CHEMICAL & INDUSTRIAL CO. **VIRGINIA**

Address: Widener Bldg., Philadelphia, Pa.

Organized 1918 under a declaration and deed of trust as a holding company. Controls the Crimora Manganese Corp., which see.

UNITED STATES MANGANESE CO. **VIRGINIA**

Office: 50 E. 42nd St., New York. **Mine address:** Elkton, Va. D. F. Newman, supt.

Property: a tract of several hundred acres on or near Hances mountain. S. E. of Elkton, shows 5' of manganese ore mostly psilomelane and pyrolusite, occurring disseminated and massive in yellow clay overlying quartzite. Mine has a washer and concentrating tables, and railway running from main plant to N. & W. R. R. No production figures available.

Mines and plant advertised for sale by Trustees at Harrisburg, Va., February 28, 1919.

VIRGINIA-CAROLINA CHEMICAL CO.

VIRGINIA

General office: Richmond, Va. Corporate office: Jersey City, N. J.

Officers: C. G. Wilson, pres.; E. B. Addison, 1st v. p.; S. D. Crenshaw, v. p.-sec. with N. S. Meldrum, Henry Walters, Harry Bronner, B. Cutler, Lucien Oudin, H. M. Tucker, Alvin W. Krech, C. I. Stralem, S. H. Miller, and S. T. Morgan, Jr., directors. S. L. Carter, v. p.; E. E. Coles, treas.; E. T. Orgain, aud.

Inc. September 12, 1895, in New Jersey. Cap. authorized, \$38,000,000 com. and \$30,000,000 8% cumulative pfd.; increased May 12, 1914, from \$20,000,000; shares \$100 par; outstanding \$27,984,400 com. and \$21,568,573 pfd. The unissued preferred stock is reserved to provide for conversion of the 10-year 6% debentures. Annual meeting, first Wednesday in September. New York Trust Co., New York, transfer agent. Guaranty Trust Co., New York, registrar. Listed on New York and Richmond Stock Exchanges.

Bonded debt: \$11,400,000 first gold 5's dated November 2, 1908; due Dec. 1, 1923; \$2,617,000 10-year 6% convertible gold debentures dated May 15, 1914, due May 15, 1924; \$12,250,000 twelve year 7½% Sinking Fund Gold Debentures, dated Nov. 1, 1920, redeemable in whole or part at 105 and interest, on or before Nov. 1, 1932.

Company was formed to consolidate a number of manufacturers of fertilizers, acids, chemicals, and kindred products. It owns and operates large pyrite mines, producing a large portion of the pyrite used by it in manufacturing sulphuric acid; in addition it has foreign potash, sulphur, and other properties. Controls the Sulphur Mining & Railroad Co. (which see), which owns pyrite mines in United States, and sulphur deposits in Mexico.

Also the Charleston, S. C., Mining & Manufacturing Co., which owns and mines phosphate rock in Florida, Tennessee, South Carolina, and Kentucky. Also the Southern Cotton Oil Co. and other subsidiary companies, directly or indirectly operated.

VIRGINIA CONS. CHEMICAL CORP.**VIRGINIA**

Probably dead. Fully described in Vol. X111.

VIRGINIA COPPER MINE**VIRGINIA****Office:** care Richard Lamb, 90 West St., New York. **Mine address:** High Hill, Halifax county, Va.

Property: the High Hill mine, 617 acres, in the Virgilina district, developed by 8 shafts of 140 to 340' depth, with about ½ mile of workings. Mine shows 2 veins giving assays up to 5.9% copper, 2 oz. silver and 80c. gold per ton. Ores are highly silicious, the gangue containing about 87% silica, which precludes smelting and wet process concentrating. Property was formerly operated by the Virginia Copper Co., Ltd.

Equipment: includes a 350-h. p. steam plant. Idle several years.**VIRGINIA IRON, COAL & COKE CO.****VIRGINIA****Offices:** Roanoke, Va., and 40 Wall St., New York City.

Company owns and controls about 225,000 acres of iron ore, coal and timber lands in Georgia, Kentucky, Tennessee and Virginia.

Pig iron shipments amounted to 206,362 tons in 1918 and 125,969 tons in 1919.

VIRGINIA LEAD & ZINC CORPORATION**VIRGINIA****Last address:** Mineral, Va.**Officers:** at last report, Berkeley Williams, pres.; W. M. Cary, v. p.; Norwood Bentley, sec.-treas.

Inc. November 30, 1915, in Virginia. **Cap.** \$600,000, including \$200,000 10% cumulative pfd. \$5 shares, and \$400,000 com. \$5 shares. Debentures \$200,000 3-year 6% convertible gold notes.

Property: 1,200 acres; the Valznico mine in Spotsylvania county and the Valcooper mine in Louisa county, under development during 1916.

The Valznico mine has a fissure vein in schist, dipping 75° S. E. and pitching N. 40° E. The ore is a complex sulphide, containing 4% lead, 12% zinc and silver, copper, gold and iron.

Development: by 250' vertical shaft and 2,400' of workings. **Equipment:** hoist, compressor, pump, steam plant and 50-ton concentrating mill.

Production: in 1916 was 2,300 tons of ore, averaging 4% lead and 12% zinc. Company does not reply to requests for information, and is presumably defunct.

VIRGINIA MINING CO.**VIRGINIA**

Controlled through stock ownership by General Chemical Co. Phillips-town, N. Y.

Operates the Gossan pyrrhotite mines at Monarat, Carroll county, Va. Edward I. Williams, supt.

Two mines are worked, the old Huey pit, 200' deep and the Bombarger.

both by open cut methods. They are located about 2,000' apart on the same vein which varies up to 60' in width and is enclosed in mica schist. The ore contains about 1/2% copper and 30% sulphur, and is shipped 48 miles to Pulaski, Va., where it is milled and the product burned to make sulphuric acid.

During 1918-'19 about 100,000 yards of overburden was removed, exposing a three-year ore supply. About 100 men are normally employed. Annual production is 75,000 tons of ore.

VIRGINIA SMELTING CO.

VIRGINIA

Secretary's office 131 State St., Boston, Mass. **Works office:** West Norfolk, Norfolk county, Va.

Officers: W. E. C. Eustis, pres.; A. H. Eustis, v. p.; F. A. Eustis, sec.-treas.

Inc. November 10, 1909, in Maine, as successor of Eustis Smelting Works. **Cap.** \$1,000,000; shares \$100 par; in \$500,000 preferred and \$500,000 common stock. Annual meeting, first Tuesday in October.

Company owns the Eustis Smelting Works, or Norfolk smelter, on tide water, near Norfolk, with railroad facilities to all points. The situation is favorable for custom smelting; as more coal is shipped from this vicinity than from any other center in North America and traffic commands favorable freight rates on return cargoes. The location also insures the best coke for metallurgical use, on advantageous terms. Ore received from vessels is unloaded by machinery into standard railway cars, with facilities to set aside any desired portion into a sample car, standing on a separate track. The unloader has a maximum capacity of 1,000 tons in 24 hours. Loaded cars containing ore are hauled by locomotives upon trestles and ore and coke dumped into storage bins having capacity for 25,000 tons of ore.

The smelter has a single water-jacket blast furnace of 600 tons daily capacity. There are two stands of converters with a capacity of 1,000 tons copper per month, a Dwight-Lloyd sintering machine, a cupola, and a reverberatory furnace for treating scrap.

The converter gases, are washed in a gas treating plant that produces liquid sulphur dioxide, which is sold to the chemical trade. The leaching and sintering plant for treating pyrite cinders, which formerly belonged to this company, has been transferred to the Virginia Industrial Chemical Co., which is a closely allied corporation.

The smelting department of the works is operated under a lease on a royalty basis, by the Norfolk Smelting Co.

VIRGINIA ZINC & CHEMICAL CORPORATION, LTD. VIRGINIA

Liquidated. Properties acquired by the Virginia Consolidated Chemical Corporation, also presumably dead.

WASHINGTON

The metal mining industry of Washington was at its lowest ebb in 1921, the decline being 70%.

The gold output of Washington increased from \$120,860 in 1920 to \$148,000 in 1921 and compared with \$252,000 in 1919. Nearly all the gold came from the San Poil, Knob Hill and Surprise mines of the Republic district. The Boundary Gold Mountain mine in Whatcom county, resumed production late in the year.

The silver output decreased from 199,678 ounces in 1920 to 132,000 ounces in 1921, compared with 259,380 ounces in 1920. Most of it came from the mines of the Republic, Nighthawk, Chewelah and Colville districts. Silver from copper ores was negligible as the Sunset mine at Index and the United Silver Copper Co. at Chewelah were only operated on a small scale.

The copper output decreased from 1,983,134 lb. in 1920 to about 402,000 lb. in 1921. The only producer was the United Silver Copper Co.

The output of lead decreased from 5,787,247 lb. in 1920 to 130,000 lb. valued at \$6,073, in 1921, compared with over 2,000,000 lb. in 1919 and over 5,000,000 in 1918. Most of the product came from the Electric Point property, near Northport, in Stevens county, which was idle most of the year.

The only dividend paid by a metal mine in Washington during 1920 was that of the Electric Point mine, which amounted to \$119,062.

ADDISON COPPER CO.**WASHINGTON**

Address: Keller, Ferry Co., Wash.

Officers: Geo. R. Hodges, pres.; R. B. Smith, v. p.; C. A. Gray, sec.-treas.-mgr., Empire State Bldg., Spokane, Wash., with Geo. F. Cohrs and Walter Stager, directors.

Inc. in Washington. **Cap.** \$75,000; 5¢ par; assessable.

Property: 5 claims, unpatented, and a millsite, 4 miles N. E. of Keller, said to show a 4-12' ledge with 15-18" paystreak containing lead-silver-copper values.

Development: by tunnels and 150' shaft. Company developing since 1919, and in 1921, started the Federal shaft in which at 37', the 4½' vein showed \$76 ore. The Mammoth tunnel will connect with the Bunker Hill shaft where 6' of rich silver-lead-copper ore is cut. Shaft is to be deepened to 600', 1922.

Equipment: includes three-drill compressor and 40 h. p. boiler.

ADMIRAL CONS. MNG. CO.**WASHINGTON**

Succeeds Admiral Mng. Co.

Address: 402 Rookery Bldg., Spokane, Wash.

Officers: Arthur L. Hooper, pres.-mgr.; Wm. B. Sprague, sec.; R. E. Plath, treas.

Inc. 1920, in Washington. **Cap.** \$200,000; bonds authorized and other indebtedness, \$2,600.

Property: 420 acres, 300 patented, 2 miles S. E. of Valley, Stevens county, also timber holdings and water rights on Deer Creek. Ore occurs in vein 18"-6' wide, said to have averaged 8.25% copper and 3 oz. silver per ton for 12 carloads. Management estimates 150,000 tons blocked out, assaying 3% copper and 3 oz. silver.

Development: by 6 tunnels, aggregating 3,200' and 100' shaft. Developing, 1921, by new tunnel to develop a vein showing 4' of 6% copper ore on surface.

ADMIRAL MINING CO.**WASHINGTON**

Described in Vol. XIV. Now **Admiral Consolidated Mng. Co.**, which see.

ADVANCE MINING CO.**WASHINGTON**

Address: A. M. Campbell, 1138 Altamont Blvd., Spokane, Wash.

Officers: Frank Johnson, pres.; H. I. Parr, v. p.; A. M. Campbell, sec.-treas., with W. F. Johnson, C. G. Staples, M. V. Burr, all of Spokane; M. Kulzer, and W. H. Wiscombe, directors. O. F. Parmeter, supt., Daisy, Wash.

Cap. \$2,000,000; \$1 par; outstanding 1,000,000 shares, assessable.

Property: 9 claims in Beulah district, near Daisy, Ferry county. **Development:** by tunnels 400' and 1,400' long.

AICHAN BEE SILVER-LEAD MINING CO.**WASHINGTON**

Office: H. M. Howard, 401 Jamieson Bldg., Spokane, Wash. J. Currie, supt., Fruitland, Wash.

Officers: H. M. Howard, pres.-mgr.; H. Schwitzer, v. p.; Dr. B. F. Blosser, sec.-treas., with Dr. C. S. Kalb, directors.

Inc. August, 1, 1916, in Washington. **Cap.** \$100,000; shares 10¢ par; 192,000 sold; 692,000 outstanding.

Property: 8 patented claims, 160 acres, in Deertrail district, Stevens county. 25 miles W. of Springdale. **Ore:** occurs as a contact deposit be-

tween limestone and granite. Three veins, 2-5' thick, now under development, are said to give assays of about 16 oz. silver and 20% lead.

Development: by 477' main tunnel, crosscutting property to depth of 225'. The tunnel has cut the Mother Lode, which is 20' to 50' wide on surface and shows iron stained quartz for several hundred feet. Ores carry zinc blende, galena, pyrite and some chalcopryrite. The Deertrail, a producing mine, lies 15 miles N. E. and the Queen and Seal and the Germania-Tungsten, equally near.

ALASKAN COPPER RIVER MINING CO.

WASHINGTON

Probably dead. See Vol. XIV.

ALLIANCE MINING CO.

WASHINGTON

Address: M. C. Hunter, 622 Old National Bank Bldg., Spokane, Wash.

Officers: M. C. Hunter, pres.; F. H. Hunter, v. p.; W. W. Gifford, sec-treas., with J. M. Lloyd and S. S. Frantz, directors.

Inc. September 9, 1913, in Washington. **Cap.** \$1,500,000, shares \$1 par; outstanding \$1,303,288; assessable, not exceeding 5 assessments of 5 mills each year. Bonds authorized \$100,000, outstanding \$32,400. In 1914 the company took over for \$171,000, the property of the Anaconda Gold Mng. & Reduction Co., paying \$120,000 in Alliance stock, and assuming an indebtedness of \$51,000 for the remainder.

Property: 7 claims, 5 patented, 100 acres, in the Eureka mining district, Republic, Wash., adjoining the property of the Republic mine, and said to cover 3,500' along the strike of the Republic vein, 12' to 30' wide, and the Princess vein, 2' to 10' wide.

Early development of the properties was done when only high-grade ore was shipped, and the Alliance Co. acquired the holdings of 4 different companies for the purpose of mining and milling the low grade ore. The veins are developed to a depth of 600' by a 385' tunnel and a 400' winze, with total workings of 5,000'.

Equipment: includes gasoline hoist and a 3-drill compressor. No work reported since organization.

ALPINE MINING & MILLING CO.

WASHINGTON

Address: Alaska Bldg., Seattle, Wash.

Officers: J. H. Starbird, pres.-mgr.; H. C. Ash, sec.-treas.; with M. R. Starbird and T. P. Revelle, directors.

Cap. \$50,000; \$100 par.

Property: four lode claims and one placer claim on Negro creek, Chelan county, said to show a vein 1½' to 3½' wide of free milling gold ore.

Development: several tunnels, 100' to 200' in length. Is a prospect.

AMALGAMATED GOLD MINES CO.

WASHINGTON

Address: Central Bldg., Seattle, Wash. **Mine address:** Ernest Riebe, supt., Blewett, Wash.

Officers: C. R. Hesseltine, pres.-mgr., 756 New York Block, Seattle, Wash.; G. W. G. Litherland, v. p.; J. E. Reynolds, sec.; G. W. Walker, treas.

Cap. \$2,000,000; \$1 par; assessable to 10c.

Property: the Blewett mine, 7 claims, and two millsites, on E. slope of Cascades, Chelan county, said to show well defined fissure veins in serpentine with gold ore, containing a small amount of silver.

Development: by the Meteor and Black Jack tunnels, with 7,000' of work. **Equipment:** includes 20-stamp mill with compressor, water power, etc. Credited with past production of over \$1,000,000.

Operations were resumed in 1920 and April, 1921, the mill handling 30 tons of ore daily, the concentrate running \$150-\$300 in gold-silver content. Shipments made regularly to Tacoma smelter, in 1921.

AMAZON MINE

WASHINGTON

J. Oppenheimer, owner, Chewelah, Stevens Co., Wash.

Property: 3 claims, patented, 51 acres, 5 miles N. W. of Chewelah, said to show a vein uncovered for 2,200'. Ore said to assay about 2½ oz. silver, 2% copper, and up to 2¼ oz. gold per ton.

Developed by several tunnels, to depth of 300' with 1,330' of workings. Production in 1918, 187 tons ore; total production, 725 tons. Idle.

AMERICAN FLAG MINE**WASHINGTON**

Owned by Maurice Snyder, and W. D. Hoover, of Aberdeen, Wash. J. S. Stevens, supt., Republic, Wash.

Property: at Sheridan, Okanogan county, 11 miles W. of Republic, Ferry county, said to show silver-gold ore that assays 16 oz. silver, 10 oz. gold and 36% copper per ton.

Development: by tunnels and 100' shaft. A flotation plant was planned at last account.

AMERICAN MINERALS PRODUCTION CO.**WASHINGTON**

Address: 528 Cont. & Comm. Bldg., Chicago, Ill.

Officers: Adolph Kurtz, pres.; H. N. Wallace, v. p.; Sidney Levy, sec.-treas., with Herbert Levy and F. F. Stevens, directors. H. F. Wierum, gen. mgr.; H. L. Griswold, supt., Valley, Wash.

Cap. \$1,500,000; \$1 par. **Dividends:** \$30,000 in 1917; none since.

Property: in Stevens county, Wash., has a large bedded deposit of magnesite, dipping 40 to 70°. The enclosing rocks are slates, schists and quartzites; the deposits being replacements of dolomite by magnesite. These deposits of crystalline magnesite, a few miles west of Valley in Stevens county, discovered in the summer of 1916, excel in size and purity any known deposits of this material.

Development: by quarries. The crude magnesite is shipped to Irvin, Wash., where it is dead-burned, on toll, and shipped thence to steel works and refractories trade.

Company states there are 300,000 to 500,000 tons shipping grade in sight; quarries have a monthly capacity of 12,000 tons, and the calcining plant at Irvin, 6,500 tons monthly.

Production: in 1918, the company mined 67,855 tons of crude magnesite; total dead-burned shipped East amounted to 17,664 tons. During 1920, output was about 66,000 tons of crude magnesite. The depression in the steel market caused a complete shut down at end of 1920. Company is now manufacturing calcined magnesite used for composition flooring and stucco.

AMERICAN REDUCTION CO.**WASHINGTON**

Address: Republic, Ferry county, Wash.

Inc. in 1915 by F. R. Clark, of Spokane; P. N. Clark and G. W. Sommer.

The property of the North Wash. Power & Reduction Co., which had been held by a receiver for 2 years, was purchased together with adjoining holdings.

Equipment: includes concentrator mill, and power plant. Idle several years.

AMERICAN TUNGSTEN CONS. CORP'N.**WASHINGTON**

Address: c/o Judge Geo. Turner, Columbia Bldg., Spokane, Wash.

Company is a reorganization, (1912) of the Germania Mng. Co. **Cap.** \$1,000,000; shares \$1 par.

The Germania Co., composed principally of German investors, was organized, 14 years ago to develop the Roselle mine, 25 miles west of Springdale, Stevens county. It is said that \$500,000 was spent in driving tunnels, in the concentrator and buildings. In 1911 the company became involved in litigation, later going into bankruptcy.

In January, 1916, eastern interests, represented by F. T. Hamshaw, of Seattle, obtained a lease and bond on the properties held by the Corporation and started operations. Holdings include the Germania and Roselle mines. Development, consisting of a 200' shaft and 3 tunnels with 3,000' of work, is said to have exposed a considerable tonnage of ore. Property still held by Alien Property Custodian at last report.

APACHE MINING CO.**WASHINGTON**

Address: 1620 Pioneer Bldg., St. Paul, Minn. **Mine address:** Beggs & Ostrowski, Nespelem, Wash.

Officers: F. A. Hoyt, pres.; M. H. Evans, sec.-treas., with J. C. Wilson and G. B. Hoyt, directors.

Inc. 1904, in Washington. **Cap.** \$1,000,000; \$1 par; issued 750,000.

Property: under lease and bond to Beggs and Ostrowski of Nespelem, Wash., consists of 6 unpatented claims, 90 acres, S. W. of Nespelem, Okanogan county. Claims show silver ore in a quartz vein in granite. Geology described in Bull. 23, Wash. Geol. Survey (1921), p. 207.

Development: by 400' tunnel, 146' incline winze, drifts and crosscuts with 2 levels, one 96' below tunnel, 355' long, the other 50' deeper. 158' long, with a winze in ore 46' deeper. Employs 7 men.

The mine has been the most persistent silver producer of the Nespelem district, since 1911, shipments of ore averaging \$12 per ton, going to the Great Metals mill.

APEX GOLD MINING CO.

WASHINGTON

Dead. **Last address:** Jas. P. Blaine, supt., Chesaw, Okanogan county, Wash. Company formed to take a lease on one claim of the Ben Harrison Gold and Copper Mining Co.

Property: the Ben Harrison mine, in Meyers creek or Chesaw district, showing a 1-6' quartz vein in schist, the ore carrying gold-silver-copper values. Developed by a 286' shaft with gasoline hoist. Mine intermittently operated. In 1911, had 10-ton mill. No recent information. See Bull. 5, Washington Geol. Survey, 1911.

APEX GOLD MINING CO.

WASHINGTON

Address: Wm. Priestly, Miller River, Wash., who has operated the property under lease and bond since 1917.

Property: the Apex gold-silver-arsenic mine in Miller river district, King county, contains a persistent vein in granodiorite, 2'-6' wide, containing arsenopyrite, chalcopyrite, galena, etc., with high grade streaks 3"-15" wide of \$20 to \$80 gold ore, mostly arsenopyrite. Ore shoot is 500' long and mined 450' vertically.

Development: by 2,500' of work in 4 tunnels, the lowest not having yet reached the orebody.

Equipment: includes 6 mile railway to lower terminal tramline, 1,000' below mine.

APOLLO CONS. GOLD MINING CO.

WASHINGTON

Mine office: Republic, Wash.

Officers: H. D. Clark, pres.; E. C. M. Hall, sec.; H. B. Ives, treas.; all of New Haven, Conn. T. J. Howell, mgr.

Cap. \$1,500,000; 50c. par.

Property: 9 claims, patented, 165 acres, in Ferry county, 10 miles S. E. of Republic, shows gold, silver, lead and zinc ore. Said to have made shipments totaling \$200,000.

ARADIUM COPPER MINING CO.

WASHINGTON

Probably dead; see Vol. XIV for description.

ARK MINES CO.

WASHINGTON

A reorganization of the Ark Group Mng. & Milling Co., Ltd., described in Vol. XIII.

Address: Spokane, Wash. **Mine address:** Kettle Falls, Wash.

Officers: J. J. Budd, pres.-mgr.; W. P. Maurer, v. p.; O. L. Budd, sec.-treas.; directors, J. J. Budd, H. Karlsten, W. P. Maurer, and H. Hoffman.

Inc. 1918, in Washington. **Cap.** \$375,000; par 25c; assessable in treasury 500,000 fully paid shares, and 400,000 paid up to 15c.; 600,000 shares given for property.

Property: 18 claims, the Silver Queen group, 3 miles S. of Kettle Falls, Stevens county. Ore occurs in contact between granite and lime with N. W. strike and dip of 40°w. Vein reported to be from 3-20' wide.

Development: by tunnels, longest 1,025' and a 130' upraise. This work has shown copper ore containing silver values in the Silver Queen ledge, said to be 50' thick with same character of ore in face of tunnel as found on surface, 350' above.

Equipment: steam power, 2 air compressors and air drills. The Silver Queen property has been under development for several years.

Company also owns 3 gold claims in the Kootenai district, British Columbia.

ARLINGTON SILVER MINING CO. WASHINGTON

Address: Sherwood Bldg., Spokane. Company was formerly the Arlington Mng. Co., but was reincorporated in March, 1918, under present name. **Mine address:** J. E. Stoolfire, supt., Okanogan, Wash.

Officers: H. E. Rhodenhamel, pres.; H. E. Stoolfire, sec.-treas.

Property: 10 claims, 7 miles from Conconully, Okanogan county, Wash., shows a 4-5' vein of milky quartz containing pay shoots with gray copper ore. Small shipments of rich lead-copper ore, containing gold and silver, were made to Tacoma smelter, 1920-21.

Development: by 990' adit with 100' winze having 2 levels.

Equipment: complete, with electric power, 4-drill compressor, etc.

Production: about 3,000 tons, since 1901, or 986 tons since 1916, that averaged 66 oz. silver, 1.15% copper and netted \$31.145.

AURELIA CROWN CO. WASHINGTON

Fully described in Vol. XIV.

Succeeded by **Crown Power Molybdenum Co.**, which see.

AURORA COPPER MINING CO. WASHINGTON

Inactive. Conrad Wolfe, pres., Symons Block, Spokane, Wash.

AZURITE COPPER CO. WASHINGTON

Office: 159 E. 60th St., New York. **Mine address:** Twisp, Wash.

Officers: C. H. Ballard, pres.-mgr.; W. G. Hughes, v. p.; Wm. Tinson, sec.; W. T. Benhe, treas.

Inc. December, 1916, in Delaware. **Cap.** \$3,000,000; par \$1; 2,600,000 shares issued.

Property: 32 claims and a mill-site in Whatcom county, 18 miles south of the Canadian line, developed by 800' of workings. Claims show gold ore. Eight tons of ore returned \$400, and a half ton shipped to smelter, returned \$135 per ton.

BEAD LAKE GOLD-COPPER MINING CO. WASHINGTON

Address: W. E. Allen, 617 Hyde Bldg., Spokane, Wash. C. H. Curtis, supt., Newport, Wash.

Officers: G. C. Geisler, pres.; C. C. Wilt, v. p.; W. E. Allen, sec.-treas., with C. M. Jacobson, directors.

Inc. 1910, in Washington. **Cap.** \$3,000,000; \$1 par; 2,000,000 shares issued. Bonds authorized, \$30,000, first 6s, dated Jan. 1, 1920, due Jan. 1, 1925; issued \$24,000.

Annual report for 1920 shows receipts, \$73,911; expenditures, \$71,979; balance, \$1,932.

Property: 18 claims, 300 acres, in Newport district, Pend Oreille county, Wash. Ore consists of sulphides of lead, iron, copper and zinc in a quartz fissure vein in diorite, 2-12' wide. In December, 1919, company bought the Conquest mine for \$20,000. The Comstock mine had been previously acquired for \$2,500.

Development: by over 7,000' of tunnels and 300' shaft. Equipped with 100-ton concentrator, moved from the Western Union mine in Idaho. The plant includes a flotation unit and should be in operation in 1922. Fifteen men employed.

BEECHER GOLD MINING CO. WASHINGTON

Address: Orient, Wash. Alex A. Anderson, mgr.

Property: the Beecher mine near Orient, Ferry county, in which gold-quartz ore occurs in stringers.

Idle since 1917.

BELCHER MINING CO. WASHINGTON

Address: c/o Jos. A. Anderson, pres., Symons Bldg., Spokane, Wash.

Property was reported to have been bought, 1918, by Frank Babcock, Ewan, Wash., for \$50,000, payable in instalments over a period of two years.

Property: the Belcher claim N. of Republic, Ferry county, shows irregular replacement deposits of pyrite associated with garnet, epidote, tremolite and magnetite in marble and interbedded shale, etc., intruded and metamorphosed by monzonite porphyry dikes and sheets.

Development: by 3 tunnels showing sulphide orebody 5'-20' thick, on dip plane (see Bull. 550 U. S. G. S., 1914, pp. 167, 175, 179). Over 5,000' of work has been done.

A 1,000' aerial tram connects the tunnels with ore bins on the railroad. Water, brought 2,000' from Lambert creek, through a steel pipe, generates electric power, supplemented by a gasoline auxiliary plant.

Equipment: includes an air compressor and power drills.

Property, reopened May, 1911, shipped low-grade gold-bearing pyritic copper ore to Granby smelter. In 1917, reported to have shipped 3,000 tons ore, assaying 6% copper and \$1 gold. Shipments continued during 1918; no later returns.

BENDER METALS MILLING CO.

WASHINGTON

Probably dead.

Officers: Henry Bender, pres.; B. W. Johnson, sec.; Robt. Baur, treas., all of Toledo, Ohio. J. W. Douglas, v. p., Spokane, Wash.

Cap. \$30,000; par \$25. Early in 1918, the company finished converting an old stampmill in the Oroville district, Stevens county, into a flotation mill to treat ore from the nearby Rich Bar, and Kaaba mines. See Kaaba Mines Co.

BEN HUR LEASING CO.

WASHINGTON

Dissolved. See Volume XIV.

BIG WEST (COPPER) SYNDICATE

WASHINGTON

Address: W. S. Hawley, mgr., Hutton Bldg., Spokane, Wash. C. S. Gilbert, supt.

Property: in a new district, at the headwaters of the Quinalt river, in the Olympic Mtns., Southwestern Washington, at an altitude of 4,500'.

A tunnel is to be driven easterly to ascertain the size of the known ore-bodies, said to contain gold, copper, iron and manganese. Work was discontinued June, 1921.

BLUE LEDGE MINING & MILLING CO.

WASHINGTON

Described in Volume XIV. Succeeded by Nineteen Nineteen Mining & Milling Co., which sec.

BLUE RIDGE MINING CO.

WASHINGTON

Address: H. A. Rodman, sec., Colville, Wash.

Officers: Thos. Taylor, pres.; Dr. Robt. Foster, v. p.; T. R. Roberts, treas.

Property: formerly owned by Aladdin M. Co., 14 miles S. W. of Northport, shows vein, proven for 1,200' on surface. Ore contains silver, lead and zinc. Developed by tunnel showing 5' vein with ore containing 40% lead and 20 oz. silver, with some zinc.

BLUE STAR MINING CO.

WASHINGTON

Address: Fred W. Dickey, Chewelah, Wash.

Officers: S. M. McPherson, pres.; L. R. Neston, v. p.; H. C. Moltern, v. p.; Jos. McPherson, sec.-treas., with F. L. Rienochl, C. M. Grove and F. H. Alm, directors.

Inc. 1906. **Cap.** \$1,600,000; \$1 par; 990,000 issued; assessable. Assessment levied, August, 1921.

Property: the Eagle group, 8 claims, 1 patented, 2 miles N. W. of Chewelah, Stevens county, said to carry silver-lead ore. Idle several years.

Production: \$40,000 to date. Property bonded to A. J. Moore, M. E., in September, 1921.

BONANZA MINE

WASHINGTON

Address: O. Jeldness, 2029 Second Ave., Spokane, Wash. **Mine address:** J. Veracke, supt., Bossburg, Wash.

Held under lease and bond by O. Jeldness and J. Veracke, since 1918. C. C. Brown, sec. Castle Rock Wash.

Property: 200 acres, located 3 miles from Bossburg, Stevens county, Wash. The mine, an old-time producer, is said to have had an output of \$1,000,000. Idle for 15 years and reopened June, 1919.

Geology: galena with pyrite and a little sphalerite occurs in lenses 6'-8' thick and up to 100' long, in shear zone in schists, intruded by granitic rocks.

Developed: by 700' inclined shaft with 100' levels and a total of over 3,000' underground workings. All ore above 800' level has been stoped. See U. S. G. S. Bulletin 550, p. 63.

Shipments of dump material contained 5 oz. silver and 20% lead. Employs 8 men.

BOSTON-AMERICAN MINING CO.

WASHINGTON

Officers: H. D. Cowden, pres., 606 Pantages Bldg., Seattle, Wash. C. A. Riddle, v. p.; L. E. Engel, sec.; F. W. Boston, treas., with J. H. Adams, P. E. Low, E. Garber and H. B. Cowden, directors. D. R. Kyes, supt.

Company is not a reorganization of the United Mining Co., Nevada, which see, but stockholders of the United Mining Co., with few exceptions, have more than an equal proportional holding in the Boston-American Mng. Co.

Inc. in 1913, in Washington. **Cap.** \$2,000,000; \$1 par; 1,600,000 common, 400,000 preferred; 1,344,200 common and 293,450 preferred issued.

Financial statement, January 1, 1917, showed: receipts for 1916, \$107,678; expenditures, \$68,928; balance on hand, \$38,750.

Property: 88 claims, 26 patented, and 4 patented mill sites, at Monte Cristo, Wash., said to show a dike of low-grade ore 300' wide, containing fissure veins with streaks of ore from a few inches to 4' in width. Ore said to contain gold, silver, copper, zinc and arsenic.

Development: total underground workings, about 19,600'.

Company's former literature considered grossly misleading. Fully described in Vol. XIV. No recent returns; probably dead.

BOUNDARY GOLD CO.

WASHINGTON

Company out of existence. **Address:** Isaac D. Sperry, 4921 Gramercy Place, Los Angeles. Former secretary: Geo. G. Gilchrist, 747 Gas & Electric Bldg., Denver, Colo. See Volume XIV.

BOUNDARY RED MOUNTAIN MINING CO.

WASHINGTON

Address: Reno, Nev. Mine address: Chilliwack, B. C.

Officers: Geo. Wingfield, pres.; E. A. Julian, gen. mgr.; C. F. Burton, sec.-treas. Stock is closely held. Control purchased June, 1916, by Geo. Wingfield and associates.

Property: in Whatcom county, is best reached from Chilliwack, B. C., 35 miles away. Claims show diorite with a fissure vein containing free gold in a quartz vein, averaging 2-3' in width, with 1.13 oz. gold per ton.

Development: carried on intermittently since 1889, is by 3 tunnels. A crosscut tunnel driven 500' below upper tunnel has a 500' drift on the vein, whose width and values are larger than above; ore shoot 520' long, 26" wide, averaged 1.13 oz. gold per ton.

Equipment: includes an hydroelectric plant and a complete 10-stamp mill.

Production: in 1916, 10,441 tons, having gross value of \$148,578. Idle, awaiting better mining conditions. Is the most important gold property of western Washington, operated by Wingfield et al in 1916 and 1917. Costs were \$3.78 for mining, \$1.17 for milling and \$1.15 general expense, or total, \$6.10 per ton in 1917. Recovery was 89%.

BRUCE CREEK MINES CO.

WASHINGTON

Company has discontinued operations at its Stevens county mine and is out of business. **Last address:** Bob Mabry, pres.-mgr., Hutton Bldg., Spokane, Wash. Described in Volume XIV.

BUNKER HILL MINING & SMELTING CO.

WASHINGTON

Described in Volume XIII.

Mining property and other assets were purchased by the Western Copper Mining Co. in June, 1917 for 975,000 Western Copper shares, which

constitute the only asset of the B. H. M. & S. Co. The new company also assumed all liabilities outstanding against the property.

BUTTE-CHEWELAH COPPER CO. WASHINGTON

Dead. Former address: J. O. Gillice, pres., Paulsen Bldg., Spokane, Wash.; F. M. Bell, v. p.; P. L. Eberhardt, sec.-treas., with G. B. Harrington and R. J. Davis (gen. mgr.), directors, at last accounts.

Inc. March, 1913, in Washington. Cap. \$1,000,000; shares \$1 par; fully paid and non-assessable; 500,000 issued.

Property: 4 claims, 75 acres, in the Valley mining district, shows vein in sedimentaries close to a diabase intrusion; average strike N. 25° E., and dip 60°. Ore contains chalcopyrite and gray copper in a gangue of quartz, calcite and spathic iron. At 100' in depth the vein is said to be 6' wide and the ore to average 2 to 5% copper, 1 to 5 oz. in silver and 50 cents to \$1 in gold per ton.

Developed by 100' winze, reported all in ore, a 300' shaft and 125' tunnel. Equipment includes a hoist and air-compressor.

CAREY MINING & DEVELOPMENT CO. WASHINGTON

In receivership (1920).

Company had a lease and bond on the Phil Sheridan and other claims in Sheridan camp, Okanogan county, owned by P. J. McCormick, Republic, Wash., and said to show a vein of silver ore with some gold and copper. Developed by 400' shaft and crosscut tunnel. Equipped with 50-ton concentrator and flotation plant. Mill feed averages 15 oz. silver per ton and concentrates 300 oz. silver. One shipment of silver concentrate made to Tacoma smelter in 1919.

CARL FREDERICK M. CO. WASHINGTON

Address: C. W. Quarries, sec.-treas., Coeur d'Alene, Ida. Mine address: C. Bernhard, pres.-mgr., Conconully, Wash.

Property: in Conconully district, Okanogan county, contains silver bearing ore.

CASCADIA MINING & DEVELOPMENT CO. WASHINGTON

Mine office: Toledo, Wash.

Officers: E. A. Sessions, pres., 212 Abington Bldg., Portland, Ore.; W. A. Gray, v. p.; W. D. Scott, sec.-treas., with M. A. Poppleton, J. P. Finley, Geo. S. Reid, F. H. Dowler, directors. J. F. Hartley, asst. sec.

Inc. March 12, 1887, in Washington. Cap. \$6,000,000; shares \$1 par; \$1,164,615 in treasury.

Property: 108 claims, 2,170 acres, 330 patented in St. Helens mining district on the divide at the head of the Toutle river in Cowlitz, Lewis and Skamania counties, includes the Polar Star and Minnie Lee groups. Properties show fissure veins in grano-diorite. The ore occurs in shoots, 2-12' thick and 20-100' long and is said to average 17.9% copper, 24.85% iron, 10.75% silica, 4% aluminum, 1.2% lime, 34.5% sulphur, 5.68% antimony, 0.8% zinc and 0.05% nickel.

Development: 5,000' of work including 300' to 700' tunnels with about 1,500' on ore. About 100,000 tons of shipping ore has been mined and put on the dump, waiting for cheaper transportation. The mines are 16 miles from a railroad over a heavy grade.

CASTLE CREEK MINING CO. WASHINGTON

Address: C. E. Cross, lessee, Republic, Wash.

Property: in Park City district, 20 miles S. W. of Republic, Ferry county. A 15-ton flotation plant was installed in 1920, to treat the silver ore of the mine dump.

CAYWASH MINING CO. WASHINGTON

Idle. Address: S. S. Callahan, sec., Twisp, Wash.

Officers: L. H. Prather, pres., Tacoma; W. R. Weisel, v. p.; D. L. Taylor, treas., both of Kennewick, Wash., with W. Wood, directors.

Cap. \$1,000,000; par \$1; assessable to 10 mills.

Property: 3 claims on Methow river, and 5 claims on Goat creek, near Mazama, Okanogan county, shows silver and gold bearing copper ore. The

ore from the Goat Creek group said to assay \$33 to \$54, and that of the Methow, \$8 to \$32 in copper, with a little gold and silver.

Development: shallow shafts and 3 tunnels, longest, 250'.

CHATTERBOY MINING CO.

WASHINGTON

Office: Dayton, Wash. **Mine address:** Danville, Wash.

Officers: A. D. Monnett, pres.; Judge C. F. Melton, sec.-treas. J. E. Leopold, mgr.

Inc. 1919, in Washington.

Property: a lease and bond on the Lucille Dreyfus mine, including 2½ claims, 1½ miles S. of Danville, Ferry county. Ore is low-grade, with chalcopryrite, pyrrhotite and pyrite, carrying gold, silver and copper. **Development:** by 1,300' adit.

CHELAN CONSOLIDATED COPPER CO.

WASHINGTON

Address: care of Michael J. Corcoran, Insurance, 180 Broadway, New York.

Operating office: 811 Lowman Bldg., Seattle, Wash. **Mine office:** Leavenworth, Chelan county, Wash.

Officers: F. D. Wilsey, v. p.; Thos. J. Higgins, sec.-treas., with Henry D. Bristol, Edw. W. Kuhn, A. T. La Vallette, J. S. Iurev and Louis Arndt Stein, trustees, at last report.

Inc. May, 1906, in Wash. **Cap.** \$12,000,000; \$10 par; issued, \$5,779,140. Guaranty Trust Co., New York, registrar. Annual meeting, first Tuesday in June. Company absorbed the **Red Mountain Gold & Reduction Co.**, the **North Star Mng. Co.** and a large number of individual mining properties.

Property: 14 claims at Index, Snohomish county, and 130 claims at Red Mountain, Chelan county, Wash., 50 miles north of Leavenworth.

The Index mine has a 4' vein, opened by tunnels of 600' and 700' with about 2,000' of workings, showing a 6' paystreak of high-grade bornite and chalcopryite ore.

The Red Mountain lands, 4 miles west of Phelps creek, 67 claims owned outright, and 58 additional claims held through the North Star Mining Co., controlled through stock ownership.

Development: by 2,000' main tunnel, supplemented by 600' of diamond-drill borings, showing a 5' vein carrying values in copper and gold, and 2 smaller veins.

Equipment: includes gasoline power, air compressor, and 7 buildings.

Company is inactive, as ore is low-grade and with low copper prices the mine cannot be operated profitably.

CHEROKEE MINING CO.

WASHINGTON

Address unknown.

Incorporators: Wm. Rakestraw, M. E. Bennett, Lloyd Harris, C. G. Edwards, all of Wilbur, Wash., and I. Toner, of Spokane.

Inc. 1917, in Washington to develop the Cherokee group of claims. **Cap.** \$1,500,000.

CHEWELAH COPPER KING MINING CO.

WASHINGTON

Address: S. P. Dommer, former pres., Spokane.

Defunct. See full description of organization, etc., in Vol. XIII. Property bonded at various times to King Mng. Co., Copper King Mng. Co., and United Copper M. Co.

CHEWELAH GREY COPPER MINING CO.

WASHINGTON

Dead, 1917. Formerly at Chewelah, Stevens county, Wash. See Vol. XII.

CHEWELAH SILVER MINING CO.

WASHINGTON

Address: W. B. Stewart, mgr., Chewelah, Wash.

Inc. 1920 in Wash. **Cap.** \$80,000 in 600,000 pd. and 1,000,000 common shares, 5¢ par; assessable. Assessment of one mill per share quarterly authorized by stockholders, March, 1921.

Property: at Chewelah, Stevens county. A tunnel, 800' long, will cut the ledge at depth of 300'.

CHLORIDE HILL MINING CO.**WASHINGTON****Officers:** R. B. McClary, sec.-treas., Spokane, Wash.**Cap.** \$1,000,000; \$1 par; outstanding 600,000 shares.**Property:** formerly owned by **Santiago Mining Co.**, 2 miles S. of Hunters, Stevens county, shows a 5½' vein in which some 80 oz. silver ore was found.**Development:** 90' shaft and 240' tunnel. Small shipments made in 1917. Idle and probably dead.**CHLORIDE QUEEN MNG. CO.****WASHINGTON****Directors:** J. C. Haas, pres., Wellington Apts., Spokane, Wash. Paul Le Plant, supt., with H. J. Doolittle, C. H. Preston, Chas. H. Case, and Earl T. Gates. D. E. Zent, mgr.**Property:** 5 claims, 14 miles N. E. of Colville, said to cover a ledge, 25-30' wide, for a distance of 3,000', showing streaks of rich galena ore, reported to run from \$22-\$80 per ton.**Development:** by 75' shaft, 135' winze and tunnel, with 5,000 tons of \$22 ore reported on the tunnel dump. A new crosscut tunnel, in 640', Sept. 1921, is being driven 180' vertically below No. 1. Eight men employed.**CLEVELAND MINING CO.****WASHINGTON**Described in Vol. XIII. Reorganized as **Santa Rita M. & M. Co.**, which see.**COLUMBIA COPPER CO.****WASHINGTON**

Probably dead. Former officers were C. M. Carroll, pres., Alex. Robinson, v. p.-mgr.; Oscar Olson, sec.-treas., all of Spokane, Wash. T. J. Vaughan Rhys, cons. engr.

Property: a 10-year lease and bond, for \$100,000 on the **High Grade S. & C. Mining Co.** claims in Deertrail Mining district, formerly owned by Carson Bros., of Reardon, Wash. Company sold property to the Granby Cons. of B. C. for \$120,000, but the High-Grade Co., controlled by Carson Bros., refused to sign deed, claiming failure to carry out contract. The High Grade Co. resumed control and was working the mine at last report. The Columbia brought suit against the High Grade Co. for damages and secured judgment for a small sum.**COLUMBIA SILVER MINING CO.****WASHINGTON****Address:** Dr. A. D. MacIntyre, Old Nat'l. Bank Bldg., Spokane, Wash.**Directors:** L. G. Bayley, E. R. Percival, Dr. A. D. MacIntyre, Frank Phillips and S. R. McClinton.**Inc.** 1920, in Washington. **Cap.** \$150,000; 5¢ par; 1,200,000 shares in treasury.**Property:** 17 claims, 3 patented, in Ninemile district, on the S. half of the Colville Reservation, about 14 miles N. E. of Keller, Ferry county.**Development:** by 500' of tunnels, 125' shaft and 65' winze, said to have opened up two veins, containing lead-silver values.

Management plans installation of 5-drill water-driven compressor and continuation of No. 4 tunnel.

CONSOLIDATED COPPER CO.**WASHINGTON****Address:** Valentine W. Brasch, sec.-gen. mgr., Turk, via Fruitland, Wash.**Inc.** 1913, in Washington. **Cap.** \$1,500,000; shares \$1 par, assessable. Annual meeting, January. Company is a reorganization of the Togo Mining & Smelting Co.**Property:** about 240 acres, 160 patented, in Cedar Canyon district, near Springdale, Stevens county. Ore occurs principally as copper pyrite in slate, serpentine and quartzite with a N.-S. strike and 40 to 60° dip. One ore-body, developed by tunnels, with about 2,000' of workings, reported by management to average 3 to 5' in width, in upper levels, and to carry 8% copper, 3½ to 5 oz. silver and a trace of gold. Upper levels said to show bornite, copper glance and a little native copper.**Equipment:** includes gasoline engine and hoist. The mine has been closed down for several years.

CONSOLIDATED FIRST THOUGHT MINES CO. WASHINGTON

Idle. Succeeds First Thought Mining Co.

Address: Orient, Stevens county, Wash.

Officers: M. B. Grieve, pres., Old Natl. Bank Bldg., Spokane, Wash.; O. J. Smith, sec.-treas., with J. E. Pickerell and S. Eslick, directors.

Inc. 1919, in Washington. **Cap.** \$1,000,000; \$1 par.

Property: 94 acres of gold-silver bearing claims in Pierre Lake district, near Orient.

Ore occurs in fracture zone in latite lava, near intrusive granite. Zone is 100' wide and known for 700'. Ore is pyrite with gold, occurring where cross fissures intersect main zone.

Development: by 3 adit levels and 130' winze; bottom level shows 5' of \$12 ore.

Equipment: includes a 6-drill compressor, hoist, 2½ mile aerial tram, assay-office, and complete mining plant.

Production: 1904 to 1910, 35,627 tons averaging \$16.88 per ton. Idle since 1914.

CONSOLIDATED MINES CO. WASHINGTON

Address: Jas. Keeth, 311 Hyde Block, Spokane, Wash.

Property: in Cedar Canyon district, Stevens county, 25 miles from Springdale, includes the Elephant and Deer Trail silver mines. The Deer Trail has been idle since 1919 owing to litigation.

Production: in 1919, 48 cars of ore were shipped from old dumps and fills. A new orebody, of low grade ore, reported cut, 1921.

COPPER BUTTE MINING CO. WASHINGTON

Orient, Ferry county, Wash. J. D. Gumper, pres.; H. J. Miller, sec.; Willis Townsend, gen. mgr.

Inc. December, 1905, in Washington. **Cap.** \$1,000,000; shares \$1 par.

Property: 4 claims, patented, in the Pierre Lake district, south of Orient, shows 2 veins in open cuts, 14' and 15' wide, respectively.

Development: by 300' shaft with drifts on the 100' level shows copper-gold ores, but not in commercial quantity. A 1,000' tunnel was expected to cut the ledge at a depth of 430' below the surface. Work was reported resumed in 1921 and a crosscut begun in the main tunnel, 600' from portal, following a well defined vein.

COPPER CLIFF COPPER MINING CO. WASHINGTON

Inactive. Probably dead. **Mine office:** Chewelah, Stevens county, Wash.

Officers: T. F. Wilson, pres., treas., and gen. mgr.; J. O. Blair, v. p.; L. C. Dougherty, sec.

Inc. February 24, 1912, in Washington. **Cap.** \$1,000,000; \$1 par; issued \$62,000.

Property: 60 acres and 40 acres timber lands, held under bond and lease, in the Chewelah district, shows contact deposits between altered granite and limestone. Ores are mainly copper, with small silver and gold values.

Development: by tunnels, longest 1,026', giving depth of 800'.

COPPER HOARD MINING CO. WASHINGTON

Address unknown.

Property: the Lookout claim, formerly under bond to the Chewelah Grey Copper Mng. Co.

COPPER KING MINING CO. WASHINGTON

Address: Chewelah, Wash. F. M. Jarvis, receiver.

United Silver Copper Mining Co. had \$75,000 bond on group but relinquished control, 1919.

The receiver advised stockholders, in June, 1919, that company owed \$65,000, including bond issues of \$31,396, and suggested that company be reorganized.

The United-Silver Copper Mining Co. did considerable development, both underground and by diamond drilling, said to have disclosed large

bodies of low-grade ore, which, however, can not be worked profitably with present mill equipment. The plan to reorganize, block out ore, and built a flotation mill seems the logical solution of the company's difficulties.

In 1921 a consolidation was planned with the United Silver-Copper Mng. Co., that owns adjacent claims.

Property fully described in "Metal Mines of Washington," p. 131, Bull. No. 23 of Washington Geological Survey, Seattle, Wash.

COPPER KNOB MINING CO.**WASHINGTON**

Address: Laurier, Wash.

Officers: Burt A. Purchase, pres., Spokane, Wash.; with W. W. Stevens, trustee, J. S. Meyers, J. T. Brunskill, Laurier, Wash.; J. E. Winters, and E. O. Conner, Spokane, directors.

Cap. \$100,000; par 10c; non-assessable.

Property: 7 claims, unpatented, near Laurier, said to show copper ore, with small precious metal content.

Development: by 60' shaft and 35' crosscut said to show 28' of ore. Only assessment work done in recent years. Operations to be resumed in near future.

COPPER QUEEN MINING CO.**WASHINGTON**

Property taken over by Copper King Mining Co.

COPPER WORLD EXTENSION MINING CO.**WASHINGTON**

Address: Nighthawk, Okanogan Co., **Head office:** Columbus, Ohio.

Officers: Walter A. Boyle, pres.; Edw. H. Caylor, v. p.; Alfred F. Carman, sec.-treas.

Property leased to **Dempster Mines Co.**, New York. (R. C. Dempster, supt.), who are said to have spent \$95,000 for equipment and development work to end of 1920.

Inc. Jan. 11, 1904, in Washington. **Cap.** \$1,500,000; \$1 par.

Property: 8 claims, 160 acres, on Palmer mountain, in the Wannicut lake district. The ore is sulphide containing 2½ to 4% copper and occurs in lenticular masses in a contact between schistose and highly silicified andesite formation.

Development: by a 335' 2-compartment shaft, with total workings of 2,000'. Some diamond-drilling done in 1920.

In 1917-18, shipments amounted to 3,500 tons ore, assaying 4% copper, 0.6 oz. silver, and 0.025 oz. gold per ton.

Equipment: includes steam plant, with 40-h. p. hoists and 4-drill air-compressor. A 2-mile Riblet aerial tram was completed in 1919; capacity, 400 tons in 24 hours. Employs 14 men.

COPPER WORLD GOLD MG. & SM. CO.**WASHINGTON**

Office: 401 Columbia Bldg., Spokane, Wash. **Mine office:** Loomis, Okanogan county, Wash. Jerome L. Drumheller, pres. and mgr.; John Wentworth, v. p. and supt.; S. A. Child, sec.-treas.

Inc. in Washington. **Cap.** \$3,000,000; shares \$1 par, non-assessable.

Property: Copper World and Copper King claims, patented lying between the Copper World Extension on the east and the Leadville mine on the west, on Palmer mountain, 6 miles N. E. of Loomis. **Ore:** a heavy sulphide containing 3-5% copper, occurs in a contact zone 100' wide, and is proven by surface work for 3,000'.

Development: the mine has several short tunnels and shallow shafts and a 135' two-compartment incline shaft, having a 125' crosscut. Work shows several lenses, 8'-13' wide. This and the adjoining property, Copper World Extension (which see), are under 10-year lease to Dempster Mines Co., from Sept. 1, 1917.

CRESCENT MINING CO., LTD.**WASHINGTON**

Company is a reorganization of the Crescent C. Mng. Co.

Office: 101 Horace St., Norwood, Manitoba, Can. **Mine office:** Twisp, Okanogan county, Wash.

Officers: D. C. McFee, pres.; Robt. Albright, v. p.; D. Munroe, sec., with J. H. Sutherland, F. J. Car, Alex. Munroe, W. H. Plumer, W. J. Nillaron, directors.

Cap. \$3,000,000; unsubscribed stock, \$1,291,786; \$1 par.

Property: 48 claims, about 960 acres, and a mill-site on the east side of Cascade Range, in Okanogan county, about 100 miles S. W. of the Granby. Ore occurs in fissure veins, carrying chalcopryrite, bornite and quartz. Main development by tunnel over 900' long. A good deal of graphite is mixed with ore.

Equipment: includes a turbine, electric plant, air drill, saw-mill, mine buildings and miners' lodgings.

CROWN POWER MOLYBDENUM CO.

WASHINGTON

Succeeds Aurelia Crown Co.

Address: P. O. Box 187, Seattle, Wash.

Officers: O. Robt. Dahl, pres.-treas.-gen. mgr.; H. C. Kohl, v. p.; Calvin Dier, v. p.; John B. Van Dyke, sec.; L. A. Dahl, asst. sec.-asst. treas., with Albert Dobbertin and George C. Whipple, directors.

Inc. 1916, in Wash. **Cap.** \$5,000,000; par \$5; all issued.

Property: 6 claims, 120 acres, and 1 millsite of about 5 acres, 16 miles west of Lucerne, Chelan county, Wash. Property includes gold, copper, silver-lead and molybdenite mines.

Development: by 8 tunnels, of about 1,400' aggregate length, and several open cuts. The Crown Point molybdenum mine has 3 tunnels, said to develop 9,000 tons of ore. Tunnel No. 3, on the copper vein, shows 4 ore shoots, of 4 to 8' width, carrying ore said to give average assays of 15.5% copper and \$8.65 gold and silver per ton. Management estimates "6,500,000 tons ore explored assaying 2% copper and \$6 per ton in gold and silver."

Equipment: includes hydraulic plant, air-compressor, machine shop, engine house, saw-mill, warehouse and 3 cabins. The mill has 2 crushers, rolls and a concentration mill with flotation equipment, to treat 50 tons molybdenite ore daily, in 1922.

Geologic features described by A. R. Crook in Bull. Geol. Soc. Am., Vol. 15, pp. 283.

CRYSTAL MINING CO.

WASHINGTON

Address: Capt. John Gray, No. 214 Third St., Spokane, Wash. **Mine address:** Miles, Wash.

Property: 40-acres .35 miles W. of Lincoln, in Lincoln county. Developed by 200' shaft.

Reported under option, 1919, to E. S. Campbell and associates for \$200,000.

CUPRITE MINING CO.

WASHINGTON

Address: Frank Scanislowski, gen. mgr., Bossburg, Wash.

Property: bond and lease on the Young American mine, near Bossburg, Stevens county. Shows lenses of high grade silver-lead-zinc ore in limestone. Lenses vary from 6' to 30' in width, 75-100' long and 10' high.

Development: by 4 tunnels.

Equipment: includes 15-ton mill with crusher rolls, Overstrom tables, etc.

DEER TRAIL CONS. MNG. CO.

WASHINGTON

Address care: Clarke Bros., Paulsen Bldg., Spokane, Wash.

Company owned an interest in the Deer Trail group of the Cons. Mines Co., which see.

DEER TRAIL MINES

WASHINGTON

Address: Jas. Keeth, 311 Hyde Block, Spokane, Wash.

Property: in Cedar Canyon district, Okanogan county, was a well known producer 25 years ago. New owner of north end of group, including claim from which most of shipments were made 25 year ago (totalling

\$3,000,000), is to complete the mill as soon as a proper flow sheet has been worked out.

DEMPSTER MINES CO.**WASHINGTON**

Office: care C. Dempster & Sons, New York City. **Mine address:** Reginald C. Dempster, supt., Nighthawk, Wash.

Operates the Copper World mine, under bond and lease since 1918, and Copper World, 1921, planning to do diamond drilling 1921-22. Properties described under respective titles. Ore is a heavy sulphide, in demand by smelters as a flux. Producing, 1917-19.

DIAMOND R. MINING CO.**WASHINGTON**

Address: A. H. Kroll, Realty Bldg., Spokane, Wash. **Mine address:** C. L. Wickstrom, mgr., Metaline, Wash.

Officers: Wm. Kroll, pres.; A. H. Kroll, v. p.; E. S. Campbell, sec.-treas.

Cap. \$100,000, 10c par.

Property: 6 claims, patented, in Pend Oreille county, one mile from Metaline. The ore occurs as irregular bunches and seams of galena.

Development: by tunnel, crosscuts and winze. **Equipment:** 25-ton mill and air-compressor. Concentrate averages 60-72% lead, 2-9 oz. silver and 1-4% zinc.

DOMINION SILVER LEAD CO.**WASHINGTON**

Officers: W. H. Linney, pres.-mgr., 2805 Summit Blvd., Spokane; Chas. P. Lund, v. p.; R. R. Rogers, sec., all of Spokane; W. L. Johnson, treas. and trustee.

Inc. 1915, in Washington. **Cap.** \$100,000; par \$10; non-assessable. Owning to litigation, property was idle for several years.

Property: Old Dominion and Ella groups, 10 miles E. of Colville, said to show high-grade silver-lead ore. Mine first opened in 1885, produced 3,061 tons of ore worth \$602,536, mostly within 100' of surface.

Development: by tunnel cutting vein of rich silver ore at 2,150' from portal, at depth of 600'. A drift on vein opened 2½' of \$1,000 ore, persisting for 40' to 50' upward, at last report. Ore carries 10-54% lead, some copper and gold and 737 to 1,409 ounces silver per ton.

Equipment: includes small plant and power drills.

DOUBLE EAGLE MINING CO.**WASHINGTON**

Officers: M. Kulzer, pres., Valley, Wash.; W. S. Rose, v. p.; E. E. Edwards, sec., Valley, with J. L. Dirks, W. H. Button, and A. Morrison, directors.

Cap. \$1,000,000; \$1 par. No debts and \$4,000 cash reported in treasury, March, 1921.

Property: 4 claims, and 200 acres leased land in Stevens county, 12 miles W. of Valley, said to show silver-lead-copper ore.

Development: by tunnels to depth of 700', and 4 adits. A 300' adit is being driven on the bottom level, where the ore shoot widened out from 6-18" following the tunnel for 50'. Shipments reported to average \$95 per ton.

The American Refractories Co. has a 10-year lease on a large magnetite deposit on Double Eagle ground.

The ground has been explored by diamond drill and 3 kilns, ore bins and a \$20,000 gravity tramway installed.

DOUBLE HEADER MINING CO.**WASHINGTON**

Address: care L. C. Shuff, Nespelem, Wash.

Officers: Geo. M. Quinn, pres.; L. C. Shuff, sec.-treas.; with E. Moore, C. J. Kennedy, and E. Smith, directors. Reported in November, 1918, that property was being operated by a close corporation, the Jenkins-Hammond Co., with Frank C. Hammond, mgr.

Inc. 1914, in Washington. **Cap.** \$1,500,000; \$1 par; 1,174,326 issued. Annual meeting, first Tuesday in June.

Property: 7 claims, 120 acres, 1½ miles S. of Nespelem, Wash. Ex-

amed by A. O. Ingalls and others. Claims cover a quartz vein in granite, dipping 38° N. E., with N. W.-S. E. course.

Development: by 80' vertical shaft, 180' incline and 390' adit. Shipments made at irregular intervals, reported sent to the Great Metals M. & M. Co. mill in 1920.

DUTCH MILLER MINING & SMELTING CO. WASHINGTON

H. P. Fogh, pres. and agent for majority stockholders, 1403 Howell St., Seattle, Wash. Geo. H. Law, sec.-treas.

Cap. \$2,000,000; shares \$1 par: all issued; 1,000,000 shares in escrow for 5 years. Majority of stock is held by an ore contract association which made a 5 year contract for output, the Dutch Miller to get 40% of earnings as royalty, one-half to apply on 500,500 shares optioned to the association.

Property: 2 patented claims, on summit of range, 12 miles south of Skykomish, Wash., formerly worked by the Seattle-Boston Copper Co. Claims show an orebody in a vein in granodiorite. Ore is chalcopyrite with tourmaline and quartz, and is high-grade. Mine lacks transportation facilities and rope tramway must be installed to get ore to the wagon-road

Examined by W. H. Weed. Inactive for several years, but company still alive.

BAGLE PEAK COPPER SPRINGS MINING CO. WASHINGTON

Mine office: Longmire, Pierce county, Wash. **Main office:** Tacoma, Washington.

Officers: R. H. Wheelock, pres., Ashford, Wash.; J. E. Walker, v. p.-mgr.; M. A. Long, sec.-treas., with G. W. Anderson and A. Lundin, directors. Inc. 1908 in Washington. **Cap.** \$150,000; \$1 par; issued, 130,000. Annual meeting, September 10.

Property: 40 acres in Cascade mining district, 14 miles from railroad, in the heart of the Tatoosh range, near Mt. Tacoma. Claims show fissure veins in granite, 6'-5' wide, carrying bornite, chalcopyrite, pyrite and arsenopyrite.

Development: by 600' tunnels. **Equipment:** includes 25-h. p. power plant, air compressor and aerial cableway. A small amount of development work is done each year.

ECLIPSE CONS. MNG. & INV. CO. WASHINGTON

Fully described in Vol. XIV. Succeeded by Virginia-Agenda Co., which see.

ELECTRIC POINT MINING CO. WASHINGTON

Address: Northport, Wash. C. D. Belser, supt.

Officers: Roy A. Young, pres.-gen. mgr.; Henry Broderius, v. p.; F. M. Turner, sec.; H. M. Waddell, treas., with L. C. Jesseph and A. V. Downs, directors.

Cap. \$1,000,000; \$1 par: 793,750 shares issued. Financial statement shows operating loss in 1920 of \$18,390, as compared with \$55,933 in 1919 and \$30,166 in 1918.

Balance sheet to Dec. 31, 1921, shows current assets, \$43,640; total assets, \$521,525; current liabilities, \$6,988.

Dividends: initial on Jan. 31, 1916; \$7,935 in 1916; \$158,700 in 1917; \$87,230 in 1918; \$47,580 in 1919; \$142,740 in 1920. The total is \$444,185, or 56¢ per share.

Property: 13 claims, 245 acres, unpatented, 20 miles E. of Northport, Stevens county, and 13 miles from Boundary, the shipping point. Mine is on top of a mountain, 4,000 to 5,000' high.

Geology: the ore occurs in 5 large, egg-shaped replacement chimneys in magnesium limestone. The chimneys are nearly vertical, 30 to 50' across and 100' to 600' deep. Ore consists of limonitic clay holding cerussite, galena nodules and remnants of a dike of very basic igneous rock. See Metal Mines of Washington Bull. 23, Wash. Geological Survey, Seattle.

Development: 10,000', including 800' shaft and 1,000' tunnel on 300' level.

Equipment: includes a 2½ mile aerial tram, from mine to Leadpoint, and another section to be built to Wood Spur; ore bins and suitable mining plant.

Production: in 1920, 1,420 tons of high grade sulphide, 7,013 tons of first class carbonate and 2,315 tons of second class carbonate ore were mined. In 1917, shipments totaled 16,310 tons ore; in 1918, 8,214 tons were shipped, returning \$241,138; in 1919, ore sales amounted to \$62,598; and in 1920 to \$265,074. Shipments made to Northport and Midvale smelters.

The future of the mine seems to depend more on the possibility of finding a market for the ore, than on the amount of ore. Property closed down since January, 1921, pending higher metal prices.

Company furnishes most of lead produced in Washington.

ELIZABETH GOLD HILL MINING CO. WASHINGTON

Address: care Frank X. Nagler, Yakima, Yakima county, Wash.

Officers: L. L. Matterson, pres.; P. J. Eschbach, v. p.; Frank X. Nagler, sec.-treas., with Jos. Feser, Thos. Hope, E. P. Sanford and Rudolph Mayer, directors.

Inc. 1900, in Washington. **Cap.** \$1,000,000; \$1 par. Annual meeting, second Monday in March.

Property: 14 claims, unpatented, 200 acres, adjoining the Blue Bell mine on the north, about 65 miles N. W. of North Yakima, in the Summit district, shows a number of orebodies in granite, carrying gold-silver-lead-copper ores with 1,600' of workings.

Ore reserves: estimated by management, 150,000 tons of ore, with 100,000 tons blocked out for stoping, averaging \$40 per ton, which figures are excessive.

Equipment: includes steam and water power and a small sawmill, with material for a 10-stamp mill on the ground. Idle since 1917.

EMPIRE MOLYBDENITE M. & M. CO. WASHINGTON

Address: M. B. Le Page, sec., 621 S. Adams St., Spokane, Wash.

Officers: I. Le Page, pres.; D. J. Whelan, v. p.; Fred Le Page, treas., with A. G. Clark, directors.

Cap. \$100,000; shares 10c par.

Property: 8 claims, unpatented, on Molybdenite peak, Metaline district, Pend Oreille county, 11 miles from Ione. Claims carry molybdenite ore that has been worked in a small way for several years, and some shipments made.

FAVORITE GOLD & COPPER MINING CO. WASHINGTON

Probably dead. See Vol. XII.

Mine at Nighthawk, Okanogan county, Wash.

F. H. & C. GOLD MINING CO. WASHINGTON

Address: J. J. Hennessy, Old Bank Bldg., Spokane, Wash.

Officers: S. A. McCay, pres.; M. L. Luby, v. p.; J. J. Hennessy, treas.-mgr; Mary Hennessy, sec., with Martin Woldson, directors, all of Spokane.

Cap. \$250,000; shares 25c par.

Property: 53 acres, 2½ miles N. W. of Rockcut, Ferry county, has gold-silver ore.

Development: 170' shaft, with about 1,000' of workings. **Equipment:** includes gasoline hoist and compressor. Small shipments were made to Granby smelter in 1918. No later information.

FIRST THOUGHT GOLD MINES, LTD. WASHINGTON

Succeeds First Thought Mining Co.

Office: Empire State Bldg., Spokane, Wash. **Mine address:** Orient, Stevens county, Wash.

Officers: M. B. Grieve, pres.; W. J. C. Wakefield, v. p.; Jos. McCarthy, treas.; O. J. Smith, sec.

Inc. 1919, in Washington. **Cap.** \$500,000; par 25c; 500,000 treasury shares. **Bonds:** \$200,000 8s authorized, 1921.

Property: 9 patented claims, 141 acres, in Pierre Lake district, 2½ miles from Orient, shows a brecciated zone, 10 to 110' wide, in porphyry-quartz-latite contact, with minor cross faults. Richer ore shoots occur at intersections; ore is gold-bearing; high grade averaging \$15.50 gold and ½ oz. silver per ton; low grade about \$6 per ton.

Development: by 200' shaft with winze to 7th level; levels at 50' intervals, No. 4 being 600' long with 75' crosscuts at every 50'; workings total 6,000'. Reported to have 400,000 tons of \$6 ore in reserve. The possibility of finding other ore shoots exists.

Equipment: includes 6-drill compressor, hoist 2½ mile aerial tram, assay-office, and complete mining plant. Ore is said not to be amenable to amalgamation or concentration, but shows a 92% extraction with cyanide.

Production: between 1904 and 1910, totals 38,180 tons of \$612,000 gross value. Idle since. Property to be sold, or failing this, attempt will be made to place bonds, 1922.

FIRST THOUGHT SILVER MINING CO.

WASHINGTON

Address: Ernest N. Patty, lessee, Okanogan, Wash.

Property: in Ruby-Conconully mining district, Okanogan county, 12 miles N. W. of Okanogan, reopened in 1921 after an idleness of 30 years duration.

Sulphide ore occurs in a marginal quartz vein in granite and schist, 5-40' in width, with N.-S. course and dip of 75° E. Assays reported to be 5-70 oz. silver; 1-6% lead; 1% copper.

Development: by tunnels to depth of 500', with over 5,000' of workings.

Production: one shipment of 27½ tons assayed 47 oz. silver, 1% copper and 30c. gold per ton.

FLORENCE-RAE COPPER CO.

WASHINGTON

Address: Index, Snohomish county, Wash.

Property: on Copper mountain, about 4 miles E. of Index, has a tunnel showing a 10' paystreak of chalcopryrite in the Margurite vein and assay of 400 lb. sample taken across 6' of the vein averages 12 oz. silver, 18.5½% copper, 29.6% iron, 7.2% silica, and 35.8% sulphur. Mine was operated in 1918 by Cascade Mng Co. and several shipments made.

FOUR METALS MINING CO.

WASHINGTON

Address: R. S. Grant, pres.-mgr., Nighthawk, Wash.

Property: 1½ mile S. W. of Nighthawk, Okanogan county, contains a silver-bearing fissure vein, 2-12' wide, in granodiorite, with N. W. course and dip of 32° W. Ore contains argentiferous galena, chalcopryrite and pyrite.

Development: by shafts and crosscuts. **Equipment:** includes a 50-ton concentrator erected in 1921 that contains ball mills, two jigs, five tables and flotation machines.

FRANK MINING CO.

WASHINGTON

Address: Chewelah, Wash.

Officers: A. C. Weary pres.; W. R. Stuart, sec.-treas.-mgr., with Wm. Thompson, directors.

Cap. \$80,000; 5c par.

Property: 4 claims, 80 acres, near Chewelah, said to show copper-lead ore in quartz vein. Developed by 120' shaft. A prospect.

FRISCO-STANDARD MINING CO.

WASHINGTON

Address: J. T. Burcham, sec.-treas., Sherwood Bldg., Spokane, Wash.

Mine address: New Boundary, Wash. J. Astloford and W. E. Hightower, of Northport, lessees.

Property: in Northport district, Stevens county, 1½ miles from the International border. Ore occurs in a quartz vein, 2-4' wide, containing tetrahedrite and galena.

Developed by drifts and stopes. Smelter shipments reported to have contained 49 oz. silver, 7% lead and 3% copper.

GALENA FARM MINING CO.**WASHINGTON**

Address: Dr. W. J. Keyes, sec.-treas., 202 Fernwell Bldg., Spokane, Wash.

Directors: Sam Kailin, pres.; David O'Neil, Chas. McSperrin, Dr. Ben Kailin, W. H. Keough, Elmer J. Miller and W. J. Keyes. W. H. Keough, mgr.

Property: 8 claims, in Stevens county, 16 miles S. E. of Northport, said to show lead-silver ore, averaging 11 oz. per ton in silver.

Development: by open-cuts and 200' tunnel. All work was discontinued during the war, but it is to be resumed on a 70' shaft.

GALENA HILL MINING CO.**WASHINGTON**

Address: Reardon, Wash. W. S. Bliss, mgr., Orient, Wash.

Officers: W. L. Shearer, pres.; V. A. Finrow, sec.-treas.

Inc. 1911, in Washington.

Property: Kettle River mine, 5 claims and a fraction, on Kettle river, 10 miles N. of Orient, Stevens county. Ore occurs in a vein, averaging 3' in width, containing galena, sphalerite, pyrite and chalcopyrite.

Development: by 270' double-compartment shaft, 80' winze and 1,000' of drifts and crosscuts. Developing since 1918 with a force of from 5-10 men.

GENERAL COPPER MINING CO.**WASHINGTON**

Address: care Dr. Robert Bell, pres., Paulsen Bldg., Spokane, Wash.

Officers: Robt. Bell, pres.; Arthur L. Hooper, sec.-treas., with A. C. Johnson, A. G. Rudeen, Dr. Peter Reid, Dr. J. H. Thompson and J. V. Campbell, directors.

Property: 1 mile N. of the Admiral mine, near Valley, Stevens county, said to show 4' of 6% copper ore, containing 5 oz. per ton of silver. Company plans exploration and development work in 1922.

GIANT SILVER MINING CO.**WASHINGTON**

Address: Fruitland, Wash.

Property: a lease and bond on the holdings of the Red Cloud Mining Co., in Deer Trail district, Stevens county.

GLADSTONE MOUNTAIN MINING CO.**WASHINGTON**

Address: W. J. Nichols, 201 Sherwood Bldg., Spokane, Wash. **Mine address:** Dan Dodd, supt., Leadpoint, Wash.

Officers: T. S. Lane, pres.; W. J. Nicholls, v. p.-treas., with J. A. Welch, F. R. Wolfe and Jesse M. Hall, directors. M. R. Luhn, sec.

Inc. August, 1916, in Washington. **Cap.** 1,500,000 shares; 10c par; non-assessable; 351,556 outstanding.

Property: 16 claims, 11 surveyed for patent, 291 acres, situated 20 miles E. of Northport, adjoining the Electric Point mine, the claims almost surrounding that property.

Geology: vertical chamber or so called "chimney" deposits in limestone. Ore contains lead as carbonate, 1 oz. silver, trace of gold. Nine sulphide chimneys were opened in 1919.

Development: by Setting Sun shaft 275' with 450' work on 4 levels that show pay-shoot 120' long of carbonate lead ore. Also has 120' Long Star shaft with ore.

Equipment: 15-h. p. gasoline hoist. Seven men employed.

Production: in 1917 shipped 22 cars of 15 to 18% lead ore netting \$12,000. Closed down in 1917, owing to lack of funds, but was reopened in 1919 and by October, carbonate and sulphide ore had been found carrying up to 79.3% lead. Six cars of ore shipped in 1920 averaged 77.5% lead, amounting to \$19,217.

GORRIEN MINING CO.**WASHINGTON**

Name changed 1922 to **Washington Black Rock Mining Co.**, which see.

GRANT CONSOLIDATED COPPER MINING CO.**WASHINGTON**

Officers: at last accounts, C. H. Clodins, pres., Ritzville, Wash.; J. MacDonald, v. p.; J. A. MacLean, sec.-treas., S. 714 Oak St., Spokane.

Inc. 1907, in Washington. **Cap.** \$1,650,000.

Property: 14 claims, on Copper mountain, 9 miles from Chesaw, Okanogan county, developed by an open cut and tunnel planned to be driven 1,500', cutting 2 strong veins carrying medium-grade chalcopryite in considerable quantities. Shipments said to have returned about 6% copper and \$3 gold per ton.

Equipment: includes two 80-h. p. boilers and an air compressor. Letters neither answered nor returned. Presumably idle.

GREAT METALS MINING & MILLING CO. WASHINGTON

Address: Almira, Lincoln Co., Wash. E. C. Williamson, mgr.; Albert Nelson, supt.

Property: 46 claims on Mineral Hill, 2 miles west of Nespelem, also bond on Cabin property.

Development: 200' Cabin shaft with levels at 85' and 200' opening shear zone containing quartz calcite veinlets with zinc-lead sulphides.

Equipment: includes a 60-ton custom mill with gravity concentration and flotation. Concentrate carries 200-400 oz. silver per ton and is shipped to the Tacoma smelter. Idle since 1920 owing to shortage of water.

GREAT NORTHERN MINING CO. WASHINGTON

Address: Jos. Rosslow, Hyde Bldg., Spokane, part owner in 1918.

Property. 4 patented claims, on San Poil river, Ferry county, 15 miles from Keller, said to show gold-copper ore, with some nickel and cobalt. Workings totaled 1,850' at last accounts.

GWINN MINING CO. WASHINGTON

Property acquired by Hall Creek Mining & Milling Co., which see.

HALL CREEK MINING & MILLING CO. WASHINGTON

Address: Rosalie, Wash.

Officers: M. W. Merritt, pres.; W. F. Bing, v. p., with S. Lamley, L. S. Kimm, H. Mondt, Sr., and Geo. Barley directors. Peter Proff, Jr., sec.-treas.-mgr., Rosalie, Wash.

Inc. in Washington. **Cap.** \$1,000,000; shares \$1 par. Annual meeting. 3rd Wed in April.

Property: 240 acres including the Gwinn mine and group of claims. shows a fissure vein carrying silver-gold-copper ore, developed by 400' shaft and 1,000' underground work.

Equipment: includes steam plant and water power, hoist and 4-drill Fairbanks compressor. Has a 75-ton concentration mill, driven by electric power.

Idle, 1921.

HAMMOND MINING CO. WASHINGTON

Address: Geo. C. Fisher, sec., Billingham, Wash.

See Vol. XIII for details.

HECLA COPPER MNG. CO. WASHINGTON

Address: care J. C. Argall, San Marco Apts., Spokane, Wash.

Out of business. Fully described in Volume XIV. Mine, near Chewelah, reported sold to the International M. & M. Co. of Idaho, which see.

HIGH GRADE SILVER & COPPER MINING CO. WASHINGTON

Address: Henry Carstens, 906 Fairview St., Spokane; J. A. Hansen, treas.

Inc. July, 1909. **Cap.** 1,500,000 shares, assessments of 9 mills levied to date.

Property: 3 claims, about 3 miles N. E. of Chewelah, Stevens county. shows a granite intrusion in lime with mineralization along contact. Ore: high-grade copper with silver and lead values.

Development: by 125' shaft and a new 60' shaft being sunk on a body of oxidized iron ore. **Equipment:** includes hoist, boiler, pump, etc.

See Columbia Turk Copper Co., for lawsuit, etc. Geology of district shown on map, p. 122 of Bull. 23, Geol. Survey of Washington, 1921.

No production reported since 1916.

HOLDEN GOLD & COPPER MINING CO. WASHINGTON

Address: O. A. Hoag, sec., Spokane, Wash. **Mine address:** W. Y. Williams, mgr., Lake Chelan, Wash.

Officers: J. H. Holden, pres.-mgr., Chelan, Wash.; A. W. Lachapelle, v. p.; O. A. Hoag, sec.-treas., with Chas. N. Boon, directors.

Cap. \$250,000. Company has no debts and no earnings to date.

Property: 3 claims, 60 acres, on Railroad creek, near Lake Chelan, 87 miles N. of Wenatchee on the G. N. R. R., shows gneiss and schist cut by granite with a vein of 40' average and 185' claimed maximum width.

Development: by 6 tunnels, No. 2 and 3 being connected by a blind shaft with about 2,000' of workings on 3 levels and several hundred feet of diamond-drilling. There also are numerous open cuts. Mine shows ore said to assay from 7 to 10% copper, 2 oz. silver and \$5 to \$10 gold per ton. Idle, except for annual assessment work.

HOMESTEAD COPPER CO. WASHINGTON

Address: W. H. Angel, mgr., Colman Bldg., Seattle, Wash.

Officers: C. Dell Floyd, pres., Chehalis Wash.; Mrs. Peter McLane, v. p.; Peter McLane, treas., with W. H. Angel (mgr.), directors. Agnes W. Floyd, treas.

Inc. in Washington. **Cap.** \$1,000,000; par \$1.

Property: 9 claims, 180 acres, 6 miles from Index, Snohomish county, said to show copper ore. Workings amount to only 200' of tunneling. Is a prospect.

ILLINOIS COPPER & SILVER MINING CO. WASHINGTON

Address: J. C. Davis, Keller, Ferry county, Wash.

Officers: J. C. Davis, pres. and gen. mgr.; J. D. Nighbert, v. p.; R. Shoemaker, supt.; Edwin Johnson, sec.; J. D. Hess, treas.

Inc. in Washington. **Cap.** \$2,000,000; \$1 par; in \$1,000,000 preferred and \$1,000,000 common stock.

Property: 10 claims, in the San Poil district, and "a 1/8 interest in 160 acres of granite", 21 miles N. of Keller.

Development: by 3,000' of tunnels, exposing zinc-copper ore with silver values.

Equipment: includes \$5,000 worth of machinery, all well housed.

No recent returns, presumably idle.

INSURGENT GOLD MINING CO. WASHINGTON

Address: G. B. Dennis, Knickerbocker Apts., Spokane, Wash.

Inc. in Washington. **Cap.** \$500,000; \$1 par.

Property: 1 claim and fraction, adjacent to the Hope mine of the Northport S. & R. Co., at Republic, Ferry county, controlled by the Day Bros.

Development: by 540' shaft, opening a 15' vein.

In 1919, the Days started suit against the Insurgent and Lone Pine-Surprise Consolidated, claiming \$100,000 damages for ore alleged to have been wrongfully removed by these companies. The Insurgent company compromised the suit by selling out to the Northport Co., while the Lone-Pine Surprise fought and won the suit brought against them.

Production: to 1918 amounted to 12,000 tons of \$19.76 gold ore.

INTERNATIONAL GOLD MINING CO. WASHINGTON

Head office: Dr. Peter Reid, Empire State Bldg., Spokane, Wash.

Officers: Peter Reid, pres.; D. F. Kizer, v. p.; G. H. Walters, sec.; C. L. Russell, treas., with H. L. Williams, directors.

Cap. \$1,000,000; shares, \$1 par.

Property: 6 claims in the Orient district, Ferry county, developed by tunnels and equipped sufficiently for a small mine.

INTERSTATE-SULLIVAN MINING CO. WASHINGTON

Officers: Dennis Sullivan, pres., Rockford, Wash.; H. F. Phillips, v. p.; A. E. Barnes, sec.-treas., Hyde Bldg., Spokane; Jack Ashley, Jr., supt.

Cap. \$100,000; shares, 5c par.

Property: Hidden Treasure group, 6 claims, on Goat mountain, N. of Clark's Fork, Wash., said to show a fissure vein with silver-lead ore.

A 3-drill compressor had been added to equipment, and a tunnel was being run to cut the vein at a depth of 800', at last account.

IRON CREEK MINING CO.

WASHINGTON

Address: Keller, Wash.

Officers: J. R. Abraham, pres.; John W. Duncan, v. p.; J. E. Angle, sec.-treas.-supt.; with J. E. Kennedy and H. Phil Brandner, directors. Rich. Marsh, cons. engr.

Inc. 1914, in Washington. **Cap.** \$1,500,000; par \$1.

Property: 15 claims, unpatented, on Iron creek, 12 miles N. E. of Keller, in Ferry county, said to show silver-lead ore in 5' fissure vein, averaging \$20 per ton.

Development: 1,400' of workings, mainly tunnels.

Equipment: 2-drill compressor, boiler and engine. A 20-ton experimental mill and cyanide plant reported under construction, June, 1921. Ten men employed.

IROQUOIS MINING CO.

WASHINGTON

Address: Chas. E. Bisbee, receiver, Rookery Bldg., Spokane, Wash., appointed in May, 1918.

Company presumably forfeited its charter. Described in Volume XIV.

IVANHOE MINING CO.

WASHINGTON

W. B. McChesney mgr., Oroville, Wash.

Property: on Palmer mountain, 7 miles from Oroville, Okanogan county, developed by 4,400' tunnel to vertical depth of 1,559', where the main orebody was intersected.

JUMBO COPPER MINING CO.

WASHINGTON

Office: Everett, Wash.

Inc. 1920, in Wash.

Property: the Jumbo group near Darrington, Snohomish county, shows rich gold-copper ore.

JUNO-ECHO COPPER CO.

WASHINGTON

Address: Albert I. Kulzer, Chewelah, Wash.

Officers: Dr. C. A. Hauber, pres.; C. T. Winslow, v. p., with H. R. Spedden of Colville, F. L. Reinoehl, Chewelah and F. H. Alm, directors.

Inc. in Washington. **Cap.** \$150,000; par 10c., assessable up to 3c. a share; 1.3c levied to date.

Property: the Juno, Echo and IbeX lode claims, 2 miles N. E. of Chewelah and adjacent to Security Copper Co. and Standard Chewelah Co. holdings. Is a reorganization of the Juno Echo M. & M. Co.

Development: by 320' shaft with levels at 150' and 300', exposing veins of copper ore carrying molybdenite. Equipped with compressor, hoist and pumps. Idle several years owing to high cost of labor and materials. Property has shipped two carloads of high-grade ore.

Reported 1921 to have absorbed Chewelah Standard Mng. Co., issuing 250,000 shares of which 100,000 went to creditors and balance to stockholders of C. S. M. Co. New property has 500' shaft, with good ore on 200' level.

JUPITER LEAD CO.

WASHINGTON

Address: Northport, Wash., or care Albert Baker, Spokane, Wash.; Chris Knutson, Wm. Bynan, C. Basler, and others, of Northport, Wash., lessees.

Cap. \$300,000; par \$1.

Property: the Last Chance group, 6 miles S. E. of Northport, which during 1908-10 produced about 1,400 tons of lead ore, valued at \$65,000. Idle until Norman Mines Co. took bond on property for \$30,000. Several carloads of ore were shipped, assaying 60% lead and zinc. Option was relinquished in October, 1916, and mine was idle until late in 1918.

Management reported taking out lead ore at depth of 500' in the 1,000' tunnel, early in 1920. Twelve men employed.

JUST TIME MINING CO.**WASHINGTON****Office:** F. C. Descent, 326 Rookery Bldg., Spokane, Wash.**Officers:** F. C. Descent, pres.; A. Anderson, sec.; with D. Danielson, directors, all of Spokane, Wash.**Inc.** 1917, in Washington. **Cap.** \$300,000; par \$1.**Property:** 2 unpatented claims, in Stevens county, 3 miles from Electric Point mine, said to show silver-lead ore in a 70' shaft. No recent report.**KAABA MINES CO.****WASHINGTON****Address:** S. Barghoorn, sec.-treas., Symons Bldg., Spokane, Wash. J. W. Douglas, pres.-mgr., Oroville, Wash.**Property:** 1 mile S. W. of Nighthawk, Okanogan county. Ore occurs in quartz fissure vein in granodiorite, averaging 1' in width, and contains argentiferous galena chalcopyrite, pyrite and marcasite.**Development:** by 240' double-compartment shaft, with 800' of drifts, said to have partly blocked out 100,000 tons of low grade ore.**Production:** in 1918, 1,800 tons of ore shipped to the Bender mill at Nighthawk, averaged \$8 per ton. Only development work being done. 1921.**KANKAKEE MINING CO.****WASHINGTON****Address:** c/o Wm. Barnard, Nespelem, Wash.**Officers:** J. M. O'Neil, pres.; F. M. D'Camp, v. p.; W. Barnard, sec.-treas., with Geo. M. McDonald, H. L. Mayberry, J. R. Sanders and E. Christensen, directors.**Inc.** in Washington. **Cap.** \$850,000; \$1 par.**Property:** 11 unpatented claims, and a millsite in Okanogan county, 3 miles W. of Nespelem, has zinc-copper ore with silver and a little gold. Said to have 15,000 tons of ore blocked out.**Development:** by 100' shaft and 20' drift in 3' of ore averaging 11-12 oz. silver, with lead, copper and zinc. Small shipments reported made to Great Metals M. & M. Co. mill in 1920.**KEYSTONE LEAD MINING CO.****WASHINGTON****Address:** 324 Fourth Ave., Pittsburg, Pa. Jesse M. Hall, mgr., Panken Bldg., Spokane, Wash. Dan D. Dodd, supt., Leadpoint, Wash.**Officers:** Robt. J. Coyle, pres.-treas.; J. M. Hall, v. p.; J. W. Cree, Jr., John D. Reilly and R. W. Hanan, trustees. Chas. V. Griffith, sec., Pittsburg, Pa.**Inc.** May, 1921, in Wash. **Cap.** \$150,000; par 10c.; 500,000 shares in treasury.**Property:** 12 claims adjoining the Electric Point mine on the E., in Stevens county, 20 miles S. E. of Northport, reported under development, July, 1921. Contains lead deposits in limestone, in a chimney of ore, 30' by 60', opened to a depth of 100'.**KING MINING CO.****WASHINGTON**

Dead. See Copper King Mining Co.

Described in Vol. XIII.

KNOB HILL MINING CO.**WASHINGTON****Office:** 622 Old National Bldg., Spokane. **Mine office:** Republic, Wash. J. E. Daley, supt.; Horace Mason, mine supt.**Officers:** John Byrne, pres.; Chester Shoudy, v. p.; with T. A. White, H. V. Chamberlain, H. Kreysler, Mrs. John Byrne, and J. E. Daley, directors. O. A. Broyles, sec.-treas.**Cap.** \$1,000,000; shares \$1 par; all issued. Stock listed on Spokane Exchange. Annual meeting, January.

Profits in 1916 were \$33,812; in 1917, ore sales totaled \$102,143 net. In 1918, ore sales were \$33,933; total income, \$37,330; expenses, \$46,546; cash on hand, \$336; operations resulting in a loss of \$9,216.

Dividends: resumed in March, 1917, after a 3-years' lapse paid \$34,784 in that year, bringing total dividends to \$105,000.**Property:** 3 claims patented, viz: the Knob Hill, Mud Lake and Alpine claims, at Republic, Ferry county, Wash. The Knob Hill is developed

by shafts and crosscuts. **Geology:** quartz veins in latite porphyry. Knob Hill vein 3'-5' thick with pay shoot 300' long and 2'-3' of ore on Alpine vein stoped for 2½' wide and 400' long.

Development: several thousand feet of workings, with 600' shaft. In 1921, stoping above 600' level yielded shipments returning \$25 to \$35 per ton, being best ore in mine.

Equipment: 50-h. p. distillate engine, 5-drill compressor, etc.

Production: several thousand tons of ore shipped in 1918 and in 1919, said to have averaged \$15 per ton; total output, 50,000 tons, yielding between \$700,000 and \$1,000,000.

Late in 1921, company was working 10 men and making regular shipments to Trail smelter.

KROMONA MINING & MILLING CO.

WASHINGTON

Office: F. M. Williams, 615 Peyton Bldg., Spokane, Wash. **Mine address:** Sultan, Wash.

Officers: C. B. Krom, pres.-treas.; J. F. Krom, v. p.-gen. mgr.; W. Y. Sanborn, sec., with J. P. Shattuck, directors.

Inc. 1916, in Washington. **Cap.** \$1,500,000; \$1 par. Annual meeting, fourth Tuesday in January.

Property: 9 claims, 180 acres, in Sultan district, Snohomish county, about 18 miles from Sultan, Wash., showing a vertical vein in granodiorite, the ore stringers 1-10', containing chalcopryrite, bornite, pyrrhotite and flakes of molybdenite.

Development: by 85' adit. Management plans to install complete equipment, including compressor, and to do extensive exploration and development work.

LA FLEUR MOUNTAIN COPPER CO.

WASHINGTON

Described in Volume XIV. Company absorbed in 1920 by La Fleur-St. James Mng. Co., which see.

LA FLEUR-ST. JAMES MINING CO.

WASHINGTON

A consolidation of the La Fleur Mountain Copper Co., Washington, and St. James M. Co., Ltd., of Idaho.

Address: Colville, Wash. **Mine address:** Danville, Wash.

Officers: W. A. Acorn, pres.; I. J. Lasswell, sec.-treas., with J. L. Lasswell, Markus Lies, Theresa James, W. H. Glunt and John Kuder, directors.

Inc. August, 1920, in Washington. **Cap.** \$2,000,000; 5 cents par; \$1,437,000 outstanding.

The La Fleur group consists of Comstock and Walla groups of 6 claims and 4 fractions, on La Fleur mountain, Ferry county, 1½ miles from rail. The ore consists of bornite, chalcopryrite and pyrite, disseminated through a quartz sericite ledge, which varies from 2' to 5' in thickness. Ore contains 3-5% copper. Developed by two prospect shafts, 37' and 50' deep.

The St. James mine comprises the Ula and Try Me claims on Sunset peak near Wallace, Shoshone county, Idaho. Ore carries lead, silver and zinc. No. 2 tunnel, started Nov., 1915, cut vein at 300', showing 8' of milling ore. The lower tunnel is 1,200' long. A 20' vein was cut in the upper tunnels.

LAKINA COPPER CO.

WASHINGTON

See same title under Idaho mines.

LAST CHANCE MINE

WASHINGTON

Address: C. W. Jackson, lessee, Okanogan, Wash.

Property: an old producer in the Ruby Hill district, Okanogan county, owned by Jonathan Bourne, Jr., Portland, Ore. Ore occurs in a quartz vein in granite, 8-20' in width; a pay shoot 2-4' wide and 200' in length, contains steel-galena, chalcopryrite, pyrite, tetrahedrite and sphalerite.

Development: by 650' drift on the vein and 300' old shaft, with 800' easterly crosscut. The mine was re-opened in 1920 and old workings unwatered.

Production: hand sorted shipments reported to average 30 oz. silver, 17% lead and 4% copper.

LAURIER MINING CO.**WASHINGTON**

Bankrupt. E. K. Erwin, receiver, Spokane, Wash.

Mine office: Laurier, Ferry county, Wash.

Officers: Dayton H. Stewart, pres.-mgr.; Grant A. Stewart, v. p.-supt.; E. K. Erwin, sec.-treas., with J. S. Talkington and Guy P. Linville, directors. G. A. Stewart, supt.

Inc. October 22, 1908, in Washington. **Cap.** \$1,000,000, increased later to \$1,500,000; shares \$1 par; all issued.

Property: 7 claims unpatented, about 120 acres, at Laurier, Ferry county, in the Curlew district. Developed by 140' shaft and several tunnels, showing a vein of pyrrhotite ore said to show copper, silver and gold values.

Equipment: includes a 2,900' aerial tramway connecting the mine with a railroad siding and gasoline compressor.

Shipments: commenced in 1915, were sent to the Granby smelter; about 500 tons of copper-silver ore from development work averaged 4.16-7.66% copper and 2 oz. silver, netting \$30 per ton.

In 1916, 1,200 tons shipped, reported to have averaged 4% copper and 3 oz. silver per ton, netting \$30 per ton. Small shipments made in 1917-18. Shipped to Tacoma smelter early in 1920. Idle and without funds, November, 1921. Reported under lease to C. A. O'Neill.

LEAD TRUST MINE (INCORPORATED)**WASHINGTON**

Address: Leadpoint, Wash. **Head office:** Wenatchee, Wash.

Officers: J. A. Scaman, pres.; F. C. Scaman, v. p.; D. A. Shiner, sec.; F. N. Mintzer, treas, with J. C. Gollehon, trustees.

Inc. in Washington, August, 1909. **Cap.** \$1,000,000; \$1 par; 417,433 shares outstanding.

Property: 5 claims, 100 acres, on Gladstone mountain, Stevens county, 2½ miles from Leadpoint, said to have rich lead-silver ore in a chimney in limestone. Ore is galena, 6'-14' wide, 60' long, of unknown depth and will average 10-15% lead.

Development: by 2 tunnels, total workings about 1,200'.

Equipment: includes 75-ton concentrator, compressor, and steam power. Total output, about 200 tons.

LEAD & ZINC CO.**WASHINGTON**

Controlled by L. P. Larsen and Jens Jensen of Metaline Falls, Wash.

Property: the Josephine mine, at Metaline Falls, Pend Oreille district, once one of the biggest zinc producers in the State. Operated under lease by Butte & Superior Mining Co. In December, 1917, company filed a petition in bankruptcy, as a result of litigation with the B. & S. Co. In 1918, surface equipment, including the 175-ton mill was sold at public auction.

LIBERTY COPPER MINING CO.**WASHINGTON**

Office: Spokane, Wash. **Mine office:** Bluecreek, via Chewelah, Wash.

Officers: J. H. Reser, pres.; C. Oldfather, v. p.; A. Haas, sec.; S. G. Neff, treas, and gen. mgr.; R. E. McVicar, trustee.

Inc. in Washington. **Cap.** \$1,000,000; shares \$1 par.

Property: 6 claims, well watered and timbered, on Bluecreek, about 1½ miles from Bluecreek station, and 6 miles N. W. of Chewelah. The main vein, developed by 4,000' of tunnels, is about 18" wide, carrying auriferous and argentiferous copper and lead ores.

Equipment: includes steam hoist, 100-h. p. boiler and an air compressor. The mine was under development from 1906 to 1915 and made its first carload shipment March, 1909. Reported that capital would be increased to \$1,500,000 to provide money for resuming work, at last account.

In January, 1922, company sued for \$1,600 on labor liens at Colville.

LITTLE COVE MINING CO.**WASHINGTON**

Address: Republic, Wash.

Officers: John W. Lloyd, pres.-gen. mgr.; F. W. Cleator, v. p.; W. W. Montieth, sec.-treas.

Inc. in April, 1918. **Cap.** \$100,000; par 10c.

Property: a lease and bond on the Little Cove and Mammoth claims in Eureka gulch, Republic district. Owned by Jonathan Bourne, Jr., and operated many years ago. Developed by 150' shaft exposing ore said to assay \$14.50 per ton. No recent returns.

LONE PINE & SURPRISE MINES

WASHINGTON

Address: Day Bros., Wallace, Idaho. Mine at Republic, Wash.

Property: operated 1921, shipping about 30 tons daily.

LONE-PINE SURPRISE CONS. MINING CO.

WASHINGTON

Address: Hyde Block, Spokane, Wash.

Officers: Chas. P. Robbins, pres.-mgr.; W. J. C. Wakefield, v. p.; Chas. Theis, sec.; J. E. Hopper, asst. sec.; E. E. Sizemore, supt.

Cap. \$3,500,000; \$1 par; 3,126,000 shares issued.

Property: Last Chance mine, at Republic, Ferry county said to show an 8" vein carrying \$13 ore for 360' along drift on 500' level. Developed by a 650' two-compartment shaft with 127' crosscut to vein on 650' level and 170' drift in shipping ore. Reserves equal to several thousand tons milling ore. Equipped with a 514 cu. ft. compressor, hoist, and boiler.

Production: in 1918, tonnage mined was 16,535; in 1919, output was 9,995 tons.

In August, 1919, the Day Interests (Northport M. & S. Co.) started suit against Lone Pine-Surprise and the Insurgent companies, claiming \$100,000 damages for ore removed by them from the Hope vein. The Insurgent company compromised by selling out to the Northport Co. The Lone Pine-Surprise Co. fought and won the suit, Nov. 2, 1920. The mine has been closed down since the filing of this suit in 1919.

LONE STAR COPPER MINING CO.

WASHINGTON

Officers: Oscar De Camp, pres.; Wm. S. Thyng, sec. and engr., Securities Bldg., Seattle, Wash., and R. C. Rimertsen, directors.

Inc. April, 1910, in Washington, practically as a reconstruction of the Copper Hill M. & Milling Co. **Cap.** \$1,500,000; shares \$1 par. Owns sundry claims, including the Copper Hill mine, near Newport, Stevens county, developed by several shallow shafts and tunnels. Mine has an 18' vein carrying chalcopryrite, disseminated in pyrrhotite. There is no machinery. Idle several years, except for annual assessment work.

LOON LAKE BLUEBIRD COPPER CO.

WASHINGTON

Address: H. H. Shallenberger, Peyton Bldg., Spokane, Wash. **Mine address:** Loon Lake, Wash.

Officers: H. D. Trunkey, pres.; H. H. Shallenberger, v. p.-mgr.; Jas. McCarthy, sec.-treas., with J. C. Haas, all of Spokane and A. R. Ammundsen, directors.

Inc. 1918. **Cap.** \$375,000; 25c. par.

Property: four claims, 6 miles N. of Loon Lake and adjoining Loon Lake Copper Co. on E., in Springdale district, Stevens county, said to show a quartz vein, 5-10' wide and several hundred feet long, containing chalcopryrite, pyrite and a little malachite.

Development: by 200' shaft, drifts and crosscuts. **Equipment:** includes a boiler, hoist and compressor. Developing.

LOON LAKE COPPER CO.

WASHINGTON

Office: 43 Leon St., Boston, also 801 Old Natl. Bank Bldg., Spokane, Wash. **Mine address:** W. L. Zeigler, mgr., Loon Lake, Wash. In receivership, 1920.

Officers: Jas. C. McCormick, pres.-treas.; F. W. Dewart, v. p.; R. L. Flanders, sec., with C. S. Kalb, J. W. Brock, J. H. MacAlman, and Alfred De Voto, constitute board of trustees.

Inc. January, 1916, in Washington. **Cap.** \$375,000; shares 25c par; \$355,000 issued.

Bonds: authorized \$90,000; outstanding, about \$45,000. **Dividends:** 1c a share monthly declared July, 1917; \$43,352 in 1917, none since.

Property: the Kemp-Komar and O. K. mines, 310 acres, on Grouse creek, 6 miles N. of Loon Lake, Stevens county, on the Great Northern R. R., said to carry a well-defined fissure vein 4'-20' wide, containing bornite, chalcocopyrite, malachite, azurite and cuprite in quartz.

Development: by 500' incline shaft with 1,587' of work on 300 and 500' levels. Between 200 and 300', oreshoot is 70' long, 35' high and 5' wide. On the 500' level, orebody is 90' long, 8' wide and averages 2% copper. There are also two tunnels, the 320' O. K., and the 300' Chapple tunnel.

Equipment: a well designed 100-ton concentrator with Ziegler flotation machines, was completed in 1919; other additions include a new generator set, 6-drill compressor, and 50 h. p. hoist. Mill feed averages 2% copper and a few ounces silver. Concentrates average 25% copper and 10 oz. silver per ton.

Production: company is the third largest copper producer in the state. In December, 1919, work was suspended, and J. W. Hancox was appointed receiver on the petition of several creditors, whose claims amount to \$20,000, while wages due amounted to \$5,000.

MANILA MINING & MILLING CO.

WASHINGTON

Idle and probably defunct. Fully described in Vol. XIV. Formerly operated near Keller, San Poil district, Ferry county.

MELROSE MINING CO.

WASHINGTON

Address: S. Edelstein, Fernwell Bldg., Spokane, Wash. **Mine address:** O. M. Mathews, New Boundary, Wash.

Officers: Jos. Cohn, pres.; O. M. Mathews, v. p.-mgr.; Sam Edelstein, sec.-treas., with J. W. Smyser, and F. M. Nudell, directors

Inc. February, 1918, in Washington. **Cap.** \$500,000; 50c par; issued 275,000 shares.

Property: 2 claims, including the Maple Leaf mine, near New Boundary, Stevens county.

The vein, encased in schist, dips 45° E. and carries shoots of copper and lead ore. **Development:** by tunnels 500' and 950' in length.

Production: 75 tons of ore shipped by present management returned \$8,000.

METALINE ORIOLE MINING CO.

WASHINGTON

Address: Metaline, Pend Oreille county, Wash. Fred N. Davis, pres. and gen. mgr.; Stella M. Davis, sec.

Inc. December, 30, 1910, in Washington. **Cap.** \$2,000,000; shares \$1 par; assessable. Total calls to end of 1920, \$40,000.

Lands: 7 claims, 140 acres, and a 5-acre millsite, unpatented. Ore occurs in irregular lenses, 2-3' thick, carrying argentiferous galena, sphalerite, chalcocopyrite and pyrite, in a quartz gangue. A carload of ore shipped in 1917 assayed 0.25 oz. gold, 42.1 oz. silver, 15.3% lead, 21.9% zinc, and 1.1% copper.

Development: by 200' shaft and tunnels of 50', 400' and 750'. A 100' incline shaft sunk on the vein from the lower tunnel shows ore throughout a 50' drift.

Equipment: a 50-ton concentration mill, steam power, with small hoist, 3-drill compressor, and a 75-ton mill.

Property idle since 1918 owing to lack of funds, but refinancing underway in 1921, expected to permit renewed operations.

METHOW GOLD & COPPER MINING CO.

WASHINGTON

Office: W. D. Scott, 419 C. of C. Bldg., Spokane, Wash. **Mine address:** Winthrop, Okanogan county, Wash.

Officers: W. D. Scott, pres. and mgr.; J. N. Tewinkel, sec.-treas., with F. S. Dow, W. G. Traub and N. O. Baldwin, directors, at last accounts.

Inc. 1899, in Washington. **Cap.** \$2,500,000; \$1 par; 2,400,000 issued.

Property: 8 patented claims near Winthrop, Okanogan Co., on west

fork of Methow river, show fissure veins in Algonkian rocks. Ore said to assay 9% copper, 2 oz. silver and \$5.50 gold per ton.

Development: includes 3 tunnels, longest 564', with openings of 1,200' to depth of 500'. Has available water power and timber. Idle, except for annual assessment work, on account of lack of transportation.

MICHIGAN GOLD MINING CO.

WASHINGTON

Officers: Cornelius Dow, Jr., pres.; T. Otto, v. p.; T. B. Furnival, sec.; A. B. Frost, treas., with H. J. Gorke, directors, all of Syracuse, N. Y.

Cap. \$1,500,000; shares, \$1 par. Majority of shares said to be held by Orient Metal M. & S. Co.

Property: 4 claims, 2½ miles from Orient, Stevens county, and adjoining First Thought mine.

MINERAL CREEK COPPER CO.

WASHINGTON

Address: E. J. Durrwachter, sec., Cle-Elum, Wash.

Inc. in Washington. **Cap.** \$150,000; 10c par; 600,000 shares held by Durrwachter Bros. of Grant, Montana; 100,000 shares sold at 25c. in Ellensburg, Wash., in 1920.

Property: Mineral Creek and Copper Queen groups, 2 miles above Little Kachess lake, Kittitas county, in the Cascade mountains. Examined by Chas. Goodsell of Spokane. The Mineral Creek group shows shear zone in diorite 20'-40' wide, with network of small veinlets of quartz pyrite and copper pyrite. The Copper Queen shows neck of poorly mineralized rhyolite breccia, containing chalcopyrite and pyrite.

Development: at Mineral Creek, by tunnels and about 3,000' of workings, attaining a depth of 450'. Ore will be extracted by an open-cut for the present. Shipments to smelter returned 6% copper.

Equipment: includes 25-ton mill with Ziegler flotation plant, Forester rod mill and Wilfley tables, run by water-power. Tests have shown an 85 to 92% recovery.

MINORCA-HOMESTAKE MINES CO.

WASHINGTON

Address: Samuel Glasgow, pres., Hutton Bldg. Spokane, Wash.

Officers: above with M. C. Hunter, v. p.; V. P. Adams, mgr.; L. K. Armstrong, and W. H. Ludden, directors.

Property: 23 claims, on north half of Colville Indian reservation, in Stevens county, about 10 miles from Bossburg.

Development: by 40' shaft, said to show 4' of ore assaying \$14 gold, \$4 silver and ½% copper. The shaft is to be extended to 100' and drifts run both ways on the vein.

MT. ELINOR MANGANESE M. & S. CO.

WASHINGTON

A. Kelly, mgr., Seattle, Wash. Mine address: Lake Cushman, Wash.

Property: a lease on the Apex manganese mine, 6 miles above Lake Cushman, Mason county, said to show an orebody 15' wide and opened to depth of 30', running 29 to 35% metallic manganese.

MOUNT ST. HELENS CONS. MINING CO.

WASHINGTON

Office: 516 Selling Bldg., Portland, Ore. **Mine office:** Spirit Lake, Skamania county, Wash.

Officers: Thos. Prince, pres.; J. P. Tamiesie, v. p.; J. M. Bell, sec.; E. L. Harmon, treas.; Dr. Henry Waldo Coe, principal shareholder; Andrew Olson, supt.; Geo. W. Lilly, engr.

Inc. 1902, in Oregon. **Cap.** \$1,800,000; shares \$1 par.

Property: 63 claims, patented, 1,200 acres in Mt. St. Helens district, Skamania Co., Wash., includes the former holdings of the Sweden Copper Co., Calumet Copper Mng. Co., Bronze Monarch Mng. Co., Chicago Mng. Co., Yellow Metal Mng. Co., Earl Mng. Co. and Cascade Copper Mng. Co. The company also owns a three-fourths interest in the United mines. In addition to copper ores the tract contains gold veins, an ochre bed, a granite quarry and a deposit of pumice stone.

Claims are said to show syenite, diorite and slate with fissure veins carrying about 20 orebodies ranging from 5 to 100' in estimated width. The

ores carry chalcocite, bornite and chalcopryrite, and vary from 2 to 25% copper, some lead, 2 to 50 oz. silver and \$1 to \$40 gold per ton.

Development: by 5,500' of workings, 5 tunnels, longest 2,300', and 50' shaft, estimated by the management to show 125,000 tons of medium and high-grade ores with a greater tonnage of milling ore.

Lands are owned outright and the company has no bonds or debts, but the property has been practically idle for some years awaiting the construction of a much-needed railway. Mines fully described Vol. XI, Copper Handbook, the predecessor of this book.

MULTNOMAH MINING, MILLING & DEV. CO. WASHINGTON

Idle. Office: 405 Kuhn Bldg., Spokane, Wash.

Officers: M. J. Hills, v. p.-sec.; Dr. F. O. Hudnutt, asst. sec.-gen. mgr. Inc. 1901, in Washington. **Cap.** \$2,000,000; shares \$1 par.

Property: about 600 acres, near Nespelem, Okanogan county, including the River group, 260 acres, patented, carrying placer gold; the Mineral Hill, Ramsey and Multnomah groups.

Development: by a tunnel of about 1,100', said to cut a 15' vein, showing argentiferous lead ore. There are 5 buildings, and a dam built across the Nespelem river.

NATIONAL LEAD-SILVER CO. WASHINGTON

Office: C. D. Muxen, Symons Bldg., Spokane, Wash.

Officers: C. D. Muxen, pres.; E. D. Weller, v. p.; E. H. Pattison, sec.-treas. and mgr. trustee; J. E. Orr, asst sec., and G. F. Ingraham, directors.

Inc. 1915, in Washington; as successor to the Phoenix G. & C. M. & M. Co. **Cap.** 2,000,000 shares; 5c par; assessable. Annual meeting, third Tuesday in November.

Property: 9 claims, known as the Panama group, and mineral rights to 159 acres, about 2 miles N. of Curlew, Ferry Co., said to show 4 veins carrying gold-silver-lead-copper ore in replacement deposits, carrying quartz, lime and iron carbonate. The country rock is fine-grained syenite with large dikes of porphyry with strata of lime lying parallel, running nearly N. and S., with dip of 80° W. Ore was encountered on 3 different contacts in the first 500' of the tunnel. The first vein, about 40' wide, was intersected 600' from the portal of the tunnel. A second vein cut at 820' proved to be 5' wide.

Development: consists of 1,200' main lower tunnel, 225' Panama, and several shorter tunnels, numerous open cuts and prospect shafts. Property being worked in 1921.

NEW CRYSTAL MINING CO. WASHINGTON

Address: care John Gray, 3-4 Fall City Blk., Spokane, Wash. **Mine**

address: M. H. O'Connell, supt., Miles, Wash.

Officers: M. H. O'Connell, pres.; Mrs. O'Connell, v. p.; C. Bogard, sec.-treas., with John Gray, C. C. Lantry, Old Nat'l. Bank Bldg., Spokane, directors.

Inc. in Wash. **Cap.** \$150,000; 10c par; assessable; 1,000,000 shares outstanding. Annual meeting, first Monday in May.

Property: 40 acres, patented, an old-time producer, in the Deer Trail district, near Miles, Lincoln county. Claims show a contact fissure between limestone and granite, that contains an ore mass 400' long, 4-8' wide, said to assay \$17 to \$80 per ton.

Development: by shaft to 400' depth, with 300' of workings. **Equipment:** includes 35 h. p. hoist, compressor, pump, steam plant, etc. **Ore reserves:** estimated at 48,000 tons blocked out, and 1,000 tons on the dumps.

NEW CURRENCY MINING CO. WASHINGTON

Organized to take over the property of the **Jay Gould Mining Co.**, at Chewelah, Stevens county, Wash., but apparently never functioned.

NEW ERA IRON & STEEL CORPORATION WASHINGTON

Has built a smelter to handle black sand and iron ore, near Sedro

NEW YORK-SEATTLE COPPER MINING CO. WASHINGTON
Inactive, but still has interest in a mine near Index, Wash. Described in Copper Handbook, Vol. XI.

NINETEEN-NINETEEN M. & M. CO. WASHINGTON
Successor to **Blue Ledge M. & M. Co.**
Office: 355 Head St., Station L. San Francisco, Calif. **Mine office:** Keller, Wash.

Officers and directors: Geo. W. Steele, pres.; G. Alfred Steele, v. p.; Chas. L. Granger, v. p., Wm. R. Rae, sec.-treas., Horace Sovereign, asst. sec., Keller, Wash.

Inc. Jan. 28, 1919, in Wash. **Cap.** \$175,000; 10c par.

Property: 5 claims, 3 patented in Ferry county, 4½ miles E. of Keller, said to show silver bearing copper ore in a 2' to 6' vein that outcrops for 600'.

Development: by two quarries and open cuts, opening a body of low-grade zinc ore. Idle.

NORMAN MINES CO. WASHINGTON
Out of existence. Described in Vol. XIII.

NORTHPORT MINING CO WASHINGTON
Address: John Gorien, sec.-treas.-mgr., Northport, Wash.
Property: 280 acres, adjoining the Last Chance mine, in Northport district, Stevens county.

Development: by two quarries and open cuts, opening a body of low-grade zinc ore. Idle.

NORTHPORT SMELTING & REFINING CO WASHINGTON
Office: Northport, Stevens County, Wash.

Officers: J. J. Day, pres; E. R. Day, sec.; with Edw. Boyce, E. H. Knight and F. M. Rothrock, directors; R. W. Marston, mgr.

Cap. \$1,000,000; shares \$1 par.

Controlled by Hercules Mng. Co., of Idaho, which owns 500,000 shares, and by Tamarack & Custer Consolidated Mining Co., which holds the remainder. Both of these are controlled by the Days.

Property: the Northport smelting plant, the Lone Pine, Surprise and Pearl claims, acquired at receiver's sale in 1916, and the Hope mine at Republic. The Hope mine, acquired in April, 1918, has over a mile of tunnels and other workings, developing a gold-silver vein. The mine is between the Lone Pine and Surprise mines, whose workings connect with it. Ore from these mines is used by the smelter as a flux.

Equipment: the Northport smelter is an up to date plant, remodelled 1916, to treat lead ore and concentrate from the Hercules and Tamarack-Custer mines in the Coeur d'Alene district. The plant contains 3 lead furnaces, 42" wide and 16' long, of 300 tons daily capacity; also a Cottrell electric fume-precipitator, costing \$100,000, and a dressing plant. The lead bullion is refined by the Pennsylvania Smelting & Refining Co. at Pittsburgh. Electric power is supplied from Canada.

An apex suit brought against the Lone Pine Surprise Cons. M. Co., was decided in favor of that company, Nov., 1920. The case was appealed by the Day family.

Owing to increased freight rates, the smelter closed down, April 1, 1921.

NORTHWESTERN IRON & STEEL CO. WASHINGTON
Address: Fred M. Williams, pres., 411 Fernwell Bldg., Spokane, Wash.

Officers: above with H. M. Shallenberger, v. p.; Frank K. Eddy, sec.-treas. **Operating staff:** E. C. Owen, supt., 626 Rookery Bldg., Spokane; A. R. Moore, sales mgr.; Guy Langdon, auditor.

Inc. 1921, in Washington. **Cap.** \$500,000; \$1 par.

Property: 300 acres of iron bearing land on Republican creek and 60 acres of timber land, at Leadpoint, 10 miles from Boundary, Stevens county, on a branch of the Great Northern R. R. A ledge 60' wide has been traced 4,500', the ore averaging 56.79% metallic iron.

Management attempting to raise \$50,000 for erection of a 30-ton electric pit furnace unit.

NORTHWEST MAGNESITE CO. WASHINGTON

Address: Crocker Bldg., San Francisco, Calif.

R. B. Rogers, gen. supt., Chewelah, Wash.

Officers: Roy M. Bishop, pres.-gen. mgr.; B. L. Thane, v. p.; S. F. B. Morse, treas.; R. A. Morton, sec.

Cap. \$1,000,000.

Property: 480 acres, 5½ miles W. of Chewelah, Stevens county, has large deposits of magnesite which occur in beds, several hundred feet thick. The mineral is a replacement of lenses of dolomite in sedimentary rocks. Surrounding rocks are slates, schists, and quartzites. It is quarried in open cuts. Drilling to depth of 300' has revealed about 1,000,000 tons.

Equipment: short aerial tram, crushing plant, making 2 in. size, compressor, 5½-mile aerial tram, 800-ton bins, crushing rolls making 10-mesh product which is mixed in proportion of 2,000 lb. of magnesite to 40 lb. of high-grade magnetite and calcined in six 125 by 7½' rotary kilns fired by a Bonnet pulverized coal plant. Each kiln can produce 70 tons of dead-burned magnesite daily. About 2.2 tons of raw material is used to make 1 ton of finished product. The calcine is ground by rolls into sizes required by the trade.

Production: capacity is 9,000 tons of calcined magnesite per month, equal to 35% of the total output of the United States. An average of \$29 per ton has been received at the plant for the product. Costs are \$24 per ton. Shipments in 1920 amounted to 90,000 tons of ferro-magnesite. Employs 400 men.

Operations ceased December, 1920, owing to lack of demand and competition from Austrian producers.

NORTHWEST MINES DEVELOPMENT CO. WASHINGTON

Dead. Described in Volume XIV. Is a Spokane promotion that formerly operated near Keller, Wash.

NORTHWEST MINING ASSOCIATION WASHINGTON

Address: 415 Chamber of Commerce Bldg., Spokane, Wash.

Officers: Oscar Cain, pres.; Frank M. Smith, v. p.; F. C. Bailey, sec.-treas., with G. B. Dennis, F. A. Ross, L. E. Nicholls and W. H. Linney, directors.

The Association conducts no operations, but its purpose is to aid and protect the mining industry in Idaho, Washington, Oregon, and British Columbia, generally known as the "Northwest," and "The Inland Empire."

OLD DOMINION MINING & MILLING CO. WASHINGTON

Address: W. H. Linney, 2805 Summit St., Spokane, Wash.

Officers: at last accounts, G. B. Dennis, pres.; Paul Blackmar, sec.

Inc. 1891. **Cap.** \$5,000,000.

Property: 10 claims, patented, including Old Dominion mine, 8 miles from Colville. The mine was discovered in 1885, and considerable high-grade silver-lead ore was shipped in the succeeding decade.

Development: to 800' depth, with 17,000' of workings. On lowest level a fault cut off the ore and work was discontinued in 1907. Has been worked in a small way since then by lessees.

In 1915, property was bought at a tax sale by Linney, but title was disputed by Peck interests, and Supreme Court of the State is said to have cancelled the sale, though Mr. Linney still controlled and worked the mine at last report.

O-LO-LIM COPPER CO. WASHINGTON

Office: 310 Hyde Block, Spokane, Wash.

Officers: Jas. Keeth, pres.-mgr.; F. T. McCormick, v. p.; D. R. Riegel, sec.-treas.

Inc. May 11, 1917, in Wash. **Cap.** \$100,000; shares 10c par; assessable: 675,000 outstanding. Annual meeting, first Tuesday in December.

Property: 160 acres in the Spokane Indian Reservation, Stevens county, leased for 25 years from the Government; 10% of net smelter returns to be paid the Government. Lands were opened to leasers in May, 1916, and work started on company's ground in January, 1917.

A quartz vein, 2-8' in width, contains chalcopyrite and pyrite in ore of milling grade, encased in shale near a granite contact.

Development: by 220' shaft and 100' drift on 200' level.

Equipment: an engine, compressor and pump.

Total shipments, about 350 tons, averaging 8.5% copper and 1.4 oz. silver. Ore is hauled 26 miles to Davenport, but a new road under construction 1921, will shorten the distance.

ORIENT GOLDEN ROCK MINING CO.

WASHINGTON

Office: 205 Hyde Block, Spokane, Wash. Mine at Orient, Ferry county, Wash.

Officers: C. E. Gray, pres. and gen. mgr.; Thos. R. L. Harris, v. p.-treas.; C. E. Ficks, sec.

Inc. 1917. Cap. \$1,500,000; shares \$1 par.

Property: the White Elephant mine, 6 claims, 3 miles from the Canadian border. The mineral zone, 75' wide, between diorite and andesite, contains gold-copper ore.

Development: by a 225' incline on the vein. Workings on the 100' level show ore carrying \$3 to \$6 per ton in gold with shoots of copper ore.

Equipment: includes steam plant, compressor, sawmill, etc.

Idle several years.

ORIENT GOLD MINES, LTD.

WASHINGTON

Property sold, November, 1915, to settle labor liens. See **Orient Golden Rock Mng. Co.**

ORIENT METALS MINING & SMELTING CO

WASHINGTON

Bankrupt. Described in Volume XIV. Formerly controlled Michigan Gold Mng. Co. and held claims near Colville, Stevens county, Wash.

OROVILLE COPPER CO.

WASHINGTON

Address: J. P. Gormely, supt., Oroville, Wash.

Officers: Theo. Wonder, pres.; H. D. James, sec.-treas.

Inc. in 1918. Cap. \$1,000,000.

Property: the O. K. mine on Kruger mountain, 4½ miles N. W. of Oroville, Okanogan county. Ore occurs in irregular lenses and bunches of quartz, 6-10' wide, in a shear zone, containing chalcopyrite, with some bornite, pyrite and tetrahedrite.

Development: by shaft and drifts.

Production: 19 cars of ore said to have averaged 7% copper, 6 oz. silver and \$2 gold.

PANAMA SILVER MINING CO.

WASHINGTON

Address: H. P. Dickinson, pres.-mgr., Nespelem, Wash.

Property: 2 claims on Mineral hill, Nespelem district, Okanogan county, contain a replacement deposit of silver ore in fracture zone 2'-8' wide, in granite. Ore contains argentite, stephanite and native silver.

Development: by 2 tunnels; 12 tons picked ore shipped Nov., 1919, averaged 56.8 oz. silver and 9.32 ounces gold per ton.

Is a promising, if small, prospect.

PHOENIX GOLD & COPPER MNG. & MILL CO.

WASHINGTON

Curlew, Ferry county, Wash.

Succeeded by **National Lead-Silver Co.**, which see.

PUGET SOUND COPPER CO.

WASHINGTON

Address: 101 Main St., Urbana, Ill. Nicolai Aall, supt., Darrington, Wash.

Officers: C. N. Clark, pres.; C. F. Cook, v. p.; W. H. de Long, v. p.; C. B. de Long, treas., with J. H. Thornburn, J. W. McCoy, Frank Lindley, J. S. Christman and A. B. Knowlson, directors.

Inc. June 21, 1916, in Arizona. Cap. \$2,000,000; \$10 par; outstanding

64,000 common and 26,919 pfd. shares. Balance sheet dated Sept. 9, 1920, showed cash and notes receivable, \$4,997; acct's receiv., \$17,050; acct's pay., \$2,116; mortgage, \$450,000; surplus, \$1,664,241.

Property: 600 acres, partly patented, at Darrington, Snohomish county. The group shows schists cut by andesite and diorite dikes, with veins paralleling the dikes. Ore occurs as bands, shoots and impregnations, and is said to contain 2-5% copper, with gold and silver.

Development: by 4 tunnels, to depth of 400', with about 5,000' of workings. **Equipment:** includes hydro-electric power plant and compressor.

PYRARGYRITE MINING CO.

WASHINGTON

Successor to Ruby Mining Co.

Office: Oroville, Okanogan county, Wash.

Officers: S. Brumbaugh, pres.; J. M. Adams, v. p.; A. B. Lee, sec.; Wm. Esselburn, treas., with Chas. A. Andrus, and J. M. Adams, directors.

Inc. November 5, 1902, in Washington. **Cap.** \$1,500,000; shares \$1 par; non-assessable; issued, \$1,175,000. **Bonds:** \$100,000 authorized, at 7% maturing 1915; issued, \$35,100. Annual meeting, second Tuesday in June.

Property: 5 claims, patented, 80 acres, with 46 acres miscellaneous freehold lands, on Mt. Chopaca, near Similkameen river, in Okanogan Co., 3 miles south of the international boundary and within 600' of the Great Northern railroad.

Geology: claims shows syenite, cut by veins containing lenticular orebodies running N. W.-S. E. and dipping at 47°. The vein under development is about 4' thick, traceable for 1,000', and carries mainly gold and silver values, with a little zinc and a trace of copper.

Development: by 3 crosscut tunnels with drifts on the vein. The main working tunnel, 300' below the old workings and about 350' below the outcrop, is 1,110' long, and has 550' of drifting on the vein and an equal amount of drifting run from a 100' upraise. An inclined shaft sunk on the vein from the lower tunnel has short levels at 100' and 200' depth.

Equipment: includes a 15-h. p. electric hoist and 5 buildings.

A 50-ton mill with 2 flotation machines operated 20 hours a day in 1921. Product is a highgrade, argentiferous concentrate which is shipped to the Tacoma smelter. Working steadily with a small force.

Q. S. COPPER CO.

WASHINGTON

Mail returned from former office, 229 North Division St., Spokane, Wash.

Mine office: Q. S. Ranch, Cuess, via Loomis, Wash.

Officers: A. M. Dewey, v. p.-gen. mgr., 4042 Arcade Bldg., Seattle, Wash.; J. P. Heckert, sec.; A. F. Suksdorf, treas.

Inc. April 10, 1914, in Washington. **Cap.** \$2,000,000; shares \$1 par. Is successor of the Q. S. Mining Co. Property was purchased by the new corporation, which paid all the debts, amounting to more than \$25,000, and issued stock at 2c a share to the old stockholders; forfeited stock was left in the treasury, which gave the corporation a majority of the stock. Bad management in 1912 wrecked the former company and led to a receivership, no annual meeting being held that year. Property was sold for taxes, but sale set aside by the courts when the receiver was appointed. Litigation involving ownership pending.

Property: 13 claims, with 10 acres of mill sites, and water rights on Sinlahakin creek, about midway between Loomis and Conconully, along the flank and crest of Aeneas mountain, in the Salmon River district. The property shows fissure veins in diorite carrying mainly low-grade copper ores. The company claims an orebody 300' wide at surface, which has been cross-cut for 238' at a depth of 800' below the outcrop without reaching the wall, and traced by stripping for 6,000' on surface, showing a ledge of 212' width at the north, 300' in the middle and 285' at the southern end of the property.

Development: begun 1897, is by 2 open cuts at either end, a pit of 50x 150' in the middle, and a tunnel 1,063' long cutting the vein at depth of 800', with another tunnel, intended for the main avenue of extraction, 540' long, planned to cut the orebody at depth of 2,000'. One tunnel shows chalcopy-

rite ore said to give assays of 11.4% copper and estimated to average 2 to 4% copper, with small and variable silver values and about \$1 gold per ton. The company claimed an average ore value of \$14 per ton from several hundred assays.

Assessment work only done by new company. No recent information; probably idle, or out of business.

Q. S. MINING CO.**WASHINGTON**

Succeeded by Q. S. Copper Co., which see.

QUILP GOLD MINING CO.**WASHINGTON**

Address: Republic, Wash.

Officers: Jas. Hutchinson, pres.; W. G. C. Lanskaill, sec.-gen. mgr., with G. V. Alexander, H. J. Lycett, and John Stack, directors. S. H. Richardson, cons. engr.

Cap. \$1,500,000; par \$1; 1,498,000 shares outstanding.

Property: 1 claim, the Quilp mine at Republic, Ferry county, adjacent to the Insurgent, Last Chance and Surprise mines. The Quilp was located in 1896 and operated intermittently by several companies. It paid five dividends, totaling \$67,500; last payment in 1912. Mine was reopened in 1914 after lengthy litigation with the defunct Republic Mines Corporation; and again opened in 1918. In 1919 and 1920, the Quilp mine was the largest gold and silver producer in the district. Shipments made to smelters at Tacoma, Northport and Trail, B. C. Ore carries gold and silver.

Development: by over 6,000' of workings to depth of 800'. Recent results at 800' have been good.

Equipment: steam power, hoist, 7-drill compressor, drills, bins, and regular mining plant.

Production: from 1900 to end of 1920 amounted to 57,334 tons of ore, containing 30,210 oz. gold and 241,525 oz. silver, giving smelter returns of \$720,938.

RATHFON REDUCTION WORKS**WASHINGTON**

Officers: A. L. Bradley, pres., Danville, Wash.; D. W. Rathfon, gen. mgr., Republic, Wash.

Cap. \$500,000; \$1 par; 400,000 shares common stock, assessable up to 50 cents.

Property: company in 1913 acquired the famous Republic mine and one other claim in Ferry county, at one time operated by New Republic Mining Co., and before that by Patrick Clark, of Spokane. Said to have produced \$2,000,000 in gold. Ore was shipped in 1918. November 22, 1919, the Republic mine was sold at sheriff's sale to satisfy a judgment of \$43,406 in favor of Fred Keibaum, J. T. Hollis and Frank Babcock.

REARDON COPPER CO.**WASHINGTON**

Directors: Oscar Carstens, T. J. Carstens, Henry Carstens, all of Reardan, Wash., and A. H. Kenyon.

Cap. \$50,000; par 5c. A close corporation.

Property: near Turk, Stevens county, includes the High Grade mine.

Ore occurs in lenticular lenses, 6' thick, containing chalcopvrite, malachite and pyrite with gold and silver values.

Development: mainly by tunnels. Shipments were made in 1918, and in 1919 shipped 137 tons of ore up to September. Exploration work only being done, (1920-21).

REBECCA MINING CO.**WASHINGTON**

Address: Nespelem, Wash.

Officers: H. J. Neely, pres.-mgr.; I. McCarthy, sec.-treas.

Property: about 10 miles S. E. of Nespelem, Okanogan county, developed by opencuts and 800' of drilling. Ore contains sulphides of pyrrhotite, chalcopvrite and sphalerite, dump samples assaying 2.68 oz. silver and 5.15% copper per ton. Diamond drilling at last account.

RED CLOUD MINING CO.**WASHINGTON**

Address: Hatton, Wash. **Mine address:** A. H. Anderson, mgr., Fruitland, Wash.

Officers: J. K. Fields, pres.; A. I. Railsback, sec.-treas.

Property: a group of claims, 2 miles S. E. of Turk, in Deer Trail district, Stevens county, under lease and bond to Giant Silver Mining Co.

RED TOP MOUNTAIN M. & M. CO. WASHINGTON

Address: Carl Fluegel, Northport, Wash.

Inc. 1920, in Wash. **Cap.** \$100,000; par 10c.; 750,000 shares in treasury.

Property: the Red Top group, 3 claims, unpatented, with several veins, 6 miles from Leadpoint, Stevens county, in Northport district, said to carry rich silver-lead ore. **Development:** by 200' of crosscuts, etc.

REDWOOD COPPER MINING CO. WASHINGTON

Dead. Mine at Chewelah, Stevens county, Wash. Developed by 400' tunnel with several hundred feet of raises and winzes expected to expose copper at greater depth. Operations ceased in April, 1912, and property was lost under foreclosure of mortgage. Present owners are Chas. Stevens and others, of Robinson Straus & Co., St. Paul, Minn.

REPUBLIC CONS. MINES CORPORATION WASHINGTON

Property now owned by the Northport Smelting & Refining Co., which see. Vol. XIII contains details of the corporation's checkered career.

RESERVE SILVER MNG. CO. WASHINGTON

Reported organized in 1920 by H. P. Dickinson and W. W. Greenwood of Seattle and C. S. Cradock of Vancouver.

Property: a bond and lease on Panama group, Moses mining district, Okanogan county. Ore occurs in a fissure vein, 12' wide, with gold-silver values of milling grade.

Development: by crosscuts and shallow shafts.

RIES MINING CO. WASHINGTON

Address: Newport, Pend Oreille county, Wash.

Officers: A. L. Reis, pres.; E. L. Sheldon, sec.; F. W. Vawter, treas., with C. F. Bell, directors.

Inc. in Washington. **Cap.** \$100,000; \$1 par.

Property: 4 claims near the Pend d'Oreille river, 2 miles N. of Newport, on the Washington side of the State border, about 30 miles E. of Chewelah. Ore occurs in a 5' quartz vein in diorite, containing argentiferous galena, chalcovpyrite and pyrite.

Development: by 215' shaft and crosscuts. Operated irregularly in a small way. Mine is favorably situated and seems to warrant further development.

ROYAL COPPER MINING & MILLING CO. WASHINGTON

I. J. Winslow, pres. **Mine address:** Chewelah, Stevens county, Wash.

Property: 7 claims said to show 3 parallel ledges having slate and granite contacts.

Development: by 400' tunnel said to carry copper, lead, silver, and gold, with small amounts of copper. Company probably dormant, as letters are returned unclaimed.

ROYAL DEVELOPMENT CO. WASHINGTON

Address: Jay Lonergan, mgr., Wenatchee, Wash.

Property: 5 claims on Red Mtn., 25 miles N. of Leavenworth, Chelan county, reported to contain a large body of copper-silver-gold bearing ore.

RUBY MINING CO. WASHINGTON

Nighthawk, Okanogan county. Succeeded by the **Pyrrargyrite Mining Co.**, which see.

SANTA RITA MINING & MILLING CO. WASHINGTON

Address: F. C. Merriam, Wallace, Idaho.

Officers: John H. Hemphill, sec.-treas., Peyton Bldg., Spokane, Wash.

Inc. 1918, in Delaware to take over property of Cleveland Mining Co. **Cap.** \$500,000; par \$1. In August, 1919, control passed to First National Bank of Devils Lake, North Dakota.

Property: 10 claims, including the old Cleveland mine, 18 miles W. of Springdale, Stevens county, discovered nearly 30 years ago. The ore is a complex lead-zinc-silver sulphide, containing antimony and bismuth, and dif-

ficult to treat profitably. Mine is developed by a 265' shaft and tunnels. The Cleveland company started operations several years ago, but lack of capital caused a shutdown after a concentrator had been built.

Development work was reported underway, July, 1921.

SEATTLE-BOSTON COPPER CO. WASHINGTON

Idle since 1916. Company owns water-rights of 40,000 est. h. p. and a charter for a railway to open large timber tracts and reach the Dutch Miller mine, described under title of Dutch Miller M. & S. Co. The former mine holdings of the Seattle-Boston C. Co. are described in Vol. VIII, Copper Handbook.

SECURITY COPPER CO. WASHINGTON

Address: 720 Peyton Bldg., Spokane, Wash. **Mine office:** Chewelah, Stevens Co., Wash.

Officers: L. K. Armstrong, pres.-gen. mgr.; M. C. Hunter, v. p.; W. W. Gifford, sec.-treas., with F. H. Fulton, directors.

Inc. 1913, in Washington. **Cap.** \$1,500,000; shares \$1 par; 1,200,000 outstanding; assessable. Total expenditures, \$275,000.

Property: Security group, 200 acres at Chewelah; Copper Butte group, 80 acres, and Chamokane group, 600 acres, 16 miles W. of Springdale. The first-named shows fissure veins cutting shales and schists; the Chamokane group has 5 veins, from a few feet to over 100' in width, and the Copper Butte has one vein, over 50' wide. All the groups carry argentiferous copper ore. Five cars shipped from the Copper Butte are said to have averaged 3.8% copper.

Development: on Security group by about 1,150' of workings on a series of six veins by 550' shaft, levels, and tunnel. The Copper Butte has about 500', and the Chamokane 1,000' of workings.

Equipment: includes a gasoline hoist and a 3-drill air-compressor on the Security.

Refinancing was arranged in August, 1919 and operations reported underway, June, 1921.

SHIPPER GOLD MINING CO. WASHINGTON

Address: Chesaw, Wash.

Officers: I. P. Blaine, pres.-mgr.; H. L. Mooney, v. p.; A. C. Blaine, sec.; W. A. Harry, treas.

Inc. May 31, 1916, in Washington. **Cap.** \$1,000,000; \$1 par; 600,000 issued.

Property: 3 claims, unpatented, 56 acres, located one-fourth mile north of Chesaw, contains at 3½' flat quartz vein running E.-W., with 22° dip. **Ore:** contains gold values with pyrite, and is said to average \$20 per ton.

Development: 700' of work, including 110' shaft, connected with 380' tunnel, blocking out 1,000 tons of \$20 ore.

Production: 1,200 tons of \$40 ore. Company owns 25-ton mill. No recent information; probably idle.

SILVER ANTIMONY MINING CO. WASHINGTON

Address: Uniontown, Wash.

Officers: J. J. Welle, pres.; Jos. Kuntz, v. p.; H. J. Hoefler, sec.-treas; with Albert Carbuhn, directors.

Inc. January 16, 1916, in Washington. **Cap.** \$1,500,000; par \$1; assessable.
