Property: one claim, one mile from Chewelah, Stevens county, said to show a quartz vein in serpentine, containing streaks of sulphide ore carrying gold-copper-antimony ore that averages \$4.80 gold, \$11.40 silver and \$22 in copper. Had a shaft 170' deep and 2 short tunnels, at last accounts.

SILVER BASIN MINING CO. WASHINGTON

Address: Davenport, Wash. C. S. Turner, pres.; W. A. Wilson, sec.-mgr.

Cap. \$1,500,000; par \$1; non-assessable.

Property: unpatented claims in Deer Trail district, Stevens county, said to have silver ore. Total production to 1918 reported as 7,500 tons, worth \$200,000. Holdings presumably include Silver Queen and Seal groups.

acquired at receiver's sale in 1920 and producing steadily in July, 1921. Shipments made to Tacoma smelter.

Development: by shafts and crosscuts. **Equipment:** includes hoist, 3-drill compressor and a pump.

SILVER BELL MINING CO.

WASHINGTON

Address: E. H. Belden, 1208 Old National Bank Bldg., Spokane, Wash.

Officers: E. H. Belden, pres.; R. F. Blackwell, v. p.; with W. R. Dwyer, J. M. Fitzpatrick and J. C. Broad, directors. E. F. McCabe, sec.-treas.

Inc. November, 1916, in Washington. **Cap.** \$1,500,000; \$1 par; 1,100,000 issued. Expenses in 1918 were \$5,000.

Property: 8 claims, 160 acres, 5 miles S. E. of Loon Lake, Stevens county, and 35 miles N. W. of Spokane, Wash.

Development: by 125' shaft, and 300' of drifting, shows 4½' quartz vein in granite. Ore said to contain 25 oz. silver per ton, with gold up to \$4. Sinking is to be continued.

Equipment: 16 h. p. gasoline hoist. Is a silver prospect.

SILVER CREEK MINING & MILLING CO.

WASHINGTON

Company dead and property, the Gold Cord mine, sold for taxes. Bought in by Steil and company reorganized as Gold Cord Mining & Milling Co., Keller, Wash., also dead.

See operations, 1904-1912, described in Vols. VIII and IX of Copper Handbook. Property favorably reported on by Wm. J. Elmendorf.

SILVER LEDGE MINING CO.

WASHINGTON

Office: Waterville, Wash. L. H. Markham, mgr., Methow, Wash.

Officers: Wm. Dunn, pres.; A. L. Maltby, sec.-treas.

Property: on Gold Creek, Methow district, Chelan county, 20 miles from Pateros, the nearest railroad point. The main or North Star vein, 2-3' wide, contains gold and silver values.

Development: by 150' incline, 970' crosscut, drifts and raises. A prospect.

SILVER MOUNTAIN MINING CO.

WASHINGTON

Mine address: Daisy, Wash.

Officers: P. E. Seelye, pres.-mgr.; J. R. Nevers, sec.-treas., 2414 2nd Ave., Spokane, Wash.

Property: the Silver Mountain, or Daisy mine, 4 miles E. of Daisy, Stevens county, and 18 miles from railroad, said to show several quartz veins in hornblende diorite, from 10' to 6' in width, containing sphalerite, chalcopyrite, marcasite and pyrite.

Development: by 600' Terry tunnel and 1,000' Seelve tunnel to depth of 125'. Five men employed.

SILVER TRAIL MINING CO.

WASHINGTON

Idle and probably dead.

Officers: A. Julian, pres.; G. B. Gilfillan, v. p.; J. H. Ferguson, J. J. McLean, P. D. Roberts and H. R. Sanderson, directors. M. S. Davys, engr.

Inc. January 15, 1910, in Washington. **Cap.** \$1,000,000; shares \$1 par; 615,862 issued. Bonds, \$700,000 of 7%.

Property: the Lake Side mines, 557 acres, Skagit county, Wash., also the Hewitt and Lorna Doone mines in Slocan district, B. C. No recent information.

SILVER TRAIL MINING CO.

WASHINGTON

Officers: J. R. Brown, pres.; A. L. Hooper, sec.; W. S. Haish, treas.; with Robert Bell, A. J. Bell, Peter Reid and M. S. Peters, directors, at last account.

Inc. 1915, in Washington. **Cap.** \$125,000; shares 10c par.

Property: the old Clungstone mine, 8 miles E. of Evans in Colville mining district, opened in early '90s by Col. I. N. Peyton.

Development: tunnels, the lower one 700', with 400' drift on a 2-6' vein of silver-lead ore. Shipments made to Trail, 1916.

No recent information. Probably dead.

SOUTHERN MINNESOTA & WASHINGTON MINES CO. WASH.

Address: H. W. Holly, mgr., Oroville, Wash.

Officers: E. A. Williams, pres.; F. B. Sangers, sec.-treas.

Property: Lone Pine mine, 21 claims, 10 miles from Oroville district, near International boundary, Okanogan county, contains a quartz vein, 1-6' thick, with silver lead ore containing some gold. Ores contain galena, chalcopryite, pyrite, covellite and bornite. Company also has a 5-year bond for \$250,000 on the Submarine property near Nighthawk.

Development: by 300' upper and 1,000' lower tunnel. Developing since 1918, but mill construction held up until title was confirmed in October, 1921.

SPOKANE CONS. TUNGSTEN CO.**WASHINGTON**

Officers: F. E. Parks, pres., Deer Park, Wash.; E. N. Robinson, v. p.; with A. M. Winston, O. F. Kelly and A. M. Wood, directors.

Cap. \$625,000; non-assessable. Company is a merger of the Deer Park Mng. Co., Spokane Tungsten Co., and Beard & Meyers mining leases.

Property: about 360 acres, held under 30-year lease from the State, 12 miles N. of Deer Park, Stevens county, said to show tungsten ore. Shipments by former owners reported as \$30,000. Present company commenced work in 1918 and planned erecting a 50-ton mill. No recent information.

SPOKANE COPPER CO.**WASHINGTON**

Dead. Fully described in Volume XIV.

SPOKANE TIN MINES CO.**WASHINGTON**

Address: C. P. Robbins, Hyde Bldg., Spokane.

Officers: C. P. Robbins, pres.; Richard Marsh, v. p., 1727 E. 11th St., Spokane, Wash.; Chas. Theis, sec.-treas., with W. J. C. Wakefield, director. Inc. 1907, in Washington. Cap. \$1,500,000; shares \$1 par.

Property: 312 acres, 8 miles S. of Spokane, said to show tin and tungsten ore in pegmatite dikes in granite and schist. It was first worked in 1907, when a shaft was sunk 165', several hundred feet of work done, a little ore extracted, and the property closed down. Mine was bonded during part of 1918, for \$75,000 to F. C. Bailey, of Spokane, who organized the Spokane Tin and Tungsten Co. About \$3,500 worth of prospecting was done and a new orebody discovered. All work ceased with the signing of the Armistice.

SPOKANE TIN & TUNGSTEN CO.**WASHINGTON**

Dead. Had a lease on the Spokane Tin Mines company's holdings near Spokane.

STANDARD CHEWELAH MINING CO.**WASHINGTON**

Address: 1112 Paulsen Bldg., Spokane, Wash.

Officers: F. R. Clark, pres.; Thos. Bowers, v. p.; R. N. Clark, sec.-treas., with G. W. Sommer, and F. F. Jarvis, directors.

Inc. in Washington. Cap. \$1,500,000; shares \$1 par; 853,620 issued.

Property: 5 claims, 91 acres, 2 miles east of Chewelah, said to show silver-copper ore, assaying about 5 oz. silver and 2 to 15% copper. Developed by a 20' shaft and 600' of workings. Mine was reported purchased in 1921 by Juno Echo Copper Co., purchase price given as 250,000 shares of Juno Echo stock, 100,000 shares going to the creditors and the balance to the Standard Chewelah stockholders.

STERLING SILVER-LEAD CO.**WASHINGTON**

Officers: Dr. J. W. Cosford, pres., 919 Nora St., Spokane, Wash.; B. C. Gochenouer, sec.-treas.; R. O. Campbell, v. p.; with Carl Anderson, B. J. Lindsay, all of Spokane, Wash.; E. Pearson and F. W. Brennan, directors.

Cap. \$2,000,000; shares \$1 par.

Property: 12 claims, patented, near Metaline, Pend d'Oreille county, said to show silver-lead-zinc ore. Development: by tunnels. In 1918, a small force was working. No later report.

SUNSET COPPER CO.**WASHINGTON**

Address: L. C. Smith Bldg., Seattle, Wash. Mine address: Index, Washington. J. G. Shepherd, supt.; E. C. Morse, mill supt. Company is

a close corporation, with E. A. Sims, pres. and manager. Dr. J. H. Shepard of Coeur d'Alene, Idaho, v. p.

Property: the Sunset mine, near Index, Snohomish county, on G. N. R. R. The mine has two parallel lodes, the Sunset and the Copper King. The first named has a 16' lode with lenses of copper ore and a considerable tonnage of low-grade ore that can be treated profitably. It is stoped for 5'-10' wide, yielding 2-6% ore. The Copper King, 475' north of the Sunset lode is like it and is quite as large and rich.

Development: for horizontal range of 1,400' and vertical 900', with adit cutting lode at 290' depth. Main adit is 400' below outcrop.

Equipment: 125-ton concentrator completed 1918 and full mine equipment.

The mine is one of the largest copper producers of the State. During 1920 company operated the mine for 10 months to December. Shipments made to Tacoma smelter.

SWAUK MINING & DREDGING CO.

WASHINGTON

Office: Yakima, Wash. **Mine address:** Frank Bryant, mgr., Liberty, Wash.

Officers: Mark Pennington, pres.; D. J. Bryant, sec.; M. Bernard, treas.

Operates a dredge of 1,000 cu. yds. daily capacity at Liberty, Kittitas county, near the junction of Williams and Swauk creek. Operations were started, September, 1920.

TACOMA SMELTER

WASHINGTON

The plant was formerly operated under name of Tacoma Smelting Co.

Office: American Smelters Securities Co., 120 Broadway, New York.

Works office: Tacoma, Wash.

Officials: H. Y. Walker, mgr., Box 1605, Tacoma, Wash.; C. E. Little, asst. mgr.; R. F. Barker, supt.

Property: a smelting plant with a 52-acres site, 6 miles from Tacoma, on Puget Sound. Property is well located for receipt and dispatch of materials, and has extensive wharves, with ore bunkers and automatic devices for unloading cargoes.

The smelter has 2,500 tons daily capacity, and treats copper, silver, gold ores and concentrates, from the entire western coast of North America, and a considerable tonnage of South American ores.

Equipment: 3 blast and 1 reverberatory furnaces. The 575' stack is one of the highest in the world. The converter department has a capacity of 300 tons of blister copper daily.

The electrolytic plant capacity is 8,500 tons per month.

Electric power is received at 40,000 volts and stepped down to 100 volts for use, the works requiring about 6,000 h. p. Fuel is petroleum, brought in tank steamers from the oilfields of southern California.

The Tacoma smelter is one of the most important custom plants on the Pacific coast, the management is progressive, and the metallurgical practice excellent. In addition to copper, the products are arsenic and liquid sulphur dioxide.

TEMPEST MINING CO.

WASHINGTON

Mine address: Daisy, Wash.

Officers: F. H. Schindler, pres.; C. W. Hill, sec.-treas.

Property: 6 claims, ½ mile S. of the Daisy mine in Kettle River district, Stevens county. Ore occurs in quartz veins in diorite, carrying sphalerite, chalcopyrite and pyrite, with chief values in gold and silver.

Development: by 2,500' of tunnels.

TENAS MINING CO.

WASHINGTON

Idle. Office: 320 California Bldg., Tacoma, Wash. **Mine near Keller, Ferry county, Wash.**

Officers: J. R. Turner, pres.; P. J. Sweeney, v. p.; C. E. Peterson, sec.; D. McPherson, treas.; with John W. Brechtel and F. W. Heide, directors, all of Tacoma, Wash.

Inc. Sept., 1910, in Washington, succeeding the Iconoclast Consolidated

Mines Co., whose property was sold for debt. **Cap.** \$10,000; shares \$1 par; fully paid and assessable up to 25% per year; issued, 3,448. Assessments to 1916, 71 cents per share.

Property: 5 claims, 80 acres, relocated 1912, 2 miles N. of Keller, shows 3 contact deposits with an orebody 30' in maximum width, giving average assays of 3.6% copper and 2 oz. silver per ton with some gold.

Development: by 325' main shaft and 3 tunnels with claimed total length of 514'. Annual assessment work only has been done since 1908. Company is a holding corporation, awaiting an opportunity to sell or bond the property.

THUNDER CREEK MINING CO.**WASHINGTON**

Henry S. Volkmar, gen. mgr.

Property: 9 claims on Thunder Creek, 2 miles N. W. of Park Creek Pass, in Skagit county, said to show lead-silver ore in a well-defined fissure vein. Developed by a 700' tunnel at an elevation of 4,600'. No recent report; probably idle.

TILLICUM DEVELOPMENT CO.**WASHINGTON**

Probably dead. Letters returned unclaimed.

Was the successor of the Palmer Mountain Tunnel Co., inc. Aug., 1912, in Washington.

Fully described in Volume XIV.

TRINIDAD MINING & SMELTING CO.**WASHINGTON****Office:** Tonasket, Wash.

Officers: Jos. Coleman, pres.-mgr.; E. F. McNall, v. p., T. W. Brown, sec.-treas.

Inc. Dec. 1, 1911, in Washington. **Cap.** \$1,000,000; shares \$1 par; 714,-300 issued.

Property: the Central group, 12 unpatented claims, 240 acres, in the Galena district, Okanogan county, 10 miles S. W. of Tonasket. Ore contains galena, pyrite, chalcocopyrite and sphalerite. A 30-ton shipment averaged \$12 per ton in gold and silver.

Development: by shafts, trenchings and open cuts, with a total of 1,200' of workings. The owners are doing all work by hand mining.

UNITED SILVER-COPPER MINING CO.**WASHINGTON**

Name changed in 1919 from United Copper Mining Co.

Office: 217 Symons Bldg., Spokane, Wash. **Mine office:** Chewelah, Stevens county, Wash.

Officers: Conrad Wolfe, pres.; W. G. Collins, v. p.; E. C. Blanchard, sec.-treas., with Daniel Hoch and J. H. Griffith, directors.

Operating staff: E. A. Wolfe, mgr.; H. D. Quimby, mill supt.

Inc. July, 1906, in Washington. **Cap.** \$1,000,000; shares \$1 par; fully issued; assessable by majority vote. Last assessment Sept., 1914, ½c a share. Annual meeting, Jan. 28. Company and Guaranty Trust Co., New York, transfer agents; Registrar & Transfer Co., and Spokane & East Trust Co., Wash., registrars. Listed on New York Curb, May 1, 1917; stricken from listing, May 27, 1920.

Treasurer's Report for years ending December 31st showed:

	1919	1918	1917
Operating revenue.....	\$236,649	\$282,966	\$354,372
Operating expenses.....	233,281	234,291	240,699
Net operating profit.....	24,716†	*18,174	113,672
Net indebtedness.....	39,879	61,577
Dividends.....	None	None	100,000

*After deducting depreciation charges and taxes.

†Operating loss.

Dividends: total to date, \$150,000. None since 1917.

Property: 16 claims, patented, 103 acres, 4½ miles N. E. of Chewelah; claims show a 6' vein cutting through shale and schist. Ore contains

chalcopryite, with streaks of gray copper ore on both walls. In 1921, a high-grade ore-shoot 4 to 5' wide was found in sinking a winze 200' below the 1,250' level; about one foot of this was rich silver ore, and the remaining 3 to 4' was good milling ore assaying 20 oz. silver and 5% copper.

This ore is opened by 65' drift on 1,400' level and for 25' below it in winze.

Development: by shafts to 1,200' depth, a winze to 1,400' and 5,000' tunnel. The mine has over 40,000' of workings. Report of Raymond Guyer, cons. engr., in March, 1919, estimated ore reserves at 50,836 tons above the 1,000' level, and below this level, 45,173 tons positive, 47,241 tons probable and 30,658 tons possible ore; grade about 1.35% copper and 3 oz. silver.

Equipment: includes electric hoist, air-compressors, capacity 1,300 cu. ft., 11 power drills, 2 pumps, and an electric lighting plant. Electric power is obtained from the Stevens County Power & Light Co. The mill uses flotation and has a maximum capacity of 350 tons per 24 hours, with a reported recovery of 85%. Employs about 50 men.

Production: 1910, 608 tons, \$5,878; 1911, 1,134 tons, \$11,184; 1912, 13,395 tons, \$240,798; 1913, 14,938 tons, \$171,617; 1914, 18,527 tons \$90,356.

	Tons mined	Value	Copper lb.	Silver oz.
1919.....	52,542	\$236,649	922,227	133,061
1918.....	66,181	315,448	907,422	130,914
1917.....	59,600	354,371	1,147,014	147,573
1916.....	40,000	372,296	1,179,178	159,271
1915.....	25,000	145,632	650,995	103,195

During first quarter of 1921, nine cars of ore shipped to the Tacoma smelter, ran 40-50 oz. silver and 10% copper per ton, netting \$1,200 per car.

Company reported to plan a consolidation with the Copper King Mining Co.

VALLEY MAGNESITE CO.

WASHINGTON

Mail returned from former office and company out of business. See Volume XIV.

VALLEY MINING CO.

WASHINGTON

Officers: W. R. Tuttle, pres.; A. L. Hooper, sec.-treas., City Hall, Spokane, Wash., with H. M. Ross, V. P. Adams, and S. Van Hook, directors, all of Spokane, Wash.

Property: 3 unpatented claims, locally known as the Edna mine, 9 miles W. of Valley, Stevens county. Idle for 12 years, but in September, 1917, mine was unwatered to 400', and levels have been driven at 100, 200, and 300' depth. Copper-silver ore exposed is said to have a value of \$600,000.

Equipment: includes a hoist and 3-drill compressor.

VIRGINIA-AGENDA CO.

WASHINGTON

Succeeds Eclipse Cons. Mng. & Inv. Co.

Address: P. O. Box 187, Seattle, Wash.

Officers: O. Robert Dahl, pres.-treas.; John S. Lutes, v. p.; John B. Van Dyke, sec., with Dr. C. E. Fawcette, F. W. Libby and L. A. Dahl, directors. Calvin V. Dier, asst. sec.

Inc. 1916, in Washington. **Cap.** \$15,000,000; \$5 par; all issued.

Property: 16 claims, 1,310 acres, unpatented, including Virginia mine and Winter Coon arsenic mine, a talc mine, and a mill site.

Mine has 3 tunnels and a shaft on a fissure vein in slate, carrying mercury, gold and silver, claimed to assay \$61.50 per ton. Workings total 1,825'. Management estimates 90,000 tons ore blocked out, March, 1919. Water power from the Stillaguamish river develops 830 h. p. by turbine. The concentrator, rated at 300 tons daily capacity, has tank room for cyanide treatment. A compressor of 600 cu. ft. capacity has recently been added.

Company holds interest through subsidiaries in the Crown Point Molybdenite and C. P. Copper mines (see Crown Power Molyb. Co.), in Aurelia Crown Mines, and in saw mill and water power and timber enterprises.

Development: by 7,975' of underground tunnel work with one shaft, developing 787,500 tons of milling ore.

Equipment: a hydro-electric plant, 300-ton concentrator, new 150-ton flotation plant, and full mining equipment.

It is said that \$448,560 had been spent to 1921, on equipment and development work.

VIRGINIA MINING CO.

WASHINGTON

Property: Virginia mine in Danville district, Ferry county. Made small shipment of gold ore containing silver and copper in 1918.

VULCAN MINING CO.

WASHINGTON

Office: A. O. Stuberg, Symons Bldg., Spokane, Wash. Mine at Orient, Stevens county, Wash.

Officers: H. M. Gibson, pres.; P. Lewis, v. p.; A. O. Stuberg, sec.; P. Larsen, treas., with J. D. Grimes, directors.

Inc. July, 1914, in Washington. **Cap.** \$1,500,000; **par** \$1; assessable.

Property: 7 claims, 4 miles N. E. of Rock Cut at 3,850' elevation, shows 3 veins with gold ore; also some silver.

Development: by several hundred feet of tunnels and shallow shafts.

Present owners have spent over \$20,000 on development. Probably idle.

WALLA WALLA COPPER MINING CO.

WASHINGTON

Office: Walla Walla, Wash. Mine office: Keller, Ferry county, Wash.

Officers: J. G. Mutinga, pres.; W. H. Meyer, v. p.; W. P. Lathrop, sec.-treas., with H. Osterman, Wm. Pfeiffer, Geo. Bradbury, C. M. McKinney, all of Walla Walla, and J. T. Leonard, directors.

Cap. \$1,000,000; **par** \$1.

Property: 10 claims, 2 unpatented, and a millsite, 1 mile N. E. of Keller, shows a 30' vein of lowgrade gold-copper ore, developed by an open-cut, shaft, and tunnel. Developing.

WASHINGTON BLACK ROCK MINING CO.

WASHINGTON

Address: John Gorrien, pres.-mgr., Hastings Hotel, Minneapolis, Minn.

Mine address: P. F. McGovern, Northport, Wash.

Inc. 1921. Is a close corporation.

Property: 8 claims, and mining rights on 160 acres, including the Maki group in E. side valley, Deep Creek, 6 miles from Northport, on county road, near the Last Chance and Great Western Mines. Claims showed 5' of high grade zinc carbonate ore, shipments made to Mineral Point plant of Empire Zinc Co. in 1920, averaging as high as 47% zinc. Ore occurs in a vein, 6½' wide, on which shaft has been sunk; vein runs N. 20° E., dip 60°. At 200' depth, ore changed to sulphide assaying 62-66% zinc. Lenses of lead ore were found in a blanket deposit cut in the shaft between the 100 and 200' levels.

Development: by 300' shaft and 280' tunnel that connects with shaft at 175' below apex of orebody. Shaft to be deepened to 400' level, 1922.

Equipment: hoist, 2 drill compressor, gasoline engine, etc. Employs 8 to 12 men.

Production: 50 to 100 tons a day; shipments started March, 1922.

WASHINGTON COPPER MINES DEV. CO.

WASHINGTON

Officers: P. H. Nester, pres.; J. L. Linn, v. p.; J. N. Hart, sec., all of Portland, Ore. **Cap.** \$500,000; **par** \$1. **Property:** 9 claims, unpatented, in Bald Mt. district, Skagit county.

Ore carries copper, gold and silver. In 1918 company was milling about 30 tons of ore daily.

WASHINGTON-IOWA COPPER MINING CO.

WASHINGTON

Idle since 1917. W. D. Gibson, pres.; P. R. Screven, sec., both of Seattle.

Property: on the eastern fork of Silver creek, 2 miles above Mineral, adjoins the Edison Mining & Development Co., under same management. Claims show 5 veins, carrying complex ore, consisting of chalcopyrite, galena, sphalerite and pyrite, with quartz gangue.

Development: by the 1,200' Bonanza crosscut tunnel.

WASHINGTON TUNGSTEN MINES CO.**WASHINGTON**

Address: Miller Bldg., Yakima, Wash.

Officers: D. B. McMahon, pres.-treas., Seattle, Wash.; J. Lenox Ward, sec., with Geo. Kerr, E. P. Sanford, E. G. Tennant, and J. J. Miller, directors.

Inc. November, 1915, in Washington. **Cap.** \$350,000; \$1 par.

Property: 15 unpatented claims, in Bumping Lake district, 50 miles N. W. of Yakima, Yakima county, said to show gold-copper-tungsten ore. Idle.

WASHOUGAL GOLD & COPPER MINING CO.**WASHINGTON**

Mail returned from former address: Washougal, Clarke county, Wash.

Officers: F. A. Mabee, pres.; John Scharboarer, v. p.; J. B. Jordan and T. A. Altman, secretaries; Dr. Otta Sutter, treas., at last accounts.

Inc. 1902, in South Dakota. **Cap.** \$1,000,000; shares \$1 par.

Property: 560 acres, held on a 30-year lease, from the State, near Mt. St. Helens, in the Bald Mountain district. Shows several vertical fissure veins in granite, one of which, averaging 6' thick, is developed by an 1,800' tunnel exposing ore, said to contain 5% copper, 15% lead and zinc, 2 to 70 oz. silver and \$1 to \$15 gold per ton.

Equipment: includes gasoline hoists, 25-ton concentrating mill, and a 3-drill Sullivan air compressor. No recent information available.

WENATCHEE GOLD MINING CO.**WASHINGTON**

Officers: J. P. Bonar, pres.; W. H. Kneemyer, treas.; both of Waterville, Wash.; M. P. Spencer, sec.

Cap. \$1,000,000; shares \$1 par.

Property: 80 acres of State land, held under 30-year lease, in Entiat valley, Chelan county, said to show free gold ore.

Development: over 500' of tunnels and shafts.

Equipment: includes a 2-stamp mill. Total shipments reported to have yielded about \$170,000. In 1918 mine was reported under a 2-year lease. No recent returns.

WESTERN COPPER MINING CO.**WASHINGTON**

Office: 229 W. 42nd St., New York. **Mine office:** Reiter, Wash.

Officers: John A. Powers, pres.; W. J. Weller, v. p.; Edw. Woram, treas.; M. A. Boldt, sec., with Frank K. Fairchild, E. T. Christensen, W. N. Wilkinson, Thos. A. Mead, and Geo. Wohlfahrt, directors.

Inc. April 25, 1917, in Maine. **Cap.** \$2,000,000; \$1 par; 1,300,000 issued. Bonded indebtedness of \$97,850 is to be retired by conversion into stock in 1921. Annual meeting, first Tuesday in April.

On June 6, 1917, company purchased assets of the Bunker Hill Mining & Smelting Co. for a stock consideration and assumed B. H. debts of \$84,973, consisting of bonds and notes, which have since been paid.

Property: Copper Bell mine, 20 claims, 15 patented and 1 millsite, patented, 371 acres at Reiter, 5 miles W. of Index, Snohomish county, Wash. Examined by Cory Wright, T. E. Brown, E. M. Simonds and V. V. Clark. Claims said to show fissures in granite, syenite and diorite, dipping 45°, with N. 40° W. course.

Ore: is mainly chalcopyrite, associated with magnetite. On account of this latter mineral, the consulting engineer considered that prospecting with a dipping needle should find additional copper deposits. The Bell shoot has been followed to 500' depth and the Jumbo to 100'.

Development: by incline shafts, 86 and 500' deep and tunnels, the longest 2,700'. To depth of 1,200' workings total 6,100'. Diamond drilling cut a parallel body to the Bell at 497 to 526', assaying 6.99% copper. This hole is to be followed by a shaft. Exploration cost \$112,927 to the end of 1916.

Equipment: to December, 1916, cost \$72,195, covering 300-h. p. hydro-electric plant, 100-ton obsolete concentrator, 50-ton smelter, compressor, tramway, diamond drill, steam engine, hoist, etc.

Property is well equipped for production if ore is developed

WEST HILL MINING CO.

Out of business. Fully described in Vol. XIII.

WASHINGTON**WEST VIRGINIA****CLARKESBURG CLINKERING CO.**

Subsidiary of American Metal Co., Ltd.

Operations discontinued in 1920; is being dissolved.

WEST VIRGINIA**GRASSELLI CHEMICAL CO., THE**

Address: Meadowbrook and Clarksburg, W. Va.

Two zinc smelters, that at Clarksburg including an acid plant. See company under U. S. section.

WEST VIRGINIA**WISCONSIN**

Wisconsin produces normally about 50,000 tons of zinc and 4,500 tons of lead per annum from the treatment of over 2,000,000 tons of ore. Most of this ore is milled and the product smelted at Illinois plants. The production centers named in their order of importance are: New Diggings, Benton, Livingston, Mifflin, Shulsburg, Hazel Green, Highland, Cuba City, Platteville, Potosi, Linden and Dodgeville.

During 1921, twelve concentrators were in operation, but only one continuously. The mine output was but 24,981 tons of crude concentrate compared with 122,948 in 1920, with shipments of 11,082 tons finished concentrate to smelters, compared with 63,057 in 1920.

In 1920 only 1,742,000 tons of crude ore was mined, compared with 1,826,200 in 1919. The low price for lead and zinc reduced the value of the output to \$4,843,690 compared with \$6,398,374 in 1919 and \$9,746,234 in 1918.

In 1920, the tonnage of green concentrate was 122,948 compared with 164,731 in 1919. In the former years, 32 mills and 5 separating plants were operated more or less continuously, but nearly all were idle at end of the year.

Unlike western vein deposits, the Wisconsin orebodies do not lie between regular walls, but form large, often highly irregular bodies, on a single floor in the so-called Galena limestone. The bottom of the ore is nearly always on a flat, generally well-defined clay seam, a few inches thick, which marks the junction of the base of the Galena lime and the top of the next formation, the Trenton lime. Above the clay bed, the orebodies make the unique "pitch" and flat formation described by Chamberlain. Theoretically, we should find two "pitches", one on either side of the top crevice, diverging as they go down, with the final flats a considerable distance apart on the clay bed. The area between, known locally as core ground, should thus constitute a single, well defined orebody, with the richer portions near the pitches and the leaner portion in the center of the core. Practically one finds few examples of this perfect orebody; almost invariably one pitch is better defined than the other, and often the opposite pitch may be totally lacking, or is marked by a faint line of fracture showing stronger mineralization than the wall rock.

Recent developments in the rich New Diggings field indicate that the "pitches" often assume a horseshoe or crescent shape, the richer ore being in the heart of the crescent, and the pitches showing less mineralization as they extend outwards. The length of the orebody may be several thousand feet, the height varying from 10 to 60' and the width from 60 to 250'. In fact, on the core side, there is no definite end of the ore. The mineral deposit simply gets thinner and thinner, and the limit of working depends on the cost sheet and the profit from the recovery.

The mines are worked almost universally with underhand (breast) stoping, using a room-and-pillar method for carrying the ground. In most cases, a

drift is carried along the edge of the ore in advance of the stopes, and new stopes are opened up on the pitch as needed. These open stopes, are frequently of great extent, sometimes 40 to 80' high and 40' wide between pillars.

The Mineral Point Zinc Co., Wisconsin Zinc Co., Vinegar Hill Zinc Co., and Frontier Mining Co., produced 77% of all the zinc concentrate and 60% of the lead output of the state in 1920-'21.

AMERICAN ZINC ORE SEPARATING CO. WISCONSIN

Subsidiary of Am. Zinc, Lead and Sm. Co., which see.

Address: Platteville, Wis.

Company owns and operates a plant using the Huff electrostatic process to remove iron from mill concentrates carrying 16 to 40% zinc and pyrite.

BARABA MINING CO. WISCONSIN

Office and mine: Mellen, Ashland county, Wis. Nelson Baraba, Sr., pres.; Nelson Baraba, Jr., sec.

Inc. 1906. **Cap.** \$1,000,000; shares \$1 par. Has a shallow shaft showing ore assaying 2.8% copper, with traces of gold and silver.

Idle since 1917.

BERKSHIRE MINING & DEVELOPMENT CO. WISCONSIN

Address: W. J. Wheeler, sec., 415 Palladio Bldg., Duluth, Minn.
Mine address: Mellen, Wis.

Property: Berkshire iron mine, near Mellen, at the western end of the Gogebic range.

BIG BEND MINING CO. WISCONSIN

Address: C. M. Treat, Cuba City, Wis.

Inc. in September, 1919. **Cap.** \$60,000; shares \$1 par. Will develop and operate leases in the Cuba district.

BLOCKHOUSE MINING CO. WISCONSIN

Address: Kistler & Stephens, Platteville, Wis.

Property: the Schroeder mine and mill and the Goke mine, both on same E.-W. range. In 1921, company combined with the McGuire-Sally Waters interests. Extensive deposits of smithsonite occur on 60' level and blende at 110' in 4 "blankets."

The Goke lease having been proved by drill and shaft, was opened 1921 and a 200-ton mill taken from the Climax mine was put up here.

B. M. & B. MINING CO. WISCONSIN

Address: Jos. Wilson, supt., Mifflin, Wis. Company owned various zinc mines in the Mifflin district. The Squirrel mine was reported sold in 1920 to the Fearless Mining Co., which see.

BURR MINING CO. WISCONSIN

Address: Wat Nalen, supt., Galena, Wis.

Reopened and mill overhauled, late 1921.

CAHOON MINE WISCONSIN

Address: A. W. Rohn, mgr., Baraboo, Wis.

Property: a tract of 140 acres, one mile S. W. of Baraboo, underlain by iron ore, opened and mined by shafts and extensive workings.

CLEVELAND MINING CO. WISCONSIN

Office: 625 Bank & Insurance Bldg., Dubuque, Iowa. S. W. Burford, mgr.; H. L. Jones, supt.

Property: 40 acres, includes the Cleveland and Hazel Green mines at Hazel Green, Grant county. Lead-zinc ore occurs in flats and pitches in limestone.

Development: several 150' shafts with 1,500' of workings said to block out 100,000 tons of ore.

Equipment: includes a 75-h. p. electric hoist, a 6-drill air-compressor, a 250-ton concentrating plant. Concentrate is sold to Mineral Zinc Co. under contract; employs normally 160 men on double shift. Closed down, 1920-21.

COMMONWEALTH IRON CO.**WISCONSIN**

Address: E. W. Hopkins, mgr., Ironwood, Mich. Property has not been worked since 1910.

CONNECTING LINK MINING CO.**WISCONSIN**

Office: Curt M. Treat, mgr., Cuba City, Wis. Robt. A. Fox, supt.

Offices: Anton Zwack, pres.; T. S. Hingtgen, v. p.; Curt M. Treat, sec.; Theo. E. Buechele, treas., with E. J. Gibbs, Henry Schmieden and J. F. Galligan, directors.

Inc. 1917, in Wisconsin. **Cap.** \$300,000; increased 1920 from \$100,000; \$1 par; 180,000 issued.

Dividends: two, equal to 20%, were paid in 1918.

Property: 300 acres, includes Connecting Link No. 2 mine, in Cuba City district, Lafayette county.

Equipment: includes electric power, a 150-ton mill, on the Dall land, and a new No. 1 concentrator completed 1920. Company was the largest producer in the Cuba district from 1918-20.

CONSOLIDATED LEAD & ZINC CO.**WISCONSIN**

Address: Charles Lawyer, mgr., Benton, Wis. Company had a lease on the Charles Smith tract, a mile S. of Benton. Drilling was completed and shaft sunk late in 1918.

DODGEVILLE MINING CO.**WISCONSIN**

Address: Dodgeville, Wis.

Erected a new mill in 1920.

FEARLESS MINING CO.**WISCONSIN**

Address: Sam Altenberg, supt., Platteville, Wis.

Inc. 1919. **Cap.** \$100,000.

Property: the Optimo Mng. Co. holdings, in the Linden district. Mine has an orebody 60' wide and 9' thick, carrying high-grade jack. Concentrates carry 30-40% zinc.

Equipment: includes a 100-ton mill, making 55% zinc concentrate by jigging.

In 1920, company acquired the Squirrel mine, a producer in the Mifflin district, formerly owned by the B. M. & B. Mng. Co., and the Nightingale mine S. E. of Benton, under development at last account.

FIELD MINING & MILLING CO.**WISCONSIN**

Office: 2200 Insurance Exchange, Chicago, Ill. **Supt.'s address:** R. F. D. No. 7, Scales Mound, Ill.

Officers: Robt. W. Hunt, pres.; Jas. C. Halsted, v. p., with L. V. Rice, gen. mgr.; C. C. Whittier, directors. C. B. Nolte, sec.-treas.

Inc. 1908, in Illinois. **Cap.** \$100,000; shares \$100 par; \$65,000 outstanding. Annual meeting, 1st Tuesday in May.

Property: the Thompson mine near New Diggings, Wis., an important lead-zinc producer, developed to depth of 225' by vertical shaft. Ore occurs in fissure veins and disseminations traversing dolomite. Management estimated ore reserves at 350,000 tons in May, 1917.

Equipment: includes electric power, 50-h. p. hoist, 600' elec. compressor, centrifugal pump, 800-ton mill, equipped with jigs and tables.

Produced zinc, lead, and pyrite averaging 45% zinc, 75% lead, 31% sulphur, 16% iron, respectively. Operations suspended in December, 1918.

FLINT MILL & FURNACE CO.**WISCONSIN**

Company operated a 20-ton Fink furnace at Wauwatosa, treating lead concentrates from the Wisconsin fields.

FLORENCE IRON CO. OF WISCONSIN**WISCONSIN**

Address: F. A. Vogel, gen. mgr., Room 337, 25 Broad St., New York City; E. A. Thiemann, asst. mgr.; Florence, Wis. Ed. Larson, supt.; M. A. Hanna & Co., sales agents.

Property: the Ernst mine at Commonwealth, Wis. and Florence mine at Florence, both mines on the Menominee range. **Ore:** non-Bessemer hematites, carrying 50% iron and 0.24% phos., mined by milling methods to depths of 500 and 700'. The Bates and Youngs mines are also operated.

Production: the Ernst mine produced 70,416 tons in 1917; 173,155 tons in 1918; 77,990 tons in 1919, a total of 561,642 tons; the Florence mine produced 47,193 tons in 1917; 97,322 tons in 1918 and 61,888 tons in 1919, a total of 3,410,569 tons in all.

FRONTIER MINING CO.**WISCONSIN**

Offices: 413 Fletcher Trust Bldg., Indianapolis, Ind.; Galena, Ill. and Benton, Wis.

Officers: J. H. Billingsley, pres.; C. R. Hinkle, v. p.; C. L. Rost, v. p.; W. C. Hauelsen, sec.-treas.; preceding with C. W. Craig, G. A. Schnull and L. G. Deschler, directors.

Cap. \$125,000; \$100 par.

Dividends: begun April, 1916, are 2% the first of each month, and 10% on the 15th.

Property: the Middie and Grotkin mines at Benton, Wis. Ore is zinc sulphide in pitches and flats in limestone.

Production: the mines when in full operation average, about 800 tons of 36 to 42% zinc concentrate weekly.

GRUNOW MINING CO.**WISCONSIN**

Address: Herman Grunow, supt., Mifflin, Wis.

Company operates zinc mines in the Mifflin district.

HARMONY IRON CO.**WISCONSIN**

Address: 808 First Nat'l. Bank Bldg., San Jose, Calif. **Mine address:** Robert King, supt., Ironwood, Mich. **Officers:** E. A. Hayes, pres.; W. P. Lyon, sec.

Inc. in California. **Cap.** \$1,000,000; \$25 par; all issued.

Property: Germania iron mine at Hurley, Wis.

HAY CREEK MINING & PROSPECTING CO.**WISCONSIN**

Address: M. L. Bacon, sec., 601 5th Ave., Antigo, Wis. Mine at Augusta, Wis.

HERCULES MINING CO.**WISCONSIN**

Property: leases 400 acres of farms, 2 miles E. of Cuba City, on which drilling revealed rich zinc and lead ore. A 100-ton mill was to be erected. Idle and probably dead.

HOLMES MINING & MILLING CO.**WISCONSIN**

Idle. Mellen, Ashland county, Wis.

Officers: John Holmes, pres.-mgr.; A. D. Barnes, v. p.; Thos. A. Humphrey, sec.; F. P. Simmonds, treas., with Edw. Bekken, A. D. Wilson and A. D. Hill, directors.

Inc. Jan. 9, 1902, in Wisconsin. **Cap.** \$150,000; shares 25c par.

Property: 160 acres in the Penokee iron range, about 1 mile N. of Bad river, shows fissure veins in greenstone, diorite and slate with E.-W. strike and dip of 70°. Three orebodies are claimed, of which one, said to be 40' wide and traceable one-half mile by a strong gossan, with slate footwall and diorite hanging, is reported to have chalcopyrite in a quartz gangue. Ore gives assays up to 9 oz. silver and \$3 gold per ton.

Development: by 150' and 188' shafts.

Equipment: includes a 16-h. p. hoist.

IMPERIAL MINING CO.**WISCONSIN**

New Diggings, Wis.

INDIAN MOUND MINING CO.**WISCONSIN**

Mine controlled by Lawrence Mines Co., which see.

KLAR PIQUETTE MINING CO.**WISCONSIN**

Address: W. H. Doyle, sec., Platteville, Wis.

Company operated zinc mines in the Platteville district, at last account.

LA RUE MINE**WISCONSIN**

Address: W. F. LaRue, owner, Alworth Bldg., Duluth, Minn.

Property: an iron mine at North Freedom, Wis., operated by the owner.

LAWRENCE MINES CO.**WISCONSIN**

Address: Dubuque, Iowa; or New Diggings, Wis.

Property: the Indian Mound mine at Benton and leases in New Diggings district. The Lawrence mine at Hazel Green was abandoned in 1918. The Indian Mound was a regular producer, 1918-'21.

LINDEN ZINC CO.**WISCONSIN**

Address: 404 Telephone Bldg., Indianapolis, Ind. **Mine address:** Augustin P. Craft, Galena, Ill.

Company said to own and operate the Frontier mine and operates a roasting and separating plant at Cuba City, Wis.

LITTLE PLATTE MINING CO.**WISCONSIN**

Address: Raymond Piquette, mgr., Platteville, Wis. Had a lease on James Tracey land, 6 miles W. of Platteville. A 50-ton mill was erected in September, 1918, and shipments made.

LUCKY FIVE MINING CO.**WISCONSIN**

Address: Mr. McKinley, supt., Dodgeville, Wis.

Property: a lease on Davis and Thomas lands, in Dodgeville district near Cuba City, Grant county, Wis. A small producer of high-grade lead-zinc concentrates. Developed by 100' shaft.

Equipment: includes steam plant and 50-ton concentrator.

LUCKY SIX MINING CO.**WISCONSIN**

J. N. Vail, supt., R. R. No. 2, Livingston, Wis.; or Mifflin, Wis.

Property: in Mifflin district, Iowa county, developed by two shafts, and equipped with a 150-ton mill.

LUCKY TWELVE MINING CO.**WISCONSIN**

Address: L. N. Dana, mgr., Benton, Wis.

Company operated zinc mines in the Benton district.

M. & P. MINING CO.**WISCONSIN**

Address: Shullsburg, Wis.

Property: the Pacquette mine, opened and first shipments made late 1921.

MACKAY MINING CO.**WISCONSIN**

Address: D. and W. Mackay, Platteville, Wis. Acquired property of the Ross Mining Co. in Linden district, in 1919, and resumed mining and drilling in November. Operated and shipped concentrate in 1920.

McMILLAN ZINC CO.**WISCONSIN**

Offices: Platteville and Hazel Green, Grant county, Wis.

Officers: A. C. McMillan, pres.; Henry Hornischfeger, v. p.; H. B. Morrow, sec.-treas., with L. C. Dagenhardt and C. M. Echols, directors; L. C. Dagenhardt, supt., Hazel Green.

Inc. August 3, 1914, in Wisconsin. **Cap.** \$100,000; \$1 par. Annual meeting, August 14.

Property: 100-acre lease, at Hazel Green, said to show zinc and lead sulphides occurring in a disseminated deposit in the Galena limestone formation.

Development: 180' vertical shaft.

Equipment: includes steam hoist, 300 cu. ft. air-compressor, pumps and a mill capacity 400 tons per 20 hours.

In February, 1918, mine was closed temporarily, due to high costs and heavy flow of water. Although fully equipped, more capital is needed to bring property to producing basis.

MINERAL POINT ZINC CO.**WISCONSIN**

(Subsidiary of the New Jersey Zinc Co.)

Address: 160 Front St., New York City. T. H. Garnett, supt.

Properties: the Marsden-Black Jack mine at Galena, Ill.; Coker No. 1 and No. 2 mines at Livingston, Wis.; Highland mine at Highland, and the Penna-Benton and Hoskins mines at New Diggings, Wis. The last named was the largest producer of galena and sphalerite in the district in 1919.

Geology: in the Black Jack mine there are two "pitches" to the ore-body; one contains heavy black jack, and has a smooth hanging wall; the other "pitch" contains ore heavy in marcasite and without any definite

wall. In the Coker mines the orebodies are of great length and determined by drill holes for a length of 6,900'. No. 1 orebody is 7,500' long, if the mines of the Vinegar Hill Zinc Co. be included.

Equipment: at Mineral Point, Wis., company has a roasting and separating plant, including a multihearth roaster of 150 to 200 tons daily capacity and magnetic separators to remove pyrite from jig concentrates, whose zinc content is raised from 37 to 59%. Recovery is about 90% at cost of \$2 per ton. Also, a 4-block zinc oxide plant of 12 double compartments each. At the Black-Jack mine, there is a 600-ton mill and at Depue, Ill., company operates a 9,068 retort zinc smelter with acid plant.

Reported that the zinc carbonate orebodies at Highland have been exhausted and company is to abandon this district.

MONMOUTH ZINC MINING CO.

WISCONSIN

Office: C. G. Norton, sec.-treas., Hazel Green, Wis.

Officers: C. E. Cornell, pres.; John A. Allen, v. p., with R. E. Tresham, Hugh Marshall and D. W. O'Connor and Andrew Elvod, directors.

Cap. \$235,300; \$10 par; \$117,650 issued. Annual meeting, first Tuesday after first Monday in February.

Property: 200 acres at Hazel Green, Lafayette county, Wis. Deposit is a fissure or "pitch" in "blue" rock, with "horseshoe" course, characteristic of the district. Ore assays 40% zinc, 15% iron, and 2.5% lime.

Development: by 220' shaft and 260' tunnel. **Equipment:** 75-h. p. motor-driven hoists, 2-drill compressor, pumps (one deep-well of 2,500, one sinker of 800, and one station of 800 g. p. m.), 400' tram from shaft to mill, and 150-ton mill employing 3 jigs of 7 cells each.

The mine was operated under lease by Vinegar Hill Zinc Co. to December 18, 1920.

Operations will be resumed when the metal market improves.

MONTREAL MINING CO., THE

WISCONSIN

Office: A. C. Bishop, sec., 1208 Hanna Bldg., Cleveland, Ohio.

Officials: E. W. Hopkins, range mgr., Ironwood, Mich. O. M. Schaus, supt.; F. B. Goodman, gen. supt.; J. M. Price, asst. supt. at Hurley; Oglebay, Norton & Co., sales agents. W. K. Carter, Ironwood, Mich., pur. agt.

Property: the Montreal and Ottawa mines on the Gogebic range, near Hurley, (Montreal), Iron county, Wis., both opened in 1886. Ores are similar, namely, soft, red, granular, Bessemer and non-Bessemer hematites, assaying 55% iron and 0.045% phosphorus in the Montreal, and 49% iron and 0.054% phosphorus in the Ottawa. The shipping grades are 61% iron and 0.033% phosphorus and 53.04 to 56.90% iron and 0.063 to 0.059% phosphorus, respectively. The mines are worked by sub-level and caving to 2,300' in the Montreal and stoping to 1,300' in the Ottawa.

Production: for 1919 and 1920 totaled 6,072,094 tons from the Montreal and 2,209,441 tons from the Ottawa.

NATIONAL ZINC SEPARATING CO.

WISCONSIN

Address: R. B. Keating, mgr., Platteville, Wis. **Works address:** Cuba City, Wis.

Works: company operates a roasting and magnetic-separating plant, capacity 275 tons of crude zinc concentrate in 24 hours, at Cuba City, Grant county, Wis. A Cottrell precipitator was installed in the works in 1918. The sulphuric acid plant can make 100 tons daily. Most of the supply comes from mines operated by the Vinegar Hill Zinc Co. The raw concentrate carries 23 to 46% zinc, and the final product 60%. This is sold to the Illinois Zinc Co., Grasselli Chemical Co., and the American Zinc Co., of Hillsboro, Ill.

NORTHWESTERN IRON CO.

WISCONSIN

Described in Vol. XIII. Mine now owned by the Steel & Tube Co. of America, which see.

but were resumed in September, and shipments made at the rate of 3-5 cars per week.

ODANAH IRON CO. WISCONSIN

Address: Cleveland, Ohio.

Property: the Windsor iron mine at Hurley, Wis.

OGLEBAY-NORTON CO. WISCONSIN

Address: O. M. Schaus, mgr., Hurley, Wis. See under Minnesota.

OLIVER IRON MINING CO. WISCONSIN

Main office: Wolvin Bldg., Duluth, Minn. Works office: Shullsburg, Wis. Operates a 300-ton roasting and separating plant. See this title under Minnesota for full description.

OPTIMO MINING CO. WISCONSIN

Office: 1127 State Life Bldg., Indianapolis, Ind.

Property: at Linden, Iowa county, Wis., was the main producer of lead-zinc concentrates in the Linden district in 1917-18. Operated by Fearless Mining Co., at last account.

PEACOCK MINING CO. WISCONSIN

Address: Henry Ovitz, supt., Mifflin, Wis.

Company operated zinc mines in the Mifflin district.

PENI MINING CO. WISCONSIN

Address: H. C. Holtz, supt., Mifflin, Wis. Owns a zinc mine in the Mifflin district.

PICKANDS, MATHER & CO. WISCONSIN

See description in Minnesota section of this Volume.

Address: Cleveland, Ohio.

Property: the Cary, Superior and West Cary mines at Hurley, Wis.

REPUBLIC IRON & STEEL CO. WISCONSIN

See general description elsewhere in this Volume. Address: Youngstown, Ohio.

Property: the Hennepin iron mine at Pence, Wis.

RODHAMS McQUITTY MINING CO. WISCONSIN

Address: Shullsburg, Wis.

Was a regular shipper of zinc concentrate in 1920. Operations resumed late 1921 and 150 tons lead "ore" shipped in first week of October. Company operates mill and tram.

ROSS MINING CO. WISCONSIN

Property: acquired October, 1919, by the Mackay Mining Co., which sec.

RUDOLPH LAND CO. WISCONSIN

Idle. Mine near Gordon, Douglas county, Wis.

Inc. 1905, as successor of Minong Range Copper Co.

Property: 12 miles from Gordon, on the southern fold of the Keweenaw syncline.

Development: by two shafts, deepest 350', sunk at an angle of 36°, on a dark amygdaloidal trap bed carrying small quantities of native copper.

Equipment: includes a 6-stamp mill. Property fully described under title of Minong Range Copper Co., Vol. XIII, Copper Handbook.

ST. CROIX CONSOLIDATED COPPER CO. WISCONSIN

(For description see Vol. XII.)

Out of business. Holdings reported divided between Lake Superior Copper Co. and Superior Cons. Copper Co. No record of operations.

SAVAGE MENKE MINING CO. WISCONSIN

Address: Platteville, Wis.

Has developed a mine on Dixon range, and installed power, pumping and mill machinery. 1921.

SHAMROCK MINING CO. WISCONSIN

Presumably dead. Fully described in Volume XIV.

SPRING VALLEY IRON & ORE CO. WISCONSIN

Address: Spring Valley, Wis.

Property: the Cady iron mine at Elmwood, Wis.

STEEL & TUBE COMPANY OF AMERICA

WISCONSIN

Office: 1st National Bank Bldg., Milwaukee, Wis. J. H. Means, manager in Wisconsin; A. D. Chisholm, manager in Michigan.

Inc. 1918 in Delaware. Cap. 972,628 shares com. (nominal par value \$2), and \$17,500,000 7% cum. pfd., \$100 par.

Property the Mayville mine at Mayville, Dodge county, Wis. Also the Keweenaw, Newport and Anvil mines on the Gogebic range and the Isabella mine, Marquette county, Michigan.

	Iron%	Phosp.%	Mang. %	Output (Tons)		
				1919	1920	Total
Mayville.....	41.45	1.05	0.10	94,673	83,700	1,472,493
Keweenaw.....	54.87	0.083	0.44	152,674	299,532	903,958
Newport.....	54.14	0.42	0.38	1,035,686	1,153,482	16,768,848
Anvil.....	54.67	0.83	0.52	5,536	10,869	920,058
Isabella.....	54.68	0.83	0.42	38,805	118,530

SUPERIOR COPPER MINES CO.

WISCONSIN

Address: Superior, Wis.

Officers: J. B. Arnold, pres.; T. A. Merritt, v. p.; F. L. Bernard, sec.; and H. M. DeLanoie, treas.

Inc. Nov. 14, 1916, in Wisconsin. Cap. \$1,000,000; all outstanding. Security Transfer & Registrar Co., transfer agent. Stricken from listing on N. Y. Curb, December, 1920.

Property: in Douglas county, Wisconsin. Ore carries native copper.

TIFFANY MINING CO.

WISCONSIN

Letters returned from former address, 925 Postal Telegraph Bldg., Chicago, Ill., and company probably dead. See Vol. XIV.

VINEGAR HILL ZINC CO.

WISCONSIN

Owned by Steel & Tube Co. of America, Conway Bldg., Chicago, Ill. W. N. Smith, gen. mgr., Platteville, Wis.; J. A. McCulloch, supt., Baxter Springs, Kans.; S. H. Davis, mgr.; J. G. Trewartha, supt.

Company operates a number of mines in the Wisconsin-Illinois and Oklahoma-Kansas districts; also controls a large acreage in the latter district on which mines are operated under sub-leases.

The North Unity mine near Day Siding was operated 1921.

The Dale mines and the Yewdall in the Livingston district resumed operations Nov., 1921, after a year shut-down, employing 50 men at each mine, the mill shipping 350-400 tons concentrate weekly to the National Separators at Cuba City.

Company, also has mill at the Field Meloy property, New Diggings.

WEST HILL MINING CO.

WISCONSIN

Probably dead. See Vol. XIV.

WINSKILL MINING CO.

WISCONSIN

Operated in Shullsburg district in 1920.

Is a subsidiary of the Wisconsin Zinc Co., which see.

WISCONSIN STEEL CO.

WISCONSIN

Address: W. H. Dye, auditor, Harvester Bldg., Chicago, Ill.

Property: the Illinois iron mine at North Freedom, Wis. For description of Minnesota and Phillipine Island operations, see Minnesota.

WISCONSIN ZINC CO.

WISCONSIN

Address J. J. Stevenson, gen. mgr., Platteville, Wis.

Subsidiary of the American Zinc, Lead & Smelting Co., which see.

Operates the Champion plant of the Wisconsin Zinc Co., at New Diggings, Wis.

ZINC HILL MINING CO.

WISCONSIN

Address: Charles Wolf, pres.-mgr., Platteville, Wis.

Cap. \$1,000,000; increased August, 1920, from \$300,000.

Property: formerly known as the Little Dick and Big Dick. Drilling exposed good ore, and a 50 to 100-ton mill was erected in June, 1918. Operations were suspended in March, 1919, on account of market conditions, but were resumed in Sept. and shipments made at the rate of 3-5 cars p.week.

Company is doing extensive exploration and development work on adjoining properties and also operates a sulphuric acid plant at Cuba City. Shut down 1921 until December, when mine was unwatered.

WYOMING

The mountainous regions of Wyoming contain numerous widely scattered mineral deposits, most of them but slightly developed. The short lived "boom" of the Encampment district, on the Colorado border, bred so many "wild cats" that the mining industry of the state has suffered loss of prestige ever since.

No gold, silver, copper or lead was produced by the mines of this state in 1920.

The normal metal output, exclusive of iron, is relatively small, that of 1919 being but 798 tons of ore yielding a total of \$84 gold, 151 oz. silver, 139,909 lb. copper, and in 1920, 131 tons of \$28.12 chromite ore. The 1919 output of copper amounted to 124,816 lb.

The entire iron production and most of the copper produced in the state comes from the Sunrise mines in Platte county, owned by the Colorado Fuel & Iron Co. In 1919, the mine produced 446,446 tons of hematite and 806 tons copper; in 1920, 24,256 lb. copper.

ACME CONS. GOLD & COPPER MINING CO. WYOMING

Inactive. See Copper Handbook, Vol. XI.

AETNA MINING CO. WYOMING

Idle. Office: Merrill, Wis. Mine near Riverside, Carbon county, Wyo. See Copper Handbook, Vol. XI.

AMERICAN FIREPROOFING & MINING CO. WYOMING

Probably dead. Former address: care Investment Clearing House, Fin. Agts., 513 Denham Bldg., Denver, Colo. A. E. Minium, pres.; S. E. Coyler, mgr., at last accounts.

Inc. 1913. Cap. \$10,000,000; shares 10c par. Stock was offered some years ago at 2c with a guarantee of refund attached, should the company's statement not be verified. Officers of the company and its promoting stockbrokers have come in contact with Federal authorities at various times, while attempting to transfer large blocks of stock without revenue stamps.

Property: 8 and a fraction claims, 200 acres, in the South Pass mining district, 35 miles from Lander, Fremont county, Wyo., the nearest railroad, comprising the Jerry Dain and Hidden Hand Fraction group, a bond and lease on the Bobtail, Denver and Bluebird claims, near Lewiston, and control of 120 acres of partially developed mineralized land.

Ore: quartz, with gold in fissure veins, 15-24" wide, said to average better than \$100 per ton in gold.

Development: includes shafts 40-70' deep, including 500' of underground workings on the Bobtail claim.

Equipment: shaft-house, blacksmith shop, pumping station, engine, boiler, crusher, electric plant, and other machinery. A new mill was ready for operation in May, 1919.

Company has presumably devoted its energies toward selling stock, in preference to working the mine.

ANCHORIA COPPER MINING CO. WYOMING

Idle several years.

Office: Room 3, Algoma Bldg., Oshkosh, Wis. **Mine office:** Copper-ton, Carbon county, Wyo. H. O. Granberg, sec.-treas.

Inc. April, 1901, in Wyoming. Cap. \$1,000,000; shares \$1 par.

Lands: 4 claims, 1 patented, 80 acres, in the Battle Lake district, developed by a 200' shaft and tunnels of 45' and 60', showing an orebody estimated at 45' width, giving specimen assays of 17% copper, and from a trace

to \$5 gold per ton. Has a 40-h. p. steam plant, with hoist good for 500', three power drills and four substantial mine buildings of logs.

ANNIE MINING CO.**WYOMING**

Inc. 1903, in Wyoming. Cap. \$250,000; shares \$1 par.

Property: 100 acres, near Jelm, said to show two 4' contact veins between granite and schist, opened by a 140' shaft and a 138' tunnel, showing copper carbonates and bornite, assaying up to 20% copper and \$10 gold per ton. Idle since 1907, except for assessment work performed each year.

ATLAS COPPER MINING CO.**WYOMING**

Address: Tie Siding, Albany county, Wyo.

Development work was carried on in 1918-'19, a few hundred tons of ore being shipped to the Omaha smelter in 1918.

AZURITE MINING CO.**WYOMING**

Idle. Office: Room 3, Algolah Bldg., Oshkosh, Wis. Arthur Bishop, v. p.; H. O. Granberg, sec.-treas. and gen. mgr.

Inc. Dec. 17, 1904, in Wyoming. Cap. \$1,000,000; shares \$1 par; issued, \$624,650.

Lands: 5 claims, 63 acres, in the Battle Lake district, near Dillon, in Carbon county, showing 3 fissure veins, in gabbro, of 15 to 20' estimated width, opened by 305' of work, including a 65' shaft and 70' tunnel.

BIG FIVE COPPER CO.**WYOMING**

Company dissolved. Fully described in Vol. XIII.

BOSTON & WYOMING COPPER MINING CO.**WYOMING**

Idle. Office: care Jas. A. Shinn, Leadville, Colo. Mine Office: Esterbrook, Albany county, Wyo.

Inc. January, 1903. Cap. \$500,000.

Property: the oldest in the district, includes 120 acres mineral lands and 120 acres miscellaneous lands, taken over from Esterbrook Mining Co. The Esterbrook mine has a 4' fissure vein, traversing diorite, schist and granite, carrying cuprite, chalcopyrite, cerussite and galena, estimated by former owner to average 2 to 4% copper, 25 to 30% lead, 2 to 4 oz. silver and \$1 to \$2 gold per ton, developed by 2 short tunnels, and 5 shafts, deepest 335'.

CARISSA MINE**WYOMING**

Address: Atlantic City, Wyo. Mine kept unwatered in 1920; no returns for 1921.

COLOWYO GOLD MINING CO.**WYOMING**

Succeeds Park Gold Mng. Co.

Address: Box 589, Laramie, Wyo. Mine office: Centennial, Wyo. Chas. V. Garnett, mgr., B. F. Majors, supt.

Officers and directors: Henry Sachs, pres.; E. H. Joslyn, v. p.; C. B. Garnett, sec.-treas.; with C. M. Balkan.

Inc. in Wyo. Cap. \$2,000,000; \$1 par; 1,410,154 shares issued. Stock being sold at 25¢, April, 1921.

Property: 14 lode claims, 320 acres and 1 placer claim, in the Medicine Bow range, Albany county, 4 miles by wagon road from Centennial. The mine is at an elevation of 9,294'. Ore occurs as quartz and hornblende in 3 veins, from 5-22' wide and reported exposed by surface workings for 4,000' in length. Values mainly in gold.

Development: by 1,000' tunnel and 1,200' of workings to depth of 600'.

Equipment: includes 32 h. p. gas engine and compressor.

The tunnel is being extended and crosscuts driven on the middle vein. Management plans to patent the claims, has asked the Federal Power Commission for a permit to develop 100-h. p. water power on Middle Fork of Laramie river in Albany county, and is to put up a mill.

COMMERCIAL GOLD MINING CO.**WYOMING**

Office: Centennial, Wyo.

Officers: P. A. Peterson, pres. Canon Falls, Minn.; P. L. Holtum, sec.; B. Holtum, mgr., Centennial, Wyo.

Inc. 1909, in Wyoming. Cap. \$1,000,000; \$1 par; 350,000 outstanding. Transfer Office: Centennial. Annual meeting, second Tuesday in August.

Property: 2 patented claims of 96 acres in Centennial mining district. The formation is similar to that of the district, granite, schist, porphyry, quartzite, etc., with N. E.-S. W. trend.

Idle since 1918.

CONGO MINING CO.

WYOMING

Owns property in Battle Lake district; idle for several years on account of lack of transportation. No recent information.

CONTINENTAL-MORRIS COPPER MNG. CO.

WYOMING

Office: Morris, Ill. Mine near Encampment, Carbon county, Wyo.

Officers: J. H. Rogers, v. p.; Dr. G. A. Leach, sec.-treas., with I. F. Hatcher, U. C. Davis, W. A. Thomas, E. R. Joyce, B. C. Hitchcock and W. F. Buck, directors.

Inc. March, 31, 1908, in Wyoming, as a merger of the Continental Copper Mining Co. and Morris Mining Co. Cap. \$2,250,000, increased later to \$5,000,000; \$1 par; issued, \$1,750,000. Annual meeting, first Tuesday in February.

Property: 7 claims, patented, 120 acres, in the Battle Lake district, carrying about 50 acres of good pine timber. Claims show schist, with 4 veins, of 31 to 40' estimated average width, traceable 1,500 to 3,000', carrying carbonate and sulphide ore, estimated to average 1 to 8% copper, with small gold and silver values.

Development: includes several shafts and 1,400' of tunnels. **Equipment:** includes a steam hoist, good for 500', and 2 buildings. Idle, but resumption planned as soon as property can be refinanced.

COPPER BOTTOM MINING & MILLING CO.

WYOMING

Address: Inez, Converse, Wyo. Henry Metz, Sr., pres.; Fred Metz, sec.-treas.

Property: the Copper Bottom mine, in the Muskrat Creek district, Goshen county.

Development work done, 1920.

DAN JOE MINING CO.

WYOMING

Address: 1708 Pioneer Ave., Cheyenne, Wyo.

Inc. in Wyo. Stock \$1 par; offered at 25¢ per share in 1920.

Property: in Silver Crown district, 20 miles from Cheyenne, the nearest R. R. Station.

Company advertised stock for sale, but has not published a record of actual mining work done.

DEER CREEK CHROMITE MINE

WYOMING

Idle. Owned by the Vindicator Cons. G. M. Co. (Colorado), which see.

EAGLE MOUNTAIN MINING CO.

WYOMING

Developing a property near Hecla, Laramie county.

ELECTROLYTIC COPPER CO.

WYOMING

Offices: 232 Wickham Blk., Council Bluffs, Iowa, and Albany, Wyo.

Officers: E. J. Stoll, pres.; J. M. Dow, v. p.; Frank R. Vierling, sec.-treas., with J. L. Fisher, H. M. Nichols, J. R. Sullivan and O. P. Wyland, directors. Wm. Benton, mgr.

Inc. November, 1917, in Wyoming. Cap. \$1,500,000; \$1 par; 763,747 shares issued.

Property: company controls the Iron Blossom, Mountain Rest and Rambler groups, near Albany and Fox Park, in Albany county (21 claims, 420 acres). The Iron Blossom Mng. Co. holds title to the mine of that name, but leases it to the Elec. C. Co.

Development: by 2 shafts, 155' and 185' deep and 3,450' of drifts and crosscuts. In 1920 company discovered the faulted northern continuation of the Rambler vein. The ore is said to average 0.32 oz. gold, 2.57 oz.

silver, 0.211 oz. platinum, 0.2460 oz. palladium and 12.55% copper.

Equipment: includes double-cylinder hoist, boilers, pumps, drills, blacksmith shop and dwellings.

Production: the Electrolytic, better known as Rambler mine, is credited with a total production of \$500,000 under former ownership. Shipments amounting to 3 tons daily, begun September, 1921.

ELENOR MINES CO.

WYOMING

Address: O. M. Beck, Atlantic, Wyo.

Officers: O. M. Beck, pres.; Nate Wilson, v. p.; F. V. Marsh, sec.-treas. Inc. 1917, in Wyoming. **Cap.** \$150,000; shares 50c par.

Property: 12 claims about 4 miles N. W. of South Pass and 28 miles south of Lander, show a well-defined vein carrying copper, gold, and silver values.

ELKHORN COPPER MINING CO.

WYOMING

Property: the Elkhorn mine in the Elkhorn Mountain district, near Overland, Carbon county, said to carry a 7' vein of sulphide ore, averaging 7 to 8% copper, with considerable ore in sight. Mine has a shaft and a 460' tunnel, with about 1,000' of drifts.

Developing and small shipments made during past few years.

EMERALD MINING CO.

WYOMING

Idle. Wheatland, Laramie county, Wyo.

Property: the Cooney Hill mine, formerly owned by the Cooney Hill Gold & Copper M. & M. Co., and the Emerald mine, on Slate creek, showing a prominent gossan outcrop in schist. The Emerald has a 60' shaft in ore, and a 100' shaft bottomed in a gossan showing traces of copper sulphides. No recent report received.

FERRIS-HAGGARTY COPPER MINING CO.

WYOMING

Inactive. Owns, or did own, the copper mine of this name at Rudefeha, Carbon county, Wyo. Company also owned \$375,000 of the Penn Wyoming bonds, but as its stock is practically all owned by the Penn Wyoming, its corporate officers and affairs are of no public interest, save as the only valuable mining asset of the chain of bankrupt corporations, controlled by the Penn Wyoming and its alleged and equally rotten successor, the United Smelters, Railway & Copper Co. See under **Penn Wyoming Co.**, in Vol. XIV, also Vol. X, Copper Handbook.

FERRO ALLOY CO.

WYOMING

Office: 603 Symes Bldg., Denver, Colo.

Property: near boundary line of Converse and Natrona counties, 16 miles S. W. of Glenrock, shows chromite in serpentine in a granite-schist contact. The deposit is 2-5' wide for a length of 150' and carries 35 to 44% chromic oxide. Discovered in 1908, but little work was done until under present ownership in 1918. Produced 131 tons of ore of an average value of \$28.12 p. t. in 1920. See same title under Colorado.

GOULD MILLING AND LEASING CO.

WYOMING

B. A. Lathrop, mgr., Centennial, Wyo. Company had a lease on the property of the Utopia M. & M. Co. (which see) in the Centennial district.

HAGGARTY COPPER MINING CO.

WYOMING

Probably dead. Mine at Rudefeha, Carbon county, Wyo. L. N. Pennock, former pres.

Cap. \$10,000, increased Nov. 9, 1908, to \$1,500,000; shares \$1 par. Controlled and owned by the United Smelters, Railway & Copper Co. Is a companion of the Ferris Haggarty Co., but like all its sister companies, owned by the U. S. R. & C. Co. Only a lawyer can tell which of the two owned the copper mine that has been the bait for so many "investors."

See Vol. XIV, also Vol. X of "Copper Handbook," under **Penn-Wyoming Copper Co.**

HECLA CONSOLIDATED MINES CO.

WYOMING

Mail returned from last address: care Henry Schwartz, pres., 308 Masonic Bldg., Denver, Colo. Mine at Hecla, Laramie county, Wyo.

Probably dead. Fully described in Vol. XIV.

HENLEY CONSOLIDATED COPPER MINES **WYOMING**

Property: 25 claims, 550 acres, 25 miles S. W. of Cheyenne, Laramie county, Wyo.

Same management as the Hecla Cons. Mines Co., fully described in Volume XIV.

HOME RUN COPPER MINING CO. **WYOMING**

Office: Rooms 17-18 Postoffice Bldg., Colorado Springs, Colo. Mine near Rudefeha, Carbon county, Wyo.

Officers: A. L. Bohrer, pres.; J. F. Humphrey, v. p.; Adolph Fehringer, treas.; Wm. C. Robinson, sec., at last accounts.

Cap. \$1,500,000; shares \$1 par.

Property: 180 acres, partly patented, known as the Copper Bell group, near the Ferris-Haggarty mine, having a 350' tunnel showing a vein with copper, gold, and silver values. Idle many years.

IMPERIAL COPPER & GOLD MINING CO. **WYOMING**

Office: 423 Caswell Block, Milwaukee, Wis. Jacob Best, sec.-treas.

Property: 6 claims, 113 acres, patented, near the Penn-Wyoming mine, on Upper Cow creek, 12 miles west of Encampment, said to show 2 veins, 1 of 26 to 32' estimated width, being a schist dike. Mine has about 500' of tunnels, developing ore giving assays of 6 to 14% copper, with small gold and silver values. Idle since 1915.

INDEPENDENCE MINING CO. **WYOMING**

Successor of Leighton-Gentry Mining Co.

Idle Office: Algoma Bldg., Oshkosh, Wis.

Officers: E. E. Meeleus, pres.; Wm. Middlecamp, v. p.; H. O. Granberg, sec.-treas. and gen. mgr.

Inc. June 28, 1904, in Wyoming. **Cap.** \$1,000,000; \$1 par.

Property: 6 claims, patented, 120 acres, 2 miles north of Dillon in the Battle Lake district, shows eruptive metamorphic country rocks, carrying an 11' contact vein between quartzite and diorite.

Development: by 200' incline shaft and 250' tunnel, showing occasional stringers of 3 to 12' width, carrying a little chalcocopyrite assaying 12% copper, with small quantities of nickel and cobalt and traces of silver and gold. Has steam power, a hoist and several small mine buildings.

INTER-MOUNTAIN MNG. & DE v. CO. **WYOMING**

Promoted by Campbell, Graham & Co., 128 Water St., New York, who are no longer at that address. Shares were listed on Boston Curb. Stock offered at 25¢.

Property: reported to have a lease on holdings of **Quin B. Mining Co.**, which see.

IRON BLOSSOM MINING CO. **WYOMING**

Office: S. C. Downey, pres., Conners Blk., Laramie, Wyo. **Mine office:** Albany, Wyo.

Officers and directors: E. J. Stoll, v. p.; Wm. Benton, sec.-treas. and mgr., Albany, Wyo.

Inc. August, 1914, in Wyoming. **Cap.** \$100,000; 10c par; \$75,000 issued; 250,000 shares in treasury. Paid dividends of 40% during 1918. Company has no debts.

Property: 5 claims, 500 acres, in Albany county, includes the Amazon, Rambler (or Electrolytic), Iron Blossom, Rochester Placer and Beulah mines, all situated 2 to 9 miles from Albany.

The **Amazon** mine with two claims, 40 acres, has a 1,000' tunnel giving a back of 200'. Ore occurs in fissure veins in diorite at 200' and 600' from portal. Two lots of ore shipped to the Grant smelter, Denver, gave returns (1) 11% copper, \$6.40 gold and silver; (2) 15.40% copper, \$12.60 gold and silver.

The **Beulah** property has a 65' shaft with a 30' crosscut from which ore was mined that yielded 11.20-15.6% copper, \$3.40 and \$5.60 gold and silver.

Ore carries 40% iron making it a good flux. A 2,200' tunnel is being driven on vein through Amazon property towards Beulah shaft to drain ground and allow larger production at lower cost. Tunnel 965' long, December, 1919.

Electrolytic, or Rambler mine, 9 miles W. of Albany, consisting of 12 patented lode claims, 234 acres, is credited with a past production of \$500,000. The mine was purchased by Wm. Benton in October, 1919, and deeded to the Iron Blossom company, 1920; it is operated under lease on a royalty basis by Electrolytic Copper Co., which see.

ITMAY COPPER MINING CO.**WYOMING**

Idle. Address, at last accounts, Rawlins, Wyo. Mine near Rambler, Carbon county, Wyo. I. C. Miller, mgr.; Albert Bryle, supt., at last accounts.

Property: 4 miles S. of Rambler, is said to have a 20' vein, carrying a paystreak of high-grade ore, apparently undeveloped, and another vein up to 8' in width carrying sulphide ore.

Development: by 300' shaft. Mine has been unprofitable to date.

JACK POT MINING & MILLING CO.**WYOMING**

Idle. Office: Room 3, Algoma Bldg., Oshkosh, Wis.

Officers: H. Thorsgaard, v. p.; H. O. Granberg, sec.-treas.

Inc. Dec. 23, 1903, in Wyoming. **Cap.** \$1,000,000; shares \$1 par.

Property: 9 patented claims, 180 acres, in the Battle Lake district, showing fissure veins in diorite and chlorite schist, and 2 contact veins, between diorite and porphyry, carrying carbonate and sulphide ores. Two veins, slightly developed, are said to average 14' to 60' in width. The smaller vein has averaged 8% copper and \$3 to \$12 gold per ton, the larger vein showing very low-grade copper ore.

Development: 75' tunnel, 100' shaft and 8 pits of 20 to 36' depth, with 411' of workings. Though inactive for many years, company is still in existence and taxes paid.

KIMBALL MINING CO.**WYOMING**

Idle. Address: Kimball, Neb. B. A. Lathrop, pres. and supt., Centennial, Carbon county, Wyo. G. W. Forsling, v. p.; A. J. Hull, sec.-treas.

Property: 19 unpatented claims, near Centennial, developed by 800' of tunnels opening a quartz vein with gold and silver-bearing copper ore. No recent returns.

LEIGHTON-WYOMING MINING CO.**WYOMING**

Probably dead. Former address: 417 Seventh St., Milwaukee, Wis.

Officers: M. H. Yewdale, pres.; Herman Pereles, v. p.; H. E. Dankoler, sec.; Spencer C. Yewdale, treas.; with A. G. Weissert, S. P. Bjorklund and C. W. Hendricks, directors, at last accounts.

Inc. 1906. **Cap.** \$1,000,000; shares \$1 par; issued, \$810,000.

Property: 2 patented claims, about 1 mile north of the Ferris-Haggarty mine in the Battle Lake district.

Development: by a 186' tunnel and a 65' shaft.

Equipment: includes a sawmill and small machinery plant.

LORIMER MINERALS CO.**WYOMING**

Address: M. Lorimer, Lusk, Wyo.

Property: near Lusk, Niobrara county, has been under development since 1918. The ore is a quartzitic sandstone, stained black, yellow and green. Shipments made to the Radium Co. of Colo., carried more than 4% uranium.

LOST CABIN MINING CO.**WYOMING**

Address: A. O. Heyer, sec., Shoshoni, Fremont county, Wyo.

Cap. \$150,000.

Property: the Lost Cabin group, in the Boyeson section, said to carry the Summit vein. Gold, silver and copper ore occurs in quartz veins. Since 1909 assessment work only has been done.

MAGGIE MURPHY COPPER CO.**WYOMING**

Office: care Chas. S. Ashley, pres., New Bedford, Mass. Mine near Douglas, Converse county, Wyo.

Inc. August, 1904, in Wyoming. Cap. \$1,000,000; shares \$1 par.

Property: 12 claims. 180 acres, and a 60-acre millsite in Horseshoe canyon, in the Laramie Peak district. Claims show granite, with gneiss and schists, carrying 7 veins between gneiss and mica-schist, one of which ranges 30 to 60' in width and shows covellite, bornite and chalcopryrite, with pyrrhotite ores assaying 1 to 6% copper, 2 to 9 oz. silver and 40 cts. to \$4.50 gold per ton.

Development: includes 114' shaft and various shallow workings. Company has kept up necessary annual assessment work, but has done no development, as far as can be ascertained.

MCKINNEY MINE**WYOMING**

Address: Cokeville, Wyo. This mine in Afton district, 30 miles N. E. of Cokeville, was under development in 1920, and copper ore was found.

NATIVE COPPER MINING CO.**WYOMING**

Tie Siding, Albany county, Wyo.

Company did development work on its mines near Tie Siding throughout 1920. Company sinking shaft from 125' down to 300' in 1921, but hampered by water.

NORTH LARAMIE PEAK COPPER MINING CO.**WYOMING**

Office: care L. V. Saul, sec., Esterbrook, Wyo. Mine office: Douglas, Converse county, Wyo.

Officers: H. C. Saul, pres.; W. A. Saul, treas.

Inc. 1908, in Wyoming. Cap. \$2,000,000; shares \$1 par; fully paid and non-assessable; 500,000 shares in treasury.

Property: 29 claims, 440 acres, patented, in the North Laramie Peak district, show pre-Cambrian schists bordering granite contacts, on which 1,000' of diamond-drill work has proven existence of a flat body of disseminated chalcopryrite ore 40' wide. A shaft has been sunk 100' on a chimney of chalcopryrite ore said to assay 27% copper, 6 oz. silver and \$2 gold, for a total width of 5'.

Equipment: includes 80-h. p. boiler with hoist, pump, steam power and a 3-drill compressor. Is a close corporation, entirely owned and financed by Messrs. Saul. No recent returns.

OCCIDENTAL GOLD MNG. & MLG. CO.**WYOMING**

Idle.

Property: 12 miles from Beulah, idle at last accounts. Roads were built and flumes and pipe laid as part of assessment work in 1918.

OSHKOSH-WYOMING MINING CO.**WYOMING**

Idle. Office: 3 Algoma Bldg., Oshkosh, Wis. Mine near Dillon, Carbon county, Wyo.

Officers: O. A. Koch, pres.; E. E. Meeleus, v. p.; H. O. Granberg, sec-treas. and gen. mgr.

Inc. June 20, 1904, in Wyoming. Cap. \$1,000,000; shares \$1 par.

Property: 11 claims, 220 acres, in the Battle Lake district, is said to carry fissure veins in gabbro. of 22' estimated average width, opened by shafts of 32' and 72' and a 22' tunnel, showing chalcopryrite and oxide ores of copper.

OTEGO MINING CO.**WYOMING**

Hecla, Wyo. Out of business. Described in Volume XIV.

PARK GOLD MINING CO.**WYOMING**

Fully described in Vol. XIV. Succeeded by Colowyo Gold Mining Co., which see.

PENN-WYOMING COPPER CO.**WYOMING**

For full history, see Vol. X of this Handbook, published in 1911, as "The Copper Handbook."

In January, 1919 it was announced that Morse Bros. Machinery & Sup-

ply Co. of Denver had purchased from the Bondholders Protective Committee, the entire assets of the Penn-Wyoming, including all the assets of the various subsidiary companies whose bond issues totaled \$3,600,000. Production from properties totals 6,414,011 lb. of copper recovered from 59,000 tons of ore equivalent to 5.4% copper.

Property: was the Ferris-Haggerty mine. The aerial tram connecting this mine with the smelter at Encampment 16 miles long, was a costly attempt to solve the transportation problem. An unsuccessful effort was made by the new owners to operate the mines. The smelter and concentrators at Encampment were dismantled and sold. Only production has thus far come from a clean up of dump material.

The geologic features of the district are described by A. C. Spencer, in *PLATINUM* Paper No. 25, of the U. S. Geological Survey, 1904.

PLATINUM MINING & MILLING CO.

WYOMING

Merged with Rambler Copper & Platinum Co. into Rambler Consolidated Mines Corporation, which is dead, its property being now owned by the Iron Blossom Mining Co., and operated under lease by the Electrolytic Copper Co. Fully described in Vol. XIII.

PLUTO GOLD & COPPER MINING CO.

WYOMING

Idle. Office: 3 Algoma Bldg., Oshkosh, Wis. Mine near Dillon, Carbon county, Wyo. H. Thorsgaard, v. p.; H. O. Granberg, sec.-treas.

Inc. Dec. 15, 1902, in Wyoming. **Cap.** \$1,000,000; shares \$1 par.

Property: 11 claims, patented, 220 acres, and a 40-acre millsite, in the Battle Lake district, near the Ferris-Haggerty mine, said to show both fissure veins in quartzite and contact deposits between diorite and quartzite, ranging from 2 to 30' in width, and carrying copper ore, with average assays of 1% copper, a trace of silver and \$3 gold per ton.

Development: by numerous pits of 10 to 20' depth, 5 shafts of 55 to 100' depth, and a tunnel of 1,004' with about 2,000' of underground workings.

Equipment: includes a 40-h. p. steam plant and 3-drill air compressor. Inactive since 1908.

PORTLAND CONSOLIDATED COPPER CO.

WYOMING

Address: care Myer Newberger, H. W. Hellman Bldg., Los Angeles, Calif.

Officers: Herbert Frankenberger, pres.; Myer Newberger, v. p.; David Sherman, sec.-treas.; with I. S. Robinson and W. H. D'Esterre, directors.

Inc. 1916, in Wyoming. **Cap.** \$2,000,000; shares \$1 par; 1,378,263 shares outstanding. Security Transfer & Registrar Co., New York, registrar; company office, transfer office. Stock listed on New York Curb.

Property: formerly owned by the West Virginia Wyoming Copper Mining Co. and the Portland Copper Mining Co., comprises 203½ acres, 153¾ acres patented, at Encampment, Carbon county, said to cover over a mile along a mineralized zone of diorite and limestone. The Portland group is reported to be traversed for 1,800' by a system of veins, which runs westerly into and through the West Virginia Wyoming for 1,800', veins said to vary from 12" to 40' in width, and to average 5% copper and some gold. Minerals are chiefly pyrite, chalcocite, bornite and malachite.

Development: 2,600' of workings, of which 1,650' are on the Portland, consisting of an 1,150' tunnel, drifts and 610' main shaft. Management estimates ore reserves at 300,000 tons probable smelting ore, containing 2 to 3% copper and 40c gold; and 50,000 tons probable smelting ore, containing 10 to 25% copper and \$1 to \$6 gold per ton. Further development necessary to prove value of the property.

Closed down awaiting change of conditions in mining industry.

POVERTY MINING CO.

WYOMING

Address: Laramie, Wyo.

Property: 6 claims, near the head of Sheep creek, on the western flank of the Laramie mountains, at an elevation of 8,000', and 38 miles by road

from Medicine Bow on the U. P. R. R.

Geology: manganese ore—manganite and pyrolusite—occurs in two beds of chert a few feet apart, from 1 to 8' thick, which are intercalated in beds of pink and maroon limestone and thin sandstone. Ore carries 40% Mn. See Bull. 715-C. (1920) of U. S. G. S., by E. L. Jones, Jr.

Development: by tunnel, 190' drift and 25' shaft.

QUIN "B" MINING CO.

WYOMING

Inc. 1916, in Arizona. Cap. \$500,000; \$1 par.

Property: 5 claims, 100 acres in Carbon county, Wyo., developed by 275' tunnel and said to show gold-copper bearing ore. A New York broker published a prospectus in 1920 giving a fictitious Baltimore address for the company and also considerable doubtful geological data. The stock was offered at 50¢ a share.

A new brokerage concern at the same address later advertised the Inter-Mountain M. & Dev. Co., as lessees of the Quin B. property.

Both companies look suspiciously like stock-jobbing enterprises of questionable character.

RAMBLER CONSOLIDATED MINES CORPORATION WYOMING

A merger of the Rambler Copper & Platinum Co. and Platinum Mining & Milling Co.

Office: 912 Otis Bldg., Chicago, Ill.

Officers: A. A. McKinley, pres.; R. M. Ayres, v. p.; J. W. Runkin, treas., with F. S. Sheldon, J. K. Blist, and J. M. Stager, directors.

Cap. \$2,500,000; \$1 par; 1,275,000 issued. Bonds authorized, \$500,000; entire issue placed in 1919.

Property: the Rambler mine, was acquired in 1919 by Wm. Benton for the Iron Blossom Mng. Co., and is now operated under lease by **Electrolytic Copper Co.**, which see.

Rambler Cons. is presumably dead.

RAMBLER COPPER & PLATINUM CO.

WYOMING

Fully described in Vol. XIII. Dead. Merged with Platinum M. & M. Co. into Rambler Consolidated Mines Corporation, also dead. See **Iron Blossom Mng. Co.**

RICH CHARTER OAK COPPER CO.

WYOMING

Address: G. P. Elmen, sec., Lincoln, Neb.

Property: formerly owned by a British corporation, is situated 7 miles N. W. of Encampment, the nearest rail point.

Development: by 7 shafts, deepest 425', and 2,000' of lateral work, said to have exposed copper-gold-silver ore. Main shaft is to be sunk to 1,000'.

Equipment: includes hoist, compressor, assay office, camp buildings, and 60-ton mill.

Resumption of operations planned for summer of 1921.

SHAWNEE COPPER MINING CO.

WYOMING

Owned by J. M. Bovee, and A. H. Ikenberry, formerly of Shawnee, Okla.

Property: 5 claims, unpatented, in Medicine Bow Mts., French Creek district, Carbon county, Wyo., near New Rambler mine, shows granite and schist cut by a fissure zone 200' wide, carrying \$4.10 gold ore.

Development: by 160' and 210' shafts. Examinations have been made by H. C. Beeler, J. J. Hinton, and other engineers. Ample assessment work is done each year.

SNAKE RIVER CONSOLIDATED MINING CO.

WYOMING

Offices: 401 Jacobson Bldg., Denver; and Columbine, Routt Co., Colo.

Officers: L. A. Pease, pres., treas. and gen. mgr.; M. M. Belshe, sec.

Inc. April, 1906, in Wyoming. **Cap.** \$5,000,000; \$1 par; 3,400,000 issued. Annual meeting, first Wednesday in July.

Property: 13 lode claims, 2 patented, 180 acres, and 520 acres of placer claims, unpatented, in Three Forks district, 24 miles S. W. of Encampment, the nearest rail point.

Geology: claims show granite and diorite, reported by management to have veins carrying auriferous galena, with strike of N. 25° W., and cross veins carrying copper striking at nearly right angles, the galena vein system having an extreme width of 77', with length of 4,500', the paystreak varying from 10" to 54" in width. The galena ore is said to average 10% lead, free from zinc, with 12-20 oz. silver and \$2 gold. The copper veins are undeveloped, but show a variety of oxidized ores at surface.

Development: by pits and shafts, and numerous short tunnels, from 30 to 500' in length, nearly all openings showing ore. The management estimates 5,000 tons of ore blocked out for stoping. Plan raising necessary funds for proper equipment and small concentrating plant. Annual assessment work being done.

SUNRISE MINE**WYOMING**

Address: Colorado Fuel & Iron Co., Denver, Colo.

Mine in Platte county, is a large producer of iron ore, in which copper also occurs.

UNITED SMELTERS, RAILWAY & COPPER CO.**WYOMING**

Dead. The property claimed by company is described under the title of the Penn-Wyoming Copper Co., which apparently was the legal owner, and full particulars regarding the entire chain of rotten promotions, including this company, are given in Vol. X, Copper Handbook, under Penn-Wyoming Copper Co.

Judgment against company for \$2,500,000 was secured by Continental & Commercial Trust & Savings Bank, Chicago, December, 1913. Bank had loaned money to company taking a mortgage on the property. Several years of litigation were thus ended and the properties of the United Sm., R'y. & C. Co. and its subsidiaries were sold at forced sale, being bought in by the bank.

On January 1, 1919, the property was purchased by the Morse Bros. Machinery Co. of Denver, who will build a mill for the treatment of the old smelter slag dump.

UTOPIA MINING & MILLING CO.**WYOMING**

Address: Centennial, Wyo.

Officers: Lee Van Voorhis, pres.; Jas. McCune, v. p.; P. L. Loltum, sec.; Bernards Loltum, gen. mgr.

Inc. 1898, in Wyoming. **Cap.** \$1,000,000; shares \$1 par; non-assessable; issued, \$875,000. Annual meeting, third Tuesday in August.

Property: 2 claims, 30 acres, unpatented, in the Centennial district, Albany county, shows contact veins between diorite and schist, one of which, averaging 5' in width, is reported to have given assays of 3% copper, 4 to 20% zinc, up to 63 oz. silver and \$44 gold per ton. Ore averages \$15 per ton.

Development: by tunnels of 250', 600', 175', 300', and 1,200', with about 2,600' of workings, all showing ore.

Equipment: includes a small electric installation, with electric drill, and 6 buildings. Leased in 1915 to the **Gould Milling & Leasing Co.** A 50-ton mill costing \$20,000 was to be remodeled, and mine and mill operated by lessees, at last report.

WESTERN SULPHUR CO.**WYOMING**

Address: Douglas, Wyo.

Officers: W. F. Cox, pres.; G. W. Metcalf, v. p.; C. D. Zimmerman, sec.-treas.; with P. I. Rothwell, directors. H. C. Austin, supt.

Inc. in Wyoming. **Cap.** \$15,000,000.

Property: 430 acres at Thermopolis, Hot Springs county, Wyo. Examined by Chauvenet of St. Louis and McClave of Denver.

Sulphur occurs disseminated through altered limestone, that carries from 60 to 99.7% S. Mining is to be by steam shovels. Diamond-drilling under way at last report. Idle, 1921. A spur line is contemplated, also a refinery.

WILLIAMS LUMAN MINING CO. WYOMING

Address: care W. J. Thom, cashier First Nat'l Bank, Buffalo, Wyo.
Mine office: Depass, Wyo. L. R. Vanhouten, pres.

Inc. May 2, 1918, in Wyoming. **Cap.** \$2,500,000; \$1 par; issued 2,385,000 shares.

Property: 9 claims, patented, 130 acres, 16 miles from a railway, in the Copper Mountain district, Fremont county, shows 8 fissure veins in granite, diorite, and altered schist. The main vein zone, 50-60' wide, traceable 3,400', in much altered, crushed and fissured diorite, has a 2' paystreak carrying free gold, and native copper in thin sheets and nuggets, ore minerals being cuprite, melaconite, malachite and chalcocite. Ore is reported to assay 10% copper, 5 to 10 oz. silver, and \$2 to \$8 gold per ton.

In 1918, company bonded the McGrath claims from D. I. Darr, of Basin, Wyo.

Development: by an 820' shaft, showing sulphides on the 800' level, with 2,000' of workings. There also are tunnels of 513' and 300'.

Equipment: includes an 80-h. p. gasoline plant, with a 15-h. p. hoist and a 2-drill compressor. A concentrator was erected in 1918.

The company is operated as a close corporation, money for development having been furnished by a few shareholders only.

WINONA GOLD-COPPER MINING & MILLING CO. WYOMING

Office: 111 Market Ave., S. Canton, Ohio. **Mine office:** Painter, Big Horn county, Wyo.

Officers: L. Cavanah, pres. and gen. mgr.; Geo. House, v. p.; Dr. J. H. East, 2nd v. p.; Wm. H. McAloney, sec.-treas., at last accounts.

Inc. 1903, in Wyoming. **Cap.** \$5,000,000; shares \$1 par; fully paid. Management was changed and company practically reorganized, December 12, 1905.

Property: 25 claims, unpatented, 440 acres, in Park County, the Sunlight basin, about 12 miles E. of the Yellowstone National Park. Claims show 6 fissure veins in granite, porphyry and andesitic breccia, carrying shoots of low-grade copper ore, reported to average 7 to 8% copper with about \$3 gold per ton. The Bluff, Malachite and Greenhorn veins are in andesite. The Bluff, 25' wide, with a 12' paystreak of low-grade copper ore, 1½' wide at surface, increasing with depth.

Development: by two tunnels, the lower or main working tunnel, 804' long. Total workings, 1,032'. **Equipment:** includes steam and electric power plants and 10 buildings. No recent returns; presumably inactive.

WYOMING COPPER & GOLD MINING CO. WYOMING

Office: Alma, Kan. C. B. Henderson, pres.; Al Rohr, v. p.; J. R. Henderson, sec.-treas.

Inc. Sept. 3, 1903, in Arizona. **Cap.** \$1,500,000; shares \$1 par; non-assessable.

Property: 9 claims, of the Metal Chief and Jessie group, in Hog Park, in the upper Platte district, 12 miles from a railway, show granite and gneiss, cut by 2 fissure veins with S.-E. strike, reported by management to average 28 to 35' in width, and to carry copper oxide and carbonate ores, with average assay of 3 to 15% copper, a little silver and \$1.63 to \$3.29 gold per ton.

Development: 105' Metal Chief shaft and the 175' Jessie shaft, which shows 5 to 10% copper tenor with small gold and silver values.

Equipment: includes a small steam plant with a hoist, steam pump, and 3 buildings.

No recent returns; presumably idle.

WYOMING COPPER MINING CO. WYOMING

Idle. Office: 303 Detroit Free Press Bldg., Detroit, Mich. **Mine office:** South Pass City, Wyo.

Officers: Charles K. Skinner, pres.; C. F. Remington, treas.; Jas. MacFarlane, v. p. and supt.; C. A. Spalding, sec., with Chas. F. Murphy, and Chas. D. Ridgway, directors.

Inc. 1905, in Wyoming. **Cap.** \$2,000,000; \$1 par; issued 1,375,000; 135,-500 shares sold for \$16 the lot at public auction in New York on Dec. 22, 1920.

Property: 12 quartz claims, 240 acres, and a 30-acre placer claim, in Fremont county, in South Pass district of Wind River mountains. Claims show a contact zone between granite and metamorphic rock, proven by prospect pits for one-half mile.

Development: 500' incline shaft, and several hundred feet of crosscutting. The vein is reported to show sulphide ore at depth of 72', that runs 2 to 6% copper, with an average of 1 to 2 oz., and maximum of 20 oz. silver, and \$3 to \$4 gold per ton.

Equipment: includes an 80-h. p. boiler and a 40-h. p. hoist, with several buildings.

CANADA

The mining companies of Canada are arranged alphabetically by provinces:—Cobalt, Porcupine, etc., are therefore, described under Ontario. The Pas district, the new copper district of Canada is in Manitoba and the great number of mineral properties of the Pacific Coast region are described in the British Columbia section.

Newfoundland being an independent Crown Colony is in a separate section.

ALBERTA

ATHABASCA MINING CO.

Inc. in Alberta, Can., April, 1914. **Cap.** \$1,000,000. Hon. G. H. V. Bulyea, Gov. of Alberta, Hon. Chas. R. Mitchell, E. J. Taylor and C. L. Freemann, directors, all of Edmonton.

Property: assets and properties of the Athabasca Mng. Syn. consisting of 800 acres of nickel claims, 160 acres iron claims, on and near Lake Athabasca, near Edmonton, Alberta, Canada. Assays of surface samples showed 1½ to 5% nickel, iron samples ran 66.7% iron, 2.12% silica, .014% phosphorus and .013% sulphur. Copper occurs as bornite.

BRITISH COLUMBIA

The mining companies of this province are arranged alphabetically. Readers interested in British Columbia mines should consult the yearly reports of the Provincial Mineralogist, issued as Annual Report of the Minister of Mines, obtainable free from the Minister of Mines, Victoria, B. C.

A. B. C. METALS CO.

BRITISH COLUMBIA

See Alaska British Columbia Metals Co.

ABERDEEN MINES SYNDICATE

BRITISH COLUMBIA

Address: 1411 Broadway, W., Victoria, B. C., or Neil MacKay, mgr., Merritt, B. C.

Property: Aberdeen group, on Brown creek, Nicola division, Yale district. Ore is copper-gold-silver.

ALAMO CONCENTRATOR

BRITISH COLUMBIA

Located at Alamo, on the Kaslo-Nakusp Ry. Owned by Clarence Cunningham, and built by General Engineering Co., of Salt Lake City. Mill has a daily capacity of 150 tons and was built to treat ore from the Queen Bess, Wonderful Sovereign, and Idaho-Alamo mines, operated by Cunningham. Power is obtained from a 225-h. p. Pelton wheel. Mill started operating about August, 1, 1919.

ALASKA BRITISH COL. METALS CO.

BRITISH COLUMBIA

Office: Alaska Bldg., Seattle, Wash. **Eastern office:** 135 Broadway, New York.

Officers: S. I. Silverman, pres.-mgr.; C. S. Cohen, v. p.; H. H. Hanson,

treas.; with H. M. Keith, W. Smith, I. L. Meyers and Morris D. Leehey, directors. N. W. Parker, sec.

Inc. 1916, in Washington. **Cap.** \$3,500,000; increased from \$2,500,000, July, 1921, in 2,500,000 common and 1,000,000 pfd. shares. All common stock is issued and \$300,000 in bonds. Par value increased from \$1 to \$10 and stock exchanged on that basis. Preferred stock offered stockholders at \$8.50 per share. U. S. Corporation Co., New York, transfer agent and registrar. Stock listed on New York Curb. Quoted at \$2 in 1920; 29c. in Aug., and \$3¾ (\$10 shares) in Nov., 1921.

Corporation is a holding company whose chief interests are in the Dewdney, or Indian Chief, mine of the **Tidewater Copper Co.**, and in the **Forty Nine Mining Co., Ltd.** (whcih see). Also controls the Stikine Mining Co. and the Glenora Mining Co., both idle.

ALASKA MINING CO.

BRITISH COLUMBIA

Address: Jos. P. Kelly, lessee, 1126 Riverside Ave., Spokane, Wash.
Mine address: Beaverdell, B. C.

Property: the Buster claim in Wallace Mtn. section, Greenwood division, shows a vein up to 3' wide carrying quartz-sericite ore with lead, zinc and copper minerals. One shipment assayed 81 oz. silver, 3.1% lead and 11.2% zinc.

ALGUNICAN DEVELOPMENT CO., LTD. **BRITISH COLUMBIA**

Office: Monadnock Bldg., San Francisco, Calif.

Mine address: W. A. Meloche, mgr., Stewart, B. C.

A Belgian corporation with head office at 16 Rue de Turin, Brussels. Jean Vanophem, pres.

Property: a bond on the Cobalt group of 3 claims, the Northern Light group of 10 claims, the Spider group of 3 claims, the Fitzgerald group, and the Woodbine group of 2 claims, all in the Salmon River section, Portland Canal division. Some high-grade silver ore was reported opened on the Spider claims, and on the Woodbine, milling ore 100' long and 70' wide.

Development: by tunneling and diamond-drilling.

Equipment: oil engine, compressor and camp. Work was discontinued in 1921 owing to lack of necessary capital.

Company also controls the **Jualin Alaska Mines Co.**, in Alaska.

ALICE ARM HOLDINGS CO.

BRITISH COLUMBIA

Address: 614 Pender St., Vancouver, B. C. **Mine address:** Alice Arm, B. C. P. N. Anderson, mgr.

P. W. Racey, cons. engr., 717 Vancouver Blk., Vancouver, B. C.

Property: Bellevue mine in Illiance river section, Skeena division, said to contain an orebody 40' wide and traceable for 3,500'. Pay ore occurs in small, rich stringers of galena and zinc blende with high gold and silver content.

The provincial government is completing a trail along the Illiance river to the mine.

ALICE ARM LA ROSE MINING CO., LTD. **BRITISH COLUMBIA**

Address: Prince Rupert, B. C. **Mine address:** Miles G. Donald, mgr., Alice Arm, B. C.

Property: La Rose mine, 2 claims in the Nass River division, 2 miles N. of Alice Arm and 2 miles from the Dolly Varden railway. The vein is quartz, carrying blende, galena, pyrite, grey copper, argentite, and native silver.

Development: by 125' tunnel and shallow shaft. A shipment of 22 tons early in 1920, yielded 3 oz. gold, and 6,157 oz. silver at the Trail Smelter. The property is worthy of extensive exploration.

ALICE ARM SILVER MINING CO.

BRITISH COLUMBIA

Address: James McAleenan, mgr., Alice Arm, B. C.

Property: the North Star claim, adjoining the Dolly Varden on the N., in Kitsault river section, Nass River division. Some tunneling was done during 1919, exposing 4' of good ore, showing ruby and native silver.

Production: in 1919, was 27 tons of ore containing 968 oz. silver.

AMERICAN BOY MINING CO.

Stockholders, 1918, Maurice Oppenheimer, A. W. Siegel, Sam Hanauer, and N. E. McCall, of Spokane, and C. D. Bibbins, Oakland, Calif. Reported in 1918 that Chas. F. Caldwell and Eastern associates had taken a 3-year lease and bond on property of the company for \$100,000. Mine had been idle for 10 years.

Cap. \$1,500,000; par \$1.

Property: 4 claims, adjoining the Last Chance, on Reco Mountain, near Sandon, Slocan district, said to show silver-lead ore. There are several thousand feet of workings; considerable ore was shipped when the property was operating.

ANDERSON LAKE MNG. & MLG. CO.**BRITISH COLUMBIA**

Address: S. Gibbs, sec., Lillooet, B. C.

Property: Skeena-Yukon group, 2 claims, at Anderson Lake, Lillooet division. Ore carries gold. Except that required by assessments, but little work has been done.

ARGO MINING & TUNNEL CO., LTD.**BRITISH COLUMBIA**

Address: Box 54, Greenwood, B. C.

Officers: Ole Lofstad, pres. and gen. mgr.; A. S. Black, sec.-treas.; with John Williamson, Jerome McConnell and Oscar Hartman, directors. Inc. June 10, 1909, in British Columbia. **Cap.** \$125,000; shares 25c par.

Property: the Argo mine, near the Greenwood smelter, developed by 1,150' tunnel, at a vertical depth of 500', with portal about 500' from track of the Canadian P. Ry. A vein of milling quartz, 10' wide, contains a 4' band of concentrating ore. Idle 1919 and 1920.

ASHCROFT COPPER CO., LTD.**BRITISH COLUMBIA**

Address: 610 Hutton Bldg., Spokane, Wash. **Mine address:** Ashcroft, B. C.

Officers: Frederic Keffer, pres.; J. C. Haas, v. p.; E. H. Knight, treas. with S. Dilshemer and C. W. Alders, directors. Chas. G. Hall, sec.

Inc. 1921, in Washington, to take over the holdings of the Highland Valley M. & D. Co. **Cap.** \$150,000; 10¢ par; assessable; 1,288,872 shares of the old company outstanding will be replaced by equal number of new shares. Assessment of 1¢ per share levied September, 1921. Bonds outstanding, \$60,000, 7%.

Property: the Chataway and Sanson, or Tamarac, groups, 15 claims, about 600 acres, 28 miles S. E. from Ashcroft, a station on the C. P. R. Company paid \$50,000 for the Chataway group and has the Sanson group of 11 claims under bond.

Copper ore with small silver and gold values occurs in a contact vein between granite and quartz-feldspar porphyry. Vein is from 3 to 17' in width, and an orebody has been opened by a drift for 400'. Ore carries chalcopryrite in a micaceous gangue. Average assays are 5% copper, with about 25c. in gold and silver.

Development: by 500' tunnel and shaft to depth of 195'. Total work amounts to 1,700' of drifts and tunnels, with 400' raises and stopes. Reserves comprise about 8,000 tons above the lower level, where 100' of drifting is in 5 to 6% ore. Development done in 1920 proved the ore to extend to lowest, or 195' level, retaining its average width and grade with unchanged character.

Equipment: includes 1,000' tramway and 50-ton mill using flotation and making a 90% extraction.

Production: in 1917, 48 carloads of concentrate and 4 of crude ore netting \$106,584 at smelter.

The mine has been idle since 1918, save for development operations. Additional funds are necessary to clear remaining indebtedness and provide funds for further development and enlargement of mill; should this development prove satisfactory, better transportation will also be provided.

ASPEN GROVE AMAL. MINES, LTD.**BRITISH COLUMBIA**

Address: Merritt, B. C.

Officers: J. E. Bate, pres.; M. L. Grimmett, v. p.; M. R. Durland, sec-treas., with Jos. Walters, and J. J. Gillis, directors.

Inc. in British Columbia. Cap. \$1,000,000; par \$1.

Property: 75 claims, in Aspen Grove district, Nicola mining division, which show low-grade copper ore. At last report property was under bond and lease to Jas. Errington and associates, and was being explored by drilling.

AUFEAS MINES, LTD.

BRITISH COLUMBIA

Dead. Formerly at Hope, B. C. See Vol. XII.

BABINE BONANZA M. & M. CO.

BRITISH COLUMBIA

Mine address: New Hazelton, B. C.

Officers: Jas. Cronin, pres., 924 S. Maple St., Spokane; Chas. Theis, v. p., with Wm. Huntley, J. F. Cronin, all of Spokane, Wash., and A. H. Mac-Neal, Vancouver, directors.

Property: a group of claims, 300 acres, at the head of the Tuchi river in the Babine range, Omineca division, 22 miles by trail from Smithers, on the Grand Trunk Pac. R. R. Orebodies occur on contact of granite porphyry and altered sediments, and in fissure veins, 1 to 3' wide, in the porphyry. Average assays show 20 to 60 oz. silver, 11 to 56% lead, 10 to 34% zinc. A large tonnage is reported to be available for a mill.

Development: several tunnels, longest 400', and shafts, deepest 105'. A 1,000' crosscut tunnel started in 1920, had in October reached a 12' vein containing high grade ore.

A promising prospect, but handicapped by its remoteness.

BANNOCKBURN MINES, LTD.

BRITISH COLUMBIA

Address: A. W. B. Allen, sec., 1138 Burdette Ave., Victoria B. C.

Mine address: Kaslo, B. C.

Property: Bannockburn mine on Hall creek, Ainsworth division, W. Kootenay district, covers a limestone-schist contact showing silver-lead ore. Developed by tunnel.

BARAMBA MINING CO., LTD.

BRITISH COLUMBIA

Address: C. J. West, sec., Capilano, North Vancouver, B. C. **Mine address:** Hotham Sound, B. C.

Property: the Baramba mine on Hotham sound, Vancouver division, has been developed by 2 tunnels, 90 and 150', said to show a 6' vein assaying 4% copper.

BAYONNE GOLD MINING CO.

BRITISH COLUMBIA

Address: Bert N. Sharp, 317 Cleveland St., Spokane, Wash.

Property: Bayonne mine, W. of Sheep Creek, in Nelson division, reopened in October, 1921.

B. C. EXPLORATION CO.

BRITISH COLUMBIA

Address: Northwest Bldg., Vancouver, B. C. **Mine address:** K. D. Woodworth, Pacific, B. C.

Property: the Independence group of 3 claims in Legate creek section of Omineca division, under bond and lease. Claims show a well defined shear zone in andesite with a 10' vein. The ore is andesitic rock and quartz carrying chalcopyrite, pyrite and arsenopyrite. Developed by shallow workings, and drilling performed in 1920.

B. C. SILVER MINES, LTD.

BRITISH COLUMBIA

Was financed and controlled by British Canadian Silver Corporation, Ltd., but in Feb. 1922, control is said to have passed to Premier Gold Mng. Co., Ltd.

Reg. office: 612 Pacific Bldg., Hastings St., W. Vancouver, B. C. **Mine office:** Stewart, B. C.

Directors: Chas. A. Banks, pres.; H. L. Hunt, H. A. Gould, G. Mahood, H. J. Bush and N. Burdick.

Inc. Oct. 3, 1919. **Cap.** \$1,500,000; \$1 par.

Property: 17 Crown-granted claims in 2 groups, adjoining Premier mines on N. & S. in Salmon River section, Portland Canal division, Cassiar district, about 14 miles from Stewart.

Development: recently confined to surface trenching and diamond drilling.

BELMONT-CANADIAN MINES. LTD.**BRITISH COLUMBIA**

Described in Vol. XIII. Property taken over by Belmont Surf Inlet

Mines, Ltd., which see.**BELMONT SURF INLET MINES, LTD.****BRITISH COLUMBIA**

Office: 500 Bullitt Bldg., Philadelphia, Pa. Operating office: Surf Inlet, B. C.

Officers: C. A. Heller, pres.; W. M. Potts, v. p.; C. B. Taylor, gen. counsel, with E. A. Cleveland, M. B. Cutter, J. C. Fraley, Geo. Tyler and T. W. Synnot, directors. J. K. Kitto, sec.-treas.; B. G. Hawkins, asst. sec.; C. Ducheneau, comptroller. Frederick Bradshaw, gen. mgr.-supt.; G. H. Garrey, cons. geologist; C. P. Seale, mine supt.; F. H. Penn, supt.; E. W. Hawkins, auditor.

Inc. in British Columbia. Cap. \$2,500,000; shares, \$1 par. Inc. by the Tonopah Belmont Development Co., of Nevada, to take over property of Belmont-Canadian Mines, Ltd., and Surf Inlet Power Co., two British Columbian corporations, owned by the Tonopah Belmont, which controlled the mine during the construction period. The mother company owns 80% of the total capital and 20% is held by the Surf Inlet Mines. Up to the end of 1918, the Tonopah Belmont Co. had spent \$1,294,706 on this property, a sum which has since been repaid by Belmont Surf Inlet.

Balance sheet for Dec. 31, 1920, shows total assets, \$2,822,091, including property and equipment, \$2,187,313; Surf Inlet Power Co. investment, \$200,000; deferred account, \$43,808; current assets and supplies, \$169,393; concentrates on hand, \$26,069; ore stock on hand, \$11,868; accounts receivable, \$83,841; cash \$99,796. Liabilities include current, \$52,910; reserve for tax, \$16,844; total surplus \$252,336. Income account showed \$866,929 from operations; miscellaneous income, \$68,248; operating expense, \$603,885; net income, \$212,103; depreciation, \$16,844; balance to surplus, \$195,258.

Dividends: initial of 5 cents a share, equal to \$125,000, was paid in April, 1919; total in 1919, \$250,000; in 1920, \$250,000; in 1921, \$125,000.

Property: 9 claims, including some of the oldest locations in the Coast section of Skeena division, 6 miles from the head of Surf Inlet, Princess Royal Island, B. C. The company is developing the Pugsley mine under a working option and expended \$39,794 on the property to end of 1920.

Geology: a quartz vein lies in two well-defined shear-zones in gneissoid granite, the main fracture, in which the main tunnel was driven, splitting into the two, 300' S. of the quartz bodies. They occur in lenticular bodies, varying in width up to 40', and averaging 10'. The ore is a pyritized quartz carrying gold, silver and copper.

Development: by the present company totals about 27,500' to the end of 1920, on 9 levels, all through tunnels. The winze below the main haulage-level is now a fully equipped three-compartment shaft with electric hoist, etc.

On January 1, 1921, reserves were reported as 234,327 tons, compared with 489,258 tons, Jan. 1, 1920.

Equipment: is very complete, including 750 k. w. hydro-electric plant, 5.65-mile transmission-line, compressors, machine-drills, conveyor-bridge, and 300-ton mill (started Sept., 1917), containing ball-mills, concentrators, and flotation machines. Concentrate is sent to smelter. A modern township has been provided and dwellings erected for employees.

Production:	Gold, Silver, Copper, Value				Total realized	Recovery	Cost	
	Tons	oz.	oz.	% per ton				
1920.....	107,976	0.448	0.206	0.317	\$10.61	\$1,146,441	91.88	\$5.74
1919.....	103,927	0.480	0.284	0.347	11.38	1,183,013	5.58

The 1918 figures are for 10 months, and those for 1917-'18 for 6 months, two broken periods. Mine is now a regular dividend payer.

BIG MISSOURI MINE.

Address: Lindeborg Bros., Stewart, B. C. Mine formerly worked under lease and bond by the Pacific Coast Exploration Co., controlled by Sir Donald Mann. Now owned by Daily Mines Co., Ltd., which see.

Property: 20 claims on Cascade creek, in Salmon River section. Portland Canal division, just N. of property of Premier Gold Mining Co., 12 miles N. of Stewart. Claims show low-grade complex ore, opened by a series of open-cuts, which prove the ore for a width of at least 1,000'. Hundreds of samples from the cuts average 60c. in gold, \$1.05 in silver, 2.16% lead, 0.5% copper, 5% zinc, 14.3% iron, 75% silica. Later work disclosed bodies of high-grade silver ore that will assay, in places, over \$100 per ton in a width of 20'. Diamond drilling, stopped 1919. If further development shows continuation of such a large low-grade orebody, experimental work will doubtless find a method to treat the complex ore. The high-grade ore is an additional asset.

BLACK PRINCE MINE

Operated under lease by J. A. Tipping, Slocan City, B. C.

Property: 4 claims in the Slocan City division, 9 miles E. of Slocan, at an elevation of 6,000'. The ore is a fine grained mixture of galena, zinc blende and iron pyrites, with a little grey copper and native silver in a quartz gangue.

Development: by tunnels, crosscuts and drifts. A small shipment of very high grade ore was made in 1919.

BOWENA COPPER MINES, LTD.

Office: C. M. Oliver, mng. director, 420 Rogers Bldg., Vancouver, B. C. **Mine office:** Bowen Id., B. C.

Inc. May, 1913, in British Columbia. **Cap.** \$300,000; \$1 par; outstanding, 287,020. Annual meeting, December 13.

Property: 3 claims, 150 acres, Crown-granted, on the east side of Bowen Island, 12 miles west of Vancouver, said to show disseminated copper ore assaying 1.9% copper and containing gold and silver.

Development: by main drift-adit, 230' long, 50' crosscut, shallow shaft and opencuts.

Equipment: water and steam power, compressor, 100-ton mill, flotation plant, etc.

Property leased, July, 1918, to C. W. Tipping for 5 years, company to receive 40% of net profits. The lease has been transferred to Mine Operators, Ltd. and extended to July 8, 1930. Lessees expect to put property on a producing basis when the copper market improves. Idle in 1920.

BRITANNIA MNG. & SMELTING CO.

All stock acquired by the Howe Sound Co., and described thereunder.

BRITISH-ALBERTA MINING CO.

Address A. J. Flood, pres., Vulcan, Alberta; W. R. Allen, sec., Nelson, B. C.

Property: St. Patrick group, 4 claims, 6 miles N. of Argenta, at head of Kootenay Lake, Ainsworth mining division. Said to show a 36' vein with lead-silver-zinc ore in streaks 6 to 18" in width. Developed by tunnel and a 90' shaft. A few men employed and small shipments made.

BRITISH-AMERICAN COPPER MNG. & SM. CO.

B. C.

Probably dead. See Vol. XIV.

BRITISH AMERICAN MNG. CO., LTD.

BRITISH COLUMBIA

Probably dead. Described in Volume XIV.

BRITISH CANADIAN SILVER CORP'N., LTD.

B. C.

Address: C. A. Banks, 615 Pender St. W., Vancouver, B. C. **Mine office:** Stewart, B. C.

Directors: R. C. C. Hockley, chm., E. H. Dunning, C. A. C. Wood and C. A. Banks (mng. dir.-cons. engr.). R. E. Bayliss, sec., 19, St. Swithin's Lane, London, E. C. 4, England.

Reported to have acquired from the Selukwe Gold Mng. & Finance Co.

(Rhodesia), control in the **B. C. Silver Mines Co., Ltd.** and **Bush Mines, Ltd.** and an interest in the **Salmon Bear River Mng. Co.** (now Premier Gold Mng. Co., Ltd.), which see.

Inc. March 26, 1921. **Cap.** £400,000; 5s par; 1,000,007 shares issued; 800,000 shares paid the Selukwe company for the Canadian holdings.

Early in 1922, it was reported that control of B. C. Silver Mines Co. had been transferred to the Premier company.

BRITISH COLUMBIA COPPER CO., LTD. **BRITISH COLUMBIA**

Fully described in Vol. XII. See **Canada Copper Corporation.**

BRITISH COLUMBIA IRON CO., LTD. **BRITISH COLUMBIA**

Address: G. A. M. Young, mgr., Kitchener, B. C.; P. G. Ebbert, sec., Creston, B. C.

Organized in summer of 1919, to develop Great War Group, 40 claims, in Nelson mining division, about 3 miles W. of Kitchener.

Management states that the holdings show a large body of hematite, running from 50 to 60% iron, and that diamond drilling will be done to ascertain its commercial possibilities.

BRITISH COLUMBIA MANGANESE CO. LTD. **B. C.**

Address: C. H. Dickie, pres.; E. J. Miller, sec., Duncan, B. C.

Inc. 1919, in B. C.

Property: the Hill 60 group of 3 claims, staked in 1918, near the summit of a mountain 2,000' high and 5 miles E. of Cowichan lake, and 4 miles by trail from a branch of the Esquimalt and Nanaimo Ry., Vancouver Island. Deposits of manganese, from 21 to 60" thick, carrying from 15.88 to 55.46% Mn., occur in a belt of cherty, jasperized rock. Open-cuts have been driven, and in 1919, 530 tons of 50% Mn. and 19% silica ore was sent to the Bibrow Alloys Co. at Tacoma, Washington, to be made into ferro-manganese.

An aerial tramway, 4,750' long, was completed in 1920, from the mouth of the tunnel to the railroad.

BRITISH COLUMBIA PHOENIX CO., LTD. **BRITISH COLUMBIA**

Described in Vol. XIII. Presumably dead.

BRITISH COLUMBIA SILVER MINES, LTD. **BRITISH COLUMBIA**

See **B. C. Silver Mines, Ltd.**

BUCKEYE MINES CO. **BRITISH COLUMBIA**

Officers: Geo. C. Mercer, pres., Lodi, N. J.; W. C. Dalglish, v. p.; E. L. Larkin, treas.; T. C. Larkin, sec., all of 291 Broadway, New York; J. J. Harris, H. G. Glennon, directors.

Inc. in Delaware. **Cap.** \$1,000,000; par \$1. U. S. Corporation Co., transfer agent and registrar.

Property: 67 acres in Ainsworth division. Ore is silver-lead-zinc.

Development: two 40' shafts and 200' tunnel.

BULLION MINING SYNDICATE **BRITISH COLUMBIA**

R. T. Ward, mgr., Bullion, B. C.

Property: over 1,200 acres, 600 held under a 25-year government lease, 600 acres Crown-granted, in Quesnel section Cariboo division. The property was formerly the largest hydraulic gold mine in British Columbia, but was tied up by litigation for several years, which is said to have been settled in 1919.

In June 1921, 30 men were reported employed driving a 500' tunnel.

BULLOCK GOLD MINES, LTD. **BRITISH COLUMBIA**

Address: Poplar Creek, B. C. R. H. Graves, mng. director; J. H. Wilson, supt.

Organized in September, 1919.

Property: Bullock mine on Cascade creek, in Lardeau mining division, shows 9 veins carrying free milling gold. Also claims in the Ainsworth division, including the Kelly Telluride group; on the latter a narrow quartz vein carries high gold values. All holdings are near Poplar Creek.

Development: by 400' crosscut and shaft to depth of 300'.

Equipment: 10 ton mill, compressor and drills.

BURNIERE NELSON GOLD MINES, LTD. BRITISH COLUMBIA

Address 314 Meridian Life Bldg., Indianapolis, Ind. J. A. Darragh, mgr., Camborne, B. C.

Property: the Burniere and Nelson claims, on Scott creek, Lardeau division, W. Kootenay district.

BUSH MINE BRITISH COLUMBIA

See Premier Gold Mining Co.

BUSH MINES, LTD. BRITISH COLUMBIA

Address: O. B. Bush, pres., Vancouver, B. C. M. D. Lechey, sec., 620 Alaska Bldg., Seattle, Wash. H. Tanner, supt., Stewart, B. C.

Inc. in 1919. **Cap.** \$1,000,000; \$1 par.

Property: 6 claims just N. E. of the Premier silver mine, N. of Stewart in Salmon River section. Portland Canal division.

Development: by open-cuts, 2 short tunnels and crosscuts. Developing with a small force.

Reported to be under control of British Canadian Silver Corp.

BUTTE & ROCHER DE BOULE COPPER CO. BRITISH COLUMBIA

Company controlled by Delta Copper Co., which see.

Officers at last accounts: Samuel McConnell, pres.; C. J. Stone, v. p.; J. W. McLane, sec.-treas., with Paul Ozanne and P. J. Jennings, directors. **Inc.** 1912, in Arizona. **Cap.** \$1,000,000; \$1 par; fully issued.

Property: the Highland Boy group adjoining, but 1,000' above the Rocher de Boule mine and covering 400 acres on Juniper Basin, Rocher de Boule mountain, Omineca mining division, 3 miles from New Hazelton and 4 miles from the Grand Trunk railroad. Claims show the extension of the Rocher de Boule veins, 2 of which have been opened by tunnels and open cuts. Ore occurs in fissure veins following intrusive dikes of porphyry in granite. Samples from veins 18" to 5' wide, assayed from 1.5% to 5.7% copper; with 0.5 to 0.8 oz. silver and slight gold values.

Property considered promising and worthy of further development.

CALIFORNIA-CARIBOO GOLD DREDGING CO. B. C.

Address: 401 Markwell Bldg., Long Beach, Calif. **Mine address:** Quesnel, B. C.

Officers: E. L. Pilling, pres.-mgr.; J. E. Platt, treas.; H. H. Paul, sec.; W. W. Wishon, engr.

Inc. in California.

Company reported to own dredging rights on the lower Cottonwood river, Quesnel section Cariboo division.

CALIFORNIA MINING CO., LTD. BRITISH COLUMBIA

Head office: Nelson, B. C.

Officers: J. R. Cassin, pres., 431 Exchange Bank Bldg., Spokane, Wash.; W. R. Orndorff, sec.-treas.; W. H. Turner, mgr.

Cap. \$400,000; shares 20c.

Property: California, Exchequer and Athabasca groups, 13 claims, 650 acres on Bird creek, 3 miles S. of Nelson, shows a strong quartz-filled fissure in schist near granite. The first named group was acquired from the Record Mng Co.

Development: to depth of 500' by tunnels, No. 3, 1,200' long, is 170' vertically below No. 2, which is 627' long. It followed a barren vein for 1,200; then cut the California vein, which is from 3 to 5' wide. Ore is said to average \$17 per ton. On No. 2, the vein has been followed for 200'. Five cars of ore assayed from \$17 to \$26 gold per ton.

Equipment: 50-ton mill and flotation plant.

CANADA COPPER CORPORATION, LTD. BRITISH COLUMBIA

Office: 42 Broadway, New York. **Mine office:** Allenby, B. C.

Officers: August Heckscher, chm.; L. W. Maver, pres.; A. J. Ronaghan, v. p.; with Allen H. Rogers (cons. engr.), C. I. Stralem, E. L. Gruver, Newman Erb, Colgate Hoyt, directors. R. H. Eggleston, sec.-treas.; H. R.

Van Wagenen, gen. mgr.; and F. S. Norcross, Jr., supt. of mines, British Columbia.

Inc. Nov. 15, 1920, in Canada. **Cap.** \$10,000,000; \$5 par; increased August, 1917, from \$5,000,000; outstanding 1,088,209 shares. **Funded debt:** \$2,500,000 1st sinking fund convertible gold 6s dated January 1, 1918, due January 1, 1928. Convertible any time into stock at \$3 a share. A sinking fund of 15c. per dry ton of ore, not less than \$150,000, shall be paid each year to the Trustee.

Debentures: \$710,000 five year 6% gold debentures issued October 1, 1919, subject to call at \$105 and interest, and offered stockholders pro rata at par with a bonus of 100% par value of stock to provide funds to complete and start plant.

Equitable Trust Co., New York, transfer agent. Empire Trust Co., New York, registrar. Stock listed on N. Y. Curb. Annual meeting, 3rd Friday in April.

Company is a reorganization of a Virginia Corporation of some name (See Mines Handbook 1920).

Under the plan and agreement of readjustment, dated July 1, 1920, there were issued 1,088,209 shares of stock. Stockholders paying 50 cents a share exchanged their stock on an even basis for new shares, while those not paying this assessment received one share of new stock for every three shares deposited before Sept. 1, 1920.

Comparative Balance Sheet, years ending December 31:

	Assets	
	1918	1919

Total	\$7,777,073	\$8,918,398

Dividends: \$615,399 paid prior to 1913; none since.

Property: the company acquired (in 1917) the property of the British Columbia Copper Co., Ltd., consisting of 1,250 acres, partly owned in fee and partly under option, located at Greenwood, B. C., and in the State of Washington, comprising the Mother Lode, Wellington Camp, Oro Denoro, Napoleon, Queen Victoria, Lone Star and Washington mines; property near Nelson, B. C., and a group of claims comprising 3,006 acres of mineral and other land in the vicinity of Copper Mountain, 9% miles from Princeton, B. C., known as the Copper Mountain Group. The company owns certain claims on Kennedy Mountain, and others are under option. Company also owns \$813,180 capital stock and \$329,642 bonds of the New Dominion Copper Co., Ltd. (see appended statement).

The company smelter at Greenwood, B. C., was permanently shut down November 26, 1918, owing to depletion of ore reserves, and low grade of remaining ores in that district, and in 1920 was offered for sale. The Boundary creek properties are described in Vol. XIII.

Copper Mountain Properties:

The company's future depends on the newer and larger holdings of 3,006 acres of mineral and other land at or near Copper Mountain, British Columbia, 9.5 miles due south of Princeton, British Columbia, and 182 miles by rail east of Vancouver. A 13-mile branch of the Kettle Valley R. R. connects Princeton and Copper Mountain.

Geology: Copper mountain consists of monzonite-porphry and granodiorite, intruded by a system of light-colored porphyry dikes.

The ore consists of finely disseminated chalcopryite, bornite and pyrite in altered porphyry and granodiorite the ore carrying recoverable values in gold and silver.

Development: property has been developed in a systematic manner by a large amount of diamond drilling and underground work. Over 118,500' of diamond drilling, 31,738' of surface trenching, 18,000' of drifting, 15,000' of raising, and 900' of sinking has been done to block out ore. Ore is taken out through the 2,900' main haulage tunnel. There is a difference in elevation of 800' between this tunnel and the next nearest workings; a 2-compartment hoistway, and a zigzag ore pass connecting the tunnels.

All ore thus far developed occurs above the level of the Similkameen River which passes along the base of Copper Mountain at an elevation of approximately 2,500'. Underground work 1919-21 consisted of timbering the main shaft and stations; enlarging haulage levels and timbering; completion of main ore pass from surface to 4,073' level; constructing dumping stations and loading chutes; raising and drifting.

Ore reserves: estimated at 10,000,000 tons of developed ore and 2,000,000 tons of probable ore, having an assay value of 1.74% copper, and approximately 35c. per ton in gold and silver. Careful geological study suggests the possibility of eventually doubling the present tonnage of assured ore. Company in addition owns several other promising prospects in the locality.

The average grade of ore has been determined from bulk samples drawn from the underground workings, and these areas have been thoroughly checked both by drill and groove sampling.

Treatment of ore: a 40-ton flotation test mill erected at the property has given very satisfactory results. Since there is a marked absence of oxidized material in the ores, a recovery of 90% of the copper is expected in regular operations: actual savings very close to this figure on extended experimental runs have already been obtained. Concentrates assaying 25% copper were maintained with a concentration ratio of approximately 17 into 1.

For the purpose of estimating earnings, a recovery of 27.4 lb. of copper per ton of ore was assumed after allowing for a certain amount of dilution by waste rock. As the wall rock is generally light colored dike material, the ore admits of clean mining.

The cost of producing copper is estimated at 9½c. per lb. when operating on a basis of 3,000 tons per day. Approximately one-half of the present ore reserves will be extracted by open-cast mining methods, and all of the ore will be drawn from the mines by means of tunnels.

Equipment: includes compressors, head-frame, hoist, concrete powder magazine, machine shops, telephone system, primary crushing plant, conveyors, surface tramways, pumping plant on Similkameen river, water lines for industrial, domestic and fire purposes, 400 h. p. steam heating plant, assay office, laundry, dwellings, dining hall, etc. Power is furnished by the West Kootenay Power & Light Co., which constructed a 100-mile transmission-line under a contract to supply 5,000 h. p.

Reduction Works. Company owns a mill at Allenby, B. C. capable of

treating 3,000 tons of ore per day. Construction was completed in 1919, but considerable delay resulted in starting the operations at company's properties in the Princeton district, due to labor difficulties among the forces of the Kettle Valley Ry. This plant began operations on Oct. 18, 1920, but was shut down on Dec. 12, 1920, owing to the low price of copper. At the time of the shut-down 1,200 tons of ore were being treated daily.

Production:

* January 1 to August 23.

In 1916, mine produced 5,196,000 lbs. copper.

No detailed information obtainable as to the success of the Reorganization Committee.

CASSIAR CROWN COPPER CO.**BRITISH COLUMBIA**

Office: 601 Empire State Bldg., Spokane, Wash. **Mine office:** Telkwa, British Columbia.

Officers: A. C. Mason, pres.; W. C. Miller, v. p.; J. V. Pohlman, sec-treas.; Geo. Dungate, mgr.

Inc. in 1916. Cap. increased from \$1,000,000 to \$1,500,000; \$1 par; 268,000 shares in treasury.

Property: five 50-acre claims on Grouse mountain, in Omineca division, 18 miles S. E. of Telkwa and Aldermere, and 260 miles from Prince Rupert on Grand Trunk Pac. R. R., said to show zinc-copper-silver ore.

Development: mainly by tunnels, longest in over 750'. Mineralized area as indicated by surface workings is a sheeted zone 10 to 12' wide. There are several shallow shafts and pits all showing more or less copper. Average assay of all ore exposed in workings is claimed to exceed 7% copper and \$3 gold.

For geology see Canadian Geological Survey of Cassiar Crown group for 1915, by J. D. McKenzie.

COAST COPPER CO., LTD.**BRITISH COLUMBIA**

Head office: Trail, B. C.

Officers: J. J. Warren, pres., Toronto, Ont.; T. W. Bingay, sec-treas.; with S. G. Blaylock, W. M. Archibald, M. W. Bacon and W. E. Cullen, Jr., directors; W. M. Archibald, mgr.; Wm. Clancy, supt., Quatsino, B. C. Company is successor of Quatsino Copper Co. and is controlled by the Consolidated Mining & Smelting Co.

Inc. September 15, 1916, in British Columbia. Cap. \$1,000,000; \$5 par. 200,000 shares issued; 110,000 shares owned by Cons. M. & S. Co., Ltd.

Property: the old Sport mine, at Elk mountain, Quatsino division, Vancouver Island. Ore shoots carry argentiferous chalcopyrite in magnetite in fissures with dip of 40° that cut through diorite. The vein is 3,000' long on the surface. The Idaho and Sport veins were cut by new adit 250' below bottom of winze and a 600' drift run on the Idaho vein.

Development: by 2 adits, crosscutting the vein, the lower 2,200' long and 500' below the upper adit. Workings total 6,193', plus about 7,000' of diamond-drilling. Work in 1920 amounted to 1,900' of drifting and cross-cutting and 192' of diamond drilling.

Equipment: 6x8' single drum hoist, 300 cu. ft. compressor and water power.

CONSOLIDATED HOMESTAKE M. AND D. CO., LTD., THE B. C.

Address: 807 Credit Foncier Bldg., Vancouver, B. C. Mine address: Major Crighton, Alice Arm, B. C. A. C. H. Gerhardi, cons. engr.

Officers: R. Helme, pres.; Geo. J. Smith, v. p.; Chas. M. Houghton, sec.-treas., with D. A. McCaskill and P. L. Simpson, directors.

Inc. in B. C. Cap. \$500,000; \$5 par

Property: Homestake group, 6 claims, in Kitsault section, Nass River division, 23 miles N. of Alice Arm, shows a fissure vein in andesite, containing 5.02% copper, 0.56 oz. gold and 2.14 oz. silver per ton.

Development: by three tunnels, 143', 460' and 750' long. Is being developed by Mineral Claims Devel. Co., Ltd. (q. v.) which has had a bond and lease on property since 1919.

CONS. MNG. & SMG. CO. OF CA. LTD., THE

B. C.

Office: 707 Drummond Bldg., Montreal, Que. Works office: Trail, B. C.

Officers: J. J. Warren, pres.; Geo. Summer, v. p.; with Sir Edmund B. Osler, Chas. R. Hosmer, H. S. Osler, W. L. Matthews, J. C. Hodgson, Henry Joseph, and J. K. L. Ross, directors. J. E. Riley, sec.; W. S. Rugh, sales mgr.

Operating officials: S. G. Blaylock, gen. mgr.; W. M. Archibald, mgr. of mines, and staff consisting of A. B. Ritchie, assistant; F. S. Peters, supt. at Rossland and White Bear; E. G. Montgomery at Sullivan and St. Eugene; M. M. O'Brien at Rock Candy; R. M. Macauley at Emma; W. Clancy with Coast Copper; Geo. H. Kilburn at Sunlock and at Blue Grouse; field operations under direction of J. K. Cram and G. H. Kilburn; T. W. Bingay, comptroller; James Buchanan, smelter supt.; G. E. Murray, assistant; B. A. Stimmel, supt. of zinc plant; J. J. Fingland, in charge of refineries; H. R. Motherwell, assistant; R. W. Diamond, supt. of concentration and testing; G. F. Chapman, construction eng.; A. L. MacCallum, supt. of acid plants; F. E. Lee, W. H. Hannay, research engr.; G. Cruickshank, F. S. Willis, H. Woodburn, department superintendents in zinc plant; D. G. Bissett, chief chemist; R. K. Blois, supt. of smoke plants.

Inc. January 1, 1906, in Canada as Canadian Consolidated Mines, Ltd. Cap. \$15,000,000; \$25 par; issued \$10,533,700, increased from \$5,500,000 in 1909 to \$7,500,000, and again in December, 1915, to present amount. Annual meeting third Tuesday in December. Listed on Toronto and Montreal Exchanges. Transfer agents: Toronto General Trusts Corporation, Toronto, and Royal Trust Co., Montreal.

Bonds: \$3,000,000 7% debentures authorized December, 1918, and convertible after January 1, 1924, into stock at par.

Cons. M. & S. controls the West Kootenay Power and Light Co., Ltd., a dividend-payer that supplies electric current to mines in this region.

Financial Statement years ending Sept. 30 to 1918, then Dec. 31:

Dividends: rate of 10% per year quarterly from May 1906, to April, 1907; then 1¼% in November, 1907; 4% in October, 1912; 2% quarterly from July, 1913, to October, 1915; and 2½% quarterly from January, 1915, to Sept. 30, 1920; fourth quarter of 1920 passed; none in 1921. The total is \$6,836,852.

Property: company was formed to take over the following properties, either by direct ownership, or by stock control; War Eagle Consolidated Mining & Development Co., Ltd.; Centre Star Mining Co., St. Eugene Consolidated Mining Co., The Rossland Power Co., and the Trail smelter, formerly operated by the British Columbia Southern railroad. In 1907, the Iron Mask, Idaho and Enterprise mines at Rossland were purchased and the Phoenix Amalgamated Copper Mines, Ltd.; also the Keystone and Four Ace claims adjoining the Phoenix, located at Phoenix, B. C. In 1910 the company acquired the La Plata, or Molly Gibson group, near Nelson, and the No. 7 group in the Boundary district. In 1911, company purchased control of the Fort Steele Mining & Smelting Co., Ltd., owning the Sullivan silver-lead mine, near Fort Steele; Le Roi Mining Co. at Rossland; the Virginia and Abe Lincoln Mines. In 1915, company purchased the Monte Christo Paul Boy, Eddie J. and the Iron Horse mines, all at Rossland, and acquired a controlling interest in the Silver King Mines, Ltd., at Nelson. Also the No. 1 and the Highland groups in Ainsworth. In 1913, the Deer Park, Grand Prize and Mabel in Rossland were taken over and the Ottawa mine near Slocan City purchased. Control was purchased in the Coast Copper Co., operating on Vancouver Island. In 1916, a lease was taken on holdings of Cons. White Bear Mng. Co. Late in 1917 company bought silicious flux properties in the Camp McKinney and Fairview districts, near Keremeos, B. C. The Voight copper mine near Princeton was acquired in 1918. To ensure a further supply of fluxing ore, the San Poil gold-silver mine at Republic, Wash., was bought in 1918 at a receiver's sale. In 1918, an option was taken on the **Iva Fern** claims on W. side of Kootenay lake on which surface conditions indicate lead-silver ores in 2 veins, and a 250' tunnel driven. To ensure a cheaper supply of fluorspar the Rock Candy claims on Kennedy creek, were acquired in 1918, and a 100-ton mill erected. In 1919, control of the Sunloch Mines, Ltd., on Vancouver island, was acquired. The 23 Silver Tip zinc-lead-gold-silver claims between Eutsuk and Whitesail lakes, Sibola section, in most southerly area of Omineca division, were taken under option in 1919.

Drilling and other work in the **Blue Grouse** mine of Gordon Bay Mines, Ltd., proving discouraging, option was dropped in 1919. The Silver King, Coast Copper, Cons. White Bear, and Sunloch companies are separately described.

The **Le Roi-Centre Star** group, on the southern slope of Red mountain at Rossland, is still the principal property. At this place the country rock is a complex of effusive and fragmentary volcanics of the Paleozoic age

intruded by a large number of nearly vertical dikes, from a few feet to 250' wide, with generally N.-S. trend, the dikes being basaltic, and occasionally slickensided, larger dikes cutting off the veins completely, with the more important orebodies occurring at the points of intersection, and having a series of faults, mainly parallel to the dikes. Ore occurs in shoots of 3 to 50' width, and 50 to 600' length, widening at intersection of veins with dikes. Ore is strongly auriferous and fairly argentiferous chalcopyrite, associated with pyrite and pyrrhotite with gangue of silicious altered country rock, ore ranging 0.5 to 2% copper, and \$8 to \$20, and occasionally up to \$100 gold per ton. Pay shoots extend, in some cases, from wall to wall, and from local enrichments the wall in some cases being very indistinct, and ore shading into the country rock. There are several veins, the more important being the Centre Star, Le Roi and War Eagle, on which the mines are opened, these being shear zones, carrying chalcopyrite disseminated mainly in pyrrhotite, with some pyrite and arseno-pyrite.

The **Rosland** group, which now has a total acreage of about 775 acres, includes the Le Roi, Centre Star, War Eagle and Iron Mask mines, which are practically one, all connected by drifts and crosscuts, with about 58 miles of workings. Mines are worked by overhand stoping, partly on the shrinkage system and partly timbered with square sets, cut from round timber. Electric haulage is used throughout, 13 electric locomotives hauling 2-ton side dumping cars to the underground ore pockets of the Centre Star shaft.

The Centre Star mine has a 2,200' 68° inclined shaft, with 16 levels opened at intervals of 125 to 175'. The shaft is concreted from the 12th level to the bottom. The mine has 8 to 10 different orebodies, but ore comes principally from the Centre Star vein, averaging 0.6% copper, 0.3 oz silver, \$8 to \$10 gold per ton.

In the Centre Star-War Eagle-Iron Mask group, ore is mined from the 3 Centre Star veins, Main, North and South, as well as from the Iron Mask, War Eagle, Josie, Poorman and Mugwump veins.

The Le Roi group produces ore from the Le Roi main South, Intermediate, North Peyton and Hollywell veins.

Electric power for the complete operation of the mines is taken from the Bonnington Falls plant of the West Kootenay Power & Light Co., controlled by Cons. M. & S. Co., 35 miles distant at 60,000 volts, stepped down at the mine to 2,000 volts for distribution and use. The compressor room has a 120-k. w. direct-current generator, driven by an alternating current motor, supplying current at 250 volts for electric motors on surface and underground, and for lighting. Air for drilling is furnished to all the mines through one system.

The mines are gold, rather than copper producers.

The **Richmond-Eureka** mine, at Sandon, under lease to Clarence Cunningham, has argentiferous lead and zinc ores, developed by tunnels aggregating $1\frac{3}{4}$ miles in length. Ore is transported to bin on C. P. R. R. tracks at Sandon by 4,000' aerial tram.

The **Sullivan** mine, at Kimberly, and 20 miles from Cranbrook on the C. P. R.R., is a lead-zinc producer, whose ore occurs in replacement deposit, in a fine grained argillaceous quartzite. Ore is a mixture of fine-grained galena, zinc blende, and iron sulphide. The ore-shoot shows a maximum slope width of 125'. Development principally by tunnels and raises. A low-level tunnel, 8,100' long, equipped with double standard-gauge tracks, has been driven to open this property, which is one of the most important zinc mines developed in North America for many years. The tunnel and upper workings are to be connected by a shaft. The ore is complex, but experimental work has proven that it can be satisfactorily milled. It will go to a 900-ton mill at company's smelter at Trail, the concentrate being treated by the electrolytic process. Electric locomotives are used in the mine and an aerial tram from upper workings to railroad cars.

In 1920 the mine produced 242,294 tons zinc-lead ore and 13,214 tons of lead ore.

The **Molly Gibson** mine, bought 1910, formerly owned by Molly Gibson Mining Co., Ltd., and later by La Plata Mines, Ltd., has a regular fissure vein in granite containing highly argentiferous lead-zinc ore. Developed by over two miles of tunnels. An aerial tram 2 miles long connects the mine and mill, while a second, five miles long, connects mill and loading bins, 5 miles from Kootenay lake. The mine is equipped with 100-ton mill, operated by water power, and two air-compressors.

Operated for 2 months only in 1920 and in 1921 was leased to W. A. Cameron for a period of several years.

The **St. Eugene** mine, at Moyie, is equipped with a 500-ton mill, but considerable of its equipment has been dismantled. Mine operated for 7 months in 1920, making a small production, and was turned over to lessees in October.

No. 1 Group, 6 miles from Ainsworth, 400 acres, has a contact deposit between dolomite and a dark lime schist. The ore, occurring in beds 3 to 8" thick, consists largely of oxides of iron, zinc, and lead in a silicious lime gangue. Principal value is in silver, about 9 oz. per ton. Development is by tunnel and winze. Equipment includes a 2-stage, 11x16x18" Jenckes air compressor, driven by belt from 150 h. p. 2,080-volt motor, power being supplied from a 350 k. w. generator at Highland Mill, Cedar creek, 9,000' distant; and an aerial tram, connecting mine ore bins with loading bins, on shore of Kootenay lake. Storage capacity at mine and lake bins is about 700 tons. Operated by lessees in 1921.

Highland Group, 1½ miles from Ainsworth, 240 acres, has a series of fissure veins in hornblende schist. Ores are silver-lead and development is by tunnels. Equipment includes 6-drill air compressor, driven by water power and a single rope aerial tram, 4,000' long, connecting mine ore bins with 150-ton mill at Kootenay lake. Power for mill is from a 350 k. w. generator, driven by a Pelton wheel under a head of 1,000'. Mine was closed in Feb., 1920.

The **Ottawa** group of 17 claims is in Slocan City district. Ore occurs in a fissure vein in granite. Development by tunnels and winzes to depth of 600'. Principal metal is silver, associated with copper, lead and zinc sulphides, some barite in gangue. The mine is being operated under a 4-year lease from 1920 by the **Ottawa M. & S. Co.**, which see.

Details of all the mines are too lengthy for insertion, but the following table gives summary of the facts concerning the principal properties.

Name	Class of ore	Development Total Drilling		—Production—		
		in 1920	in 1920	in 1920	to date	
		feet	miles	tons	tons	
Rossland Gp.	gold, copper..	5,460	60.80	4,519	54,524	4,877,600

Richmond-Eureka	lead-silver	1.80	1,113	19,420
Ottawa	silver.....	83	2.17	510	1,628

Reduction works: the Trail smelter near the International boundary, treats all kinds of ores and does an extensive custom business, which will be mainly smelting concentrate and refining copper from the Canada Copper Corporation at Princeton, when that company starts operations.

There are two sampling mills, equipped with crushers and Vezin samplers; No. 1 mill, for copper ores, of 200 tons hourly capacity; No. 2 for lead ores, of 100 tons hourly capacity.

The smelter has a calcining department, and blast-furnaces for copper and lead. All the copper ores are bedded and hauled from the beds (of 21,000 sq. ft.) by electric locomotives to the charge bins, and from these to the furnaces. Lead ores for the roasting department are delivered to beds by a system of belt conveyors and drawn from these beds by a conveyor over an electric scale to the roasters.

The calcining department consists of three 22½' 7-deck Wedge roasters, and five 26' Godfrey furnaces. The roasted ore is sintered in 32 Huntington Heberlein sintering pots and 3 Dwight-Lloyd sintering machines, fumes being passed through the Cottrell electric precipitator.

The 1,800-ton copper smelter has 4 blast furnaces, 2 of 35' and 2 of 25' taking a 32 oz. cold blast. Two 12' Great Falls type converters are in operation making blister copper.

The 350-ton lead smelter has one 45x180" and three 45x180" blast furnaces, with mechanical feeder, reducing mainly calcined ores. Crude lead ores are roasted in seven 26' Godfrey furnaces, which reduce the sulphur from the original tenor of 16% to 8%, and these calcines are reroasted in fifteen Heberlein sintering pots, yielding a product carrying only 4½% sulphur. 9' Huntington-Heberlein sintering pots, yielding a product carrying only 4½% sulphur. The sintered ore, carrying 30 to 50% lead, is smelted in the blast-furnaces, each making 50 to 85 tons of lead bullion daily, with about 4% matte fall. This matte is roasted and again put through the blast-furnaces, and slags are graulated. Blast-furnace gases are passed through a Cottrell precipitator.

An electrolytic lead refinery, handles anodes cast from the silver-lead bullion. This plant, of 100 tons daily capacity, was the first electrolytic lead refinery ever built, and uses the Betts process. The lead is of exceptional purity, with average assay of about 97%, which means that a short ton of lead carries only about 1 oz. of impurities, which is excellent work.

The silver refinery, taking silver sludge from the electrolytic lead tanks, has a water-jacketed reverberatory furnace for the production of doré bullion, and the necessary kettles, tanks, and bluestone plant for parting the precious metals with sulphuric acid; also furnaces for melting and casting the silver and gold bullion. The silver bullion is 999 fine and the gold bars are 995 fine.

The electrolytic copper refinery now handles 50 tons per day, having been enlarged in 1918 at cost of \$250,000. A wire-rod mill is also to be built costing \$75,000.

Blast is supplied at 32 oz. for all furnaces, by one No. 9, and one No. 9 1/27, one No. 11, and one 400 cu. ft. Root blower, and one 200 cu. ft. Connerville blower.

An electrolytic zinc plant was erected in 1916. The process is similar to that used at Anaconda, Mont., but is the direct result of the operation of an experimental plant treating ore from the Sullivan mine and producing 1,000 lb. of zinc per day.

The plant contains two driers, three 18x5' ball mills, thirteen 7-deck 25-ft. Wedge roasters, a large leaching building, where the ores are leached by counter-current continuous process in Pachuca tanks and thickened in Dorr thickeners, purified in Pachuca tanks, and filtered with Kelly and Oliver filters, electrolyzing-tank rooms, where the solutions are electrolyzed in concrete electrolytic tanks; thirteen 1,000 k. w. motor-generator sets; the necessary transformer plant to reduce the 60,000 volt current with which the plant is supplied; and a melting plant with two reverberatory furnaces for melting the cathode zinc.

U. S. Patent No. 1,320,805, Nov. 4, 1919, was issued to R. H. Stewart, S. G. Blaylock, Robert Vaughan, and J. K. Batchelder of this company, for hydro-chemical extraction of zinc from ores or other zinc-containing

material in which the zinc has been made soluble by roasting, the process above.

The zinc concentrator, with daily capacity of 900 tons, is equipped with a 6x6' ball mill, a standard 24" 17-cell Minerals Separation flotation machine, concentrating tables, filters, thickeners, and complementary appliances. This plant is to be increased to 2,500 tons capacity. Briefly, the method consists in removing a little of the heavy galena on tables, the middling is subjected to wet magnetic separation for removal of pyrrhotite, and finally to preferential flotation for separation of the blende from the galena. Concentrate from the mill goes to the electrolytic plant described above.

The mill at the Rock Candy mine makes a product carrying 84% calcium fluoride and 6% silica.

Other accessories to the Trail smelter are copper and zinc-casting departments, sulphuric-acid plant (2,879 tons in 1918), hydro fluosilicic plant (196 tons in 1918), and bluestone plant, all recently overhauled and in good order.

Power for the reduction works is electric throughout, and brought from Bonnington falls, on the Kootenay river.

The works have a central heating station and well-equipped machine, carpenter, boiler, and electric shops. The assay-office, which handles an unusual variety of work, in great detail, is exceptionally commodious and well equipped.

Production, including custom ores:

	Ore Smelted, tons	Gold, oz.	Silver, oz.	Lead, lb.	Copper, lb.	Zinc, lb.

Total 1894-1920 6,350,432 1,951,048 32,278,092 580,593,764 96,898,237 106,344,850

Company at present is the only one in the world producing electrolytically refined copper, gold, lead, silver, and zinc at one plant; also making sulphuric acid, hydrofluosilicic acid, bluestone, and manganese dioxide. Trail is a metallurgical center using the latest processes, not following recent practice, but a leader in devising new methods.

While Cons. M. & S. has many mines, its future apparently depends on the large ones described, especially the Sullivan mine.

Its custom business is important and will expand. The management is enterprising, competent, and eminently fair in its dealings with the companies that ship ore to its smelter.

CONS. WHITE BEAR MNG. CO.

BRITISH COLUMBIA

Address: Cons. M. & S. Co. of Canada lessee, Rossland, B. C.

Property: at Rossland, Trail Creek division, adjoins the Rossland group of the Cons. M. & S. Co. on the W., contains pyrrhotite-chalcopryrite ore lenses in diorite porphyrite underlying the barren Mount Roberts formation.

Up to 1908, when company operations closed, development consisted of 1,000' shaft, with about 4,000' of total workings, and 4 veins had been opened. Ore is copper-gold and in the main low grade.

Equipment: included an Elmore concentrating plant.

After 8 years of idleness, property was taken under lease by **Cons. M. & S. Co. of Canada**, which see.

CONWAY MINING CO. BRITISH COLUMBIA

Address: c/o J. M. Miller, Billingham, Wash., or J. Brown, mgr., Ferguson, B. C.

Property: Old Gold and Silver Queen mines in Trout Lake division, W. Kootenay district, 13 miles from Ferguson. The ore is high-grade silver-lead.

COPPER CREEK MINING CO., LTD. BRITISH COLUMBIA

Address: W. Ross Alger, sec., 601 Agency Bldg., Edmonton, Alberta.
Mine address: Kamloops, B. C.

Property: Tenderfoot group on Copper creek, Kamloops division, Yale district. Ore is copper-gold-silver. Idle much of 1919, mine was reported under option in 1920 to eastern capital and a concentrator was to be erected.

COPPER MOUNTAIN MG. & DEV. CO. BRITISH COLUMBIA

Office: 5406 Union Ave., South Tacoma, Wash. Mine near Quatsino. Fully described Vol. XII.

CORK-PROVINCE MINES, LTD. BRITISH COLUMBIA

Office: Kaslo, B. C. Mine at Zwicky, B. C.

Officers: W. E. Zwicky, pres.-gen. mgr.; Henry Giegerich, v. p.; W. H. Burgess, sec.-treas., with J. A. Johnston, R. E. M. Strickland, directors. Transfer office: Kaslo. W. H. Burgess, registrar.

Inc. May, 1915, in British Columbia. **Cap.** \$1,000,000, 10c par, 8,500,000 issued; increased July 17, 1919, to \$1,250,000; shares \$1 par. Bonds issued, \$17,500. Net indebtedness at end of 1920 was \$16,000.

Property: 13 claims, 9 Crown granted, containing about 700 acres on the S. Fork of Kaslo creek in the Ainsworth division, 4½ miles from Zwicky on a branch of the C. P. R. R. Company is a consolidation of the Cork and Province groups.

The ore occurs in fissure veins in slate, which have a N. E.-S. W. course and 68° dip. The shoots are 6' to 30' wide, containing silver-lead, and zinc ore.

Development: a 1,400' crosscut tunnel, intersects the Black Fox and the Cork veins, at depth of 300' and has 2,300' of workings. The Black Fox vein cut at 700' from the portal is 4' to 6' wide, but has no commercial ore at this point and will be explored. The Cork vein cut at 920' is strong and wide and contains 4 productive ore shoots averaging 8' wide for lengths of 50 to 325'. Ore reserves are said to be 10,000 tons, to about the 300' level.

Equipment: 100-ton concentrator, flotation unit, hydro-electric plant, saw-sawmill, compressor and electric lighting system.

Production: mine yielded 1,206 tons previous to consolidation, and about 933 tons in 1915; 45 in 1916; 414 in 1917; 733 in 1918. Ore shipments averaged 35 oz. silver and 49% lead in 1918.

Operations were resumed in June, 1919, but suspended in October; 225 tons of lead concentrate, and some zinc was shipped. Idle pending re-financing.

CORONATION GOLD MINES, LTD. BRITISH COLUMBIA

Address: Will Haylmore, 1232 Wharf St., Victoria, B. C. **Mine address:** Lillooet, B. C.

Property: Coronation mine on Cadwallader creek, Lillooet division. Was idle for several years until 1920, when taken under lease by Aylward & Burdick.

COUVERAPEE MINING CO., LTD. BRITISH COLUMBIA

Address: O. S. Chonin, pres., 211 - 8th Ave. W., Calgary, Alberta.
Mine address: Field, B. C.

Property: Couvrapee mine on Mt. Stephen, Golden division, E. Kootenay district, shows a replacement deposit in limestone, the ore assaying 15% lead and 3 oz. silver per ton, with a small amount of zinc. Was a shipper in 1918, but idle 1919-'20 because of boundary litigation with the adjoining Monarch mine. Reported that an amalgamation of the two mines has been effected.

CUNNINGHAM, CLARENCE**BRITISH COLUMBIA**

Address: Alamo, B. C. **Mine address:** Sandon, B. C.

Property: the Silverite and Sovereign silver-lead mines at Sandon, Queen Bess mine, and claims of Standard Silver Lead Mng. Co., Slocan division., purchased in mid-1921. Also by control, holdings of Wonderful Group Mng. Co., Idaho-Alamo Cons. Mines, Ltd. and Enterprise (B. C.) Mines, Ltd., and under lease, the Richmond-Eureka mine of Cons. Mng. & S. Co. of Canada. Lease on mines of Van Roi Mng. Co. was relinquished late in 1921. Cunningham owns also the Alame Concentrator. Except for the two first named, these mines, etc., are separately described.

Cunningham has a reputation for combining a progressive mining policy with up-to-date methods.

DALY MINES CO., LTD.**BRITISH COLUMBIA**

Controlled by Portland Canal Mines Co. (q. v.), as a U. S. Holding company, organized by Pat Daly and T. H. Wilson of New York, late in 1921.

Property: the Big Missouri mine (described under that title) and International group of 8 claims, in the Solman River section, Portland Canal division, $6\frac{1}{2}$ miles northeasterly of Stewart on the international boundary. The latter, in which Daly owns a $\frac{1}{4}$ interest, shows an 8 to 10' vein in schist, to be developed by a 300' tunnel to reach depth of 160'. Ore is silicified schist and quartz, carrying pyrite.

DELLIE MINING & MILLING CO., LTD.**BRITISH COLUMBIA**

A reorganization, 1918, of the Silver Hoard Mining Co., described in Vol. XIII.

Address: L. R. Hawley, sec.-treas., 614 Hutton Bldg., Spokane, Wash.

Mine address: W. S. Hawley, mgr., Ainsworth, B. C.

Officers: W. H. Carder, pres.; Dr. E. N. Northrop, v. p.

Inc. 1918, in Washington. In summer of 1919, company levied an assessment of 1c. per share in order to pay off its heavy indebtedness.

Property: the Silver Hoard mine, 5 claims, 2020 acres, Crown-granted, 7 miles N. W. of Ainsworth, said to carry the same vein stoped in No. 1 mine of Cons. M. & S. Co., 2,400' away. The vein is in limestone. Milling ore is said to assay 3% lead, 10% zinc, and 15 oz. silver per ton.

Development: by 7,000' of workings.

Equipment: includes hydro-electric power, compressor, hoist and a 75-ton flotation plant.

Production: from 1911 to 1916, reported as 43 cars of ore, assaying 46.9 oz. silver, 4% lead, and 15% zinc, with net smelter returns of \$32,000.

Mine operated by Grant Bros. and Rogers under a 2-year lease from 1921.

DELTA COPPER CO., LTD.**BRITISH COLUMBIA**

Address: 703 Tegler Block, Edmonton, Alberta. **Mine office:** Tramville, B. C.

Officers: W. H. Hargrave, pres.-mng. director; J. H. Miller, v. p.; A. J. McCormick, v. p.; C. R. Tufford, sec.; Colin Case, treas., with G. A. McAlpine, John Timothy, C. S. Pingle and W. S. Sargent, directors. W. G. Norrie-Lowenthal, cons. engr.

Property: 25 claims, including the Delta, Chicago, Hazelton, and Dyke group of claims, in the Hazelton section, Omineca division, adjoining the Rocher de Boule mine on the east. Also, controls Butte & Rocher de Boule Copper Co. (q. v.) owning the Highland Boy group.

Some tunneling was done in 1919, but owing to lack of funds, work was suspended. Property considered promising.

For geology, see Memoir 110 (1919), Canadian Geological Survey.

DISCOVERY MINING & POWER CO., LTD. BRITISH COLUMBIA

Address: Wm. Morrison, mgr., Atlin, B. C.

Property: placer ground on Pine creek, Atlin mining division. Gold production for summer of 1919 was about \$25,000, by several sets of lessees. Said to be controlled by Frank H. Mobley, of Prince Rupert.

DOLLY VARDEN MINES CO. BRITISH COLUMBIA

Inc. in Delaware.

Property near Alice Arm, taken over by Taylor Mining Co. (which see).

Company was involved in protracted litigation with Taylor Engineering Co., which was finally settled in 1920.

DONOHUE MINES, LTD. BRITISH COLUMBIA

Address: F. M. Hawkes, pres., 610 First Ave., Seattle, Wash.; C. A. Moon, gen. mgr.; Jos. T. Knapp, supt.

Property: 8 claims, including the Tubal Cain, King William, and Joshua mines, near Stump lake, Nicola mining division. Ore contains copper, lead, zinc, silver, and gold. The deposit consists of quartz veins, 10 to 60' wide, traversing a green diabase porphyrite. Development has followed veins to 400' in depth. In 1919, the Joshua shaft was unwatered and exploration resumed. Shipments of silver ore sent to Trail.

Equipment: includes compressor and air-drills. A 50-ton concentrator is to be installed.

DOUGLAS CHANNEL MINES, LTD. BRITISH COLUMBIA

Address: 409 Credit Foncier Bldg., Vancouver, B. C.

Is a reorganization of the Drum Lummon Mines, Ltd.

Cap. \$3,000,000. Glenville A. Collins Engineers, Ltd., as managers, liquidated indebtedness of old company and continued development work. In June, 1921, the Drum Lummon Mines, Ltd. (N. P. L.) was organized and acquired the holdings of the Douglas Channel, in exchange for 1,225,000 shares of stock.

DRUM LUMMON MINES, LTD. BRITISH COLUMBIA

Described in Vol. XIV.

Reorganized in 1921 as Douglas Channel Mines, Ltd., and property sold to Drum Lummon Mines, Ltd., (N. P. L.) which see.

DRUM LUMMON MINES, LTD., (N. P. L.) BRITISH COLUMBIA

Address: Glenville A. Collins, mgr., 410 Credit Foncier Bldg., Vancouver, B. C. **Mine office:** Douglas Channel, B. C.

Officers: G. A. Collins, pres.; J. Broatch, v. p.; N. M. Silcock, sec.-treas., with N. Thompson, Dr. T. B. Turner and J. F. Meads, directors.

Inc. June 10, 1921. **Cap.** \$3,000,000; \$1 par; 1,325,000 issued, 1,225,000 shares going to Douglas Channel Mines, Ltd.

Property: 13 claims on Drum Lummon bay, N. shore of Douglas channel, Coast section of Skeena division, 25 miles from Hartley Bay.

Geology: ore occurs as bornite, chalcocite and chalcopyrite in quartz, biotite, or feldspar, as replacements along an andesite dike.

Development: to depth of 700', by 400' main tunnel with depth of 200' and a 400' drift. A 100' winze is being sunk. Workings total 2,000'. Management estimates ore reserves at 5,000 tons, averaging \$25 per ton. Shipping ore said to average 65% copper, 60% silver and \$45 gold. Shipments made to Tacoma smelter.

DUNDEE MINING CO. BRITISH COLUMBIA

Address: Ymir, B. C.

Property: the Dundee mine, adjoining the Yankee Girl at Ymir, Nelson division. Mine is reported to have very favorable indications of a large tonnage of commercial ore, having a tunnel 2,954' long said to prove the ore to 1,100' depth. Arthur Lakes, Jr., estimated 100,000 tons ore proven, with a gross value of \$850,000, or \$380,000 net.

Property was under option 1920-'21 to the Mining Corp. of Canada, Ltd.
ECHO SILVER-LEAD MINING CO., LTD. BRITISH COLUMBIA
 Address: L. J. McAtee, sec.-treas., 27 E. Boone Ave., Spokane, Wash.,
 or P. J. Bonner, supt., Silvertown, B. C.

Inc. in Washington. Cap. \$150,000; par 10c.

Property: near Silvertown, in Slocan mining division, adjoins Standard Silver Lead property.

Development: by tunnels. Main ore shoot said to be 8' in width. Late in 1918, company is reported to have arranged for a lease of the Standard Silver Lead Co.'s mill during part of each month, and in May, 1919, the output was at the rate of 4 carloads silver-lead concentrates, and 3 carloads zinc concentrates monthly. Total shipments in 1919 to Trail were 500 tons.

EDEN & CRESCENT MINING CO. BRITISH COLUMBIA
 Address: 1405 Old Natl. Bldg., Spokane, Wash. Mine address: Coffee Creek Landing, near Ainsworth, B. C.

Officers: A. L. White, pres.; W. J. Nichols, v. p.; E. B. McBride, sec.-treas., with W. Y. Williams, C. F. Caldwell and W. H. Button, directors, at last report.

Inc. January, 1917, in Washington. Cap. \$75,000; shares 5c par; 900,000 issued. Property: 8 claims, on Kootenay lake, near Ainsworth.

Development: by 2 shallow shafts and 800' tunnel. A crosscut opened 6' of ore assaying 30% lead and 6 oz. silver per ton. A small amount of development work is done annually.

EFANJAY GOLD MINING CO. BRITISH COLUMBIA
 Address: A. J. Grover, sec.-treas., Hyde Bldg., Spokane, Wash.

Officers: J. A. Irvine, pres.; J. L. Goodwin, v. p.

Company organized in 1916 to take over the Fawn group of claims in Sheep Creek section, Nelson division, near Salmo, and reported to show an orebody 14" wide carrying from \$21 to \$65 gold per ton.

Development: by tunnel.

Company holds also a lease on placer claims on the Tulameen river in Similkameen division, subleased in 1917 to the Placer Development Co. of America, Ltd., which in 1918 spent \$25,000 from July to December, building a dam across the Tulameen river, a spillway and flumes. Bedrock was not reached and operations have not yet been resumed.

ELLEN GROUP GOLD MINING CO. BRITISH COLUMBIA
 Address: Prince Rupert, B. C.

Property: Ellen group on Shuttle Island, Queen Charlotte division, 7 miles from Lockeport. An 8" quartz vein carrying free gold has been opened by a 65' crosscut.

ELLIS SILVER MINING CO., LTD. BRITISH COLUMBIA
 Office: 31 Wellington St., East Toronto, Ont.

Officers: in 1918.—P. W. Ellis, pres.; M. C. Ellis and R. V. Ellis, v. p.'s.
 Inc. in Ontario.

Property: the Eastmont group, about 60 acres, on Ten-mile creek, Slocan mining division. Said to show silver-lead ore, developed by tunnels on 4 levels. Mine under lease and bond to H. D. Lea & Co., shipped 50 tons in 1918 and 102 tons of ore in 1919.

EMANCIPATION MINING CO., LTD. BRITISH COLUMBIA
 Described in Vol. XIV. Property acquired by Liberator Mining Co., which sec.

EMIGRANT MINES, LTD. BRITISH COLUMBIA
 Address: J. Fagan, mgr., Yale, B. C.

Property: Emigrant mine in Yale Division, idle at last account. Ore carries gold and copper.

ENGINEER MINES BRITISH COLUMBIA
 The former owner, Capt. James Alexander, was lost in the S. S. Princess Sophia disaster, October, 1918. J. A. Fraser, Gold Commissioner, Atlin, B.

C., custodian for the Alexander heirs, the Allan I. Smith Estate of Philadelphia. Reginald Brook, mgr., Gleanerville, B. C.

Claiming a 20% interest and alleging that the mine is to be sold for \$3,000,000, W. P. Grant started suit in the B. C. Supreme Court against Gold Commissioner and Mining Recorder at Atlin. The suit was dismissed in Oct., 1920. The Engineer Mining Co., which owned the mine, but allowed the claims to lapse in 1907, before the present owners staked the claims, started action to establish their title to the property, on the ground of "Fraud". The case was decided in favor of the Alexander heirs in October, 1921, but an appeal has been taken.

Property: 11 claims, on east side of Taku arm, and 25 miles from Atlin, shows quartz veins with native gold and tellurides in shales and greywackes. Deposits range from simple veins a few inches in thickness to compound veins over 200' thick. Two large central veins of the latter type are "hubs" from which several veins radiate. "Hub A" is 200' wide and over 300' long; "Hub B" is 270' in width.

Development: includes a great number of open-cuts, and several tunnels driven on the most promising-looking veins. Surface work has exposed about 25 veins, up to 4' in width, a few containing shoots and pockets of bonanza ore; two of these are especially rich—the boulder vein and the shaft vein. Greater part of work has been on vein "E" on which a 275' shaft has been sunk, with four levels, totalling about 1,100' of workings. All this work has been in ore. Waste broken about 10' ahead of ore, which is afterward taken down with as little shooting as possible, and sorted into 3 grades. The first grade, showing visible gold, is treated in a 5-foot ball mill; the record run of this mill was 296 oz. gold from 160 lb. of ore.

Shipments made to Tacoma smelter, 1919.

A minister of Mines report for 1918, states "there is every reason to believe that it can be developed into one of the greatest gold-producers on the Continent." Little work being done, owing to litigation over title.

ENTERPRISE (B. C.) MINES, LTD. BRITISH COLUMBIA

Address: Clarence Cunningham, Alamo, B. C. **Mine address:** Slocan City, B. C.

Property: on Enterprise Creek, Slocan City division, 8 miles northeast-erly of the City of Slocan, was first worked in 1894 and has been something of a producer.

ENTERPRISE MINING, DEV., & POWER CO. BRITISH COLUMBIA

Address: 308 Empire State Bldg., Spokane, Wash.

Officers: Chas. A. Coffin, pres.-gen. mgr.; W. V. Garrett, v. p.-mgr.; N. L. Jackson, sec.-treas., all of Spokane.

Inc. in Washington. **Cap.** \$250,000; par 10c.

Property: 7 claims, 2 Crown-granted, at Paulson, Trail Creek division, said to show three gold veins, two silver veins, and a large lead-zinc vein.

Development: by several tunnels, one 300' long. Idle.

EUREKA COPPER MINES, LTD. BRITISH COLUMBIA

Address: 507 Union Bk. Bldg., Victoria, B. C., or Nelson, B. C.

Officers: J. J. Malone, pres.; J. G. Bunyan, sec.-treas.; with J. A. Gibson, L. K. Larson, and J. J. Bunyan, of Nelson, and S. G. Campbell, Vancouver, directors.

Property: since October, 1918, under lease and bond to Inland Mng. Co. (q. v.), which has so far made two payments.

EVA MINING CO. BRITISH COLUMBIA

Former address: W. C. Bailey, sec., Nelson, B. C.

Inc. in British Columbia. **Cap.** \$1,500,000; par \$1.

Property: at Camborne, on Poole creek, Lardeau mining division. Although the mine is one of the most extensively developed properties in the district, it has been idle for several years. Developed by over 5,500' of workings, with 200,000 tons of ore blocked out; the 30,500 tons already milled showed a gross value of \$5.69 per ton.

Equipment: includes a 10-stamp mill and a compressor.

EVENING STAR MINE**BRITISH COLUMBIA**

Address: Hugh Sutherland, owner, mgr., Winnipeg, or 302 Hoover St., Nelson, B. C. Wm. Moore, supt., Slocan City, B. C.

Property: on Dayton creek, $3\frac{1}{2}$ miles E. of Slocan City. A crosscut driven from the middle of the old tunnel reported to have cut the vein, October, 1920. Shipped 49 tons of ore in 1918. Equipment being installed and buildings erected 1922, to replace those destroyed by fire.

EXPANSION GOLD MINING & MILLING CO. BRITISH COLUMBIA

Probably idle. Property near Camp McKinney, Osoyoos division, is described in Vol. XIV, of this book.

FALLS CREEK MINING CO.**BRITISH COLUMBIA**

Carl M. Mohr, mgr., Nelson, B. C., who is manager of the Suokane M. & D. Corp, also.

Inc. in Washington. **Cap.** \$1,500,000; par \$1; assessable.

Property: Beasley-Monarch group, 6 claims, near Beasley siding, 8 miles W. of Nelson, under bond and lease from Spokane M. & D. Corp. (q. v.), said to show $2\frac{1}{2}\%$ copper ore. Has a 1,500' tunnel, reaching a depth of 500'. Late in 1921, a crosscut opened 7' of ore, assaying 7% copper and \$2.50 per ton in gold, or about \$18.00.

FERGUSON MINES CO., LTD.**BRITISH COLUMBIA**

Mine address: Ferguson, B. C.

Controlled by Geo. Alexander, of London, Eng., represented by Jas. Anderson, Box 122, Kalso, B. C. Company in hands of receiver and mine leased for company's account.

Property: the Ajax, Nettie L., and Silver Cup groups in Trout Lake mining division, with over 2 miles of workings. Considerable ore was shipped 15 to 20 years ago; 550 tons ore shipped in 1912, assaying 40 oz. silver and 60% lead.

The mill was dismantled, July, 1921. Mines have been operated intermittently by lessees.

FIFE MINES, LTD.**BRITISH COLUMBIA**

Address: Rossland, B. C. Chas. Dempster, gen. mgr.

Property: the Hattie Brown claim at Rossland and the Dykehead, Ben Hur, Three Bells, and Fife claims at Fife, near Christina lake, 12 miles E. of Grand Forks, Boundary district, B. C. Claims show vein up to 30' in width, carrying about 6' of smelting ore, with balance of concentrating grade, developed by a glory hole, an 80' shaft and a main tunnel having a 235' winze.

Ore: contains chalcopryrite, carrying gold and silver values, claimed to average 3 to 6% copper and \$4 to \$8 gold per ton.

Equipment: includes necessary mine buildings and a 5-drill air compressor. Property considered promising. Idle.

FIRE VALLEY GOLD MINING CO.**BRITISH COLUMBIA**

Probably dead. Described in Volume XIV.

FISHER MAIDEN MINING CO.**BRITISH COLUMBIA**

Officers: J. L. Prickett, pres.; Wm. Huntley, v. p.; H. S. Stoolfire, sec. & treas., Sherwood Bldg., Spokane, Wash., with John O'Connor, directors.

Cap. 1,500,000 shares; 10c. par; 1,000,000 issued.

Property: the Fisher Maiden group, 7 miles from Silverton, Slocan division, reported sold to Barney Crilley and J. J. Malone, on a 3-year bond and lease, 1917. Claims said to carry silver, lead, and zinc.

No recent information, probably idle.

FLINT MINING CO., LTD.**BRITISH COLUMBIA**

Controlled by **Index Mng. Co.**, which see.

Address: E. J. Edwards, Kaslo, B. C.

Property: Flint mine, on S. fork of Kaslo creek, in Ainsworth division, W. Kootenay district. Company was developing in 1919; no information since.

FLORENCE SILVER MINING CO., LTD. BRITISH COLUMBIA

Offices: 517 Hutton Bldg., Spokane, Wash., and Ainsworth, B. C.

Officers: F. R. Wolfe, pres. and gen. mgr.; A. F. Kelly, v. p.; D. E. Saunders, sec.-treas., with J. A. Lavender, and A. M. Frost, directors. R. H. Hewer, gen. supt.; J. H. Noble, mill supt.

Inc. July 1, 1911, in Washington, and in November, 1917, in British Columbia. **Cap.** \$1,250,000; \$1 par. Stock transferred at company office, Spokane.

Dividends: in March, 1919, initial dividend, 1½¢ a share, \$17,650; 3¢ in 1919; none since. Total is \$34,726.

Property: 8 claims, Crown-granted, 370 acres, 2 miles N. of Ainsworth. Claims on the west side of Lake Kootenay, extend west from shore about 2 miles.

Ore: lead, zinc and silver in E. W. fissure veins and replacement deposits in quartzite and slate. Three ore-shoots have been developed, one said to have over 400' of commercial ore. Milling ore said to contain 7.4% lead, 7% zinc, 11% iron, and 2.5 oz. silver.

Development: the main working tunnel (N.-S.) is 3,600' long. It is connected by raises with No. 2 tunnel, 360' above; the latter is 2,400' long and has over 10,000' of workings at average depth of 700'. No. 3 and 4 levels have about 700' of workings. Company states that it has 600,000 tons of ore blocked out that average 14% lead, 10% zinc, and 4 oz. silver.

Equipment: includes 250-h. p. compressor, 350-h. p. hydro-electric plant, and 1,800' aerial tram from No. 3 tunnel to the mill. The 300-ton concentrating mill on the shore of Kootenay lake was completed May 1, 1917. Water power is developed at Woodberry creek, under 350' head. A 500' surface tram runs from tunnel portal to terminus of an 1,800' aerial tram that runs to the mill. A 40-h. p. gasoline motor hauls ore in 10-car trains.

Production: 1,800 tons of concentrate in 1920, valued at about \$70 per ton net at smelter. Labor trouble and low price of lead affected the 1920 output. Toward end of 1921, shipments averaged 69.8% lead and 14 oz. silver per ton.

FORT STEELE OPERATING CO. BRITISH COLUMBIA

Address: care Carl Compe, Detroit, Mich., or Fort Steele, B. C.

Is the operating company for **Victor Silver Leaf Mng. Co.**, which see.

FORTY-NINE MINING CO., LTD. (THE) BRITISH COLUMBIA

A subsidiary of the Alaska-British Columbia Metals Co., which see.

Offices: 730 Rogers Bldg., Vancouver, B. C., and 135 Broadway, New York. Harry Howsen, mgr., Stewart, B. C.

Officers: S. I. Silverman, pres.; H. B. Price, v. p., 227 Pemberton Block, Victoria, B. C.; Silas P. Silverman, sec.-treas., 701 Rogers Bldg., Vancouver, B. C., with C. F. Caldwell and O. B. Bush, directors.

Inc. March, 1919, in British Columbia. **Cap.** \$1,500,000; par \$1; outstanding 100,000 shares. Registrar and transfer agent, U. S. Corporation Co., New York City. Listed on New York Curb. Sales \$5 high, \$1 low, 1919.

Property: 7 claims and 2 fractions, Crown-granted, on W. slope of Mt. Dillworth, in Salmon River section, Portland Canal division, 20 miles N. E. of Stewart, B. C., or Hyder, Alaska. There are 2 parallel veins, the larger of which is 30' wide and said to average 21 oz. silver and \$20 gold.

Development: by opencuts and 2 tunnels, with a total of 400' of underground workings. See Vol. XIV for earlier work.

Work was continued during 1920, but was suspended in 1921, to await completion of roads and adjustment of labor trouble.

GABBRO COPPER MINES, LTD. BRITISH COLUMBIA

Address: Geo. E. Winkler, pres.-mgr., Box 1460, or 420 Sayward Bldg., Victoria, B. C. **Mine office:** Jordan River, B. C.

Property: on west coast of Vancouver island, in Jordan River section of New Westminster division, adjoins the Sunloch, is said to have good surface showings.

GALENA MINING & MILLING CO. BRITISH COLUMBIA

Address: J. B. Clark, sec., 1519 - 9th St., Spokane, Wash., or 542 First Ave. So., Seattle, Wash. **Mine address:** Silverton, B. C.

Company was formed to take over the Galena silver-lead-zinc mine in the Silverton section, Slocan division. The estate of the late Patrick Clark of Spokane holds 75% of the stock, and the A. W. McCune interests in Salt Lake City hold the remainder.

Development: exploration opened up orebody said to be 11 to 14' wide, as disclosed in raises 150' apart on the intermediate level. Ore said to be worth about \$20 a ton.

Equipment: includes a 150-ton concentrator, with daily output of 35 tons concentrate. Recovery is 90% lead on tables and 80% zinc by flotation. Rolls and Huntington mills do the crushing.

Leased to James Casey early in 1919, but now closed down.

GAMBLE MINING CO., LTD. BRITISH COLUMBIA

Address: Main St., Kimberly, B. C.; H. S. Gamble, pres.; N. W. Burdett, sec.; R. E. Beattie, mgr., Cranbrook, B. C.

Property: placer claims on Wildhorse creek in the Fort Steele mining division, E. Kootenay district. A monitor was operated during the summers of 1919, 1920 and 1921.

GENERAL MINING, MILLING & LEASING CO. B. C.

No recent information; probably idle. Described in Volume XIV, which see.

GEORGIA RIVER MINING CO., LTD. BRITISH COLUMBIA

C. H. Dickie, Duncan, B. C., chief owner.

Property: an option on 8 claims on Georgia River, Salmon River section, Portland Canal division, 17 miles from Stewart, shows free milling gold ore, said to run \$100 per ton. Ore occurs in a 20' quartz vein running E.-W. and an 18" fissure vein having a N.-S. course.

Development: by 700' tunnel and 40' winze. Considerable work planned for 1921.

GIBSON MINING CO., LTD. BRITISH COLUMBIA

Jas. H. Doyle, Nelson, B. C., liquidator.

Address: King George Hotel, Kaslo, B. C., or D. K. May, mgr., 226 Rookery Bldg., Spokane, Wash.

Officers: F. E. Archer, pres.; S. C. Warr, v. p.; E. H. Latham, sec.-treas., with D. P. Cosgriff and W. H. Phillips, directors.

Cap. \$2,000,000; par 10c, outstanding July 1, 1921, 1,421,963 shares issued.

Annual report, year ended July 1, 1919, shows: receipts from stock sales, \$82,152; from ore sales, \$803; accounts payable, \$16,930; total expenditures, \$112,092.

Property: 7 claims, 260 acres, on So. Fork of Kaslo creek, Ainsworth division, 12 miles W. of Kaslo, and 7 miles from Zwicky on the C. P. R. R. Sulphide ore occurs as a contact deposit in schist and slate. Pay shoots from 40-120' long said to average 12% lead, 16% zinc and 9 oz. silver.

Development: by 4,000' of tunnels on two veins to depth of 700'. Present company shipped 21¼ tons in 1918, averaging \$45 per ton. Idle since July, 1919, owing to litigation. Further development considered necessary to prove value of the property.

GLACIER CREEK MINING CO., LTD. BRITISH COLUMBIA

Probably dead. Property in Portland Canal region is described in Volume XIV.

'GLENER MNG. & MLG. CO. BRITISH COLUMBIA

Address: Gleanerville, Atlin, B. C.

Property: 3 and a fraction claims in Taku Arm section, Atlin division, adjoining the Engineer mine on E., shows 5 quartz veins carrying native gold and pyrite. Idle in 1920.

GLENORA MINING CO.**BRITISH COLUMBIA**

Subsidiary of **Alaska British Columbia Metals Co.**, Alaska Bldg., Seattle, Wash.

Cap. 600,000 shares of which A. B. C. Metals owns, or controls 300,000 shares of 500,000 issued.

Property: the Carson Coulter group, 150 acres, at Glenora, on the Stikine river, Stikine division, not far from holdings of Stikine Mng. Co., covers 4,500' on strike of vein. The ore carries pyrrhotite and chalcopyrite and is said to have assayed 8% copper and \$4 in gold and silver per ton at the surface. Idle for a number of years.

GOLD CURE MINING CO.**BRITISH COLUMBIA**

Officers: Chas. F. Caldwell, pres., Kaslo, B. C.; J. F. Blake, v. p.; Clarence Marsh, sec.-treas., 314 Dalton St., Spokane, Wash., with A. G. Copeland, directors.

Inc. in 1917, in British Columbia.

Property: 7 claims on South fork of Kaslo creek, Ainsworth division, said to show several veins of silver-lead ore from which high grade ore was shipped in the early days.

Development: by tunnels. No recent report, presumably idle.

GOLDEN CANYON GOLD & SILVER MNG. CO., LTD.**B. C.**

Officers: W. J. McMillan, pres.; Peter Hamilton, v. p.; with R. J. McMillan, all of Vancouver.

Property: in Slocan region, said to show ore assaying as high as 60% antimony.

Development: several hundred feet of tunnels. Shipments total 100 tons. No recent information; probably idle.

GOLDEN GRANT MINES, LTD.**BRITISH COLUMBIA**

Address: A. Martin, sec., 305 Pemberton Bldg., Victoria, B. C. **Mine address:** Cardon Landing, B. C.

Property: Giant mine at Spillimacheen, Golden division, E. Kootenay district, is reported to have a considerable amount of low grade silver-lead-zinc ore in sight. Idle 1919-'20.

GORDON BAY MINES, LTD.**BRITISH COLUMBIA**

Idle.

Property: the Blue Grouse group on Cowichan lake, New Westminster division, was operated by Cons. M. & S. Co., and some 4 to 5% ore mined. Option was relinquished in 1919.

GRANBY CONS. M. S. and P. CO., LTD.**BRITISH COLUMBIA**

Offices: 718 Granville St., Vancouver, B. C., and 25 Broad St., New York. Mines at Hidden Creek, B. C., and Valdez, Alaska; and other places in B. C. and Alaska. Smelter at Anyox, B. C.

Officers: W. H. Nichols, pres.; J. T. Crabs, W. H. Robinson, and Edwin Thorne, v. p.'s; Henry Bruere, B. Hochschild, W. A. Paine, J. B. F. Herreshoff, E. P. Earle, R. P. Butchart and Chas. Hayden, directors. Edward Everett, sec.; H. Harvey, asst. sec.; Valentine Quinn, treas.; L. R. Thomas, asst. treas.; H. S. Munroe, gen. mgr.; J. A. Bancroft, asst. gen. mgr.

Inc. March 29, 1901, by special act of the British Columbia Parliament. Cap., originally \$15,000,000; shares \$10 par; changed, 1906, to \$100 par, increased to \$20,000,000 in February, 1914, to provide for conversion of bonds; \$15,000,420 outstanding. **Bonds:** authorized February 25, 1913, \$5,000,000, first mortgage, 6%, 15-year, convertible at par; June 30, 1919, \$1,799,800; series A, of which \$931,900 are stamped bonds; dated May 1, 1913. Series A bonds are convertible until May 1, 1923, at holders' option, into stock at par with cash adjustment of accrued interest and current dividend. Bonds of general issue redeemable at 105 plus interest after 10 years. 4% to be retired by purchase at \$110, annually; outstanding, Dec. 31, 1920, \$1,503,400. Capital increased to \$25,000,000 in February, 1920, also bonds increased by \$2,500,000, 8%, underwritten by Hayden, Stone & Co. Shares listed on New York and Boston Stock exchanges. Range of shares during 1920

was \$55½ high and \$15¼ low, with total sales of 36,056 in New York; in 1921 range was \$31¼ to \$15 with sales of 40,250.

Boston Safe Deposit & Trust Co., and Lincoln Trust Co., New York, registrars; American Trust Co., Boston, and Title Guarantee & Trust Co., New York, transfer agents; registrar of bonds, Title Guarantee & Trust Co., New York; trustee of bonds, Columbia Trust Co. and Central Union Trust Co., New York. Annual meeting, first Tuesday in May.

Company was organized to purchase the property and assets of the old Ironsides Mining Co., Knob Hill Gold Mining Co., Ltd., Gray Eagle Gold Mining Co., Ltd., Granby Consolidated Mining & Smelting Co., Ltd., and the Grand Forks Water & Light Co., at an aggregate cost of \$12,097,030. Stock to the amount of \$1,402,970 was issued for cash and services rendered.

Comparative General Balance Sheet, years ending June 30 to 1919, then Dec. 31:

Year	Assets.				Total
	Prop. and Equipment	Investments	Supplies Accts. Rec.	Cash, Ore and Metals	
1920	\$18,312,336	\$1,070,169	\$2,308,498	\$3,219,357	\$24,906,360
1919	17,597,917	743,370	5,608,312	83,774*	24,033,374

None paid in 1920 and 1921.

Property: includes original Granby group at Phoenix in the Boundary district, B. C.; the Hidden Creek mine on Granby bay, Observatory inlet, B. C.; Copper Key and Belcher groups at Belcher mountain, Wash.; the Oversight group; the Bonanza Creek mine; 30 quartz claims on Granby Penin-

sula; Mamie and Dean mines on the Kasaan Peninsula; the Midas mine at Valdez, and the It mine adjoining the Dean on Prince of Wales island.

In the Portland Canal district is the limestone quarry, which supplied 41,000 tons in 1919.

Company also owns a large interest in a coal mine and coking plant at Crows Nest Pass, and a 100,000-h. p. water power site at Kettle Falls. The smelter at Grand Forks, operated since 1901, was closed down June 20, 1919. Company also owns the Cassidy coal mine of over 800 acres at Nanaimo, on Vancouver island, 70 miles N. of Victoria.

The Phoenix Mines

The Granby or Knob Hill properties at Phoenix, B. C., 43 claims and fractions, 1,050 acres. Mining operations were stopped June 14, 1919, and plant completely dismantled by end of 1920. The mines still show 2,513,636 tons of low grade ore, of which amount about 500,000 tons is available. The geology and development are described in Vols. XIII and XIV.

Grand Forks Smelter: blown out in 1919 and by end of 1920 was being dismantled. Plant is described in Vol. XIII.

Hidden Creek or Anyox Mines.

Address: E. E. Campbell, supt., Hidden Creek, B. C.

The Hidden Creek mine is located on Granby (formerly Goose) bay, Observatory inlet, south of and parallel to Portland canal. It is probably the largest copper mine of British Columbia. The 9 claims cover the top and sides of a hill 920' high, enclosed by 2 branches of Hidden creek and 2 miles from Anyox, the smelter site and seaport town of the company.

Geology: the ore occurs as a mass of solid sulphides, pyrite and chalcopyrite, or mixed with country rock in shear zones, in crushed and schistose argillite. The rocks are folded and mashed but are part of the cover of the great granite mass forming the Coast range. There are 2 deposits, one 25 to 40' wide, traced 1,400', the other estimated to be 100' wide and of unknown length. Development by diamond drill holes shows the ore to extend 500' below sea-level, a vertical distance of 1,450' below outcrop.

Development: by tunnels, and shaft totaling 45,000'. Diamond drilling totals 109,805'. During 1920, development of all kinds was confined to a minimum, resulting in decrease of ore reserves.

Production: in 1921, amounted to 914,000 tons as compared with 807,083 tons in 1920. Reserves on Dec. 31 estimated to be 10,986,420 tons high grade and 10,339,085 tons low grade ore. Plans are underway to construct a concentrating plant to treat both the low grade and certain ores which are two siliceous for economical pyritic smelting.

Alaskan Mines

Operations were suspended in 1918 due to shortage of transportation facilities and mines have since remained idle because of general economic conditions. Ore shipments, however, continued into 1919. The Midas mine at Valdez has reserves of 140,138 tons of ore; grade is not given, but 1917 shipments averaged 3.24% copper, 0.476 oz. gold and 0.32 oz. silver. The last shipments from the Mamie and It mines averaged 1.90% and 4.89% copper, respectively.

Anyox Smelter: this is the company's headquarters and chief plant. There are 4 furnaces, 54" wide and 30' long, making it the largest pyritic smelter in the world, treating about 3,000 tons daily. Company has laid out a town, installed water works, electric plant, graded streets, built stores, hospitals, etc. To supply fuel for the smelter, coal is brought from Vancouver Island and made into coke at Anyox, in a plant completed in 1919. By-products are saved. The works were described in "The Canadian Mining Journal" of November 26, 1919; also in the Annual Report of the Minister of Mines of British Columbia for 1919.

In 1920, the plant treated 796,150 tons of ore, of which 47,070 came from outside sources.

During 1921 there were 930 men employed at Anyox.

Production: for years ending June 30, to 1919; then Dec. 31, except 1916, which is for nine months ending March 31.

Year	Tons (a) Ore	M'ng Cost	Sm. Per ton	Total	per ton l.b. Cu.	lb. Copper	Silver Oz.	Gold Oz.	Cost Cu. cents (b)

Custom ore is not included in the figures after 1917.

(a) In 1916, custom ore amounted to 1½% of total ore treated.

(b) After crediting gold and silver. (c) Estimated.

(d) July to December inclusive. (e) Includes custom ores.

Granby is a great and well managed company. Expenditures in recent years on equipment exceed \$5,000,000. Operations in 1920 were confined to Anyox and the supply of coal and coke. Company's surplus will probably show a further reduction for the year 1921, and additional funds may have to be found to carry the comparatively recent capital investment and to tide it over the present economic depression.

GREAT CARIBOO GOLD CO.

BRITISH COLUMBIA

See Lightning Ck. Gold Gravels & Dr'n'ge Co.

GREAT OHIO COPPER MINE

BRITISH COLUMBIA

Sargent & Munro, owners, New Hazelton, B. C.

Property: adjoins the Butte Rocher De Boule mine and is operated by Jennings and Trimble, under lease and bond. A well defined fissure vein in granodiorite, traceable at surface for 700', carries an orebody 4' wide, giving assays of 22.5% lead, 9.5% copper, 134 oz. silver, 8.6% zinc and 0.04 oz. gold.

Development: by 355' tunnel, open cuts and drifts. Ore occurrence and conditions are similar to those in the Rocher De Boule, but further development necessary to determine value of mine. No recent information.

GRIBBELL ISLAND COPPER CO.

BRITISH COLUMBIA

Office: 203 First National Bank Bldg., Bellingham, Wash. Mine at Gribbell Island, Skeena division, Cassiar district. Idle since 1906, owing to lack of funds. Fully described, Vol. XI, Copper Handbook.

GUINDON MNG. & MLG. CO.

BRITISH COLUMBIA

Address: care Frank Guindon, Moyie, B. C.

Property: at Moyie lake, Fort Steele division, E. Kootenay district. Ore is silver-lead.

HARRIS MINES, LTD.

BRITISH COLUMBIA

Address: W. A. Harris, New Hazelton, B. C.

Property: American Boy mine on 9-mile Mtn., Omineca division, 5 miles N. of New Hazelton. Ore occurs in fissure veins, 6"-3' wide, in tuffaceous sediments, containing galena, sphalerite and tetrahedrite in a siliceous gangue.

HEDLEY GOLD MINING CO., LTD.

BRITISH COLUMBIA

A Canadian re-incorporation, 1918, of the Hedley Gold Mng. Co.

Offices: 25 Broadway, New York; and Hedley, B. C.

Officers: I. L. Merrill, pres.; W. B. Dickson, v. p.; J. D. Clarke, sec-treas., with W. D. Thornton, E. C. Congdon, G. E. Tener, G. P. Jones, Geo. G. McMurty, Marcus Daly, and W. E. Corey, directors. G. P. Jones, gen. supt., Hedley, B. C.

Inc. 1913, in British Columbia, as successor to the Yale Mining Co. Cap., \$2,400,000; shares \$10 par; all issued. Guaranty Trust Co., New York, transfer agent; Mechanics & Metals Nat. Bank, New York, registrar. An-

annual meeting, second Wednesday in April, at Hedley, B. C. Listed on New York Curb.

Comparative Statement of Income Account:

Year	Rec. at Mill	Expenditures	Profits(a)	Dividends	Surplus	Erngs. on Cap. Stock
1920	\$324,985	\$326,926	(b)\$1,940	\$6,379

			Total		\$2,484,000

In September, 1919, quarterly dividend was passed to conserve surplus for development. None in 1920 and 1921.

Property: the Nickel Plate and Sunnyside mine, 31 claims Crown-granted, and mill site, 1,370 acres in all, on Nickel Plate Mountain, and in Similkameen Valley, Osoyoos mining division, Boundary district, Hedley, B. C. Also owns the Copper Flat property near Silver City, N. M.

Geology: the Hedley ore deposits are of contact metamorphic origin, and occur at contact of dikes and sheets of gabbro in altered limestone; they are irregular in outline, usually have a well-defined boundary on the side of the gabbro, and dip about 24°. Ore occurs in shoots. Nickel Plate shoot is 150' wide, 40' thick, and 1,500' long. Principal ore mineral is arsenopyrite, with which occurs chalcopyrite, pyrrhotite, sphalerite, pyrite, gold and sometimes tetradymite; the valuable content of the ore is gold alone. In the association of gold with arsenopyrite in deposits of this origin the Nickel Plate ore deposits are unique and have no known counterpart in North America, excepting perhaps the White Caps at Manhattan, Nevada.

Development: 2 tunnels, 900' and 1,160' long and a 35° incline shaft, 1,000' deep. Greatest depth of workings are at 5,200' elevation, 670' below the outcrop. Shrinkage stoping is used, and no timbering required. New work in 1920 amounted to 690' and 2,210' of diamond drilling. Management plans to spend \$35,000 in additional drilling and development work.

Reserves: Jan. 1, 1920, were 100,000 tons of \$9.15 ore, 95,000 tons of \$7 ore and 70,000 tons of \$6 ore. The 900' level has the highest grade ore, and which is said to extend lower so that deeper development will give im-

creased reserves. On account of high prices the mill was closed during winter (1919-20); and development work only carried on.

Ore is transported from the mines to the mill at Hedley by means of electric and gravity tramways. The former is 1 mile long, while the 45° gravity tram is 10,000' long, with a 4,000' drop.

Equipment: includes an air hoist, two compressors, each of 2,000 cu. ft. capacity and driven by 440 h. p. motors; also a 200-ton 40-stamp mill equipped with 24 Frue vanners and 12 Deister tables.

Electric power supplied by company's hydro-electric plant on the Similkameen river, with 2,100 h. p. twin turbines. Powerhouse has a 1,250 k. v. a. alternating current generator. Total cost of plant, \$192,009, charged to capital account.

Recent production:

	Ore Tons	Ave. Assay	Gold Rec.	% Rec.

1912.....	70,455	11.19	748,133

* Including sale of arsenic to Tacoma Smelting Co., recovered in concentrates.

Conditions in the lower levels of the mine have changed considerably during the past four years. While the orebodies are larger and stronger and maintain practically the same grade, the specific gravity has increased due to an increase in arsenopyrite, which adds to the cost per ton of ore milled. Concentrate tonnage rose from 3,831 tons in 1913 to 6,218 tons in 1915, and to offset this increase in costs the company installed a cyanide plant. War conditions during 1918 prevented extensive development and not enough new ore was opened to replace the amount milled. Hedley is a good property well managed.

The mine was operated from March to October, 1920, and was to be reopened July, 1921.

HELLSGATE MNG. CO., LTD.

BRITISH COLUMBIA

Address: Ashcroft, B. C.

Property a: number of claims in Thompson river valley, Ashcroft division, near Spence's Bridge, shows gold-bearing alluvial deposits.

HERCULES MINES, LTD.

BRITISH COLUMBIA

Address: F. M. McLeod, mgr., 803 Dominion Bank Bldg., Vancouver, B. C., and R. G. E. Deckie, supt., Canada Life Bld., Vancouver, B. C.

Officers: F. M. McLeod, pres.-sec.; Albert T. Craig, v. p.-treas.; with R. G. Ed. Leckie and Wellington Beaton, directors.

Inc. 1909, in British Columbia. **Cap.** \$1,000,000; \$1 par; 598,751 shares outstanding.

Property: 3 patented claims, 157 acres at head of Salmon river, Portland Canal division, 13 miles N. of Stewart. The outcrop has been traced for 2,000'. In 1910, a vein from 5 to 30' wide was found in greenstone-schist. The ore carries galena, chalcopyrite, gold and silver. Work to be resumed, 1922. A prospect.

HEWITT-LORNA DOONE MINES

BRITISH COLUMBIA

Address: R. Insinger, owner, P. O. Box 2,181, Spokane, Wash.

Property: 12 Crown-granted claims, 1,200 acres timber, and a 125-ton flotation mill, located at Silverton, in Slovan division. Ore is lead-zinc.

Development: by tunnels to depth of 1,200'. Some development work done in 1918-19, under lease, by Clarence Cunningham. In a suit brought

against Cunningham for non-fulfillment of contract, Insinger was awarded a sum equal to the amount of development work agreed upon but not completed by the defendant. The property is closed down.

HIGHLAND VALLEY MINING & DEVELOPMENT CO. B. C.

Fully described in Vol. XIV. Company reorganized in 1921 as **Ashcroft Copper Co., Ltd.**, which see.

HOBSON SILVER LEAD CO.

BRITISH COLUMBIA

Address: C. H. Harvey, Paulsen Bldg., Spokane Wash., and Ymir, B. C.

Officers: George T. Reynolds, pres.; W. L. McEachren, v. p.; W. B. Ward, Jr., sec.-treas., Fort Worth, Texas; C. H. Harvey, asst. sec. and treas.; preceding with J. C. Buchanan, F. R. Monfort and W. A. Buchanan, directors.

Inc. 1911, in Washington. **Cap.** \$1,500,000; \$1 par: outstanding 1,286,571. Stock transferred at company's office. Annual meeting in January.

Property: Yankee Girl mine, 3 claims and 2 fractions, patented, 126 acres, on Dundee Mtn. at Ymir, Nelson division, said to show lead-zinc ore in fissure deposits in tongues of granodiorite, which extend into schist; strike N. E.-S. W.; dip 60°. Ore is said to assay \$20 gold, 6.5 oz. silver and 5.5% lead per ton. The main vein, the Yankee Girl, drifted on for 3,000' in No. 4 tunnel, is 5' to 12' wide and shows 2 ore shoots, 50' and 300' long respectively.

Development: 4 tunnels. No. 1, 1,600' long; No. 2, 2,400' long and 400' below the surface; No. 3, 400' long and 175' below No. 2; No. 4, 4,300' long and 600' below No. 2, is driven in the footwall and for the first 1,160' nearly parallels the vein. The Yukon vein is probably same as main vein. Estimated to have 35,000 tons of probable ore. Total underground workings over 10,000'.

Equipment: includes 2 air compressors and a 6,000' tramway.

In 1918, shipments amounted to 8,847 tons ore, most of it going to the Canada Copper Corp.

Holdings were taken over in 1920 by **Texas Yankee Girl Mng. Co., Ltd.**, which see.

HOPP MINES (JOHN HOPP & CO.)

BRITISH COLUMBIA

Address: M. Bailey, mgr., Barkerville, B. C., or John Hopp, 1617 4th Ave., W., Seattle, Wash.

Property: 3 hydraulic mines on Lowhee and Mosquito creeks, near Barkerville, Cariboo division. That on Lowhee is the most important producer. The season of 1921 is reported to have brought fair returns.

HORN SILVER MINES PARTNERSHIP

BRITISH COLUMBIA

Address: E. W. Condit, mgr., 906 Vancouver Bl., Victoria, or Similkameen, B. C.

Property: Horn Silver mine in Similkameen division, developed by 2,000' of workings. Ore occurs in a vein said to be from 18' to 6' wide, with gold-silver values. Development work underway since 1919, the returns from shipments paying all expenses.

Production: about 1,000 tons of 40 oz. silver ore per year.

HOWE SOUND CO.

BRITISH COLUMBIA

New York office: 665 Fifth Ave. **Mine office:** Britannia Beach, B. C.

Officers: Evander B. Schley, pres.; W. H. Gelshenen, v. p.; W. J. Quigly, v. p., with H. M. Hanna, Jr., G. H. Howard, C. E. Dunlap, Reeve Schley, Chas. G. Raynor, and K. B. Schley, directors. W. J. Walworth, v. p.-sec.; Emil Richter, asst. sec.-treas.; E. B. Schley, chairman executive committee; C. P. Browning, mine supt.

W. J. Quigly, gen. mgr., El Paso, Tex., A. L. Eaton, gen. mgr., at El Potosi property.

Inc. Aug. 22, 1903, in Maine. **Cap.** \$3,000,000; \$1 par; 1,984,150 issued. Bankers Trust Co., New York, transfer agent. Chase National Bank, New York, registrar. **Bonds:** \$4,304,000, 20-year, 6%. There was authorized and

issued \$5,380,000 to acquire El Potosi M. Co. Of this, \$1,076,000 has been retired by sinking fund.

On Jan. 3, 1918, a voting trust agreement to terminate Jan. 3, 1923, or earlier, was entered into by holders of a majority of the capital stock and the voting trustees. To Dec. 31, 1919, 1,662,282 shares had been exchanged for Voting Trust Certificates that are listed on the N. Y. Curb. Shares sold in 1920, high 4½, low 2¼; in 1921 (July), high 2¾, low 2, on N. Y. Curb.

Dividends: 15c in 1918; 20c in 1919; 20c in 1920; 5c in 1921. Total, \$1,190,490.

Company owns the entire stock issue of the Britannia Mining and Smelting Co., Ltd., which in turn owns the Britannia Power Co. and the Howe Sound Power Co. Howe Sound also owns 53,800 shares of the total issue of the El Potosi Mining Co., which, in turn, owns a large majority of the stock of the Chihuahua Mining Co.

In 1920, company acquired 172,857 shares, \$1 par. of the Calera Mng. Co., a New Jersey corporation, owning property in Chihuahua, Mexico.

Britannia Mining & Smelting Co., Ltd.

Inc. in British Columbia. Cap. \$2,500,000; \$25 par; \$2,299,150 issued.

Property: holdings at end of 1920 were 515 Crown-granted mineral claims and 17 beach lots of 23,943 acres; 31 mineral claims of 1,450 acres 10 timber licenses of 5,599 acres; a total of 30,992 acres. During the year 1918

\$113,605 was spent for new property in prospecting, surveying, Crown granting, etc. The Britannia mine is subdivided into four divisions, known as the Fairview, Bluff, Jane, and Empress, all connected by underground workings. Company has also some claims 12 miles E. of Britannia Beach, on which \$75,000 was spent in 1919.

Geology: the orebodies consist of a series of roughly parallel lenses of chalcopryrite and pyrite in schist, and large masses of silicious material through which chalcopryrite and pyrite are irregularly disseminated. All the orebodies developed thus far are confined to about 100 acres, the remainder of the company's holdings being undeveloped.

Development: by a main adit, 13'x9' and 4,712' long, crosscutting the mineralized zones at an elevation of 2,150' above the sea, on what is called the 2,200' level. The present productive workings are all above this main gathering and haulage way, connection being made by a blind main shaft with the 1,000' level on No. 1 vein, 3,900' from the adit portal, and by 2 raises, one reaching to the 1,000' level on No. 1 vein and the other (No. 68) to the 850' level on No. 3 vein. These raises are used for conveying ore from the upper workings, the latter, the more important, connecting with all levels between 850' and 2,200'.

Glory holes covering about 10 acres at the surface extend to the 250' level, from where ore is conveyed by winze to the 1,800' level and then transferred to raise No. 68.

Eventually mine will be operated from a main adit at the 4,100' level which will transport the ore direct to the mill; this adit was in about 4,000', April, 1921 and an upraise to reach the 2,700' level is being driven.

Workings aggregate about 40 miles. Little advance was made in the first half of 1920 and total for the year was 7,078' only; in addition there was 5,446' of drilling, of which 2,130' was done on the Victoria, a less well developed section of the property. The indications are that this section will add an entirely new tonnage to the ore reserves.

Ore Reserves: at end of 1920 were 4,951,510 tons, averaging 1.9% copper as compared with 5,298,555 tons in 1919. Broken reserves were 1,687,156, showing a decrease of 175,040 tons from those of 1919.

Equipment at the shaft includes a double-drum electric hoist on the 1,050' level and a Gates crusher in the rock-raise between the 1,050' and 2,200' levels, placed on the 1,800' level and run by a 75-h. p. motor. This raise, 200' east of and connected with the shaft, serves as a storage bin for ore, with capacity of 4,000 tons above the 1,800' level and 2,000 tons below the 1,800' level. The raise is lined with 12" by 12" timbers. Electric motors haul the ore from the chute to the portal of the tunnel. From the portal the ore is hauled 3 miles by electric railway to head of a 33% incline, 5,500' long, vertical drop of 1,450', which leads to the bins of the concentrator at the water's edge. Other similar raises, equipped with crushers, are driven in different localities to give flexibility to the operation.

By system of dams, intakes and pipe lines, Britannia creek has been harnessed to produce over 8,000-h. p. during most of the year. Work done in 1917, to develop Furry creek produces over 2,500-h. p., which will be increased by additional installations in the future. As reserve power, there is a steam turbine plant of over 3,000 h. p. capacity located at the beach.

Equipment: includes 8 compressors, some driven by water wheels, some by steam, and some by either steam or water-generated electricity, with total capacity of nearly 20,000 cubic feet of free air per minute.

The concentrating mill at Britannia Beach was treating about 2,500 tons of ore daily, when destroyed by fire, March, 1921. A new 2,500 ton concentrating plant to cost \$1,000,000 is to be completed by mid-1922.

There are 2 townsites in connection with the company's operations, one at Britannia Beach; on the shore of Howe Sound, and the other, known as the Mine Townsite, laid out at the portal of the new tunnel. The Britt-

ania Beach settlement, destroyed 1921 by a snowslide, has been rebuilt on a new site. Shipments are made to the Tacoma smelter.

Production is as follows:

Year	Concentrate Tons	Copper Lb.	Gold Oz.	Silver Oz.	Total Value
1920.....	75,728	18,161,854	6,495	101,505	\$6,791,066
1919.....	70,099	17,330,844	4,350	99,863	6,936,069
1918.....	63,655	18,322,482	3,045	98,131 (a)	7,846,423
1917.....	57,217	16,357,329	992	91,504	7,019,815
1916.....	16,288,835	791	91,905 (a)	6,042,538
1915.....	9,058,045	397	50,306	1,616,133
1914.....	11,841,232	213	68,515	1,640,379
1913.....	13,167,000	89	72,300	2,052,188
1912.....	14,300,000	76,500	2,383,285
1911.....	8,685,000	46,000	1,074,334
1910.....	520,000	1,000	7,500	64,000

(a) includes lead and zinc values.

The Britannia proved a hard problem to handle for years, but has made money under the present management, which is thoroughly capable. A successful future seems certain, and the results are a tribute to the far-seeing judgment and persistency of Mr. E. B. Schley.

During 1921, 250 men were employed in development work which is reported to have materially increased the ore reserves.

HUDSON BAY ZINC CO., LTD.

BRITISH COLUMBIA

Fully described in Vol. XIII. W. E. Cullen, sec., Hyde Bldg., Spokane, Wash.

IDAHO-ALAMO CONS. MINES, LTD.

BRITISH COLUMBIA

Address: Clarence Cunningham, Alamo, B. C. Mine address: Sandon, B.

C.

Property: Idaho-Alamo group, on Carpenter creek, Slocan division, said to show a considerable tonnage of silver-lead-zinc milling ore which is shipped to the Alamo concentrator.

IKEDA MINES, LTD.

BRITISH COLUMBIA

Address: A. Ikeda, Ikeda Bay, Queen Charlotte Island, B. C., or S. J. Castleman, sec., 22 Imperial Bldg., Vancouver, B. C.

Inc. Sept., 1910 in British Columbia. Cap. \$850,000; shares \$1 par.

Property: the former holdings of the Awaya-Ikeda Co., Ltd., taken over for \$200,000, include 42 claims, 2,100 acres, in several groups on Ikeda bay, at the southern end of Moresby island, 3 miles from Jedway, and connected therewith by government rail and telephone. Steamer connection is had with Vancouver, 450 miles distant. The principal or Lily, group of 8 claims, 400 acres, was discovered May, 1898, by Arichka Ikeda, and developed by him until taken over by the present company, September, 1910.

Geology: the group shows limestone and slate cut by dikes of greenstone and diorite, having well defined flat fissures at right angles to and between the vertical main fissures. Ore occurs in a series of veins of 2 to 8' width, the largest orebodies lying along the horizontal main fissure. The vein principally developed is of 5 to 30' width, proven for 1,000' in length and about 300' in depth. The ore shoot, up to 20' in width, carries lenses of chalcopyrite, averaging, as mined, about 2.5% copper, with a gangue of silicious country rock and occasional stringers of quartzite and limestone. The ore mined by the former owners averaged about 4% copper, 2.2 oz. silver and \$2.25 gold per ton.

Development: the Lily mine has 4 tunnels connected by winzes. No. 3 tunnel, 940' long, driven on the vein for 660', has about 5' of chalcopyrite of good average teneur and ends in a 40x50' chamber from which considerable

ore has been stoped, the ore in the chamber apparently not being the same as that followed in the tunnel, lying about 45° to the N. and found by crosscutting. Little new work was done in 1919.

Production: ore shipped to Granby smelter at Anyox:

Year	Tons	Copper, lb.	Gold oz.	Silver, oz.
1919.....	151	38,990	51	722
1918.....	358	83,384	77	987

A concentrating plant is needed to treat the lower grade ores in this mine.

INDEX MINING CO.

BRITISH COLUMBIA

Address: E. J. Edwards, mgr., 3328 9th St., Spokane, Wash., or Kaslo, B. C.

Property: the Index mine on South fork of Kaslo creek, Ainsworth division, 14 miles from Kaslo, containing veins of silver-lead ore, in a highly metamorphosed zone of sedimentaries near granite. Faulting is frequent. Company controls the Flint Mng. Co., which see.

Development: by several tunnels, one being driven to cut the vein at a depth of 300' below the upper workings.

Equipment: water-power under 250' head, compressor, etc.

Shipment of \$100 per ton ore reported in 1920.

INDIAN MINES CO., LTD.

BRITISH COLUMBIA

Address: L. W. Patmore, sec., Prince Rupert, B. C.

Property: in the Salmon River section, Portland Canal division, 10 miles N. of Stewart.

Development: by opencuts and tunnels, exposing a quartz vein from 12 to 20' wide and for a length of 2,000', that carries galena, sphalerite and pyrite.

INLAND MINING CO., LTD.

BRITISH COLUMBIA

Address: Walla Walla, Wash. **Mine office:** Granite Siding, Paulson and Nelson, B. C.

Officers: Albert Niebergal, pres.; J. F. Talabere, v. p.; Alfred Bachtold, sec.-treas.; with C. E. Nye, D. Donovan, H. Ibberson, and G. Magallon, directors. W. M. Myers, mgr.; H. D. Griswold, supt. at Paulson.

Inc. in Washington. **Cap.** \$1,500,000; shares \$1 par; non-assessable.

Property: all near Nelson, Grand Forks division, consists of the Inland gold mine, closed as being unprofitable; the Berlin gold-silver copper mine on Trail creek, under lease since 1918, to the **Griswold-Billingsley Co.**; the Eureka copper mine on Eagle creek, under option from the **Eureka Copper Mines, Ltd.**, since 1918; and the Granite-Poorman gold mine, acquired July, 1919, from the **Kootenay Gold Exploration Co.**, the latter reported under bond and lease to Bowness and Mahon, who are developing with five men.

Development: the Eureka and Granite-Poorman mines have been extensively opened by tunnels and shafts, exposing a considerable quantity of ore. A long crosscut has been driven in the Eureka to open the vein at depth.

Equipment: steam and electric power, compressors, hoists, pumps, aerial trams and 10 and 20-stamp concentrating plants with ball-mill.

Production: definite figures are not obtainable, but the Eureka has shipped several thousand tons of smelting ore, and the Granite-Poorman has been operating on and off for 30 years. Ore and concentrates are sent to the Granby smelter.

Company operations suspended for lack of funds, 1920-21.

INTERNATIONAL COPPER CO.

BRITISH COLUMBIA

Address: A. C. Garde, mng. engr., Prince Rupert, B. C.

Property: the Bald Mountain group of 32 claims, 1,600 acres, on the N. part of Porcher island, Skeena division, 20 miles by water from Prince Rupert. Several ore-zones have been disclosed by shallow workings, one showing ore carrying 4% copper, 1 oz. silver and 0.04 oz. gold. This seam

was 12" across near the surface, widening at a depth of 25' to 48" with 6.2% copper. Little has been done since 1916. Climatic and economic conditions are considered good.

INTERNATIONAL DREDGING & EXPLORATION CO., LTD. B. C.

Address: 303 Jones Bldg., Victoria, B. C., or W. E. Loveridge, mgr., Harpers Camp, B. C.

Property: placer ground on Seven Mile creek, near Quesnel, Cariboo district.

INTERNATIONAL EXPL., DEV. & INVEST. CO., LTD. B. C.

Address: 209 Sherwood Bldg., Spokane, Wash. **Mine address:** J. W. Osborne, mgr., Eholt, B. C.

Officers: T. A. Farrell, pres.; S. A. Haynes, sec.-treas., with E. T. Smith, R. L. Smith and J. W. Osborne, directors.

Cap. \$500,000; shares \$1 par.

Organized to locate, acquire and develop prospects, eventually disposing of them to operating companies. A 3-year option for \$60,000 was taken on 7 claims near Paulson, 17 miles from Grand Forks, and several claims were exploited 12 miles from Grand Forks. Idle at last account.

IRON MASK MINE BRITISH COLUMBIA

Owned by Kamloops Copper Co., which see.

IRON MOUNTAIN, LTD. BRITISH COLUMBIA

Address: John Waldbeser, mgr., or R. W. Miffin, sec., Salmo, B. C.

Property: the Jersey and Emerald mines in Sheep Creek camp, Nelson mining division. A 50-ton concentrator was completed in 1920. Shipments to Trail in 1919 amounted to 177 tons from the Emerald and 42 tons from the Jersey mine. The Emerald mine has been a shipper of lead-silver ore since 1906, with a total production of about 50,000 tons.

I. X. L. GOLD MINING CO. BRITISH COLUMBIA

Address: John S. Baker, Fidelity Trust Co., Tacoma, Wash.

Property: I. X. L. mine, adjoining the O. K. mine, and about 2½ miles W. of Rossland. Ore occurs in a fissure vein in serpentine, containing free-gold, copper, lead and iron. The mine is under 3-year lease from March 1921 to R. B. Shelledav and associates, of Rossland. A 1,700 lb. shipment of picked ore to the Trail smelter in September netted \$2,887.

JACKSON BASIN ZINC CO. BRITISH COLUMBIA

Probably liquidated as property was acquired by Utica Mines, Ltd., 1919.

JEWEL-DENERO MINES, LTD. BRITISH COLUMBIA

Secretary's office: W. Robertson, 71 George St., Edinburgh, Scotland.

Mine office: Greenwood, B. C.

Directors: J. Galloway, chairman; J. E. Rogerson and W. W. Slater. **Inc.** Nov. 22, 1912, in Edinburgh.

Cap. £70,000; shares 5s each; 279,400 shares issued. Authorized bond issue, £12,500, 8%; £11,202 issued.

Property the Jewel gold mine at Greenwood, developed to depth of 500' by shafts and crosscuts and started production in 1911. Produced 16,525 tons of ore in 1914, yielding £31,360. In 1915 only development work was done and in 1916 the mine was being operated by lessees. **Equipment:** includes a 15-stamp cyanide mill. Idle 1921-'22.

KAMLOOPS COPPER CO. BRITISH COLUMBIA

Lessee of Kamloops Mines, Ltd.

General office: 609 First National Bank Bldg., Duluth, Minn. **Mine address:** Kamloops, B. C.; E. G. Wallinder, supt.

Inc. Sept. 7, 1909, in Arizona. **Cap.** \$3,000,000; shares \$10 par, part paid, 128,561 issued, none preferred. First-mortgage bonds on Iron Mask mine amount to \$210,000; and convertible 6% notes, \$128,500.

Accounts for period of 2 years show revenue of \$337,454 of which ore sales netted \$109,330. Balance at end of September, 1916, was \$77,572. Excess of current assets over liabilities was \$33,840. No statement since.

Property: 10 claims, 2,041 acres, 228 acres mineral land, including the Iron Mask mine, 7 miles S. W. of Kamloops.

Geology: The Iron Mask shaft is sunk on a shear zone, mineralized to 20 to 30' in width, with segregations of better grade ore forming a pay-streak of variable width, carrying chalcopyrite, associated with magnetite in a chloritic gangue, containing orthoclase intercrystallized with copper sulphide. The country rock is diorite with smeary basic patches of gabbroic material. The Iron Mask orebody averaged 28' in thickness, and was lenticular in shape above the 690' level; here it was cut off by a horizontal fault. It has been found below this level by diamond-drilling from the 750' level and is being opened up. The ore is troublesome to concentrate by ordinary methods owing to its chlorite and quartz-orthoclase gangue.

The mine shows several orebodies besides the Iron Mask, all of them due to "igneous after effects," and occurring in fresh diorite, filling fissures as replacements along fissures and in patches, the ore consisting of orthoclase, chlorite, epidote and other secondary pneumatolytic minerals, with interlocked chalcopyrite, pyrite, magnetite, etc.

The Erin orebody shows excellent ore and numerous pits at various points on the property all show ore.

See Annual Report of Minister of Mines, British Columbia, 1915, for detailed description of geology, workings, etc. Examined by Walter Harvey Weed.

Development: includes the 780' Iron Mask shaft and over 18,000' of workings, on 9 levels; the 330' Erin shaft sunk on ore for 300' with 600' of drifts and crosscuts; the 50' Lucky Strike shaft and 3 other prospect shafts. Electric power is obtained from the City of Kamloops power-station. In 1917 and 1918, approximately 8,000' of diamond-drilling was done.

Equipment: includes 300-ton flotation, mill, one 150-h. p. compressor, one 225-h. p. motor for the "Iron Mask" hoist and 8 smaller motors, 6' double-drum hoist, 3 air compressors of 1,300 cu. ft. capacity, good for 15 drills, and electric-light plant and a sawmill. Transportation is by a good wagon road with steep grades, leading to the railway siding below Kamloops. The management plans a 2½-mile tram, having a drop of 1,100'. Power comes from an hydro-electric plant at Kamloops.

Idle D. Braithwaite, sec.-treas., Fairview, Boundary district, B. C.

Production: the mill was not operated to capacity during 1918, total shipments of copper concentrates amounting to 2,800 tons. Regular operations were conducted in 1919, employing 50 men. Concentrates shipped to the Tacoma smelter.

It is understood that the English corporation has extended the time for further payments on the property.

KAMLOOPS MINES, LTD.

BRITISH COLUMBIA

Office: 151 Coronation House, 4 Lloyds Ave., London, E. C., Eng. Company in hands of trustees, as property is under lease and bond to the Kamloops Copper Co.

KEYSTONE DEVELOPMENT CO., LTD.

BRITISH COLUMBIA

Address: Kaslo, B. C. **Mine address:** A. J. Harris, mgr., Zincton, B. C. Wm. Martin, pres.; W. J. Elmendorf, cons. engr.

Property: Charleston group of 6 claims in Ainsworth division, W. Kootenay district, near the Whitewater mine, developed by tunnels. The ore is silver-lead.

KING EDWARDS MINES, LTD.

BRITISH COLUMBIA

Idle D. Braithwaite, sec.-treas., Fairview, Boundary district, B. C.

Inc. 1904, in British Columbia. **Cap.** \$500,000; shares \$1 par.

Property: 10 claims, 500 acres, in the Similkameen district. Opened by 350' of workings, said to show a sulphide orebody 6 to 10' wide averaging 5% copper.

KING SOLOMON COPPER MINING CO., LTD.

B. C.

Office: 206 Penfield Bldg., Philadelphia, Pa. **Mine office:** Cowichan, British Columbia.

Officers: A. S. Anderson, pres.; Philip Singleton, v. p.; Jas. Humes, v. p.-gen mgr.; J. K. Evans, sec.; H. A. Nolte, treas., with B. L. Foster and Geo. T. Storey, directors.

Inc. July 2, 1908, in British Columbia. **Cap.** \$1,000,000; par \$1; issued 685,005 shares.

Property: 133 acres patented claims, near Cowichan, Vancouver island, includes the King Solomon, Queen of Sheba and Koksilah claims, showing two fissure veins in syenite and diorite.

Development: by 700' tunnel and two open quarries, 125 by 50' and 50 by 70'. Operations confined to small amount of development work, since 1917, pending construction of railway (C. Natl. R. R.)

Equipped with 65-h. p. steam engine, air compressor, saw-mill, houses, etc.

About 800 tons of ore shipped to Tyee smelter returned 8 to 9% copper, 1 oz. silver and small amount of gold. No production, 1917-'20.

KITCHENER MINES, LTD. BRITISH COLUMBIA

Address: R. W. Harrison, Quesnel, B. C.

Operating a placer mine on Keithley creek, Quesnel division, Cariboo district. The channel has been attacked by drifts. Reported that pay gravel should be reached in the 1922 season.

KITSALAS MOUNTAIN COPPER CO. BRITISH COLUMBIA

Address: Usk, B. C.

Officers: J. D. Wells, pres.; Jesse Brooks, v. p.; A. J. Thomson, treas. and mgr.; Usk; with S. H. Davis, and Jas. Darby, directors.

Inc. in British Columbia. **Cap.** \$500,000; par \$1.

Property: 6 claims in Omineca division, one mile from Usk, with workings but 200' above Grand Trunk R. R., shows several quartz veins opened by cuts and tunnels showing ore carrying argentiferous bornite and chalcocite, with free gold in both quartz and hornite.

Development: by 60' incline and 400' tunnel.

Equipment: includes a crusher, Gibson mill, Wilfley table, and gasoline engines. Shipments made to Tacoma smelter in 1919. Only development work done in 1920-21.

KLEANZA CO., LTD., THE BRITISH COLUMBIA

Address: John Willman, mgr., Usk, B. C.

Property: the Golden Crown claims on Kleanza Mtn., Omineca division, near Usk. Two quartz veins, stripped during 1919, showed gold and copper. The country rock is granite cut by lamprophyre dikes. Developing since 1919.

Company also engages in lumbering and sawmilling, and operates an hydro-electric plant. A concentrating mill is contemplated.

KOOTENAY BELLE GOLD MINE BRITISH COLUMBIA

Address: M. M. McCune, mgr., Sheep Creek, via Salmo, B. C.

A. W. McCune, Salt Lake City, in 1918, had a bond on this property together with the Queen Vancouver, and Alexander mining groups, in the Sheep Creek gold camp of the Nelson mining division. The Queen is credited with a past production of \$1,300,000, and the Kootenay Belle, \$100,000 in gold.

Properties had been idle several years, but new management started a 3,000' crosscut tunnel and continued development to 1920.

KOOTENAY BONANZA MINES, LTD. BRITISH COLUMBIA

Office: 901 Vancouver Block, Vancouver, B. C.

Officers: W. Finch Page, pres., London, Eng.; A. E. Rand, v. p.; R. S. Lennie, sec.-treas.; preceding with A. C. Burdick and J. A. Hendry, directors.

Inc. in British Columbia. **Cap.** \$3,000,000; shares \$5 par; outstanding, \$200,000. Company organized to take over the Silver King mine from the bondholders of the Hall Mining & Smelting Co., Ltd.; the claims of the Kootenay Development Syndicate, Ltd.; Dandy & Ollie Cons. Mines, Ltd., and of the Starlight Mines, Ltd., as well as other properties.

Silver King and Dandy groups of claims were sold to the Silver King Mines, Ltd. The company now holds 34 other claims, comprising the North Star, Great Western Starlight and Irene groups, comprising practically all the mineral area of Toad mountain, at Nelson.

Presumably idle.

KOOTENAY GOLD EXPLORATION CO. BRITISH COLUMBIA

Company defunct. Property acquired July, 1919, by Inland Mining Co., which see.

LADYSMITH SMELTING CORPORATION, LTD. B. C.

Address: F. A. Sieberlings, Goodrich Tire & Rubber Co., Akron, Ohio.

Operating office: Ladysmith, Vancouver Island, B. C. S. deWitt, sec.-treas., 2101 L. C. Smith Bldg., Seattle, Wash.

Property: 1,247 acres, including 13 claims, Crown granted 342 acres, a 45-acre smelter site and 800 acres timber lands. Owns the Ladysmith smelter, and mineral lands on Mt. Sicker, Vancouver Island, purchased from the Tyee Copper Co., in December, 1916, for \$275,000. In January, 1920, 14 additional copper claims were acquired.

The Tyee mine, on Mt. Sicker, in the Somenos district, 11 miles N. W. of Duncans, and about 80 miles from Victoria, yielded only 1,200 tons of ore in 1907, and has been idle since. The orebody was rich, but shallow, and although it was explored thoroughly, nothing of value was found.

Smelter: known as the Ladysmith works, is well located, on a 45-acre site on Oyster harbor, and treated custom ores from as far N. as Alaska and as far S. as Mexico. The smelter was remodeled and practically rebuilt 1909-1910. There is a 40x210' wharf, having an electric hoist, connected, by an elevated incline trestle, with the smelter bins, which are of 5,400 tons capacity. The works are terraced throughout, permitting handling of material by gravity, and have a capacity of 500 tons daily.

The furnace building has 42x120" and 48x160" Allis-Chalmers blast furnaces of 200 and 300 tons daily capacity, respectively.

Production: the smelter yield was 3,604,474 lb. copper in 1903; 5,045,000 lb. in 1904; 3,039,398 lbs. copper, 103,474 oz. silver and 5,952 oz. gold in 1905; 3,173,431 lbs. copper in 1908, 2,148,058 lbs. copper in 1909; 45,758 tons of ore, yielding 3,392,901 lbs. copper, 41,128 oz. silver and 10,041 oz. gold in 1910; In 1911, 42,030 tons of custom ore were treated. Closed down 1911.

The 250-ton mill was remodeled and flotation installed, 1917.

In 1918, the smelter was in operation for 5 weeks and closed down because sufficient ore could not be obtained to keep even one furnace running.

Company is developing the Alaska holdings of **Latouche Copper Mining Co.**

LA FRANCE CREEK MINING CO. BRITISH COLUMBIA

Address: Sheep Creek, via Salmo, B. C.

Property: silver-lead-zinc claims on La France creek, Nelson division, difficult of access, but upon which \$60,000 is said to have been spent. Several tunnels have been driven, 1,100' in all, cutting ore at a depth of 600'.

LAKE SHORE MNG. CO., LTD. BRITISH COLUMBIA

Address: E. J. Edwards, 3328-9th St., Spokane, Wash. Mine address: Ainsworth, B. C.

Property: 12 claims, in Ainsworth division, between Highland and Florence Silver mines just N. of Ainsworth. Ore is silver-lead. Development consists of 200' shaft and 600' tunnel.

LANARK MINING CO. BRITISH COLUMBIA

Address: Illecillewaet, B. C.

Officers: Wm. B. Dornberg, pres. and mgr., Spokane, Wash.; Geo. L. Allen, v. p.; A. H. Blair, treas., Yakima, Wash. Inc. in Washington. Cap. \$200,000; par 10c.

Property: 16 claims in Revelstoke division, at Laurie, on the C. P. Ry., has produced considerable high-grade silver-lead ore. The main tunnel of 400' level, is 700' long; and the orebody has been mined out above this level.

A winze 140' deep with 180' of drifting, exposes the downward extension of the orebody.

Development: continued during 1919 and 1920, is reported to have opened up 2' of high-grade ore and 6' of milling ore at 1,000' depth.

Equipment: includes 250-h. p. hydro-electric plant to run the compressor, hoist, and concentrator.

LASQUETI ISLAND MINING CO., LTD. BRITISH COLUMBIA

Address: 708 Birks Bldg., Vancouver, B. C. or Hy. Lee, mgr., Lasqueti, B. C.

Officers: R. A. Mather, pres.; A. D. Tennant, v. p.; John D. Mather, sec.; Geo. E. Winter, treas., last accounts.

Inc. 1910. Cap. \$500,000; shares 25c par.

Property: 3 claims, 150 acres, on Lasqueti island, Nanaimo division, at the S. W. end of Texada island, on the Gulf of Georgia, 55 miles from Vancouver.

Development: by tunnel, on 20' veins known as St. Joseph, having 4 paystreaks, of 6 to 24" width, said to carry ore averaging 10% copper and \$20 gold per ton. Idle.

LEO MINING CO. BRITISH COLUMBIA

No record of operations since 1916. Described in Vol. XIV.

LE ROI No. 2, LTD. BRITISH COLUMBIA

Secretary's address: L. Rowell, 4 Broad St., Place, London, E. C. 2, England. **Mine office:** Rossland, B. C.

Directors: Lord Ernest Hamilton, chairman; A. B. Dealtry, L. W. Harris, H. G. T. Hawes and Major C. H. Campbell. **Alex Hill & Stewart,** managers and cons. engr.s.; P. S. Couldrey, mgr.

Inc. June 1, 1900, in Great Britain. Cap. £600,000; £5 par; fully issued and fully paid. End of fiscal year changed from Sept. 30 to Dec. 31, 1920.

Dividends: 5s in 1901; 5s in 1902; 2s in 1904; 3s in 1905; 1s in 1912; 2s in 1915-16; 1s. in 1916-17; 1s in 1920. Total to end of 1920, £2 13s per share, or £318,000.

Report for 15 months ending Dec. 31, 1920, shows a loss of £12,181; previous balance, £21,088; 1920 balance after dividends was £3,576. Income from ore sales was £21,102 in 1919 and £23,392 in 1920.

Company owns the following stock interests: 15,700 shares, £1 par, in Cloncurry Synd.; 63,193 ord. shares, 1s par, and 10,483 pfd. shares, £1 par, in Van Roi Mining Co.; 447 shares, £1 par, in Dobbin and Cloncurry Mines Ltd. In addition, £16,022 have been advanced to these companies.

Property: the Le Roi II group, including the Josie, No. 1 and Annie mines, and 2 claims near the Velvet mine; and the Giant California claims acquired in 1914; all at Rossland in the Trail Creek division. Also 5 claims in Ymir camp, Nelson division.

Josie mine has 5 pyrrhotite veins containing chalcopyrite and pyrite. Output in 1919, averaged 14.99 lb. copper, 0.68 oz. gold, and 0.56 oz. silver per ton, with a gross value of \$264,576 total, or \$17.27 per ton for 15,317 tons, and in 1920 (15 mos.), 0.62 oz. gold, 0.71 oz. silver and 17.56 lb. copper, valued at \$271,743, or \$16.55 per ton for 16,422 tons.

Development: by the Josie main shaft to the 1,950' level, and by 3 tunnels, 2 on the Josie and 1 on the Poorman claim. During 1919, new work amounted to 1,316' of drifts, crosscuts and raises, also 3,535' of diamond drilling at a cost of \$2.04 per foot, compared with an 1,114' advance for 15 months in 1920, plus 5,744' of drilling costing \$3.06 per foot.

Management estimated 5,012 tons of broken ore in stopes, Sept. 30, 1919 and none of first class at end of 1920. The total footage of diamond drilling from 1902-1919 (incl.) is 120,762', at an average cost of \$1.92.

Equipment: includes a 150-h. p. electric hoist, a machine shop, framing shop, smithy, superintendent's dwelling, etc.

The mill, across a small gulch from the Josie shaft, is of 50 tons rated daily capacity, having Blake and Gates crushers, 2 Chilean mills, 3 Jencke sizers, and 6 Wilfley tables. An Elmore oil concentrator, fully described

Vol. IV, was installed 1903, proving a technical, but not a commercial success, and was superseded by Wilfley tables. A 70-ton flotation unit was added to treat low grade dump ore, with an indicated extraction of 90%, and began operation in fall of 1921.

Production: largest production was 3,001,027 lb. in 1902. Recent production has been as follows, years endings September 30:

Year	Tons ore	Copper Lb.	Gold Oz.	Silver Oz.
*1920.....	16,422	288,415	10,187	11,692
1919.....	15,317	229,658	10,559	8,621
1918.....	19,642	671,122	8,516	19,687
1917.....	10,984	574,799	4,006	15,631
1916.....	19,231	730,015	7,258	17,675
1915.....	15,681	870,268	7,961	23,788
1914.....	29,679
1913.....	35,553
1912.....	507,499	14,157	12,281
1911.....	864,500	22,725	19,219
1910.....	970,966	26,447	24,078

*15 months to Dec. 31, 1920.

Except for development and construction, operations were suspended for part of 1921.

LIBERATOR MINING CO.

BRITISH COLUMBIA

Address: E. T. Hodge, 1522 Standard Bk. Bldg., Vancouver, B. C.

Mine address: Wm. Thompson, mgr., Jessica, B. C.

Inc. 1920 to succeed Emancipation Mining Co., Ltd.

Property: Emancipation mine, 15 claims, in Coquihalla valley, Yale division, about 15 miles from Hope, acquired for \$60,000 in cash and \$100,000 in company shares. A bedded quartz vein, 1-3' wide, occurs in slates carrying free gold, silver, pyrite and arsenopyrite.

Development: by 1,200' tunnels.

Equipment: including stamp mill, installed and work underway. Management claims 5,000 tons of \$20 ore blocked out (Oct. 1921). Shipments made to Tacoma smelter, 1919-'20.

LIGHTNING CREEK GOLD GRAVELS & DRAINAGE CO., Ltd. B. C.

Office: C. H. Unverzagt, mgr.-treas., 405 Lexington Ave., New York City. **John S. Horgan, pres.; Wilson M. Taylor, sec. Mine address:** Wingdam, B. C.

Inc. 1896, in British Columbia. Cap. \$3,000,000; shares \$5 par; 481,359 issued. Bonds: \$250,000 authorized; \$185,000 outstanding.

Property: 40 claims, 2,036 acres, or about 20 miles of placer leases along lower Lightning creek, Quesnel division, Cariboo district, with a plant and P. O. at Wingdam, B. C. Several million dollars is said to have been taken out of the gravel deposits near Stanley many years ago. Below Stanley, deep drifting work was started at La Fontaine, and the bed rock gravel mined out for some distance, but it carried insufficient gold to be profitable. Below Fontaine down to Wingdam the placer deposits have not been worked to any extent, the ground being too deep to be worked without heavy pumping machinery. In 1919, a 195' shaft was sunk to bedrock, and a new 3-compartment shaft was finished, but operations presumably ceased early in 1920, when the new shaft was destroyed. Development has been negligible.

The present company claims to have spent \$1,400,000 for the property and its development, but so far has been unsuccessful in its mining operations. The ground has been prospected for several seasons by a Keystone drill. The management claims "there are over \$10,000,000 net values already (December 31, 1919) disclosed." For opinions, see Annual Report, 1919, of the Minister of Mines, B. C., also the "New York Curb" for March and May, 1919.

In April, 1921, the Mines Operating Co., presumably organized by the same interests, claimed to have acquired the Lightning Creek holdings. Two other concerns, Standard Finance Co. and Great Cariboo Gold Co. are in some way involved in this enterprise. Company is unfavorably regarded and the minority stockholders have at last forced the property into receivership.

LITTLE BERTHA-PATHFINDER MINES BRITISH COLUMBIA

Address: Grand Forks, B. C., or A. E. Savage, supt., Bannock, B. C.

A consolidation of the **Bertha Cons. G. Mng. Co.** and the **Pathfinder Mng. Co.**

Property: on the E. side of the north fork of Kettle river, 16 miles N. of Grand Forks. The mines carry copper-gold-silver shipping ore near surface and have been worked in a small way. In 1920, new interests started a 1,000' tunnel.

LITTLE BILLY OPERATING CO. BRITISH COLUMBIA

Probably dead. Little Billy mine now owned by **Van Anda Copper**

Co.

LORNE MINE

BRITISH COLUMBIA

Owned by Arthur F. Noel, Lorne Mine P. O., B. C.

Mine on N. side of Cadwallader creek, about 50 miles from Mission Station, in Lillooet mining division, is said to have 9 distinct orebodies.

Development: by tunnels. Development work in 1918 yielded 380 tons of ore, returning 192 oz. gold and 37 oz. silver when milled. In 1919 the mill treated 400 tons of ore yielding \$2,565 in gold.

Idle in 1921.

LOUIS CREEK PLACER GOLD MNG. & DEV. CO., LTD. B. C.

Address: 302 Hinckley Bldg., Seattle, Wash. or 34 Hastings St., E., Vancouver, B. C. **Mine address:** Louis Creek, B. C.

Officers: J. S. Sherry, pres.; Fred Breaks, v. p. and mgr.; O. E. Newkirk, sec.-treas.; with H. P. Crosby, and M. Whaun, directors.

Inc. Feb., 1918, in Washington. **Cap.** \$200,000; par 10c; 750,000 shares in treasury.

Property: 3 half-mile leases, 200 acres, on Louis creek, Kamloops mining division, Yale district, said to have gold-platinum ore. No recent report.

LUCKY BOY MINING CO. BRITISH COLUMBIA

Address: S. L. Meyers, pres., Erie, B. C.

Property: Lucky Boy mine, in Nelson division, W. Kootenay district. Copper ore occurs in a 2½' vein.

LUCKY JIM ZINC MINES, LTD. BRITISH COLUMBIA

Office: 138 Burdett Ave., Victoria, B. C. A. W. Bevan Allen, Receiver, P. O. Box 857, Victoria, B. C. **Mine address:** Zintcon, B. C.

Officers: Dr. H. C. Lamback, pres.; Dr. T. A. Russell, v. p.; G. T. Edmiston, sec.-treas., all of Spokane; with J. I. Collison, Chas. McKinnis, and Chas. Ehrenberg, directors.

Inc. April, 1919, in British Columbia. **Cap.** \$2,500,000; increased Jan., 1918, to \$6,000,000; shares \$1 par; authorized bond issue \$150,000, bearing 7%.

Property: 11 Crown granted claims, 343 acres, including the Lucky Jim mine at Zintcon, Slocan division, developed by 3,600' of tunnels, drifts, raises, and crosscuts.

Operations were suspended by lack of funds in 1914, and mortgage foreclosure for \$62,000, started when the Court appointed a receiver to reopen the mine. Operations were resumed in 1915, and in December, 1916, receiver paid off first mortgage and was instructed by the Court to pay off the second mortgage (see later). For many years the affairs of the company were badly tangled due to an over-issue of approximately 3,000,000 shares of stock by G. Weaver Loper, formerly managing director and transfer agent, who was sent to the Washington State Penitentiary. The company was reorganized, and a statement made covering operations from April 1914, to April, 1918. The income was \$249,874, of which \$228,161 was from

ore shipments; expenditures totaled \$246,721, leaving a balance of \$2,653. On the balance sheet was an item \$2,999,899, listed as over-issued shares. Total assets were \$5,533 with indebtedness of \$71,291, or net deficit of \$65,758. To avoid litigation, on account of the over-issue of stock an increase in capitalization was made to cover it.

Early in January, 1920, shareholders were notified that the Trustees for the mortgagees had commenced proceedings to foreclose the mortgage, and unless \$12,000 was paid on account, company would eventually lose its property.

The necessary funds could not be raised among stockholders and the mortgage was foreclosed, Feb. 17, 1921. A reorganization is being planned.

LYNN CREEK ZINC MINES CO. BRITISH COLUMBIA

Address: Vancouver, B. C. W. C. Woods, pres.; G. Phillips, sec., at last accounts.

Property: several Crown-granted claims on west fork of Lynn creek. Victoria division, near North Vancouver, show lead-zinc ore. Development is by tunnels. Since 1918, only the essential assessment work has been done to patent the claims.

MAID OF ERIN SILVER MNG. CO., LTD. BRITISH COLUMBIA

Address: Haines, Alaska, or care Robt. W. Wiley, mgr., Rainy Hollow, B. C.

Property: in Rainy Hollow, Atlin division of Cassiar district. Company reported to have begun operations in 1919 and to have shipped silver-copper ore to Tacoma. Active in 1921.

MANSFIELD MINING CO. BRITISH COLUMBIA

Address: M. R. Leahy, Ferguson, B. C.

Property: the Crescent mine on 8-mile creek N. shore of Trout Lake Trout Lake division, developed by 2 tunnels to depth of 350', said to show a 7' vein of silver-lead ore, assaying \$12. A high grade shoot is reported to carry 70% lead and 50 oz. silver per ton.

MAPLE LEAF MINES, LTD. BRITISH COLUMBIA

Mine address: Franklyn Camp, B. C.

Officers: H. W. Young, pres.-mgr.; John Donaldson, sec.-treas., both of Grand Forks; with J. B. Miller, S. B. Sangers. Thos. Dunlop, C. W. Brown, and H. W. Collins, directors.

Property: on N. fork of Kettle river, 40 miles from Grand Forks said to show lead ore; with a small amount of copper, but not in commercial quantities.

Development: by tunnels. During 1919, the lower tunnel was lengthened 160' and a 100' crosscut driven.

Equipment: includes a gasoline engine, 3-drill compressor, and assay office.

The value of the property depends on future development.

MARBLE BAY MINE BRITISH COLUMBIA

See Tacoma Steel Co.

MASTODON MINING CO. BRITISH COLUMBIA

Address: J. W. Evans, mgr., 4 McDonald Bldg., Lethbridge, or Revelstoke, B. C.

Property: 10 claims, 23 miles N. E. of Revelstoke, between La Forme and Carnes creeks. W. Kootenay district, shows zinc and lead ores.

Development: consists of a 110' shaft with some driving, and much open cut work. said to have been very encouraging.

McALLISTER MINING & MILLING CO. BRITISH COLUMBIA

Property: the McAllister mine, sold to Slocan Silver Mines, Ltd., which sec.

McKINLEY MINES, LTD. BRITISH COLUMBIA

Described in Volume XIV. Property transferred to Chas. R. Leonard, Butte, Montana, to be held in trust until sold for not less than \$40,000. The

proceeds of sale, after deducting expenses, are to be distributed prorata among the shareholders.

McLENNAN SILVER MINES, LTD. BRITISH COLUMBIA

Address: Vancouver, B. C.; or Alice Arm, B. C.

Officers: J. A. McLennan, pres.; R. C. Purdy, v. p.; Dennis Campbell, sec.-treas., with Dr. Peter A. McLennan, Dr. A. F. Greer and A. E. Garvey, directors.

Inc. 1920 in B. C. **Cap.** \$1,500,000; par \$1.

Property: the Royal group, 7 claims, in Kitsault river section, Nass River division, adjoining the Dolly Varden mine on the west. Development said to have opened a vein 12' wide, traceable for 400' at surface, with ore running high in silver.

MINERAL CLAIMS DEVEL. CO., LTD. BRITISH COLUMBIA

Formed in 1919 by W. A. Somerville, et al., to take over holdings of **Homestake Mng. & Devel. Co., Ltd.**, which see. Two payments have been made under the option.

MINERAL HILL MINES, LTD. BRITISH COLUMBIA

Address: 506 Winch Bldg., Vancouver. **Mine address:** H. J. Fetter, supt., Stewart, B. C.

Inc. 1919. **Cap.** \$2,500,000; \$1 par.

Property: Mineral Hill group, 7 claims, E. of and adjoining the Big Missouri, in the Salmon River section, Portland Canal division, 12 miles N. of Stewart. Surface work opened ore rich in native silver and argentite.

Development: by 400' tunnel and 300' of crosscuts and drifts. Exploration continued, 1921-22.

MINES OPERATING CO. BRITISH COLUMBIA

Address: W. E. Parker, v. p., 405 Lexington Ave., New York City.

Presumably organized by C. H. Unverzagt interests to succeed **Lightning Creek Gold Gravels & Drainage Co.**, which see. In September, 1921, company advertised for parties willing to advance \$150,000 to put the property on a producing basis with estimated profits of \$5,000 per day. Appears to be a promotion, that needs watching.

MINNEAPOLIS & TEXADA COPPERITE CO., LTD. B. C.

Offices: 1311 Washington Ave., N., Minneapolis, Minn., and Vananda, Texada Island, B. C.

Officers: A. Stremel, pres.; E. E. Rorem, 1st v. p.; John Kraft, 2nd v. p.; A. E. Barker, sec.; John F. Danek, treas.; above, with Edcen Schmidt, Hilmer Olson, B. F. Laffin and W. H. Curtis, directors.

Inc. in Arizona. **Cap.** \$1,000,000; shares \$1 par; 400,000 issued.

Property: 5 claims, 225 acres, on Texada Island, 47 miles N. W. of Vancouver, said to show 2 main veins, the Swan and the Paxton, containing copper ore, with gold and silver. Paxton vein is said to be traceable 1,500' on surface. Value of property is entirely prospective.

Also holds certain claims under lease from Norsemen Expl. Co.

Development: 200' shaft, with 300' of drifting; also a number of test pits. Considerable mill ore extracted in this work, reported to average 4% copper, 2% lead, and \$5 per ton in gold and silver.

MINNESOTA GOLD & SILVER MNG. & MFG. CO. B. C.

Succeeded by **Triune Gold & Silver Mng. & Mfg Co.**, which see.

MINNESOTA SILVER CO. BRITISH COLUMBIA

Controlled by Yawkey estate. **Address:** New Denver, B. C.

Property: Ivanhoe group on the Divide between Sandon and Four mile creek Slovan division; operated under bond and lease in 1918 by **Rosebery Surprise M. Co.**, but option later relinquished. The mill and water rights were sold to Silversmith Mines, Ltd., in 1921 for \$15,000.

MOJLY GIBSON (RURNT BASIN) MNG. CO. LTD. B. C.

Address: D. 853, Rosslund, B. C. **Mine office:** Paulson, B. C.

Officers: W. R. Braden, pres.; J. B. Singer, v. p.; I. J. Tremboth, sec.; M. E. Purcell, mgr. director.

Cap. \$1,000,000; par \$1; 240,000 treas. shares.

Property: the Molly Gibson group, 9 claims, in Grand Forks division, 4 miles S. W. of Paulson, on the C. P. R. R., shows a mineralized area 2,000' long, covering a porphyry-limestone contact. Veins said to average from 2-8' in width and to assay from \$5-\$25 in gold. Three cars of ore shipped in 1920 averaged \$43 per ton.

Development: by 300' crosscut tunnel connecting with shaft.

Worked steadily throughout 1920; idle in 1921; reported that operations were to resume early in 1922.

MOLYBDENUM MINING & REDUCTION CO., LTD.

B. C.

Address: F. H. Coyne, sec., 516 30th Ave., S., Seattle, Wash. J. D. Ross, Ross, mgr. Anyox, B. C.

Property: Success mine, 21 claims on the Alice Arm section, Nass River division, 15 miles from Anyox. The group shows a series of quartz veins in a mineralized zone 60' wide, which for a length of about 800' show small bunches of ore containing silver, lead, zinc, and molybdenum. A 4,000' aerial tram connects the mine and mill.

The property has been tied up by litigation since 1916. In June of that year, the court at Victoria issued an order requiring that the property be placed on the market at a fixed price of \$150,000.

Idle several years.

MOOSE GROUP MNG. CO., LTD.

BRITISH COLUMBIA

Address: F. M. Sylvester, pres., 717 Vancouver Bldg., Vancouver, B. C. P. W. Racey, supt., Alice Arm, B. C.

Property: 4 claims, adjoining the Last Chance, in the Kitsault River section, Nass River division, 19 miles N. of Alice Arm, said to show two veins, one 20' wide. The ore is grey copper with high silver content, some manganese and a little galena.

Development: driving 2 tunnels, the upper 310' above the lower.

MOTHER LODGE SHEEP CREEK MINING CO.

B. C.

Probably dead. Described in Vol. XIV. Property amalgamated with that of **Nugget Gold Mines, Ltd.**, which see.

MOUNTAIN CHIEF MINING CO., LTD.

BRITISH COLUMBIA

Address: Royal Bank Bldg., Nelson, and Renata, B. C.

Officers: J. W. Evans, pres.-mgr.; J. H. Lawrence, sec.-treas., with A. D. Nash, Chas. F. Blacha, and W. A. Gordon, directors.

Inc. 1918. Cap. \$50,000; \$100 par; increased April 1921 to \$600,000; \$10 par.

Property: 5 claims, 3 miles from Renata, on Lower Arrow lake, Trail Creek division. Stripping and open cut work is said to have disclosed an ore-body 5 feet wide and 100' long, in limestone, near the contact with an intrusive granite. Ore assays about 2½ oz. silver and 3½% copper. In 1918, about 600 tons of ore were shipped from old workings. In September, 1919, a 200-ton shipment was made. A hoist and compressor were installed and the mine is reported under development.

MOUNTAIN CONS. MINING CO.

BRITISH COLUMBIA

Property: 7 miles from Sandon, B. C., consists of two claims said to show a small, but rich vein in granite. Ore is silver-lead, with a little gold. The mine is in rough country and can be worked only in the summer. Operations each season said to result in a profit.

MOUNT SICKER & B. C. DEV. CO., LTD.

BRITISH COLUMBIA

Idle. **Office:** 30 George Square, Glasgow, Scotland. Fred L. Smith, chairman; John D. Steel, sec.

Inc. Oct. 20, 1898, in Great Britain. Cap. £125,000; shares £1 par. Lands are on Mt. Sicker, Vancouver Island, B. C.

MULTIPLEX MINING & MILLING CO.

BRITISH COLUMBIA

Address: P. O. Box 424, Revelstoke, B. C., or Camborne, B. C.

Officers: O. T. Bibb, pres.-mgr.; F. G. Wrightson, sec., with Jos. Stevenson, L. P. Schooling, and J. G. Hilbery, directors.

Inc. April, 1914, in British Columbia. **Cap.** \$1,000,000; par \$1; non-assessable; 339,391 shares in treasury.

Property: 18 claims, 830 acres, $1\frac{3}{4}$ miles E. of Cambourne, at junction of Poole and Mohawk creeks, in Lardeau division, West Kootenay, said to show silver-lead-zinc ore in fissure veins, also gold ore in quartz veins of different type. It is said that \$25,000 has been spent on development work by tunnels, with about 1,500' of workings. Company planned to add a hydro-electric plant and resume development work at last account.

MUSKETEER GROUP**BRITISH COLUMBIA**

Owned by Miles Donald, Alice Arm, B. C. but under option to J. D. Meenach, of Seattle, Wash.

Property: 5 claims on the E. side of the Kitsault river, Nass River division, 18 miles N. of Alice Arm. Developed by shallow workings claimed to show ore running 32 oz. silver per ton.

NELSON MINING & DEVELOPMENT CO. BRITISH COLUMBIA

Officers: F. A. Starkey, pres.; Clarence Marsh, sec.-treas.; W. W. Shaffner, gen. mgr.

Property: company has a bond on the Comstock group of 3 claims near Poplar, Ainsworth division, at an elevation of 6,000'. A quartz vein, sparsely mineralized with galena, lies in schists and argillites, cut by aplite dikes, and carries a little gold, silver, lead and zinc.

Development: by 2 tunnels, 158' apart, the lower being in about 170'.

A prospect with fair indications.

NEW CANADIAN METAL CO., LTD.**BRITISH COLUMBIA**

S. S. Fowler, Riondel, B. C., mgr. Control is held in France.

Property: the Bluebell lead-silver mine at Riondel, near Ainsworth.

Geology: the deposit is a replacement in limestone, irregular masses of ore following the bedding, with tongues projecting into the foot-wall country of pre-Cambrian sediments.

Development: mine is 600' deep on incline of 35° with extensive workings extending under Kootenay lake. The mine was flooded 1917, by an in-rush of water; the old pump could not handle the water and a new 1,000-gal. pump has recently been added. In the spring of 1920 the mine workings were partly unwatered and operations resumed with a small force.

Equipment: includes mill and Blake crushers, rolls, jigs, trommels, Huntington mills, Wilfley and Deister tables.

Production: shipped 5,000 tons of oxidized ore from surface workings in 1918; in 1919 shipments to Trail amounted to 1,249 tons crude ore and 36 tons of concentrate.

NEW DOMINION COPPER CO., LTD.**BRITISH COLUMBIA**

Controlled by Canadian Copper Corp., Ltd. Mines considered exhausted and of no commercial value. For description, see Vol. XII.

NEW ERA MINING CO., LTD.**BRITISH COLUMBIA**

Address: 1218 Standard Bk. Bldg., Vancouver, or Camborne, B. C. W. E. Morphy, mgr.

Property: lease and bond on the Beatrice mine, 3 Crown-granted claims above timber line, near Camborne, Lardeau division. The mine, which has 1,400' of tunnel work, was closed down some years ago on account of the low price of silver. Ore said to assay about 34% lead and 100 oz. silver per ton. Reopened in 1919.

NEW HAZELTON GOLD-COBALT CO.**BRITISH COLUMBIA**

Address: Nicholas Thompson, pres., 309 Pacific Bldg., Vancouver, B. C. R. Dalby Morkill, sec.-treas. **Mine address:** Hazelton, B. C.

Property: near Hazelton, on W. slope of Rocher De Boule mountain, Omineca division, 5 miles from Carnaby, shows a 2' vein in granodiorite. This vein contains bunches and bands of ore varying from 3 to 18" in width; ore contains auriferous arsenopyrite with some molybdenum. In 1918, a 26-ton shipment assayed 1.24 oz. gold; 1.4% MoS₂; 1.18% MoO₃; 1.12% cobalt; 0.6% nickel; 8.98% arsenic.

Development: by tunnels, the main one is over 700'; a second tunnel 250' lower, in about 200'.

An aerial tram carries the ore 1,000' down the mountain, from which point it is packed 5 miles to the Grand Trunk railway.

Property: shows another vein which is supposed to be a continuation of the main Rocher De Boule vein. Idle several years.

For geology, see Memoir 110, (1919) Canadian Geol. Survey.

NICKEL PLATE MINE

BRITISH COLUMBIA

See Hedley Gold Mining Co.

NOBLE FIVE MINING CO.

BRITISH COLUMBIA

Address: R. Dunsmuir & Sons, owners, Victoria or Sandon, B. C. Paul Lincoln, mgr.

Property: the Noble Five and Deadman groups between Sandon and Cody in the Slocan division, has been extensively developed during the past 8 years. The present lowest level has a 4,000' crosscut, 1,100 below upper workings, and about 3,000' below apex of the Noble Five and Last Chance veins, proving the continuity of the veins at depth. The veins contain silver-lead ore. In 1919, company acquired the adjoining Reco mine of 5 claims, developed by 15,000' of workings and once a famous producer of silver-lead ore; see Reco M. & M. Co. in Vol. XIV.

A 4-compartment, 1,000' raise connects the upper workings with the lower level which is to be the main haulage way. Company employs between 30 and 40 men. Said to have ore reserves sufficient to keep the mill busy for 2 years or more.

Equipment: water-power, compressor, and 100-ton flotation plant using the Callow system, completed in 1920, at a cost of \$250,000. The mill was closed down, February, 1921.

Is an old and well known mine that produced bonanza ore from its upper levels.

NOONDAY MINES CO.

BRITISH COLUMBIA

Office: 1017 Paulsen Bldg., or Box 1772, Spokane, Wash. **Mine address:** Sandon, B. C.

Officers: R. C. Lammers, pres.; J. B. White, sec.-treas.-mgr.; C. D. Randall, sec.; with H. S. Burdick and S. White, trustees.

Cap. \$750,000; shares 25c par; 2,000,000 issued.

Property: the Noonday and other claims on Carpenter creek, Slocan division, near Sandon.

Development: by tunnels, with several thousand feet of workings, said to have opened 14,000 tons of \$17.50 lead-silver ore.

A promising prospect. Shipments have been made at various times.

NORSEMEN EXPLORATION CO.

BRITISH COLUMBIA

Office: 1048 McKnight Bldg., Minneapolis, Minn. **Mine office:** Cap-sheaf, Vananda, Texada Island, B. C.

Officers: E. E. Rorem, pres.; W. H. Curtis, v. p.; C. A. McKenzie, sec.; Allen T. Rorem, treas.; B. F. Laffin, A. E. Barker and Eden Schmidt, directors; Robt. Forbes, cons. engr.; Jas. Forbes, Sr., supt.

Inc. in Arizona. **Cap.** \$500,000; shares \$1 par; issued, \$375,000.

Property: 23 claims, 1,000 acres, 730 patented, on Texada Island, B. C., shows contact deposits between limestone, granite and diorite. Copper occurs as chalcopyrite and bornite, with gold and silver values. The Cap-sheaf claim has an 80' vertical shaft that showed 10' of ore, said to have averaged 4% copper and \$6 gold and silver. Test shafts along the vein for several hundred feet show a continuity of the vein, and crosscutting proved it to be about 25' wide. The Cameron claim, adjoining the Texada iron mine, owned by the Puget Sound Iron Co.—on which extensive development has been done, has a capping of magnetic iron with large lenses of chalcopyrite. The vein is reported to be over 180' wide and is thought to average 4% copper. The Aladdin claim carries silver-lead ores. It has a 212' vertical shaft with about 250' of crosscutting. The Aladdin, De Ore,

and Blizzard claims are leased to the Minneapolis & Texada Copperite Co. Company's property covers about 4 miles along the various veins, is convenient to tide water transportation and about 20 miles from a smelter.

NORTH POINT MINING CO., LTD.**BRITISH COLUMBIA**

Address: Oscar Eden, Prince George, B. C.

Property: a silver-gold-lead mine near Giscoma Portage, Cariboo division. A 600' tunnel to cut the main vein was 350' long in mid-1921.

NORTH STAR MINING CO.**BRITISH COLUMBIA**

Address: O. C. Thompson, Kimberley, B. C.

Property: the North Star mine in Fort Steele division, E. Kootenay district, under lease to Thompson and McKinley. In 1919, production was 7,121 tons of lead-carbonate ore, somewhat curtailed because plant was in part destroyed by fire. Shipments were made also in 1920; operations suspended Jan., 1921, were resumed in September. Equipped with compressor, etc.

NUGGET GOLD MINES, LTD.**BRITISH COLUMBIA**Address: 735 Granville St., Vancouver, B. C. **Mine office:** Salmo, B. C.

Officers: Alister Forbes, pres., with N. T. Burdick, R. S. Lenine, C. M. Oliver and W. H. Logan, directors. E. B. Crickmore, sec.; R. H. Stewart, cons. engr.; Harold Lakes, mine supt.

Inc. in British Columbia. **Cap.** \$1,050,000, in 1,000,000 common and 50,000 preference shares; increased March 10, 1921 to 100,000 pfd. shares and 1,900,000 com. shares, \$1 par. Listed on Spokane Stock Exchange. Balance sheet of Dec. 31, 1920, shows: Assets, \$1,100,190, including property, \$531,240, equipment, \$205,466, cash, \$1,367. Liabilities include mortgage on Mother Lode, \$50,000; current, \$58,133. Net bullion sales were \$36,984; production costs amounted to \$60,157, leaving an operating loss of \$31,847 for second half of 1920.

Property: 15 claims, including the Searchlight, and Nugget groups, and the Mother Lode acquired in 1919 by amalgamation with Mother Lode Sheep Creek Mines Co., in Sheep Creek district, Nelson division, 15 miles from Salmo, showing 5 veins in chlorite and quartz schists.

Development: by tunnels, with 6,000' total workings. A 1,600' tunnel cut vein of the Nugget mines in November, 1921, on the Sheep creek side of the mountain, beneath the old Nugget workings.

Equipment: water-power (400 h. p. available), 14-drill compressor, dwellings, 3,800' aerial tram, and 10-stamp mill with cyanide plant. The mill, acquired from the Mother Lode company, is said to give a 97% recovery on 100 tons daily.

Production: from 1908 to 1911, the Nugget produced \$220,000 gold from 14,000 tons of ore. The loss in tailing was from \$3.50 to \$5.50 per ton. The old Mother Lode company made a profit of \$163,617 during the period 1912-1915. During 1920, 6,757 tons were mined; 4,647 tons milled yielded 2,774 oz. gold. About 35 men employed.

Examined in 1920, by Andrew Larson, Spokane.

NUMBER ONE MINE**BRITISH COLUMBIA**

Owned by J. M. Harris, Sandon, B. C., and F. T. Kelly.

Property: 5 claims, 231 acres, shows a fissure vein containing silver-lead ore, cutting through slate, and porphyry.

Development: by 3 tunnels, 200, 500 and 700' in length. Total output to date, 312 tons of ore. Owners report \$22,270 received from ore sales in 1918, with operating expenses of \$16,702 and \$3,000 paid as dividends.

OLALLA COPPER MINING & SMELTING CO.**B. C.**

Property idle, but under 25-year lease to Yale Development & Construction Co., organized among the stockholders of this company. No recent information. Fully described in Vol. XIV.

OLIVE A. SILVER LEAD CO., LTD. BRITISH COLUMBIA

Address: A. D. Wheeler, lessee, Ainsworth, B. C., or J. W. Beckett, 2003—10 St., Spokane, Wash.

Property: the Gallagher mine in the Ainsworth division, W. Kootenay district, 2½ miles N. W. of Ainsworth, shows irregular replacement deposits of lead carbonate ore in limestone, assaying high in silver. Developed by 2 tunnels.

OREGON & B. C. MINING & DEV. CO., LTD. BRITISH COLUMBIA

Idle many years. Fully described in Vol. XIV.

OTTAWA MINING & SMELTING CO. BRITISH COLUMBIA

Address: A. L. MacPhee, Slocan City, B. C., who with L. H. Biggar (mgr.) and Pat McQuire, has a 4 year lease from 1920 on the Ottawa mine of Cons. M. & S. Co. of Canada, which see.

Property: the Ottawa group on Springer creek, Slocan division, 5 miles E. of Slocan City. Ore carries silver, copper, lead and zinc, the former predominating. Estimated to be 35,000 tons of ore in dumps and stopes carrying 10 to 20 oz. silver per ton.

Equipment: includes 50-ton flotation plant erected by lessees at cost of \$30,000, using crusher, tube mill and 9 cells and connected with mine by 2,000' air tram. A 4' Pelton supplies 160 h. p. Mill operation began in mid-1921, making a concentration of 35 tons of ore into 1 with a 75% silver extraction, at a cost of \$2 per ton of ore for milling and freight.

OUTSIDER MINE BRITISH COLUMBIA

Address: Martin Woldson, owner, Spokane, Wash.

Property: 8 claims, at Maple bay, Portland Canal division, 35 miles S. of Stewart, formerly known as the Brown Alaska property which was equipped in 1916 with an aerial tram from the mine to the beach. Several thousand tons of ore assaying about 2.8% copper, were shipped during 2 years operations. Shows several veins from 6 to 30' in width. The ore is low grade and silicious.

Development: by tunnels, the longest about 800'. Five hundred feet of new work in 1918, opened an oreshoot 200' long and 16' wide assaying 2% copper. Only a small amount of development done annually.

Equipment: includes two compressors, water power, aerial tram, ore-bins, dock, etc., not in good order.

OUTLAND SILVER BAR MINING CO., LTD. BRITISH COLUMBIA

Address: 543 Hastings St. W., Vancouver, B. C.

Inc. July 19, 1920. **Cap.** \$500,000; \$1 par.

Property: Outland group on Salmon river, about 14 miles above the Premier.

PACIFIC COAST EXPLORATION CO., LTD. BRITISH COLUMBIA

Company controlled by Sir Donald Mann, had an option on the Big Missouri mine (q. v.) in the Portland Canal division. Property was drilled and otherwise explored. Option was presumably relinquished and property taken over by Daly Mines Co., Ltd., which see.

Address: 43 Victoria St., Toronto, Ont. Wm. Nobe, mgr., Stewart, B. C.

PACIFIC MINES DEVELOPMENT CO. BRITISH COLUMBIA

Address: W. J. Elmendorf, Sandon, B. C.

Organized and controlled by Campbell, Wells & Elmendorf, Prefontaine Bldg., Seattle, Wash.; Oscar V. White has a 10% interest.

Property: a lease on 6 Crown-granted claims, including Payne mine, on Carpenter creek, Slocan division, first located in 1891 and originally owned by the Payne Mines, Ltd.

Development: by 4,000' crosscut, raises and winzes, completed at a cost of \$160,000 by the Slocan-Payne Mines, Ltd., under a lease in 1912. The main orebody has been followed for 1,200' in length.

Production: to date estimated at \$50,000 tons silver-lead ore and 6,000 tons zinc ore.

Operated by lessees in recent years, prior to organization of present company.

PANAMA MINE

H. Giegerich, Kaslo, B. C., owner. The mine, W. of Whitewater, in the Slocan country, is developed by 2,000' of tunnels and drifts to depth of 300'. Reported to carry a contact vein, from 3-5' wide, that averages 120 oz. silver. Small shipments made to the Trail smelter. Developing with a small force each summer.

PARADISE MINES

Owned by R. Randolph Bruce, Invermere, B. C., Robt. MacDonald, supt.

Property: on Spring creek, Windermere division, shows silver-lead carbonate ore in limestone. Ore assays 35 to 45% lead and 35 to 45 oz. silver per ton.

Development: by tunnels, with 7,000' of workings.

Production: in 1918, 2,470 tons; in 1919, 1,700 tons; in 1920, 1,200 tons. Employs 35 to 40 men.

PAYNE MINES, LTD.

Address: Oscar V. White, agt., Sandon, B. C.

Property under lease to **Pacific Mines Dev. Co.** (q. v.), and described thereunder.

PERRIER GOLD MINES, LTD.

Address: D. 1059, Nelson, B. C.

Officers: C. C. Crossley, pres.; R. W. Hinton, v. p.; W. M. Cunliffe, sec.-treas.

Inc. 1920. Cap. \$250,000.

Property: Perrier mine on Cottonwood creek, near Nelson, developed by 120' shaft, with 200' drift northerly, said to be in 2' of milling ore.

Equipment: includes 150-ton mill, compressor, hoist, pump, water power. A stamp mill is planned.

PIONEER GOLD MINES, LTD.

Address: Andrew Ferguson, 432 Richard St., Vancouver, B. C., or Lorne Mine, B. C.

Property: Pioneer mine in Cadwallader Creek area, Lillooet division. The ore is gold-bearing and is treated on the ground. Mine was closed down for part of 1920, but operations reported to have been resumed.

PLACER DEVELOPMENT CO. OF AMERICA, LTD.

B. C.

Address: 603 Scan. American Bk. Bldg., Tacoma, Oregon. **Mine address:** Tulameen, B. C.

In 1917, company took a sublease on placer ground on the Tulameen river, controlled by the **Efanjay Gold Mng. Co.**, which see.

PLACER GOLD MINES CO. OF SEATTLE

BRITISH COLUMBIA

Address: W. G. McLean, sec., 1002 Third Ave., Seattle, Wash. T. M. Daulton, mgr., Atlin, B. C.

Property: placer claims on Ruby creek, in the Atlin division. The pay-streak is covered by basalt. Operations are both hydraulic and drifting, depending on conditions. During 1919, an advance of 217' was made. Seventeen men moved 53,000 yd., recovering about \$40,000, from May 1st to October.

PORTLAND CANAL MINES CO.

BRITISH COLUMBIA

Controlled by Pat Daly and T. H. Wilson, New York City.

Is the U. S. holding company for the **Daly Mines Co., Ltd.**, (q. v.), a British Columbia corporation, owning the Big Missouri group, (q. v.), Salmon River zone, Portland Canal division.

These companies organized in fall of 1921, presumably succeed the Pacific Coast Expl. Co.

PORTLAND CANAL TUNNELS, LTD.

BRITISH COLUMBIA

E. J. Hearn, sec., 104 Moody Blk., Victoria, B. C.

Officers: R. I. Elliott, K. C., Pres.; with R. M. Stewart and J. R. Wag-horn, directors.

Inc. Aug. 23, 1912, in British Columbia. **Cap.** \$700,000; shares 25c par.

Property: 10 claims, Crown-granted, near Stewart, Portland Canal, B. C. Company was organized to drive a crosscut tunnel to intersect the vein series of Glacier Creek, previously worked in the Portland Canal and in the Stewart Mining Co.'s properties. The tunnel, over 3,000' long, has so far failed to disclose orebodies of permanent commercial value. Idle since 1914, owing to lack of funds.

PREMIER GOLD MINING CO., LTD. BRITISH COLUMBIA

Address: Dale L. Pitt, mgr., Premier, via Stewart, B. C.; or care American Smelting & Refining Co., 120 Broadway, New York City.

Officers: R. W. Wood, pres., Fernie, B. C.; H. A. Guess, of A. S. & R. Co., v. p. and managing director, 120 Broadway, New York. Minor C. Keith, v. p.; with R. K. Neill, W. R. Wilson, I. Untermyer, G. T. Bridgman, directors. W. E. Merriss, sec.; L. A. Chapin, treas.

Inc. 1919, in British Columbia. **Cap.** \$5,000,000; \$1 par.

Property: the Premier, or Bush mine, with the 8 Cascade Falls claims, located in 1910 by William Dilworth and the Bunting brothers. Claims No. 4 and 8 contain the Premier mine. The property is adjacent to the Alaska line, on the east side of Cascade creek, a tributary of the Salmon river, and 14 miles from Stewart at the head of Portland Canal.

The claims were formerly owned by the Salmon-Bear River Mining Co., ('See Canadian Mining Journal' of October 7, 1919), which did a little trenching and tunneling, but neglected to open the great outcrop of the high-grade vein now being worked. The claims were idle until the summer of 1914, when W. J. Rolfe examined them for a Canadian company. The vein was traced for 800' down the hill, the surface stripped and the trenches cut at regular intervals all exposed pay ore, some high-grade. The mine was then bonded to New York interests and work re-started in the winter of 1914, in charge of H. P. Plate, who drove 3 exploratory tunnels. After 18 months work, at cost of \$60,000, the option was given up. In 1918 R. K. Neill examined the ground and bonded it for \$100,000. A few yards crosscut work in the reopened tunnel showed that it paralleled the vein and was 6' from it. An 82' crosscut showed ore that averaged \$55 per ton in gold and silver. Recent work has blocked out a large tonnage of high grade gold-silver ore.

In August 1919, it was examined by Mr. H. A. Guess and a 52% interest purchased for the American Smelting & Refining Co. and associates. British Canadian Silver Corp. also said to hold an interest. The latter is reported to have sold (Feb., 1922) its controlling interest in B. C. Silver Mines, Ltd. to the Premier company.

In December, M. D. W. Bacon, of Los Angeles, filed suit against Mr. Neill, claiming half of his interest in the mine, based on an alleged partnership between them. In January, 1921 judgment was recorded in favor of Neill.

Geology: according to J. J. O'Neill in Canadian Dept. of Mines Summary Report for 1919, Part B, all high-grade deposits are in grano-diorite porphyry, close to its contact with tuffs, and the large deposits of low-grade material occur near the upper margin of this porphyry in rock which apparently is an intimate mixture of porphyry and metamorphosed tuff. The principal silver sulphide is argentite, with freibergite, and pyrargyrite. There are also pyrite, sphalerite, galena, and chalcopyrite.

Development: by an adit, 600' long, opening considerable milling ore, also 2 shoots each 70' long, assaying \$100 and \$200 per ton, respectively. Two lower adits, 250 and 710' below the upper one, were in 1,200' and 1,000', September, 1921, the upper of these having opened the same high-grade and additional milling ore. Total extensions in 1921 were 4,447'

which includes a 420' shaft connecting 3 and 4 levels. Considerable diamond-drilling has been done from the various adits, including 6,821' drilled in 1921.

Equipment: water-power, electric-light plant, crushing and sorting house, compressor, and 100 ton concentration and cyaniding mill. An 11-mile aerial tram, from the mine to Stewart, B. C., on the coast, was completed late in 1921; the fall in this distance is 1,400', of which 900' is in the first 3 miles. In 1921, company employed 382 men.

Production: during winter of 1918-'19, 488 tons of high-grade ore was shipped, yielding 3,209 oz. gold and 108,285 oz. silver, worth \$165,000. Production since purchase by the A. S. & R. Co. and associates has been to September, 1921, about 38,000 oz. gold and 1,400,000 oz. silver, from approximately 6,000 tons of ore. Shipments are made to the Tacoma smelter. Total mine output in 1921 was 15,129 tons of ore.

The Premier is a big potential producer, in good hands.

PRINCESS COPPER MINING CO. BRITISH COLUMBIA

Address: John Walker, c/o Wallbridge & Walker, 333 Homer St., Vancouver, B. C.

Property: 6 claims, 2 miles up the Matheson (Matsin) river, Knight Inlet section of the Nanaimo division. Irregular, lenticular, garnetite ore-bodies, carrying copper ore, mostly bornite, lie in metamorphosed limestone. These characteristics render exploration difficult.

Development: by a main adit 210' long, exposing a little ore, assaying 0.9% copper and 1.4 oz. silver, across 3' of garnetite. A 6" shoot was showing in the face at last accounts. Indications would warrant further development work.

PRINCETON MINING & DEV. CO., LTD. BRITISH COLUMBIA

Address: Box 215, Princeton, B. C.

Officers: F. F. Foster, pres.-mgr.; G. E. Murphy, v. p.; Perley Russell, sec.-treas.

Inc. Oct. 12, 1917, in British Columbia. **Cap.** \$150,000; par 10c; non-assessable; 500,000 shares issued.

Property: the Copper Farm group of 3 claims, 156 acres, in Similkameen division, 4½ miles E. of Princeton, on Great Northern R. R. On the upper levels the vein shows 6" of ore assaying up to 16% copper 2-12 oz. silver and 45c.-\$.250 gold.

Development: by 3 tunnels, 48--480' deep. Equipped with 3-drill compressor and steam power.

Work was reported resumed in 1920 with a small force.

PROVIDENCE MINING CO. BRITISH COLUMBIA

Address: Box 446, Greenwood, B. C.

Property: Providence mine, 1 mile N. of Greenwood, carries a quartz vein 1' wide with N.-S. strike and dip of 60° E. Ore contains gold, silver and lead.

Development: by 500' shaft, drifts and raises.

Equipment: includes 600 cu. ft. compressor, and pumps.

Production: in 1919, shipments to Trail amounted to 338 tons containing 39,903 oz. silver, 267 oz. gold and 7,616 lb. lead. Treatment cost was \$5.50 per ton and transportation \$5.50 per ton.

Mine was operated under lease in 1919-'20 by Morrison & Gillis (M. S.), of Greenwood. Company resumed operations early in 1921 and expects to make regular shipments. About 35 men employed.

PTARMIGAN COPPER MINES, LTD. BRITISH COLUMBIA

Address: care H. H. Johnson, Kirkland Lake, Ont.

Property: 8 claims at 5,300' elevation, 15 miles inland from the mouth of Bear River, on Bedwell Sound, Vancouver Island. Considerable development work was contemplated on the property, but all work was suspended shortly after the outbreak of the European war.

Claims are on Big Interior mountain and show gossan outcrops underlain by chalcopyrite-magnetite ore. No recent information.

QUATSINO COPPER CO.**BRITISH COLUMBIA**Dead. Succeeded 1916 by **Coast Copper Co.**, which see.**QUEEN BESS MINE****BRITISH COLUMBIA****Owners:** Clarence Cunningham, Alamo, B. C., and Dr. J. G. Cunningham, Spokane, Wash. **Mine address:** New Denver, B. C.**Property:** 9 claims, on Carpenter creek, Slocan division, N. W. of Sandon, show silver-lead ore in fissure veins developed by tunnels and by a 300' shaft.

Recent operations curtailed owing to adverse labor conditions; shipments to Trail smelter resumed late in 1921.

QUEEN BESS MINES CO.**BRITISH COLUMBIA****Address:** O. A. Thomas, pres. and mgr., 400 Central Bldg., Seattle, Wash. H. W. Schuett, sec., Black Pool, B. C.**Property:** 6 claims on E. side of North Thompson river, Kamloops division, 2 miles south of Blackpool Station on Canadian Northern Ry., said to show fissures in greenstone, with silver-lead and zinc ores. Veins are from 2 to 6' wide. Also owns Noonday gold groups, in same district.**Development:** 300' shaft and several tunnels, with several hundred feet of workings in which sufficient ore was considered in sight to warrant building a 50-ton concentrator which began operating in February, 1919.

Shipments in 1919 amounted to 26 tons of silver-lead concentrates. No later figures available.

QUEEN MINES, INC.**BRITISH COLUMBIA****Address:** E. V. Buckley, Alma Centre, Wis.**Property:** the Queen, Yellowstone and Alexandria mines and a mill-site on Sheeps Creek, near Salmo, said to show several veins containing gold ore.**Development:** 700' shaft with drifts run over 100', said to expose an ore-body 8-33' for 800' in length, and averaging \$9 per ton.**Equipment:** includes 20-stamp mill.

Mine credited with total production of \$1,529,000.

Reported 1921 under bond for \$150,000 to **Queen Ore Hill Mines, Ltd.**, (q. v.), organized by C. H. Cassill.**QUEEN-ORE HILL MINES CO., LTD.****BRITISH COLUMBIA****Address:** C. H. Cassill, Wellington Apts., Spokane, Wash.Inc. 1921, in B. C. **Cap.** \$250,000; 25c. par.; 600,000 shares in treasury.**Property:** a lease and bond on the Queen mine on Sheep Creek, near Salmo, owned by the Queen Mines, Ltd., and the adjoining Ore Hill group of 5 patented claims.

No work is being done.

QUESNEL FORKS GOLD MINING CO.**BRITISH COLUMBIA**

Presumably dead. Was formed to take over holdings of Bullion Mng. Syndicate, but this did not materialize.

RAMBLER-CARIBOO MINES, LTD.**BRITISH COLUMBIA****Head office:** Three Forks, B. C.; **Post office:** New Denver, B. C.**Officers:** A. F. McClaine, pres.; Alfred Coolidge, v. p.; W. A. Cameron, supt., with J. F. Hall, C. L. MacKenzie, Johnston Armstrong and H. Cornwall, directors; A. E. McClaine, Jr., sec.-treas.**Cap.** \$2,000,000; \$1 par.; all issued. Listed on Spokane, Exchange.

Financial statement of December 31, 1920; shows assets, \$2,034,541, including mines, \$1,762,800; equipment, \$55,000; cash on hand, \$10,156. Balance forward, \$23,345; receipts from ore sales, \$31,181; from stock sales, \$13,023; expenditures amounted to \$32,518.

Dividends: \$385,000 prior to 1903; \$35,000 in 1915; \$87,500 in 1916; \$35,000 in 1917; \$17,500 in 1919. The total is \$560,000.**Property:** 5 crown-granted claims, at the head of McGuigan creek, near Three Forks, Slocan division, has been operated for many years as a silver-lead and zinc mine, and has been extensively developed at depth. On the 14th level a 5,000' crosscut was run, but development there was disapp-

pointing, the orebody apparently not extending that far. The Jennie and Last Chance claims were acquired for \$65,000, of which the final payment of \$25,000 was made in January, 1920.

Development: during 1920, the 800' level was driven 400', mostly in Jennie ground and the 700' level is being continued. The ground is well mineralized, but no commercial ore was opened up.

Operations adversely affected by labor trouble and metal market. Company suspended operations in September, 1921, and mine and mill were leased to W. A. Cameron, the superintendent, who also operates the Molly Gibson mine of the Cons. M. & S. Co.

Management is considered "honest, efficient, and extremely conservative." but gives out but little information.

RECO MINING & MILLING CO.

BRITISH COLUMBIA

Probably dead; see Vol. XIV. Property taken over in 1919 by Noble Five Mng. Co., which see.

RECORD MINING CO.

BRITISH COLUMBIA

Out of business. Described in Vol. XIV. Holdings taken over by California Mining Co., Ltd., which see.

RED CLIFF MINING CO.

BRITISH COLUMBIA

Idle. Bankrupt. Mine at Stewart, Skeena district, B. C. See description in Vol. XII.

RELIEF MINING CO.

BRITISH COLUMBIA

Presumably dissolved; see Vol. XIV. Succeeded by Second Relief Mng. Co., which see.

RENO GOLD MINES, LTD.

BRITISH COLUMBIA

Mine address: Sheep Creek, B. C.

Officers: W. B. Pool, pres.-gen. mgr.; Thos. K. Kirkpatrick, v. p.; Clarence Pool, treas.; Jas. O'Shea, sec., with Michael O'Donnell, directors.

Inc. 1921. Cap. \$1,000,000; \$1 par; 500,000 shares in treasury.

Property: the Reno-Donnybrook group, 16 claims, between Fawn and Hidden creeks, Nelson division, 9 miles from Salmo and 1 mile N. of the Nugget Gold Mines. The 6 veins which have been prospected show a quartz filling carrying about \$20 in free gold; vein widths apparently increase with depth and show somewhat decreased ore values.

Development: by main adit, in 120' (November, 1921) on No. 1 vein, showing 2' of high grade gold ore.

ROCHER DE BOULE COPPER CO.

BRITISH COLUMBIA

Idle.

Address: Butte, Montana. **Mine office:** Tramville, B. C. D. J. Williams, mgr.

Officers: M. S. Browning, pres.; A. Fred Wey, v. p., and S. A. Douglass, directors.

Inc. Oct. 15, 1911, in Arizona. Cap. \$1,000,000; \$1 par; fully issued, fully paid. Listed on Butte (Mont.) Exchange. Annual meeting, October 20.

Property: 6½ claims. Crown grant, 325 acres with 50 acres millsite and 100 acres other lands, in Hazelton section, Omineca division, 9 miles from the Grand Trunk Pacific railroad.

Ore occurs in fissure veins in granite, veins having an E-W strike with dip of 60°. Five ore-shoots developed had average width of 5½", 3,000' long and proven to depth of 150', according to management.

Development: by shaft and 800' tunnel. Copper occurs as chalcopyrite and bornite.

Mine was under lease to Montana Continental Dev. Co. from 1913 to February, 1916, and during this time value of shipments totaled over \$700,000.

Equipped: with 240-h. p. hydro-electric plant; aerial and surface tramways, compressor and saw-mill by lessees, who worked mine on royalty basis.

For several years this mine was the most important in the district, but exhaustion of the developed orebodies in the upper levels caused a decreased

production in 1918, and in October, 1918, the property was shut down until conditions should become normal.

Production: from April, 1915, to the time it closed down, was 39,833 tons of ore, containing 4,214 oz. gold, 62,865 oz. silver, and 5,746,306 lb. copper. For detailed description, see the 1914, 1916, 1917, and 1918 Annual Reports of the Minister of Mines, B. C. For geology see Memoir 110 (1919) Can. Geol. Survey.

ROSEBERY SURPRISE MINING CO., LTD. BRITISH COLUMBIA

Head office: Nelson, B. C. **Operating office:** New Denver, B. C.

Officers: H. L. Hollis, pres.; W. C. Boyden, v. p.; Otto T. Langbein, sec.-treas. J. P. MacFadden, gen. supt.

Property: company owns the Surprise, Ajax and Monitor mines near Sandon, the Bosun mine at New Denver, and the Rosebery mill at Rosebery, B. C.

Bosun mine: near shore of Slocan lake, half-way between New Denver and Silverton, was first worked in 1898, but only acquired by present company in 1917. Vein is large and carries lenses of galena ore carrying zinc blende, but running high in silver. The blende ore is said to assay 70 to 90 oz. silver and between 45 and 55% zinc. Old workings consist of 5 tunnels driven on the vein and opening it to a depth of 400'. Recent work comprises an extension of old workings and driving the lower or No. 6 tunnel a half mile to gain a depth of 800' on the vein. In 1921-'22, much of the output is from the 5th level, and in part from a second vein, 8' wide, discovered in the hanging wall. The lead and zinc ores are said to run 180 and 100 oz. in silver, respectively.

Surprise mine: 3 Crown-granted claims, 93 acres, 2 miles N. E. of Sandon, has lead-zinc ore in a fissure vein in slate. Development: a main tunnel over 3,000' long, with total workings of 15,000'. Mill feed assays 62 oz. silver, 19% lead, and 16% zinc. Output in 1918 totaled 13,998 tons of ore. Closed down in 1920.

Mining and milling operations curtailed during 1920, and in 1921 limited to the Bosun mine. Shipments made to the Trail smelter.

ROSSLAND KOOTENAY MINING CO., LTD BRITISH COLUMBIA

Idle since 1904. **Office:** 325 Crown Court, Old Broad St., London, E. C., Eng. **Mine office:** Rossland, Trail district, B. C.

Officers: C. Williamson Milne, chairman; Dr. G. Schack-Sommer and Lionel W. Harris, directors; W. S. Gregg, sec.

Inc. May 17, 1902, in Great Britain, as a reconstruction of Rossland-Great Western Mines, Ltd., and Kootenay Mining Co., Ltd. **Cap.** £150,000; shares £1 par; issued. £148,607.

Property: 171 acres, at Rossland, carrying auriferous and argentiferous copper ores, of low grade, and 113 acres placer at West Kootenay. The company also owns 2,615 shares of the Santa Eulalia Development Co., Ltd., owning the Nueva Chihuahua property at Santa Eulalia, Chih., Mex. Revolutionary conditions have prevented any work for several years in Mexico.

ROSSLAND VELVET MINES, LTD. BRITISH COLUMBIA

Address: C. E. Nordman, mgr., Rossland, B. C.

Inc. 1920. **Cap.** \$300,000.

Property: the Velvet mine, in Trail Creek division, W. Kootenay district, near Rossland. Ore contains copper and gold. Shipped 310 tons to smelter in 1920.

RUTH MINES, LTD. BRITISH COLUMBIA

Address: Box 122, Kaslo, B. C. **Mine office:** Sandon, B. C.

In 1917, company went into voluntary liquidation and property was offered for sale. Reported in March, 1919, that company was being re-organized. No details of officers or capital.

Property: the Ruth and Hope mines, on Carpenter creek, Slocan division, near Sandon, worked for the Alexander interests of London, by Jas.

Anderson of Kaslo. In 1919, reported that the vein had been cut in the lower tunnel 600' from the portal, and where cut had a width of 8'.

SALMON BEAR RIVER MINING CO., LTD. BRITISH COLUMBIA
Reorganized as the Premier Gold Mining Co., which see.

SANTA ANNA MINING CO., LTD. BRITISH COLUMBIA

Address: 1104 Standard Bank Bldg., Vancouver, B. C. Mine address: John McConville, Gowland Harbor, B. C.

Property: 6 claims on Quadra island, Nanaimo division, 11 miles N. of Heriot bay. The ore carries copper, gold and silver.

SECOND RELIEF MINING CO. BRITISH COLUMBIA

Succeeding the Relief Mng. Co.

Address: Erie, B. C.; or Bayfield, Wisconsin. A. D. Westby, mgr.

Property: the Second Relief mine, and 6 patented claims (186 acres) of former Relief Mng. Co., on Salmon river, in Nelson division, 14 miles N. of Erie, said to show sulphide ore in a quartz fissure vein in diorite. Vein strikes N.-E. with dip of 85°. Pay ore occurs in shoots, from 50-170' wide, and is said to average \$18 per ton in gold.

Development: to 416' depth by 4 tunnels, each 1,200' long.

Equipment: includes 14-drill compressor, pump, steam power and 75-ton cyanide mill.

Mine is credited with production of over \$500,000. In 1918, shipments to Greenwood smelter amounted to 85 tons concentrates resulting from 1,241 tons ore treated. Eleven men were employed and \$13,700 was spent on new equipment. In 1919, a fire destroyed much of the surface equipment. Operations have presumably been resumed since reorganization.

SHEEP CREEK CONSOLIDATED BRITISH COLUMBIA

Mine address: Salmo, B. C.

Property: 8 claims, W. of the Reno group and believed to contain the extension of the Reno veins. A prospect.

SILVEKADO GROUP BRITISH COLUMBIA

Address: Howard Cameron, Stewart, B. C.

Controlled by J. J. Coughlin of Vancouver, et al.

Property: on E. side of Bear river, opposite Stewart, in Portland Canal division, shows a quartz vein, 4 to 14" wide, assaying 5% copper, \$10 in gold and 360 oz. silver per ton. A tunnel is being driven at 2,000' elevation and a tramway constructed. Is a prospect.

SILVER BELL MINE BRITISH COLUMBIA

Owners: R. F. Green of Victoria, and Sam Green. Mine address: W. E. Newton, supt., Kaslo, B. C.

Property: a high-grade silver-lead mine on S. fork of Kaslo creek, Ainsworth division, near the Gibson and Index mines. Ore occurs in a shear-zone either in granite or along its contact with sedimentaries. Ore carries lead carbonate, galena, and native silver.

Development: by tunnels, the longest 270', and raises. Shipped 200 tons of high grade ore in 1920.

SILVER CREEK MINES, LTD. BRITISH COLUMBIA

Address: Revelstoke, B. C. D. Woolsey, mgr., Albert Canyon, B. C.

Officers: J. H. Brasetti, pres.; D. Woolsey, v. p. and mgr.; with Patrick Treanor, directors; H. C. Forsyth, sec.; J. B. Watson, treas.

Inc. Sept., 1918, in British Columbia. Cap. \$750,000; par 50c; issued 700,000 shares; non-assessable.

Property: the Woolsey group, 11 claims, unpatented, about 500 acres, 7 miles by trail from Albert Canyon Sta. on C. P. R. R., shows a fissure vein in slate and gneiss, 23' wide, samples running 6 oz. silver, 6% lead and 6% zinc. Ore is silver-lead, with a quartz gangue.

Development: by tunnels and crosscuts. Property is a promising prospect.

Bonded to C. V. Brennan of Victoria, B. C., at last account.

SILVER CREST MINES, LTD.**BRITISH COLUMBIA****Address:** J. E. Fitzgerald, sec., 420 Rogers Bldg., Vancouver, B. C.**Mine address:** Stewart, B. C.**Cap.** \$50,000; par 25c.**Property:** the Silver Hill group, 11 claims, in Salmon River section, Portland Canal division, on E. side of Dillworth glacier, 14 miles N. of Stewart. Ore is silver-lead.**SILVER CROWN MINING CO, LTD.****BRITISH COLUMBIA****Office:** 429 Rookery Bldg., Spokane, Wash. **Mine office:** Trout Lake, B. C. **Officers:** Fred Hamilton, pres.; A. C. Bartels, v. p.; A. Herman, sec.-treas., with Geo. Skore and H. C. Weyerhoist, directors.**Inc.** Feb., 1917, in Washington. **Cap.** \$125,000; shares 10c par; assessable; 852,250 issued.**Property:** 3 claims, 150 acres, on Ethel Mtn., Trout Lake division, W. Kootenay district.**Geology:** fissure vein in granite and limestone, dipping 45° and pitching N. W. Shoots are from 18 to 36" wide. Ore contains silver and lead, assaying \$125 per ton. **Development:** by 1,300' tunnel to depth of 550'.**Production:** in 1917 was \$65,000. No recent information; probably idle.**SILVERED-COPPER MINING CO.****BRITISH COLUMBIA**

Probably dead. Described in Vol. XIV.

SILVER GABLE MNG. & MLG. CO.**BRITISH COLUMBIA****Address:** Dr. N. M. Baker, Old Natl. Bk. Bldg., Spokane, Wash., or W. B. Smith, Kaslo, B. C.**Property:** in the Ainsworth mining division, W. Kootenay district.**SILVER HOARD MINING CO.****BRITISH COLUMBIA**

Described in Vol. XIII.

Reorganized as the Dellie M. & M. Co., which see.

SILVER KING MINES, LTD.**BRITISH COLUMBIA****Office:** Trail, B. C. **Mine address:** Nelson, Kootenay Lake, B. C.**Officers:** Jas. J. Warren, pres.; S. G. Blaylock, v. p.; T. W. Bingay, sec.; W. M. Archibald and R. S. Lennie, directors. Company is owned jointly by the Kootenay Bonanza Co., and the Consolidated Mining & Smelting Co., of Canada, Ltd., in the proportion of $\frac{1}{4}$ and $\frac{3}{4}$, respectively.**Property:** 5 claims, on Toad mountain, back of Nelson, includes the old Silver King mine, formerly owned and operated by the Hall Mining & Smelting Co., Ltd. Mine is opened by a shaft to the 10th level, showing 3 well defined veins in diabase schist. The ore occurs where the veins are intersected by 2 dikes, and in the altered surface zone is principally bornite, with tetrahedrite, iron pyrites and silver occurring in the unaltered zone below. Gold is present in small amounts. Considerable ore was extracted in the past from above the 5th level in the Main vein. The South vein and the K. vein were practically untouched. Ore reserves are estimated at 100,000 tons. Ore in the main vein has been proven to a depth of 1,130' by diamond drill borings.**Equipment:** includes electrical motors of 50-h. p., a 100-h. p. electric pump, an 1,850' tramway, and all necessary mine buildings. Shut down 1915-16. In 1918 mine was kept unwatered and 6,180' of diamond-drilling was done. No ore was shipped. Diamond-drilling in 1919 amounted to 305'.

Inactive in 1920-21.

SILVER ORES, INC.**BRITISH COLUMBIA****Address:** E. J. Fader, Invermere, B. C.

Company controlled by New York interests.

Property: Hot Punch mine in the Windermere division, E. Kootenay district. Also, the Buyan mine in same district, 7 miles from Wilmer.**SILVERSMITH MINES, LTD.****BRITISH COLUMBIA****Address:** Box 1772, Spokane, Wash. **Mine office:** Sandon, B. C.**Officers:** John B. White, pres., 1017 Paulsen Bldg., Spokane, Wash., with

J. M. Harris, J. P. McGoldrick, H. C. Lambach, F. B. Grinnell, A. C. Burdick and T. S. McPherson, directors. Oscar V. White, gen. mgr.

Company is the successor of Slocan Star Mines, Ltd., which went into liquidation in 1918. Present company organized in 1918, acquired entire assets of Slocan Star Mines at liquidator's sale, assuming a \$90,000 bond issue and delinquent interest amounting to \$11,596; a \$35,000 floating indebtedness was liquidated by issuance of preferred shares. Shareholders of Slocan Star were given share for share upon payment of 3½¢ additional; for every \$5 so paid in, shareholders received one share of preferred stock.

Cap. \$750,000, of which \$250,000 is 7% preferred, par \$5 and \$500,000 common stock, par 20¢; assessable to 5¢. In February, 1920, all outstanding preferred shares were retired and bonds and interest paid off.

Annual report for fiscal year ending May 31, 1921, showed cash assets, \$7,739; government bonds, \$16,452; profit \$20,106. P. & L. surplus, \$1,137.

Dividends: initial dividend amounting to \$25,000, paid Jan. 5, 1921.

Failure of Slocan Star Mines is laid to excessive construction costs due to new milling, hydro-electric, and other equipment, failure to keep development ahead of extraction, and largely lack of sufficient capital.

Property: at Sandon, Slocan division, consists of the Slocan Star and Rabbit Paw groups of 12 Crown-granted claims, which were involved in the protracted and costly apex litigation between the Star Mining & Milling Co., plaintiff, and the Byron N. White Co., for about 10 years. Holdings also include a patented millsite and extensive water rights.

Ore carries silver, lead and zinc, occurring as large shoots in the Slocan Star lode, a strong fissure vein in slate, traceable over a mile. This strikes N. E.-S. W., dips 47° and is 10' wide, bulging in places to as much as 70' across.

Development: by 11 main tunnels, No. 11, the lowest; ingress and egress is through No. 10, a crosscut tunnel 2,100' into the vein, total workings over 15,000'. Reserves have been practically exhausted down to 5th level. From the 6th level to surface, several shoots of sphalerite with siderite gangue were left intact in former years. On No. 10 level, the main oreshoot is 450' long and 6' wide. This orebody is blocked out from the 11th to the 5th level, reserves being estimated at 200,000 tons.

The Ivanhoe mill acquired in 1921, was remodelled and enlarged to 150-tons daily, and put into commission on Dec. 31.

Production: for year ending May 31, 1920, 13,400 tons ore yielding 280 tons shipping ore, 834 tons lead concentrate and 834 tons zinc concentrate, returning \$205,996, with a net profit of \$14,350. In 1920, the mill treated 15,588 tons of ore. Shipments amounted to 134 tons crude ore and 2,021 tons silver-lead concentrate, returning \$260,404. Expenses were \$169,860.

SILVER STANDARD MINING CO. BRITISH COLUMBIA

Office: 506 Winch Bldg., Vancouver, B. C. **Mine office:** W. G. Norrie-Lowenthal, New Hazelton, B. C.

Owners: J. W. Stewart, Angus Stewart, D. McLeod, and the estate of the late A. L. McHugh.

Gross earnings in 1916 were \$49,000, and \$65,000 in 1918; \$71,272 in 1919; \$101,312 in 1920.

Property: the Silver Standard mine, 14 Crown grant claims, 700 acres, 7 miles N. of New Hazelton, in Omineca division, said to show 9 fissure veins in calcareous sandstone, dipping 62° and striking N. 50° E. Veins are from 12 to 72" wide and 4 of them carry profitable ore. Shoots are 100 to 400' long. Ore is a sulphide, mill ore averaging 0.10 oz. gold, 30 oz. silver, 3% lead and 11% zinc.

Development: by 1,400' tunnel to be extended 800', and total of over 4,000' of workings to 500' depth. Mining is by shrinkage stoping. Reserves are 15,000 tons. No. 4 vein has a continuous shoot over 400' long.

Equipment: includes 60-h. p. gas engine, 350 cu. ft. compressor. In 1918, a 50-ton concentrator of the Faust type was completed on Two Mile creek,

about 3 miles from the mine. Ratio of concentration is 5 to 1. Ore is hauled by truck from mine to mill.

Production: in 1918, 90 tons of silver-lead concentrates yielded 38 oz. gold, 14,913 oz. silver, 83,050 lb. lead and 356 tons zinc concentrates yielded 97 oz. gold, 43,363 oz. silver; in 1919, 137 tons silver-lead concentrates, 42 oz. gold, 28,068 oz. silver, 140,919 lb. zinc; and 349 tons zinc concentrates, 96 oz. gold, 43,325 oz. silver, 34,021 lb. lead, 224,539 lb. zinc; in 1920, 279 tons silver-lead concentrate yielded 86 oz. gold, 43,696 oz. silver, 189,488 lb. lead, 66,460 lb. zinc and 601 tons zinc concentrates, 131 oz. gold, 59,324 oz. silver, 73,372 lb. lead and 453,512 lb. zinc.

The property was closed down Dec. 1920, but work was resumed early in 1922.

For geology, see Memoir 110 (1919) Canadian Geol. Survey.

SILVER TIP MINING & DEV. CO., LTD. BRITISH COLUMBIA

Address: 717 Vancouver Blk., Vancouver, B. C. **Mine address:** P. W. Racy, mgr., Stewart, B. C.

Property: 3 claims, Silver Tip group, in Salmon River section, Portland Canal division, 14 miles N. of Stewart, has a quartz vein showing 8" streak of galena with high silver value. Developed by tunnel.

SILVER TIP MINING & POWER CO. BRITISH COLUMBIA

Office: J. H. Beattie, 718 Green Bldg., Seattle, Wash.

Officers: at last accounts. A. Julian, pres.; G. B. Gilfillan, v. p.; M. S. Davys, engr., Kaslo, B. C.

Inc. Jan. 15, 1910, in Washington. **Cap.** \$1,000,000; shares \$1 par; 615,862 issued. **Bonds.** \$700,000 of 7%.

Property: the Lake Side mines, 557 acres, Skagit county, Wash.; also a lease on the Hewitt-Lorna Doone mines in Slocan district, B. C. acquired from Silverton Mines, Ltd., in 1917, but since relinquished. See **Hewitt-Lorna Doone Mines**, in this volume.

SILVERTON MINES LTD. BRITISH COLUMBIA

In 1917 assets, including a lease on the Hewitt-Lorna Doone mines, were transferred to the Silver Tip Mining & Power Co.

Described in Vol. XIII.

SIMILKAMEEN CONS. COPPER CO. BRITISH COLUMBIA

At last accounts property was worked by Pacific Syndicate, Ltd., on which there is no recent information. Company, etc., described in Vol. XII.

SIMILKAMEEN MG. & SM. CO., LTD. BRITISH COLUMBIA

Idle. No recent information. Described in Vol. XIII. **Address,** at last accounts, care Bank of British North America Bldg., Vancouver, B. C. Mine near Princeton, B. C.

SITTING BULL MINING CO. BRITISH COLUMBIA

Address: 838 Henry Bld., Seattle, Wash. **Mine address:** E. D. Smith, supt., Invermere, B. C.

Property: the Sitting Bull mine on Boulder creek, Windermere mining division, said to have high-grade silver-lead ore.

Development: on 5 levels by tunnels. In March, 1919, company had 90 tons of ore sacked for shipment that averaged 132 oz. silver and 29% lead. No work has been done since 1919.

SLOCAN SILVER MINES, LTD. BRITISH COLUMBIA

Successor to McAllister Mng. & Mfg. Co., in 1920.

Address: R. A. Grimes, pres.-mgr. Kaslo, or Three Forks, B. C. W. Riddell, sec.-treas.

Property: McAllister mine on N. fork of Carpenter creek, Slocan division, 3 miles from Three Forks. Ore occurs in a well-defined quartz vein in quartzite, carrying grey copper with values mainly in silver; assays show 33 oz. silver, 5% lead, \$1 gold and 2% copper. Reported that 2 ore shoots, one 600' long, have been uncovered, and that ore reserves containing 1,500,000 oz. of silver, are available.

SLOCAN STAR MINES, LTD.**BRITISH COLUMBIA**

Described in Vol. XIII. Went into liquidation in 1917 and entire assets acquired by **Silversmith Mines Ltd.**, which see.

SNOWSTORM & IONA GROUPS**BRITISH COLUMBIA**

Address: Stuart Henderson, owner, P. O. Box 638, Victoria, B. C.

Property: 23 claims, in Highland valley, 29 miles from Ashcroft on the C. P. R. R., reported under examination by the Provincial government, under the "Mineral Survey & Development Act". On the Snowstorm, 5,736' of diamond drilling opened up an orebody varying in width from 8-18' and assaying 1-2.7% copper. On the Iona, a tunnel is in 225' in quartz carbonate formation. Development continued during 1920.

SNUG COVE COPPER CO., LTD.**BRITISH COLUMBIA**

Address: C. M. Oliver, mgr., 419 Rogers Bldg., Vancouver, B. C. **Mine office:** Bowen Id., B. C.

Property: several claims adjoining those of the Bowena Copper mines on the N., on the E. side of Bowen island, 12 miles W. of Vancouver. They contain shear-zones, one carrying copper sulphides. A 160' adit was driven, but no ore was cut.

SOHO CONS. MINES, LTD.**BRITISH COLUMBIA**

Address: Sherwood Bldg., Spokane, Wash. **Mine address:** Sandon, B.

C. J. C. Ryan, mgr., 1610 Gardner St., Spokane, Wash.

Property: Soho silver-lead mine on Carpenter creek, Slocan division, W. Kootenay district, shows 4 veins. Developed by 100' shaft, etc.; total workings over 3,000'.

SOUTH EASTER MINING CO.**BRITISH COLUMBIA**

A subsidiary of the Northern Customs Concentrators, Ltd., of Cobalt, Ont. A. S. Holmes, local mgr., Skidegate, Queen Charlotte Islands, B. C.

Property: 7 claims, one mile from Skidegate, shows 3 quartz veins; one, with commercial ore traceable on surface over 1,000', is 8 to 10' wide, and assays \$8 to \$15 gold per ton.

Development: by 100' shaft, with several hundred feet of workings on the 50 and 100' levels.

Closed most of 1919. Reorganization underway.

SPOKANE MINING & DEV. CORP.**BRITISH COLUMBIA**

Office: Nelson, B. C.

Officers: J. A. McLean, pres.; F. A. Starkey, v. p.; Chas. F. Caldwell, v. p.; C. M. Leamonth, sec.; W. F. Baker, treas., with H. T. Hodge, and M. C. Monahan, directors. C. M. Mohr, managing director.

Inc. May, 1917, in British Columbia. Cap. \$1,500,000; par \$1.

Property: the Beasley-Monarch mine, 6 claims, near Beasley, 8 miles west of Nelson, shows 2 fissure veins between diorite footwall and granite hanging-wall. Vein matter consists of quartz, calcite, pyrite, and chalcocopyrite. No. 1 vein is proven for 800' by open cuts and pits, and varies up to 20' in width. Several cars of ore shipped assayed 3¼% copper, and \$1.50 to \$2.00 gold and silver per ton. No. 2 vein opened by open cuts and 150' tunnel, is said to be traceable for a mile on surface. Also the St. Anthony gold mine in same district.

In 1919, the Monarch was taken under bond and lease by Falls Creek Copper Mng. Co. (q. v.), and is being explored by diamond drills under direction of C. M. Mohr.

SPOKANE ROCHER DE BOULE MINING CO.**B. C.**

Idle and probably dead. Fully described in Vol. XIV.

STANDARD FINANCE CO.**BRITISH COLUMBIA**

See **Lightning Cr. Gold Gravels & Drainage Co.**

STANDARD SILVER-LEAD MINING CO., LTD.**B. C.**

Offices: 507 Empire State Bldg., Spokane, Wash., and Silverton, B. C.

Officers: W. J. C. Wakefield, pres.; Geo. H. Aylard, v. p.-gen. mgr.; Chas. Hussey, sec.-treas., Victoria, B. C., with L. K. Larson and W. A. Corey, directors. W. H. North, asst. mgr.

Inc. Dec. 1910, in Washington. Operated under present management

since 1911. Controlled by the Finch-Campbell-Clark estates of Spokane, **Cap.** \$2,000,000; shares \$1 par; fully paid; all issued. Annual meeting, first Tuesday in May. Security Transfer & Registrar Co., New York, registrar and transfer agent. Listed in Spokane and on New York Curb.

Annual report for 1920 shows: total receipts, \$216,609; expenditures, \$143,197; operating profit, \$73,412. Cash balance, \$367,173.

On Sept. 30, 1921, surplus was \$411,887, compared with \$366,275 on June 30, the increase including \$1,401 for lead, etc., and \$43,688 net from Beer, Sondheimer settlement.

Dividends: 1912, \$425,000; 1913, \$650,000; 1914, \$475,000; 1915, monthly rate of 2½% commenced September 10, total for year, \$250,000; in 1916, \$600,000; in 1917, \$300,000; none since; a total of \$2,700,000 to 1921.

Property: 10 full claims, 6 fractions, 600 acres, 2 miles N. E. of Silverton, located on Slocan Lake. The claims carry fissure veins in slate and graphitic schist. Ore carries silver, lead and zinc in a quartz-pyrite gangue. Silver occurs as gray copper and ruby. The orebodies occur in the form of lenticular masses along the vein, varying in width from 1' to 25'.

Development: tunnels numbered from 1 to 8, inclusive, open the vein to a depth of 1,200'.

Equipment: 150-ton concentrator, flotation unit, hydro-electric power plant on Four Mile creek and an 8,000' tramway connecting mine and mill.

Production: in 1917, silver-lead ore realized \$881,616; in 1918, \$112,898; in 1919, \$198,419; in 1920, \$182,879.

The mine was sold (July 1921) for \$50,000 to Clarence Cunningham and associates.

Company is looking for a promising new property. Expended about \$5,000 in 1920 on the Wellington group in Whitewater section of Ainsworth mining division, but dropped option.

STAR MINING & MILLING CO.

See Silversmith Mines Ltd.

STEMWINDER MINING CO., LTD.

Address: 43 Victoria St., Toronto, Ont. **Mine address:** Kimberley, B. C.

Property: the Stemwinder and Ontario group in Fort Steele division, E. Kootenay district, near Kimberley, adjoins Cons. M. & S. Co's Sullivan mine. Ore carries silver, lead and zinc.

STIKINE MINING CO.

Address: S. Silverman, 1 Wall St., New York. Controlled by A. B. C. Metals Co., Alaska Bldg., Seattle, Wash.

A. B. C. Metals owned or controlled 600,000 shares of 750,000 issued.

Property: 6 claims, 156 acres, at Grand Rapids, in the Stikine district, accessible from Wrangell, Alaska. Tunnels have been driven in limestone, revealing bunches of zinc blende, but indications are not considered encouraging. Presumably idle.

SUNLOCH MINES, LTD.

Address: Trail, B. C., or 717 Vancouver Blk., Vancouver, B. C. **Mine address:** Sooke, B. C.

Mine was acquired in 1917 by Cons. M. & S. Co., Ltd., and is controlled through majority stock ownership.

Directors: W. M. Archibald, pres.; T. W. Bingay, S. G. Campbell, S. G. Blaylock and W. O. Miller. John Hanna, supt.

Property: Sunloch group, 22 claims, on Jordan river, 42 miles by road from Victoria; also an option on adjoining Vulcan group. A logging railway connects the property with tidewater.

Geology: the copper deposits occur on, or near both contacts of a gabbro dike. Ore consists of a sheared and hornblende basalt, carrying a large proportion of finely disseminated chalcopyrite. Alternating layers of rich and lean ore give a banded appearance. Small grains of pyrite are plentifully distributed in the ore.

Development: has been confined almost entirely to one claim, Sunloch No. 6, on which there are 3 well-defined ore-bearing zones, known as

BRITISH COLUMBIA

BRITISH COLUMBIA

BRITISH COLUMBIA

BRITISH COLUMBIA

the River, Cave, and Archibald lodes. A tunnel on the River zone cut 5' of 1.9% copper ore, 20' of 3.7% ore, and 3' of 3.8% ore, partly opening 280' along vein at a depth of 240'. An adit on the Cave zone passed through 60' of 4% ore; at 180' a crosscut S. cut 60' of 0.9% ore, 20' of waste, 36' of 2.58% ore, including 11' of 5.1% ore, this at a depth of 240' from surface. A diamond drill hole, 150' farther in than the crosscut and at a depth of 400' cut about 15' of ore assaying 0.65 to 7.9% copper. Less work has been done on the Archibald zone, but it is considered equally promising. Work on opposite side of river shows that the Cave zone continues into the Vulcan group.

Management estimated from 100,000 to 150,000 tons of 3 to 5% ore at end of 1918. Since then, exploration has opened additional ore. Development in 1920 was continued until October, when work was suspended.

Development on the property has shown that property has merit and fully warrants further development.

SURF INLET GOLD MINES

BRITISH COLUMBIA

Corporation sold its property to **Belmont Surf Inlet Mines, Ltd.**, for 20% of the capital stock of that company.

SURPRISE MINE

BRITISH COLUMBIA

Owned by **Rosebery Surprise Mining Co.**, which see.

TACOMA STEEL CO.

BRITISH COLUMBIA

Office: Tacoma Bldg., Tacoma, Wash. Mine office: Vananda, Texada Island, B. C.

Officers: S. R. Balkwill, pres.; E. M. Shelton, v. p.; A. F. Eastman, sec.-treas.-gen. mgr.; D. C. Stephens, supt.

Cap. \$50,000. Paid five \$35,000 dividends.

Property: 208 acres of iron ore lands on Vancouver Island, and the **Marble Bay copper mine**, 3,000 acres, Crown-granted, near Marble Bay harbor, at the northern end of Texada Island.

Geology: the Marble Bay is a high grade copper mine of the contact metamorphic type, yielding bornite ore carrying 5 to 10% copper with gold-silver values. The orebodies are detached and occur in a thick limestone formation altered to garnetiferous marble. The ore lenses vary from 5' to 200' long and 10' to 50' wide. The largest was 15'x20' and 502' vertically. On the lower levels, the ore is essentially unchanged. The limestone lies flat and is cut on the 1,700' by granodiorite, impregnated with sulphides.

Development: by a 1,600' three-compartment shaft and several thousand feet of workings. A 45° winze extends 365' below the 1,500' level; a new level was opened from it at 1,700', equal to 1,619' vertical. At the bottom of the winze the ore assayed 2.8% copper, 0.5 oz. silver, and 0.72 oz. gold. The stope between the 1,500' and 1,600' levels is up to 65' high, 70' long, and 8' wide. In 1920, only diamond drilling done between 16th and 17th levels. Work in 1921 on 1,700' level disclosed small orebodies, not sufficiently large to warrant extraction, with copper at 14 cents. Orebodies, though rich, are not continuous, necessitating expensive exploration work to develop new ones. See Victor Dalmage, Econ. Geol., Oct., 1921, p. 372.

Equipment: includes steam and electric power, with 5 hoists, 5-drill and 10-drill air compressors. There is a wharf, on Marble Bay, having large ore bunkers, connected with the mine by a ground tram. In connection with the mine there is a limestone quarry and 4 kilns, with daily capacity of 300 bbls. of lime.

Production: 11,697 tons of gold-silver-copper ore in 1917; 626,422 lb. of copper in 1918.

TALTAPIN MINING CO., LTD.

BRITISH COLUMBIA

Address: W. Sanders, sec., 416 Standard Bank Bldg., Spokane, Wash. A. Wood, mng. dir. Mine office: Burns Lake P. O., B. C.

Property: the Silver Fox claim, on Taltapin lake, Burns Lake section, Omineca division. The main vein, 8' wide, shows quartz ore carrying lead, copper and silver, in part milling and in part high grade. Developed by a

TARHEEL COPPER CO., LTD.**BRITISH COLUMBIA**

C. J. Lincke, supt., Golden, B. C.

Property: the Tarheel group of claims, near Golden on the middle fork of the Similkameen river, Golden mining division.

TASSOO MINING & SMELTING CO., LTD. **BRITISH COLUMBIA**

Out of business. Property now owned by F. C. Elliott, of Victoria, B. C., and J. E. Cortell, of Seattle, Wash., described, Vol. XIII.

TATLAYOKO GOLD MINES CO., LTD. **BRITISH COLUMBIA**

Address: Squamash, B. C.

Property: 6 claims on Chromium creek, tributary to Klinaklena river, northern part of Nanaimo division. A quartz vein, with strike S. 20° E. and dip of 37°, cuts a series of dikes; the width is from a few inches to several feet. Ore carries gold and silver, one sample assaying 3.5 oz. gold and \$26 in silver per ton. Lenses of stibnite also occur. Developed by 4 tunnels. Equipped with saw mill and assay office. A concentrator is contemplated. Reported that \$50,000 had been expended to Jan. 1, 1921.

TAYLOR ENGINEERING CO., LTD. **BRITISH COLUMBIA**Is the holding company for **Taylor Mng. Co.**, which see.**TAYLOR MINING CO., LTD.** **BRITISH COLUMBIA**

Subsidiary of Taylor Engineering Co., Ltd.

Address: 850 Hastings St., W., Vancouver, B. C. **Mine address:** C. B. North, mgr., Alice Arm, B. C.

Officers: A. J. Taylor, pres.; with R. P. Butchart, H. C. Chiene, C. M. Rowlson, and J. F. Tener, directors. John Anderson, sec.

Inc. in June, 1919, with capital of \$1,500,000, \$1,200,000 paid up, by the Taylor Eng. Co., to take over the property of the Dolly Varden Mines Co. This ended a legal squabble that tied up the property for some time, and was a much discussed matter in the Provincial Legislature. The Taylor Engineering company constructed a railway from tidewater to the mine, but the Mines company failed to pay for the work done, which drove the Engineering company into financial distress, as it owed \$462,500 borrowed to pay construction bills. Meanwhile, the Dolly Varden company gave the Temiskaming Mining Co., of Ontario, an option on the mine for \$900,000. Finally, the Legislature gave owners 10 days in which to pay off all labor claims and the Engineering company's account. The D. V. mines company defaulted, so the Engineering company took possession and organized the Taylor Mining Co. On Sept., 1921, Geo. Wingfield brought suit against the company for \$182,322, to cover a \$150,000 mortgage and accrued interest, due July 31, 1921.

Property: the **Dolly Varden** and **Wolf** silver mines, 480 acres of patented ground, on the Kitsault river, Nass River division, 18 miles from Alice arm, near Granby bay. Railroad connects mine with tidewater, 18 miles distant. Mine is described in "Eng. & Mng. Jour." of March 13, 1920, by Robert Dunn.

Geology: ore occurs in a shear zone in andesite, the ore being considered as secondary. Near the surface native silver occurs in extremely rich streaks. Lower down, ruby silver, argentite, and stephanite also occur and at 270' in depth ruby silver is the principal mineral. Fine-grained pyrite, carrying good value in silver occurs from surface to bottom level (300'). Faulting and cross-fissuring is common and make a complex structure.

Development: to depth of 1,200' by 6 tunnels, connected by raises. Besides this tunnel work, diamond drilling is said to have developed about 45,000 tons of ore. Samples of shipping ore gave 244 oz. silver, 18% lead, 12.4% zinc.

The Wolf group: 2 miles N. of the Dolly Varden, on opposite side of

river, also belongs to the Dolly Varden group. Ore is similar to the Dolly Varden, though a little lower in silver.

Development: consisting of 85' of tunnels, 770' of open cuts, and 4,900' of diamond-drilling has shown probable existence of 120,000 tons ore containing about 1,800,000 oz. silver, and over 400,000 tons of lower-grade ore.

Equipment: includes 18-mile narrow gauge railway from mine to Alice Arm and 2,000' aerial tram, etc. Railway was extended to Wolf mine in 1920. There is also a steam plant, 400 cu. ft. air compressor, machine shop, dwellings, cook and bunk-houses and dock at Alice Arm. A 500 h. p. hydro-electric plant was installed, 1920.

Production: shipments to Anyox and Tacoma smelters from Sept. 1, 1919 to Sept. 1, 1920, amounted to 1,170,000 oz. silver. Heavy snowfalls closed railway in December, but a force of men was retained for development work until end of 1921.

TEXAS YANKEE GIRL MNG. CO., LTD. BRITISH COLUMBIA

Subsidiary of **Mining Corp. of Canada, Ltd.**, Cobalt, Ont. **Mine address:** W. T. McDowell, supt., Ymir, B. C. A. W. Newberry, mgr.

Company in 1920 acquired holdings of **Hobson Silver Lead Co.**, at Ymir, in the Nelson division, which see, for description.

TIDEWATER COPPER CO., LTD. BRITISH COLUMBIA

Address: 227 Pemberton Blk., Victoria, B. C. **Mine office:** Sidney Inlet, B. C.

A subsidiary of the Alaska British Columbia Metals Co., 135 Broadway, New York. H. B. Price, pres.-gen. mgr. The A. B. C. Co. owns 90% of entire stock issue. Dan M. Drumheller, Jr. supt.

Inc. in Washington. **Cap.** \$1,000,000; par \$1. **Bonds:** \$300,000, 7-year, 7% first mortgage conv., guaranteed by A. B. C. Co.

Property: 8 claims, 400 acres, also an 80-acre manufacturing site on the beach, 200 miles N. W. of Seattle, Wash., by boat to Sydney inlet on west coast of Vancouver Island, B. C. Mine known as Dewdney, or Indian Chief, has been worked by many different companies since 1897, and is said to have produced 15,000 tons of 4½% copper ore. Ore is a contact deposit of garnetized limestone containing bornite, with small quantities of chalcopyrite and chalcocite, capping a granodiorite hill. The present company acquired the property in 1916 and has expended \$800,000 in development work and equipment. The Yreka claims on Quatsino sound were bonded in 1919.

Development: by tunnels. During 1919, No. 2 and 3 S. side adits were extended 400' and 200', raises and drifts totaled 600', and diamond-drilling 1,000'. Diamond drilling was continued throughout 1920-'21.

In the Annual Report for 1919, it is estimated that "As this orebody (the South) is exposed in the underground workings nearly 400' below the surface of the mountain, it is possible that a tonnage of approximately 250,000 tons may be available without sinking."

Equipment: water-power, 350 h. p. in 4 units, ore bins, 3,000' aerial tram, compressor, crushers, ball and tube-mills, and 300-ton flotation plant, making a recovery of over 94%. The concentrates average 35% copper. Costs are reported as 9¢ per lb. of copper. The mill was closed down early in 1921, and development work only performed during that year; operations were resumed Feb., 1922.

TOBY CREEK MINING CO., LTD. BRITISH COLUMBIA

Address: 850 Hastings St. W., Vancouver, B. C. **Mine office:** Athalmer, B. C.

Officers: M. H. Leggat, pres.; E. O. Connish, v. p.; D. G. Lockyer, sec.-treas.; W. L. Smith, mgr., 824 Broadway, Seattle, Wash., with D. D. Young, F. R. Begg, B. W. Greer and C. F. Lee, directors.

Inc. May 17, 1920, in B. C. **Cap.** \$300,000; \$1 par; 82,000 shares in treasury, May, 1921.

Property: Silver King and Maple Leaf claims, on S. fork of Toby creek. Windemere division, East Kootenay district. Developed by 200' tunnel and 100 tons of silver-lead ore reported ready for shipment.

TOFINO COPPER CO.**BRITISH COLUMBIA**

Dead. Was a subsidiary of the Alaska British Columbia Metals Co., operating a group of copper-silver claims on Copper Creek, Vancouver Island.

TRAIL MINING CO., LTD.**BRITISH COLUMBIA**

Address: c/o R. C. Crowe, Trail, B. C. Mine address: A. W. McCune, Jr., Salmo, B. C.

Property: near Salmo, Nelson division, W. Kootenay district, developed by a tunnel, 600' long, Sept. 1, 1921. Oxidized lead ore with silver values occurs in a vein reported to be 16' wide.

TRAIL SMELTER**BRITISH COLUMBIA**

Owned by Consolidated Mining & Smelting Co. of Canada, Ltd., and described under that title.

TREASURE MOUNTAIN MINING CO.**BRITISH COLUMBIA**

Idle. Described in Vol. XIV.

TRIUNE GOLD & SILVER MNG. & MFG. CO., LTD.**B. C.**

Successor to Minnesota G. & S. Mng. & Mfg. Co.

Address: R. H. Battey, mgr., Ferguson, B. C.

Property: the Triune mine, near Ferguson, in the Trout Lake division, at an elevation of 7,500'. A quartz vein, carrying galena, iron pyrite, and blende, lies in slates, which rest on a footwall of schist. The average of 18 cars of ore was 34% lead, 6 to 9% zinc, 0.5 oz. gold, and 182 oz. silver.

Development: by 4 tunnels. No. 4 is in 600' in slate, with no ore showing, but indications seem promising. Further development necessary.

TROJAN MINING CORP.**BRITISH COLUMBIA**

Address: 837 Henry Bldg., Seattle, Wash. Mine address: F. D. Smith, supt., Athalmer, B. C.

Property: Trojan mine on Slade creek, Windemere division, E. Kootenay district, shows a quartz fissure vein carrying copper.

Equipment: includes 35 h. p. gas engine and compressor. Active development was underway in 1919, but no later information available.

TRUE FISSURE MNG. & MLG. CO., LTD.**BRITISH COLUMBIA**

Address: T. W. Mitchell, sec. 229 E. 6th St., Cincinnati, Ohio. Mine address: Ferguson, B. C.

Cap. \$2,500,000; par \$1.

Property: 8 crown-granted claims, and 160-acre millsite, in Trout Lake division, West Kootenay district, ½ mile from Ferguson, shows silver-lead-zinc ore with some gold, which assays to 75 oz. silver, 35% lead, 25% zinc, and 0.15 oz. gold. Developed by tunnels. Active in late 1921.

TYEE COPPER CO., LTD.**BRITISH COLUMBIA**

Smelter and assets sold in December, 1916, to the Ladysmith Smelting Corp'n, Ltd., which see.

UNION COPPER MINING CO.**BRITISH COLUMBIA**

Address: D. Campbell, 503 Pender St., Vancouver, B. C.

Property: the Union group of claims, on the N. side of Knight inlet, Nanaimo division, Vancouver Island. No ore has been found, so far as the 280' adit and 54' crosscut have been opened. Quartz, carrying iron pyrite, occurs in a belt of metamorphosed sediments of slaty structure.

UNION MINING CO.**BRITISH COLUMBIA**

Address: Grand Forks, Lewis Johnson, part owner and mgr.; company not incorporated.

Property: 4 claims, 150 acres, Gloucester camp, Grand Forks division, Yale district, shows gold-silver ore.

Development: by 4 tunnels, with several hundred feet of workings. New work consists of a crosscut N. from No. 2 tunnel and a drift on the vein is said to be 22' wide and to assay \$20 per ton. The shaft is being continued to 300' depth. The mine is 27 miles from rail, and transportation and smelting charges absorb most of the value. Owners have been trying to raise money to build a mill.

turned \$31.80 per ton; in 1918, 153 tons assaying \$6.20 to \$12.80 gold and 31-50 oz. silver per ton; in 1919, 81 tons assayed 31 oz. silver and 0.28 oz. gold.

UNITED METALS MINING CO.**BRITISH COLUMBIA**

Address: T. C. Nutter, mgr., Alice Arm, B. C.

Property: 3 claims, Illiance section, in Skeena division, 11½ miles N. E. of Alice Arm, showing numerous quartz veins in sedimentaries; continuity of ore-shoots in length and depth is very irregular. Mineralization consists of galena and zinc-blende, carrying silver values. Property has been undergoing exploration, no ore being shipped, though 50 tons of ore was sacked, ready for shipment, late in 1919. The work done during that year did not open the vein to any advantage.

In 1919, all right, title, and interest in the company was sold to D. J. Hancock and T. C. Nutter for \$25,000; the only remaining interest the stockholders have is the division of the money to be paid by them.

UTICA MINES, LTD.**BRITISH COLUMBIA**

Address: T. R. French, Kaslo, B. C.

Officers: Chas. F. Caldwell, pres.; T. R. French, sec.-treas., with H. R. Wade, F. T. Abey, and V. D. Williamson, directors. W. C. Sivyer, R. H. Voorhees and W. Tolman, directors.

Inc. in British Columbia. **Cap.** \$2,000,000; \$1 par; 1,600,095 issued; 200,000 shares offered at 10c each in December, 1919, to pay pressing debts. Auditors' report, January 12, 1918, showed cash on hand, \$213; buildings, equipment, etc., \$28,470; mine, \$1,427,945; stock discount, \$184,628; total assets, \$1,690,310. Liabilities included accounts payable, \$6,994; bills payable, \$7,500; profit and loss, \$75,690. An initial dividend of 2c was paid in June, 1917, followed by 2c in September. These two dividends, together with fact that smelters refused to accept the ore on account of the high zinc content, left the treasury in a depleted condition at end of year.

Property: on 12 Mile creek, Ainsworth division.

Development: by tunnels to 1,200' below vein outcrop. Workings cover over 6,000'. In 1918, the mine operated only about 3 months, due to lack of funds. Output was 222 tons of ore, which produced 13,661 oz. silver, and 10 tons lead. Company operations were suspended in April, 1919, but resumed later by lessees. Shipments for 3 months in 1919 amounted to 155 tons, containing 17,360 oz. silver and 26 tons of lead.

In 1921-22, property was under lease to O. C. Thompson and W. B. Horton who have opened 2 ore shoots, 18 and 24" wide. A 2,000' crosscut tunnel is being driven to attain 250' additional depth. The former is also lessee of the North Star mine.

VALDEZ ISLAND COPPER CO., LTD.**BRITISH COLUMBIA**

Address: 220 Pemberton Blk., Victoria, B. C.

Officers: F. H. Rosher, pres.; S. F. Rosher, sec., Capt. F. N. D. Rosher, mgr., with G. A. Fraser, directors.

Cap. \$500,000; shares non-assessable.

Property: Copper Mt., or Ingersoll group, 19 claims and a fraction, about 1,000 acres, at head of Gowland harbor, on Quadra Island, N. W. of Nanaimo, is one of oldest locations on coast, but has never been thoroughly prospected until recently. Ore is chiefly chalcocite and bornite, with alterations to carbonate oxides and native copper, occurring along joint planes and shear-zones, apparently as isolated orebodies of lenticular shape. The Senator and Copper Mt. claims have the best showing and yielded most of the ore shipped in 1918 and 1919 (300 ton). Development on this claim has been mostly in open-cuts. Dump samples give 3.5% copper; no precious metals.

Total shipments to date, about 3,000 tons.

VAN ANDA COPPER & GOLD MINES CO., LTD.**B. C.**

Inactive. H. W. Treat, gen. mgr., and L. Goodacre, trustees; Jas. Raper, agt., Van Anda, B. C. Company is presumably alive, but not operating.

Property: 20 claims, crown-granted, 840 acres, including the Copper Queen, Cornell and Little Billie mines.

The Copper Queen mine has lenses of rich ore, mainly bornite, with some chalcopryite along a diorite-limestone contact. The deposit has one main ore-shoot, 150' long and 30' wide. See Texada Id., B. C. by R. G. McConnell, Geol. Survey Canada Memoir 58, 1914, pp. 566-64.

The Copper Queen shaft is 600' deep with a winze 240' deep on the 500' level. In 1918 the mine was operated under lease by Thomas Davis, of Seattle, Wash.

VANCOUVER MINING DEV. SYNDICATE **BRITISH COLUMBIA**
See Volume XIV.

VAN ROI MINING CO. **BRITISH COLUMBIA**
Controlled by Le Roi No. 2. Ltd., Rossland, which holds 63,193 ordinary and 10,483 preference shares, out of 90,000 and 30,000 issued.

Office: Leonard Rowell, 4 Broad St. Place, London, E. C. 2, Eng.
Mine office: Silverton, B. C.

Directors: Lord Ernest Hamilton, chairman; A. B. Dealtry, T. J. Lloyd, supt.

Inc. July 9, 1908. **Cap.** £34,500 in 30,000 £1 pfd. and 90,000 1s. ordinary shares.

Property: the Vancouver group at Silverton, Slocan division, bonded to Clarence Cunningham in 1916 for \$225,000 and credited with production under his management, of \$350,000. The option was relinquished in October, 1921.

VICTOR SILVER LEAF MINING CO. **BRITISH COLUMBIA**
Address: 612 6th Ave., Spokane, Wash. **Mine address:** Fort Steele, B. C.

Officers: R. Abernethy, pres.; E. R. Abernethy, sec.; C. E. Berry, treas.; all of Spokane, with Geo. F. Gundry, and John Tospon, directors.

Cap. \$1,500,000; par \$1.

Property: 3 claims, on Maus creek, 10 miles E. of Fort Steele, said to show gold-silver-lead-zinc ore in 3 shoots. No shipments have been made, though sorted ore is said to assay \$100 per ton.

Development: by tunnels, longest 400'

Property is being operated by **Fort Steele Operating Co.**, which see.

VIKING COPPER CO. **BRITISH COLUMBIA**
Presumably idle. See Vol. XIV.

WALLACE MOUNTAIN MINES, LTD. **BRITISH COLUMBIA**
Address: H. B. Morley, sec., Box 176, Penticton, B. C. **Mine address:** Beaverdell, B. C.

Property: the Sally silver group on Wallace Mtn., Greenwood division, reported leased to Glenville A. Collins in 1921.

Production: in 1920 amounted to \$80,000. Present output said to run 300 to 400 oz. silver per ton of ore, with some lead.

WALTERS INVESTMENT CO. **BRITISH COLUMBIA**
Address: Geo. H. Walters, Empire State Bldg., Spokane, Wash. Controls **Waverly-Tangler Mng. Co.**, which see.

WASHINGTON MINES, LTD. **BRITISH COLUMBIA**
Address: W. H. Burgess; Kaslo, B. C. or Rambler, B. C.

Directors: J. L. Retallack, O. T. Stone and W. H. Burgess, sec., all of Kaslo, B. C., and Clive Pringle, Ottawa, Ont. Same interests in control of the Whitewater mine.

Inc. in British Columbia. **Cap.** \$300,000; par \$1; assessable.

Property: Washington and Slocan Bay groups, Ainsworth division, was for several years the largest shipper of that section, but ore became baser in depth and property was closed down in 1911. Mine is said to contain large bodies of complex lead-zinc ore in its lower levels, which can now be profitably concentrated.

Was operated by lessees, 1919-'20.

WAVERLY-TANGIER MINING CO.**BRITISH COLUMBIA**

Reported organized in 1920 by Walters Investment Co., Empire State Bldg., Spokane, Wash., who bonded and reopened the mine in 1918.

Property: the Waverly-Tangier group on Downie creek. Revelstoke division, first prospected in 1896 by Gold Fields of British Columbia, Ltd. Several veins have been opened up containing silver, lead, gold and copper.

Development: by 3 tunnels, longest 650', raises and crosscuts, totaling 3,300' of old workings to vertical depth of 450.

A wagon road to Albert Canyon, 25 miles to the S. E., is being repaired and development work is to be continued.

WELLINGTON GROUP**BRITISH COLUMBIA**

Address: H. W. C. Jackson, lessee, Slocan, B. C. **Mine address:** Retalack, B. C.

Property: on Whitewater creek, Ainsworth division, was being developed by Standard Silver Lead Mng. Co., but option relinquished in 1920.

WESTERN BELLE MINING CO.**BRITISH COLUMBIA**

Idle or dead. See Vol. XIV.

WESTERN MINES EXPLORATION SYNDICATE**B. C.**

Address: J. D. Kearns, sec., 470 Granville St., Vancouver B. C. P. H. Fraser, mgr., Harpers Camp, B. C. **Property:** a placer gold property at Quesnel, in Cariboo mining district.

WESTERN MINING & DEVELOPMENT CO.**BRITISH COLUMBIA**

Dead. See Vol. XIII.

WEST KOOTENAY POWER & LIGHT CO., LTD.**B. C.**

Controlled by Consolidated Mining & Smelting Co.

Office: Rossland, B. C.

Company owns three hydro-electric plants with a revenue-producing load of 23,712 h. p., current being supplied to mines and works along the International boundary. Company is an important accessory to mining in British Columbia.

WESTMOUNT MINE**BRITISH COLUMBIA**

Address: H. D. Lea, lessee, Slocan City, B. C.

Property: on Enterprise creek, 8 miles from Slocan lake, located in the early nineties, worked continuously from 1905 to 1914, and now being actively worked by lessees. The main vein, from 3 to 6' wide, consists of decomposed granite with quartz in granite. Ore carries silver, lead, and zinc.

Development: by 4 adits and extensive drifting, etc. Present work consists of stoping between No. 3 and 4 levels. Shipped 3 carloads to the Trail smelter in 1919.

WHALE CHANNEL MINES CO., LTD.**BRITISH COLUMBIA**

Address: A. H. Wallbridge, sec.-treas., 333 Homer St., Vancouver, B. C.

Company organized in December, 1919, to develop 6 claims on Princess Royal Island, Skeena division, 3 miles north of the Belmont Surf Inlet mine. A 1,500' tunnel was to be driven to open a 12' vein which had been traced for 3,500' on surface.

WHITWATER MINES, LTD.**BRITISH COLUMBIA**

Address: W. H. Burgess, sec.-mgr., Retalack, via Kaslo, B. C. Is also manager of Washington Mines, Ltd.

Property: one of the earliest producers in Ainsworth division, was sold over 20 years ago to Whitewater Mines, Ltd., of London. Credited with total production of \$3,300,000. Mine at Retalack, on a branch of the C. P. R. R., has been worked under lease since 1918 on a 20% royalty basis, employing 15-20 men.

Production: 1918, consisted of 409 tons of silver-lead ore, and 135 tons silver-zinc ore. In 1919, 619 tons of silver-lead ore and 202 tons of silver-zinc ore were shipped to smelters.

WOLF GROUP**BRITISH COLUMBIA**

See Taylor Mining Co., Ltd.

WONDERFUL GROUP MINING CO. BRITISH COLUMBIA

Address: care Clarence Cunningham, Alamo, B. C. **Mine address:** Sandon, B. C.

Property: 9 claims, in 2 groups, on Carpenter creek, Slocan division, acquired from Miller Creek Mng. Co. and the original Wonderful Group Mg. Co., in 1913, for \$75,000. Ore is lead-silver.

New owner seems to have found the main vein so unsuccessfully sought by former owners, as it was reported in 1918, that \$125,000 worth of ore had been shipped, and the daily output in September, 1919, was 100 tons. Ore is milled in the Alamo concentrator at Alamo, on the Kaslo-Nakusp Ry. Operations curtailed in 1920 owing to lack of labor.

YALE DEVELOPMENT & CONSTRUCTION CO. B. C.

Has a 25-year lease on property of Olalla Copper Mining & Smelting Co., fully described in Vol. XIV.

YMIR-WILCOX DEV. CO., LTD. BRITISH COLUMBIA

Idle many years. Described in Vol. XIV.

MANITOBA

The Province has a rich mineralized belt that extends easterly for 100 miles from the Saskatchewan border, at Lake Athapapuskow, to Herb lake (formerly called Wekuska). The deposits at Flin Flon, Schist and Copper lakes are near the west end of this belt, and include the Great Sulphide mine, Mandy mine and several other properties. The Pine Root area, on the east arm of Athapapuskow lake, is said to rival the Flin Flon. At Herb lake, at the east end of the belt, the Rex mine, Dauphin and 3 other properties are being opened up.

The Flin-Flon and Schist Lake districts have attracted much attention since 1916, because of the large size and richness of the copper deposits found there. They are situated 650 miles N. W. of Winnipeg and 90 miles N. W. of The Pas, northern Manitoba, and reached by steamer from The Pas to Sturgeon lake, thence 40 miles east to Flin Flon lake.

The rocks are greenstones, conglomerates, etc., intruded by quartz-porphry dikes and masses. The ores are sulphides and carry copper, gold and silver, with some zinc.

The region was described in detail by R. C. Waccale, Commissioner of Northern Manitoba, at the Pas, "Mining and Mineral Prospects in Northern Manitoba."

BELLEVUE MINING CO. MANITOBA

Succeeded by Selkirk Gold Mng. Co., which see.

BINGO MINES, LTD. MANITOBA

Office: Jos. Myers, pres., 401 Montreal Trust Bldg., Winnipeg, Man. R. J. Kennedy, supt., Herb Lake, via The Pas, Man.

Inc. 1920. Cap. \$2,000,000; \$1 par. Stock offered at 50c.

Property: the Bingo mine, in Herb Lake section of The Pas district, 20 miles from Hudson's Bay Ry., northern Manitoba, near the Rex mine of the Herb Lake Gold Mines, Ltd., developed by 170' shaft, showing 12" of quartz assaying high in gold.

Developing. Favorably reported on by Prof. J. S. De Lury of Manitoba University.

Company apparently controls the **Pas Cons. Mines** (q. v.) and is reported to have an option on the **Rex** mine.

BROOKLYN MINING CO. MANITOBA

Address: Bert Clarkson, pres., 57 Market Arcade, Buffalo, N. Y., or care R. E. Hickey, 509 Paris Bldg., Winnipeg, Man. A. L. Anderson, supt.

Property: in Gold Lake area, Big Rice Lake district. Quartz veins, 2' maximum width, occur in shear zones in porphyry; the ore is gold-bearing. Development began in spring of 1919, and includes 2 shafts with greatest depth of workings 110'.

BRUCE CONS. GOLD MINES, LTD.**MANITOBA**

Address: 849 Somerset Bldg., Winnipeg, Canada.

Officers: Col. Wm. Grassie, pres., with E. D. Alderson, W. B. Tobias, J. J. Papineau and Dr. Halpenny, directors.

Cap. \$2,500,000; par \$1.

Property: 275 acres in Gold Lake area, Big Rice Lake district.

CALUMET-CORBIN MINES CO.**MANITOBA**

Presumably dead; see Vol. XIV. Company was succeeded by Dominion Gold Mining Co.

CANADIAN MNG. & LEASING CORP.**MANITOBA**

Property: Cabin claim, adjoining the Morrison No. 1 claim of the Lake Superior Corp. in Rice Lake district, acquired for \$50,000 from Algoma Exploration & Development Corp. in 1921. Company also reported operating property of Gold Pan Mines, Ltd., under lease in 1922.

CHICA MINING CO.**MANITOBA**

Address: 605 Wolvin Bldg., Duluth, Minn. Mine address: The Pas, Man. C. S. Power, sec.

Property: the Chica claim at Athapapuskow lake, the Pas district, near mouth of Pine Root river, shows a narrow zone of porphyry flanked by conglomerate, with granite intrusions. Drilling in 1918-19 to depth of 400' is reported to have found a lens of chalcopyrite at the porphyry conglomerate contact.

COMMONWEALTH GOLD MINES, LTD.**MANITOBA**

Address: 236 Curry Bldg., Winnipeg, Man. Geo. H. Porter, mgr.

Property: the Commonwealth claim at Gold lake, Big Rice Lake district, shows quartz outcrops in granite. The quartz carries free gold, pyrite and chalcopyrite.

COPPER KING MINING CO., LTD.**MANITOBA**

Address: 910 Somerset St., Winnipeg, Man. E. E. McLosky, mgr.

Property: on the shore of Winnipeg Lake, The Pas district, 2½ miles from mouth of Wanipigow river, shows pyrite and chalcopyrite, with quartz and calcite, disseminated throughout a shear zone of granite gneiss. Ore lenses and stringers are from a few inches to 3' wide, and will perhaps average 1% copper. Some drilling has been done.

DEEP GOLD ROCK MINES, LTD.**MANITOBA**

Address: 242 Main St., Winnipeg, Man. D. A. Urquhart, mgr.

Property: the Ginney group, near Bulldog lake, Big Rice Lake district. A shear zone up to 15' wide in schist, shows quartz lenses and stringers, with free gold and pyrite present in both quartz and schist. Surface work was being done during 1921.

DEVLIN MINING & DEVEL. CO.**MANITOBA**

Address: 232 Portage Ave., Winnipeg, Man. F. T. Carruthers, sec.

Property: 20 claims, at Rice Lake, Twp. 17, R. 15, Bird River district, 15 miles from the C. R. Ry. Ore is chalcopyrite and nickelliferous pyrrhotite in a norite-granite contact. Is a prospect.

DOMINION GOLD MINING CO.**MANITOBA**

Presumably dead; see Vol. XIV. Was a successor to Calumet-Corbin Mines Co. The Gold Pan and Gold Seal claims, said to have been a part of Dominion company's holdings, now owned by Gold Pan Mines, Ltd., which see.

FLIN FLON MINE**MANITOBA**

Address: Mining Corporation of Canada, Ltd., Bank of Hamilton Bldg., Toronto, Ont. Wm. Koerner, mgr.

Property: 10 claims, including the Flin Flon mine, on the E. side of Flin Flon lake, 90 miles N. W. of The Pas, Northern Manitoba.

Geology: the orebody, partly in Manitoba and partly in Saskatchewan, occurs in a shear-zone striking N. W. and dipping 70° E. The rock is greenstone, in places amygdaloidal, intruded by quartz-porphyry on the hanging-wall side. The footwall is a talcose rock that is probably a basic dike. The

deposit has been formed by replacement and shows courses of unmineralized rock, while the main orebody is a lens of solid sulphide made up of pyrite, sphalerite, chalcopyrite, and magnetite, with gold and silver values. The disseminated ore on the hanging wall, though low in copper, is fairly high in gold and silver, while on the footwall the reverse obtains.

Development: preliminary work was by trenching and diamond-drilling. In all, 44 holes were put down, a total of 25,664', to depth of 1,600', proving the orebody over a length of 2,500' and 300' width, and revealing 16,812,296 tons of probable ore and 2,975,100 tons of possible ore. The average content is 1.82% copper, 3.49% zinc, \$1.60 gold and 1.2 oz. silver. In 1920, \$400,000 was spent on underground work. No. 1 shaft is 200' deep with 498' of crosscutting and 260' of drifting on the 200' level. No. 2 shaft is 300' deep with a 170' crosscut on the 100' level and a 185' crosscut on the 300' level.

Equipment: includes that bought from the Mandy company nearby, and a complete camp of a dozen log cabins.

A majority interest in property was sold to the Mining Corp. of Canada, May, 1921, after option held by W. B. Thompson had been dropped.

GABRIELLE MINES, LTD.

MANITOBA

Address: 207 Scott Bldg., Winnipeg, Man.

Officers: A. C. Gray, pres.-mgr.; E. A. Pelletier, v. p.; C. A. Millican, sec.-treas., with J. W. Sifton and B. Stuart Mackenzie, directors.

Inc. 1919, in Manitoba. **Cap.** \$1,000,000; \$1 par; 459,268 shares outstanding, March, 1921. Annual meeting 2nd Thursday in September.

Property: 2½ claims, patented, about 110 acres, near Rice lake, Big Rice Lake district, said to show 4 quartz veins containing gold-silver-platinum.

Development: by 132' shaft and 125' tunnel. Further development planned when necessary funds available.

Unfavorably reported on by J. B. Tyrrell, and property closed down, August, 1921.

GOLD PAN MINING CO.

MANITOBA

Officers: Jas. H. Ashdown, pres.; F. O. Fowler, v. p.; Gordon McCavish, sec.-treas., with E. F. Hutchings, S. Hart Green and Sam Scott, directors. J. A. Borthwick, supt.

Property: Gold Pan and Gold Seal claims at Big Rice Lake, 130 miles N. E. of Winnipeg, located on the same vein, which is traceable at surface for 3,000'. The ore occurs in lenses of gold-bearing quartz.

Development: on the Gold Pan by 191' shaft and 42' winze to depth of 230', also about 500' of drifting; on the Gold Seal, a 210' shaft and drifting said to show a 4½ quartz vein, carrying free gold, pyrite, chalcopyrite and sphalerite.

Equipment: includes 3-stamp mill, 3-drill compressor, boilers and hoist.

Company ceased work on the Gold Pan mine in 1920 and is now reported developing the Gold Seal claim. Property reported under option to Canadian Mng. & Leasing Corp'n. (1922).

GORDON MINE

MANITOBA

Address: J. P. Gordon, owner, The Pas, Man.

Property: at Copper Lake, The Pas district. Drilling in 1920 is said to have shown a lode width of 45' and mineralization increasing with depth. Ore is gold-bearing.

GREAT SULPHIDE CO.

MANITOBA

Described in Vol. XIV. See **Flin Flon Mine.**

GREAT WEST GOLD MNG. CO., LTD.

MANITOBA

Address: Winnipeg, Man. R. S. Ripstein, mgr.

Property: the Apex and Eva group, in Big Rice Lake district, N. of Turtle lake, developed by 58' shaft showing a 5' vein assaying \$27 in gold per ton. Active in 1921.

HERB LAKE GOLD MINES, LTD.**MANITOBA**

Offices: The Pas, Manitoba, Canada, and Makeever Bros., mgrs. of the Mines Development Syndicate, 170 Broadway, New York City.

Officers: M. M. Makeever, pres.; J. S. Cooper, v. p.; Sanford Makeever, sec.-treas., above with C. C. Pringle, J. R. Campbell, Barney Asran, directors. Walter Neal, mgr.; J. R. Campbell, supt., Herb Lake, via The Pas, Manitoba.

Inc. in Manitoba, Canada. **Cap.** \$1,000,000; par \$1; all issued.

Property: 7 claims, includes the Rex mine, on N. E. shore of Herb (Wekusko) lake, The Pas district, said to show a quartz fissure vein 3' wide in hornblende schist, traceable for a distance of 1,700'. Ore carries free milling gold reported to average \$27 per ton. Pay ore shoot is 75' long, depth not determined. Overhand stoping methods are used for mining ore.

Development: by 65° incline shaft, 270' deep, and 500' of workings.

Equipment: 5x7" steam hoist, 300 cu. ft. air compressor, pump, 30-ton Lane amalgamation mill, with Deister-Overstrom tables; also assay office and complete camp.

Production: from May to November, 1918, reported to have shipped gold bullion to value of \$27,323.

Mine closed in Nov., 1918 on account of labor shortage, was reopened July, 1920. Reported under option to Bingo Mines Co. in 1921.

HITRITRITE MINE**MANITOBA**

Property: one of many groups in N. W. quarter of Twp. 19, R. 14 E., in southern Manitoba, 85 miles N. E. of Winnipeg. Pyrrhotite and chalcopyrite occur in norite, similar to that at Sudbury. Assays show nickel, copper and a little platinum.

INDEPENDENCE MINES, LTD.**MANITOBA**

Address: care H. B. Redmond, mgr., Winnipeg, Man.

Property: near the lake in Big Rice Lake district, has the same general characteristics as the Gabrielle mine (q. v.). Ground has been developed to a considerable degree.

KISKI MINING CO., LTD.**MANITOBA**

Controlled by **North Canada Expl. Co., Ltd.**, which see.

Address: 303 Merchants Bk. Bldg., Winnipeg, Man. **Mine address:** The Pas, Man. H. V. Hudson, sec.

Property: the Kiski-Wekusko group at Herb lake, The Pas district, upon which the first gold discovery of this area was made. Three veins have been uncovered; No. 2 is up to 6' wide and has been opened by a shaft. Vein filling consists of quartz, tourmaline and arsenopyrite carrying gold; some copper and lead are present.

LAURA MINES, LTD.**MANITOBA**

Address: 759 Fleet Ave., Winnipeg, Man. T. Duff Smith, mgr.

Inc. in October, 1919. **Cap.** \$2,000,000.

Property: located in the Big Rice Lake district. The ore is gold-bearing.

MAMMOTH MINING CO.**MANITOBA**

Address: 705 McIntyre Bldg., Winnipeg, Man. **Mine address:** The Pas, Man. John Connor, pres.

Property: the Apex group near Herb lake, The Pas district, shows a highly silicified zone of mineralization in granite, carrying pyrite, some chalcopyrite and gold. Mineralization has been traced for 1,000', and has an average width of 15 to 20'. Assays range \$1.50 to \$24 in gold. In spring of 1921, company was in litigation over title.

MANDY MINING CO.**MANITOBA**

Address: Geo. R. Bancroft, supt., The Pas Manitoba, Canada.

Subsidiary, by a 78% stock control, of the Tonopah Mining Co. of Nevada, with head office at Bullitt Bldg., Philadelphia, Pa.

Cap. \$100,000.

At end of 1919, current assets were \$523,484, and liabilities, \$347,549,

of which \$327,465 was indebtedness to Tonopah Mng. Co.; for 1920, these figures were \$632,011 and \$267,906, with \$248,938 due the mother company. The net operating profit for 1919 was \$217,452, and surplus, \$168,318; for 1920, \$243,131 and \$289,105, respectively.

Property: at Schist lake, north of The Pas, is developed by 200' shaft and diamond-drill exploration below this depth. Orebody as opened showed 25,000 tons of chalcopryite, averaging 20% copper and \$5 in gold and silver, surrounded by 180,000 tons of low grade ore, assaying 6.5% copper 25% zinc and \$5 in precious metals: the latter is too poor to mine under present conditions. All of the high grade ore was extracted by March, 1919, and work was suspended.

Equipment: includes hoist, tramway, barges, etc., reported to have been sold in part, March, 1920, to syndicate developing the Flin Flon property.

Production: final shipment of 7,510, tons made in 1920. Gross value of shipments has been; in 1917, \$233,026; in 1918, \$527,516; in 1919, \$629,666 and in 1920, \$417,157; total, \$1,807,365, with a total net profit at the mine of about \$500,000. Charges for transportation were necessarily high, about \$20 per ton to R. R. point alone.

MANIGOTAGAN MNG. & DEVEL. CO.

MANITOBA

Address: 215 Curry Bldg., Winnipeg, Man.

Property: the Moose group near Rice lake in Big Rice Lake district, shows gold-bearing quartz lenses in a wide, well-defined shear zone in schist, near its contact with a granite intrusion. The main quartz body, 2 to 6' wide has been opened by an 100' shaft.

MINES DEVELOPMENT SYNDICATE

MANITOBA

Address: Makeever Bros., Managers, 262 Washington St., Boston, Mass., or 170 Broadway, New York City. F. G. Stevens, chief cons. engr.

Syndicate is a co-operative association. Organized January, 1919. Each investor holds pro-rata share. On Jan. 1, 1922, paid in capital was about \$600,000, of which Makeever Bros. contributed \$180,000. The syndicate took over properties and work of the Mines Exploration Syndicate, which had been formed to run but 2 years. This syndicate develops properties before making cash payments for title.

Properties: under development include: (1) The Rex gold mine, in Manitoba, developed and equipped with a mill and now held by the **Herb Lake Gold Mines, Ltd.**, which see; (2) A one-fourth interest in the Northern Manitoba; (3) A controlling interest in the Candelaria Mines, at Estencita, Jalisco, Mexico, on which one mile of development work has been done, but the mill not yet completed; (4) Owns the Tajitos and Espinosa mining properties in state of Nayarit, Mexico; (5) Oil interests as follows; twelve (12) producing wells at Centerville, Kansas; 1,036 acres in Warren county, Kentucky, on which 8 wells have been completed; a fourth interest in 4,740 acres in Fort Norman oil field of Northern Alberta, 640 acres of which adjoin those of the Imperial Oil Co.'s original discovery.

MINES EXPLORATION SYNDICATE

MANITOBA

Described in Vol. XIV. Succeeded by **Mines Development Syndicate**, which see.

NORTH CANADA EXPLORATION CO., LTD.

MANITOBA

Succeeds Northern Manitoba Mng. & Dev. Co., a Makeever promotion, described in Volume XIV.

Address: 170 Broadway, New York, or care J. F. Caldwell 395 Broadway, Winnipeg, Man. **Mine address:** The Pas, Man. H. J. Bickel, sec.; R. Kerr, mgr.

Inc. 1919.

Company controls the **Kiski Mng. Co., Ltd.**, which see.

Property: Moosehorn gold claim on Herb lake, via The Pas, northern Manitoba. Limited development done and small shipments made by former company. Practically idle, 1920-21.

NORTHERN COPPER & NICKEL MINES **MANITOBA**

See same title under **Ontario**.

NORTHERN MANITOBA MINING CO. **MANITOBA**

Address: The Pas, Manitoba.

Officers: H. S. Hohnson, pres.; R. Kerr, sec.

Cap. \$1,000,000; par \$1.

Is a local enterprise, financed by The Pas people.

Property: 3 gold claims at Herb lake, The Pas district. Developed by 120' shaft. A one-car shipment in 1918 is said to have given returns of \$81 per ton, but work was stopped on account of lack of money.

Equipment: costing \$12,000, includes a 40-h. p. boiler, and a compressor.

NORTHERN MANITOBA MINING & DEV. CO. **MANITOBA**

Described in Volume XIV. Succeeded in 1919 by **North Canada Exploration Co., Ltd.**, which see.

PAN EXTENSION GOLD MINES CO., LTD. **MANITOBA**

Address 220 Curry Bldg., Winnipeg, Man.

Officers: H. B. Montgomery, pres.; John Beckman, mng. director-sec-treas., with Wm. Buckley, E. J. Harden and Wm. D. Shaw, directors.

Inc. in Manitoba. **Cap.** \$3,000,000; \$1 par; stock offered at 50c.

Property: in Big Rice Lake district, adjoining the Gold Pan mine and presumably on the same orebody. The vein is $4\frac{1}{2}$ ' in width, with 3' of quartz, showing galena and free gold.

Development: by 200' shaft; work to be continued in conjunction with Gold Pan, under management of J. A. Borthwick.

Pan Extension stock has been rather extravagantly exploited in the press by the Canadian promoters.

PAS CONSOLIDATED MINES, LTD. **MANITOBA**

Address: 410 Montreal Trust Bldg., Winnipeg, Man. C. G. Ashwin, mgr., The Pas, Man. Company controlled by Bingo Mines, Ltd.

Property: the Elizabeth-Dauphin group, 6 claims, 1 mile N. of the Rex. A 50' shaft has been sunk in quartz, opening a 3' vein.

Operations suspended awaiting more favorable conditions.

PENNIAC GOLD REEF MINES, LTD. **MANITOBA**

Succeeded by **Star Lake Gold Mines, Ltd.**, which see.

REX MINE **MANITOBA**

Controlled by **Herb Lake Gold Mines**, which see.

SELKIRK GOLD M. CO. **MANITOBA**

Reorganization of the **Bellevue Mng. Co.**

Address 502 Huron and Erie Sts., Winnipeg, Man. J. D. Sinclair, sec.; Frank Phillips, supt.

Property: the Luleo mine at Hole river, Big Rice Lake district, reopened under new management in 1922.

STAR LAKE GOLD MINES, LTD. **MANITOBA**

Office: 509 Merchants' Bank Bldg., Winnipeg, Manitoba, Canada.

Officers: W. R. Milton, pres.; J. H. Hicks, sec.; J. W. Harris, treas.; with E. R. Potter and John Smith, directors.

Inc. Nov., 1915, to purchase the property of the Penniac Gold Reef Mines, Ltd. Terms of purchase were as follows; owners agreed to take 333,333 shares of stock and set aside 33,333 shares for development purposes. Stockholders in the Penniac Mines to receive 200,000 shares and to pay to the Star Lake \$25,000 to liquidate liabilities of old company, amounting to \$15,000, and leave a surplus for development work. Star Lake Co. agreed to have \$100,000 in treasury within 6 months from November, 1915, otherwise vendors could cancel agreement. 125,000 shares offered to public at \$1 par.

Cap. \$1,000,000; \$1 par; 500,000 issued. "An extraordinary 'speculative investment' is offered to the public for a limited number of 6% preferred shares at par, to be redeemed later at 15% above par," is the wording of a circular.

Property: 6 patented claims, 200 acres, on Star Lake, eastern Manitoba, said to show a quartz vein in a shear zone of Keewatin conglomerate near a contact between granite and schist. Vein minerals include quartz, gold-bearing pyrite and arsenopyrite. The Penniac company is reported to have spent \$100,000 on development work, consisting solely of test pits and a 90' shaft, said to disclose two lodes. The main shear zone is said to be 200' wide, with two main and several lesser parallel quartz veins with strike N. 35-45° E. and dip N. W., all showing gold in payable quantities. Property reported on by R. C. Wallace, University of Manitoba; W. H. Jeffrey, W. J. Tretheway of Toronto, and J. Tait Milliken of Colorado.

Development: by 95' shaft and 150' tunnel.

Equipment: includes a 5-ton mill, office and several buildings. Management planned extensive development and banked on platinum content of the ore to make large profits. No recent information, probably idle.

NEW BRUNSWICK

EASTERN CANADIAN COPPER CORPORATION, LTD. N. B.

Mail returned 1918, from former address.

Fully described in Vol. XIII.

INTERCOLONIAL COPPER CO. NEW BRUNSWICK

Office: P. O. Box 294, Pawtucket, R. I. **Mine office:** Dorchester, Westmoreland county, N. B.

Officers: Darius L. Goff, pres.; T. J. Edwards, sec.; F. J. Powers, treas.

Has been idle several years. Operations will probably never be resumed. Property: described in Vol. XIII.

NORTH AMERICAN ANTIMONY SMELTING CO., LTD. N. B.

Address: Stanley Elkin, pres.; St. John, N. B.

Mine address: Antigonish, N. B.

Is a prospect containing a small vein of good ore.

NOVA SCOTIA

Sixteen gold mines were operated in 1921, but the combined output was but 1,650 tons of ore crushed, yielding 379 ounces gold, or \$4.65 per ton.

BRADFORD MINES, LTD. NOVA SCOTIA

Address Tangier, Nova Scotia. A. L. Schneider, mgr., or care W. C. Milner, Halifax, Nova Scotia.

Officers: T. Heffler, pres.; A. E. Abrams, v. p.; W. C. Milner, sec-treas., with Paul J. Engel, Jr., 37 Wall St., New York, and G. J. Partington, Halifax, directors.

Inc. Oct. 3, 1914, in Nova Scotia. **Cap.** \$1,000,000; \$1 par; outstanding, 440,000 shares. Transfer office and registrar, Security Reg. & Transfer Co., New York. Listed on New York Curb.

Property: the Bradford mine, 264 acres, in Tangier gold district, Halifax county, 40 miles by steamer from Halifax. Ore occurs in several gold-bearing "leads," varying from 3" to 18" in width, with milling ore, averaging $\frac{1}{2}$ -1 oz. gold per ton.

Development: by 630' three-compartment Kent shaft with 4 crosscuts driven E. and W. at 22', 340', 500' and 600'. Also has 80' Bradford and 50' Reese shaft.

Equipment: hydro-electric plant, compressor, 20-stamp mill, machine and blacksmith shop and buildings.

Output to 1917 estimated at \$700,000.

Employed 12 men in 1921 and added 4 transformers, rock crusher and other machinery.

CAPE BRETON COPPER CO., LTD.**NOVA SCOTIA**

Mine near Coxheath, Cape Breton county, N. S.

Cap. \$2,000,000.

Property: the old Coxheath mine and adjoining lands, 10 miles, from Sidney, Cape Breton, shows several cupriferous veins, of which the principal, averaging 10' in width, traverses felsite and diorite, carrying lenses of argentiferous and auriferous chalcopyrite, in a silicious gangue, ore averaging about 4.5% copper. Deepest shaft 420'. Idle many years.

CARIBOU GOLD MINES, LTD.**NOVA SCOTIA****Address:** Caribou, N. S. G. H. Lawlor, mgr.

Property: the H. F. Ross mine in Halifax county, Caribou district, developed by 2 shafts connected on the 130' level. Produced 305 tons of ore yielding 137 oz. of gold in 1920, to September, when mine was closed. No production 1921 and reopening dependent on labor conditions.

CHETICAMP COPPER CO., LTD.**NOVA SCOTIA**

Idle. Office: 37 Sackville St., Halifax, N. S. **Mine office:** Cheticamp, Inverness county, N. S.

Officers: Edward Staris, pres.; John W. Regan, sec.-treas.; Milton V. Grandin, supt., at last accounts.

Inc. May, 1904, in Nova Scotia. **Cap.** \$3,000,000; shares \$1 par, as a merger of the Eastern National Copper Co., Ltd., and 3 other corporations.

Property: 950 acres, freehold, also a 200-acre mill and smelter site, 1,000 acres timber lands, and 200 acres water frontage, with a government license for exploring and locating mines on 50 sq. miles.

Property shows a mineralized zone, in micaceous schist, of 350' width, traceable 1½ miles, carrying 4 orebodies, of which 3 are developed by a 200' shaft and by tunnels of 25', 35' and 115', claimed by company to show 250,000 tons of exclusively sulphide ore, averaging 2.5 to 3.5% copper, 18% lead, 30 oz. silver and \$2 to \$30 gold per ton. Nearest railroad is 38 miles, but mine is only 5 to 6 miles from tidewater. Property considered promising, though estimates of tonnage and values are excessive.

CONSOLIDATED MANGANESE CO., INC.**NOVA SCOTIA**

Address: H. H. Burham, mgr., New Ross, Lunenburg county, Nova Scotia. Promoted during the war, now idle and machinery for sale.

Property: the Granite pit and Bone pit mines, yielding soft or pyrolusite ore in upper workings with hard, or manganite ore beneath it. **Development:** includes 196' Kane shaft.

Equipment: concentration mill, hoist, and pumps, etc.

Mill treated 400-500 tons of ore, mainly from the 85' level of the Kane mine, in January, 1921. Closed down since.

Production: 150 tons of manganite ore and 30 tons of pyrolusite ore in 1921.

DOMINION MINING CO.**NOVA SCOTIA**

Probably dead. See Volume XIV.

E. H. GLADWIN & CO.**NOVA SCOTIA****Address:** E. H. Gladwin, mgr., Beaverdam, Halifax county, N. S.

Property: the Austin-Thomas mine, prospected for five years past, by shallow shafts, 25' to 30' deep, on 2"-8" gold quartz leads, showing 3 pay shoots.

Production: in 1921, 55 tons crushed in mill, yielding 11 dwt. gold.

Employs 8 men.

GOLDENVILLE CONS. MNG. CO., LTD.**NOVA SCOTIA**

Fully described in Volume XIV. Successor, 1916, to Goldenville Cons. M. Co., Ltd. Reorganized in 1919 as **Sherbrooke Mines & Power Co., Ltd.**, which see.

GREAT BRAS D'OR MINING CO.**NOVA SCOTIA**

Baddeck, Victoria county, N. S. **Mine office:** Middle River, Victoria county, N. S. D. J. Patriquin, mgr. Operates a gold mine. Last production reported was 775 tons ore, yielding 262 oz. gold. No recent returns.

ALEX GREENOUGH**NOVA SCOTIA**

Address: Oldham, Halifax county, N. S.

Property: covers the Galena lead, 8" thick. Milled 85 tons, 1921, giving 13 oz. 2 dwt. gold with 16 tons on dump.

HALL & HITCHIE MINE**NOVA SCOTIA**

Address: Herman Hall, mgr., Caribou, Halifax county, N. S.

Property: the Monroe and Elk Mines, first named showing several small quartz leads, 4" to 10" thick, intersected by "angulars" and carrying free gold.

Development: by Holman Monroe and Bob Wright shafts and several pits. During 1921, only surface work done.

Equipment: includes 10 stamp gold mill, with Wilfley table and 10 h. p. engine, 3 drill compressor, etc.

Employs 5 men.

Production: 40 tons milled yielded 74.25 oz. gold.

W. P. C. INGLIS MINE**NOVA SCOTIA**

Address: S. O. Mason, foreman, Mount Uniacke, Hants county, N. S.

Property: the Hayes mine, reopened 1921, developed to 90' depth, showing 6"-14" ore.

Employs 5 men.

LAKE COPPER MINING CO., LTD.**NOVA SCOTIA**

Idle. Office: care Dr. H. Mackay, New Glasgow, N. S. Mine office:

Polson's Brook, Antigonish county, N. S. A. G. Baillie, gen. agt.

Inc. January, 1908. Cap. \$2,500,000 share \$1 par.

Property: 6,400 acres, on Polson lake, said to show a vein 5' thick, traceable a mile and carrying auriferous, and argentiferous copper ore. Mine has a 103' shaft with 554' of workings.

LOON BROOK MINING CO., LTD.**NOVA SCOTIA**

Office: 1 Leys Ave., Letchworth, Herts, Eng. Mine office: Montague, N. S. E. Romilly Smith, mgr.

Operating a gold property and 10-stamp mill with cyanide unit in Montague district, N. S.

Last production reported was 118 tons of ore, which yielded 400 oz. gold. No recent returns.

MONTAGUE GOLDFIELDS, LTD.**NOVA SCOTIA**

Head office: 80 Granville St., Halifax, N. S. Mine office: E. S. R. Smith, mgr., Montague, Halifax county, N. S.

Officers and directors: Jas. Farquar, pres.; E. S. Romilly Smith, gen. mgr.; R. G. Rent, sec.-treas.; A. C. H. Gerhardi, supt.

Property: the Montague gold mine, in Halifax county, shows the usual thin gold quartz "leads" in anticlinal folds with pay ore where crossed by "angulars", or fractures.

Development: by 300' shaft with 800' of work on 280' level and stoping lengths of 700' to height of 100' to 200'. New 500' shaft planned for 1922.

Equipment: includes 25-stamp mill, tube mill and a 100-ton barrel-amalgamation plant.

In 1921, new equipment included 30-h. p. gasoline engine, 2 Gould pumps, etc.

Examined in 1921 by J. Lindsay Allen who spent 3 months at mine for British interests. This work disclosed a 26-inch quartz vein, traceable 2 miles, opened for 200' and said to run \$9 per ton. The St. Patrick vein, 18' wide, is said to run \$18 per ton.

Employs 5 to 25 men.

Production: 1921, was 80 tons milled, yielding 159.6 oz. gold.

NOVA SCOTIA MOLYBDENUM CO., LTD.**NOVA SCOTIA**

Address: Union Bk. of Canada, Halifax, N. S. Mine address: New Ross, N. S. H. C. Burchell, mgr.

In 1918 company was operating a molybdenite deposit at New Ross, Lunenburg county. Ore occurs in a pegmatite dike and is said to assay ½-1% molybdenum sulphide. Developed by 100' shaft.

H. P. & J. H. PURCELL MINE **NOVA SCOTIA**

Address: Sheet Harbor, Halifax county, N. S.

Property: shows 7"-14" vertical vein of quartz in hard slate and diabase. Ore carries galena and free gold, one sample of 50 lbs. assaying \$195 per ton.

Development: slight. Employs 4 men.

RENFREW GOLD MINES, LTD. **NOVA SCOTIA**

Controlled by M. J. O'Brien, Ltd., 511 Union Bk. Bldg., Ottawa, Ont.

Mine address: Renfrew, N. S. B. McConnell, mgr.

Property: the Renfrew gold mine in Hants county.

H. F. ROSS MINE **NOVA SCOTIA**

Address: H. F. Ross, Caribou, N. S.

Owned by **Cariboo Gold Mines, Ltd.**, which see.

SHEELITE MINES, LTD. **NOVA SCOTIA**

Controlled by M. J. O'Brien, Ltd., 511 Union Bk. Bldg., Ottawa, Ont.

SHERBROOKE MINE & POWER CO., LTD. **NOVA SCOTIA**

Organized 1919 to succeed Goldenville Cons. Mining Co., Ltd., was a reorganization, 1916, of Goldenville Mining Co., Ltd.

Address: 170 Summer St., Boston, Mass.

Mine office: Goldenville, Guysboro county.

Officers: D. E. Makepeace, pres.; E. B. Estes, sec.; J. A. Floyd, treas., with A. C. Post, W. E. Bremmer, Z. F. Rooke, W. W. Johnson and H. N. Wright, directors. J. W. Warner, mgr.

Inc. June 1, 1919, in Nova Scotia. **Cap.** \$2,400,000; \$1 par; 2,000,000 outstanding. Bonds authorized, \$60,000; \$25,000 outstanding.

Property: 501 acres on St. Mary's river, Goldenville, Guysborough county, said to show quartz veins in anticlines of slate and quartzite. Pay ore occurs in 3 belts, with narrow quartz seams containing coarse gold.

Development: by vertical and incline shafts to 750' depth, with 5,500' total workings. New work being done on 160' and 260' levels of Stewart shaft, with stopes 40' high and 100' long on Stewart and Strike lodes.

Equipment: includes 500 h. p. hydro-electric power plant, 50 h. p. electric hoist, 1,000 cu. ft. compressor, turbo-pump and 40-stamp mill.

Idle in 1920. Mine was unwatered and 10-stamps in operation, for 4 months, 1921, milling 1,390 tons yielding 75.3 oz. gold.

Employs 25 men.

WENTWORTH COPPER CO., LTD. **NOVA SCOTIA**

Idle.

Inc. 1907, to acquire lands, bought at foreclosure sale, of the Cumberland Copper Co. Company apparently holds property for speculation purposes as no work has been done since purchase.

WEST GORE ANTIMONY CO. **NOVA SCOTIA**

Property: the Rawdon mine, at West Gore, N. S., opened 1884. Company is closely allied with the St. Helen's Smelting Co., Manchester, England, which refines the product.

The main deposit is up to 4' wide and has been opened for 200' on one level. The ore consists of stibnite and native antimony, associated with pyrite, quartz and calcite. Country rock is a soft slate.

Development: by shafts, the main one, 502' deep, with a 332' winze below this level.

Production: about 1,200 tons of ore monthly, yielding 110 tons of concentrates containing 38 to 45% antimony. No recent information. Inactive, 1921.

ONTARIO

Much of the data herein is abstracted from the valuable reports issued by the Ontario Department of Mines.

ACME GOLD MINES, LTD.

ONTARIO

See **Hollinger Cons. Mines, Ltd.**

ADANAC SILVER MINES, LTD.

ONTARIO

Office: Excelsior Bldg., Toronto. **Mine address:** Haileybury, Ont., Can.

Officers: R. A. Cartwright, pres.; Alex. Faskin, v. p.; M. R. Cartwright, treas. and managing director; with E. M. Campbell, and C. L. Sherrill, directors; Jas. Aitcheson, sec.

Inc. March, 1915, in Ontario. **Cap.** \$3,000,000; \$1 par; 2,825,122 shares issued. Trusts & Guarantee Co., Ltd., registrar and transfer agent.

A merger with the Victory company to form a \$3,000,000 corporation. Adanac to get \$1,000,000 in shares, will take place in 1920.

Property: in Coleman Twp., Cobalt district, adjoins the Temiskaming, showing smaltite, niccolite, and a little silver.

Development: by 420' shaft. Diamond-drilling from the 310' level was commenced in December, 1919, but only small pockets of ore were found. The mine was closed down early in 1920.

AETNA GOLD MINES, LTD.

ONTARIO

Address: 340 Confederate Life Bldg., Toronto, Ont. **Mine address:** So. Porcupine, Ont. C. H. Lambert, sec.

Inc. March 8, 1918. **Cap.** \$1,000,000.

Property: in Whitney Twp., Porcupine area, Timiskaming district.

ALADDIN COBALT, LTD.

ONTARIO

Liquidators: Frank F. Fuller, sec., 638 Salisbury House, London Wall, and R. Simpson, Finsbury Pavement House, both London, E. C. 2, England. **Mine address:** Cobalt, Ont.

Directors: D. H. Herbert, chairman, Lt. Col. Chas. Gold, Capt. C. R. E. Jorgensen, and S. B. Peech.

Registered April 23, 1913. Acquired all the capital of the **Aladdin Cobalt Co., Ltd.**, registered in Canada with a capitalization of \$500,000, shares \$5 par. Canadian shareholders received 5 fully-paid £1 shares for every two \$5 shares held. Controls Chambers Ferland Co.

Cap. £500,000; shares £1 par; 499,993 shares issued.

Company in voluntary liquidation since 1919, property becoming a part of Kirkland Lake Proprietary (1919) enterprise, 2 shares of which were exchanged for 7 shares of Aladdin.

Chambers Ferland Co.

Subsidiary of Aladdin Cobalt Ltd.

Address: 58 Wellington St., Toronto.

Inc. 1908 in Ontario. **Cap.** \$2,500,000; par \$1.

Aladdin Cobalt Co., Ltd.

Subsidiary of Aladdin Cobalt Ltd.

Address: Excelsior Life Bldg., Toronto. **Mine office:** Chas. A. Richardson, mgr., Box 239, Haileybury, Ont.

Inc. Aug. 23, 1912, in Ontario. **Cap.** \$500,000; \$5 par; all issued.

Dividends: ½% January 24, 1916; 2% February 28, 1917; none reported since; total, \$48,000.

Property: 125 acres, includes the Chambers Ferland mine, in Coleman Twp., Timiskaming district, supposed to have the extension of the adjoining Nipissing vein system.

Ore: silver in veins of calcite.

Development: by several shafts, deepest 425'. New work on the 410' level reported to have opened up a 2" vein of high grade ore. A lease which permitted use of Right of Way company's shaft was relinquished in late 1921.

Equipment: newly installed, includes double-drum hoist, 125-ton crusher, 125 h. p. boiler, ore bins and an ore house with engine.

Production: of 25 tons daily to Bailey custom mill reported early in 1921; later in year company operations ceased, but by arrangement with Nipissing, Aladdin ores are mined and milled on a cost basis by that company.

ALEXO MINING CO., LTD., THE ONTARIO

Address: Porquis Junction, Ontario.

Officers: G. F. Haning, pres.; Maj. E. F. Pullen, v. p.-mgr.; H. N. Roberts, sec.-treas., with Capt. Frank Pullen, Lt.-Col. C. W. Allen, and F. J. Stewart, directors.

Inc. January 3, 1912, in Ontario. **Cap.** \$40,000, \$1 par; 30,005 shares issued.

Property: the Alexo mine in Dundonald Twp., Timiskaming district, discovered in 1908 and active work starting in 1912. The ore, a nickel-copper pyrrhotite, averages 4% nickel and is shipped to the Mond Nickel Company's smelter.

Development: by 400' shaft, crosscuts and drifts.

Production: 8,618 tons in 1918; total 49,746 to January 1, 1919. About 20 men employed. Inactive in 1920.

ALGOMA CUSTOM SMELTING & REFINING CO., LTD. ONTARIO

Idle several years. **Works office:** Thessalon, Algoma, Ont. See Vol. XI. Copper Handbook.

ALGOMA STEEL CORPORATION ONTARIO

Subsidiary of the Lake Superior Corporation.

Gen. office: Sault Ste. Marie, Ont. **Secretary's office:** Traders' Bank Bldg., Toronto, Ont. W. C. Franz, pres. and gen. mgr.; Alex Taylor, sec. G. R. McLaren, supt. M. A. Hanna & Co., sales agents.

Inc. May, 1907, in Ontario, as Lake Superior I. & S. Co. Name changed in 1912.

Cap. \$15,000,000 com. and \$15,000,000 7% cumul. pfd.; par \$100; \$15,000,000 com. and \$10,000,000 pfd. issued, and all held by Lake Superior Corp.

Property: the Helen and Magpie iron mines, old producers, in Michipicoten district, with blast furnaces at Sault Ste Marie. The Helen, opened in 1899, is developed to vertical depth of 641'. The mine was a steady producer of iron ore, which occurs as goethite with some hematite, until closed down in 1919, after producing a total of 2,479,189 tons.

The Magpie, opened up in 1911, is developed by a 4-compartment shaft to depth of 581' with levels at 125', 205', 305', 435' and 560'. The orebody, mainly siderite, is said to be 50' wide for a length of 1,500' and when roasted makes a fair Bessemer ore. Mining is by back stoping and sub-levels.

The ore carries 50% iron and 0.020% phosphorus. Shipments from the Magpie are sent to the Sault blast-furnaces. Employs about 250 men when working to capacity.

Production: (Magpie) in 1914, 98,070 tons; in 1915, 118,697 tons; in 1916, 187,966 tons; in 1917, 174,774 tons; in 1918, 157,095 tons and in 1919, 163,008 tons, a total of 919,544 tons.

ALGOMONT MINES, LTD. ONTARIO

Address: 911 Kent Bldg., Toronto, Ont. **Mine office:** c/o Rydel Bk., Algoma, Ont.

Inc. 1920. **Cap.** \$4,000,000.

Property: copper-gold-silver claims in Aberdeen Twp., Algoma district.

ALLIED GOLD MINES, LTD. ONTARIO

Address: 55 Yonge St., Toronto; or 1905 Dime Bank Bldg., Detroit, Mich. **Mine office:** Boston Creek, Ontario.

Officers: F. L. Smith, pres., Detroit; Angus Smith, v. p.; A. W. Brechtling, sec.-treas., with J. H. Remick and W. H. Muir, directors. F. C. Loring, cons. engr.; R. W. Norrington, mgr.

Inc. October, 1918, in Ontario. **Cap.** \$2,000,000; par \$1; outstanding 1,250,000 shares. Security Transfer & Registrar Co., transfer agent.

Property: 12 claims, 7 patented, 480 acres, in Boston Twp., Boston Creek area. Company was organized to acquire large acreage of gold-mining land in this area, following the success of the Miller-Independence Mines, which adjoins on the S. the Renaud-Cullen group of the Allied company. The group is said to have several quartz veins with one well-defined fissure showing almost across the property. This is developed by a 100' shaft, and diamond-drilling work.

Equipment: electric hoist and compressor.

No ore is blocked out as yet; but property is being explored by diamond drills.

ALLIED PORCUPINE GOLD MINES, LTD. ONTARIO

Main office: Sun Life Bldg., Toronto, Ont. **Mine office:** South Porcupine, Ont.

Officers: W. A. McConnell, pres.; R. L. Hudson, v. p.-treas.; A. J. Young, sec., with F. W. Hudson and W. D. Robb, directors. R. Kirkegaard, cons engr.-gen. mgr.; L. K. Fletcher, supt.

Inc. 1921, in Ontario. **Cap.** \$5,000,000; \$1 par; 2,500,000 shares issued. Trust & Guarantee Co., registrar and transfer agent.

Company is a consolidation of the Three Nations Gold Mng. Co., La Palme Porcupine Mines, North Whitney Gold Mines and the Cavana Veteran claim. Reported that La Palme stockholders would receive one share of new company for each 2 shares of La Palme stock held. Three Nations company had previously gone into liquidation.

Property: 18 patented claims, 720 acres, in Whitney Twp., Porcupine area. Ore occurs as a disseminated deposit in Kewatin and Temiskaming schist, with E.-W. course and dip of 40°.

Development: by 250' vertical shaft and about 1,000' of workings. Diamond-drilling to depth of 1,000'.

Equipment: includes hoist, compressor, pump, steam-power, 10-stamps and cyanide plant.

New company unwatered Three Nations mine late in 1921 and plans extensive drilling campaign. It is alleged that La Palme company has not lived up to the merger agreement, and litigation has ensued.

ALLIE ISLAND COPPER MINE. ONTARIO*

Office: 225 Water St., Kenora, Ont., Can. Owned by F. W. Moore et al.

Property: 4 claims, the S 777, K. 312, K 314 and K 315, 156.64 acres in all, at the east end of Allie Island, about 15 miles from Kenora.

Geology: claims cover an outcrop of serpentine or chlorite-schist, carrying small pellets or crystals of native copper. Country rock is dolomite, altered trap and greenstones. Orebody claimed to be ½ mile long, with a maximum width of 700'.

Development: is surficial only, 40 and 20' pit-holes, showing ore in bottom. Ore said to average 1½% copper. Owners planned development work at last account.

ALPINE SILVER MINES ONTARIO

Address: 806 Ferry St., Niagara Falls, Ont. **Mine address:** E. J. Thompson, mgr., Gowganda, Ont., Can.

Property: in Van Hire Twp., Gowganda silver area, 25 miles W. of Elk Lake terminus of the T. & N. O. Ry. Exploratory surface work was being done late in 1921, said to have exposed the main vein for 400', and to have disclosed other veins; ore is silver-bearing. It is planned to extend old 600' tunnel to cut veins at 200' depth; reported that monthly expenditures are \$3,500.

AMERICAN MOLYBDENITE, LTD. ONTARIO

Address: C. J. Peters, mgr., Wilberforce, Ontario, J. J. Gray, sec., 760 Keele St., Toronto, Ont.

Directors: Wm. Flavelle, A. W. Marsh and W. J. L. McKay.

Inc. in Ontario. **Cap.** \$1,000,000; \$1 par.

Property: 100 acres at Wilberforce, said to show a huge dyke of pyroxene with molybdenite evenly disseminated.

Equipment: steam power and 125-ton mill with flotation unit.

APEX PORCUPINE MINES, LTD. ONTARIO

Address: 420 Bank of Hamilton Bldg., Toronto, Can.

Officers: Sir Henry Pellatt, pres.; J. A. Jacobs, v. p., with D. S. Friedman, M. Workman, A. M. Bilsky and R. P. Gough. C. H. Manaton, sec-treas.

Inc. 1911. **Cap.** \$2,000,000; \$1 par; 1,800,000 shares issued. Trusts & Guarantee Co., Toronto, registrar and transfer agent.

Owens 80 acres in southern Tisdale Twp., Porcupine district, showing pyrite and free gold, developed by 120' shaft. Shut down since 1912.

ARGONAUT GOLD, LTD. ONTARIO

Address: 601 Royal Trust Bldg., Montreal, Quebec. **Mine office:** Larder Lake, Ont.

Officers: J. H. Rainville, pres.-gen. mgr.; Eugene Fiset, v. p.; with A. Raymond, F. A. Labelle, O. Lemieux, A. Grovel and L. Graton, directors. L. J. A. Marchand, sec.-treas. John W. Morrison, gen. supt.; J. E. Hardman, cons. engr.

Inc. 1919, in Ontario. **Cap.** \$3,000,000; \$1 par; 715,430 shares in treasury, Jan. 1, 1921; 500,000 shares were offered at 40c. per share (Can. currency) in November, 1921. Crown Trust Co., transfer agt.; Montreal Trust Co., registrar; both of Montreal. Annual meeting in April.

Balance sheet for year ending Jan. 31, 1921, shows: total assets, \$2,332,849, including current, \$16,679; fixed, \$2,130,282; liabilities include accounts payable, \$9,521; balance due on Boissonault claims, \$18,000.

Property: 11 claims, 460 acres, including La Mine d'Or Huronia, near S. end of Beaverhouse lake, N. E. corner of Gauthier township, Larder Lake area, 18 miles E. of Dane on the T. & N. O. Ry., and 57 miles N. of Cobalt. Gold was discovered in 1901. Examined by Forest Rutherford.

Geology: the claims show 22 veins, all carrying gold, striking N. E., and more or less vertical. Of these Nos. 2, 15, 16, 20 and the New Vein, assay \$12 to \$19 per ton and are of sufficient width to warrant development. Some of them consist mainly of felsite in which are magnetite, copper pyrite and pyrite. Others are made up mostly of calcite, and again others consist mainly of quartz. The country rock is greenstone, which is cut by quartz-porphry dikes. The ore mined during 1920 averaged \$10 per ton.

Development: by 3 shafts. The deepest, or No. 3 shaft, has 2 compartments and was down 380' at end of 1921. Levels have been opened at 85, 200 and 350', with 2,600' of lateral workings. On the 350' level, a 5' vein has returned an average assay of \$19 for a distance of 280'. Ore reserves are estimated to be 50,000 tons of \$14 ore.

Equipment: hydro-electric power, 12-drill compressor, hoist, 15-stamps, copper plates and test mill.

Production: from development work amounted to 4,637 tons, returning \$32,513 in 1920.

ASSOCIATED GOLDFIELDS MINING CO., LTD. ONTARIO

See Vol. XIV. Taken over March, 1921, by Canadian Associated Gold-fields, Ltd., which see.

ATIC LAKE MINES, LTD. ONTARIO

Address: 711 Dominion Bank Bldg., Toronto, Ont.; Edw. Watts, mgr.

Inc. Aug. 19, 1918. **Cap.** \$40,000.

Property: on Atic Lake, Thunder Bay district.

ATLAS GOLD MINES, LTD. ONTARIO

Address: Confederation Life Bldg., Toronto, or 157 James St., Montreal.

Mine address: A. M. Bilsky, supt., Kashbow P. O., Ont.

Cap. \$2,000,000; par \$1; 1,250,000 shares issued. Listed on Toronto Standard Stock Exchange. Shares, 20c low, 40c high, 1918; 35c. low, 40c. high in 1919.

Property: 42 acres, in McMurchy Twp., West Shining Tree gold area, Sudbury district, 60 miles S. of Porcupine, Said to show 15 veins, five of which have been stripped and examined.

Veins are well defined, and about 2' in width. Company is planning development, but was idle in 1920.

AURUM MINES, LTD.**ONTARIO**

Office: 420 Bank of Hamilton Bldg., Toronto, Ont., Canada. **Mine office:** Matheson, Ont.

Officers: Sir Henry M. Pellatt, pres.; Col. J. B. Miller, v. p.; with W. B. Reid, A. E. J. Blackman and A. H. Jeffrey, directors. C. H. Manaton, sec.; H. M. Asling, treas.

Inc. in Ontario. Cap. \$1,500,000; \$1 par; 800,000 shares outstanding.

Property: 2 patented claims, 80 acres, adjoining the Croesus mine, in Munro Township.

Ore: occurs in quartz and schist veins in basalt, dipping N. W.-S. E.; average value of the gold contents is as yet undetermined. Mine examined by W. J. Trethewey and A. G. Kirby, who recommended diamond-drilling in attempt to pick up the Croesus vein. Idle.

BAILEY COBALT MINES, LTD.**ONTARIO**

Address: 1446 Railway Exchange Bldg., Chicago, Ill.

Inc. August 15, 1906, in Ontario. **Cap.** \$5,000,000, shares \$1 par. Trusts & Guarantee Co., Ltd., Toronto, Can., transfer agt. and registrar. In 1914, company being deeply in debt, a permanent liquidator was appointed.

Reorganization Committee: because of the bankrupt condition of the company and appointment of liquidators by Supreme Court of Ontario, the following consented to act as a committee and prepare a plan for reorganization: Albert G. Wheeler, Jr., chairman; Wm. E. Stevenson and H. S. Langdon, with Walter Laier, sec., 22 William St., New York. Lawyers' Title Insurance & Trust Co., New York, is depository.

Reorganization plan: as finally worked out, provides that the liquidators transfer the Bailey mine and its assets to a new company, to be known as the **Bailey Silver Mines, Ltd.**, which see.

Judgment obtained by E. A. Benson for \$90,000 due him was purchased by the Profit Sharing Construction Co. of New York, and was sustained. The property was sold by order of the court to the Bailey Silver Mines, Ltd., newly organized by interests closely associated with the Northern Customs Concentrators, Ltd. The new company paid the Benson claim of \$90,000 and \$40,000 for legal expenses, in addition to 425,000 shares given Bailey Cobalt stockholders for their property. See Vol. XIV for record of litigation.

Company has been in the hands of liquidators since June, 1914. At a meeting held Sept. 23, 1921, liquidation proceedings were ended, a directorate was elected and authorized to accept the 425,000 Bailey Silver shares, which it is understood are to be held en bloc.

BAILEY SILVER MINES, LTD.**ONTARIO**

Address: Excelsior Bldg., Toronto. **Mine office:** Cobalt, Ont.

Officers: A. J. Young, pres.; C. J. Boothe, v. p.; Alex Fasken, treas., with Wm. Hines, Jr., and G. H. Sedgewick, directors. W. R. Sweeney, sec.; L. O. Walton, asst. sec.; G. E. Bateman, cons. engr.; Norman Laing, purch. agt.; Capt. Sandow, mine supt.; Robt. E. Dye, mill supt.

Inc. Feb. 3, 1920, in Ontario, to acquire holdings of Bailey Cobalt Mines, Ltd. (q. v.) and the 200-ton custom mill of the Northern Customs Concentrators, Ltd., at Cobalt. **Cap.** \$1,250,000; \$1 par. Funded debt: \$150,000 first mortgage 7% bonds, due March 1, 1925, issued to take up Bailey Cobalt holdings. Toronto General Trusts Corp., Toronto, transfer agent, registrar, and trustee for bonds. Annual meeting, 3rd Tuesday in February.

Gross revenue for first half of 1921 amounted to \$68,936.

Property: the Bailey mine, 38 acres, adjoining the Penn Canadian mine in Coleman Twp., Nipissing district. In Nov., 1921, lease was taken on the old Silver Cliff mine.

Development: by shafts to 5th or 280' level. Several veins have been opened up and regular shipments being made. The ore averages 20-25 oz. silver for a width of 4-6'. From May 10 to Dec. 31, 1920, 383' of crosscutting, raising and drifting was done and 21,600 cu. ft. of stoping. A narrow gauge railroad has also been completed from the Nipissing Central R. R., connecting mine and mill. Ore developed and in place estimated at 12,100 tons containing 173,000 oz. silver. The Silver Cliff was reported to have about 6,000 tons of ore in reserve, Jan. 1, 1922.

Production: the 200-ton mill, to be known hereafter as the **Bailey Silver Custom Mill**, treats about 4,000 to 5,000 tons per month, from the Bailey, La Rose, Silver Leaf and Ophir mines. The mill has been operated continuously since April 1, 1920 to June 30, 1921, treating 70,631 tons, returning \$204,506; gross earnings for 1921 were approximately \$147,072. During first half of 1921, the Bailey mine shipped 6,451 tons of ore.

BALDWIN GOLD MINING CO., LTD.

ONTARIO

Address: 301 Dominion Bank Bldg., Toronto. **Mine address:** W. Wilson, mgr., Kenogami Lake, Ont.

Officers: F. W. Tanner, pres.; F. W. Gates, v. p.; J. A. Cherry, sec.-treas.; with Jas. Edward and Jas. Gorrie, directors.

Inc. January, 1917, in Ontario. **Cap.** \$2,500,000; par \$1; outstanding, 2,178,284 shares. Chartered Trust Executor Co., Toronto, transfer agt. Listed on Standard Stock Exchange, Toronto.

Property: 160 acres, in Eby Twp., Timiskaming district. Gold was discovered on tract in 1910 and property bought in 1917 from Mr. Jas. Gorrie for 1,500,000 shares. Ore occurs in quartz veins.

Development: on one vein includes a 200' shaft, with 500' of workings, said to expose ore of "large amount but not estimated."

Equipment: includes a hoist and compressor. Property is a prospect.

BEAUMONT GOLD MINES, LTD.

ONTARIO

Succeeds North Davidson Mines, Ltd.

Address: R. T. Jeffrey, 1601 Royal Bank Bldg., Toronto. **Mine address:** Schumacher, Ont.

Property: 2 claims, about 80 acres, in Tisdale Township, Porcupine area.

Development: by shaft, 300' deep, July, 1921, and in Nov. preparations were made for drilling property. A 200-ton mill is planned.

BEAVER AUXILIARY MINES CO.

ONTARIO

Seventy-five per cent. of company's capitalization is held by Beaver Cons. Mines, Ltd., which see.

Property: 120 acres, at Elk Lake, in James Twp., carries silver ore, mainly of milling grade. **Development:** by 330' main shaft, crosscuts and drifts. **Equipment:** hoist, two 90 h. p. boilers and compressor. No work has been done on the property for several years.

BEAVER CONS. MINES, LTD.

ONTARIO

Mine office: H. L. Donaldson, supt., Cobalt, Ont.

Office: 810 Lumsden Bldg., Toronto, Ont.

Officers: F. L. Culver, pres.-gen. mgr.; F. C. Finkenstaedt, v. p.; H. E. Tremain, sec.-treas.; preceding officers, Wm. T. Mason, F. L. Lovelace, W. E. Stevenson, and R. Graham, directors.

Inc. February, 1907. **Cap.** \$2,000,000; \$1 par, fully paid, all issued. Union Trust Co., Toronto, and Security Transfer & Registrar Co., New York, transfer offices. Annual meeting in April. Stock listed on Standard Stock Exchange, Toronto.

* Due from smelters.

Dividends: \$170,000 in 1911; \$180,000 in 1912; \$60,000 in 1913; \$60,000 in 1914; \$120,000 in 1915; \$60,000 in 1916; \$60,000 in 1920. The total is \$710,000.

Property: 2 claims, patented, 60 acres, in Coleman Twp., Cobalt district; also owns approximately $\frac{1}{4}$ of entire stock of Kirkland Lake Mining Co., Teck Twp., which see, and a $\frac{3}{4}$ interest in the Beaver Auxiliary Mines Co., owning 120 acres in James Twp. A lease is held on the adjoining Prince Davis property.

Ore carries silver, cobalt, and arsenic in narrow calcite veins, in diabase and the Keewatin formation. Ore occurs as high-grade in pockets and shoots, or as milling ore.

Development: by 1,650' vertical shaft, which encountered the lower diabase-Keewatin contact at a depth of 1,570'. The high grade ore on the 1,600' level was the deepest occurrence of such ore at Cobalt. New work in 1919-20 amounted to 1,870' and in 1920-21 to 1,285'; in the former period large bodies of milling ore were uncovered, but no new orebodies have since been found.

Equipment: includes a 150-ton concentrator, giving an extraction of about 80%, blacksmith shop, dwellings, etc.

Production: year ending Feb. 28:

	Silver Oz.	Earnings

* 10 months.

In face of the falling silver price, mine was shut down Dec. 31, 1920; company has transferred its interest to the gold producing Kirkland Lake, under same management.

BIDGOOD GOLD MINES, LTD.**ONTARIO**

Address: 806 Ferry St., Niagara Falls, Ont. **Mine office:** Kirkland, Ont.
Officers: Geo. Tough, pres.; D. H. Angus, mgr.

Property: 8 claims in Teck Twp., Timiskaming district, between Mud and McTavish lakes, E. of Kirkland Lake. Veins occur in the porphyry, or in conglomerate near it. Quartz carries copper and iron pyrite, with some pyrrhotite and molybdenite. Two veins assayed from 80 cents to \$12 per ton. No. 4 vein is 25' wide, and traceable for 250', and No. 9 is 8' wide, traceable for 350'.

Development: by over 3,000' of surface trenching, and a shaft, 400' deep, Dec. 1, 1921, with laterals being extended on 3rd and 4th levels.

Equipment: 65 h. p. boiler, 6 by 8" hoist, 3-drill compressor, etc.

BIG DYKE MINING CO.**ONTARIO**

Address: South Porcupine, Ont., Can.

Property: the McRae-Porcupine and Pike Lake mines, in Deloro Twp., Porcupine Gold area, 4 miles S. of South Porcupine. Was developing mid-summer of 1921.

BLUE QUARTZ GOLD MINES, LTD.**ONTARIO**

Is a merger of La Santa Lucia Gold Mines, Ltd., and Cartwright Goldfields, Ltd.

Address: Horace C. Crow, 184 Sunnyside Ave., Toronto, Ont.

Officers: Horace C. Crow, pres.; C. H. Taylor, v. p.-gen. mgr.

Inc. 1921, in Ontario. **Cap.** \$3,000,000; par \$1.

Property: La Santa Lucia, one claim, and the adjoining Cartwright group of 6 claims, on S. shore of Painkiller lake, in the Beatty-Munro gold area, Larder Lake division, Timiskaming district; also 2 Cartwright claims, 80 acres, on N. shore of lake. Narrow veins, a few inches to 2' wide occur in rocks of Keewatin and Timiskaming age. Ore consists of highly fractured quartz, with some calcite, carrying gold, both free and as tellurides, and pyrite. Seven veins have been exposed.

Development: by 110' shaft and surface work. Drilling and lateral work are now (Jan. 1922) underway.

Equipment: is being installed to replace that destroyed by fire in 1916.

BOSTON CREEK MINING CO., LTD.**ONTARIO**

Address: Imperial Bank Chambers, Niagara Falls, Ont. **Mine address:** Boston Creek, Ont.

Officers: F. M. Richardson, pres.-mgr.; W. B. Albright, v. p.; M. L. Quillman, sec.-treas.; R. E. Margenau, mgr.

Inc. in 1916 to take over mine from the R. A. P. Syndicate, financed by Sherwin-Williams Paint Co. interests, who spent \$250,000 on the property. **Cap.** \$2,000,000; \$1 par; 1,050,000 shares issued and 999,995 were pooled for two years. Security Transfer & Registrar Co., New York, transfer agent. Listed on New York Curb, and on Toronto Stock Exchange. Shares sold, 13c. low, 39c. high, 1918; 18c. low, 33c. high, 1919; 8c. low, 22c. high, 1920; 1c. low, 15c. high, 1921.

Property: 21 claims, 100 acres, in Boston township, 45 miles N. W. of Cobalt and 382 miles N. of Toronto and crossed by the T. & N. R. R. See Vol. XIV for complete description.

Although extravagant statements in brokers' letters and market rigging created suspicion, the property will, it is believed, eventually be a milling proposition, ranking well with the various Porcupine companies. Mine has been idle for some time on account of disagreement between company and R. A. P. Syndicate, whose shaft the Boston Creek was using. Reported that the two companies would be consolidated. No recent returns.

BOSTON McCREA GOLD MINES, LTD.**ONTARIO**

Address: 1118 Prudential Bldg., Buffalo, N. Y. **Mine address:** Boston, Ont.

Officers: G. W. Morris, pres.; W. R. Adams, mgr.

Property: in Pacaud Twp., Boston Creek area, Timiskaming district, shows 2 parallel veins about 3' wide. Ore is gold bearing, assaying \$8 to \$25 per ton. No work apparently has been done since mid-1920.

BOSTON-PARRY SOUND COPPER CO. ONTARIO

Mine office: Parry Sound, Parry Sound district, Ont. Inc. June, 1908, in Maine. **Cap.** \$1,000,000; shares \$1 par. Is a close corporation.

Property: 200 acres, in the vicinity of the Wilcox and McGowan mines. Idle some years, but owners are well-to-do and expect to reopen property some day.

BOURKES MINES, LTD. ONTARIO

Address: 55 Yonge St., Toronto. **Mine office:** J. J. Byrne, mgr., Sese-kinika, Ont.

Cap. \$5,000,000, increased from \$2,500,000 in Nov., 1921; par \$1; 1,700,000 shares offered to stockholders in proportion to their holdings.

Property: the south half of Lot 9 in second concession of Benoit Twp., at Bourke's siding, N. W. of Kirkland Lake, developed by shaft and 1,500' of workings. A 28" gold quartz vein exposed at 200' depth.

Equipment: 80-h. p. steam boiler, 210 cu. ft. compressor, 2 hoists.

The company has been short of funds for some time, and the mine closed down.

BOUSQUET GOLD MINES, LTD. ONTARIO

Address: 6 King St. West, Toronto. **Mine office:** Willisville, Ont.

Officers: Harold Tough, pres.; R. R. Tough, v. p.-mgr.; Wm. B. McPherson, sec.-treas., with Thos. Baird, and Jas. A. Bousquet, directors.

Inc. 1920, in Ontario. **Cap.** \$2,000,000; \$1 par.

Property: 10 claims, in Howry Creek area, Sudbury mining division, 7 miles E. of Willisville on the Algoma Eastern R. R. and 66 miles from Sudbury. Gold ore occurs in narrow quartz veins in a belt of grey schist.

Development: by 2-compartment vertical shaft, being sunk early in 1921.

Equipment: includes compressor, boiler, engine and buildings.

Development results said to be disappointing and mine closed down Nov. 1, 1921. Company reported seeking a more promising property.

BRANT MINES, LTD. ONTARIO

Address: W. M. MacDonald, mgr., Gowganda, Ontario.

Officers: J. C. Cohoe, pres.; E. L. Goold, v. p.; O. Hall, sec.-treas., with F. L. Mapes, W. H. Whittaker, C. W. Leeming and C. H. Waterous, directors.

Inc. 1917, in Ontario. **Cap.** \$1,500,000; \$1 par; 1,000,000 issued.

Property: 87 acres, formerly owned by the Mapes-Johnston Silver Mines Co., in Meickle township, Silver Lake district, and near the Miller Lake-O'Brien mine.

Development: by 350' shaft and other workings. On 320' level, ore assaying 2,000 oz. silver per ton was reported as being mined.

Equipment: includes hoist, compressor, machine-drills, and accessories.

Shares quoted at 57c. early in Nov., 1917. No recent information.

BRITISH AMERICA NICKEL CORP., LTD ONTARIO

Office: Jackson Bldg., Ottawa, Ont. **Mine and smelter office:** Nickelton, Sudbury, Ont.

Officers: Edgar N. Rhodes, pres.-mng. director; D. Vogt and V. N. Hybinette, v. ps.; S. M. Brown, sec.-treas., with J. Fred Booth, F. W. Field, Sir Eric Hambro, E. R. Wood, Sir U. J. R. Borresen, A. Gronningsater (technical dir.), Sir Robert Borden, S. Giertsen, Oscar Jebson, P. C. Stevenson and E. A. Cappelen Smith, directors. J. H. Gillis, chief engr.; E. Hibbert, mgr. of mines; E. J. Carlyle, mgr. of smelter; R. L. Peek, mgr. of refinery; Frank E. Lathe, chief chemist; T. N. Hay, purch. agt.; R. F. Howard, elec. engr.; H. L. Roscoe, supt. of mines.

Inc. August, 1913, in Canada. **Cap.** \$20,000,000; par \$100; all issued. **Funded debt:** \$24,500,000 authorized; \$22,500,000 bonds outstanding. British

Government holds \$14,000,000 of stock and \$3,000,000 bonds. National Trust Co., transfer agt. and registrar.

Property: 17,590 acres in McKim Twp., Sudbury nickel district, Ontario, the Corporation owns 17,590 acres, of which 12,590 acres are within a mineral bearing zone, 4 miles N. W. of Sudbury, the balance being non-mineral and required for smelter townsites, etc. Included in the above are the following mines: Murray, Whistle, Wild Cat, Jackson, Nickel Lake group, W. D. 16, Elsie, Gertrude, Victor, Lady Violet and Falconbridge. Lands contain 21 known orebodies, 7 of which have been developed. The Murray orebody consists of norite impregnated with pyrite and chalcopyrite with a greenstone-granite footwall, and has been proven to a depth of 3,600' on a 38° dip, with a thickness of 40 to 140'. The ore carries 3% nickel and copper, but higher grade is known to exist at depth; metals of platinum group are present. The company has spent \$900,000 on diamond drilling from 1907 to 1918.

Development: at the Whistle mine has reached the producing stage, but work has been largely concentrated at the Murray, which is opened by a 1,200' three-compartment shaft with 8 levels. Mining methods permit of a 90% extraction of the whole ore mass.

Ore reserves: diamond drilling has developed over 18,000,000 tons, 16,000,000 tons of which is in the Murray mine.

Equipment: at the Murray includes three 1,000' h. p. boilers; a double-drum hoist handling 8 ton skips at speed of 1,500' p. m.; 4 compressors supplying 6,500 cu. ft. of air. The mine supplies 1,300 tons of ore per day which is crushed to 2" in a 46x48" crusher and 20% of material discarded is waste. Transportation on 5 levels is handled by 5-ton electric locomotives hauling four 4-ton cars. Ore is conveyed to the smelter, 1¼ miles distant in 35-ton cars. **Smelting plant:** consists of two 50x360" blast furnaces, fed by especially designed four 4-ton compartment charge-cars on standard gauge track, hauled by electric locomotives; and three 13x30' basic lined converters served by two 60'-span 40-ton electric cranes. Six 1,000 h. p. boilers supply power to four 2,200 h. p. turbo-blowers delivering air to furnaces and converters. Gases pass through flues and chambers to a 300' stack with 25' inside diameter. Entire plant is so arranged that it may be electrically driven when outside power is obtainable. The furnace capacity is about 1,600 tons of ore per day. Matte from the furnaces carrying 12% nickel and copper ore, blown up to 81% in the converters, then granulated and shipped to the refinery.

Refinery: is situated at Deschenes, Quebec, where cheap electric power is procurable, and uses the Hybinette process of separating the copper, nickel and precious metals from the matte. It is equipped with two 8-hearth Wedge roasters from where the matte passes to the leaching department and a part of the copper is extracted. Leached matte is electrically smelted and nickel copper anodes are cast for treatment in the nickel-depositing building, which covers 3 acres. In addition to nickel, nickel sulphite and nickel ammonium salt are produced. The slimes are treated in a special department to yield the platinum metals, gold and silver. The plant has an annual capacity of 15,000,000 lb. of nickel. About 55 tons of copper is produced per 100 tons of nickel.

The mines are served by the Canadian Pacific, Canadian Northern Ontario and Algoma Eastern railroads.

The company was originally financed by the British Government as a war measure and the smelter and refinery, begun in late 1916 and early 1918 respectively, were put into commission in Jan. 1920. In February, 1921, mines and plants were closed down pending a financial reorganization, which became effective in mid-summer following.

BRITISH MOLYBDENITE, LTD.

ONTARIO

Address: 34 Victoria St., Toronto. **Mine address:** Gooderham, Ont.

Officers: Harry Secord, pres.; Geo. W. Hunt, sec.

Property: in Glamorgan, Twp., Haliburton county, 1¼ miles E. of Gooderham. Operations began in 1918.

BRUCE MINES, LTD. **ONTARIO**

Dead. Mines sold to **Mond Nickel Co.** in 1915.

BUFFALO MINES, LTD. **ONTARIO**

Fully described in Volume XIV. Company went into voluntary liquidation, March, 1920. The property is now owned by the **Mining Corporation of Canada, Ltd.**

BURKE GROUP **ONTARIO**

Owners: Messrs. Burke, Landagne, Cochrane and Bulloch.

Property: 13 claims, on W. shore of Granite lake, Fawcett Twp., West Shiningtree area, Sudbury district, shows a N.-S. quartz vein in altered pillow lava and schist. The ore is gold-bearing. Late in 1921, was taken under option by Hollinger Cons., which will drill ground.

BURNSIDE GOLD MINES, LTD. **ONTARIO**

In voluntary liquidation.

Address: R. Simpson, liquidator, Finsbury Pavement House, London, E. C. 2, England.

Property: 3 claims adjoining the Tough-Oakes, in Teck Twp., Kirkland Lake area, sold to Kirkland Lake Proprietary (1919), Ltd., stockholders receiving one £1 Kirkland Lake share for two Burnside shares.

Development: by 3 shafts, No. 2 being connected with Tough-Oakes workings on 400' level. No. 3 has been deepened to 500' to attack faulted segment of Tough-Oakes No. 2 vein, discovered on Burnside ground.

Equipment: includes 30-ton mill.

CALUMET & ALGOMA MINING CO. **ONTARIO**

Address: Lucas Hermann, sec., 109 Fifth St., Calumet, Mich. Mine near Massey, Algoma, Ont.

Officers: Jos. Vertin, pres.; Chas. Schenk, v. p.; Lucas Hermann, treas. Inc. 1905. **Cap.** \$1,000,000; shares \$5 par; assessable; issued, \$100,000 paid in, \$1.75. A reconstruction of the Copper Queen Mining Co., Ltd. In March, 1919, had no debts, and had \$400 in the treasury.

Property: 957 acres, freehold, shows a 45' fissure vein, traceable about 3 miles, carrying medium-grade chalcopryrite ore, more or less auriferous, with occasional bornite and malachite, giving assays of 5 to 25% copper. Has 2 shafts, No. 1 being 138' deep, and 2 tunnels, longest 195'. Lands are heavily timbered and well watered. Idle several years.

CALUMET & MONTANA CONSOLIDATED MINING CO. **ONTARIO**

Described in Vol. XIV. Succeeded in 1918 by the **Three Star Silver Mines, Ltd.**, which see. Company was a reorganization of the Calumet & Montana Mng. Co., described in Vol. XI.

CAMBURN SILVER MINES, LTD. **ONTARIO**

Address: Rm. 901, 263 St. James St., Montreal. **Mine address:** Box 756, Cobalt, Ont. J. H. Rattray, mgr.

Inc. in 1919. **Cap.** \$3,000,000, increased in 1920 from \$1,500,000; par \$1.

Property: the Lumsden and Waldman mines in Coleman Twp., Timiskaming district.

CANADIAN AMERICAN RESOURCES, LTD. **ONTARIO**

Address: 1006 Royal Bank Bldg., Toronto.

Officers: Alex. Alexander, pres., 927 Fifth Ave., New York; L. E. Denyes, v. p., Toronto; Dr. R. G. Bogart, sec., Kingston, Ont.; Geo. B. Leighton, treas., New York; with Jacob Rupert and Geo. B. Gifford of New York, and S. W. Jenckes, St. Catherines, Ont., directors.

Inc. in Ontario late in 1919. **Cap.** \$50,000,000. Company was organized to aid the development of mining and oil properties.

CANADIAN ASSOCIATED GOLDFIELDS, LTD. **ONTARIO**

Practically a successor to Associated Goldfields Mng. Co., Ltd.

Mine address: Geo. A. Gray, Larder Lake, Ont. **Office:** 306, C. P. R. Bldg., Toronto.

Officers: Geo. A. MacKay, pres.; A. A. McFall, v. p.; A. Singer, J. Din-

woody, and D. H. McCartney, directors. R. Wm. MacKay, sec. There is an advisory committee of 38 stockholders.

Inc. in 1921, in Ontario. **Cap.** \$30,000,000; \$1 par. This concern is supposed to have taken over the Associated Goldfields Mng. Co., Ltd, Goldfields, Ltd., Larder Lake Gold Mng. Co., Ltd, and Tournie Mng. Co., Ltd., the first named is to receive 18,000,000 shares (4 to 1 basis) of new company; Goldfields to receive by an equal exchange 2,356,647 shares; others to receive 1 share of new stock for 2 old; the remainder, about 8,000,000 shares, to remain in treasury.

Associated Goldfields has apparently agreed to the above arrangement, and being reported to have stock control of Goldfields, Ltd. (q. v.), the latter also has presumably agreed. In March, 1921, however, 40 stockholders petitioned the Government for relief and in July, a protective committee was appointed to prevent by legal process the consolidation of Goldfields, Ltd. with new company.

The financial position at the end of March, 1921, was cash and Victory Bonds, \$825,401, and notes receivable, \$275,000. Current liabilities were under \$15,000. During 1919, \$169,259 was spent and perhaps a total of about \$330,000 to the end of that year.

Property: about 2,000 acres; includes the Harris-Maxwell, the Kerr-Addison, and the Reddick mines, now known as Blocks B, C, and D, respectively, located in Larder Lake district, Ontario. Block B mine is opened to the 500' level, with workings practically all in silicified dolomite.

Reported to have acquired Costello-Thighe and Costello-Lucy claims late in 1921.

Development: during 1919, gratifying results were obtained on the 300, 400, and 500' levels of Block B. In Block C and D, 2 lenses of ore, each 2,000' long, from 50 to 150' wide, and proved to a depth of 500' by drills, are said to average \$11.50 per ton. It is estimated that there is enough ore to supply a 2,000-ton mill for years. These deposits are enclosed by lower-grade ore, 400 to 500' wide. A 3-compartment shaft was down to 350' on Block C by August, 1921. An extensive development campaign, largely by drilling, is reported to be under way.

Equipment: in addition to plants on Blocks B and D, the construction of a 1,000-ton mill, to be eventually of 10,000 tons capacity, is contemplated.

See Goldfields, Ltd. for further information regarding Blocks B and D.

This company is ambitious and desirous of doing big things, so it is to be hoped that the optimistic estimates of reserves are correct. Certain features have come in for a lot of criticism in Ontario, seemingly justified by an incident during 1920. It appears that the Provincial Government proposed building a branch line from the T. & N. O. Ry. to Larder Lake, costing \$250,000 for 16 miles, which the Associated company admits is of great importance to its future; yet when the Government wished to make an examination of the mine to see whether the line was justified, the company was unwilling to submit its property to the inspection. Therefore only a macadam road is to be built. By Oct., 1920, criticism had increased, and considerable doubt existed concerning the estimates given.

All work on Block B. ceased on Oct. 1, 1921, and efforts to be concentrated on two other blocks. At a stockholders' meeting in Jan. 1922, it is reported that management was subjected to much criticism.

CANADIAN CASEY COBALT CO., LTD.

ONTARIO

Address: 1514 Bk. of Hamilton Bldg., Toronto, Ont. **Mine address:** New Liskeard, Ont.

Directors: W. W. Perry, C. H. C. Leggott and Edna Fitzsimons, all of Toronto.

Inc. 1920, in Ontario. **Cap.** \$245,000.

Property: in Casey Twp., Cobalt silver area, Timiskaming district.

CANADIAN COPPER CO.

ONTARIO

Entire stock of company taken over by International Nickel Co. of Canada, Ltd. and company dissolved.

CANADIAN EXPLORATION CO., LTD. ONTARIO

Offices: 28 Victoria Sq., Montreal, and Naughton, Ont.

Mine closed and plant sold, property was described in Vol. XIII.

CANADIAN-KIRKLAND GOLD MINING CO. ONTARIO

Address: Kirkland Lake Ont. **Mine address:** Kirkland, Ont.

Officers: A. A. Amos, pres.; Geo. Tough, v. p.-mgr.; G. G. T. Ware, sec.-treas.; with D. H. Angus, and R. W. Brigstocke, directors.

Inc. in Ontario. **Cap.** \$2,000,000; par \$1.

Property: 4 claims, 154 acres, in Teck Twp., Kirkland Lake area, Timiskaming district.

Development: by 2 shafts, one 150' deep, sunk in mineralized zones consisting of quartz veinlets and greywacke, impregnated with copper and iron pyrite, galena, and calcite. In 1920, 200' of crosscutting on the 150' level failed to cut the orebody and further work was discontinued. A 45° drill-hole, 400' deep, was put down at a point 500' S. of the shaft to intersect the vein.

Property under option since May 1, 1919, to **Northcrown Porcupine Mines Ltd.**, which see.

CANADIAN MINING CORPORATION, LTD. ONTARIO

Liquidated. Interests taken over by **Mining Corporation of Canada, Ltd.**

CANADIAN MINING & FINANCE CO., LTD. ONTARIO

Office: 85 Bay St., Toronto, Can.

Company is not engaged in any mining operations, simply owning a few claims. The several properties that it formerly managed are now owned by the **Hollinger Consolidated Gold Mines, Ltd.**, which see.

CANADIAN SMELTING & REFINING CO. ONTARIO

Out of existence, described in Vol. XIII. Former office, Orilla, Ont.

CANE SILVER MINES, LTD. ONTARIO

Address: 508 Lumsden Bldg., Toronto, Ont. **Mine address:** Elk Lake, Ont. H. J. Martin, sec.

Property: in Cane Twp., Elk Lake area. Timiskaming district. S. of Kenabeck P. O., on the Elk Lake branch of the T. & N. O. Rv. No. 8, the most important of the veins discovered is about 12" wide. The ore is aplite with value in silver. There are 3 shafts.

The rumor that Hudson Bay Mines was to become interested seems to be unfounded, but it is understood that officials of that company are involved in the Cane Silver Mines.

CARIBOU COBALT MINES CO. ONTARIO

Offices: 61 Broadway, New York, and Cobalt, Ont.

Officers: Herman Cook, pres.; F. M. Loper, v. p.; E. H. Westlake, sec.-treas., with J. H. Susmann and Sam A. Lewisohn, directors.

Inc. September 29, 1913, in Maine. **Cap.** \$1,000,000; \$1 par; 950,000 outstanding, of which 837,498 shares are owned by the Kerr Lake Mines, Ltd. Listed on New York Curb. The Caribou Cobalt Mines Co. owns the entire capital stock of Cobalt Comet Mines, Ltd., which is the operating company. Dividends to April, 1917, totaled \$175,000.

CART LAKE SILVER MINES, LTD. ONTARIO

Idle. No recent information. Described in Vol. XIV.

CARTWRIGHT GOLDFIELDS, LTD. ONTARIO

Now a part of **Blue Quartz Gold Mines, Ltd.**, which see.

CARVETH GOLD MINES, LTD. ONTARIO

Address: c/o Faskin, Excelsior Life Bldg., Toronto. T. H. Carveth, sec.

Property: in Thomas Twp., Porcupine area, Timiskaming district. Some drilling has been done.

Early in 1920, reported that company was selling stock by representing that property was "in the very heart of the gold yielding district of the Porcupine Division", and that the Government had been called upon to take action because property is actually situated 20 miles from the center.

CASEY-COBALT MINING CO., LTD.**ONTARIO**

Office: Balfour House, Finsbury Pavement, London, E. C., Eng. R. F. Eden, liquidator.

Company went into voluntary liquidation, November, 1920, and assets have been distributed. Fully described in Volume XIV.

CASEY-COBALT SILVER MINING CO., LTD.,**ONTARIO**

Head office: 15-20 Traders Bank Bldg., Toronto. **Mine office:** New Liskeard, Casey Township, Ont.

Officers: W. R. P. Parker, pres.; J. P. Watson, v. p., with G. M. Clark, Capt. R. E. G. van Cutsem and Lieut. Graeme Watson, directors. John W. Shaw, mine eng. Company was controlled by the Casey Cobalt Mng. Co., Ltd., now liquidated.

Inc. Dec. 19, 1906. **Cap.** \$100,000; par \$1; all issued. Paid \$203,249 in dividends.

Property: originally 40 acres in Harris Twp., and the Casey-Cobalt mine in Casey Twp., 9 miles N. E. of New Liskeard. In 1918 practically all work was done on the property of Casey-Harris Mining Co., Ltd., of which company Casey-Cobalt Silver Mining Co. owned a half interest. Since 1918 all the available ore of the two properties has been milled and operations have ceased. The only work done in 1918-'19 was on the property of the Harmak Mining Co., which lies W. of the Casey. Operations were charged for at cost, the Casey company to receive 10% of the Harmak Company profits for a number of years.

Equipment: includes hoist at 375' shaft, compressor and mill erected in 1918.

● Presumably in liquidation. Mill sold to **Triplex Gold Mines, Ltd.**, in 1922.

CASEY MOUNTAIN MINING CO.**ONTARIO**

Address: 115 Stair Bldg., Toronto. **Mine address:** Judge, Ont.

Officers: Robt. G. Williamson, pres.-mgr.; W. A. Staples, sec.-treas.

Property: about 240 acres, 2 miles from the Casey-Cobalt mine, in Casey township, about 15 miles N. W. of Cobalt.

Development: by 425' shaft, said to have cut a vein of silver ore of commercial value.

After an idleness of 2 years, active development reported to have resumed in mid-1921.

CASTLE MINING CO.**ONTARIO**

Entire capital stock owned by **Castle-Trethewey Silver Mines Co.**, which see.

CASTLE-TRETHEWEY SILVER MINES CO.**ONTARIO**

Successor to Trethewey Silver Cobalt Mine, Ltd., effective January, 1922. **Office:** 603 Standard Bank Bldg., Toronto. **Mine address:** Gowganda, Ont.

Officers: J. P. Bickell, pres.; J. B. Tudhope, v. p.; with Gordon Taylor, W. J. Sheppard and S. R. Wickett, directors. L. J. Pashler, sec.-treas.; Murray D. Kennedy, mgr.; J. S. McReavy, supt.

Inc. May 30, 1906, in Ontario. **Cap.** \$2,000,000; \$1 par; outstanding Feb. 1, 1922, 400,000 shares. Toronto General Trust Corporation, transfer office; C. E. Robin, registrar. Listed on New York Curb, and Toronto Stock Exchange. **Dividends:** of 123% were paid to Jan., 1919. Profit and Loss surplus, Dec. 31, 1919, was \$69,848.

At reorganization meeting, Jan. 1922, name was changed as above, stockholders of old company to receive one share of new for each 4 shares of old stock held, with 30 days in which to subscribe for 1,600,000 treasury shares pro rata at 10c. per share. This will pay off about \$40,000 debts of old company and provide working capital.

Company owns all the shares of the Castle Mining Co., Ltd.

Property: Castle Silver mine, 11 claims, 400 acres, in Nicol Twp., Gowganda area, adjoining Miller Lake O'Brien, developed by shaft to depth of

270'. Also a lease on 112 acres under Miller Lake. Small production has been realized from development work.

The Tretheway mine, 35 acres, in Coleman Twp., adjoining Coniagas Mines, Ltd., on N., was sold to that company in January, 1920, for \$100,000.

CATHERINE GOLD MINES, LTD. ONTARIO

Address: 806 Ferry St., Niagara Falls, Ont. **Mine address:** Boston Creek, Ont. T. B. Tough, pres.

Property: in Catherine Twp., Boston Creek area, Timiskaming district, is said to have good surface indications.

CENTRAL OPERATING CO., LTD. ONTARIO

Subsidiary of **Mining Corp. of Canada**, which see.

Address: 1514 Trader Bk. Bldg., Toronto, Ont., or M. F. Fairlie, mgr., Cobalt, Ont.

Operates holdings of Foster Cobalt Mng. Co. under lease to parent company, Mining Corp. of Canada.

Property: the Foster mine on shore of Glen Lake. Coleman Twp., Timiskaming district, developed by 6 shafts to depth of 210'; lateral work is considerable, including a 1,600' crosscut under the lake.

CHALLENGER GOLD MINING CO., LTD. ONTARIO

Address: c/o Amour & Mickle, Confederation Life Bldg., Toronto, Ont. **Mine address:** Bourkes, Ont.

Officers: P. R. Webster, pres., with H. P. Rickard and Alex Miller, directors.

Inc. in Ontario. Cap. \$110,000.

Property: in Bernhart Twp., Bourkes area, Timiskaming district.

CHAMBERS FERLAND MINING CO., LTD. ONTARIO

See description under **Aladdin Cobalt, Ltd.**

CHAPUT-HUGHES GOLD MINES, LTD. ONTARIO

Address: 1507 Royal Bank Bldg., Toronto, Ont. **Mine address:** Haileybury, Ont. J. A. Hughes, mgr.

Property: one claim, in Teck Twp., Kirkland Lake area, Timiskaming district. First opened in 1919, and a strong, well mineralized vein exposed. Machinery was installed and shaft sinking begun in 1921.

CHENEY COPPER CO., LTD. ONTARIO

Office: 5 Melinda St., Toronto, Ont.

Officers: D. M. Robertson, pres.; R. P. Gouch, v. p.; G. Taylor, sec-treas.; preceding with J. S. King, G. P. McCallum, J. L. Coffee and G. Waldron, directors, all of Toronto.

Inc. in Ontario. Cap. \$2,000,000; \$1 par; fully paid. No bonds. No stocks in hands of the public.

Property: 700 acres, of which 400 are held by Crown patent and the balance under Mines Act of Ontario, 28 miles from Thessalon, on C. P. railway and 40 miles east of Sault Ste. Marie.

Geology: lands show a series of three parallel veins exposed by outcrops, trenches and open cut for 1½ miles, with width of 4' to 12'. Strike is north 16° west with dip of 75° to south. Veins are mostly quartz with pockets or lenses of specular iron, iron pyrites and copper minerals.

Idle.

CHURCHILL MINING & MILLING, LTD. ONTARIO

Address: 117 King St. W., Toronto, Ont. **Mine address:** Wasapika Lake, Ont. W. R. Knox, mgr.

Inc. March 22, 1918, in Ontario. Cap. \$1,000,000.

Property: 4 claims to the S. W. of Michiwakenda lake. Churchill Twp., West Shiningtree gold area, 20 miles N. E. from Westree on the C. N. Ry. Two veins, 2 to 3' wide, occur in a rusty pillow lava-schist. Towards the W. they come together and pass into a porphyritic rock. A 40' shaft on the N. vein showed 38' of ore, carrying gold and pyrite.

CLIFTON PORCUPINE MINES, LTD. ONTARIO

Office: 703 Bank of Hamilton Bldg., Toronto. **Mine address:** Wm. C. Offer, supt., Box 120, South Porcupine, Ont.

Officers: F. C. Preston, pres.; H. L. Gibson, v. p., with W. E. Preston, Jas. Cowan and Wm. C. Offer, directors. E. H. Bridger, sec.-treas.; F. D. Reid, mgr.

Inc. April 5, 1919, in Ontario. **Cap.** \$2,000,000; par \$1; 1,550,000 shares outstanding. Trusts & Guarantee Co., Ltd., Toronto, registrar and transfer agent. Annual meeting, 2nd Tuesday in Sept.

As of July 1, 1920, current assets were \$14,369; liabilities \$911.

Property: one claim, 50 acres, in Porcupine district, ¼ mile S. of Dome Mines, Ltd., said to show several quartz veins in quartz-porphry.

Development: by 170' shaft with total workings about 1,000'. Considerable ore developed above 200' level in 1919. Total output to date reported as \$14,511.

Equipment: includes power house, hoists and compressors.

Electric power installed 1920, but operations suspended late in that year owing to lack of funds.

COBALT COMET MINES, LTD.

ONTARIO

Offices: 61 Broadway, New York; and H. A. Kee, mgr., (Giroux Lake) Cobalt, Ont. Same general officers as Caribou Cobalt Mines Co., which company owns the entire capital stock of Cobalt Comet Mines, Ltd.

Inc. April 16, 1913, in Ontario. **Cap.** \$1,000,000; \$5 par; 190,000 outstanding. Annual meeting, 2nd Thursday of Feb. Dividends total \$230,000.

Property: 2 part claims, patented, 70 acres in Coleman Twp., Timiskaming mining district, formerly known as the Drummond mine.

Ore fissure veins contain shoots of variable widths of rich silver ores, whose minerals are native silver and cobalt-nickel sulpharsenides.

Development: by two shafts, 100' and 200' deep.

Equipment: includes an air hoist, electric pump, compressed air and electric power.

Production: practically all ore in sight has been removed and future earnings depend on further discoveries of ore. Low-grade ore is treated by the Dominion Reduction Co.; high-grade ores are shipped. Mine yielded 203,777 oz. in 1916 and 4,869 oz. in 1917. No recent production reported.

COBALT-FRONTENAC MINING CO., LTD.

ONTARIO

Address: D. H. Flecher, mgr., Flinton, Ont.

Officers: Geo. W. Millan, pres.; Noah Dymont, v. p.; M. Doyle, sec.-treas.

Property: the Golden Fleece mine, near Flinton. Developed by incline shaft. **Equipment:** includes mill and cyanide plant.

Production: in 1919, 15 oz. gold, yielding \$300.

COBALT-ONTARIO DEVELOPMENT CO.

ONTARIO

Reorganized 1919 as Matachewan Gold Mines, Ltd., which see.

COBALT PROVINCIAL MINING CO., LTD.

ONTARIO

Address: J. M. McCarthy, sec.-treas., 121 Chamber of Commerce Bldg., St. Louis, Mo. **Mine office:** Box 747, Cobalt, Ont.

Directors: F. G. Logan, John Riddington, J. M. McCarthy and C. L. Painter.

Inc. in Ontario. **Cap.** \$1,500,000; \$1 par; all issued. Chartered Trusts & Executor Co., Toronto, transfer agent and registrar.

Property: 31 acres, adjoining Nipissing at Cobalt, Coleman Twp., Timiskaming district, developed by 350' shaft with 5,500' of workings.

COBALT REDUCTION CO., LTD.

ONTARIO

See Mining Corporation of Canada, Ltd.

COBALT SILVER QUEEN, LTD.

ONTARIO

Address: 1322 Traders Bk. Bldg., Toronto, Ont. **Mine address:** Box 256, Cobalt, Ont. W. J. Post, mgr.

Inc. April 8, 1906. **Cap.** \$1,500,000; par \$1; all issued.

Dividends: \$315,000 to end of 1918; last in Dec. 1908.

Property: the Silver Queen mine, 58 acres, in Coleman Twp., Timiskaming district, just E. of McKinley-Darragh. Was under lease in 1918 to Geo. A. Irwin, of Cobalt.

COLUMBIA COPPER MINING CO. ONTARIO

Idle and probably dead. Described in Volume XIV.

COMFORT-KIRKLAND MINES, LTD. ONTARIO

Address: 12 King St. E., Toronto, Ont. Mine office: Kirkland Lake, Ont.

Directors: Dr. C. V. C. Comfort (Rochester N. Y.), Andrew M. Stobie, Malcolm Stobie, Archibald McVey Little and H. M. V. Weller. R. A. Bryce, cons. engr.

Cap. \$1,500,000; par \$1.

Property: lies between the Ontario-Kirkland and Minaker holdings, in Teck Twp., Kirkland Lake area, Timiskaming district, 1 mile S. of Kirkland Lake. The formation is greywacke with porphyry dikes.

CONIAGAS MINES, LTD., THE ONTARIO

Office: 50 Ontario St., St. Catharines, Ont. **Mine office:** Cobalt and So. Porcupine, Ont.

Officers: R. W. Leonard, pres.; Alex Longwell, v. p.; with R. P. Rogers, A. L. Bishop, R. L. Peek, F. D. Reid, gen. mgr., and H. H. Collier, directors. J. J. Mackan, sec.-treas.; Wm. C. Offer, supt. at So. Porcupine.

Inc. November 24, 1906, in Ontario. **Cap.** authorized and outstanding \$4,000,000; \$5 par. Toronto General Trusts Corp., transfer agt. Annual meeting in December. Listed on Toronto Stock Exchange. Share prices \$1.45 low, \$3.67 high 1918; \$2.40 low, \$3.15 high 1919; \$1.75 low, \$3.15 high in 1920; \$1.20 low, \$2.20 high in 1921.

Owens 2,495 shares of the stock of the Coniagas Reduction Co., Ltd., (see below), which handles this company's product.

Income Account, Fiscal Years Ending October 31:

Year	Gross income	Net income	Dividends and bonuses	Surplus for year
1921.....	\$917,634	\$398,722	\$800,000	\$401,278(b)
1920.....	1,089,485	529,274	500,000	29,274
1919.....	1,049,671	650,595	400,000	250,595
1918.....	1,017,212	609,358	500,000	109,358
1917.....	1,065,745	641,334	300,000	341,344
1916.....	1,192,424	840,791	600,000	240,791
1915.....	1,013,513	658,730	600,000	58,730
1914.....	1,407,877	968,387	1,320,000	351,613(b)
1913.....	2,186,664	1,693,583	1,640,000	53,583
1912.....	2,172,967	1,676,953	1,440,000	236,953

(b) deficit.

Balance sheet as of Oct. 31, 1921, shows assets, \$6,267,955, which includes Coniagas mine, \$3,985,700; Maidens McDonald property, \$52,500; Montgomery Maidens, \$500; Trethewey mine, \$55,559; machinery, camps, etc., \$330,209; Coniagas Reduction Co., \$249,500; Canada Victory Loan bonds, \$894,563; and current, \$658,996. Liabilities include, current \$212,866; reserve for depreciation, \$329,000. Surplus is \$1,695,890.

Dividends: and bonuses to Nov. 1, 1921, amount to \$10,840,000, of which \$2,140,000 were bonuses.

Property: the Coniagas mine, 40 acres on the townsite of Cobalt, Coleman Twp., adjoining the Nipissing Mines on the W. In 1917, the Maidens-McDonald and Maidens-Montgomery claims, 120 acres, in Deloro Twp., 4 miles S. W. from South Porcupine, were acquired; this property adjoins the Ankerite mine, held under option by the company until 1918, when after making substantial payments, the option was dropped. In January, 1920, a 35-acre tract adjoining Coniagas on the N., was purchased from the Trethewey Silver-Cobalt mine for \$100,000. Claims in McVittie Twp., Larder Lake gold area, were taken under option, 1920-21, and are to be drilled. The Coniagas mine contains a large number of small, but very rich veins carry-

ing silver with small amounts of nickel, cobalt, and arsenic. The Porcupine property is gold-bearing, but is still in the development stage.

The Augaunico, mine in Bucke Twp., was sold for \$10,000 on Jan. 2, 1920; company had expended over \$17,000 in exploration without encouraging results.

Development: totaled 37,119' of underground workings on October 31, 1921. New work for year ending Oct. 31, 1921, amounted to 730'. Development work was confined to following small stringers and exploration on all levels and driving numerous crosscuts through unexplored ground. No important new orebodies were developed during the year, though a large tonnage of low-grade ore was developed. Connection was made with the Trethewey workings in 1920. No work has been done at Porcupine for 2 years or more.

Ore reserves: management states that extent of low-grade ore is very difficult to determine, but one year's supply of broken ore was available, Nov. 1, 1921. The company is retreating sand and slime tailing of which it has remaining 75,000 tons of sands and 18,600 tons of slimes, containing about 212,000 oz. of recoverable silver. Sand tailing on Trethewey amounts to 37,000 tons with a 173,900 oz. silver content.

Equipment: includes a 60-stamp concentrating mill handling 300 tons daily; a flotation plant for treating tails; and the Buffalo cyanide mill taken under lease in 1920 for the reclamation of old slime tails. An underground electrical haulage system was completed in 1921. Much of the Trethewey equipment has been sold.

In year ended Oct. 31, 1921, mill treated 113,279 tons of ore, averaging 11.30 oz. silver per ton, and made an extraction of 68.32%; the extraction of flotation plant from mill tailing was 68.29%. The flotation plant treated also 19,125 tons of old sand tails; 14,932 tons of old slimes were reduced by cyanide.

Shipments for year were: 402 tons of mill concentrate averaging 1,950 oz. silver per ton; 537 tons of flotation concentrate averaging 655 oz.; and 25.46 tons of ore averaging 4,407 oz. per ton.

Production, years ending October 31:

Year	High-grade ore, tons	Tons Concls.	Cost per Oz. silver		Ounces Silver	Price, Oz. Silver Cts.
			Cts. (a)	Cts. (b)		
1921..	25	939	33.52	6.33	1,301,515	70.88
1920..	20	912	48.98	7.35	994,235	122.50
1919..	14	953	34.94	7.45	940,267	106.00
1918..	63	1,396	33.87	7.98	974,264	94.14
1917..	124	742	21.36	4.31	1,344,267	79.89
1916..	193	648	15.24	4.27	1,773,286	63.11
1915..	267	607	13.62	3.25	2,002,053	49.25
1914..	485	688	12.44	3.58	2,497,394	56.75
1913..	735	1,034	8.76	4.32	3,252,566	60.55

(a) includes all expenses except shipping, smelting, refining and marketing charges which are under (b).

Total production of mine to October 31, 1921, amounted to 29,490,278 oz.

Ore and concentrates are treated by the Coniagas Reduction Co., Ltd., which see below; but in 1920, some part of flotation concentrates were shipped to A. S. & R. Co. at Pueblo, Colo.

Coniagas Reduction Co., Ltd., The

Entire stock issue owned by the Coniagas Mines, Ltd., except 5 shares issued to directors to qualify.

Inc. 1908, in Canada. Cap. \$250,000; \$100 par.

Owned a smelter and refinery at Thorold, Ont., producing silver bullion, cobalt and nickel, both metallic and oxides, white arsenic, etc. D. A. Mutch sup

During fiscal year ending Oct. 31, 1921, company shipped 1,486,857 oz. silver and treated 1,413 tons ore, dry weight. Company produces silver, arsenic, and the oxides of cobalt and nickel.

Dividends: total \$450,000 in 13 years; the last \$100,000 in 1920.

Due to low metal prices and high costs, company operated under difficulties in 1920-21.

CONSOLIDATED COPPER CO. OF PARRY SOUND ONTARIO

Office: 705 Palladio Bldg., Duluth, Minn. **Mine office:** Parry Sound, Parry Sound district, Ont.

Officers: Robt. Forbes, pres.; Robt. Millard, v. p.; J. G. Harris, sec-treas.; preceding, with A. C. Le Richeux, Frank Cox, E. E. Rorem, Dr. J. D. Budd and C. J. Jackes, directors.

Inc. February, 1902, in Ontario. **Cap.** \$5,000,000; shares \$1 par; issued about \$3,100,000. No stock for sale.

Property: 1,500 acres, patented, carries considerable standing timber, in Foley, McDougall, Hagerman and Cowper townships. Part of property formerly held by Hattie Belle Gold, Copper & Nickel Co. and the Valentine Mica Mining Co.

Geology: contact deposits between slate and quartzite, and fahlbands containing chalcopryite ore with occasional bornite and chalcocite, mainly low in grade, but with occasional seams of high-grade ore. There are 18 different orebodies, as shown by test pits and stripping, 4 of which are slightly developed. The fahlbands show a width of more than 1,000', carrying 7 bands of ore, of 200' estimated aggregate width, amenable to concentration. Ores assay 1.5 to 12% copper, 3 oz. silver, and from a few cents up to \$8 gold per ton.

Development: by 180' vertical shaft, and about 25 pits of 10 to 100' depth. The Spider Lake mine has a shaft house, and steam hoist good for 500', with necessary mine buildings. A considerable orebody has been exposed by trenching. The Lefex mine, about 220 acres, has an iron gossan, carrying up to 2% copper and \$2 to \$3 gold per ton. A 600-lb. test shipment, from the 65' level, returned 30% copper, and various samples have shown from 1.5 to 3% nickel, and from nothing to \$20 gold per ton.

Idle several years.

CONTACT BAY MINES, LTD.

ONTARIO

Office: care J. N. Beckley, Rochester, N. Y. **Mine address:** H. S. Badger, supt., Dryden, Ont.

Inc. July 10, 1918, in Ontario. **Cap.** \$200,000. Is a close corporation, and apparently succeeds the Rognon Gold Mines, Ltd.

Property: Rognon, Redeemer and Bonanza groups, near Wabigoon lake, Van Horn Twp., Kenora district, northwestern Ontario.

Development: by 100' Rognon shaft, 86' Bonanza shaft and 286' of drifting E. and W. The orebody is 4' wide, averaging \$8 in gold per ton with occasional rich pockets of ore. Test shipments have been made from both Redeemer and Rognon mines.

CORDOVA MINES, LTD.

ONTARIO

Office: Sun Life Bldg., Toronto, Ont., Canada. **Mine office:** Cordova Mines, Peterboro county, Ont.

Officers: P. Kirkegaard, pres.; Wm. H. Price, v. p.-treas.; Edw. Willan, sec., with C. M. Kirkegaard and C. M. Garvey, directors.

Inc. 1911, in Ontario. **Cap.** \$500,000; shares \$5; all issued. Company is operated as a close corporation.

Property: 670 acres, owned in fee simple, in Belmont twp., Peterboro county. Ore occurs in veins in diorite which are said to be from 8 to 30' wide with ore shoots from 50 to 400' long. The ore consists of quartz, schist and iron sulphides, and is estimated to average \$5 gold per ton.

Development: by shafts of 160', 400', and 500' depth, with a total of over 6,000' of underground workings. Idle since 1918.

Equipment: the ore and shaft-houses and the mill burned in 1917, were

partly replaced in 1918. Other equipment includes two 1,500 cu. ft. compressors, hydro-electric power plant developing 900 h. p., pumps and 1,800' tramway. Up to 1919 mill had treated about 70,000 tons of a total value of \$360,000.

An electric smelting plant for the production of ferro-chromium with a daily capacity of 5,000 lb. completed, February, 1919, was never operated.

CRAWFORD-SKEAD GOLD MINES, LTD.**ONTARIO**

Address: Haileybury, Ont. **Mine address:** Boston Creek, Ont. H. W. Crawford, mgr.

Property: in Skead Twp., Boston Creek area, Timiskaming district, developed by shallow shaft said to open a 6' vein of quartz porphyry.

No record obtainable of personnel or finances.

CROESUS GOLD MINES, LTD.**ONTARIO**

Office care A. A. McGrath, Room 812, 42 Broadway New York.

Mine office: Matheson, Ont.

Officers: D. M. Steindler, pres.; H. M. Thompson, asst. sec.; Chas. Lobner, gen. mgr.

Inc. September 21, 1912, in Ontario. **Cap.** \$2,000,000; \$1 par: 200,000 issued. Stock owned by Dominion Reduction Co.

Property: the Welsh & Dobie claims in Munro township.

Geology: quartz vein in diabase. Gold occurs free and in sulphides, with a little silver. Spectacular gold ore was found on the Dobie claim.

Development: by 400' incline and 2,222' total workings. Near the surface, the shaft produced \$1,000 for each foot in sinking. Gold is all coarse and free.

Equipment: includes 50-ton mill, with Hardinge mill, picking belt, and amalgamation plates.

Production: in 1918 was 3,124 oz. gold from 692 tons of ore; total to Jan. 1, 1919, \$259,953. Mining operations suspended Feb., 1918.

CROWN-RESERVE MINING CO., LTD.**ONTARIO**

Mine office: H. F. Strong, supt., Cobalt, Ont.

Offices: Dominion Express Bldg., Montreal, Quebec; 18 Toronto St., Toronto, Ont.

Officers: John W. Carson, pres. and min. dir.; W. I. Gear, 1st v. p.; J. G. Ross, 2nd v. p.; C. A. Smart, J. W. Ross, A. G. Gardner, R. W. Reford, F. S. Meighen, Ziba Gallagher, and J. H. Thom, directors. Jas. Cooper, sec.-treas.; John Reid, asst sec.-asst. treas.; S. W. Cohen, con. engr. H. W. Darling, field engineer; H. J. Stewart, mgr.

Inc. January 16, 1907, in Canada. **Cap.** \$2,000,000; \$1 par; outstanding, Jan. 1, 1918, \$1,999,957, of which \$231,143 is held by trustees for the benefit of the company and bears no dividends. Crown Trust Co., Montreal and Toronto, transfer office and registrar. Annual meeting, fourth Wednesday in January. Listed on Montreal Stock Exchange and Toronto Stock Exchange and dealt in on New York and Boston curbs. High 60c. low 25c. in 1919; 48-15½c. in 1920; 13-9½c. in 1921.

Dividends: 20% in 1908; 71% in 1909; 60% in 1910-12; 48% in 1913; 24% in 1914; 8% in 1915; 5% in 1916; total dividends to Jan. 1917, \$6,190,849, or 335% on the outstanding capital. None paid since.

Balance sheet for 1920 shows: assets, \$2,517,321, including ore, \$16,000; cash, \$50,548; accounts receivable, \$21,104. Liabilities include accounts payable, \$4,882.

Income Account Essentials—years ended December 31:

Year	Ore Sales	Total Dish.	Net Earnings	Other Income	Total Income	Total Surplus
1920....	\$34,260	\$125,745	†\$91,485	\$1,789	†\$89,969—	\$512,482

* Includes depreciation \$174,339. † Deficit

Property: original holdings at Cobalt consist of 23 acres in Kerr Lake, developed by the Crown Reserve mine, which has been one of the heavies; producers in Cobalt. The company co-operated with the Kerr Lake Mining Co. in the draining of Kerr Lake, but the results were disappointing to Crown Reserve in that no new valuable veins were found. The pumping out of the lake made it possible to obtain ore containing over 2½ million oz. silver, which otherwise could not have been extracted, and the small veins discovered, not in themselves of great importance, were sufficient to pay for the whole cost of the operation.

Owns also Reward Gold Mines in Inyo county, Calif.

The Crown Reserve Co. owns 60% of the stock of the Porcupine-Crown Mines, Ltd., (q. v.); see also its operating company, **Northcrown Porcupine**. This mine closed down in June, 1918, but limited operations were resumed in 1919. It is estimated to have \$500,000 in ore reserves. Company owns jointly with Kerr Lake Mining Co., Ltd., the Drummond Fraction property from which it received a profit of \$9,844 in 1916; no work was done on this property in 1918, but was resumed November, 1919. Lease on holdings of Silver Leaf Mng. Co., Ltd., expired in fall of 1919 and was not renewed. Beginning with May, 1919, company became indirectly interested in the Canadian Kirkland property (see Northcrown Porcupine).

Development: by 800' shaft. In 1919, development work amounted to 2,698', making 40,845' to date. Work in the unexplored east end of the property cut 4" of rich ore on the 150' level in December, 1919.

Strikes, high costs and lack of power handicapped operations during 1920, but diamond drilling reached depth of 1,500' from the 500' level. The Reward mine was closed down in 1918, and equipment sold; development results were not encouraging. In 1918-19, company explored the Walsh silver mine in Milner Twp., Gowganda area, and sunk shaft to a depth of 200', property is still under option.

Production, year ended December 31:

Year	Silver Prod. Gross Oz.	Gross Value	Net Value	—Per Ounce—

Company's low grade ore is treated by the Dominion Reduction Co.

The future of the Crown Reserve Mining Co. depends upon its ability to acquire new properties. In following this policy, begun in 1915, company has investigated, staked and leased, many properties, in northern Ontario, northern Quebec, northern Manitoba and California; control of 2,000 acres in the two first named is now held.

In 1921, company took over 13 claims in the Larder Lake gold area, Timiskaming district, 17 miles E. of Dane on the T. & N. O. Ry. A 30' vein in altered basalt assaying \$5 per ton in gold has been opened. Results of development are reported to be so encouraging that a subsidiary company is contemplated, with an exploratory fund of \$250,000.

DAVIDSON CONS. GOLD MINES, LTD. ONTARIO

Is a holding company only, owning £175,000 pfd. and £450,000 common stock of **Porcupine-Davidson Gold Mines, Ltd.**, to which all assets were sold in August, 1921.

Address: 12 King St. E., Toronto, Ont.

Officers: G. C. Crean, pres.; H. H. Sutherland, v. p.-mng. dir.; with J. J. Davis, S. W. McKeown, C. W. Moodie, E. A. Snowman and Robt. Starke, directors. L. C. Platt, sec.-treas.

Inc. Aug., 1919, in Canada, as a reorganization of The Davidson Gold Mines, Ltd. **Cap.** \$5,000,000; \$1 par; 4,000,005 shares outstanding; stockholders of old company received 2 shares of new stock for every share of old. Chartered Trust & Executor Co., transfer agt. and registrar.

Report of Dec. 31, 1920, shows current assets of \$9,083 and liabilities, \$57,261. Fixed assets include \$3,662,241 for mineral holdings and plant. For 9 months beginning Sept., 1919, \$144,245 was expended on development.

In Jan., 1921, stockholders decided to sell company to English syndicate; 1,000,000 shares were sold to it at 75c. and according to report, remaining outstanding shares were to be taken over at \$1.18 per share. Eventually, in August, this resulted in a reorganization, and company sold its entire assets to a new company, **Porcupine-Davidson Gold Mines, Ltd.** (q. v.), receiving £50,000 cash, £175,000 pfd. and £450,000 com. stock of new company.

DAVIDSON GOLD MINES, LTD. ONTARIO

Reorganized, 1919, as Davidson Cons. Gold Mines, Ltd., which see.

DELORO SMELTING & REFINING CO., LTD. ONTARIO

Address: Deloro, Ont., Can. **Branch offices:** 1404 C. P. R. Bldg., Toronto, and 26 Albemarle St., London W., England.

Officers: M. J. O'Brien, pres.; J. A. O'Brien, v. p.; Thos. Southworth, mng. director; S. B. Wright, gen. mgr.; S. F. Kirkpatrick, cons. metallurgist; F. A. Bapty, sec.-treas.

Company is the successor, 1917, of the Deloro Mng. & Reduction Co., with same officers and management.

Owns a smelting plant and refinery at Deloro. Output consists of bar silver, arsenic, nickel oxide and metal, and cobalt oxide and metal. Also manufactures "stellite," a high-grade cutting metal.

Company aims to finish all products at the Deloro plant. Employed about 250 men at last accounts.

DICKSON CREEK (COBALT) SILVER MINES, LTD. ONTARIO

Company is controlled in England.

Mine address: H. Hollands-Hurst, mgr., Box 479, Haileybury, Ont.

Directors: W. F. H. Blandford, chairman, Walter Eveling, Phillip Hurst and A. E. Smith.

Property: lots 9 and 10, Concession V, about 110 acres in Bucke Twp., 7 miles from Cobalt, developed to depth of 250' with crosscuts and drifting N. E. and S. W. All work has been done in conglomerate formation. Five men employed.

DOBIE MINES, LTD. ONTARIO

Office: Porcupine, Ont.

Officers: Frank C. Armstrong, pres., 25 Broad St., New York; S. J. Le Huray, sec.-treas., 260 St. James St., Montreal; with C. H. Ancrum, A. C. Davidson and W. E. Coughtry, directors. H. C. Carmichael, mgr.

Inc. March 27, 1911, in Ontario. **Cap.** \$1,500,000; par \$5; outstanding, \$1,200,000. Of the issued stock, \$1,100,000 was given to the owners in payment of the property and \$100,000 stock was purchased by the Tisdale Gold Mng. Co., to provide funds for development purposes. Transfer agents: Toronto General Trust Corp., Toronto; Investment Trust Co., Montreal. Listed on Toronto Standard & Mining Exchange, and traded in on the unlisted department of the Toronto Stock Exchange, and on the New York and Boston Curbs. Cash balance April 1, 1919, \$30,736.

Property: 17 claims, crown patented, in Tisdale Twp., taken over from the Tisdale Gold Mng. Co., Ltd. Idle several years.

DOMESTIC EXTENSION MINES CO., LTD. ONTARIO

Fully described in Vol. XIV; property purchased, September, 1920, by **Dome Mines Co., Ltd.** (q. v.) for 76,667 shares of the latter, or on basis of 1 share of D. E. for 30 shares of D. M.

DOMESTIC LAKE MINING & MILLING CO., LTD. ONTARIO

Offices: New Liskeard, Ont., and South Porcupine, Ont.

Officers: A. A. McKelvie, pres.; Wm. H. Kinch, v. p.; F. L. Hutchinson, sec.-treas., with Thos. McCamus, F. L. Bapst, S. J. Dark and Chas. L. Sherrill, directors. D. M. McPhail, mgr.

Inc. Aug. 26, 1914. **Cap.** \$3,000,000; \$1 par; all outstanding. Funded debt, \$43,200 1st mtge. 5 year gold 7s, issued in 1919. Controlled by Hudson Bay Mines, Ltd., which owns 1,594,045 of the outstanding shares. Trusts & Guarantee Co., Ltd., Toronto, transfer office. Annual meeting, second Monday in February. Listed in Toronto and on New York Curb.

Report for year ending Dec. 31, 1920, shows total assets, \$2,158,870, including bills and accounts receivable, \$28,205; current liabilities, \$30,988; bonds and interest, \$46,206. Revenue amounted to \$47,448 and expenditures were \$53,383, including mining and development, \$18,972; milling, \$11,531.

Property: 3 claims, patented, 120 acres, in Tisdale township, Porcupine, showing gold ore in quartz veins, regarded as replacement deposits. The veins run N. 10° E. and have a dip of 70°. The mineralized zone traverses a basaltic rock, and runs through the entire group.

Development: to depth of 600' by vertical shaft and 18,375' of workings. Work in 1920 was confined to No. 3 vein on the 600' and 500' levels.

Equipment: includes Vulcan hoist, compressor and 200-ton mill. A 100-ton cyanide plant was completed in 1918.

Production:

Year	Tons	Gross	Value	Extraction	Costs
	Milled	Value	per ton	%	per ton
1920...	5,336	\$ 51,919	\$9.73	90.00	\$3.05
1919...	4,433	23,832	6.50	78.85
1918...	11,929	115,202	9.65	84.5	8.73
1917...	16,388	68,214	4.16	66.1	8.14
1916...	6,540	25,629	3.92

The mine and mill were in operation from Jan. 1 to May 27, 1920, but idle since. A consolidation with the West Dome Cons. Mines is in contemplation.

DOMESTIC MINES CO., LTD., THE ONTARIO

Head office: 36 Toronto St., Toronto, Ont. Executive and financial: 42 Broadway, New York. **Mine address:** South Porcupine, Ont.

Officers: J. S. Bache, pres.-treas.; W. S. Edwards, v. p.; H. P. De Pencier, v. p.-gen. mgr.; Alex. Fasken, sec.; A. H. Curtis, asst. treas., and asst. sec., preceding, except H. P. De Pencier, with G. C. Miller, Colgate Hoyt, Howard Poillon and T. R. Finucane, directors. C. W. Dowsett, mill supt.

Inc. March 23, 1910, in Ontario. **Cap.** authorized, \$5,000,000; outstanding 476,667 shares; \$10 par; Guaranty Trust Co., New York, and Trusts & Guarantee Co., Ltd., Toronto, transfer agents. Bankers Trust Co., New York, and Toronto Genl. Trusts Corp'n, Toronto, registrars. Annual meeting, second Tuesday in June. On June 23, 1915, the New York Stock Exchange listed \$3,500,000 of the capital stock with authority to add \$500,000 on official notice of issuance and payment in full; listed on Toronto Stock Exchange.

Dividends: on Sept. 1, 1915, initial quarterly of 50c per share was paid; continued until reduced in June, 1917, to 25c quarterly. The total was \$1,500,000. Disbursements suspended until January 15, 1920, when 25c.

equal to \$100,000, was paid; and the same quarterly until July, 1920; thereafter 25c. quarterly on 476,667 shares; total \$2,395,834 to Jan. 20, 1922.

Company proposes to begin redemption of its capital stock, and to this end will repay \$1.00 per share on April 20, 1922.

Comparative General Balance Sheet, years ending March 31:

Year	Property and Equipment	Assets.

* Deficit. † Loss.

On Sept. 30, 1921, net quick assets were \$1,759,385 and net profit, \$493,834, before depreciation and depletion.

Property: 6 claims, 240 acres, in Tisdale Twp., Porcupine area. The tract shows the veins of milky quartz usual in the district, the ore carrying free gold and auriferous pyrite. They form a stockwork whose net work of interlacing stringers cut schists and intrusives of pre-Cambrian age. The orebody is over 100' across in places, and has been proved by diamond drill work to a depth of 1,200' or more. The original outcrop, a dome-shaped hillock about 30' high, showed so much free gold at one place that it was called the Golden Stairway. The gold occurs irregularly in the quartz, which is found in large irregular masses, entirely without walls. It is mainly found on or near the contact of an intrusive porphyry with sedimentaries, and is capped by slate. Development has proven the existence of quite as good ore at 700' and in diamond drill holes at 1,150' vertically below the surface, as that mined on the surface and in the upper levels.

The company's option on the 5 adjoining claims, 198 acres, of the Dome Extension Mines Co., Ltd., was extended 6 mos. to Sept. 15, 1920, when it was exercised by payment of 76,667 shares of Dome Mines. Expenditures by latter for exploration and development were \$51,682 and \$12,875 in fiscal years ending 1920 and 1921. Negotiations for purchase of holdings of Foley-O'Brien, Ltd. were under way late in 1921.

Development: the Dome mine has 3 working shafts, the main shaft being 1,200' deep. Considerable exploration and diamond-drill work has been

done on the orebody, especially during the period December, 1917 to June, 1919, when the mill was idle on account of war conditions.

Up to 1918, over 750,000 tons had been mined and milled and 321,000 tons remained in stopes. Stopping costs in that period were 47c per ton. New methods of mining and ore handling installed in 1919, will, it is said, make a notable saving in costs. A square-type shaft was sunk on the foot-wall side of the ore-bearing zone, to a depth of 1,000', with stations at 100' intervals, and loading pockets for ore and waste on several levels. The eighth level at a vertical depth of 850', is the main haulage way, all ore going to a 36 to 54 in. jaw crusher just below the station. Ore passes are so arranged that all the ore mined above this level, estimated at 2,000,000 tons, will be moved mechanically after it is loaded into cars. Shaft No. 2 is utilized as a main chute or pass from the upper workings to No. 8 level. Electric locomotives are used for haulage. Ore is hoisted by skips working in balance, taking 4 tons per trip at a speed of 1,100' per minute.

During 1919-20, extensions totaled 3,505', with 865' of drilling additional; stopping was largely confined to the 7 and 8 levels, with development extending from the 3 to the 10th level; during 1920-21, extensions were 5,907' and drilling 5,907'; largely on 7th, 8th and 10th levels. Late in 1921, a new orebody, averaging \$20 per ton, was found on the 7th level.

Ore reserves: as of March 31, 1918, were 1,950,000 tons averaging \$5.10 per ton and in 1919, they were substantially the same. Reported in 1920 that irregularity of ore occurrences and erratic values preclude accurate tonnage estimates, but that a 3 to 4 years ore supply was available; broken reserves on March 31, 1920, were 251,352 tons of ore, and about 200,000 tons a year later.

On the Dome Extension, which is opened by 3 shafts, and on which former management had performed over 10,000' of work, development during 1919-20 consisted of 1,172' of drifts, etc., and 1,285' of drilling. On the 6th level, an orebody covering 12,000 sq. ft., with an ore grade of \$4.62 per ton, was discovered and an ore zone on the 10th level was explored; 6,849 tons of ore averaging \$4.45 per ton were sent to the mill. In fiscal year ended March, 1921; 4,063' of drilling was done.

Equipment: is modern, extensive, and all electrically driven, by power obtained from Wawaitin Falls, 13 miles from the property. Three-phase current is supplied over the company's own transmission line at 12,000 volts, stepped down to 550 volts by 600 k. w. transformers.

The cyanide mill is of 1,500 tons daily capacity. It contains ball-mills (instead of the stamps formerly used), tube-mills, thickeners, agitators, and filter-presses.

Production: for years ended March 31:

Year	Ore Milled, Yield		Recovery %	Cost per Ton			Total
	Tons	per ton		Mining	Reduction	General	
1921...	273,700	\$ 7.11	94.73	\$2.18	\$1.78	\$0.57	\$4.53
1920...	270,080	6.57	94.30	1.69	1.28	0.47	3.44
1919...
1918...	247,000	4.17	97.67	1.42	1.06	0.30	2.78
1917...	459,530	4.73	92.98	1.44	0.95	0.31	2.70
1916...	347,640	5.50	92.88	1.22	1.01	.32	2.56
1915...	248,550	4.68	90.6	1.38	1.12	.46	2.97
1914...	145,305	8.77	94.51	1.86	1.69	.64	4.19
1913...	101,812	10.72	95.63	1.31	2.35	1.29	4.95

Note: 1918 and 1920 figures are for 8 and 11 months, respectively.

The Dome is a big low-grade mine in which some extraordinarily rich ore is found. The mine and mill are well equipped to handle 1,500 tons daily, and under normal conditions will earn a handsome surplus.

Labor and power shortage handicapped operations during the fiscal year ended March 31, 1921, but conditions have improved since.

DOMINICO MINES CO., INC.**ONTARIO**

Directors: Dr. Carl H. Hubier, Rochester, N. Y. pres.; John C. McCurdy, Jas. J. Withall, J. Wilson McCleary, W. W. Jones and H. L. Holmes.

Property: Big 4 mine, 155 acres, in Gowganda district, said to show a vein of silver-cobalt ore assaying \$26 per ton at 40' depth.

DOMINION NICKEL-COPPER CO., LTD.**ONTARIO**

Property taken over by **British-American Nickel Corporation**, which see.

DOMINION REDUCTION CO., LTD.**ONTARIO**

Office: Cobalt, Ont.

Officers: D. M. Steindler, pres.; Mortimer B. Davis, v. p.; H. M. Thompson, sec.-treas., with A. A. Allen and L. L. Steindler, directors. Albert Wood, supt.

Inc. 1912, in Ontario. **Cap.** \$2,000,000; shares \$1 par; \$1,600,000 outstanding. Nearly all stock is held by the directors.

Company took over the Nova Scotia mill at Cobalt. Mill has 40 stamps, and treats custom ore, including low-grade ore from the Kerr Lake and Crown Reserve mines, with which the mill is connected by an aerial tram. All ore is purchased outright and reduced to bullion; payment is made in cash or in bullion. Company also owns and operates the property of the **Croesus Gold Mines, Ltd.**, in Munro Twp., 50 miles E. of Porcupine; has an interest in the St. Anthony, or Thunder mine, at Sturgeon Lake, and operates the Nova Scotia mine.

In 1920, company made a contract with the Peterson Lake company to treat 300,000 tons of tailing in Peterson lake, receiving 35c per ton of net proceeds.

EDWARDS & WRIGHT, LTD.**ONTARIO**

Address: 120 Bay St., Toronto, Ont. **Mine address:** No. Cobalt, Ont.

Inc. Jan. 30, 1918. **Cap.** \$100,000.

Property: the Green Meehan and Red Rose mines in Bucke Twp., Timiskaming district. The former is developed by 200' shaft. Early in 1918, a promising vein was exposed in a 45' winze from bottom level and connection was to be made with the Red Rose.

Production: in 1918, including dump ores, was 50,941 oz. from 3,708 tons of ore. No recent details.

ELLIOTT-KIRKLAND GOLD MINES, LTD.**ONTARIO**

Address: Haileybury, Ont.

Officers: S. H. Worth, pres.-treas.; R. H. Lyman, v. p. and mgr.; W. A. Gordon, sec.; with John M. Wood and E. W. Kearney, directors.

Inc. December, 1916, in Toronto. **Cap.** \$2,000,000; par \$1. Traded on Toronto Stock Exchange.

Property: 3 gold-bearing claims, at Kirkland Lake, developed by a 537' shaft and extensive diamond drilling. As commercial ore was not found on the lower levels, work was stopped in 1919, and has not been resumed.

Equipment: 60-h. p. boiler, hoist, compressor, and quarters for 18 men.

ELSTONE DUNKIN MINES, LTD.**ONTARIO**

Address: New Liskeard, Ont. **Mine address:** Larder Lake, Ont.

Property: 3 claims, in Gauthier Twp., Larder Lake area, Timiskaming district. Ore is gold-bearing. Reported May, 1921, that program called for extensive development, including a 400' shaft. Reported in March, 1922, that company was being reorganized. Is a prospect.

FALCONBRIDGE MINES, LTD.**ONTARIO**

Address: c/o Fred B. Snyder, pres., 710 Security Bank Bldg., Minneapolis, Minn.

Cap. \$10,000. Company is licensed to do business in Ontario.

Property: nickel-copper claims in Falconbridge Twp., Sudbury district.

FIDELITY MINING & DEVELOPMENT CO. ONTARIO

Address: 806 Ferry St., Niagara Falls, Ont. **Mine address:** Kirkland Lake, Ont. E. W. Kearney, sec.; Chas Duckeman, mgr.

Property: several claims in Teck Twp., Goodfish Lake section, Kirkland Lake area, directly S. W. of La Belle Kirkland. The rock formations are basalt and diabase, with intrusions of grey quartz-feldspar, porphyry. Lode matter consists of altered basalt with vein quartz and silicified rock, carrying pyrite and molybdenite. Fine, free gold was observed on the outcrop.

Development: by 192' incline sunk on a 20" vein, which widened to 84" at the bottom. Work was suspended from June, 1919, to Feb., 1920.

Equipment: includes 50-h. p. boiler, 6 by 8" hoist and 3-drill compressor, etc.

FOLEY-O'BRIEN, LTD. ONTARIO

Address: So. Porcupine, Ont.

Officers: C. L. Sherrill, pres.; H. B. Hatch, mgr.

Inc. April 3, 1911. **Cap.** \$3,000,000.

Property: in Tisdale Twp., Porcupine area, on westerly edge of So. Porcupine, adjoins Dome Extension on N. E. corner, shows interbedded slates and greywacke, intruded by porphyry. Ore is gold-bearing, but none in commercial amounts has been found. Geological conditions are said however to be favorable.

Development: by 3 shafts, 70, 160 and 235' deep; also a 250' winze from 160' level. Laterals amount to 1,800'.

Equipment: includes two 50 h. p. boilers; 2 compressors of 600' total capacity; and 3 hoists.

Company has not apparently operated since 1914. In late 1921, reported that the Dome Mines were considering purchase of property.

FOSTER COBALT MINING CO. ONTARIO

Inc. Feb. 14, 1906, in Ontario. **Cap.** \$1,000,000; \$1 par. Dividends paid, \$45,000; last Jan. 1, 1907.

Owns the Foster mine at Cobalt, worked intermittently up to 1919, by company, or lessees. Now under lease to Mining Corp. of Canada (q. v.), and operated by its subsidiary, Central Operating Co., Ltd. (q. v.). Developed to depth of over 200' and has been a small producer.

GENESSEE MINING CO., LTD. ONTARIO

Head office: Cobalt, Ont. **Executive office:** 442 Powers Bldg., Rochester, N. Y. L. F. Steenman, mgr.

Officers: C. F. Wray, pres.; A. H. Dewey, v. p.; Alexander Russell, sec.-treas.; L. F. Steenman, gen. mgr., with Dr. J. Pope Delaney and W. J. Weid, J. G. Comerford and G. H. Welch, directors.

Inc. 1915, in Ontario. **Cap.** \$2,000,000; \$1 par.

Company has a 6 years lease on the U. S. claim, north of the north claim of the Chambers-Ferland.

Development: by 572' shaft, with 2,100' of workings on 500' level and 265' on 350' level. Two veins of low-grade ore were cut on the 500' level, and crosscutting to these veins on the 350' level was begun, spring of 1921. Work suspended for lack of funds, but reported that it is to be resumed early in 1922.

GIBSON GOLD MINES, LTD. ONTARIO

Address: 302 Ellicott St., Buffalo, N. Y. **Mine address:** Shiningtree, Ont.

Officers: G. A. T. Hagan, sec.; E. C. Roberts, mgr.

Property: one claim in Asquith Twp., Peterborough county, southern section of W. Shiningtree district, and on E. shore of lake of that name. Two or more deposits occur in shear zones. Ore is quartz, well mineralized with pyrite carrying gold.

GIFFORD COBALT MINES, LTD.**ONTARIO**

Address: c/o R. C. Levesconte, 20 King St. E., Toronto, Ont. **Mine address:** Box 118, Cobalt, Ont. F. B. Mosure, mgr.

Property: in Coleman Twp., Timiskaming district, adjoins the Beaver mine, developed by 200' shaft and winze for 150' deeper; workings total about 1,000'. Ore is silver-bearing. Because of water, mine has apparently not been operated since early 1918.

GLEN LAKE COBALT MINES, LTD.**ONTARIO**

Probably dead. Described in Volume XIV.

GOLDALE MINING CO.**ONTARIO**

Address: 85 Bay St., Toronto, Ont. **Mine address:** Schumacher, Ont. Controlled by the Marcus Daly Estate; Jas. Y. Murdoch, pres.; C. H. Poirier, mgr.

Property: 50 claims, 2,000 acres, in Tisdale Twp., Pearl lake section of Porcupine area, Timiskaming district, formerly owned by the Bewick Moring interests. The drilling program planned by the management was completed Aug., 1921. Property is developed also by 140' shaft.

GOLD CENTRE MINES, LTD.**ONTARIO**

Head office: 312 Temple Bldg., Toronto. **Mine office:** Timmins, Ontario. B. M. Watson, mgr.

Officers: T. G. Marquis, pres.; Geo. S. Bingham, v. p.; M. P. Van der Voort, sec., with A. H. Jucksch, Wm. R. Kirk, and W. Melrose, directors. Inc. in Ontario. **Cap.** \$3,000,000; par \$1; issued 1,500,000 shares.

Transfer agent and registrar, Trusts and Guarantee Co., Toronto.

Property: 160 acres, in Porcupine district, formerly owned by the Boyce Syndicate, located about one mile E. of the productive area of the Hollinger Cons. in a section where only a limited amount of work has been done.

GOLDEN SUMMIT MINING CO.**ONTARIO**

Address: J. L. Kerr, Detroit, Mich. **Mine address:** Sesekinika, Ont.

Inc. 1920 to develop a property on Kapakita creek, in Masonville Twp., Bourke's area, Timiskaming district. Presumably was a stock selling promotion only.

GOLDFIELDS, LTD.**ONTARIO**

Address: P. Kirkegaard, (of Protective Committee), Sun Life Bldg., Toronto.

Inc. March 14, 1910, in Ontario. **Cap.** \$3,000,000; 2,356,647 shares issued.

Property: the Harris-Maxwell (or Goldfield) mine in Hearst Twp.; and claims of Reddick Gold Mng. Co., Ltd., 9 miles to N. E., in McGarry Twp., acquired in 1914; both in Larder Lake area.

Development: by 500' shaft with drifts on 65,400' and 500' levels. On Reddick: by 100' shaft and 400' of drifts. New work in 1918 in two mines was 1,100'.

Equipment: includes 2 hoists, 8-drill compressor, and 30-stamp mill. Power is supplied by company's hydro-electric plant at Raven falls, 13 miles distant. Reddick mine is equipped with hoist, 3-drill compressor and 20-stamp mill.

The Goldfields mill, completed in 1912, was operating until May, 1913, but apparently not since.

Beginning about 1916, the activities of Goldfields, Ltd., have been closely associated with those of Associated Goldfields Mng. Co., Ltd., and its successor, Canadian Associated Goldfields, Ltd., which see. Professing that no information regarding Goldfields has been made available to its stockholders since April 29, 1912, a protective committee began in July, 1921, to determine the relationship of the company to its so-called successors.

GOLD REEF MINING CO.**ONTARIO**

Address: 24 King St. W. Toronto, Ont.

Officers: E. P. Smith, pres.; J. Ross Curry, sec.-treas., with M. P. Vandervoort, J. T. Eastwood and S. W. Gooderham, directors.

Inc. in Ontario. **Cap.** \$3,000,000; \$1 par; 2,000,000 shares issued. Trusts & Guarantee Co., Toronto, transfer agent and registrar.

Property: 240 acres, in Porcupine district, developed by 100' shaft. Plans include sinking to 300' depth and diamond drilling.

GOODFISH GOLD MINES, LTD.

ONTARIO

Address: Haileybury, Ont. H. L. Slaght, sec.

Property: 3 claims in Teck Twp., Kirkland Lake area. Timiskaming district, developed by 80' shaft. Work was resumed in mid-1921 after several years idleness.

GRACE MINING CO.

ONTARIO

Address: Geo. J. Blake, pres., 300 Broadway, Buffalo, N. Y. **Mine address:** Eagle P. O., Ont.

Property: the old Grace and Norwalk, or Mauxman groups, on Lake Eagle, Kenora district, 21 miles S. of Eagle river station on the C. P. R. R., reopened in 1919.

Development: by 150' shaft, drifts and crosscuts, in quartz veins said to contain free milling gold ore.

GRANBY-KIRKLAND GOLD MINES, LTD.

ONTARIO

Head office: Rm. 303, 57 Queen St. W., Toronto, Ont. **Mine office:** Kirkland Lake, Ont.

Officers: J. M. Childerhose, mng. director; Newton C. Shaver, pres.; D. H. Macdonald, v. p., with Thos. Holgate, I. T. Stockwood and Richard Robinson, directors. A. W. Grierson, supt.

Cap. \$2,000,000; par \$1.

Property: 3 claims, 139½ acres, in Lebel, Twp., includes the Bain mine between Ontario Kirkland and King Kirkland holdings, on which trenching has disclosed 14 promising veins, six of which carry gold values, said to assay as high as \$15.20.

Work has been confined mainly to surface exploration and test pits. Operations resumed June 25, 1921.

GRASELLI CHEMICAL CO., LTD., THE

ONTARIO

Office: Hamilton, Ont., Canada. Mine at Lanark, Ont.

Officers: E. R. Grasselli, pres.-treas.; T. S. Grasselli, v. p.; E. R. Bailey, sec.

Inc. 1911, in Ontario. Is controlled by the Grasselli Chemical Co., Guardian Bldg., Cleveland, Ohio.

Property: the Caldwell pyrite mine at Clyde lake, Blithfield Twp., opened about 1919.

Company manufactures acid at Hamilton, and, in addition to its own supply, purchases pyrite in the open market.

GREENE KIRKLAND GOLD MINES, LTD.

ONTARIO

Address: Toronto, Ont. **Mine address:** Kirkland Lake, Ont. W. F. Green, mgr.

Inc. 1919. **Cap.** \$3,000,000; \$1 par.

Property: in Teck Twp., Kirkland Lake area. Timiskaming district.

HAILEYBURY-FRONTIER MINING CO.

ONTARIO

Address: H. F. Strong, B. 1000, Haileybury, Ont. Mine at Silver Centre, Ont.

Inc. July 31, 1909. **Cap.** \$1,250,000.

Property: in So. Lorrain Twp., adjoins holdings of the Keeley Silver Mines. High grade cobalt-silver ore is found in a number of shoots. Developed by 2 shafts and about 1,000' of workings, to a depth of 300'.

Late in 1921, claims were taken under lease and option by **Mining Corp. of Canada**, which is installing a larger mine plant and contemplating new shaft.

HARGRAVE CONS. MINES, LTD.

ONTARIO

A merger of the Hargrave Silver Mines and Reliance companies in

December, 1919.

Address: Cobalt, Ont. Jno. T. Shaw, mgr.

Company owns 40 acres in the Porcupine area. Property at Cobalt, in Coleman Twp., adjoining Kerr Lake Mng. Co. sold to that company for \$16,500 in 1921.

HARGRAVE SILVER MINES, LTD.

ONTARIO

Described in Vol. XIV. Company merged, December, 1919, with Reliance Co., to form Hargrave Consolidated Mines, Ltd. (q. v.), with same capital as H. S. M. Ltd., but free of debt.

HARMAK MINING CO.

ONTARIO

Address: Toronto, Ontario.

Inc. June 15, 1918, in Ontario. **Cap.** \$300,000.

Property: in Casey Twp., Cobalt silver area, W. of holdings of Casey-Cobalt Silver Mng. Co., which in 1918 had a contract to develop Harmak ground. Developed by 375' shaft, and equipped with hoist.

The Casey-Cobalt company is now reported to be in liquidation and the Harmak mine is presumably idle.

HARVEY-KIRKLAND GOLD MINES, LTD.

ONTARIO

Address: 59 Yonge St., Toronto, Ont. **Mine address:** Kirkland Lake, Ont.

Officers: C. J. Beilby, pres.; W. G. Switzer, v. p.; J. W. Beilby, sec.-treas.; Geo. G. Thomas, mgr.

Inc. in Ontario. **Cap.** \$1,500,000; \$1 par.

Property: in Lebel Twp., Kirkland Lake area, Timiskaming district, about 2 miles S. E. of Kirkland Lake, shows 2 or more veins.

HATTIE GOLD MINES, LTD.

ONTARIO

Address: Matheson, Ont.

Property: 200 acres, in Coulson Twp., Munro area, Timiskaming district, 12 miles from Matheson on the T. & N. O. R. R., said to show several quartz veins containing \$2.28 to \$7.20 per ton in gold, both free and with tellurides with high grade patches, associated with pyrite, copper pyrite, and galena.

Development: by 3 shafts, one showing 4' of \$100 ore at 80' in depth. Equipped with mining plant purchased from Porcupine-Imperial.

Reported Dec., 1921 that 400,000 shares were underwritten by Dr. S. G. Abbott at 25c. and balance at 50c.

HAYDEN GOLD MINES, LTD.

ONTARIO

Address: 509 Brisbane Bldg., Buffalo, N. Y. **Mine address:** Schumacher, Ont. Wm. H. Hayden, mgr.

Property: in Ogden Twp., Porcupine area, Timiskaming district, S. of Timmins, developed by 375' shaft and equipped with mining plant. After several years idleness, mine was dewatered in Dec., 1921, and lateral work begun on 100', 200' and 300' levels..

HEIGHT OF LAND MNG. SYNDICATE

ONTARIO

Address: 23 Jordan St., Toronto, Ont. **Mine address:** Sesekinika, Ont. Percy Ashley, mgr.

Property: 2 claim groups, one on island in Sesekinika lake and the other at Junction of Benoit, Melba and Maisonville Twps., in Bourke area, Timiskaming district.

HERMINA MINING CO.

ONTARIO

Office 109 5th St., Calumet, Mich. **Mine office:** Massey, Ontario, Canada.

Officers: Edw. J. Hall, pres.; Chas. Schenk, v. p.; Lucas Hermann, sec.; W. B. Anderson, treas.; preceding, with Ole Olson, Frank Schroeder, Paul Tritschler, Geo. E. Perley and T. H. Pollack, directors.

Inc. June, 1903, in Ontario. **Cap.** \$2,500,000; shares \$12.50 par; \$8 paid and \$4.50 assessable. Total assessments to date, \$2.35 per share; 71,000 shares issued. Annual meeting, fourth Tuesday in June.

Property: 1,040 acres near Massey, on which shafts were sunk and ore

developed. Company mined a small amount of copper ore some years ago but has been idle since.

HERRICK GOLD MINES, LTD.**ONTARIO**

Address: c/o A. J. Sutherland, 10 King St., East, Toronto, Ontario.

Mine address: Shiningtree, Ont.

Officers: A. H. Chapin, pres.; F. C. Sutherland, v. p.; E. M. White, sec-treas., with E. A. Snowman, Dr. J. T. Herrick, G. C. Crean, H. H. Sutherland, directors. F. L. James, mgr.

Inc. April, 1919, in Ont. **Cap.** \$2,000,000; \$1 par; 478,000 shares in treasury, March, 1921. Chartered Transfer & Executor Co., Toronto, registrar and transfer agent.

Property: 6 claims, 275 acres, on the W. side of S. end of Michiwakenda lake, adjoining the Wasapika mine on the N. W., in the McMurchy Twp., West Shiningtree area, Sudbury district, 20 miles N. E. of Westree on the C. N. Ry. A quartz-calcite vein fills a vertical fault fissure that was traced for 1,000' through conglomerate slate, rhyolite, and a reddish lamprophyre. In some characteristics, it is similar to the Kirkland Lake deposits. Visible gold, accompanied by pyrite, calcite, chlorite, and talc, occur in dark seams in the quartz.

Development: by a 50' shaft, said to show 54" of rich ore; and 3,000' of diamond drilling to depth of 800', exposing 22' of ore said to average \$15 per ton. In the winter of 1919-20, a good camp was built and further development work is under way.

HILL GOLD MINING CO., LTD.**ONTARIO**

Mine address: Matheson, Ont.

Inc. May 13, 1918, in Ontario. **Cap.** \$3,000,000.

Property: in Beatty Twp., Painkiller Lake district, about 10 miles from Matheson. Some development work was done in 1918 and 1920; idle 1921.

HOLLINGER CONSOLIDATED GOLD MINES, LTD.**ONTARIO**

Offices: 85 Bay St., Toronto, and Timmins, Ontario.

Officers: Noah A. Timmins, pres.; D. A. Dunlap, v. p.-treas.; J. B. Holden, sec., with L. H. Timmins, W. L. McDougald, and J. R. Timmins, directors. A. F. Brigham, general manager; C. G. Williams, general supt.; E. L. Longmore, mill supt.; R. W. Robbins, mech. supt.; A. W. Young, prod. supt.; R. T. Regnell, develop. supt.; Benjamin Richards, mine inspector.

Inc. 1916, in Ontario. **Cap.** \$25,000,000; \$5 par; 4,920,000 issued. Toronto Genl. Trusts Corp. and Montreal Trust Co., transfer agents. Guardian Trust Co. and Montreal Safe Deposit Co., registrars.

Company is a consolidation of the Hollinger Gold Mines, Ltd., Acme Gold Mines, Ltd., Millerton Gold Mines, Ltd., and Claim 13,147 of the Canadian Mng. & Finance Co., Ltd.

Stock was issued as follows: 200,000 shares in treasury; 2,400,000 to Hollinger shareholders; 2,100,000 to Acme shareholders; 100,000 to Canadian M. & F. Co. shareholders.

Added to Surplus.....	\$1,358,563	\$599,290	\$461,274

Total receipts for first 7 months of 1921 were \$5,126,050, with a surplus after dividends of \$431,921.

Dividends: initial of 1% in July, 1912; 1% quarterly to March, 1917, when rate was increased to 1% every 8 weeks; payments suspended in June, 1917, but resumed in 1918 and continued at 8 week periods to Aug., 1920; 4% remainder of that year; 1% on Jan. 28, 1921, and 1% every 4 weeks thereafter. Extra dividends of 1% were paid Dec. 31 of 1918, 1919 and 1920. Total to Dec. 31, 1921, \$16,558,000.

Property: the Hollinger mine, 11 claims, 440 acres, patented in Tisdale Twp. Porcupine, and other holdings mentioned; also oil lands in Kansas acquired in 1919 and representing an investment of \$115,915.

Company is reported (late 1921) to have taken options on claims at Elbow lake, Manitoba, and on the Burke (q. v.) claims in West Shiningtree area, Ontario.

Geology: the chief rock of the entire area consists of basalt in the S. E. portion and the common greenstone of the Keewatin series in the N. W., while between these two areas, approximately 2,000' apart, lies an area of basalt schist and an area of greenstone schist, which have been intruded by a quartz-feldspar porphyry. The porphyry has not, except near its marginal contacts with the older rocks, proved of value as a source of gold, yet it is believed that its occurrence has had a definite influence upon the mineralization and concentration of gold values in the older rocks. It is within the area between the basalt and the greenstone that the gold bearing veins are found. Orebodies consist of quartz veins and country rock containing gold and pyrite. Veins do not have well defined walls and as the fissuring has been very irregular, a vein consisting largely of quartz in one place may consist of quartz veinlets and intervening schist a short distance away. The veins are practically vertical. Of a total of 77 veins proved, 38 veins have been developed.

Ore reserves estimated December 31:

	Tons	Value	Gross Value
1920.....	4,087,083	\$10.20	\$41,719,670
1919.....	4,392,000	9.09	39,928,000
1918.....	4,489,080	9.15	41,080,005
1917.....	4,494,510	8.95	40,231,435
1916*.....	3,938,540	8.68	34,185,535
1915**.....	1,846,000	9.65	17,824,800
1915.....	1,600,800	10.02	16,031,600
1914.....	1,162,960	11.49	13,358,420
1913.....	845,300	13.71	11,604,800
1912.....	664,540	17.48	11,271,400
1914.....	462,000	22.14	10,230,000

* For consolidated properties. ** Reserves re-calculated as a basis for consolidation.

Development: to depth of 1,250' by eleven shafts, one of 1,250' being on the old Hollinger claim. Development is very extensive with levels at 100' intervals, but by far the greater part of work and production is confined to ground above the 800' level. Reported that a new 6-compartment shaft is contemplated. Adverse labor conditions and the high price of supplies led to a curtailment of development in 1918, all work below the 800' level being stopped, yet new work for that year totaled 25,611'; 22,643' in 1919 and 18,103' in 1920. Company employed 1,207 men in 1919, an average of 1,025 in 1920; and 1,750 in 1921.

Equipment: includes a 200-stamp mill with cyanide plant, having a daily capacity of 3,500 tons, or 17 tons per stamp; this stamp duty has been made possible by addition of auxiliary rolls between gyratories and stamps. Mill capacity is to be increased by 35% or more in 1920; and stamps may be entirely discarded. The gold is largely free and the ore easily treated by simple crushing by stamps and regrinding in tube-mills, preparatory to cyanide treatment. Power is obtained from a central plant built by the C. M. & F. Co.

Production and Costs (per ton of ore milled):

	Tons Milled	Average Value	Mining Costs	Milling Costs	General Charges	Assay Tailing	Value Recovered
1920.....	650,205	\$9.93	\$2.84	\$1.46	\$0.52	\$0.38	\$6,219,664
1919.....	711,822	9.73	2.88	1.22	0.43	0.33	6,722,226
1918.....	578,755	10.24	3.24	1.18	0.51	0.30	5,752,371
1917.....	508,139	8.67	2.96	1.02	0.46	0.31	4,261,939
1916.....	601,854	8.84	2.19	0.97	0.40	5,073,401
1915.....	334,750	10.11	2.18	0.99	0.40	3,169,813
1914.....	208,936	13.67	2.70	1.22	0.56	2,719,354

In 1919, with the mill running 69% normal, the mine produced an average of \$134,440 weekly. In 1920, mill handled only about 1,700 tons per day because of power shortage. The net yield was \$9.56 per ton compared with \$9.40 in 1919.

Hollinger has become one of the world's greatest gold mines and, in the matter of production, stands second to the Homestake only on the American continent. The company deserves much credit, because in years gone by it worked the mine under adverse conditions.

HOWREY CREEK MINING CORP. LTD. ONTARIO

Address: 77 Victoria St., Toronto, Ont. **Mine address:** Gore Bay, Ont.
Officers: Glenn C. Bull, pres.-treas.; A. L. Kemp, v. p.-mgr., with S. A. Erwin, Wm. Benziger and W. A. Werrett, directors.

Inc. 1920 in Ontario. **Cap.** \$1,000,000.

Property: 4 claims, in Howrey creek district, 6½ miles E. of Willisville on the Algoma Eastern R. R. An adit is being driven on the main vein reported to be 18" wide at shallow depth, and carrying gold, platinum and arsenic.

Equipment: includes compressor, boiler and blacksmith shop. About 17 men employed.

HUDSON BAY MINES, LTD.**ONTARIO**

Office: New Liskeard, Ont. **Mine office:** Cobalt, Ont.

Officers: A. A. McKelvie, pres.; Wm. H. Kinch, v. p.; F. L. Hutchinson, sec.-treas.; with F. L. Bapst, Thos. McCamus, H. P. Burgard, and C. L. Sherrill, directors. D. McPhail, mgr.

Inc. July 16, 1909, in Ontario. **Cap.** \$3,500,000; \$5 par; outstanding September 1, 1915, \$3,380,425. **Bonds:** \$35,000 authorized and outstanding. Controls Dome Lake Mining & Milling Co., Ltd., and Kirkland Hudson Bay Mines, Ltd. Trusts & Guarantee Co., Ltd., Toronto, transfer agent and registrar. Traded in on Toronto Stock Exchange.

Company was operating subsidiary of Timiskaming & Hudson Bay Mng. Co., but latter was dissolved in 1919.

Financial statement for year ending Aug. 31, 1921, shows total revenue of \$17,418, and expenditures, \$37,766, leaving a deficit of \$20,347. Assets other than plant and property at Cobalt, Kirkland Lake and Gowganda, include Dome Lake \$353,022, Kirkland-Hudson Bay \$44,000, accounts and bills receivable \$23,877, ore \$2,660. Current liabilities including \$35,000 bonds were \$43,000. Surplus, \$96,591, compared with \$117,526 for previous year.

Dividends: total to 1919 was \$778,909, last one of 2½% paid August 31, 1913.

Property: 9 claims, 340 acres, at Cobalt, in Coleman Twp.; 160 acres at Gowganda and 200 acres at Kirkland Lake.

Development: in 1920, amounted to 262' of crosscuts, 107' of drifts and 40' of raising. Results of exploration in 1921 do not warrant further expenditure, unless price of silver advances to a marked degree.

No work was done in 1920 and 1921 on the Gowganda property or at Camp No. 2, or at Kirkland Lake, owing to unsatisfactory labor conditions and high costs.

Ore reserves: as of Aug. 31, 1921, estimated at 4,896 tons in place and broken, containing 48,960 oz. silver.

Equipment: complete mining machinery and a 20-stamp mill.

Production: in 1919, mill treated 21,102 tons, extracting 104,926 oz., or at the rate of 79.27%. Milling cost was \$43,136 and total cost \$83,577, or \$3.93 per ton; in 1920, output was 20,308 tons, mined at a cost of \$55,234, or \$2.72 per ton. Milling cost was \$39,834, or \$1.96 per ton for 20,308 tons, yielding 95,444 oz., an extraction of 76.92%.

Mining operations at Cobalt ceased in April, 1921, but mill, which had closed down in Oct., 1920, was again started in Aug., 1921, to clean up broken ore.

Company's Cobalt claims have about reached exhaustion and management reports that ore in sight is of too low grade for profitable exploitation with existing silver prices, costs and method of treatment. Holdings in other fields are however considered valuable.

HUDSON COPPER CO., LTD.**ONTARIO**

Address: Rm. 810, 7 Water St., Boston, Mass. **Mine address:** Havilah, Ont. Angus McDonald, mgr.

Inc. Nov. 18, 1916. **Cap.** \$2,000,000.

Property: the Havilah mine, near Rock lake, Aberdeen Twp., Algoma district. Ore carries copper, gold and silver. One shipment of nickel-free copper ore was made in 1918. Presumably idle.

HUGHES McELROY GOLD MINES, LTD.**ONTARIO**

Address: 503 C. P. R. Bldg., Toronto, Ont. **Mine address:** Boston Creek, Ont. Chas. Hughes, mgr.

Property: in McElroy Twp., Boston Creek area, Timiskaming district, developed to depth of 250'.

HUNTON CONS. GOLD MINES, LTD.**ONTARIO**

Successor to Hunton-Kirkland Gold Mines, Ltd.

Office: J. W. Young, sec.-treas., Langford, Blk., Haileybury, Ont. **Mine address:** Kirkland Lake, Ont.

Officers: Thos. Birt, pres.; David Elliott, v. p.; J. Walter Young, sec.-treas.; with Henry M. Porteus (mgr.) and A. E. Hunton, directors.

Inc. in Ontario. **Cap.** \$3,000,000; \$1 par; 1,500,000 shares issued. Trusts & Guarantee Co., transfer agent and registrar.

Company is a reorganization of the Hunton-Kirkland made Feb., 1922, by which capital was increased from \$2,500,000 to \$3,000,000, and its holdings augmented by addition of the 2 Gibson-Duncan claims on W. and Slight-Solomon fraction on E., owners of which receive 410,000 and 90,000 shares of new company respectively. Hunton-Kirkland stockholders receive 1,000,000 shares.

Property: 2 claims, 80 acres, 1 mile S. of the S. W. end of the Kirkland Lake, Teck Twp., Kirkland Lake area, Timiskaming district. A porphyry dike intrudes the schistose sedimentary rock, and mineralization occurs along the S. contact extending into both formations. An open-cut was made along a series of 1 to 3" quartz veinlets, which intersect the sediments and porphyry. A 100' shaft is said to have followed this mineralization. Free gold was seen at 30'. Diamond-drilling showed gold to a depth of 254'. This zone is 300' long on the surface.

By the acquisition of the Gibson-Duncan and Slight-Solomon tracts, company's property covers about one mile of the E.-W. zone of mineralization.

Development: by shallow shaft, to be sunk to 300' depth. Equipped with a hoiler, hoist and compressor.

HUNTON-KIRKLAND GOLD MINES, LTD. ONTARIO

Succeeded by Hunton Cons. Gold Mines, Ltd., which see.

HURONIAN BELT CO., LTD. ONTARIO

Officers: F. H. Hamilton, chairman; with E. Turk, E. T. McCarthy, H. B. Hooper, directors.

Inc. March, 1914, in Ontario. **Cap.** £200,000. Company acquired, in 1914, all the interests of the Huronian Belt Syndicate, Ltd.; and has an interest in the Porcupine V. N. T. Gold Mines, formerly the North Thompson. Also has claims in Northern Ontario and near Great Slave Lake.

The Associated Gold Mines of Western Australia holds 379,220 shares in the Porcupine V. N. T., and the Huronian is entitled to 25% of any profit made by the Associated company on selling these shares.

INTERNATIONAL MOLYBDENUM CO., LTD. ONTARIO

Out of business. See Volume XIV.

INTERNATIONAL NICKEL CO., THE ONTARIO

General office: Constable Hook, Bayonne, N. J. **Executive office:** 67 Wall St., New York. **Operating office:** J. L. Agnew, gen. mgr. and J. C. Nicholls, gen. supt., Copper Cliff, Ont. **Refinery office:** John More, mgr., Port Colborne, Ont.

Officers: Chas. Hayden, chairman of the Board; Robt. C. Stanley, pres.; J. L. Ashley, sec.-treas.; with W. N. Cromwell, A. Jaretzki, W. E. Corey, A. D. Miles, Wm. T. Graham, W. H. Brownson, Britton Osler, J. L. Agnew, Thomas Morrison and S. Prosser, directors. Alex J. Watson, asst. sec.-treas.

Inc. September, 1912. Is a consolidation of International Nickel Co. and Colonial Nickel Co., and owns entire stock of the International Nickel Co. of Canada, Ltd., formerly Canadian Copper Co. Company also owns all issued stock of Huronian Co., Ltd., Ontario, the Societe Miniere Caledonienne, New Caledonia, and Nickel Corporation, Ltd., England.

Cap. \$8,912,600. 6% non-cumulative preferred stock, \$100 par, and \$41,834,600 common stock, \$25 par. The authorized share capital is \$12,000,000 and \$50,000,000, respectively. There were 16,121 stockholders, July, 1921.

Stock is listed on the New York Stock Exchange. Bankers Trust Co., New York, transfer and dividend agent. Guaranty Trust Co., New York, registrar. Shares: 26 high, 11 low in 1920; 17 high, 11¼ low in 1921.

Comparative Statement of Income Account and Balance Sheets, years ending March 31:

Year	Total Income	General Expenses	Taxes	Depreciation	Mineral Exhaustion	Net Profits
1922(c)	\$364,275	\$311,874	\$70,128	623,951(b)	*\$641,278

A 10% stock dividend was paid November 1, 1915.

Assets: March 31, 1921, were \$64,938,704, which included properties, \$47,726,912; liabilities included capital stock, \$50,747,200; current, \$1,644,249; funds, \$661,078; surplus, \$11,886,177.

Dividends: as in above table. The distribution on common stock was passed in June, 1919, breaking a continuous record dating back to 1909.

Copper-nickel properties consist of mines with an estimated developed reserve of 20,000,000 tons, smelting plants at Copper Cliff, Canada, handling 3,500 tons daily, separating and refining plants at Constable Hook, Bayonne, N. J., and Port Colborne, Ont. The company's new rolling mills, under construction 1920-1922, near Huntington, W. Va., have been built entirely from surplus. They will specialize in Monel metal, a product with important possibilities.

Property: company is the world's largest producer of copper nickel ores and copper nickel matte. Ore was discovered 1886, mining commenced 1900, and smelters were started in 1901. It consists of about 18,000 acres, mostly on the south range of the Sudbury nickel belt. The ore consists of a mixture of chalcopyrite, pyrrhotite and pentlandite in a norite gangue. The ore may be massive sulphides, as in the Creighton mine, or disseminated sulphides scattered through the gangue, as in Crean Hill mine. The Creighton orebody has a pitch (45°) length of 2,500', varies in length from 400 to 1,000', and in width from 100 to 375'. For geology see Eng. & Min. Jour., Vol. 101, No. 19.

The Creighton mine has 3 incline shafts with vertical depth of 1,000'. Open pit mining was practised until 1912, when underground stoping began. The mine is developed to the 18th, but main shaft reaches beyond the 23rd level, a total inclined depth of 1,941'. Below the 6th level, shrinkage stoping has been adopted from crosscuts connecting with main drifts in the footwall.

The No. 3 incline shaft, with 5 compartments, handles the entire output. No. 2 shaft being used for handling men and supplies only. Trimming on the main levels is by electric locomotives, with 4-ton cars.

Primary crushing of ore is done underground. The crushers are the jaw type 42x30" and are set at 6". Shafts are equipped with electrically driven hoists operating in balance, mechanical appliances being in use for quick loading of skips. All buildings are of concrete, steel and brick, fireproof construction.

Secondary crushing is carried out in the ore-house, which has a capacity of 500 tons per hour, followed by screening and hand sorting on picking belts. Concrete bins of 3,000 tons capacity are situated under the picking belts.

The electric hoist is operated on the Ilgner system, hoisting 9-ton skips at 2,500' per minute. The mine has 4 compressors, each of 5,000 cu. ft. capacity, and sufficient for 150 drills. Production is 3,500 tons per day; total production of Creighton, 8,874,780 tons at end of 1919.

The Crean Hill mine, about 2 miles east of the Victoria, has an inclined 4-compartment shaft, 780' deep. The production was about 450 tons daily.

Surface equipment includes rock-house for crushing and sorting ore, power house, workshops, warehouses, etc.

The Creighton, 6 miles from Copper Cliff, is now the only operating mine; for official description, see Can. Inst. M. & M. Bul., July, 1920. See item for August, 1920, for official description of Copper Cliff smelting plant.

No. 2 mine at Copper Cliff, is developed to a depth of 860', and produced about 200 tons of sorted ore per day. Equipment is similar to that at Crean Hill.

The International through the Huronian Co., a subsidiary, has a hydro-electric plant at High Falls, 30 miles from Copper Cliff, utilizing an effective head of 85', which yields about 13,000 k. v. a. The current is transmitted at 33,000 volts.

The Creighton ore, which is high in sulphur, goes in part to Wedge roasters and reverberatory furnace, but largely to the roast yard, 9 miles from Copper Cliff, where sulphur is reduced to 10%. The yard is about 7,500' long and contains space for 122 roast beds, using wood as fuel. Since 1919, an unloading bridge has been used; ore is re-loaded by steam shovel, taken to the smelter, and dumped into bins.

The blast furnace building contains 8 furnaces, 5 of which are 4' 2"x17' long, a 3' 6" jacket having been inserted between the upper and lower tiers to lower settlers sufficiently to receive molten converting slag.

The charge of raw and roasted ores is practically self-fluxing; about 10½% coke is used. The slag carries about 32.5% silica. This matte averages 26% copper-nickel.

The reverberatory department contains a fine grinding plant, 4 Wedge roasters and 2 reverberatories, one working. The ore is ground in ball mills and roasted in Wedge furnaces. The reverberatory furnace smelts about 500 tons in 24 hours. It burns pulverized coal, crushed so that 85% will pass 200 mesh and is blown in by fan blast; about 80 tons a day is consumed. Matte averages 16% copper-nickel; slag contains about 33% silica.

Matte is blown in 6 basic converters of the horizontal type, exactly as in the conversion of copper matte, but is stopped as soon as the iron is eliminated. Final product contains 24% copper, 55% nickel, and 0.5% iron. Slag contains 27% silica, and 4% copper-nickel, most of it recovered in settlers. Matte is cast into iron molds, broken up, and treated in the International company's Canadian refinery at Port Colborne, Ontario, and at Bayonne, N. J.

The Port Colborne refinery, near the Lake Erie entrance of the Welland Canal erected at a cost of \$5,000,000, produces 15,000,000 lb. of nickel and 8,000,000 lb. of copper yearly. The plant finished in June, 1918, is described in Eng. and Mining Journal, March 8, 1919. A small amount of platinum-palladium, etc., is produced as a by-product.

An increasing market for Monel metal and nickel in rolled forms will be supplied by company's Huntington plant.

The year ended March 31, 1917, was the company's most profitable year: since that time earnings have rapidly fallen. Demand ceased when the Armistice was signed and operations were cut to $\frac{1}{3}$ normal, but were gradually increased toward the end of the fiscal year 1920 to 60% capacity and remained so for next six months, but were thereafter curtailed until March, 1921, when operations were at about 20% capacity, and finally on Sept. 1st, all mines and plants were shut down for an indefinite period. Reported at about the same time that officers of the subsidiary, International Nickel Co. of Canada, had resigned and the Toronto offices definitely closed. Also, it is rumored that the Bayonne refinery will be abandoned.

International Nickel is a splendidly managed property with a promising future.

ISLET EXPLORATION CO., LTD.

ONTARIO

Address: 509 Alworth Bldg., Duluth, Minn., or care F. S. Wiley, Port Arthur, Ont.

Officers: J. L. Washburn, pres.; A. Mac Washburn, v. p.; Frank B. Randall, sec.-treas., all of Duluth, Minn. D. C. Peacock, mgr.

Inc. 1920 in Ont. **Cap.** \$250,000; \$10 par.

Property: company has acquired control of the "Woods Location", comprising 10,000 acres at Port Arthur, Sibley Twp., Thunder Bay district, $\frac{3}{8}$ mile off the main shore of Lake Superior, including the Silver Islet mine, situated on an island 80' in diameter and credited with a production of \$3,000,000 in silver, when operated 50 years ago. Property owned by Nepigon M. & Lands Co.

Development: to depth of 1,265' in old workings. The Silver Islet mine was unwatered in 1920 and new work begun on July 1, 1921, on old 4th level (200' deep). A 1,200' crosscut to cut 3 known veins, was 700' long in October and has encountered a well mineralized zone showing lead, zinc and iron sulphides. Company is also sinking a shaft on Edward's island, 9 miles to the E., said to expose arsenical silver ore.

IXION MINES, LTD.

ONTARIO

Address: 26 King St., Toronto, Ont. A. S. Muirhead, sec.

Inc. April 26, 1915, in Ontario. **Cap.** \$100,000.

Property: the Cochrane mine in Cochrane Twp., Sudbury district under lease to Timiskaming Mng. Co., Ltd. Ores are silver-cobalt-nickel.

ONTARIO

Address: 65 Broad St. Ave., London, E. C. 2, England; or J. Mackintosh Bell, mgr., Keeley mine, Silver Centre, Ont. J. W. Bryant, supt.

Officers: Edw. Hooper, pres., with Alfred H. Collier, E. Turk and Jas. C. Williamson, directors. Thos. Mallinson, sec.-treas.

Inc. Feb. 9, 1920 in England. **Cap.** £170,000; 10s. par; 265,850 shares outstanding of which 80,000 are owned by Associated G. M. of W. A., and 40,000 each by Erdlich Proprietary and Siberian Proprietary.

Property: 2 patented claims, 80 acres in South Lorrain Twp., Timiskaming district. Ore carrying native silver, occurs in fissure veins in diabase and greenstone, with pay shoots from 30-200' long. Milling ore averages 23 oz. silver and high-grade runs up to 700 oz. silver and 220 lb. cobalt per ton.

Development: to depth of 435' by 4 shafts with 900' of workings, said to

have blocked out 27,000 tons containing 700,000 oz. silver and 275,000 lb. cobalt. Work has been largely confined to the Wood's and No. 6 veins.

Equipment: includes hoists, 12-drill compressor and 60-ton mill with flotation unit.

Operations were carried on from March 15 to Oct. 13, 1920, at a cost of £16,749 and resumed in April, 1921. Shortage of power and labor conditions have retarded development.

Production: of a small tonnage of high grade was made in 1920. The mill, which was placed in commission in October, 1920, operated for 30 days and shut down for lack of power. For 4 months in 1921 ending Nov. 1, 1921, total output from ore and concentrate was 263,000 oz. silver.

KENABEEK CONS. SILVER MINES, LTD. **ONTARIO**

Dead; see Vol. XIV. Succeeded by **Triangle Silver Mines, Ltd.**, which see.

KENYON COPPER MINES, LTD. **ONTARIO**

Address: Rm. 3, Bk. of Toronto Bldg., Toronto, Ont. **Mine address:** Massey, Ont. J. F. Flynn, mgr.

Property: the Kenyon mine in May Twp., Sudbury district. Ore carries copper, gold and silver.

Option on property of Massey Station Mng. Co. held in 1917, was not exercised. Company inactive.

KERR-ADDISON MINES, LTD. **ONTARIO**

See **Canadian Associated Goldfields, Ltd.**

KERR LAKE MINES, LTD. **ONTARIO**

A reorganization, November, 1917, of the Kerr Lake Mining Co., of New York. Owns entire capital stock of its operating subsidiary, Kerr Lake Mining Co., Ltd., which see below. The change was made to eliminate the expenses and taxes of the New York holding company.

Company owns also a 150,000 share interest in Wettlaufer Lorrain Silver Mines; 837,498 shares of capital stock of Caribou Cobalt Mines Co., a majority interest (1,001,000 shares) in the Tahoe mine, Utah, and $\frac{2}{3}$ interest (95,238 shares) in the Rimu Gold Dredging Co. The two first named are separately described; see below for the two last.

New York office: 61 Broadway. **Mine office:** Cobalt, Ont.

Officers: Adolph Lewisohn, pres.; Sam. A. Lewisohn, v. p.; E. H. Westlake, sec.-treas.; with J. H. Susmann, J. Parke Channing, D. M. Steindler, H. S. Carpenter, Theo. L. Herrmann, and Wm. B. Joyce, directors. Mine manager, H. A. Kee.

Inc. 1917, in Ontario. **Cap.** \$3,000,000; par \$5. Reduced September, 1919, to \$2,400,000; par \$4. Bankers Trust Co., New York; Federal Trust Co., Boston; Trusts and Guarantee Co., Ltd., Toronto, transfer agents; Equitable Trust Co., New York; Old Colony Trust Co., Boston; Union Trust Co., Ltd., Toronto, registrars.

Balance sheet of August 31, 1921, shows assets, \$3,552,838, which includes Kerr Lake Mng. Co., Ltd., \$2,400,000; U. S. Liberty Bonds, \$148,635; accounts receivable, \$160,916; investment in other mining properties, \$839,500; cash, \$3,787. Liabilities include capital stock, \$2,400,000; Kerr Lake Mng. Co., \$31,582. Surplus \$1,114,214.

Income account shows dividends received from Kerr Lake Mng. Co., \$590,000; interest, \$14,529; and exchange, \$5,714. Expenses were \$131,264. Year's surplus was \$178,980.

Dividends: paid by predecessor and present companies total \$8,310,000 to Aug. 31, 1919, in addition to a capital distribution, Sept., 1919, of \$1 per share; none paid in year ended Aug., 1920; \$300,000 paid in year ended Aug., 1921; \$75,000 on Oct. 15, 1921; \$75,000 on Jan. 15, 1922.

Due to the impending exhaustion of the mine at Cobalt, company has begun to embark in other mining ventures.

Kerr Lake Mining Co., Ltd.

Office: 61 Broadway, New York. H. A. Kee, gen. mgr., Cobalt, Ont. Entire stock issue owned by Kerr Lake Mines Ltd., of Ontario.

Balance sheet of August 31, 1921, shows assets: \$1,573,854, which include mining property, \$55,000; plant, \$34,282; supplies, \$14,638; cash \$54,862; investment in Canadian and U. S. bonds, etc., \$1,380,698; Kerr Lake Mines, Ltd., \$31,582. Liabilities: 400 shares of capital stock at par, \$100, \$40,000; accounts payable, \$3,878; accrued wages, \$2,335; reserve for outstanding liabilities and taxes, \$125,000, leaving a \$1,402,641 surplus after dividends of \$590,000.

Total proceeds from ore sales for year were \$94,306; interest \$76,634; exchange \$17,531; dividends received \$7,350. Operating expenses were \$145,555, including \$16,500 for Hargrave property. Operating profit for the year was \$50,265.

For sake of comparison, assets on Aug. 31, 1920, were \$2,324,933; ore sales \$998,749; and profit \$618,052.

Dividends: for years ended Aug. 31; total to 1915, \$6,808,000; \$666,000 in 1917; \$650,000 in 1918; \$653,000 in 1919; \$1,000,000, in 1920; \$590,000 in 1921; total \$10,367,000.

Property: one patented claim and two fractional claims, 57 acres in Coleman Twp., Nipissing district, Cobalt.

Company cooperated with Crown-Reserve Mng. Co. (q. v.) in draining Kerr Lake, and has a joint-ownership with it in the Drummond Fraction.

In 1921, the adjoining 80 acres of Hargrave Cons. Mines was purchased. This mine is developed to depth of 375' and is said to have produced better than 500,000 oz silver.

Geology: for description of these features see Nipissing Mines Co. The ore occurs in small vertical fissure veins in Huronian slate and conglomerate, both veins and ore being of the character typical of the Cobalt district. The ore-shoots vary from a few feet to 400' in length and occur in an area of about 8 acres.

Development: to depth of 550' by several vertical shafts, with a total of 63,232' of underground workings. New development for the fiscal year, 1921, amounted to 3,341', compared with 2,969' in 1920. Operations were curtailed from Dec. 1920, but development continues, and up to mid-1921, were largely confined to No. 3 Diabase vein. Ore extracted from the Hargrave has already repaid purchase price. Later work has failed to find new veins of importance.

To test the ground below the diabase the winze was sunk on the Keewatin vein to a depth of 150' below No. 6 level, or 475' below the surface. The winze is entirely in the Keewatin formation below the diabase contact, and 3 levels driven from the winze show the vein to be weak and less mineralized as it leaves the contact, confirming the general belief that commercial ore is probably confined to the diabase near or above the contact.

Ore reserves: estimated on Aug. 31, 1920, to be 150,000 oz. silver in shipping ore and like amount in milling grade. A 75,000 ton dump to be treated by Dominion Reduction Co. should yield \$1 profit per ton.

Equipment: includes 12-drill air compressor, hoist, sorting and jigging-plant of 125 tons daily capacity, fully equipped machine shop and a pot melting furnace to melt the rough metallics into bullion, installed in 1915.

Production: for year ended Aug. 31, 1921, amounted to 194,352 oz. silver and 17,096 lb. cobalt. Total cost of production per oz. was 56.04c. in 1920, as against 40.81c. in 1919.

Ore reserves at Kerr Lake are approaching exhaustion, and though acquisition of the Hargraves had improved the situation somewhat, operations were indefinitely suspended in early 1922.

Tahoe Mine-Utah.

Property: in Boxelder county, 26 miles S. of Oakley, Idaho, from where electric power is secured. The mine is said to contain 87,000 tons of ore, assaying 18 oz. silver and 80c. gold in shallow workings.

Equipment: includes 150-ton mill.

Production: began Dec. 1919, and in about 21 months was 983,008 oz. silver and 1,868 oz. gold. Mill is treating about 100 tons daily.

Rimu Mine- New Zealand.

Property: about 1,150 acres, near Hokitika, Province of Westland, South Island, N. Z.

The total prospected area consists of 880 acres, with 63,000,000 cu. yd. proved, of which 30,714,000 cu yd. are estimated to average 16.07c. and 32,407,000 cu. yd., 10.04c. per cu. yd. There is also an additional 20,000,000 cu. yd. of dredgable ground.

Equipment: electrically driven dredge with bucket capacity of 10 cu. ft. will handle 7,000-8,000 cu. yd. per day.

Dredging operations began Sept. 12, 1921.

KERR LAKE MINING CO.

ONTARIO

Reorganized. November, 1917. into **Kerr Lake Mines, Ltd. of Ontario**, which see.

KINGDON MINING, SM. & MFG. CO., LTD.

ONTARIO

Subsidiary of, and operating company for, James Robertson, Ltd.

Address: 314 Beaver Hall Hill, or P. O. Box 1210, Montreal, Quebec.

Mine address: Galetta, Ont.

Officers: C. M. Robertson, pres.; J. J. Milne, sec.-treas.; A. G. Munich, man. dir.; John E. Hardman, cons. engr.; R. R. Rose, supt.

Inc. 1919, in Ontario. **Cap.** \$750,000. No bonded debt or liabilities.

Property: the Galetta, or Kingdon mine on Chats island, in the Ottawa river, in Fitzroy Twp., Carleton county, 5 miles E. of Amprior, formerly operated by Jas. Robertson, Ltd. The mine has a 5½' vein in a fault fissure in crystalline limestone. Ore contains grains, clusters and crystal aggregates of galena in calcite and barite, with but little zinc.

Development: by new 3-compartment shaft, 426' deep, with over 3,500' of work on No. 2, 3 and 4 levels. Mine is exhausted above 2nd level, and principal ore reserves are between 3rd and 4th levels, the latter being 1,350' long, and from which a winze has been sunk to 550' in first class ore.

Equipment: includes hoist, 10-drill compressor, and 250-ton concentrator using jigs and tables making an 80% lead and a small amount of zinc concentrate. A smelter with open-hearth furnace produces 18 tons crude pig yds. of dredgable ground.

Production: about 1,500,000 lbs. lead in 1918 and over 3,000,000 lbs. in 1921. Mine was operated 1919-20, but figures of output are not available.

KING EDWARD MINE

ONTARIO

Owned by J. S. Dobie and Mary C. Dobie, Thessalon, Ont.

Closed down indefinitely.

KING KIRKLAND GOLD MINES, LTD.

ONTARIO

Address: 26 Adelaide St. W., Toronto, or Kirkland Lake, Ont.

Officers: C. F. Jordan, pres.-mgr.; E. L. Wettlaufer, v. p.; A. B. Crosby, treas.; G. M. A. Davison, sec., with John Swartz, D. Sprague and Duncan McLellan, directors. Ernest Craig, supt.

Inc. 1920, in Ontario. **Cap.** \$5,000,000; \$1 par; 3,070,000 shares in treasury, Dec. 1, 1921.

At a reorganization meeting Nov. 28, 1921, capital was increased from \$2,500,000 to \$5,000,000, outstanding stock being exchanged on a share for share basis, and 450,000 shares being paid for Ferguson claims.

Property: the Montgomery group of 7 claims, 309 acres, S. W. of Mud lake and east of Kirkland lake, in Teck Twp., Timiskaming district. A number of narrow quartz veins have been found in feldspar porphyry. One vein, 1 to 12' wide, has been traced for 250' on the surface, showing visible gold in one shoot 12' long. The quartz carries iron pyrite, galena, and calcite. Also, the 2 adjoining Ferguson claims, 80 acres, acquired late in 1921.

Development: by surface work and an 80' shaft. A mine plant is being installed.

KIRK GOLD MINES, LTD.**ONTARIO**

Address: 911 Kent Bldg., Toronto, Ont. **Mine offices:** Kirkland Lake and Leeburn, Ont.

Officers: John Black, pres.; Major Birkett, mgr. at Kirkland; M. Bean, supt. at Leeburn.

Cap. \$4,000,000, increased from \$2,000,000; par \$1.

Property: 3 claims, in Lebel township, Kirkland Lake area, Timiskaming district, adjoins the King Kirkland. Owns claims also in Aberdegn Twp., Algoma district. Both are prospects.

KIRKLAND COMBINED MINES, LTD.**ONTARIO**

Address: 26 Adelaide St. W., Toronto, Ont. **Mine address:** Kirkland Lake, Ont.

Officers: W. F. Greene and A. W. Greison, directors; J. E. Day, mgr. Inc. in 1919.

Property: Day group of 2 claims adjoining the Sylvanite on the N., and corner the Tough-Oakes on the N. W. First prospected in 1913, reverted to the Crown, and re-staked late in 1919. A fault-zone along the porphyry-lamprophyre contact contains veinlets of quartz and iron pyrite, with gold at a few points. Drilling showed the zone to be mineralized to depth of 200'.

Development: by 200' shaft, a 106' crosscut south and several hundred feet of drifts.

KIRKLAND-HUDSON BAY GOLD MINES, LTD.**ONTARIO**

Controlled by Hudson Bay Mines, Ltd.

Address: Box 51, New Liskeard, Ont. **Mine address:** Kirkland Lake, Ont. F. L. Hutchinson, sec.

Property: 2 claims, in Teck Twp., Kirkland Lake area, Timiskaming district, between Lake Shore and Townsite mines, said to contain several promising veins.

The labor strike of 1919 stopped development work and management is now awaiting more favorable operating conditions.

KIRKLAND KALGOORLIE MINE**ONTARIO**

Address: Kirkland Lake, Ontario.

Property: also called the Honer mine, 1 claim, just west of the Hunton-Kirkland, a mile S. of the S. W. end of Kirkland lake. Sediments are intruded by narrow dikes of red porphyry, striking N. E.-S. W. One quartz vein was traced for 300' on the surface. The best ore was on the footwall side in narrow seams of quartz. Iron pyrite is visible. A shaft was sunk, machinery erected, and a camp built in 1920.

KIRKLAND LAKE EXPLORATION, LTD.**ONTARIO**

Office: Pinner's Hall, Austin Friars, London, Eng.

Officers: C. H. Villiers, pres.; H. J. Hollingsworth, and R. D. La Bere, directors. E. C. Wheeler, sec.

Inc. January, 1914, in England, to acquire mining properties in Ontario, Canada. **Cap.** £150,000; £1 par; 26,000 issued. On June 30, 1916, assets included stocks and bonds, £10,320; interest in the Kirkland Lake district, £1,650. Organization expenses, £5,498; exploration etc., £12,001; cash, £116.

Property: in Swastika district, near Porcupine, and an interest in claims adjacent to the Tough Oakes mine. Is a holding company, inactive several years.

KIRKLAND LAKE GOLD MINING CO., LTD.**ONTARIO**

Is a subsidiary of Beaver Cons. Mines, Ltd.

Mine address: W. M. Sixt, supt., Kirkland Lake, Ont.

Address: 810 Lumsden Bldg., Toronto, Ont.

Officers: F. L. Culver, pres.-mgr.; Wm. Thos. Mason, v. p.; R. Graham, sec.-treas.; H. E. Tremain, asst. sec.; with F. L. Lovelace, directors.

Cap. \$2,000,000; \$1 par; all issued; 1,743,050 shares are owned by Beaver Cons. Mines, Ltd. Shares quoted at 26c. low, 56c. high, in 1921 on Toronto

Exchange, Union Trust Co., Ltd., Toronto, transfer agt. and registrar. Annual meeting in August.

Annual report for fiscal year ending May 31, 1921, shows assets, \$1,693,331, including, property, \$1,000,000; cash, \$9,586; bullion on hand, \$21,619; liabilities include, capital stock, \$2,000,000; bills payable, \$361,400; current accounts, \$22,438; P. & L. balance, \$28,958. Income was \$313,201, including \$255,115 from ore sales; expenditures were \$278,211, with a net operating profit of \$11,081, after deducting for depreciation and accrued interest.

Property: 362 acres in Teck Twp., Kirkland Lake area. Development work has been confined to one claim on a vein which has been traced 1,400' on surface and proved to 900' level underground.

Geology: the vein is principally in the porphyry and syenite that lies adjacent to a band of conglomerate, greywacke, and quartzite. The best ore is a bright red porphyry, or syenite, through which there are ribbons of quartz carrying tellurides, copper pyrite, iron pyrite, molybdenite, graphite, calcite, and native gold. The main vein is recognized by the presence of fault-planes, and the area between the main faults is much disturbed. There is great irregularity in mineralization. The best ore is on the footwall.

Development: by two shafts, 900' and 520' (main) deep, connected and with levels 100' apart. During 1919-'20, total workings reached 4,420', and orebody had been opened for 300' on the 400' and for 260' on 500' level, and had been proved to 700' depth; average stope width was 16'. In following 12 months, the orebody was developed on 700' and 900' levels, and diamond drilling was done from the latter. Values on 900' level range from \$3 to \$60. Total openings to June, 1921 were 6,882. On March 1, 1920, estimated reserves between 300 and 700' levels were 120,000 tons.

Equipment: includes steam plant, electric motors, double-drum hoist, a 12-inch and smaller compressors and a 150-ton mill, completed in 1918, with an 8' Hardinge mill, Dorr classifier, tube mill and cyanide plant.

Production: years ended May 31, 1920. (5 mos.), 14,636 tons yielding \$107,071, and \$40,354 additional from dump, etc.; 1921, 42,822 tons from mine and 2,657 tons from dump yielded \$277,007.

KIRKLAND LAKE PROPRIETARY, LTD

ONTARIO

Fully described in Vol. XIV. Succeeded in 1919 by **Kirkland Lake Proprietary (1919) Ltd.**, which see.

KIRKLAND LAKE PROPRIETARY (1919) LTD.

ONTARIO

Address: H. J. Guntrip, sec., Finsbury Pavement House, London, E. C., or Box 480, Cobalt, Ont.

Mine address: Chas. A. Richardson, mgr., Kirkland Lake Ont.

Directors: G. R. Bonnard, chairman; K. H. Campbell, R. Simpson, C. R. E. Jorgensen, M. G. Latilla and Sir B. Blood. S. C. Thomson, cons. engr.

Inc. October 21, 1919, to acquire holdings of Kirkland Lake Proprietary, Ltd. **Cap.** £1,000,000; shares £1 par; 699,398 shares issued.

Company was formed to acquire holdings of Kirkland Lake Proprietary, Ltd., Tough-Oakes Gold Mines, Ltd., Sudbury Syndicate, Ltd., and Aladdin Cobalt, Ltd. Holdings of Burnside Gold Mines, Ltd., were later amalgamated and control obtained of the Sylvanite Gold Mines, Ltd. With exception of the Aladdin claims at Cobalt, these properties are in the Kirkland Lake area, Timiskaming district. They are described under individual titles. No detailed report of parent company is as yet available.

KIRKLAND MUNRO GOLD MINES, LTD.

ONTARIO

Address: care F. C. Sutherland & Co., 12 King St. E., Toronto, Ont.

ONTARIO

Company dissolved. Fully described in Volume XIV.

LA BELLE KIRKLAND MINES, LTD.

ONTARIO

Address: Sun Life Bldg., Toronto, Ont. Mine address: Kirkland Lake, Ont. F. C. Loring, mgr.

Property: the Gibson group of claims at Goodfish lake, Kirkland Lake area, said to show molybdenite and gold ore in Keewatin formation. Developed to depth of 350' by shafts and crosscuts, showing several 2' stringers of high-grade ore. Diamond drilling totaling 5,000' is said to indicate ore to 700' depth.

Equipment: includes compressor and hoist good for depth of 1,000'. Suspended operations July, 1917, pending financing.

LAFAYETTE SILVER MINES, LTD.

ONTARIO

Address: Kent Bldg., Toronto, Ont. Mine address: Gowganda, Ont. Newton Bigbee, mgr.

Property: 2 claims, 4101 and 4102, in Nicol Twp., Gowganda area. Ore is silver-bearing.

LAKE MATACHEWAN GOLD MNG. CO., LTD.

ONTARIO

Address: 502 Kent Bldg., Toronto, Ont. Mine address: Elk Lake, Ontario.

Officers: Geo. Collins, pres.; Amos Tipling, v. p.; J. C. M. German, sec.-treas.; with Geo. A. Benton and Ed. J. Hayes, directors. E. Somerville, mgr.

Inc. in Ontario. Cap. \$2,000,000; par \$1; 1,000,000 treasury shares. Snook & Dixon, of Toronto, are underwriters.

Property: 3 claims in Powell Twp., Elk Lake (Matachewan) area, and joins Matachewan Gold Mines on N. The formation is largely schistose sedimentaries cut by narrow porphyry dikes. Ore is quartz carrying sulphides with gold. Claims were drilled winter of 1919-20.

LAKE SHORE MINES, LTD.

ONTARIO

Address: Kirkland Lake, Ont.

Officers: Harry Oakes, pres. and man. dir.; A. G. Slaght, v. p.; W. H. Wright, 2nd v. p.; Dr. W. P. St. Charles, treas.; with C. E. Wettlaufer, J. B. Tyrrell and A. E. Wende, directors. Kirkland Securities, Ltd., sec.; R. C. Coffey, mgr.

Inc. February 25, 1914, in Ontario. Cap. \$2,000,000; par \$1; all issued. Trusts and Guarantee Co., Ltd., Toronto, transfer agent and registrar. Traded in on Toronto Exchange. Price record \$1.15 to \$1.20, Aug., 1921.

Dividends: last (No. 9) of 2% on Nov. 10, 1921; total since 1918, \$400,000.

Balance sheet, Nov. 30, 1920, shows assets of \$1,369,465, which includes bullion on hand, \$144,015; supplies, \$56,978; Victory bonds, \$50,000; buildings and equipment, \$158,031; property, development and organization expense, after charging off \$270,000 for exhaustion, \$952,638. Current liabilities total \$56,052; capital stock discounted \$1,332,203; surplus \$22,017.

Income account shows, \$528,028, of which \$483,701 was from ore sales; expenditures totaled \$234,992; net profit was \$104,992, after deducting \$120,000 for exhaustion and \$10,000 for taxes. The total operating cost was \$15.51 per ton.

Property: 4 claims and 4 fractions, 171 acres, the Lake Shore gold mine, on Kirkland Lake, in Teck Twp., adjoins the Teck-Hughes and Orr properties on the east. There are several veins, and the orebodies vary in width up to 11'. Ore occurs chiefly in a reddish porphyry. Faulting is frequent. Constant assaying is necessary to follow the shoots.

Development: by 600' shaft and several thousand feet of workings. In the year ending Nov. 30, 1920, new work totaled 1,130', with 18,702 tons of broken ore in stopes, averaging \$28.27 per ton, or \$520,575. Cross-cuts on the 200' and 400' levels have been driven under the lake. Most work has been done at 200', where the No. 2 vein is opened for 1,500', the greater part in ore. During 1921, work was concentrated on the 400 and 600' levels, the main production coming from the 400' level.

Equipment: purchased electric power, 7-drill electrically-driven compressor, fully equipped shaft-house, heating plant, shops, dwellings, assay office, and treatment plant employing crusher, ball-mill, tube-mill, classifiers, and continuous decantation cyanide plant.

Production: during fiscal year ending Nov. 30, 1920, was 18,889 tons, averaging \$25.61, or \$483,701; to Nov. 30, 1921, 21,621 tons yielding \$460,186. During Dec. 1921, mill handled 2,004 tons of ore, recovering \$70,854.

Officers: D. Lorne McGibbon, pres Shirley Ogilvie, v. p.; S. J. Le Huray, sec.-treas., with E. W. Nesbitt, Edwin Hanson, David Fasken, W. M. Dobell and W. A. Black, directors. G. C. Bateman, gen. mgr.

Inc. in Ontario. **Cap.** \$7,500,000; \$5 par; reduced November, 1917, to \$1,500,000, par \$1. Bankers Trust Co., New York, and Royal Trust Co., Toronto and Montreal, transfer agents. Guaranty Trust Co., of New York, registrars. Annual meeting, 2nd Wed. in April. Stock listed on Toronto Stock Exchange. Quoted in 1920, high 53½c., low 25c.; in 1921, 38c. high; 16¼ low.

In 1918, took over all assets and liabilities of the holding company, La Rose Cons. Mines Co. It owns 97,269 shares, 90% of University Mines, Ltd.

Combined financial statement of La Rose and University Mines for 1921 shows total receipts for ore shipments, \$552,754; other income, \$59,363; value of ore in transit, Dec. 31, 1920, \$210,626; value of ore in transit, Dec. 31, 1921, \$77,527; operating expenses, \$352,930; net profit, \$126,089. Balance sheet of La Rose Mines as of Dec. 31, 1920.

Assets: total \$31,130,255, which includes: mines, mining claims, etc. (including 97,269 shares of stock in University Mines, Ltd.), \$1,456,151; advances of Univ. Mines, Ltd., \$77,544; buildings and equipment, \$41,645; supplies, \$217,488; cash in banks, \$132,372; call loans, \$58,245; Victory Loan investment, \$100,550.

Liabilities: capital stock \$1,500,000; surplus, \$500,667; reserve, Univ. Mines, Ltd., \$34,230; accrued expenses on ore, \$30,771; accounts payable, \$12,565; unpaid payroll, \$4,715; reserve for depreciation, \$45,000; surplus, \$500,667. Net current assets, Dec. 31, 1921, were \$555,910.

Dividends: total \$7,505,410; last in April, 1918. La Rose Cons. Mines Co. paid \$5,911,640 during its existence.

Property: 6 patented claims, 359 acres, at Cobalt, Coleman Twp., includes the La Rose, Princess, Lawson, University and Fisher-Eplett mines, all practically worked out, and the Violet mine which adjoins the O'Brien on the east. A boundary dispute with the O'Brien company was settled by the Supreme Court in 1920.

Development: in 1920 amounted to 2,336', confined to La Rose, Violet and Princess mines; in 1921 it was 5,241', including that on the University. The Fisher-Eplett and Lawson mines were not operated, 1920-21. Late in 1921, results on 530' level of the Violet were encouraging and an ore shoot, 5' wide and 225' long, is said to average 30 oz. silver; a winze is being sunk. Reported that La Rose mine was flooded by inflow from Cobalt lake in December.

Equipment: complete and modern in all respects. Ore is treated at mill of Bailey Silver Mines, Ltd.

Production: total, to end of 1920, 40,058 tons of ore and concentrate, yielding 25,205,092 oz. silver, with net returns of \$13,230,728. During 1921, from La Rose and University, 36,365 tons of ore averaging 15.7 oz. per ton were treated, yielding 659 tons of concentrate containing 570,970 oz. silver.

Production:

Year	Prod. Oz. Silver	Net Value	Cost Prod. per oz.,c	Net Sell		Dividends	Surplus
				Price	Net Profit		
1921	637,042	\$390,958	46.00	63.54	\$126,089	\$550,910
1920	410,445	313,995	73.27	83.41	13,279	500,667
1919	289,317	356,124	105.00	117.00	30,204	514,424
1918	288,556	268,525	87.17	99.83	45,544	\$30,000	456,046
1917	437,338	328,751	68.64	82.94	71,372	\$30,000	509,927
1916	740,065	449,734	46.39	64.89	164,744	333,000
1915	1,135,142	526,996	31.64	50.88	230,662	436,000
1914	1,368,247	637,555	37.20	53.92	217,979	918,000

Production figures for 1921 include those of the University mine.

La Rose is a liquidating property, unless new properties are acquired. Numerous properties have been examined, but none was under option.

University Mines, Ltd.

Controlled by La Rose Mines, Ltd.

Cap. \$1,000,000.

Balance sheet for year ending Dec. 31, 1920, shows assets, \$1,077,715, including property, \$1,000,000; buildings, \$8,117; railway siding, \$1,172; liabilities include, due La Rose Mines, Ltd., \$77,544. Income from ore sales was \$74,027; other income, \$8,327; expenses, \$95,183; operating loss, \$12,828. The total deficit is \$68,426.

During 1920, La Rose did 2,263' of development work on the University mine, opening up a new body of milling ore and a 3" vein of high grade. Management estimates 3,000 to 4,000 tons of broken ore in stopes.

Shipments in 1920 amounted to 6,086 tons mill ore averaging 10.3 oz., or 49,294 oz. silver, and 20.6 tons high grade ore, averaging 2,500 oz. per ton, a total of 100,895 oz. silver. In July, 1921, the mine was reported shipping 2 cars daily to the Bailey mill.

LA SANTA LUCIA GOLD MINES, LTD.

Merged with Cartwright Goldfields, Ltd., to form Blue Quartz Gold Mines, Ltd., which see.

LAWSON MINES, LTD.

Company dissolved and property now a part of La Rose Mines, Ltd., which see.

ONTARIO

ONTARIO

LEBEL CRYSTAL LAKE GOLD MINES, LTD. ONTARIO

Address: 157 Bay St., Toronto, Ont. **Mine address:** Kirkland Lake, Ont. Hy. S. Rose, mgr.

Property: at Crystal lake, Lebel Twp., Kirkland Lake area. Early in 1921, company planned to expend \$50,000 on exploratory work.

LEBEL LODE, LTD. ONTARIO

Address: Cobalt, Ont. **Mine address:** Kirkland Lake, Ont.

Officers: A. J. Post, pres., Cobalt; W. Langden Hayden, v. p. 54 Wall St., New York; Chas. Mickle, v. p.; G. W. Dixon, sec.-treas., with Dr. G. A. Schmidt, G. L. Brewer and Gordon Cameron, directors

Inc. 1921, in Ontario. **Cap.** \$2,000,000; \$1 par; 1,499,971 shares in treasury.

Property: 3 claims, 100 acres, in Lebel township, Kirkland Lake area, N. of the King Kirkland, said to show gold values at surface.

A prospect.

LEBEL ORO MINES, LTD. ONTARIO

Address: 8 Bk. of Toronto Bldg., Toronto, Ont. **Mine address:** Kirkland Lake, Ont. Rolf Hurd, mgr.; W. F. Greene, supt.

Property: in Lebel Twp., eastern section of Kirkland Lake area, covers the McGee gold-bearing vein developed by a shaft, 50' deep, in early 1921. Ore is said to be of commercial grade at surface.

LIGHTNING RIVER GOLD MINES, LTD. ONTARIO

Address: Box 639; Haileybury, Ont.

Officers: W. J. Lucy, pres.-mgr.; W. J. Morrison, v. p.-cons. engr.; Udney Richardson, sec.-treas.; with Dr. J. A. Wilson, Geo. Wallace, W. M. Cochenour and L. B. Howey, directors.

Inc. Feb. 1920, in Ontario. **Cap.** \$3,000,000; par \$1; 1,400,000 treasury shares. Montreal Trust Co., registrar. Annual meeting, Feb. 21, 1922. As of Sept. 7, 1921, 96,040 shares were sold for about \$34,236.

Property: the Howey-Cochenour-Williams group of 8 claims in Holloway Twp., 4 claims in Egan Twp., and 6 claims in Maisonsville Twp., of which 8 claims are patented; total of 720 acres. The two first named are about 40 miles apart in the Larder Lake area, and the third group is in Bourke's area, all in Timiskaming district. The H.-C.-W. claims, 10 miles S. of Abitibi lake, show a narrow quartz vein and stringers in a sheeted zone, near a basalt-rhyolite contact, with a dip of 23°. The ore carries pyrite with which fine gold is associated; it is said to assay \$27 and upward for widths of 12 to 18", over a distance of 200'. Developed by 70' shaft and trenching; equipped with boiler and hoist. The two other groups have been explored on the surface only.

As frankly stated, these are prospects.

LORRAIN CONSOLIDATED MINES, LTD. ONTARIO

Office: 42 Broadway, New York. **Mine address:** Matheson, Ont.

Officers: D. M. Steindler, pres.; J. M. Cohen, mgr.

Mark Harris & Co., Standard Bank Bldg., Toronto, Can., were underwriters of 250,000 shares of stock.

Property: in So. Lorrain Twp., in area of same name, is said to show a vein 5-8" wide of calcite and smaltite on which 260' shaft has been sunk. At about 65' vein dipped out of shaft but it was again found at 263'. No commercial ore encountered yet.

Development: work in progress, 1917, but stock is considered a speculation pure and simple. Idle several years.

MAJESTIC GOLD MINES, LTD. ONTARIO

Address: 213 Carlton St., Toronto, or care Chas. Gregory, Parry Sound, Ont. **Mine address:** Matheson, Ont.

Officers: M. A. Attalah, pres.-mgr.; Chas Gregory, sec., with S. Latief, directors.

Inc. Jan. 24, 1921 in Ontario. **Cap.** \$1,000,000; \$1 par.

Property: in Beatty and Coulson townships, Munro area, also an option

on Craig-Pollard claims on Miles lake, W. of West River station, in the Howrey Creek area, said to show an 8' quartz vein.

Developing with 7 men at last account.

MYPES-JOHNSTON SILVER MINES CO. **ONTARIO**

Dead, and property acquired by **Brant Mines, Ltd.**

MARCH GOLD, LTD. **ONTARIO**

Address: care Chas. B. Jakes, 202 Lumsden Bldg., Toronto, Ont. **Mine address:** So. Porcupine, Ont. A. J. Brant, mgr.

Property: in Deloro Twp., Porcupine area of the Timiskaming district, near the Maidens-MacDonald mine of the Coniagas company, from which a mining plant was obtained. Operations began mid-1921, and in November it was reported that \$20,000 was available for exploratory work and 16 men employed.

MASSEY STATION MINING CO., LTD **ONTARIO**

Office: 801 Dominion Bank Bldg., Toronto. Mine near Massey, Ont.

Officers: Wallace Nesbitt, pres.; S. H. P. Pell, v. p.; Britton Osler, sec.; preceding, with Robt. Means Thompson and Miss I. M. Innes, directors.

Inc. April 24, 1901, in Ontario. **Cap.** \$300,000; \$100 par; fully issued. Company is said to have expended about \$300,000 on development and equipment.

Property: 840 acres, Crown granted, including 480 acres timber land in Salter township, Sudbury district, about 3 miles from a railway.

Geology: the tract is covered by steeply dipping beds of quartzite and schist, crossed by a mineralized zone a mile long. This contains lenticular deposits of quartzose material containing disseminated particles of copper glance, bornite, and in depth chalcopyrite. The two lenses developed are 10' wide, and the 50,000 tons of ore developed is said to assay 3 to 5% copper, with \$1 to \$2 gold per ton. See Lincoln, in "Eng. & Min." Jour." of August 4, 1917.

Development: by shaft 600' deep and several levels. Also 150' tunnel.

Equipment: includes a 200-h. p. steam and electric plant, with 2 Lidgerwood hoists, a 6-drill compressor and 15 buildings.

A 50-ton experimental mill, using the Elmore vacuum oil flotation process, with Blake and centrifugal crushers and 3 Jenckes and Wilfley tables, was built ten years or so ago, but property closed down in 1909 owing to failure of mill to make expenses.

Property was under option to Kenyon Copper Mines, Ltd. at beginning of 1917, but reverted to the owners. The ore can undoubtedly be treated by flotation methods, but development of larger reserves is needed.

MATACHEWAN GOLD MINES CO. **ONTARIO**

Is a reorganization of the Colorado-Ontario Development Co.

Address: 2 Toronto St., Toronto, Ont. **Mine address:** Elk Lake, Ont.

W. J. Boland, sec.; W. H. Seaman, mgr.; E. Craig, supt. of exploration.

Inc. Oct. 17, 1918, in Ontario. **Cap.** \$4,000,000.

Property: 5 claims, includes the Otisse gold mine, the Robb Clemens and Berry Dunn claims, in Powell Twp., Matachewan (Elk Lake) area, on the Montreal river, 23 miles N. E. from Elk Lake, the terminus of a branch of the T. & N. O. Ry. The Otisse was operated in 1918 under lease by the Colorado-Ontario Development Co.

Geology: the chief rocks near the orebodies are dark grey, altered basalt and associated fragmental rock, which when altered, are speckled with iron pyrite. What is known as the Otisse ore is a light-grey rock that has been altered from a dark basaltic rock. It carries abundant iron pyrite, and quartz in minute veinlets.

Development: by extensive trenching, 15,000' of drilling, 2 shafts and 1,000' of lateral work on the 200' level.

Idle since June, 1920, pending development of hydro-electric power.

McGUIRE KIRKLAND GOLD MINES, LTD. ONTARIO

Address: 157 Bay St., Toronto, Ont. **Mine address:** Kirkland Lake, Ont. K. A. McRae, supt.

Inc. March 3, 1919, in Canada.

The prospectus issued by the company gives the charter but has very little other information. Original incorporators were Lena Adams, book-keeper; Mary Winnifred Hunt, stenographer; K. A. McRae, engineer; Vera Marion Gray, teacher; Mabel Gray, teacher, and Edward Martin, inspector, all of Toronto. The first three are directors.

Company was organized to purchase 3 mining claims in Larder Lake district for 150,000 shares. Reported 1921 to own property in Lebel Twp., Kirkland Lake area.

McINTYRE EXTENSION MINES, LTD. ONTARIO

Property and assets of this company purchased by **McIntyre Porcupine Mines, Ltd.** (which see), by payment to minority shareholders of 294,000 shares in exchange for 955,501 shares of McIntyre Extension Mines, Ltd. See Vol. XII for description of property, and history of company.

McINTYRE-JUPITER MINES, LTD. ONTARIO

Property and assets of this company purchased by the **McIntyre Porcupine Mines, Ltd.** (which see), by payment to minority shareholders of 316,298 shares of McIntyre Porcupine Mines, Ltd., in exchange for 943,893 shares of McIntyre-Jupiter Mines, Ltd. See Vol. XII for description of property and of organization.

McINTYRE PORCUPINE MINES, LTD. ONTARIO

Offices: Standard Bank Bld., Toronto, and Schumacher, Ontario.

Officers: J. P. Bickell, pres.; W. J. Sheppard, v. p., with J. B. Tudhope, Jos. Errington and N. S. Dunlop, directors. M. P. Van der Voort, sec.; H. G. Laux, treas.; L. J. Pashler, asst. sec.; R. J. Ennis, gen. mgr.

Inc. March 16, 1911, in Ontario. **Cap.** \$4,000,000; \$5 par; being changed from \$1 par in 1921, increased from \$3,000,000 in 1917, when company purchased properties and assets of McIntyre Extension Mines, Ltd., and McIntyre Jupiter Mines, Ltd. Payment amounted to 610,298 shares for both mines. McIntyre-Porcupine shares issued total 3,640,283. The capital of the three amalgamated companies was \$7,500,000, \$7,398,878 issued Outstanding bonds were retired at maturity August 15, 1918.

Toronto General Trusts Corp. and Security Transfer & Registrar Co., New York, transfer agents and registrars. Annual meeting, usually in October. Listed on New York Stock Exchange.

Dividends: 3 of 5% in 1917 including initial on Feb. 15; 3 of 5% in 1918; 2 of 5% in 1919; 3 of 5% in 1920; 3 of 5% in 1921; and total of \$2,540,698. In 1922, 5% was paid on Jan. 2.

Shares sold as high as.

Comparative General Balance Sheet, years ending June 30:

Includes depreciation.

Property: located on the south, west and north sides of Pearl Lake, Tisdale Twp., comprises 347 acres, of which 113 acres are under Pearl Lake and Gillies Lake. The area added by acquiring the Extension and Jupiter mines was 127 and 79 acres, respectively. The immediate object of amalgamation was to secure the right to use the Extension main shaft for deeper exploration of the McIntyre property on N. side of Pearl Lake, as development work had revealed large orebodies at 1,000' depth in both mines.

Geology: the tract shows a broad band of schistose quartz porphyry, between two areas of altered volcanic schist, basalt and associated lavas.

Exploration has shown that the best gold ore occurs in the altered volcanic schist, at or near the quartz porphyry contact; development in the quartz porphyry away from the contact has not shown much gold. Orebodies are lenticular in form and very irregular, the shoots consisting of quartz more or less interbanded with mineralized schist. The discovery of orebodies has been rendered difficult by the presence of compression faults which have displaced portions of the ore as much as 130'. Eighty per cent. of ore milled is heavily mineralized schist.

Development: by 2 shafts, 1,625' and 2,000' deep, making McIntyre the deepest gold mine in Canada, with stations at 1,125', 1,250', 1,375', 1,500', 1,625' and 1,700'. Total work, 72,000' at end of March, 1921, not including 50,000' of diamond drilling. Vein system has been opened up on the 1,375' and 1,500' levels and explored by drilling to depth of 1,700'. Two new veins each about 8' wide and carrying \$7 gold per ton, were cut on the 1,375' level.

Ore reserves:

	Tons	Average Value	Total Value
June 30, 1921	624,422	\$10.25	\$6,392,394
June 30, 1920	502,682	11.13	5,595,500
June 30, 1919	433,057	11.00	4,777,324
June 30, 1918	459,276	9.80	4,490,432
June 30, 1917	443,617	11.14	4,943,034
March 31, 1916	201,920	11.12	2,247,128
March 31, 1915	109,693	7.79	854,436

Equipment: property is well equipped with hoisting and milling plants, including a 550-ton cyanide mill, in which a 95% recovery is obtained by grinding the ore in cyanide solution and giving a short period of agitation. A new 250-ton mill unit was being (Jan. 1922) installed, which will be particularly adapted to the treatment of carbonaceous ore of which a considerable tonnage has been opened. This makes a total mill capacity of 750 tons per day. In 1919-20, an electric hoist to handle 3 tons from depth of 3,000' was added.

Production:

	Tons Milled	Value per ton	Rec. %	—Costs per ton—			Profit per ton
				Mine	Mill	Total	
1921....	171,916	\$11.67	94.9	\$3.57	\$1.21	\$6.33	\$4.75
1920....	188,835	11.52	95.6	3.06	1.04	5.48	5.54
1919(d).	179,874	9.76	95.2	2.89	1.01	5.08	4.21
1918(d).	178,327	10.05	95.6	3.26	0.90	5.15	4.90
1917(c).	195,307	10.00	95.4	2.99	0.89	4.78	5.22

1913....	31,979	7.85	89.8
1912....	14,500	7.00	75.0

(a) Year ending March 2. (b) 15 months, ending March 31. (c) 15 months ended June 30, 1917. (d) Year ending June 30.

In first 18 months of operation, the Blue Diamond Coal Company showed a net deficit of \$157,127, but initial expenditures are reported to have been heavy.

Mine development during the past few years has been very satisfactory as the veins on the lower levels show as much commercial ore as the upper workings, and lateral development of the upper levels has opened up entirely new orebodies. These results and the acquisition of adjoining properties, assures a long productive life to the company, which is now one of the three big gold producers of Canada.

An option obtained in 1918 on controlling interest in the Newray property adjoining the Plenaurum, expired in 1921, work on that mine having failed to disclose orebodies of commercial grade.

Company acquired in 1920 a 50% interest in the Blue Diamond Coal Mine, Ltd., situated at Brule, Alberta; the latter company holds an option on 50% of the capital stock of Canadian Coalfields, Ltd. The Timiskaming Mng. Co. has joined forces in this venture.

At prices prevailing in April, 1922, the shares were selling on a basis of \$16,000,000 for the mine. According to the Canadian Mng. Journal, "the mine must produce \$32,000,000 to realize a reasonable return to those who buy stock at the prevailing price."

As recent diamond drilling has shown an indicated tonnage far in excess of the amount of ore reserves of \$6,000,000 gross, it is not improbable that the above figure may eventually be realized.

McIVOR GOLD MINES, LTD.**ONTARIO**

Address: Kirkland Lake, Ont. Harry Oakes, mgr.

Property: at Beatrice lake, Teck Twp., Kirkland Lake area, near Swastika and about 3 miles from Kirkland Lake, developed by 100' shaft. Continuation of development was planned for summer of 1921.

McKINLEY-DARRAGH-SAVAGE MINES OF COBALT, LTD. ONT.

* Loss.

Dividends: 2% in 1907; 9% in 1908; 10% in 1909; 15% in 1910; 50% m 1911; 50% in 1912; 32% in 1913; 18% in 1914; 12% in 1915; 1916, 1917, 1918 and 1919; in 1920, 3% quarterly to Oct. 1; none since. Total 265%, or \$5,889,028.

Property: 1 claim, 40 acres, the McKinley-Darragh mine in Coleman Twp., at southern end of Cobalt lake; 1 claim, 40 acres, the Savage mine, on the east side of Cart lake; 40 acres in Bucke Twp., the Bennett claim. The McKinley-Darragh, which adjoins the Nipissing and La Rose holdings, has been the most important producer. Deepest workings are at 400', where the contact with the Keewatin formation is exposed.

Development: work in McKinley amounted to 8,200' in 1918, the largest footage of any year. This large amount of exploration was responsible for the increased costs, but it served to find several payable orebodies. Several small veins were developed in the lower levels of the mine, but no large orebodies of importance were found. There is only a small area of favorable ground on the lower levels yet to be explored. The Savage is practically worked out.

In 1919 and 1920, total extensions were 5,893', and 108,158 tons of

milling ore were hoisted, much the larger part from the McKinley. As ore remaining in this mine averages about 9 oz., it cannot be profitably mined with a silver price as of Dec. 31, 1920.

Equipment: includes a 200-ton concentrator and a flotation unit for treatment of tails.

Ore reserves: estimated January 1, 1919, to contain 852,754 oz. of silver compared with 1,076,182 oz. January 1, 1918, and 1,714,302 oz. January 1, 1917. On Jan. 1, 1920, ore reserves were 1,077,411 oz. of silver; and one year later reported that about 25,000 tons of broken ore were available, plus a considerable tonnage blocked out, but only a little of it profitable with silver at 60c.

Costs at the McKinley-Darragh mine:

Year	Tons Milled	Costs			
		Mines	Mill	Mktg.	Total
1920.....	63,892	\$3.12	\$2.51	\$1.06	\$8.86
1919.....	56,570	3.01	2.11	1.54	9.48
1918.....	67,020	2.75	1.53	1.19	7.36
1917.....	68,142	2.47	1.33	1.06	6.93
1916.....	62,676	1.98	0.95	1.08	5.15
1915.....	50,912	1.78	0.93	1.01	4.71
1914.....	45,098	2.22	1.44	1.70	6.99
1913.....	48,761	2.44	1.39	1.88	7.37

Extraction on all ore milled was 86.9% in 1913; in 1914, 85.1% on McKinley ore and 64.1% on Savage ore; 80.9% in 1915; 86.98% in 1917; 87.23% in 1918; 84.27% in 1919; 75.77% in 1920.

Production:

Year	—Ounces Silver Shipped—			Cost per oz.	Profit per oz.
	McK.-D.	Savage	Total		
1920.	627,630	0.8562	*\$0.0502
1919.	767,798	0.7193	0.3872
1918.	904,543	0.6842	0.3130
1917.	1,020,545	0.5052	0.3268

1914.	1,051,925	208,121	1,260,046	0.3130	0.2310
1913.	1,672,431	556,066	2,228,497	0.2230	0.3690

* Loss.

Total silver shipped to end of 1920 was about 19,520,565 oz.

Silver prices realized were 99.72c. in 1918; 110.65c. in 1919; in 1920, 64.25c. to 131c.

Because of low price of silver and lack of power, mine was shut down on Dec. 31, 1920; the situation at the end of 1921 was no better.

MERCER SILVER MINES, LTD.

ONTARIO

Out of business, described in Vol. XIII.

METALS CHEMICAL, LTD.

ONTARIO

Out of business. Described in Vol. XIV. Property sold to Ontario

Smelters & Refiners, Ltd.

MILLER-ADAIR MINES, LTD.

ONTARIO

Address: 26 Adelaide St. W., Toronto, Ont. Mine address: Shining-tree, Ont. Jas. E. Day, pres.

Property: 2 claims in McMurchy Twp., Sudbury district, adjoins the Wasapika on N., exposes the Ribble vein crosscutting pillow lava schist, and said to be 5' wide. The vein filling is quartz carrying fair gold values.

MILLERETTE SILVER MINING CO., LTD.

ONTARIO

Property became a part of the Miller Lake O'Brien mine, which see under M. J. O'Brien, Ltd.

MILLER INDEPENDENCE MINES, LTD.

ONTARIO

Address: Germantown, Ohio.

Mine address: W. E. Simpson, gen. mgr., Boston Creek, Ontario.

Officers: Wm. Stroop, pres.; John C. Schaeffer, sec.; Edward Rettick, treas.; with Geo. Ozias, O. B. Brown of Dayton, Ohio, J. A. Read, Adam Begrad and Frank Groch, directors.

Inc. November 17, 1915, in Ontario. **Cap.** \$500,000; increased to \$700,000 in 1918; \$1 par; 650,000 shares outstanding. Annual meeting, Feb. 2, 1922.

Property: 160 acres in Pacaud Twp., Boston Creek district.

Geology: the vein cuts through fine grained "pillow" lava and hornblende schist with a feldspar-porphry dike on the hanging wall. The ore is white quartz, containing specks of pyrite, galena and telluride of gold. **Reserves:** not extensive, but of good grade.

Development: by 4 shafts, the deepest 500', from which level, crosscut was driven 487' to open principal zone of mineralization. Also by drilling from 500' level.

Equipment: includes a mill, recently enlarged to 75 tons daily capacity, using Groch flotation unit, 5-drill compressor, 4 boilers, 2 hoists, etc. Electric power is used.

In August 1920, 46,000 shares were offered to stockholders at \$3.80 per share, being the balance of a block of 100,000, the sale of which was authorized by the Ohio Dept of Securities, but which were not disposed of owing to the prevailing financial conditions. Because of this and of many unpaid subscriptions, operations were suspended, May, 1921. Later a bond issue of \$50,000 was fully subscribed and development resumed.

Perry, sec.; Scott Turner, cons. engr.; C. E. Watson, mgr.; M. F. Fairlie, mill mgr. London advisory com.; A. C. F. Fitzgeorge, chm.; T. W. Inwood and R. F. Eden

Inc. Nov. 23, 1916. **Cap.** \$8,300,250; par \$5; all issued; succeeding company of same name, incorporated March 20, 1914, with capital of \$2,075,000, par \$1. Stockholders of old company received new stock to the amount of \$4 for each \$1 of old; and stockholders of the Canadian Mng. Corp., Ltd., the original holding company (English) and now liquidated, received one share of new M. C. C. for each share of C. M. C. held.

London transfer agency: 14 Cophall Ave., London, E. C. Traded in on Toronto Stock Exchange; price range, \$2.12-\$4 in 1918; \$1.50-\$2.50 in 1919; \$1.05-\$2.20 in 1920; 95c.-\$1.22 in 1921.

April 1, 1914, the Mining Corp. of Canada acquired the mining properties formerly operated by the Cobalt Townsite Mng. Co., Ltd., Cobalt Lake Mng. Co. Ltd., City of Cobalt Mng. Co. Ltd., and the Townsite Extension Mines, Ltd., total area, 200 acres, at Cobalt. In 1915, the property of the Little Nipissing Mining Co., 40 acres, was acquired.

Owns entire capitalization, \$250,000, of Cobalt Reduction Co., Ltd., operating a 300-ton mill and 140-ton cyanide plant. Company also owned all the capital stock of Canadian Industrial Minerals, Ltd., operating a fluorspar mine at Madoc, Ont.; this venture was dropped in December, 1920, with a net loss of \$225,000. In spring of 1920, purchase of Buffalo Mines, Ltd., 40 acres, was completed by the General Examining & Development Co., a subsidiary, all shares of which are owned by the Mining Corp. The Central Operating Co., Ltd. (q. v.), operates holdings of Foster Cobalt Mng. Co. under a lease, and the Texas Yankee Girl Mng. Co., Ltd. (q. v.), operating in the Nelson division of British Columbia, are also subsidiaries. In 1921, corporation leased the Haileybury-Frontier in So. Lorrain Twp., which see for description.

Balance to balance sheet.....	\$3,268,628	\$3,311,577	\$3,025,347

Dividends: in 1916, 25% and 2½ bonus; in 1917, 18¾%; in 1918, 16¼%; in 1919, 37½%; in 1920 37½%. The total is \$5,499,275.

Property: the City, Lake and Townsite have been the principal mines at Cobalt, but are gradually being worked out. Acquisition of the adjoining 40 acres of the Buffalo materially increased company's total reserves; this mine between 1913 and 1919 produced over 7,000,000 oz. of silver, and while greater part of high grade has been mined, a large tonnage of low grade ore is left.

Geology: ores occur in narrow calcite veins in Huronian conglomerate and Keewatin formation. The high-grade ore in 1918 assayed 1953 oz. silver per ton, the milling ore, 35 oz. silver per ton, and average of total ore treated was 41 oz. per ton.

Development: a 3 years' extensive exploration was completed 1918 and extensions in 1919 were only 606'. Work in 1920 proved satisfactory and drilling operations indicated the existence of new ore. Total openings are over 22 miles. Mining costs, including development and exploration, were \$4.76 per ton in 1920, compared with \$5.26 in 1919 and \$7.30 in 1918.

Ore reserves: at end of 1919 were 38,735 tons carrying 1,307,220 oz. of silver, compared with 28,950 tons and 830,940 oz. silver for 1920. There were about 350,000 tons of tailing in Cobalt lake in 1919, reduced to 275,000 tons in 1920. The Buffalo mine is credited in 1920 with 1,350,060 oz. silver contained in 74,653 tons of ore. The total reserve tonnage includes 45,286 tons broken ore.

Equipment: in addition to plant of Cobalt Reduc'n Co., includes Buffalo mill under lease from General Ex. & Devel. Co., equipped to treat high and low grade ore; has cyanide and flotation units and is connected by aerial tram with Cobalt Lake. The Buffalo mill was leased in 1920 to the Coniagas Mines. Early in 1921, capacity of Cobalt Reduction mill was increased from 160 to 300 tons.

Company had 200 new properties under consideration in 1919 and 300 in 1920, principally in Canada. Those under option in British Columbia have proved generally disappointing. In Manitoba, a majority interest in the Flin Flon (q. v.) property was purchased in May, 1921. Limited exploration continues in search of radium ore in Butt Twp., Ont. Except for the lease on the Foster mine, there are no new developments in North-

In 1917, a quartz gold property in the Yenisei district of Siberia, was bought, after considerable development had been done, but due to the political condition of the country the mine was closed temporarily. The affairs of the British American Mng. Co., in which the Mining Corp. had a 45% interest, have been wound up. In 1920, options were taken on properties in Mexico and Nicaragua.

Mines and mill were closed down for about 3 months early in 1921, owing to low silver price; mill capacity was increased during this period.

Production: ore is treated at the Cobalt Reduction Co's plant.

Year	Tons ore treated	Oz. Silver per ton	Extraction per cent.	Total Oz. silver Rec.	—Total costs—	
					per ton	per Oz.
1920	51,918(a)	30.66	91.69	1,459,643	\$20.06	62.60c
1919	35,410(a)	35.52	94.12	1,183,760	20.78	59.78
1918	42,482(a)	41.01	95.71	1,667,344	24.51	60.96
1917	84,085	56.49	94.43	4,485,541	19.26	36.11
1916	114,392	42.29	92.14	4,457,440	13.43	34.46
1915	132,879	37.86	90.72	4,563,957	10.15	29.57

(a) Does not include 17,632 tons tailing treated with a total silver recovery of 40,908 oz., or 58.04%, in 1918; 28,494 tons of tails yielding 46,892 oz. silver, or 48.45%, in 1919; 71,476 tons yielding 204,375 oz., or 73.01%, in 1920.

Production, to 1921, totals 32,217,505 oz. Reported that much of 1921 production came from the Buffalo mine.

The company is one of the largest silver producers in Canada. Its 3 Cobalt properties are nearing exhaustion, but under present management there seems little doubt that with the acquisition of other good mines, the company will continue paying dividends.

MOFFAT-HALL GOLD MINES, LTD.

ONTARIO

Address: care W. T. Hall, Haileybury, Ont. **Mine address:** Kirkland Lake, Ont.

Officers: Fred. C. Bidgood, pres.-mgr. director; Lloyd R. Moffatt, v. p., with R. Y. Campbell and Bruce Williams, directors. Wm. S. Hall, sec-treas.

Corless, Canadian mgr.; Oliver Hall, mine supt.; A. Sharp, supt., Carson mine; J. F. Robertson, supt. of smelting works.

Inc. September 20, 1900, in Great Britain. **Cap.** £3,400,000, including £500,000 in 7% cumulative pref'd shares; par £1; £2,000,000 non-cumulative 7% preferred shares of £1 par. and 900,000 common shares, £1 par. Original capital, £600,000, increased July, 1908, to £850,000; in £500,000

cumulative 7% preferred shares, £5 par; £300,000 ordinary shares, £1 par, and £50,000 deferred shares, £1 par; total issued capital £750,000. Reorganized July 22, 1914, with authorized capital of £2,400,000, in shares of £1; 500,000 being in 7% cumulative preferred shares; 1,000,000 in 7% non-cumulative preferred shares, and 900,000 ordinary shares, increased 1918 to present capital. Fiscal year with April 30.

Debenture stock: £375,000 first mortgage 5's, redeemable at 105 on or before Jan. 1, 1935, issued against stock of old company, and £500,000 6's, due at 101 before Dec. 31, 1924. In spring of 1921, an issue of £1,300,000 mortgage debenture stock 8's was made; secured by trust deed and due at 104 between Jan. 1, 1926 and Nov. 1, 1941; the issue of £500,000 6's will be repaid out of the proceeds.

Dividends: 7% has been paid regularly on preferred shares; dividends on ordinary shares; 6% in 1905; 10% in 1906; 12½% in 1907; 15% in 1908, 1909 and 1910; 16¼% in 1911 and 1912; 21¼% in 1913; 35% in 1914; 20% in 1915 and 1916, on new capital; 20% less tax in 1917; interim of 1s per share, less tax; final of 3s per share free of tax in 1918; interim of 1s per share free, paid on Feb. 5 and final of 2s 6d on Aug. 1, 1919; same amounts on Feb. 5 and Aug. 6, 1920; in 1921, 1s per share tax free was paid on Aug. 12.

Property: over 14,000 acres in the Sudbury district, and mining rights on about 12,000 acres near to and including Bruce Mines, about 29,000 acres in all. In the Sudbury district the Levack, Garson, Victoria, Worthington, Bruce copper-quartz mines are worked. The Blizzard, Frood Extension, Kirkwood and North Star are held in reserve. The Bruce mine is opened by several shafts producing quartzose-copper ore, used as flux in the converters.

Development: the Levack mine, purchased in 1913, is opened by a 5-compartment inclined shaft, 590' deep, with 7 levels. In 1918, ore had been developed on 5 levels, and proved to a depth of 1,400'; reserves estimated at 6 to 8,000,000 tons of ore.

The Garson mine has a 3-compartment 1,000' shaft. Diamond drilling has proved ore to 1,300' depth.

The Victoria for a long time the company's chief producer is the deepest mine in Canada. At last accounts the 3-compartment shaft had reached the depth of 2,600; and was being sunk to 3,000' depth.

The orebody at the Worthington mine, 750' deep, is a mixture of very high-grade ore and rock, which is close sorted. The orebody is a brecciated basic dike and not typical of the Sudbury deposits. (For geology see Economic Geology, Vol. X, No. 6.)

The North Star shaft is 400' deep. The Blizzard mine was worked by open-pits.

The Frood Extension mine has a 4-compartment shaft, 1,000' deep, levels at 400, 750, and 900'. The main orebody lies at 1,000' depth. Work at this mine was stopped when the war started.

The copper-nickel ratio in the ore from these different mines varies widely.

Smelter: the 1,500-ton smelter at Coniston, Ont., 7 miles E. of Sudbury, blown-in May 15, 1913, has 4 blast furnaces, 50x240", and 4 Pierce-Smith basic converters with shells 10' in diameter and 25' 10" long. Ores are smelted in blast furnaces and matte bessemered to a rich matte containing 41% copper, 41% nickel, 17% sulphur, and less than 1% iron. This product is shipped to the company's refinery at Clydach, in Swansea Valley, South Wales, where the metals are separated and the nickel is refined by the Mond process.

Refining works: at the Clydach works the matte is dead-roasted and treated with dilute sulphuric acid, which permits the extraction of about 65% of the copper and 2% of the nickel. The residue, after drying, assays 45 to 60% nickel, and is treated in charges of 500 kgs. with water-gas, in a

reduction tower, at a temperature of about 300° C. This tower has shelves and the ore is moved from shelf to shelf by automatic rakes, the lower shelves being cooled. After treatment in the reduction tower the charge is transferred to a volatilizing tower and treated with carbon monoxide at a temperature of about 100° C. The residue therefrom is returned to the reducing tower and the charge goes forward and back between the 2 towers for 10 to 15 days, and when 60% of the nickel has been volatilized, as nickel carbonyl, the residue of the charge is returned to the roasting furnace. The nickel carbonyl is treated in a decomposing apparatus, wherein the metal is recovered in granules, assaying 99.4 to 99.8% nickel, and the copper is turned out as bluestone of which the company markets considerable quantities for agricultural purposes.

All the Canadian plants are up-to-date and operated electrically by power from 3 hydro-electric plants, 2 of which are the property of the Lorne Power Co., a subsidiary of the Mond Nickel Co. The growth of the company's operations within the past several years has been phenomenal.

Production: the mine output for 1911 was 163,352 tons, 117,658 tons in 1912, 408,638 tons in 1915, 361,335 tons in 1917, 382,913 tons in 1918. Metal production is not reported, but unofficial estimates four years ago placed the annual output at about 4,000,000 lb. fine copper and 5,000,000 lb. nickel, with a possible maximum production of 10,000,000 lb. copper and 15,000,000 lb. nickel. A small amount of platinum is also produced, amounting to 4,465 oz. in 1918.

After the Armistice, finished stocks accumulated and in 1919, company's operations were curtailed, but in 1920, production was gradually brought back to normal.

MONETA PORCUPINE MINES, LTD.

ONTARIO

Office: 420 Bank of Hamilton Bldg., Toronto, Ont. **Mine office:** Timmins, Ont.

Officers: Sir H. M. Pellatt, pres.; D. M. Steindler (42 Broadway, N. Y.), v. p.; with J. A. Murray and A. G. Kirby, directors. C. H. Manaton, sec.-treas.

Inc. in Ontario. **Cap.** \$2,000,000; par \$1; 1,541,000 shares issued. Company registers and makes transfers.

Property: 120 acres in Tisdale Twp., Porcupine area, Timiskaming district, adjoins Hollinger on W., is said to show several promising gold-quartz outcrops.

MONTREAL KIRKLAND GOLD MINES, LTD.

ONTARIO

Address: 46 Bank of Ottawa Bldg., Montreal. **Mine address:** Kirkland Lake, Ont.

Inc. March 2, 1918. **Cap.** \$1,000,000.

Property: the Killoran group of 4 claims in Teck Twp., Kirkland Lake area, adjoins Ontario Kirkland on S., developed by an 100' shaft sunk in 1918. On Nov. 1, 1921, sale of 75,000 shares at 25c. was authorized, proceeds to be used for plant and resumption of operations.

MOOSE MOUNTAIN, LTD.

ONTARIO

Offices: 17 Battery Pl., New York, and Sellwood, Ont.

Officers: Chas. E. Herrmann, pres., with J. J. Mitchell, J. R. Dennis, A. L. Harnes and Chas. H. Smith, directors. A. J. Anderson, Sellwood, Ont. mgr.; W. R. Cox, 120 Broadway, New York, cons. engr. and sales agent.

Inc. in Ontario. **Cap.** \$2,000,000; par \$100. Transfers made at company's New York office.

Property: the Magpie and other Moose Mountain iron mines, about 5,000 acres, at Sellwood, Hutton Twp., Larnark county, 30 miles W. of Sudbury, on Can. Natl. Railway, opened in 1908. Eleven orebodies, 80 to 250' wide and 400 to 6,000' long, have been uncovered; the country rock is schist. The ore is a finely disseminated magnetite.

Development: by tunnels, up to 400' long; total workings, 2,000', to a depth of 200'. Overhand shrinkage stoping is employed.

Ore reserves: estimated to be 100,000,000 tons, assaying 35% iron and 0.08% phosphorus.

Equipment: includes electric power, double drum hoist two 2,000' compressors, 800-ton concentrator and briquetting plant, making a briquette averaging 66% iron and 0.012% phosphorus.

Production: 40,444 tons in 1915; 5,338 tons in 1916, none in 1917; 26,777 tons in 1918; 38,287 tons in 1919. Total to 1922, about 500,000 tons of cobbled ore, concentrate and briquettes.

MURRAY-MOGRIDGE MINES, LTD. ONTARIO

Address: Union Bk. Bldg., Toronto, Ont. **Mine address:** Bourkes, Ont.

Officers: Gideon Grant, pres.; G. F. McFarland, v. p., with F. B. Carvell, Douglas Murray, J. R. L. Starr, W. W. Sloan, Wm. I. Banfield, D. D. Grant and J. L. McDowell, directors. A. E. Marks, sec.-treas.; G. G. Thomas, manager.

Cap. \$4,000,000; \$1 par. Listed on New York Curb, Security Transfer and Registrar Co., transfer agents.

Is a reorganization of the Murray-Mogridge Co. The shareholders of old company received 1,928,870 shares of new stock and New York interests took 200,000 shares, at \$1 a share, the proceeds to be used to pay off all obligations and to give funds for the development. Reported in November, 1919, that \$100,000 had been paid in.

Property: about 680 acres, at Wolke Lake in Maisonville Twp., near Bourkes' Siding on the T. & N. O. Ry.

Development: by 200' and 100' shafts, also 300' of drifting, said to disclose 6 quartz veins. Work suspended owing to lack of funds, in 1920.

NATIONAL MINES, LTD. ONTARIO

Address: E. C. Whitbeck, sec.-treas., 17 Ellwood Bldg., Rochester, N. Y.

Operated under lease, the King Edward mine, idle several years.

NEPIGON MINING & LANDS CO. ONTARIO

Owms Woods Location, a 10,000 acre tract in Sibley Twp., under option to the Islet Exploration Co., which see.

NEW EXTENSION MINES, LTD., THE ONTARIO

Address: 1512 Bk. of Hamilton, Toronto, Ont. **Mine address:** New Liskeard, Ont. W. W. Perry, sec.

Inc. Oct. 23, 1918, in Ontario. **Cap.** \$150,000.

Property: in Casey Twp., Timiskaming district.

NEW PORCUPINE IMPERIAL MINES, LTD. ONTARIO

Successor of Porcupine Imperial Mines, Ltd. H. L. Taylor, pres.

Cap. \$3,000,000; \$1 par. Holders of Porcupine Imperial stock received one share of new stock for two shares of old company's stock.

Property: ¼ mile S. W. of Dome Lake, in Porcupine area, is said to show several veins of gold ore under development for several years by 115' shaft with about 500' of workings. Some diamond drilling has also been done. No recent information.

NEWRAY MINES CO., LTD. ONTARIO

Office: Jas. E. Day, sec.-treas., 26 Adelaide St., W., Toronto, Ont.

Mine address: Timmins, Ont.

Officers: B. J. Bixby, pres., Buffalo, N. Y.; H. L. Tudor, v. p.; C. P. Charlebois and W. F. Funk, directors

Inc. in Ontario. **Cap.** \$1,500,000; increased to \$3,000,000 in 1918; \$1 par; 1,318,000 issued. U. S. Corporation, New York, and Imperial Trusts Co., Toronto, registrars and transfer agents. Traded in on Toronto Stock Exchange.

Is a reorganization of the Rea Consolidated Gold Mines, Ltd.; stock being exchanged at the rate of 1½ shares new stock for each share of Rea Consolidated stock.

Property: North ½ of lots 6 and 7, Concession III, about 320 acres;

comprise the Rea mine, at Porcupine, $1\frac{1}{2}$ miles from Schumacher, the nearest railroad station. The well-defined quartz fissure veins strike N. E. and dip N. W.; ore-shoots occur as lenses in and along shear zones.

Development: 2-compartment vertical shaft, sunk 420' on vein, with levels at 200, 300 and 400'. The oreshoot is cut and displaced by a fault at depth of 240'; below the fault the vein is not of the same character. The orebody above the fault was stoped for about 300' in length, $4\frac{1}{2}$ ' wide, and 200' in depth and is said to have produced 19,500 tons of ore, averaging \$11 per ton. Diamond drilling is said to have cut 12' of quartz showing free gold at 630' vertical.

Equipment: includes 10-stamp mill, hoist, 6-drill compressor, pumps and boiler.

Production: 11,607 tons of ore yielding \$125,000 in bullion in 1915. It resumed treatment in May, 1917. Output in 1918 was 401 tons of \$3.78 ore.

In 1917, property was taken under control by the Crown Reserve company of Cobalt, but option was relinquished in 1918 and McIntyre-Porcupine Mines, Ltd. then took an option on 1,500,000 shares at 45c. per share, which expired in 1921.

Inactive because of lack of funds.

NICHOLS CHEMICAL CO., LTD.

ONTARIO

Subsidiary of **General Chemical Co.**

Office: 222 St. James St., Montreal, Canada.

Property: the Northern Pyrites mine on Vermillion Lake at North Pines, shows veins averaging 45' in width for 1,000' in length with strike N. E. and dip 55° N. W. Mine said to have the largest pyrite deposit under development in Canada.

Equipment: includes 2-mile aerial tram, hoist, compressor and concentrating mill. Shipments to the United States are made via Graham on the Grand Trunk Pacific R. R. and the Great Lakes. Employs 130 men. Company does not publish financial or statistical reports.

About 95,000 tons of pyrite produced in 1915; 103,337 tons in 1918. Work resumed in Oct., 1919, after having been shut down.

Company also operates the Goudreau pyrite mine, shipments from which in 1918, amounted to 90,613 tons. About 200 men employed under Gerald G. Dobbs, supt., at last accounts.

NIPISSING EXTENSION MINES, LTD.

ONTARIO

Address: Imperial Bank Ch., Toronto, Ont. **Mine address:** Cobalt, Ont.

Officers: A. J. Young, pres.; W. E. Stevenson, v. p.; with Albert Loening; J. W. Pickup, and Abbott Kimball, directors. E. H. Birkett, mgr.

Inc. 1919, in Ontario. **Cap.** \$3,000,000, issued \$2,000,000.

Company has purchased property formerly owned by **Nipissing Ext. Mng. Co.**, 40 acres in Peterson Lake section of Coleman Twp., and property once owned by **Farah Mng. Co.**, 53 acres, also at Cobalt.

No recent information.

NIPISSING MINES CO.

ONTARIO

Company's assets and business acquired in September, 1917, by the Nipissing Mines Co., Ltd., of Ontario. Nipissing Mines Co., described in Vol. XIII.

NIPISSING MINES CO., LTD.

ONTARIO

Company took over assets and business of the Nipissing Mines Co., of Maine, which controlled the Nipissing Mining Co., Ltd., see below.

Head office: Excelsior Life Bldg., Toronto. **New York office:** 165 Broadway.

Officers: E. P. Earle, pres.; Alex Fasken, sec.; P. C. Pfeiffer, treas. **Directors:** E. P. Earle, W. H. Brouse, R. T. Greene, David Fasken, August Heckscher, John H. Black and R. B. Watson.

Inc. July 18, 1917, in Ontario. **Cap.** \$6,000,000; par \$5; all issued. Transfer agents; Bankers Trust Co., New York. Old Colony Trust Co., Boston; and Toronto General Trusts Corp., Toronto. Registrars: The New

York Trust Co., N. Y., State Street Trust Co. Boston and Toronto General Trusts Corp., Toronto. Listed on Boston Stock Exchange, New York Curb and on Toronto Stock Exchange.

Nipissing Mines Co., Ltd. is a holding company, owning the entire stock of the Nipissing Mining Co., Ltd.

Annual report, December 31, 1921, shows total receipts \$945,407, including \$935,000 dividends on stock of Nipissing Mining Co., Ltd.; total disbursements were \$936,590, including \$900,000, paid in dividends. Assets, January 1, 1921, were \$6,368,817, including capital stock of the Nipissing Mining Co., Ltd., \$6,000,000; dividends receivable from The Nipissing Mining Co., Ltd., \$360,000; cash \$8,817.

Dividends: 46 paid by Nipissing Mines Co. (Maine Corp.) 1906-1917, was 269%, or \$16,140,000. Ten paid by Nipissing Mines Co., Ltd. (Ontario Corp.), 1917-'19, 80%, on \$4,800,000, making a total of 349%, equal to \$17.45 per share, or \$20,940,000. Distributions in 1920, were \$1,800,000; in 1921, \$1,140,000; or grand total of \$23,280,000 (388%); in 1922, \$360,000 was paid in January.

As the management realizes that the original Nipissing holdings are nearing exhaustion, the company is actively searching for new properties.

Exploration on 1,000 acres of oil lands in Clay county, Texas, acquired in 1919, proved disappointing and work stopped. The oil property near Osawatomie, Kansas, controlled by the company, has shown fair results. In 1920, a majority interest of the **Croton Magnetic Iron Mines**, owning iron mines at Brewster, N. Y., was purchased, and in 1921 an option was taken on the Rochester Veteran claim in the Porcupine gold area, adjoining the Hollinger. Other Canadian properties have been, or are being, considered.

Nipissing Mining Co., Ltd., The

Head and mine office: Cobalt, Ont. **New York Office:** 165 Broadway. Entire stock issued owned by Nipissing Mines Co., Ltd.

Officers: David Fasken, pres.; E. P. Earle, v. p.; with John H. Black, R. T. Greene and R. B. Watson, gen. mgr., directors. Alex Fasken, sec.; P. C. Pfeiffer, treas.; Hugh Park, mgr.; J. J. Denny, mill mgr.

Inc. 1904, in Ontario. **Cap.** \$250,000; shares \$100 par; all issued.

1914	2,516,065	2,558,733	971,112	1,587,621	1,235,000	343,715

Dividends: paid to January, 1921 total \$23,640,000 or 394%.

Property: 8 claims, 846 acres at Cobalt, Ontario, Canada, has over 100 fissure veins, from ½" to 12' in width, occurring in Huronian conglomerate or Keewatin formation. The ore carries silver, with cobalt, arsenic, nickel and mercury.

Development: total work in 1919 amounted to 7,717', compared with 7,815' in 1918. There are 10 working shafts on the property. The lowest, or No. 64 shaft is 1,003' deep; work there in 1919 gave no ore. Since the beginning of 1919, several orebodies have been found, all of which have proved up well.

During 1920, little in the way of new veins was found, but the older veins, which continue to be the main sources of ore production, proved better than expected. Hereafter operations will be conducted through 2 principal shafts, one on each side of the lake. Extensions in 1920 totaled 8,213'. During 1921, development work opened promising shoots of high grade silver ore in veins No. 64 and 251. Extensions amounted to 6,352'.

Exploration work on the Rochester claim has not exposed ore of commercial value, but 7 holes have been drilled and the work is to be continued.

Ore reserves: on Jan. 1, 1922, were 1,444 tons of high-grade and 58,044 tons of low-grade ore, assaying 1,313 and 19.1 oz. silver; total silver was 3,004,939 oz. compared with 3,568,127 oz. in 1920.

Equipment: includes a 40-stamp mill for low-grade ore, cyanide plant, air compressors, power house, hoists, tramway, etc. A flotation plant of 10 Callow cells treats tailings.

A new regrinding plant was added in 1920 and an additional recovery of nearly one ounce of silver is effected. Both high-grade and low-grade ores now go to the stamps.

Production:

Nipissing is the largest company, has most extensive holdings of any company in the Cobalt district and is an exceedingly well managed corporation.

NORTHCROWN PORCUPINE MINES, LTD.

ONTARIO

Is a merger, May 15, 1920, of properties of **Porcupine-Crown Mines, Ltd.**, and of **Thompson-Krist Mng. Co., Ltd.**; the former remains a holding company with a ⅓ interest in new company.

Mine address: H. J. Stewart, mgr., Timmins, or Cobalt, Ont.

Offices: Dominion Exp. Bldg., 145 St. James St., Montreal and 18 Toronto St., Toronto.

Officers: (same as Porcupine-Crown), JOHN W. CARSON, pres.-mgr. dir.; Wm. T. Gear, 1st v. p.; Jas. G. Ross, 2nd v. p.; Jas. Cooper, sec.-treas.; with J. R. L. Starr, J. B. Bertram, Percy Galt, A. G. Gardner and Ziba Gallagher, directors.

Inc. April, 1920, in Ontario. **Cap.** \$3,000,000; \$1 par; Porcupine-Crown and stockholders of Thompson Krist received 2,000,000 and 1,000,000 shares, respectively, new company receiving \$30,000 cash, in addition to property holdings.

Property: Porcupine-Crown patented claim, 40 acres, and adjoining Thompson-Krist claims, 120 acres, in Deloro Twp., Porcupine area; and under option from May, 1919, the 4 claims of Canadian-Kirkland Gold Mng. Co., Ltd., (q. v.) in Teck Twp., Kirkland Lake area. At Porcupine, quartz ore occurs in veins in schist, carrying free gold and sulphides; main orebody is 5' wide and 1,100' long.

Development: to depth of 1,100' by vertical shaft. In 1917, a serious cave cut off 3 levels and operations were suspended, June, 1918; total new work was 700'. During 11 months of 1919, former company was again active, but in a small way. At beginning of 1920, ore reserves had an estimated value of \$500,000. At Kirkland lake, work was also on limited scale in 1919, and apparently was suspended altogether during 1920-'21; but in January, 1922, reported that operations on the Canadian-Kirkland were to resume.

In Jan., 1922, it was reported that company was in financial difficulties, due to the alleged default of Thompson-Krist to meet certain obligations.

New company in 1920 uncovered two new veins on the 500' level of T.-K. and began 1,900' crosscut on same level of P.-C. ground. Mill was operated part of year.

Equipment: includes 150-ton cyanide mill. Total cost per ton ore was \$5.47 in 1916, and \$7.07 in 1917.

Production:

	Tons Treated	Value Per Ton	Extrac- tion	Net Value Bullion
1918.....	10,907	\$9.64	97.09%	\$124,474
1917.....	37,722	10.97	97.09%
1916.....	51,273	12.11	97.14%	571,652
1915.....	41,326(a)	14.46	97.70%	613,565
1914.....	40,857	17.18	97.26%	689,151

(a) Not including 5,093 tons tailing, assaying \$3.15 per ton, treated with an extraction of 85%.

Company is under same management as Porcupine-Crown and Crown Reserve.

All operations were suspended in June, 1921.

NORTH DAVIDSON MINES, LTD.

ONTARIO

Now **Beaumont Gold Mines, Ltd.**, which see.

NORTH DOME MINING CO.

ONTARIO

Dead. Company was controlled by Timiskaming Mng. Co., which later purchased property at a forced sale.

NORTHERN COPPER & NICKEL MINES

ONTARIO

Address: 704 Merchants Bank Bldg., Winnipeg, Manitoba, or Ingolf, Ont.

Officers: A. F. Hardy, pres.; C. J. Diebold, v. p.; J. H. Hicks, sec.-mgr. **Cap.** \$2,000,000.

Property: 1,640 acres, includes the Olive mine, in Rainy River district, near Mine Centre, Ont., and close to the Manitoba line. The main vein occurs in a dike of porphyritic felsite and carries free gold.

Developed by 250' shaft. The mine was fully equipped and in operation about 20 years ago.

NORTHERN CUSTOMS CONCENTRATOR, LTD. ONTARIO

Office: 702 Excelsior Life Bldg., Toronto, Ont.

Officers: A. J. Young, pres.; C. J. Booth, v. p.; L. O. Walton, sec-treas.; C. J. B. Armstrong, supt.; F. J. Bourne, man. dir., and cons. engr.

Cap. \$250,000; 248,008 shares issued.

Company sold its custom mill at Cobalt to **Bailey Silver Mines, Ltd.** and now owns stock control of the **Bailey-Silver** and the **South Easter Mng. Co., B. C.**

NORTHERN PYRITES CO. ONTARIO

Property owned by the **Nichols Chemical Co.**, which see.

NORTH THOMPSON (ASSOCIATED) GOLD MINES, LTD. ONT.

Merged, 1917, into **Porcupine V. N. T. Gold Mines, Ltd.**, which see.

NORTH WOODS MINING CO. ONTARIO

Office: 115 Broadway, New York.

Officers: John C. Hicks, pres.; Ernest Sharp, v. p.; W. W. Stevens, sec.; Charles S. Rees, treas.

Inc. 1914, in Ontario. Cap. \$2,000,000; \$1 par; all issued. Shares closely held.

Property: 27 claims, 1,080 acres, in Tisdale, and Whitney townships, in heart of the Porcupine district, close to the principal mines.

Development: only nominal exploration has been done owing to abnormal conditions. In the fall of 1919 some drilling was done.

O'BRIEN, LTD., M. J. ONTARIO

Main Ontario office: 511 Union Bk. Bldg., Ottawa. Mine offices: Cobalt and Gowganda, Ont.

Officers: M. J. O'Brien, pres.; J. A. O'Brien, v. p.; J. G. Dickenson, mgr. Staff for O'Brien mine: A. E. McKee, sec.-treas.; A. D. Campbell, engr.; D. W. McLeod; supt.; L. McEwen, mill supt. Staff for Miller Lake O'Brien mine: Alex. Starke, sec.-treas.; H. G. Kennedy, supt.; G. Barkhouse, mill supt. D. J. McCarthy, mgr. at Goudreau, Ont.

Company has license, Jan. 17, 1918, to operate in Ontario.

Cap. for use in Ontario, \$12,000,000. It controls the **Renfrew Gold Mines, Ltd.**, and **Scheelite Mines, Ltd.**, of Nova Scotia, the Storm Cloud mine in Arizona and property in Missouri and Mexico. All of these will be found described elsewhere in this volume.

Property: includes the O'Brien silver mine at Cobalt and Miller Lake O'Brien silver mine, near Gowganda, together 560 patented acres; an interest in the Bansall silver group, in Haultain Twp., 2 miles N. E. of Gowganda, and an option on the McCarthy-Webbs gold group in Sault Ste. Marie section of the Algoma district. The Bansall has an 118' shaft and was being worked 1918-19.

O'Brien Mine

A group of claims in Coleman Twp., near Cobalt lake and adjoining Nipissing on N. E., has been a steady silver producer for many years and in 1919, was reported to have 5 years' ore reserves in sight.

Ore: occurs in conglomerate, Keewatin and diabase and contains silver, cobalt, arsenic and nickel.

Development: by 6 shafts to depth of 800', with 10 miles of crosscutting, raising, drifting and winzing.

Equipment: includes 200-ton concentrator and cyanide mill.

Production: 1,237,345 oz. of silver shipped from 51,892 tons of ore in 1914; 1,137,000 oz. from 65,000 tons in 1918; 1,170,000 oz. from 54,000 tons in 1920.

Miller Lake O'Brien Mine

A group of claims, including the Millerette, in Nicol Twp., Gowganda area, near and N. W. of Miller lake, has been the leading silver producer in the Gowganda district.

Development: by 525' shaft and extensive workings.

Equipment: includes hoists, 20-drill compressor, and a mill; a hydro-electric plant between Gowganda and Burke lakes is equipped with 2 turbines and a 500-h. p. generator.

Production: figures not available, but reported to be 631,671 oz. in 1918 and 708,872 oz. in 1919. The district is credited with a total production from 1908-1920, of 5,430,152 oz., mainly from this mine.

O'BRIEN MINE

ONTARIO

See M. J. O'Brien, Ltd.

O'CONNOR SILVER MINES, LTD.

ONTARIO

Address: Rm. 34, Imperial Bk. Bldg., Toronto, Ont. **Mine office:** Cobalt, Ont. Frank Callaghan, mgr.

Property: in lot 6, concession IV, Coleman Twp., Timiskaming district. This presumably is the same company which in 1918-19 was reported to have issued exaggerated statements describing its mineral holdings. It is to be hoped that a reformation has taken place.

ONTARIO-KIRKLAND GOLD MINES, LTD.

ONTARIO

Address: Haileybury, Ont. **Mine address:** Kirkland Lake, Ont.

Officers: Frank Huth, pres.; Wm. H. Meyers, v. p.; A. J. Bolton, treas., with Walter E. Hurd, Ralph Hurd, (mgr.) M. Y. Krauss and Wm. J. Yeoll, directors. W. A. Gordon, sec.; R. C. Coffey, cons. engr.

Inc. 1918, in Ontario. **Cap.** \$1,500,000; par \$1; outstanding 1,470,000 shares. Trusts and Guarantee Co., Toronto, registrar and transfer agent. Annual meeting, in June.

Property: 2 patented claims, 88½ acres, in Teck Twp., S. E. of Lake Shore mine, Kirkland Lake area. Ground shows gold bearing quartz veins, 4 to 8' wide, in porphyry and conglomerate. Ore assays \$8 to \$28 per ton, with milling ore averaging about \$15 p. t.

Development: by two 470' shafts, one of 3 compartments, with 4,000' of crosscutting and drifting on 150', 300' and 450' levels. Ore reserves estimated to be 100,000 tons.

Equipment: electric power, 2 hoists, 440 cu. ft. compressor, and 100-ton mill completed late in 1921. First bullion shipped in Feb., 1922.

ONTARIO PORCUPINE EXPL. CO.

ONTARIO

Address: c/o E. Loring, mgr., Haileybury, Ont. **Mine address:** Timmins, Ont.

Property: in S. W. part of Mountjoy Twp., Porcupine area, one mile from Timmins. A heavy overburden of sand and gravel prevents the usual surface work. Extensive drilling was done late in 1920, but no detailed information received since.

ONTARIO SMELTERS & REFINERS, LTD.

ONTARIO

Address: Welland, Ont. F. J. Hickling, mgr.

Inc. Feb., 1920, in Ontario. **Cap.** \$750,000; \$500,000 outstanding. In March, 1920, \$250,000 of 7% 1st mortgage bonds were authorized; \$210,000 issued.

In 1921, company acquired plants of **Metals Chemical Co.** (see Vol. XIV), near Welland, and of the **Standard Sm. & Ref. Co.** at Chippewa. The former includes furnaces and refinery for producing nickel and cobalt salts from residues and ores. Also owns the Ogistoh mine in Powell Twp., Elk Lake area. Timiskaming district.

OPHIR COBALT SILVER MINES, LTD.

ONTARIO

Address: W. M. Alexander, 608 Lumsden Bldg., Toronto, Ont. **Mine office:** Cobalt, Ont.

Inc. in Ontario. **Cap.** \$1,500,000; \$1 par; 1,370,000 shares issued. Trusts & Guarantee Co., Toronto, transfer agent and registrar.

Property: in Coleman Twp., developed to depth of 582' with almost a mile of workings. The mine was developed while under option by the Mng. Corp'n. in 1918 and the Nipissing M. Co. in 1919.

ORE CHIMMEY MINING CO., LTD.**ONTARIO**

Office: 100 Clyde Block, Hamilton, Ont. **Mine office:** Northbrook, Frontenac county, Ont.

Officers: A. E. Fletcher, pres.; F. E. Misener, v. p.; O. E. Dores, sec-treas.; with C. H. Siple, S. G. McKay, H. A. Baldwin, R. W. Thomas, Chas. Zinn and S. A. Fletcher, directors. W. G. Anderson, gen. mgr.; J. R. Mouglin, mill mgr.

Inc. October 11, 1909, in Ontario. **Cap.** \$1,200,000; par 40c. Increased April, 1918, from \$600,000. Annual meeting, last Tuesday in October. The property was bought for 850,000 shares of stock.

Property: about 1,200 acres, in Barrie Twp., Frontenac county, Eastern Ontario district, 50 miles from Kingston and about 11 miles from Kaladar, the nearest C. P. R. R. station. Claims show conglomerate, quartzite and schist, reported to have a vertical interbedded, jasper vein, of the so-called "iron formation" 2' to 18' wide on the surface, with hornbende schist on the hanging to N. E. and conglomerate and quartzite to S. E., and a basaltic footwall. In 1918, company acquired the Big Dipper mines, a gold property of about 1,240 acres.

Development: by 403' shaft, with total workings of 2,000'. Crosscut at 400' is reported to have disclosed a vein of sulphide ore carrying galena and chalcopyrite with gold-silver values.

Equipment: includes three 100-h. p. boilers, two 1,000 cu. ft. compressors, a hoist, 20-stamp mill with amalgamating plates, tables and a magnetic separator. The mill capacity is about 200 tons a day. An electric plant was under construction at last account.

ORE EXTENSION MINING CO., LTD.**ONTARIO**

Address: Vineland, Ont., Canada.

Officers: David Fretz, pres.-mgr.; S. Spiece, v. p.; Geo. Laws, sec.-treas., with J. O. Moore and S. R. Lupton, directors, at last report.

Inc. November 1, 1913, in Ontario. **Cap.** \$1,500,000; shares 50c par.

Transfer office: 354 Hudson St., Buffalo, N. Y. Annual meeting, 2nd Thursday in January.

Property: 167 acres at Northbrook Lenox and Addington counties, said to show gold-silver-lead-zinc-copper ore, in six veins, from a few feet to 40' wide, in diorite and schist. Developed by a shaft 53' deep. A prospect.

ORR GOLD MINES, LTD.**ONTARIO**

Address: Kirkland Lake, Ontario, Canada.

Inc. 1917. **Cap.** \$3,000,000.

Property: the Orr claims, adjoining the Teck-Hughes and Lake Shore mines at Kirkland Lake. Under option to the defunct Kirkland porphyry from 1917-'20.

Development: by vertical shaft, 420' deep, with 4 levels. No. 1 vein, 300' long on the surface, is 400' on the bottom level. A 700' crosscut was driven on this level to reach a parallel vein which outcrops 575' to the south. Work has been suspended since the miners' strike of 1919.

OXFORD COBALT SILVER MINES, LTD.**ONTARIO**

Address: Woodstock, Ont.

Officers: A. H. Wilson, pres.; J. R. Shaw, v. p.; Geo. F. Mohon, sec.; with J. W. Russell, (mgr.) and A. T. McNeil, directors. E. A. Rea, treas.

Inc. 1919, in Ontario. **Cap.** \$1,000,000; par \$1; outstanding 590,000 shares. Annual meeting, Sept. 19, 1921. Assets as of Sept. 1, 1921 were \$526,316; liabilities \$452,151; cash \$617.

Property: 2 claims, 41 acres, in Coleman Twp., Timiskaming district, shows fissure veins containing silver, cobalt, and nickel. Also, 20 acres of the Waldman tract and 40 acres additional, both adjoining, acquired late in 1921, for 150,000 Oxford shares.

Development: by 153' shaft and 150' of crosscutting and drifting. A new shaft on the Waldman was down 75' in Jan. 1922, and had opened narrow

shoots of high grade cobalt ore in a wide fractured zone in the Keewatin formation. Planned to continue shaft to contact with underlying diabase.

Equipment: complete, costing \$10,900.

PALMER-PAINE MINING CO.

ONTARIO

Address: 405 Royal Bk. Bldg., Toronto, Ont. B. P. Paine, pres., Niagara Falls, Ont. **Mine address:** N. K. Morrison, supt., Gowganda, Ont.

Organized, 1919, to operate the T. C. 177 claim near the Miller Lake-O'Brien mine, which was formerly operated by the T. C. 177 Mining Co. Several veins are said to have been opened to a depth of 200' and low-grade silver ore found, though but little ore of commercial grade has been found.

Equipment: includes hoist, compressor and boiler.

PARAGON-HITCHCOCK SILVER MINES, LTD.

ONTARIO

Address: Collingwood, Ont., Canada. **Mine office:** Wabun, Ont.

Officers: Donald McKay, pres.; W. R. Hitchcock, v. p.; T. R. Gilpin, 2nd v. p.; David Melville, sec.; W. T. Herrington, treas.; E. H. Hitchcock, C. W. Pitt, W. A. Hamilton, R. Feigehen, J. P. Welsh (mgr.), directors.

Inc. May 22, 1917, in Ontario. **Cap.** \$2,000,000; par \$1; 990,000 treasury shares; 1,100,000 shares pooled with McKay as trustee. Annual meeting in February.

Property: 4 claims in Tudhope Twp., near rail, and 2 claims, 4 miles away, in Willet Twp., in Elk Lake area; total of 245 acres.

Geology: the 4 Hitchcock claims comprise a heavily-timbered, low-lying tract, with diabase showing as the only rock exposure. Four well-defined silver-bearing veins can be traced through this exposure. Four veins have also been uncovered on the Paragon group; the ore is quartz and calcite carrying fair silver values.

Development: on Hitchcock by 200' shaft with 2 levels; on Paragon by 160' shaft with crosscuts.

Equipment: boiler, hoist, and compressor at each camp.

PARRY SOUND COPPER MINING CO., LTD.

ONTARIO

Office: 500 Germania Life Bldg., St. Paul, Minn. **Mine office:** Parry Sound, Ont.

Officers: Frank Johnson, pres.; Otto Monson, sec.-treas.; preceding, with John Ogren, A. Linderholm and F. X. Benning, directors.

Inc. March 23, 1899, in Ontario. **Cap.** \$5,000,000; shares \$1 par; issued, \$4,500,000. Liabilities are given at \$45,000 floating indebtedness. Annual meeting, second Tuesday in August.

Property: the McGowan and Wilcox mines, 10 claims, 1,000 acres, one-half freehold and one-fifth held subject to a \$3,000 mortgage, on the eastern shore of Georgian bay.

The Wilcox mine has 4 parallel veins in a zone a quarter mile wide. The mine has a 145' shaft sunk on a 20' vein in granite-gneiss, traceable 1,000', carrying auriferous and argentiferous bornite, assaying 2.8 to 11% copper. There also is an opencut, 20x150', 18' deep, showing 3% chalcopryrite ore.

The McGowan mine has shafts of 100', 100' and 250', and a 150' cross-cut tunnel, showing bornite and occasional chalcopryrite, with quartz gangue. A smelter shipment of 240 tons of selected ore returned 17% copper and \$5 per ton in combined gold and silver.

Equipment: includes a 10-stamp mill, hoisting machinery and several buildings. Idlc.

PATRICIA SYNDICATE.

ONTARIO

Address: Boston Creek, Ont.

Property: a lease on the Boston Hollinger, 80 acres, in Pacaud Twp., Boston Creek area. Main vein of bluish quartz said to be 2 to 4' wide, and developed to a depth of 200'. Ore is free-milling and said to assay \$20 to \$22 gold per ton; it was treated in a 40-ton mill with a 92% recovery.

The plant was destroyed by fire in 1919 and after the death of C. A. O'Connell, the manager, the property reverted to original owners. Reported

4 acres underlying Peterson Lake at Cobalt, almost sur-
ings of the Nipissing Co.

iven by company, including those held by the Seneca-Su-
nes and Mercer Silver Mines, have expired.

t: the Peterson Lake area has been prospected through
1 3 and the Nova Scotia territory opened up; several veins
ound here, but to date commercial ore has not been found in
s. Extensions for 12 months ended May, 1920, totaled 253',
1921.

1 April 30, 1921, were 126,000 oz. of silver in mine and dumps.
: includes a 100-ton mill erected in 1918 to reduce tailings, but
d to be unprofitable on that scale; in 1919-'20, capacity was
0 tons and agreement made with Dominion Reduction Co. to
t a cost plus 35c. profit basis.

e: in 1913, 1,230,732 oz. silver; in 1914, 1,608,550; in 1915, 2,-
16, 11,204 oz. Mine in 1920 shipped 2,173 tons of ore with
er content. Peterson's share of 2 month's milling operations
concentrates carrying 5,436 oz. silver.

s litigation between the company and the Dominion Reduc-
tled in a judgment awarding to the company 250,000 tons of
erson Lake, derived from the company's ore, and valued at

mill was started Sept. 9, 1920, but because of the depressed
all operations ceased Dec. 18. For past 5 years company has
difficulty after another, but management apparently has perse-

g of 1921, stockholders were urged to take up preference shares.

W. Bain, J. H. Black, R. T. Shillington, W. H. Stafford and Denis Stairs, directors. T. S. H. Giles, sec.-treas.

Inc. Dec. 5, 1916, in Ontario. **Cap.** \$3,000,000; \$1 par; 475,000 treasury res. The Associated Gold Mines of Western Australia holds 667,700 res. Transfer agts., Security Transfer & Registrar Co., New York, and Fish and Colonial Land and Security Co., Toronto; the latter also registrar. Stock traded in on Toronto Stock Exchanges. At public auction New York on Dec. 22, 1920, 25,000 shares were sold at 8 cents each.

Property: about 160 acres, adjoining the Hollinger on the west, in Tisdale Twp., Porcupine area. Claims show several quartz veins, one cut on level reported to average 20' in width, with pay ore about 11' wide. Formation is amygdaloidal basalt.

Development: by 600' shaft, with recent work on the 400 and 600' levels.

Ore reserves: estimated to be 130,000 tons of \$9.50 ore.

Equipment: includes hoist, 2 compressors, hydro-electric and steam engine, and 100-ton mill, which employs the continuous decantation process. Is equipped with crusher, 6' Hardinge ball mill, classifiers, Dorr classifiers and Dorr thickeners.

Production: 15,134 tons of ore yielding 3,977 oz. gold in 1918.

Operations ceased entirely in July, 1918. Reported in summer of 1920 offer of Hamilton B. Wills to underwrite 600,000 shares, at average price of 31¾ c., had been accepted, but one block of 200,000 shares, at 15c. share only was issued. Funds are needed to sink shaft to 900' and to ease mill capacity.

Operations to be resumed about April 1, 1920.

RCUPINE WHELPDALE MINES, LTD. ONTARIO

Address: B. J. Simons, sec., 911 Royal Bank Bldg., Toronto.

Cap. \$2,500,000; \$1 par.

Property: north half of Lot 11 in Tisdale Twp., Porcupine, opened by 14' shaft and equipped with steam boilers, hoist, compressor, etc.

No recent information.

RT ARTHUR COPPER CO., LTD. ONTARIO

Address: 904 Bk. of Hamilton Bldg., Toronto, Ont. **Mine address:** Centre, Ont.

Officers: Fred M. Connel, pres.; J. F. Hewitson, v. p.; J. A. M. Alley, v. p.; W. H. Connel, mgr.

Inc. Dec. 6, 1916, in Ontario. **Cap.** \$2,500,000.

Property: the Hewitson mine at Shoal lake, Rainy River district, 4 miles from Mine Centre, developed by an inclined shaft.

Equipment: includes 100-h. p. boiler, hoist and 500' compressor.

The mine was a small producer in 1916, but apparently idle since 1918.

PREMIER PAYMASTER MINES CO. ONTARIO

Offices: Suite 402, 79 Milk St., Boston, Mass., and Rm. 209, 15 Front St., Reno, Nev.

Mine office: B. M. Walton, supt., So. Porcupine, Ont.

Officers: E. H. Walker, pres.; A. S. Fuller, v. p.-gen. mgr.; Frank G. Gault, sec.-treas., with J. A. Frohock and D. B. Pattison, directors.

Inc. July, 1920, in Nevada. **Cap.** \$2,500,000, \$1 par; assessable, 869,156 shares outstanding. A 5¢ assessment was called Jan. 1, 1921 and assessment of 3 of ten cents per share was payable Jan. 14, 1922. Metropolitan Trust Co., Boston, transfer agent; Old South Trust Co., Boston, registrar.

Is a holding company, owning all but 5 shares of capital stock of Porcupine Premier Mines, Ltd., which see. Stockholders of Porcupine Premier Mines, Ltd. (q. v.) had privilege to exchange shares on an equal basis for stock of Premier Paymaster.

Stock sales in 1922 were at 75¢ and later at \$1 a share. Company recently financed for all development planned in 1922.

Is an attractive speculation.

Inc. 1921 in Ontario. **Cap.** \$1,000,000; \$1 par; 500,000 shares given S. W. Barber, for the mine.

Property: Barber mine in Coleman Twp., near Latchford, developed by 2 shafts. Seven veins have been opened containing silver and cobalt.

Equipment: installed Oct. 1921, includes 2 boilers, hoist and compressor.

PROSPECTOR'S DEVELOPMENT CO., LTD. ONTARIO

Dead; see Vol. XIV.

QUEEN LABEL GOLD MINES. ONTARIO

Address: Kirkland Lake, Ont.

Officers: G. A. Wanless, pres.; David Goss, v. p.; V. W. Hattin, sec.; Harry Brannif, treas.; E. B. Wood, gen. mgr., with Chas. Hamblin, directors.

Inc. 1921 in Ontario. **Cap.** \$2,000,000; \$1 par.

Property: 160 acres, at Gull lake, Lebel twp., Kirkland Lake area, 1½ miles E. of the Tough Oakes. Reported Jan., 1922, that 4,000' trenching had exposed 6 veins. Vein No. 5 assayed \$1 to \$33 in gold and 37 oz. silver across 5'.

R. A. P. GOLD MNG. CO. OF BOSTON CREEK, LTD. ONTARIO

Address: Sun Life Bldg., Toronto, Ont. **Mine address:** Boston Creek, Ont.

Inc. Jan. 29, 1917, in Ontario. **Cap.** \$2,500,000; par \$1.

This company was incorporated presumably as successor to the R. A. P. Prospecting, Developing and Mng. Syndicate, which in 1915 was operating the R. A. P. mine in Boston Twp., Boston Creek area, under management of John Papassimakes, and in 1916 sold part of holdings to the Boston Creek Mng. Co. (q. v.), allowing the latter to use the R. A. P. shaft and plant. A disagreement between the companies caused the stoppage of operations. Reported that a consolidation would be effected, but no recent information received.

REDDICK GOLD MINING CO., LTD. ONTARIO

Formerly Dr. Reddick, Larder Lake Mines, Ltd.; property acquired in 1914 by Goldfields, Ltd., which see.

REEVES-DOBIE SILVER MINES, LTD. ONTARIO

Address: 426 Powers Bldg., Rochester, N. Y. or Martin H. Jacobs, Gowganda, Ontario.

Inc. June, 1917. **Cap.** \$2,000,000; \$1 par.

Property: in Milne Twp., Gowganda area, on which intermittent work has been carried on since 1908, and several shipments of ore and concentrates made.

Development: by open-cuts, the largest being 70' long and 16' wide, and by 200' shaft. Ore carries from 30 to 50 oz. silver per ton.

Equipment: includes steam power, stamps, ball-mill, and flotation plant of 45 tons daily capacity.

Late in 1920, company went into hands of a receiver and 213 bags of

concentrate in transit were seized to satisfy a judgment against the company for wages.

GENT MINES, LTD. ONTARIO

Address: Taylor St., Sarnia, Ont., or Ed. E. Oliver, supt., Elk Lake, Ont.
Property: Regent mine in James Twp., near Elk Lake. A shaft is being sunk on a 2' vein of silver ore.

LIANCE SILVER MINES, LTD. ONTARIO

Consolidated in 1919 with Hargrave Silver Mines, Ltd., to form Hargrave Cons. Mines, Ltd.

RENFREW MOLYBDENUM MINES, LTD., THE ONTARIO

Formerly Algonquin Devel. Co., with headquarters in Belgium.
Address: Renfrew, Ont. **Mine address:** W. M. Weigel, gen. mgr., Mt. St. Patrick, Ont.

Officers: Jean Vanophen, pres., 24 Rue Batalliere, Paris, France; A. E. Motte, v. p.; R. Le Aprohon, sec.; P. C. Neault, treas.
Inc. Dec. 8, 1913, in Ontario. Cap. \$1,500,000.

Property: in Brougham Twp., Renfrew county, shows molybdenite disseminated with pyrite and pyrrotite in pyroxenite in a limestone-pegmatite contact. One orebody said to be 40' wide and 600' long; molybdenite content of ore about 0.95%.

Development: by 2-compartment shaft, 150' deep, and 3 working levels.
Production: in 1916, 1,248 lb. of concentrate; in 1917, 57,254 lb. of concentrates from 3,656 tons of ore; in 1918, 35,561 lb. of concentrates.

Equipment: includes hoist, compressor, and mill with Elmore unit having capacity of 35 tons, with 95% extraction. Idle.

RIGHT OF WAY MINES, LTD. ONTARIO

Dead; see Vol. XIV. This company, incorporated 1909 as successor to the Right of Way Mng. Co., Ltd., became financially involved; J. P. Langley appointed receiver in fall of 1921, and property sold to Right of Way Syndicate, which see. Address of former company was care Jas. D. Cunningham, sec., Central Chambers, 46 Elgins St., Ottawa, Ont.

RIGHT OF WAY SYNDICATE ONTARIO

Successor in 1921 to Right of Way Mines, Ltd.
Address: Cobalt, Ont.; John Matheson, supt. Company sponsored by the City of Montreal.

Property: 3½ acres adjoining La Rose mine, by lease from the Government, and mining rights on 3½ miles of the right-of-way of the T. & N. O.

Under former companies, the mine produced a large amount of silver over \$550,000 was paid in dividends up to 1917. In recent years little ore has been found, but mine is said to contain some milling ore and a large quantity of other veins may prolong its life. It is developed by shafts to a depth of 465'.

ROCHESTER GOLD MINES, LTD. ONTARIO

Address: care J. N. Beckley, Rochester, N. Y. Reported that the mine has been taken over by Contact Bay Mines (q. v.); the non company is therefore presumably dead.

WINCO MINES CO. ONTARIO

Address: Rochester, N. Y.
Organized, 1919, to operate the Big Four group in the Gowganda silver belt. In developing silver-bearing veins, reported to have opened a pyrite vein, 22' wide and carrying 44% sulphur.

TRIPLE OPERATIVE COBALT MINES, LTD. ONTARIO

Succeeds Ruby Silver Mines.
Address: care P. J. Hart, sec., Cobalt, Ont. **Mine address:** No. Cobalt,

Officers: Clifford H. Moore, Cobalt, pres., with Dr. E. W. Mitchell, E. J. Armstrong, Kenneth McDonald and B. Hartly, directors.

Inc. 1920. Cap. \$1,500,000; \$1 par; 750,000 shares in treasury.

ST. ANTHONY GOLD MINES, LTD.**ONTARIO**

Office: 2 Toronto St., Toronto, Ont.

Officers: C. L. Campbell, pres.-mng. dir.; W. J. Boland, sec.-treas.; with Homer L. Gibson, Dr. A. F. Demary and J. F. Boland, directors, all of Toronto. Chas. Randall, mgr.

Inc. Sept. 19, 1921, in Ontario. **Cap.** \$3,000,000; \$1 par; 1,500,001 shares outstanding. **Bonds:** \$112,000 first mortgage, dated Sept. 30, 1921, due in 6, 9, 12 and 18 months. Transfer agt. and registrar, Security Transfer & Registrar Co., New York. Stock listed on New York Curb. Annual meeting, 2nd Tuesday in February.

Property: 7 claims, 400 acres, on Sturgeon lake, Thunder bay district, said to show several veins carrying gold values up to \$12 per ton, with an estimated ore reserve of \$1,250,000 in value. Equipment includes a 150-ton mill. Past production reported to be \$200,000.

Property has been leased for several years, the **Thunder Mng. Co.** (q. v.) operating the mine in 1918. Newly organized company is said to be financially equipped to properly operate the property.

SANDERSON KIRKLAND GOLD MINES, LTD.**ONTARIO**

Address: 207 Robinette Chambers, Toronto, Ont. **Mine address:** Kirkland Lake, Ont. Edw. Orser, mgr.

Property: 100 acres in Lebel Twp., Kirkland Lake area, near the Tough Oakes mine. Exploration was to begin spring of 1921.

SCHUMACHER GOLD MINES, LTD.**ONTARIO**

Head office: 85 Bay St., Toronto, Ont. **Mine office:** Schumacher, Ont.

Officers: F. W. Schumacher, pres.; F. L. Culver, v. p.; J. Y. Murdoch, sec.-treas.; H. E. Tremain and C. A. Covert, directors. T. J. Harwood, mgr.

Inc. July 16, 1914, in Ontario. **Cap.** \$2,000,000; \$1 par; 1,850,000 issued. Traded in on Toronto Stock Exchange. Price range 16½ to 30c. in 1920; 17½ to 35c. in 1921.

Financial reports for fiscal years ended 1920 and 1921 were not issued, but balance sheet as of Feb. 28, 1922, shows total assets \$1,940,903, of which current are \$10,588 and discount on shares, \$202,500; liabilities include current, \$27,648; reserve for depreciation, \$10,919. Surplus was \$52,335. Operating account, June 30, 1920, to Feb. 28, 1922, shows receipts, \$706, and expenditures \$15,697.

Property: the Schumacher mine, at Porcupine, adjoining the McIntyre on the W. for ¼ mile, and the Acme mine of the Hollinger Conso^dated for ¾-mile. Vein outcrops are numerous and extensive, occurring in an E-W. ore zone 1,000' wide. The No. 1 vein is traceable for 1,150', with width of 50 to 60'.

Development: to depth of 700', with about 12,000' of work at main or working shaft. Two orebodies cut on the 600' level by diamond drilling have not yet been mined. A second shaft was 400' deep in December, 1919.

Reserves: 99,425 tons, averaging \$6.78 per ton.

Equipment: includes 180-ton mill containing Hardinge and tube mills, and 300-ton continuous decantation cyanide plant.

Production: March 31, 1917, to March 31, 1918, 45,373 tons of ore yielding \$259,365. Output in the calendar year 1918 was 4,463 oz. gold from 19,098 tons of ore.

Reported refinanced 1922, and operations to be resumed.

SCOTTISH ONTARIO SYNDICATE**ONTARIO**

Address: Porcupine, Ont.

Property: in N. W. part of Whitney Twp., Porcupine area, shows E-W. veins in altered basalt. Vein filling is a mixture of calcite, tourmaline and quartz, carrying pyrite with associated gold. Developed to depth of 90'. Mine was to be reopened in summer of 1921, after an idleness of some years.

Officers: C. L. Denison, pres.; R. W. Pomeroy, v. p.; Geo. C. Miller,
A. W. Johnston and J. F. Thompson, directors Wm. C. Himrod,
.; D. L. H. Forbes, gen. supt.

Inc. April, 1913 in Ontario. **Cap.** \$4,000,000; \$1 par; 1,720,000 issued.
ls: \$600,000. Prudential Trust Co., transfer agent and registrar. Traded
Toronto Stock Exchange. Stock sales ranged 18½c. to 32c. in 1920;
to 17½ in 1921.

At a special reorganization meeting, Dec. 7, 1921, capital was increased
\$2,500,000 to \$4,000,000, 4 new being issued for every 5 old shares

Also a new issue of \$600,000 five year 7% bonds, plus \$35,000 cash,
authorized to take up old issue of \$500,000, due Oct. 1, 1920, but not
d, and on which defaulted interest was \$135,000. Shareholders had
irst, and bondholders the second, call on all unissued stock at 15c. per
s, the latter having privilege of paying in bonds.

Statement for year ended Aug. 31, 1921, shows an expenditure of \$291,-
including depreciation and depletion. Gross revenue was \$344,806,
ng net profit of \$52,840. Current assets were \$202,000 and current
ities, \$22,000.

Property: 115 acres, in Teck Twp., Kirkland Lake area, adjoining the
tt-Kirkland and Lake Shore mines.

Geology: the veins occur largely in porphyry and syenite. Ore is
l as shoots, between two prominent faults. It is composed of brecc-
l syenite, porphyry and quartz, and carries gold, pyrite, copper pyrite,
molybdenite. The gold content is erratic, but averages about \$10 per

Development: by 4 shafts, the main one being 600' deep, with over 11,-
of workings. Recent work is said to be encouraging, especially on 600'

Ore reserves, Sept. 1, 1921, estimated to be 98,000 tons averaging
per ton.

Equipment: hoist, 10-drill compressor, and milling plant, including ball
tube mills, cyanidation by counter current decantation, and Oliver

Property: includes the Gans and Red Jacket claims in Coleman Twp. Cobalt, and the North Dome property in the Porcupine area. Also com-
y has a lease on holdings of Ixion Mines, Ltd. (q. v.) in the Sudbury
rict.

Ore: at Cobalt, high-grade silver, containing arsenic and smaltite. Ore-
ts occur in veins where they cut contact of the Keewatin formation
a diabase sill. Pay ore is found in shoots.

Development: by 1,600' vertical shaft. During 1919, extensions at
alt were 2,283', and in 1921 to July, 1,316', but results of development,
1 in the Gans area from which much had been hoped, were discourag-
Earlier exploration of the lower contact was also unsatisfactory.

Equipment: includes a compressor for 20 drills, a Nordberg hoist with
rums and capacity of 2,500'. Electric power is hydraulically generated.
40-stamp mill is equipped with concentrating machinery and a 125-
flotation unit.

Production: 11,744,065 oz. of silver from 1907 to November 30, 1920.
yield in 1918 was 420,076 oz.; in 1919 243,037 oz.; in 1920, 243,029
silver.

Operations at Cobalt were suspended in November, 1920, and are not
ly to be resumed, although there is a possibility of developing medium
ie ore with silver above 70c. per ounce. Company is endeavoring to
other properties; but its coal land venture has apparently not been thus
successful, the Blue Diamond company reporting a deficit of over
,000 for first 18 months operations. See Vol. XIV for more complete
ription of Timiskaming.

ACKERAY GOLD MINES, LTD. ONTARIO
Address: 244 Bathurst St., Toronto, Ont. **Mine address:** New Liskeard.
Cap. \$2,000,000; par \$1.

Property: claim groups in Thackeray, Maisonville and James Twps.,
der Lake area, Timiskaming district. Also reported to own 250 acres
Lebel Twp., Kirkland Lake area. Company has apparently been in-
ve since Jan. 1, 1921.

WACHMAN MINING & MILLING CO., LTD.

ONTARIO

Office: Dryden, Ont. N. Wachman, mgr. Cap. \$500,000.

Company was organized in 1918, by Robert Wachman, 4439 So. Michigan Bldg., Chicago, Ill., to acquire 2,100 acres of mineral lands at Wabigoon lake, Kenora district.

Main vein of tract is said to be 4" to 3' and traceable 2,540', and to show silver and free milling gold ore for a length of 400'. Developed by 2 shafts, 3' and 100' deep.

Company said to have spent \$100,000 in development work. In August 1921, company was in financial difficulties and a share holders' committee was treating with creditors.

WAKENDA MINES, LTD.

ONTARIO

Address: 26 Adelaide St. W., Toronto, Ont. Mine address: Shining Tree, Ont. Jas. E. Day, pres.

Property: the Shining Tree mine in McMurchy Twp., Wasapika section of the West Shining Tree area, Sudbury district. Also, the Anzac mine in Tisdale Twp., Porcupine area, Timiskaming district. Ores are gold-bearing.

Company is apparently affiliated with the Miller-Adair Mines, Ltd.

WASAPIKA CONSOLIDATED MINES, LTD.

ONTARIO

Address: Geo. R. Rogers, pres.-gen. mgr., Bank of Hamilton Bldg., Toronto, Ont. Martin Fasset, supt., Shining Tree, Ontario.

Inc. 1920, in Ontario as a reorganization of the Wasapika Gold Mines and adjoining properties, old shareholders receiving 3 new shares for each old one held. Cap. \$6,000,000; \$1 par. In July, 1920, 2,000,000 treasury shares were offered at 10c each, "in view of the speculative nature of the enterprise."

Property: the Ribble group of 6 claims on the S. of Michiwakenda lake, West Shining Tree gold area, 20 miles N. E. of Westree on the C. N. Ry. contains a schist zone with quartz lenses, up to 4' wide, and irregular arrow veins of crushed quartz, cut by veinlets of pink calcite. Free gold visible. Surface sampling is reported to have exposed 800' of \$9 ore over 4 feet.

Development: by 200' shaft and several hundred feet of workings. In E. crosscut at 100' depth exposed on the footwall 5' of \$12 ore, and on the hanging wall \$3 to \$11 ore. The shaft cut the vein at 160'.

Equipment: steam power, hoist, sawmill, shop and camp. A 100-ton mill is planned.

WASAPIKA GOLD MINES, LTD.

ONTARIO

Listed in Volume XIV. Reorganized 1920 as the **Wasapika Consolidated Mines Ltd.**, which see.

WEST DOME CONSOLIDATED MINES

ONTARIO

Head office: 420 Traders Bank Bldg., Toronto.; Mine office: So. Porcupine Ontario. F. J. Hamilton, mgr.

Officers: Sir Henry M. Pellatt, pres.; Hugh Blain, v. p.; C. H. Manan, sec.-treas., with J. A. Murry, R. L. Baker & Co., and G. A. Stimson, directors.

Inc. 1915, in Ontario, to take over property and assets of the West Dome Mines Co. Cap. \$3,000,000; \$1 par; all issued. Listed on New York Curb and in Toronto. Security Transfer and Registrar Co., transfer agent.

Property: 176 acres, in Tisdale Twp., Porcupine area, adjoins Dome mine on W. Idle from 1912 to 1915, after fire destroyed many lives besides surface equipment worth \$75,000. Property shows a quartz vein open to depth of 1,800'. There are also 8 other veins as yet undeveloped.

Development: by 70° incline shaft, 365' deep, sunk on a quartz vein

183 acres, adjoining the Wasapika Mines, in the area, 20 miles N. E. of Westree on the C. N. Ry. that there are 15 veins on the property, all with richartz, which occur in schistose bands. The veins are dikes.

100' of stripping and 3 shafts, one being 100' deep.

Active prospect that requires further development.

RAIN SILVER MINES, LTD.

ONTARIO

N. Y. **Mine office:** South Lorrain, Ont. J. H. Hurd, jr., pres.; D. M. Steindler, v. p.; E. H. Westlake, J. H. Hurd, and T. L. Herrmann, J. H. Susmann, W. J. Maney, J. L. Mitchell and Herman Cook, directors.

and in some places 8'. Workings total about 100,000 tons in Ontario. **Cap.** \$1,500,000; \$1 par; outstanding, 1,500,000 shares. Kerr Lake Mines, Ltd. owns 150,000. Annual production in January. Bankers' Trust Co., New York, and Security Transfer Co., Ltd., Toronto, transfer offices; Security Transfer Co., New York, registrar. Listed on New York Curb. 1917, 1918, 1919, 1920, 1921, 1922, 1923, 1924, 1925, 1926, 1927, 1928, 1929, 1930, 1931, 1932, 1933, 1934, 1935, 1936, 1937, 1938, 1939, 1940, 1941, 1942, 1943, 1944, 1945, 1946, 1947, 1948, 1949, 1950, 1951, 1952, 1953, 1954, 1955, 1956, 1957, 1958, 1959, 1960, 1961, 1962, 1963, 1964, 1965, 1966, 1967, 1968, 1969, 1970, 1971, 1972, 1973, 1974, 1975, 1976, 1977, 1978, 1979, 1980, 1981, 1982, 1983, 1984, 1985, 1986, 1987, 1988, 1989, 1990, 1991, 1992, 1993, 1994, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022.

1920 showed total assets, \$1,506,172, including \$50,000 cash and \$5,640 cash, with a net surplus of \$89,090.

In 1913, owing to exhaustion of ore, and efforts to develop property practically abandoned.

The company's properties were operated under a Lorrain Syndicate, but no work was done in 1920.

GOLD MINES, LTD.

ONTARIO

and Lake, Ont.

Officers: Donald B. White, pres., care McGibbon Lumber Co., Sarnia, Ont., Garnet Hodgins, v. p.; Allan B. Reynolds, treas.; J. E. Lloyd, sec. Inc. 1921. **Cap.** \$500,000.

Property: 130 acres in Teck Twp., Kirkland Lake area. To be developed.

WHITE RESERVE MINING CO., LTD. ONTARIO

Address: 15 Toronto St., Toronto. **Mine address:** Latchford, Ont.

Officers: J. A. McAndrews, pres.; A. E. Marks, sec.; with S. B. Playair, directors. Leonard G. Smith, mgr., Haileybury, Ont.

Inc. June 17, 1914, in Ontario. **Cap.** \$1,000,000; par \$1; all outstanding.

Property: 3 claims, 2 patented, 130 acres, in Twp. of Whitson, Maple Mt. district, and 40 acres, in Twp. of James, both said to show fissure veins of diabase; silver, cobalt and nickel ore occurs in shoots of variable size and with a wide range of value.

Development: by several shafts, deepest 140', and total workings of 500'. No ore is mined as work is confined to development and exploration in order to block out ore reserves.

Equipment includes hoist and 9-drill compressor.

Beginning with fall of 1920, claims in Whitson Twp., have been under option to the **National Mng. Corp.** (q. v.) of England, which has been drilling the ground under direction of J. B. Tyrrell, of Toronto, with Chas. J. Fyfe, supt. The National company has a branch office at 802 Lumsden Bldg., Toronto.

WHITE ROCK MINING CO., LTD. ONTARIO

Address: Box 1,300, Sudbury, Ont. **Mine address:** Coyne P. O. Ont. Wm. McVittie, mgr.

Cap. \$1,000,000; par \$1; 450,000 treasury shares.

Property: the White Rock, or Saville-McVittie, claims in McMurchy Twp., Wasapika section of the West Shining Tree area, Sudbury district, adjoins West Tree holdings on S. E. A quartz vein from a few inches to 6' wide occurs in pillow lava, traceable for 2,600'.

Development: by 2 shafts, 1,000' apart, and some lateral work.

Equipment: includes small mining plant, 2-stamp mill and saw-mill.

WOOD-KIRKLAND CO. ONTARIO

Address: care Geo. W. Morres, 1118 Prudential Bldg., Buffalo, N. Y. **Mine address:** Kirkland Lake, Ont. J. Murphy, supt.

Inc. February, 1920. **Cap.** \$2,000,000; \$1 par.

Property: 300 acres, in Lebel Twp., Kirkland Lake district, developed by 100' shaft. Vein cut at 50' and 100' shows gold and silver values.

WRIGHT-HARGREAVES MINES, LTD. ONTARIO

Address: Kirkland Lake, Ontario.

Officers: Oliver Cabana, Jr., pres.; Edwin Lang Miller, v. p.-sec.; Gerard F. Miller, treas.; with Albert Wende (mng.-dir.), Oliver G. Donaldson, Ralph Hockstetter, Chas. G. Duffy and Harcourt Ferguson, directors. E. Grant, supt.

Inc. June 16, 1916, in Ontario. **Cap.** \$2,750,000; \$1 par; all outstanding. Transfers made by company; Chartered Trust & Executor Co., Toronto, registrar. Annual meeting, Sept. 6.

Balance sheet, Dec. 31, 1921, shows current assets, \$349,419, and liabilities, \$172,027. Gross earnings for 8 months of mill operation, \$486,282. Initial dividend of 5% paid Jan. 2, 1922.

Property: 4 patented claims, 152 acres, on most easterly point of Kirkland Lake, Teck Twp., Temiskaming district, N. E. of Lake Shore mine. First gold discovery in Kirkland Lake area made on these claims about 911. The mineralized zone can be traced for 2,400' in feldspar-porphry, with low values at surface, but enrichment taking place 400' deep. The main vein is 5 to 20' wide; ore value is \$15-\$16 in gold.

Development: by two shafts, 950' apart, but connected; total workings, 1,100'. Six thousand tons of broken ore available, Oct. 1, 1921. Four

levels have been opened and main shaft is being deepened; had reached 550' on Feb. 1, 1922.

Equipment: includes 100 h. p. hoist, compressor and a 150-ton cyanide mill completed fall of 1920.

Production: to Sept. 1, 1921, \$241,618 (about 5 mos.).

Work was suspended from mid-1919 to May, 1920, owing to a strike and general conditions; from that time until May, 1921, mine was generally idle awaiting completion of mill and headframe. Prospects are considered good.

QUEBEC

ALBERT COPPER CO. QUEBEC

Office: 25 Broad St., New York. **Mine office:** Capelton, Sherbrooke county, Quebec. Organized to take over the mining interests of the Nichols Copper Co. in Quebec.

ASCOT MINING CO. QUEBEC

A close corporation owning an old copper mine near the Eustis mine, in Ascot township, Sherbrooke county, Quebec. See Vol. XII.

BLACK LAKE ASBESTOS & CHROME CO., LTD. QUEBEC

In liquidation.

Directors: J. A. Jacobs, M. Arnado, Leon Schinasi, W. G. Ross, and John W. Cook.

Annual report for 1920 shows an operating profit of \$161,097, and a surplus of \$1,510 after deducting for depreciation, interest, etc.

Property: asbestos holdings at Black Lake and the Caribou chrome mine in the Coleraine-Caribou district. Work at latter definitely stopped in mid-1920, and plant dismantled in following year.

BRITISH MINERALS CORPORATION, LTD. QUEBEC

Address: 605 McGill Bldg., Montreal. **Mine address:** Amos, Que. S. E. Melkman, mgr.

Owens the Siscoe mine, located on an island in Lake De Montigny, Dubuisson Twp., Temiskaming county, 40 miles by river from Amos, on the National Transcontinental Ry. Mine shows quartz veins and stringers in diorite and greenstones. Veins are from 22' to 10' in width. Developed by shallow shafts, deepest 100'. An 8-ton sample assayed \$39.64 gold per ton. Property is considered worthy of exploration.

CANADIAN WOOD MOLYBDENITE CO. QUEBEC

Described in Vol. XIII. Property taken over, 1917, by Dominion Molybdenite Co., which see.

CANADIAN ZINC PRODUCTS CO., LTD. QUEBEC

Address: Eastern Twps. Bldg., Montreal. **Works address:** Notre Dame des Anges, Que. L. D. Adams, gen. mgr.

Operates a zinc oxide plant. Under same management as Zinc Co., Ltd.

DOMINION MOLYBDENITE CO. QUEBEC

Absorbed the Canadian-Wood Molybdenite Co.

Address: care W. J. Boland, pres., 2 Toronto St., Toronto, Ont. Harold Fisher, of Ottawa, is manager.

Inc. 1917. Cap. \$500,000.

Property: the Moss mine, near Quyon, Pontiac county.

Development: by opencuts, exposing molybdenite in reddish gneissoid granite. A 200' shaft has stopes connecting with the open cuts. The ore is principally finely disseminated in flakes of 1/2" or less, and is hand sorted. Present company did 12,000' of diamond drilling which is said to have blocked out considerable ore.

Equipment: includes 150-ton mill, using crushers, dryers, ball mills and Callow flotation machines. Ore containing as low as 1% MoS₂, gives 95% recovery.

ion: from March, 1917, to January, 1919, over 43,000 tons of been mined and milled. Mine was closed down in July, 1919, on the poor market for molybdenum.

MINING & MILLING CO.

: 903 Bk. of Hamilton Bldg., Toronto, Ont. **Mine address:** ue.

: Fred M. Connell, pres.; K. A. McPhadyen, sec.

7: the Huntingdon copper mine, 409 acres, in Bolton Twp., Brome e ore deposit is a well mineralized mass of greenstone between nd schist. The mineral is chalcopyrite.

ment: by tunnels. Company has a 250-ton flotation plant built 50,000 tons of ore on the dumps. Up to first week in February, ill had treated 6,000 tons assaying about 2% copper. Concen- shipped to Nichols Copper Co. The plant was closed down for ths in 1919, was reopened, and again closed, March, 1920. Mine o have a considerable reserve of low grade ore.

MINING CO.

Eustis, Sherbrooke county, Quebec. W. E. C. Eustis, 131 State Mass., pres., sec.-treas.; F. M. Passow, mgr.

8, in Quebec, and operated as a close corporation.

7: in Ascot Twp., near Sherbrooke, carries 4 parallel inter- es of cupriferos pyrite in talcose schist, crossed by diorite riferous belt being traceable for 2 miles. Lenses are 3 to 60' eraging about 2.5% copper, up to 60 cts. per ton in combined ver values, and 40% sulphur, but with considerable variations, ally carrying up to 50% sulphur. Footwall vein, or lens 4 to to 100' long. Main vein 20 to 60' thick, 100 to 120' long. Shaft 5' thick, 50 to 100' long. No. 1 vein 2 to 25' thick 20 to 120' wall and shaft lenses richest in copper, averaging 4 to 8% carry 2 1/4% copper with 42 to 48% sulphur. Property is producer of pyrite, for the sulphuric acid trade.

ment: the mine, opened 1870, and producing for 80 years, has cut tunnel, 1,000' long and a 3,450' incline with average dip of ouble skip tracks. The mine is dry, most of the water coming e and the upper stopes, but the limited quantity of mine water and contains copper in solution, which is precipitated as cement crap iron as it leaves the tunnel, through which it is conducted r. Mine is served by the Boston & Maine railway.

ent: includes a 150-h. p. electric hoist, good for 3,500' depth, rill, 2-stage air compressors, 1 run by steam and 1 by electricity. -ton mill, three-fourths mile from the mine, is connected there- electric tram, equipped with three 3-ton cars. The mill has a lectric equipment. Ore sufficiently rich for shipping is reduced , and concentrated ore is reduced to 1/8' size, by crushers and going thence to an 8-compartment classifier with spigots dis- 8 Wilfley tables. Middlings from coarsest tables are returned s and from finer tables, to the re-crushing department.

ore and concentrates are shipped to various acid works, and f for sulphur, the cupriferos cinder remaining being shipped to smelter, where it is treated for copper. Production was about of cupriferos pyrite yearly.

9) years continuous operation, mine was closed in March 1919, proved market conditions.

ZINC & LEAD CO., LTD.

: Guarantee Bldg., 285 Beaver Hall Hill, Montreal, Quebec.

: T. O. Lyall, pres.; J. C. Beidelman, v. p.-gen. mgr.; with Hon. 7 and P. D. L. Lyall, directors. E. A. Wright, sec.-treas.

and leases 400 patented acres, in Lemieux Twp., Gaspé, Gaspé peninsular. Examined in 1918 by Adhemar Mailhot. Well mineralized fissure intruded by quartz-porphry, and by later basic phalerite and galena in quartz and spar.

of drift and crosscut work, with tunnel entrance; now down 257'. Crosscutting on the 250' level; richer ore than the orebody exposed on the 100'. Machinery for a 400-ton mill was installed, from mine to railroad was to be completed in 1921. Was active in 1921.

MOLYBDENUM CO., LTD. QUEBEC

20. Formerly the Indian-Peninsular Mng. Co. Montreal, Cobalt, Ont., and 1011 Chestnut St., Philadelphia, Pa.

pres.; P. G. Grant, v. p.; with S. D. Wright, W. D. G. G. G., directors.

Capital \$1,000,000; \$1 par; all issued; non-cumulative; dividend payable on Friday before first Monday in September. Controls the St. Maurice Mines Co., Ltd.,

MINING CO., LTD. QUEBEC

A. Allard, sec.; J. P. Martin, mgr. Located in the Gaspé district, 40 miles by river from Amos, on the Gaspé Ry., consists of parts of lots A and 37, in Gaspé Twp., Temiskaming county. Shows a vein, 2 to 10' wide, exposed for over 700' by strip-

mining shaft with 75' of drifting on vein at bottom. Company built and operated a small experimental 10-ton mill to have yielded good gold value, but work was discontinued on account of financial difficulties.

CO. OF CANADA, LTD. QUEBEC

Head office, Black Lake, Quebec. Formerly the Gaspé mine, 250 acres in Coleraine Twp., Megantic county, Quebec, occurring in serpentinite.

Shaft, deepest 200', with workings on 90' and 190' levels, 100' in length with crosscuts each 50'.

Equipped with an electric hoist, compressor, and 100-ton mill. Concentrate assays 50% chromic oxide. Was active in January, 1921.

MAGNESITE CO., LTD. QUEBEC

Head office, 1000 St. Jacques St., Montreal, Quebec. Formerly the Gaspé mine, 250 acres in Coleraine Twp., Megantic county, Quebec, occurring in serpentinite. pres.; C. L. Higgins, v. p.; W. J. Phelps, sec.; L. N. Benjamin, A. W. Gifford, A. Letang, and all of Montreal. W. P. Boshart, supt., Calumet, Mich.

Capital \$186,000.

Located in Greenville Twp., Argenteuil county, said to have been active. Mining is by open-cut methods.

QUEBEC
A. O. Norton, pres. and mgr.; W. Jenkin,

freehold, except 150 acres, title covering only mining claims in Suffield, King, Silver Star, and Marrington mines,

in Ascot township, 7 miles from Sherbrooke, with railroads within 2 miles on either side.

The mines show 3 lenses, of 3 to 20' width, 1 proven to depth of 400', estimated by owner to average 4 to 5% copper, from a trace to 10% zinc, 5 to 25 oz. silver, and \$1.50 gold per ton. The King mine has a 165' incline shaft with about 500' of workings. The Suffield mine has a 350' shaft with about 1,200' of workings, showing ore assaying 3% to 4%, and combined gold and silver values of \$2 to \$12 per ton, with about 25% sulphur. The Marrington mine, 100 acres, 1½ miles from Suffield, and about 1 mile from Capelton is opened by a 260' shaft with about 400' of drifts, developing a lens about 75' wide at surface, said to carry at depth 5 to 7' of good ore. Little development work has been done since August, 1914, and no shipments have been made from the property.

Equipment: includes 100-h. p. boiler, a 50-h. p. hoist, compressor and 100-ton flotation mill. Property considered promising.

QUEBEC MEGANTIC COPPER CO., LTD.

QUEBEC

Address: Senator Pope, pres., care Quebec Legislature, Montreal, Que. Company inc. in 1921 and stock offered public.

Property: a copper prospect in Halifax township, Megantic county, Que., showing stringers of copper oxide in a zone impregnated with oxides. Developed by shallow shaft and by surface stripping, proving mineralization for several hundred feet.

ST. MAURICE MINES CO., LTD.

QUEBEC

Subsidiary of Indian Peninsular Molybdenum Co.

Office: W. E. Simpson, Cobalt, Ont., and 1011 Chestnut St., Philadelphia, Pa.

Officers: W. J. Haines, pres.; A. E. Doucet, v. p.; W. H. Storey, sec. treas., with W. E. Simpson, S. D. Wright, A. W. Porter, and P. G. Grant, directors.

Inc. June, 1916, in Quebec. **Cap.** \$750,000; \$100 par; all issued; non-assessable. Annual meeting, first Monday in September.

Property: 5 claims, 683 acres, at Indian Peninsula on Lake Keewagama Temiskaming county, 20 miles S. of Amos on the National Trans. Ry. Ore carries molybdenite and is treated in a 100-ton mill.

TETREAUULT MINE

QUEBEC

Address: 416 Power Bldg., Montreal. **Mine address:** Notre Dame des Anges, Que. Pierre Tetreault, owner; J. P. Tetreault, mgr.

Property: in Montauban Twp., Portneuf county, shows a narrow zone of highly altered limestone surrounded by amphibolites and schist with intrusions of gneiss and pegmatite. The ore is limestone carrying zinc and lead. Developed by shafts.

That portion of property under lease to the Zinc Company, reverted to Tetreault in spring of 1921.

WEEDON MINING CO., LTD.

QUEBEC

Office: 263 St. James St., Montreal. C. W. Cushman, supt., Weedon, Quebec.

In 1915 acquired the property of the East Canada Smelting Co., at Weedon from the Precious Metals Corporation of New York.

Property: 375 acres in Weedon Twp., Wolff county. Has produced 260,000 tons of cupriferous pyrite ore, mined for sulphur as well as copper in the last 8 years. Average assay is 3.3% copper, 40.8% sulphur, trace of lead, 0.77% zinc, 0.5 oz. silver, and 20c gold per ton.

Geology: ore occurs in two lenses in schist. Main orebody is 570' long and from 15 to 45' wide, with dip of 45° N. E., and course N. 37° E.

Development: by two shafts 700 and 900' deep, and 13 levels driven to the limits of the ore. **Reserves:** on January 1, 1921, were about 200,000 tons.

Equipment: 2 air hoists (60-h. p.), one 150-h. p. electric hoist, 2 com-

pressors (one electrically driven, 1,600 cu. ft. capacity), and all necessary buildings, shops, etc.

The zinc mine is developed by one 400' shaft. It is equipped with a 250-ton concentrating mill using tables, flotation unit, and magnetic separation. Produces zinc concentrates containing 42% zinc and lead concentrates averaging 60% lead, 65 oz. silver, and \$13 gold per ton.

Transportation: at copper mine $3\frac{1}{2}$ miles of aerial tram to railroad, costing 7c. per ton.

At zinc mine there is 4 miles of teaming. Mining costs at copper mine in 1916 including development and all overhead charges were \$2 per ton. Complete cost at zinc mine of concentrates, f. o. b. cars, was \$6 per ton of crude ore.

Production of copper in 1916, 5,640,000 lb. Mine output in 1919 about 80 to 100 tons daily, or 25% of that in 1917-18.

The copper mine was shut down May, 1921, after continuous operation since 1910. Reported that a fair amount of low grade ore is still available.

ZINC COMPANY, LTD.

QUEBEC

Address: 263 St. James St., Montreal. **Mine address:** Notre Dame des Anges, Que. L. D. Adams, gen. mgr.

Property: the Notre Dame mine in Montauban Twp., Portneuf county. The ores are zinc-lead. Work on the Tetreault mine, under lease, ceased April, 1921, and property turned back to owner.

Company under same management as Canadian Zinc Products Co.

SASKATCHEWAN

BEAVER LAKE GOLD MNG. CO.

SASKATCHEWAN

Mail returned, 1919, from Prince Albert, Saskatchewan, Canada.

Property: 32 claims acquired in 1914, from the Prince Albert Expl'n Co., on the north shore of Beaver Lake, 118 miles from Le Pas, the nearest R. R. point, on the Can. Northern Ry., out of Winnipeg.

On the Prince Albert claim, at the contact of the Huronian schist and Laurentian diorite, a 48" quartz outcrop can be traced for a considerable distance. A 70' incline shaft, sunk on the vein, is said to show a 4 to 5' vein averaging \$16 in gold and 2 oz. silver per ton. Probably idle.

YUKON TERRITORY

Gold is the outstanding metal in the Yukon, and practically all is derived from alluvial deposits. The estimated value of the gold production for 1921 is \$1,250,000, somewhat larger than the previous year. The grand total is \$173,780,000.

ALASKA CORPORATION

YUKON

Address: Carcross, Y. T. E. R. Wilcox, supt.

Property: 7 claims, 284 acres, the Big Thing group on Windy arm, Conrad district, 7 miles S. of Carcross, shows a fissure vein, 4' wide, in granite, carrying gold-silver ore. Developed by shaft and tunnel, with total workings of several thousand feet. Equipped with 2 boilers, hoist, 2 compressors, etc. Has been a producer.

ANACONDA MINING CO.

YUKON

Address: Whitehorse, Y. T. O. Dickson, mgr.

Property: 3 claims, 114½ acres, 3½ miles N. W. of Whitehorse, covering a granite-limestone contact. Copper ore occurs in lenses, with 15' maximum width. Developed by shallow workings.

Subsidiary of The North West Corporation, which see.
- CANADIAN KLONDYKE MINING CO., LTD.** YUKON
On November 22, 1917, the Granville Mining Co. (which see), the bond-holding company, applied for a receiver for the Canadian Klondyke Mining and Canadian Klondyke Power companies.
Address: Dawson, Yukon Territory. A. Baird receiver. F. P. Burrall, mgr.
- Inc.** March 5, 1913, in Canada. **Cap.** \$8,000,000 shares \$5 par; \$6,000,000 issued. When the receiver took over the property on January 5, 1918, total liabilities (excluding claims of litigants) were \$662,038, which included \$158,570 in wages. Balance sheet of December 31, 1918, showed current assets of \$506,900, and current liabilities of \$30,569; total assets, \$4,156,837. The profit and loss statement for the year showed a gross profit on operation of \$216,963. Gold returns were \$452,648, and total income was \$487,120; operating charges absorbed \$270,157. Net profit to surplus was \$44,570.
- Property:** 151 placer claims and hydraulic lease No. 18, about 26,000 acres, in the Klondyke valley, with total production to date of nearly \$12,000,000.
- In 1918, company operated 3 dredges which handled 4,300,910 cu. yds. at a total cost of 10.28c., and yield of 11.19c. per cu. yd., compared with a cost of 14.46c. and yield of 14.76c. in 1917, and cost of 14.22c. and yield of 14.21c. in 1916.
- Equipment:** includes 10,000-h. p. hydro-electric power plant 3 dredges with 17½ cu. ft. buckets, having a daily capacity of 10,000-16,000 cu. yds. Oxy-acetylene plant, electric furnace, and adequate shop equipment.
- COPPER KING MINE** YUKON
Address: Whitehorse, Y. T. J. P. Whitney, owner.
- Property:** 2 claims, 91 acres, ¾ miles N. W. of Whitehorse, covers a limestone fragment, 600'x1,200', surrounded and underlaid by granite. Orebodies, lenticular in shape and of 5' average width, occur in limestone; the ore carries bornite and chalcopyrite, with gold and some silver. Developed by tunnel and shaft; equipped with boiler, hoist and compressor.
- DOMINION MINING CO., LTD., THE** YUKON
Subsidiary of The North West Corporation, which see.
- EAGLE GROUP** YUKON
Address: care R. S. Ames, Dawson, Y. T. **Mine address:** Mayo, Y. T. B. C. Sprague, owner.
- Property:** 8 claims on Eagle gulch, ¼ mile from mouth of Dublin gulch, Duncan district. Ore is gold-bearing, assaying up to \$27.31. Developed by tunnel.
- GRAFTER COPPER MINING CO.** YUKON
Address: R. Lowe or J. P. Whitney, Whitehorse, Y. T.
Geo. Armstrong, E. A. Dixon, J. P. Whitney, Robert Lowe, and W. C. Pedlaw, owners.
- Property:** 1 claim, Crown-granted, 47 acres, elevation 3,822', 1 mile N. of the Arctic Chief, near Whitehorse, has a 7-mile wagon road to the terminus of the White Pass & Yukon R. R.
- Mine lies in an area of alternating bands of limestone and diorite, with aplitic cross dykes. **Ore:** consists of magnetite containing bornite and chalcopyrite, with a garnet-augite gangue. Ore is estimated to carry 8% copper and \$3 gold per ton. Mine opened 1900, but idle until 1907, has a shaft about 90' deep with 150' of workings, including some stopes nearly to the surface.
- Equipment:** includes steam power. Estimated 200 tons of high-grade

Operations resumed in 1915 and over 15,000 tons
d to Tacoma smelter since then. Idle 1920.

gen. mgr. at Grand Falls, Newfoundland. Is a Newfoundland Development Co., Ltd. covers about 2,500 sq. miles, held by 99-year lease, Newfoundland, surrounding Red Indian lake. The Han's River mine, about 5 miles W. of the lakes on schists in sericitic schists formed of volcanic grits, the dip is 51° E. and dipping about 30°. The mine has shafts of a 370' shaft with several levels, having long orebodies thus far found varies from 5 to 10' in horizontal, and 370' in downward extension. The ore is carrying 2.36% copper, 8.14% lead, 20.38% zinc, 1.50% gold per ton.

Developed on by W. H. Weed.

NEWFOUNDLAND
NE
 The mine is at York Harbour, Birchy Cove, Bay of Islands, on the bay, at elevation of 1,000' carries cupriferous ore of a fine-grained and close-grained with 2% to 4.5% copper and sulphur being valuable for the manufacture of acid. The main shaft sunk at an angle of 72° to the S. E., the dip of the ore lenses. Levels are opened at 60' and 120' on S. W. along the strike of the orebodies. The mine has a 250-h. p. steam plant, with a 50-h. p. Flory hoist and high-altitude air compressor. Company supposedly has been closed down for years.

MEXICO

The Mines had in 1921 a record of about 70,000 mining claims, 3,000 of these claims were subject to forfeiture under the Mexican mining law requiring such payments to hold title even to patented claims. The Republic as a metal producing country is shown by the following figures, issued by the *Iniciativa de la Rey* de

Metal Production of Mexico

1920	1919	1918	1917
\$15,265,568	\$15,248,575	16,824,700	9,000,000

occur at southern end of the Sierra de las Adargas, cut by dikes of porphyry and andesite. One of the orebodies is 600' in diameter and is high.

zed, but the ore usually occurs along the contact, mostly in limestone. carbonate ores of the upper levels run 15-30% lead, 12-30 ounces silver per ton, and 0.2 to 0.5 oz. gold. The deeper ores carry 55% lead and 60 oz. silver.

Development: by 450' main shaft and extensive workings. Unwatered in 1921. A power line 45 miles long is under construction and the property machinery reconditioned, 1922.

Employed between 100 and 250 men in 1921.

FRIC CORPORATION, LTD.

MEXICO, D. F.

Address: J. E. Frank, 23 Broad St. House, London, E. C., England.

Inc. Aug., 1920, as a reorganization of Cons. Mines of El Oro Ltd. **Cap.** 100,000; £1 par; 93,550 shares issued credited as 17s. paid in exchange for 1,100 fully paid £1 shares of Cons. Mines.

Property: 490 acres at El Oro, Mex., and additional holdings in Gold Coast Colony, Africa.

AGUASCALIENTES COPPER SMELTER

AGUASCALIENTES

Owned by American Smelting & Refining Co.

Office: 120 Broadway, New York. **Operating address:** C. L. Baker, mgr., El Paso, Texas. **Works address:** F. H. Peyton, supt., Aptdo. —A, Aguascalientes, Mexico.

Has an annual capacity of 480,000 tons.

AGUILA CONSOLIDATED MINING CO.

JALISCO

Address: 185 Summer St., Boston, Mass.

Mine address: Hostotipaquillo, Jalisco, Mex. **Chas. P. Bowker,** mgr.

Officers: D. E. Makepeace, pres., Attleboro, Mass.; E. B. Estes, sec.; A. Floyd, treas.

Inc. 1917, in Arizona. **Cap.** \$1,200,000; shares \$1 par. Company is a reorganization of the Aguila Amalgamated Mining Co., described Volume XI, which succeeded the Mazeppa Cons. Mining Co. Stockholders in the company were given the option of exchanging their holdings on a basis 1 share of new for each 5 shares of old and payment of 4c. per share of stock.

Property: the Aguila mine, near Cinco Minas, said to have a 600' shaft, 1/2 mile and over one-half mile of workings and to show ore assaying from \$0 to \$160 per ton, mainly in gold and silver.

Company not producing at last report.

AHUMADA LEAD CO.

CHIHUAHUA

Address: J. C. Greenway, Warren, Ariz.

Officers: L. D. Rickett, pres.; John C. Greenway, v. p.; H. C. Dudley, p.; John F. Bankerd, sec.-treas., with W. D. Thorton, directors.

Inc. March 4, 1921, in Delaware. **Cap.** \$1,000,000; \$1 par; 783,351 shares standing.

Property: 28 claims, 25 patented, 1056 hectares, in Los Lamentos mountains 42 miles E. of Villa Ahumada, Chihuahua, Mex. Company also owns the entire capital stock of the **Compania Minera de Plomo, S. A.**, and **Compania Minera de la Corona, S. A.**, also a majority interest in the **Union Mng. Co.**, which owns the **Compania Minera Erupcion y Anexas, A.** Ore occurs as mantas of silver-lead sulphides and carbonates in lime, averaging 30% lead and 5 oz. silver.

Development: by 2,200' of tunneling and incline shaft, with about 10,000' workings.

Mining is done by open stope method. Shipments to date total 15,000 tons of ore.

A 45 mile railroad is being built by the Erupcion and Ahumada companies to connect with the Mexican Central R. R., north of Villa Ahumada.

 a., a Mexican corporation.

es, including the San Enrique group adjoining the
 er groups, about 4 miles from Baca, in the Allende
 rtation over a standard-gauge line to the Cigarrero

de Almoloya is an isolated mountain range, about
 carrying limestone beds of the Comanche series of
 ctensively fractured by several systems of faulting,
 > 90 metres width, principal zones being the north-
 ge, of which the most prominent is the San Pedro
 W. system of Miocene age, which are the sources
 umbers, the most important orebodies occurring at
 faults. Lands adjoin the Cigarrero mine on the
 xtension of the San Pedro fault, proven by diamond
 n the 800' and 900' levels.

s been in pockets, in leached shear zones, carrying
 are expected to increase at depth, with about 30%
 d 8 to 80 grams gold.

l shafts, deepest 700', and 4 tunnels, longest 1,600'.
 nfinied to the San Enrique and Exploradora groups,
 id winzes, with 2 main and several shorter tunnels,
 orkings.

gasoline and air power, with one 15-h. p. and two
 urrent is to be used as soon as available.

e been almost entirely along the San Pedro fault
 th. Revolutionists practically stopped all work in
 tendent for ransom in April and stopping mail and
 k will be resumed when conditions are again stable.

* Deficit. ** No deduction made for depreciation, depletion and administration expense.

Of the 1916-'17 deficit, \$21,977 was assumed by Am. Eng. & Op. Co.; in 1918 and 1919, its proportionate share of the earnings was \$221,445 and \$213,067, respectively. During the year 1920 company retired all the outstanding 1st mortgage, 6% convertible gold bonds amounting to \$852,500.

Dividends: 3 payments of 50c. during 1920.

Property: 4 groups of mines 285 acres at Parral, including the Presena, Las Cruces and Palmilla properties, the latter including the famous Palmilla bonanza mine of Pedro Alvarado. The first two are old mines which were worked in former days by Mexicans. The ore occurs in fissure veins in andesite.

In 1920, company acquired a controlling interest in the **Silver Reef Cons. Mines Co.** and the **Utah Silver Reef Mng. Co.**, owning important properties in Silver Reef district, Washington county, Utah. Company also has an option on the Parral & Durango R. R.

Development: new work in 1921 totaled 4994' compared with 15,175' in the Alfarena 3-compartment shaft was sunk to the 10th level (1,126' to the Fontanena 550' shaft enlarged to 3-compartments and sunk 21.

anabena mine was equipped with electric power hoists, pumps, etc., mining begun 1921. The shaft 425' deep, is thought to have un-dermines of 20 oz. ore below the 185' level.

Equipment: includes 2,000' compressors two double drum electric hoists, pumps, a 1,200 ton mill with 600-ton cyanide plant, and 50-ton roasting furnaces are to be added during 1921. Employs 100 men. Electric power obtained from the Mexican Northern

Production:

	ORE TO MILL	Gm. Per Ton		Contents

.....	82,728	548.1	1.06
.....	118,383	570.1	0.79

Estimated by Franklin W. Smith in 1919 as 2,086,000 tons producing 9.2 oz. silver and 2,592,000 oz. probable ore averaging

operations were seriously hampered for several years by revolution, operations in 1916 being carried on for but 42% of the year. The Villista forces occupied Parral on November 5, 1916; the mill and mines, which they operated for 15 days, produced 100 tons of silver bullion; 96 additional bars were stolen and sold to the extent of \$300,000. Many of the office and operating buildings were destroyed. In 1916 and 1917, operations were stopped for 7 months out of 24. Since then, the mine has been in almost continuous operation, reaching 9.53, 9.28 and 9.12, respectively, in 1918, 1919 and 1920.

Company:

NAYARIT

1st Natl. Bank Bldg., Sunbury, Pa. Walter J. Pentland, President; Nayarit, Mex.

Barclay, pres.; J. I. Higbee, v. p.; C. A. Sidler, secy.; J. Quinn, Hon. John V. Teshler, Geo. L. Stearns and Dr. M. J. Tors.

Capital, \$1,000,000. Cap. \$2,500,000; \$1 par; 50,000 shares

Properties: Refugio, Animas, and Tres Estrellas mines in the Hos-

Refugio mine, 125 acres, was worked for 25 years by present owners, down to the 500' level. The main shaft is 15' to 15' with well-defined walls. Ore contains gold and silver to the value of \$15.00 per ton. The Animas property, owned by the Refugio and is apparently on the same vein, contains 20 ounces silver and \$3 to \$5 gold per ton.

Both mines are worked by means of tunnels, the Animas having no shaft. The Tres Estrellas property, 120 acres, is a small mine not been developed at depth.

Equipment: a 15-stamp mill and a 50-ton cyanide plant. Also a 50-ton roasting plant and compressors.

The revolution in Mexico has interfered with operations, and the mill has not yet been put into operation, although development at the mines continues. Employs 100 men.

AMAZON GOLD CO.**DURANGO**

Probably defunct. Formerly operated the Candelaria silver mine near Chacala, Durango. See *Cia Rest de Baca Ortiz*.

AMERICAN ENGINEERING & OPERATING CO.**CHIHUAHUA**

Controlled by *Alvarado M. & M. Co.*,

This company operated the Alvarado M. & M. Co.'s properties, under lease, paying a royalty of 30% on all ore extracted. The contract was cancelled in September, 1919.

Reported 1920 operating a property at Portola, Calif., adjoining the Walker mine of the Anaconda Copper Mng. Co.

AMERICAN-MEXICO MINING & DEVELOPING CO.**DURANGO**

Mine office: Velardena Cuencame, Durango, Mexico. W. H. Williams, mgr.

Inc. 1902, in So. Dakoto. Cap. \$3,000,000; \$1 par.

Property: in the Velardena district, Dgo., includes Los Libres mine, developed by 134' shaft and reported in operation to May, 1921. Shipments made to the smelter at Velardena.

Past history of company fully given in Copper Handbook, Vol. X.

AMERICAN SMELTING & REFINING CO.**CHIHUAHUA**

Operating office: Mills Bldg., El Paso, Tex. C. L. Baker, gen. mgr.,

J. R. Woodue, asst. gen. mgr., Walter M. Drury, mgr., Mexican Mining Dept., El Paso.

Extensive holdings in Chihuahua and elsewhere in Mexico are described under company's name in U. S. section of this book.

AMERICAN ZINC EXTRACTION CO.**CHIHUAHUA**

Address: Parral Hdgo., Chihuahua, Mexico.

A. E. Swain, mgr., at last accounts.

Property: the Tajo mine, and 100 ton mill near Parral.

AMPARO MINING CO.**JALISCO**

Office: 541 Drexel Bldg., Philadelphia, Pa.

Mine office: Etzatlan, Jalisco, Mexico. Jas. H. Howard, gen. mgr.

Officers: A. F. Bracher, pres.; W. H. Kister, and A. S. Miller, v. p.'s, with Henry Freund, J. H. Stopp, F. W. Stanton, Alfred Gratz, G. B. Reimensnyder, J. H. Scott, L. H. Adler, Jr., and C. K. Smith, Jr., directors. J. S. Williams, sec.-treas.

Mine Staff: Wm. Howard, asst. mgr. and mill supt.; Chas. A. Joyce, mine supt. W. R. Askew, chief engineer; Maj. A. F. Dick-Cleland, supt., of Explor'n Co. and the Canvada.

Inc. 1902. Cap. \$2,000,000; \$1 par; reduced from \$3,000,000 in 1907.

Financial Statement years ending December 31:

Year	Revenue	Net Profit	Dividends	Assets		Liabilities	
				Current	Current	Current	Current
1920.....	\$1,748,381	\$231,756*	\$400,000	\$1,104,101	\$79,854		
1919.....	2,146,605	494,878	360,000	1,307,179		
1918.....	1,707,197	308,595	300,000	1,470,256	174,710		
1917.....	1,220,964	178,065	320,000	1,293,455	517,850		
1916.....	1,297,236	456,970	400,000	1,377,538	428,056		

* Includes \$115,128 for depletion of mineral deposits. Net profit 1920 was \$114,416 which with surplus as of Jan. 1, 1920 totals \$1,421,596, less dividend of \$400,000, left surplus of \$1,021,596.

Dividends: as above, 3% Jan. 31, 1921; 2½% July 30, 1921.

Property: the Amparo group includes the Canada, La Union, San Juan, Amparo, San Domingo and Natividad mines, and Rancho Embocado of 4,390 pertenencias, 7 to 9 miles S. of Etzatlan, State of Jalisco.

San Domingo and Natividad mines, and Rancho Embocado of 4,390 pertenencias, 7 to 9 miles S. of Etzatlan, State of Jalisco.

Development: by general shaft to depth of 1,300'; also has an auxiliary shaft. New work in 1916 totaled 10,501'; 9,806' in 1917; and 13,690' in 1918. The orebody at 1,100' was good, but the shoot was very spotty on 1,300' level. In 1920, good ore was cut on the 1,600' level and a large tonnage of probable ore developed.

Ore reserves: of positive, probable and prospective ore have varied from 750,000 tons in 1908, to 472,350 in 1916; 481,572 in 1917; and 481,000 in 1918, only there is an increase in positive ore. Shrinkage stoping is practiced, resulting in reduction of costs. 439,000 in 1919 depleted 81,745 tons in 1920. Shrinkage stopes held 77,514 tons May 22, 1921.

Equipment: a 1,000 hydro-electric plant; machinery electrically driven throughout, including hoists, compressors, 65 drills, underground hoists, pumps, sorting plant, aerial tram, telephone line. The 500-ton mill contains crushers, 80 stamps, 6 tube-mills, concentrators, Dorr classifiers, Pachuca tanks, and 3 Oliver filters. The Merrill-Crowe vacuum system was installed in 1920, in the cyanide department.

Production:

Year	Tonnage	Silver, oz.	Gold, oz.	Extract., %	Total Cost
1920.....	149,518	1,258,985	27,176	87.2	\$9.03
1919.....	127,037	1,249,722	33,959	88.3	11.51

Operating costs in 1920 were \$9.03 per ton, compared with \$11.51 per ton in 1919. Tonnage crushed and treated in 1920 averaged 403 tons per day, compared with 355 in 1919. In 1921, for period Jan. 2rd. to May 22, mill ran 140 days treating 59,673 tons or 426 metric tons ore per day, that averaged \$9.71 per ton.

Company operated mill at capacity in 1921, employing about 1,000 men.

ANGANGUEO, NEG. MIN., DE

MICHOACAN

Controlled and managed by A. S. & R. Co., 120 Broadway, New York City.

Operating office: Mills Bldg., (A. S. & R. Co.), El Paso, Texas. **Mine**

Address: Anganguero, Mich., Mexico.

Operating staff: Alex W. Edelson, supt.

Property: the San Cristobal and Carmen silver-copper mines, near Anganguero, Mich.

Equipment: includes steam power, compressor and 150-ton concentration mill. Employs 175 men.

Output formerly 200 tons per day.

ANITA COPPER MINES CO., S. A.

SONORA

Office: Fundicion, Sonora, Mexico. Geo. M. Ryall, pres.; T. C. Kirkland, asst. gen. mgr.

Inc. 1904, in Mexico, as a subsidiary of the Douglas Copper Co. Now owned by Pacific Smelting & Mining Co., which see.

ANITA MILL

DURANGO

E. F. Knotts, owner and general manager, Guanacevi, Durango.

This custom plant at Guanacevi, Durango, has a 50-ton amalgamation concentration mill and flotation equipment. Mill has crusher, 15 stamps, ball mill and steam boilers. Employs 100 men normally.

ANTIMONY CORPORATION

HIDALGO

Address: Room 1210, 71 Broadway, New York City.

Officers: Chas. F. Rand, pres.; Jos. S. Fay and Olof Wenstrom, v. p.'s; Chas. F. Smith, sec.-treas., with Freeman Hinckley, Robt. A. Manning and Geo. Tyson, directors. Olof Wenstrom, mine mgr.

Inc. Feb. 15, 1916, in Delaware. **Cap.** \$1,000,000; shares \$5 par; 100,000 preferred; issued 10,000 preferred, 100,000 common, no bonds. Late in 1921, company acquired all the holdings of the Cortez Associated Mines, by stock

exchange, paying 1 share of Antimony for 4 shares of Cortez stock. The Cortez company's only property therefore is 68,770 shares of Antimony common stock.

Property: 48 hectares, 120 acres patented, Zimapan, State of Hidalgo, Mex., contains a large deposit of antimony ore carrying jamesonite, consisting of 50.8% lead and 29.5% antimony, and carrying silver. The occurrence is fully described by W. Lindgren and W. L. Whitehead, *Econ. Geol.*, July, 1914, p. 435, and R. W. Raymond, *E. & M. Journal*, January 2, 1915, p. 9.

Operations were suspended in April, 1917, due to bandits and excessive taxation. The great lead-antimony deposit mass does not seem to persist, but a silver-lead-antimony vein was disclosed, which would be valuable were it in the United States.

Cortez holdings: 1,079 pertenencias, 2,666 acres, in 4 groups, in the districts of Jacala Zimapan, and Ixmiquilpan, about 20 miles distant. The lands include the entire old mining camp of Jacala.

The Jacala property shows thickly bedded blue limestone intruded by granular monzonite with alteration along the contact and mineralization of the metamorphosed limestone by copper and silver-lead sulphides. The intrusive mass is $1\frac{1}{4}$ miles long and 700' wide. The contact zone carries numerous orebodies showing chalcopyrite and magnetite below the 300' zone of oxidization.

Careful exploration has shown that most of the ore-shoots are low in copper and carry but 1 to 3 oz. in silver. Main development is by the Cortez 1,770' tunnel, which has opened up about 35,000 tons of pyritic ore containing magnetite and chalcopyrite, the average copper contents being 1.72%. Several hundred thousand tons may possibly be developed here, and as the ore contains 50% iron, it will be valuable for a flux.

The Humboldt, Cortez, Abeja and Santa Maria show promise of making producing mines. The Humboldt has a magnetite-garnet outcrop, explored by the 1,304' Humboldt tunnel with drifts and a 130' incline winze, mostly in ore. The Santa Maria 394' shaft has developed a body of soft, leached copper-bearing gossan of 6,000 sq. ft. area. This shaft will connect with the Humboldt tunnel.

Small replacement deposits of silver-lead ore in limestone also occur at Jacala, but the Carmen mine is the only one of promise. This well-known producer, $1\frac{1}{2}$ miles north of Jacala, yielded 40 oz. silver-lead ore for many years. The mine workings are on the contact between limestone and porphyry and developed a replacement chimney of silver-lead ore in limestone, worked by an incline shaft to a depth of 900'. The company's new work has not yet cut the downward continuation of this ore shoot.

The San Nicholas group includes the Soledad and Ensino Largo mines. Zimapan lies in a broad, arid valley with the 4,000' deep Moctezuma canyon 9 miles west and the 3,000' deep Toliman canyon 6 miles west. The mines lie in the Toliman canyon and on the ridge between it and the Moctezuma river. The ore deposits lie around a large intrusion of monzonite porphyry either as contact deposits carrying copper, or silver-lead deposits in the surrounding limestone, especially along fissures and intrusive dikes. The latter form pipes, or chimneys, either vertical or inclined. The copper properties at this place are practically undeveloped, but a contact deposit showing disseminated copper pyrite, zinc blende and galena, promises to develop a large tonnage.

The mines have been closed down since 1913, owing to revolutionary disturbances, during which period all supplies were stolen and machinery destroyed.

ARADOS COPPER CO.

Address: Clarence W. Hoyt, pres., 185 Devonshire St., Boston, Mass.
Property: about 2,000 acres were taken over 1910 from Chihuahua Copper Co. and Quo Vadis Copper Co.

The Quo Vadis and other groups show numerous contact veins between

GUANAJUATO

J. Bryant, Apt. 86, Guanajuato, Mex.

s, in La Luz district, near Guanajuato, developed alling compressor plant and air drills. Shipping re in 1921:

AUGUSTIAS DOLORES Y ANEXAS, S. A.; NEG. GUANAJUATO

Office: Gilberto Luno, gen. mgr., Pozos, Guanajuato, Gto., Mex.

Address: E. Castelazo, mgr., Mineral de Pozos, Gto., Mex.

Property: the Augustias, San Francisco and Dolores mines, 360 pertenencias, carrying strong veins containing silver ore.

Equipment: includes steam power plant, compressor, and 200-ton cyanide mill. Employs 200 to 250 men.

AURORA SILVER MINES CORPORATION SONORA

Mail returned from last address: H. J. Schwartz & Co., fiscal agent, 25 Broad St., New York.

Officers: B. G. Warner, pres.; A. C. Bauer, v. p.; W. D. Murray, sec.; William Kinnie, treas., with George Greig and Charles Brophy, directors, at last accounts.

Inc. in Delaware. Cap. \$1,000,000; \$5 par; fully paid.

Property: a group of silver mines at Tecoripa, Sonora, Mexico, including La Aurora, La Providencia. El Pilar, and Aurora Anexas, 12 hectares, situated 20 miles from Cumuripa, on the Southern Pacific. Under Mexican ownership the mines produced rich ore.

Development: to depth of 400' and 60' winze. Four headings were in rich ore at last reports; with good shoots of milling ore. The main vein is 3 to 4' wide. Dumps contain 10,000 tons of \$34 ore, which it is estimated can be treated at \$8 per ton.

Equipment: steam power, hoist good for 1,000', and mill moved from another mine 18 miles distant.

AURORA Y ANEXAS, MINERA LA, S. A. CHIHUAHUA

Owns the Aurora mine, with 160 hectares, in the Cuchillo district, near Coyame, Chihuahua; and the Justicia copper mine, four miles east of Marquez station on the Kansas City, Mexico & Orient railroad. These properties were purchased from Don Francisco Diaz in 1908, by the late Ernesto Madero.

Owing to conditions in Mexico, it is impossible to get recent information.

Officers: Lionel W. Harris, chairman; Frank F. Fuller, sec.; Edw. Hooper and A. Glencross, directors. Hooper, Speak & Co., cons engs. 5 London Wall Bldgs., London.

Inc. March 6, 1909, in Great Britain. Cap. £100,000, in 1,000,000 priority shares and 1,000,000 ord. shares of 1s par; issued 500,000 priority shares and 978,429 ordinary shares.

Is a second reconstruction of Avino Mines of Mexico, Ltd., which was organized February 13, 1899, which was the successor of Alvino Syndicate, reorganized February 24, 1903, as successor of company of same name, Ltd. Present company took possession of property August 1, 1909. Stockholders of old company were given 1 ordinary share, par 1s, full paid, for each fully paid £1 share of the old company with the right to buy priority stock at par, share for share. After payment of 200% on priority shares. they rank equally with ordinary shares. Shares are listed on the London Stock Exchange.

Accounts for year ending June 30, 1920, show a profit of £1,398; cash and war loans, £6,078; ore on hand, £472; ore on dump, £2,081; debtors, £743; creditors, £694 debit balance, £12,210.

Property: the Avino, or Socovon silver-copper-gold mine, 166 acres, at Avino 10 miles from Gabriel, State of Durango, on the Mexican International railway, the nearest rail point.

The mine has a 900' shaft and 1,050' tunnel, with several large tajos or pits, one being nearly 400' in width and of considerably greater length. Ore is a complex mixture of auriferous and argentiferous lead and copper

SONORA

Office: A. O. Smith, sec., 80 Gracechurch St., London, E. C. 3, England.

Directors: G. A. Stockfield, chairman; A. Bulle and W. Blount.

Inc. Oct. 2, 1906, in Great Britain. **Cap.** £190,000 in 120,000 10% cum. preference shares, 5s. par; and 160,000 ordinary shares of £1 par; 87,500 preference and all ordinary shares issued.

Financial statement for period April 30, 1914 to April 30, 1920, showed mining expenditures, £13,987; development, £27,671; London expenditures, £10,937; debtors, £6,200; creditors, £9,363.

Property: 150 acres of gold and silver-bearing claims in the Hermosillo district. A concentrating mill and cyanide plant is available. Work was suspended in mid-1913, owing to revolutionary disturbances.

BATOPILAS MINING CO.

CHIHUAHUA

Address: 47 Cedar St., New York City. **Mine office:** Batopilas, Chihuahua, Mexico. John R. Harbottle, gen. mgr. in Mexico.

Officers: F. D. Merchant, pres.; N. F. Palmer, v. p.; W. M. Brodie, v. p.; L. H. Scott, treas.; E. W. A. Jorgensen, sec.-asst. treas., with Robt. M. Currier, Geo. W. Field, Gates W. McGarran, Jas. Marwick, Geo. Rowland, Edw. L. Stevens and Chas. F. Scott, trustees. Walter M. Brodie, 47 Cedar St., New York City, cons. engr.

Inc. 1887, in New York. **Cap.** \$9,000,000; \$20 par; 446,599 issued. Bonds: authorized \$1,000,000, 1st mtge. 6's, dated Dec. 1, 1887, for 15 years, outstanding \$366,500. Bonds were extended to December 1, 1927; interest has been paid to June 1, 1918. Shares listed on the New York and Boston Stock exchanges. Annual meeting, third Tuesday in April. Central Union Trust Co., New York, and State St. Trust Co., Boston, transfer offices. Farmer's Loan & Trust Co., New York and Old Colony Trust Co., Boston, registrars. Shares, sold, \$1 low, \$1¼ high in 1918; \$1¼ low, \$2 high in 1919; ½ low and 1¼ high, in 1920; ¾ low and \$1 high, in 1921 to June.

Dividend: one of 12½c a share was paid December 31, 1907.

Records at Batopilas were destroyed in 1916, but company hopes to issue financial statements by Jan. 1, 1922. Gross receipts from bullion sales were \$109,060 in 1920 and \$48,500 in first 6 months of 1921.

Property: concessions to 61 square miles of richly mineralized lands near Batopilas, in the Andres del Rio mining district, in the extreme southwestern part of the State of Chihuahua, Mexico. When 1913 began the company had titles in the silver zone for 2,137 acres, and in the auriferous zone, 20 miles up the river, for 140 acres. On account of the revolution it has been impossible to comply with the provisions of the contract covering what is known as the concession. Company surrendered all but 300 pertinencias believed to be the most valuable of former holdings.

Ore: native silver occurring with calcite in veins in diabase. The San Miguel property contains many veins, some of which have been worked for more than 100 years. The main veins are the San Antonio, Cancio, Cinco de Mayo, Diablo, Carmen, and Veta Grande now worked out.

The low grade ore from the San Miguel mine, which produces ¾ of silver output, averages about 10 oz., and that from the Porfirio Diaz Tunnel group about 7½ oz.

Development: over 10 miles of adit levels and 77 miles of workings. The principal mines are the Porfirio Diaz Tunnel on the Todos Santos Group, the San Miguel mine, El Escritorio, and El Camuchin. Work at El Escritorio and El Camuchin was unsatisfactory in 1913 and they were closed down. The P. D. tunnel is 7,200' long, and with extensions, 9,600'.

Equipment: two mills, viz; the San Antonio mill with 100 stamps and

ns, electric light plant and air-compressor, all run of furnishing 850-h. p.

contains a 25-stamp battery for high-grade ores, tinging pans, refining plant machine-shop, foundry, es, boarding house, etc.

the Batopilas River by means of a dam 764' long ig. The water after being used in the San Antonio the river and runs to the San Miguel Hacienda, ed by turbines.

Inc. May 16, 1885, in France. **Cap.** \$12,000,000; shares \$100 par. There are also 46,000 founders' shares. Is controlled jointly by the French house of Rothschild and the Banque Mirabaud, and owns a considerable share interest in the Compagnie d'Inguaran is exempt, until December 17, 1925, from all federal and local taxes, except stamp taxes; is exempt, until 1935, from export and import duties on fuel consumed: is exempt, until 1942, from custom duties and local duties.

Report for year ended Dec. 31, 1919, showed operating profit \$6,570,353; dividends absorbed, \$4,800,000; founders shares, \$1,147,013; directors percentage, \$101,776; to reserve, \$521,564. Total reserve funds, \$15,200,000. Profits for 1920 (11 months) were \$940,000. Balance sheet of Dec. 31, 1920, showed assets, (francs at par) \$9,060,000 which includes fixed assets, \$380,000; investments, \$540,000; acc'ts receivable, \$1,000,000; cash \$1,832,000; inventories, \$5,200,000; deferred charges, \$108,000. Liabilities, include capital stock, \$2,400,000; notes and accounts payable, \$1,060,000; reserves, \$2,440,000, profit for year, \$940,000.

Five per cent of the net profit goes into the reserve fund, 8% to the ordinary shares and 2% of the remainder to the directors. Of the balance then left, 77% goes to the ordinary shares and 23% is divided among 46,000 founders' shares. The result is that ordinary stockholders get 73½% of the profit, founder shareholders 19½%, and directors 2%.

Bond issue: \$1,000,000 8% gold debentures sold to an American syndicate in April, 1921, due \$200,000 annually, March 1, 1926-March 1, 1930.

Dividends: \$62.5 in 1901; \$62.5 in 1902; \$104.16 in 1903; \$135.41 in 1904; \$200 in 1905; \$312.5 in 1906; \$200 in 1907; \$25 in 1911; \$36 in 1912, with \$34.1 for founders' shares; \$35 in 1913, with \$21 for founders' shares; \$22 in 1914, with \$10.90 for founders' shares; \$40 in 1915, with \$24 for founders' shares; \$75 in 1916; \$40 in 1917; \$25 in 1918; \$40 in 1919.

Property: 11 groups; 20,000 hectares and 598,600 hectares grazing land, five steamships and stock interests in the Compagnie des Mines de Huaron, Soc. Minerais et Metaux and Compagnie d'Inguaran. The mines lie in three different arroyos at a distance of about 19 miles from the plant, the latter being at the port of Santa Rosalia, where a harbor has been enclosed by breakwaters built of poured slag. The ores are in the form of 3 "mantos" or bedded deposits, slightly inclined, resting on an extensive stratum of conglomerate. The predominant minerals are the oxides and silicates of copper, with many rare species, some containing antimony. The deposits dip at angles between 10° and 15° toward the sea, that is to the east. Water found at a shallow depth, is raised by large centrifugal pumps. The roof is soft and is subject to caving, which renders the problem of timbering the stopes somewhat difficult and costly. A force of 3,500 workmen is employed, and a population of 11,000 persons depends upon the operation of the property. The region is a desert, nearly destitute of vegetation, and incapable of cultivation. The ores comprise a remarkably varied series of oxidized copper minerals in which the metal occurs in combination with silver, lead, cobalt, manganese and other metals. The oxide is melaconite, more or less mixed with manganese and iron oxides; below water level covellite and copper glance occur.

Owned by Canario Copper Co.

Mail returned marked "Unknown" from former address: Room 23 First National Bank Bldg., Douglas, Ariz. **Mine address:** Nacozari, Sonora, Mexico.

Management: same as El Canario Copper Co.

encias, 877 acres, in 9 groups, in the vicinity of the mines, show several strong silver veins, with 1,911' an and Don Placido groups have dumps carrying claimed to average 4.65% copper, 62.2 oz. silver and shipments to El Paso smelter returned from \$82.98

minerals are peculiar to this deposit; boleite, an per and silver; cumengeite, oxychloride of lead and lorocarbonate of lead; spherocobaltite, a carbonate very-known oxidized ore of copper occurs here, as anganese and iron. Gypsum is abundant and native erals occur in an unctuous, decomposed tuff, locally

le beds, the upper averaging about 3' in thickness, he bottom, 2 to 10'. The middle bed carries oxide olitic concretions, known locally as **boleos**; hence The lowest bed, partly below in the water line, carll as oxides and carbonates. This bed, called No. 3, ce of ore supply of the property. It averages a inches up to 16' in different parts of the property, through the tuffs in thin, irregular veins, with clay ed concentration toward the bottom of each bed, nfact layers of 6 to 12".

Development: the mine is worked by tunnels 15 to 200 meters above sea level, and by 7 shafts, varying from 150' to 500' deep, with extensive underground workings.

Owing to the peculiar occurrence of the ore, drilling is done by hand, the ore is hand-sorted, and about half the output is machine-briquetted at a cost of only about 18 cents per ton, the argillaceous gangue serving as a natural binder.

Equipment: the mines have complete steam and electric plants, generating upwards of 2,500-h. p. from steam engines, of which 2,000-h. p. is transformed by two 500-k. w. 3-phase current generators and two 250-k. w. 3-phase generators. The Santa Rosalia electric plant furnishes power for hoisting, traction engines and a lighting system having 50 arc lights and a number of incandescent lamps. The climate is tropical, and the country extremely arid. Potable water is brought from a reservoir on the Yaqui plateau, through a 16,074-meter pipe-line, having pumps at Santa Agueda and Santa Rita. The mines and works are connected by a 30-kilometer private railway, equipped with 9 locomotives and 250 cars.

Compania del Boleo treats 1,000 metric tons daily, the ores averaging from 4 to 5% copper. There are 7 blast-furnaces in operation, with a capacity of 200 tons each per 24 hours. The ores are mainly oxidized and contain a large amount of moisture as delivered to the smelter. The products shipped are black copper assaying 93% in that metal and matte containing 63% copper.

The smelter handled 356,700 tons of ore in 1911; 360,000 tons of ore, yielding 12,650 tons of copper in 1912; 374,350 tons, yielding 13,000 tons copper in 1913; 324,000 tons, yielding 11,480 tons of copper in 1914; 317,000 tons, yielding 11,500 tons of copper in 1915; 290,000 tons, yielding 11,000 tons of copper in 1916; and 258,400 tons, yielding 9,225 tons metal in 1917; 263,700 tons, yielded 9,400 tons copper in 1918; 194,800 tons, yielded 8,000 tons copper in 1919; 3,527 tons copper in 1920 to (Sept. 30). In 1921, output was reduced to about 100 tons per month. Reserves of ore amount to 6 year's supply.

The company's policy of secretiveness concerning mine operations, together with its refusal to permit inspection by visiting engineers and geologists, has made it impossible to give detailed information concerning a unique ore deposit and its exploitation. The property is one of exceptional merit and has been ably managed for many years. About 1,300 to 3,500 men employed. Company has been able to continue operations uninterrupted despite revolutionary disturbances in Mexico.

BONANZA MINING CO. S. A.

SONORA

Office: Cananea, Sonora, Mexico.

Officers: T. Evans, pres.; C. T. Knapp, v. p.; Geo. Young, sec.-treas.; Casey Stites, asst. sec.-treas.; and R. E. Howe, directors. Is the operating Mexican corporation of the Superior Bonanza Mining Co., which see.

BUFA MINING, MILLING & SMELTING CO. SONORA

Office: 1030 Van Nuys Bldg., Los Angeles, California. Mine at La Bufa, Sahuaripa, Sonora, Mexico.

Officers: Wm. E. Richardson, pres. and gen. mgr.; H. A. Sibbet, v. p.; Baron W. Riley, sec.

Inc. 1902, in Arizona. Cap. \$1,500,000; shares \$1 par. Has paid 5 dividends, last being \$60,000, July, 1905.

Property: 123 acres, showing 6 fissure veins, 2 of which average 4' width, are opened by a 600' incline.

Ore: said to assay 10% copper, 10% lead, 4% zinc, 150 oz. silver and \$2.50 gold per ton. Values are in argentiferous tetrahedrite and copper sulphides.

Development: shafts of 300' and 600', and a 225' tunnel, with 8,000' of workings; 20,000 tons of high-grade ore said to be blocked out, with low-grade ore on the dump.

Equipment: includes a 120-h. p. plant, with hoists, air compressors and 7 power drills.

The 35-ton concentrator has a small sampling mill attached. There also is a 20-ton leaching plant. The smelter, at the mine, includes 10-ton and 25-ton reverberatory furnaces. Product is matte carrying 50% copper, 600 to 800 oz. silver and 1.5 oz. gold per ton, shipped by burro to Aguascalientes, via Guaymas, for refining. Production, 1906, was about 750,000 lb. fine copper.

Secretary reported in Feb., 1920, that mine had not been operated for over 10 years, due to the revolution.

Address: Chas. Butters, pres., 6272 Chabot Rd., Oakland, Calif.

Mine address: Paul Crawford, mgr., Copala, Sinaloa, Mex.

Property: a silver mine at Copala, 60 miles from Matzatlan, Sinaloa, Mex.

Equipment: steam-electric power, compressor, etc., with 400-ton mill, having 60 stamps, tube mills and cyanide department. Employs 150-200 men.

CADENA DE COBRE MINING CO. SONORA

Address: care C. A. McDonald, sec.; Bisbee, Ariz. Mine office: Sahuaripa, Sonora, Mex.

Officers: Emil Marks, pres.; C. H. Holz, v. p.; N. Newman, treas.; R. F. Koehler, J. Pennypacker and John Treu, directors; Arthur Houle, cons. engr.

Inc. Jan. 5, 1905. Cap. \$1,000,000; shares \$1 par.

Property: 83 hectares, in Los Chinos mountains, on the Yaqui river, shows iron outcrops up to 300' in width.

Development: by the 96' Bisbee tunnel, showing ore assaying 4 to 25% copper. Idle on account of revolutionary disturbances in Mexico.

CALERA MINING CO. CHIHUAHUA

Controlled by Howe Sound Co., 665 Fifth Ave., New York City. Mine office: Wm. J. Quigley, v. p.-mgr.; El Paso, Texas.

Inc. in New Jersey. Cap. \$200,000; \$1 par; 194,774 shares issued of which 172,857 are owned by Howe Sound Co.

Property: La Prieta mine, 3 claims, 140 acres, at San Isidro, Chihuahua, Mex. The ore is a silver-lead-zinc sulphide averaging 3-4 oz. silver per ton and amenable to flotation. The mine was under development until 1912, but has since been idle owing to revolutionary disturbances. Control

was acquired by Howe Sound company in November, 1920, and operations resumed, 1921.

Mill: 100-ton concentrator. Owns 6-mile narrow gauge railway line.

CANANEA CONSOLIDATED COPPER CO., S. A. SONORA

Is the Mexican operating company of the **Greene-Cananea Copper Co.** (q. v.).

CANARIO COPPER CO. SONORA

Address: care Cameron Michel & Co., 8 West 40th St., New York.

Officers: James P. Harvey, pres. and mgr.; F. O. Schellenberg, v. p.; T. M. Simonton, sec.; Jacob Schaefer, Jr., treas. **Directors:** James P. Harvey, F. O. Schellenberg, Wm. McDermott and B. A. Packard.

Inc. in Arizona, with capital of 2,000,000 \$1 shares; 600,000 issued; but re-incorporated in Delaware, with capital of \$20,000,000; shares \$10 par value; 800,000 issued. **Registrar & Transfer Co.,** New York, transfer agent. **Commercial Trust Co.,** New Jersey, registrar. The company owns all the capital stock of **El Canario Copper Co., S. A.** and **Mountain Consolidated Copper Co., S. A.** both of Mexico.

El Canario Copper Co.

Owned by Canario Copper Co., a Cameron, Michel promotion.

Address: Nacozari, Sonora, Mexico; and Room 23, First National Bank Bldg., Douglas, Arizona.

Management: James P. Harvey, gen. mgr.; J. E. Coker, supt.

Property: includes El Canario mine, 15 miles east; and the Lillie and the Lillie Segunda mines, 3 miles west of Nacozari, Sonora. El Canario adjoins La Caridad of the Moctezuma Copper Co. Geologic report of the Lillie made by C. H. Dunning, gives but little data on which to base an opinion.

El Canario ores carry enargite, and run from 2 to 18% copper, with some silver. The property is crossed by the El Caridad vein and two east-west cross-veins. An 800' tunnel, whose face is 500' below outcrop, has not yet cut the intersection of veins as planned.

The Lillie Mine has a vein from 40 to 60' wide, which consists of a replacement of limestone between quartzite, intersected and paralleled by acid-porphry dikes. The vein outcrops boldly for several thousand feet.

Development is by tunnels; No. 3 will gain a vertical depth of 600', and is expected to enter the ore-zone 500 to 600' from the portal, and 500' under the large high-grade ore stope above in the No. 1 tunnel. Thirty-three cars of high-grade ore have been shipped to the Copper Queen smelter at Douglas, Arizona, from surface workings.

The Lillie Segunda mine joins the Lillie mine on the south. The main 250' shaft on the north end of the orebody, encountered sulphide ore at a depth of 20' and extending to a depth of 100' where the foot-wall zone was encountered. The ore averaged 2.25% copper, with 1.75 oz. silver per ton. The 100' crosscut shows ore for 110' and was extended to intercept another oreshoot. The 250' level encountered commercial ore at a point 310' from the shaft.

Equipment: the main shaft is equipped with 60-h. p. hoist and compressor, capable of furnishing about 1,300' cu. ft. of air per minute. An air pipe-line has also been extended to the Lillie No. 3 tunnel.

The Lillie and Lillie Segunda mines embrace 278 pertenencias. A tunnel-site has been located on the east side of Lillie Segunda mountain, where an air-compressor and other machinery will be installed to drive a 3,000' tunnel to crosscut the Segunda orebody 700' below the surface. The tunnel-site is 1½ miles from Nacozari. Development is said to be highly favorable, and it looks as if the Lillie Segunda would make up for the disappointing results in other properties owned by this company.

Mountain Consolidated Copper Co., S. A.

Owns the Batamoti Copper mine 8m N. W. of Nacozari.
CARMEN COPPER CO.

DURANGO

Office: 316 W. 42nd St., New York.

Mine office: Mineral del Carmen, El Oro, Durango, Mexico.

Officers: Geo. Moeser, pres.; R. D. Kent, sec.-treas.; F. C. Alley, special agent. Louis Burgonia, supt., 2732 San Diego St., El Paso, Texas.

Inc. in New York. Cap. \$750,000; shares \$100 par.

Property: includes El Carmen mine, 160 hectares, and a considerable acreage of miscellaneous lands, 45 miles from Rosario, the nearest rail point.

The mine carries silver-bearing copper ores, with considerable development, said to have opened up 50,000 tons of 25 to 30 oz. silver ore.

Equipment: includes steam power, compressors and 100-ton mill with 40 stamps, 3 crushers and Frue vanners.

Operations resumed in 1920 after an idleness of several years. Employs 200 men.

CARMEN GUANAJUATO GOLD MINING CO. GUANAJUATO

Controlled by the Guanajuato Cons. M. & M. Co., which owns 51% of the issued stock.

Address: 52 Vanderbilt Ave., New York City.

Property: 48 pertenencias at Guanajuato, Gto. and a 10-stamp, 50-ton mill.

Closed down in 1920 owing to political disturbances.

CARMEN SYNDICATE SONORA

Dead. Was subsidiary of Proprietary Mines Co. Fully described in Vol. XIV.

Syndicate relinquished option on Carmen group, April, 1920. Property purchased by Florence Divide Mng. Co., which see.

CARNEGIE LEAD & ZINC CO. SONORA

Office: C. Peterson, sec., 701 Oliver Bldg., Pittsburg, Pa.

Mine address: H. Sinclair McKay, mgr., Cananea, Son., Mexico.

Officers: J. H. Sanford, pres.; D. T. Helm, v. p.; J. F. Edmonds, v. p.; R. B. Haverstick, treas., with E. M. Love, W. M. Henderson and C. W. Stilson, directors.

Inc. March 3, 1915, in Arizona; amended July 17, 1918. Cap. originally \$500,000; increased 1918 to \$1,000,000, and in 1920 to \$2,000,000; \$5 par; \$877,020 issued. Bonds authorized, \$250,000 first-mortgage, 10-year, 7%, dated October 1, 1917; \$244,000 issued. Registrar: Colonial Trust Co., Pittsburg. Stock transferred at company office. Annual meeting second Tuesday in June. Listed on Pittsburg Stock Exchange.

Company is a reorganization of the Calumet & Sonora Mining & Milling Co., described in Vol. XI.

Employs 500 men.
- CHIHUAHUA MINING CO.** CHIHUAHUA
Controlled through stock ownership by El Potosi Mng. Co., a subsidiary of the Howe Sound Co.
Offices: 655 Fifth Ave., New York City, and Chihuahua, Mexico.
Officers: E. B. Schley, pres.; W. H. Gelshenen, v. p.; W. J. Quigley, v. p.; W. J. Walworth, sec.-treas.; E. Richter, asst. sec.-asst. treas.
Inc. Jan. 8, 1890, in New York. Cap. \$600,000; \$1 par; outstanding, 387,806 shares. Stock transferred at company's New York office. Annual meeting, second Monday in January. Stock is closely held.
Property: in the Santa Eulalia district, Chihuahua, Mexico.
Ore: lead, silver, and zinc occurring as replacement deposits in limestone.
Development: by vertical shafts to a depth of 1,800'. Operations have been hampered by the revolution, though shipments of zinc ore were made in 1915 and 1916. No work was done in 1919, but shipments were reported in 1920.
- CHOIX CONSOLIDATED MINING CO., LTD.** SINALOA
Office: 516 Grant Bldg., Los Angeles, Cal. Mine office: Choix, Sinaloa, Mexico.
Officers: C. J. Heyler, pres.; A. M. McDermott, v. p.; J. R. Thomas, sec.; with A. E. Pomeroy and Richard Lamson, directors.
Inc. May, 1902, in Arizona. Cap. \$5,000,000; shares \$1 par; non-assessable issued, \$3,155,534. Is protocolized under laws of Mexico. Owns 45% of the stock issue of Los Platanos Development Co. Annual meeting, first Monday in October.
Property: 269 hectares, in El Fuerte district of Sinaloa and Urique district of Chihuahua. Orebodies are contact deposits between diorite and limestone and porphyry and limestone with fissure veins in granite and quartzite carrying gold and silver.
Shipments of 1,062 tons of ore to the Aguascalientes smelter, mine re-

turns of 19.5 to 28% copper, with gross values of \$127,915, and net value of \$47,940.

Company sold its smelter machinery and 1,000,000 shares capital stock to the **El Fuerte M. & S. Co.**, which is operating the mine under a 10-year lease. The Choix company receives 10% of the net proceeds of all ore smelted, as royalty.

CHONTALPAN Y ANEXAS, S. A., MINERA GUERRERO

Address: Harold W. Fowler, mgr., Zacualpam, Mexico, Mex. J. Cleveland Jones, supt.

Officers: Jules Lacaud, pres.; Felipe Laso, v. p.; Fernando Guinchard, sec.-treas. F. Dosal, treas., with R. A. Lacaud, Augustin Legoretta and Ed. Weyl, directors.

Inc. 1907, in Mexico. **Cap.** 350,000 p.; 25 p. par; 14,000 shares outstanding.

Property: 8 patented claims, 500 acres, at Tetipac, Guerrero, Mex.

Management estimates ore reserves at 2 years supply averaging 30 oz. per ton.

Development: by 218 meter shaft and tunnel 800 meters long.

Equipment: includes electric hoist, compressor, pump, 75-ton concentrating mill with 2 K. & K. flotation units.

The mine has been a regular shipper for several years.

CIENEGUITA CONSOLIDATED MINES SONORA

Office: 25 Broad St., New York. Is a reorganization of the Cieneguita Copper and Cieneguita Securities companies.

Officers: James F. Whitney, pres.; August Gauch, v. p.; R. C. Davenport, sec.; with Theodore Martin, Geo. D. Christy, and F. W. Hunt, directors.

Property: 1,100 hectares, about 40 miles S. W. of Sahuaripa, Sonora, is covered by rhyolitic rocks, mostly fragmental, cut by a diabase dike. The Chipiona and the Cargona groups lie close together and the Ostimuri-Tayapa group about 2 miles to the S. E. The rocks are cut by vertical veins, one reported to be from 3' to 50' wide, traceable 3 miles and to carry ore shoots averaging about 2½% copper and 40 oz. in silver.

Development: mainly by tunnels, one of 1,200' with 2 shallow shafts and a total of about 3 miles of workings. These workings are not sufficient to block out any large amount of ore, but show that the property has merit.

Equipment: includes 100-h. p. steam plant, a 6-drill compressor and all necessary mine buildings and houses for employes.

A small smelter has crushers and rolls, a 75-ton calcining furnace and two 50-ton reverberatory furnaces, burning wood. Smelting plant inadequate and poorly adapted for the ore. Idle, pending restoration of peace in Mexico.

CINCO MINAS CO. JALISCO

Offices: 46 Cedar St., New York; 1026 Citizens National Bank, Los Angeles, California.

Mine address: Magdalena, Jalisco. Geo. F. Zoffman, mgr.; W. A. Grassie, gen. supt.

Officers: James W. Gerard, pres.; Marcus Daly, v. p.-treas., T. D. McCarthy, sec., with Mrs. J. W. Gerard, and H. E. Crawford, directors.

Inc. March, 1910. **Cap.** \$500,000; \$100 par; all issued. **Transfer office:** 61 Broadway, New York.

Property: in the Hostotipaquillo district of Jalisco. Examined by John B. Farish.

Geology: deposit is a fissure vein with andesite hanging and dacite footwall; it is 10 to 40' wide, dips 65° S.-W., and has a N. 45° W. course. Ore shoots are 500 and 250' long by 25 and 20' wide. Ore is a sulphide assaying 12 oz. silver and \$2 gold per ton.

Development: by 900' vertical shaft and 1,000' of tunnels. Workings aggregate 35,600'. Reserves are estimated as 500,000 tons. Mining is by overhand stoping and back filling.

Equipment: electric power, 500-h. p. hoist, compressor, pump, tram and 500-ton concentration and cyanide mill, containing 30-stamps, 5 tube mills and 2 ball mills, etc. Employs 500-600 men at mine and mill.

No production figures are obtainable, as mine is privately owned, but mine and mill were operated to full capacity in 1921.

COAHUILA MINING & SMELTING CO., LTD. COAHUILA

Office: 614 Penobscot Bldg., Detroit, Mich. **Operating office:** Apartado 72, Monterrey, N. L., Mexico. **Mine office:** Jimulco, Viesca, Coahuila.

Officers: H. T. Ambrose, pres.; Frank J. Llewellyn, v. p.; Walter E. Parker, sec. and gen. mgr.; Archibald Cattell, treas.; preceding, with J. Kirby, Jr., Sidney B. Cohn and C. F. Jennings, directors; J. C. Treadwell, supt.; Alex McCormick, mine supt.; Harry Reed, mill supt.

Inc. January, 1902, in Mexico. **Cap.** \$500,000 gold; shares \$1 par; non-assessable, fully issued.

Dividends: 10% in 1902; 6% in 1904; 29% in 1905; 30% in 1907; 10% in 1909 and 16% in 1910, a total of 101%, or \$505,000. Annual meeting, first Wednesday in February.

Property: comprises holdings in the Mapimi, Viesca and San Juan de Guadalupe districts, containing the (1) Santa Maria, Sultana, and other mines at Jimulco, carrying copper and lead ores, opened by a 700' main shaft, and a 1,000' main tunnel, with steam and electric power; (2) the Alberto mine, in the Mapimi, district was said to have made regular shipments of high grade ore to the Mapimi smelter, 1910; (3) a 250-ton smelter, with steam and electric power, connected with the mines by rail, idle since 1909. The revolution in Mexico practically stopped all mining in Coahuila.

COBRE MEXICANA, S. A., COMPANIA SONORA

Address: care Copper Exploration Co., 8 W. 40th St., New York City. Inc. 1919, in Mexico as operating company of **Copper Exploration Co.**, which owns 80% of the authorized \$10,000 capital stock.

No record of holdings or operations available.

CONCHO MINING CO. CHIHUAHUA

(Compania Minera de Concho, S. A.)

Succeeds Naica Mining Co.

Address: Jose Estrada Otamendi, pres., Naica, Chih., Mex., or Jose Bovro, cons. engr., Naica, Chih.

Property: the San Francisco, Dolores and Toledo mines, yielding silver-lead ores.

Equipment: includes gas and electric power, etc. Employs 250 men normally.

CONS. MINES OF EL ORO, LTD. MEXICO, D. F.

L. N. Billson, liquidator, 23 Broad St. House, London, E. C. England. Reorganized 1920 as **Afric Corporation, Ltd.**, which see.

CONSOLIDATED SONORA MINES CO. SONORA

Address: C. P. Shaver, sec., care Bank of Thibodaux, Thibodaux, La., who says nothing has been done at the mine near Fronteras since 1914. See Vol. XIII.

CONSTANCIA, S. A., CIA. MINERA LA COAHUILA

Address: S. F. Shaw, gen. mgr., Apto. 2, Esmeralda, Coah., Mex.

Inc. 1879, in Coahuila. **Cap.** P. 32,000; par P. 32.

Property: the Esmeralda, Deonea, Guadalupe, San Salvador and Blanca silver-lead mines.

Equipment: complete with steam power, hoists, compressors, etc. Employs 250 men.

CONTINENTAL MINING CO. COAHUILA

Mine office: San Antonio, Texas.

Officers: Otto Wahrmond, pres.; C. T. Priest; San Antonio, v. p.; S. G. Newton, sec.

Inc. April, 1905, as a reconstruction of Continental Copper Co. **Cap.**

\$1,000,000; shares \$10 par. Is closely allied in ownership and management with the Jimulco Mining Co.

Property: the Panuco mine with 65 hectares, opened in 1700 and worked at intervals since. Property was bought from the Panuco Copper Co.

Ore: deposit is a chimney of breccia, cemented by metallic sulphides, mainly chalcocopyrite, but with a little chalcocite, in a quartz gangue, the country rock being granite. The ore is reported to average about 3½% copper.

Company owns a 40-mile railway, from Monclova to Panuco. Old company invested about \$1,000,000 in the property and improvements. Largest production, under former ownership, was 1,466,059 lb. copper in 1902, and a small production was secured, July-November, 1907, by present company, estimated at 1,250,000 lb. copper. Mine considered promising, though low in grade, and management good. Closed down since 1913, on account of danger to life and property by revolutionary bands.

CON VIRGINIA MINE

SONORA

Address: Ygnacio Soto, Douglas, Ariz., owner. Was under option in 1919-20 to Shattuck Arizona Copper Co.; relinquished Jan. 1, 1921.

Property: 246 acres in Sierra Madre Mnts., E. of Moctezuma and within 4 miles of Chihuahua state line, show a vein 28' wide. The ore carries silver and a little gold; silver value is 5 to 35 oz. at surface, but apparently does not continue with depth. Shattuck company did 700' of work.

COPETE CONSOLIDATED COPPER CO.

SONORA

Office: 15 William St., New York.

Officers: Wm. T. Read, pres.; F. C. Hanford, v. p.; Myra B. Martin, sec.-treas., with Ralph Melczer and John C. Morrow, directors.

Inc. March, 1906, in West Virginia. Cap. \$1,000,000; shares \$1 par, non-assessable; issued 549,170½ shares. Annual meeting, first Wednesday in March.

The company was organized to develop the property owned by the Melczer Mining Co., legalized in Mexico, the entire stock issue of which is held by the Copete Consolidated Copper Co.

Property: 70 pertenencias, comprising the Last Chance, Copetito, Jalisco, Santiago, and El Copete claims, about 173 acres, at El Copete, Sonora, shows an immense gossan capping, apparently the remnant of a great blanket vein, the greater part of which has been eroded away.

Development: by several tunnels and a 615' shaft with about 7,000' of workings. Ores are mainly low-grade copper with considerable iron pyrite, gold and silver, giving average assay value of \$6 per ton. The bottom of the ore zone seems to have been reached at about 300'.

It is believed that the officers now in control of the company will use every effort to bring the enterprise to a successful issue and the past may be considered a closed chapter. Those interested in the very interesting history of the company will find it given in Vols. X and XI, The Copper Handbook.

Idle on account of the revolution.

COPETE MINING CO.

SONORA

Office: 15 William St., New York. Myra B. Martin, sec.

Inc. 1900, in West Virginia. Cap. \$5,000,000; shares \$5 par. Owned stock of the Melczer Mining Co., transferred, 1906, to Copete Consolidated Copper Co., which see.

CORI GOLD MINES CO.

NAYARIT

Address: L. E. Whicher, 25 Broad St., New York City.

Officers: L. E. Whicher, pres.; Raymond Guyer, v. p.; R. M. Atwater, Jr., treas., with John Costin, H. G. McNair and E. G. Thomas, directors. S. L. Sherman, sec.

Inc. 1921, in Delaware. Cap. \$2,000,000; \$1 par; 500,000 outstanding. Organized as a holding company for the Compania Minera de Cori, incorporated in Mexico. Cap. 5,000 pesos.

Property: 4 groups, 300 acres, adjoining El Tigre mine, 6 miles from Huajicori in district of Acaponeta, Nayarit. Tract contains a quartz vein in andesite, 4-20' wide, running N.-W. with dip 35°, and containing gold-silver-lead ore. The main vein has been opened at surface over a distance of 2,000'. Rich ore occurs in pockets. Mine is credited with past production of \$2,000,000 in gold from shallow workings.

Development: by 50' shaft and 200' adit on vein.

Equipment: includes 10-ton mill, 50-ton crusher, 10-h. p. gas engine.

CORONA CONS. MINING & MILLING CO.

CHIHUAHUA

Address: Parral, Hidalgo, Chihuahua, Mex.

Is holding company for Mexican corporation, La Compania Min. Corona,

S. A.

Officers: N. P. Wilson, pres., Denver. M. E. Peters, sec.

Cap. \$1,750,000; par \$5; \$427,500 in treasury.

Property: Dudosa and other claims, 35 hectares, next to Palmilla mine, 3.5 miles from Parral, Chih.

Development: 1,500' shaft with drifts on San Cristobal vein and 400', 750' and 300' incline shafts opening 9' of shipping silver ore on San Cristobal at 500' with 22' of \$5 ore on 640' level.

Equipment: steam power, hoists, compressor, etc.

CORTEZ ASSOCIATED MINES

HIDALGO

Office: 53 State St., Boston, Mass.

Mine office: Jacala, Hidalgo, Mex.

Officers: Joseph S. Fay, pres.; Olof Wenstrom, v. p.; Freeman Hinckley, sec.-treas.; preceding officers, B. Nason Hamlin, Robt. A. Manning and Philip W. Wrenn, directors.

Inc. Jan. 3, 1910, in West Virginia. **Cap.** \$1,500,000; shares \$3 par; non-assessable; \$825,000 issued. Boston Safe Deposit & Trust Co., transfer agent. Stock traded in on the Boston Curb. Annual meeting first Tuesday in March. Company began business with \$272,000 cash, and early in 1919 had about \$1,500 cash, plus its holdings in the Antimony Corporation, (40,000 shares, or 80% of the issued common stock). Balance sheet of Dec. 31, 1920, showed \$596 cash.

Late in 1921, the directors transferred the entire holdings of the company to the Antimony Corp'n., on a basis of 4 for 1, giving the Cortez 28,750 additional Antimony shares and thus avoiding the total loss of the mines through non-payment of taxes. See Antimony Corporation for description of property.

CUATRO SENORES, S. A. CIA MIN.

CHIHUAHUA

Reported to have a lease on the property of the La Vigas Mining Co., at San Sostenas, Coyame, Chihuahua.

CUBANA CONSOLIDATED COPPER CO.

SONORA

Mine near Arizpe, Sonora, Mexico.

Inc. Jan. 6, 1903, in Arizona. **Cap.** \$500,000; shares \$1 par.

Lands: 244 hectares, bought for \$20,000; show 6 orebodies of 4' to 20' width, of which 3 carry estimated values of 12% copper, 10 oz. silver and \$2 gold per ton.

Development: 6 shafts, deepest 102', and a number of tunnels, longest 250' and 575', with a total of 1,415' of underground openings. Mine is about 30 miles from Cananea. Sample carload smelter shipments returned 23% copper, with fair gold and silver values. Property considered promising, but idle at last accounts.

CUCHARA MINING CO.

NAYARIT

Mine address: Acaponita, via Nayarit, Tepic, Mexico.

Address: Lacy Manufacturing Co., 601 Washington Bldg., Los Angeles, Calif. **Officers:** Wm. Lacy, pres.; Roscoe Kennedy, sec.

Inc. 1902 in Calif. **Cap.** \$1,000,000; \$10 par.

Property: a large and well developed mine credited with a production of over \$1,000,000 and reported to have as much more in sight in present reserves.

CUSI-MEXICANA MINING CO.**CHIHUAHUA****Address:** Wm. N. Fink, Chihuahua, Chih., Mex.**Property:** the San Miguel silver-lead-copper mine, opened by shafts and drifts.**Equipment:** includes steam plant.

Employs 50 to 100 men when operating.

CUSI MINING CO.**CHIHUAHUA****Office:** 144 South Wabash Ave., Chicago, Ill.**Officers:** O. A. Wright, pres.-treas.; A. C. Honore, v. p.; E. J. McGowen, Jr., v. p.; R. E. Mauntz, sec.**Property:** the Promontorio mine and other claims at Cusihiuriachic, Chihuahua, Mexico, showing veins of silver-lead ore.

Company is operated as a close corporation, with only 4 stockholders. no details available.

DEMOCRATA CANANEA SONORA COPPER CO.**SONORA****Office:** Fourth National Bank Bldg., Cincinnati, Ohio. Mine at Cananea, Sonora, Mexico.**Officers:** H. H. Hoffman, pres.-treas.; C. E. Hoffman, v. p. and gen. mgr.; H. W. Santen, sec.**Inc.** May 8, 1905, in Arizona. **Cap.** \$3,000,000; shares \$10 par; issued \$2,869,970. Central Trust Co., registrar. Annual meeting, last Tuesday in May.**Property:** 18 hectares, 44.5 acres, lying between the Copete and Veta Grande, in the heart of the Greene Cananea mines. Oreboddy is of contact metamorphic origin, consisting of a breccia of fragments of altered limestone, cemented by quartz, bornite and copper pyrite, in a fracture zone 50' wide in limestone. The orebody lies about 300' north of the Democrata shaft and also outcrops in 2 patches of garnet rock surrounded by diorite porphyry, good carbonates being mined at the surface.**Development:** comprises a 700' shaft and 1,600' tunnel, with 5 miles of workings. On the 500' level, the known orebody proved to be larger than previously estimated and the stopes yielded 5% ore. The East orebody near the Kirk mine, developed by tunnel workings, has also materially increased the proven ore reserves. Average assays at present are 3½% copper and 1.5 oz. silver per ton.**Equipment:** includes electrically-operated hoists and air-compressor. Smelter contains 3 blast-furnaces of 250 and 300 tons daily capacity. A converter and electric power-plant were completed in November, 1917.

When in full operation company employs 600 men.

Production: in 1920, (7 months to Aug. 1), 3,462,155 lb. copper; 105,315 oz. silver; 461 oz. gold.

Operations have been intermittent due to the revolution. Work was resumed in 1915, and continued until March, 1919; there was a suspension until October, when one furnace was blown-in and 300 men employed. Worked at 50% capacity to August 1, 1920. Property is a valuable one.

DESCUBRIDORA MINING & DEVELOPMENT CO.**CHIHUAHUA**

Owned by El Rayo Mines Co. See Dolores -Esperanza of America.

DINAMITA MINING CO.**CHIHUAHUA****Address:** S. G. Burn, mgr., El Paso, Tex.

Mines leased 1922 to H. A. Morse of San Francisco, Calif.

Property: the Dinamita, Ontario Anexas, Kanamha, Anexas, El Disloque groups. 52 pertenencias, 125 acres in Santa Eulalia district, and southern part of La Sirena group.**DOLORES ESPERANZA CORPORATION****CHIH. & SONORA**

Succeeds Mines Company of America.

Office: Room 226, 111 Broadway, New York City.**Jas. S. Colbath,** gen. mgr.; **Geo. A. Schroter,** cons. engr.**Officers:** H. S. Black, pres.; W. E. Reis and A. T. Black, v. p.'s; with W. T. Graham, Frank H. Ray, E. N. Skinner, J. D. Tooker, W. Hinckle

Smith, Wm. H. Wheeler and E. L. Gruver, directors. J. D. Tooker, sec-treas.

Inc. Jan. 18, 1919, in Maine. Cap. \$2,000,000; shares \$2 par; 864,817 outstanding. Bankers Trust Co., New York, transfer agent. Equitable Trust Co., New York, registrar. Listed on New York Curb. High 2½, low 1¾ in 1921.

On February 11, 1919, directors of the Mines Company of America were authorized to sell all the company's property to the Dolores Esperanza Corporation for \$600,000 cash, this money to be used to pay off all debts and to meet expenses. Old stockholders could buy new stock at \$2 per share up to number of shares held.

Balance sheet: for year ending Dec. 31, 1921 showed current assets \$2,424,700 including quick assets of \$526,598 comprising \$4,466 cash, \$12,578 acct's receivable, \$137,064 for bullion in transit, \$190,000 Liberty bonds and \$182,007 supplies on hand. Other assets: deferred charges \$1,040, property and plant \$945,431, construction expenditures \$665,452, claims against Mexican government \$138,104, concentrate stored at La Dura, \$148,073.

Liabilities of \$2,424,700 include capital stock outstanding, \$1,728,175, current liabilities, \$55,987, surplus \$17,971 and equity of minority stockholders in subsidiary companies, \$622,566.

The above compares with balance sheet of Dec. 31, 1920 which showed assets totaling \$2,736,865, including property and investments, \$977,811; Dolores plant, \$378,536; claims against Mexican government, \$127,853; machinery and supplies, \$218,077; concentrates at mine, \$207,889; Victory Bonds, \$648,670; cash \$27,519. Liabilities include capital stock, \$1,729,634; reserves, \$202,500; surplus, \$115,567. Income for 1920 amounted to \$49,551 and expenditures were \$86,268.

Ownership in companies is as follows:

Per cent owned	Par.	Shares owned
99—Dolores Mines Co.....	\$5.00	396,220
100—Chihuahua Esperanza G. M. Co.....	1.00	2,411,000
75—Consuelo M. M. & Power Co.....	1.00	1,826,500
99—El Rayo Mines Co.....	2.00	355,187
100—Creston Colorado Co.....	100.00	1,000
33¼—La Dura Mill & Mine Co.....	10.00	33,333¾
33¼—Compania Minera Gloria Fortuna	1.00	8,000

Dolores Mines and El Rayo Mines each own ½ of La Dura and Fortuna capitalization.

Dividends: (by Mines Co. of America) total paid to Dec. 31, 1916, amounted to \$4,958,600, including a dividend in 1906 in stock of the Dolores M. Co.

Chihuahua-Esperanza Gold Mining Co.

Property: adjoining that of the Dolores Mines Co., Chihuahua, on the west, consists of 3 claims, 304 acres. Company also owns 10,000 acres of timberland 5 miles north of Dolores.

Geology: formation is similar to that of the Dolores. Fissure veins occur in rhyolite dikes cutting andesite; 3 vein-systems exist. Development amounts to 502'. Ore reserves said to total 2,500 tons worth \$15 per ton. La Esperanza mine has great possibilities.

Consuelo Mining, Milling & Power Co.

Property: adjoins that of the Dolores Mines Co., west of Madera, in Chihuahua, on the south and east, and consists of 77 pertenencias, 190 acres, and a half interest in 9 pertenencias, 22 acres, also a water-right on the Tu-

formation is similar to that of Dolores. No systematic work has been done; the value of the ground is prospective.

Creston Colorado Co.

Torres, Sonora, Mexico.

Discovered by, 1902, in Ohio. **Cap.** authorized and outstanding, \$100,000. Annual meeting, first Saturday in November.

Operations since 1921-'22 and will not be operated until general economic conditions improve and high taxation is abated.

Claims, 828 acres, commonly known as "Minas Prietas" in Sonora, at La Colorado, a station on the narrow-gauge railway, 12 miles east of Torres, on the Southern Pacific R. R. of 10 miles south of Nogales, Ariz. The mines have been worked and have produced regularly during the last 33 years, but are now depleted. Gross production estimated at over \$112,000,000.

The property is divided into 4 different mines; the Creston Colorado, Amarillas-Grand Central, and Verde. The claims contain a number of prospect holes to cover the latter for 8,000' along their strike. Company rights to 7,000 acres land, including the mining claims. It is situated on the Matape river.

The strike is a general E.-W. strike, dip N. 55° to 90°, and vary in thickness from 40'. Larger orebodies occur principally in diorite, meta-quartz porphyry. The Creston ore, or east end ore, is a hard quartz. The Colorado is a harder quartz. Sulphides of iron and zinc occur from the surface down. Streaks of high-grade copper ore are occasionally found. The Verde ore is a very refractory. The Amarillas-Grand Central ore is a hard quartz, containing free gold in places. Average values in the Verde are said to be 60% gold and 40% silver.

Production in 1916 totaled 2,075 tons, compared with 2,578 tons in 1915, as follows: Creston mine, 1,473 tons; Colorado mine, 226 tons; Verde mine, 376 tons.

Production estimated Jan. 1, 1917, as 190,350 tons, average assay, gross value of \$937,591, as compared with 200,300 tons, average assay, per ton, the previous year; gold figured at \$20 per oz.

The Amarillas-Grand Central mine has one dump of 80,000 tons which will be retreated.

The Creston mine includes steam hoist and compressor. The Colorado cyanide plant receives Creston ore over a 700' incline tramway, and the Colorado ore over an 800' incline tramway. The Verde Central mine has steam hoisting and compressor. The Verde Central crushing plant; also a 450-ton cyanide plant, which is situated at Creston. Creston, Amarillas and Colorado over aerial tramways. The Verde, 10 miles from the mines, on the Matape river, supplies water through a 5" pipe.

Plants: have been intermittently operated for the past few years on unsettled conditions in Mexico. The Amarillas-Grand Central plant produces 100 tons per day with an extraction of 20.5% by concentration, a total of 73.8%.

Colorado mine, tons	Am.-G. C. Mine, tons	Old tailing, tons	Total tons	Value per ton
2,150	14,550	\$5.65
18,854	10,365	3,469	131,350	4.80
18,090	10,887	3,243	126,875	4.67

The Verde mines were badly damaged by Mexican bandits. The Verde mines are rich in large bars of good ore, fired the shaft sets, burned buildings

and cyanide tanks, and stole the brass and babbit metal from all machinery. It will require a large amount of time and money to put the property in shape for operating.

Dolores Mines Co.

Inc. Nov., 1903, in Mexico. **Cap.** authorized and issued, \$2,000,000; full paid and non-assessable; par \$5. No bonded debt. U. S. Mortgage & Trust Co., New York, transfer agent, Guaranty Trust Co., New York, registrar. Annual meeting, first Tuesday in December. Listed on New York Curb.

Entire capital stock of this company was formerly owned by an English company called Dolores, Ltd.; dissolved February 25, 1908, by exchange of stock, share for share, of Dolores Mines, Ltd. The company owns 33 $\frac{1}{3}$ % of La Dura Mill & Milling Co.

222 shares sold for \$1 each at public auction in New York on Dec. 22, 1920.

Property: 17 contiguous claims, 250 acres, in Chihuahua, west of Madera, on the Mexico Northwestern Ry., about 250 miles S. W. of El Paso, Texas, and 200 miles N. W. of the city of Chihuahua. Mines are reached over a 45-mile trail, requiring 7 days' time for pack trains. Company also owns 3 detached mineral claims, 126 acres, near Dolores, and all surface rights to 12,500 acres, also a water right on the Tutuaca river.

Geology: vein systems consist of rhyolite dikes in andesite; the veins are fissures in these rhyolite dikes, strike north and dip 55° to 90°. Ore-bodies occur at or near intersections of side fractures and within the boundaries of the dike. The group, as shown by developments to date, contains 4 main vein systems, known as the **Alma, San Francisco, West San Francisco, Washington and Arco Iris** dikes, covered for 8,000' on the strike of the Alma vein system, 4,000' on the San Francisco vein system, 3,800' on the West San Francisco, 1,000' on the Washington, and 2,600' on the Arco Iris vein system. The adjoining El Continente mine was acquired in 1921. Dolores ore is a very hard quartz, containing about 2% sulphides of iron, silver and occasionally lead and traces of zinc. Values in ore approximately 40% gold and 60% silver.

Development: to depth of 700' with levels 100' apart. Early in 1921, the mine was entirely unwatered and crosscuts driven on the 200, 400, 500 and 700' levels. The 700' shows 3 orebodies in floor, with combined length of 577'. Face of 700' north drift is in ore.

Ore reserves: were estimated Jan. 1, 1917, as follows:

	Tons	Value per ton	Gross value
Ore in place.....	135,628	\$13.80	\$1,873,335
Broken ore.....	13,595	14.10	191,668
Total.....	149,223	\$13.83	\$2,065,668

Compared with 125,663 tons of \$14 ore with gross value of \$1,768,693 on January 1, 1916. Value is based on \$20 per oz. for gold and 50c. per oz. for silver.

Equipment: includes concentrating and cyaniding plants, also compressors and hoisting plants, machine shops, etc. Electrical equipment to supplant steam power is in place. A 33-mile transmission line connects Dolores with Madera; line is designed to carry 3-phase, 60-cycle current of 33,000 volts. Power is furnished by a generating plant near Madera to consist of two turbo-generators, with total capacity of 1,500 k. w., 2 jet condensers, two boilers, etc.

The new mill has 15x24" Blake crushers, belt conveyors and steel ball mills, with 5,400 tons monthly capacity and was put into operation, 1921. Company has reduced power costs by erection of steam turbine plant at

om the mine, generating 1,500 k. w. transmitted over new mine. The new 200-ton cyanide plant is finished and in constructed a saw mill and 4,500' aerial tramway to the nt. 420 tons of ore treated in last half of 1921 at its recon- ill, yeilding \$280,265 in bullion. In April, 1922 produc- tons per day, or full capacity.

El Rayo Mines Co., Mexico.

nta Barbara Chihuahua, Mexico. 906, in Maine. **Cap.** \$1,000,000; outstanding \$714,000; bonded debt. Annual meeting, second Tuesday in Feb- New York Curb. Company is the American holding l Rayo Mining & Development Co., S. A., a Mexican he Descubridora Mining & Development Co. and Buena Co. claims, 766 acres, in the State of Chihuahua, S. W. of erminal of a branch line of the Mexican Central Railway. ed from Santa Barbara over an 8-mile trail. Company lease on about 12 square miles of timberland, adjoin- perty. El Rayo is at an elevation of 7,200' above sea claims cover the N.-S. strike of the producing veins for

in fissure veins in rhyolite, which dip from 50° to 90° rom a friable and oxidized quartz at the north end to a ing quartz at the center and south end of the property. ins about 4% sulphides, chiefly iron, with traces of lead ulphides are found occasionally. The metal content is d 26% silver. The ore shoots are irregularly shaped t vein junctions or intersections with main fracture. nderground workings extend to depth of 1,400' and total mine covers 4,700' of the vein system at the north end, covers 2,300' of the vein system and adjoins the Adela, mine covers 5,000' of the vein system on the extreme perty. inwatered to depth of 1,200', the main tunnel level, by

ore estimated Jan. 1, 1917, as:

	Tons	Value per ton	Gross value
.....	65,210	\$11.58	\$755,283
.....	13,328	10.77	143,542
.....	<u>78,538</u>	<u>\$11.44</u>	<u>\$898,825</u>

75,038 tons of \$10.48 ore with gross value of \$786,825 on lue is based on \$20 per oz. for gold and 50c per oz. for

udes a 1,950 cu. ft. steam operated compressor plant, furnishes the necessary fuel, lumber and mining timbers, 60-ton crushing, concentrating and cyaniding plants, r at the portal of the 1,100' level of the Adela mine the V in 6-ton cars to the mill storage bin. Course of ore ollows: from bin through 9"x15" Blake crusher, set at ize by conveyor belt to bin, by Challenge feeder over e set of 16"x36" Traylor rolls, discharge to 2 sets of lls, to classifier; overflow to tables, oversize in closed

circuit returned to 7'x14' tube-mill; discharge to classifier, overflow to tables, oversize in closed circuit returned to tube-mill. Pulp treated by cyanide solution. Resulting bullion and concentrates are marketed in America.

Electrification of entire plant was finished in 1917. Electricity is furnished, under contract, by the Cia. Agricola y de Fuerza Electrica del Rio Conches, S. A. from its plant at La Boquilladam, about 70 miles from El Rayo.

Extraction has varied from 80% to 89%, from 12% to 20% being taken out by concentration and flotation, the balance by cyanidation.

Flotation by the Callow system is a success, and in later work recoveries were 42.7% by flotation, and 47.6% by cyanidation.

Development work was carried on during 1921, "without conclusive results". Property idle, 1922.

La Dura Mill & Mining Co.

Office: 111 Broadway, New York City. **Mine office:** La Dura, Sonora, Mexico. **Cap.** outstanding, \$1,000,000; \$10 par.

Property: 4 individual mines—Gloria-Fortuna and La Dura, on the east bank of the Yaqui river, Sonora, California and Prieta, 1½ miles N. E. of the former. The mines are near La Dura station on the Cananea, Yaqui River & Pacific Ry., which leaves the main line of the Southern Pacific of Mexico at Corral station, 325 miles south of Nogales, Ariz. Mines are connected with railroad by aerial tram.

Ore is a white quartz containing sulphides of silver, copper, lead, iron and zinc. Most of the ore requires milling.

There are 5 main veins known as the California, Prieta, Gloria-Fortuna, West Florida and La Dura. The Prieta and Gloria veins, from 6" to 4' wide, occur in andesite, strike N. W.-S. E. and dip 30° S. W.

Ore reserves: estimated Jan. 1, 1917, as 16,015 tons, average grade \$54.80 per ton.

Only the Prieta and Gloria mines are operated by the company. The Prieta has a 3-compartment shaft, 1,040' deep. The Gloria is operated through a 1,600' incline shaft and a 700' vertical shaft, connected with the former, on the 500' and 700' levels. Stopping has proved persistence of veins in spite of faulting.

Equipment: in 3 units as follows: the Prieta-Gloria steam-operated compressor and hoisting plants; the Gloria-Fortuna-La Dura steam-operated compressor, hoisting, milling and generating plants; pumping plant, stores offices, and shops located half way between the two groups of mines. A transmission line from the Gloria-Fortuna plant furnishes power for pumping.

The mines employ under normal conditions, 8 Americans and about 225 Mexicans.

General Opinion: Dolores Esperanza Corporation had ore reserves in all its properties, estimated January 1, 1917, to have a gross value of \$5,824,670. The company has several good properties, is well managed, and should make large profits with a peaceful Mexico and an improved metal market.

DOLORES MINES

SAN LUIS POTOSI

Address: E. E. Reyer, supt., American Smelters Securities Co., Mathuala, San Luis Potosi, Mexico. U. S. address: W. M. Drury, mgr., 1112 Mills Bldg., El Paso, Tex.

Geology: ore occurs as a contact metamorphic deposit between quartz monzonite and limestone. The shoots are large, some extending to a known depth of 1,000' and covering an area of 15,000 sq. ft. Oxidation extends to lowest levels but both oxide and sulphide ores occur on all levels. The ore averages from 2 to 3% copper. \$1.25 gold and 2 oz. silver per metric ton.

Development: by two 1,000' shafts and numerous adits. Underground work is largely done on contract.

Equipment: includes 250 h. p. compressor, two 125-h. p. double drum

hoists, sample mill, hospital, dwellings, etc. The power plant is at Matehuala, 6 miles distant.

Production: averages 600 tons daily, when operating under normal conditions with 800-1,000 employees. Shipments made by Matehuala Ry. to company's smelter at Matehuala.

DOLORES MINES CO.

Subsidiary of the Dolores-Esperanza Corporation, which see.

Property: 8 patented mining claims, having an area of 429 hectares, or practically 1,060 acres, situated on the western slope of the Somera mountain. Mine offices, mill and cyanide plants and practically all improvements are in the State of Michoacan, but a portion of the mining property is in the State of Mexico and adjoins the mining claims of El Oro Mining and Railway Co., the Esperanza Mining Co. and the Mexico Mines of El Oro.

The main vein (Veta Verde) has an average strike of N. 18° W. and a dip of about 60° S. W. and has been proven for practically three kilometers along its strike and in places to 600 meters upon its dip.

The Dos Estrellas Company also holds 60% of the stock in the old Borda Antigua property in the Tlalpujahua district (about 3 kilometers from Estrellas mill) and during 1921, acquired controlling interest in other small silver properties in the same district. As development work has proven Veta Verde to lose its mineralization in depth, the company has actively engaged in searching for other properties and it is understood that they have options upon various properties including the Veta Grande near the City of Zacatecas and a copper-gold property at Las Vigas, State of Vera Cruz.

Geology: the property lies in an extensive belt of Cretaceous schists known as the "El Oro Shales" that extend from the northeastern part of the State of Michoacan to the southern part of the State of Mexico and northern part of Guerrero. These sedimentary rocks have been intruded by porphyritic igneous rocks of Tertiary age, accompanied by extensive faulting. Some of the northeast and southeast faults parallel or coincide with the veins and are highly mineralized, containing profitable orebodies, as for instance the San Rafael vein in the El Oro camp; other faults which have a general easterly and westerly strike, affect the vein system in several ways, but are void of mineralization.

The Dos Estrellas Company has extensively developed a system of veins, the principal one, known as Veta Verde, having ascending offshoots or branches, into the hanging wall, containing in general, payable ore. The main vein and its branches only occur in the shales. The shales and veins are covered by a caprock of andesitic lava, varying according to the topography of the original surface, from 80 to 320 metres in thickness.

The Veta Verde has a proven uniform width of about twelve metres down to a depth of approximately 600 metres from the cap rock.

The hanging wall branch veins vary from 70 cms. to 3 meters in width, and are approximately parallel to each other and to Veta Verde. The westerly vein (Nueva) is about 65 meters from the main vein. In the upper part of the mine the shale is often mineralized to such an extent as to constitute ore, and the silver values in the shale are in places higher than those in the silicious ore of the branch veins. East of Veta Verde, in the footwall country, there are other veins, only one of which (Blanca) joins the Veta Verde in depth. The others have a width of from 0.8 to 2 meters, are irregularly mineralized and of little industrial importance.

The eruptive rocks include andestic and rhyolitic dikes and large intrusive masses. In the lowest workings, diabase is found.

The payable mineralization ceases very abruptly at a notably uniform level which is slightly lower than the point where the branch veins split from the main vein, or about 500' below the cap rock.

Development: by 6 tunnels from 200 to 1,800 meters in length and by 5 principal shafts from 150 to 450 meters in depth. Additionally there are six interior shafts of from 150 to 300 meters in depth. There are approximately 60 kilometers of levels of which about 38 kilometers are open at this time.

Ore reserves: the calculated ore reserves, December 31st. of each year, are shown in the following tables:

Year	Positive Metric Tons	Probable Metric Tons	Ore mined tons
1916.....	469,528	337,551	146,317
1917.....	213,218	84,166	277,876
1918.....	453,764	367,056	337,420
1919.....	542,920	461,292	366,440
1920.....	429,664	399,535	376,019

Equipment: Dos Estrellas has a complete electrically driven mining plant and machinery, including electric haulage (8 Baldwin Westinghouse locomotives).. The milling and cyaniding plant has a daily capacity of 1,250 metric tons and comprises two Hadfield gyratory crushers, Merrick automatic weigher, automatic sampler, 120 stamps of 1,250 lb., 108 drops per minute, 14 tube mills, 5'x24', 29 R. P. M., 14 classifiers, 9 Dorr thickeners, Butters filters and Merrill and Crowe vacuum precipitation.

The company owns its railway and rolling stock connecting its mine and mill with the El Oro camp, also owns lumber forests in the States of Mexico and Michoacan.

Production:

Years	Beneficiates Tons*	Total Value Bullion Rec.	Value Rec. per ton	Operat'g. Costs p. t.

*Dry metric tons.

Note: On account of political disturbances, milling was suspended from April, 1914 until May, 1916, with the exception of one month during 1915.

The total production from the mine from its inception to the end of 1920 was 4,869,878 dry metric tons.

DULUTH-MOCTEZUMA MINING CO. SONORA

Inactive. **Office:** Room 610 Lonsdale Bldg., Duluth, Minn.

Officers: Geo. H. Crosby, pres.; Cassius Bagley, v. p.; A. O. Rabideau, sec.; all of Duluth.

Inc. 1909, in Minnesota. **Cap.** \$500,000; shares \$10 par; \$300,000 issued. Mexican holdings forfeited on account of excessive taxes. Minnesota iron lease sold for enough to clear up indebtedness on same.

DULUTH-SONORA COPPER CO. SONORA

Address: 602 Palladio Bldg., Duluth, Minn. Mine near Cananea, Sonora, Mexico.

Officers: B. Silberstein, vice-president, preceding with W. D. Underhill, sec., Theron H. Hawkes., treas., with Geo. M. Tallant and A. F. Norton, directors.

Property: about 3,621 acres, embracing a part of the former holdings of the Calumet & Sonora Co., and the South Cananea, or Mitchell property. The latter shows a strong vein with wide silicious outcrop and has been developed by a 400' shaft and some underground work, but an examination of dumps fails to show ore. Norton shaft, one-fourth mile distant, said to be 293' deep and to show good ore. Remainder of property considered of questionable value. Idle since 1910. Is a prospect only.

DURANGO MINING CONGRESS DURANGO

Address: Ernest Stein, sec., Durango Esdo Dgo., Mex.

Organized early in 1922 to assist the mining industry of the state.

DURANGO SILVER & COPPER CO. DURANGO

Organized to operate the properties of the San Luis Mining Co. (q. v.), under a lease with option to purchase. Owing to difficulties surrounding operations in Mexico and fall in price of silver, no work has been done.

EASTERN CANANEA DEVELOPMENT CO.**SONORA**

Mine about 18 miles N. E. of Cananea, Sonora, Mexico. John Martin, supt., at last accounts.

Property: said to show copper sulphide ore, is developed by shaft, held under lease and bond from M. L. Fay, of Duluth, Minn., who controls the **Fay Cananea Copper Co.**, the owner of the mine through the **Cananea Eastern Mining Co.**, S. A., a Mexican corporation. No returns secured, and idle for years.

EL CUBO MINING & MILLING CO.**GUANAJUATO**

Office: 1025 Peoples Gas Bldg., Chicago, Ill.

Mine address: Guanajuato, Gto, Mexico. Irving Herr, gen. supt., Cubo, Gto., Mex.

Officers: H. L. Hollis, pres.; Alfred Cowles, treas.; A. Hunter, sec.

Property: Villalpando and other mines in the towns of Cubo and Villalpando, 6 miles from Guanajuato, Mexico, with extensive workings on a typical fissure vein in andesite. The free milling silver ore occurs in ore-shoots.

Equipped: with 250-ton flotation and cyanide mill, held under lease and option from the **Providencia M. & M. Co.**

Operations were resumed in October, 1919. Reported treating about 5,000 tons of ore monthly in 1921. Employs 150 men.

EL EDEU; COMPANIA MINERA Y BEUEFICIADORA**ZAC.**

Idle. Mine at El Eden, Zacatecas, Mex.

Officers: Francisco Llamosa, pres. and gen. mgr.; Enrique Gutierrez, sec.; Luis Colina, supt.

Inc. 1905, and reorganized 1907, in Mexico. **Cap.** 600,000 pesos; shares 100 pesos par.

Property: silver-gold mines, 102 hectares.

Development: by 210' shaft and tunnels aggregating 1,120', developing copper and lead zinc ores.

Equipment: includes 40-stamp mill with 2 Krupp tube mills, 6 Wilfley tables and 6 Johnson tables; company planned installing a cyanide plant, to treat a large amount of tailings accumulated, the dump being estimated to average 400 to 500 grams silver and 3 to 5 grams gold per metric ton.

ELENITA DEVELOPMENT CO.**SONORA**

Office: Room 3300, 120 Broadway, New York.

Officers: Henry B. Paull, pres.; Thomas H. Collins, v. p.; Frederic R. Kennedy, sec.-treas., with Thomas F. Cole, and John F. Bankerd, directors.

Inc. March 15, 1907, in Arizona. **Cap.** authorized 40,000 shares, par \$10, \$400,000; issued 6,000 shares at \$10; 21,310 shares at \$9 paid in; part paid stock subject to final call of \$1 per share; in treasury 12,690 shares.

Property: Bonanza de Cobre mining claim, 182 pertenencias, approximately 450 acres at Cananea, Sonora, Mexico. Title to property held by the **Lomita Mining Company, S. A.**, a Mexican corporation.

EL FAVOR MINING CO.**JALISCO**

Officers: Makeever Bros., Journal Bldg., Boston, Mass., and 170 Broadway, New York.

Mine address: Hostotipaquillo, Jalisco, Mex.

Officers: Sanford Makeever, pres.; Dr. H. D. Meredith, v. p.; J. L. Makeever, treas.; M. M. Makeever, sec.

Staff: E. F. Beadle, gen. mgr.; J. H. Nelson, supt.; J. G. Murphy, cons. engr.

Inc. July, 1906, in Arizona; protocolized, 1906, in Mexico. **Cap.** \$3,500,000; shares \$1 par. Stock not listed. After 6 years of development work, mine paid total dividends of \$210,000 in 1913-1914. Property said to represent investment of \$1,000,000.

Property: the Favor silver-gold mine, 476 acres mineral land and extensive surface area at El Monte, 75 miles N. W. of Guadalajara, Jalisco, Mex. A branch line of the Southern Pacific R. R. runs to Quemada, near the mine, and the Chapala Hydro-Electric Co. furnishes power for \$50 per

h. p. year. Vein reported as 10' to 14' thick with shoots of bonanza silver-gold ore workable to 1,300' by tunnels.

Development: by over 3 miles of workings above No. 7, the deepest, level.

An orebody assaying \$140.80 in silver, free from manganese, was opened on No. 7, also on No. 3; while rich ore was found on No. 5. Reserves are said to be sufficient to supply mill for several years.

Equipment: includes 150-ton concentrator and cyanide plant; the mill has 35 stamps, crusher, tube-mills, Dorr classifiers and thickeners, Oliver filters, pachuca tanks, Wilfley tables. Extraction claimed to be nearly 90%. Total production to date reported as \$1,500,000.

Mill buildings, burned by bandits in 1918, were rebuilt; and in September, 1919, daily output was 55 tons of \$12 ore. In August, 1921, the mill was closed down because of low price of silver and high cost of supplies, but was reported reopened in November.

EL FUERTE MINING & SMELTING CO.

SINALOA

Address: 516 Grant Bldg., Los Angeles, Calif. **Mine office:** Choix, Sinaloa, Mex. A. M. McDermott, gen. mgr.

Officers: Dr. L. C. Heller, pres.; J. A. Painter, v. p.; Arthur Gleason, sec.; J. R. Thomas, treas.; with A. M. McDermott, and E. B. Sprague, directors.

Inc. 1918 in California. **Cap.** \$500,000; \$1 par; 85,289 shares issued. Company owns 1,000,000 shares of the Choix Cons. M Co.

Property: 11 claims, in El Fuerte district, held under 10-year lease from the Choix Cons. M. Co., and a 500 acre smelter site on the Fuerte river.

Equipment: 100-ton smelter purchased from the Choix company is now being installed. During 1920-'21, a 53-mile road to the railroad terminus was completed, a 150,000 gal. reservoir, lime kiln, blacksmith shop and necessary buildings constructed. Employs 50 men.

EL ORITO MINING & MILLING CO.

DURANGO

Address: care Robt. F. Fitz, gen. mgr., P. O. Box 275, Los Angeles, Calif. **Mine address:** Yerbanis, Durango.

Officers: A. W. Church, Port Chester, N. Y., pres.; R. F. Fitz, v. p.-sec.; J. A. Rovelstad, treas.

Inc. May 10, 1910, in Arizona. **Cap.** \$500,000; shares \$100 par; outstanding \$432,500. Annual meeting, third Monday in May.

Properties: 93 pertenencias containing gold veins of free milling ore at Penon Blanco, and a copper property at Velardena, Durango, Mex.

Development: one vertical and one incline shaft, depth 375' with deepest workings at 475'. Total underground workings 1,500'.

Equipment: includes a 3-stamp mill. Mines were closed down 1912, owing to revolution, but operations resumed 1922, at mine and mill.

EL ORO MINING & RAILWAY CO., LTD.

MEXICO, D. F.

Offices: H. F. Wreford, sec., 24 Lombard St., London, E. C. 3, England; 61 Broadway, New York.

Directors: R. T. Bayliss, chairman; A. M. Main, managing director in Mexico. H. V. Hart-Davis Naylor, L. Breitmeyer, P. L. Foster, J. H. M. Shaw, R. M. Raymond. H. C. Enos, asst. mgr., El Oro, D. F., Mexico.

Inc. July 27, 1899, in Great Britain, to acquire the capital stock of the American Mng. Co. and the American Railroad & Lumber Co., the former owning the El Oro Gold & Silver mine in the El Oro district of Mexico, and the latter owning the railroad connecting the mine with the Mexican National Ry. Purchase price was £886,072; paid £820,084 in cash and £65,988 in stock. The two American companies have since been dissolved. **Cap.** £1, 150,000; outstanding shares £1 par. £1,147,500 issued. Annual meeting in October. Listed on London Stock Exchange.

To comply with the Federal Statutes of Mexico, an operating company, The Investment Co., Ltd., (*La Compañía de Inversiones del Oro, S. A.*) was organized under Mexican law in 1920, and is engaged in examing and developing new properties.

Report for year ended June 30, 1920, showed, total assets, £1,478,061, which includes, property and equipment, £936,562; investments £40,093; supplies, £65,003; bullion in transit, £60,862; bonds, £168,606; cash £173,201; debit balances £33,731, liabilities include, capital issued, £1,147,500; credit balances, £156,707; profit and loss, £172,273. Income amounted to £773,705, of which £696,394 was from bullion sale; expenditures were £710,759, leaving an operating profit of £62,946.

Annual report for year ended June 30, 1921, showed: assets, £1,484,326, including stores and material, £118,270; bullion in transit, £55,665; war bonds and treasury bills, £214,562; cash, £62,873; investments, £81,778. Liabilities include: sundry credit balances, £202,520; profit and loss, £131,906. Income amounted to £808,908, of which £678,508 was from bullion; £98,836 railway receipts; £31,124 interest and dividends; £438 sundry receipts.

Dividends: 148% from 1900 to 1913; 1913-14 to 1915-16, nil; 1916-17, 5% 1917-18, 5%; 1918-19, 5%; 1919-20, 5%; 1920-21, 5%. A stock dividend of 1 share of Investment Co. stock for each 25 shares El Oro stock held, was declared payable, June, 1921.

The El Oro Mng & Rv. Co., Ltd., owns 42,687 shares (par £1), of the **Suchi Timber Co., Ltd.**, 4,100 fully paid and 50,000 partly paid shares Invest. Co. stock; 25,000 shares and £6,000, 7-year 10% notes of Mexican Corporation, Ltd.

Property: the San Antonio, San Rafael Trianon, Diamante, Ofir, and Carmen No. 2 claims, 786 acres, at El Oro, 100 miles northwest of Mexico City. In 1912-1913, the adjoining Ofir claim, 11½ acres, was bought for £130,000 cash. This claim controls the rights of the San Rafael vein in depth. Ore occurs in fissure veins in a quartz-calcite gangue having a strike of N. 30° W. and dipping to the west. Commercial gold ore occurs in long horizontal ore shoots. Orebodies vary in width from 10' to 60'.

Development: by shafts from 1,500' to 1,600' deep. Results on the 2,200' level of the San Rafael have been disappointing, the vein having been cut off by a fault. Recent work on the Descubridora opened up an orebody 800' long, 18"-5' in width and averaging \$13 in gold and 3 oz. silver and on the 1,350' of the Ofir, a 6' orebody averaging \$20 gold and 1½ oz. silver was followed for 100'.

Total development for fiscal year, June 30, 1921, was 26,280'.

Equipment: includes a 200-stamp mill, 8 tube-mills and a cyanide plant. Mine and mill operations were resumed October, 1916, with 100 stamps and 70 were in operation at last accounts.

Production for years ending June 30:

Year	Tons milled	Value p. t.	Cost p. t.	Rec. %	Gross Value	Net Profit
1918-19....	\$308,665	\$8.07	\$6.80	90.11	\$2,491,279	\$279,116
1919-20....	368,538	8.77	6.70	86.74	2,789,547	326,909
1920-21....	385,770	7.63	5.71	87.13	2,545,446	357,010

Ore reserves: June 30, 1921, estimated at 282,124 tons of \$7.96 gold and 2.11 oz. silver, as compared with 293,779 tons in 1920 and 333,135 tons in 1919.

Mining costs for 1921 were \$2.38 per ton exclusive of \$0.79 per ton for development, \$0.24 for milling, \$1.06 for cyaniding, \$0.01 for water \$0.31 for general expense and \$0.87 per ton for taxes, a total of \$5.66 per ton, to which London expenses of 5¢ per ton must be added. For year ending June 30, 1921, 150,000 tons from San Rafael vein, averaged \$4.45 gold and 2.01 oz. silver.

Compania de Plata El Progreso

taff: Andrew MacFarlane, gen. mgr.; W. C. Laughlin, cons. met. eng.;
 Shotwell, cons. min. eng.; Jackson Elliott, mill supt.; E. E. Noon,

mine supt.; J. V. Macfarlane, engr.; John Logan, assayer; A. C. Burnett, accountant.

Property: the Progreso-Colorada mine of 28 acres, opened in 1895, and adjacent ground acquired in 1919, in the central part of Sonora, near junction of the Yaqui and Sonora rivers, and 160 miles S. of the international boundary. Nearest town is Suaqui de Batuc. Nearest rail is Verde, on the Mina Prietas line, a narrow-gauge road joining the Southern Pacific at Torres. In 1919 a 35-mile wagon-road was built to connect with the Moctezuma-Lampazos wagon-road, giving a direct route to Nacozari, 110 miles distant. Economic conditions in the district are generally favorable. Shallow workings on the vein have yielded silver worth \$1,500,000. Mine examined by W. A. Farrish, James MacFarlane and W. C. Loughlin.

Geology: the district shows uptilted limestones and overlying tuff beds, cut by intrusive igneous rocks and by andesites; the fissure veins are in the intrusives. At Progreso-Colorada, the country rock is quartz diorite. The rock north of the Progreso vein is a porphyritic andesite, badly altered by vein-forming agencies, and impregnated with magnetite, pyrite and chalcopyrite. Numerous well-mineralized fissure veins, characterized by banded quartz, cut these two rocks, and carry shoots of rich silver-gold ore. Five nearly parallel veins that occur in a zone 500' wide, are of the typical silver-gold type, run E. and W., and dip N. Only two, the Progreso and Colorado veins, 200' apart and parallel, have been mined, but all five can be developed and mined from the new shaft now being sunk, and all five may be expected to show ore to depths of 500 to 1,000'.

Progreso vein is developed to depth of 300' by 2 shafts developing the vein for a length of 500' or more. The ore shoot is from 7.8 to 13' wide in the old stopes, and is continuous for a length of 500' on the 215' level.

Reserves, above 215' level total 21,800 tons, averaging 33 oz. silver and \$6 gold per ton. There is also about 10,000 tons of indicated ore in the mine, and 5,100 tons of \$26.25 ore on dumps.

The **Colorado** vein has been opened to a depth of 130' and a length along its outcrop of 355'. On the 130' level continuous ore is exposed for a length of 147'. Samples cut for a length of 100' along this level averaged 6' wide and assayed 24.5 oz. silver and \$1.60 gold. Reserves in Colorado mine as of March, 1919, are 5,000 tons of \$25.25 ore, plus 2,600 tons on dumps containing 46.17 oz. silver and \$2.75 gold per ton.

Old Colorado and San Jose veins also show promising outcrops opened by shallow shafts.

The new 500' shaft now being sunk will have levels at 100' intervals, beginning at 200'. The San Fernando vein south of the main shaft, was opened in 1919 by a 30' shaft in \$22 ore.

Equipment: 80-h. p. hoist, 8-drill compressor, sinking pump, 10 machine-drills, and 100-ton mill consisting of stamps, tube-mill concentrates, and cyanide plant, to be enlarged to 300 tons.

Production: from Dec., 1919 to Dec., 1920, mill treated 3,670 tons that averaged 16 oz. gold and 22.5 oz. silver per ton. The recovery was 439 oz. gold and 58,720 oz. silver, from which the company netted \$54,677.15. This was realized from the mill before it was equipped and does not of course represent results from the finished mill.

Is a promising property.

SONORA

Mine office: Bacoachi, Arizpe, Sonora, Mexico.

Officers: at last accounts, A. C. Chalot, pres. and gen. mgr.; Dr. S. Newton Leo., v. p.; A. L. King, treas.; preceding, with T. B. Johnstone, Albert Reineman, Julius G. Miller, Henry Stern, Wm. H. Freystadt, I. Neuberger, A. H. Wand, D. Powdermaker, Dr. Moritz Gross, Adolph Oltmann and John H. Brown, directors; John Martin, supt.

Inc. in Arizona. Cap. \$2,000,000; shares \$1 par. Property is held through a Mexican corporation with capital of 10,000 pesos, shares 100 pesos par, entire stock issue of which is owned by El Trjunfo. Annual meeting, first Monday in October.

Property: 136 acres, in 12 different groups, principal property, about 4 miles from the Picacho mines, about 8 miles S. W. of Bacoachi, 2 miles from the Sonora river and about 75 miles by wagon road from Cananea. Lands carry 5 veins 2' to 5' wide, said to be traceable 2 miles, and to carry azurite, malachite, bornite, chalcopyrite and chrysocolla, all silicious, and occasional native silver, with a claimed average value of 5% copper, 25 to 600 oz. silver and \$3 gold per ton.

Development: about 7,000' of workings, main shaft 400' deep, connecting with a tunnel for extraction.

Equipment: includes a 90-h. p. steam plant at the mine, small sawmill, 50-ton reverberatory furnace and 26 buildings. Wells provide water for boilers and potable use.

A 50-ton mill has a 25-h. p. steam engine and 4 Behrend tables, with a 3-mile pipe-line to the Sonora river, where there is a small pumping station.

Company paid a dividend of 1% in August, 1911. During 1912, company operated its smelter (reverberatory), shipping matte to El Paso, running \$625 per ton.

Transportation facilities are poor, nearest railroad station being at Cos. 38 miles distant by mule trail.

Closed down since 1913 on account of unsettled political conditions and insecurity of property rights during revolution.

EL VAN COPPER CO., S. A.

SONORA

Mine near Nacozeni, Sonora, Mexico. Not operated for several years and several claims forfeited to government for non-payment of taxes.

EMPIRE MINING CO.

SONORA

Was the Mexican holding company of the **Dolores Mining & Development Co.**

Property: the Major Domo Copper mine, 85 hectares, a few miles from Cananea. A 200' shaft shows a N. E.-S. W. vein, 2½' to 3' wide. Company also owns the Dolores, Empire, Bonanza, Spanish, Golden Cross and Providencia, silver-gold properties, 65 hectares, in the Magdalena district, Sonora, Mexico. Planned erecting a 3-unit Pittman mill at the Golden Cross property, 14 miles S. W. of Cananea. No recent reports received; presumably defunct.

ERUPTION MINING CO.

CHIHUAHUA

Address: El Paso, Texas, or John C. Greenway, mgr., Warren, Ariz.

Holds control of **Cia. Minera Erupcion y Anexas, S. A.**, a Mexican corporation. Controlled by **Ahumada Lead Co.** and by **Calumet & Arizona Mng. Co.** interests.

Officers: E. F. Knotts, pres.; D. B. Smith, v. p.; J. H. Williamson, v. p.; C. A. Kinne, sec.-treas. Basil Prescott, geol.

Inc. in New Mexico. Cap. \$1,000,000; increased to \$1,500,000; \$1 par.

Property: 85 miles S. of El Paso, in Lamentos Mtns., Chihuahua, adjoining holdings of the Ahumada. The main ledge has been developed for a distance of 1,700'. About 200 men employed, in 1922.

A 45-mile road (Ferrocaril de Chihuahua y Oriente) was constructed in 1922, by Erupcion and Ahumada companies, to connect with the Lucero station south of Juarez on the Mexican railroad.

ESMERALDA COPPER CO.**SONORA**

Has no representative at former mine office: Llano, Magdalena, Sonora, Mexico. F. C. Emery, pres.; W. D. Fredericks, mgr., at last accounts.

Property: 88 hectares, has about 300' of workings, showing copper ore, with silver said to increase at depth. Presumably idle.

ESMERALDA COPPER MINING & SMELTING CO.

Idle. Mine near Santa Catarina del Norte, Baja California, Mex., known as La Esmeralda, is opened by shaft, with considerable development.

ESMERALDA MINING CO.**CHIHUAHUA**

Address Drexel Bldg., Philadelphia, Pa.

Mine address: Parral, Chihuahua, Mex., Adam Schaefer, supt.

Inc. 1907, in Delaware. **Cap.** \$1,000,000; par \$1.

Officers: W. P. Fairman, pres.; A. Urghuart, mgr.

Property: La Esmeralda gold-silver mine near Parral, Chih.

Development: 200' shaft and 600' tunnel with total of 1,500' of workings.

Employs 250 men when operating.

Equipment: includes electric power, compressor, etc.

ESMERALDA; NEGOCIACION MINERA**ZACATECAS**

Idle. **Property:** at Chalchihuites, Sombrerete, Zacatecas, Mexico, includes the Anaconda, Esmeralda and La Luz mines, developed by shafts and tunnels, opening up argentiferous lead and copper ores.

ESPERANZA, LTD.**MEXICO, D. F.**

Office: C. L. Johnson, sec., No. 1 London Wall Bldgs., London, E. C. 2, England. **Office of American company:** E. L. Gruver, pres., 25 Broad St., New York City.

Directors: R. J. Frecheville, chairman; F. W. Baker, Sir F. M. Crisp, A. A. Kelsey. Charles Hoyle, gen. mgr.; E. Ph. Harivel, asst. mgr.

Reg. Oct. 6, 1913, in Great Britain **Cap.** £455,000; shares £1 par; all issued and credited, except seven, as fully paid. Acquired by agreement with the Guggenheim Exploration Co., and the Venture Corporation, Ltd., 449-800 shares of \$5 each, all the capital except 200 shares, in the Esperanza Mng. Co. of New York, inc. in New Jersey, and owning gold and silver mines covering 390 acres, adjoining the El Oro mine at El Oro, Mexico. Purchase price was £454,993 in fully paid shares.

1916..	892,085	702,234	+ 189,851	56,250	301,732

Property: 6 patented claims, 390 acres, adjoining El Oro mine, at El Oro, shows fissure veins in shale, cut by andesite intrusions. The dip is 70° to the S. W., and course N. 45° W. The ore shoots are from 50 to 150' long, and from 2 to 100' thick.

The San Rafael vein is traceable for 10,000' through El Oro district, but is cut by many transverse faults which displace the orebodies. The Esperanza vein fills a fault that has a displacement of 500'. The San Rafael vein fills a fault fissure whose displacement is approximately 1,000' vertical. This vein narrows at depth of 2,000' in the Esperanza mine and extends for 2,500' through the property, with 7 payable branch veins.

Development: at El Oro, by vertical shafts, 1,600, 1,000, and 400' deep, and a 1,000' tunnel for tramping. Deep work on the San Rafael and San Carlos veins showed that the limit of pay ore had been reached. Work in 1920-21 has been concentrated on the 3, 4, 5 and 8th levels of the Descubridora vein. Winze No. 6 was sunk 42' below 5th level, exposing the vein with an average width of 13-19" and assaying 10-72 oz. silver and 0.2-1 oz. gold per ton.

Recent work shows the following results:

Year	Feet	Total, feet	Reserves tons	Profit in reserves
1920.....	2,565	188,177	117,684**
1919.....	1,975	185,612
1918.....	4,817	183,637	35,131*	£19,322
1917.....	9,908	178,820	65,368	39,727
1916.....	8,900	168,912	111,723

*Plus 50,000 to 100,000 tons of payable fills. ** Plus 750,000 tons possible low grade ore.

Equipment: electric power, 400-h. p. hoist, and cyanide mill, using 120 stamps and 14 tube-mills of 1,000 tons daily capacity. The stamps are being replaced by ball-mills.

Production:

Year	Tons Milled	Year	Tons Milled
1920.....	273,120	1918	200,589
1919.....	267,258	1917	200,548

During most of the years, 1914 and 1915, revolutionary disturbances prevented work. Operations were suspended from February 25, 1915, until April 23, 1916.

To end of 1918, the total output was \$78,003,993 (Mexican gold currency) from 2,826,041 tons ore.

Company has under option and is developing the Union en Cuale mines, near Banderas bay, 25 miles from Las Pinas, Jalisco. The property shows very large and persistent veins of zinc ore carrying silver and gold, as well as lead ore. These veins were worked until 1893 for the silver only, two of the mines yielding about 6,000,000 ounces up to that date. To Dec. 30, 1920, \$243,000 had been expended on the Cuale holdings. The purchase price is \$250,000.

ESPERANZA MINING CO.

BAJA CALIFORNIA

Secretary and office: E. W. Nicholson, 801 Land Title Bldg., Philadelphia, Pa. **Operating office:** P. O. Box CCC, San Diego, Cal. Mine near Ensenada, Baja California, Mex. Geo. P. Brown, gen. mgr.

Property: 83 hectares, and 40 acres miscellaneous lands, on Cedros island, on the Pacific coast, shows diorite cut by veins having 3 lenticular ore shoots, carrying carbonate and sulphide ores, estimated by company to average 40' width, 300' depth and 1,100' length, and to contain an average of 2.5% copper, 3% zinc, 2 oz. silver and \$3.50 gold per ton.

Development: about 8,500' of workings, showing 150,000 tons of low-grade ore, with about 100,000 tons blocked out for stoping. Has received about \$450,000 from shipments to the Denver, Pueblo, San Francisco and Tacoma smelters.

Unsettled conditions in Mexico since 1914 have prevented reopening the property.

ESPERANZA MINING CO., LA,

COAHUILA

Address: Saltillo, Coah., Mex.

Stock made assessable and 50,000 new shares issued in January, 1921.

ESPERANZAS MINING CO.

DURANGO

Idle for several years. Mine at Estacion Symon, San Juan de Guadalupe, Durango, Mexico. Joseph Steel, gen. mgr., at last accounts. Cap. \$200,000.

Property: includes the Montana de Cobre, Esperanza and other claims.

ESQUER y CIA; ALEXANDER

SONORA

Mine at Baroyeca, Alamos, Sonora, Mexico. J. J. Esquer, mgr., at last accounts.

Property: the Mexicana, Esperanza and other mines, developed by shafts and tunnels, carries auriferous and argentiferous copper ores. Idle for years.

ESTACA MINING CO.**SINALOA**

(Mexican Candelaria Co.)

Office: Col. Daniel M. Burns, pres., Call Bldg., San Francisco, Calif.**Mine address:** Contra Estaca, Sinaloa, Mex.**Staff:** H. D. Hickie, gen supt.; D. M. Munro, mine supt., B. A. Newman, mill supt.

Property: the Rosario and Contra Estaca silver-lead mine in Concepcion de Oro district, Sinaloa, Mex., reported forfeited for non-payment of taxes and re-located in 1921 by Manuel Hoche.

Equipped with 16-stamp mill, 2 tube mills and 100-ton cyanide plant.

EXPLORADORA de SANTA MARTA S. A., CIA**CHIHUAHUA****Address:** T. W. Foster, gen. mgr., Caples Bldg., El Paso, Tex.**Officers:** Dr. C. S. Bungart, pres.; Dr. I. J. Bush, v. p.; H. W. Foster, sec.-treas., with W. B. Watts and Elliott Ryer, directors.**Inc.** 1921. **Cap.** 5,000 shares.

Property: 60 hectares on Eureka river, Baranca del Cobre district, southwestern Chihuahua.

EXPLORATION CO., LTD.**MEXICO****Office:** H. F. Wreford, sec., 24 Lombard St., E. C., London; P. L. Foster, 61 Broadway, New York.

Directors: R. T. Bayliss, chairman and mng. director; J. H. M. Shaw, mng. director; J. R. Maguire, J. E. D. Ryder, G. D. Smith, and O. E. Warburg.

Inc. March 21, 1904, in Great Britain, to acquire the assets and undertakings of a company of same name, registered June, 1896, except certain assets and liabilities which had been acquired by the Exploration Assets Co., Ltd. The company carries on a general financial business and holds interests in the Tomboy, El Oro, Santa Rosa, Buena Tierra, Greene-Cananea Copper, Chile Copper, Natomas Co., South African Real Estate Trust Ltd., and other concerns, and floated the Mexico Mines of El Oro, Ltd.

Cap. £750,000; shares £1 par; reduced Nov., 1916, to £375,000; shares 10s. par, all issued. For every 5 old shares, holders received 3 fully paid shares and £2 of the Assets Company's debenture stock.

Dividends: declared by former company: 1896, 2s; 1897, 2s 6d; 1898, 2s. 6d.; 1899, 3s.; 1902, 1s. Dividends paid by present company; 1905, 1s.; 1906, 1s.; 1907, nil; 1908, 1s.; 1909, 1s. 6d.; 1910, 1s.; 1911, 1s. 6d.; nil in 1913, 1914 and 1915; 1s. in 1916; 6d. in 1917; 9d. in 1918; 1s. 6d. in 1919; 1s. in 1920.

For year ending Dec. 31, 1920, income was £74,715; there was a net profit of £57,162, which added to balance of £87,384 from previous year, left a total balance of £124,546, after deducting £20,000 for depreciation. Total assets of £532,240, include cash, £20,772; shares in other companies, £266,521; Natl. War Bonds, £78,163; treasury bills, £69,832; exchequer bonds, £70,211; debtors and debit balances, £26,738. Liabilities include capital stock, £375,000; creditors, £31,701; unclaimed dividends, £991; profit and loss, £124,546.

EXPLORATION CO. OF ENGLAND & MEXICO, LTD.**MEXICO**

In liquidation, 1917.

FAY-CANANEA COPPER CO.**SONORA**

Probably dead. Last address: 2105 East Superior St., Duluth, Minn. Mine near Cananea, Sonora, Mexico. Described in Vol. XII.

FENOMENO MINING CO.**BAJA CALIFORNIA****Address:** Tecata, Baja Calif., Mex.**FORTUNA MINES CO. OF MEXICO, LTD.****CHIHUAHUA**

Subsidiary of Santa Eulalia Mng. Trust, Ltd., a British Corporation.

Address H. A. Searle, sec., 65 London Wall, London, E. C. England.

Directors: T. Davidson, H. A. Searle, H. Limebeer, A. S. Northcott and W. Pocock. W. J. Deavitt, supt.

Inc: January 1920. **Cap.** £200,000; 5s par. Company acquired holdings of Manta Mng. Co., Ltd., 1921.

Property: Carmen silver-lead group, 47 acres, at Santa Eulalia, 15 miles S. E. of Chihuahua, Mex., reported shipping high-grade silver ore.

FORTUNA, S. A.; COMPANIA MINERA LA. AGUASCALIENTES

Address: Aguascalientes, Mex. **Mine office:** Tepezala, Ocampo, Aguascalientes, Mexico.

Officers: Geo. B. Wardman, pres.-gen. mgr.; O. F. Westlund, v. p.; DeWitt Crevelling, sec.-treas. Alberto Pez, supt., at last accounts.

Inc. 1902. Cap. 200,000 pesos; shares 100 pesos par.

Property: 20 hectares, including La Fortuna and adjoining mines.

Development: by tunnels and a 100-meter blind shaft to a vertical depth of 200 meters, and length of 600 meters, showing oxidized argentiferous copper ores of commercial grade.

FRESNILLO CO.

ZACATECAS

Address 82 Beaver St., New York.

Inc. 1910, in New York. Cap. \$2,000,000 com. and \$500,000 7% cum. pfd.; \$100 par; \$1,500,000 com. and \$500,000 pf. outstanding.

Property: bonded on a 60-40% profit basis, to **The Mexican Corporation, Limited**, which see.

GARRETSON-SAHUARIPA CO.

SONORA

Probably dead. Mine at Calera, Sahuaripa, Sonora, Mexico. W. H. Farnsworth, pres.; Laurens Enos, v. p.; W. H. Davenport, sec.; D. B. Sherman, treas.; John A. Moore, supt., at last accounts

Inc. 1903, in Arizona. Cap. \$600,000; shares \$100 par; non-assessable; issued, \$450,000.

Property: 96 hectares, and 14,000 acres of surface rights, about 30 miles S. E. of Sahuaripa, includes La Calera mine, having 6 orebodies, 2 under development, of 3' to 6' width, estimated by company to average 2% copper, 45 oz. silver and \$14 gold per ton, which is interesting, if true. Mine has about 1,200' of workings.

The smelter, 1 mile from the mine, has a 50-ton 29"x48" Garretson pyritic blast furnace. Idle for years awaiting construction of the Sonora Central railway from Tonichi, which has been surveyed to pass through this property.

GRANADENA MINING CO.

HIDALGO

Closed down by revolution. Mine at Santa Barbara, Hidalgo, Mex., produces silver-lead ore with a small amount of copper. Fully described Vol. X.

GREENE CANANEA COPPER CO.

SONORA

Office: 25 Broadway, New York.

Officers: W. D. Thornton, pres.; Cornelius F. Kelley, v. p.; Jos. W. Allen, sec.-treas.; W. S. Harper, asst. sec.-asst. treas.; H. B. Paull, aud.; Philip L. Foster, Cornelius F. Kelley, Walter Douglas, W. D. Thornton, Wm. E. Corey, John D. Ryan, Jos. B. Cotton, Jos. W. Harriman and L. D. Ricketts, directors.

Inc. Dec. 26, 1906, in Minnesota. Cap. \$60,000,000; shares \$100 par; issued \$50,000,000. The New York Trust Co. and Old Colony Trust Co., Boston, transfer agents; Bankers Trust Co., New York, and State Street Trust Co., Boston, registrars.

Shares listed on the New York and Boston Stock Exchanges. Range of shares during 1920 was 28¼ in January and 15 in December. Total sales in New York were 71,663 shares.

In Feb. 1921, company took a 4.63% interest, \$1,852,000 total amount, in the Copper Export Association's \$40,000,000 8% bond issue.

The Greene Cananea owns the entire stock issue of Cananea Cons. Copper Co., the operating company which holds title to the Mexican properties.

Earnings: as the company's average profit per pound for the past 10 years was 5.65c., earnings on an average annual copper production, equivalent to 78.8 lb. copper per share, are equal to \$4.45. The silver production alone could probably take care of a dividend requirement of \$2 a share.

The Cananea Consolidated Copper Co., S. A.

Mines and works: Cananea, Sonora, Mexico. C. E. Mills, pres.; T. Evans, v. p. and gen. supt.; Geo. Young, sec.-treas.; Casey Stites and W. S. Harper, asst. sec'ys; T. Evans, traffic mgr. and purch. agt.; G. W. Prince, smelter supt.; F. J. Strachan, mill supt.

Inc. Sept. 30, 1899, in Mexico. **Cap.** 20,000 pesos, shares \$1 gold par. Entire stock owned by Greene Cananea Copper Co., the C. C. C. Co. being merely the operating company, holding direct title and right to operate the property, as is necessary under the laws of Mexico.

Property: 14,062 hectares, or approximately 34,738 acres mineral lands held by mining patent from the Mexican government. The surface lands also owned by the company comprise 130,414 hectares, or approximately 322,123 acres. All of the mines, works, offices, warehouses, stores, etc., of

the company, and valuable residence properties, occupied by local officials and employees in Cananea, are located on its own land.

Cananea is a community of 16,000 inhabitants, located 40 miles south of the International boundary line, on a branch railway of the Southern Pacific lines of Mexico.

Geology: the mines are situated in the Cananea mountains, in northern Sonora, within sight of and 40 miles south of Bisbee, Arizona. The mines are in a mineral belt, about 6 miles long, in a N. W.-S. E. direction, and about 2 miles wide. The oldest rock is pre-Cambrian granite, which is overlaid by Cambrian quartzite, in turn overlaid by Cambrian limestone. Breaking through these rocks, and covering much of the mineral belt, is a series of igneous rocks of Tertiary age, which include many varieties of massive intrusive volcanic rocks, largely as bedded tufts.

Three main classes of ore deposits are recognized: (1) Deposits containing secondary chalcocite together with iron pyrite either massive or disseminated along shear zones in diorite porphyry; (2) Contact deposits containing chalcopyrite associated with iron pyrites and some zinc blende in a matrix of altered limestone; (3) Disseminated chalcopyrite associated with zinc blende in a diorite porphyry breccia.

The 3 great mines of Cananea are the **Veta Grande**, **Oversight** and **Capote**, which have large bodies of direct smelting ore and also contain great deposits of concentrating bodies. This ore contains copper as chalcocite, disseminated through diorite porphyry in broad shear zones.

The Capote mine differs from the Veta Grande and Oversight in that the ore occurs not only disseminated in diorite porphyry but also in the underlying granite. There are 3 principal ore shoots connected by continuous ore on the various levels. The ore in the upper levels is chiefly chalcocite, but the new shoot consists of massive pyrite with primary chalcopyrite and bornite in granite.

The **Cobre Grande** mine, the original mine of the Cananea Consolidated Copper Co., has been idle for some years, save to supply converter lining. The ore occurred in a wide vein traversing both altered limestones and igneous rocks.

The **Kirk** mine is situated in an extensive area of highly-altered limestone capped with diorite porphyry and cut by small, irregular dikes and intrusions of the same material. The ore is not adapted to concentration and it is necessary to hand-pick it as mined. The sorted ore carries a desirable high percentage of lime and iron.

The **Chivatera** has a large body of oxidized ore containing about 2% copper, but averages 12 to 15 oz. silver and some gold. As the orebody now stands it contains several years' reserves on the basis of 150 to 200 tons daily production, and there is a considerable territory lying ahead of present exploration that gives promise of important development.

The **Sierra de Cobre** property was acquired by purchase from the Phelps-Dodge interests several years ago, and since its acquisition has proved to be a large and profitable mine. The ore occurs in fissures in the limestone, the fractures running out from the Eureka fault. The ore occurs as a replacement of the limestone, both in the veins and as irregular deposits of pyrite and chalcopyrite that follow the bedding planes of the limestone on each side of the veins. The Sierra de Cobre property also has an extensive area of undeveloped ground lying in the limestone areas, along which smelting ore has been found in the Kirk mine and elsewhere.

The **Elisa** mine contains a number of lenses of ore lying approximately parallel to a nearly vertical fault between limestone and the diorite porphyry. The lenses occur in the limestone at the fault and back of it for a distance of 150', along a zone some 1,500' in length. The ore consists of a garnet matrix containing chalcopyrite and iron pyrite. It is a desirable basic ore for the smelter, containing about 20% of lime in addition to the iron.

Ita is a small mine whose ore occurs on a contact between y and quartz porphyry. The orebodies are not large and ous. New development work in the vicinity of Henrietta wn workable orebodies.

itos mine and the town of that name are located at the N. mineral belt and at the terminus of the narrow-gauge company. The Puertecitos ore deposit has a great oute altered by igneous contact metamorphic action to lime- c and containing carbonates of copper and some chalcopy-

Large areas of this outcrop contain enough copper to war- ick is carried on by means of large quarries. The ore as ficiently rich to be sent direct to the smelter, but has to and-sorted, yielding about 4 tons of waste material to each

mine, one of the earliest producers of the camp, located ertecitos, has been reopened with a view to again putting ing class. The ore from the mine is similar to that of

Duluth mine has an orebody that is a neck of diorite and 200' wide, intrusive in bedded tuffs. The diorite is shatt- for 200' to 300' below the surface is impregnated through- and copper minerals. On the 600', lowest level, the cen- g canoe-shaped orebody. The ore carries good silver and about 2% copper.

in 1920 totaled 76,431' including drifts on 7th and 8th anea Duluth, 6th and 7th level of the Kirk and 11th and e mines. Total development work, 200 miles. Develop- n 1918 amounted to 13½ miles, compared with 5 miles in d 1½ in 1915.

kept pace with extraction in 1918 and 1919, but in 1920. ase in visible ore reserves at the Capote, Oversight and nes, but an increase in the Cananea Duluth. Definite ton- n.

reene-Cananea is one of the best equipped of the North roducers, as is necessary by reason of its isolated loca- tion includes practically everything from the producing end ress, to the maintenance of a community. The electrical of turbines and engines having a capacity of 5,850 K. W.) K. W. direct current, transmitting up to 11,500 volts. blant, current is supplied for every phase of the enter- eption of the pumping plants at Oja de Agua. These ng the water a distance of 9 miles, using a crude oil for the generation of the necessary steam, for the opera- ng engines.

ng plants have a daily capacity of 2,800 tons and con- olant, sampling mill, two concentrating mills, a settling lant. The concentrators have been remodeled recently system installed.

trates, fluxes, etc., for the blast furnace treatment, are d to the main receiving bin over a narrow gauge rail- passing the sampling mill is conveyed to the bedding tributed evenly over the entire length of the bed by hich is automatically tripped. The mixed ore is re- e which has a capacity of 175 tons per hour, the charge avity above the furnace into measuring hoppers hold- There are 5 such hoppers at each furnace, and these are ectly into the furnace, or into the feed floor. At the otte blast furnace, the company has its own roasting

plant, reverberatory furnaces for smelting fine ore and Great Falls type Bessemer converters 12' in diameter.

The company owns and operates 36 miles of standard and narrow gauge railroad, including branches, spurs and sidings connecting with the Nogales and Naco branches of the Southern Pacific lines of Mexico and by this line with the El Paso and Southwestern Railroad at Naco, Ariz.

The following table summarizes operations:

Year	Ore Concentrated tons	Cost of Milling	Products Smelter, tons	Cost of Smelting
1920.....	288,176	782,989
1919.....	220,821	\$1.87	715,621	\$3.51

Employs 3,247 men, 211 of whom are not Mexicans. Improvements in 1922 will cost \$1,000,000.

GUADALUPE DE LOS REYES; NEG. MINERA SINALOA

Address: Apto. 80, Mazatlan, Sin., Mex.

Mine address: Guadalupe de los Reyes, Sin., Mex.

Officers: Marcial Yribarnegaray, pres.; Leopoldo Guerrero, mgr.

Property: the Estaca and Descubridora silver mines.

Equipment: 100-ton concentrator, with flotation and cyanide plants.

Employs 250 men.

GUADALUPE LEAD SMELTER NUEVO LEON

Works address: Guadalupe, N. L., Mexico.

Is a custom plant owned and operated by the Cia. Minera de Penoles, which see for details.

GUANACEVI TUNNEL CO. DURANGO

Mine at Guanacevi Santiago Papasquiario, Durango, Mexico.

Inc. 1904, in Arizona. Cap. \$5,000,000; shares \$5 par. Debts amounted to \$150,000 in 1912 and have since increased.

Property: is in hands of trustees until conditions in Mexico permit of financing company sufficiently to carry on the extensive development planned. There are 22 properties, including timber rights and original concessions, said to possess large bodies of gold and copper ore. The mine has 3 shafts of 100' depth each, with tunnels of 1,250' and 1,400', the main tunnel, 7x9', planned to be driven about 3 kilometers, management estimating that in this distance a large number of veins carrying lead and copper ores should be cut, the tunnel being estimated as likely to cost about \$250,000.

The L. Diamond Co., of Boston, was never a representative of this corporation, but a number of brokers bought stock and combined to unload on the public at unduly high prices.

Idle for several years.

GUANAJUATO CONS. MNG. & MILLING CO. GUANAJUATO

Subsidiary of Exploration Company of New York.

Office: 35 Wall St., New York

Mine address: Jos. Mac Donald, gen. mgr., Guanajuato, Gto., Mexico.

Officers: Fred G. Corning, pres.; Robt. Mulford, v. p.; C. Van Rensselaer Cogswell, sec-treas.; with Walter D. Clark, Walter W. Storer, R. A. Walker, W. Lawrence Green, Chas. G. Molin, Sidney Green, all of New York, and Geo. A. McGlone, Charleston, W. Va., directors.

Inc. 1899, in West Virginia. Cap. \$3,000,000; shares \$5 par; 566,184 issued. \$169,080 of the unissued stock has been set aside to retire the outstanding 7% bonds. State St. Trust Co., Boston, transfer agent. Old Colony Trust Co., Boston, registrar. Annual meeting in January, at Charlestown, W. Va. Listed on Boston Stock Exchange and dealt in on New York Curb.

Bonds: authorized \$300,000; outstanding \$128,000 convertible debenture 7's, dated January 2, 1904, due January 2, 1924. Interest January 2 and July 2, at New York office of company. Coupon and registered bonds, \$100, \$500 and \$1,000; convertible at 120 into stock at par; 10% of net earnings is set aside for redemption of this bond issue. Coupon No. 22, due January 2, 1915, on the debenture bonds, was payable on May 15, but No. 23, due July 2, 1915, was deferred until further notice. Trustee, Columbia Trust Co., New York.

Sold \$15,000 of 7% bonds for \$150 the lot at public auction in New York on Dec. 16, 1920.

Dividends 1¼%. 6¼c per share, paid July 31, 1906; 1½%, 7½c per share, October 31, 1906; none since.

Balance sheet December 31, 1913, the last one published, showed assets of \$3,495,586, which included mines, plants, etc., \$3,136,890; supplies, \$78,896; cash, \$96,996. Liabilities included: 6% bonds, \$5,000; refunding notes, \$53,800; surplus, \$200,000; sinking fund, \$28,409; undistributed profits, \$45,019; notes payable, \$10,466.

Income account for 1913, last reported, showed: Receipts—bullion and concentrates, \$670,142; expenditures, mining, etc., \$302,452; ore bought, \$176,585; treatment charges, \$39,186; bullion expense, \$23,413; taxes, etc., \$26,674; total \$568,312. Gross profit, \$101,830. Deduct: bond interest, \$13,412; depreciation, \$33,427; bond redemption reserve, \$5,494; total, \$52,333. Net profit, \$49,498; undistributed profit forward, \$45,522; total \$95,019. Forward to surplus accounts, \$50,000. Undistributed profit, December 31, 1913, \$45,019.

The company owns a large interest in the Carmen-Guanajuato gold Mining Co.

Property: the Sirena, San Bartolo and San Vicente mines in the Guanajuato district. Of these the Sirena is the oldest, having been worked for 100 years. Under normal conditions it has a monthly output of 7,500 tons of milling ore, with value mainly in silver. Vein varies in width from 3' to a maximum of 200'. Ore reserves of the Sirena mine were estimated 1913 as 800,000 to 1,400,000 tons blocked out, pillars and fill; Penafil lease, 180,000 tons. Only development work being done since May, 1920. Employs 500 men when active.

Development: by shafts to depth of about 1,000'.

Equipment: includes 80-stamp, 250-ton concentrator, 250-ton cyanide plant, electric power, etc.

GUANAJUATO DEVELOPMENT CO. GUANAJUATO

Office: 50 Broad St., New York. Corporate office: Jersey City, N. J. Mine office at Guanajuato, Gto., Mexico.

Officers: Geo. W. McElhiney, pres.; Wright Johnson, v. p.-sec.; P. E. Sharpless, v. p.; W. H. Porter, treas.; with C. G. Fowler, H. C. Field, H. O. Marcy, John A. Martin, and F. G. Peck, directors. John Pritzel, asst. treas.; Geo. W. Bryant, attorney in fact, in Mexico.

H. C. Field, gen. mgr.

Inc. Feb. 24, 1906, in New Jersey. **Cap.** \$300,000 com. and \$600,000 pfd., decreased June 24, 1916, from \$1,000,000 6% cum. pfd.; \$3,000,000 common; pfd. \$60 par; com. \$10 par. Preferred stock has preference as to assets and is subject to call at par and accrued dividends on any semi-annual dividend date. Stock transferred at company's office. Annual meeting, first Wednesday after second Tuesday in June, at Jersey City, N. J.

Dividends: preferred, paid semi-annually Jan. and July 1, from 1906 to 1910, inclusive, none since.

Property: company controls the **Pinguico Mines Co., Mexican Milling & Transportation Co.** and **Peregrina Mining & Milling Co.** and the **Esperanza Mine**. Properties are located at Guanajuato, Gto., and are held under Government titles, options, etc.

The mines have strong fissure veins cutting bedded volcanic tuffs and intrusive rocks. The ore-shoots contain rich silver ore with gold values, in a quartz gangue. Lead and copper are practically absent.

Esperanza Mine.

Address: P. R. Hudson, gen. supt., Guanajuato, Gto., Mex.

Mine yields free silver ore with low gold values, treated in San Mathias mill of Mex. Mlg. & T. Co.

Development: by shafts and extensive levels to depth of 600'.

Employs 250 men.

Mexican Milling & Transportation Co.

Subsidiary of Guanajuato Div. Co.

Address: O. W. Johnson, supt., Guanajuato, Mex.

Property: the San Mathias concentration mill with crushers, 40 stamp battery, tube mills and cyanide plant, treating 300 tons of silver ore a day. Employs 250 men under normal conditions.

Peregrina Mining & Milling Co.

Mine address: W. T. Kendall, gen. supt., J. G. Reilly, supt., Guanajuato, Gto., Mex. Same officers, as Guanajuato Dev. Co., with H. C. Field, A. G. Lund, John A. Martin, Frank G. Peck, and James Tracy Potter, directors.

Inc. Feb. 21, 1905, in New York. **Cap.** authorized and issued, \$1,000,000, 7% cum. pfd., and \$2,000,000 common. **Shares:** preferred, \$100; common, \$10. Annual meeting in June in New York.

Dividends: preferred paid 3½% in 1905; 1906 to Sept. 1, 1910, inclusive, 7% per annum; none thereafter until April 15, 1915, when 3½% was paid. Common none. Preferred dividends, payable March 1 and Sept. 1, at 50 Broad St., New York. Last one, of 5% paid April 15, 1916.

Financial report for year ending Dec. 31, 1918, the last issued, shows a total deficit of \$547,090, compared with a deficit of \$379,397 in 1917.

Property: about 175 acres, which include a group of old producing silver-gold mines near Guanajuato, Mexico. Output under normal conditions, 13,000 tons per month. Ore reserves estimated January 1, 1919, at 70,000 tons.

Equipment: includes milling and cyanide plants. Ore milled in 1918 was 55,146 dry metric tons.

Operations continuous for 15 years, until suspended September, 1921, owing to increased taxation and general depletion of reserves. Total amount milled about 1,250,000 tons.

Pinguico Mines Co.

Controlled by the Guanajuato Dev. Co.; same officers; with W. B. Field, H. O. Marcy, Jr., A. G. Lund, J. A. Martin, H. C. Field and Frank G. Peck, directors.

Inc. Sept. 13, 1906, in New Jersey. **Cap.** authorized and outstanding, \$1,000,000 6% cum. pfd. and \$500,000 common, reduced from \$2,000,000 and \$5,000,000 respectively June 24, 1916. Shares: preferred \$50; common, \$1 par. Preferred stock has preference as to assets and is subject to call at par, and accrued dividends on any dividend date. Stock transferred at company's office. Annual meeting, first Friday after second Tuesday in June at 15 Exchange Place, Jersey City, N. J. Fiscal year ends December 31.

Dividends: preferred, 1907, to Oct., 1913, inclusive, 6% per annum; none reported since. Common, none. Preferred payable April and October 1 at 50 Broad St., New York.

Property: the Pinguico mine, 5 claims, 300 acres, covering 3,200' on the main Pinguico vein, near Guanajuato, Gto. **Ore:** silver-gold. **Development:** Pinguico shaft, 800' deep, and the Fortuna, 670' deep, with several miles of underground workings. **Equipment:** includes a 40-stamp mill and 250-ton cyanide plant.

Company has been developing the Esperanza mine at Santa Ana, held under lease and bond. The group consists of 197 acres on the mother lode, 2½ miles N. W. of Guanajuato. H. C. Field in charge.

Employs 250 men, normally.

GUANAJUATO REDUCTION & MINES CO., THE GUANAJUATO

Address: Columbus, Ohio. Mines and mills at Guanajuato, Gto., Mex.

Officers: C. L. Kurtz, pres., Columbus, Ohio; Wm. G. Moore, v. p.; Geo. D. Bounton, v. p., Philadelphia; C. J. Kurtz, sec.-treas.; with C. J. Schlachter, Wm. D. Sherrerd, Robt. T. Moore, Geo. W. Chase and L. O. Bailey, directors. W. G. Wheaton, auditor; H. P. Smith, gen. mgr. at Guanajuato; Louis S. Noble, cons. engr., August McDonald, mill supt.

Inc. 1904, in Colorado, as a consolidation of several silver and gold mines in the Guanajuato district. **Cap.** \$75,000; \$1 par. Stock transferred at company's office, Columbus. Empire Trust Co., New York, registrar. Annual meeting, first Tuesday in February, at Colorado Springs, Colo. Listed on New York Curb.

Bonds: authorized \$3,000,000; outstanding, \$2,800,000, first mortgage 6%, 20-year, \$100, \$500, and \$1,000 gold bonds, dated July 1, 1904, due July 1, 1924; interest January 1 and July 1, at office of the trustee, Empire Trust Co., New York.

Bond interest was deferred January 1, 1915, and operations temporarily suspended in August, 1916, due to the revolution in Mexico and also to the inability to secure cyanide and other supplies.

The company was unable to convert its product into cash on account of the Mexican revolution and defaulted, July 1, 1914, interest on its first mortgage 20-year 6% bonds; this interest was paid in January, 1915. On February 1, 1919, interest was paid for the period July 1, 1914 to January 1, 1915.

Comparative Income Account, years ended December 31:

Year	Gross Earnings	Operating Expenses	Net Earnings	Bond Interest	Balance for year
1920.....	\$1,285,048	\$1,166,228	\$118,820	\$168,000	\$49,180(b)
1919.....	1,618,567	1,227,157	391,410	168,000	223,410
1918.....	1,213,872	1,044,673	169,199	168,000	1,199
1917.....	1,214,145	1,043,940	170,205	168,000	2,205
1916.....	353,357	339,314	14,043	168,000	153,957(b)
1915.....	489,724	366,434	123,290	168,000	44,710(b)
1914.....	1,523,668(a)	1,361,720	161,948	168,000	6,052(b)
1913.....	1,149,176	839,674	309,502	168,000	141,502
1912.....	1,004,290	693,477	310,813	168,000	142,813
1911.....	930,280	648,247	282,033	168,000	114,033
1910.....	931,562	618,414	313,148	168,000	145,148

(a) Includes deduction of \$64,191 for conversion of accounts from 2 to 1 ratio to U. S. currency. (b) Deficit.

Property: a group of famous bonanza silver mines in the Guanajuato district in which much of the ore is in the form of old stope-fills. Since 1918, La Luz group, embracing the San Pedro, Purisima, Rosario and Pili mines, has been acquired. Also, in late 1919, the Promontorio mine was leased on a 50c. royalty basis.

Development: consists quite largely of opening old workings, extensions in solid ground averaging about 10% of the total, which in 1920 was 6,674 meters. Work on the Promontorio which shows the extensions of the Garrapata orebody has not proved encouraging. On La Luz, a new 3-compartment shaft had reached 115 meters in April, 1921, and at the Pili mine a 4 meter vein of good ore grade was uncovered.

Operating results for 1918:

	Prod. tons	Silver, grams	Gold grams	Cost	Reserves Met. tons
Tepeyac—Valenciana.....	8,338	270.0	2.00	\$3.59	19,950
Maravillas—Cata.....	18,842	225.0	1.64	2.76	38,700
Melado—San Miguel.....	27,363	244.0	2.20	2.79	30,580
Mellado—Kurtz.....	20,899	220.7	2.02	2.08	50,880
Mellado—Rayas.....	13,484	202.0	7.69	3.65	15,520
Mellado—Garrapata.....	35,137	199.3	3.33	2.06	77,515
Promontorio	4,754	194.7	3.90	2.67
Dumps.....	87,473	153.9	1.36	0.41	483,143
Total.....	216,290				716,288

The reserves average 219 grams of silver and 2.55 of gold; there is also a probable tonnage of 234,225 with an average of 229 grams of silver and 2.27 of gold. La Luz group has no reserves as yet but its dumps will afford 249,000 metric tons averaging 177 grams of silver and 1.78 grams of gold.

Equipment: includes the Bustos 160-ton stamp and concentrating mill and Flores cyanide plant. Crushed ore is sent from the mill to the treatment works through 6,000' of 8" pipe.

In December, 1920, the San Pedro 20-stamp all sliming mill on the La Luz property was completed and was operating shortly thereafter; the capacity is 200 tons.

Production, year ending December 31:

Year	Tonnage	Silver grams	Gold, grams	Extraction.		---Cost---	
				Silver, %	Gold, %	Mining per ton	Milling per ton
1920	217,074	194.7	2.36	84.25	84.23	\$2.74	\$1.97
1919	217,965	198.6	2.55	84.08	83.13	2.75	1.96
1918	187,760	209.7	2.29	78.08	80.39	2.91	2.10
1917
1916	64,030	245.7	2.49	80.18	85.35	1.44	1.93

Beginning with April 1918, the Bustos mill has operated full capacity, and in spite of low silver prices, it is believed that it and the San Pedro should continue to run "under a modified operation as to ore sources."

GUERRERO MINING CO.

SONORA

Was the Mexican incorporation of the Victor Mining & Smelting Co., which owned 2 properties in Magdalena district, Sonora, Mexico, 10 miles S. W. of Cananea. Properties about one-half mile apart, contain 15 and 32 pertenencias, respectively.

room, coal and ore-bins and reservoirs holding thousands of barrels of water, and with an inexhaustible supply of good water.

A ranch of 25,000 acres lying between the mines and Hermosillo has been acquired for the timber and agricultural land, and the new road through this tract should shorten the haul to Hermosillo several miles.

No record of recent developments.

HIDALGO COPPER MINING & SMELTING CO.

HIDALGO

Office: Avenida Juarez 15, City of Mexico D. F.

Mine office: Zimapan, Hidalgo, Mexico.

Officers: Sydney Ludlow, pres.; Ricardo T. Sobey, v. p.; R. A. Mills, sec.; Hedley Ludlow, treas.; preceding, with George A. Camphuis and W. H. Armstrong, directors. **Staff:** Hedley Ludlow, gen. mgr.; Jas. H. Armstrong, supt.; Plenio Lopez, engr.; Halarion Diaz, chemist.

Inc. Aug. 14, 1907, in Arizona. **Cap.** \$2,000,000; shares \$10 par, in \$1,000,000 preferred and \$1,000,000 common stock. Annual meeting, third Monday in August.

Property: the Concordia and Purissima mines, 500 acres, with a 500-acre millsite, said to carry copper ores, with small amounts of lead ore. Lands show monzonite-porphry and limestone, with contact ore deposits. Copper ores are estimated by the company to average 2.8% copper and 800 grams silver per ton. The mines yield a great variety of ores, including oxides and carbonates, and sulphides of lead and copper.

Development: by shafts and tunnels, with a total of 3,000 meters of workings, estimated to show 50,000 tons of ore, with 20,000 tons blocked out for stoping.

Equipment: includes a small steam plant and 16 buildings. Company employed about 800 men at the mines and works when operating.

The Equitiva Smelter: the 50-ton smelter, at Zimapan, 5 miles from the mine, contains 2 duplicate 20-ton water jacketed blast furnaces, operated for copper matte and occasionally for lead. (See description by R. B. Brinsmade, M. & Sci. Press, Sept. 24, 1921). The smelter received ore by pack-train. Copper is smelted to a 20% matte that is sent to the Aguascalientes smelter. The lead ore from Nevada group of mines averaged 25% lead and 900 grams silver. Employs 250 men.

Inc. 1903, in Mexico. **Cap.** P10,000,000; par P100. Listed on Mexico City Stock Exchange.

Property: the Gicarrero mine, 129 hectares, covering the mineral zone of the Sierra Almoloya. The geological conditions greatly resemble those at Santa Eulalia. Ore occurs in limestone, in lenses, one having a width of 70' and length of 140', ore said to average 5% copper, 25% lead, 6% zinc, 15 oz. silver and \$8 gold per ton. Values are mainly in silver-lead ores, though chalcocopyrite occurs as a by-product.

The mine is extensively developed to a depth of 300 meters, by an 800' shaft and 2 main tunnels.

Equipment: includes 600-h. p. gas and electric power, with hoist and air compressor. A 3-stamp experimental mill is connected with the mine by a 4,000' incline tram. A standard gauge railroad connects the mine with the N. P. R. at Baca. Employs 500 men.

tares, the Treadwell group, 3 miles from Ocotlan,

shows a vertical fissure vein of 2 to 12' width, cutting bedded andesite tuffs, leached and oxidized to depth of 300'.

Development: by a 400' vertical shaft, with 700' of workings, showing chalcocopyrite, with quartz gangue, estimated by company to average 4.5% copper and 200 grams silver per metric ton. Some ore was shipped returning 14% copper and 600 grams, silver per metric ton.

Equipment: includes a 30-h. p. boiler, hoist and a small air-compressor for hammer drills.

Idle since 1912 owing to conditions in Mexico.

LA JARA GOLD MINES CO.

TEPIC

Idle and probably dead.

Office: W. P. Dunham, pres.; E. G. Thomas, v. p.; J. W. Dunham, sec.-treas.

Inc. in Maine. **Cap.** \$3,000,000; shares \$1 par; 2,500,000 issued.

Property: the old Natividad group of claims, 298 acres, at La Jara. Tepic, said to show large quartz veins in andesite carrying gold-silver ore. Mine was under development by tunnels until July, 1916, when conditions in Tepic became dangerous to Americans.

In 1917, company acquired an option on the Jim Crow-Imperial group of patented claims about 123 acres, in the Steeple Rock district, New Mexico, about 7 miles E. of Duncan, Ariz. Said to have made ore shipments in the past running from \$22 to \$500 a ton in gold and silver.

LA LEONA SILVER MINING CO.

OAXACA

Address: Mirabeau C. Towns, 3 Maiden Lane, New York; or Rickards Hermanos, Mexico City.

Property: 11 claims, 80 miles from City of Oaxaca. According to the "New York Curb" of August 24, 1918, Louis Roumagnac and associates, of the Tuxpam Star Oil Corporation scandal, advertised that they owned the claims and incorporated a company under the above title, and stated that whoever put money into it would get a fortune. The promoters simply held an option. Fairly large blocks of the \$1,200,000 outstanding shares, \$5 par, were sold at prices up to \$1 a share. The bubble burst when a judgment was obtained by the real owners of mines—Rickards Hermanos of Mexico City.

LAMPAZOS SILVER MINES CO.

SONORA

The only data obtainable about this corporation was from George Graham Rice's "Industrial and Mining Age."

Office: formerly at 40 Exchange Place, New York; or the Registrar & Transfer Co., 900 Market St., Wilmington, Del.

Officers: at last accounts, H. J. Wendler, v. p.-gen. mgr.; I. H. Weinberg, sec.; with C. S. Herzig and J. J. Harper, directors. Judge H. D. Rummel, Charleston, W. Va., attorney.

Inc. Jan. 15, 1918, in Delaware. **Cap.** \$3,000,000; \$1 par; 2,000,000 issued.

Company has no property, having lost its option on the Lampazos mine, now owned by Max Muller, Epes Randolph estate and the Bank of Sonora. 443 acres, containing 17 mines, 4 of which have been developed. The mine is reported to have 200,000 tons of 30-oz. silver ore blocked out, with continuous bands of ore for 1,500 to 2,000' that extend down to bottom of mine 750' below surface. A 12-mile wagon road was constructed.

The Lampazos appears to be a good mine whose name has been clouded by scandalous promotion methods.

LANE-RINCON MINES, INC.

o. E. Voorhees, Jr., Santa Barbara, Calif.
stenes, Coyame, Iturbide, Chihuahua, Mex., consists

of 74 hectares, said to show upturned Cretaceous sandstones and shales with interbedded copper lodes, occurring as impregnations and replacements in sandstone. Four veins last under development are reported to average 7 to 12' in width, and to give average returns of 7.5% copper and 3 oz. silver per ton, mainly from disseminated bornite and chalcopyrite, with occasional oxidized ores and native copper.

Development: by shafts of 61', 98', 125' and 212' with various levels; also 3 short tunnels. Workings estimated to develop 160,000 tons of ore.

Equipment: includes steam power, a hoist, and air compressor, and a 100-ton concentrator. Buildings include an office, store and 19 dwellings. Ore was hauled, 43 miles, to Las Trancas stations, by traction engine.

Reported under lease to **Cia. Minera Cuatro Senores, S. A.**

LAUGHLIN MINING CO.

SONORA

Address: W. C. Laughlin, or George Schroter, San Javier, Sonora, Mexico.

Property: Las Animas silver mine at San Javier, leased from the Wyman Mining Co., of Cleveland, Ohio. A leaching plant to handle 50 to 100 tons of ore a day was put in operation early in 1918.

No recent information.

LA UNION CONSOLIDATED COPPER CO.

SONORA

Address: C. B. Bell, Douglas, Ariz., owner.

Property: 660 acres, in Cerro Tordillo section of the Ajo mountains, W. of Fronteras, Sonora, Mexico, shows a 3' to 20' vein traceable a mile, that carries high-grade copper, gold, silver, zinc ore in a contact deposit in lime near an intrusion of porphyry.

Development: by 5,000' of tunnels and shafts to depth of 500'. Shipments of 1,500 tons made 1914 returned 15% copper, 15 oz. silver and 0.1 oz. gold. The property was worked in 1882-86, acquired by present owner in 1906, and considerable work done in 1912-13-14. C. B. Bell plans resuming operations, 1922.

LLUVIA DEL ORO MINING CO.

CHIHUAHUA

Address: Rialto Bldg., St. Louis, Mo.

Tigre Mining Co., S. A.

mgr., Douglas, Ariz.
 El Tigre, Son., Mex.; Ernest J. Stanley, mine supt.,
 mine, 13 claims, 936 acres. at El Tigre. Montezuma
 contains veins of gold-silver-lead-copper ore cut-
 ting is from 3½-25' wide, proved for 4,000' in length,

and runs N.-S. with average dip of 65°. Geology fully described in M. & S. Press, Oct. 23, 1920.

Development: by 1,300' incline shaft and 5,000' tunnel, with over 1½ miles of workings. Ore is mined mostly by overhead shrinkage, and electric haulage is employed underground. During 1920, work amounted to 11,217'; the main vein was opened for 1,000' on the 9' level, and averaged 50 oz. silver per ton. Good ore was also opened in the Kelley vein on the 5th level.

Equipment: includes electric power, 25-h. p. electric hoist, pump and 200-ton concentrating mill making an average extraction in 1920 of 96%. The mill treated 76,212 tons of ore and produced 6,748 tons concentrate averaging 2.78 oz. gold; 433.31 oz. silver; 3.9% copper; 14.05% lead. Costs were \$4.48 for mining and \$3.75 for milling.

Production: in 1920 was 77,454 tons, averaging .25 oz. gold; 40.1 oz. silver; 37% copper; 1.38% lead.

Company has been able to continue operations and shipments more or less regularly, notwithstanding disturbed conditions in Mexico during the past years.

MAGISTRAL, S. A.; NEGOCIACION MINERA DEL ZACATECAS

Office and mine: Apto. 22, Zacatecas, Zacatecas, Mexico.

Company, a close corporation, is said to have paid for improvements from net earnings. Owns the Refugio de Magistral and San Roberto mines. See Vol. XIII.

No recent returns secured. Property idle owing to Mexican conditions.

MAGISTRAL AMECA, S. A., CIA. DE COBRE JALISCO

Mine office: Ameca, Jalisco, Mexico.

Officers: H. L. Percy, pres.-gen. mgr.; Fred M. Lyon, v. p.; Geo. C. B. Robinson, sec.-treas.; and H. N. Manington, directors.; Percy A. Babb, cons.-engr.; G. E. McCormick, mine mgr.

Inc. 1908, in Mex. Cap. P 1,000,000; par P 100. Is the operating company, whose entire stock is held by the **Magistral Ameca Copper Co.**, incorporated. Annual meeting, second Wednesday in November.

Property: bought of **Las Moras Copper Co.**, for \$100,000 by Patrick Clark, Jas. P. Harvey, H. L. Percy and Fred M. Lyon, the first named selling his quarter interest to his associates for \$55,000.

Property: the Mina Magistral 74 pertenencias, 185 acres, on the Hacienda Hegira, 8 miles S. W. of Ameca, has veins in diorite that are cut by porphyry dikes. The veins occur on dike contacts and show outcrops of silicified rock with quartz stringers and hematite. The vein varies from 4 to 25' in thickness and carries lenticular orebodies connected by mere films of quartz or fissures with wall rock impregnated with chalcopyrite. The Magistral ore shoot occurs where 3 veins intersect. The ore carries copper sulphides (chalcopyrite), and averages from 4 to 7% in copper with about \$2 in combined gold and silver value.

Development: by 321' shaft, and by tunnels with about 1 mile of openings, developing copper ground for width of 5 to 50', said to assay 4 to 8% copper. The Magistral was worked many years ago for bluestone, used by neighboring mines in the process of treating silver-lead ores.

Equipment: includes two 80-h. p. high-pressure boilers and a 150-h. p. tandem compound engine, with hoist good for 500', at the Magistral. The mines are connected with Ameca by a good wagon-road, 8 miles long, with a 1½% grade, built with the idea of using it for railway tracks in the future. The 125-ton concentrator includes a ball-mill and flotation plant.

Owing to disturbed conditions in Mexico, operations have been greatly interfered with. No recent returns securable. Employs 100 to 150 men normally.

MANHATTAN DEVELOPMENT CO.

SONORA

Owns **Arnold Mining Co.** property near Santa Cruz, Sonora, Mexico.

MANHATTAN EXPLORATION CO.**SONORA****Office:** 52 Broadway, New York. **Mine:** at Hermosillo, Sonora, Mex.**Officers:** Grosvenor B. Clarkon, pres., A. H. McCarthy, v. p.; T. Addison Bell, sec.-treas.; with Wm. Tierney, directors.**Inc.** Feb. 6, 1909, in Maine. **Cap.** \$2,000,000; shares \$100 par; \$1,806,000 outstanding. Company is a close corporation.**Property:** several valuable properties, near La Dura in the Yaqui River district, Central Sonora. Two of the properties, the Promontorios, silver-lead and the Mesita, copper-silver-lead ore, had just reached the shipping stage when the Mexican revolution stopped all operations, May, 1912. Company expects to resume operations as soon as country is once more safe.**MANTA MINING CO., LTD.****CHIHUAHUA****Address:** W. Poccock, 18 St. Swithin's Lane, London, E. C., England.**Mine address:** W. J. Deavitt, supt., Sta. Eulalia, Chih., Mex.**Inc.** 1909. **Cap.** £1,000,000; £1 par; all issued.**Property:** the Manta silver-lead mine at Santa Eulalia, Chihuahua, reported sold 1921 to Fortuna Mines Co. of Mexico, Ltd., which see**MAPIMI LEAD SMELTER****DURANGO****Works address:** Mapimi, Durango, Mexico.

Owned and operated as a custom smelter by Cia. Minera de Penoles, which see for details. Plant will eventually be consolidated with that at Torreón.

MARIA MINING CO.**SONORA****Office:** 516 Providence Bldg., Duluth, Minn.**Officers:** Joseph Backus, pres., Virginia, Minn.; Jas. A. Butchart, sec.-treas.; with Thos. F. Brady, Martin Trewhella and Thos. A. Armstrong, directors.**Cap.** \$500,000; shares \$1 par.**Property:** the Carmen mine, in Arizpe mining district, Sonora.**Ore:** silver, gold, in veins in andesite and rhyolite.**Development:** by shaft; greatest depth 350', with 3,000' of underground workings. Had been idle 4 years, owing to the revolution, but resumed work in February, 1917 and rich silver ore was extracted. On account of bandits work was again suspended.**MASCOTA COPPER CO.****JALISCO**

Supposedly dead. Mail returned from former address, Ameca, Jalisco, Mexico.

Officers: Chris. D. O'Brien, Sr., pres.; J. M. Bowler, v. p.; Byron J. Mosier, sec.-treas.; Chris D. O'Brien, Jr., gen. mgr., at last accounts.**Inc.** June, 1908, in Arizona, as successor of Independence Mining & Smelting Co. **Cap.** \$1,500,000; shares \$1 par.**Lands:** 46 hectares, said to include an antigua mine, in the Guachinango division of the Mascota district, 24 miles from the Mexican Central line. The claims show an 8' fissure vein in porphyry, said to be traceable about 2,000' and proved to depth of 486'. The ore is reported to average 5% copper, 7 oz. silver and 6 grams gold per ton.**Development:** includes 300' shaft and 375' tunnel, with 4,825' of workings, estimated to show 40,000 tons of ore, with 28,000 tons blocked out for stopping.**Equipment:** included 50-h. p. steam plant, with 3-drill air-compressor, a 25-ton wooden stamp-mill with 10 Allis-Chalmers gravity stamps, and a small concentrator, equipped with 2 Overstrom tables, vanner, 4 slime tables and a sizer. Operations suspended on account of revolution.**MATEHUALA SMELTER****SAN LUIS POTOSI**

Owned by National Metallurgical Co., a subsidiary of A. S. & R. Co.

Office: 120 Broadway, New York. **Operating address:** C. L. Baker, gen. mgr., El Paso Texas. **Works address:** Matehuala, San Luis Potosi, Mexico.

Is a copper smelter drawing ores from the nearby mines of Le Paz and Catorce. It is on the Mexican Central railway, has a complete plant including jaw-crusher, sampler, ore-bedding plant, 4 hand-fed blast-furnaces, total capacity of 400,000 tons annually, 3 cycloidal blowers giving 24-oz. blast pressure driven by 180 and 200-h. p. steam engines, 5 boilers, forehearth, slag-cars, electric locos for slag dump, generators, machine-shops. The plant turns out a matte averaging 45% copper which is sent to the Aguascalientes smelter for conversion. The smelter was idle in 1916, but was blown-in early in 1917, and operated nearly continuously since then.

MAZAPIL COPPER CO., LTD.**ZACATECAS**

Office: C. R. Darlington, 47 Peter St., Manchester, England. **Mine address:** Apartado 64, Saltillo, Coahuila, Mexico.

Directors: Alfred Crewdson, chairman; R. R. Crewdson, Col. Arthur Dugdale, W. A. R. Heaven, A. B. Mallinson, J. Ramsden, and J. W. Purcell. R. H. Jeffrey, mgr.; J. F. Allen, cons. engr:

Inc. February, 1891, and re-incorporated April 21, 1896, in Great Britain. **Cap.** £1,000,000; par £1; was originally £200,000 in £10 shares, but increased 1903 to £300,000 and in July, 1912 to £500,000, shares subdivided, and £140,830 transferred from reserve fund and 5 shares given as bonus for every old £10 share held. In Feb., 1920, changed to £1,000,000 and 100,000 given to shareholders as bonus. **Debentures:** £120,000 at 7%; £114,500 issued.

Dividends: 20% in 1910; 20% and a 5% bonus in 1914; 30% cash and 50% bonus in 1912; nothing 1913 to 1916; 5% in 1917; 7½% in 1918; 22½% in 1919; 20% bonus in shares, in 1920.

Company owns and operates the Coahuila and Zacatecas railway, running from Saltillo to Concepcion del Oro, 2 smelters and various mines, employing over 4,000 men normally. Operations were suspended June, 1913, by the Mexican revolution, but were partly resumed in March, 1917. Also owns a half interest in the New Sabinas Ltd., owning coal lands in Coahuila, Mexico.

Property: the Mazapil copper mines at Concepcion del Oro, Mazapil, Zac., including about 850 hectares of mineral land in State of Zacatecas. The Aranzazu and Cabrestante mines, carrying copper ores, are the most important; the San Eljijo, Naranjera, Cajon, San Francisco and Protero mines, carrying silver-lead ores, and the Promontorio group, producing mainly fluxing ores. Copper ores occur in irregular masses, in limestone, near granite-porphry contacts, and are opened by over 25 miles of workings.

Equipment: includes a 150-ton concentrating plant. The smelters are at Concepcion del Oro and Saltillo. The first named, of about 800 tons daily capacity, has 4 copper furnaces.

The Saltillo smelter, built 1906, has a lead plant of 300 tons daily capacity, and does a general custom business, as well as treating ores of the company. There are 3 blast-furnaces and 1 reverberatory furnace. Transportation is by 4 aerial trams. Two furnaces were blown in at the Saltillo plant in December, 1921.

Production: in 1918 was 5,320 metric tons copper, 4,250 metric tons lead, 1,005,000 oz. silver and 11,580 oz. gold; 1919 output estimated at 7,500,000 lb. copper. No later figures available.

Operations resumed, March, 1922, at mine and at the Saltillo smelter. Employs normally 3,000 men at mine and smelter.

MELCZER MINING CO.**SONORA**

See Copets Consolidated Copper Co.

MESA RICA GOLD CO.**SONORA**

Address: A. G. Frick, sec., Freeport, Ill.

Inc. 1905, in South Dakota. **Cap.** \$3,000,000; \$3 par; 700,000 issued to J. J. Smith, A. F. Tanner, and others of Chicago, the organizers.

Property: 415 acres, 40 miles E. from Sahuaripa, Sonora. About 3,000'

of development has been done, mainly on the surface. No work is being done, but taxes are paid and a caretaker is in charge.

MESQUITAL DE ORO MINE**JALISCO**

Address: J. E. Hunter & Co., El Paso, Texas.

Property: the Mesquital mine, was a famous bonanza producer, under bond to the Hunter Co. early 1922, and work resumed on vein parallel to bonanza lode.

METATES MINING CO.**SINALOA**

Address: 425 Grosse Bldg., Los Angeles, Calif.

Officers at last account: W. T. Bell, pres.; Ira D. McCoy, sec.

Inc. 1910 in Calif. **Cap.** \$200,000; \$1 par; 141,394 shares issued.

Property: 3,000 acres at Metates, (Mazatlan) Sinaloa, Mex., worked for silver ore.

MEXICANA; COMPANIA METALURGICA**MEXICO**

Offices: 82 Beaver St., New York, and 26, Ave. 15th de Septiembre, Mexico City, D. F.

Officers: Geo. Foster Peabody, pres.; D. C. Brown, 1st v. p.; C. J. Peabody, 2nd v. p.; R. E. Safford, sec., asst. treas., with H. H. Dean, G. F. Peabody, Wm. Mason Smith and Isaac Jackson, directors.

Donald O. Brown was appointed receiver for the company, March, 1921, in an equity suit brought by stockholders in the Montezuma Lead Co. Bondholders Committee: Rm. 1404, 52 William St., New York City.

Inc. 1890, in New Jersey. **Cap.** \$4,000,000; shares \$100 par; fully issued; in \$1,000,000 cumulative 8% preferred stock, \$1,250,000 guaranteed 6% second preferred stock, and \$1,750,000 common stock.

Bonded debt \$2,774,700 first gold 5s. dated July 1, 1901, due July 1, 1931; interest payable at the company's New York office. Coupon (principal may be registered) \$1,000, and registered in multiples of \$100, Guaranty Trust Co., New York, trustee. Authorized \$3,000,000, of which \$732,700 held alive in sinking fund. Subject to call at 110 and interest. Sinking fund, 2% per annum of amount outstanding; bonds so purchased being kept alive and the interest thereon added to the fund. Interest paid without deduction for normal income-tax. Guaranty Trust Co., New York, registrar.

Property: interests are extensive, including control of numerous subsidiary mining, transportation, and land companies, among the more important being the **Sombrerete Mining Co.**, and the **Mexican Lead Co.**, at Sombrerete, Zacatecas, Mex., the **Montezuma Lead Co.**, **Alvarez Lead & Timber Co.**, **Mexican Mineral Railway Co.**, and **Potosi & Rio Verde Railway Co.**

The **Veta Rica** mine, owned outright, is at Sierra Mojada, and is an important silver-lead producer. Development is by a 600' shaft.

Other important producers are the silver-copper mines at **Concepcion del Oro**, State of Zacatecas. The **San Pedro** and **San Pablo** mines at Diente in Coahuila, 12 miles from Monterrey, are also important producers of lead, and the mines of the San Pedro district at San Luis Potosi are heavy producers of silver, gold and lead ores, constituting the main supply of ore for the company's custom smelter at San Luis Potosi. Smelter has been operating since February, 1918.

At the Diente group, including the San Pedro, San Pablo, and Zaragoza mines, J. S. Carnahan, mgr., silver ore was originally discovered in caves in cliffs of hard blue limestone. It is found in so-called chimneys or pipes, the largest one being beneath a cave 150 meters wide and of same height. The orebodies extend from near the crest of the cliffs or 3,266' above the valleys, down to the deepest workings. The ore chimneys are connected by thin seams and stringers which are a guide in exploration work. The silver occurs in cerussite, changing to galena in depth. Mining is by panel slicing under mats of timber. (See Brinsmade, "Min. & Sci. Press," November 22, 1919.) Monthly production averaged 1,000 tons, but in December, 1919, ore extraction was suspended, though development continued.

Equipment at Diente: steam boilers, Frazer and Chalmers engine-driven Bullock generators, motor-driven compressor, Lidgerwood hoist, ventilating fans, machine-drills, 3-rail gravity surface tram 1,000 meters long, Hallidie single-rope aerial tram, and 2,200-meter aerial tram to loading-bins at rail.

The **San Luis Potosi smelter**, blown in February, 1918, treating 1,000 tons daily, includes 12 furnaces for the reduction of gold, silver and lead ores, and a special copper department of 100 tons daily capacity. The works have steam and electric power, and employ about 1,000 men. In addition, there has lately been completed the Carmen 250-ton cyanide plant for cyanidation of lower grade ores from the San Pedro mines.

The company is a large producer of lead and silver, with copper and gold, secured mainly as by-products, and is active and enterprising in the rejuvenation of old properties and the development of new mines. The low price of silver has seriously affected recent output and profits.

MEXICANA DESSARALLADORA DE MINAS SONORA

Address: C. N. Knutsen, mgr., Cumpas, Sonora, Mexico.

In May, 1919, it was reported that this company, headed by L. G. Cloud, had leased the San Nicholas silver mines from the Transvaal Co. The property is 15 miles west of Cumpas, in the Moctezuma district, and has been examined by W. H. Weed for the Transvaal Co.

Equipment: includes a 50-ton flotation plant yielding 2 tons of concentrate daily assaying 800 oz. silver, 80% lead, and 6% copper. Concentrate is sent to El Paso. Fifty men employed, at last account.

MEXICANA MINING CO. JALISCO

Was the operating subsidiary company of the **Keystone Mng. Co.**, of Shamokin, Pa., which see.

MEXICAN CORPORATION, LIMITED (THE) ZACATECAS

Offices: A. A. Kelsey sec., 1 London Wall Bldgs, London, E. C. 2, England; 61 Broadway, New York; and Edificio La Mutua, 522, Mexico City.

Directors: F. W. Baker, R. T. Bayliss, Walter McDermott, F. A. Govett, A. S. Elmore, Herbert Guedalla, J. A. Agnew, and Lord Brabourne. Consulting Engineer-gen. mgr., Hugh Rose.

Inc. July, 1919, in Great Britain. **Cap.** £1,000,000; increased to £1,400,000; £1 par; all allotted, of which £850,000 is held by Consolidated Gold Fields of South Africa, Consolidated Mines Selection Co., Central Mining Corporation, Imperial & Foreign Corporation, Lena Goldfields Co., Lake View Invest. Trust, and the Exploration Co., Limited, etc.

When the company was formed 25% of the capital stock was underwritten by the Camp Bird Co., 25% by Santa Gertrudis, and 15% of the capital, or 150,000 shares reserved for subscription by Santa Gertrudis shareholders. Additional shares accrued to Camp Bird, through the share holding in Santa Gertrudis.

Financial statement for year ending June 30, 1920, showed: total assets £700,555, which includes, advances to Mexican Corporation, S. A., £571,236; investments, £42,920; Union en Cuale option, £17,311; cash, £58,857; profit and loss, £5,691. The 1921 report showed: total assets £1,326,935, which includes investments, £95,130; Union en Cuale option, £28,792; advances to Mexican Corporation, £1,132,813; profit and loss, £38,427.

Debentures: £380,000 of 10%, 7-year notes, redeemable at 120% offered in Nov., 1920.

Company was organized to acquire an interest in the **Teziutlan Copper Co.**, the **Fresnillo Co.**, and a 22½% interest in the option of the **Esperanza Co.** on **La Union en Cuale** mine. A Mexican company, the **Mexican Corporation, S. A.**, was incorporated to operate these holdings. In Dec., 1921, company acquired the **Silla mines**, 60 miles E. of Mazatlan, Sin., Mex. The mine has 600,000 tons of sulphide ore blocked out that will assay 2.4% copper, \$1.75 gold and silver, and 5.5% zinc, and diamond-drilling has revealed

additional ore. This ore needs concentration by flotation, followed by smelting.

Teziutlan Unit

Address: D. R. Thomas, mgr., Aurora, Puebla, Mex.

Property: a 25-year lease from Nov. 1919, on 2,500 acres at La Aurora, Puebla, Mex. Development in 1920-21, totaled 1,229' in Cometa orebody. Also 10' of ore opened in Volcan, or bottom level for 185', averaging 3.3 oz. silver, 4.5% copper, 24% zinc.

Equipment: includes 300-ton flotation mill, hydro-electric plant, smelter, with two blast furnaces each of 400 tons daily capacity. The cost of operations from Nov. 1, 1919 to June 30, 1920, amounted to \$140,360. The Mexican operating company gets 37½%, and the Teziutlan Copper Co., 62½% of the operating profit.

Production: the smelter treated 35,256 tons, valued at \$547,326, or \$15.52 per ton and containing 82.9 oz. gold, 58,451 oz. silver, and 2,199,692 lb. copper. The silver output was sold at an average of 22c. per ounce and copper at 18.4c. per lb.

See Teziutlan Copper in Volume XIII of this Handbook.

Fresnillo Unit.

S. N. Cook, mgr.; J. S. Butler, supt., Fresnillo, Zac., Mex.

Company acquired a 40% interest in the Fresnillo Co., at Fresnillo, Zacatecas, comprising the Proano or Fresnillo mine and a total of 733 acres mineral land. The Proano produced 150,000,000 ounces of silver from 1550 to 1873, when pumping expenses and low silver prices caused its shutdown. In 1919, there was 600,000 tons of tailing left, assaying 0.05 oz. gold and 3.2 oz. silver per ton, besides 3.5 oz. of mercury. Management estimates ore in the Cerro Proano, a small hill 300' high and ¼ mile across, at 4,000,000 tons of 5.25 oz. silver ore that can be mined by the "glory hole" system, and 2,000,000 tons probable ore.

Development: to depth of 1,500' with workings on 50 veins. Work in 1921 totaled 5,457' mostly in preparation for glory hole workings of surface orebody.

Equipment: includes oil-fired Stirling boilers, steam turbines direct connected to 60-cycle, 2,300-volt alternating current generators, having a total normal capacity of 6,000 k. w., with 50% continuous overload rating; a 2,000-ton treatment plant is being constructed, consisting of 10-ton ore cars electric locomotives, one 30" gyratory crusher, two 48" horizontal and two 48" vertical Symons disc-crushers; wet fine grinding to 75% through 200 mesh, will be done in six Marcy type rod mills, space being left for the addition of auxiliary tube mills and for concentration equipment, if found desirable latter on, especially in the treatment of sulphide ores; the finely ground pulp will flow to six Dorr type thickeners, 60 ft. diameter, by 10 ft. deep, and thence to 13 agitators of a modified Dorr type, 40' diameter by 25' deep, after agitation, the pulp will pass to a Butter's type vacuum filter plant, the tailings therefrom being pumped to the impounding dams. Precipitation of metals will be by the Merrill zinc dust method, with the Crowe vacuum system. -Expenditures to June 30, 1921, total \$559,856. Half of the new plant began operations in Aug., 1921, the balance in September.

Production: from Nov. 1, 1919 to June 30, 1920, 100,901 dry tons were treated, valued at \$693,033 or \$6.87 per ton and containing 531 oz. gold, and 390,744 oz. silver. Tailings treated amounted to \$96,225 dry tons valued at \$507,139, or \$5.27 per ton, containing 428 oz. gold, 180,141 oz. silver, and \$23,992 in mercury and copper.

MEXICAN CORPORATION, S. A.

MEXICO

The Mexican operating company of the Mexican Corporation, Ltd., which see.

MEXICAN EXPLORATION & MINING CO.

SONORA

Controlled by Pacific Smelting & Mining Co.

MEXICAN METALS CO.**SONORA**

Officers: Geo. E. Keith, pres.; Geo. H. Woodman, v. p.; Sumner M. Teele, sec.; Harold C. Keith, treas.; with Eldon B. Keith, directors.

Inc. Aug., 1916, in Arizona. Cap. \$5,000,000; shares \$5 par; assessable; 538,824 issued; \$2.55 paid.

Company succeeded the **Arizpe Mines Co.** and holds title to property through the **Moctezuma-Arizpe Development Co.**, legalized in Mexico. Fully described in Vol. XI, **Copper Handbook**.

Old Colony Trust Co., registrar; Federal Trust Co., transfer agt. Annual meeting, second Monday in September. Listed on Boston Curb.

Mexican property near **Cananea, Sonora, Mexico**, closed down in autumn of 1914. After geological survey of property made by J. M. Little, checked by A. H. Rogers of Boston, and Franklin W. Smith, of Bisbee, it was decided to sell or abandon such property as directors considered unworthy and to purchase new properties.

Company took a 5-year lease in 1917 on the **Ajax** property of the **Colburn-Ajax Gold Mng. Co.** at **Cripple Creek, Colo.** No record of recent work obtainable.

Property: company was formed to acquire by agreement with the **Exploration Co., Ltd.** 26.63 hectares (65.79 acres), total with surface rights, 75 acres, adjoining the **Esperanza** mine, near **El Oro, Mexico.** The land, formerly held by the **Mexico Venture Syndicate, Ltd.**, includes the **Mexico** gold and silver mine. The properties of the **Compañia Minera de Oro Nalon** were acquired in January, 1915, for 30,000 fully paid shares. The ore is gold and silver bearing occurring in fissure veins.

Development: by the North shaft 1,574' deep, and the South shaft, 1,687.

Ore reserves: on June 30, 1917, were estimated at 457,100 tons, \$11.89 gold, and 8 oz. silver; in 1918 there were 416,200 tons; 379,000 tons in 1919; and 350,100 tons in 1920, averaging \$10.92 gold and 8.82 oz. silver; in 1921, 311,430 tons averaging \$11.23 gold and 9.83 oz. silver per ton.

Equipment: includes a 40-stamp mill, 7 tube mills, and a cyanide plant.

Production:

Year	Tons Milled	Total Yield	Gold	Silver, oz.
1920-21.....	125,185	£455,999	\$1,426,291	975,162
1919-20.....	138,710	533,808	1,435,381	972,934

This famous and efficiently managed property appears to have passed the zenith of its career.

Exploradora De Minas De Mexico, S. A., Cia.

Subsidiary of Mexico Mines of El Oro, Ltd.

Inc. 1920, in Mexico. **Cap.** 2,000,000 pesos; 10 pesos par; 1,065,000 shares owned by Mex. Mines. Organized to examine and develop promising properties in Mexico. Two mines were under development at last account.

MEXICO MINING, REFINING & EXPLORATION CO. SONORA

Address: W. T. Calderwood, pres., 840½ S. Berendo St. or F. C. Lamb, sec.-treas., 1432 W. 28th St., Los Angeles, Calif.

Officers: Wm. T. Calderwood, pres. and gen. mgr.; Dr. Chas. B. Nichols, v. p.; F. C. Lamb, sec.-treas.; preceding with E. B. Lovie, C. A. Neil, L. A. Davis and A. A. Snodgrass, directors. B. A. Ogden, supt.; A. Wainwright, engineer.

Inc. 1905, in Arizona. **Cap.** \$5,000,000; \$1 par. Annual meeting, second Monday in April, at Nogales, Ariz.

Property: El Creston de Cobre mine, 35 miles west of Hermosillo, an antigua dating from the eighteenth century. The property carries ore-bodies, 2 of which are said to be 30' wide, and traceable 1,400', with ores averaging 4% copper, 8 oz. silver and \$1 gold per ton.

Development: by 8 shafts, deepest 300', and 4 tunnels with 1,000' of workings estimated by the company to show 100,000 tons of ore.

Le Cobriza mine at Sayopa, is said to show a 16' vein with a 7' pay-streak, carrying copper-silver ore.

Equipment: includes 235-h. p. steam plant, 2 hoists, 6-drill air compressor, and 20-ton mill. Company was planning to erect a 100-ton smelter, but revolution interfered. No recent information secured.

MICHOACAN RAILWAY & MINING CO., LTD. MICHOACAN

Address: G. A. Mitchell & Co., secretaries, 17 Ironmonger Lane, London, E. C. 2, England. **Mine office:** Anganguero, Michoacan, Mexico. **Works office:** Ocampo, Zitacuaro, Michoacan, Mexico.

Directors: G. A. Mitchell, chairman; C. H. Potter, W. J. H. Moll, and T. B. R. Scott.

Inc. Jan. 29, 1889, in Great Britain. **Cap.** £105,364; £1 par; in £21,015 A non-cumulative 7% preference shares, £12,190 B non-cumulative 7% preference shares, £70,745 ordinary shares, and £1,414 founders' shares; all issued save 6,094 ordinary shares. Total capital issued is £99,370. Debentures; the prior lien debentures were paid off. There are outstanding £51,500 (the balance of £103,000) 4% mortgage debentures due July 1, 1930, repayable at a premium of 50% at any time before that date. All arrears of interest up to July 1, 1920 were cancelled by the debenture holders. The railway rights originally held have been disposed of to the Michoacan & Pacific Railway Co., in which the company has a £60,000 share interest in addition to £18,600 bonds held.

Income during 1917 was £7,820, of which £807 was profit, after paying £5,475 for interest. Assets, consisting of investments, securities stores, advances, rental accrued, etc., totaled £145,960 at end of 1917. Against this were debentures, interest, and creditors of £218,574.

Property: 537 hectares known as the Anganguero silver mines, opened by

tunnels and variously reported to have 14 to 30 kilometers of workings. Mine was leased, 1909, for 10 years, to the American Smelting & Refining Co., and this lease has been extended until July, 1936, at a minimum annual rent of \$50,000 (Mexican) plus half the net profits.

Conditions in Mexico have improved and the mines are now being operated by the A. S. & R. Co. The government operates the railway in a limited way, but pays nothing to the owners.

MINA MEXICO MINING CO.

SONORA

Out of business. Succeeded by **Compania de Minas de Mexico, S. A.**

MINAS DE MEXICO, COMPANIA DE

SONORA

Office: Mina Mexico, Sonora, Mexico.

Officers: E. F. Bryant, pres.-treas.; E. P. Ryan, v. p.; J. M. Gandara,

sec.

Property: the copper mine formerly worked by the Mina Mexico Mining Co. at Mina Mexico, Sahuaripa district, Sonora, Mex.

Equipment: includes a power plant, small mill and smelting plant.

Property has been in charge of caretaker for several years, but will be operated when Yaqui River branch of the Southern Pacific has been rebuilt.

MINERA CONSOLIDA LOS AZTECAS, S. A., COMPANIA SONORA

Controlled by **Aztec Consolidated Mining Co.**, which see.

Inc. in Mexico. Cap. 10,000 pesos; 1 pesos; par; 9,997 held by Aztec Cons. M. Co. Company holds title to Mina Verde and La Polka mines.

MINERALES Y METALES, COMPANIA DE

MEXICO

Subsidiary of American Metal Co., Ltd.

Office: 61 Broadway, New York. Heath M. Steele, gen. mgr., Monterey, N. L.

Cap. \$2,500,000; increased from \$125,000 in 1917; par \$100 (Mex currency). A. M. Co. owns entire share capital.

Company is practically a holding company for its subsidiary, **Cia. Minera de Penoles, S. A.**, to which (in 1920) it sold all mines, reduction works and railroads, for 180,000 Penoles shares, Minerales retains only certain real estate holdings and leases. The latter includes 6,710 acres of oil-land in the State of Vera Cruz, adjacent to producing areas.

MINES CO. OF AMERICA

CHIHUAHUA

Fully described in Vol. XIII. Succeeded by **Dolores Esperanza Corporation**, which see.

MINNEAPOLIS COPPER CO.

SONORA

Mine address: Cumpas, via Nacozari, Sonora, Mexico.

Officers: J. W. Christy, pres.; James Thompson, sec.; F. A. Guice, gen. mgr.

Inc. June, 1906, in South Dakota. Cap. \$1,000,000; shares, \$10 par; also inc. in Mexico as Minneapolis Copper Co., S. A., the South Dakota corporation being a holding company. Is operated in the United States under the title of Minneapolis Copper Development Co., the reason for which has not been explained.

Property: 277 hectares, about 30 miles S. E. of Cumpas. Property carries several fissure veins, in andesite, with N. E. strike, of which 4, under development, are of 5' to 8' estimated average width, carrying tetrahedrite, estimated by company to average 10% copper, with traces of lead and zinc, 5 to 40 oz. silver, and \$1 and upwards in gold, with occasional very high assays.

Development: the Archipelago mine, the principal property, has a 250' incline shaft, and the mine as a whole has about 8,000' of workings, mostly in ore.

Equipment: includes a 35-h. p. gasoline hoist and 5 buildings. There is also a 75-ton smelter, built in 1912. Transportation is by wagon-road to Cumpas, freight being carried in two 90-h. p. gaso-electric trucks.

Operated under lease, 1917, by Samuel E. Greenidge, of Douglas, Arizona. No later returns received.

MIRASOL; COMPANIA MINERA DEL CHIHUAHUA

Address: E. P. Ryan, gen. mgr., El Paso, Tex. **Mine address:** Eduardo W. Enriquez, gen. supt., Cusihiuriachic, Chihuahua, E. F. Russell, mill supt. **Officers:** H. L. Hollis, pres., 1025 Peoples Gas Bldg., Chicago, Ill.; J. M. Gandara, sec.

Operated as a close corporation. **Inc.** in Mexico, 1918. **Cap.** P 50,000; par P 1.

Property: the Promontorio mine at Cusihiuriachic, contains siliceous lead-silver-copper ore. Developed by 3 shafts.

Equipment: 600-h. p. steam-electric power, compressor. **Mill:** 200-ton concentration plant with crushers, rolls, 2 tube mills, ball mill and flotation plant. Employs 550 men.

MOCTEZUMA COPPER CO. SONORA

Fully described under title of **Phelps Dodge Corporation, U. S.**

H. T. Hamilton, mgr.; Frank Ayer, supt., Nacozari, Son., Mex.

MOCTEZUMA Y ANEXAS; CIA. MIN. TAMAULIPAS

Address: M. Barreda, mgr., San Nicolas, Tamaulipas, Mex.

MOLOLOA MINING CO., LTD. JALISCO

Controlled by Makeever Bros. Rm. 1210, 170 Broadway, New York City.

Address: Hostotipaquillo, Jalisco, Mexico.

Officers: Sanford Makeever, pres.; M. M. Makeever, sec.; W. M. Mathews, treas. and gen. mgr.; Edward Fenley, supt., at last accounts.

Inc. 1908, in Canada. **Cap.** \$250,000.

Property: the Mololoa gold-silver mine, 130 hectares, includes antiguas opened by the Spaniards in the 16th century, reopened in 1904. Several fissure veins in andesite carrying gold-silver ore were worked in 1914, and shipments made to the El Favor mill.

Development: by Mololoa tunnel to depth of 800'. In 1919 the Soledad shoot of the Mololoa mine was said to show silver ore which, on No. 6 level, beyond the fault, was 12' wide and assayed \$38.50 per ton. The ore carries so little manganese that cyanidation will extract 85% of the silver.

MONJARAS MINING CO. NAYARIT

Office: H. Chester Johnson, sec. 1535 Chestnut St., Philadelphia, Pa.

Officers: Judge Wescott, pres., Trenton, N. J.

Inc. in 1919. **Cap.** \$2,500,000.

Property: nearly 100 acres; 10 kilometers south of Ixtlan del Rio, Nayarit, the new State of Mexico. **Geology:** fissure veins traverse granitoid rocks, porphyry and limestone.

Development: by adits or tunnels. High-grade shipping ore has been opened. **Equipment:** mine cars, tracks, houses for officers and miners.

Property taken over by **Humboldt Mining Co.**

MONTANA de MANGANESO; MINAS SONORA

Address: Aurelio de Leon, mgr., Apto. 4618, Mexico City, Mex.

MONTEREY LEAD SMELTER NUEVO LEON

Owned by **American Smelting & Refining Co.**, which sec.

Office: 120 Broadway, New York. **Operating address:** C. L. Baker, gen. mgr., 1112 Mills Bldg., El Paso, Texas. **Works address:** L. B. Harrison, supt., Monterey, Nuevo Leon, Mexico.

Has an annual capacity of 410,000 tons, or 1,500 tons a day.

MONTEREY MINING, SMELTING & REFINING CO., S. A. N. L.

(**Compania Minera, Fundidora y Afinadora, S. A.**) **Address:** Monterey,

Nuevo Leon, Mex. Earl F. Salisbury, gen. mgr.

Cap. \$8,000,000; \$100 par. Capital stock is to be reduced to \$3,000,000 (Mex.) upon final payment for smelter.

Property: includes the **Ocampo** mine at Cuatro Ciénegas and **Santa Elena** mine, at Mineral de la Mula, Coahuila, carrying gold, copper and lead ores; **Lepanto** silver-lead mine at Naica, Chih.; **Azarte** silver-gold mine at Panuco, Dgo.; **El Caballo** silver-lead mine at Sta. Barbara, Chih.; **San Juan** silver-lead mine at Villa Garcia, N. L., and **La Puerta** silver mine at Pueblo Nuevo, Dgo.

The smelter and refining plant formerly operated by the company has been sold to the Cia. de Minerales y Metales, S. A., a subsidiary of the ?American Metal Co., Ltd.; later turned over to Cia. Minera de Penoles (q. v.), a subsidiary of Minerales y Metales.

MONTERREY, S. A.; CIA. FUND. FIERRO Y ACESO DE N. L.
Monterrey Iron & Steel Co.; New York address: Wm. G. Moler, agt., 5 Beekman St.

Works address: F. F. de Sachico, Monterrey, N. L., Mexico. **Main office:** Apartado 243, Ciudad Mexico, D. F., Mex.

Officers: Adolfo Prieto, pres.; Manuel Garza Guerra, v. p. **Staff:** Roberts Gayol, gen. mgr., Monterrey; Ramon Yarza, works mgr., Monterrey; A. G. Hartenstein, gen. supt., Monterrey.

Inc. in Mexico, 1900. Cap. P. 10,000,000.

Property: in addition to having large iron and steel works, company owns the property known as **Iron Mountain** near Durango, about 1½ miles long by ½ mile wide and 200 to 400' high. Conservative estimates place reserves at 360,000,000 tons of specular hematite and magnetite, carrying 60% iron. The ore is generally hard or massive.

Also the Cinco de Mayo iron mines in Coahuila, containing magnetite and hematite ore.

Smelter: 300-ton blast furnace, with full equipment for steel making; also bolt and nut factory, wire mill and wrought iron pipe works, etc. Employs 2,000 men.

MONTEZUMA LEAD CO

CHIHUAHUA

(Subsidiary of **Mexican Metallurgical Co.**, which see)

Address: 28, Avenida Republic del Salvador, Mexico, D. F., Mex.

Mine address: Francisco Antunez, mgr., Guanajuato, Gto., Mex.

Property: the Morelos silver mine, developed by tunnels, but not productive. Employs 50-75 men.

NACOZARI CONSOLIDATED COPPER CO.

SONORA

Controls the Tharsis-York Co., which see.

Office: First National Bank Bldg., or P. O. Box 1074, Douglas, Ariz.

Mine office: Pilares de Nacozari, Sonora, Mexico.

Officers: John G. Alexander, pres.-gen. mgr.; L. M. Williams, v. p.; B. R. Russell, sec.; Roy Hiatt, treas.; with L. E. Hoover and R. C. Heath, directors. Fred Alexander, mill supt.; George Motz, mine supt. and purch. agt.

Inc. July, 1907, in Arizona. Cap. \$6,000,000; \$5 par; increased Feb., 1919, from \$3,000,000; 1,048,729 issued; 151,271 shares in treasury, November 1, 1920. Annual meeting, second Monday in November.

Property: 17 claims, 502 acres, in 3 contiguous groups, adjoining the Pilares mine of the Moctezuma Copper Co. on the E. and S. The Galera tract shows andesite and brecciated rhyolite cut by several large quartz veins containing copper lead and zinc sulphides, with gold-silver values. The Tharsis-York or Central group was acquired by the company in December, 1918, by purchase of a majority of the Tharsis-York stock. This land, with that of the Copper King group, to the east, contains a big outcrop or red "reef" 600' wide, of brecciated silicious vein-matter, which is

SMELTER CO. DURANGO
ittsburgh, Pa. **Mine office:** Magistral, Durango,

, pres.; Wm. L. Curry, v. p.; John S. Eberman.
nancial agt.; E. A. Kennedy, supt.; R. W. Stiler,

000 collateral income bond issue; issued, \$375,000. Company owns all the stock of the Santa Maria del Oro Mines Co., which company purchased property of the Lustre Mining & Smelting Co. from old stockholders, paying for same in stock and bonds of the National Mines & Smelters Co.

Property: the Magistral and Cocinera mines. 32 claims, 441 hectares, 1,089 acres of mineral lands, 397 hectares of mill and smelter sites, besides miscellaneous lands and leasehold timber lands. The Magistral mine is developed by 3 tunnels and 9 shafts and has a large body of slightly cupriferous pyrite with quartz and limestone gangue carrying 0.5 to 5% copper, probably averaging under 1% copper, 1oz. silver and 15 to 20 grams gold per metric ton.

The Cocinera mine developed an ore-shoot, 1,000' long, 15' wide and said to average \$10 gold and copper with a little silver. Depth over 600'.

Ore reserves: in this and the Azurite mines are estimated by the management at 190,000 tons, developed in new ground since 1911. The old company claimed reserves of 185,000 tons in other and entirely distinct orebodies, in 1910.

Equipment: is complete including a central power plant having two 360-h. p. and two 350-h. p. gas engines, one 200-h. p. and three 400-h. p. gas producers, 2,300-volt 3-phase generator, two 6-drill air-compressors and 10 hoists of 100 to 300-h. p. The 40-stamp mill, 750-lb. heads, has Huntington mills, 1 ball-mill and 10 Frue vanners.

The smelter has 6 blast-furnaces, including two 150-ton hot-blast furnaces and three 200-ton furnaces, air for blast being heated by waste gases in a specially-designed heater. Produced 8,000 tons matte sent to the A. S. & R. Co. at Aguascalientes, averaging 15 to 17% copper, \$155 gold and \$4 silver per ton.

The old company apparently spent a million dollars or so for installation before the mines were sufficiently developed to provide the ores necessary to keep the various plants running and in 1907-'08 became financially embarrassed. The mines are not yet on a profitable basis, but with the new concentration plant, built in 1915, it is expected that the property will yield a satisfactory return on the investment, as soon as operations become normal in Mexico.

The plant is reported to have been badly damaged by bandits.

NATIONAL SMELTING CO.

ZACATECAS

Address: L. H. Taylor, Jr., 2030 Land Title Bldg., Philadelphia, Pa.

Properties said to be lost to company through the revolution in Mexico, and a claim for indemnity has been filed with Department of State. Practically dead. See Vol. XI for description.

Inc. 1912, in Coahuila, Mexico. **Cap.** 1,000,000 pesos; 100 pesos par.

Property: 57 claims, 142 acres, in Mazapil district, Zacatecas, Mexico, containing contact and chamber deposits of gold and silver bearing lead and copper ores, in part oxidized. The sulphide ore assays 19 oz. silver, 16% lead, 22% zinc and 14% iron, while the oxide ore averages 9 oz. silver and 14% lead.

Development: is to a depth of 600' with about 1,000' of underground workings, blocking out 100,000 tons of ore.

Equipment: includes electric hoist, pump and a 40-ton concentrator. Mine is connected with railroad by a 5-mile cable line and an 8-mile tramway, the cable handling 100 tons in 8 hours.

Company is apparently connected with the Compania Minera del Saltillo, which see.

Property: 1,000 pertenencias, 2,471 acres, known as El Rey del Cobre group, near the Rio Murga in Las Union district, 10 miles north of Petatlan and about 28 miles N. E. of Zihuatanejo, the nearest port. The property shows contact deposits in metamorphic schist, the main lode having a N. E. strike, traceable 3 miles. No. 3 orebody, reported to have a maximum width of 197', carrying lenses of cupriferous pyrite, is developed by crosscut tunnels, drifts and raises to depth of 234' below the outcrop. No. 5 orebody, about 1 mile to the S. E., has only been slightly developed: the nature of the ore in both is said to be identical. Ore is estimated to average 1.5% copper and 40¢ in silver and gold per ton, with 48% sulphur and 42% iron.

Property lies in a very rugged country and is reached only by trails.

Development: by "A" shaft of 109', "B" shaft of 70', El Socavon drift tunnel of 400', No. 3 crosscut tunnel of 404', No. 4 crosscut tunnel of 486', No. 5 tunnel of 243', and No. 1 tunnel of 407', with a total of 3,050' of workings.

Ore reserves were estimated at 3,000,000 tons of ore blocked out, January, 1916.

Equipment: includes a hoist, not installed, good for 1,000' depth, and a small air-compressor. There are about 35 buildings.

Development: was continued without interruption until 1915. Company was planning to build a railway to Zihuatanejo and to add equipment at the mines. The mine, though low-grade, apparently contains large orebodies and is considered promising.

PACIFIC SMELTING & MINING CO.

SONORA

Mine and smelter office: Fundicion, Sonora, Mex.

Officers: Melbert B. Cary, pres.; Geo. M. Ryall, v. p., 390 Pacific Electric Bldg., Los Angeles.; Nelson S. Haughwout, sec.-treas.; preceding, with Ronald E. Curtis, Howard Mc Williams and Charles E. Wetmore, directors. Thornton C. Kirkland, asst. gen. mgr.

Inc. Oct. 6, 1909, in Maine. **Cap.** \$8,000,000; shares, \$5 par, issued in \$1,737,850 convertible cumulative 7% preferred stock and \$6,262,150 common stock; all issued. United States Corporation Co., New York, registrar. Annual meeting, third Monday in January, at Augusta, Maine. Stricken from listing on New York Curb.

Shares sold at public auction in New York on Dec. 31, 1920; 3,000 prd., \$40 the lot; 1,000 com, \$10 the lot.

Holdings: company controls the Mexican Exploration & Mining Co. by ownership of 98% of the capital stock and practically the whole of the capital of 5 subsidiary Mexican corporations, viz.; the Anita Mines Co., Yaqui Mining Co. and the following smelting companies: Compania Metalurgica y Refinadora del Pacifico, S. A., owning the Fundicion smelter; the Mexican American Smelting & Refining Co., S. A., owning the Guaymas smelter and the Sinaloa Smelting Co., holding the Mazatlan, or Sinaloa smelter concession.

Anita Copper Mines Co., S. A., owns the Anita mine with 330 acres, 25 miles north of the Fundicion smelter and station of that name on the Southern Pacific Railroad of Mexlco. Mine has been developed to a depth of 900' on the dip of the vein and ore reserves above the 7th level were estimated by Courtney de Kalb at 55,000 tons, that average \$2.58 gold, \$1.17 in silver and 3.99% copper.

Geology: the Anita (or El Cobre mine), has a shear zone 115' wide with a diorite foot and rhyolite hanging wall. This zone traceable for several thousand feet, with N.-S. strike and dip of about 45° W., carries ore in 5 lenses, or chimneys, the principal one being opened from the surface down to the 8th level, branching at the 6th level. Faulting, cross-faulting and brecciation occur with displacements up to 200'. Ore is said to be a metasomatic replacement of diorite accompanied by a contact metamorphic

deposit. It contains the usual oxide minerals succeeded in depth by chalcopyrite.

Development: comprises a 900' inclined main shaft with 9 levels opened and about 7,415' of workings. There are also 4 other shafts.

The surface equipment consists of 2 cross-compound 2-stage Rand compressors of 3,000-cu. ft. combined capacity; a Risdon second-motion duplex hoist, 14x21"; three 150-h. p. boilers; generator for light and power; rock-crushers, picking tables, shops assay office, office buildings, warehouses, dwellings, supplies, etc.

The Pirita mine, 81 acres, 5 to 7 miles from Victoria station contains pyritic ore having small values in gold, silver and copper. The deposit will eventually become of value to the company for fluxing purposes.

Yaqui Mining Co. S. A., owns several slightly developed mining properties including the Rosamond and Aurora mines with about 1,600' of development work, exposing commercial copper-silver ore.

Compania Metalurgica y Refinadora del Pacifico, S. A., owns the Fundicion smelter, built originally to treat the ores of the Anita mine and to do custom business. The plant has a capacity of 350 tons a day, but was designed and in part equipped for 3 times that amount. It has one 42x160" blast furnace, sampling mill, power house, shops, administration buildings, and an electric plant for lighting and power purposes, all machinery excepting yard locomotives being motor driven. The plant is of modern design and in excellent condition. Plant idle for many years.

The L'Aime lime quarry, has 75 acres of limestone averaging 1.2% silica, with about \$1 in gold.

Mexican-American Smelting & Refining Co., S. A., owns the Guamas smelter with 250 acres, at Batuecas, a suburb of Guaymas on tide water, lying between the Bay of Guaymas and the S. P. R. R. of Mexico. The plant was erected by William C. Greene, founder of the Greene-Cananea Copper Co.

The Sinaloa Smelting & Refining Co., S. A., owns a concession from the Government for a smelter at Mazatlan, or elsewhere in the State, for a period of 20 years from the 27th day of April, 1906, and is particularly exclusive in its terms.

PALMAREJO & MEXICAN GOLD FIELDS, LTD. CHIHUAHUA

Office: E. B. Brown, sec., 10 Austin Friars, London, E. C. 2, England.

Directors: Sir W. B. Perceval, chairman; G. Hallett, H. G. Tollemache, and E. Turk. W. D. Hole, gen. mgr., in Mexico; E. T. McCarthy, cons. eng.

Inc. June 25, 1898, in Great Britain. **Cap.** £565,000, in 200,000 A shares of 6 pence each, 21,000 pfee. shares of £1, and 1,400,000 of 5s., of which 120,000 pfee. and 835,978 ord. issued.

Bonds: £25,000 of prior lien, due April, 1921; £28,330 of 5% first, £18,797 of 7% second, and £93,500 or 6½% third mortgage debentures. Accrued debenture interest on March 31, 1920 was £45,107. Property was in hands of Receiver from December, 1914, to August, 1918.

Financial report for year ending March 31, 1920 showed, expenditures to date, £144,514; cash £3,219; accrued debenture interest, £45,181; creditors, £1,727; debtors, £1,350.

Property: 127½ sq. miles of mineral and timber lands in the Huruapa district of western Chihuahua. Reserves estimated as 331,560 tons proven ore, averaging 45s. (\$10.80), and 1,600,000 tons of possible ore of similar value.

Equipment: an old 60-stamp mill and treatment plant, which will be remodelled.

Operations were suspended from 1912 until late in 1918, owing to revolution.

PALMARITO LEASING CO.

SINALOA

Miles S. Milward, gen. mgr., Mocorito, Sinaloa, Mex.

Property: Palmarito mine in Mocorito district, developed by 3-compartment shaft to 200' depth, said to open a 90' vein of silver ore.

Equipment: 20-stamp mill and cyanide unit, treating 80 tons of 12 oz. ore daily at last account.

Property: a silver-lead mine, with some copper. Idle on account of Mexican revolution.

PEDRAZZINI GOLD & SILVER MNG. CO., S. A. MINAS SONORA

Succeeded Arizona company of same name in 1921.

Address: 50 bis, Rue Pierre-Charron, Paris VIII, France, or care John Pedrazzini, Locarno, Switzerland.

Officers and directors: John Pedrazzini, pres., and Paul Pedrazzini, sec., Locarno, Suisse. In San Francisco, Calif.; Fernando Montijo, v. p.; Adolfo Bley and Fred'k A. Denicke. At Paris; Chas. Berrogain. At Douglas Ariz.; Wm. D. King, attorney for company in Arizona and Sonora, Mex.

Mine staff: Antonio Pedrazzini, gen. mgr., Arizpe; Fernando Montijo, Jr., mng. engr.

Inc. 1921, in France. **Cap.** 15,000,000 francs; par 100 francs; 105,555 shares (f. 10,555,555 par value) given in exchange for shares held by stockholders of American companies in ratio of 30 shares of \$1 par of Ped. G. & S. M. Co. for 2 shares (f. 100 par) of new company and 90 shares of Minas Mercedes for 2 shares of new company, making a total issue of 10,555,555 francs in new stock, when all the old stock is exchanged. The new company thus starts out with f. 4,444,445 treasury stock.

In 1920, total receipts were \$262,872, of which income from sale of concentrate was \$257,788; expenditures were \$210,051; profit and loss, \$52,820. Total assets, \$1,513,318; current liabilities, \$160,391.

Report of old (American) company for year ended Dec. 31, 1919, showed receipts from ores and concentrates, \$96,628; ore in transit and on dump, \$52,000; expenditures include, operating \$73,349; taxes and general, \$54,057; interest \$11,266; depreciation, \$25,653.

Balance sheet for 1921 shows assets total, \$1,513,318, including mines buildings and 50% interest in The Minas Mercedes Co., Ltd., \$1,172,000; equipment, \$230,881; cash and supplies, \$18,286; Minas Mercedes Co., \$22,735.

Liabilities include capital stock \$1,250,000; creditors, \$160,391; reserve fund, \$50,106; profit & loss, \$52,820.

Property: the Chispas mine with about 650 acres at Las Chispas, Arizpe district, Sonora, Mex., about 15 miles from Arizpe and 60 miles from Nacozari. This mine famous for its high grade silver ore, has been worked since 1890, though only since 1908 by this company. The claims show rhyolite cut by a series of 14 parallel fissure veins including the Chispas and the Wm. Tell veins. The vein-filling is rhyolite-breccia and quartz. In the upper workings of the Chispas mine the silver occurs as cerargyrite but below water level it forms argentite, polybasite, stephanite and ruby silver. The ore as milled averages 40 oz. silver and 0.5 oz. gold, while the rich ore that is sacked for export averages 500 oz. silver and 40 oz. gold per ton.

The irregularity of the pockets of rich ore prevents an accurate estimate of ore developed, but discoveries of new ore more than balanced extractions in 1920-21, the 900' level being practically virgin ground with excellent ore faces.

Development: the mine is opened by a 900' shaft; a tunnel connecting with it on the 600' level, a half mile from the portal extends several thousand feet further on the vein. Ore is hoisted to this tunnel level. Daily out-

pments of very high grade ore average 70 tons

l-ton mill with concentration plant, compressor, lilton Corliss engine. Water is pumped from the Mill recovery is about 85%. Employs 200 men

is 607,708 tons of ore, containing 1,773 oz. gold : 64,385 tons concentrate contained 204 oz. gold combined output yielding a net smelter return of operating and developing were \$82,600 and for eneral, \$93,012.

Mapimi Unit.

tecle, gen. mgr., Mapimi, Durango, Mex. Philip Durango, Mex.

property near Mapimi, Durango, includes the est and longest known producers of Mexico. The and has an average monthly production of 15-, containing 14% lead, 13 oz. silver and 1 oz. gold. is five blast-furnaces and a roasting-plant for the of charge per annum, and there is also an arsenic enic as a by-product from smelting operations. nine and smelter, as well as the town. A 25-mile nets both mine and smelter with the National o. The normal yearly production of the plant is ullion and 5,000 tons of white arsenic.

mid-1921; smelting plant is being combined with

Golondrinas Unit.

as, supt., Guadalupe, Nuevo Leon, Mex.

and soledad zinc-lead mines, in the Villaldama ns cover 2,270 acres, and yield lead and zinc ores arrow gauge railway to the plant at Guadalupe.

This plant has a 250-ton concentrator and a 200-ton lead smelter. There is also a calcining plant for zinc-carbonate ores, capable of handling 7,000 tons per month from the mines near Guadalupe, and the company's other mines and custom ore. At Guadalupe there is also a modern power-plant, officers workmen's houses, schools, hospitals and other miscellaneous equipment.

Cia. Minera Cerralvo.

Address: Cerralvo, N. L. Mex. E. A. Manderfield, supt

This unit of 750 acres, in Nuevo Leon includes the El Refugio silver-lead mines, whose product is handled in a 100-ton concentrator and 100-ton lead smelter. The mine produces 1,200 tons of 40% lead ore and can furnish 300 tons of zinc carbonate ores monthly.

Zacatecas Property.

Providencia Mines situated in Saltillo district, Zacatecas, these mines are capable of producing 4,500 tons of lead-silver ores per month, averaging 18% lead and 13 oz. of silver; also 1,500 tons of oxidized zinc ores running about 75% zinc. The ore goes by aerial tramway and narrow gauge railway to the National Railway at Saltillo. The zinc ores are sold in the United States and the lead-silver ores treated at the various smelting-plants controlled by the company.

Guanacevi Mines

In Guanacevi, Durango, the company owns valuable silver properties covering 415 acres. As they are remote from a railway and in an unsettled district, the company has not yet begun operations there. Work already done on the properties is said to show that they are worth more than the amounts invested.

Monterey Unit.

Monterey smelter and refinery—The lead smelter and silver-lead refinery plant of the Cia. Minera, Fundidora Y Anadora Monterey, S. A., at Monterey, N. L., originally under lease, was acquired by purchase. This plant has 9 blast furnaces which can reduce 90 tons of charge daily, and has an annual refining capacity of 50,000 tons of lead bullion. It also has an electric silver parting plant for the separation of gold and silver, equivalent to a production of 10,000,000 oz. of silver. This plant treats primarily Penoles ores and bullion, but also handles custom business.

Paloma and Cabrillas Mines—Comprise 278 acres of mining properties near Higuera, in the State of Coahuila, and is connected with the National Railway lines at that point by an aerial tramway. The mines are equipped with adequate power-plant facilities as well as offices, workmen's houses, hospitals, schools, etc., and are capable of producing 5,000 tons monthly of iron-lead ores containing 15% lead and 3 oz. of silver, and 800 tons of zinc carbonate ores containing 32% zinc.

Company also controls the following properties:

Cia Minera la Parrera—The capital stock of this company is P500,000 of which the Penoles Co. owns 50%. Its mining properties are in the Sierra Mojada district, Coahuila, covering 475 acres, from which are produced lead-silver, copper, and zinc ores. The Parrera Co. also owns a 50% interest in the San Salvador mine in the same district, which has been producing for over 30 years. The Parrera Co.'s own properties are still in the development stage, although the value of the production up to date covers all development expenses. The San Salvador and Encantada mines were closed in mid-1921.

Santa Eulalia Property.

Address: Santa Eulalia, Chih. J. M. Brook, Jr., supt.

These properties covering 2,935 acres in Santa Eulalia district, Chihuahua, are held under a 10 year lease (from 1917) and bond from **San Toy Mng. Co.**, which see. Ores are transported by aerial tram from Santa Eulalia to the main line of the National Railway. Other properties in this district, including San Antonio Chico, Inglaterra and Cosineras mines, are under lease.

After a shutdown, shipments were resumed in May, 1921; ore averages 17 oz. silver and 20% lead.

Cia. Metalurgica De Torreon, S. A.

(Managed by Cia. Minera de Penoles)

Office: Torreon, Viesca, Coahuila, Mexico.

Officers: Heath M. Steele, pres.; E. M. Villareal, v. p.; Lic S. M. Zambrano, sec.; with H. Himes, F. T. Anderson, G. H. Harbordt, directors.

Inc. June, 1901, in Mexico. **Cap.** 4,000,000 pesos; shares 80 pesos par; of which the Penoles company owns 83%.

Dividends: 20% in 1902; 18% in 1903; 14% in 1904; 12% in 1905 and 1906; 6% in 1909.

Property: the Torreon smelter and a number of lead mines and several partly developed copper mines in northern Mexico, covering 503 acres. The San Diego mine at Santa Barbara, Chihuahua, has a 150-ton concentrator treating zinc ore.

Smelter: is a modern plant of 1,250 tons daily capacity at Torreon, an important railway junction point. The plant handles the company's own output, but also does an extensive custom business in gold, silver, lead and copper ores.

The plant has 10 blast-furnaces, including eight 100-ton silver-lead stacks, and two 250-ton copper stacks, all using mechanical charges. There are two Dwight-Lloyd sintering machines, and a converter plant of 30 tons daily capacity to treat copper matte. Water is furnished by three large wells. The company has an extensive townsite, with dwellings for laborers and officials, officers, hospitals, schools, etc. The plant has been operated as a custom smelter for the past 15 years.

Production: The normal production is 20,000 tons of silver-lead bullion and 2,500 tons of blister copper per annum. Prior to the revolution, the plant treated over 200,000 tons of ore annually at a profit of \$700,000. Regular, but much curtailed, operations were continued to August, 1921, when smelter was closed down pending the alterations required for an increased capacity.

The Mapimi smelter is being dismantled, Penoles Co. planning to make the Torreon plant its principal smelter.

Subsidiaries: the Penoles company controls also through stock ownership, the Cia. de Combustibles Agujita, S. A. and the Cia. de Combustible Nacional Y. Transporte, S. A. The former owns coal-lands aggregating 4,225 acres at Agujita and Lampacitos, with a developed tonnage of 18,000,000 and a possible production of 45,000 tons of coal per month. Coking plants have a total capacity of 12,500 tons. Penoles Co. consumes most of both coal and coke, any excess production being sold through the C. N. & T. Co., which has its own transportation equipment, consisting of three 90-ton locomotives and 60 cars.

The Penoles company owns 30 locomotives and 900 cars, which it operates over the National railroads to transport its products. It also has valuable real estate holdings in Monterey, Laredo and Saltillo. In addition to the above the Penoles Co. has minority interests in several other companies, including a 40% interest in Cia. Minera de Naica, S. A., which Penoles does not operate, and maintains a trading department for the marketing of its own products as well as for the purchase and sale of the products of independent companies operating in Mexico.

PERLA MINING CO., LA

DURANGO

General office: 40 Wall St., New York.

Mine address: David R. Thomas, mgr., Topia, Mex.

The mine was idle for eight years owing to revolutionary disturbances, but work was resumed in 1921 and shipments of 3 cars per month made to the Aguascalientes smelter.

PROPRIETARY MINES COMPANY OF AMERICA GUANAJUATOSucceeded 1922 by **Valenciana Extension Co.**, (q. v.)**Office:** 25 Broad St., New York; or D. C. Catlin, 15 Broad St., New York.**Officers:** D. C. Catlin, pres.; E. J. Page, v. p.; Chas. E. Pope, 2nd v. p.; C. W. Pope, sec.-treas.; above with Horace E. Parker, Wm. A. Robinson, Jr., Theodore Dwight and W. B. Cogswell, directors.

Inc. 1907, in Nevada. **Cap.** \$3,000,000; shares \$5 par; \$2,250,500 issued. **Bonds:** authorized, \$750,000, 6% convertible; outstanding, \$703,400. New York Trust Company, registrar. Stock transferred at company's office. Annual meeting, second Monday in June. Is a holding company, controlling through stock ownership the Mineral Development Co. and the Providencia M. & M. Co. of Guanajuato, Mexico.

Latest financial report available, year ending May 31, 1914, showed assets; property, \$2,249,000; stock, bonds and notes of subsidiary and other companies, \$560,542; accounts receivable, \$31,076; cash \$5,427; furniture, \$313; accounts since organization of company, \$132,632; loss and gain \$8,700. Liabilities, amounting to \$3,737,193, include outstanding stock, \$2,250,500; outstanding bonds, \$703,400; stock exchanged for Min. Dev. Co. shares, \$6,380, accounts payable, \$5,996; contingent, \$21,417.

The 1915 annual report contains a reference to necessary "additional financing" when the orebodies of the Nueva Luz mine have been more thoroughly developed and when political conditions in Mexico permit the reopening of the Tajo de Dolores mine.

Mineral Development Co.

Address: Donald Catlin, sec., 15 Broad St., New York City., Smith K. Hayes, in charge, Guanajuato, Mexico. **Cap.** \$1,000,000; shares \$1 par; \$800,000 issued.

Property: the Nueva Luz mine, the La Planta and Torre mines. La Nueva Luz mine, adjoining the world famous Valenciana mine is developed by a 2,035' shaft and a 1,130' crosscut, driven to the Veta Madre, below the Valenciana workings. This work exposes 3 veins, the third or footwall vein 51' wide, averaging 130 grams of silver for the entire width, including a 5' streak that assayed 530 grams silver with small amounts of gold, copper pyrite and some zinc blende and galena. This vein was cut at 1,069' from the shaft, at a point several hundred feet S. E. of the place where the downward extension of the old Valenciana ore shoot should be found. Drifting to be done, 1922, will open up this ground. The mine was closed from 1914 to 1920, as company's model hoisting and compressor plant, supply house etc., were burned down. Mine kept unwatered, but no work done. A new company, the Valenciana Extension, was organized by Proprietary Mines Co. in 1921 to purchase and develop the Nueva Luz group. See under that title.

Providencia Mining & Milling Co.

Cap. \$1,250,000, of which \$250,000 is 7% preferred, convertible at 110. and \$1,000,000 common stock, 250,000 shares common in treasury.

Property: the Tajo de Dolores mine at Guanajuato, Mexico. The mine was closed down in April, 1914 and the outlook for an early resumption of operations is not bright. The 200-ton mill and cyanide plant has been leased for 3 years to El Cubo Mining & Milling Co. for a monthly rental of \$1,000 U. S. currency and an option to purchase at \$100,000. The option has been exercised and final payment will be made in 1922. The Cubo Co. agreed to mill Taio de Dolores ore for a period of 7 years at cost plus 20% thereafter. The lease became operative when work was resumed.

PROTECTORA y ANEXAS; COMPANIA MINERA LA ZACATECAS

Address: San Salvador, Mazapil, Zacatecas, Mexico. Percy A. Babb, pres. and gen. mgr.; J. L. Miranda, sec.

Inc. 1907, in Mexico. **Cap.** 100,000 pesos; fully paid.

Property: 68 hectares, including La Protectora y Anexas and San Francisco mines carrying copper, lead and zinc ore occurring as replacements in limestone. Low-grade ores average 2.5 to 5% and high-grade ores 12 to 19% copper. Mine has a depth of 100 meters with about 1,500 meters of workings.

Equipment: includes a 15-h. p. gasoline hoist. Working about 200 men and shipping around 250 tons of high-grade ore monthly before closing down. No recent reports received and mine presumably idle.

PROVIDENCIA SAN JUAN DE LA LUZ y ANEXAS, LA
GUANAJUATO

Address: Emilio Mendez Bancel, Ave. Brazil 6, Mexico City, Mex.

PUEBLA SMELTING & REFINING CO. . **PUEBLA**

Office: 2 Rector St., New York.

Officers: C. H. Bassford, pres.-treas.; J. L. Lawrence, v. p.; L. F. Reed, sec., with J. A. Osborne, and L. S. Rogers, directors.

Inc. Oct., 1912, in Delaware. Cap. \$5,000,000; shares \$5 par; non-assessable. Debentures, \$1,000,000 at 6%. Owned a 72% stock interest in the Cia Minera Explotadora El Magistral y Anexas, and also sundry lands acquired from the Bankers Mining & Development Co.

Due to the revolution the property has not been operated since 1913.

PURISIMA; NEG. MINERA Y FUNDICION HIDALGO

Address: Jorge Hernandez Yanez, owner, Zimapan, Hgo., Mexico.

Office: P. V. Hernandez, mgr., 4 a del Fresno 142, Mexico City.

Property: the Todas Santos and Santo Tomas groups, 100 claims, at Zimapan, Hgo., containing lead-silver-gold bearing ore.

Development: by 89 meter shaft and 40 meter tunnel.

The operations of the Purisima Silver Lead smelter, owned by this company, are an excellent example of smelting without water jackets.

Production: 800 to 1,600 tons yearly.

Examined by Olaf Wenstrom. Is a promising property needing development and modern equipment.

PURISIMA Y GUADALUPE FRESNILLO Y ANEXAS; CIA
MINERA HACIENDA GRANDE, HIDALGO

Address: Manuel A. Teja, Uruguay 44, Mexico City, Mex.

QUINTERA MINING CO., LTD. . **SONORA**

London secretary and office: J. G. Mills, 8 Crosby Square, London, E. C., England. **Paris office:** 1 Rue des Mathurins, Paris IX, France. **Mexican agent:** T. Robinson Boursy, Hermanos, Alamos, Sonora, Mexico.

In consequence of the former unsettled state of affairs in Mexico, the mine was closed down in 1909; in 1921, company placed its entire holdings in the states of Sonora and Sinaloa on the market for immediate realization. Property fully described in Vol. XIV.

RAFAEL POZAS, S. A., CIA. MIN. . **NUEVO LEON**

Address: Monterey, N. L., Mex.

REAL DEL MONTE Y PACHUCA, CIA DE HIDALGO

Fully described under own title in Volume XIV.

Subsidiary of U. S. Smelting, Refining & Mining Co., which see.

REFORMA MINING & MILLING CO. . **GUERRERO**

Address: c/o Hamilton H. Durand, New York Counsel, 68 William Street, New York City.

Mine address: Campo Morado, Guerrero, Mexico.

Property: group of mines at Campo Morado containing copper, lead and silver ores and developed by 2,700' of tunnel work.

Equipment: includes electric power, compressor and 100-ton smelter, Employs 175-200 men when operating.

REPUBLICAN MINING & MILLING CO. . **QUERETARO**

(Subsidiary of Cookson & Co., Ltd., Newcastle on Tyne, England).

Address: Mutual Life Bldg., Mexico City, D. F., Mex.

Staff: H. E. Bouchier, gen. mgr.; A. J. Lewis, mgr. mining department; W. J. Graveling, asst. mgr. and metallurgist.

Property: the Penamiller antimony mines.

RHODES (MEXICAN) MINING & GENERAL, LTD. . **MEXICO**

Address: C. A. Sack, sec., Portland House, 73 Basinghall St., London, E. C.

Inc. June, 1920, to acquire the capital stock of the Rhodes (Mexican) Mng. Synd., Ltd. **Cap.** £20,000, in 10,000 pfd. and 10,000 ord. shares; £1 par; 2,945 pfd. and 7,883 ord. shares issued.

Rhodes (Mexican) Mines Syd., Ltd.

Address: C. A Sack, sec, Portland House, 73 Basinghall St., London, E. C., England.

Inc. 1919. **Cap.** £5,000 in 3,000 pfd. and 2,000 ord. shares; £1 par; all issued.

Property: option on holdings of F. J. M. Rhodes in Mexico, including Pachuca-Capula Silver & Gold Mines, Pachuca-San Carlos silver mine and oil concessions in the Tuxpam fields.

RICHFIELD COPPER CO.

SONORA

Office: 812 Mears Bldg., Scranton, Pa.

Officers: Dr. J. K. Bentley, pres.; Dalbys L. Fickes, sec.; Otto Robinson, treas.; preceding, with Harry Witter, R. H. Gay, Geo. Stark, John Hershberger, Philip Robinson, J. A. Schadt, R. E. Mikesell, W. O. Smith, J. H. Wood and Jacob Huffer, directors.

Inc. 1902, in Arizona, as successor of Richfield Mining Co. **Cap.** \$5,000,000; shares \$1 par; issued, 4,000,000. Bonds, \$250,000, authorized, at 6%; issued, \$230,000. Scranton Trust Co., registrar. Annual meeting, 2nd Saturday in October.

Property: 1,300 acres of mineral property, with timber and ranch lands, totaling 26,512 acres in the Ures district. The Dos Naciones group, 12 miles east of Tuape and 35 miles from a railway, is said to have 7 contact deposits between granite and limestone, of 10' to 60' estimated average width.

Development: includes about 10,000' of underground work, showing oxidized ores and chalcopyrite, reported by present management to assay 4 to 15% copper, 7 to 40 oz. silver and \$2 to \$5 gold per ton.

Equipment: includes two 25-h. p. hoists and a 5-drill air compressor, several mine buildings and an 80-ton water-jacket smelter.

Idle owing to revolutionary disturbances in Mexico.

RIO GRANDE & DOLORES SILVER MINING CO., LTD.

Address: M. Jenks, liquidator, 6 Old Jewry, London, E. C. England. Company was wound up voluntarily in 1919. Fully described in Volume XIV.

RIO PLATA MINING CO.

CHIHUAHUA

Office: 410-11th Ave., New York.

Officers: H. W. Miller, pres.; Archibald Nesbitt, v. p.; J. J. Bonneau, sec.; Lincoln Bonneau, treas., with Geo. F. Parker, John C. Hanson, W. E. Green, Jos. Coult, R. N. Brundage, A. P. Roth, D. J. Dwyer, and J. H. Lee, directors.

Inc. April 7, 1906, in Arizona. **Cap.** \$2,000,000; shares \$5 par; outstanding \$1,872,590. Stock transferred at company's office. New York Trust Co., New York, registrar. Annual meeting in January, at Phoenix, Ariz. Protocolization of the company completed October 15, 1910.

Company controls the Trinity Cons. Hydraulic Mining Co. in California, **Dividends:** initial dividend, 1½%, paid Dec 1909; quarterly dividends, 2% from March, 1910, to December, 1911, inclusive; none in 1912; February 1, 1913, 1%; none since.

Property: the mines and reduction works of the Cia Minera de Rio de Plata, S. A., of Mexico; 187 acres mining land, 2,700 acres ranch and timber lands and water rights, located 6 miles S. of Guazapares, Chihuahua, and 350 miles from El Paso. Holdings include the Santo Nino, David, Santa Teresa, Santa Barbara, Cleopatra, La Ultima and Enrique, silver mines. The ore occurs in the Santa Barbara fissure vein dipping 17°, with average width of 4 to 6'.

Development: by tunnels, with about 3,000' of workings.

Equipment: includes hydro-electric plant and an auxiliary steam plant, 25-stamp mill, 60-ton concentrator and an 80-ton cyanide plant.

Operations have been greatly interfered with on account of the revolution, but property not molested. A new staff was sent to the mine in 1919, but withdrew shortly after; operations presumably resumed in 1922.

RIO TINTO COPPER CO.

CHIHUAHUA

Mine and works office. Terrazas, Chihuahua, Mexico.

Inc. in Ohio. Is a holding company for Mexican subsidiaries. Operated as a close corporation under the control of Corrigan, McKinney & Co., Cleveland, Ohio.

Property: the Rio Tinto Mexicano mine and works bought 1908 for \$187,500, and the property formerly held by the **San Rafael Copper Mining Co.** The first named is about 25 miles north of Chihuahua City and comprises a main tract of 153 hectares, and a smaller tract of 6 hectares, including nearly all the developed mineral property of the Terrazas camp, except a few lead mines. The tract includes the Rio Tinto mine, and properties formerly worked by the **Rio Tinto Mexicano Mining Co., Boston & Mexican Mining Co., Dragoon Mining Co. and San Rafael Copper Mining Co.** The principal properties are the Rio Tinto Mexicano, San Rafael, Promontorio, Verde and Colombia mines, all connected underground. The company also owns the Savanarola group, at Savanarola, about 50 miles south of Chihuahua and 35 miles west of Ortiz carrying silver-copper and lead ores.

The Rio Tinto Mexicano mine opened 1860, closed 1902, reopened 1905, has been owned and operated by a number of different mining companies until purchased by this company from Messrs. Enrique and Juan A. Creel.

Geology: the claims cover contact deposits between limestone and altered andesite, there being 5 known orebodies in a metamorphic zone traced 1,500 metres. The orebody has a minimum width of 2', maximum of 100', and averages 20' across. Ore also occurs between the limestone bedding planes, near a large quartz ledge, and the orebodies, while erratic in size and occurrence, are connected and practically continuous. The limestone has an average dip of 45° N.-W., and the property has also some silver-lead ore. The gangue is mainly limestone, somewhat garnetiferous. Extensive diamond-drill borings prove large orebodies of workable copper ore.

Development: by a number of shafts to a depth of 400'; has about 3 miles of workings. The ground is firm, requiring no timbering, pillars having been removed to give chambers up to 100' square.

The San Rafael mine has a 440' two-compartment shaft. The Promontorio mine has 2 shafts, 1,000' apart, the main shaft being 350' deep. The Colombia mine has a 275' shaft, with about one-half mile of workings.

Equipment: includes steam and gas power, air compressors, etc.

Ore is carried from mines to smelter by a mile long narrow-gauge railway, equipped with a 6-ton Porter locomotive and 5-ton iron ore cars.

Smelter at Terrazas, one mile from the mine, connected by ½ mile spur with the main line of the Mexican Central railroad, has two 300-ton 42x192" blast-furnaces. The converter department has 1 stand and 3 shells, with a 40-ton electric traveling crane and a relining plant. The power plant has a 250-h. p. compound engine, direct-connected to a No. 8 Connersville blower, and a 100-k. w. generator supplies current for the other machinery.

Production: for recent years not known, but for the four years 1906-1910 was 9,150,000 lb. copper; 27,000 metric tons smelted averaged 2.5% copper, mining cost being \$3.50 per ton, and smelting cost \$3.50 per ton, or a cost for finished copper of 12.5c. per lb. The ore, though low grade, exists in large quantities, and the mine promises to become a producer, capable of making 1,000,000 lb. fine copper monthly.

The mine and smelter were operated intermittently throughout the earlier years of the Mexican revolution.

ROSARIO MINING & SMELTING CO.**CHIHUAHUA****Address:** Geo. Stinson, agent, Guadalupe y Calvo. E. Chihuahua, Mex.

Property: a group of gold-silver claims in Victoria district, W. of Santiago Papasquiro.

Plans erection of mill and completion of highway connecting with Guadalupe y Calvo.

ROY MINE**SONORA**

Address: W. R. Moycumber, supt., Pilares de Teras, Sonora, Mexico. Has 50-ton flotation plant.

SALTILLO, S. A.; COMPANIA MINERA DEL.**ZACATECAS**

Office: Primera de Galeana No. 2 Saltillo, Coahuila. Mine near Mazapil, Zacatecas, Mexico. Lic. Miguel Cardenas, pres.

Inc. June 15, 1899, in Mexico. **Cap.** 100,000 pesos; shares 100 pesos par; fully paid.

Dividends: were 10,000 pesos in 1907; 15,000 pesos in 1908. Annual meeting, January 31, each year.

Property: the Jesus Nazareno mine, in the Nazareno mining district of Mazapil, 10 miles from a railway. The mine produces 1,000 metric tons of silver-lead ore monthly, when conditions are normal.

Equipment: includes 5-mile private tram line, and 135-h. p. gas and electric plant. Apparently connected with Compania Minera Nazareno y Alicante, S. A., which see.

SAN ANTONIO COPPER CO.**SONORA**

Address: Geo. J. Eisele, sec.-treas., Iron Mountain, Mich. **Mine office:** San Antonio de la Huerta, Sonora, Mex.

Officers: Otto C. Davidson, pres.; Dr. J. A. Crowell, v. p.; preceding, with John Uno Sebenius, D. M. Clemson, Hon. Richard C. Flanagan, E. G. Kingsford and W. H. Johnston, directors; John E. McIntyre, supt.

Inc. Sept. 23, 1908, in Arizona. **Cap.** \$2,500,000; shares \$10 par; issued, \$1,000,000 full paid and \$1,000,000 with \$3.50 paid. Title is through the San Antonio Copper Co., S. A., inc. April 12, 1908, in Mexico, all stock being owned by this company. Annual meeting, 2nd Monday in April.

Property: 9 groups, about 7,500 acres, with 2,000 acres about 3 miles from San Antonio de la Huerta, near the Yaqui river. The property was worked 1862 in a small way.

Lands show a mineralized zone 200' to 500' wide, with veins containing copper oxides and carbonates, with a considerable quantity of chalcocite, giving assays up to 11% copper.

Development: consists of tunnels with 15,000' total workings, opening 7 separate orebodies, with 4,000' of workings in ore. Dwight E. Woodbridge estimated that the San Antonio had 300,000 tons of ore, averaging 7% copper. The railway line extends to within 2.2 miles of the main tunnels. Operations suspended on account of revolutionary disturbances since August, 1917.

SAN AUGUSTIN Y ANEXAS**DURANGO**

Address: E. Capillas Rueda, 7a Altamirano 133, Mexico, D. F.

SAN FRANCISCO Y MARAVILLAS; CIA. MIN. HIDALGO

Address: G. Hernandez, mgr., Apto. 431 Mexico City, Mex.

SAN GERONIMO CO. JALISCO

Address: B. J. Cotna, Worcester, Mass., who organized this company in 1922 to take over and operate mines in the Mascota district of Jalisco. Machinery and supplies were said to be on hand early in 1922.

SAN GERONIMO MINES & METALS CORP'N. SONORA

Office: 149 Broadway, New York City.

Officers: M. P. Dallon, pres.; M. P. Hall, treas. and G. F. Powell, engr.

Is a close corporation.

Empire Trust Co., N. Y., transfer agent; Columbia Trust Co., registrar.

Property: a group of claims that cover the "San Geronimo mining district", including a highly mineralized tract of 1,800 acres near the San Miguel river, about 18 miles N. E. of Poza, in which there are five mines.

Development: by numerous prospect shafts and tunnels.

Equipment: includes a 100-ton concentrating plant.

SAN JUAN MINING CO. CHIHUAHU

Address: A. H. Kraft, pres.-mgr., Box 994, El Paso, Texas.

Property: the San Juan copper mine, 40 acres, in Chihuahua, 9 miles S. of the border, opposite Fort Hancock, Texas. Office and loading stations are on the Southern Pacific, 2 miles N. of border.

Geology: limestone and sandstone are cut by dykes and sheets of porphyry with contact deposits along the igneous mass. Ore is an impregnation and replacement of limestone and sandstone with chalcopyrite and chalcocite.

Development: by 1,200' tunnel and 3,000' of work on 3 levels, opening ore 3 to 10' thick, for a length of 200'. Reserves in 1919 were 10,000 tons broken in the mine, 8,000 tons on dumps, and 25,000 tons ready for stoping. This ore carries from 3 to 4% copper and 3 to 4 oz. silver per ton.

Equipment: includes a complete mining plant, and 75-ton concentrator.

Production: from Feb., 1916, to Dec., 1918, inclusive, 22,500 tons sent to El Paso smelter yielded \$336,563. Expenses were \$226,336, leaving a profit of \$110,227. Mining, milling, and freight is estimated to total \$7.80 per ton.

Employs 100 men, when active.

SAN JUAN REDUCTION CO. BAJA CALIFORNIA

Address: P. A. Guappe, mgr., San Antonio, Baja California, Mexico. J. C. Puttner, mine mgr.; David Lawrence, mill supt. Operates a mine yielding gold-bearing arsenopyrite ore, 5 miles E. of Triunfo.

The reduction plant has dry rolls, Hardinge mills, roasting furnaces, and cyanide department. No recent information is available.

SAN JUAN Y ANEXAS; MINA CHIHUAHUA

Office: M. F. Crossette, mgr., First Natl. Bank Bldg., Denver, Colo.

Operating staff: Fred. MacCoy, gen. mgr.; J. L. Salinas, Pachuca, mine mgr., Simon Anduaga, Pachuca, mine supt., P. S. Stockdale, Pachuca, mill supt.
Inc. 1874, in Mexico. **Cap.** 220,000 shares; 10s par; all issued.
Property: includes mines at Pachuca, Hidalgo; Parral, Chihuahua; and Analco, Jalisco, Mexico.
The San Rafael mine at Pachuca was a producer in 1878 and to end of 1910 is credited with a production of 47,000,000 oz. silver. The ore contains argentite and occurs in quartz veins in andesite, the orebody being 500 meters long, 300 meters deep and up to 75' wide, the ore averaging 450' gm. silver per ton. Gold occurs in ratio of one gold to 250 silver.
Development: by 3 shafts, deepest 1,955', with 21 miles of workings.
Reserves: at end of 1920 were 167,535 tons, averaging 3.67 grams silver per ton.
Equipment: electrically equipped throughout, includes 1,500 k. (wt) power, 3 hoists, compressor, pumps, 3 electric locomotives, etc.
Mill: with 500 ton cyanide plant was burned down in 1921; rebuilding, 1922.
Production: 131.969 metric tons in 1918; 138.228 tons in 1919 and 131.-589 tons in 1920. Average value in 1920 of ore milled was 453 grams silver per ton with an extraction of 88.958% of the silver and 81.2% of the gold.

Mine staff: C. A. Lantz, gen. mgr.; F. H. Walsh, gen. supt., J. F. Berry, mine supt.

Inc. Dec. 31, 1909, in England. **Cap.** £1,500,000; increased Jan., 1911, from £1,275,000; shares £1 par; all issued and fully paid. (Camp Bird, Ltd., owns 841,685 shares.) An issue of £300,000 of 8% five year notes dated Sept. 30, 1925, was made in Dec., 1920.

Company organized to acquire from Camp Bird, Ltd., a controlling interest in the **Compania Minera de Santa Gertrudis y Guadalupe**, owning the

Santa Gertrudis gold and silver mines, for \$9,000,000 Mexican currency, approximately £922,130. Consideration for the option was £222,869, payable £20,000 cash and £202,869 in fully paid shares; the vendors also agreed to provide subscribers for 1,072,131 shares at par, and to provide £150,000 working capital, and also the purchase price of £922,130, the preliminary expenses to be repaid to vendors out of the first profits.

The name of the operating company is **Compania de Santa Gertrudis, S. A.**

The subsidiary company formed to operate the mill in which the ores are treated, is known as **Compania Beneficiadora de Pachuca, S. A., inc.** in Mexico. All shares in both these companies are owned by Santa Gertrudis Co., Ltd.

Company owns 137,745 fully paid £1 shares of Mexican Corp., Ltd. and 108,510 $\frac{3}{4}$ paid shares. Also £60,000 notes, 10 year 10% 49,996 shares of Mexican Chemical & Metallurgical Corp., Ltd.

Balance Sheet, years ending June 30:

Year	Assets.				
	Property & Equip.	Investments	Cash	Miscel.	Total
1921	£1,019,343	£948,616	£ 9,858	£77,468	£2,055,286

1916	55,394	42,057	97,451	75,421	22,030

Dividends: 15% in 1911-12; 15% in 1912-13; nil in 1913-14, owing to unsettled conditions in Mexico and Europe; 5% in 1914-15; 5% in 1915-16; nil in 1916-17; 8 $\frac{3}{4}$ % in 1917-18; 40% in 1918-19; 5% in 1920, to Jan. The total is £881,250.

Income account showed total receipts, £251,699, of which £250,000 represented dividend disbursements of the Com. Ben. de Pachuca; expenditures were \$14,315, leaving balance £237,384.

Santa Gertrudis Mines

Property: 626 acres in the Pachuca mining district, State of Hidalgo, about 62 miles from Mexico City. The tract carries silver and gold ore in large fissure veins or crush zones, 50' to 100' wide in andesite. A great oreshoot 3,000' long, 18' thick and 600' high has prongs that extend upward from the 800' or 900' level, but do not reach the surface. Down to No. 18 level the ore maintained its value. On the 19th level the ore was low grade and the values practically ceased on the No. 20 level, though the country rock did not change, nor were the structural conditions different.

Development: at Santa Gertrudis—new openings and reserves may be tabulated thus:

Year	New Work, feet	Ore, tons	Reserves	
			Silver recoverable, oz.	Gold recoverable, oz.
1921.....	1,297	309,911	2,687,877	15,430
1920.....	5,714	476,678	4,309,556	24,382
1919.....	8,162	718,579	7,128,996	40,108
1918.....	7,014	880,433	9,595,800	53,987
1917.....	8,856	1,125,000	12,381,080	61,904
1916.....	14,865	1,214,000	13,392,981	66,964
1915.....	15,838	1,287,000	14,595,567	72,977
1914.....	1,194,000
1913.....	1,047,000
1910 (when purchased)....	1,150,000 (containing profit of £1,650,000)

Equipment: Santa Gertrudis has a complete electrically-driven mining plant.

The Mill: the milling plant which can handle 2,000 tons of ore daily, has sixty 1,550-lb. stamps, two 8' by 48" Hardinge ball-mills, 11 tube-mills, elevators, thickeners, Dorr agitators, 8 filter presses, 300 leaf vacuum-filter plant, aluminum dust precipitation plant (zinc dust superseded), and Crowe vacuum precipitation apparatus. Flotation experiments show that process cannot compete commercially with cyanidation for the treatment of the company's ore.

The mill was enlarged to treat 2,000 tons daily in 1921.

Production, years ending June 30:

Year	Tons*	Value	Extraction,		Price Silver,	
			%	Gold, Oz.	Silver, Oz.	per oz.
1921.	201,094	£ 502,109	86.4	12,170	2,119,409	75.45¢
1920.	356,988	1,178,971	93.00	20,322	3,479,326	120.12
1919.	362,122	1,037,606	24,359	4,304,812	102.52
1918.	324,762	951,605	87.95	21,856	3,775,745	96.77
1917.	223,736	395,374	89.84	11,154	1,989,761	81.42
1916.	277,616	379,651	12,550	2,286,450	49.68
1915.	211,669	249,728	10,727	2,000,856	65.66
1914.	293,836	498,754	54.81
1913.	263,554	631,718	57.79

* 52.7% of capacity in 1915; 56.6% in 1916; 53.2% in 1917; 80.7% in 1918; 90.2% in 1919; and 98.3% by July, 1919. The low capacity was due to the revolution in Mexico.

Production during 1921 was 201,094 tons of ore that averaged 49s, 11d per ton, 86.4% of value being silver and 13.6% gold.

Since its purchase in January, 1910 up to June 30, 1921, the mine has produced 2,773,696 tons of ore containing 196,817 oz. gold and 36,378,926-oz. silver.

During 1918, Santa Gertrudis, through its subsidiary, made a 20-year con-

tract with **Compania Explotadora de Minas** to operate the latter's El Bordo, Malinche, El Cristo and La Zorra properties, 431 acres of developed and virgin ground in the most highly mineralized and productive part of the Pachuca district.

The Bordo Property.

El Bordo mine is on the Vizcaina vein, one of the largest in the district, and from which a great production has been and is being obtained in the neighboring Santa Ana (see Real del Monte), San Rafael, and Camelia mines for a distance along the strike over 8,000', from ore-shoots recurring with great regularity. El Bordo is a well-developed mine, with a large tonnage of profitable ore blocked out, in addition to having excellent future prospects; it covers 2,500' on the strike of the Vizcaina, Sacramento and Tapona veins. Some of the shoots vary from 5½' of 43 oz. ore up to 36' of 50 oz. ore, with 44' of 12½ oz. ore.

Development: at Bordo for 1921 was 4,396' in payable ore, 5,060' in vein, not payable, and 4,842 in rock.

Year	New work, ft.	Reserves		
		Ore, tons	Silver, oz. per ton	Gold, oz. per ton
1921....	14,298	1,064,059	11,944,552	48,810
1920....	14,798	1,064,180	11,000,444	48,400

During 1921 new work amounted to 14,298'.

In March, 1920, the main shaft of El Bordo was burned for a depth of 500', with great loss of life and delay in ore extraction. Shaft was sunk to 625 meters in 1921, with extensive development on 6 levels the deepest 525 meters.

Equipment: at El Bordo is a steel head-frame, 300-h. p. electric hoist, 1,400 cu. ft. compressor, machine-shops and 4-mile aerial tram, with branch to Malinche to new mill.

Production: was 131,836 tons in 1920 and 257,050 tons in 1921.

The Malinche Mine

Malinche covers a large, undeveloped area east of the Camelia and Paraiso mines which have worked in ore to its boundary line, and it covers 5,000' on the strike of the Vizcaina vein. It also has the eastern extension of the Maravillas vein which has been productive in nearby mines, with frequent ore-shoots for over a length on the strike of 8,000'. During 1920, a total of 2,504' was done.

Development: includes the 846' Ensenaza shaft used for ventilation, and the 1,410' Santo Tomas shaft. The 330-meter (1,082') level passed through broken vein matter for 325'. Beyond this the vein became normal, with 14 oz. ore. At 390' W. of the main crosscut, a local crosscut exposed 19' of 14.5 oz. ore, plus 6' of 19.5 oz. ore, in the Maravillas vein.

Reserves on June 30, 1921, were 133,761 tons of ore, containing 1,386,490 oz. of recoverable silver and 5,170 oz. of gold, compared with 102,810 tons in 1920, containing but 832,190 oz. silver and 3,670 oz. gold.

El Cristo is a partly developed mine from which a considerable tonnage of ore has been extracted. Other veins in this ground are the Calderona and Maravillas, in which further development should disclose important tonnages of lower grade ore.

Development: at El Cristo; previous work was by the 2,575' Calderona tunnel and the Esperanza shaft. The adit has since been driven 350', and a raise 592' above the end is to connect with the shaft. Mine is now fully equipped and has aerial tramway to El Bordo terminal.

Reserves at June 30, 1921, were 121,797 tons of ore containing 1,049,726 oz. recoverable silver and 5,170 oz. gold, a reduction of 10% below 1920 figures.

La Zorra covers a small vein upon which little development has been done and is a prospect of undetermined value.

the mines are connected with the new mill by an and a short branch line installed to deliver ore from n line at El Bordo.

working arrangement Santa Gertrudis makes an adora de Minas of \$500,000, to be repaid out of the vides \$600,000 for the development of the mines, enlargement of its present milling and treatment i the profits for 20 years.

ciadora de Pachuca, S. A. (Milling Co.)
lidalgo, Mex.

June 30, 1920, the mill treated 477,075 tons having 84, or £3 9s. 6d. per ton and containing 23,070 oz. er. In year ending June 30, 1921, the mill treated trudis and El Bordo mines, with an estimated pro-

ezitlan Copper Property.

management anticipated the depletion of its mine its place. In November, 1919, through The Mexi- ich see, company acquired a 25-year lease on prop- pper Co. The mines, 500-ton mill, power-plants ate of Oaxaca. Development, in 1921, exposed an ed for 185', and proven for 400' long by diamond rages 3.3 oz. silver p. t., \$5.80 gold, 4.5% copper, id 21.3% insoluble. Prior to 1913, when the rev- on, the annual output was 7,000,000 lb. of copper, ver and gold. There were 2,500 men employed. ained on the Fresnillo Co., which has a mine in

*Deficit.

Property: 5 claims, the Bustillos, La Fortuna, Independencia, Juarez and La Central, in the Santa Eulalia district, 12 miles S. E. of Chihuahua, adjoining the Potosi mine, controlled by the Howe Sound Co.

Ore: lead-silver, occurring in chimneys and "mantas" (beds or blankets) in limestone. For detailed description of geology of the district, see Trans. A. I. M. E. Vol. LI, (pp. 57-99).

Comparative Statement of Operations:

Year	Ore,		Silver		Lead		Average Net Value	
	Tons	Oz.	Oz. p. t.	Lb.	%	Oz.	Lb.	
1914	2,918	110,824	31.5	51.48c	
1913	7,129	554,181	78.5	57.45c	
1912	7,851	485,712	66.3	260,989	1.8	60.07c	2.89c	
1911	12,173	1,433,071	117.7	1,275,778	5.9	51.87c	1.79c	
1910	20,181	879,492	43.6	1,584,528	3.9	52.10c	1.65c	
1909	25,509	1,410,630	47.8	1,810,397	3.1	50.77c	1.66c	

Company was a large producer of silver-lead ore prior to the Madero revolution. In 1917, the Santa Eulalia property was leased to Compania de Minerales y Metales for 10 years, on a royalty of 15% on net smelter returns, the minimum to be \$30,000, payable monthly in advance in installments of \$2,500.

SAN VICENTE MINING CO.

SINALOA

Address: 58 Second St., San Francisco, Calif.

Officers: A. G. Folger, pres.; F. C. Ruppel, sec.

Inc. 1893, in California. **Cap.** \$100,000; \$1 par; 100,000 shares issued.

Dividends to date amount to 820%; last distribution, 5%, Nov. 16, 1916.

Property: 250 acres, patented, at San Ignacio, Sinaloa, Mex. Credited with past production of \$5,000,000 in gold and silver.

SAN XAVIER COPPER CO.

SONORA

Probably dead. Formerly operated mine near San Xavier, Sonora, Mex. See Vol. XIII.

SIERRA CONSOLIDATED MINES

CHIHUAHUA

Office: 120 Broadway, New York, N. Y.

Officers: J. B. Cotton, pres.; Robert Linton, v. p.; F. R. Kennedy, sec.-treas.; H. B. Paull, auditor.

Directors: Robert Linton, E. R. Grochau, J. F. Bangerd, T. F. Cole, J. B. Cotton, L. D. Ricketts, F. R. Kennedy, and H. B. Paull.

Inc. Aug. 18, 1909, in Arizona. **Cap.** \$5,000,000; \$10 par; 76,500 shares issued, fully paid 223,500 shares part paid at \$7 each, \$1,564,500; total outstanding \$2,329,500. Last assessment, \$1 per share, was payable Aug., 1, 1918. Stock transferred and registered at the company's office. Annual meeting, first Tuesday after first Monday in May at Warren, Arizona. Stock traded in on Boston Curb.

Property: embraces mines, mineral and timber lands, water-rights, etc. The mineral properties consist of 1,235 acres, in Ocampo, Pinos Altos, Socorro and Yepachic, in the district of Rayon, State of Chihuahua, Mexico. The timber lands comprise 80,000 acres all in Chihuahua. The company has water-power rights at Jesus Maria arroyo, a stream that flows through Ocampo, and to the Basaseachic falls 18 miles from Ocampo.

Development: from 1909 to 1912 in Matulera, Belen, Santa Eduvigis, Guadalupe, San Ramon, El Conico, San Estanislao, and La Cumbre mines totalled about 13,000' when operations were suspended on account of the revolution.

The underground work has developed six ore-shoots blocking out approximately 100,000 tons of ore averaging \$12 per ton in gold and silver, basing the value of silver at 50c per ounce. The silver occurs as argentite, with some associated gold, in a silicious gangue. The ledge matter is an andesite breccia cemented with quartz.

Equipment: the mill equipment consists of a 20 by 10" Blake crusher, ten 1,500-lb. stamps, two 4 by 20' tube-mills, three 15 by 45' Pachuca agitators, two Dorr thickeners, Esperanza classifier, 135-ton Oliver filter, Gwynne centrifugal pumps, solution tanks, steel zinc-boxes, Johnson precipitate press, tilting furnace for refining precipitates and other necessary accessories. The electric generating station, 6 miles from Ocampo, on one of the company's timber tracts consists of 66" by 16' Brownell tubular boilers, with feed waterheaters, pumps, etc.; three 100-h. p. Russell high-speed automatic engines belted to 75-k. w. generators; three 75-k. w. oil-cooled transformers; and all necessary lightning arrestors, switch-board apparatus, Tyrell regulators, etc. The current is generated at 2,300 volts and raised to 22,000 volts for transmission to Ocampo.

Sierra Mining Company, S. A.

Principal office: Juarez, Chihuahua. Mines and works at Ocampo, district of Rayon, Chihuahua, Mexico. This company is the Mexican operating corporation of the Sierra Consolidated Mines Co.

Officers: J. B. Cotton, pres.; Robert Linton, v. p. and gen. mgr.; H. O. Flipper, sec.; F. R. Kennedy, treas.; H. B. Paull, auditor and Enrique N. Seyffert, commissario.

Inc. Dec. 11, 1908, in Mexico. **Cap.** 25,000 shares at \$20 each (Mexican Currency).

SIERRA MADRE MINING CO.

CHIHUAHUA

Address: W. J. Kelly, pres., 4601 Lincoln Ave., Chicago, Ill.

Officers: W. J. Kelly, pres.; J. R. Kelly, v. p.; M. P. Geiselman, sec.-treas., with M. V. Kelly, directors.

Inc. in Mexico. **Cap.** \$250,000; \$1 par; 5,000 shares in treasury.

Property: 7 claims, 165¼ acres, in State of Chihuahua. Ore said to contain lead, silver, copper and gold.

Development: by shafts and drifts to depth of 1,000'. Reported to have 50,000 tons milling ore on dump.

Idle since Mexican revolution.

SIGLO NUEVO; MINA EL

NUEVO LEON

Address: Pablo Hinojosa, mgr., Cerralvo, N. L., Mexico.

SILVER SEAL MINING CO.

SONORA

Mine at Pilares de Teras, Sonora, Mex. Fred O. Colsen, lessee at last accounts.

Property: El Aguaje mine, 12 miles east of Nacozari, showing a fissure vein in andesite rock, carrying narrow paystreaks of gray copper, chalcopy-

rite and galena ore. The mine yielded ore which assayed up to 15% copper and 20 oz. silver per metric ton.

Probably idle.

SINALOA SMELTING & REFINING CO., S. A. **SINALOA**

Subsidiary of the Pacific Smelting & Mining Co., which see

SINDICATO MINERO FUNDIDOR **NUEVO LEON**

Address: Joaquin Maiz, mgr., Apto. 102, Monterey, N. L., Mex.

SOCORRO y ANEXAS; CIA. MINERA **AGUASCALIENTES**

Address: Gabriel Chavez, mgr., Bajos del Hotel Paris, Aguascalientes,

Ags., Mexico.

SOMBRERETILLO MINING CO., S. A. **SONORA**

Dead. Was controlled by Sonora Central Mines Co., also defunct.

SONORA CENTRAL MINES CO. **SONORA**

Dead. See Vol. XI of Copper Handbook.

SONORA CHIEF MINING CO. **SONORA**

Probably dead. Mail returned from former address, 219 Argyle Bldg., Kansas City, Mo. Mine near Suaqui de Batuc Sonora, Mex.

Officers: Jas. E. Crosby, pres.; Dr. Moses T. Runnels, v. p. and treas.; R. A. Bruns, sec.; preceding with C. D. Stoll and I. D. Waggener, directors. Inc. July 18, 1904, in Arizona. Cap. \$1,500,000; \$1 par.

Property: the Phoenix and Lakeside groups, 464 acres. This flotation was, it is believed, a crooked one. The property had no such showing as reported and described. Such veins as existed were tiny streaks, a few inches wide, which in places contained very high-grade ore, chalcocite and perhaps whitneyite. Its location, on the far side of the Yaqui river, is such that even a remarkably good showing would not have been worth development at the time the company was active. The property is said to be totally devoid of merit.

SONORA COPPER MINING CO. **SONORA**

Idle and probably dead. Mail unclaimed, at last office 895 So. Clarkson Ave., Denver, Colo.

Officers: Edward J. Wilcox, pres.; H. L. Peebles, v. p.; Fred W. Weber, sec.; C. A. Parker, treas., and L. J. Stark, directors, at last accounts. Inc. May 17, 1910, in Colorado. Cap. \$10,000; shares \$1 par.

Property: 10 claims. 4 miles from San Felipe, in the Arizpe district, Sonora, developed by 820' of underground workings, showing a 12' vein, with some complex silver-lead-zinc ore.

Is unfavorably regarded.

SONORA COPPER SMELTING CO. **SONORA**

Last address: 424 Scarritt Bldg., Kansas City, Mo. **Mine office:** Noria Sonora, Mex.

Officers: A. M. Conard, pres. and gen. mgr., at last accounts; J. M. Lowe, v. p.; C. E. Kroh, sec.; W. R. Moore, treas.

Inc. June 25, 1908 in Arizona. Cap. \$3,000,000; shares \$10 par.

Company supposed to have been organized as successor of the Sonora Copper Co., but apparently owns only a 50% stock interest in that company, and title to the Mexican property is held in the name of the International Copper Ore Corporation, which is controlled, in some manner, by this company, the corporate relations being neither clear nor satisfactory.

Property: about 500 acres, including the Cobre Grande, 123 acres, 5 miles east of Noria.

The principal mine, is not considered worthy of the money spent upon it and the past history of the president is such that the company is regarded with much suspicion.

SONORA DEVELOPMENT CO. **SONORA**

Office: 500 New Ridge Bldg., Kansas City, Mo. R. W. Brown mgr.

Officers: H. P. Wright, pres.; J. A. Nuttman, 1st v. p.; D. J. Haff, v. p.; W. A. Rule, treas.; J. W. Amermen, sec.; with William Huttig, Thos.

Mackie and Henry C. Page, directors. International Commission Co., Y. Soto, agent, Douglas, Ariz.

Inc. in Arizona. Cap. \$2,500,000. Reorganization completed in 1919, and outstanding shares reduced to 500,000. Company absorbed the Goodlander Mining & Milling Co. in 1902.

Property: 335 acres, includes Don Genario, 50 acres; Nacozari Copper Queen, 65 acres; La Madrugada, 40 acres; El Nocturno, 40 acres; La Gran Republica, 25 acres; Lady Goodlander, 65 acres; Tres Avril, 15 acres, and Wostenholm, 35 acres. Properties show silver, copper, lead, and zinc ore.

Company resumed development work in 1921.

SONORA EXPLORATION CO.

SONORA

Controlled by **Aztec Consolidated Mining Co.** which see.

Inc. in Arizona and legalized in Mexico. Cap. \$10,000; shares \$1 par; 9,997 held by Aztec Cons. Mining Co.

SONORA EXPLORATION CO.

SONORA

Address: Estacion Yzabal, via Agua Prieta, Mexico.

Property: once owned by the **Florida Copper Co.**, includes El Temblor Last Chance, Texas, and other properties, carrying copper ore, developed by shaft.

Equipment: includes steam power and an air compressor. Idle and probably dead.

SONORA MEXICAN SILVER MINES, LTD.

SONORA

Office: G. W. Vinson, sec., 9 Kings Bench Walk, Temple, London, E. C. 4.

Directors: Sir E. W. Birch, chrm.; M. Epstein, T. W. Brown, J. C. Craigie.

Inc. Sept. 1919. Cap. £85,000; £1 par; 45,000 shares issued.

Property: 125 acres, in Alamos district, near Minas Nuevas, Sonora, includes the Quintera, Zambora Purisima, San Antonio, Zambora No. 3, Fortuna and La Purisima Conception mines worked before the 1914-21 revolution by Amos Yaeger.

Equipment: includes 20-stamp mill and cyanide plant.

SONORA MINING & DEVELOPMENT CO.

SONORA

Idle since 1910. **Office:** 207 Spitzer Bldg., Toledo, Ohio. **Works office:** Toledo, Sonora, Mex.

Officers: A. E. Klausner, pres.; H. R. Klausner, v. p. and gen. mgr.; J. G. Meilink, sec.-treas.; and A. V. Baumann, directors, at last report.

Inc. 1904, in Arizona. Cap. \$5,000,000; shares \$1 par. Company operated in Mexico under the name of the **Yaqui Smelting & Refining Co., S. A.**, inc. in Mexico; cap., 100,000 pesos. Company is exempt from the payment of property tax for 20 years and also enjoys a 50% reduction on the state tax for 20 years. International Trust Co., Boston, registrar; Frederick R. Tibbetts, Boston, transfer agent.

Property: about 154 hectares, about 80 miles east of Torres and 60 miles below Campo Santo Nino. The principal property is the Veta Grande mine, about 10 miles from the smelter, said to show a gossan 40' wide, outcropping for a quarter mile.

Equipment: the reduction works include a sampler, smelter and power plant, with necessary adjuncts. The 150-ton smelter has a 36" circular Allis-Chalmers blast furnace, for use interchangeably on lead and copper ores, and a small furnace for copper only. The power plant includes two 80-h. p. water-tube boilers, 2 engines, an Erie high-speed engine and a No. 7 Connorsville blower, for furnace blast. The lead refinery building has a softening furnace, refining furnace and 2 desilverizing kettles, operating on the Park process. The silver refining plant includes 2 cupel furnaces, with blast attachments, 1 bullion furnace, 1 muffle furnace and necessary pots and moulds, with a bullion vault.

SONORA-PACIFIC MINING CO.**SONORA**

Idle. Address: Noria, Sonora, Mexico. Ira E. Bowers, gen. mgr., at last account.

Inc. 1911, as the successor of the Liano Copper Co.

Property: 10 groups, 526 hectares on Caracahui mountain, 3 miles east of Noria, the nearest rail point. Lands show limestone cut by intrusions of diorite and porphyry, with a quartz vein of 3' to 50' estimated width, traceable 6,000' on the company's claims, which is reported to show bunches of ore carrying chalcocite, bornite and chalcopyrite, with a little native copper, 6 to 10 oz. silver and \$2 to \$5 gold per ton, as developed.

Development: consists of the 105' No. 1 shaft, No. 4 shaft of 800', and No. 7 shaft of 600' with tunnels of 50', 200', 577, and 750'. Orebodies developed so far are too small and too few for commercial production.

Equipment: includes a 125-h. p. steam plant, with 2 hoists, and a 6-drill compressor.

SOYOPA SILVER MINING CO., S. A.**SONORA**

J. E. Crocker, mgr., Nogales, Son., Mex.

Inc. 1921.

Property: Hidalgo gold-silver mine, in Soyopa district, Sonora.

SULTANA, S. A., LA CIA. MINERA**COAHUILA**

Address: J. C. Rodriguez, Apto. 87, Saltillo, Coah., Mex.

SUPERIOR BONANZA MINING CO.**SONORA**

Controlled through stock ownership of 60,000 shares by Cananea Cons. Copper Co., S. A.

Office: Cheyenne, Wyo. Head office: 25 Broadway, New York City.

Officers: Jos. B. Cotton, pres.; John D. Cuddihy, v. p.; Walter S. Harper, v. p.; Jos. W. Allen, sec.-treas.; Paul J. Geisler, asst. treas., with Evan J. Dudley and A. E. Peterman, directors.

Inc. in Wyoming, Aug. 31, 1907. Cap. \$1,250,000; shares \$10 par; 74,923 issued. Owns the entire capital stock of Bonanza Mining Co., S. A.

TAJO: MINAS DEL.**SINALOA**

Mine address: G. C. Jones, mgr., Rosario, Sinaloa, Mexico.

Office: Bradbury Estate, owners, Bradbury Bldg., Los Angeles, Calif. Is one of the large gold-silver mines of Mexico, showing a big fissure vein in andesite, developed to 1,000' in depth. Working \$8 ore from old fills and pillars, above 600' level, at last reports. Has a complete equipment with 1,000-k. w. gas-producer electric plant.

The mill has a capacity of 250 tons per day and treats custom ore.

TAMAULIPAS; CIA. MINERA DE**TAMAULIPAS**

Address: Sabino Zuniga, mgr., El Palmar, Jurisdiccion de San Nicolas, Tamo.

TECOLOTES MINES**CHIHUAHUA**

Owned by Am. Sm. & Ref. Co., which see.

Address: W. P. Schumacher, supt., Chihuahua City, Chih., Mex.

About 1,000 men are reported employed at mines and at the 750-ton mill.

TEZIUTLAN COPPER MNG. & SM. CO.**PUEBLA**

Office: 82 Beaver St., New York. R. E. Safford, sec.

Property leased for 25 years to The Mexican Corporation, Ltd. (which see), the operating company receiving 37½ per cent. of the net profit. See Vol. XIII for details of organization.

The Teziutlan Copper Co., a N. J. Corp'n, is a subsidiary of this company

THARSIS-YORK CO.**SONORA**

Fully described in Vol. XIV. Property purchased by the Nacozari Consolidated Copper Co., which see.

TIGRE MINING CO., S. A.**SONORA**

See Lucky Tiger Combination Gold Mining Co.

TIRO GENERAL; CIA. MINERA DEL SAN LUIS POTOSI

Sold property to the **Cia Metalurgica Nacional**, of Matehuala, San Luis Potosi, Mex., which is controlled by the American Smelting & Refining Co.

TIRO GENERAL MINES SAN LUIS POTOSI

Owned by **Cia. Metalurgica Nacional** (or National Metallurgical Co.), a subsidiary of the American Smelting & Refining Co. Mine was formerly owned by the **Cia. Minera del Tiro General, S. A.**

Office: 120 Broadway, New York. **Operating address:** W. M. Drury, gen. mgr., 1112 Mills Bldg., El Paso, Texas. **Mine address:** S. H. Sherman, Charcas, S. L. P., Mexico.

Property: 72 pertenencias, 178 acres, with 46-acre millsite, and 50-acre farm, in the Venado district. The mine was worked on a small scale for 3 centuries, and in a larger way since 1859. It shows 2 main ore zones, carrying fissure veins in porphyry, near a limestone contact, with a generally E.-W. strike and dip of about 70°. The N. vein, of 3 to 8 meters width, with known length of 500 meters, is opened to depth of 1,361', showing chalcopyrite and sphalerite estimated by the management to average 2% zinc, 430 grams silver and 8 grams gold per metric ton. There are 9 tunnels with 13,123' of workings.

Equipment: includes a 700-h. p. steam plant, with hoists of 100-h. p. and 175-h. p. and a 10-drill air compressor. There is a 10-stamp mill and a 150-ton concentrator, having crushers and 5 sets of rolls, with trommels and other necessary equipment. The mill has 10 pneumatic dry concentrators, which treat sulphide ores and give a preliminary lead concentrate cut out from the final zinc concentrate, the latter being a 45% zinc product, secured largely from rosin jack.

The mine was flooded from 1913-1919; was unwatered in 1920, but operations again suspended, 1921.

TOMMIL-ESPANOLA PROPRIETARY CO., LTD. SINALOA

Office: Capel House, 54 New Broad St., London, E. C.

Mexican office: Donald Gosset, resident engr., Mazatlan, Mex.

Directors: Henry Herbert Pain, chairman; John L. Richardson and Arthur Edwin Rigden.

Inc. August, 1920 as a reconstruction of the Tommil (Mexican) Mng. Co., (1910) Ltd. **Cap. £250,000;** 10s par; 258,734 issued and fully paid; 169,467 issued, 6s 8d paid.

Property: San Felix, Eliza and San Augustin claims in Tamazula district, Durango, equipped with 50-ton cyanide mill. The mine has been closed down since 1912 owing to revolutionary disturbances.

Company has since acquired a one-half interest in the Habal gold quarries and the Espanola group, about 7 miles from Rosario, in the State of Sinaloa and about 50 miles from Mazatlan.

Development: by 100' shaft, crosscuts and drifts. Trial shipment to Tajo mill said to have averaged 30 oz. silver and 2 oz. gold.

It is planned to form a syndicate to develop the Habal property and erect a 1,000-ton mill.

TOMMIL (MEXICAN) MINING CO., (1910) LTD. SINALOA

Liquidator: A. E. Rigden, Capel House, 54 New Broad St., London, E. C. 2, England.

Succeeded August, 1920 by Tommil-Espanola Proprietary Co., Ltd., which see.

TORREON. S. A., CIA. METALURGICA DE COAHUILA

Controlled and managed by **Cia. Minera de Penoles**, which see for detailed description.

Office: Torreon, Viesca, Coahuila, Mexico.

Operates both silver-lead and copper custom smelters.

TRANSVAAL COPPER MINES CO. OF UTAH SONORA

Mine address: Cumpas, Sonora, Mexico.

1 Utah, as a reorganization of the Transvaal Mining
a reconstruction of the Transvaal Copper Co. Cap.
. Annual meeting 1st Tuesday after 1st Monday in

Verde, Cobre Rico, Buckeye, Ultima Chanza, and
tal of 3,500 acres of mineral land, including a 50-acre
re townsite adjoining; La Piedra Verde ranch of
interest in the San Nicolas Tolentino ranch, 26,000
and grazing lands.

's holdings cover the heart of a mountainous dis-
id rock alteration with acid stream waters, bleached
and "chimneys" or "pipes" of silicified breccia. The
posures, part of an underlying batholith, cutting frac-
reccias, baked by contact action. In the Transvaal
l volcanic rock are cut by irregular mineralized frac-
noclase, carrying chalcocpyrite, fluorite, chlorite, and
sited by pneumalytic action. The "pipe" or "chim-
terial cemented by quartz, are sometimes barren, but
La Verde and Cobre Rico, contain workable copper
type of deposit and resembles the Calumet-Copper
ona, the Kamloops mine in British Columbia and the
iles W. of the Cobre Rico property.

as two 80-h. p. boilers, a steam hoist and air com-
pply at this mine is bad, owing to its acidity.
l drilling at La Verde, the Transvaal mine proper,
tonnage of low-grade primary ore, averaging 1½%
by the management at 3,000,000 or more tons, which
ed some day by flotation methods. The drills have
id to a depth of 1,100'.

mine has 2 shafts, No. 1 of 100' and No. 2 about 140'
unnels and about 16,400' of workings, (including
loping several orebodies in a mass of brecciated rock.

Ore is estimated to average about 2% copper, 1 to 2
of gold. Management estimates 2,500,000 tons avail-

e has about 10,000' of tunnel work, on a blanket vein
showing ore reported to have given average returns
o 10 oz. silver, with a trace of gold. There are about
de ore left in the mine and a considerable amount of
present commercial value. The mine, however, has
ored in the bottom, or lower tunnel level and the ore
layed out.

mine is a silver property about 8 or 10 miles from the
a vein varying from 1 to 4' in width, carrying silver-
ze to copper in the lower workings. The mine is re-
l 6,000 tons of 60 oz. silver ore and still has between
f 50-oz. silver ore. It is regarded as a promising pros-
eral development. In May 1919, it was reported that
ing Co. operating as the Mexicana Dessaralladora de
a lease on this mine. A 50-ton flotation plant was

za mine has a 300' incline shaft and a 100' winze, with
gs. developing a fissure vein of 10" to 42" width. The
s 50,000 tons of ore in sight, averaging 10% copper,
ce of gold. This property is a good, but small mine,
opment. Equipment includes a steam plant and hoist.

The nearest rail station is at Nacozari, 30 miles north, but the Cananea, Rio Yaqui y Pacifico railway has surveyed a line to within 9 miles of the smelter. The company has built about 35 miles of wagon roads and 25 miles of trails at a cost of \$50,000, with a maintenance charge of about \$5,000 yearly.

The main camp is at La Verde, 25 miles S. W. of Cumpas, where mining operations are centered. There are 20 buildings, including 3 power plants, machine shop, carpenter shop, smithies at the principal mines, 2 laboratories, a boarding house, general store, with a branch store at the smelter, a hospital and several dwellings.

Smelter: at Cumpas, about 25 miles from the mines, was located at that point because of a good site and ample water supply. Equipment includes a 125-ton 42"x120" El Paso Foundry & Machine Works water-jacket blast furnace, with room for 2 additional furnaces of the same size. There is a reverberatory furnace, of 50 tons daily capacity, and a sampling mill, capable of sampling ore to feed 3 furnaces. The smelter power plant includes, three 80-h. p. Babcock & Wilcox boilers and Allis-Chalmers tandem compound engine and a Connersville blower. This smelter was blown in May 1, 1906, treating ores from the Buckeye and San Nicolas mines and doing a little custom business, producing matte shipped to the Laurel Hill works of the Nicholas Copper Co., and from May 1, 1906 to November 3, 1907, a period of 18 months, the smelter, in operation about two-thirds of the time owing to scarcity of freighting outfits, smelted 18,550 tons of ore having an average assay tenor of about 10% copper and 8 oz. silver for copper ore, and 2% copper and 60 oz. silver for silver ore., making 3,089 tons of matte yielding 2,178,855 lbs. fine copper, 407,607 oz. silver and 240 oz. gold.

The extensive development work done on the property since 1909, shows the existence of small veins of rich ore and large deposits of low-grade ore. The property can be worked on a large scale when given the rail connections absolutely essential to the profitable exploitation of the ores.

TRENTON-SONORA MINING CO.

SONORA

Mine office: Tarachi, Sonora, Mex.

Property: the San Jose, Santa Eduvigis, El Porvenir and other mines, 4 miles S. of La Calera carrying copper ores, with values mainly in silver. The San Jose mine is reported to show an 18" paystreak of highly auriferous chalcocopyrite.

Development: by a 200' shaft sunk on the vein, equipped with a hoist. There is a mill and a smelter. No recent returns.

TRES ESTADOS MINING CO.

COAHUILA

Address: Saltillo, Coah., Mex. Ramon M. Garcia, treas.

The 15th assessment of 50 centavos per share levied, August, 1921.

Property: in Coahuila, Mex.

TRES SENORES MINING CO.

ZACATECAS

Mine: at San Pedro Ocampo, Zacatecas, Mexico.

Property: includes La Providencia and La Poderosa mines, near San Pedro Ocampo yielding ores that have given smelter returns of 10% copper, 3,234 grams silver and 120 grams gold per metric ton. No recent reports received. Property closed down.

UNION EN CAULE MINING CO.

JALISCO

Property being operated by **The Mexican Corporation, S. A.**, a subsidiary of the Mexican Corporation, Ltd., (Mex.), which see.

UNITED MEXICAN MINES

SONORA

Idle. Address: O. L. Neer, mgr., Douglas, Ariz.

Property: 40 miles S. of Nacozari, near La Verde, via Cumpas, Sonora, Mexico, includes the Veta Grande and Cerro Gordo groups, near the Transvaal mine.

Mines show rhyolite, granite and porphyry, with several orebodies occurring in fissure veins, and as breccia deposits between trachite and granite. Ores contain copper sulphides.

UNITED MINES CO.**GUANAJUATO****Office:** 15 Broad St., New York City.**Officers:** Fred G. Corning, N. Y. pres.-gen. mgr.; Jos. McDonald, mgr., Guanajuato, Mex.**Inc.** 1917, in So. Dakota. **Cap.** \$2,500,000; par \$5; 2,000 shares sold for \$100 the lot at public auction in New York on Dec. 16, 1920; 19,000 for \$100 the lot on Dec. 31.**Property:** the Melladito, La Lula, San Ramon silver mines in the Guanajuato district. Work was resumed on the Melladito group, 1920-21, and a new body of milling ore reported opened up.**Equipment:** includes 15-stamp mill, tube mills, 100-ton cyanide plant, etc., operated intermittently.

Employs 150 men.

VALENCIANA EXTENSION CO.**GUANAJUATO**

A reorganization of the Mineral Development Co. and Proprietary Mines Co. Sponsored by C. W. Pope & Co. Reported that Cameron, Michel & Co., 8 W. 40th St., New York City, will handle stock sales and have control.

Inc. 1921. **Cap.** \$6,000,000; par \$10; 300,000 shares put in voting trust, and go to stockholders of the Mineral Dev. Co. and stockholders and bondholders of the Proprietary M. Co.

Cameron, Michel & Co., are to have option on 200,000 shares at \$5, proceeds to be used to continue development of Nueva Luz mine, and a further option on 80,000 shares at par.

Company organized to take over the Nueva Luz mine, and other holdings hitherto owned by the Mineral Development Co., a corporation controlled by the Proprietary Mines Co. The property, fully described under the latter title, is a development proposition which is expected to open up the downward extension of the great Valenciana orebody, probably the greatest silver bonanza ever known. From geologic evidence, it is thought that this orebody will pass downward into the Nueva Luz ground. See **Proprietary Mines Co.**, in this book.

Company will it is said start out clean, with no bonus, promotion or ownership stock available for sale, and former owners are to accept voting trust shares and wait for their profits from the mine. The new interests will finance property from sale of treasury stock. Last work in Nueva Luz mine cut the Veta Madre at a point 200' or so from the place where the Valenciana ore shoot is supposed to be. It will take 1,800' of drifting to explore and open up the ore shoot.

VETA GRANDE; CIA. MIN. de la**ZACATECAS****Address:** Jose de Casco, Isabel la Catolica 72, Mexico City, Mex.**Property:** an old silver-lead mine, shipping to smelter at Aguascalientes in 1920.**VETA GRANDE; CIA RESTAURADORA del MINERAL de****ZAC.****Address:** Jose de Caso, Isabel la Catolica 72, Mexico City, Mex.**VETA GRANDE MINES****CHIHUAHUA**

Address: Parral, Chih., Mex.**VICTOR MINING AND SMELTING CO.****SONORA**

Probably defunct. Former office 315 Schulz Bldg., Columbus, Ohio.

Former address: Cananea Sonora, Mexico.**Officers:** at last accounts, S. D. L. Jackson, pres.; M. F. Cole, v. p.; F. P. Jackson, sec.-treas.; with J. S. MacLean, W. H. Sartain, C. Thornton, Chas. Schindler and C. A. Stillwagen, directors. W. A. Woodlief, fiscal agent.**Inc.** May 9, 1905, in Arizona. **Cap.** \$1,500,000, increased 1907, from \$1,000,000; shares \$10 par; issued, 90,000 shares. Title to property was held through the Guerrero Mining Co., legalized in Mexico.**Property:** 47 pertenencias, in 2 groups in the Magdalena district, about

12 miles S. W. of Cananea, shows fissure veins in granite-porphry intruding sedimentary rocks.

Development: by 5 short tunnels, about 1,500' of workings, showing high-grade copper ore with small gold and silver values, in 2 veins of about 4' and 70' width, latter without ore.

Mine was ordered sold at receiver's sale, September 11, 1916, at Nogales, Arizona.

WASHINGTON MINES DEVELOPMENT CO. SONORA

Office: Douglas, Ariz. **Mine office:** Washington Mine, via Huepac, Sonora, Mexico.

Officers: F. O. Bostwick, pres.; Geo. Cass, v. p.; Albert Sames, sec-treas.

Inc. 1911, in Arizona. **Cap.** \$1,500,000; shares \$10 par; issued 130,000 shares.

Property: 27 hectares in the Arizpe district, 60 miles from Nacozari, the nearest rail point. Claims show several "pipe" deposits composed of brecciated rhyolite in dacite. Ore is reported to average 3.2% copper, 0.35% tungstic acid, 1.5 oz. silver and some gold.

Development: by a total of about 6,000' of workings said to show 600,000 tons of ore blocked out for stoping.

WEST COAST MINING & SMELTING CO. SINALOA

Idle many years. **Office:** Mocorito, Sinaloa, Mexico. **Howard L. Haines, pres.;** Chas. M. Hicks, sec., at last accounts.

Inc. 1906, in Maine. **Cap.** \$2,500,000; shares \$1 par; in \$500,000 of 7% cumulative preferred stock and \$2,000,000 of common stock.

Property: 6 groups, 387 acres, 5 to 20 miles from Mocorito, and 12 to 40 miles from Carbo. Principal property is Los Tajos group, 357 acres, showing andesite, cut by narrow fissure veins of 4' average width that are said to carry chalcopryite ore. The River mine, has a 150' shaft, on a vein of 5 to 8' reported width, carrying ore said to average about 5% copper and \$3 per ton in gold and silver.

Equipment: a 70-h. p. steam plant, a small compressor and 6 drills. The 30-ton experimental concentrator has a crusher, 2 rolls, 2 Bartlett tables and 3 screens. The smelter, at the mine, has a 50-ton water-jacket blast furnace.

WEST MEXICAN MINES, LTD. CHIHUAHUA

Address: W. Marshall, sec., 2 Norfolk St., London, W. C. 2, England. **Mine address:** Guadalupe y Calvo, Chihuahua, Mex.

Directors: R. K. Higginsbotham, J. C. McKellar and Hon. J. A. Peacock, at last accounts.

Inc. Jan. 22, 1910, in Great Britain. **Cap.** £550,000; £1 par; 470,007 shares issued. **Debentures:** £190,040, authorized in 1912.

Property: 105 acres, 1½ miles N. W. of Guadalupe y Calvo, includes the Rosario mine, formerly owned by the Rosario M. & M. Co., and 10,000 acres of ranch and timber lands with water rights of the Guadalupe river.

Development: the Rosario is opened up on seven levels and is said to contain substantial reserves of milling ore.

WEST MEXICAN MINES CO. BAJA CALIFORNIA

Office: Krape Inv. Co., Gas & Electric Bldg., Denver, Colorado. **Mine office:** San Antonio, Baja California, Mexico.

Officers: A. A. McCall, pres.; A. R. Whitely, v. p.; W. G. Krape, sec-treas.

Inc. January, 1912, in Arizona. **Cap.** \$3,000,000; shares \$1 par; non-assessable; outstanding 1,985,000 shares. Annual meeting, first Wednesday in January.

Property: 7 claims, about 60 acres, in the San Antonio district, 38 miles S. of La Paz, Lower California, Mexico. Veins are both fissure and contact, containing gold and silver. Pay ore occurs in shoots and streaks, the main

* Loss.

Property: company acquired the properties of the Guanacaste Syn. and the Guacimal Expl. Co. After obtaining possession of three-fifths of the capital stock of the Costa Rica Esperanza Mng. Co. in exchange for land, the Abangarez Co., December 31, 1909, acquired the balance of the stock, by giving one share of Abangarez and \$1.87 in cash for each share of Costa Rica Esperanza. Owns mining properties covering 118 sq. miles in the province of Guanacaste, Costa Rica, C. A. The ore from the Tres Hermanos lode at Majica creek is transported by 4,000' aerial tram to the Abangarez mill.

Equipment: includes a power plant on the Guacimal river, 12 miles from the mill; cyanide plant, saw mill, tramway, buildings, etc., and a 5-mile narrow gauge railway.

Production:

*Includes cost of production, administration and marketing.

**Per ton. †Deficit.

The depletion of the La Luz vein, leaves the company dependent upon the Tres Hermanos property for its ore supply. Development at this mine has been neglected for 5 years and present reserves are small and low grade.

AGUACATE MINES, INC.**COSTA RICA**

Office: 126 Liberty St., New York City. Mine office: San Mateo, Costa Rica. H. H. Juchem, gen. supt.

Officers: W. F. White, pres.; Edgar H. Woodward, treas.; W. Foster White, asst. treas.

Inc. 1907, in Maine. **Cap.** \$4,000,000; \$3,754,630 outstanding and \$245,370 in hands of trustees for benefit of company.

Balance sheet of Dec. 31, 1920, shows assets of \$4,194,119; covering property and equipment, \$3,892,323; exploration, \$163,556; current, \$70,922. Liabilities include current, \$483 and depreciation reserve, \$193,636. The deficit was \$61,020. Operating expense was \$60,551, with a loss of \$15,285 for the year.

Property. the Quebrada Honda mine, which carries gold ore in fissure veins that average \$8 per ton value recovered. Also, Los Castros mine and the Oreamunos group, and an option on the Little Johnny mine, about 2 miles to the east.

Development: by tunnel and a shaft below the 700' level, or the main haulage tunnel connecting with the mill. On the Black vein, the deepest workings are on the 1,000' level, opened 1918, for 840' in length and stoping started, ore being hoisted to the 700' level. Recent work on the 850', 930' and 1,000' levels has opened the ore shoot for about 1,000' in length. A new orebody was discovered on the 850' level in 1920. Total extensions for that year were 1,779'.

Ore reserves: on Dec. 31, 1920, were 28,677 tons. plus 4,500 tons of probable ore.

The amalgamation and cyanide mill with a capacity of 2,000 tons per month, made an extraction of 89.7% in 1919 and 84.9% in 1920.

Production: in 1918 was 17,159 tons of \$7.87 ore yielding \$130,342 in bullion, in 1919, 10,609 tons of \$9.26 ore yielding \$91,995; in 1920, 6,260 tons yielded \$45,266.

AMERICAN MANGANESE MFG. CO.

COSTA RICA

See same title under Minnesota.

Office: 352 Bullitt Bldg., Philadelphia, Pa.; and Duluth, Minn.

Officers: R. A. Crespi, Jr., gen. supt.; William Norris, geologist.

Property: 5 developed mines acquired in 1917 from the Costa Rica Manganese & Mining Co., at Playa Real, on the Pacific Coast, 2 miles N. E. of Norris Hermosa on the Nicoya peninsula, province of Guanacaste, Costa Rica, in a region difficult of access and with bad climate. (Described in the Eng. & Mng. Journal of October 27, 1917; and in Bull. 710-C of U. S. G. S.)

Equipment: steam tramway, loading pier on the coast, 5,000-ton orebins, docks, 9 lighters, and 5 ore steamers aggregating 6,000 tons, delivering at Baltimore or Philadelphia.

Production: from 1914 to Oct. 1918, inclusive, a total of 14,000 long tons.

The Playa Real property, formerly the main source of ore supply, is exhausted and company is now developing the Curiol mine, 15 miles inland from Santa Rosa, which is credited with a production of 20,000 tons of ore that averaged 52% manganese and 8% silica. Present owners have extracted 500 tons high-grade ore and estimate 20,000 blocked out.

The future profits of the company depend almost entirely on the market for these desirable manganese ores.

BABILONIA GOLD MINES, LTD.

NICARAGUA

In liquidation. G. G. Hay, liquidator, No. 1 London Wall Bldgs., London, E. C. 2, England.

Described in Volume XIV. Registered June 9, 1911, as Sierra Guaranty Syndicate, Ltd., named changed Dec., 1911. Went into voluntary liquidation, Dec. 17, 1920.

BUTTERS POTOSI CONSOLIDATED MINES, INC.

SALVADOR

Succeeded by El Salvador Silver Mines Co., which see.

BUTTERS SALVADOR MINES, LTD.**SALVADOR**

Address: La Union, Department of La Union, Salvador, Central America.

Property: San Sebastian mine, 30 miles N. of La Union, San Salvador. Company controls the **Grecia Mng. Co.** of Nicaragua.

Geology: fully described by C. Erb Wuensch in Mining and Scientific Press of September 8, 1917.

Development: by 800' shaft, with 1,800' drainage tunnel 30' below, and 30 miles of workings.

Production: 3,500 tons milled each month. Total output is approximately \$15,000,000.

Early in 1921 company discontinued operations.

CENTRAL AMERICAN EXPLORATION CO.**NICARAGUA**

Address: Jas. M. Hall, mgr., 602 Postal Telegraph Bldg., Chicago, Ill. John A. Willey, supt., Matagalpa, Nicaragua, C. A.

Officers: Frank K. Bull, pres.; Jas. M. Hall, v. p.; Horace L. Wing, sec.; E. T. Meredith, treas., with Ashton Clemmens, T. A. Harding and N. E. Coffin, directors.

Inc. November, 1918, in Delaware. **Cap.** \$200,000; \$100 par; \$186,000 outstanding.

Property: company is opening up a gold gravel mine (ancient channel) in a concession covering the Coco, or Wanks river, and its tributaries 400 miles up the river. The concession extends from Bocay to Guilili, and covers about 4 million acres, including dredging and hydraulic gravels and all mineral rights.

Development: company spent some two years drilling an ancient gravel channel reported to be 100 to 300 yards wide, traceable 40 miles and 30' to 100' deep. Values vary from 9¢ to \$10 per cu. yd., but company expects an average of 30¢ a yard.

Equipment: a straight hydraulic plant to treat 2,500 cu. yds. daily. Dredging ground along the bars of the Coco river are said to average 20¢ per yard.

CHONTALES MINES, LTD.**NICARAGUA**

Address: care Mechanics & Metals Natl. Bank, registrar, 20 Nassau St., New York City. Headquarters Montreal, Que. D. J. Pullinger and Wm. Wallace Mein are interested. J. F. Thorn, gen. mgr., Santo Domingo, La Libertad, Nicaragua.

Property: includes Escandola, Javali, Cedro and Pabon mines, near Santo Domingo, in the department of Chontales, said to cover 12,000' of vein, 3,300' of which has been opened up, showing average widths of 12 to 14'. Developed by tunnels, the lowest crosscut tunnel driven in 1921, having an average back of 300'.

An ancient gravel channel has been traced by drilling for 40 miles, the width varying from 30-100 yards and the depth of gravel from 30-100'. Average values given as 30¢ per cu. yd. in coarse nuggets.

Equipment: includes power plant and 200-ton mill. A 1,000-h. p. hydro-electric plant is being erected and a mill is to be enlarged to 600 t. p. d. An hydraulic plant with capacity of 2,500 yd. daily, was installed in 1921.

Production: about 210 tons daily; 50,000 tons milled to date, valued at \$1,000,000.

COCO RIVER MINING CO.**NICARAGUA**

Office: was at 50 Broadway, New York.

Officers: J. G. Turrif, Ottawa, Can., pres.; H. A. Currie, v. p. A. A. Holland, managing director. J. A. Calder, J. T. Brown and J. H. Lamont, directors, at last accounts.

Inc. in Delaware. **Cap.** \$1,000,000; \$1 par; 500,000 issued. U. S. Corporation Co., 28 Cedar St., New York City, registrar and transfer agent.

Property: 175 acres in Cabo Gracias district, Nic., C. A., 60 miles inland and 3 miles from navigable river, via Cabo Gracias.

old quartz said to average \$5 per ton.

\$125,000, includes 200-ton mill "of ironwood and
ors, etc. A report by A. A. Holland, is said to give
out and 4,000,000 partly blocked out.

Nothing about the present status of the company.
dly defunct.

*Loss.

Property: 9 square miles in the Pis Pis mining district, which is 100 miles in direct line from the town of Prinzapolca on the east coast of Nicaragua. Transportation of supplies from the United States involves 1,200 miles by ocean steamer, 90 miles by coast schooner, by barges up to Tunkuy, transfer into "pitpans" to Miranda on the Tunkuy river, and finally 7 miles by narrow-gauge railway to the mine. The full distance from Prinzapolca is 187 miles. It costs from \$90.78 to \$131.28 per ton to carry freight from New Orleans to the mine. The rainy season lasts for 8 months, when wheel vehicles cannot be used. The Tunkuy Transportation & Power Co. which operates the railway and power-plant, is controlled by the Eden company.

Development: as the property is mountainous, the veins are all opened by tunneling, there being 6 main adits at an elevation of 652 to 1,307 ft. above sea-level. The main tunnel has an electric haulage system, the locomotive handling 20 tons a trip. The two veins so far developed—the Culebra and Eden, strike E. and W. and N. and S., respectively and dip steeply, so that shrinkage stoping is used. The oxide ore near the surface breaks easily, but the deeper ore is difficult to blast. The Culebra vein is rather more uniform in value than the Eden, in which the values are bunched.

The main tunnel had reached 3,850' in March, 1921, and search was being made for a known ore shoot in the Hidden Treasure vein; two vein systems were cut, but their value has not been determined. During 1919 and 1920, practically all ore of commercial grade in the Eden vein was mined. Development in 1920 largely confined to the Culebra vein in which the main ore shoot is 160'x4.4' for a height of 390'. Ore reserves at end of 1919 were 115,161 tons of \$11.41 ore and for 1920, 88,574 tons averaging \$12.29, representing a 2 years supply. Extensions for 1919 and 1920 were

2,247' and 1,401', respectively; total workings about 5 miles; costs \$15.66 and \$14.54 per foot. Mining costs including development, were \$4.46 in 1919 and \$4.65 in 1920.

Equipment: includes fully equipped machine-shops, sawmill, ice plant, wireless station for distant communication, hydro-electric plant of 700-h. p. turbine and 500 k. w. generator, since increased to 1,200-h. p., sub-station electric locomotive, two 600-cu. ft. air-compressors, drills, and 150-ton cyanide mill including ball and tube-mills.

Production: the mill started in November, 1918, and produced \$45,947 to the end of the year. In 1919 the mill treated 36,159 tons of \$12.94 ore, yielding \$443,400 with an extraction of 94.7%; in 1920, 42,169 tons of \$9.13 ore yielded \$363,957, or a 94.5% extraction, as compared with 92% in 1918. Milling cost for 1919 was \$3.62 and in 1920, \$3.74.

EL SALVADOR SILVER MINES CO., INC.

SALVADOR

Office: 11 Pine St., New York. Receiver: A. Parker Nevin, 30 Church St., New York.

Frank M. Estes, gen. mgr.; Gus Scogland, mgr., Divisadero, Department of Morazan, El Salvador, C. A.

Officers: Edward D. Dowling, pres.; A. J. McAllister, sec.; with F. B. Adams, Thomas Howell, F. D. Lackey, T. H. Frothingham and F. W. Allen, directors. H. M. Case, treas.; John Cabot, Jr., asst. sec.-asst. treas.

Inc. Feb., 1918, in Delaware. **Cap.** \$3,000,000; \$1 par; all issued. Company's office, transfer agent; Bank of America, registrar, both in New York. Listed on New York Curb.

Balance sheet of Oct. 31, 1921, shows assets, \$4,207,155, of which \$161,295 are current. Current liabilities were \$281,771. Deficit for the fiscal year was \$560,950.

Company was organized to acquire, consolidate and operate a group of producing mines in Salvador, including those of Butters Salvador Mines, Ltd., Butters Divisadero Co., and Butters Potosi Consolidated Mines Co., also controls 95% of the issued capital of the Monte Mayor Mines Inc.

Property: an estate of 3,000 acres, 4½ miles from San Sebastian, Department of La Union, comprising the Monte Mayor, Santa Gertrudis, Banadero, El Carao, and Los Tunos, Tempisque and Jimerito mines; the first named being the most important. Also owns rights on estates nearby covering 2,500 acres.

Monte Mayor Mines, Inc.

Address: 11 Pine St., New York, or G. A. Swanquist, Divisadero, El Salvador, C. A.

Officers: E. D. Dowling, pres.; J. H. Warner, v. p.; G. W. Griffin, sec.; with G. E. Farish and G. A. Swanquist, directors. H. M. Case, treas.

Inc. Jan., 1918, in Delaware, succeeding Monte Mayor G. & S. Mng. Co., Ltd. (of London). **Cap.** \$500,000; \$1 par; all issued.

Equipment: includes 10-stamp, 60-ton cyanide mill, water power, steam power plants, offices, dwelling, etc.

The Monte Mayor mine has an oreshoot 500 feet long opened to a vertical depth of 120'; the Santa Gertrudis orebody is 200' long and opened to depth of 150'; the Carao oreshoot is 200' long and developed to a depth of 70', the veins persisting at depth in all mines. Surface work on Banadero and Los Tunos shows a strong vein, and indications of good oreshoots. The Tempisque and Jimerito claims cover a well-defined, vein parallel with the Monte Mayor. In the former, the shoot is 220' long and opened to depth of 80'.

Butters Potosi: the Potosi mine, 25 miles west of the Divisadero. Extensive development has proven considerable ore, with every indication of a continuation of the ore shoots downward.

Butters Divisadero: 7,000 acres, 14 miles west of Monte Mayor, and 24 miles north of San Miguel, the nearest rail point connecting with La Union on the Pacific Coast, Department of Morazan. The important mines of this

group are the Divisadero, La Matilde, San Francisco, Carolina, Portectora, and Gigante; also leases on the Encuentros and Loma Larga mines. The Divisadero is the most extensively developed mine, including the Matilde and Carolina which belong to it.

Workings extend to depth of 700' on the incline and for a length of over 2,000'.

Gigante: this mine, situated about six miles east of Divisadero, is opened to depth of 100', with promising indications, and estimated to contain a total of 26,960 tons valued at \$301,716.

Equipment: Monte Mayor—present plant cost \$161,983; and includes hydro-electric and steam power-plants, mine machinery, 10-stamp mill, cyanide plant, store and quarters.

Divisadero—oil-storage tanks, 14-mile oil pipe-line, steam and Diesel oil engine plant generating 1,100-h. p., transmission-line, hoists, pumps, compressors, aerial tram, 400-ton cyanide mill, foundry, machine-shops, stores, dwellings, etc.

Potosi—power-plant, hoists, machine shop, etc.

Production:

Mine	Years	Ore, Tons	Gross Value
Monte Mayor.....	3	23,382	\$233,818
Divisadero.....	13	5,194,967

The Divisadero yield represents 93,971 oz. of gold and 5,657,128 oz. of silver.

Operations were suspended July 1921.

A report by F. M. Estes, gen. mgr., was apparently distinctly unfavorable, and as company is without funds or income, the directors on Oct. 31, 1921, recommended that company's assets should be liquidated. On Jan. 30, 1922, a receiver was appointed on application of Alex. J. McAllister with a claim of \$37,550. Bankruptcy proceedings against Thos. H. Frothingham had already begun on Dec. 12 preceding, but at the request of El Salvador stockholders, the trustees were restrained from immediately disposing of his property, alleging fraudulent representations.

ESMERALDA MINE

NICARAGUA

Address: Alfonso Hurtado, Granada, Nicaragua.

Property: at La Libertad, Chontales district, adjoins that of Babilonia Gold Mines on the W. Ore is gold-bearing, averaging \$10 per ton. Has been worked for many years.

1915..	1,200,743	847,276	353,466	117,324	236,142	240,000

*Plus \$100,000 from amortization in 1917; \$200,000 each in 1918 and 1919; \$80,000 in 1920.

Property: a 20-year concession from the Government upon 25 sq. miles of mineral-bearing land, located about 20 miles from Tegucigalpa, including the Rosario mine, at San Juancito, Honduras, C. A. The altitude is 5,000'. The first work was done in 1882. Also the San Marcos mine of the Sabana Grande company, 40 miles W. of Rosario. Concession to the Rosario was renewed for a second 20 years' period on Dec. 31, 1920.

Geology: the veins lie in slate, andesite, and altered granite. The ores are mainly silver-bearing, the principal mineral being stephanite. There is a little native silver.

The Rosario contains about 20 mineral bearing veins, which have been or are now being worked. The south San Miguel was the main producer in 1918-19-20.

Geological investigations of the entire zone, as well as surrounding country, were concluded in 1916. Exploration of other properties is part of the regular work of this company. It resulted in finding the San Marcos, which has been under development by the company since 1919, and on January 1, 1920, contained 19,202 tons of ore averaging \$38.77 per ton in silver and gold. Is developed to 375' depth. Extensions in 1920 were 1,415', and output was 11,671 dry tons, compared with 7,120 in 1919.

Development: results may be shown as follows:

Year	*Ore Mined		Reserves Tons	Value per Ton	Cost per ft.	Cost per Ton
	Footage	Tons				
1920.....	16,838	91,690	211,783
1919.....	15,901	92,167	283,422	\$13.45
1918.....	11,266	74,816	282,559	15.15
1917.....	9,381	83,052	303,296	9.21	\$12.21	\$0.87
1916.....	12,637	81,513	312,143	9.51	9.91	0.97
1915.....	13,000	90,162	343,716	9.76	10.18	1.09

*Does not include ore from development.

Two crosscuts have been driven—the Pena Blanca—Esperanza, beginning at the S. E. end of the Esperanza No. 3 and running in a S. W. direction to develop the southern territory, and the Pena Blanca S. W. crosscut, starting at the junction of the Southwest and Jucuara veins in Block 84, and planned to reach Jucuara gulch. With this connection made, additional water power and cheap timber are obtainable from the western side of the mountain. The cost of lumber was reduced from \$22.50 to \$12.50 per 1,000 board feet since the tunnel was completed. Rock passed through was not favorable for ore deposition. The Esperanza crosscut opened some ore, which is being developed.

Underground workings are scattered. Shrinkage stoping is mostly employed. Little timber is required. The mine has over 60 miles of track and 40 miles of piping for air.

Equipment: at Rosario, two 1,200-h. p. hydro-electric plants, hoists, 5, 6, and 7-ton electric locomotives in the mine, 2-air compressors, machine-drills, sawmill, 400-ton cyanide mill using zinc dust precipitation, machine shops, assay office, hotel, store, schools, 1,500 employees, including 50 white, and a military garrison consisting of a commandant, 58 officers and men. Labor conditions are good.

At San Marcos—three 50-h. p. oil-driven air compressors, laboratory, shops and dwellings. A 35-ton flotation plant was burned in 1920, but is being rebuilt and may include a cyanide unit.

Production: at Rosario; beginning with 1914, includes a certain proportion of stope filling.

Year	Ore Treated		Extraction		Extracted		Total Cost per Ton
	Dry Tons	Silver, %	Gold, %	Silver, Oz.	Gold, Oz.		
1920.....	140,100	86.07	94.52	1,711,349	8,001	\$8.51	
1919.....	133,900	85.66	94.00	1,584,579	10,200	9.50	
1918.....	129,900	86.75	88.31	1,587,468	9,748	9.41	
1917.....	141,218	93.79	94.00	1,670,612	13,790	7.49	
1916.....	128,030	89.04	94.24	1,810,886	14,989	6.30	
1915.....	117,790	87.45	92.32	1,748,803	15,211	5.74	
Total since 1912	845,758						

In addition, San Marcos mill recovered 249,751 oz. silver and 967 oz. gold in 1919; 268,337 and 1,109 oz. in 1920. The flotation concentrates are shipped.

New York & Honduras Rosario is an extensive property making good profits. Its resources are extensive, and exploration continues to open up new mines. Reports contain a wealth of interesting mining and metallurgical information.

Operations, suspended early in 1921 to await better silver prices, were resumed, November first.

NICARAGUA MINING CO.

NICARAGUA

Office: 1218 Locust St., Philadelphia, Pa.

Officers: B. C. Warnick, pres.; C. J. Fox, v. p.; W. H. Steigerwalt, sec.-treas.; with C. A. Daniel, W. H. Bilyeu, W. S. Duling, Barry Searle (cons. eng.) and J. M. Steele, directors. Granville S. Borden, gen. supt.

Inc 1919. Cap. \$2,000,000; \$1 par; non-assessable; 1,000,000 being issued early in 1920.

Property: in the Pis Pis district, 100 miles from the Atlantic Coast, 160 miles from Prinzapolca, which is 90 miles north of Bluefields. Supplies are handled by the Tunky Transportation & Power Co., a subsidiary of the Eden Mining Co.

Andesite is the prevailing rock of the district, and is cut by diabase dikes and by numerous quartz veins. The main vein system runs N. E. and S. W. and dips 25 to 75° N. W. The vein zone contains many branch, cross and parallel veins, and is cut by faults. The vein quartz contains gold and silver, together with a complex mixture of copper, lead and zinc sulphides.

The company owns the following mines:

(1) the Concordia group discovered in 1894, from which gold worth \$1,200,000 was extracted by simple amalgamation, which only saved 46%. The claims cover an area of 300 by 10,000', and include water-power sites that will generate from 300 to 1,000 h. p.

(2) the Lone Star claims of 113 acres, also 1,070 acres of farm land and a 7-acre water power site, completely equipped with 30-stamp mill, 500-h. p. hydro-electric plant, shops, etc., costing \$270,000. This mine has yielded \$1,200,000; though only 50% of the assay value was recovered.

Development: has proven a block of ore averaging 8½' thick, 925' long, and with an average back of 456', which contains 262,383 tons of ore averaging \$10.82 per ton. Gross value of ore developed, \$2,839,931. With an 80% recovery, net gross value is \$2,271,953. With a working expenditure of \$4 per ton or \$1,052,531, the net profit is \$1,222,415. A 150-ton mill is expected to treat this tonnage in 5 years.

(3) the Bonanza-Mars mines of 335 acres, plus 1,600 acres of farm land, together with general equipment, consisting of hydro-electric plant, 100-ton stamp-mill and cyanide plant, houses, etc., which cost \$400,000. Reserves are estimated at 2,000,000 tons with over 90,000 tons that will average \$12 per ton, available. This mine has yielded over \$1,200,000.

The consolidation of these producing properties and their operation by modern methods, are expected to yield large returns. Development has been confined mainly to the Neptune vein of the Bonanza and a 9-stamp amalgaming mill with cyanide unit was put into commission Oct., 1920.

NICOYA MINING CO.

COSTA RICA

Property sold to American Manganese M. Co.

SABANA GRANDE-HONDURAS MNG. CO.

HONDURAS

Controlled by New York & Honduras Rosario Mng. Co., which see.

SILVER LEAD MINING CO.

GUATEMALA

Address: Sansare, Guatemala.

Property: near Sansare, 9 miles from rail. Reported in August, 1918, that a wide deposit of pyrrhotite, containing nickel and cobalt had been opened.

TONOPAH NICARAGUA CO.

NICARAGUA

Controlled by the Tonopah Mining Co. of Nevada.

Property: the Santa Rita mines, 30 miles from the Eden Mining Co.'s mine. Diamond-drilling was completed in July, 1918. Work to date has developed 984,232 tons of carbonate ore, assaying 63 cents gold and 4.832% copper; 163,556 tons of sulphide ore, averaging \$3.41 gold and 10.287% copper, and 308,800 tons of sulphide ore, containing 27 cents gold and 3.365% copper. There is also 35,500 tons of tailings, assaying \$2.73 gold and 1.97% copper. The aggregate is 1,492,088 tons, carrying 91 cents gold and 5.059% copper. Work has been suspended until it is practicable to erect a mill, for which tests have been made but prevailing high costs and decline in metal prices have prevented company from going ahead.

WEST END OPOTECA MINES CO.

HONDURAS

Office: Syndicate Bldg., Oakland, Calif. Mine at Opoteca (or Rosario), Honduras.

Officers: F. M. Smith, pres.-treas.; J. F. Carlton, v. p.; Geo. C. Ellis, sec., with L. W. Bennett, Rufus P. Jennings, C. P. Murdock and R. L. Oliver, directors. J. W. Sherwin, gen. mgr.; J. R. Blair, auditor; Paul Neer, mine supt.

Inc. 1920. Cap. \$3,000,000; \$1 par.

Property: 1,500 acres, including the Opeteca mine, operated by Spaniards in early days. Silver ore, with values of 2 to 3 oz. up to 30 to 40 oz. per ton, occurs in caves and chambers in limestone. When orebodies have been delimited and probable tonnage determined, mill and hydro-electric power plant will be erected.

On April 1, 1921, the West End Cons. Mng. Co., which had financed development, turned the property over to the West End Opeteca, receiving 1,788,486 shares for the property. These shares were distributed as a dividend to West End Cons. shareholders. Including moneys expended by West End Cons., total disbursements to April 1, 1920, were about \$62,000.

WEST INDIES

Including Cuba, Hayti, San Domingo, and Porto Rico.

BETHLEHEM CUBAN MINES CO.

CUBA

(Formerly Spanish American Iron Co.)

Address: 111 Broadway, New York City.

Subsidiary of Bethlehem Steel Co. and is practically a consolidation for operating purposes, of the Juragua Iron Co., Bethlehem Iron Mines Co. and Spanish American Iron Co.

Owens (1) the hematite iron mines at Vinent, 4 miles from Daiquiri, on south coast of Cuba, near Santiago, and (2) the Mayari open cut, brown iron ore mines at Woodfried, near Nipo Bay, on north coast of Cuba, in Oriente province, with 17½ miles railroad to Felton on Nipo Bay, where it has a nodularizing plant, loading piers, etc.

Production: in 1919, 279,700 tons; in 1920, 561,268 tons of 58% ore.

Juragua Iron Co.

(Operated under lease by Bethlehem Cuban Iron Mines Co.)

Owens about 10,000 acres of iron ore land at Firmezú, Oriente province, Cuba, with its own railroad 15.46 miles long to its docks at La Cruz, on Santiago harbor.

Production: 212,013 tons in 1915; 39,784 in 1916; 17,128 in 1917. Later shipments included with Daiquiri output.

BLANTON COPPER MINING SYNDICATE

SAN DOMINGO

Inactive. **Address:** The Bourse Bldg., Philadelphia, Pa. **Mine office:** Bucaro, San Cristobal, Santo Domingo.

Officers: E. J. Hedden, pres.; H. A. Smith, sec.; J. B. Thom, treas.; with M. W. O'Boyer, A. D. Blackinton, J. F. Wilt, directors. F. T. Eddingfield, mgr., Santo Domingo; Otto Peterson, supt.

Inc. Feb. 16, 1910, in Delaware. Cap. \$500,000; \$25 par; \$360,000 outstanding. Authorized bond issue, \$400,000; \$180,000 outstanding. Annual meeting, first Monday in January. Total receipts from ore sales from October, 1915, to July 15, 1916, amounted to \$45,193, or net cash \$32,440, for 857 tons selected ore, the ore averaging 12.4% copper and \$1.60 in gold and silver. Shipments from January-July, 1917, totaled 231 tons of 12.78% copper ore. This ore is hand sorted about 10 to 1. Property examined and reported on by F. Lynwood Garrison, Thos. F. Donnelly, Henry D. Adams, and F. T. Eddyfield.

Property: 1,700 acres, held under government concession, including the Bucaro mine, on the Rio Nigua, 27 miles west of San Domingo, bought of

San Christobal Mining Co. Property shows orebodies in limestone, near a porphyry contact, one orebody in the Bucaro mine carrying chalcopryrite, bornite and chalcocite, all auriferous and argentiferous.

Development: by tunnels, the work aggregating 3,500' in 1917. Company reports 35,000 tons ore blocked out and that property is near the profitable stage. The Ferdinand vein opened for 200' on No. 1 level is said to average 16' of 4% ore for 150', and has 25,000 tons nearly probable ore. The Santiago vein appears to be 40' to 80' wide and assays ½ to 1½% copper for levels 130' apart along 200' drift.

Company out of funds and properties idle.

CUBA COPPER CO.

CUBA

Dead; see Vols. XIII and XIV. Company operations discontinued in 1916 and property operated for 2 years thereafter by the Cuba Copper Leasing Co., which see.

CUBA COPPER LEASING CO.

CUBA

Subsidiary of International Minerals and Metals Corp. (q. v.).

Office: 61 Broadway, New York.

Was a subsidiary of Beer, Sondheimer & Co., (q. v.), which owned entire capital stock. Company leased and operated property of Cuba Copper Co. (q. v.) 1916-18; management of owning and leasing companies was the same. At end of 1919, company owed Beer, Sondheimer \$1,238,094.

HAYTI MINES CO.

HAYTI

Address: 25 Broad St., New York City.

Inc. 1910, in New York. **Cap.** \$1,000,000; shares \$5 par; non-assessable.

Is a New York corporation. Property is held by the Miniere de Terre Neuve, a Haitian corporation, whose title is direct from Haitian government, to whom company must pay 5% royalty on all copper or other ores mined, from a concession covering 250 square miles N. W. of Gonaives, Hayti.

The property at Memé contains a contract metamorphic deposit of bornite ore in garnetized Tertiary limestone, invaded and altered by andesite and by quartz diorite. Also veins of copper ore in the eruptive rock at and near the village of Terre Neuve. Considerable surface stripping and numerous shallow shafts and short tunnels have been driven on the property, and shipments of sorted ore made to New York smelters. Reports on property made to Vogelstein & Co. by Duncan Rogers and Bela Low. Examination also made by J. H. France and W. H. Weed.

LOS CERROS COPPER CO.

CUBA

Office: Blackstone Bldg., Cleveland, Ohio.

Officers: W. I. Boardman, pres.; W. C. Watkins, v. p.; Sherman C. Dalbey, sec.; W. L. Rees, treas.; Col. D. H. Pond, gen mgr.

Inc. Aug. 12, 1905, in Arizona. **Cap.** \$500,000; shares \$100 par.

Property: 2 claims, 100 acres, also 1,500 acres of non-mineral land, near Fomento, Prov. de Sta. Clara, Cuba, opened by 3 shallow shafts and 5 tunnels, longest 250', showing ore assaying 10% copper, 20 to 25% zinc, 20% sulphur and 30% silica, with gold and silver values. Zinc apparently decreases at depth. The vein has a 12' to 15' gossan outcrop along its strike. Property is an antigua. The ore though mostly low-grade and zinciferous can be concentrated and property is considered worthy of further development under competent direction.

MATAHAMBRE MINES

CUBA

Address: A. H. Diaz, Consulado 57, Havana, Cuba. D. F. McCormick, Matahambre, Pinar del Rio.

Property: 12 patented claims, leased by estate of M. L. Diaz, about 1,000 hectares, in province of Pinar del Rio, 110 miles west of Habana.

Geology: ore occurs in lenses in a series of fault veins cutting the sedimentary rocks; the ore is chalcopryrite, assaying 12% copper, 1 oz. silver and a trace of gold.

ARGENTINA

LA MINE

ARGENTINA

es N. of Caldera district, Chiliceto department, province of
ws silver-gold-copper ore. Was equipped with blast furnace
to be too small for profitable operation, Inactive, 1921.

CO., LTD.

ARGENTINA

ully described in Volume XIV. Property was owned by
Minera de Famatina, which see.

LA CORPORACION MINERA de

ARGENTINA

care Dr. Santiago O'Farrel, Buenos Aires, Argentina.
r: about 850 acres in 4 groups, formerly owned by **Famatina Co.**,
ish concern, in the Mexicana district, Chilecito department. La
ice, on eastern slope of Famatina range at an elevation of 15,000',
San Pedro, Upulungus, Espiga and other veins. Mineralization
r near the contact of quartz-diorite with sedimentaries in veins

generally normal to the contact. The veins are narrow, 24" to 33", and ore values at depth range from 2.5 to 6% copper, \$5.50 to \$12.25 gold, and 1 to 6 oz. of silver.

Development: largely by tunnels up to 600' in depth. Total drifting on San Pedro is 5,000' and 6,300' on Upulungas.

Equipment: mines are connected with R. R. at Chiliceto by 22 mile cable way and with smelting plant at Santa Florentina, 17 miles distant. Smelter consists of two 75-ton roasters, two 100-ton blast furnaces, a 150-ton reverberatory and 2 converters; charcoal is used for fuel. During last seven months of 1920, the output was 733 tons of copper.

LOS BAYOS MINE

ARGENTINA

Property: in Los Bayos district, department of Chiliceto, Los Rioja Province. Ore is copper-silver-gold. Equipped with 2-mile cableway connecting with concentrator. Has been considerably developed and was a producer. Now inactive.

NATIONAL LEAD CO. OF ARGENTINA

ARGENTINA

A branch of National Lead Co. of 111 Broadway, New York, organized to manufacture mixed metals in the republic.

SAN JUAN MINE

ARGENTINA

Property: 7 miles N. E. of Caldera district, department of Chiliceto, province of La Rioja. Copper ore occurs in contact of quartz-diorite with sedimentaries. Has been operating in a small way for many years, the ore being treated by chloridization roast at Totoral, 7 miles distant.

BOLIVIA

ANGLO-BOLIVIAN MINING SYNDICATE, LTD.

BOLIVIA

Subsidiary of Aramayo Francke Mines, Ltd., which see.

Property: tin, silver and bismuth mines, including the early day Real Socavon, situated in the Potosi district, province of Potosi.

ARACA, EMPRESA DE ESTANO

BOLIVIA

Office: Oruro, or Santiago, Bolivia. Mine at Araca, Bolivia.

Property: in Araca district, province of La Paz, on the westerly slope of Quimsa Cruz range, 66 miles S. E. of La Paz and 3 miles S. of the Tanapaca mine. Two principal veins, Pireo and Central, occur in shales, sandstone and quartzite, near their contact with granite. Ore is cassiterite in a gangue of quartz, tourmaline, and iron oxides; silver is not present; average value 4% tin. Stopable ore is over 3' and up to 50' wide.

Equipment: includes aerial tram from mine to mill (San Jose). Prior to war, annual production was 150 tons of barrilla (i. e. 60% tin concentrate); in 1919, it was 100 tons.

ARAMAYO DE MINES EN BOLIVIE, CIE.

BOLIVIA

Successor to Aramayo Francke Mines, Ltd.

Office: Geneva, Switzerland. Mine office: Quechisla, Bolivia.

Directors in England: F. A. Aramayo, chairman; Bernard Dale, L. A. Kensington, Robt. G. Ribon, and F. J. Torromé.

Directors in Bolivia: F. A. Aramayo, chairman and managing; C. V. Aramayo, C. Navarro, and M. Roberts (gen. mgr.).

Inc. Oct. 17, 1906, as Aramayo Francke & Co., Ltd. **Cap.** £600,000; shares £1 par; £597,090 outstanding. Name of company changed to present title, January, 1911.

To avoid increased taxation in Great Britain, company was liquidated and holdings transferred on Dec. 23, 1920, to a Swiss company.

Report for 19 months from June 1, 1918 to Dec. 31, 1919, showed; net profit, £663,905; with balance forward, £748,244; dividends and bonus, £268,690; balance £479,554. Assets include; cash, £74,672; bills receivable, £133; debtors, £290,218; tin stocks, £530,583; supplies, £288,463;

Liabilities include; creditors, £180,321. Profit in exchange 22.5 francs to the pound. 09; 1s 6d in 1910; 2s in 1911; 3s in 1911-12; 3s 6d in 1s. 6d. in 1914-15; 3s. in 1915-16; 6s. in 1916-17; 9s. 9; 4s. in 1920.

Consolidated mining rights over the mountain group of in Potosi province, containing tin, bismuth and wolfram works of Santa Barbara, Santa Elena and Sala-Sala; Totani, with its mines; the Quechisla smelter; the 1,460 hectares, with concentrator and smelter at Churquini, Chocaya, 81½ hectares, the estates and the concentrating plant at Asllani, besides lesser importance.

Company operates 2 groups of mines, the Chorolque averaging 3' wide cutting andesite near limestone formations at Chocaya yield silver-tin ores from narrow rusive in slate. At Tasna, bismuth ores are mined. Mines in 1920 has prolonged the life of the Chorolque

Dividends: 20% in 1915-16 and 1916-17; nil in 1917-18; 15% in 1918-19; 25% in 1919-20.

Property: tin claims at Berengueta, province of Cochabamba equipped with a concentrating mill.

Production: 324 tons tin concentrate in 1915-16; 348 tons in 1916-17; 244 tons in 1917-18; 366 tons in 1918-19; 386 tons in 1919-20; 329 tons in 1920-21.

CARACOLES, EMPRESA MINERA

BOLIVIA

Acquired early in 1920 by Guggenheim Bros., 120 Broadway, New York. See **Pacuni Blanca**.

Property: in Quimsa Cruz district, La Paz province, on E. side of Quimsa Cruz range, shows several vein systems in granite; the veins are 1.5 to 6.5 feet wide, with a tourmaline-quartz filling carrying 8-10% tin and some zinc. The Huanchaca de Inquisivi, Pepita, Antofagasta, Llamero, Carmen Rosa, and San Enrique are the principal veins of the mines.

Development: is by adits; new owners propose driving a tunnel to cut Antofagasta and Pepita at depth.

Equipment: originally, 2 mills with a joint monthly production of 35 tons of tin concentrate. Reported that a new mill is to be erected to serve all mines. A 66-mile automobile road has been built connecting mines with Eucalyptus on the Antofagasta & Bolivia Ry.

COROCORO DE BOLIVIA, COMPANIA

BOLIVIA

Mine office: Corocoro, La Paz, Bolivia. G. B. Lott, mine supt.

Inc. April 23, 1873, in Bolivia. **Cap.** 1,025,000 bolivianos.

Property: 500 hectares; is the largest copper mine in Bolivia, employing, at last accounts, about 1,000 men. Mine 530 meters deep, is opened on steeply inclined beds of white to green sandstone and conglomerate carrying disseminated native copper, and rarely native silver, with occasional cuprite and chalcocite.

Development: by six vertical shafts timbered with 8x10" Oregon pine and equipped with electric hoists ranging from 50 to 180-h. p. The ore when mined is soft, and even when dry disintegrates readily. The copper is between the grains of sand so that grinding in the usual sense is not necessary. Two 12x18" jaw crushers will disintegrate 1,000 tons in 10 hours. Jigs obtain 95% of the total mill recovery. Capacity of mill is 200 to 250 tons of ore per day with heads assaying 2 to 3% copper.

Equipment: includes a narrow-gauge line between shafts and mill operated by gasoline locomotive, 1,500-h. p. Diesel engines and a mill. The product is exported as "copper mineral," production ranging from 800 to 1,200 quintals of 46 kilos, monthly, of "barillas de cobre" of about 85% average copper tenor. Copper sulphide, as chalcocite, is exported as crude ore at the rate of 1,500 metric tons monthly of 18% copper. Shipments are made to the Tacoma smelter.

COROCORO UNITED COPPER MINES, LTD.

BOLIVIA

Registered office: 5 Lothbury, London E. C., England. **Main office:**

7 Rue des Italiens, Paris, France. **Mine office:** Corocoro, La Paz, Bolivia.

Officers: Baron Rene de Batz, chairman; J. L. Barber, P. Bebin, A. Berthin, N. Berthin, G. Charbonnel, F. Harrington, L. Monnier, Baron C. Portalis, and Baron F. Portalis, directors; G. Bryans Wolfe, sec. in London; Roger Leo, sec. in Paris; F. J. Dorion, gen. mgr.

Inc. Aug. 6, 1909, in Great Britain. **Cap.** £700,000; increased in Jan. 1921 to £1,000,000; £1 par; 740,968 issued, fully paid. Company took over the properties of J. K. Child & Co., Ltd.; Sucession Noel Berthin; Compania Sud Americana de Cobre de Corocoro, and Carreras Hermanos.

Annual report for year ended June 30, 1920 showed total income £111,744; expenditures, £13,942; interest, £1,535; depreciation, £49,682; net operating profit, £46,583; reserve fund, £68,000; balance forward £6,942; total reserves £238,000; Assets total £1,170,299, include property £375,000; equipment, £273,000; Arica smelter, £112,576; live stock and furnish-

supplies in Bolivia and on hand, £112,040; copper, £222,478; debtors, £55,663. Liabilities include accts payable, £156,338; creditors, £95,082; profit

cs in 1912-13; 60 centimes in 1913-14; 1 franc in 1915-16; 6 francs in 1916-17; and 6 francs in 1917-18; 9-20; 10% bonus in fully paid shares, Feb. 1921.

es at 12,000' elevation, in the Corocoro district of principal mines are the Vizcachani, Santa Rosa and formerly owned by J. K. Child & Co.; the second, and the third by the Noel Berthin estate.

is found native in several beds of sandstone in and brownish shale. The ore-bearing beds occur a strong fault. Beds to the east of this fault are p east, the copper-bearing strata being succeeded by of red slates capped by green slates and limestone, clay and brown sandstone. Beds west of the fault veins, and are much harder than the copper-bearing on is not uniform and the native copper occurs in to the naked eye, as well as in grains, plates, flat masses weighing several hundred pounds. The ado vein, is also mineralized, and was once the main yielding sulphides and arsenides of copper. It is was the feeding fissure whose solutions spread into precipitated by organic matter; but there are also

have not yet crosscut very far into the series, but l 6 vetas, the four former are divided into 7 cuerpas, into 10 to 14 beds. Some of these beds have 7 to 8 ore, the white ramos being 30 meters wide on the hani shaft, of which 8 meters are mined as ores. eters workable thickness with an average content

emely arid, without timber, and almost without e is made of a local fuel, called taquia, which is boilers and also for drying ores, and in the past ng.

several beds, notably the Yanabarra, the ore is in ich is hand-sorted into shipping and milling grades. 50-ton flotation plant, now in the course of expan-

nine openings in the conglomerate strata stand some crushing, and levels average 25 metres apart h steps cut. Little timbering is used, except for t cost, timber being imported mainly from North rgs are secured principally by the poteo or dry-used for arching lateral workings.

led into 4 operating units, the principal and active oro and the Guallatiri. The former has a vertical quipped with a steam plant, and ore-sorting and llatiri has shafts of 180 and 350 meters. The Vis-ik to the 15th level.

l extensions including surface work, amounted to was 67,537 tons of sulphide ore, and 96,276 tons of ch more than one-half came from the 13th to 14th he former averaged 1.92% and the latter 7.89%

opper ore is treated in 3 mills of 10 to 100 tons product known as "barilla," or crude copper mineral,

of 80% copper tenor, which is shipped to Europe for refining. An electric power plant of 500-k. w., in which alternators are driven by semi-Diesel engines, has been erected. A low pressure steam turbine was added in 1921.

Production: in 1919-20 was 14,672,022 lb. of copper, of which 3,654,941 lb. was contained in native copper concentrated, 4,962,093 lb. in sulphide flotation concentrate, 6,024,771 lb. in shipping sulphide ore.

Owing to the remote and almost inaccessible location of these mines, past production has been small, compared with possibilities, but the company is making progress and output is steadily increasing since rail communication has been established. The property is considered decidedly promising.

GALLOFA-CONSOLIDADA DE COLQUECHACA, CIA BOLIVIA

Address: Lucre, Bolivia.

Property: the Manjon and Gallofa mines in the Colquechaca district, province of Potosi, 80 miles by road from Challapata on the Antotagasta & Bolivia Ry. The veins, Gallofa and Descubridora, are narrow fissures, 4" to 16" wide, in rhyolite near its contact with red sandstone; the first named largely barren, but with high-grade silver ore occurring in small shoots, while in the latter grade silver-tin ore is exposed.

Development: is by several long tunnels.

Equipment: 40-ton mill and flotation unit.

Production: from hand jigs has been 30-40 tons of concentrate per month.

GENERAL DE MINAS EN BOLIVIA, CIA BOLIVIA

A Bolivian company.

Property: in the Choknacota canyon, Quimsa Cruz district, province of La Paz, 20 miles S. of Araca, shows 2 principal veins in shale, the San Luis being 4 to 6' wide; the ore is quartz and cassiterite, with some zinc and copper as sulphides. A 4,000' aerial tram connects mine with mill, treating (in 1919) 25 tons of 10-12% tin ore per day; 2½ tons of 70% concentrate are produced.

HUAINACHUCHO MINE BOLIVIA

Address: Rafael C. Campos and Luis Calvo, lessees, Colquechaca, Bolivia.

Property: covers part of the Gallofa in the Colquechaca district, Potosi province, reached by an 80-mile road from Challapata on the A. & B. Ry. The vein is a 4"-8" fissure in rhyolite, low grade or barren except for small shoots of rich silver ore. Developed by tunnels.

Production: averaged 400 tons crude ore per month during 1919.

HUANACHACA DE BOLIVIA, COMPANIA BOLIVIA

Officers: Jorje del Rio, Calle Blanco No. 653, Valparaiso Chile; R. Conziner, 22 Rue de la Pepiniere, Paris, France.

E. S. Suffern, agent, 135 Broadway, New York City.

Directors: T. F. Donnelly, pres.; Max Fontaine, v. p.; R. Wedeles, J. M. Ries Arrias and M. Edwards.

C. Leonard Ball, gen. mgr.; B. G. Lott, supt.

Inc. 1873, in Bolivia. **Cap.** £1,600,000; £5 par; all issued. Listed on Paris Bourse.

The year 1919 showed a profit of £4,453.

Dividends: £2,112,000 from 1899 to 1908, inclusive; nothing since.

Property: 3,300 acres, including silver mines at Pulacayo (or Huanachaca), Potosi. **Equipment:** includes 25-mile railway, and lixiviation plant.

Production: 2,572,000 oz. silver in 1920.

HUAYUA-POTOSI y MILLUNI, COMPANIA BOLIVIA

Office: Huet Hnos, La Paz, Bolivia.

Property: the Huayua-Potosi and Milluni mines at Milluni, La Paz province. Silver-free tin ore occurs in sedimentaries near their contact with granite.

includes the Mina Socovan, Itos, La Colorado,
taining several veins, the principal ones being the

which, in 1918, produced 7,246 tons of ore that averaged 16.5 kilos silver and 3.80% tin per ton. The Mina Socovan has 270 meter shaft from which 10,360 tons of ore was mined in 1918 that averaged 7.17 kilos silver and 1.69% tin.

Reserves: at Mina Socovan, about 23,900 tons that average 5.5 kilos silver per metric ton, and 1.15% tin. Mina Itos reserves total 3,700 tons, and average 28 kilos silver and 3.0% tin.

Equipment: includes hoists, 100-h. p. compressor, Diesel engine, electric power, buildings, etc. Mill at Machacamarca includes McDougall and Merton roasters, Hardinge mill, tables, jigs, etc.

Production: in 1918 was 1,110 tons of barilla (concentrate) carrying 59.41% tin; in 1919, 1,010 tons of barilla containing 14,088 kilos silver; in 1920, 905 tons barilla containing 14,499 kilos silver.

Company has a good property, ably managed.

For geology of district, see Miller-Singewald Min. Deposits of So. America, p. 110.

PACUNI BLANCA N. DILLON, EMPRESA MINERA BOLIVIA

Acquired 1919-20 by Guggenheim Bros., 120 Broadway, New York.

Property: in Quimsa Cruz district, La Paz province, S. of the Caracoles group, which see. Two tungsten veins parallel joint planes in granite and are cut by the Veta Grande tin vein; widths are 10" to 2½'. Wolframite occurs with quartz, and ore averages 12% tungsten oxide. Monthly production was 35 tons of concentrate carrying 70% tungstic oxide and 2% tin. The mill has been dismantled and tin ore will be treated at new Caracoles mill.

PATINO

BOLIVIA

Controlled by Simon I. Patino.

Address: Uncia, Bolivia. Alex Grosberg, asst. gen. mgr.

Property: the Huanuni mine, about 15 miles E. of Machacamarca on the R. R.; Uncia, 45 miles S. E. of Machacamarca and near the Llallagua mine; and La Unificada in the Colquechaca district, 80 miles by road from Challapata on the A. & B. Ry.; all in the province of Potosi. La Unificada was formerly owned by Cia. Colquechaca Aullagas de Bolivia.

At Uncia, a cassiterite-quartz-pyrite ore occurs both in sedimentaries and in porphyry intrusions. At La Unificada, 3 principal tunnels open the Embudo vein, 4 to 8" wide, on a sandstone-rhyolite contact; vein shows generally low-grade silver-tin ore with small shoots of high grade.

In 1918-19, Uncia was producing 1,000 tons tin concentrate per month.

Simon I. Patino is an important tin operator and owns a ¼ interest each in Williams Harvey Corp. and Williams Harvey & Co., Ltd. Also owns railroad to Huanuni from Machacamarca, connecting with the A. & B. Ry.; extension to Uncia will be made.

PENNY & DUNCAN, EMPRESA

BOLIVIA

Office: Oruro, Bolivia. Mines at Morococala in Potosi province and at Tres Cruces in province of La Paz.

PORCO TIN MINES, LTD.

BOLIVIA

Office: H. F. Ings, 148½ Fenchurch St., London, E. C. 3, England.

Directors: E. Hooper, chairman; L. A. Kensington, R. G. Ribon, and J. Macandrew. A. B. Reece, gen. mgr.; M. Roberts, cons. engr. Avelino Aramayo & Co., general agents in England.

Inc. Sept. 27, 1912, in England. Cap. £140,000; shares £1 par; 120,075 issued. Debentures: £19,900, 6%.

Statement for year ended Dec. 31, 1919, shows an operating loss of £8,693; debit balance, £23,360; creditors, £85,969. Assets include, cash £1,303; debtors, £115; ore and concentrate, £32,326.

Company was to be refinanced in 1921 or face foreclosure by debenture holders, Avellho Aramayo & Co.

Property: 400 acres, 25 miles from Potosi. Mines were worked in the 16th century for silver, but are now worked for tin. The district is moun-

tainous, up to 17,000' at one point. (See Eng. & Mng. Journal, February 24, 1917).

Geology: the Porco company is working tin deposits in igneous agglomerate, tuff and quartz porphyry. The San Jose vein is a shattered zone with orebodies of massive pyrite, low in tin, but with 8 oz. silver per ton. One shoot is 500' long and 6½' wide. Another is 170' long and 8' wide, assaying 3% tin.

Development: by tunnels, open cuts and drifts. Reserves in 1918 were 315,000 tons of 1.67% tin content and Dec. 31, 1919 were 10,550 tons of 1.6% ore. These reserves have since been exhausted.

Equipment: includes 2½-mile aerial tram and a 100-ton mill, 2 ball mills, screens, jigs, Wilfley tables, Huntington mill, classifiers, Humboldt tables, buddles, etc. The tailing is cyanided for the silver. Mill at Agua Castillo recovers only about 60%.

Production: in 1915, 168,000 lb. tin; in 1916, 443,500 lb.; in 1917, 20,404 tons of ore yielding 307 tons of tin oxide; in 1918, 274 tons of tin; in 1919, 21,280 tons yielded 279 tons tin concentrate. During 1920 the mill treated mainly custom ore, and early in 1921 all operations were suspended.

ROYAL SILVER MINES, LTD.

BOLIVIA

Operates silver-tin mines at Potosi, mining through the Socovan Real. This company, together with Bebin Hermanos and Luis Soux, controls operations at this famous camp.

SAN JOSE; CIA. MINERA DE

BOLIVIA

Is a Chilean company operating tin mines at western edge of town of Oruro, province of Oruro, and mill at Poopo on the R. R.

SANTA TERESA MINE

BOLIVIA

Owned by Gumuncio Bros., Colquechaca.

Property: in the Colquechaca district, province of Potosi, near the Huainacucho mine and on the same vein. Was producing high-grade ore and concentrate at last account.

SOUX HERNANDEZ, EMPRESA

BOLIVIA

Office: and mine at Potosi, Bolivia. Luis Soux, owner.

Property: several mines in Potosi district, province of Potosi. Owns the first smelter erected in Bolivia. Production consists of bar-tin, 95% pure, tin concentrate and silver ore. Employs about 1,000 people.

This is the most important mining enterprise in the Potosi district.

TANAPACA, EMPRESA MINERA

BOLIVIA

Property: is a consolidation of 2 small mines in the Araca district, La Paz province. Two veins Potosi and Allianca, in slate, are exposed on slope of the Choquetanga range. The former, 1.5 to 3' wide, shows a soft iron-stained ore with 4-5% tin; the latter, in a slate-quartzite contact 2.5' wide, shows quartz carrying 10% tin.

Equipment: includes 2 mills, that of Allianca has Chilean mill, jigs and tables. **Production:** of both mills is from 22-24 tons of concentrate per month.

Property is under option to the International Mng. Co. (q. v.)

TOTAL; SOCIEDAD ESTANIFERA

BOLIVIA

Office: Santiago, Chile. Mine at Total, 7 miles from Pazna, province of Oruro, Bolivia.

UNCIA; COMPANIA MINERA DE

BOLIVIA

Office: Oruro, Bolivia. Company owns tin mines at Uncia, province of Potosi and is presumably controlled by S. I. Patino. (See Patino.)

BRAZIL

The mineral deposits of Brazil include two important gold mines and the remarkable diamond bearing conglomerates and gravels near Diamantina, in Minas Geraes, about 300 miles due north of Rio de Janeiro. It is also the

world's largest producer of monazite sand. Manganese was the most important mineral product of Brazil, in 1917 though the great deposits of iron ore are without doubt the most extensive undeveloped deposits of any country in the world.

BRACUHY FALLS CO.**BRAZIL**

Address: Joaquin de Almeida Lustoza, Ouro Preto, Brazil.

Property: the Serra do Mascate, Mendonca, and Inhotin iron deposits containing over 29,000,000 tons of iron ore.

BRAZIL; CIA. DE MIN. Y MET. DO**BRAZIL**

(Brazilian Mining and Metallurgical Co.)

Property: iron mines acquired from Antonio da Costa Lage of Rio.

BRAZILEVIA COMPANHIA METALLURGICA**BRAZIL**

Property: 8 manganese mines in State of Minas Geraes, estimated to contain 100,000,000 tons of ore.

BRAZILIAN IRON & STEEL CO.**BRAZIL**

Mail returned from last address: M. Harder, Rio de Janeiro, Brazil.

Property: the Cana and Santa Anna iron ore deposits containing 132,000,000 tons, and the Algeria and Cota deposits of 10,000,000 tons. A concession is held for construction of a railway.

ITABIRA IRON ORE CO., LTD.**BRAZIL**

Office: R. S. Long, 81 Gracechurch St., London, E. C. 3, England.

Directors: I. W. B. Pease, chairman; Sir A. E. Harris, F. W. Lund, Sir I. H. Benn, P. M. Gotto, Robt. Grant, A. J. Cruickshank and F. A. E. Samuelson.

B. H. Sanders, res. engr., Itabira, Brazil.

Inc. March 31, 1911, in England. **Cap.** £2,000,000, in 500,000 pfd., 359,438 issued; and 1,500,000 ord. £1 shares, all issued.

Notes: £345,000, holders having the right to form a new company to take over the property in 1921. No financial report issued since June 30, 1918. Company controls the Victoria Minas (Diamantina) Ry.

Property: 18,271 acres in the Province of Minas Geraes. Ore reserves are estimated at 140,000,000 tons of hematite, assaying 69% iron; also 20,000,000 tons of second grade, and 330,000,000 tons of soft ore. A royalty of 6d. (12c.) per ton is payable to the B. H. Syndicate, Ltd., the previous owners.

Reported that official permission has been obtained for construction of a smelting plant with annual output of 150,000 tons.

MORRO DA MINA, CIA.**BRAZIL**

Property purchased 1920-21 by **United States Steel Corporation.**

Property: in Lafayette district, Minas Geraes, near Queluz on the Estrada da Ferra Central do Bresil. Lenticular shaped manganese ore-bodies occur in granite, gneiss and schists; the ore as shipped carries 50.5% manganese.

Development: is mainly by open cuts. Operations began first in 1902 and in 1916 daily shipments were 700 tons of ore. Total production 1903 to 1916 was over 1,000,000 tons. Ore reserves in 1916 were 10,000,000.

This mine is said to show "the largest known deposit of high grade manganese ore."

OURO PRETO GOLD MINES OF BRAZIL, LTD.**BRAZIL**

Office: G. H. Wells, 6 Queen St. Place, London, E. C. 4, England.

Directors: Edwin Beer Taylor, chairman, Baron Oberkampf, M. Paisant, E. R. Hoakes, A. S. Taylor and E. de Wael. A. J. Bensusan, supt.: John Taylor & Sons, mgrs.

Inc. July 10, 1914 (originally Jan. 31, 1884), in England. **Cap.** £100,000 in 60,000 10% non-cumulative pfd. and 40,000 ordinary £1 shares, of which 29,661 and 39,429 have issued respectively. Velho and Catuba gold mines and iron and man- g Minas Geraes. Considered the oldest and deepest ashwork has been continued since 1834, and work- tical. The iron deposits contain over 300,000,000 ethz. There is also a manganese deposit assaying 1% Fe. No. 22 level, 6,426' deep, there has been opened

about 900' of lode. Temperature on the 6,426' level is 109° for the air and 116° for the rock. Reserves are estimated at over one million tons.

Equipment: complete mine, mill, and power plants. Treatment is by 130 stamps, 7 tube-mills, concentrators, roasting furnaces, cyanidation and filters. Aerial trams are used to advantage. Company operates a store, hotel, medical department, electric railway, farm and eucalyptus plantation. Power is generated by water at running cost of 3c. per h. p. day.

Production: to end of 1919 was 6,940,000 tons containing £13,350,000 in gold.

Year	Ore, Tons	Gold, Oz.
1920-21	151,299	98,311
1919-20	170,828	105,537
1918-19	167,854	99,874
1917-18	180,300	109,912
1916-17	187,400	\$12.06 per ton

This is the most interesting mine in South America and in some respects one of the most remarkable in the world. It has been regularly operated since 1834 and although the deepest mine in the world, the orebody has maintained its size and value to the bottom level, 6,426' below the surface.

SIDERURGIC MINEIRA, COMPANHIA

BRAZIL

Address: Bello Horizonte, Minas Geraes, Brazil. Also Amara Lanazi, Sao Paulo.

Property: extensive iron and manganese deposits near Sabara, in State of Minas Geraes, together with others in Ouro Preto and other departments.

Equipment: includes a 35-ton blast-furnace, and a plant containing 600-h. p. gas engine, air-compressor, 200 k. w. generator, etc., erected in 1918-19.

WIGG MANGANESE MINES, THE

BRAZIL

Address: Carlos Wigg, sole owner, Rua S. Pedro, 42-Seb. Rio de Janeiro Brazil. Gailey, Davis & Co., agents, Philadelphia, Pa. Arthur J. Wood, mgr. Inc. 1870, in Brazil. Cap. \$1,000,000.

Property: near Burnier Station. Central Railway of Brazil. State of Minas Geraes. Ore is a contact deposit in itabirite, and carries 50% manganese, under 5% silica, and 0.05% phosphorous. Workings are down to depth of 200'. Reserves are estimated at 600,000 tons.

Equipment: hydro-electric plant, hoists, pumps, compressors, and tramways.

Production: is 200 to 300 tons of ore daily. Some ore of 80 to 84% manganese dioxide is also mined and a 60-65% iron ore for several small blast furnaces in vicinity.

BRITISH GUIANA

BRITISH GUIANA GOLD CONCESSIONS CO., LTD.

B. G.

Address: Georgetown, British Guiana.

Property: mineral rights including the Peters mine on the right bank of Puruni river. Is equipped with mill. Total production is 40,228 oz. gold Idle since 1916.

DEMERARA BAUXITE CO., LTD.

BRITISH GUIANA

Owned by Aluminum Co. of America, which see

Property: the Three Friends deposit of high-grade bauxite at Akyma on the Demerara river. The ground is held under lease from the Crown, on a 10% royalty basis.

ANDES COPPER CO.**CHILE**Corporation dissolved February 5, 1918. See **Andes Copper Mining Co.****ANDES COPPER MINING CO.****CHILE**

Subsidiary of Anaconda C. M. Co.

Address: D. B. Hennessey, sec., 25 Broadway, New York City. **Mine address:** Potrerillos, Chile. O. M. Kucho, mgr., Antofagasta, Chile.**Officers:** B. B. Thayer, pres.; Wm. Braden, v. p.; C. F. Kelley, v. p.; A. H. Melin, treas., with John D. Ryan, Messmore Kendall and Wm. Wraith, directors.**Inc.** Jan. 20, 1916, in Delaware. **Cap.** \$50,000,000; \$100 par.**Property:** the Potrerillos mine at Chanaral, Chile, 1,003 acres; mill site claims, 1,200 acres; mill site potash claims, 2,954 acres; and inter-connecting mining claims, a total of 272,275 acres. The mine is 90 miles from the coast, in the main range of the Andes. The orebody is about 1,800' long, 900' wide and 850' deep, and occurs in quartz porphyry intruded in limestone.**Development:** churn drilling and underground openings proved up 100,000,000 tons of available 1.4% ore up to 1917. During 1917, sixteen drill-holes were finished, aggregating 12,000' and proving an additional 5,434,081 tons of an average grade of 1.5411% copper.

During 1918, 2,990' of drift work, raises, etc., was done; 11,800' of drilling added 5,000,000 tons of reserves.

During 1919, 12,546' of churn drilling opened up 33,000,000 tons of ore and in 1920, 9,086' opened up 7,826,241 tons, making total estimated reserves of 218,262,503 tons, averaging 1.49% copper. To end of 1920 the main adit has been advanced 11,142' and a 422' inclined shaft sunk.

Equipment: includes a mine railway for transportation of ore and supplies from the mines to the reduction works, also railroad from mines to Chanaral.

The Quebrada pipe-line consisting of a 3" steel line 17 miles long, with terminal reservoirs, was brought into Potrerillos in 1917 for the purpose of supplying the camp. The Asientos pipe-line aggregating a total of 96 miles, bringing in the water supply to Barquito for the purpose of supplying the railroad, was completed. Construction progressed on La Ola pipe-line, about 35 miles long, which is to bring water to the mill-site for the purpose of operating the concentrator when completed. Fifteen miles of wagon-road were constructed for this project in 1918. A supply of water for domestic use is being developed at Cajoncito. A model town is being built for housing 5,000 people, with churches, schools—both American and Chilean—office buildings, etc., at the millsite.

A 22,000-k. w. steam turbine electric plant is to be built at Port Chanaral. Power will be transmitted to the mines and works at 100,000 volts.

The Andes is an important addition to the list of big South American copper producers, ranking with Braden, Cerro de Pasco, and Chile Copper.

Potrerillos Railway Co.Subsidiary of **Bethlehem Steel Corporation**, 111 Broadway, New York. per Mining Co. Office 25 Broadway, New York.**Officers:** same as Andes C. Mng. Co.**Inc.** January, 1916, in Delaware. **Cap.** \$5,000,000; shares \$100 par.

Company owns concessions granted by the Government of Chile for construction and operation of a railway in the Republic. A line was completed from the Port of Chanaral to a point on the Government railway, and from the station of Pueblo Hundido, on said line to the Potrerillos properties a distance of 60 miles. These properties are owned by the Andes Copper Mining Co.

Cruz Grande, estimated to contain 200,000,000 tons of ore averaging 67½% iron and 0.05% phosphorus, which is to be mined and transported via Panama Canal to the United States. Ore is mined by open cut methods, crushed at the mine and delivered to bins at waterside.

Equipment: includes electric power plant at Cruz Grande, ore crushing plant, and a 25-mile electric railroad.

BRADEN COPPER MINES CO.

CHILE

Controlled by Kennecott Copper Corporation, and is the holding company of Braden Copper Co.

Office: 120 Broadway, New York.

General officers: S. R. Guggenheim, pres.; Stephen Birch, John K. MacGowan, E. A. Guggenheim, and W. P. Hamilton, v. p.'s; Leopold Frederick, treas.; W. E. Bennett, sec.; C. E. Moran, asst. sec.

Directors: Stephen Birch, Thomas Cochran, E. A., S. R. and H. F. Guggenheim, W. P. Hamilton, H. O. Havemeyer, John K. MacGowan, W. C. Potter, Seward Frosser and J. N. Steel.

Inc. May 26, 1909, in Delaware. **Cap.** \$10,000,000; shares \$5 par; increased 1911 to \$14,000,000; issued \$12,953,530 to December 31, 1920.

Bonds: authorized \$20,000,000 issue of 15-year 6% sinking fund gold bonds, non-convertible, due February 1, 1931; \$15,000,000 outstanding. For the purchase of this last issue a minimum of \$1,000,000 per annum will be applied, payments being made semi-annually, starting February 1, 1917 Sales in New York during 1920 totaled \$541,000. Range of prices was 93 in March and 79¾ in December.

Owens entire capital stock and bond issue of the Braden Copper Co. Farmers Loan & Trust Co., New York registrar. D. A. Crockett, 149 Broadway, New York, transfer agent. Annual meeting fourth Monday in June.

In December 1915, offer was made by the Kennecott Copper Corp. to purchase the stock of the company, payment to be made in Kennecott Copper Corp. stock. As an alternative stockholders had the privilege of receiving \$15 in cash for each share of the Braden Copper Mines Co. As a result of this offer the Kennecott now owns 99% of the stock of the company, which based on the market value of stock at the time the offer was made, cost \$42,281,300.

In Feb., 1921, company took a 5.95% interest, \$2,380,000 total amount, in the Copper Export Association's \$40,000,000 note issue.

Inc. June 18, 1904, in Maine, and name changed to present title, Aug. 9, 1904. **Cap.** \$2,332,030; \$10 par; fully issued. Company is protocolized in Chile. Is controlled, through ownership of entire stock issue, by Braden Copper Mines Co. Has a \$4,000,000 issue of 6% first-mortgage convertible bonds. Annual meeting, fourth Tuesday in July.

Property: the Teniente mines, 655 claims, 8,168 acres, including 16 acres at Rancagua. Mines are reached from Valparaiso by the Chilean State railroad, 158 miles to Rancagua, and from that point by company's narrow-gauge railway, 43 miles to the smelter and mill at Sewell, and 1½ miles farther to the mines. The elevation is 7,700 to 9,000', the mine being in a very rugged region on a part of the main range of the Andes.

Company has purchased 10,000 acres of mountain land, for a tailings site, which will hold 200 million tons of tailings. It is 8 miles from the mill and together with the dam, will cost \$1,200,000.

Another purchase of 40,000 acres surrounding the mine put all the company's works, including the new smelter under construction at Caletones, on the company's own land and carries smoke easements on adjacent tracts.

A third purchase included sundry lots of land and water rights needed for the new power plant on the Pangal river and a right of way for the power line.

Geology: all the rocks are igneous and the rock at the mine is an andesite surrounding a plug of tuff, which fills the throat and crater of a volcano. This light gray tuff is no longer loose and friable, but cemented into a hard concrete-like mass. The ore deposit is unique, being a series of irregular lenses of ore formed about the border of the old plug, slightly tilted to one side. (Graham.) On one edge erosion has removed the mineral deposit. The volcanic vent is of nearly circular section 4,000' across, and filled by tuff and an agglomerate of rounded boulders of all sizes. The crater rim is surrounded by highly fractured and brecciated andesite, the fractures being mineralized around the circumference. The ore zone has been further fractured by porphyry dikes, which occasionally cut into the tuff.

The orebodies occur around, but outside the rim of the crater, in the andesite near its contact with the tuff. The ore consists of shattered andesite, often finely brecciated near the tuff contact, copper minerals filling the cracks and openings. The ore bodies are limited on one side by the tuff, but in the andesite the grade becomes lower, passing from breccia to fractured rock and fading out in the more blocky country rock. The fractures in the rock range from a mere film of sulphide up to seams 3 to 4" thick of mixed bornite and chalcopyrite, mainly the latter. The orebodies dip at 70° toward the center of the crater.

Five distinct orebodies have been proven, and four, the Fortuna, Teniente, Centinela and Bornite are worked. All are marked by strong outcrops stained with copper minerals. The zone of oxidation is shallow, ranging from a few feet to 150' in depth, and as the deposit consists of disseminated ore, it is believed that values will persist to great depth.

The Fortuna orebody is typical of all the deposits. It is lens-shaped in horizontal section, is developed for 3,000' in length and has a maximum width of 260'. Below the 4th level, 1,425' beneath the outcrop, little increase in size can be expected, as the rock is denser and ore is lower grade. The copper occurs as bornite and chalcopyrite, associated with ankerite and quartz. The Fortuna orebody is developed and ready for ore extraction. The shrinkage stopping system, similar to that employed at the Ray Cons., is used. Stopes are carried up 7 metres wide, with 5-metre pillars. The topography of the country is such that shafts are practically unnecessary; all ore can be taken

out through tunnels, and, even though parts of the mine are very wet, pumps are not required.

The mine was gophered by former owners for high-grade ore, which was followed and extracted wherever found. Average grade of Fortuna ore is lower than in El Teniente mine, but workings show copper sulphides and occasional metallic copper throughout the brecciated material for depth of 2,000'.

The **Teniente** orebody, which is supposed to be in the crater of the old volcano, is the largest and most important orebody of the property, having a length on No. 1 level, of 4,800', an average width of 300', and depth of 840'. It is in this orebody that the greatest increase of tonnage is to be expected. It is much the largest of the various orebodies and, with the exception of the small Bornite orebody, the richest.

No. 1 Teniente level and No. 2 Fortuna level have been extended along the tuff contact entirely around the crater, 2½ miles. The Teniente is the oldest mine of the district, having been worked by the Spaniards for the high-grade ore in the small veins.

The **Centinela** orebody is being mined above Teniente No. 3 level and will probably extend below it. The Bornite orebody worked out above the 4th level, is rich, but small, and no great extension in depth is looked for. Regimiento No. 2 orebody lies beyond the Fortuna, is lower grade and its size has not yet been determined.

New work from the beginning in 1916 to 1918 inclusive aggregates 276,728'; in 1919 extensions 35,031'; in 1920, 47,470'.

In 1918-19, development was mainly on the Teniente side, where large quantities of good ore were disclosed. During 1920 and after, grade of ore sent to mill was lower than the average because of decreasing copper content of the Fortuna with depth and because southern upper part of Teniente now being exploited is lower grade than other sections. Driving of the new ore-pass gathering system is being pushed; ore caved down on the Teniente side will be sent to C level through passes, where it will be handled by motors to other passes, thence by the main electric railroad haulage-level, to the crushing plant at the mill. This new railway, completed April, 1918, is entirely underground; its grade being but 0.5%; trains of fourteen 22-ton cars are used. The two-unit (5,000 cu. ft. each) compressor station is underground. Mining methods were described by Frank Cameron in the "Min. & Sci. Press" of September 20, 1919.

The main 3-compartment 9'x20' shaft, between C level and Fortuna 5, known as shaft A, 1,650' deep was in operation by early 1921.

Ore reserves: calculated by Fred Hellmann, are as follows:

Year	Positive	Copper, %	Probable	Copper, %
1920.....	176,640,000	2.45	87,750,000	1.87
1919.....	174,600,585	2.45	92,000,000	1.91
1918.....	173,506,356	2.45	90,000,000	1.88
1917.....	149,192,000	2.42	90,000,000	1.88
1916.....	131,680,000	2.40	88,000,000	1.89

Electric power is used throughout. It is generated at the Coya hydro-electric plant on the Cachapoal river by four 2,000 k. w. Pelton wheels and generators, and a 4,000 k. w. vertical Francis turbine with generator, a total capacity of 15,000 k. w. Power is delivered to mine and mill at Sewell over a 16-mile 33,000-volt transmission line.

To handle 10,000 tons of ore per day, an additional hydro-electric power plant on the Pangal river, 6 miles from the Cachapoal power plant, will develop a total of 15,000 k. w. by three Pelton impulse wheels and generators. A new transmission line has been erected between these two power stations;

mission line having already been installed between arriving current at 66,000 volts for the new smelter and mine at Sewell. Two units of the new power line are under construction.

erial tram, 2,630 meters long, with 550 meters drop connecting the mine and mill, at Sewell, is used for ore. The main line, of 2,000 meters length, runs from the central transfer station, where connection is made with the Teniente mine and a 500-meter line to La Fortuna. A new tram from the mill at Sewell to the new smelter is under construction.

At the Sewell smelter there will be a 12,500-ton coarse-ore crushing plant finished in 1921. The treatment is for from 7,400 to 10,000 tons daily capacity. The flow is through a bin, gyratory crusher, rolls, Symons disc crushers, ball mills, impact screens, trommels, Wilfley tables, 30 classifiers, two 60' Dorr thickeners, 11 gear-driven Minerals Separation cells of 20 cells each, Callow flotation units and Rateau concentrators of 20,000 cu. ft. of air per minute at 7 lb. pressure; also a concentrate mixing and loading plant.

A testing plant was in operation during 1915, testing samples of copper from concentrate; it is believed that a full scale test is usually carried out on a commercial scale, but cost of such a test is inadvisable at the present time.

The acid provided for the flotation cells is prepared in two Wedge 7-hearth furnaces. The acid contains 7% moisture, 16% copper, 13.6% silica, 28.6% iron, and the roasting temperatures, from 1 to 7, respectively, are 380, 400, 420, 440, 460, 480, 500° C. The furnace shaft makes one revolution in 10 minutes. It is required to operate the furnace when treating 100 tons of ore per 24 hours. The calcine contains 2% sulphur.

There are four in number (being added to), each with a capacity of 100 tons and constructed of timber framing and 1/8-inch

At Sewell was completed, several improvements have been made, the most important being the addition of nodulizing kilns. These are used in the manufacture of Portland cement. The grate surface was reduced to nodule form. The 4th and 5th blast furnaces ever built, being 8' in diameter and 100' long, with a gas oil burner at discharge end. By feeding nodules into the blast furnace capacity has been almost doubled and the grate is practically cut in two. On account of an irregular supply of coal a pulverizing plant was added to the nodulizers.

The plant now consists of 14 storage bins for concentrates, 2 ball mills, 2 grates, with a daily capacity of 50 tons concentrates, 2 nodulizing kilns; 2 blast furnaces, whose daily capacity is 100 tons, or 600 tons nodulized concentrates; 3 Pierce-Smith converters, two having 33 tuyeres, and other 17 tuyere apparatus.

At Caletones, 5 miles from Sewell, was to have been completed at end of 1921.

The plant, including the concentrators and smelter, are now producing about 10,000 tons of 2% ore daily, at an estimated cost of \$1.00 per ton of ore mined down in New York. Work was stopped during the winter of 1919, and is now being carried on in accordance with a plan prepared under direction of H. E. Skougor.

Production:

Year	Milled, tons	Copper, %	Concen- trate, tons	Copper % covery,	Mill re- covery, %	Blister out- put, lb.	Price received, per cts.	Cost lb., cts
1920.	2,205,200	2.078	179,353	19.49	77.28	64,918,000
1919.	1,176,794	2.161	106,195	20.23	83.63	42,040,000

1914.	900,299	2.120	28,304,092
1913.	18,098,000
1912.	9,500,000

Copper is sold through the new firm of Guggenheim Bros.

Although operations at the Braden property have not yet fulfilled the expectations of its sponsors, it is believed that the treatment problems are solved, and with the completion of plant extensions and of the new smelter at Caltones, that profits will be large, though no prediction is ventured as to the date of dividends. Known ore reserves will last 50 years on a 10,000-a day basis, and extent of the orebodies is as yet only partly known.

CATEMOU; SOCIETE DES MINES DE CUIVRE DE CHILE

Reorganized 1913 as Compania Minera de Calama. In August, 1916, property was sold to the Chile Copper Co., which see.

CALDERA COPPER SMELTER CHILE

Owned by the Soc. de Minas Y Fundiciones de Carrizal (q. v.), a subsidiary of the Am. Smelting & Refining Co.

Office: 120 Broadway, New York. Operating address: J. P. Chadwick, representative, Antofagasta, Chile. Works address: Caldera, Chile.

Has a 6,000 ton charge capacity per month. Not operating in 1920-21.

CARRIZAL; SOC. DE MINAS Y FUNDICIONES DE CHILE

Subsidiary of the American Smelting & Refining Co., 120 Broadway, New York City.

J. P. Chadwick, representative, Antofagasta, Chile.

Company owns smelters at Carrizal and Caldera.

Caldera: this smelting plant contains 3 copper blast-furnaces and converters, reducing 5,000 to 7,000 tons of charge monthly, mainly copper ore purchased from local mines. The plant ships from 400 to 600 tons a month of converter copper, which goes to Tacoma, Wash., for refining.

Carrizal: this copper smelter, at Chanarcitos, contains but one blast-furnace, handling from 1,300 to 1,800 tons of charge monthly, the ore coming largely from the Astillas mine, which the company owns. The 300 tons a month of copper matte which the furnace produces is shipped to Tacoma.

The copper mining industry of both the Caldera and Carrizal districts was practically suspended in the early part of 1919 on account of the low price of copper. Both smelters were closed down during 1920.

CATEMOU SOCIETE DES MINES DE CUIVRE DE CHILE

Reported to have been taken over by a Chilean syndicate, 1920-21.

Main office: 50 Boulevard, Emil Jacquemin, Brussels, Belgium. Office: 5 Rue du Helder, Paris France. Operating and works office: Estacion Chagres, Aconcagua, Chile. A. W. Lehman, gen. mgr.

Officers: Eugene Renevey, chairman; Max Lyon, managing director; Georges Renevey, Jean Renevey, Robert de la Bouglise and Robert Franklin, directors; Joseph Wouters, sec., in Brussels; Henry Saloman, in Paris.

Inc. June 2, 1899, in Belgium. Cap. f. 5,000,000; shares f. 500 par; divided into 10,000 preference shares at 8%, and 35,000 ordinary shares; non-assessable. Debentures f. 1,500,000 5% bonds. Annual meeting, last Friday in June.

10, 5% in 1911, 6% in 1912, 6% in 1914, 8% in 1915, 7.

The mines and works have telegraph and telephone communication. Forces, 1916, averaged 1,200 men, with the high average wages of 5 pesos for underground workmen, and 4 pesos for surface labor.

Reduction works: include 2 smelters, each with converter plant, with aggregate capacity of 650 to 750 metric tons of ore daily, and 2 concentrating plants employing flotation, one situated at La Poza, 12 kilometers from the second, near Chagres Station on the Andes railroad, and at Chagres smelter. The Poza plant, with a daily capacity of 60 tons, treated 55,000 tons of ore assaying 3.5% copper, in the 3 years ended Dec. 1919, producing a 16.3% concentrate with an extraction of 80.6%. The Chagres concentrator has a daily capacity of 400 tons, and in 1920, treating ore averaging 4.7% copper, its extraction was 90.6%, with concentrate assaying 31.1%; cost per ton of ore was 14.22 pesos.

La Poza smelter, of 300-tons daily capacity, has 2 blast furnaces turning out 50% matte. The converter department has five 57x77" shells, with 12 tuyeres each, of the Copper Queen type, turning out cakes carrying 99.7% copper and 40 oz. silver per ton. There is a 40-ton briquetting plant and the converter department has a quartz mill. Power is furnished by a 165-h. p. Pelton water wheel and a 175-h. p. engine. Furnace blast is supplied by No. 6 Connersville blowers and converter blast is furnished by a Riedler air-compressor, with capacity to reduce 20,000 cu. ft. of free air per minute to 15 lb. pressure. Fuel is coke, one ton of coke smelting 6 tons of ore, ores treated being highly silicious, with slags averaging 0.4 to 0.5% copper. In 1918 La Poza and Chagres smelters treated 80,000 metric tons of ore, of 6% average tenor, yielding 4,000 metric tons fine copper. Employs 100 men at average wages of 4 pesos daily.

The converting plant at Chagres smelter contains a large horizontal Pierce-Smith machine.

Chagres smelter has 36x84" and 36x120" Allis-Chalmers cylindrical water-jacket blast-furnaces. Ores smelted at this plant carry excess of silica and alumina and are deficient in sulphur, necessitating the free use of low grade cupriferous pyrite and limestone, for fluxing. Reverberatory furnaces are 17x55' and 17x85'. A 2,000-h. p. hydro-electric plant has been erected.

Production: was 3,379,947 lb. fine copper in 1907; 4,060,873 lb. in 1908; 4,073,761 lb. in 1909; 4,920,500 lb. in 1910; 4,660,000 lb. in 1911; 6,960,000 lb. in 1912; 5,843,250 lb. in 1913; 7,878,465 lb. in 1914; 7,210,350 lb. in 1915; 11,082,330 lb. in 1916; 9,200,000 lb. in 1917; 9,100,000 lb. in 1918; 6,000,000 lb. in 1919.

Property is estimated by company to have, with further improvement, a productive capacity of 20,000,000 lb. fine copper yearly.

CENTRAL CHILI COPPER CO., LTD.

CHILE

In 1921, a receiver and manager was appointed in Chile.

Address: Bromhead Bros. & Co., 10 Basinghall St., E. C. 2, London, England. Mine and works office: Panulcillo, Ovalle, Coquimbo, Chile.

Officers: E. A. J. Goldschmid, chairman and managing director; H. L. Bromhead, Andre Goldschmid and W. H. Patchell, directors.

Inc. Jan. 11, 1898, and is second reconstruction of the **Panulcillo Copper Co., Ltd.**, inc. Jan. 5, 1864, and reconstructed as the Central Chile Copper Co., Ltd., in June, 1894.

Cap. £400,000; shares £1 par; 312,468 shares issued. Increased from £300,000 in 1905, 30,000 new shares being offered to shareholders at par.

Financial statement for year ended Dec. 31, 1920 showed a net loss of £19,274, increasing total debit balance of £126,485. Assets include property, £237,817; equipment, £10,000; Tambillos mine, £12,436; stocks of ore and materials, £10,133; cash, £218; debtors, £1,015. Liabilities include, capital stock £312,468; creditors, £10,440; bank over draft, £71,804.

Dividends: 6 pence per share in 1900, 6 pence in 1901, and 1 shilling in 1907; none since.

f the Panulcillo and Condessa Copper Mines and of Coquimbo, Chile, also the Inagotable mines, 10 and several properties in adjoining districts.

ally by the 1,000-meter San Gregorio tunnel. Ore associated with pyrite, in limestone gangue, with tition of malachite, azurite and chalcocite.

agotable mines, are at Ferro Negro.

al power and compressor plant. Also a 400-ton the Panulcillo Alto mine by tram, is 76 kilometers quipped with 3 calciners, 2 reverberatory furnaces, three 42x84" blast-furnaces. The smelter treats npany's sulphides furnishing flux. Matte is crushed ork for smelting.

oper, 1913, 2,274 tons; 1914, 2,491 tons; 1915, 2,737 917, 2,817 tons of copper, smelted from 56,869 tons from 32,063 tons of company and 27,826 tons of ,000 tons of copper. Smelting operations suspended

deposit consists of a number of parallel ferruginous similar type to the Atacama orebody. The deposit l with the smelter and therefore has never been onsidered to be of as great if not greater value than

The other deposits of the company are scattered over the territory of Chanaral, some being of the porphyry type with oxidized ores, others being true fissure-veins, with sulphides.

The smelter is located at the harbor of Chanaral. It has four water-jacket furnaces, one of 100, one of 80 and two of 50 tons. There are two converter stands. Converter shells are 1.68 meters in diameter and 2 meters in length. The basic process is used with excellent results in spite of small size of converters. Air at 10 lbs., is delivered to the converters by a two cylinder direct connected double expansion Walker compressor.

The product of the smelter is bar copper averaging 99 to 99½% copper and containing about 60 grams gold and 150 grams silver per metric ton.

In view of the increasing difficulties due to war conditions, the mines and smelter have been shut down in the course of 1918. In 1919 the smelter was severely damaged by a strong earth-quake.

Operations have not yet been resumed. It is believed that methods of ore treatment should be modified. Smelting should be given up and replaced by leaching in view of the large existing tonnage of oxide ores and of the progress made during these last years in the leaching process. Experiments have shown the easy solubility of the copper content of Chanaral oxide ores in diluted sulphuric acid.

Property is considered valuable and management good.

CHILE COPPER CO.

CHILE

Office: 120 Broadway, New York.

Officers: Daniel Guggenheim, pres.; Albert C. Burrage, v. p.; Morris Guggenheim, v. p.; H. F. Guggenheim, v. p.; Jos. Clendenin, v. p.; E. A. Guggenheim, v. p., with Isaac Guggenheim, S. R. Guggenheim, William Loeb, Jr., John N. Steele, Albert C. Burrage, Jr., Russell Burrage, Chas. D. Burrage, H. L. Chalifoux, J. K. MacGowan, and E. A. Cappelen Smith, directors. W. E. Bennett, sec.; C. E. Moran, asst. sec. L. Frederick, treas.; D. A. Crockett, transfer agent, 149 Broadway, New York.

Inc. April 16, 1913, in Delaware. **Cap.** \$135,000,000; \$25 per; issued, 3,800,000; 600,000 shares held in treasury for conversion of \$15,000,000 7%, 10-year and 1,000,000 shares for \$35,000,000, 6% 15-year gold bonds. Am-Trust Co., Boston, registrar. Shares are listed on the New York and Boston Stock Exchange. Company owns entire issued capital stock of the Chile Exploration Co. of New York.

Range of prices during 1920 was 21¼ in January and 7¾ in November. Sales totaled 89,889 shares in New York; in 1921, high was 16¾ and low 9, with sales totaling 736,900.

Funded debt:

(1) Collateral trust convertible 7%, 10-year gold bonds, due May 1, 1923. \$15,000,000 outstanding; convertible into stock at \$25 per share; bonds are a direct obligation of the company and are secured by deposit of the entire capital stock of the Chile Exploration Co., the operating subsidiary of the Chile Copper Co. This is a closed mortgage.

(2) Collateral trust convertible 6%, 15-year gold bonds, series A, due April 1, 1932. This issue of \$35,000,000 is convertible into Chile Copper Co. stock at \$35 per share and secured, subject to the convertible 7s, by the capital stock of the Chile Exploration Co.

Price range of debentures in New York in 1921 was 99¾ to 90 for the 7s, and 87 to 66 for the 6s.

In Feb., 1921, company took a 7.58% interest, \$3,032,000 total, in the Copper Export Association's \$40,000,000 note issue, bearing 8% interest.

* Loss.

During 1921, there was a loss of \$1,353,949 before depreciation and depletion. Cash and securities on March, 1, 1922, were \$10,435,900.

Property: the copper deposit of Chuquicamata, province of Antofagasta, the largest known in the world, forms the crest of a low ridge at an elevation 9,600' above sea level. Chuquicamata is 85 miles east of the Pacific ocean, on a branch of the Antofagasta & Bolivia Railway, 163 miles from Antofagasta. Company owns 740 claims, 7,601 acres; 2,080 acres are mineral land, the balance being plant site, waste dump area and claims covering limestone, iron ore, salt and sulphur deposits. See Vol. XIV for description of former holdings of Cia. Minera de Caloma acquired by Chile Copper in 1916.

Geology: essentially, the orebody occupies a shear-zone in granite with an outcrop 8,000' long and an average width of 750'. The maximum length as proved up to the present time is 7,500', with maximum and average widths of 2,200 and 1,340'. Since starting operations, to the end of 1920, 149 prospect holes were drilled; totaling 61,577'. The average of the entire deposit is estimated at 2.12% copper. The copper in the oxidized zone occurs in the form of brochantite, with a small amount of atacamite and chalcantite. Underneath the oxidized ores lies a zone of mixed ore containing both oxidized and sulphide copper, and below this lies a sulphide zone containing chalcocite with pyrite, and with enargite towards the bottom. The latter zone can be treated in the customary way by water concentration and direct smelting, but for sometime, the oxidized portion only of the orebody will be treated. Vein mines occur along the eastern edge of the deposit, but are not being exploited at the present time.

Development: by the open cut method, five benches being now open. Total length of ore faces on all benches as of Dec. 31, 1920, was 7,680', with an additioaal 3,700' containing both ore and waste. The benches vary in height from an average of about 30' to a maximum of 150'. The ground is broken both by churn-drill and tunnel blasting. For the former method a total of 4,795 holes, with a length of 190,690', have been drilled, and for the latter 93,340' of lateral and vertical extensions have been driven, of which 38,651' have been blasted. These figures represent the work accomplished since beginning of oprations to Dec. 31, 1920. The broken ore is handled by power shovels. The total ore mined during this period was 16,260,547 tons, averaging 1.60% copper.

During 1920, 2,134,665 cu. yd. of ground was broken, including 627,595 cu. yd. of waste; 764 drill holes measured 34,477' and 5,919' of blasting tunnels were driven.

As an aid in determining the reserves, 149 prospect holes, or 61,577' have been drilled; but none in 1920.

Ore reserves: estimated as follows (by tons):

Year	Oxidized	Per ct.	Mixed	Per ct.	Sulphide	Per ct.	Total	Av. %
1920....	329,306,106	1.91	151,000,000	2.98	210,000,000	1.84	690,306,106	2.12
1919....	333,550,866	1.91	151,000,000	2.98	210,000,000	1.84	694,550,866	2.12
1918....	336,510,349	1.91	151,000,000	2.98	210,000,000	1.84	697,510,349	2.12
1917....	339,000,000	1.91	151,000,000	2.98	210,000,000	1.84	700,000,000	2.12
1916....	339,000,000	1.91	151,000,000	2.98	210,000,000	1.84	700,000,000	2.12

Equipment: at mine includes 9 No. 103-C electric, one No. 225-B electric and 10 95-B steam, shovels, the latter are being replaced by the more economical electric shovels. Thirty-two locomotives, varying in weight from 54 to 80 tons, are used for tramping purposes. There are also air compressors, 60 and 70-ton ore cars, railway shops and everything necessary for moving 15,000 tons of ore daily.

Treatment: the reduction plant, $2\frac{1}{2}$ miles from the mine, which started operations May 18, 1915, has a capacity of 15,000 tons a day. Copper is recovered by leaching process as developed by E. A. Cappelen Smith; brochantite, the principal mineral, being readily soluble in dilute sulphuric acid. As it contains no arsenic, antimony or bismuth, the solution is not fouled by repeated use.

The ore is broken by two 84x50" jaw crushers, 3 No. 10 gyratory crushers, six 48" horizontal and twenty-four 48" vertical Symons disc crushers, to $\frac{3}{8}$ " size. It is then distributed to mastic-lined, concrete vats, of which there are nine, 110' wide, 150' long and 17.5' high, each with a capacity of 10,000 tons of ore.

The leaching process requires approximately 6 days for the complete cycle, 1 for filling the tank, 2 for leaching, 2 for washing and draining, and 1 for charging. The leached residue is taken from the vats by grab buckets operated on a traveling bridge, transferred to cars and piled on the waste dump.

Copper is precipitated from the pregnant solution by electric deposition, but before electrolysis the solution is dechloridized. The ore contains from .05 to .1% chlorine, which is extracted with the copper, in the leaching operation, and by agitating the solution with cement copper, the chlorine is precipitated as cuprous chloride. This is separated from the solution in settling tanks, and then dissolved in brine and agitated with scrap iron in revolving bronze drums, where the copper is precipitated in a finely divided condition suitable for dechloridizing more solution. The clear solution from the settling tanks goes to the electrolytic tank house, where it is electrolyzed using ordinary copper cathode starting sheets and insoluble anodes made of ferro silicon. The electrolytic tank house contains 894 tanks 19' long, $3\frac{1}{2}$ ' wide and 4' 10" deep made of mastic-lined concrete. Of the 894 tanks 64 are used for making cathode starting sheets and 830 for electrolytic deposition of copper from solution. The solution enters the head tank of the system containing about 5% copper and $2\frac{1}{2}$ to 3% free acid, and leaves the last tank containing $1\frac{1}{2}$ % copper and 7 to 8% free acid.

There is a gain of sulphuric acid from the brochantite in the ore amounting to 5-7 pounds per ton of ore treated; this permits discarding continually from the system sufficient solution to remove the iron introduced into the solution in the dechloridizing plant and by the corrosion of the ferro silicon anodes in the tank house.

An important feature of the operation has been the increased extraction each year since the plant started. The average extraction by the mill during the last three years was 88.09% in 1918; 89.57 in 1919; 92.12 in 1920. The maximum was reached in February, 1921, when an average of 94.1% was obtained for the month. The continued increase in extraction is chiefly due to finer grinding of the ore, although the high figure noted, was owing partly to a longer time treatment.

Since the ore contains no impurities such as are usually encountered in a copper refinery, the wire bar copper produced is exceedingly pure. At present is averages 99.95% copper and 101% conductivity, Mathiesson standard.

Power for operating the reduction plant is generated at Tocopilla on the Pacific Coast by four 10,000 k. v. a., 53,300-h. p. total, steam turbines, served by oil-fired steam boilers. A 100,000-volt, 3-phase, 50-cycle, 87-mile steel tower transmission-line connects this plant with Chuquicamata. A large part of the power is utilized for electrolytic purposes, through seven

2,500-k. w. motor generators which convert 5,000-volt alternating current into 250-volt direct current. During 1920, this plant generated an average of 27,210 k. w. per hour.

Additional machinery increased the power-house capacity to 115,000 k. w. (153,300 h. p.) by adding three 25,000 k. w. turbo-generators. An 18,000 kw. unit was added also in 1921. A new 135,000-volt transmission line and sixteen 3,480-k. w. rotary converters added in 1919, provide the necessary 250-volt direct current. Total oil storage capacity is 165,000 barrels.

Transportation of copper and supplies being difficult, Chile Exploration and Braden Copper, early in 1916, jointly purchased two steamers, the "Sherman" for \$790,000, and the "Republic," for \$825,000, to trade between Chile and New York. The Chile Steamship Co. and Sherman Steamship Co. were formed to operate these vessels. The revenue from general carrying business soon repaid the purchase price and the owners were offered \$1-250,000 each for them, but refused. J. K. MacGowan is president of both steamship companies. In 1921, two 70,000-bbl. tank ships were purchased to facilitate transportation of fuel oil.

There are over 9,000 persons at Chuquicamata, dependent on the company, which has erected 1,855 houses, staff quarters, club-house, 2 schools, and controls the townsite.

Production:

*Exclusive of depreciation and depletion. $\div 7\frac{1}{2}$ months.

At end of 1919, plant capacity had reached 15,000 tons of ore per day, with an annual possible production of 145,000,000 to 155,000,000 lb. copper. Plans for further increase of annual capacity, first to 194,500,000 lb., next to 241,500,000 lb. and finally to about 303,500,000 lb. of copper have been prepared, but actual construction is held in abeyance until return of normal conditions. The latter stage involves handling about 35,000 tons of ore per day.

Annual report for 1920, announces that development stage of this huge enterprise has now been passed.

Copper is sold through the new metal-selling agency of Guggenheim Bros.

CHILENA DE FUNDICION DE ESTANO, CIA.

CHILE

Subsidiary of Llallagua Tin Co., (q. v.), operating mines in Bolivia.

In 1917, erected a 30-ton pig tin smelter at Arica, Chile, which was blown-in February, 1918. No later information.

COLLAHUASI la GRANDE; SOC. FRANCAISE des MINES

DE CUIVRE

CHILE

In liquidation; property and plant sold to Poderosa Mng. Co., (q. v.) in 1921-22.

Property: in Collahuasi district, in S. E. corner of province of Tarapaca. Copper ores occur in lenticular masses in andesite, with oxidized zone reaching depth of 250'. The ores are generally high grade and carry silver. There is said to be no developed ore in sight, but prospects are considered promising.

extensive comprising that formerly held by the Com-
 agua, 195 pertenencias of mineral land and the Nal-
 al of nearly 2,000 acres., near El Monte Station on the
 R.

include 3 parallel blanket veins, striking north-south,
 east, with a width of 3 to 30'. They are opened for a
 s, and principally worked in the Trinidad, Las Vacas,
 Venus, Brillante, El Gato, and Esperanza mines. These
 ores, changing at 65' depth to chalcopryrite, bornite and
 minated form, averaging 4% copper, and nearly self-
 lso contains a blanket deposit with 2% copper in a
 sed as a flux; the vein has the same strike and dip as
 rphyritic formation with low-grade values.
 re are several air compressors, a 2,000-h. p. hydro-

electric plant on the Rio Maipo, and abundant wood on the Naltagua ranch.

Transportation equipment includes several aerial trams and a private railway. The aerial tram from El Monte to San Antonio, where the tower station is located, is 5,600 meters in length, with 22 towers, of 22 meters maximum height, on concrete foundations, having greatest span of 386 meters. An incline tram, at San Antonio, connecting with the lower station of the aerial tram, is 300 meters long, at an incline of 30°, having a double line of rails. A 2½-kilometer railway connects the incline tram with the private rail system, which has a total length of 25 kilometers. Equipment includes 6 locomotives, with 2, 3 and 5-ton ore cars.

An experimental concentration plant to treat 100 tons per day was erected in order to determine the best method to concentrate these ores.

Smelter: The 300-ton smelter is at Naltagua, in the valley of the Rio Maipo, adjacent to the Rio Mapocho, 70 kilometers by river to the coast, and 225 kilometers to Valparaiso. Plant contains two 40"x160" blast-furnaces and two 17"x55' reverberatory furnaces of the Anaconda type, fired by pulverized coal.

The converter department has 3 stands, with 9 shells, of the Copper Queen barrel type, an electric traveling crane with an hydraulic accumulator for rotating the shells and a large Pierce-Smith basic converter.

The smelter power plant includes 770-kw. engines, 4 Connersville blowers and a 200-h. p. air-compressor for converter blast. The boiler plant has five 200-h. p. boilers, three 300-h. p. boilers and a 30-meter steel stack.

Works were described by Mark R. Lamb in "Engineering and Mining Journal" of October 28, 1916.

About 1,500 men are employed at the mines and works, with average wages of 5 pesos at the mines and 6 pesos at the smelter.

Production: has been as follows: 293,209 lb. in 1908-09; 2,253,090 lb. in 1909-10; 2,486,772 lb. in 1910-11; 4,082,892 lb. in 1911-12; 4,703,005 lb. in 1912-13; 5,659,356 lb. in 1913-14; 6,504,004 lb. in 1914-15; 9,417,692 lb. in 1915-16; 9,241,030 lb. in 1916-17; and 8,054,497 lb. in 1917-18; 5,998,805 lb. in 1918-19. Above figures are for Chile bars assaying 99.1% copper.

No recent figures are available but smelter was operating up to mid-1921.

PODEROSA MINING CO., LTD.

CHILE

Office: F. W. Bishop, sec., 145 Dashwood House, New Broad St., London, E. C., Eng. **Operating office:** R. O. Packard, gen. mgr., Casilla 855, Antofagasta, Chile. **Mine office:** Collahuasi, Tarapaca, Chile.

Directors: Chas. Fearn, chairman; L. W. Harris, V. Echeverria and W. J. Barnett.

Inc. Nov. 27, 1908, in Great Britain. **Cap.** £200,000; par £1; reduced in 1922 from £500,000; £5 par; fully issued and fully paid.

Financial Statement shows:

Yea.	Revenue	Total Charges	Profit
1920.....	£112,303	£ 76,789	£35,504
1919.....	58,003	59,602	1,599*
1918.....	60,100	18,662*
1917.....	199,370	103,361	96,009
1916.....	119,738	52,039	67,699

* Debit.

Dividends: 5% in 1909; 10% in 1916; 12½% in 1917; 2½% in 1921.

Property: 37 contiguous claims, 185 hectares, or 457 acres, including the Poderosa, which is the principal producer, and the San Carlos, Rosario, and other mines. The lands lie at an extreme elevation of 15,400', among the rounded peaks on the western edge of the Bolivian plateau, a region

above the timber line, and barren of vegetation, with the exception of yareta, which constitutes the fuel of the district. Copper mines were worked in this district during the era of Spanish dominion, and previously by the Indians, as evidenced by remains of ancient furnaces, fragments of matte, scoria and tools left in old workings. Development of the mines was begun 1903, and regular ore shipments were started January, 1906.

In 1921-22, purchase of property and equipment of the Soc. Francaise des Mines Cuivre Collahuasi la Grande was in progress.

Geology: copper bearing lodes occur in fissured zones in andesite, with ore lenses up to 100' long and 50' thick that carry 18% copper and 6 oz. p. t. silver. Poderosa, or main vein, is a fissure without visible outcrop, lying alongside a diorite dike intrusive in dacite. The vein lies under the dike, but in places departs from it. It has numerous branches and parallel fissures. Secondary sulphides occur at 250' below the surface.

Development: the Poderosa mine had several shafts, with a winze to the 10th level. At the Rosario, a new shaft reached the 5th level (410') in 1921. Total extensions in 1920 were 2,957'.

Ore reserves are estimated, July, 1920, at 8,000 tons blocked out averaging 30% and 7,000 tons partly developed ore in the Poderosa mine. Dump reserves amount to 134,000 tons varying between 3.2 and 5% copper.

Equipment: includes power plant, ore-sorting plant, concentrator, etc. There are 175 men on the payroll, 95 being underground.

Production: in 1910 the mine yielded 10,902,080 lb.; in 1911 6,419,372 lb.; in 1912, 5,077,204 lb. In 1916, 3,948 tons of 28.7% copper and 9.4 oz. silver ore and concentrate was shipped; in 1917, 6,980 tons assaying 31.55% copper and 13.09 oz. silver; in 1918, 3,309 tons averaging 30.7% copper and 12.45 oz. silver; 1,498 tons averaging 31% copper and 12.97 oz. silver in 1919; 5,011 tons averaging 30.13% copper and 15.16 oz. silver in 1920.

Costs f. o. b. mine in 1920 were £12.55 per ton of ore and £44.66 per ton of copper.

Ore is shipped by railroad to Ollague, en route to Antofagasta.

SANTIAGO MINING CO.

CHILE

Subsidiary of Anaconda Copper Mining Co.

Office: 25 Broadway, New York.

Inc. 1917, in Delaware. Cap. \$10,000,000; shares \$25 par.

Property: Lo Aguirre mine, situated 20 kilometers W. of the City of Santiago, Chile. The mines consist of five groups, 500 acres, partly acquired by purchase from former owners and partly by denouncement. The African mines, also owned by the company, are 3 miles E. of Lo Aguirre: Lo Aguirre and Farfana farms of 17,387 and 980 acres, respectively, were secured for (1) their water-rights; (2) control of the intervening space between the two groups of mines; and (3) to avoid liability for damage to farmlands, near the proposed reduction works.

Development: in Lo Aguirre mine, the ore occurs as a disseminated deposit. Work begun in 1914, has developed more than 6,000,000 tons of ore carrying from 1.75 to 3.5% copper. The average of all tunnel samples was 2.44%. The ore is a mixture of sulphide and oxides. It is believed that the orebody contains a much greater tonnage, estimates showing 16,000,000 tons of probable ore, but a little over 6,000,000 is all that was definitely developed at beginning of 1918.

During 1918, eleven holes, aggregating 4,029', were drilled, in addition to 6,900' of underground work; in 1919 work amounted to 8,264' of haulage drifts and raises and in 1920 to 8,121'.

In the African mine the ore occurs entirely as sulphides assaying 3.73% copper.

Development: by 2 vertical shafts, 2,000' apart, to depth of 858' and 423'. Total new work amounted to 3,672' in 1919 and 8,403' in 1920.

Equipment: includes hoisting engines, pumps, compressors and air-drills. Townsites have been established at both mines.

SOUTH AMERICAN METAL CO. OF CHILE**CHILE**

Subsidiary of American Metal Co., which owns entire capitalization.

Office: 61 Broadway, New York.

Ins. June, 1917. Cap. \$250,000.

Company was organized for purpose of conducting a general trading business in South America, especially in Chile. It supervises the mining exploration carried on by the A. M. Co. on that continent, and also purchases copper ore and matte for refining in the U. S.

The copper smelter at Guayacan (q. v.) province of Coquimbo, Chile, is controlled by the S. A. M. Co.

VACAS; COMPANIA MINERA LAS**CHILE**

Address: E. David Pope, care El Nilhue, Chagres, Chile.

Property: the Vacas gold mine with 150 hectares, near the Pupio river, at southern end of the Aconcagua goldfield, between latitude 30° 30' and 32° 00' south; and near the Caruto, Magui, Cueva, and Talco mines. Las Vacas is practically the only gold mine now operating in Chile and has been worked for over 100 years.

Geology: the veins are in unaltered and hard granite and are richest near the contact with andesite dikes that cut and slightly displace them. Pegmatite quartz veins are also common through the granite, sometimes carrying gold which does not persist. The main vein is 3 to 12 meters wide in the upper, and from 5 centimeters to 2 meters in the lower workings. Sulphides exist right from the surface and carry gold in fine-grained friable pyrite, though none is visible to the eye. The ore averages a little less than an ounce per ton.

Development: to a depth of 1,000' or more by incline shaft and cross-cut adit 300 meters long, connecting with shaft at depth of 60 meters. The principal workings are at bottom of the mine.

Equipment: 2 compressors, drills, pumps, geared hoist, and 10-stamp mill with amalgamating plates, classifiers, tube-mill, Dorr thickener, 3 Pachuca agitators. Moore vacuum-filter, and zinc boxes for precipitation of the gold from cyanide solutions. Amalgamation saves 66% of the gold value, but a total recovery of 90% is made.

COLOMBIA

This Republic is best known for its gold and platinum production which comes mainly from alluvial deposits. The annual output averages over \$5,000,000 in gold, about 400,000 oz. silver and 35,000 oz. platinum. The emerald mines are quite famous, and deposits of copper, zinc and lead are also known, but practically undeveloped and unworked.

ANGLO-COLOMBIAN DEVELOPMENT CO., LTD. COLOMBIA

Controlled by South American Gold & Platinum Co., which see.

BREITUNG MINES CORP. OF DELAWARE COLOMBIA

In process of dissolution. Fully described in Volume XIV.

BRITISH PLATINUM & GOLD CORPORATION, LTD. COLOMBIA

Office: 73 Basinghall St., London, E. C. 2, England.

Mine address: Mayolo & Co., local director, Buenaventura, Colombia.

Directors: T. J. Ive, chm.-mng. dir.; J. Mayolo, Walter Conan, and G. H. Short. C. A. Sack, sec. Inder, Henderson & Dixon, cons. engrs.; Johnson, Matthey & Co., technical advisors.

Inc. May 2, 1918, in Great Britain. Cap. £1,000,000, increased Dec. 1919, from £250,000; par £1; 596,788 issued. Company has an interest in **Colombian Proprietary Gold Mines**, and an option on all unissued stock.

Financial statement for year ended July 31, 1921, shows assets: property, £252,520; dredges, equipment and supplies, £158,683; buildings and furniture, £5,823, investments, £133,743; debtors, £6,053; cash, £44,542; platinum, and gold £17,432; development and general expense, £35,936. Liabilities include: capital stock £595,901; reserve account £33,493; credi-

tors, £13,398; P. & L. account, £11,940. Net proceeds from bullion was £22,389 and operating expense, £11,668. A balance of £17,860 was carried forward.

Property:—extensive tracts of placer ground in the Choco district of Colombia, acquired from the **Consolidated Columbia Platinum & Gold Mines, Ltd.**, and from Messrs. **Pugliese, Frigerio & Mayolo**, also the entire assets and rights of the **Paris (Transvaal) Gold Mines, Ltd.**

Lands include: (1) at Bolivar and Colonia, 2,560 acres of gold-bearing ground, 50 miles S. of Buenaventura, said to contain enough pay-gravel to supply several dredges.

(2) **Cimarronas**, 7,680 acres have been prospected by 40 shafts and 152 bore holes and contain 2,156,000 cu. yd. of an average value of 13.12 pence per cu. yd., or £117,909, figuring platinum at £12 per ounce.

(3) **Opogodo** ten square miles, of which 2½ miles are estimated to contain 4,181,000 cu. yd. of 25.78d. (61.56c.) to 36.76d. (73.52c.) of dredgable ground, and 60,000,000 yd. of hydraulicking ground worth 10.3d. (20.6c.) per yd. Proportions of precious metals are 25% and 75% platinum. Net value of proved area is £1,703,145.

Equipment: consists of 2 dredges of 60,000 yd. monthly capacity each; motor launch and 2 steel cargo-boats.

Production: from Opogodo flat by dredge No. 1 from Jan. 15 to July 31, 1921, 1,516 oz. platinum and 446 oz. gold, from 177,000 cu yd. The gross return was 36.32d. per yard, at cost of 9.97d. per yd. From July 31, to Nov. 5, production was 582 oz. platinum and 176 oz. gold. Dredge No. 2 was to be operating by May, 1922. Up to end of fiscal year 1921, tributors produced 273 oz. platinum.

CHICAGO; LA MINA

COLOMBIA

Address: via Nechi or Zaragoza, Guamoco district, Colombia.

Property: gold-lead-zinc mine in Guamoco district. Ore is a heavy iron sulphide containing gold, the ore varying from \$30 to \$40 per ton. Plant includes water power, crusher, Hardinge mill, and counter-current decantation system of cyanidation. No figures of production available.

CHOCO PLATINUM PLACERS, INC.

COLOMBIA

Address: Andacoya, Colombia, John M. Relph, gen. mgr.

Inc. 1921, in Delaware. **Cap.** \$600,000; par \$1; fully paid. National Security Co., New York, registrar and transfer agent.

Property: mining rights for 20 years on Le Soledad tract 400 acres, in the Intendencia de Choco, covering 1½ miles along the San Juan river, and said to have 2½ to 3' of gravel carrying ½ oz. recoverable platinum per cu. yd. Total recoverable value estimated to be \$5,000,000. It is proposed to work the deposit by the drift method.

COLOMBIA CORPORATION, LIMITED

COLOMBIA

Office: Henry Richards, sec. 341 Salisbury House, London Wall, London, E. C. 2, England. W. A. Prichard, gen. mgr., Medellin, Colombia.

Directors: Fred'k W. Baker, chm.; John A. Agnew, F. D. Behrend, Lord Bradbourne, A. Stanley Elmore and H. C. Porter; the same as Oroville Dredging.

Inc. Sept. 30, 1919, by the Oroville Dredging Co. to acquire the Constancia mine for \$180,000. **Cap.** £510,000; £1 par. Half of shares are ordinary, and were allotted to Oroville Dredging as the purchase price, the other half are preference shares, entitling holders to half of the profits until a 100% dividend has been paid and 12½% thereafter; up to Dec. 1, 1921, 25% only had been paid on Pfd. shares.

Balance sheet, Dec. 31, 1920, shows assets total, £423,543 of which £72,065 is current; liabilities include loan from Nechi Mines, Ltd., £100,212 and current £4,583. On Nov. 24, 1921, cash bullion and accounts receivable amounted to £23,377; loan and accounts payable, £128,347.

Property: the Constancia mine near Anori, Province of Antioquia, 50 miles S. W. of the Pato (q. v.) dredging area, has 2 parallel quartz lodes of

the California type, each about 6' wide and opened for length of 2,400' out of 16,000 owned. The formation is mica schist cut by granite and diorite dikes; ore is quartz containing pyrite and chalcopyrite, and carries up to ½ oz. in gold. The mine has been worked for 140 years, and from 1914 to 1918 produced 46,000 tons of ore worth \$311,000 under former ownership.

Development: by shaft and open cuts to 300' depth under former owners; much of ground is exhausted down to the Tobon level. During 1919 and 1920, the Tortaro and Constancia (main) shafts were retimbered, a new (4th) level was opened, on adit driven to drain open cuts, and workings generally put into condition. New work amounted to 794', and the large ore shoot found above was opened on 3rd level. Ore reserves are estimated to be 300,000 tons of \$6 to \$8 ore and 70,000 tons of probable ore averaging \$8 to \$10.

Equipment: includes an old one-stamp mill with cyanide unit, new hoist, 450 to 550-h. p. hydro electric plant with Pelton wheel and 29,500' ditch, necessary buildings and 4½ mile motor road to Dos Bocas. A 300-ton mill is to be erected by about Jan. 1, 1923.

Production: in 1920, 11,617 tons of ore yielding \$4.08 by amalgamation and concentration. Concentrates are to be stored for treatment by new mill.

Options secured and other properties have been released.

COLOMBIAN MINING & EXPLORATION CO., LTD COLOMBIA
Office: H. S. Parnum, sec., 10 Throgmorton Ave., London, E. C. 2, England.

F. B. Powell, mgr., Marmato Mines, Medellin, Colombia, S. A.

Directors: Francis Allen, chm., with H. Lovegrove, R. F. W. Hodge, E. L. Heinemann, N. L. Jenks and G. E. Sully.

Inc. Feb. 1908, in Great Britain. **Cap.** £550,000; increased in 1920 to £1,000,000; £1 par; 800,000 shares issued.

Debentures: £50,000 6% 7-year, redeemable at £105; outstanding Dec. 31, 1919, £10,700.

Financial report for 6 years and 3 months ending June 30, 1920, showed, cash, £818; bullion in transit, £7,373; debtors, £4,736; total development and general expenditures, £195,787; liabilities include loans, £11,325, loans and interest, £30,345; creditors, £23,582; bills payable, £4,000.

Property: a 40-year Government lease acquired from the C. W. Syndicate, Ltd., on 900 sq. miles in the Supia and Marmato districts of Colombia, at an annual rental of £3,200.

Reserves at Marmata were estimated by F. B. Powell at 509,080 tons of 40s. 6d. (\$11.60) ore, plus 314,400 tons of 24s ore as stope filling. The gold is associated with marcasite and treatment may be troublesome.

Equipment: includes 40-stamp mill, tube-mills and cyanide plant. With 80% recovery. The first 3,000 ton unit of a new 10,000 ton mill was to be completed early in 1922.

Company also owns rights over oil-bearing properties and has organized the Colombian Oilfields, Ltd., to develop these holdings. The San Antonio M. & S. Co., Ltd., was organized to develop the silver mines on Marmato mill.

COLOMBIAN PROPRIETARY GOLD MINES, LTD. COLOMBIA

Controlled by British Platinum & Gold Corp.

Office: 73 Basinghall St., London, E. C. 2, England.

Directors: T. J. Ive, chm., G. H. Short, S. T. Cohn and H. J. Eder. The Portal Trust & Agency, Ltd., sec.

Inder, Henderson & Dixon, cons. engrs.

Formed in 1921. **Cap.** £200,000; par £1; 30,000 treasury shares. Working capital provided by sale of 60,000 shares at par.

Property: a gold bearing gravel area of 40 square miles in 12 claims, about 26,000 acres on the Liantin river, 70 miles S. of Buenaventura, formerly owned by Cia. Minera de Santa Rosa. A dredge with capacity

of 60,000 cu. yd. per month has been purchased for £40,000.

CONS. COL. PLATINUM & GOLD MINES, LTD **COLOMBIA**

Property: acquired in May, 1918, by British Platinum & Gold Corporation, which see.

FRONTINO & BOLIVIA (S. A.) GOLD M. CO., LTD. COLOMBIA

Office: J. J. Truran, sec., 184 Gresham House, London, E. C. 2, England.
Mine office: La Salada, Colombia.

Directors: S. W. Stephens, chairman; T. H. Alexander, Sir H. P. Harris, Hon H. O'Neill, and R. C. Lyall. J. Reed, supt.; Pellew-Harveys & Co., cons. engrs.

Inc. July 18, 1911. Cap. £200,000; par £1; in 23,390 pice. shares, all issued and 176,610 ord., 140,000 issued. Debentures amount to £39,134 10%, redeemable in 1926.

Report for year ended June 30, 1921, shows income from ore sales, £104,721, expenditures at mine £78,778; profit, £16,919. Balance carried forward, £27,014. Current assets, £95,325; current liabilities, £19,476.

Dividends: regular on preference shares and 10% on ordinary in 1915; 10% in 1916; 10% in 1917; 5% in 1918; 7½% in 1919; 10% in 1920; 5% in Jan. 1921; 2¼% in Jan. 1922.

Property: mining rights over 12 sq. miles and surface rights over 40 sq. miles in Colombia, S. A. At the Silencio mine, the main producer, recent development has been on the 11th to 17th levels. During fiscal year ended June 30, 1921 new work amounted to 2,697' compared with 4,313' in 1920. Although there was a decrease of about \$6 per ton in 1921 as compared with 1920, the ore width was increased by 5". During 5 months after June 1921 the value of ore mined was about \$20 per ton. Company also owns an interest in the **Marmajito Mines, Ltd.**, owning adjacent properties. About 850 men employed.

Ore reserves, June, 1916, were estimated at 42,200 tons; in 1918, at 58,500 tons, worth \$18 per ton; in 1919 at 56,100 tons of \$17 ore; in 1921, 53,200 tons of \$16 ore. In July 1920, the Marmajito company reopened its properties.

Equipment: includes hydro-electric and steam plants; 2 compressors, pumps, etc. Ore is treated by a combination of sorting stamp mills, concentrators; pan amalgamation and cyanide, 10-stamp mill and cyanide plant.

Production, years ending June 30:

Year	Ore, tons	Gold, Oz.	Year	Ore, tons	Gold, Oz.
1915.....	25,971	26,938	1919.....	29,020	23,958
1916.....	25,484	22,358	1920.....	29,760	25,815
1917.....	23,642	20,653	1921.....	29,420	21,910
1918.....	27,855	23,895			

In 1921 there was also produced 15,631 oz. silver compared with 17,197 oz. in 1920.

LIBERTAD, LA MINA

COLOMBIA

Address: via Nechi, or Zaragoza, Guamoco district, Colombia.

Property: a gold mine in the Guamoco district, which has been profitably operated for over 8 years on a series of rich pockets occurring in quartz vein 2' to 12' wide. Ore is free-milling, and is treated in a 10-stamp mill with concentrator and cyanide plant.

MAMMOTH GOLD, SILVER & PLATINUM MINES COLOMBIA

Controlled by Assets Realizing Corporation of California which owns 60% of share capital and is itself a subsidiary of the Dupont Copper Co. whose address is 10 E. 43rd. St., New York City.

Address: J. V. Priest, 812 Merchants' National Bank Bldg., Los Angeles, Cal.

Property: in Department of Bolivar, is a concession of about 48,000 acres with extensive placer holdings as well as quartz veins. Extensive

sampling shows that the placer properties carry between \$2 and \$3 per yd. in gold, with some platinum. This property was carefully examined in 1919, and full equipment taken in to work the gravel, using hydraulic elevators. Other assets on the property include rubber trees, vegetable ivory, mahogany, and Peruvian bark. There is also a surface seepage of oil on a part of the property.

MARMAJITO MINES, LTD.**COLOMBIA**

A subsidiary of Frontino and Bolivia (S. A.) G. M. Co., Ltd., which see. **NECHI MINES (COLOMBIA), LTD.** **COLOMBIA**

Controlled by Oroville Dredging Co., Ltd., and Pato Mines, Ltd.

Office: Henry Richards, 341 Salisbury House, London Wall, E. C. 2, England.

Directors and officers: F. W. Baker, chm.; F. D. Behrend, A. S. Elmore, J. A. Agnew, and H. C. Porter. W. A. Pritchard, mgr.

Inc. Feb. 5, 1914, in Great Britain. **Cap.** £140,000, in 140,000 pfee. and 140,000 ord. 10s shares, all issued.

Financial results, years ending Sept. 30:

Year	Revenue	Profit	Cur. Assets	Cur. Liab.	Dividends
1920....	£198,462	£140,003	£198,133	£28,441	£ 49,000

Property: in Colombia, S. A.

OROVILLE DREDGING CO., LTD.**COLOMBIA**

Office: H. Richards, sec., 341 Salisbury House, London Wall, London, E. C., England.

Directors: F. W. Baker, chairman, F. D. Behrend, Lord Brabourne, A. S. Elmore, J. A. Agnew and H. C. Porter.

Inc. June, 1905, in Great Britain. **Cap** £700,000; £1 par; 686,538 issued. Acquired holdings of **Oroville Dredging Co.** of Calif. which is now in liquidation.

Report for year ended Sept. 30, 1920, shows—Assets: investments, £715,000; debtors, £7,911; war bonds, £24,595; Victory bonds, £8,523; cash £16,939. Liabilities include, capital stock, £686,538; outstanding

dividends, £11,254; creditors, £13,371; reserves, £19,008; profit and loss, balance, £42,797, after deducting dividends, £94,398.

Total income was £118,770, of which £116,534 represented dividends from subsidiary companies, and expenditures, £6,941, leaving balance forward, £111,829.

Dividends: 6d Dec., 1919; 9d March, June, Sept., 1920; 4s in 1921; 9d March, 1922.

Company is a holding corporation and controls the following companies—

Nechi Mines (Colombia) Ltd., 125,993 ord. sh. 10/par (£28,348); **Pato Mines (Col.) Ltd.**, 89,021 sh. £1 par, dividends £88,186; **Colombian Corp'n Ltd.**, 255,000 ord. sh. £1 par, 7pfd. sh. £1 each 5/pd.; **Natl. Mng. Corp'n Ltd.**, 19,291 sh. £1 each 10/pd.

See descriptions under individual titles.

PARIS (TRANSVAAL) GOLD MINES, LTD. COLOMBIA

Liquidated in 1920 and holdings acquired by **British Platinum and Gold Corp'n., Ltd.**, which see.

PATO MINES (COLOMBIA), LTD. COLOMBIA

Subsidiary of Oroville Dredging Co., Ltd.

Office: Henry Richards, sec., 341 Salisbury House, London Wall, London, E. C., England. **Mine office:** Apartado 104, Barranquilla, Colombia.

Directors: Fred W. Baker, chairman; F. D. Behrend, H. S. Derby, A. Stanley Elmore, J. A. R. Agnew, and H. C. Porter. W. A. Prichard, supt.

Inc. Oct. 5, 1909. **Cap.** £100,000; shares £1 par; all outstanding: 89,021 shares owned by Oroville Dredging Co. The Pato Co. owns 14,000 shares of Nechi Mines, Ltd.

Financial Statement, years ending Sept. 30:

	Net Profit	Balance	Dividends
1920.....	£98,759	£188,234	£105,000
1919.....	29,724	195,475

Dividends: 50% in 1919; 70% in 1920; 35% in 1919-20 (Dec.)

Property: 40,000 acres of gold gravel ground on the Nechi river, six miles from Zaragoza, Department of Antioquia. At last estimates, in 1913, 448 acres contained 19,092,650 cu. yd. averaging 29.1c per yd. to depth of 26.4'. Since then about 8,000,000 yd. has been dredged. The depth averages 31'.

Geology: the properties lie in an oval basin cut through by the Nechi river and surrounded by crystalline rocks: within the basin are flat tables of bedded gravel with red or blue clay strata that contain beds of peat or brown coal.

Equipment: includes hydro-electric power plant, and 8½ cu. ft. dredge, ice plant, and repair shops.

Production:

Year	Yardage	Yield	Per Yd., c.	Cost, c.
1920.....	1,437,600	\$526,267	36.60	8.92

Directors: H. March, E. Cousens, M. A. Remson and J. Hegan-McGarry.

Inc. Nov. 12, 1919, in Great Britain. **Cap.** £25,000; in 20,000 7% pfd.

shares, £1 par, and 100,000 deferred shares, 1s par; 4,227 preferred and 96,000 def. issued.

The preferred shares receive all profits until they have had dividends totaling 100%.

Balance sheet of Dec. 31, 1920, shows cash £4, debtors £100. Preliminary expenses £500, general expense £2,462, creditors, £4,181.

Property: option from J. Hegan McGarry on 200 sq. miles of gold and platinum bearing ground in Choco district, Colombia, S. A., for which company paid £5,000 cash and £5,000 in 100,000 fully paid deferred shares of 1s each.

SAN ANTONIA M. & S. CO.

COLOMBIA

A subsidiary of Colombia Mng. & Exploration Co., Ltd., which see. **SOUTH AMERICAN GOLD & PLATINUM CO.** COLOMBIA

Office: 61 Broadway, New York. **Mine address:** Andogoya, Colombia.

Officers: Adolph Lewisohn, pres.; Frederick and Sam A. Lewisohn, and E. H. Westlake, v. p.'s; F. M. Loper, sec.-treas., with James McDougall, A. F. Keene, J. H. Susmann, Walter Lewisohn, C. W. Stones, and I. Parke Channing, directors. N. C. Marshall, res. mgr.

Inc. Oct. 11, 1916, in Delaware. **Cap.** \$10,000,000; \$5 par; 1,800,000 issued, of which 1,466,018 are in escrow. Bankers Trust Co., registrar; Central Union Trust Co., transfer agent. Listed on New York Curb. Preferred stock was cancelled in 1919. Price range 1919-20-21, 14½ high, 3 low.

Bonds: \$500,000; 7%, 10-years cumulative convertible income notes due 1926.

Company operates through a subsidiary (Compana Min. Choco Pacifico) Most of the shares are owned or controlled by Lewisohn Brothers, General Development Co., Consolidated Gold Fields of South Africa, Gold Fields American Development Co., and Johnson, Matthey & Co. of London.

Property: (1) about 10,000 acres, and (2) 50 miles of river beds and banks in the Intendencia of de Choco accessible from the San Juan river. Exceptional quantities of platinum and gold are said to be available; the ground so far prospected running as high as \$6 per cu. yd., and averaging about \$1.40.

Equipment: includes 3 steel dredges with monthly capacities of 40,000, 100,000 and 125,000 cu. yd. respectively; No. 2. began operating, Jan., 1921, and No. 3 in spring of 1922. With 3 dredges working, it is estimated cost will be 16c. per yard.

Production:

Year	Gold, oz.	Platinum, oz.	Value
1921.....	4,501	14,053	\$1,100,000*
1920.....	1,520	6,967	800,000*
1919.....	972	6,349	700,000
1918.....	702	6,184	565,000

* Estimated.

DUTCH GUIANA

GUIANA DEVELOPMENT CO.

DUTCH GUIANA

Office: care T. T. Wilson, 120 Broadway, New York City.

Property: placer ground on the Maroni river, in Dutch Guiana.

Equipment: includes a 7-cu. ft. dredge, erected in 1920.

ECUADOR

Ecuador has only a small gold production, and although deposits of other metals are known, there are no operating mines. The total production of gold has in recent years averaged about \$800,000 annually, coming mainly from the veins of the Zaruma district, in the southern part of the country.

Inc. Dec. 10, 1903, in Great Britain. **Cap.** £140,000; £1 par; all issued.

Financial statement for year ended Dec. 31, 1920 shows an operating loss of 325,075 francs compared with profit of 858,699 francs for 1919. Loss deducted from share premium account leaves balance of that account, 1,619,263 francs. Reserve fund 424,076 francs.

Dividends: 169% from 1905 to 1917, inclusive, 27% being paid in 1917; 25% in 1918; 23% in 1919.

In 1915, absorbed the Peruvian Mining Trust Ltd. paying £16,100 in fully paid shares, and acquiring its silver mining property.

Property: the silver mine at Ticapampa, province of Huaras, Peru, formerly worked by the Com. Min. de Ticapampa for which company paid £1,800 cash and £70,000 in fully paid £1 shares.

Equipment: mining and milling machinery, and 100 km. railway.

Production: 374,400 oz. silver in 1916; 591,100 in 1917; 570,755 oz. in 1918; 352,165 oz. in 1919.

BACKUS Y JOHNSTON DEL PERU; SOC. MIN.

PERU

(Subsidiary of Cerro de Pasco Corp'n.)

Main office: 134 Plateros de San Pedro, Lima, Peru.

N. B. Roper, gen. mgr., Casapalca, Peru; W. B. Donoghue, smelter supt.; J. D. Campbell, supt., Casapalca Mines.

Officers: A. J. Bennett, pres.; T. P. Jones, v. p.; with D. C. Babbitt, H. S. Hunter, and N. B. Roper, directors.

Inc. May 1, 1917, in Peru. **Cap.** £300,000; shares £1 par, fully paid. Company purchased practically entire holdings of the Backus & Johnston Co., a New Jersey corporation, fully described Vol. XI.

Cerro de Pasco Corp., which had held an one-half interest in the Natividad mine, is reported to own a very large interest in Backus Y Johnston.

Property: consists of several large groups of copper-silver mines in the Morococha and Casapalca districts, Peru.

Casapalca Mines: the principal mines in this district are the Carlos Francisco, Upper and Lower, the Cuarenta, Coiina, Aguas Calientes and Chuquichucho. The first named is developed by an adit, equipped with electric haulage, about 5,000' long, which cuts the vein at a depth of about 2,500' below the outcrop. The vein is being worked along a length of 7,500' from the adit level, and from adits about 1,200' and higher above the main adit. The output of the Casapalca mines is about 4,000 tons monthly averaging 2% copper and 40 oz. silver per ton including concentrates.

Morococha Mines: the company relies principally upon the Morococha district for its copper ores, the chief sources of supply being the Huilca, Natividad, Churruca, Isabel, Alicia, Favorita, Alapampa, Ombla, San Luis, Pacchapata, La Vieja, Manuelita and the mines of the Cia. Santa Clara, Cia. Minera de Pesares and of the Cia. La Blanca. All of these mines are operated by the company either on account of ownership, by partnership arrangement or on lease.

The Natividad, the deepest shaft of the district, is 500' below the drainage tunnel level—a total of 1,000'. To provide for the deeper development of this and other mines of the district, a large central shaft is being sunk to a depth of 500' below the level of the drainage tunnels and a pumping plant capable of handling 10,000 gallons per minute will be installed. The ore from the Morococha district is transported to the smelter, 32 kilometers distant, over the Peruvian Central Railway, which has a branch line 14 kilometers long running from Ticlio on the main line to Morococha.

Smelter: the smelter and concentrating plants are situated at Casapalca on the main line of the Peruvian Central Railway, 154 kilometers from the port of Callao, at an altitude of 13,700'. The company is operating at pres-

ent two of its three furnaces and four 96"x150" horizontal barrel type basic converters. The sintering plant consists of 20 roasting pots of 10 tons daily capacity each, and of three Dwight-Lloyd sintering machines. The smelter handles a considerable quantity of custom ore.

Concentrating plant: the concentrator rebuilt in 1921 contains a primary washing and picking plant, in which the ore from the Casapalca mines is first screened and washed and then hand-picked to remove waste and high-grade ore, the intermediate product going to the mill proper. The fines from the washer go direct to the smelter. The concentrating mill contains: one No. 5 gyratory crusher, one 36" Symons disc crusher, two 6' ball mills, one 4½' Hardinge regrinding ball mill, eight shaking screens, one 6' Dorr Classifier, six Butchart sand tables, four Deister fine sand tables, and seven Deister slime tables. Primary slime is thickened in two 30-ft. Dorr thickeners and treated by flotation in 9 K. & K. machines. Flotation concentrates are dried in leaf filters built at the plant.

The main power plant, situated on the Rio Rimac, 4 miles below the smelter contains two 800-k. w. generators driven by Pelton wheels, transmission being at 10,000 volts. At the smelter there are two 150- k. w. and one 125-kw. generators, also driven by Pelton wheels. Air is furnished as follows: for the furnaces, by one 118-cu. ft. and two 200-cu. ft. Connersville blowers, both driven by Pelton wheels, and by one motor-driven turbo-blower of 24,000 cu. ft. capacity; or the sintering pots, by 3 small rotary blowers of the Connersville type; for the converters, by a 14,000 cu. ft. Nordberg blowing engine, direct-driven by a synchronous motor; for the Casapalca mines, by 3 motor-driven air compressors with a combined capacity of 5,000 cu. ft. free air per minute. A 500-ton sampling mill and 16-oven coking plant were erected in 1919.

Production:

CAYLLOMA; CONSOLIDADA SOC. ESPLOTADORA DE PERU

Office: Casilla 178, Valparaiso, Chile.

Officers: G. C. Kenrick, pres.; H. A. Barker, mgr.; L. J. Rosenshine, mill supt.

Inc. 1906, in Chile. Cap. £125,000; shares 5 shillings par. Gross sales of products in 1917 were £34,142.

Property: 500 acres in Province of Caylloma, Arequipa, Peru. The outcrop of vein now worked is over 13,000' long. Company took over property originally worked by the **Caylloma Silver Mining Co.**, formed in London in 1889. The first silver mines of the district were worked by Spaniards in 1630, and prior to that time by the Incas.

The mines, which are at 16,500' elevation, show andesite cut by quartz-rhodonite veins carrying rich silver minerals, together with galena and chalcopryite. The ores of milling grade average 20 oz. silver per ton, the sorted ore 100 to 300 oz. silver per ton, with some gold.

Development: by 6,000' drainage tunnel tapping center of ore deposit.

Equipment: includes 80-ton treatment plant with 12 Nissen stamps, Deister tables, and cyanide works. Plant was reconstructed in 1919.

Production: the monthly output averages 110 tons of concentrate assaying 6 to 9 kg. (190 to 280 oz.) silver, with gold and lead. Cost of mining is \$8; milling, \$5; and total, \$20 per ton of ore mined.

CERRO DE PASCO COPPER CORPORATION**PERU**

Office: 15 Broad St., New York.

Officers: L. T. Haggin, pres.; Edward H. Clark, v. p.; with Ogden Mills, J. H. Harding, A. J. Bennett, Charles Steele, Allan McCulloh, directors. C. V. Drew, 2nd v. p.-purch. agent; H. Esk Moller, sec.-treas. W. J. Hamilton, gen. mgr., Lima, Peru.

Inc. Oct. 28, 1915, in New York, succeeding the Cerro de Pasco Copper Investment Co. Cap. 1,000,000 shares, without par value; 898,229 issued. Annual meeting second Wednesday in May. Columbia Trust Co., New York City, transfer agent; Bankers Trust Co., registrar. Listed on New York Stock Exchange. Shares were \$67½ high and \$31 low in 1919. In 1920 the high was \$61¾, and low \$25; in 1921, range was \$36½ to \$23.

Bonds: \$8,000,000, ten-year, convertible, 8% gold bonds issued in Jan., 1921, to pay for the new smelter, etc. An annual sinking fund, 20% of net earnings, to be set aside for their redemption; \$140,000 of bonds were called Jan. 1922. Bonds (at \$105) may be exchanged for stock at any time at \$33¾ per share.

Company owns \$2,850,000 of the \$3,000,000 capital of the Cerro de Pasco Railway Co. In 1917 the Cerro de Pasco Mng. Co. and Morococha Mining Co. were dissolved, and their assets and liabilities were transferred to this corporation.

Cerro de Pasco owns also a stock interest in the American Metal Co. and in the Soc. Minera Backus Y Johnston del Peru, which see.

Financial Statement: years ended December 31;

Freight and passenger earnings	1,173,035
Inventory Dec. 31.	4,357,183
Total	23,282,391

Inventory Dec. 31, 1920	7,009,177
Operating expenses, etc.	9,946,053
Custom ores	2,808,739
United States and foreign taxes	477,964
Interest on bonds	635,570
Balance	2,404,889
Dividends	449,115
Surplus	1,955,774
Profit and loss surplus	40,336

Dividends: initial of \$1 March, 1916, and \$3 in that year; \$4 in 1919; \$4 in 1920; 50 cents March, 1921; none since.

Property: at Cerro de Pasco consists of about 400 acres of land that includes three-fourths of the rich Cerro de Pasco district, with a smelter site and extensive coal tracts north of Cerro de Pasco.

Cerro de Pasco lies 14,300' above sea level, rendering physical labor very fatiguing. The population of the town is about 6,000 of whom only a small percentage are white. The region is bleak and all food and supplies must be brought in from considerable distances. The year has but two periods, the wet and dry, the former from November to April. Both are said to be bleak and exceedingly disagreeable. Snow and hail fall at any time, summer or winter, but rarely remain on the ground as long as 48 hours even in winter. The fluctuation between mean summer and winter temperature is about 20° F. only, less than the daily variation.

Silver was discovered at Cerro de Pasco in 1630, and the mines produced to the close of the nineteenth century about 450,000,000 oz., from 40,000,000 tons of silver and copper ore, nearly all extracted by hand-work and carried 3 to 6 miles on the backs of llamas, to primitive smelters, whence the silver bullion was transported by llamas 200 miles to Lima, until 1870, when a railroad was completed to Oroya. Formerly only the copper ores of 25 to 40% were shipped.

Geology: the ore deposits occur in rhyolite agglomerates and tuff, forming the western part of a body of rhyolite $1\frac{3}{4}$ miles across, that is intrusive in, and surrounded by limestone. Over an area a mile wide and nearly 2 miles long, nearly every claim carries ore. The orebodies outcrop prominently as crestones, or ridges and carry gold, silver, copper, lead, zinc and cobalt. The oxidized zone carries considerable gold, running as high as 1 to 2 oz. per ton, occurring in rich but erratic shoots. The high silver values usually extend to about 100' depth only, occasionally running up to thousands of ounces per ton, followed by rich silver-copper ores, which in turn at a little greater depth, are succeeded by ore low in silver but richer in copper, the copper ores being estimated to have averaged 15 to 30 oz. per ton in the old workings. Primary ores below the water level contain bornite and chalcopyrite, associated with pyrite, tetrahedrite, arsenopyrite and sphalerite, containing little silver and only traces of gold. There are occasional veins of high-grade silver-lead ores, with others carrying up to 8% zinc; practically all the copper ores are bismuthiferous, hence refractory in reduction. The ores carry about 35% silica and 14 to 30% iron, the excess of silica requiring considerable limestone for fluxing.

Development: the Cerro company is working its orebodies through 5 shafts to a depth of 800'. The surface of the property shows scores of tajos, big pits resulting from the caving in of old open cast workings, some of these being 300' deep. The property lies in a basin, and the mines are very wet, especially below a depth of 400'. The Rumiallana drainage tunnel, begun April, 1877, by Henry Meigs, was completed 1907, by the Compania Empresa Socavonera del Cerro de Pasco, with which a financial arrangement was made, through a 5% stock interest given in the Cerro de Pasco Copper Co. obviating the payment of a 20% royalty.

The present company disregarded old workings and opened a new mine,

by 2 tunnels, of about 2 miles length each, and 5 new shafts. The Diamante, Pena Blanca, Carmen and Noruega 2-compartment shafts have 4 levels opened and are bottomed at 410'. The Excelsior shaft is 800' deep with levels 100' apart and serves the entire mine. Waste is used for filling, timber being very expensive, and used only for lining shafts and timbering important tunnels. The mines are equipped with powerful pumps. Reserves of ore blocked out are said to be kept 4 years ahead of smelter consumption, these including first-grade ore of 8 to 10% copper tenor, with good silver values, and second-grade ore, of uncertain copper tenor, though probably workable in the main.

According to M. R. Walker, the Rumiallana drainage tunnel is a working level, 30' below the 400' level. Shrinkage, square set, and cut and fill methods are employed. Reserves averaging 5% copper, were estimated in 1918 as sufficient for 20 years. All hoists are electric. Coal and oil-fired boilers are available. A total of 1,600 h. p. is used at the mines. Electric locomotives run on the main haulage levels, pulling six 22-cu. ft. ore cars; new cars are to be 40 cu. ft.

Additional to the tonnage of available copper ore there is estimated to be over 100,000,000 tons of oxidized silver ore assaying from 8 to 18 oz. per ton. Of this, 18,800,000 tons are blocked out, and contain a total of 200,000,000 oz. of silver.

A new main hydro-electric power plant at Oroya, is supplied by water from the Yauli river through a 4,700' pipe line. Twin water wheels, of 5,000-h. p. at 300 r. p. m. each, operate under a 700' head, and drive 4 generator units with total capacity of 15,000 kva., delivering a 2,300 volt current to 9 transformers, where it is raised to 55,000 volts for use at the mines. Morococha concentrator, smelter and collieries.

Reduction works: at La Fundicion, near Tinahuarea, 9 miles from the mines, are connected therewith by rail. All buildings are of steel frames, covered with corrugated iron. The plant treats a small quantity of custom ores and has a sampling mill with crushers, rolls and chain-bucket elevators. The works are terraced throughout, permitting the handling of material by gravity and are built on the unit plan.

The furnace building has twelve 2,000-ton flat-bottomed steel ore bins, filled from railroad tracks above, and loading into charging cars run along side, that are drawn by small locomotives on a narrow-gauge track running on either side of each furnace, 2 cars constituting a charge. There are five 56"x180" water-jacketed blast-furnaces of about 300 tons actual daily capacity each. Slag is granulated by running water. The smelter building has a steel stack, 220' high and 20' in diameter. There are three 60' reverberatory furnaces, fourteen 18' six-hearth McDougal calcining furnaces and 6 Dwight-Lloyd sintering machines.

Pulverized coal is burned in all furnaces. The process was described in the June, 1920, Min. & Met. of the A. I. M. & M. E. by C. L. McIntyre.

The converter department, in a separate building, has 4 Pierce-Smith basic lined converters. Product of the converter is 99% blister copper, in cakes, shipped to Baltimore for refining.

The Fundicion smelter is old, antiquated and built at too high an elevation, owing to rarity of atmosphere. It will be superseded in 1923 by a new plant, erected near Oroya, the junction point of the Cerro de Pasco Railway and the Central Railway of Peru. This site, some 2,000' lower than the present smelter, is much nearer to both the Morococha mines and to the port of Callao from which bullion is shipped and where supplies and construction material are received. Smelter will embody the most modern and approved ideas. One unit reported to be in operation and plant is to be completed some time in 1923 at cost of \$9,000,000, with total capacity of 2,500 tons of ore per day.

The **Morococha property:** includes the Gertrudis, San Francisco and

pany also owns the Natividad mine through the pany, now a subsidiary of Cerro de Pasco.

opened 1897, on the Cerro San Marcello, west of 3 limestone beds with ore impregnations follow- vein has strike of N. 51° E. and nearly vertical 2 meters in width, with a paystreak of 60 cm. to 1 upper and chalcopyrite averaging about 14% copper per metric ton, balance of vein carrying about 1 silver per metric ton. The mine is developed by level of Lake Morococha, mining through winzes ts in the hanging. Ore is hand-cobbed at the portal

is opened to about 300 meters depth, developing rrying ore averaging 14% copper and 14 to 70 oz. tunnel, planned to be 750 meters long, is being rkings.

uel is developed by the Copaycocha and Vulcano 100 meters length, and ore is mainly enargite, with nnantite, associated with pyrite. Mine was opened oduced 6,476,400 kg. fine copper and 10,794 kg. fine ing about 20% copper and 333 grams silver per

is opened by a 4,000' tunnel, known as the Carlos ion is approximately 20,000,000 lb. per year, smelted orks.

main line of 83 miles, running from Cerro de Pasco ction is made with the Central Railway of Peru, niles to Callao, the latter line being one of the most aiving cost \$43,000,000 and gaining nearly 3 miles ng the highest altitude of any railroad on the globe, le of 2.5%, with no less than 37 tunnels, including ne kilometer length which cuts through a ridge of le Pasco railway has a branch to the coal fields, and, s and yards, has about 135 miles of standard- 0-lb. rails. The main line has an average grade of grade of 3%, and cost upward of \$2,000,000 Equip- tives, in addition to 6 light switching engines at the re and coal gondolas, with a total of 247 forty-ton g of the best American manufacture. The railroad

oys about 2,200 men at the copper mines, 1,500 men the Goyllarisquisca coal mine, 400 at the Vincuscan-) at the Quishuarcancha coal mine.

striking workmen at the Morococha dynamited the oding of lower levels, and American employees had

37 lb. copper in 1906; 20,258,689 lb. in 1907; 23,646,921 lb. in 1909; 31,713,012 lb. in 1910; 48,600,926 lb. in 1912; 43,856,000 lb. in 1913; 40,753,000 lb. in 1914; 1,452,000 lb. in 1916; 72,650,000 lb. in 1917; 71,910,000

lb. in 1918; 58,124,000 lb. in 1919; 50,004,104 lb. in 1920; 56,294,000 lb. in 1921. Silver and gold output were 4,347,247 oz. and 26,382 oz. respectively, in 1920. The total output for 13 years ending Dec. 31, 1920, was 660,779,611 lb. copper, 45,904,700 oz. silver, and 292,825 oz. gold.

Copper is refined and marketed by the American Metal Co., Ltd.

The Cerro de Pasco has been a costly undertaking, the total investment to date being \$25,000,000. The ores are refractory and the great altitude of the old smelter, which is 14,300' above sea-level, coupled with inefficient native labor, have given rise to an exceedingly complex and tiresome problem in ore reduction. The labor however is cheap, and this, together with the high silver content of the ore, places the company among the world's lowest cost copper producers. With its new reduction plants, Cerro de Pasco is in position to substantially increase its production, and to make substantial profits.

CERRO DE PASCO EXTENSION, INC.

PERU

Name changed to Peruvian Copper and Smelting Co., which see.

CERRO VERDE MINE

PERU

Address: Carlos J. Lohman, owner, Arequipa, Peru.

Mine address: J. A. Gibbons, mgr., Arequipa, Peru.

Property: 244 pertenencias, about 20 miles S. E. of Arequipa, 9 miles by automobile road from railway at Taibaya. Elevation of mine is 8,800'.

Geology: copper occurs in a disseminated deposit in rhyolite, near a contact with porphyritic diorite. Two irregular masses of granodiorite divide the rhyolite mass. An oxidized zone about 220' deep has silicates and carbonates; these pass downward into secondary sulphides changing at 320 to 450' in depth to primary sulphides.

Development: property is being thoroughly prospected by churn-drilling and by underground work from a 430' shaft. Work on the 250' level totals 3,000'. The deposit is said to contain more than 10,000,000 tons that average between 2 and 2½% copper.

FERNANDINI, E. E.

PERU

FERROBAMBA, LTD.

PERU

Office: F. F. Fuller, sec., 638 Salisbury House, London, E. C., Eng.

Operating office: Arequipa, Peru. **Mine office:** Ferrobamba, Catobambos, Apurimac, Peru.

Directors: A. C. Burrage, chairman; A. C. Adams, T. C. J. Burgess, A. J. W. Lawson, C. D. Burrage, H. W. Brown and A. Solomon.

Inc. Nov. 5, 1909, in Great Britain. **Cap.** £150,000; 60,000 priority shares, 10s. par; 39,381 issued; 120,000 ordinary shares, £1 par, fully paid. Is registered in Peru.

Financial report of Dec. 31, 1920, shows, total expenditures in Peru, to date £52,767 being £1,723 for year 1920, expenditures in London, were £825 in 1920, or a total to date of £9,183. Sundry debtors, £65. Cash £36. liabilities include, loans and accrued interest, £15,406, creditors, £336

The Ferrobamba property is in central Peru at an elevation of 13,000' above the sea and about 45 miles west of Cuzco, the terminus of the Southern railway, 500 miles from Mollendo, the seaport. The 207 claims are in 10 groups, covering 2,255 acres, in the Cotobamba district, state of Cuzco, Peru. The deposits show oxidized copper ores at the surface, underlain by sulphides largely bornite, and can be worked by steam shovels.

Property: includes valuable water-right concessions, from which it is planned to develop hydro-electric power, the rivers being fed by the melting snows of the Andes. The concessions include water rights to the Rio Chahuahuacho and several affluents, and application has been made for similar rights on the Rio Apurimac, about 25 miles in an air line from Ferrobamba No. 1. Including the last named concession, the available water power is rated at 120,000 h. p.

The property has been divided into 5 zones, or groups, known as Ferro-

bamba No. 1, Ferrobamba No. 2, Katanga, Charcas and Bonanza. Conditions are much the same at these different properties and it is thought that all can be worked opencast.

Ferrobamba No. 1, 900 acres, shows an enormous mass of garnet rock, apparently of contact metamorphic origin, rocks being hornblende-biotite-granite and limestone altered into wollastonite by contact metamorphism for a remarkable distance in many places up to 3,000' from any recognized igneous contact. An area of 34 hectares of proven copper ground, 2,300' long and 1,640' wide, is estimated to carry ore of payable tenor to a depth of 200', or approximately 12,000,000 tons of ore.

Churn-drilling with Keystone drills from 1910 to 1912, together with underground work in 15 tunnels and in the shafts, proved 6,000,000 tons of ore averaging 3.7% copper and 1.3% sulphur.

Ferrobamba Nos. 2 and 3, 300 acres, constitute the Sulfobamba mine. Development to January, 1913, has proven 778,000 tons of ore carrying 2.25% copper, with 6.75% sulphur and 532,000 tons too low grade to work.

The Katanga or Reina de Cobre mine, 300 acres, is undeveloped.

The Charcas group, though having an area of only about 35 acres, contains a pyrite orebody 100 meters wide and 800 meters long, carrying chalcopyrite with pyrite, the face of a bluff of ore assaying 5% copper, 3 oz. silver and 9 grams gold per ton.

The Bonanza claims, 420 acres, lying 9 miles south of Ferrobamba No. 1, apparently resemble the other properties, but no mining has been undertaken.

Development: 8,300' of tunnel or adit work and continuous operation of 2 churn-drills.

Property has been examined and reported on by Frank Klepetko and W. H. Wiley. Property closed down awaiting railway transportation.

Company is inactive and property in charge of a responsible caretaker.

LAMPA MINING CO., LTD.

PERU

Address T. S. Hancox, sec., 411 Tower Bldg., Liverpool, Eng. **Mine address:** E. C. P. Barber, gen. mgr., Santa Lucia, Peru.

Directors: J. L. Barber, chairman, S. Downs, H. P. Gamon, Maj. J. Grundy, W. H. Hasler.

Inc. June, 1906. Cap. £100,000; £1 par; all issued.

Financial report for year ended June 30, 1920, shows an operating profit of £8,024; dividends absorbed, £7,000; balance carried forward, £4,137; cash, £239; copper ore and matte, £12,988; supplies, £19,676; creditors, £20,553.

Dividends: 10% in 1919-20, none since.

Property: the Grundy, Cerillos Santa Catalina San Otto, San Carlos y Scavon, Esmeralda and Rubi copper mines, 17 pertinencias, at Santa Lucia station, province of Lampa, department of Puno, Peru. Also the Fucra Electrica site and the Toropujani water power.

Equipment: includes water power plant and smelting plant.

MOROCCOCHA MINING CO.

PERU

Absorbed in 1917 by Cerro de Pasco Copper Corporation, and company dissolved.

NEW CHUQUITAMBO GOLD MINES, LTD.

PERU

Office: 459 Salisbury House, London, E. C. 2, England.

Mine office: Joseph Crankshaw, res. mgr., La Quinua, Junin, Peru.

Directors: F. Lowy, chairman; F. E. Macfadyen and F. H. McCardie. **Inc. May 22, 1907, in Great Britain. Cap. £50,000; £1 par; 44,869**

issued.

Financial statement for 24 months ending June 30, 1919, shows a loss of £4,926 and creditors, £8,124. **Dividends:** 36% from 1907 to 1916.

Property: 142 acres, the Esperanza, Carmen, Cacara and Santiago gold mines on Chuquitambo hill, 1,000' high at La Quinua near Cerro de Pasco, Junin, Peru, with replacement deposits of auriferous quartz lying with the

bedding of limestone where cut by andesite dikes. The ore is 65' wide, and carries \$4 to \$25 per ton gold.

Development: by tunnels and open-cuts. **Equipment:** a 40-stamp mill and cyanide plant.

Production: £12,567 from 19,360 tons in 1916; £10,743 from 21,333 tons in 1917; £18,980 from 41,294 tons in 1918 and 1919.

Property is a gold mine 200 years old that has never been worked in depth. Present company has driven a 1,200' tunnel, 600' below the old Carmen workings and geological conditions indicate extensive orebodies below old workings.

PERUVIAN COPPER & SMELTING CO.

PERU

Successor to **Cerro de Pasco Extension, Inc.**

Offices: 115 Broadway, New York; and Pachacayo, Peru, S. A.

Officers: J. A. Vandegrift, pres.; B. W. Steele, v. p.; F. W. Mason, sec.-treas., with C. S. Farnum, J. W. Murray, F. T. Harrington and R. R. Carter, directors. M. W. Breden, asst. sec. Carl B. Neel, cons. engr.; C. C. Rossi, supt.

Inc. Aug. 10, 1917, in Delaware. **Cap.** \$10,000,000; \$1 par; non-assessable; 5,000,000 issued. U. S. Corporation Co., registrar; transfer office, 65 Cedar St., New York. Annual meeting, second Tuesday in March.

Stock offered at 70c. per share in 1920; quoted among unlisted securities, 15c. was bid and 25c. asked in Oct. 1921. Company said to have ample funds in treasury to carry out the construction and development work planned. No financial statement published.

Property: 1,101 acres of copper-silver and 40 acres of silver-lead claims at Yauricocha, in the district of Yauyos, on western slope of the Andes, 50 miles S. W. of Pachacayo on the Central Railroad of Peru, and 262 kilometers from Callao on the coast. Also owns 4,082 acres of coal land at Jautenhuasi, 20 miles E. of Yauricocha, and 30 miles from Pachacayo. Examined by Frank Klepetko.

Geology: the Yauricacha ores occur in a contact between limestone and diorite. The orebody is vertical, runs N. W.-S. E. and has a length of 2,500'. Ore is carbonate changing to sulphide at water-level at 400 to 500' below surface. Ore said to average 16% copper and 3 oz. silver.

Development: at Yauricocha, by 2 vertical main shafts, 225 and 400' deep, and 4,000' of workings. Reserves reported as 400,000 tons, plus 3,000,000 tons of probable ore to a depth of 300'. In January, 1920, a crosscut on the 225' level was reported to have gone through 110' of 23% ore and the 375' level showed 130' of 26% ore. Vein is said to be proven for 2,500' in length and to 400' in depth.

At the Felicidad copper mine, 3 miles W. of Yauricocha, little work has been done. The vein is said to be 300' wide and 4,000' long on surface, and it is expected to become a large mine.

The Jupiter and La Porfia silver-lead mines, 14 miles W. of Yauricocha and 6 miles E. of the coal mines, have not been worked by this company, though they yielded ore running 51% lead and 100 oz. silver per ton when worked by former owners.

The Jautenhuasi coal properties contain 4 veins of coal 3 to 4½' thick with no partings. The coal cokes well and is good enough for boilers. Tests made at the Casapalca smelter were satisfactory and the coal gave good results in locomotives of the Central Railroad of Peru. Reserves are given as 40,000,000 tons. The Government of Peru is said to have voted \$1,500,000 towards construction of a railway to these mines.

At Rangracancha, 6 miles W., company has another coal mine.

Equipment: includes a 300-h. p. hydroelectric plant with foundations for 600-h. p. steam and gasoline hoists, compressor, ½ mile of 3' gauge tramway, complete 100-ton copper smelter, with two 50-ton reverberatory furnaces, machine-shop, warehouse, dwellings, and motor road under con-

1921, 400 men were employed on the motor road
 ons of ore from the Yauricocha mine, reduced at the
 aged 23.68% copper and 2½ oz. silver per ton, giv-
 \$153,422. None of this ore was selected, according

to increase the capacity of the smelter to 300 tons
 ost of power plant, road, coal mine expenses, etc.,

VANADIUM CORPORATION OF AMERICA**PERU**Formerly **American Vanadium Co.****Offices:** 120 Broadway, New York; Bridgeville, Pa.; and Minasragra, Peru.

Officers: J. L. Replogle, pres.; M. G. Baker, v. p.; E. F. Nickerson, sec.; L. K. Differderfer, treas.; with Charles M. Schwab, T. M. Schumacher, T. Coleman du Pont, Ledyard Cogswell, E. R. Tinker, H. P. Whitney, F. K. Sheesley, C. M. MacNeill, C. M. Walton, Jr., E. E. Fernandini and Joseph De Wyckoff, directors.

Inc. 1919, in Delaware. **Cap.** 300,000 shares, increased to 500,000 shares in 1920; no par value; 373,334 issued. Guaranty Trust Co., transfer agent; Chase Natl. Bank, registrar. Listed on N. Y. Stock Exchange.

Range of shares during 1919-20 was \$97 high and \$34 low. A total of 3,635,895 shares changed hands during 1920. In 1921, range was \$41 to \$25½, with sales totalling 912,700 shares.

Balance sheet, Dec. 31, 1921, shows assets \$14,909,018, including properties, \$10,379,524; patents and processes, \$1,000,000, current assets, \$3,397,882; def. charges, \$131,612. Liabilities include capital stock, \$14,323,697; current, \$38,691; reserves, \$639,429. P. & L. account shows a deficit of \$92,799, as compared with \$520,592 surplus in 1920; a total of \$1,320,648 has been expended on plants and improvements. First 6 months of 1921 showed a net income of \$86,613 and deficit of \$60,291 after depletion and depreciation.

Dividends: initial quarterly of \$1.50 per share on April 15, 1920; \$4.50 in 1920; \$1 in 1921.

Peruvian Property: vanadium mines at Minasragra, Peru, and smelters at Bridgeville, Pa., where ferro-vanadium is made.

The ore deposits, which are the richest and most productive vanadium deposits in the world, were originally located for coal but their real nature was discovered by the manager of the Hauranca smelter in 1905, who denounced them jointly with E. E. Fernandini. The latter sold out to J. J. Flannery, in 1908.

Geology: the mines, which produce 80% of the world's supply of vanadium, are in the Andes at an elevation of 16,800'. The orebody is a lens-shaped mass 300' long and up to 30' thick, enclosed in red gypsiferous shales near igneous intrusions of varying composition. The ore is made up of the hydro-carbon mineral quisoquite, coke and patronite, a greenish-black sulphide of vanadium. (See Hewitt Trans. Am. Inst. Min. Eng., Vol. 4, 1909). The orebody is exploited by stripping and open cut methods. Tunnels and drilling have recently located a second large deposit. The ore as shipped has averaged 19% metal, but the reserves are of lower grade though estimated to contain 28,000,000 lb. vanadium in blocked out and probable ore.

Equipment: includes gasoline locomotives and equipment of open-cut work. Connection is being made with Peru Central Ry. at Jumasha, 28 miles distant by means of narrow gauge railroad and water transportation. A 500-h. p. hydro-electric power plant also is under construction.

Production: annual output of vanadium is about 3,000,000 lb., enough for 1,000,000 tons of steel. Ferro-vanadium sells for \$5.00 per lb.

In December, 1919, the Vanadium Corporation announced that it had absorbed the **Primos Chemical Co.** of Colorado and its subsidiary companies, **Primos M. & M. Co.** and **Primos Exploration Co.**

Colorado Properties.

Company owns at Vanadium, Colo., about 4,700 acres of roscoelite bearing land, and mines at Bear Creek, Fall river and Placerville, developed by 400' shaft and tunnels. All work in this district was stopped late in 1920.

The Urad mine covering 570 acres, the first in America to be worked for molybdenite exclusively, is in the Daly district, 11 miles above Empire, Clear Creek county, Colo. Ore occurs in veins, is mined through tunnels and an open cut, the product being sacked and shipped. Equipment includes

compressor, 250-ton flotation mill and 2,400' aerial tramway. Treatment was described by W. H. Coghill and J. P. Bonardi in the Eng. & Min. Journal of May 29, 1920.

Tungsten Department

1,534 acres, distributed over 5 sq. miles in the northern part of the Nederland district, Boulder county, Colorado.

Geology: rocks are gneissoid granitic and a granite schist, which grade into quartz and mica-schist. These rocks are cut by dikes of pegmatite in which the ores occur as veins and streaks, carrying ferberite, black tungstate of iron, in a matrix of quartz and feldspar and crushed rock. Veins run N. and S. and usually dip steeply, rarely as little as 45°.

At the Conger mine three veins are open, the Conger, Middle and East. The first two unite on their strike on the 450' level, making a large orebody. Ore shoots are lens-shaped, and show rapid pinching and enlargement. On the 200' level the vein has been stoped for a total distance of 800', and a big ore shoot has been stoped for 250' long, 90' high, and 8' wide.

Development: the shaft is said to be 1,100' deep, making it the second deepest tungsten mine in the world, the Atolia in California coming first. Levels are about 100' apart, and shrinkage stoping is employed. A working tunnel connects with the shaft at the 150' level.

Equipment: includes hoist and 300 cu. ft. compressor. A two-mile tramway from mine to mill hauls ore in trains of five cars of 1½-ton capacity by 3½-ton storage battery motor.

The Quaker and Oregon mines, about 4 miles from Lakewood, have a relatively small output, which is delivered to the mill by wagon. The Lone Tree mine, half a mile from Lakewood, has a high-grade orebody, 100' long, stoped for 70' high and as much as 20' wide. The Quaker shaft is 325' deep.

The Primos mill, at Lakewood has a capacity of 60 tons daily. It has a 100-ton bin for company ore, and six 15-ton bins for custom ore. After sampling, ore goes over 1½" grizzlies, oversize to Blake crusher, then to 10 stamps of 1,000 lbs. each; delivering 3½ to 4 tons of 20-mesh pulp per 24 hours. Battery pulp goes to No. 6 Wilfley tables, making concentrates which are sent to settling tanks above Frue vanners, whose tailings go through settling tanks, with discharge to Dorr classifiers and sand to Prosser tube mill, whose product with part of settlers goes to Frue vanners. Tailings of vanners go to canvas tables. Milling practice produces concentrates carrying from 40 to 65% tungstic acid, with recoveries ranging from 65 to 85%.

As Vanadium Corp. has consolidated its reduction and refining departments, doing all work at Bridgeville, the two plants at Primos, Peru, are no longer of use. One has been sold and the second is to be.

URUGUAY

BERNARDO MINING SYNDICATE, LTD.

URUGUAY

Address: N. R. Thompson, sec., 108 Victoria St., London, S. W., England.

Directors: B. W. Ritso, managing; S. Ransome and W. King.

Inc. June 22, 1920. Cap. £20,000; £100 par; 152 shares issued.

Property: mining concessions at Pampa, Dept. of Tacuarembó, which contain gold deposits.

VENEZUELA

EL AMPARO MINE, LTD.

VENEZUELA

Address: Guasipati, Roscio, Venezuela.

Property: the old and famous La Paz gold mine in the Roscio district, State of Bolívar, said to have been almost worked out late in 1918. Equipped with 10-stamp mill, pans, tables, and cyanide plant.

GOLD FIELDS OF VENEZUELA, LTD. VENEZUELA**Address:** El Peru, Venezuela.

Property: claims showing gold quartz veins, 4 miles west of El Callao in Roscio district, State of Bolivar, southwestern Venezuela. A plant employing 2 Chilean mills treats \$15 to \$20 gold ore by amalgamation and cyanidation. Company is developing and treating ore on a small scale, 1921-22.

INCREDIBLE, COMPANIA ANONIMA MINERALO. VENEZUELA**Address:** Caracas, Venezuela.

Property: the Incredible gold mine at Guasipati, 8 miles N. E. of El Callao, in southwestern Venezuela. Development work is said to have proven a large tonnage of milling ore. **Equipment:** includes 20-stamp mill and cyanide plant.

Production: over 40,000 tons of ore yielding \$10 per ton by amalgamation, with \$5 in the tails recoverable by cyanidation.

NEW CALLAO GOLD MINING CO. LTD. VENEZUELA**Address:** El Callao, Venezuela.

Property: the famous Callao mine and the Callao La Union, Nueva Hanza alluvial mines; also the Culebra and El Porvenir vein mines near El Callao in southeastern Venezuela. The old mine is full of water, but some of the lesser mines, are very promising.

The company is French and its financial condition is weak owing to the present status of European affairs. It is however, operating on a reduced scale.

SOUTH AMERICAN COPPER SYNDICATE, LTD. VENEZUELA

Office: 2 Broad Street Place, London, E. C. 2, England; and Aroa, Port of Tucacas, Venezuela.

Directors and officers: H. Edwards, chairman; J. A. Agnew, T. O. Callender, H. Maulbourguet, and C. N. Murphy, Erd. James, sec.; G. B. Butterworth, gen. mgr.; C. H. Stewart, cons. engr.

Inc. March 27, 1907, in Great Britain. **Cap.** £50,000; 2 shillings par; 250,000 issued. Notes £37,500 of 7% issued in November, 1918; convertible into shares at 5/ per share.

Dividends: 25% in 1909; 30% in 1910; 145% in 1911; 250% in 1912; 350% in 1913; 75% in 1914; 62½% in 1915; 150% in 1916; 200% in 1917.

Property: the Aroa mine and the San Antonio and Titira mines, covering an area of 40 sq. miles, 55 miles from port of Tucacas, Venezuela. The Aroa orebody is 50'-75' wide on the surface, and dips N. E., the Titira crebody is similar, but has not been opened up to the same extent. Drilling operations began in March, 1920. The ore consists of pyrite and chalcopyrite.

Equipment: includes 200-ton smelter.

Production: in 1916, 1,188 tons matte containing 317 tons copper and 12,482 tons ore shipped, containing 846 tons copper; in 1917, 1,940 tons matte containing 394 tons copper and 25,000 tons ore containing 1,309 tons copper. In 1922, C. H. Stewart reported a reserve of 600,000 tons of 5% copper and that 5,000 tons monthly could be mined immediately. A new smelter is being built.

YURUARI COMPANY VENEZUELA

A Venezuelan company, owned in Caracas, Venezuela.

Property: gold-bearing gravel tract in Cicapra district, 25 miles N. W. of El Callao. The gold is in decomposed schist, and churn-drilling is said to have revealed several million yards of ground worth \$1 per yd., which could be worked at cost of 50 cents. At last accounts a 200-yard clam-shell dredge was at work.

es and 13% at the smelters.

e Mansfeld copper mine, together with several large coal
alia, and a potash bed near Wansleben, opened by a shaft,
n operation since 1903. Landed holdings also include con-
f forest.

ines at Langendreer, near Hamm, Westfalen, include sev-
ines, with 4 operating shafts, and in connection is a coke
225,000 metric tons yearly capacity, production averaging
ic tons coal and coke daily. There are 2 crushing plants, 1
and the other at Rothenberg.

ld mine was opened A. D. 1199, was immensely profitable
teenth and fifteenth centuries, but the industry nearly suf-
during the Thirty Years' war. Activity was resumed in
right of working the mines was declared free, this resulting
up of a great number of small independent operators. The
ny was first formed 1852, as a consolidation of the various

ests has resulted in a nearly seventeenfold increase of production, from 1,179 metric tons fine copper and 6,489 kilograms silver in 1852.

Geology: the ore of the Mansfeld mine is kupferschiefer, a 12" bed of fine-grained bituminous shale, lying nearly horizontal, having a dip of about 5° only. A thickness of but 8" is workable, but the bed underlies an area of several hundred square miles. The ore contains slightly argentiferous chalcopyrite, bornite and chalcocite, disseminated in very fine grains through the kupferschiefer. Lying just under the kupferschiefer is an arenaceous shaft, also carrying chalcopyrite. There also is a slightly cupriferous limestone bed, known as the Dachberg. The kupferschiefer carries 2.9 to 10% copper, and ores smelted average 2.5 to 3% copper and 0.015 to 0.020% silver.

Owing to the great age and extent of the old workings, the headings usually were 2 to 4 kilometers from the shafts, hence the actual mining was done under considerable disadvantage, the thinness of the bed and the great extent of the workings rendering it necessary for miners to work on their sides, stomachs or backs, as in coal mines, wearing boards upon their trunks and thighs, in order to protect themselves from the rock floors. Recent mining operations are through a row of 6 deep-level hoisting shafts, intersecting the kupferschiefer at depths of 300 to 600 meters. Three other shafts reach the seam at still greater depths, and 2 of these also intersect a bed of excellent carnalite. These shafts are all circular, 6 meters in diameter, with a lining of brick, backed by concrete. Many of the scores of old shafts which average about 400 meters in depth, are used for ventilation, safety and raising water. The principal new shafts are the Hohenthal at Helbra, the Hermann at Helfta, and the Paul at Helmsdorf. All new shafts have steel headframes. Underground haulage, formerly done by horses, has been supplanted by electric locomotives, in the newer workings. Ore is hand-sorted on reaching surface, and waste rock, including considerable limestone, is used for underground filling.

Water from the entire mine is drained to the Hohenthal, Ernst and Niewandth shafts, whence it is raised by steam and electric pumps to the main adit, 150 meters below surface.

Equipment: includes the most modern improvements. Many shafts have cross-compound steam hoists, with conical drums for deep winding, but the Hermann and Paul shafts and the newer exploratory shafts have electric hoists employing the Ilgner system of balancing. All hoisting is done by double-deck cages holding 4 cars. Electric power is generated by gas engines at the Krughutte and Kupferkammer reduction plants.

The Krughutte power station has two 1,300-h. p. units, the blast furnaces being connected with 2 parallel gas trunks, taking blast gases to a purifier house, where there are Zschokke and Theisen centrifugal washers, through which the gas passes, and is then dried by passing through a Theisen vapor separator, going thence to a gasometer of 500-cubic meters capacity, from whence it is drawn as required to two 1,300-h. p. Ochelhauser gas engines, direct-connected to a Siemens-Schuckert 3-phase alternator of revolving field type. Current is transmitted to various works at 3,000 to 10,000 volts, and there stepped down for use.

Transportation is by railway lines and a number of Otto aerial trams, the Hermann mine having a 7-kilometer electric aerial tram.

The Mansfeld has numerous reduction plants, including 2 smelters for raw ores, 2 roasting smelters with acid plants, 2 matte smelting works, and a desilvering plant, the various works having a total of 13 reverberatory furnaces.

The method of reduction is by heap roasting and calcining in shaft furnaces. Roast heaps are built about 1,000 meters long, 6.5 meters broad at the bottom and 3.5 meters broad at the top, and 2 meters high. The only fuel used is a little brushwood, at the edges and bottoms of heaps, and each heap is roasted about 4 weeks. If the ore carries any fines, these

dioxide and bituminous matter than to throw off sulphur, the latter running only 2 to 3% in the raw ore, while the bituminous matter ranges 10 to 17% and carbon dioxide 7 to 13%. There are 2 roast stalls near the shafts, and at the furnaces the first-fusion product is a matte carrying 40% copper and 0.25% silver. This matte is broken up and roasted in calcining kilns, and the roaster matte, with the addition of 5 to 10% raw matte, is smelted in reverberatory furnaces to white metal carrying 74 to 75% copper and 0.45 to 0.50% silver. The slags from the white metal carry 4 to 6% copper and are returned to the shaft furnaces. Slag is utilized extensively for the manufacture of slag brick and paving blocks. The white metal is ground in Krupp ball mills and sent to the Saigerhutte refinery.

The Kochhutte, at Helbra, is the principal smelter, treating about three-fifths of the total production. There are 8 furnaces, 1 held in reserve, of circular shaft type, using cold blast. The Krughutte treats the rest of the ore. This plant, at Eisleben, near the mines has 6 furnaces, one being held as a spare, all of circular shaft type, with forehearths, using cold blast.

The Eckardtthutte, at Leimbach, has 4 copper furnaces of circular shaft type, using cold blast. This plant also has 1 lead stack, producing silver and lead matte, and makes a little nickel speiss from resmelted fine dust. The Eckardtthutte has an acid plant, with 72 kilns and 5 lead acid chambers, employing the chamber process of acid making.

The Kupferkammerhutte, at Hettstedt, has 3 circular shaft furnaces, but employs a hot blast. The acid plant at the Kupferkammerhutte has 82 kilns and 6 lead acid chambers, turning out 50 metric tons of 50° Beaume sulphuric acid weekly.

The Gottesbelohnunghutte is one of the smaller and less modern smelters, equipment consisting of 13 small reverberatory furnaces, 17 roasting furnaces and 2 small furnaces for refining slags.

The Saigerhutte is mainly a refinery, including a desilvering plant, operating on the Ziervogel process, which roasts the matte and retains the silver as a sulphate which is dissolved in water and the solution run over metallic copper, which precipitates the silver, the cement silver so secured being pressed and resmelted to metal 999 fine. The final furnace product, after the extraction of the silver, is blister copper of 99.7 to 99.8% tenor.

Production: in 1919 latest available was 17,255 metric tons compared with 20,632 in 1917 and 25,000 in 1913. Early production was 5,865,898 lb. in 1867, increased to 15,230,287 lb. in 1877, to 29,176,000 lb. in 1887, and 40,230,400 lb. in 1897. Recent production has been as follows: 42,500,278 lb. in 1903; 41,629,349 lb. in 1904; 43,824,141 lb. in 1905; 40,108,000 lb. in 1906; 38,822,000 lb. in 1907; 39,686,800 lb. in 1908; 41,891,400 lb. in 1909; 44,769,800 lb. in 1910; 45,955,600 lb. in 1911; 45,188,600 lb. in 1912. Production in 1912 was secured from 873,305 metric tons of cupriferous material smelted.

The Mansfeld is handled with high technical skill, and its orebodies, by reason of their vast extent, are among the largest known. No detailed information has been available since 1913.

SAXON TIN & WOLFRAM MINING CO., LTD. GERMANY

Liquidated in conformity with the Act of 1918. See Vol. XIII for description of company, etc.

GREAT BRITAIN

ABER LLYN, LTD.

GREAT BRITAIN

Address: T. A. Evans, sec., 28 Threadneedle St., London, E. C., England.

Inc. April, 1919. **Cap.** £70,000; 5s par; 248,000 shares issued

Financial statement for year ended June 30, 1920, showed cash, £10,-

037; debtors, £145; stocks on hand, £1,992; calls in arrear, £5,550; creditors, £1,113.

Property: 1½ miles from Bettws-y-Coed, Carnarvonshire, North Wales, formerly owned by Aber Llyn Zinc Mines, Ltd. and said to contain large reserves of 8.5% zinc ore. Company also holds an interest in gold properties in Rhodesia and Portuguese Zambesia.

MINING & MINERALS CO., LTD. ENGLAND

Office, sec., Camborne, Cornwall. Bewick, Moreing &

A. Thomas, managing. Oliver Wethered, J. M. Holman, A. Robinson, C. A. Moreing and M. Rogers.

895, in England. Cap. 350,000 ord. shares, £1 par; all ordinary shares, 1s par; 297,166 issued. Debentures: £75,000, issued February, 1918.

for the year 1918, resulted in a profit of £22,927, plus £9,000, period. In 1919 there was an operating loss of £37,573 and in 1920 a further operating loss of £11,275, leaving a debit balance of £48,848. Report for 18 months ending Dec. 31, 1921, showed, operating expenses, £67,832; operating loss, £16,344; total debit £23,642.

since 1896 total 135% (£1,356,430); last one, 7½% paid 1913. This is the most famous tin mine of Cornwall, worked from 1700 to 1867 and which from 1799 to 1867 yielded ore carrying together with small amounts of arsenic, silver, and cobalt, to the value of £3,234,693.

The mine, with the East Pool & Agar, Ltd., purchased the minimum 100 acres of the Tehidy Estate for £90,000, Dolcoath taken over.

worked by 3,000' shaft and extensive workings. Prior to 1915, the depth of the mine was up to 1,500 fathoms, but in 1919 was only 150 fathoms and in 1920 about 125 fms. A comprehensive drilling campaign in 1919, was not successful in locating new ore reserves.

The mine includes machinery for the 3,000' shaft, 16 Holman pneumatic concentrators, and Elmore flotation plant.

	Ore Treated, Tons	Black Tin (70 % Metal)	Costs Per Ton
.....	30,052	338	\$14.50
.....	61,703	732	11.75
.....	28,877	387	11.22
.....	61,499	827	10.76
.....	69,714	967	8.64
.....	79,347	1076	6.52
.....	82,967	1187	6.36
.....	107,102	1322	5.89

Ore reserves have been exhausted and the property closed down pending refinancing.

EAGLE LEAD CO., LTD.**WALES**

Address: C. Codling, sec., 8 Princes St., London, E. C.

Inc. March, 1920. Cap. £105,000, in 100,000 ord. shares, £1 par, and 100,000 def. shares 1s par; all deferred shares and 50,000 ord. shares issued.

Property: a lease on the Pandora lead-zinc mine in North Wales.

EAST HALKYN MNG. CO., LTD.**WALES**

Address: W. H. Humphreys, sec., 9 Old Bank Bldg., Eastgate, Chester, England.

J. Powell, mgr., Rhosesmor mine, Halkyn.

Inc. March 22, 1890. Cap. £20,000; £1 par; all issued; 15,000 fully paid; balance 10s called.

Financial report for 1919 showed an operating profit of £262. Dividends paid since 1892; 12½% in 1918; 5% in 1920.

Property: 637 acres on Halkyn Mountain, Flint county, Wales, includes the Rhosesmor mine.

Production: in 1919, 961 tons of lead ore.

EAST POOL & AGAR, LTD.**ENGLAND**

Office: J. F. Maynard, sec., Carn Brea, R. S. O., Cornwall, England.

Directors: H. M. Rogers, chairman; J. M. Holman, J. C. Gardner, E. A. Loring, and C. A. Moreing. Bewick, Moreing & Co., gen. mgrs.; M. T. Taylor, supt.; J. W. Partington, chemist.

Inc. Jan. 11, 1913, in England. Cap. £100,000; shares £1 par; changed to 480,000 of 5s. par in August, 1917; all issued. In April, 1919 capital increased to £1,500,000 and 120,000 new shares of 5s each were issued at rate of 1 for every 4 held.

The net profit for 1916 was £22,485, of which £9,116 was paid in dividends. In 1917, profit was £59,651, and £24,061 in dividends. In 1918, profit was £103,784 and dividends £60,000. In 1919, profit was £5,522, with realizable assets of £168,213, and in 1920 there was a loss of £28,008.

Dividends: 15% in 1916; 25% in 1917; 50% in 1918; 10% in 1919.

Property: a 42-year lease on 2 mines at Illogan, Cornwall, that were worked from 1834 to 1912. In 1918 company acquired a 33% interest in the Tehidy Estate, Tehidy Minerals, Ltd., (q. v.) for £30,000 and also own a large interest in the adjoining Tolgus Mines, Ltd.

Development: in 1917 and 1918, because of Government demands, was largely confined to opening ore for immediate extraction, and but little exploratory work was done in 1919. In 1920, a crosscut was driven on 1,500' level to reach Rogers lode which was 40' wide, only 75' above, and a 2,000' tunnel was advanced 890' to undercut the Tolgus workings. This work opened profitable ore in 2 other lodes, assaying 45 to 70 lb. tin oxide per ton, and the Great lode, 13' wide, carrying 150 lb. wolfram and 8 lb. tin, but in spite of these favorable conditions, low metal prices forced a shut-down on Feb. 12, 1921. Extensions in 1918 were 4,215', plus 1,078' of diamond drilling, and 3,874' in 1919.

The mine was opened by the 1,500' Agar shaft which collapsed in May 1921; reported that new shaft is to be sunk.

Equipment: includes steam and electric power, Cornish and motor-driven pumps, compressors, hoists, shops, assay office, 12 Holman pneumatic stamps, 6 tube-mills, 32 concentrators, slime plant, and magnetic separators. Late in 1919 a flotation process was evolved by which the cassiterite could be floated with a 90% recovery.

ending December 31:

Black Tin, tons	Wol- fram, tons	Arsenic, tons	Copper, tons	Value
874	47	500	...	£175,767
1005	72	589	10	165,544
1280	57	420	...	290,276
...	176,000
5 706	100	527	118

totalled 55/11, or \$13.56 per ton, against a yield of 47/3, or range figured at \$4.85.

MINES, LTD.

ENGLAND

Lann, gen. mgr., Pendeen, Cornwall.
 Wethered, chairman; B. H. Nicholson, J. A. Stoneham
 E. J. Andrews, sec.

1911, in Great Britain. Cap. £90,000; increased in 1919 to 10/ par; 180,000 shares issued 10s. pd., 180,000 issued. Debentures; £25,000 authorized, nil outstanding.

5 months ended March 31, 1918, was £8,177, of which £1,000 contributed. Net profit for year ending March 31, 1919, was £11,992. Dividends: 10% in 1917; 20% in 1919.

108 acres at Pendeen, St. Just, Cornwall. Four lodes are being worked. The mill containing 8 Holman pneumatic stamps and tables of capacity is at work. Reserves are given as 130,000 tons of tin. Development in 1919-20 was quite satisfactory. The Wheal Penryn has been unwatered and good ore is being developed. Company is situated in the South Crofty in Cornwall and Rayfield (Nigeria).

Production, in recent years: (March 31)

	Tonnage	Yield
.....	28,324	£69,064
.....	25,919	76,514
.....	25,919	76,514
..... (12 months)	26,313	56,860
..... (12 months)	28,683	43,350

Concentration amounted to 432 tons or 34.16 lb. per ton in 1920. Costs £1.10 per ton.

Operations were suspended in January, 1921 pending completion of the Victory shaft, and to await improved metal market.

WESTERN ANTIMONY MINES, LTD.

SCOTLAND

Address: C. Clayton, sec., 6 Cross Lane, Eastcheap, London, E. C. 4.
 E. C. Semmens, mgr.

1919. Cap. £35,000; 1s. par. A close corporation. Property: Glendinning antimony mine at Westerkirk, Dumfriesshire.

WESTERN ORES, LTD.

ENGLAND

Address: H. Warner, sec., 56 Cannon St., London, E. C., England.
 gen. mgr.; J. Chynoweth, mine mgr.

1917. Cap. £15,000; £1 par; all issued. Property: a working lease on the Castle-an-Dinas wolfram mine at St. Austrey, Cornwall.

Production: in 1919 (to Sept.), 3,350 tons of ore milled, yielding 40% wolfram. Only development work being done.

WHEAL PENRYN UNITED MINES, LTD.

ENGLAND

Address: H. Stentiford, liquidator, 1 Broad St. Place, London, E. C., England.
 In 4, 1921, it was resolved to wind up voluntarily.

Inc. July 2, 1906, in Great Britain. **Cap.** £100,000; 10s. par; £90,000 issued. In 1919 company was refinanced and two 5s. shares issued for original 10s. shares, 3s. 6d. paid.

Balance sheet of Sept. 30, 1921 showed loss, £8,414; cash, £115; bill rec., £1,743; debtors, £330; tin, £746; supplies, £2,118; calls in arrear, £2,318; creditors, £7,947; bank loan, £3,000.

Dividends: £21 to 13/6 paid by old company to 1911 on £100,000 £1 shares; 90% from 1911 to end of 1913; nothing since.

Property: a tin-bearing tract at Camborne, Cornwall, on which there is a concentrating plant.

Production: from 1913-1918 inclusive, 451 tons black tin, valued at £82,664; in 1919, 33,856 tons of ore, containing 353 tons black tin valued at £43,730, a recovery of 23.35 lb. per ton. Employed 378 men in 1919.

Closed down in 1920 and mine under water.

GWINEAR TIN MINES, LTD.

ENGLAND

Address: G. W. Haydon, 63 New Broad St., London, E. C., England.

Inc. 1919. **Cap.** £60,000 in 240,000 shares, 5s par; 180,017 shares issued.

Debentures: £15,000.

Property: Carzise tin mine at Gwinear, Cornwall.

HALKYN MINING CO., LTD.

WALES

Address: F. J. Warmsley, sec., 29 Eastgate Row North, Chester.

Inc. 1883. **Cap.** £10,000; £1 par; all issued.

Property: in Halkyn Mountain district, county of Flint, Wales.

Production: in 1919, 429 tons lead and 456 tons blende.

HARTHORPE LEAD CO., LTD.

ENGLAND

Address: C. A. Hall, sec., 62 Oxford St., London, W. 1, England.

Inc. 1920. **Cap.** £10,000; in 2,000 pfd. and 8,000 ord. shares, £1 par; 666 pfd and 7,602 ord. shares issued.

Property: at Wolsingham, Durham, England.

KILLIFRETH MINE LTD.

ENGLAND

Address: E. J. Andrews, sec., Capel House, New Broad St., London, E. C., England.

Inc. 1912. **Cap.** £175,000; £1 par.

Property: a lease on the Killifreth, Wheal Busy and Hallenbeagle mine at Scorrier near Chacewater, Cornwall.

KINGSDOWN (HEWAS WATER) TIN MINES, LTD.

ENGLAND

Address: D. H. Edwards, sec., 14 Broad St. House, London, E. C., England.

Inc. 1919, to succeed Kingsdown Sett, Ltd. **Cap.** £60,000; 2s each, 550,000 shares issued.

Property: a lease on 80 acres, 3 miles from St. Austell, Cornwall. Developing.

LANNER SYNDICATE, LTD.

ENGLAND

Address: Aikman & Glen, 121 St. Vincent St., Glasgow. **Mine office:** Lanner, Cornwall, England.

Inc. 1914, in Edinburgh. **Cap.** £90,000; £1 par; all issued.

Property: mines and plant formerly owned by Tresavean Mines, Ltd., at Lanner, Cornwall. In 1919 development amounted to 1,376'. Mill treated 31,380 tons of ore, producing 345 tons black tin, 77 tons crude arsenic, 27 tons copper precipitate, valued at £51,664. About 320 men employed.

LEADHILLS CO., LTD.

SCOTLAND

Address: E. F. Wilson, sec., 5 South St., Finsbury, London, E. C. W. B. Skewis, mgr., Leadhills, Lanarkshire, Scotland.

Inc. 1903 as reorganization of Leadhills Silver Lead M. & S. Co., Ltd. **Cap.** £20,000; £1 par; 17,045 shares issued.

Accounts for year ended June 30, 1920 showed an operating profit of £528. Last dividend, 1919-20, 2s.

Property: at Leadhills, Lanarkshire, Scotland.

Production: 1918-19, 1,841 tons lead ore; 1919-20, 1,990 tons.

sec., 4 London Wall Bldgs., London, E. C.

Inc. February, 1920, in Great Britain. **Cap.** £160,000; shares 10s par; 240,000 issued. Company succeeds the Levant Mining Co., organized in 1872.

Property: the Levant mine, on a cliff facing the Atlantic Ocean, 6 miles from Land's End in Cornwall, adjacent to the Geevor mine. There are 2 system of lodes, which intersect. They are in granite and "killas" (clay-slate). The mine, operated since 1820, is practically dry, in spite of being partly under the sea.

Development: by 1 main and 2 blind shafts, reaching depth of 2,100', and many miles of workings. There are 3 blocks of unworked ground said to be worth developing.

Equipment: includes steam power, 50-h. p. pump, hoists, 30 Californian stamps, and 76 Cornish stamps, concentrating machines, etc.

Production: to end of 1918, the total was 3,800 tons of crude arsenic sold for £32,657; 136,562 tons of copper ore for £859,303; and 21,959 tons of black tin for £1,531,977. The last three years for which returns are available follows:

Year	Arsenic Tons	Copper Tons	Black Tin Tons	Total Value
1918.....	52	54	278	£60,137
1917.....	86	146	372	53,815
1916.....	202	155	437	49,926

Operations suspended.

LISBURNE DEVELOPMENT SYNDICATE, LTD.

WALES

Address: E. A. Wakefield, 80 Bishopsgate, London, E. C. R. R. Nan-carrow, Pontrhydygroes, Ystrad Meurig, Cardiganshire, Wales.

Inc. 1907. Cap. £20,000; in 4,000 pfd., and 16,000 ord. shares; £1 par. Financial statement June 30, 1920, showed operating loss, £1,243; debit balance, £1,229.

Property: about 7,500 acres, near Aberystwyth, Cardiganshire, of which 2,500 acres are being operated by a subsidiary, the **Welsh Mines Corp'n., Ltd.**

MINERALS SEPARATION, LTD.

ENGLAND

Office: H. C. Hankine, sec., 62 London Wall, London, E. C. England

Directors: Francis L. Gibbs, chairman, John Ballot, Sir Ernest M. Clarke, J. C. Moulden, Seth Gregory, H. A. Krohn, W. W. Webster. W. Broadbridge, chief engr.

Inc. in 1903, to carry on metallurgical operations. **Cap.** £50,000; shares £1 par; all issued and fully paid; increased to £500,000 in November, 1919.

Profit in 1920 was £16,629 compared with £15,673 in 1919. The 1920 balance carried over from previous year was £32,889. Cash was £26,646; debtors, £61,455; investments, £72,308, War Loan, £30,800. Treasury bills (cost), £491,949.

Dividends: 50% in 1917 to 1918; 25% in 1919; nil in 1920.

The chief assets of the company are a number of patents (said to be over 50) for flotation processes and machines for recovery of concentrates from silver and lead, zinc, copper, and other ores. The use of flotation has been as great an advance in the treatment of zinc and copper ores as the cyanide process has been for gold ores. United States, Canadian, and Mexican Minerals Separation patents are owned by Minerals Separation North American Corporation, which see. In August, 1919, the patent rights for Spain were reported licensed to the Penarroya company (which see) which is to act as agent; also to the Societe Minerals et Metaux in France.

NATIONAL MINING CORPORATION, LTD.**ENGLAND**

Office: A. E. Ford, sec., 428 Salisbury House, London, E. C. 2, England.
Canadian address: 802 Lumsden Bldg., Toronto. J. B. Tyrrell, cons. engr. for Canada.

Directorate: H. Gudalla, chairman, Walter McDermott of the Consolidated Mines Selection Co., J. A. Agnew of the Burma Corporation, F. A. Govett of the Lake View & Oraya Exploration Co., F. W. Baker of the Mexican Corporation, S. Christopherson of the Consolidated Gold Fields of South Africa, B. Kitzinger of the National Bank of South Africa, A. S. Elmore of the Chemical & Metallurgical Corporation, Sir H. S. Barnes, Sir E. M. Edgar and H. D. Lewis.

Inc. October 25, 1919, in Great Britain. **Cap.** £3,000,000; £1 par; 2,500,000 shares issued; 10s called. The corporation is organized for financing of mining and metallurgical companies.

- Report dated Dec. 31, 1920, shows investments and shares, £905,943, (cost); loans, cash and debtors, £335,000; creditors, £22,229; accounts payable, £245,000. Receipts were £81,644; expenditures, £59,308; profit balance, £22,336.

Company is interested in Burma Corporation, Ltd., Santa Gertrudis Co., Ltd., Mexican Corp'n, Ltd., Tanganyika Concessions, Ltd., White Reserve Mine, Ontario, etc.

NORTH WALES IRON & MANGANESE CO., LTD.**WALES**

Address: A. Hampson, 8 Cook St., Liverpool, England.

Inc. 1903. **Cap.** £55,000; £1 par; all issued. Report for year ended Sept. 30, 1919, showed a profit of £8,542; dividends absorbed, £8,250; balance forward, £294.

Property: 188 acres at Rhiw, near Pwllheli, Carnarvonshire, Wales.

ORE CONCENTRATION CO., LTD.**ENGLAND**

Office: 701 Salisbury House, London, Eng. **Directors:** Alex. Stanley Elmore, chairman, F. E. Elmore, Walter McDermott and B. C. Hinman. J. A. Stocker, sec.

Inc. Nov. 18, 1905, in Great Britain. **Cap.** 230,000 ord. shares of £1 each, 224,544 issued, and 20,000 pfd. of £1 each, 8,795 issued.

Company owns the Elmore patents for concentration of ore by the use of oil and has installed plants at several low-grade copper properties.

PORKELLIS TIN MINES, LTD.**ENGLAND**

Address: E. J. Andrews, sec., 54 New Broad St., London, E. C., England. E. Gordon, mgr.

Inc. 1915. **Cap.** £80,000 in 160,000 shares: 10s each; 80,000 shares issued. Debentures authorized and issued, £15,000, 10%.

Property: Porkellis mine at Wendron, near Helston, Cornwall.

Equipment: includes 100-ton mill, four suction gas engines, hoists and boilers.

Production: in 1919, 2,746 tons milled yielded 26½ tons black tin valued at £3,424.

ST. IVES MINES, LTD.**ENGLAND**

Address: J. F. P. Baxter, 244 High Holborn, London, W. C., England.

Inc. 1916 as Wolfram Camp, Ltd., name changed in 1919. **Cap.** £150,000; £1 par; 60,102 shares issued.

Property: Giew and Trenwith mines, also the St. Ives group, in St. Ives district, Cornwall, formerly owned by St. Ives Cons. Mines, Ltd., in liquidation.

Production: at the Giew mine in 1919, 15,162 tons milled yielded 194 tons black tin valued at £28,152.

SHROPSHIRE MINES, LTD.**ENGLAND**

Address: E. W. Lowe, sec., Pinner's Hall, Austin Friars, London, E. C.

Inc. 1916. Is a consolidation of Shropshire Lead Mines, Ltd., and Wotherton Barytes and Lead Mng. Co., Ltd.

Property: near Minsterley, Shropshire, England.

Directors: F. Allen, chairman; H. J. Meyerstein and H. Lovegrove; T. W. Evans, sec.

Inc. July 18, 1906, in Great Britain. **Cap.** £50,000; 5s par; all issued, increased to £100,000 in June, 1919.

Profit for 1917 was £43,852. Reserve fund is £16,000. **Profit** for 1918 was £67,554; in 1919, £300; in 1920, £3,056.

Dividends: 66% from 1909 to Dec. 31, 1920, including 70% for 1918, 25% for 1919 and 10% for 1920.

Property: 184 acres, includes the South Wheal Crofty, New Cooks Kitchen, North Crofty and the Trevenon, arsenic-copper-tin-tungsten mine at Illogan and the Castle Dinas tungsten mine at St. Columb, Cornwall. Equipped with concentrating plants.

Development: in 1920, 3,766' of work was done.

Production: years ending December 31:

	Ore, tons	Gross Yield
1920.....	69,960	£145,841
1919.....	68,056	113,365
1918.....	67,588	195,284
1917.....	70,055	159,981
1916.....	71,706	103,087

Costs are around 35/ per ton.

SOUTH PHOENIX, LTD.

ENGLAND

Address: H. Archibald, sec., 27 Old Jewry, London, E. C., England.

Inc. 1920, to succeed South Phoenix Tin Mine, Ltd. **Cap.** £10,000; 5s par.

Property: lease on tin mines at Minious, Siskeard, Cornwall.

TEHIDY MINERALS, LIMITED

ENGLAND

Office: J. F. Maynard, sec., 20 Copthall Ave., London, E. C., England.

Mine office: East Pool Mine, Carn Brea, Cornwall. Bewick, Moreing & Co., gen. mgrs.

Inc. February, 1919, in Great Britain. **Cap.** £40,000; £1 par; 10/- called up; increased in September to £300,000; £290,000 issued; 150,000 shares are held by Viscount Clifden.

The Dolcoath and East Pool & Agar companies have large interests in Tehidy.

Reported for period July 1, 1918 to Dec. 31, 1920, shows income, £27,480; administration expense, £10,744; income tax, £8,429; net balance £9,621. Liquid assets, £40,065.

Property: the mineral rights on more than 26,000 acres in Cornwall, previously owned by the Basset since 11th century and Clifden estates, including the Tincroft East Pool and Agar, Ltd., South Crofty and other tin mines; also deposits of silver-lead ore, hematite and china clay, considered to be the most important mineralized area in Cornwall. Besides the famous Rogers tin lode, the ground contains several others. A large production of tin and other products has been made in the past, but there is yet a great area of unexplored ground. The lodes have been worked mainly in the "killas" (clay slate), but as the tin content increases in the granite, extensions will be made in this formation. It is proposed to start extensive lateral development of the principal fissures. Diamond-drilling is also to be done. Geology studied by Malcolm Maclaren; mining methods by W. A. Macleod.

TINCROFT MINES, LTD.

ENGLAND

Office: F. E. Martin, sec., Carn Brea, R. S. O., Cornwall.

Directors: Jas. Wickett, chairman; T. R. Bolitho, J. Gilbert, J. W. H. Bolitho, H. Rich, and W. D. Coode.

Inc. May 20, 1900, in England. **Cap.** £62,500, in 50,000 priority and 200,000 ord. 5s shares, of which all and 96,953, respectively, are issued. **Debentures:** £30,000 authorized, of which £15,500 have been issued.

Financial statement for half year ending June 30, 1920, shows receipts £37,936 and net loss £2,436; the loss in 1919 was £17,483.

Dividends: priority shares received 10% in 1907, 5% in 1912 and 1913, 10% in 1917, and 110% in 1918.

Property: 142 acres at Carn Brea, Cornwall, has a lode 3 to 15' wide, dipping 60°, and opened to a depth of 1,248' in granite. Ore carries arsenic, copper, tin, and wolfram.

Equipment: includes beam hoist, 2 Cornish pumps, motor-driven compressor, and 200-ton dressing plant using ordinary gravity and Nissen stamps, concentrators, and magnetic separators. Employs 598 men. Operation suspended January, 1921, and lease surrendered in June.

Production:

TOLGUS MINES, LTD.

ENGLAND

Address: J. F. Maynard, sec., East Pool Mine, Carn Brea, Cornwall. Bewick, Moreing & Co., mgrs.; M. T. Taylor, supt.

Inc. 1919. **Cap.** £80,000; £1 par; 55,000 shares issued.

Property: Great South Tolgus and South Tolgus tin mines, at Illogan, Cornwall, acquired from East Pool and Agar, Ltd.

TREBURGETT CONS. MINES, LTD.

ENGLAND

Address: G. D. Cahill, sec., 8 Adams St., Adelphi, London; W. C.; O. Swete, mgr.

Inc. 1919. **Cap.** £50,000; 5/ par; 108,685 shares issued.

Property: Treburgett silver-lead mine at St. Teath, Cornwall. The mine was reopened in 1919, the old workings, a 144' shaft and 1,080' adit cleaned out and the necessary equipment installed.

TYNDRUM LEAD & ZINC MINES, LTD.

SCOTLAND

Controlled by Kinta Tin Mines, Ltd., of Malaya.

Office: H. P. Hood, sec., 65 London Wall, London, E. C. 2. England.

Directors: W. A. Luning, C. G. Lush, A. Joshua and W. Illingworth. Mine mgr., A. Ireloar.

Inc. June 25, 1918. **Cap.** £55,000; in 50,000 6% cumulative £1 pfd. and 100,000 ls. common shares; 30,000 and 60,000 issued.

Property: a lease on the old Tyndrum mines, 480 acres, in S. E. corner of county of Perth ½ mile from Tyndrum. A lead-zinc bearing lode has been uncovered for 1,700', largely virgin ground. Lead content of ore runs as high as 10 to 12%.

Development: to depth of 350' by adit levels, with possibility of reaching 1,000' by such openings. Work is being largely confined to No. 4 level.

Equipment: includes 75-ton concentrator and 5,000,000 gal. reservoir, and mine is to be connected with the Caledonian Ry. The mill is still in the experimental stage, and the ore treated comes from dumps and old stope filling. The mill output averaged 8 tons of lead and 7 tons of zinc concentrate per week in 1920.

UNION MINING & SMELTING CO., LTD.

WALES

Address: A. N. Stockdale, sec., 20 Lawrence Lane, London, E. C.

Inc. 1919. **Cap.** £500,000; £1 par; 362,875 shares issued.

Accounts to March 31, 1921, show cash, £290; debtors, £325; calls in arrears, £13,936; creditors, £4,014.

Property: the Moelwyn mine, 886 acres and the Bwlchylwyr mine, 135 acres, at Llanfrothen, Merioneth, Wales, both formerly owned by the Union Zinc Mng. Co., Ltd.

CORNWALL, LTD. **ENGLAND**

consolidation of the Workington I. & S. Co. and other
 blast furnaces, steel works, collieries, and iron mines
 in England and manganese mines in India.

Properties: the Kumsi and Shankargudda mines in Shimoga
 Mysore, 150 miles S. E. of Goa; a 40-mile branch connects
 Madras & Southern Mahratta Ry., which delivers ore to
 Goa. The Workington company began operations in 1906.
 It is a mineralized zone 450' wide, and from 2,000 to 3,000'
 and psilomelane in parallel bands, associated with quart-
 zite. Ore composition is 30 to 36% manganese, 2 to 20%
 iron and 0.01 to 0.14% phosphorus. Development is by open-
 pit hand work. The two mines are connected with Shimoga
 by tramways.

 thony Henry Louis, tech. advisor.

18, 1900, in Great Britain. **Cap.** £100,000; £1 par; 97,919

profit for 1920 (Sept. 30) was £10,841; previous balance,
 dividends and bonus absorbed, £12,240; balance forward, £5,005.
 Loss in 1921 was £10,828; deficit, £3,287.

1921: total 37/10 (\$8.98) per share from 1901 to 1918, when 2/6
 was paid. The distribution in 1919 was equal to 7½%; in 1920

1921: a 60 year lease from 1917 on 80 sq. miles of mineral land at
 Northam, containing deposits of galena and fluorspar in limestone.
 The plant was remodeled in 1919-20.

Production (Sept. 30.): in 1917, the 5,452 tons of ore smelted yielded
 1,428 tons of lead; in 1918, 4,281 tons of ore gave 3,405 tons of lead. Out-
 put in 1919 was 2,837 tons of lead, and 11,500 tons of fluorspar; in 1920,
 1,563 tons of lead ore and 9,374 tons of fluorspar; in 1921, 1,563 tons lead ore
 and 9,374 tons fluorspar.

Address: E. A. Wakefield, 80 Bishopsgate, London, E. C. R. C. Nan-
 ning.

1919. **Cap.** £50,000, in 44,000 10% pfd. shares, £1 par and 120,000
 ordinary shares, 1s. par; 31,000 pfd. and all ord. shares issued.

Property: includes several lead-zinc mines, the lands covering mining
 or rights over 2 square miles in Cardiganshire, formerly owned
 by the Iron Devel. Synd.

WILLIAMS HARVEY & CO., LTD. **ENGLAND**

Has smelters at Liverpool and at Hayle in Cornwall, is the largest
 producer of tin in Europe. A subsidiary, the Williams Harvey Corp.

The National Lead Co. owns $\frac{1}{3}$ of the capital stock, as does Simon I. Patino (q v.), one of the largest individual tin operators in Bolivia.

GREECE

ANGLO-GREEK MAGNESITE CO., LTD.

GREECE

Office: J. D. Henderson, 24 Finsbury Square, London, E. C. 2, England.

Directors: C. F. Colville, chairman; J. MacLaren, W. G. Waldron and J. Hogg, gen. mgr.

Inc. Aug. 21, 1902, in England. **Cap.** £176,250 in 50,000 8% cum. pfd., 125,000 £1 ord. and 25,000 ls. dfd. shares, of which 37,845, 97,581 and 15,728 are issued, respectively.

Report for year ended Dec. 31, 1919, showed a profit of £13,715; balance, £50,095; dividends absorbed, £21,310; reserve fund, £24,000; balance carried forward, £4,785.

Dividends: 7% each year on pfd. shares; on ord. shares from 1904-1917, inclusive, is 181%; 1918, 5%; 1919, 25%; 1920, 10% and bonus of 1 new ord. share for each $2\frac{1}{2}$ ord. shares held; and 1.325% on dfd. shares 1911-1917 inclusive; 1918, nil; 1919, 300%; 1920, bonus of 1 ord. share for $2\frac{1}{2}$ dfd. shares held.

Property: 5,000 acres near Pyli on the island of Eubœa, Greece, mostly magnesite bearing.

Equipment: mining machinery suitable for open-cut work. 4-mile aerial tram, ore trams, etc.

Production: not given, but operations must be highly profitable judging by profits. Much of the ore comes to the United States in normal times.

 ors: A. O. Cautley, J. H. Gretton and S. C. Magennis, C. Ban-
 gt.

April 22, 1902, in Great Britain. Cap. £700,000; shares £1 par; all
 originally £2,000,000. Bonds: £150,000 of prior lien.

erty: iron ore deposits from 3 to 35 miles from Mo, on the coast
 ay, connected by 17 miles of rail with Storforshei, near Mo. About
 0 tons of 39% ore has been proven.

ipment: the concentrating works at Guldsmedvik, of 2,000 tons daily
 , awaits normal conditions before operations start. Product is
 to England.

AL COPPER & SULPHUR CO., LTD.

NORWAY

ice: 33 Old Broad St., London, E. C. 2, England. Mine office: W.
 nd, mgr., Foldal, Alvdal, Norway.

fficers: Sidney St. J. Steadman, chairman of board of directors; W.
 dale, cons. eng.; D. N. Forbes, sec.

Inc. Jan. 27, 1906, in Great Britain. Cap. originally £350,000; shares £1 par, in £150,000 preferred and £200,000 deferred stock. Company re-organized in 1914 and capitalization reduced to £185,000; shares £1 par; 28,000 shares issued, December 31, 1915.

Balance sheet; for 1916, included: Assets—mining properties, £60,000; equipment, £52,479; ore stocks, £17,405; provisions and livestock, £16,006; debtors, £19,669; cash, £18,478. Liabilities—capital stock, £28,000; mortgages and liens, £155,074; creditors and credit balances, £21,911. Net receipts from ore sales amounted to £8,808. Operations for the year showed a loss of £1,610, with a total debit to date, £18,712.

Property: about 3,000 acres, at Foldal, Norway, timbered and including 4 old mines, known as the Juliana Marie, Knutshovd, Foldal, Grey, Moltke and Grimsdal, worked for about 150 years. Mine, opened mainly by tunnels, shows a vein of about 12' average width, carrying massive cupiferous pyrite, with only traces of arsenic, vein giving every indication of persistence. Ore estimated to average about 2% copper and 46% sulphur. Property also has some ore of high copper tenor.

Development: during 1915 amounted to 5,385', compared with 6,328' in 1914. The main shaft was sunk to the 6th level, but exploratory work on this and the 5th and 7th levels did not fulfill expectations of the management.

Equipment: includes an excellent mining plant, installed at a cost of £105,000, and company has expended about £22,000 for substantial mine buildings. A large waterfall, on the Einuna river, held under a 25-year lease, subject to renewal, at annual rental of £25, has been improved with a hydro-electric power station. Good wagon roads have been built.

A 22-mile Pohlig aerial tram, which is one of the longest in the world, built at a cost of £38,412, runs from the mines to the Alvdal railway, and has a capacity of 40 metric tons per hour. Miscellaneous improvements include a telephone line, and a quay at Trondhjem, for ore shipments.

The tonnage of clean ore shipped from the mine to the railway was—

Year	Tons	Copper, %	Sulphur
1910.....	58,558	1.93	46.31
1911.....	48,832	1.96	45.84
1912.....	45,334	1.99	46.38
1913.....	38,579	1.85	44.79
1914.....	40,457	1.84	44.87
1915.....	58,400	1.81	44.33

Property considered promising and management good. No report issued since 1915.

ORKLA GRUBE-AKTIEBOLAG

NORWAY

Address: N. E. Lenander, mgr., or V. B. Lange, Lökkens Verk, Norway.

Officers: Marcus Wallenberg, pres.; Th. Fearnley, v. p., at last accounts.

Inc. October, 1904, in Norway. Cap. 16,000,000 kroner (\$4,160,000); shares 180 kroner (\$46.80) par.

Dividends of 7% are paid.

Property: at Meldalen, Norway. Deposits are lenses in gabbro. Ore is a cupiferous iron pyrite, carrying 2% copper and 42 to 44% sulphur. The mine is opened by the main or Wallenberg 5-compartment shaft, 1,193' deep.

Equipment: five 1,200-h. p. electric hoists, four 1,400-h. p. compressors, two 130-h. p. pumps and a mill of 500,000 tons annual capacity.

Production: in 1915 was 180,000 tons, and in 1916, 100,000 tons. No recent returns.

tons daily capacity is equipped with 3 Hadfields
 crusher-crushers, 15 sets of rolls, 76 Harz jigs,
 tables, 1 slime table and 62 sizers.

Mineral Separation units.

oil flotation plant, the largest Elmore plant in the world, having 18 units, with a productive capacity of about 25,000 tons of 6.5% copper concentrate yearly. The plant went into commission, April, 1909, and in the first year of operation produced about 8,000 tons of concentrate, carrying 6.75% copper, with a recovery of better than 80%. This Elmore plant is not only the largest installation in existence, but has given perfect satisfaction, redeeming all promises. Many small Elmore units, installed at other copper mines in other parts of the world, have proven unsuccessful, but the high saving and low costs of the Elmore plant at the Sulitjelma show that the process, under suitable conditions, is a commercial as well as a technical success. The Elmore people state that the plant operates at minimum working costs, consuming for each ton of ore treated, only 2.7 lb. of the cheapest kind of common fuel oil, and no acid. Practically the entire production of the Elmore plant at Sulitjelma has been from tailings that were wasted before the installation of this process. The daily capacity of the milling department is 1,600 tons.

The Smelter: the 160-ton smelter, at Fagerlid, 2 to 5 miles from the various mines and receiving ore by aerial trams, has a 50-ton water-jacket blast-furnace; one reverberatory furnace; two 50-ton pyrite smelting converters of the Knudsen type; a Wedge calcining furnace, a gas-fired reverberatory furnace, with hearth 15x60', and a converter stand, with 10 shells of the Manhes type, 5' diam. and 5' 6" long. First-fusion product is a matte of 30 to 40% copper and final product is blister copper assaying 99.2% sent for refining to the Helsingborg Kopparverks Aktiebolag, at Helsingborg, Sweden, where there is a leaching plant, in connection with the works. Ores smelted average 6 to 8% copper, 32 to 34% sulphur, 34 to 36% iron and 2 to 4.5% alumina, with traces of lime and magnesia.

The smelter employs the Knudsen discontinuous pyrite process, which largely utilizes the calorific value of the sulphur effecting a considerable saving in fuel cost. Pyritic and chloritic ores are smelted, the former yielding a fusible slag, the viscosity of which is much increased by the addition of the chloritic ore. For this reason slag is run into the forehearth and allowed to settle for 90 minutes, after which pyritic fines are added. The Knudsen furnaces, of 20 tons capacity each, are lined with magnesite blocks, set close together and luted with a bond of magnesite mortar and tar, applied hot. The wear is confined to the under portion of the furnace, up to 30 to 50" above the tuyeres, and is comparatively small, the working furnaces having run for 179 to 459 charges before linings required repairing. Two men are sufficient to work a furnace, 2 others attending to the forehearth, each forehearth sufficing for 2 or 3 furnaces. The loss in smelting low-grade ores amounts to 10% only, slags running only 0.2 to 0.3% copper, as against a former loss of about 15% of assay values, and the cost of smelting under the Knudsen process is given as 3s. per ton of ore, this covering wages, transportation of ore to the smelter and cost of fuel. Converter costs were said to be under \$1 per metric ton in 1913.

Miscellaneous enterprises of the Sulitjelma include the ownership and operation of 7 steamers, 2 tugs, 40 barges, and a 13-kilometer private railway system, known as the Sulitjelmabanen, of 750-mm. gauge, equipped with 3 locomotives and 120 freight cars.

Production: the total to May, 1919, was 1,917,354 tons of cupreous iron pyrite and 368,836 tons of smelting ore.

Year	Tons		Year	Raw Ore, Copper,	
	Raw Ore.	Copper.		Tons	Lb.
1918.....	133,433	1910.....	130,000	9,000,000
1917.....	224,488	1909.....
1916.....	215,675	1908.....
1915.....	1907.....	120,000	8,140,562
1914.....	1906.....	7,000,000
1913.....	1905.....	90,000	6,225,856

202,176 tons of ore in 1916; 154,762 tons of ore in 1917; 80,079 tons in 1918; 60,522 tons in 1919; 93,812 tons in 1920; 148,261 tons in 1921. Shipments amounted to 41,827 tons in 1919; 226,739 tons in 1920; 204,400 tons in 1921.

Apparently the San Domingos is no longer an important copper producer, but the property, which has a long and honorable record of production, is carefully managed. Abnormal conditions due to the war have hampered operations for several years.

Office: S. J. C. Air, sec., 20 Copthall Ave., London, E. C. 2, England.

Directors: M. Philips, chairman; F. Gates, managing; F. Goddard, and E. Laffargue, T. Gribble, mgr.

Inc. July 15, 1909, in Great Britain. **Cap.** £100,000; £1 par; 80,000 issued. **Dividends:** total 55% from 1909, to 1916, inclusive; none since.

Report for year ended Sept. 30, 1919, showed an operating loss of £5,654; balance forward, £24,326; cash, £16,194; metal stock, £36,217; debtors, £876; investments, £7,114; creditors, £12,669.

Property: a tract of 1,800 acres near Silvaes, province of Beira Baixa, Portugal, carrying tungsten (wolfram) deposits, and equipped with two concentrators.

Production: 235 tons of wolfram concentrate in 1914; 300 tons in 1915 and 337 tons in 1916. Developing at last account.

RUSSIA

BOGOSLOVSK MINING CO.

RUSSIA

Address: via Verknaya or Goroblagodatskaya on the Perm-Gornoza-
vodsk railroad, Department of Perm, Russia.

Property: 2 groups of copper claims, 15 by 1 mile in area, 6½ miles S. E. of Verknaya, Department of Perm, eastern slope of the Ural mountains.

Geology: the mineralized belt is on the line of other deposits of copper pyrite on the eastern slope of the Urals, being a continuation or those at Kyshtim, Sissert, and Kalata. Country rock is granite and "keratophyre," a soda-felsite porphyry. The former is not productive where massive. Copper-bearing pyrite occurs as lenses in a belt of highly altered argillaceous schist, intersected by several porphyry dikes. A gossan cap, 60' thick, is always found on top of the ore, but the outcrop is covered by 3' to 10' of soil and debris, the country being swampy and covered with thick forest and undergrowth. Drill holes show the depth of oxidation to be 60'. Gossan carries \$3.90 to \$10.28 gold per ton, and may be treated by cyanidation.

Development: by surface pits, shafts, and drill-holes, last mentioned put down from 95 to 735'. Ore reserves to a depth of 660' amount to 3,400,000 tons, averaging 3.6% copper. At 686' depth the lens is 50' wide. At depth of 105' in No. 7 Bogoslovsky shaft, ore assayed 33.5 to 43.8% sulphur, 9.2 to 26.9% silica, 27.1 to 38.0% iron, traces to 0.43% zinc and 4.6 to 12.65% copper. A sample of 976 tons from between the 70 and 105' levels yielded 7½% copper at the Bogoslovsky smelter, which has a capacity of 60,000 tons of pyrite ore per annum, plus other ore.

Equipment: includes hoists, 300 and 1,050 cu. ft. compressors, and reduction works to be erected.

No recent information.

CAUCASUS COPPER CO.

RUSSIA

Office: E. W. Lowe, Pinners Hall, Austin Friars, London, E. C. 2, England.

Directors: J. Colquhoun, chairman; M. Grancini, Viscount Grimston and E. B. Lockhart.

500 issued. **Debentures:** £42,620 of 5% firsts, and £1,850,000 of 5% seconds of which £752,000 series A., are outstanding out of a total of £850,000, and £486,000 series B. out of £500,000 authorized.

Inc. Oct. 4, 1900, in England. **Cap.** £1,000,000; shares £1 par, 513-

have been available for 7 years owing to the war, but in 1919 the net assets were £178,319. Creditors, loans, and bills payable were £100,000; and debenture interest accrued, £76,447. Dzansul, Department of Kutais, Caucasus, southern Russia, reserves were estimated at 3,600,000 tons of 3.1% copper. The Russian kish army took possession, but was ejected 5 months later. Reserves was done late in 1916, but none since 1919. The company has a 1,000-ton mill using flotation. In 1919, the company recovered 3,600,000 tons of 3.1% copper ore. Production was 1,000 tons of copper in 1911; 2,992 tons in 1912; 3,936 tons in 1913.

CORPORATION, LTD. RUSSIA

Richardson, sec., 341 Salisbury House, London, E. C. 2,

Baker, chairman; Walter McDermott, A. S. Elmore, sec. and advisory engineer and agent in Russia, A. Gernet, sec. in England. Cap. £250,000; £1 par; £245,250 issued. Annual report, shows a loss for 12 months to March 31, 1919, of £18,485, and a profit for 18 months to Sept. 30, 1919 of £16,000, and £18,485.

At the end of 1919, assets were £83,114 and liabilities, £6,442, compared with £794 and liabilities, £24,881, March 31, 1917.

The Altai region of western Siberia was sold to **Altai Mines**, which company has an interest in collieries in southern Russia and the Russian Industrial Corporation. Company has also an interest in the Elmore zinc-lead recovery process in Russia, Norway

Altai Mines, Ltd.

Richardson, sec., 341 Salisbury House, London, E. C. 2, Eng-
mgr.

1917, with capital of 100,000 shares of 100 rubles par, and is a subsidiary of the Russian Mining Corporation, Ltd., which now has 100 shares received for its property.

The concessions in the Altai region of western Siberia include an area of 12,292 sq. miles and the **Zyrianovsk** of 21,000 sq. miles have been mined here from early times and records show that 556,000 oz. silver, 30,000 tons of copper and 500,000 lbs. gold have been produced.

The **Zyrianovsk** property has a series of lenses of copper and gold. The reserves developed, are estimated to contain 315,000 tons, assay-
ing 2.5% copper, 15 oz. silver and 0.35 oz. gold per ton. The results of exploration, but the **Byelousovsk** copper mine on the Altai promises well. Drilling has proven an ore body containing 10' 6" in width, estimated to contain 1,600,000 lbs. of ore assaying 3.55% copper, 9.08% zinc, 1 gr. gold and 60 gr. silver per ton. It has shown at depth the copper values increase and the gold values decrease.

The **Berezovsk** mine, W. of **Byelousovsk** has been developed. It is said to indicate 200,000 tons of ore averaging 11.1% copper, 1.7 gr. gold and 191 gr. silver per ton. Several veins, 1-5' wide, have been disclosed and at the **Zmeinogorsk** mine are 10,000 tons of gold and 30,000 tons high grade barite on the dumps.

Barite is easier than in other mining regions of Siberia, however, the industry has been suspended owing to political conditions in Russia.

Inc. 1919, in England. **Cap.** £12,000,000; £1 par. Shares issued in exchange for property holdings amount to 9,628,351 shares; 3,442,838 for Irtysh; 2,520,000 for Kyshtim; 1,768,152 for Russo-Canadian, and 725,982 for Tanalyk. Shareholders in Irtysh, Kyshtim, and Tanalyk received 2 new shares for each old one held; Russo-Canadian stockholders get one new share for each preference share, and one new share for every 2 shares common held. Russo-Asiatic assumed the Irtysh and Tanalyk debentures. (614,217 shares), and the Irtysh options, (555,194 shares).

Financial statement at time of consolidation showed; cash due from Russo-Canadian Co., £830,000; cash due from Irtysh Corp., £115,000; cash receiv. from share options, £278,581; liabilities, Kyshtim Corp., £80,000; Tanalyk Corp., £18,000.

Balance sheet of Dec. 31, 1920, showed: **Assets:** interests in Russian mng. companies, £8,175,052; expenditures in other interests, £25,959; sundry invest., £3,067; debtors, £700; cash rec. from Russo-Canadian Dev. Co., £721,649; cash, £170,785, prel. expenses, £36,670; balance, £47,822; total, £9,181,707. **Liabilities:** include capital issued, £8,461,587; debentures, £614,117; unclaimed debenture interest, £2,754; sundry creditors, £103,249.

Property: freehold and leasehold mining, agricultural and forest land, mining claims and concessions in the Urals and Western Siberia covering 2,500,000 acres and including 12 developed metal mines with 7,260,000 tons proven ore reserves, and coal mines having an output of 400,000 tons per annum. The properties are fully equipped and when operations are resumed, annual production should amount to 18,000 tons copper, 20,000 tons zinc, 12,000 tons of lead, 140,000 oz. gold and 1,700,000 oz. silver. In 1920 company acquired an option on 36,000 acres mineral land in the departments of Gard and Lozere, France, and development work is underway. An early resumption of operations at the Russian properties depends on political conditions but will probably occur in 1923.

Irtysh Corporation, Ltd.

Assets acquired by Russo-Asiatic Consolidated, Ltd., (1919), and corporation in liquidation.

Inc. November 27, 1914, in England. **Cap.** £2,000,000; £1 par. **Debentures:** £1,000,000 of 6% authorized, £500,000 issued, bonds £20 and £100 each, of which 84,140 have been converted into shares at £2 10s. each, under rights now expired, leaving a balance of £415,860 outstanding.

Company acquired the whole capital of two Russian companies the **Ridder Mining** and **Kirgiz Mining**. To January, 1918, the Irtysh had advanced £979,528 to these companies.

Property: the Ridder, Sokolni and other zinc-lead-copper mines in the Altai region, Western Siberia, and the Ekibastrous coal basin, of 25 sq. miles area with equipment for a production of 250,000 tons per year.

Ore reserves: in 1917 were estimated at 945,000 tons of sulphide ore assaying 31.2% zinc, 18.1% lead, 1.5% copper, 9.7 oz. silver and 0.47 oz. gold; also 2,229,000 tons of concentrating ore containing 6.7% zinc, 3.5% lead, 0.5% copper, 1.7 oz. silver, and 0.7 oz. gold per ton. There are 360,000 additional tons of sulphide ore carrying gold in Sokolni mine, making a total of 3,534,000 tons, containing on estimated profit-value of £13,000,000.

Equipment: first unit (50,000 tons) of a concentrating mill of 200,000 tons per annum capacity, power plant, coke plant, zinc distillation plant of 20 blocks of retorts (6 finished), lead smelter, refinery and accessories, 143-

eamers and 28 barges; also a farm to supply food to

nd treated at the Ridder property, carried 63 miles by and then 80 miles by rail to the colliery and smelters. ted to 210 tons of 99% spelter in 1916, and 333 tons \ considerable tonnage of zinc and lead concentrates own owing to political disturbances. When in full erty will add considerably to the world's metal out-

in Great Britain, to acquire the entire share capital r Works, a Russian corporation. Cap. £1,260,000; 40 issued and fully paid. Debentures authorized, ed and redeemed.

9% dividend paid in December, 1912; total in 1912, % in 1914; 10% in 1915, paid in November, 1916.

the interest held in the Kyshtim Mining Works Co. e Russo-Canadian Development Corporation, the ceiving debentures in the new company in exchange. miles, or 1,406,700 acres, the mineral lands covering nder being farm and forest areas, all situated in the outhern Urals, Russia. The copper mines, 36 miles nected by company's own line with the Government es are important, and the timber not only used for s, but also sold to the public.

nines are the Amerikansky, Ivanoff, Koaniukoff. Ore reserves June, 1917, were given as 3,000,000 pper, 0.1 oz. gold and 1 oz. silver per ton.

ore of Kyshtim is a compact dense, massive aggre- e, barite, and quartz, carrying irregular blotches, ins, of chalcopyrite, sphalerite, and tennantite. The istinct roughly horizontal and parallel zones. (1) s from the surface to a maximum depth of 60'. (2) c sand, extends from the bottom of the gossan to 50', the greater part of which lies beneath the level e the loose, leached sulphides, reach from the bottom t maximum depth of 180', gradually changing into massive, mainly unaltered sulphide ore. Downward y sulphide does not occur in the form of a com- e, but has taken place to a relatively slight degree alls, especially the hanging wall, to the greatest oration which is 600' below the ground-water level. e mine plants, also smelter at Karabash capable of f copper yearly. There are 3 blast-furnaces of a n 1,800 tons daily, and one 100' gas-fired regenera- for fine ore and flue dust. Company has an elec- tim, with annual capacity of 14,000 tons of copper. ding January:

Copper,	Year	Copper,
Tons		Tons
.. 5,000	1915.....	7,642
.. 6,392	1914.....	7,588

In 1914 total cost was £37.84 per ton of copper, which is equal to 8.1c. per lb. In January, 1918, the Bolsheviks nationalized the Kyshtim properties but it is reported that this was changed later.

Tanalyk Corporation, Ltd.

Assets acquired by Russo-Asiatic Cons., Ltd., and company in liquidation.

J. P. R. Webster, liquidator, Pinners Hall, Austin Friars, London, E. C. 2, England.

Inc. April 15, 1912, in Great Britain. Cap. £450,000; shares £1 par; £362,991 outstanding. Debentures: £200,000 authorized and £198,357 issued.

Property: 28,350 acres of mineral land, and timber rights on 300,000 acres of forest in the Orenburg Government, in the southern Urals. The actual title to the property is held by the South Urals Mining & Smelting Co., Ltd.

Development: the mines, several miles apart, which have been worked, include the Mambet, Ulali, Tanalyk, Troitsk, Tuba, Epaevsky, and Sebaeva, containing an estimated total of 570,700 tons of sulphide ore averaging 2.63% copper, 0.084 oz. gold, and 1.45 oz. silver per ton. The Sebaeva contains 450,000 tons of this total. There is also 157,340 tons of oxidized ore assaying 0.38% copper, 1.35 oz. gold, and 6.73 oz. silver per ton. The Semeonovsky mine contains a reserve of 98,500 tons of ore, carrying no copper, but with 0.50 to 0.61 oz. gold and 0.65 to 0.75 oz. silver per ton. The Tuba mine contains 45,000 tons of ore with 1% copper, 3 to 3.1 oz. gold, and 16 to 20 oz. silver. The profit in sight, at pre-war prices for metals, is estimated at £2,500,000.

Equipment: steam-power, hoists, compressors, railway, smelter of 8,000 tons monthly capacity, amalgamation mill at Tuba, and cyanide plant at Semeonovsky. Blister copper is refined by the Kyshtim company.

Production: in 1914, 252 tons blister copper, and 12,000 oz. silver; in 1915, 564 tons copper, 11,415 oz. gold, and 98,440 oz. silver; in 1916, 687 tons copper, 22,000 oz. gold, and 137,000 oz. silver; in 1917 (9 months), 700 tons copper, 22,000 oz. gold, and 145,000 oz. silver.

The Russian revolution has interfered greatly with operations, but Tanalyk will eventually be a large producer of copper and precious metals.

Russo-Canadian Development Corporation, Ltd.

Inc. 1917, in Canada. Cap. 1,000,000 7% non-cumulative preferred, and 2,000,000 common shares; \$5 par; all issued. Company organized to acquire from the Irtysh, Kyshtim, and Tanalyk Corporations all the issued capital of the Ridder, Kirgiz, Kyshtim Mining Works, and the South Urals M. & S. companies registered in Russia; also the capital of the Mining & Metallurgical Bank, the Trading Company and the Prospecting Co. Merged with the Russo-Asiatic Consolidated, in 1919.

Prospecting Company, The

Inc. in Russia. Cap. 200,000 rubles. Company holds the mining interests of the Russo-Canadian Development Corporation, which in 1919 was taken over by the Russo-Asiatic Cons., Ltd.

Property: concessions covering about 73 sq. miles have been located. In the mineralized area of 1,550 acres of the Steppe region there are 5 porphyry deposits and 7 veins with favorable indications. Prospecting has been done by drilling.

known copper mine that was operated by the German In January, 1919, the French administrators visited that it had been actively worked from 1915 to 1918; condition was good, and that all machinery, equipment, etc.

SPAIN**ALMADEN CUPRIFERO MINES CO.****SPAIN**

Province of Ciudad-Real, Spain.

Controlled by the Government of Spain, but the output is owned by the Rothschilds in London. Part of the output is for domestic consumption, the remainder being for export. By reason of low production and cheap costs, Almaden is one of the quicksilver industry of the world.

It is the greatest quicksilver mine in the world, at Almaden. The Rio Tinto copper mines and 130 miles S. W. of Ciudad-Real. The Athenians, Romans, and Moors worked it for several centuries.

The strata consist of steeply upturned slates with interbedded shales, which weather out in steep, rocky outcrops. The strata are intersected by diabase dikes and other igneous rocks.

There are a series of 3 parallel nearly vertical quartzite veins about 100' wide, and from 26' to 46' average width. The walls are so steep as to permit stopes 25' wide. The workable orebodies are generally 1,000' long, and will average 8% to 10% mercury. Mercury is not uncommon. On the lower levels much metallic mercury, the cinnabar and pyrite.

In 1920, were officially said to contain 15,000 metric tons.

The mine extends extensively down to the 11th level. The San Teodoro shaft is 984' deep and there are 2 accessory shafts.

A winze opens the orebody to the 12th level and shaft will be sunk to 1,250' in 1922.

Equipment: includes 10 pairs of Bustamente subliming furnaces, two Cermak-Spirek continuous-movement furnaces for fine material, and 3 double-pan furnaces of the same system for coarse ore.

Production: is 70-80 tons of ore daily or 16,000 tons yearly. The last official figures, those for 1917, show that 13,166 tons of ore treated, yielded 1,823,477 lb. quicksilver or 911.7 tons, a recovery of 6.93%.

For description see H. V. Gould, Mng. & Sci. Press, April 23, 1921. Employs 2,000 men, of which only about 130 do actual mining, 348 build walls underground, 411 work in the furnace plant and the balance on general surface work.

In October, 1916, the mines were leased for 15 years, to avoid the rising cost of production while under government control. The maximum price that the Treasury must pay for mercury is based on an average net cost of production for the period 1911-16. The Treasury fixes the number of flasks to be produced and the dates of delivery. The contractor is to spend 30,000 pesetas (\$6,000) yearly in exploration and to erect an electric power plant. The Government pays the contractor for improvements either by amortization of 5% yearly on the works and 10% on the machinery; or if preferred by the Treasury, through appraisal of their real value at the time it resumes charge of the improvements.

Costs: \$8.29 per flask in 1900, when the selling price was \$45; and \$15.-22 in 1915, when the price was \$94.

Liquidated. See Volume XIV.

CALA; SOCIEDAD ANONIMA MINAS DE

SPAIN

Office: Estacion S. 2d, Bilbao, Spain. **Mine office:** Cala, Santa, Olalla, Huelva, Spain.

Officers: Don Enrique Areilza, pres.; Don Jose del Castano, Bilbao, v. p.; Don Ernesto Bengoa, sec.; Don Juan de Areito, managing director.

Inc. Aug. 31, 1900, in Spain. **Cap.** 15,000,000 pesetas shares (acciones) and 7,000,000 obligaciones.

Accounts for 1916, the last obtainable, show a current balance of 143,240 pesetas and expenditures of 175,573 pesetas for construction account; 185,540 pts. for interest on bonds; 98,198 pts. for interest on accounts and 50,000 pts. loaned to Coto Teular Co., leaving a balance of 30,050 pts. Total expenditures to date amount to 5,803,317 pts., for mine account, and 14,914,332 pts. for railway account. Total all accounts, 31,153,638 pts.

Property: a group of 8 mines, 345 hectares, at Cala, near the Pena and Rio Tinto mines, carrying extensive bodies of magnetic iron ore and cupriferos pyrite. Company owns and operates a 97-kilometer railroad from the mines to San Juan del Aznalfarache, on the Guadalquivir river, in the adjoining province of Selvilla. The mill reduction works were installed in 1917.

Production: for 1916 was 23,973 tons of ore. Shipments were 12,669 tons crude ore; 7,346 tons calcined ore, 1,010 copper mineral, the total value being 286,536 pesetas. No later figures procurable.

CAMPANARIO; SOCIETE DES MINES DE CUIVRE DE SPAIN

Address: 5 Rue du Helder, Paris, France. **Mine office:** Valverde del Camino, Huelva, Spain.

Abel Suais, chairman of board of directors.

Inc. Dec. 20, 1906, in France. **Cap.** 5,000,000; shares 500 par.

Property: seven hundred hectares, including 6 old mines, and actually having about 250,000 tons of cupriferos pyrite in sight.

Equipment: includes an elaborate and extensive surface plant.

Production: about 40,000 tons of pyrite annually, ore being first treated by lixiviation and cementation to recover its copper content, and residue sold for sulphur. No exact figures available.

 afts, with foot-holes alternately, on either side, for
 iners.

e had 231,000 tons ore reserves, and Esperanza and
 tons ore reserves, January, 1917.

ielded 1,029 tons in 1912, 107 in 1913, and 534 in 1914.

Esperanza, San Daniel, and Forzosa properties by
 sinking and crosscutting, was in progress, 1917-18;
 ing and operations were suspended October 1918,
 at the Esperanza

Total ore reserves at end of 1916 estimated at 738,000 tons, 872,000 tons in 1917, 886,000 tons in 1918, 882,000 tons in 1919, and 835,000 tons in 1920.

In 1919, reserves totaled 190,000 tons cementation ore and 86,000 tons smelting ore

Equipment: includes two leaching plants dealing with mine liquors and making 98 tons of copper in 1913; 82 tons in 1914; 135 in 1915, and 127 in 1916.

Company has a private narrow-gauge electric line connecting with the Buitron railroad. The power plant consists of 4 Premier gas engine units, each with a suitable gas producer plant, with electric generators, giving economical and satisfactory service.

Production: begun July, 1906, has been as follows: 20,421 long tons of ore in 1906; 54,276 tons in 1907; 87,894 tons in 1908; 103,140 tons in 1909; 112,143 tons in 1910; 108,650 tons in 1911; 97,681 tons in 1912; 95,897 tons in 1913; 111,457 tons in 1914; 86,288 tons in 1915; 108,725 tons in 1916; 86,633 tons in 1917; 62,720 tons in 1918; 71,176 tons in 1920. Company produces no metallic copper directly from its ore, but the copper contents of the pyrite shipped amounts normally to about 100,000 tons yearly. Total shipments in 1919 amounted to 33,996 tons and in 1920 to 82,970 tons. In 1919 company acquired control of the **Cyprus Sulphur & Copper Co.**, Cyprus.

HUELVA COPPER & SULPHUR MINES, LTD. SPAIN

Office: C. Forbes, sec., 6 Old Jewry, London, E. C. 2, England. **French office:** 9 Bl'vd de la Madeleine, Paris, France. **Mine office:** Cueva de la Mora, Huelva, Spain.

Directors: P. Lyttleton Gell, chairman; H. Gaillochet, v. p.; Ad. de Chuzouliere, G. Dyckhoff, E. Choppy, P. E. de Caplane, G. Chanlaire, J. Roux-Brahic, and Comte C. de Leusse; L. Delafosse, mgr.

Inc. Oct. 28, 1903, in Great Britain. **Cap.** £400,000; increased 1907 to £600,000, but reduced again in July, 1912, to £420,000; 279,139 shares issued and fully paid.

Financial statement, years ending June 30:

Year	Revenue	Operating Charges	Profit at Mine
1920.....	£205,317	£204,650	£ 666
1919.....	219,000	219,213	213*
1918.....	203,490	186,896	16,594
1917.....	247,928	225,436	22,493
1916.....	178,578	169,185	9,393

*Loss, abnormal costs and fluctuations in Spanish Exchange are given as causes of the above poor results.

Dividends: none have been paid since October, 1907, when 5% was distributed.

Property: the Cueva de la Mora and Monte Romero tracts comprising 246 hectares (507 acres) and other properties of 650 hectares, lying between the Rio Tinto and Tharsis properties, Huelva, Spain. The total area is 3,400 hectares. Lands are favorably located and are traversed by the Olivargas and Juliana rivers. The company is re-foresting its lands with pine and eucalyptus.

There are five producing mines, the Monte Romero, La Corta, Aguas Tenidas, Esperanza and Victoria.

In 1919, reserves totalled 190,000 tons cementation ore and 86,000 tons smelting ore and in 1920, 14,500 tons cementation ore, 67,000 tons smelting ore and 32,000 tons complex ore, a total of 113,500 tons.

Equipment: includes a pyrite smelter, cementation beds, etc. The company has built a complete town for its workmen, numbering about 1,200 men, the town having a normal population of about 5,000. The company's

y Huelva line.

Production: was 5,563 tons of cupriferos pyrite in 1905; 20,523 tons in 1906; 34,905 tons in 1907; 48,511 tons of ore and 67 tons of cement copper in 1908. Production of fine copper is estimated at 175,000 lb. in 1905; 600,000 lb. in 1906; 1,000,000 lb. in 1907; 1,350,000 lb. in 1908; 25,000 tons of 5% ore shipped and 45,000 tons sent to cementation plant in 1909.

In 1915-16, 61,730 metric tons of ore yielded 3,856,600 lb. copper; in 1916-17, 63,385 metric tons gave 3,863,612 lb. copper; in 1917-18, 70,042 tons and 8,606 tons custom ore gave 3,621,200 lb. of copper; in 1918-19, 61,996 tons of company and 7,625 tons of custom ore yielded 4,437,440 lb.; in 1919-20, 66,243 metric tons and 5,862 tons custom ore yielded 3,634,396 lb. copper.

PENA COPPER MINES, LTD.

SPAIN

Office: Ernest Johnston, sec., 295 Salisbury House, London, E. C. 2, England. **Mine office:** Nerva, Huelva, Spain.

Directors: C. C. D'Anvers, chairman; M. Paisant, C. A. Massaouti, R. G. Levy, E. Porges and John F. Allen. **Henrique Schreck**, gen. mgr., Pena Mines, Huelva, Spain; F. Allen, cons. eng.

Inc. Sept. 19, 1900, in Great Britain. **Cap.** £750,000; shares £1 par; 537,600 issued.

Dividends: 1903, 5%; 1904, 5%; 1905, 4%; 1906, 7½%; 1907-1914, nil; 1915, 6%; 1916, 6%; 1917, 7½%.

Report for year ending Dec. 31, 1920, showed a profit for year of £68,813, and balance carried forward, £32,944.

Company was formed to acquire a copper and sulphur mine in the south of Spain that had, for two or three years previously, been worked by a Belgian company. Small dividends were paid from 1903 to 1906. An independent branch railway to the mine was constructed and opened in 1914, and since that time the earnings of the company have steadily improved.

Property: 1,724 acres, the Pena del Hiero group of 17 old mines, 2 miles N. E. of the Rio Tinto mine. Ore extraction is by open quarry work, the overburden being stripped off. Ore reserves are estimated as 397,385 tons, December, 1919.

Production:

Year	Tons mined	Ore shipped, tons	Copper recov'd, tons
1910.....	132,559	144,810	1,017
1911.....	131,367	124,323	1,004
1912.....	84,698	80,844	793
1913.....	68,759	5,734	703

1917.....	160,121	145,120	587
1918.....	91,827	72,023	554
1919.....	57,333	47,897	529
1920.....	82,751	124,034	516

PENARROYA, SOCIETE MINIERE ET METALLURGIQUE DE

Office: Paris France; and Penarroya, Spain. **Henri Jequier**, metallurgist; **Dr. Auguste Hollard**, cons. eng.; **Bradley, Bruff & Labarthe**, cons. construction engs. (San Francisco, Calif.)

Inc. in France. **Cap.** 73,125,000 francs; (\$14,625,000) in 292,500 shares of 250 francs par value.

Profit in 1917 was equal to \$2,799,723, from which \$279,978 was applied to amortization and reserve, leaving \$2,519,808 net. **Dividends absorbed, \$2,350,000.**

Dividends: 40 francs per share, equal to 16% on the capital, was paid in 1917. In 1920, two dividends paid amounted to 11,600,000 fr.

Property: lead-silver mines at Penarroya, Province of Teruel, Spain; also coal mines nearby; lead mines in the Pyrenees and mines in Algiers and Tunis, northern Africa.

Equipment: includes a 10,000-h. p. hydro-electric plant, a smelter at Penarroya, one at Marseilles, France, at Megriva in Tunis and the Noyelles Godault works, formerly owned by the Malfidano company. A complete new reduction works contains crushing and sampling machinery, roasters, Dwight-Lloyd sintering machines, 4 blast-furnaces for lead and one for copper ore, powdered coal plant, converters, and refinery. Entire equipment was made in America.

Company controls or owns every lead smelter in Spain. In August, 1919, it became sole owner in Spain of the Minerals Separation flotation patents.

Production: in 1919, 59,950 tons galena and 73,803 tons lead; in 1920, 54,697 tons galena and 75,509 tons lead.

RIO TINTO CO., LTD.

SPAIN

Secretary and offices: J. Gordon Macleod, 3 Lombard St., London E. C. 3, England. **Mine,** at Rio Tinto, Huelva, Spain. **Works office:** Port Talbot, South Wales.

Officers: Sir Charles Wm. Fielding, chairman; Earl of Denbigh, Viscount Milner, Sir Arthur H. D. R. Steel-Maitland, and John M. Macdonald, directors; Turquand, Youngs & Co., auditors; G. W. Gray, supt. of mining; A. J. Caddick, cons. engr.

Inc. March 29, 1873, in Great Britain. **Cap.** £3,500,000; increased, November, 1905, from £3,250,000 shares £1 par in £1,625,000 cumulative 5% preference shares and £1,875,000 ordinary shares, fully issued and paid. The new issue of 50,000 ordinary shares, par £5, was sold to share holders at £63 per share, netting the company £3,150,000 for the redemption of an outstanding bond issue of £2,989,740, at 4%, which was fully retired. Transfer form, common; fee 2s. 6d.; warrants to bearer are issued in denominations of 1, 5, 10 and 25 shares, fee 1s. per warrant, fee for conversion into registered shares, 2s. 6d. per certificate. Stock Exchange settlement; all shares quoted in the official list. Fiscal year ends with calendar year; accounts are issued in April, and an interim semi-yearly report is issued in October. Dividends are also payable in Paris by the Société Generale, 29 Boulevard Hausmann.

Dividends: on the old ordinary shares, of £10 par, 1879 to 1896, ranged from 6s. in 1886 to 38s. in 1896. On the present ordinary shares of £5 par; dividends have ranged from 40% in 1897 to 110% in 1906. Dividends were small at first, because the company was seriously handicapped by 3 different sets of mortgage bonds, bearing 5% interest. In 1895 the mortgage debt was consolidated into a single issue of £3,600,000 1st mortgage debentures, bearing 4% interest, with a sinking fund and semi-annual redemption, which would have extinguished the mortgage in 1919, but, by the use of new share capital November, 1905, floated at the tremendous premium of 1.160%, the company placed itself in an impregnable financial position, the credit for this able stroke of finance having been due mainly to Mr. Fielding. Recent dividends on ordinary shares have been as follows: £3 12s. 6d., or 72½%, for 1901; £2 10s., or 50%, for 1902; £3 10s., or 70%, for 1903; £3 10s., or 70%, for 1904; £4, or 80%, for 1905; £5 10s. or 110%, for 1906, £4 7s. 6d., or 87½%, for 1907; £2 15s., or 55%, for 1908; £3, or 60%, for 1909, with an interim dividend of £2 10s. for 1910; £2 12s. 6d., for 1911; £4 10s. in 1912; £3 15s. in 1913; £1 15s. in 1914; £2 15s. in 1915; £4 15s. for ordinary and 5s. for preferred in 1916; £4 10s. in 1917; £2 10s. in 1918. £2 in 1919; none for 1920 and 1921, breaking a record of continuous payments since 1879. In 1920, only preference dividends were paid (5s.); and £772,586 invested in British War Loan and gilt edge shares.

or year ended Dec. 31, 1920, showed, operating profit, lance, £348,670; dividends absorbed, £81,250; balance reserve fund, £500,000; staff provident fund, £199,132. acres, freehold, of which 4,710 acres were secured overnment. Mining operations are conducted in an p. miles.

s of the Rio Tinto occur as mammoth lenses with d porphyry to the N., and are capped by large masses

The main orebody is cupriferous pyrite, carrying minute grains of chalcocite and chalcopyrite. The l to a depth of 100' where the zone of secondary en- uing to an average depth of 300'. Ore ready for ex- bout 56,000,000 tons, but diamond-drill borings have oodies carrying upwards of 130,000,000 long tons of serves for about 60 years' production, and it is unlike- of the orebodies available has been proven. The ore used largely in the manufacture of sulphuric acid, ceous ore consisting of copper sulphides disseminated gangue.

overburden there are 14 steam shovels, the largest u. yds. capacity, and about 2,000,000 cu. meters of d yearly, though this figure has been considerably : under exceptional requirements.

ed is graded in 3 classes: (1) smelting ore carrying port ore about 3.5% copper, and 45 to 50% sulphur; 5 to 2% copper only. The average amount of copper leached has ranged from 1.5% copper, in 1876 the : by the present company, to 3.234% in 1884.

: mine for 1912 was 2,406,969 tons, carrying 2.18% tonnage has gradually increased. The ores carry an er per long ton, with traces of gold, and consider- y the Claudet process, at the smelter. About one- ction is exported for sulphur contents, about one- balance either leached or sent abroad. In the zone t. The ores average 4 to 5% copper and with depth ue, until at about 1,000' depth the average copper .25%. Owing to the ore being unusually rich in res of the Rio Tinto are in good demand, and in various British works the company exported washed antities to Germany, France, Belgium, and a number ited States. **Reserves:** on the surface were estimated 10,000 tons of ore in the leach-piles, containing 150,-

Tinto has three mineral zones, known as the South n Dionisio or Middle lode and the North lode, in e are two smaller detached lenses adjacent to the are being worked opencast. There are 5 different worked opencast, and one underground. The under- d pillar-and-stall, with levels at intervals of 12½ ned 4 meters high and the entire floor divided into of 4x4 meters, leaving pillar of 6x6 meters, with ory method of extraction, leaving as it does more : mined.

ine, the westernmost and deepest of the group, has depth. The work of changing over the San Dionisio was begun 1907, and completed 1911. The over- ially of porphyry and slate, was removed by steam ough tunnels on the different levels, similar work h lode, opencast extension. Ore will be mined by

steam shovels to as great a depth as practicable, below which it will be necessary to hoist by shafts to the lowest tunnel level. The San Dionisio is likely to be the chief source of ore supply for several decades to come and work has been planned systematically for 10 years in advance.

Most of the ore mined is hauled out through tunnels without the need of shafts or engines. The lowest tunnel now in use for the 2 main lodes, the South and Dionisio, has not proven deep enough and management plans driving a new tunnel, 200' below the present one, which will be 3 miles long, and will require 3 to 4 years for completion.

Wherever possible mining has been done by open pit workings which have the great advantage of giving complete extraction of the ore. The depth of the largest pit is about 600' and beyond the great pit the immense orebodies are worked by drift-stopes, the capping being blasted and sent down the shafts to fill and hold the ground as the ore is removed. Steam shovels have replaced manual labor to a considerable extent in opencast ore extraction.

Smelter contains 5 blast-furnaces of 250 tons capacity of ore daily and 15,000 to 25,000 tons of blister copper annually; 4 McDougali roasters; a 50-ton daily sulphuric acid plant; and a leaching plant having ponds with a capacity of 5,540,000 cu. meters of ore. The blister contains 98.58% copper, 19.35 oz. silver, and 0.25 oz. gold per ton.

Production: 1876-1916, was 20,000,000 tons of pyrite shipped, and 40,000,000 tons of ore treated locally, a total of 60,000,000 long tons, this ore yielding 730,000 long tons fine copper. No production figures are available since 1913, on account of war reasons, but considering strikes and temporarily reduced yields, these figures are approximately correct. In 1913 there was shipped 652,168 tons of pyrite, while 1,207,403 tons of 2.19% ore was treated at the mines. This total of 1,859,571 tons compares with 2,406,969 tons in 1912; respective copper outputs were 44,978,880 and 57,395,520 lb.

In July, 1919, the daily output was 4,000 tons of 46% sulphur ore and 1,000 tons of highly siliceous, high-grade copper ore. There were 9,000 men on the payroll. Operations were seriously hampered during 1920 by labor trouble, and the mines were practically idle during last half of year.

The management of the company is both technically and financially above criticism, and the mine itself, after 3,100 years of production, requires no commendation.

SAN MIGUEL COPPER MINES, LTD.

SPAIN

Liquidated. Fully described in Volume XIV.

THARSIS SULPHUR & COPPER CO., LTD.

SPAIN

Head office: George Reid, sec., 136 W. George St., Glasgow, Scotland.

Mine office: Huelva, Spain. **Works** in Great Britain; Hebburn-on-Tyne, Willington Quay, Cardiff; and Glasgow.

Directors: W. P. Rutherford, chm. and managing director; Albert J. J. Messan, Hugh Brown, F. Alexis Ducoing, Sir Herbert E. Maxwell S. C. Hograth, F. A. L. Leprince-Ringuet, T. G. Hardie, G. E. I. Messan, Lord Glenconner.

Inc. Oct. 27, 1866, in Great Britain. **Cap.** £300,000, since increased by amalgamation with other companies and the issue of new capital, to £1,250,000. Shares £2 par, fully paid.

Dividends: begun 1868, have been paid since without the lapse of a single year, and have averaged 18% per annum. To the end of 1920 they amounted to the magnificent total of £10,999,057, putting this company well to the front among profitable mines of the world. In 1919 dividends amounted to £109,375 or 12½% less income tax, and in 1920 to £131,250 or 15%.

In addition to dividend disbursements, the company has written off sums aggregating £2,729,109, and on Dec. 31, 1920, had £357,530 in cash and securities. Net profits of operations have ranged from a minimum of

£27,
£16

maximum of £478,878 in 1899, with £162,743 in 1909; £188,140 in 1911; £253,066 in 1912; £246,727 in 1913; £103,291 in 1915; £199,150 in 1916; £158,078 in 1917; £103,797 in 1919; £134,949 in 1920; £45,945 in 1921.

Number of cupreous and iron pyrite mines at Tharsis in the

Spain, some of which were worked in ancient times by

the Phoenicians before them. At this time the ore comes principally from the Calanas, from which 328,237 tons of sulphur ore were extracted in 1919, 251,620 tons in 1920; 222,577 tons in 1921. This million tons of ore now awaiting extraction, and the depth still undetermined.

In the early years of the company, the Tharsis group of mines was the main source of supply, but the richer ores of that property becoming exhausted the Calanas mine became the mainstay of the company's production. The Bullones mine at Tharsis also supplies a part of the output, yielding 33,946 tons in 1921 compared with 59,821 tons in 1919. The North Lode output was 4,235 tons in 1921, 4,477 tons in 1920. The North Lode is also developing into

the company also owns the Almagrera and Lagunazo mines, both within the Tharsis group.

The Tharsis group is connected with the port of Huelva by the company's 29 miles long, from which a branch line, 18 miles, runs to the north.

Due to the low copper content of the ore now being produced the company's production of refined copper is much reduced, from 13,544 tons (30,258,560 lb.) in 1884 to 4,066 tons (9,107,172 lb.) in 1917; 3,246 tons in 1918; 260,801 tons in 1919; 313,918 tons in 1920.

KALI CO., LTD.

SPAIN

Headquarters: 10, Abchurch Lane, Liverpool, England. **Mine office:** Valverde del Camino, Spain. **Works offices:** Widnes and St. Helens, Lancashire.

Max Muspratt, chairman; E. Mount, sec., C. Kaesmacher, Hill & Steward, cons. engrs.

Great Britain. **Cap.** £6,105,240. Net earnings were £287,721 in 1920, of which £93,871 was disbursed for interest on debentures.

The company is primarily a chemical and manufacturing corporation, the mining being merely a small branch of its business, which embraces subsidiary works and corporations, some of the plants of very large capacity.

The company has its principal works at St. Helens, Runcorn, and Glasgow, making extensive use of Spanish pyrites, which are roasted in the presence of sulphur, after which the cinder remaining is leached for copper. The company's copper properties in Spain include the Sotiel Coronada mine, the Castillo del Buitron mines, held under lease from the Cia. de Buitron, and Tinto and Santa Rosa mines, all in the province of Huelva.

These properties show typical Huelvan slates, carrying lenticular deposits between slate and porphyry, having a general N.-W. to S.-E. dip from 30° to vertical, carrying cuprififerous pyrite.

Sotiel Coronada mine, 666 hectares, produces cuprififerous pyrite which is treated as cement copper equivalent to an annual output of about 1,000,000 lbs. of copper yearly.

At the Castillo del Buitron property is a group of 4 concessions, 47 acres, in which mining is done by both underground and open-cut operations, with the ore being stoped, with dry walling and rock filling for depleted stopes. The principal ore above 1.5% copper is exported, the low-grade ores being treated at the mine, and washed sulphur ore exported.

Castillo del Buitron property is a group of 4 concessions, 47 acres,

at Zalamea La Real, and includes La Poderosa group of 6 hectares, adjoining, and the Concepcion mine of 6 hectares, at Almonaster. The 2 principal lenses of ore of the Castillo del Buitron group are the Levante, with a length of 150 meters, but of irregular outline, and the Poniente, about 200 meters long. Production of this group averages 1,500,000 lbs. fine copper yearly.

The Tinto & Santa Rosa group includes La Santa Rosa and El Tinto mines, having a combined area of 141 hectares, at Zalamea La Real. The Santa Rosa mine has 2 parallel lenses, with 7 levels opened, and the Tinto mine has ores said to average about 1.5% copper and 46% sulphur. The group has 9 shafts, and was estimated 1908, by the Spanish Government, to have 1,500,000 metric tons of ore developed. Production from this group is estimated at about 2,000,000 lb. fine copper yearly.

The company controls the Ferrocarril del Buitron, a narrow gauge railroad running from Castillo del Buitron to Huelva, equipped with 18 locomotives.

Production: from Spanish mines was 100,000 metric tons of cupriferous pyrite and 1,350 tons of copper precipitates in 1920. The company formerly was a large purchaser of iron pyrite, but its own mines now meet its requirements.

SWEDEN

LAKE COPPER PROPRIETARY CO., LTD.

SWEDEN

Office: E. M. E. Culverhouse, sec., 85 London Wall, London, E. C. 2, England.

Directors: Col. Lynch-Staunton, chairman; R. C. Lambert, Edw. Manville and Jas. Swinburne. James Swinburne, cons. elec. engr.

Inc. March 18, 1906. **Cap.** £300,000 in 298,000 ord. £1 shares; 255,500 issued and 40,000 def. 1s. shares, all issued. Debentures £500,000, 6%, issued June, 1912; repayable in yearly drawings between December 1922-1932; issued £218,180.

Company paid £200,000 cash for all the shares of the Lake Copper Grufaktiebolaget, owning 1,500 acres of mining leases.

Balance sheet for year ended Dec. 31, 1920, shows cash, £8,807; shares and rights in other companies, £259,326; mortgages, £9,744; advances to mining companies, £279,977; machinery, £14,644; machinery suspense account, £11,503; total, £584,003; outstanding capital, £257,500; debentures, £218,180; loans, interest, etc., £4,030; P. & L., £8,422.

Property: the Stora Strand and Vingnas mines about 90 miles N. of Gothenburg, Sweden. Orebody on the Stora Strand has been proven for over 10 miles in length and to 800' depth and carries copper-silver-gold values. Reserves estimated at 100,000 tons of ore. Ore occurs in a slate bed and averages 2% copper.

Development: by 13 shafts on the Stora Strand and 4 on the Vingnas.

Equipment: (at Stora Strand mine) three air-compressors, drills, electric hoist. A concentration mill was put into operation early in 1921.

WAH CHANG MINING & SMELTING CO., LTD.

CHINA

Main office: Changsha, China. **Other offices:** 9 Ningpo Road, Shanghai, China; Wah Chang Trading Corporation, Woolworth Bldg., New York; H. M. Newhall & Co., Newhall Bldg., San Francisco; and H. E. M. Bourke, 21 Great Winchester St., London, E. C. England.

Officers: Y. H. Wang, pres.; H. Y. Liang, v. p.-chief engr.; K. C. Li, v. p.-New York mgr.; M. C. Wang, v. p.; N. F. Chu, v. p.-treas.; S. L. Tang, supt.-asst.-treas.; K. K. Chang, sec.; T. W. Tseng, asst. sec.; D. C. Chow, Shanghai mgr. **Auditors:** Y. G. Chow, M. H. Li, and C. F. Tsai. **Directors:** H. L. Shuan (chairman); H. Q. Liang, Q. Yang, C. T. Chow, D. W. Tang, P. Q. Yuen, H. K. Liang, L. C. Tsow and F. C. Chow.

The Wah Chang company was formed in 1898, under the name of Kiu-Tung Antimony Mining Co., and was the first antimony mining company in China. In 1908 it was reorganized, and obtained a patent for its antimony smelting process from the Chinese Government. In addition to this, the company obtained a monopoly of the smelting of antimony in the province of Hunan, to extend over a period of 10 years as from 1908. It has since been extended for a period of 25 years. Under this monopoly, no company has the right to erect works in the province, unless the consent of the Wah Chang company is obtained. The patent granted extends over the whole of China.

The main office is situated at Changsha, next to the antimony works, which extend over a large area, and includes in addition, a lead plant, warehouses, etc.

The Pao Hua Co. (q. v.), operating in the province of Yunnan, is associated with Wah Chang company.

Antimony Mines: (1) the Yi-Yang, a good property with modern mining equipment. A railway has been built to connect the mine with the river; (2) the An-Hua mines; and (3) the Lu-Lin mines.

Tin Mines: the An-Yuen and Poo-sha.

Tungsten Mines: the Yao Kan Sian and Ton An mines. Each mine is controlled by a subsidiary of the Wah Chang Company.

Lead Mines: the Tien For Tai mines.

Products: the principal product is the WCC Antimony, with a guaranteed minimum purity of 99% Sb., but assaying 99.6% and over. Company also markets Chinese needle antimony, white oxide of antimony, and antimony ore; tungsten concentrates, which assay 70% WO₃, and over; lead and zinc ores; and Chinese No. 1 tin ingots. The antimony, tin and tungsten are shipped all over the world. The lead is entirely disposed of in China for domestic purposes.

At the antimony works the Herrenschildt process is used. This was described by K. C. Li in a paper prepared for the American Institute of Metals, and reprinted in the E. & M. Journal of October 20, 1917, also by C. Yu Wang in Bull. 136, of the A. I. M. E. in April, 1918. The ore mined is low-grade. In 1915 and 1916 there was extracted from accumulated residue over 9,000 tons (20,160,000 lb.) of metals. The works treat custom ore.

This company is the largest antimony producer in the world and supplied 55 to 65% of American imports since 1915. Exports of antimony from Changsha to the United States during 1916, amounted to 4,762 tons.

against \$1,500,000 in 1915. The 1917 figures were 3,712 (U. S.) plus 454,836 Hankow taels (83 to 106 cents) at Changsha in 1917 to all countries were 21,333 tons of ore, valued at \$2,252,807; 102 tons of ore, \$9,394, and 14,804 tons of concentrates, \$3,712.

CHANG TRADING CORPORATION.

100 Colworth Bldg., New York.

Li, pres.-treas.; G. K. Li, v. p.; Guy C. Riddell, sec. In the winter of 1914-15 the Wah Chang Mining & Smelting Co. opened a branch office in America for the direct sale of its business, which began in a small way with the handling of tungsten ore only, rapidly developed, and in 1916 it formed a New York corporation under the above title with a capital of \$100,000. It did not become operative until March 1, 1918, when the capital was increased to \$1,000,000, and the entire business of the Wah Chang Smelting Co., Ltd. branch office was taken over.

In May, 1919, the capital was increased to \$2,000,000. The Wah Chang Trading Corporation is a representative of Wah Chang M. & S. Co., outside of China, which recently took control of Wah Chang M. & S. Co.'s agencies in America. The scope of the business has been greatly extended, and now includes tungsten metal (crude and oxide), tungsten and other ores, tin, silk, and machinery, pig iron, railway equipment, soda ash and aluminum, brass and general equipments as exports.

CHANG TRADING CORPORATION, LTD.

CHINA

R. D. James, sec., 2 Broad St. Place, London, E. C. 2, Eng-land.

H. Edwards, chm.; R. Jaeger, J. P. Kendrick and H. W. Lee, v. p.

1918. Cap. £300,140; 1,120,000 pfd. ordinary, 5s par, 20s par, and 2,800 deferred shares, 1s par; 2nd and 3rd class of 508,620 of pfd. ordinary of which 291,652 are fully paid, the balance unpaid.

The company was organized to acquire concessions in China and elsewhere. In 1921, it took over the Eastern Pioneer Co., Ltd. with its Szechuan concession in S. W. China, agreeing to exchange its pfd. stock with that of the E. P. Co. on an equal basis, but E. P. stock to be assessed 2s per share. Revolutionary conditions in China have seriously handicapped operations.

MING HSING MNG. CO.

CHINA

100 Tengyueh, Yunnan, China.

Wu Shih-shun, pres.; J. W. Finch, engr. in chief; J. A. T. Metcalf, met. engr. There are 5 directors.

Under a Chinese charter in Sept., 1919; with capital of \$1,000,000, the company is a government of Yunnan province and New York-Orient Mines Co. property; an old lead-zinc-silver mine which is being reopened. Recently it has acquired a tin property in Cochiu and the Tungchwang copper mine and is carrying out a geological investigation.

MANGANESE MNG. CO.

CHINA

100 Changsha, Hunan, China.

The company operates manganese deposits. The construction of a reduction plant has been postponed indefinitely.

CYPRUS

CYPRUS SULPHUR & COPPER CO., LTD.

CYPRUS

100 F. A. Cassini, sec., 62 London Wall, London, E. C. 2, Eng-land.

Directors: G. M. Ritchie, T. D. Lawther and D. Max mining engr.

Inc. Oct. 28, 1909. **Cap.** £20,000; par £1; divided in B. of 10,000 shares each; a large stock interest is owned by the Copper and Sulphur Co., Ltd., of Spain. Name of company changed from Lymni, Ltd., was changed in 1919. Expenditures for 1919 and liquid assets £2,838.

Property: a concession covering a copper mine at Lymni with reserves of 3,000,00 tons of 1% and 400,000 tons of 10% at end of 1910. Development and experiments in ore treatment continued.

Examined by Wm. Young Westervelt.

DUTCH EAST INDIES

These islands, especially Billiton and Banca, are noted for their important production of tin, from 20,000 to 25,000 metric tons per year. Precious metals are also produced, the output in 1919 amounting to 100 oz. of gold and 1,002,000 oz. of silver.

AEQUATOR, MYNBOUWMAATSCHAPPIJ

Address: Pajakombo, Sumatra's Westkust, Dutch East Indies.

Property: a concession, includes the Mangani mine which covers quartz veins in andesite. The ore carries manganese and silver values.

Production: in 1919 was 76 kgm. gold and 11,639 kgm. silver.

ALGEMEENE INDUSTRIE MYNBOUW en EXPLORATIE (Kliripan Mine)

Address: Batavia, Java. **Mine address:** Djokja, Java.

Property: 2 concessions including the Kliripan mine in Djokja district. The orebodies occur in a limestone formation. Production to date is small.

BANCA TIN MINES

Comprise the very important Government owned tin mines on the E. and N. coasts of the island of Banca. Pay gravel, clay, sand and gravel up to 65' deep, and carries a large amount of tin. Development is by open cuts. There are central offices in different districts.

Production: in 1919 was 12,401 metric tons of tin.

BILLITON MAATSCHAPPIJ

Address: Tandjong Pandan, Billiton, Dutch East Indies.

Property: a concession covering the whole island of Billiton, 700 sq. miles, granted in 1852 and expiring in 1927, 5% of the production paid to the Government.

Cassiterite (tin oxide) occurs in alluvial deposits on the contact of granite with sedimentaries. Alluvial deposits on the surface are exhausted and deeper deposits up to 80' are worked. Drilling: 9½ oz. to the cu. yd. is workable. Two lode mines at Gartoemedang, are worked, the ore carrying 2½% cassiterite.

Development: of alluvial deposits by hydraulic mining and of lode mines by open cut and shaft; that of Tikong by deep, with 3 levels and over 6,000' of total workings.

Equipment: includes a 4,000 k. w. electric power station, 2 of oil engines, suction and bucket dredges, hoists, etc. 2 concentrating mills handling 200 tons of ore daily. 17,000 Chinese; 17,000 are employed directly and indirectly.

Production: of tin in metric tons: 4,632 in 1914; 5,191 in 1916; 6,479 in 1917; 8,250 in 1918; 7,207 in 1919. In 1919 total output was recovered from 2,576,369 cu. yd. of a

is shipped to the Dutch East Indies, Straits Settlement.

**EXPLOR. & EXPLOIT. MAATSCH. BOLANG MONGONDOU
(Goeroepahi and Mintoe mines) CELEBES**

Address: Goeroepahi, Menado, Celebes, Dutch East Indies.

Property: consists of 2 concessions in Menado district, island of Celebes, granted in 1917, includes the Goeroepahi and Mintoe mines. Gold and silver-bearing quartz veins occur in late Tertiary andesite. Mintoe has not reached the producing stage.

Production: at Goeroepahi in 1919 was 359 kgm. gold and 215 kgm. silver.

KETAHOEN, MYNBOUW SUMATRA

Office: Batavia, Java; or at mine, via Benkoelen, Sumatra, Dutch East Indies.

Property: on island of Sumatra, is a large and well equipped silver-gold mine. For geology, see Redjang Lebong. Closed down since 1918.

KINANDAM-SUMATRA MYNBOUWMAATSCHAPPIJ SUMATRA

Address: Pedang, Sumatra, Dutch East Indies.

Property: a concession, which includes the Salida mine, on the W. coast of island of Sumatra, granted in 1909. Quartz veins occur in andesite; ore carries gold and silver.

Production: in 1919 was 223.5 kgm. gold and 6,409 kgm. silver.

LEBONG SIMPANG MINE SUMATRA

This and the Tambang Sawah mine are Government owned. Both are in the Benkoelen district, island of Sumatra, and show gold and silver-bearing orebodies in andesite. Still in prospective stage.

PALELEH, MYNBOUWMAATSCHAPPIJ CELEBES

Address: Batavia, Java. **Mine office:** Menado Celebes, Dutch East Indies.

Property: a concession in Menado district, island of Celebes, granted in 1897, includes the Paleleh mine. Orebodies occur in brecciated and propylitic rocks, and contain pyrite, chalcopyrite, galena and sphalerite, with gold and silver.

Production: was 288 kgm. of gold and 286 kgm. silver in 1919.

REDJANG LEBONG, MYNBOUWMAATSCHAPPIJ SUMATRA

Office: Batavia, Java.

Mine address: Lebong Donok, Benkoelen, Sumatra, Dutch East Indies.

Property: a concession in the Benkoelen district, island of Sumatra, granted in 1899. It includes the Redjang Lebong a large and well-equipped mine producing silver and gold.

Geology: the gold-silver deposits are of Tertiary age and closely connected with andesite and dacite flows and trachyte. The veins are persistent and formed of finely-banded quartz with a little calcite, and variable quantity of sulphides. Selenium is always present.

Equipment: water-power, full mining equipment. The mill contains stamps, tube mills, sand and slime tanks and a cyanide plant. Decantation and filtration are practised.

Production: in 1919 was 21,089 oz. gold and 123,476 oz. silver.

SIMAU, MYNBOUWMAATSCHAPPIJ SUMATRA

Address: Batavia, Java, **Mine address:** Lebong, Tandai, Benkoelen, Sumatra, Dutch East Indies.

Property: two concessions granted in 1906 and 1916 in the Benkoelen district, island of Sumatra, includes the Simau and Gloemboek mines. Ore deposits carrying gold and silver are closely related to flows of Tertiary andesite and trachyte.

Production: from the two mines in 1919 was 1,111 kgm. gold and 8,836 kgm. silver.

SINGKEP TINMAATSCHAPPI

Singkep tin mines

Address: Singkep, Riouw, Dutch East Indies.**Property:** a tin-mining concession covering the whole island of Singkep, granted in 1893, and a concession on undersea areas S. E. of Singkep, granted in 1907. Geology is similar to that of the Billiton Co., which sec. alluvial deposits are worked through adits, or by offshore dredges handling each and littoral gravels.**Production:** in 1920, land deposits yielded 239 and sea shore deposits 79 metric tons.**BOENGAI PAGOE, N. V. MIJNEN SYND.****SUMATRA****Address:** Batavia, Java, Dutch East Indies.**Property:** 4 concessions in district of Sumatra's Westkust, granted in 1916. Lead-copper ore, with gold and silver, occurs in granodiorite and serpentine rocks. Is not as yet a producer.**LAMBANG SAWAH MINE****SUMATRA**

See Lebong Simpang Mine.

TOTOK, MYNBOUWMAATSCHAPPI**CELEBES**

(Totok Mine)

Address: Batavia, Dutch East Indies.**Property:** a concession in Menado district, on the northern peninsula of the island of Celebes. Gold ore occurs as white quartz forming pockets and stringers in metamorphic limestone overlying amphibole-andesite.**Production:** in 1919 was 157 kgm. of gold and 73 kgm. of silver**FEDERATED MALAY STATES**

This peninsular is best known for its tin mines which produce 35,000 to 40,000 tons annually, or about 30% of the world's supply. Gold mining is also carried on though apparently not very profitably.

The mineral industry is controlled by British and Australian investors, as is also the case in Siam, and to some extent in the Philippine Islands.

ASAM KUMBANG TIN DREDGING, LIMITED**MALAYA****Offices:** Taiping, Perak, Federated Malay States and Challis House, Martin Place, Sydney, New South Wales, Australia.**Directors:** A. W. Freeman, chm.-mng. dir.; W. A. Freeman, A. H. Rix and F. Leverrier. Hy. K. Bennett, sec.; Miss L. B. White, sec. at Sydney; A. J. King, mgr.**Inc.** June 30, 1920, in Federated Malay States to take over holdings of an Australian company of same name (see Vol. XIV), now in liquidation, with W. A. Freeman, liquidator. Stock of old and new companies were exchanged share for share. Dividends 3s in 1920. **Cap.** £150,000; £1 par; 75,000 issued, of which Austral Malay owns 22,525 shares. Financial statement of old company June 30, 1920, shows assets of \$1,196,240, of which \$30,619 was cash and accounts receivable; liabilities include \$410,349 in loans and accounts payable. Surplus transferred to new company was \$143,034. Of the loans \$278,000 was due the **Kampong Kamunting Tin Dredging, Ltd.**, later reduced to \$11,143 by issuance of 25,000 Asam shares. For 6 months ended June 30, 1920, ore sales were \$388,699; operating expense, \$83,471; and net profit, \$134,548.**Property:** 845 acres of tin-bearing alluvial ground near Taiping. There were 331 holes put down, revealing 18,850,000 cu. yd. carrying 0.9 lb. tin oxide per yard; also 32 bores showing 2,000,000 yd. of 0.58 lb. gravel.**Equipment:** a new dredge of 100,000 yards monthly capacity was installed early in 1920.**Production:** for 6 months ended June 30, 1920, was 239 tons tin oxide from 522,400 cu. yd. of material at a cost of 15.98c. per yard. Recovery has equalled the estimated tin content of the ground.**AUSTRALIAN**

Officers: directors and officers, same as Asam Kumbang Tin Dredging (q. v.), except that H. Huntsman takes the place of A. H. Rix on the directorate.

Inc. June 30, 1920, in Federated Malay States. **Cap.** £50,000; £1 par; 20,000 issued. Was formed to take over holdings of an Australian company of same name (see Vol. XIV), now in liquidation, with W. A. Freeman, liquidator. Stock of old and new companies were exchanged share for share.

Dividends: 3s. in 1920.

Company is a holding corporation interested in the Asam Kumbang (22,525 shares), Kampong Kamunting (8,000 shares) Larut Tin, Ulu Yam Tin (21,600 shares), and Kamunting Tin, which see. Other properties; after being explored and proven, are organized into operating companies. In 1920, 15 properties were investigated.

Balance sheet Dec. 31, 1920, shows assets, \$536,090, which includes \$60,000 loan to Asam Kumbang; cash and accounts receivable, \$6,619; current liabilities were \$3,136. Gross income was \$39,790 largely in dividends received, and expenses were \$13,598.

BADAK COMPANY

MALAYA

Successor to Badak Mining Syndicate, in April 1920.

Office: M. I. Murchie, legal mgr., Melbourne, Australia, J. R. Raleigh, gen. mgr.; H. F. Scarborough, field mgr.

Inc. 1919, in Victoria. **Cap.** £750,000; par £1; each of 400 Badak syndicate shares issued was exchangeable for 1,000 shares of new company, and holders had privilege of subscribing to 200,000 contributing shares at 4s.

Property: 5,000 acres at Jeneri, State of Kedah. On strength of drill holes giving up to 22 lb. tin per yard, shares of former company jumped £2,000 each early in 1920. A check on these high results was at first reported, but later drilling proved the ground, all but valueless. The whole business was apparently sufficiently scandalous to warrant Government investigation.

BADAK MINING SYNDICATE

MALAYA

See Vol. XIV. Succeeded by Badak Company, which see.

CHENDAI CONSOLIDATED, LIMITED

MALAYA

Offices: Station Hill, Redruth, Cornwall, England; and Ipoh, Perak, Federated Malay States.

Directors: F. D. Bain, chm.; and W. P. H. Chappel. S. Wicett, sec.; H. L. Armstrong, mgr.

Inc. March 19, 1914, in England. **Cap.** £60,000; £1 par; £45,950 issued.

Balance sheet for year ended April 30, 1920, shows revenue of £1,169 and loss of £823. Supplies and cash amounted to £1,398, and accounts and notes payable, £2,280; surplus was £186.

Property: 300 acres in Kinta district, State of Perak. Part of area is alluvial and is leased to tributers, who mined 37 tons of black tin in 1920.

Equipment: includes a 60-ton mill which did not operate in 1920, the Chendai lode mine being idle.

CHENDERANG TIN DREDGING, LTD.

MALAYA

Office: Bright & Galbraith, Ltd., sec., 7 Martin's Lane, Cannon St., London, E. C. 4, England.

Directors: J. I. Philips, chm.; Sir. Ernest Birch, W. Arthur Addinsell, R. L. Corbett and Jas. Sellar. N. F. Dare, gen. mgr.; M. T. N. Bluck, cons. engr.

Inc. Feb. 6, 1914, in Great Britain. **Cap.** £120,000; £1 par; 92,500 issued. During year ended March 31, 1921, net profit was £5,251. With previous balance there was available £10,444. Excess of assets over liabilities was £24,960. Profit in 1920, £12,720.

Dividends: 7½% in 1915-16; 5% in 1916-17; 10% in 1917-18; none 1918-

19; 10% in 1919-20; none since.

Property: 1,400 acres of tin-bearing ground, with options on 250 additional acres in State of Perak. **Equipment:** includes pipe-line, giants, elevators, dredge, etc.

Production:

Year	Ground moved, cu. yards	Black tin saved, tons	Average per yard, lb.	Cost per yard, cents
1920-21.....	965,000	339	0.79	8.5
1919-20.....	930,000	287	0.69	7.4
1918-19.....	890,000	169	0.44	..
1917-18.....	1,035,000	254	0.54	8.0
1916-17.....	1,100,000	260	0.53	7.4

Tributers produced 87 tons in 1920 and 104 tons in 1921.

F. M. S. TIMAH

MALAYA

Office: Bright & Galbraith, Ltd., secs., 7 Martin's Lane, Cannon St., London, E. C. 4, England.

Directors: John I. Philips, chm.; Sir Ernest W. Birch and W. Arthur Addinsell.

Registered May 1, 1920, to take over holdings of company with same name, registered Oct. 16, 1912. **Cap.** £90,000; par £1; all issued in exchange for issued stock (15,000 one pound shares) of old company. H. A. Huntley (address as above) is liquidator.

Balance sheet June 30, 1921, shows **assets** £112,870, of which investments was £86,798 (156,000 market value) and current £9,277; accounts payable were £22,869. P. & L. account for 14 months to June 30, 1921, shows net loss of £15,639. **Dividends** of old company, 1913-19 total 310% none since.

Company was organized to acquire and handle tin mineral lands of the Federated Malay States; and was instrumental in selling properties to Chenderiang Tin, Kampong Kamunting Tin and Kamunting Tin Dredging companies.

In year ending with June, 1921, prospecting work revealed favorable indications but actual development has been postponed. Late in 1921 company took over part of the **Ipoh Tin company's** mineral holdings and one dredge.

LARUT TIN DREDGING CO., LTD.**MALAYA**

Probably idle; one of many companies in which **Austral Malay Tin, Ltd.** is interested. Said to have tin-bearing ground in State of Perak yielding 1.10 lb. per cu. yd. No information since 1917-18 when Malcolm Newmar was manager.

MALAYAN TIN DREDGING, LTD.**MALAYA**

Offices: Portland House, 73 Basinghall St., London, E. C. 2, England; and Batu Gajah, Perak, Federated Malay States.

Directors: E. W. Birch, chm.; S. H. B. Blandy, Walter J. Payne and C. V. Stephens. A. H. Cullen, sec.; Wm. T. Back, act. mgr.

Inc. May 9, 1911, in England. **Cap** £250,000, increased Dec. 1918 from £125,000; £1 par; 180,000 issued.

Accounts for year ended June 30, 1920, show a revenue of £118,806, of which £31,279 was profit. Balance carried forward was £35,469 (less excess profits duty), compared with £47,869 and current liabilities, £25,305. Investments include Kramat Pulai shares.

Dividends: 10% in 1913; 5% in 1914; 20% in 1915; 25% in 1916; 25% in 1917; 10% in 1918; 20% in 1919; 20% in 1920.

Property: 1,697 acres in tin-bearing ground in the Kinta valley, State of Perak, of which 29 acres were exhausted, June, 1921.

Equipment: includes 4 steam-driven (coal) dredges, with 2 more of 120,000 cu. yd. monthly capacity each to be added in 1921. Operations began in 1913.

Production:

	Yardage	Tin saved	
		lb. per yd.	Cost per yd., cents
1920-21.....	3,258,200	0.64	...
1919-20.....	2,558,500	0.52	15.2
1918-19.....	3,256,540	0.49	10.6
1917-18.....	3,220,300	0.57	8.2
1916-17.....	3,141,300	0.59	8.2

NORTH TAIPING TIN DREDGING CO., LTD.**MALAYA**

Address: Taiping, Perak, Federated Malay States. Company is registered in Penang, Straits Settlements.

Property: tin-bearing placer ground near Taiping, adjoining that of Asan; Kumbang company, with a recoverable tin oxide content of 1.0 lb. per yard.

Equipment: one dredge taken over from the Bangnon Valley Tin (of Siam), in early 1919.

FAHANG CONSOLIDATED CO., LTD. (THE)**MALAYA**

Office: A. Giffard, sec., Blomfield House, London Wall, London, E. C. 2, England.

Directors: J. E. Champney, chm.; E. H. Finch, J. A. Scrimgeour, H. Frisby, Jr., and H. W. Thomson. The Borneo Co., mgrs., Singapore; J. T. Marriner, gen.supt.

Financial statement for the years ending July 31, shows a profit in 1915 of £103,963; £98,925 in 1916; £161,113 in 1918 and £68,414 in 1919. In 1920, total revenue was £455,806, of which £459,554 was for tin sales; net profit was £156,021, with balance forward after deductions of £22,437. As of Dec. 14, 1920, current assets were £182,197; accounts payable, £55,556 and reserves, £120,225.

Dividends: on preferred shares have been paid regularly, plus extras of 2½% in 1913; 5% in 1914 and 1915; 8%, 1916-17 and 1917-18; 5%, 1918-19; 8%, 1919-20. Common shares received 12½% in 1913; nothing in 1914; 15% in 1916; 20%, 1916-17 and 1917-18; 15%, 1918-19; 20%, 1919-20.

Property: mining rights over approximately 200 square miles of land containing tin lodes in State of Pahang. Company's rubber plantations, 3,800 acres were transferred to a new concern in 1920.

Development: there are 8 deep mines, in which a total of 7.50 miles of new work was done in 1919-20; workings total about 100 miles. Ore reserves amount to 700,000 tons. The Nicholson and Williks shafts are 1,626' and 1,200 deep respectively; the lodes opened by these shafts are the largest producers; one shoot is reported 48" wide carrying 6% tin.

Equipment: is remarkably complete, including hoists, pumps, turbo-generator, power-plant, compressors, ground tramway, steamers and barges on river, Diesel oil engines, 50 gravity and 4 Holman pneumatic stamps and concentrating plant, also complete medical department for 4,500 employees (mostly native). New machinery was installed 1920-21.

Production:

Year	Ore treated, tons	Tin oxide saved, %	Tin oxide, tons	Value of oxide, per ton	Cost per ton of ore treated
1919-20.....	178,200	...	2,199	\$1,572	\$14.15
1918-19.....	236,100	...	1,815	1,222	8.32
1917-18.....	187,300	1.69	2,114	879	5.38
1916-17.....	156,700	...	2,772	595	5.95

The tin oxide contains 71.5% metal. A small output comes from alluvial deposits worked by lessees.

This company is doing a large business, about which the shareholders are kept well informed.

PENGKALEN, LIMITED

MALAYA

Offices: Station Hill, Redruth, Cornwall England; and Osborne & Chappel, gen. mgrs., Ipoh, Federated Malay States.

Directors: Fred D. Bain, J. W. T. Bolitho; W. R. H. Chappel, W. B. Harris and Stanley Wickett. Tom Wickett sec.

Inc. Aug. 22, 1907, in Great Britain. **Cap.** £200,000 in 100,000 pfd. ord. 10% and 100,000 ord. shares; £1 par; increased from £100,000 March, 1920; 90,000 of each issued.

Financial statement for year ended September 30, 1920, shows total revenue of £36,142, of which £6,474 was from royalty and £27,926 from power sales. The profit was £15,412. After paying dividends and depreciation, the balance was £8,578. Cash and investments totaled £75,254 and accounts payable, £6,848.

Dividends:

Year	Preferred, %	Common, %

Office: A. H. Cullen, sec., Portland House, 73 Basinghall St., London, E. C. 2, England. **Mine address:** G. W. Simms, gen. mgr., Selangor, Federated Malay States.

Directors: C. V. Thomas, chm.; W. J. Payne, S. H. Moore, and F. D. Osborne.

Inc. Oct. 5, 1909. **Cap.** £180,000; par £1; 111,407 issued fully paid, of which Tronoh Mines, Ltd., owns 40,000 shares. Receipts for 1920 were £83,815, of which 83,223 was from ore sales; with a net profit of £17,615.

Dividends: first in 1916 with total of 35% to end of 1919; 15% in 1920.

Property: a lease on the Sungei Besi tin mines, 117 acres, in Kuala Lumpur district, State of Selangor. Drilling is underway on 25 additional acres on the N., now being acquired. Company has also a lease on the Kepong mines, which are however not profitable at 1922 metal prices. Equipped with puddling plant.

Production: in 1918 was 405 tons of ore from 202,887 cu. yd.; in 1919, 423 tons from 194,582 yd.; in 1920, 363 tons from 197,796 yd. From Kepong, 230,000 yd. yielded 121 tons of ore additional in 1920.

TAIPING TIN DREDGING CO., LTD.

MALAYA

Address: Taiping, Perak, Federated Malay States.

Company registered in Penang, Straits Settlements, is operating a tin-bearing area in Malaya with dredge acquired from Deebook Dredging early in 1919.

TEKKA, LIMITED

MALAYA

Offices: Tom Wickett, sec., Station Hill, Redruth, Cornwall, England; and Osborne & Chappel, gen. mgrs., Ipoh, Federated Malay States. C. H. Preedy, mgr.

Directors: F. D. Osborne, chm.; W. R. H. Chappel, S. H. Lanyon, Stanley Wickett and H. Rich.

Inc. March 15, 1920, to take over mineral holdings of company of same name (see Vol. XIV). **Cap.** £500,000; par £1; 358,577 shares issued. Old stockholders received 4 new shares for each old share held, with privilege of subscribing to 40,000 additional shares. Company controls Tekka-Taiping, Ltd., which see.

Profit of old company for year ended January 31, 1919, was £72,166, plus £13,336 from 1918, making £85,502 available; £37,987 was carried forward to 1920. For year ending March 31, 1921, total receipts were £53,834 with net profit, £20,502. Investments were £29,573 and cash, £9,709. Surplus was £1,778.

Dividends: of old company 69/6 (\$16.62) per share since 1909; exclusive of shares of Takka-Taiping distributed in 1913; 8/6 in 1918; 8/6 in 1919. By new company; 9d in 1920; 4½d in Jan. 1921.

Property: about 500 acres of tin-bearing land in Kinta district, State of Perak. Bedrock is limestone.

Equipment: water supply for hydroelectric plant, monitors and elevators; tailing dams; magnetic separator; 2 locomotives.

Production:

Year	Yardage sluiced	Yield per yd., lb.	Black tin, tons	Cost per yd., ¢
1920 (April '20 to Mar. '21)....	549,005	1.49	367	57.40

The total output of black tin was 1,122 tons, compared with 1,199 tons in 1919. This is one of the largest producers of Malaya.

SOUTH, LTD.

MALAYA

W. H. Cullen, sec., Portland House, 73 Basinghall St., London, E.C. 4, and Tronoh, Federated Malay States.

Chm.: C. V. Thomas, chm.; Sir E. W. Birch and W. J. Payne. Sec.: J. H. Rich. Cap. £100,000; par £1; all issued fully paid, in 1911. In 1919, there was an operating profit of £2,283. On Dec. 31, cash and investments £2,674. Current liabilities, £2,674.

Dividends: total 20%, from 1914 to July, 1918.

Operations: 258 acres of tin alluvial ground in Kinta Valley, State of Perak, operations ceased in mid-1918 and reported property to be sold to the company, Ltd., which sec. In 1920, new ground at Chemar was acquired and operations resumed.

MALAY TIN DREDGING, LTD.

MALAYA

Secs: Taiping, Federated Malay States.

Operations: An unexpected cost of dredge, company was reported to be £58,000 in 1921. A substantial stock interest in company is held by the Malay Tin, Ltd.

Operations: A tract of tin-bearing placer ground in State of Perak, part of which is estimated to contain sufficient material for one dredge for one year to run 0.80 lb. tin oxide per cu. yd. Dredge completed and operated early in 1922.

MALAY GOLD CO.

MALAYA

Operations: under this title in United States section of this volume.

INDIA

The Kolar goldfield, in the State of Mysore, is the one important gold mining area of India. The mines are all under one management with headquarters in London, and are all operating on one lode—the Champion Reef. It is a rather thin quartz vein, much folded in places, encased in hornfels-schist, which is surrounded by granite rocks. Operations are now at a depth of 4,000' or more. The gold is free and its extraction easy by amal-

gamation and cyanidation. Production averages around £2,250,000 annually. All machinery is driven by electricity generated 90 miles distant. The field has a very promising future.

ANANTAPUR GOLD FIELDS, LTD.

INDIA

Office: W. L. Bayley, sec., 6 Queen St. Place, London, E. C. 4, England.

Directors: Sir Donald Robertson, chm.; V. Herbert Smith, H. C. Taylor and A. E. Taylor. John Taylor & Sons, mgrs.-cons. engrs.

Inc. Feb. 1, 1906. **Cap.** £100,000; par £1; divided in 40,000 pfd., 30,-446 issued, and 60,000 common shares, all issued.

Financial statement, March 31, 1921, shows revenue of £2,396, largely dividends from associated companies, and £974 expense. Current assets were £12,805 and liabilities, £204.

Dividends; 60% in 1908-9 in shares of North Anantapur and 90% in 1911-12 in shares of Jibutil Gold Mines; otherwise none.

Anantapur Gold is practically a holding company, with options on a large acreage in the Anantapur district of Madras. Presidency, near Ramagiri, on which prospecting only is being done. Other holdings were sold to **North Anantapur** and **Jibutil Gold Mines** companies for cash and stock. In addition to stock distributed as dividends, Anantapur Gold owns 30,218 com. and 827 pfd. shares of North Anantapur and 535 Jibutil pfd. shares.

BALAGHAT GOLD MINES, LTD.

INDIA

Office: W. L. Bayley, sec., 6 Queen St. Place, London, E. C. 4, England.

Directors: Lord Ribblesdale, chm.; Sir Donald Robertson, A. C. J. de Lothiniere, Hy. C. Taylor and Arthur E. Taylor. John Taylor & Sons, gen. mgrs.; W. Pritchard, supt.

Inc. Oct. 18, 1919, as a reorganization of **Balaghat Gold Mng. Co., Ltd.** **Cap.** £154,000, in 95,400 10% pfd. fully paid, and 212,600 ord. shares 9s paid, 10s par; all issued. Capital decreased from £308,000 on reorganization. Company has stock interest in Anantapur and North Anantapur companies.

Gold bullion for 14 months in 1920 realized £163,716 and net operating profit was £33,296. Current assets over liabilities, Dec. 31, were £35,706. Surplus was £23,509.

Dividends: total 132½% on pfd. shares from 1900 to 1907 and 52½% on ord. shares from 1901 to 1906; none until 1920; then 10% on pfd.; 12½% on pfd. and 11¼% on com. in 1921.

Property: 1,565 acres in the Kolar gold field, State of Mysore.

Development: by shafts and extensive workings to the 4,000' level. On the 2,600' level a shoot, assaying 1.7 oz. gold was 3' 4" thick and opened for 842' long in 1920. Reserves in 1920 were 91,755 tons, compared with 75,030 tons in 1919. Also, 177,000 tons of tailing that carry recoverable values.

Equipment: is complete, including mine plant, stamp mill, and cyanide plant. A new 130-ton sand plant has been added, and slime plant increased to 250 tons.

Production:

Year	Ore, tons	Tailing, tons	Gold, oz.
1920	38,550	65,950	28,067
1919	33,600	62,800	25,395
1918	26,745	54,130	22,135
1917	28,525	61,600	19,929
1916	29,476	57,438	17,725

BALAGHAT GOLD MINING CO., LTD.

INDIA

Succeeded by Balaghat Gold Mines, Ltd., which see.

BALUCHISTAN CHROME CO., LTD.

INDIA

Office: W. H. Antram, sec., 19 St. Swithin's Lane, London, E. C. 4, England.

pid., and 110 ord. shares of £1 par, all issued.
Profit in 1919 was £24,938, and £62,542 was carried forward. Net current assets were £22,000. Dividends: 10% on pfce. in 1917; 12% pfce. and 20% on ord. in 1918; 10½% and 5% in 1919.

Property: 6,176 acres of mineral land in the Hindubagh district of Baluchistan.

Production: 10,417 tons of chromite in 1917; 21,724 tons in 1918; 18,839 tons in 1919.

BENGAL IRON CO., LTD.

INDIA

Successor to Bengal Iron & Steel Co.

Offices: C. E. Rutter, sec., Clutha House, 10 Princes St., London, S. W. 1, England; and Martin & Co., mng. agts., Calcutta, India.

W. T. MacLellan, chm. of directors and mng. dir.; J. Angus, cons. engr.; R. H. Nichols, gen. mgr., Kulti, Bengal, India.

Inc. Dec. 5, 1919. **Cap.** £2,500,000 in 750,000 7½% cumulative pfd., 500,000 issued, and 1,750,000 common shares, 1,572,983 issued; par £1.

Company has leases on Burrakur Ironworks, 1,500 acres, at Kulti, including four 80-ton blast furnaces, on coal mines, and on iron mines at Manharpur and Salai, in Singhbhum district, Bengal. The former are connected by 20-mile railway with the reduction works. Employs 10,000 Indians.

Reported that a new company with registry in India was to be formed, to succeed this one.

BURMA CORPORATION, LTD. (OF INDIA)

INDIA

Office: T. E. Dixon Smith, sec., 22 Merchant St., Rangoon, India. London agt. D. Anderson, 1 London Wall Bldgs., E. C. 2.

Directors: Sir T. R. Wynne, chm.; C. F. Clifton, Gerard Lovell, John Hogg, and A. T. W. Paine.

Staff in Burma: P. E. Marmion, gen. mgr.; A. R. Oberlander, gen. supt.; W. R. Degenhardt, chief engr.; A. B. Colquhoun, mine supt.; P. J. A. Plummer, smelter supt.; B. W. Lennon, mill supt.; L. McDonough, railway supt.

Inc. Dec. 17, 1919, in Rangoon, India, to take over assets of Burma Corp., Ltd. (of London) and its subsidiary Burma Mines, Ltd., in which the parent company held a 99.8% stock interest. **Cap.** Rs. 20,00,00,000; par Rs. 10; Rs. 13,54,16,890 issued, fully paid, in payment of aforesaid assets. Funded debt; £1,000,000, first mortgage 8% convertible 10 year debentures, all issued.

Gross revenue of 1920 was £1,206,757. After deducting operating expense, £719,360, development, £12,221, etc., profit was £455,516, reduced to £246,770 after appropriations for taxes, depreciation, interest, etc. Balance sheet of Dec. 31, 1920, shows cash, investment and accounts receivable, £610,767, and accounts payable, £403,021.

Property: 2,496 acres, including the ancient mines at Bawdwin, Upper Burma, is one of the greatest lead-silver-zinc mines developed in the past decade. Company also owns iron, coal and limestone deposits and timber lands.

Geology: ore deposit is a replacement of a fine-grained, dark-colored, silicified rhyolite, the impregnated zone being over 100' wide in places. Walls are not well defined. Ore is an intimate and complex mixture of sulphides, with irregular and varying amounts of lead and zinc. The best ore, carrying up to 50% lead, 50 oz. silver, and 25% zinc, is in the core of the deposit. Silver, which occurs as argentite, is constant as 1 oz. silver for each 1% of lead, irrespective of the zinc content. The vein has been developed for over 2,000' along its strike. Copper is making its appearance in the north end.

Development: by the Chinaman tunnel and the 7,400' Tiger tunnel, 8' by 10' in cross section and driven 500' below the former. The two tunnels

connected by an interior shaft. The Tiger tunnel is the main haulage drainage-level. Mining is done by square-set and timberless rill. The Chinaman and Shan orebodies are connected by haulage-ways at 653, 430, and 300' levels. Mine has over 20 miles of workings.

Reserves: at end of 1920 were 4,429,458 tons, assaying 23.2 oz. silver to the ton, 3% lead, and 17.7% zinc; of which 335,681 tons is copper ore averaging 2 oz. silver, 12.8% lead, 7.7% zinc, and 11% copper.

Equipment: a 60-mile 24" gauge railway connects the mines with the reduction works at Namtu, 13 miles distant, and with the Government works at Namyaio. Mine has 2 Diesel engines, compressors, machine-drills, a concentrating plant, a new 800-ton concentrating mill employing jigs, tables, and classifiers. Operation at end of 1920, but its flotation unit has not as yet met with success.

Roasting furnaces, sintering pots and machines, 3 blast-furnaces, steam turbo-blower. Also a 3-turbine 5,000 h. p. hydroelectric plant at Namyaio, 40 miles distant. For a 700 ton output, 2,300 employees are employed.

Production:

	Lead, tons	Silver, oz.
11 mos.).....	30,651	3,235,682
.....	23,821	2,869,727
.....	18,535	2,164,856
.....	18,641	1,970,503
.....	16,957	1,525,844
.....	11,088	1,105,603

In spite of its substantial output, Burma Corp. is still somewhat in the infancy stage but can look ahead with fair assurance when its metallurgical problems have been solved, and if and when it can obtain and hold adequate labor supply.

The plan adopted in 1919 involving new smelter and refinery to produce 6,000 tons of lead and 6,000,000 oz. silver was abandoned as too expensive, and in early 1921, was modified to deal with a daily output of 700 tons, yielding annually 45,000 tons of lead and 4,500,000 oz. silver. Construction of zinc works and new lead smelter were therefore suspended, and capacity of existing lead smelter increased from 1,800 to 3,000 tons, and silver output in proportion. E. P. Mathewson engaged as consulting engineer, reported of Jan. 1922, concurs in company's modified policy, and recommends: (1) that attempts to save zinc be discontinued for the present, (2) that zinc be selected and about 40% of mine run be smelted direct. (3) that zinc plant be increased by addition of another turbine, (4) that transportation be improved, (5) that a bag house be constructed, (6) that conditions of labor supply be improved. These recommendations are to be carried out.

BURMA MINES CORPORATION, LTD. (OF LONDON) **INDIA**
Incorporated in England in 1913, it owned 99.8% of issued stock of its parent, Burma Mines, Ltd. Company was dissolved, as of Aug. 23, 1921, its assets, as well as those of Burma Mines, Ltd., being taken over by a new Burma Corp., Ltd., (q. v.), incorporated in India. Shareholders of old company received fourteen Rs. 10 shares for each £1 share.

BURMA MINES, LTD. **INDIA**
Vol. XIV. Both this and the parent company, Burma Corp., Ltd. (of London) were liquidated beginning mid-1920, and assets of both transferred to a new company, Burma Corp., Ltd. (of India), which also assumed the Burma Mines debts.

COPPER CO., LTD. **INDIA**

ter, details of which will be found under the above name in the African section of this book. Company has optioned part of its ground to the Cordoba Copper Co., which see.

CENTRAL PROVINCES PROSPECTING SYN., LTD., THE INDIA

Office: Ernest Wallis, sec., 305 Winchester House, Old Broad St., London, E. C. 2, England. Col. Thos. Gracey, chm. of directors; Lt. Col. Thos. Gracey, mng. dir.; Hy. R. Holmes, agt.-gen. mgr.

Inc. Jan. 30, 1908. **Cap.** £300,000; par £1; all issued and fully paid. **Financial statement of Dec. 31, 1920,** shows net profit, £83,041 and £91,324 available with previous balance. Balance forward was £19,224. **Assets** include investments, £210,235; ore on hand and sold, £139,873; bills and accounts receivable, cash, etc., £194,048. **Liabilities** show bills and accounts payable, £169,302 and reserves, £243,331.

Dividends: 1908 (first) through 1918, plus bonuses, total 217%; 16% and 8% bonus in 1919; 8% in Oct. 1920.

Property: manganese mines in the Nagpur, alaghat and Bhandara districts, Central Provinces. The orebodies occur interstratified with highly metamorphosed sedimentaries. Company has been a consistent producer and reports at end of 1920 an ample supply of manganese ore available, but no market. In 1906, output was about 283,000 tons.

CHAMPION REEF GOLD MINES OF INDIA, LTD. INDIA

Office: F. H. Williams, 5 Queens St. Place, London, E. C. 4, England.

Directors: Lord Ribblesdale, chm.; Sir J. D. Rees, Sir J. F. F. Homer, Mrs. M. M. E. Tennant and Edgar Taylor, C. F. Heathcote, supt.; John Taylor & Sons, gen. mgrs.

Inc. Oct. 31, 1921, as a reorganization of **Champion Reef Gold Mng. Co., Ltd.**, in order to replenish the treasury. **Cap.** £260,000; 10s par; share all issued with credit of 4s paid; 1s has since been called. Stockholders of former company receiving 1 share of new for each 4 shares of old stock held.

Financial statement to Jan. 13, 1922, shows receipts, £44,155 of which £26,357 was stock assessment and £17,776 gold bullion; after deducting expenses, cash balance was £23,609.

Dividends: by old company, beginning with 1894, total £4,619,966; last of 4d on Jan. 29, 1921.

Property: 1,095 acres in the Kolar field, State of Mysore, India.

Development: by shafts, the deepest being Carmichael's and Glen's Secondary, 6,091' and 6,094'; and many miles of workings. During 1920 there were 9,281' of new openings, including 620' of shaft sinking, against 8,702' in 1919.

Ore reserves: are estimated at 248,846 tons, a decrease of 44,669 tons. Results in 1920 were not of great importance but in 1921, deep workings exposed narrow shoots, 6 to 10", averaging 1.73 oz. gold which it is believed can be worked at a profit. Operations have been handicapped by "rockbursts".

Equipment: complete modern mining plant, with 140 stamps, tube-mills, and cyanide plants. Native labor is employed, the pay roll numbering several thousand. A modern medical department is maintained by this and the other companies in the field.

Production; years ending Sept. 30:

Year	Ore, tons	Tailing, tons	Gold Value

1916.....	194,311	285,492	497,329
Total since 1892....	4,375,739	13,759,128

THE MINES HANDBOOK, 1922

11 months, 1920-21 production was 53,760 oz. in gold.

Champion Reef has been one of the world's great gold mines, and was expected that it can be rejuvenated by deep development made by increased working capital.

CHAMPION REEF GOLD MINING CO., LTD.

INDIA

Company in liquidation, F. H. Williams, liquidator, 5 Queen St. Place, E. C. 4, England. Last report, Sept. 30, 1920, shows excess of assets of £132,344 and surplus, £40,272. See Vol. XIV. Assets and liabilities transferred to Champion Reef Gold Mines of India, Ltd., (q. v.), members of old company accepting new stock on a short for share basis and assessment.

DEBA COPPER CO., LTD.

INDIA

Office: 5-6 Queen St. Place, London, E. C. 4, England. Mine address: Deba, supt., Rakha Mines P. O., Singhbhum district, Chota Nagpur, India.

Officers: Edgar Taylor, chairman; Hugh F. Mariott, C. O. Villiers, supt. of Harrowden, Richard E. Carr, J. E. Champney, directors; Handel Wells, sec.; John Taylor & Sons, mgrs.; J. Hocking, mine supt. Aug. 5, 1908, in Great Britain. Cap. £200,000; shares 5s par; all shares fully paid. Company is a consolidation of the Cerro Muriano Ltd., and North Cerro Muriano Copper Mines, Ltd. Financial statement for year ending Dec. 31, 1920, shows expenditures of £3,386; in London, £2,129; total, £5,516; receipts were £4,262. Balance sheet shows cash, investments and sundry debtors, £70,572; liabilities, £38.

Dividends: in 1912, 20%; in 1913, 20%; in 1914 and 1915, nil; in 1916, nothing since.

September, 1919, company announced the sale of its mining property in Spain for 1,000,000 pesetas. See Vol. XIV for a description of holdings.

Property: an option on 20 sq. miles of promising ground of the Cape Colony, in the Singhbhum district of Bengal, near the Rakha Hills about 6 miles S. of Rakha Mines Sta. on the Bengal-Nagpur Ry., in the Mosaboni, Laukesra, Surda, Dhobani and Badhia mines. The old and old time workings show a wide zone of copper-bearing schist and veins of chalcopyrite. Work up to end of 1920 was exploratory, and included various prospect shafts and trenches.

DEBHER MINE

INDIA

Property: a manganese mine in Gangpur native state, Province of Orissa, 250 miles westerly of Calcutta. Has practically been a non-producer since 1908. The ore, mainly psilomelane, occurs as much as 8 to 16' thick interbedded with schists and quartzites averaging 49% manganese. The largest of 7 exposures can be followed for 720'. Developed by open-cast work. A 6-mile narrow gauge railway connects mine with the Bengal-Nagpur railway.

DEBHAL SANDUR MNG. CO., LTD.

INDIA

Address: Ballary, Madras, India. Property: manganese mines in the Sandur hills, Kamataru district, about 100 miles N. W. of Madras. The deposits, tabular in form, occur in schists and slates, and are up to 100x700' in extent. The minerals are wad and psilomelane. Ore averages 45% manganese, 12% iron, 1% silica and 1% phosphorus.

DEBHAL IRON & STEEL CO., LTD.

INDIA

Address: Asansol, Bengal, India. March, 1918. Cap. £1,000,000. Company is (June, 1921) erecting two 150-ton blast furnaces at Asansol, Raniganj coal area, 130 miles N. W. of Calcutta, with estimated capacity of 110,000 tons of pig iron and 73,000 tons ferro-manganese. Mines near Gua Buru, Singhbhum district, Bengal, are said to show

large reserves, with iron ore.

INDIA MINES DEVELOP. SYN., LTD. **INDIA**
Officers: W. L. Bayley, sec., 6 Queen St. Place, London, E. C. 4, England; and W. R. Coleridge, agt., 8 Strand Rd., Rangoon, Burma, India. M. Low, chm. of directors; John Taylor & Sons, mgrs.-cons. engr.
Inc. July 14, 1919. **Cap.** £20,000; par £1; 13,338 shares issued, 17/6 paid, of which Mysore Gold Mng. Co. owns 3,333.
* Company formed to acquire and deal in mineral properties. Prospecting is underway.

JIBUTIL (ANANTAPUR) GOLD MINES, LTD. **INDIA**
Officers: W. L. Bayley, sec., 6 Queen Street Place, London E. C. 4, England.

Lord Vaux of Harrowden, chm. of directors. John Taylor & Sons, gen. mgrs.

Inc. Nov. 29, 1913, in Great Britain. **Cap.** £250,000; in 50,000 pfce. all issued, and 450,000 ord., 422,465 issued, of which 330,543 are 8s paid only; 10s par. Preference shares get 20% per annum.

The year ended Sept.30,1921, resulted in a loss of £4,896. Cash, etc. totaled £18,817, and accounts payable, £3,763. Debit balance, £64,519.

Property: about 3 sq. miles in Anantapur district of Madras, India.

Equipment: 20-stamp mill and cyanide plant.

Production: from December, 1913, to September, 1918, the total output was 35,816 oz. gold from 128,570 tons of ore. Milling operations suspended Oct. 1918 and part of machinery has been sold, but exploratory work has been continued.

KANBAUK (BURMA) WOLFRAM MINES, LTD. **INDIA**

Officers: W. J. Groves, sec., 34 Great St. Helen's, London, E. C. 3, England; and Foucar & Co., 63 Merchant St., Rangoon, India.

C. I. Lock, chm. of directors, C. M. Lyons, mgr.; H. D. Griffiths, cons. engr.

Inc. March 24, 1917, in Burma. **Cap.** £190,000; £1 par; 139,666 issued. Debentures, £60,000 authorized; £50,000 issued at 10% for 5 years.

Profit for 1919 was £6,578, with balance forward, £32,024. Liquid assets over liabilities, Dec. 31, 1919, were £20,053. Reserves were £21,725.

Property: lease of 4,732 acres in the Tavoy district of Burma, carrying tungsten and tin deposits. A concentrating plant is at work.

Production: 305 tons of wolframite in 1916; 358 tons in 1917; 377 tons in 1918; 294 tons in 1919.

MAWCHI MINES, LTD. **INDIA (BURMA)**

Office: J. A. Henderson, sec., 2 Broad St. Place, London, E. C. 2, England. **Mine office:** Mawchi, via Toungoo, Burma.

H. Greenwood, chm. of directors; F. M. Ball, mgr. in Burma. J. D. Hoffman, cons. engr.

Inc. Nov. 2, 1914, in Great Britain. **Cap.** £250,000; £1 par; 221,120 issued, of which Southern Shan States Syn., Ltd., owns 135,632 shares.

Also £50,000 of 6% debentures. Company holds stock interest in Kassa Mng. Co. of Nigeria, Africa.

Profit for year ended June 30, 1919 was £19,559 which with previous balance made £36,192 used for writing down development. Current assets exceeded liabilities by £47,251.

Dividends: 5% in 1916; 10% in 1917; and 5% in 1918.

Property: a concession of 11 sq. miles, 16 miles from Pazaung, in Southern Shan states, Burma, for which company pays rental and royalty to the government. Tin and tungsten deposits are worked, and reserves were 71,939 tons of ore estimated to carry 4.97% mixed concentrate.

Production: 639 tons of mixed concentrate from 22,071 tons in 1916-17; 678 tons in 1917-18; 1,030 tons in 1919.

land. **Directors:** Lionel Holland, chm.; J. D. Rees, Mrs. H. J. Tennant, W. F. Garland, Edgar Taylor, and Hy. Claude Taylor. R. H. P. Bullen, supt.: John Taylor & Sons, mgrs.

Inc. July, 1880, in England. **Cap.** £610,000, increased in 1919 from £305,000; 10s par; all issued. Company has a 3,333 share interest in Indian Mines Devel. Syn., which see.

Gross revenue in 1921 was £672,547 of which £648,762 was from bullion and profit, £207,800; with previous balance, £213,030 was available and balance forward after deductions was £108,838. Liquid assets, Dec. 31, 1921, were £620,763; liabilities, £112,760. Reserves were £181,857.

Dividends: total 3,275% to end of 1921 equal to £9,085,520. In 1922, 1s plus 6d bonus on March 31.

Property: 6,517 acres at Kolar, State of Mysore.

Development: by shafts over 4,000' deep and extensive workings on a narrow lode. Reserves were 837,000 tons at end of 1921. Due to abnormal conditions, development was 51,000' less than normal during the years 1914-1918. Extensions in 1920 were 11,737' and in 1921, 18,428'. Except in the Ribblesdale section of the mine, results have not been particularly encouraging.

Equipment: complete, with 160 stamps, tube-mills and cyanide plants

Production: to end of 1921 was 5,043,362 oz. gold from 6,137,653 tons of ore.

Year	Ore, tons	Gold Yield, oz.
1921.....	202,289	129,686
1920.....	233,503	156,801
1919.....	270,425	163,719
1918.....	293,186	174,301
1917.....	307,126	198,556
1916.....	305,845	197,303
1915.....	304,408	207,724

The Mysore has been one of the world's largest gold mines. Its depleted ore reserves are quite low-grade, but inasmuch as zones of impoverishment overlying high-grade ore are a feature of the mine, a campaign of deep development is underway made possible by the recent increase of capital.

NORTH ANANTAPUR GOLD MINES, LTD.

INDIA

Office: W. L. Bayley, sec., 6 Queen Street Place, London E. C. 4, England.

V. Herbert Smith, chm. of directors; John Taylor & Sons, mgrs.; J. G. Vivian, supt.

Inc. June 23, 1908, in Great Britain. **Cap.** £125,000, in 25,000 pfce. (all issued), and 100,000 ord. (91,253 issued); £1 par. Preference shares are entitled to 20% per annum. **Anantapur Gold Fields, Ltd.**, owns a 1/3 stock interest.

Profit for year ended June 30, 1921, was £30,355. Current assets were £97,091, liabilities, £4,619 and surplus, £17,793.

Dividends: from 1912 to March, 1921, the pfce. shares received a total of 202 1/2%, and ordinary shares 32 1/2%.

Property: 1 1/2 square miles in Anantapur district, Madras. A 2-year option on the Baragunda copper mine in northern India was relinquished 1920-21. In 1919-20, option was secured on Sideshur copper block about 10 sq. miles, in Rakha hills, Shota Nagpur, Bengal between holdings of Cape Copper and Cordoba Copper companies. Exploration has begun.

Development: by 5 shafts. Ore reserves, June 30, 1921 were 7,000 tons

coveries have been made operations will cease shortly
 es 35-stamp mill and cyanide plant.
 ending June 30:

29 W. of Calcutta and 45 miles N. of the iron mines, includes three 375-blast furnaces, 300-ton mixing furnace, four 50-ton and three 70-ton basic hearth furnaces, and rolling, bar and rail mills. Also, under construction, there are two 600-ton blast, one 1,200 ton mixing and one 200-tilting furnaces; two 25-ton Bessemer converters; and many shops for unmanufactured products. Company's employees number 25,000.

VOY TIN SYNDICATE

• INDIA

Address: Tavoy, India.

Property: alluvial tin-bearing ground in the Tavoy district of Burma, including one tract on the Pauktaing river, where drilling is reported to have yielded 0.75 lb. tin oxide per cu. yd. Also, 3 gold placer properties on the Singu, Mole and Namsang rivers, in Bhamo district, Burma, said to require 30 million yards of terrace gravel with 34c. of gold per yd. and 75,000 acres of dredging ground showing 25c. per yd.

WATERLOO STEEL CO'S, LTD.

INDIA

Owns extensive manganese properties in Mysore province; see under Mysore at Britain for description.

WIZIANAGRAM MINING CO., LTD.

INDIA

Address: Vizianagram, Madras, India.

Property: the Kodur, Garbham and Perapi mines in the Vizagapatnam district, Madras Presidency, near Garividi on the Bengal-Nagpur Ry., 56 miles from the seaport Vizagapatnam and some 500 miles S. W. of Calcutta. Manganese deposits are associated with calcareous gneisses in a granite-metamorphic contact. The Garbham, said to be the largest manganese ore in India, is 167' thick and 4,500' long, to a depth of 100'. The ore is generally psilomelane; as mined the manganese content is from 35 to 50%. Recent figures available but from 1909 to 1913, the annual output averaged over 45,000 tons.

INDO-CHINA (FRENCH)**INDO-CHINA MINES DE**

TONKIN

Address: M. G. Bault, owner, 180 Quai du Commerce, Hanoi, Tonkin, Indo-China.

Property: a concession, 27 kilometers in area, that contains fissure veins and replacement deposits of zinc and lead in limestone and schist. About 10,000 francs have been spent thus far in ore development and construction of a 35-kilometer railway. Production is normally about 18,000 tons of zinc yearly, since 1914.

INDO-CHINA MINES DU HAUT TONKIN, SOC. DES MINES D'

TONKIN

Address: Cao-bang via Hanoi, Tonkin, Indo-China.**Cap. Fr. 375,000.**

Property: the Beau-Site alluvial tin concession in the Thein Tu'c valley, 25 miles W. of Cao-bang. The deposits consist of gravels composed of quartzite pebbles embedded in clay and worked hydraulically. Employees number 300. Production in 1916 was 90 tons assaying 30 to 35% tungstic and 25 to 30% tin.

INDO-CHINA MINES & WOLFRAM DU TONKIN, SOC. DES

TONKIN

Address: Cao-bang via Hanoi, Tonkin, Indo-China.**Cap. Fr. 3,500,000.**

Property: the St. Alexandre concession on Pia-Uac Mtn., 35 miles W. of Cao-bang, embraces 20 tin-tungsten lodes in schist on or near its contact with granite. The most important lode averages 1.75 ft. wide, and has been followed for 2,000' on the strike and over 300' deep. The ore is concentrated at mine, and treated by magnetic separator at Thien Tu'c. Hydroelectric power is used; 1,000 natives are employed. Production in 1916 was 10,000 tons of concentrate.

Company also has a concession in the Thien Tu'e valley, covering the Adele alluvial deposits, 65 to 165' deep, estimated to total 13,000,000 cu. yd. carrying from 4.5 to 45 lb. of mineral to the yd. The ore is cassiterite with 4 to 5% wolfram. Material is raised on incline planes by electric hoists and conveyed to a 4-unit washery, of which 2 are in operation, with capacity of 125 yd. per day. Block tin is to be made on the ground.

JAPAN

ESSHI MINE

See Sumitomo Goshi-Kaisha (Sumitomo Copper Co.)

FUJITA MINING & SMELTING CO., LTD.

Office: 20 Dojima-Kitamachi, Osaka, Japan. **Branch offices:** 6 Yamashiro-cho, Kyobashi-ku, Tokio; 27 2-Chrome, Asahi-machi, Korea.

Officers: Tokujiro Fujita, pres.; Nakasuke Saka, gen. mgr.; Baron Keitaro Fujita, Hikosaburo Fujita, Yotaro Takagi, Seiichi Saito, Kotaro Suzuki, mgrs.; Otojiro Sasano, Kennosuke Tsujimoto, inspectors.

Inc. in Japan, with capital of Y30,000,000 (\$15,000,000) to operate the mining and smelting department of the Fujita Company (Gomei Kwaisha Fujitagumi), which see.

The company is also extensively engaged in forestry (Nam Heng rubber estate in Kota Tinggi, Johore State, Malay Peninsular, 6,000 acres; Kokkaido forest in northern island of Japan, 180,000 acres; Yawataya sawmill Osaka, Nagakisawa sawmill near Kosaka mine, etc.), and agriculture including reclamation work at Kojima bay, near Okayama, Japan.

When metallic mining was started in Japan, the Fujita Company was among the first to take an active interest in it, and the company led the way in adopting the latest appliances then used in Europe and America. The total number of mining claims and mines owned by the Fujita Mng. & Sm. company, in Japan, Korea, and Formosa, are 181 and 70, respectively. Some of them are being explored while 32 are being successfully worked. The total value of the mineral products of the company for 1916 amounted to 1,500,000 yen, and 19,500,000 yen in 1918, including:

Metal and unit	1916	1918
Gold, ounces	27,000	32,000
Silver, ounces	1,169,000	831,000
Copper, pounds	22,640,000	33,502,000
Lead, tons	382	140
Zinc, tons	336	1,600
Other ores, tons		36,000

Of silver, the company produces about 30% of the total yield of Japan; copper, about 17%; and gold, 13%. The company employs 12,509 miners, whom 4,491 are underground and 8,018 on surface.

Kosaka Mine: situated at Kosaka-machi, Kazunogun, Rikuchu, in the extreme northern part of Hondo, the main island of Japan. The mine is about 10 miles from the Government railway. It was worked until 1897 as a silver mine, passing in 1881 to the present ownership. The Kosaka employed 6,500 hands in 1918.

Geology: country rock is brecciated porphyry tuff, ranging from a fine conglomerate to a coarse grit, of Tertiary age, with a covering of volcanic ash and with intrusions of liparite and andesite. The orebodies constitute a fine example of metasomatic replacement occurring along the contact zone between the tuff or liparite and andesite, and is surrounded by the clay with dissemination of pyrite, but are shading imperceptibly into the liparite. There are 5 of these orebodies, of immense size, ranging from 10 to 270' thick, and proved for a length of a half-mile, while drills have

in the formation to continue to a depth of 1,700'. The area of deposit explored is 2,000' long, 800' wide, and 500' deep. There are three kinds of ores; a complex sulphide, pyrite both compact and loose, and siliceous. They carry much barite.

All ores are more or less argentiferous, and the product is divided into grades. The first grade is the complex sulphide, averaging 2.43% copper, 6% lead, 9.80% zinc, and 15.64% iron, with 7 oz. silver per ton, and a trace to \$2 gold per ton, the gangue carrying 40 to 45% barium sulfate. The pyritic ore, second grade, averages 2.3% copper, 0.47% lead, 6% zinc, and 26.83% iron. The siliceous ore, third grade, carries 1.27% copper, 0.26% lead, 1.48% zinc, and 19.4% iron.

Development: the Kosaka ore deposit is mined by tunnels. The slicing and filling system is used, but underground mining was practically abandoned in 1908 for open-cut workings, similar to those of the Utah Copper. From 1,000 to 1,800 cu. yd. of overburden is removed daily, the entire burden being estimated at about 4,000,000 cu. yd. Stripping is partly manual and labor and partly with drills, and with electric trolleys to remove the waste.

The open pit is of funnel shape, about 1,000'x2,000' in size, with the bottom terraced. Owing to extraction of ore by tunnel and open-cut workings only about 500 h. p. is required at the mine.

Equipment: includes two 8-drill Leyner air compressors and one 12-drill compressor, and an electric pump on the 500' level.

The smelter: $1\frac{3}{4}$ miles from the mine, with electric rail connection, is about 1,000 ton daily capacity. There are 6 pot roasters, 3 Bruck-schel briquetting machines, and several stamps used for briquetting ores. The percentage of fines is 35% of the raw ore. There are 10 top-water jacket blast-furnaces, 7 of which are 24' long, and 4' wide above the level; the others are smaller. One 15' furnace is used for matte concentration. Semi-pyritic smelting is employed, coke charged from the top is about 1.5%, and powdered coal inserted through the tuyeres at 3% of the crude ore. The blast pressure is about 1 lb. About 25% stone and 10% slag and matte to raw ore are used as fluxes. The grade of all ores is only 2.5% copper, with small gold and silver contents. The grade of the first matte is 35%, and the second, 45%.

The converter plant has 2 stands, with 8 shells. There are 2 Brown-eri-Rateau blowers, a complete lining department, and 140-ton electric fans. Blister copper from the converter is refined electrolytically, the product being 99.95% copper. The slime from the electrolytic tanks is treated in two cupel furnaces. The monthly capacity of the electrolytic plant is 1,200 tons.

The electrolytic zinc refinery at the Kosaka mine was installed in 1915. There are 4 Herreshoff calcining furnaces, which were used before the present calcining, one muffle furnace, and 5 Ding's magnetic separators. The production of electrolytic spelter is about one ton.

Power is all electric, the Kosaka installations aggregated 3,550 k. w. and also 220 k.w. d.c. for the mine, smelter shops, and rail lines. It is generated by 4 water plants on the river Oyu, near the mine, also by a mobile steam plant.

The Kosaka mine operates an electric trolley, with 9 miles of main and branch lines, equipped with 35 locomotives and 400 three-ton ore cars. The lines reach all principal points at the mine, smelter, and shops, and connect with the Kosaka railway at the Kosaka depot. The Kosaka railway, which is 15 miles between Kosaka and Odate, connects with the government railway at Odate.

Production: the annual output of the Kosaka has been as follows: 12,761 tons of copper, 335 tons of lead, 829,970 oz. silver, 20,000 oz. of gold, and 1251 tons of zinc.

The Tokito dressing plant is 2 miles from the smelter, with aerial tram

connection. Mixed ores from the branch mines of the Kosaka mine are dressed, the capacity being 100 ton per day.

Hanaoka Mine.

This mine is in Kit-akita-gun, Akita Prefecture, Japan, and has been owned by the Fujita Co. since 1915.

The deposit is massive and the ore contains copper and iron pyrite, galena, zinc blende, and gypsum. After hand-picking, it is transported to the Kosaka smelter, 18 miles away.

Production: was 125,582 tons of ore in 1918, that averaged 0.000092% gold, 0.00513% silver, and 3.112% copper.

Omori Mine.

This mine is situated in a mountainous region in the province of Iwami (Omori-machi, Nima-gun, Shimane-ken), in the northwest of Hondo, near the coast of the Japan Sea. This mine is said to have been discovered some 600 years ago, and reopened in 1525. The mine discovered some 600 years ago, reopened in 1595 and highly productive, until closed by an earthquake, was reopened in 1884 by the present company and equipped with a modern plant.

Geology: the district is composed of Tertiary tuffs and sandstone, intruded by a great mass of andesite. There are five veins 10" to 3' wide, dipping 80° to 70° N., and opened for 2,000' in length. The ore contains chalcopryrite, galena, and zincblende with gold and silver. Five of the veins—Sato, Honnakase, Nakase, Sanjio and Umanose—are worked. The ore averages 0.00148% gold, (\$8.56) 0.05001% silver, 6.66674% copper and 0.58771% lead.

Development: the veins opened by shaft and long tunnels with very extensive drifts and stopes. The ore, after being cobbled and picked, is concentrated in a mill containing rolls, trommels, jigs, etc. The crude ore and concentrate are smelted in an ordinary circular jacketed furnace. The matte formed from this semi-pyritic smelting is once more smelted, forming blister copper (98%Cu), containing 2.3% gold, 77% silver and lead. This last operation is carried out according to the Japanese Mabuki process.

Production: the output was 1,071,100 lb. of blister copper in 1916; 854,679 lb. in 1917, and 729,366 lb. in 1918. All blister copper from this mine is shipped to the Kosaka electrolytic refinery.

Oarasawa Mine.

This mine is 17 miles W. of Kurosawajiri station on the Government railway, to which a tramway has been constructed from the mine, is situated at Yuda-mura, Waga-gun, Iwateken (east district of Akita-ken, not far from the Kosaka mine).

Geology: granite, tuff, and rhyolite of Tertiary age are cut by nearly parallel veins 3' to 6' wide, with steep dips. The ores consist of quartz containing chalcopryrite and iron pyrite.

At the nearby Unekura mine fissure veins in rhyolite and tuff contain chalcopryrite and some pyrite in a quartz gangue. The veins are opened by shafts and tunnels and worked by overhand stoping, ore being mechanically dressed to 7.5% grade.

Production: is about 151,000 long tons of dressed ore yearly. The blast furnace plant is similar to that at the Omori. Annual production of 1650 long tons blister copper that averages 98% copper, 0.0005% gold, 0.05% silver. This is sent to the Kosaka refinery. About 1,000 men are employed.

Matsuoka Mine.

The mine is situated in Kume-gun Okayamaken, about 10 miles from rail with Yuzawa station on the Government railway.

Geology: country rocks are liparite and tuff of Tertiary age cut by a network of veins only a few of which persist downward to the deeper workings. The ore consists of chalcopryrite, galena, and zinc blende, and assays 0.003% Au, 0.0085% Ag, and 0.95% Cu. This is dressed to 0.006% Au,

1% Ag, and 2.3% Cu, and is transported by railway to Kosaka. Production was 15,000 tons of dressed ore in 1916.

Yanhara Mine.

The mine is situated in Kume-gun Okayamaken, about 10 miles from Tsuyama railway station of the Chugoku line, near the River Yoshii, the mine output is carried by boat to Kuban on the Island-Sea, at the river mouth, 35 miles below.

Geology: a Mesozoic clay slate is intruded at several places by a basic rock of the gabbro family. The deposit is a magmatic segregation, in the gabbro near the contact, there being several orebodies largest measuring 100' by 500' by 250'. The ore is iron pyrite, containing only 0.4% copper and 46% sulphur, and is used mostly for making sulphuric acid.

Production: 420,000 tons of pyrite and 30 tons of copper ore yearly.

Hirota Steel and Ferro-Alloy Works.

Address: Aizu, in Fukushima Prefecture. During the World War, Aizu suffered from lack of all ferroalloys. The Fujita company taking advantage of this opportunity, started to produce these alloys and special steels. The works are operated by hydro-electric power, and now produce ferro-silicon, ferro-manganese, ferro-chromium, ferro-tungsten, ferro-lybdenum, ferro-titanium, ferro-vanadium, silico-spiegel of every description, and special kinds of high-speed steel, etc.

Most of the products are used in Japan by the navy and army arsenals, and also by various engineering works, while some alloys are exported to foreign countries.

URUKAWA GOMEI KAISHA

JAPAN

(Furukawa Copper Co.)

Address: as below.

Directors: Baron Toranosuke Furukawa, pres.; Rokusaburo Kondo, chief director; Masayuki Otagawa, Koji Inoue, Bunjiro Kondo.

In 1875 the late Ichibei Furukawa established the Furukawa Copper Company in Tokyo. He was very energetic, and devoted himself to developing and equipping the mines, he had proven worth while, by previous prospecting work.

In 1903 the late Junkichi Furukawa, the son of the founder, succeeded his father and became president of the firm. In the same year the concern was reorganized into a company under the Japanese law. On his death, in 1906, Toranosuke Furukawa, his brother, succeeded him, and since then he has been president of the company. Cap. 20,000,000 yen.

The company has 11 offices, 4 copper works, and 25 mines, whose total area of concession is about 70,000 acres; 1,200 officials and 25,000 men are employed; the annual production is 35,000 tons of copper, 20,000 tons of copper wire and plate, 220,000 tons of copper ore, 2,000,000 tons of coal, and quantities of bullion, pig lead, silver ore, zinc ore, etc.

Head office: Marunouchi, Tokyo, Japan.

Ashio Mines.

These mines are in Ashio, Kamitsuga-gori, in Tochigi-ken, about 100 miles from Tokyo, connected by the Imperial government railroad and the Ashio railroad. They are 11 miles W of famous Nikko. Area of the concession is 4,000 acres.

Geology: the district consists mainly of Paleozoic sediments and Tertiary liparite (rhyolite). The liparite forms a volcanic neck 2 miles in diameter, intrusive in Paleozoic sedimentary rocks. The Ashio veins, most of which traverse the liparite, run either N. 60° E. or N. 80° W. The veins of the first named direction are called the 60° lodes or Yokomabu series, and the others the 100° lodes, or Shinsei series. The mines have more than 200 veins, half of which are being worked. The veins intersect each other, are 1 to 16' thick, 400 to 6,000' long, and generally have steep dips. The chief minerals are chalcopyrite and pyrite, with accessory amounts to zinc blende, arsenopyrite, galena and pyrrhotite. Bornite and chalcocite occur, while cuprite, malachite, pisanite and sometimes azurite and native copper are found in the oxidized zone. The gangue minerals found in small amount include clay, chlorite and quartz; calcite is found in the deeper workings. Native bismuth, bismuthinite, wolframite, fluorite, crystallized vivanite, ludlamite and apatite are occasionally found.

Development: the mines are opened by 3 main tunnels or adits; the Arika, Kotaki and Isudo, which are three miles apart.

The 8,000' Arika adit driven along the Yokomabu vein, is the transportation and drainage level. The Kotaki adit, driven on the Kosel and Tengu veins, is connected with the Arika tunnel. Both the tunnels are used as trunk haulage ways for underground transportation. The 6 levels below and the 12 levels above are reached through the Tsudo adit.

Tsudo which is the main haulage tunnel is 475' lower than the Arika. This level driven northward for 12,000', cut more than 50 veins, most of them being profitably worked. The Tsudo tunnel is 11' high and 13' wide. There are 12 mine levels below it, the lowest one 1,500' beneath the tunnel.

Besides these tunnels, there are seven deep shafts, one extending over 1,500' below the lowest tunnel.

to the lowest level is as follows: Outcrop on Bizendate peak to Tsudo 2,200'; below Tsudo adit, 1,500'; a total of 3,700'.

The aggregate length of drifts amounts to about 1,200,000', or 190 miles. Overhand stoping is generally used, but also square set work. Each is 6' high, and more than 2½' wide, varying according to the thickness of the vein.

General features: waste water from the precipitating tank for cement and the slimy water from the dressing plants are treated with milk-lime, after passing through slime settling ponds.

The smoke from all furnaces passes through Cottrell treaters. Ashio in a very mountainous region, aerial tramways are widely used for transportation of timber, etc.; their total length is 25 miles. The Tana-system is adopted in all lines.

Power is supplied from the Hosoo hydro-electric power plant (12 miles from Ashio), developing 20,000-h. p.

Production: has increased gradually during the past 10 years as follows: 6,315 long tons in 1907; 7,191 in 1908; 7,526 in 1909; 7,453 in 1910; 8,470 in 1911; 8,470 in 1912; 10,428 in 1913; 12,204 in 1914; 11,624 in 1915; 15,315 (33,187,840 lb.) in 1916.

Cost of Ashio copper is probably a little less than 10c per lb. finished.

Ani Copper Mines.

(Annual production, 1,500 tons of copper.)

The Ani Copper Mines are at Ani, Kitaakita-gori, on the western side of Mori-yoshi Mountain, in Akita-ken. The concession covers 4,600 acres, and is over 5 miles long.

Geology: rocks include Tertiary tuff, tuffaceous shale, rhyolite, and granite. There are two sets of veins, one running N.-S. and the other E.-W. The dip is generally steep, though a few of the N. S. lodes have a dip less than 40°. The E.-W. lodes are cut by the N.-S. lodes, which are some-brecciated veins, and occasionally have a clay filling. The E.-W. lodes are numerous, though neither thick nor long; while the N.-S. lodes are few though few in number.

The principal metallic minerals are chalcopyrite, associated with pyrite, galena and zinc blende. The gangue or vein stuff is mainly quartz, sometimes calcite and barite are found. The oxidized zone is deep, and contains bornite, chalcocite, native copper, etc.

Transportation is by electric haulage. The total length of electrically roped trackage is 10 miles. All shafts are equipped with electric hoists. Total electric power used is 1,200 h. p.

All the machinery of the mines is driven by electricity, transmitted at 110 volts from the Hosoo hydro-electric power plant to five substations. The voltage is transformed down to 2,200 volts, again stepped down to 500 volts at underground substations.

Ore dressing: there are three concentrators, one at the portal of each shaft. Crude ore is sorted into two grades underground, one averages 1.5% copper, the other 0.8%. The three mills treat 250 tons of 1st and 1,500 tons of 2nd grade. Concentrates from these mills amount to 300 tons of 66% grade daily.

Cement copper is recovered from stope fills and weathered rubbish. The production is 2½ tons of 66% copper, which is sent direct to the smelter.

The Honzan Smelter

Smelter: at Honzan, the eastern part of Ashio handles about 105,000 tons of 12.5% material annually, indicating a production of 13,000 tons fine copper per year.

The lump ore is charged raw to the blast-furnace, the fines are smelted in reverberatory furnaces after roasting in 5 McDougall furnaces. The gas is bessemerized.

There are four blast-furnaces, 160x42" at the tuyere level; the height

from the center of the tuyeres to feed floor is 8½'. Blast is supplied by Root No. 8 blower, also by turbo-blower. Matte averages 40% copper. Assays silica, 39%; iron, 25%; lime, 19%; alumina, 9%, and copper, 40%.

The reverberatory furnace is 19'x110' and waste heat is utilized in steam boilers. Matte is ladled into converters by an electric traveling crane.

There are 7 converters of the barrel type, 72" diam. and 100' in length. The tuyeres have Dyblie ball valves. Blast for the converters is produced by two turbo-compressors. Lining for converters is a decomposed rhyolite tephrophy (liparite).

Gases from the roasters, blast and reverberatory furnaces, and converters, pass through two Cottrell treaters to eliminate the fumes and dust. Arsenic is also saved. The dust carries 1.37% copper, 19.72% sulphur, and 0.83% arsenic.

Analysis of the converter copper is as follows: copper, 99.077%; gold, 0.003%; silver, 0.1065%; arsenic, 0.029%; bismuth, 0.006%; iron, 0.052%; sulphur, 0.028%, and selenium and tellurium, 0.038%.

Mining: there are many levels and shafts, including the Manaita 10' high, 7' wide, and 8,000' long, the most important transportation and drainage level. Below this there are four levels at present. The Kanbun is 7' high, 4' wide, and 4,500' long. There are ten other levels above the Kanbun tunnel with intervals of 60' to 80', the lower five now being used. The Kosawa main shaft, 4'x4', is one of the blind shafts, which is sunk down the Maehi vein in Manaita level, and is 400' deep. It is equipped with hoists and pumps. The Chomatsu crosscut opens nearly all of the chief veins in this mine. It is 7' high, 10' wide, and 1,000' long and is the most important transportation level. There are seven levels above and six below it.

The Sosuido level is the third below the Chomatsu, and is 4' wide, 6' high, and 1,700' long. It is used for drainage only. The Kayakusa, 4'x14', is one of the blind shafts sunk to the Shinsei vein on the Chomatsu level, and is 800' deep at present. The Koganehira level is the lowest for transportation and drainage, and is 7' high, 4' wide, and 1,500' long. The Kosawa level is 50' above the former, and is 6' high, 4' wide, and 3,000' long. There are 10 levels above the Koganehira, connected by winzes. The Maie tunnel is cut through at the foot of the mountain range between the Kayakusa and Sammai valleys. It is the lowest level in the mine, and is 7' high, 8' wide and 9,000' long, with double tracks. During the driving of the chief veins in Kosawa and Sammai were found. The Suidoko adit is driven first as a crosscut; then, after proceeding along the Shogorohi vein, it cuts several other veins. It is 7' high, 8' wide and 6,600' long, and is the most important transportation and drainage level. There are 10 levels above connected by winzes.

Treatment: the main concentration mill is at the Kosawa mine, and contains Hancock jigs, tables, and flotation plant. The 1% crude ore feed is concentrated to 10% Cu.

Ores: the dressed ore treated contains 40% silica and 10% copper. About 16,000 tons of ore are treated annually, yielding 1,500 tons of copper.

The fines and sands are briquetted or roasted in pots. The briquets, roasted ores, and raw material are reduced in 2 blast furnaces with limestone. Matte is blown to blister copper by the Japanese Mabuki hearth (7).

Blister copper, containing 98% copper and 0.11% silver, is sent to the Mikko Copper Works and electrolytically refined.

Power is chiefly supplied from the Hitachihai hydro-electric power station, which generates 1,000 h. p. There are also two small auxiliary plants. Another plant for supplying 2,000 h. p. is under construction.

Nagamatsu Copper Mines.

(Annual production averages 2,000,000 lb. of copper.)

River
works,

Mogami-gori, in Yamagata-ken, and are situated on the south of Mt. Tanaka. The area of the concession is 1,300 acres.

Geology: the district consists of Tertiary shale, tuff, and sandstone, with intrusives of rhyolite and andesite. The ore occurs in veins which cross all the rocks and consist of chalcopyrite and pyrite in a clay matrix. Zinc blende and galena frequently occur, quartz and barite are also occasionally found.

Development: by the 5,000' Ogiri and 2,500' Chugiri tunnels.

Treatment: crude 1% copper ore is hand picked, the reject being mill-processed. The concentrate averages 8.5% copper. The fines are roasted in pots; lumps and roasted products are smelted into matte in blast-furnaces. The matte is blown into blister at Mabuki. The blister contains 97% copper, 0.18% silver, and is sent to Nikko Copper Works for refining.

Power: a hydro-electric power plant of 200 h. p. is at work.

Mizusawa Copper Mines.

(Annual production about 1,000,000 lbs of copper.)

These mines are at the village of Iwasaki-mura, Wago-gori, in Iwate-ken. The area of concession is about 1,882 acres.

Geology: granite, Tertiary tuff, and rhyolite are cut by fissure veins, the most important being the Maehi, Okuhi, and Uwabanhi, mainly in the north; the vein filling is quartz, containing chalcopyrite and pyrite; galena and zinc blende are found in small quantities. The crude ore contains 1.2% copper, and concentrates 7.4%.

Development: by the 500' Tsudo adit level, and No. 6, 1,400' long.

Smelting: the dressed ore and concentrate averaged 7.4% copper and is smelted. The fines are roasted, briquetted and smelted with lump ore in a blast-furnace, the resulting matte blown to blister copper by the Japanese process. The blast furnace is 33"x66" at the tuyeres, and 10' 6"

Otori Copper Mines.

(Annual production 1,000,000 lb. copper.)

The concession covers 296 acres, at the village of Oizumi-mura, Shitagawa-gori, in Yamagata-ken.

Geology: the ore occurs in veins in Tertiary agglomeratic tuff and sandstone. The main lode is 1' to 6' wide, 2,500' long and nearly vertical. The ore contains chalcopyrite and pyrite, in quartz and rhodochrosite, both in small quantity.

Development: by the 1,600' Tsudo tunnel and 1,200' Ogiri level, 420' long.

Treatment: crude ore carries 3.6% and the concentrates 8% copper.

Kawayama Mines.

(Annual production, 1,000,000 lb. copper.)

The mines cover 400 acres in Ikumo-mura, Abu-gori, in Yanaguchi-ken, about 10 miles N. W. of Yanaguchi.

Geology: the ore occurs in a contact metamorphic deposit alongside the artz porphyry dyke cutting Paleozoic limestone. The orebody is 100' thick, and consists of a mosaic of garnet, hedenbergite, quartz, chalcopyrite, and occasionally zinc blende and galena.

Development: by five levels, the longest, 2,500' long, and a 350' shaft.

Treatment: the crude ore is sorted by hand. The dressed ore is 85% copper in mine run.

Smelting: is done by blast furnaces and Mabuki hearths. The blister copper from the blast furnace carries 95% copper and 0.6 to 0.7% silver.

Kune Copper Mines.

(Annual production, 170,000 tons of ore.)

The concession covers about 3,000 acres in and near the village of Sagami-mura, Iwata-gori in Shizuoka-ken, situated on the eastern bank of the Sagami River. The mines have no concentrating mill and no reduction plant, the pyritic ore being sold.

Geology: graphitic schist and chlorite schist of the Algonkian system epigenetic deposits of pyritic ores (copper 3-8%), which strike N. and dip 30° to 60° N. W. There are six orebodies mostly 6' to 8' with one 45' to 100' wide and 1,500' long and 1,500' deep. The ore consists of a compact granular aggregate pyrite and chalcopyrite with pyrrhotite and quartz and occasionally magnetite.

Development: by 14 levels. The 1,500' Ogiri, crosscut, is the transition level. The Tsudo adit, 400' below is 9' wide, 8' high, and 3,000' long. A 500' shaft on the Tsudo adit is used for deep work.

Production: The mines produce both basic copper ore, and siliceous ore, and a small amount of cement copper. Annual production of pyritic ore amounts to 10,000 tons, averaging 4% copper.

Transportation: the ores are carried by a ropeway to bins built on the bank of the River Tenryu, and then are loaded on boats and carried to Tenryu station of the Imperial Government Railway.

Power: 2,500 h. p. is generated by water at Toyone, 5 miles N. W. of the mines.

Furokura Copper Mines.

Production: annual production, 50,000 tons of copper ore.
Property: the property covers 2,322 acres, at the village of Oyu-mura, Kazunonaka, Akitaken.

Geology: Tertiary tuff, shale, and andesite are cut by quartz veins traverse all of the rocks. The Hompi varies from 1' to 12' and the length is 5,000'. The ore carries chalcopyrite and pyrite, in quartz. Magnetite and hematite also occurs, and sometimes calcite is found.

Development: on the Hompi vein; the Ogiri tunnel is 5' wide, 7' high, and 1,000' long, and is the most important transportation and drainage level. The Hompi tunnel, 260' above the former, also is driven on the Hompi vein at a distance of 5,000'. The Hosoji tunnel is 530' above the lowest or level. All levels are connected by shafts and winzes. Stopping is practiced by hand-drilling and by Leyner rock drill and Instoppers.

Treatment: high-grade ore is mostly screened and picked, and the low-grade ore is concentrated mechanically. The dressed ores treated are concentrated in tanks, containing 5.5% copper. They are divided into lumps, grains, and fines, and are sent to the smelter of the Kosaka mines owned by Fujita.

Power: gas engines of 600 h. p. are used, and a hydro-electric power plant of 1,300 h. p. is under construction. An aerial tram connects the mines and the Kosaka plant.

Kijo Gold Mine, Korea.

Production: annual production, 2,000 tons of lead containing gold.)
Property: this property covering 20,000 acres is in Todo, Kijo-gun, Heianhoku-shi, Chosen (Korea.) It is 27 miles N. E. from Sensen station of Chosen Railway.

Geology: the tract contains 15 quartz veins in gneiss, that vary from 10' to 100' in width. The principal minerals are native gold and galena, with zinc blende and a little argentite. Iron pyrite, arsenopyrite, and chalcopyrite occur as accessory minerals.

Development: exploitation of the deposits begun in 1912, disclosed numerous small gold veins and gold-lead veins. Work is proceeding on a large scale.

Smelting: the mines have a small concentrating mill. Blast furnaces for experimental work produce lead ingots, containing much gold, which are sent to the Amagasaki refinery.

(Production of silver)
 The concentrates are treated in Akita-ken, with the Aomori Railway.

Geology: The ore is a result of intrusions of granite.
Development: by 14 levels, 1,370' deep.

Ore treatment: The ore is treated on Wilfong's process of cyanidation. The ore contains (6.5 oz.) silver. The annual production of silver amounts to 100,000 lbs.

(Annual production)
 The mines are 17 miles from the Aomori Government Railway.

Geology: The ore is a result of intrusions of granite that carries andesite.
 The concentrates are treated in Akita-ken, with the Aomori Railway.

The mine is situated in Mabukin, Aomori-ken, Japan.
 The mine is situated in Mabukin, Aomori-ken, Japan.

Name
 Shioyashira,
 Shimoyamada,
 Shinshakanoda,
 Yoshima.

This consists of the S. E. of the mine, blast furnace, and sent to Nikkō Smelter.
 Product of silver.

This results from various silver-bearing veins.
 Annual production of silver 10,000 lbs.

The Nishikawa Copper Concentration Plant is a tank furnace of a blast furnace. The waste is brass foundry. A Cottrell's cupellation process. A hydro-

Innai Silver Mines.

(Production about 400,000 ounces of silver annually.)

The concession covers 2,613 acres at the town of Innai, Ogachi-gori, Akita-ken, within 3 miles of Innai station of the Imperial Government way.

Geology: Tertiary tuff tuffaceous shale and tuffaceous sandstone cut by intrusions of rhyolite and andesite, contain quartz veins.

Development: includes the 7,800' Sosuido adit and the Yamaichi shaft, 1/2' deep.

Ore treatment: crude ore is crushed by gravity stamps and concentrated on Wilfley tables. Concentrates and old tailings are treated by cyanation. The former contains 1.09% (355 oz.) silver, and the latter 0.02% (oz.) silver. The cyanide plant completed in 1917, produces 400,000 oz. silver annually.

Daira Lead Mines.

(Annual production 600 tons of lead, and 5,000 tons of zinc ore).

The mines are at the village of Fujikoto, in Yamaoto-gori, Akita-ken, 5 miles from the Futatsui station of the Ou line of the Imperial Government Railway.

Geology: Tertiary tuff, andesite, and rhyolite are cut by a quartz vein which carries argentiferous galena, and zinc blende.

The concentrator has a flotation unit, and an electro-magnetic separation plant. The lead ore is roasted in pots with limestone, reduced by charcoal in Mabuki hearths, and made into base bullion. The zinc ore is sold.

The mine has a 400-h. p. hydro-electric power plant.

Coal Mines.

Name	Coal	Tons per Annum
Magashira, Shakanoo, Daini-Shakano	Bituminous	380,000
Noyamada	Anthracite	160,000
Shakanoo		60,000
Hima		500,000

Mizushima Smelter

This customs smelting plant is situated on the islet Mizushima, 5 miles from the Havour Tamashime, near Okayama City. It contains pot roast-blast furnaces, and Mabuki hearths making blister copper which is sent to Nikko Copper Works.

Production is 3,500 tons of copper per annum.

Amagasaki Refinery

This refinery, in the town of Amagasaki, near Osaka, treats the copper from various sources, refining it in reverberatory furnaces. Lead ingots and silver bullion are also produced.

Annual production is 5,000 tons of refined copper, 2,000 tons of lead, and 10,000 oz. of silver bullion.

Nikko Copper Works.

The Nikko works are at Kiyotaki, near Nikko, and make electrolytic copper, copper wire, alloy wire, copper plates, etc.

Copper from Ashio and other mines is refined here. The plant consists of a tank house using the series system, and another with the multiple system, a blue vitrol plant, refining furnaces, and slime house.

The wiring plant has rolling rods and plates, wire drawing mills, and a foundry.

A Cottrell treater removes sulphur and arsenic from the gases of two blast and two reduction furnaces.

A hydro-electric power plant at Hosoo develops 10,000 h. p.

Annual production is 30,000 tons of electrolytic copper and copper wire; 1,500,000 oz. of bullion, etc.

Honjo Copper Works.

These works at Yanagiwara-cho, Honjo-ku, Tokyo, produce copper and brass sheets.

Annual production is 500 tons of copper and brass sheet.

HIDAIRA DOZAN JAPAN

Address: Miyazakiken, Higashi, Usukigori, Kitakatamura, Japan
Viscount S. Naito, owner; Y. Kasahara, chief engr.

Property: a copper mine with annual production of 6,000,000 lb.

HIKOSHIMA MINE JAPAN

This mine situated in Yamaguchi prefecture is the largest zinc mine of Japan, the output in 1918 being 27,672,960 lb. of zinc and 230,720 lb. of lead. No later information is available.

HOMANZAN MINE JAPAN

Address: T. Hori, owner, Shimaneken, Katarugori, Hatsa-komura.

Mine address: O. Kuwabara, chief engr., Shimaneken, Yatsukagori, Iwasakamura, Japan.

Property: 2 copper mines near the villages of Hatsako and Iwasaka.

KINOSHIMA REFINERY JAPAN

Head office: Osaka, Japan. **Mine address:** M. Matsui, gen. mgr.; M. Tsugaki, mgr., Kinoshima, Japan.

This copper refinery produces 3,000,000 lb. per year, at Hiroshimaken, Takeharakogai, Kinoshima.

KUHARA MINING CO., LTD. JAPAN

Head office: Tokyo, Japan. **London agt.,** C. Kamiya, 60 Mark Lane, E. C. 3.

Officers: F. Kuhara, pres.; with K. Saito, K. Takenouchi, E. Nakayama and H. Tsumura, directors.

Cap. 75,000,000 Yen (\$37,500,000); par 50 yen. Report for half year ended November, 1918, shows credit balance of 6,955,777 Yen after paying dividend. Reserve funds total over 30,000,000 Yen.

Property: includes the Hitachi, the largest copper mine in Japan, Kapsan copper mine in Korea, and 63 others.

Company operates the Hitachi, Saganoseki, and three other refineries. At the second named a chimney 570' high, was built in 1918; it is 26' inside diameter at the top, and located 1,000' above the smelter.

Engineering works: at Hitachi and Tsukudajima.

Products: copper, gold, silver, spelter, and other metals. Company's electrolytic copper—Hitachi Brand—is well-known in the London market).

Kuhara Trading Co., Ltd.

Sole agent for the Kuhara Mining Co., Ltd.

U. S. offices: 26 Cortlandt St., New York City, and 309 Kohl Bldg., San Francisco.

Head office: Kobe, Japan. Branch offices are at Tokio, Osaka, London, Paris, Lyon, Rome, Berne, Port Said, Calcutta, Bombay, Singapore, Bangkok, Batavia, Hongkong, Shanghai, Tientsin, and Vladivostock.

mitsubishi kogyo kaisha, ltd. (mitsubishi mng. co., ltd.) JAPAN

Head office: Maru-no-uchi, Tokyo, Japan.

Officers: Baron K. Iwasaki, chairman; Managing Directors; Y. Shigematsu, Dr. A. Nomi, I. Mitani; **Directors:** K. Kimura, S. Eguchi, K. Schimanura, S. Miyoshi; **Auditors:** M. Kushida, K. Aoki, S. Moroto, K. Sato. Established April 10, 1918, as the successor of the Metal Mining Department and the Coal Mining Department of Mitsubishi Co.

Cap. 100,000,000 Yen; paid up 62,500,000 Yen. Company is an important producer of gold, silver, copper, tin, tungsten ore, coal, and coke, possess-

ing 26
works,

2 coal mines, a smelter, a refinery, metal works, coke ry. Chief products are as follows:

Silver, oz.	Electro. copper, lb.	Coal, long tons
522,972	19,554,194	3,345,161
519,884	17,322,428	3,411,898
428,400	16,139,811	3,272,045
582,435	21,208,179	3,190,940
679,556	18,661,316	2,985,873

opper is marketed as electrolytic ingots branded with insure identification, as it is considered to be unsurpassed tric conductivity. The larger part of the output is sold arket through the London Branch of Mitsubishi Shoji nicipal metal mines and recent production thereof per ans:

Location	Metal	Output
Osaruzawa, Kazuno, Akita	Copper	6,300,000 lb.
Arakawa, Sempoku, Akita	Copper	2,891,000 lb.
Aikawa, Sado, Niigata	Bullion	4,618 lb.
Kamianame, Ono, Fukui	Matte	722,000 lb.
Ikuno, Asago, Hyogo	Copper	5,653,000 lb.
Minamitani, Yubu, Hyogo	Tin	145,000 lb.
Fukuya, Kawakami, Okayama	Copper	1,264,000 lb.
kata, Higashi-usuku, Miyazaki	Copper	2,086,000 lb.
jo, Kamo, Shizuoka	Cop. ore	2,515 M. t.
okawame, Waka, Iwate	Cop. ore	3,451 M. t.
ji, Hakui, Ishikawa	Bullion	957 kg.
sara, Minami-tsuru, Yamanashi	Pyrite	19,239 M. t.
Iwafune, Higashi-ibaraki, Ibaraki	Tungsten	94 M. t.
umi, Kita, Ehime	Cop. ore	2,581 M. t.

coal mines, the 8 most important produce annually from 200,000 0,000 long tons each.

Metallurgical Works, etc.

zawa Mine: about 22,321 acres, near Odate-machi, 420 miles N. by railroad. The mine has been operated since 1650, producing ntities of gold, silver and copper.

ogy: country rock consists of shale, tuff, pyroxene-andesite, pro- nd liparite. Ore deposits which form simple fissure veins are found rocks, and are divided into 3 series. Motoyama, Tagori and Aka- neir number reaching several hundreds. The strike of Motoyama s approximately N.-S., while those of Tagori and Akazawa series W. The veins range from 1' to over 10' averaging 3' wide. The le part averages 500' in length, and has a dip of 60° to 80°. Ores i chalcopyrite, chalcocite and bornite, associated with pyrite and quantities of sphalerite, galena and hematite.

velopment: by 3 working shafts and 7 main levels at 100' intervals, 20 miles of workings.

quipment: electrical installations aggregate 3,300 h. p. Working s average 2,400 persons. The 1,000 ton dressing plant has modern ment. The reduction plant has two 150 ton blast furnaces, turning blister copper of 98% tenor, which is sent to Osaka Refinery.

mine, and 7 miles from Sakai station.

Geology: shale, tuff, pyroxene-andesite, and rhyolite are cut by 5 groups of veins that run N.-E. to S.-W, and 70° dip to N. W. The ore shoots vary from 1,000 to 4,000' in length and carry chalcopyrite ore containing small quantities of pyrite, galena and sphalerite in quartz gangue.

Development: by 5 shafts, 300' to 700' deep and by numerous tunnels, the deepest workings being 800' below drainage level.

Equipment: includes 4 power houses, with aggregate of 4,000 h. p. About 1,200 person are employed.

Hisaichi Branch Mine: is 5 miles E. of Arakawa mine. Its 200 ton concentrator has the latest equipment. Concentrate is sent to the Arakawa mine by tramway, to be smelted; and the ingots go to the Osaka Refinery.

Sado Mine

This mine is on the west coast of Sado island, 32 miles from the city of Niigata, on the mainland.

Geology: shale, tuff, pyroxene-andesite, are cut by five quartz veins, 2 to 120' thick, that run E.-W., and dip 60° to 80° S. Ores contain native gold, argentite, and chalcopyrite, associated with pyrite, galena, sphalerite, etc., in quartz gangue.

Development: includes 2 working shafts and 4 main tunnels; with about 16 miles of underground work, opening veins for a distance of 1,500' to 8,000' on the strike.

Equipment: includes a 600 k. v. a. hydro-power plant and a 5,000 k. v. a. electric plant. Low grade ores are amalgamated in mill of 110 stamps and 3 tube-mills. Tailing and slime are treated with cyanide, and copper and rich gold ores by blast furnace. Bullion and ingots are sent to Osaka Refinery.

Takachi Branch Mine: 15 miles N. from Sado mine; deposits are fissure veins in liparite and propylite with strike E.-W. and dip of about 70° to 80°, and 7' to 8' wide. Dressed ore is sent by single rope tramway to shore, and carried to Sado mine by boat.

Ikuno Mine

This mine with 6,213 acres, is not far from Osaka City, and connected with it by railroads.

Geology: ore occurs in fissure veins in rhyolite, altered andesite and tuff. The two main lodes, Kanagase and Tasei, lie east of Ikuno town. The veins are dislocated by several basalt dikes. The Kanagase vein is 10,000' long, runs N.-S. and dips 60° to 80°. The ores contain native copper, bornite, chalcopyrite and tetrahedrite, associated with much sphalerite, galena, and less cassiterite, native bismuth, and a very little wolframite, scheelite and argentite. The Tasei lode has a 14' main vein with numerous branches. The mine, as "Ikuno Silver Mine" which has been noted for centuries, owes its reputation to the rich silver content of the Tasei ores.

Development: 3 working shafts with 15 miles of workings.

Equipment: includes a hydro-power plant and a steam-power plant; Also a concentrator and a smelting plant where copper and tin ores are treated. Blister copper and crude tin are sent to Osaka Refinery.

Akenobe Mine

This tract of 6,800 acres, lies 20 miles west of the Ikuno mine.

Geology: Paleozoic slates, tuff and quartz schist with beds of altered Mesozoic sandstone, slate, conglomerate and limestone. The rocks are cut by veins that are sometimes intersected by later dikes of diorite. The ore occurs in simple fissure veins, those at the east end of the property producing silver ores and those on the west, copper and tin ores. Equipment includes the Mikobata concentrator where copper and tin ores are treated by modern methods. Dressed ore and concentrate are sent to Ikuno mine by trucks.

Yoshioka Mine

3,137 acres, is 33 miles from Tatai, on railroad. Slate and sandstone are cut by porphyrite and quartz veins, in the sedimentary beds, decrease in richness. The mine also contains workable orebodies of contact origin, in igneous rocks near an igneous contact. The veins are of the form a stockwork. The ore contains chalcopyrite, with pyrite, arsenopyrite, galena and sphalerite in a quartz average 1.3 to 1.5% copper. Operated by a shaft with 9 levels with over 28 miles of workings. Includes several hydro-power plants, concentrators, dressing and smelting plant.

Makimine Mine

covering 1,388 acres is far from railroad transportation. The geologic section shows Paleozoic phyllite and graphite slates, in part derived from the Aso volcano. The ore deposits in schist are of the average 4% copper. There are 3 groups in which there are 10 orebodies, from 10' to 20' wide, though sometime for some of them the width is from 4' to 8' only. The orebodies are not complete and includes hydro-power plants and a smelter.

The Naoshime Smelter

located on Naoshima islet, an hour and a half from Okayama City. The plant is divided into two departments, one for copper and one for lead. The copper department has MacDougall roasters, a large reverberatory furnace, and converters. The lead department contains roasters, pots, a blast furnace, a softening reverberatory furnace, a refining reverberatory furnace, distillation and cupellation furnaces. Arsenic gases are treated by 5 units of electric precipitation. Blister copper, lead and bullion are sent to Osaka refinery. In 1920 was 4,454,000 lb. copper, 9,000 lb. lead and 829 kg. bullion.

The Osaka Refinery

The refinery which adjoins the Imperial Mint at Osaka covers 12 acres and employs about 300 persons. It contains 15 reverberatory furnaces which produce bullion of 97 to 99% purity, which are treated in the electrolytic cells with cathodes that assay 99.96% copper, 0.0037% silver, 0.014 lead, 0.0001% tin, and a trace of sulphur. The gold and silver of the electrolytic bullion is recovered by roasting in a small muffle furnace, leaching with cyanide solution of the refinery to take up the small copper content and the residue is mixed with lead and cupelled. The resultant bullion is refined by electrolysis with the bullion produced at the mines. Blister copper from all Japanese mines is refined here. Lead of 99.99% and tin of over 99.9% are refined by electrolysis at the refinery. Output is as follows.

	Gold, oz.	Silver, oz.	Electro copper, lb.
.....	19,799	651,040	21,376,324
.....	23,849	667,138	20,218,448

Yoshimizu Metal Works: produce copper plates, copper and brass wire, and several kinds of alloys. The Mitsubishi Mining Company is one of the five large mining com-

es operating in Japan, and like the others, is exceptionally progressive. ess has not been due to the possession of mines of exceptional value, gh the company has some excellent properties, but rather by the utilion of the most modern methods and appliances in mining and metallurgy, cted by the best technical skill available.

SUI MINING CO., LTD.

JAPAN

Head office: No. 1 Surugacho, Nihombashiku, Tokyo, Japan. **New office:** 65 Broadway, New York.

Directors: Gennosuke Mitsui, pres.; with Genyemon Mitsui, Dr. Naoya Nada, Dr. Tamaki Makita, Dr. Buntaro Yamada, Dr. Heinojo Ueki, Ken-iro Iwata, Dr. Takuma Dan, Kikusaburo Fukui, and Kwan-ichi Okano. **Auditors:** Jutaro Mitsui, Shogoro Hatano, and Tomojiro Ono.

Cap. 50,000,000 yen paid up.

Property: the Miike, Tagawa, Yamamo, Hondo, Noborikawa, Sunagawa, Hiro, and Kawakami coal mines; the Kamioka, Kushikino, and Kouzo al mines; the Iwaonobori sulphur mine; zinc refinery, by-product coke gas power plant and dye manufactory. The Kamioka smelter is in the t of a sericulture district and in order to prevent fumes and dust from aging the mulberry trees and silkworms, a 3-unit Cottrell treater handles s from the furnaces. Dust from the precipitator carries 1.13% free hur and 19.65% arsenic.

Production: in 1918 was 3,696,000 tons coal, 31,000 oz. gold, 657,000 oz. r, 41,000 lb. copper, 5,750 tons lead, 10,400 tons zinc, 15,700 lb. arsenic, ons tungsten ore, 7,000 tons sulphur; also 114,000 tons coke, 1,300 tons hate of ammonia, several kinds of oil, intermediates, dye-stuffs, and nicals.

IRUKIYO MINING CO., LTD.

JAPAN

Head office: Hiji-machi, Oita-ken, Japan. **Address of iron works:** shi, Oita-ken, Japan.

Officers: Nobuye Narukiyo, pres. and Seigo Yeguchi, v. p.

Organized in 1917. **Cap.** 2,000,000 yen, fully paid.

Property: the Bajo mine, 2,934 acres, in Oita prefecture, on Kyushu d. one mile from Tateishi on the Hoshu railway, 60 miles S. of Moji; the Takamine mine, 681 acres, at Kamo, Kagoshima prefecture, prov- of Satsuma, in southern part of Kyushu island.

At the Bajo mine, 6 principal fissure veins, from 2 to 20' wide, which r in andesite and granite, have been opened for 1,000' in length. The is quartz, carrying gold and many silver and copper minerals; the values 1.75 to 3.5 oz. gold and 7 to 14 oz. silver per ton. The Takamine mine vs quartz veins in andesite, carrying gold and argentite associated with e.

Development: at Bajo, by 2 vertical and 1 inclined shaft, to depth of with levels at 50 to 100' intervals. The Takamine is being prospected unnels; power is supplied by a gas engine and 60 men are employed.

Equipment: at Bajo, includes 5 boilers totalling 540 h. p.; 60 and 35 h. oists; 75 h. p. 10-drill compressor. Mill uses thirty 100 lb. stamps for grade and ten 1,050 lb. stamps for low grade ore, both followed Wilfleys

About 1/3 of mine output is shipped direct to the Saganoseki copper iter. Employees number 600.

Production: at Bajo, 36,841 oz. gold and 332,039 oz. silver in 1919; 41,- oz. gold and 427,947 oz. silver in 1920.

Company has also iron works with annual casting capacity of 3,500 tons Dita harbor.

MITOMO GOSHI-KAISHA (LIMITED PARTNERSHIP) JAPAN

Head office: Kitahama 5 Chome, Higashiku, Osaka, Japan.

Officers: Baron K. Sumitomo, pres. **Directors:** M. Suzuki, chairman; Nakada, K. Yukawa, C. Kusaka, Y. Yamashita, M. Ogura, T. Sumi- o, K. Odaira and J. Matsumoto.

The Besshi Copper Mine

Iyo, Japan.

Yamada, gen. mgr.; U. Okada, mgr.

The Besshi mine is situated near Kiota at Niihama on the Inland Sea, in the Province of Iyo, on Shikoku is operated since 1691 and has been owned and continuously by the Mitomo family two hundred and thirty years. According to records the annual production of copper was 3,360,000 lb. for 8 years.

It was worked successfully by the old Japanese methods until 1883 when modern European methods were introduced. It is the largest copper producer in Japan. The district is one of the schists, which near the mines contain bands of pyritic whole enveloped in quartz-schist. A serpentinized rock, forming a wall country near the orebody.

The orebody is an immense mass 6,000 ft. long, 4 to 30 ft. thick, and averages 1,750 ft. deep, is intercalated in crystalline schist, and is a bedded deposit. The course of the orebody is north 30 deg. It has been worked for 6,000 ft. in length. It is usually 10 to 20 ft. over 60 ft. The bed dips 45 deg. northeast, and is worked by a shaft. The vein is faulted by east to west-faults at 45 deg. that dislocate the orebody 10 to 20 ft., but never over 60 ft. The output was 10,425,800 lb. in 1902.

The ore consists of chalcopyrite streaks in massive crystalline pyrite and curved and broken slivers of blackish schist. The ore averages 3 and 4 per cent copper.

It is usually free from impurities and when the blister is refined in reverberatory furnaces, the copper produced, is sold at Lake Copolytic copper prices.

Development: by an 1,800' incline shaft sunk on the ore with 8 levels. An adit called "The Third", 6,000' long, was driven on the 8th mainage and transportation. The 16,000' main or "The Fourth" level finished recently, is the lowest and is only 500' above the 3rd level. Between the 3rd and 4th adits, there is a brick lined blind shaft, 10' diameter and 2,000' depth) from which six levels have been sunk to lock out the ore. Fourteen levels are now in use between the outer and the main adit.

Extraction is by ordinary overhand stoping, and an electric tramway transports the ore to the dressing works at the portal of the 3rd adit. The ore will probably be transferred shortly to the portal of the 4th adit. The mine is electrically lighted, the main levels timbered with steel, and ventilation by natural methods.

Water from this old mine is very strongly acidulated and richly with copper and iron. The copper content is recovered by a preliminary plant first on scrap iron and then on a mixture of iron and coke; the usual output amounting to 400,000 lb. To prevent pollution of the water used for irrigation purposes, the mine water is carried for 10 miles to the sea through a slag-lined ditch.

Dressing works: the ore is transported to the dressing works at Tonon where chunks are crushed by hand spalling and machine crusher: followed by hand picking and jigs. Experiments have proved that low grade especially the chloritic ores, can be concentrated by flotation, and this process will be adopted in the near future. Ore and concentrate are transported by a 3,600 meter aerial tramway to bins at Kuroishi, then taken by the company's railroad to Niihama on the coast, and carried by boat to the dressing works at the Island of Shisaka-jima about ten miles distant.

Metallurgical Works: the smelting plant formerly at Besshi and afterwards at Niihama, was transferred to the Shisaka-jima on account of

miners' complaints against the smelter fumes. The plant is thoroughly modern in design and equipment. Lump ore is treated by pyritic smelting in 3 blast furnaces each 24' x 4' at tuyere level. A special feature of these furnaces is that the cross section is similar to that of the iron blast furnace, designed by K. Nakamura. The pyritic cinder from the company's acid and fertilizer works at Niihama as well as some from outside works are added to the smelting charge. The fine ore was formerly nodularized with fluxing siliceous sand and water in a patented revolving apparatus and roasted in its specially designed by K. Nakamura, but now all fines as well as fluxes are sent as flux to the reverberatory furnace of the Mitsubishi Mng. Co.'s Naoshima smelting works, and then returned as blister copper to the electro-refining works at Niihama (owned by the Sumitomo Goshi-Kaisha).

The first matte from the blast furnaces at Shisaka-jima is concentrated pyritically, in a blast furnace 24'x4', and the second matte is converted into blister in three 10' converters of vertical type and with basic linings; the resultant blister copper goes to the Niihama electro-refining works. The use of coal making the cost of steam power high, a hydro-electric plant will be installed in 1922 at Hateba near the portal of the 4th Mt. This will be run by water from the streams on Besshi Mtn. which are collected and conducted through the mine by a special ditch, to the opposite northern side of the mountain. A head of 2,000' is obtained and 6,000 h.p. developed, this being the highest head of this kind in Japan. A 10-mile submarine cable will conduct current to the metallurgical works. Power will be utilized also for some purposes other than that of the mining enterprise.

Refineries: the Besshi copper is peculiarly free from impurities. Formerly all blister was refined in reverberatory furnaces, producing the famous S. Copper of 99.8% fine. This is especially suited for rolling and alloying, being sold at rather higher prices than electro-refined copper, just as in the case of Lake Superior copper. As, however, the company owns large wire and sheet mills at Osaka, some electric copper is required, and for this reason the company established its electrical refinery.

Production: of the Besshi mine in recent years follows: 1918, 22,503,000 lb.; 1919, 23,592,000 lb.; 1920, 21,312,000 lb.; 1921, 22,029,000 lb. For 1922, it is estimated production will be 28,077,000 lb. The total output from the very beginning of operations (about 230 years ago) up to 1921, amounts to 663,610,000 lb.

YAMAGUCHI KOGYO CO.

JAPAN

Address: Hokkaido, Shiribeshi, Iwanaigori, Ozawamura, Japan. **Chief Engineer:** K. Tamura; Y. Takahashi, mining engr.

Property: the Kunitomi mine, has an output of 3,000,000 lb. copper per annum.

dividends: 1903, \$1.25; 1904, 1905 and 1906, \$1 each; 1907, 60c.; 1908; 09, \$1.15; 1910, \$1; 1911, \$1.50; 1912, \$1; 1913 and 1914, \$1.50; 1915, \$1.50; 1917, 50c.; 1918, 25c.; 25c. in 1919; 50c. in 1920; making a \$19.50 per share, or 195%, or \$8,367,435.

Property: a concession covering 400 sq. miles, including a number of mines in the Unsan district in the northwestern part of Korea, de- by Evans and Hoeffle in "Min. & Sci. Press" of March 29, 1919.

Geology: the region shows granite rocks eroded into a high and rugged mountainous area. The lodes are typical fissure veins varying from 20' to 100', and of unusual persistence downward, but are broken by intense

crushing and faulting. The vein quartz contains pyrite, galena, sphalerite, gold, and a little silver. A predominance of galena is generally accompanied by an increase in gold, but free gold is rarely seen. Graphite is distributed in small quantity through the ore.

Development: the following tables summarize operations at the principal mines:

Tabowie Mine.

Value per ton.....	\$4.78	\$4.03	\$4.63
Cost of mining per ton....	\$3.25	\$1.96	\$2.01

Reserves in all the mines are 795,066 tons, worth \$5.24 per ton.

Extensive prospecting is carried on continuously on the concession, 1,443' of work being done in 1917; 1,226' and 3,323' of ditching in 1918, and 9,354' in 1919. In 1920, development amounted to 3,891', and trenching 3,435'.

Mining methods vary somewhat, but overhead stoping, with or without timber, is the general practice. Large stoping widths, soft walls, and slipping of backs along graphitic seams in the quartz requires square-sets. As waste and dike matter are mixed with the ore, sorting is necessary.

Equipment: includes 20-mile narrow-gauge timber tramway, 22½-mile transmission line; sawmill and wood-working shop; 2 hydro-electric power plants of about 2,500-h. p., the second one (the Suribong), finished in No-

vember,

of last 9 months of fiscal year ended 1921 was 154,951 tons; costs were \$888,557 and net profit \$112,904. For first 7 months ended 1922, output was 125,721 tons, with gross receipts \$619,517 and net profit \$2,715.

Production to June 30, 1920 was 250,461 tons of ore valued at \$32-

if water is of frequent occurrence and is a serious handicap. The fire in the Tabowie mine lasting for about 6 months de-
struction materially.

Operations are extensive and ably conducted. Geological work is carefully studied, and while one of the mines is almost exhausted, others maintain ore reserves. The native labor problem has been met without serious perplexities, mainly by a close study of Korean conditions and industry. Altogether a highly profitable concern, operating on a large scale at low cost. Results are given with commendable detail in the following tables.

*Loss.

Dividends: have been 25% in 1910; 50% yearly from 1911 to 1918, inclusive; none since.

Property: a lease on the Suan concession in Wang Hai province, granted 1908, to the Korean Syndicate, comprising 166,000 acres, about 55 miles E. from Pyeng Yang. The concession carries full rights to examine, develop and operate all mines and deposits contained within the area covered by the grant. Company also has permission to cut timber and to use all the water required for mining, milling and other purposes from sources within, or adjacent to, the district. These privileges are given for a royalty of 1% on the gross value of the output of the mines. There is an additional annual tax of about 30 cents per acre (50 sen for each 1,000 tsubo), on all land actually selected for mining operations, such selections being made by December, 1916.

The rights in this concession are secured to the Seoul Mining Co. by an agreement made with the Korean Syndicate which provides for the payment of 8% royalty of the actual profits derived from the concession, clear of all depreciation charges. (Royalties and taxes paid in 1918 amounted to \$70,-84.)

Geology: property shows both granite and limestone, the principal orebody, known as the Collbran Contact, lying between limestone and a batholith of granitoid rock. Ores carry gold, copper, tungsten and bismuth, the gold seldom being visible and rarely in coarse condition. Silver is also present, alloyed with the gold to an appreciable amount. The copper ores contain chalcopyrite, bornite and tetrahedrite, with a high gold content, a fair average probably being about 1.2% copper and \$10 gold. The orebodies are irregular and in general parallel with the limestone-granite contact, connected more or less by generally well-defined fissures. The gangue is a highly silicious crystalline limestone, altered by contact action and containing a considerable amount of magnesia and alumina.

Development: there are 3 principal and several subsidiary mines being worked, the former being the Tong Ahm and Tul Mi Chung. In 1918, 38,209' of new work was done, and total is now over 200,000'. Development was much curtailed in 1920.

The Suan mine is about exhausted. It has been an interesting mine, as the ore contained \$9.20 gold, 1.15% copper, and 1.7 lb. bismuth per ton. Mining is conducted through shafts and tunnels.

Tul Mi Chung is the largest mine. The main work has been done on orebodies occurring at the junction of limestone and schist. Good ore was found at the limestone-granite contact, and possibilities in that formation

rie deposit consists of an extensive band of quartzite, inter-
imestone, of an average thickness of 25'. This band carries
as scheelite, 40 cents gold, and 0.4% copper. Reserves are
67,717 tons, worth \$4.93 per ton. A great deal of experimental
en done on this ore, locally and abroad, especially in making
products.

ent: includes steam and hydro-electric power plants, 56-mile
-line, complete mining machinery, 40-stamp mill at Suan mine
ed to treat ore from the Soctarie mine, and 480-ton mill at the
ng, including regrinding, flotation, and cyanidation plants.

Tul Mi Chung and Suan mines only.

his is a highly profitable company, directed by able technical men who
many problems to solve, not the least being the separation of gold, cop-
and tungsten, upon which experiments have been under way for the
four years. Flotation is expected to make a good recovery. The Tul
hung mill is now treating 488 tons daily of gold-copper ore and a 1,000-
mill is planned. If 80% of the gold, copper and tungsten can be extract-
rom the Soctarie ore, a 1,000-ton mill will also be erected there. Com-
y conducts extensive prospecting on its concession, following geologic
minations.

Technical operations on the Suan Concession are described by A. R. Higall and J. F. Mitchell-Roberts in the "Min. & Sci. Press", October 11, 1919.

PHILIPPINE ISLANDS

There has been but little change in the metal production for several years. Production for 1917 was valued at 2,668,615 pesos (P1 = 50 cents), 1918, P2,618,259; for 1919, P2,766,231; for 1920, P2,484,058. Gold accounts for 98% of the total. Iron is the only other metal for which production figures are obtainable, but, except in 1919, the output has been the result of Filipino companies who by crude methods and on a small scale, are exploiting the rich iron ore deposits in the Angat district in Bulacan province.

CUPAN MINING CO.

PHILIPPINES

Address: Wm. M. Haube, 827 R. Hidalgo, Manila, P. I. T. Philips, Mt.

Property: on Batwaan creek, Benguet, Luzon, has been operated in a full way for several years. A 3-stamp mill worked for a year or so. Mine opened by tunnels, which are said to show that the vein persists. Developing 1919-20.

ANTAMOK VALLEY MNG. ASSOC.

PHILIPPINES

Address: c/o Wolfson and Wolfson, 65 Plaza Cervantes, Manila, P. I. **Property:** a gold mine whose output supplies a 6-stamp mill with highly developed.

ARAYAN MINING CO.

PHILIPPINES

Address: Napuangan, Aroroy, Mashate, P. I. **Property:** a gold mine at Napuangan, Aroroy district. Was being developed up to mid-1921; no later information.

BALETE MINING SYNDICATE

PHILIPPINES

Address: Balete, Aroroy, Masbate, P. I. **Property:** a gold mine whose output supplies a 6 stamp mill with highly developed ore. Idle 1919-20.

BENGUET CONSOLIDATED MNG. CO.

PHILIPPINES

Claims

12½% was paid; 22½% in 1917; 25% in 1918; 35% in 1919; 33% in 1920; 10% in 1921 to June. Now that construction expenses are over, larger distributions may be expected.

Property: 26 claims (420 acres), of which 17 (285 acres) are patented in the Antamok valley, 7 miles from Baguio, covering 8,000' along strike of main Benquet lode.

Geology: the main vein is formed by 2 principal fault fissures and a third series of adjustment cracks. In these fissures were deposited the main hanging wall and foot wall veins. The fault planes are not parallel, and the mineralized solutions working along each fissure produced, first, a zone of enriched ore in close proximity to the fault planes, and, secondly, penetrated the brecciated mass lying between the two and mineralized it in a ratio varying directly with the distance separating the two fissures. The walls are approximately 160' feet apart. The main pay shoot is on the hanging wall; another is on the foot wall, and a third and smaller one lies intermediate between them; there are also two cross veins. The hanging wall on one level is more than 1,400' feet long. Ore is a mixture of quartz, iron oxide and sulphide, altered diorite and clay; quartz predominates over the other gangue minerals. There is some free gold, but none is visible; ore averages \$20 per ton in gold.

Development: by tunnel, with a shaft sunk below it reaching a depth of 600'. A 3,500' drainage tunnel is being driven along the hanging wall, which will also permit a thorough examination of the lode. Ore reserves are estimated to be 27,100 tons (of a value of P860,000) positive, 38,810 tons (P1,417,840) probable and 132,910 tons (P2,370,000) possible, on Jan. 4, 1921.

Equipment: includes 10-stamp mill, and cyanide plant of 110 tons daily capacity, ½-mile aerial tram and 2 hydro-electric plants. The mill is fully described by C. M. Eye and M. F. Dodd in Min. Sci. Press of Dec. 4, and 11, 1920.

Production (1 peso-50 cents):

	Ore treated, Tons	Value per ton	Total Value	Extraction	All Costs
1921*.....	18,904	P31.01	P586,140
1920	35,565	33.24	1,068,892	90.5	P16.04
1919	23,719	40.38	853,410	8.91	17.16
1918	23,539	41.32	972,631	89.0	15.36
1917	20,427	35.60	727,201	87.1	14.34

*Six months. Total production to Jan. 1, 1921, is 143,793 tons with yield of P4,983,750.

So little data is obtainable from the Philippines that this report is noteworthy, as it shows that the Benguet is a good mine paying a large return on the capital invested.

COLORADO MINING CO.

PHILIPPINES

Address: Uy Chaco Bldg., Manila, P. I.

Mine address: Aroroy, Masbate, P. I.

Property: in the Aroroy district, of Masbate, contains 15 quartz veins, of which 7 are being developed.

The ore is in a brecciated zone, containing several quartz veins, with clay and manganese, between. No. 5 lode has been traced on surface for 1,500'. One vein is stoped for a width of 36'.

Development: by tunnels is the most extensive of any mine in the Philippines. Underground work, extended 1920 toward Keystone ground to open claims acquired in 1919.

Equipment: includes mill with 20 stamps, ball mill, tube mill, cyanide and power plant, employing a 500-h. p. Diesel engine.

This company has been a consistent producer since 1912, but apparently es publicity and does not reply to our requests for information.

ONSTRATION, LTD.

PHILIPPINES

Address: H. P. Whitmarsh, Baguio, Mountain Province, P. I.

Property: one of the mines of the Copper King group at Tuba, Benguet, n. The vein, on which most work has been done, is composed of cal-quartz and manganese; the other vein yields a refractory ore, carrying silver and sulphides of copper, lead and zinc.

Development: by 4 tunnels, said to have blocked out 100,000 tons of ore.

Equipment: 5 stamps and amalgamating plates. A 150-ton cyanide mill templeted.

Property was being developed in 1919-20, and in latter year, Hongkong l was said to be considering the property, and may finance it, as a re-f an examination recently made.

DWATERS MINING CO.

PHILIPPINES

Address: Mr. Hagen, Baguio, Mountain Province, P. I.

Property: the Headwaters gold mine on Antamok river, Benguet, Luzon, lease to Mr. Hagen. A small mill extracted gold to the value of 27,- osos during 1917 and 1918. Hongkong capital is interested. Being de-d 1919-20.

STONE MINING CO.

PHILIPPINES

Address: care G. M. Willy, Aroroy, Masbate, P. I.

Property: an old, formerly profitable gold mine in the Aroroy district; ly restaked, has a stamp mill and cyanide plant. Part of property o Colorado Mng. Co. about 1918.

Mine was being developed 1919-20.

UON MINING CO.

PHILIPPINES

Address: Zamboanga, Mindanao, P. I.

Property: a gold mine at Zamboanga on the island of Mindanao. Was developed up to mid-1921, no later report.

GA MINES, LTD.

PHILIPPINES

Address: Lianga, Mindanao, P. I.

Property: placer ground near Lianga on Mindanao island. At last ac- (Aug. 1921) a dredge was being installed.

MA GROUP

PHILIPPINES

Address: H. P. Whitmarsh, Baguio, Mountain Province, P. I.

Property: a gold mine at Itogon, Dungaln Creek, Benguet, Luzon, 15 S. of Baguio. Ore is quartz carrying silver and gold in ratio of 4 to weight; one sample across 15' is said to assay \$23.60. Developed by s, with a possible back of 1,500'. While no ore is as yet available, ions are reported to be favorable, and development is being continued.

IT MINE

PHILIPPINES

Address: Moisan and Muller, Maliit, Mambulao, Ambos Camarines,

Property: a gold mine developed by open cuts and tunnels. A mill con- of chain crusher, 10 stamps and amalgamating slates. Mine and mill operating up to Aug. 1921.

BULAO PLACER CO.

PHILIPPINES

Address: 107 Escolta, Manila, P. I.

Property: placer ground in Bulalacao bay, Mambulao, Ambos Cama- The dredge was formerly on Mambulao bay. Operated in 1918, no ation since. Idle or dead.

MANILA IRON & STEEL CO.

Address: O. P. Rhodie, Manila, P. I.

Company owns a small blast furnace in Bataan, which treated iron ore brought from the Calamabayanga deposits and magnetite sand found in concentrated form on the beaches of Mariveles and Limay, Bataan. Has been idle since the armistice.

PHILIPPINES**MARINDUQUE MINING CO.**

Address: E. E. Elser, Kneedler Bldg., Manila, P. I. E. E. Calvin, sec-treas.

PHILIPPINES

Property: 15 claims on east side of Marinduque island, 3 kilometers from Salamaga bay, located in 1916.

Geology: fissure veins, 4 to 10' wide, in andesite, carrying an average of 6% lead and 6% zinc, also up to 3% copper.

Development: by tunneling. About 20,000 pesos were spent during 1917 and 1918. Concentration tests made in 1918, gave a 60% lead concentrate and 45% zinc concentrate. Idle in 1920-21.

MENTZER MINE

Address: Geo. Mentzer, Binalonan, Pangasinan, P. I.

PHILIPPINES

Property: a gold mine at Lubang, Mountain province. Is equipped with mill which was operating at last account, August, 1921.

NATIONAL IRON CO.

A company organized by the Territorial Government at Manila to work the deposit of lateritic iron ore on Dahikan bay, Surigao province, Mindanao island. Deposit is estimated to contain 500,000,000 tons and was reserved by the Government in 1915. Reported that Cebu island with its seams of coking coal will be the logical smelting point.

PHILIPPINES**PARACALE BUCKET DREDGING, LTD.**

Controlled by **Philippine Dredges, Ltd.**, through ownership of 97,075 £1 shares out of 150,000.

PHILIPPINES

Company's 2 dredges, operated by **Philippine Dredges, Ltd.**, in Paracale river, were shut down and dismantled in 1918.

PARACALE VENTURE CORPORATION

Address: B. A. Green, 34 Escolta, Manila, P. I.

PHILIPPINES

Property: placer deposits that underlie a cocoonut grove in the Paracale district of Ambos Camarines. In 1920, work consisted of driving along bedrock. The ground is supposedly an old river channel 20 meters deep.

PHILIPPINE DREDGES, LIMITED

Officers: 31 Queen St., Melbourne, Australia; Paracale, Ambos Camarines, P. I.; and Palmerston House, London, E. C. 2, England.

PHILIPPINES

J. McWhae, chairman of board of directors; A. F. Showers, sec. in Melbourne; E. Habben, sec. in London; W. Telford, mgr.

Inc. Nov. 12, 1912, in Victoria, Australia. **Cap.** £200,000; £1 par; 174,600 issued. Debentures: £41,400 at 7%, due 1919. Company controls the Paracale Bucket Dredging, Ltd. Dividends: 5% in 1917; 5% in 1918; none since.

There was a debit of £6,989 for year ended Oct. 31, 1920, with debit balance forward of £30,951. Current liabilities amounted to nearly £7,000.

Property: 1,103 acres of placer ground along the Paracale.

Production: 21,230 oz. gold from 2,027,888 cu. yd. in 1916; 17,825 oz. from 2,198,253 yd. in 1917; and 12,372 oz. from 1,832,642 in 1918; 5,817 oz. in 1919; 3,936 oz. in 1920.

PHILIPPINE EXPLORATION CO.

Address: Uy Chaco Bld., Manila, P. I.

PHILIPPINES

Property: in Manbulao district, Ambos Camarines. Physical condition of mine is poor, as the shaft and tunnels are caved, but work was resumed in 1920.

PHILIPPINE MINING & INDUSTRIAL CO. PHILIPPINES

Address: Kneedler Bldg., Manila, P. I.

Property: an iron mine owned by Japanese on Calambayanga island, Mambulao, Ambos Camarines.

Development: by bench-quarrying methods. Intensive exploitation was underway in 1920.

Equipment: ore-cars, 40-meter loading pier, scows, etc.

Production: beginning 1918, was 100 to 150 tons of iron ore daily with a total output in 1919 of about 18,000 tons. Ore was smelted in Japan.

Idle since end of 1919.

SYNDICATE MINING CO. PHILIPPINES

Address: 101 Lara, Manila, P. I. Mine office: Aroroy, Masbate, P. I.

Officers: J. T. Pickett, pres.; W. J. Shaw, v.-p. treas.; Jay Parsons, sec. F. M. Evans, mgr.; W. G. Carpenter, gen. supt.

Inc. in Philippines. Cap. \$500,000; \$50 par. Annual meeting January 15.

Property: a mile S. of the Colorado mine, and 8 kilometers S. W. of Aroroy, at north end of Masbate island. Deposit is a fissure in andesite and diorite. Ore consists of quartz and calcite, and at times is charged heavily with manganese. The average value is \$11 per ton in gold and silver.

Development: by 1,400 and 2,800' tunnels, opening ground to depth of 500'. Reserves are equal to 2 years.

Equipment: includes 1,000' gravity tram, compressor and 140-ton all-sliming cyanide mill, driven by Diesel type engines.

Production: averaged 100 tons daily during past 3 years; increased since June, 1919, to 130 tons daily.

This is one of the 3 principal gold mines of the Islands, but company does not give out information.

AVAMENTA CHAVES MINING CO. PHILIPPINES

Address: Cagayan, Misamis, P. I.

Property: a recently discovered iron (magnetite) deposit in Bukidnon, Mindanao, said to be of large dimensions. There had been no production up to mid-1921.

SIAM**ALORSTAR TIN PROSPECTING CO. SIAM**

Address: Melbourne.

Company was organized early in 1920 to acquire tin-bearing areas in Malaya or Siam. Prospecting has been underway at Koh Painam and Bandon, Siam. The property at Bandon is reported to have been taken over late in 1921. On April 30, 1921, company had a £1,866 cash balance.

BANGNON VALLEY TIN, N. L. SIAM

Address: Bangnon Valley, Renong, Siam. Controlled by Australian capital.

Property: tin-bearing land in Bangnon Valley, Renong, Siam, on which a dredge is operating. During year ended May 31, 1919, 275 tons of black tin was recovered from 605,147 cu. yd. of alluvium, or 15.99d per yard as compared with a cost of 5.57d. Regular dividends are being paid; in 1918-9, 4s per share were paid from net profit of £26,269.

In February 1919, company's plant was transferred to North Taiping Tin Dredging Co., Ltd., (q. v.), and corporation has presumably gone out of business.

BANGRIN TIN DREDGING CO., LTD. SIAM

Controlled by Siamese Tin Syndicate.

Address: Capel House, New Broad St., London, E. C. 2, England. Organized March, 1920. Cap. £170,000; £1 par; of which Siamese Tin owns 40,000 shares.

Property: the Bangrin tin-bearing ground in Renong district, 5 miles

ating profit for 1920-21 was £6,211, other income, £2,734 and balance, £24,494; total, £33,439 with balance of £9,152 after and other deductions. Excess of current assets June 30, 1921, 430.

ends: preference shares paid in full; while common received 12 1/2 30% in 1916; 30% in 1917; 25% in 1918-19; 15% in 1919-20; none

perty: 460 acres of tin-bearing gravel land on the Renong and Pak vers, Siam, on which 2 dredges are working; also 1,000 acres at Rasa ngon, Malaya, acquired in 1920 for 32,000 Renong shares, of which es contain 18 to 24' of ground averaging 1.2 to 1.6 lb. black tin per on which one dredge has been working since March, 1921.

roduction years ended June 30:

	Yardage	Black Tin	Cost per yd.
.....	1,277,944	846
.....	1,508,983	578	12d to 17d
.....	1,577,374	759	11d (22¢)
.....	2,033,357	842	10d (20¢)
.....	2,170,177	970	8d (16¢)

The Siamese properties are becoming exhausted and company's future depends on its Malayan holdings.

RONPIBON EXTENDED**SIAM**

Address: J. W. Barrett, Ringwood, Victoria, Australia.

Inc. November, 1917, in Victoria, Australia. **Cap.** £40,000. Controlled by Deebook Dredging and Ronpibon Tin.

Property: 90 acres of tin-bearing gravel in Bangnon Valley, Renong, which with one dredge were purchased with stock from Deebook in 1917. For year ended May 31, 1920, recovered 282 tons of tin concentrate from 678,000 cu. yd. of material.

RONPIBON TIN. N. L.**SIAM**

Address: R. W. Stringer, 31 Queen St., Melbourne, Australia.

Property: tin-bearing ground in Rawnpibun, Southern Siam. With the Deebook Dredging, Ronpibon is interested in Ronpibon Extended. Erection of a dredge was to have been completed early in 1922.

SIAMESE TIN SYNDICATE, LTD.**SIAM**

Office: Capel House, New Broad St., London, E. C. 2, England.

W. H. P. Stevens, chairman of board of directors; **C. A. Underwood**, sec.; **H. G. Scott**, gen. mgr. in Siam; **A. N. Wakefield**, res. mgr.

Inc. Nov. 22, 1906, in Great Britain. **Cap.** £200,000; £1 par; 120,000 issued.

Operating receipts for 1920 were £198,285 and profit, £45,271. Excess of current assets was £3,540; surplus, £6,660; reserves, £20,000.

Dividends: 30% in 1913; 20% in 1915; 25% in 1916; 25% in 1917; 25% in 1918; 25% in 1919; 30% in 1920; 10% in 1921.

Property: 1,730 acres of tin-bearing land at Ngow, Renong district Siam. The new areas acquired contain over 30,000,000 cubic yards, carrying from 0.8 to 4 lb. of tin per yard, include the 125 acre Bandon tract on Peck and Plai Wah rivers. A coconut plantation is also being cultivated. A part of the mineral holdings, the Ratroot area, was sold to an Australian company in 1921.

Equipment: includes 3 dredges.

Production: 798 tons of black tin in 1917; 777 tons in 1918; 938 tons in 1920; 1,298 tons in 1921.

In March, 1920, a subsidiary, the Bangrin T. D. Co. (q. v.), was formed to work the Bangrin property 5 miles N. of Ngow.

TONGKAH HARBOR TIN DREDGING CO.**SIAM**

Office: A. M. P. Chambers, Elizabeth St., Hobart, Tasmania. **Hy. J. Wise**, of Wise & Inglis, mgr.

Malcolm Kennedy, chairman of board of directors; **E. T. Lewis**, gen. mgr.; **G. H. Symons**, asst. mgr. **J. C. Masterton**, sec. in Siam.

Inc. 1906, in Tasmania. **Cap.** £250,000; shares £1 par; 150,000 issued.

Net profit was £40,336 in 1915; £40,808 in 1916; £67,923 in 1917; £118,920 in 1918; £75,548 in 1919; £90,664 in 1920; in 1921 there was a loss of £22,525, after depreciation, etc. **Current assets** at end of September, 1920, totaled £118,235 and liabilities, £4,798. **Surplus** Sept. 30, 1921, was £61,085.

Dividends: to September, 1921 total £615,000.

Property: 5,350 acres in Tongkah harbor, Siam, of which over 720 acres have been dredged. The dredgable material averages 1 lb. tin oxide per yard. Five boats are at work. Holdings of **Bang Tao Co.** are to be worked on royalty basis.

Production:

This is one of the most profitable mining companies in the Orient, and its annual reports give full data concerning dredging operations and costs.

SIBERIA

AYAN CORPORATION, LTD.

SIBERIA

Office: A. E. Ford, sec., 428 Salisbury House, London, E. C. 2, England.

J. J. Agnew, chm. of directors; C. W. Purington and J. C. McNaught, joint managers.

Inc. July 8, 1921, to acquire from the **Syndicat Minier du Pacifique** and certain individuals, alluvial gold properties in the Okhotsk region, Kamchatka district, eastern Siberia, N. of Nicolaivsk. **Cap.** £300,000; par £1; all issued fully paid. **Debentures:** £92,500 7s of which 30% has been paid. The National Mng. Corp. and 3 other companies are sponsors for this new corporation.

LENA GOLDFIELDS, LTD.

SIBERIA

Head office: H. Richards, 341 Salisbury House, London, E. C. 2, England. **Agency:** Russian Mining Corporation, Ltd., Nevsky 19, Petrograd, Russia.

Directors: Lord Harris, chairman; F. W. Baker, G. Benenson, Herbert Guedalla, Sir Leigh Hoskyns and J. R. Mason, C. W. Purington, cons.engr.

Inc. July 10, 1908, in England. **Cap.** £1,405,000; shares £1 par; all issued. Company holds 19,474 shares of the **Lena Gold Mining Co.** (Lenskoié), which see below, the operating company in Russia. In 1920 company purchased 45,000 shares (45% interest) of **Altai Mines, Ltd.** Ruble exchange and shareholdings make the financial situation complicated.

Balance sheet of Sept. 19, 1920, showed:

Assets: shares Lenskoié Co. stock (19,474), £572,808; Altai Mines Co. shares, £1,122,616; sundry invest., £157,290; Lenskoié Co., £25,521; loans and interest, £45,547; debtors £8,904; War loan, war bonds, Victory Loan, plus interest, £373,296; Cash, £122,178; balance, £441,091; total, £2,868,254.

Liabilities: Capital stock £1,405,000; premiums, £187,626; dividends unclaimed, £7,185; creditors, £175,180; loans, £26,970; reserve account £1,066,291.

Dividends: 20% in 1909-10; 30% in 1910-11; 20% in 1911-12; nil in 1912-13; 5% in 1913-14; 1¼ rubles per share in 1914-15, paid in April, 1916.

Property: gold placers worked since 1863, yielding over \$200,000,000. There are four groups totaling 90,376 acres in the Irkutsk province of Siberia.

Development: for many years operations were on somewhat primitive lines, but modern methods are gradually being introduced, including prospecting by drilling, underground drift mining, hydraulicking, dredging and winter washing of gravel; also improved sluices, riffles, jigs, and clean-up accessories. Over 5,000 men and 800 horses are employed under normal conditions.

Proved reserves of pay gravel are as follows:

Class	Yards	Recoverable value per yd.	Gross profits	Years life
Drifting	711,200	39/10 (\$9.46)	£ 456,363	1½
Dredging	58,984,000	1/7½ (\$0.40)	£2,577,800	16

The calculated life of the mine is based on the old rate of extraction for drift mining, and the use of two 17 cu. ft. dredges for the other ground.

Production from drift mining years ending September 30:

Year	Yardage	Yield per yd.	Value	Cost per yard
1916-17	570,529	46/1 (\$11.05)	£1,318,445	27/6 (\$6.54)
1915-16	788,942	39/10 (\$ 9.56)	1,503,010	27/6 (\$6.54)
1914-15	974,234	38/11 (\$ 9.23)	1,791,944	26/7 (6.31)
1913-14	873,635	29/4 (\$ 6.80)	1,277,609	26/10 (6.44)

Winter washing operations were not begun until 1913; 25% of the total yardage mined was washed in the winter of 1914; 36½% in 1915, and 52½% in 1916.

This is an immense property formerly worked by primitive methods but now equipped and worked with up to date machinery. The transformation has been handicapped by prejudices, complex finance, inefficient labor, severe winter climate, and long distance from sources of supplies. All operations have been at a standstill in recent years owing to revolutionary disturbances.

Lena (Lenskoie) Gold Mining Co.

Address: H. Richards, 341 Salisbury House, London, E. C. 2, England. Gernet, chairman in Russia; M. Malozemoff, mine manager.

Inc. in Russia. Cap. 33,000,000 rubles, increased from 11,100,000 R. in 1917 by issuing 110,000 shares of 150 R. (par value) at 355 R. each. Lena Goldfields, Ltd., holds 19,474 shares of the Lenskoie's capital stock.

No accounts for 1916-17 were available up to June, 1919; but for that year the gold output was valued at £1,445,014.

In November, 1917, the Bolshevik regime brought serious trouble to the Lenskoie Co. The exorbitant demands of workmen and dealers increased 500% above pre-war prices, while labor efficiency, never satisfactory, dropped 50%. The selling price of gold was raised six times by the Government, but this was still insufficient to meet expenses. The Soviet-Government then agreed to meet the loss provided the company yielded to all demands. In October, 1918, the mines were nationalized and the offices in Petrograd confiscated by the Soviet party. In June, 1918, this Government was expelled from Bodaibo, the region in which the mines are situated, and since then little news has been received. In March, 1919, only 3 drift-mines were being worked, yet these are capable of yielding 237,000 oz. of gold annually for at least 6 years.

For further particulars see **Lena Goldfields, Ltd.**, above.

RUSSK GOLDFIELDS, LTD.

SIBERIA

Office: 65 Broad St. Ave., London, E. C. 2, England. Thos. Mallin, sec.

G. S. Dyer, gen. mgr.; Hooper, Speak & Co., cons. engrs.

Inc. March 1, 1906, in Great Britain. Cap. £920,000 in 531,000 ordinary shares (530,007 issued), 876,000 preference shares 5s. (318,000 issued), and 170,000 priority shares, £1 (80,000 issued). The **Russian Mng. Corp.** owns 30,000 ordinary shares and a large interest is held by the **Siberian Proprietary Mines.**

Financial Statement, years ending January 13, converted from rubles to sterling.

Year	Revenue	Expense in Siberia	Expense in London	Profit or loss	Dividends

COMPANY, LTD. (THE) SIBERIA

ec: Gen. Agency & Trust Co., Ltd., secs., 1 Broad Street Place, E. C. 2, England.

J. B. Dale, chairman of board of directors; I. I. Chikantseff, gen. Russian company.

. June 26, 1912. Cap. £1,000,000; £1 par; 755,000 fully paid, shares and listed on the London Stock Exchange. An option expiring two fter peace, on 166,000 shares treasury stock has been granted. Title erty is held through the Sissert Mining District Co., Ltd., registered ssia, which the company controls through ownership of entire share

profit in 1916 was £2,544, and surplus £4,951.

ividends: 5% in 1913 and 1914; none since.

roperty: about 340,000 acres, held under a perpetual lease, in the Urals, iles S. of Ekaterinburg, on the Ekaterinburg-Cheliabinsk railway. The erty includes many old copper, gold, and iron mines, and extensive ts. The principal copper properties are the Degtiarsky, Polefskoy,

Gumeshevsky mines, which have been worked since 1727, and the selksky, opened in 1906. There are also about 100 iron mines, yielding onite of 40 to 53% iron content, with other mines yielding chrome and nganese. Iron ore reserves are estimated at 6,000,000 tons. The annual put of iron ore was 40,000 tons.

Development: the Sysselsky copper mine is opened by 3 shafts, deepest

245', showing ore of about 5% copper tenor. Mine has a plant with a productive capacity of 1,500 tons per annum. Reserves are estimated at 70,000 tons of 4¼% ore.

The **Gumeshevsky** and **Polefskoy** mines, discovered in 1716 have been operated almost continuously since 1727. These mines are about 500' deep, and up to 1870 produced a total of about 63,500,000 lb. fine copper, though only oxidized ore was mined. The orebody is a contact deposit, genetically related to augitic rocks, and lying between limestone and augitic biotite pyrenites, the oxidized ore occurring in a decomposed irony and calcareous clay belt, fully 2 miles in length and about 1,000' wide. The sulphide ores carry chalcopyrite in lenses of garnet-magnetite rock. The old ore dumps at the Gumeshevsky, consisting of clay material with fine ore that escaped hand-picking in earlier operations, were worked with excellent results. They still contain 400,000 tons. The ore has been leached at the rate of 80,000 tons yearly.

Old slag dumps at Polefskoy are also to be reworked. These dumps, estimated at 640,000 tons, are said to contain 1% copper, about 75% of which is thought to be recoverable by pyritic smelting.

Fifty drill-holes at the Degtiarsky mine showed 3,530,000 tons of 2.77% copper ore, with 3s. (72c.) gold and silver. The orebody is about 10,000' long, 5,800' being fully proved. Over 5,000,000 tons is ultimately expected. Two shafts to 150', with laterals, confirm drilling results.

At the Staro Podnefskoy and Kadnakofsky iron mines the surface is a true gossan and the underlying sulphide is certain to be copper bearing and of commercial value.

In the Krilatofsky mine, 6 miles from the Degtiarsky, are gold quartz veins in granitic schist. Reserves to 280' are estimated at 371,000 tons of 3s. 3d. (\$3.18), and 227,000 tons of 10s. 6d. (\$2.52) per ton ore. In the Blagoveshensky, near Sissert, is considerable 20s. (\$4.80) gold ore. These ores will be used as a flux in reducing the copper ores.

The Degtiarsky and Syselsky mines also contain several million tons of iron pyrite.

From the Bgorshinsky and Isyhks mines a large quantity of coal is available.

Annual production was normally 40,000 tons of iron ore, 17,500 tons of pig iron, 10,000 tons of pyrite and some coal.

In 1912 the mines produced 3,280,200 lb. of copper; 2,895,200 lb. in 1913; 2,140,600 lb. in 1914; 506,000 lb. in 1916. In recent years operations have been intermittent owing to revolutionary disturbances.

SPASSKY COPPER MINE, LTD.

SIBERIA

Office: J. A. Clark, London manager and sec., Finsbury House, Blomfield St., London, E. C. 2, England.

Sir A. Fell chairman of board of directors; Ernest Carnot v. c.; H. C. Bayldon gen. mgr. at Spassky Zavod, Akmolinsk, Siberia; H. C. Robson, melter supt.; D. G. Smith, supt. at Yuspensky; E. T. McCarthy, cons. eng. Henry Puzev, mgr., Miasnitskaia 17, Moscow, Russia.

Inc. July 9, 1904, in Great Britain. Cap., £1,250,000; shares £1 par; 1,069,070 issued.

Statement for 1915 published November 1916 showed a net profit of £126,453 earned in Siberia. The remittance of funds from Russia is not permitted, so money will accumulate there. Assets included cash, £162,316; supplies, £159,256; and metals, etc., £163,039. Creditors, etc., amounted to £100,202. No financial statement is available since.

Dividends: 15% in 1910, 17½% in 1911, 25% in 1912, 10% interim on account of 1914, declared in October, 1915. Further dividends postponed on account of revolution.

Property: in the Kirghiz Steppes, in 2 main groups, about 300 miles apart, 250 and 500 miles, respectively, from the nearest points on the Tash-

revo

The **Spassky group**, comprising about 100 sq. miles, in the Akmolinsk district, includes the Yuspenssky copper mine and the Karagandy and Saran coal mines; also lands carrying iron and limestone.

Geology: the Yuspenssky mine has a network of veins at and near the contact of slate and arcose sandstone, in sedimentaries, of Permian age. The 2 veins, known as the Annensky and Vladimir, or Yuspenssky, are about 200' apart and substantially parallel, and it is thought they may join at depth. Principal development is on the Annensky vein, which is 10 to 60' in width, carrying a hanging-wall paystreak of massive chalcocite, succeeded by bornite, largely massive, with silicious gangue followed by small quantities of chalcopyrite and occasional tetrahedrite, the vein growing gradually leaner in copper toward the footwall, which is imperfectly defined and carries low-grade copper impregnations. The gangue is mainly quartz and barite, and the ore is estimated by the company to average 12 to 20% copper. The upper workings show some native copper, cuprite, azurite and malachite. The mine was gouged for rich ore by the former owners, who left a large amount of low-grade material unstopped.

Development: the Yuspenssky mine is opened by 3 shafts, the Annensky being 700' deep. Chalcopyrite is taking the place of bornite in the enrichment zone, while the mineral content is becoming more evenly distributed. Reserves at the end of 1915 were 10,000 tons of 19% and 429,475 tons of 7.8% ore. Considerable diamond drilling was done in 1915 and 1916, with fair results.

Equipment: includes 900-h. p. steam plant, hoists, compressors, pumps, 150-ton concentrator and smelter, 26-mile railway and quarters for employees.

The Karagandy coal mine, 24 miles by rail from the Spassky smelter, produced 90,215 tons in 1913; 80,901 in 1914, and 63,984 in 1915. It contains about 400,000,000 tons of coal.

The **Atbasar group**, 28½ sq. miles, 250 miles N. E. of Djousalie, the nearest station on the Orenburg-Tashkent railway, includes the Kresto, Pokrofsky, Annensky and Nadiozhdenski mines, and a coal area of about 9 sq. miles, 65 miles from the mines.

Geology: the Atbasar shows sedimentary sandstones, shales and conglomerates, on a plateau of about 20 sq. miles, lying about 70' above the level of the district, carrying numerous outcrops of malachite, and at depths of 50 to 70' from surface, are found sandstone beds mainly 18" to 8' thick and of 3' estimated average thickness, carrying bornite, claimed to average about 13% copper. Reserves were estimated at 543,900 tons of 10.7% ore.

Equipment: includes mining machinery, buildings and smelter of 6,500-ton capacity of copper per annum, this being erected between the coal and copper mines.

Production at Spassky:

Year	Ore, tons	Copper, pounds
1906.....	1,824,480
1907.....	1,573,650
1908.....	2,961,280
1909.....	15,551	3,675,840
1910.....	19,647	5,343,520
1911.....	31,302	6,401,920
1912.....	28,315	8,955,520
1913 (15 months).....	43,591	11,215,680
1914.....	20,697	10,489,920
1915.....	20,847	7,728,000

Operations at the Spassky have been seriously hampered by war and revolution. In April, 1918, the Bolshevik faction nationalized the property,

but it was handed back within a short time, and late in 1918 operations were resumed on a reduced scale. Since early in 1919, the property has been in the hands of the Bolshevik, but has presumably not been seriously damaged.

TIU-TIU-HE MINE

SIBERIA

Address: Aaron Hirsch & Co., Halberstadt, Saxony, Germany, or Jules Bryner, Vladivostok, Siberian Russia.

Property: 2,000 acres of mineral land on Tiu-Tiu-He creek, 24 miles inland from the Sea of Japan, E. coast of Siberia, 180 miles N. E. of Vladivostok. In 1909, a large calamine (zinc carbonate) deposit was mined by open cut. The ore is in part a replacement of limestone along quartz porphyry contact. Besides zinc, the ore carries-lead and silver. A tunnel started in 1914 was driven at depth of 275'. This tunnel with other development is said to expose 500,000 tons of sulphide ore averaging 18% zinc, 12% lead and 8 oz. of silver per ton. Equipment: includes a 1½ mile aerial tram, a 2' gauge railway to the coast and 175-ton concentrator.

Production: probably \$5,000,000 to \$6,000,000 gross of shipping ore assaying 50% zinc up to 1914.

AUSTRALASIA

Includes the Commonwealth of Australia and Dominion of New Zealand. The mines are described alphabetically by States.

NEW SOUTH WALES

The metal output of the state for 1920, comprised 48,907 ounces gold valued at £207,746; 1,290 tons copper valued at £127,928; silver valued at £36,942; silver-lead concentrates, £76,634; lead £9,905 and zinc concentrate £249,454; tin and tin ore £413,794. This diminished output compared with that of previous years is due to labor troubles particularly in the Broken Hill district. The mining industry employed 29,163 men in 1920.

ABERCROMBIE COPPER MINES, LTD.

N. S. W.

No recent information. See Vol. XIII for details.

ADELONG CREEK DREDGING CO.

NEW SOUTH WALES

Address: Tumbalong, N. S. W.

Operations for half year ended Nov. 30, 1921 showed a loss of £221 (after depreciation), compared with a loss of £1,681 for previous six months.

Company operates two dredges; No. 1 treated 277,800 cu. yd. and recovered 4.09d per cu. yd. at a cost of 4.40d; No. 2 dredge treated 334,100 cu. yds. and recovered 3.30d per cu. yd. at a cost of 3.39d.

ADELONG GOLD ESTATES, LTD.

NEW SOUTH WALES

Address: W. George, gen. mgr., Grahamtown, N. S. W.

Report for year ended April 30, 1921, showed receipts from gold sales, £16,481; net operating profit, £2,187; dividend (No. 16—1s), £3,750. Liquid assets exceed liabilities by £13,601.

Company operates two dredges. In half year ending April 30, 1921, No. 1 dredge treated 333,495 cu. yd. in 2,397 hrs. and recovered 2,091 oz. gold or 3.01 gr. per cu. yd. at a cost of £6,339 (4.56d) and valued at £8,270 or 5.95d per cu. yd. No. 2 dredge treated 269,344 cu. yd. in 2,613 hrs., and recovered 1,047 oz. gold or 1.86 gr. per cu. yd., at a cost of £5,975 (5.3d) and valued at £4,171.

AMALGAMATED ZINC (DE BAVAY'S), LTD.

N. S. W.

Office: E. H. Shackell, sec., Collins St., Melbourne, Australia; and C. Lloyd, 1 London Wall Bldgs., London, E. C. 2, England.

Directors: Hon. W. L. Baillieu, chairman; M. Cohen, A. J. F. de Bavay London Board; H. W. P. Clinton, F. A. Govett, G. W. W. Mackinnon, W.

1909, in Australia. Cap., £500,000; shares £1 par; all issued and
d.

ounts are submitted semi-annually. Report for 1st half of 1921
receipts, £150,934 and balance to profit and loss account, £127;
previous half year (Dec. 31, 1920) was £16,651.

idends: 5% in 1910; 20% in 1911; 27½% in 1912; 32½% in 1913;
1914; 45% in 1916; 20% in 1917; 20% in 1918. A dividend of 1s was
April, 1919, and in 1921.

pany acquired the entire assets of the De Bavay Treatment Co.,
nd the patents of the Potter's Sulphide Ore Treatment, Ltd. To avoid
n with the Minerals Separation, Ltd., the companies were merged into
nerals Separation and De Bavays Processes Australia Proprietary,
apitalized at £300,000, shares £1 par, of which 101,750 shares were is-
ie Minerals Separation Ltd., and 83,250 the Amalgamated Zinc. The
amated Zinc has the right to use all the Minerals Separation patents,
st pay the usual royalties.

ompany also owns the following share interests: 119,250 shares Miner-
eparation & De Bavay's Processes, Australia Pty., Ltd.; 960 shares Zinc
cers Association Pty., Ltd., and 200,000 shares in Electrolytic Zinc Co.
ustralia.

algamated Zinc has no mines, but buys zinc-lead-silver tailings from
oken Hill South, Broken Hill Proprietary Block 10, and North Broken
mines at Broken Hill, N. S. W. Material is treated in a flotation plant
le of handling 40,000 tons per month.

roduction: for first half of 1921, 128,646 tons of tailing treated, yielded
tons zinc concentrate, assaying 46.4% zinc, 7.9% lead, 13.8 oz. silver,
15 tons lead concentrate, assaying 49% lead, 39.2 oz. silver and 18.1%

During previous half year, work was resumed in November, (after the
) and 14,852 tons treated yielded 3,403 tons zinc concentrate, averaging
% zinc, 6.7% lead and 13.4 oz. silver per ton and 32 tons lead slime con-
ate, averaging 48.6% lead, 15.7% zinc and 76.6 oz. silver.

FISH BROKEN HILL PROPRIETARY CO., LTD. (THE) N. S. W.

Offices: E. E. Garner, sec., Salisbury House, London, E. C. 2, England;
t. Clark, Australian sec., Steamship Buildings, Adelaide, South Australia.

Directors: W. H. Woodhead, chm.; F. S. Saunders, A. Stewart, G. W.
Mackinnon, M. G. Anderson, F. V. Sanderson, J. K. Samuel (last three
y the Australian board), C. I. Emery, gen. mgr.; G. C. Klug, cons. engr.;
eal. mill supt.

Inc. Nov. 11, 1887, in England. Cap. £339,000, in 315,000 £1 ordinary
es, and 60,000 8s. privileged shares; all issued and fully paid.

The first half of 1919 resulted in a profit of £65,582, which was carried
ward; the second half in a profit of £21,125; the year 1920 showed a loss
£47,758, leaving a credit of £122,903 to P. & L. account. Liquid assets
ed liabilities by £218,303.

Dividends: since 1897 total £821,280, but have been irregular; 4 in 1917
6 in 1918.

Property: Blocks 15 and 16 at Broken Hill, N. S. W., held under lease
m the N. S. W. government.

Development: by shafts and extensive workings. No development work
s done in 1920. Ore reserves in 1920 amounted to 1,095,015 tons, asaying
oz. silver, 13.3% lead, and 11.3% zinc. Equipment: complete for mining;
o concentrating plant, using jigs and flotation (Minerals Separation and
ster selective).

Production: for first half of 1919, 63,099 tons of ore milled made 9,903
ns concentrate carrying 60.7% lead, 7.3% zinc, and 26.4 oz. silver; the flo-
tion plant made 8,040 tons of concentrate, carrying 45% zinc, 9.1% lead.

and 10.1 oz. silver; 1,953 tons carbonate ore running 23.6% lead was also mined.

The mine was closed from May, 1919 to Nov., 1920, owing to a general miners' strike for higher wages and shorter hours. From Nov., 1920 to Jan. 1, 1921, 600 tons of carbonate ore and 13,756 tons sulphide ore was mined. The lead mill treated 14,279 tons yielding 2,330 tons lead concentrate; the zinc mill treated 10,636 tons lead mill residue, yielding 2,120 tons zinc concentrate that averaged 10.8 oz. Ag.; 9% Pb.; 45% zinc. Normal output is about 300,000 tons of ore annually.

BROKEN HILL JUNCTION LEAD MINING CO. N. S. W.

Office: A. D. Young, Brookman's Bldg., Adelaide, South Australia.

Directors: J. G. North, chairman; J. Bembrick, R. T. Edwards, W. A. Freeman, and C. H. Smith, W. Queale, mgr.

Inc. 1914 in South Australia. Cap., £150,000; shares 10s. par; 272,567 issued and fully paid. Report for six months ended March 31, 1920, showed a loss of £4,835 and debit balance, £7,649.

Property: 51 acres of mining ground at Broken Hill, N. S. W., developed by shafts and extensive workings.

Equipment: includes complete mine and mill equipment with concentrating plant and air-compressor. The ore will be treated by the Block 10 Co.

BROKEN HILL PROPRIETARY BLOCK 14 CO., LTD. N. S. W.

Office: J. Brandon, 31 Queen St., Melbourne, Victoria, Australia.

Directors: Alex. Campbell; B. A. Moulden, V. J. Saddler, Clive Bailieu, and J. L. Wharton. F. V. Smith, mgr.

Inc. Feb. 19, 1887 in Victoria. Cap., £155,000, in 100,000 10% cum. pfd. 6s. shares and 100,000 ord. 25s shares; all issued.

Reports are issued half-yearly, and in the period ended March 31, 1921, the operating loss was £17,671. Excess of liquid assets over liabilities was £37,760.

Dividends: 19s per share from 1896 to 1901, after which 37s 6d on pfd. and 26s on ord. shares, to Sept., 1919; 6s paid in 1920.

Property: at Broken Hill, N. S. W. Though the company has a mill, the carbonate ore is all sold to smelters and the sulphide ore is treated at the Block 10 mill. Recent exploration work developed much new ore, but the old stopes are still productive. Company also has an interest in the King Island Scheelite Co. (39,450 shares), which see.

Production: for November and December, 1920 was 405 tons carbonate ore, averaging 24.3% lead and 13.8 oz. silver and 1,201 tons sulphide ore.

The mine was closed down to November, 1920, because of the miners' strike, but operations were short lived, mine work being again suspended in December.

BROKEN HILL PROPRIETARY BLOCK 10 CO., LTD. N. S. W.

Office: J. Brandon, 31 Queen St., Melbourne, Victoria, Australia.

Directors: A. Campbell, chairman. Clive Baillieu, William Jardine, V. J. Saddler, and B. A. Moulden. A. W. Wincey, gen. mgr.

Inc. March 14, 1888, in Victoria. Cap., £1,000,000; shares £10 par; all issued and £9 13s paid.

Reports are issued half-yearly, and during the period ended March 31, 1921, showed a loss of £18,800. Surplus of liquid assets over liabilities was £60,138.

Dividends: from 1890, total £14. 3s per share; including 3s in 1918-'19.

Two dividends were paid in 1920, No. 117 of 1/6 per share and No. 118 of 1/ per share, a total of £12,500.

Property: mines at Broken Hill, N. S. W., and an interest in the Block 10 Misima Gold Mines, operating on St. Aignan Island, near New Guinea. The Broken Hill mine contains estimated reserves of 228,900 tons to a depth of 1840'.

ore from Block 14 mine.

Production: during 1920 the mine was worked only from November to December, and the mill was in operation until January 21, 1921. Costs for the half year to March 31, were 60/8.36 as compared with 47/6.76 for previous six months. Shipments amounted to 1,228 tons lead concentrate, assaying 36.53 oz. silver, 61.12% lead and 6.35% zinc and 756 tons zinc concentrate, assaying 12.19 oz. silver, 5.30% lead and 47.69% zinc; in addition there were 16,833 tons de Bavay tailings and 6,907 tons slimes.

BROKEN HILL PROPRIETARY CO., LTD.

N. S. W.

Head office: F. M. Dickenson, 320 Collins St., Melbourne, Victoria, Australia. **Mine office:** Broken Hill, N. S. W. **Steel works:** Newcastle, N. S. W.

Directors: Bowes Kelly, chairman; with R. O. Blackwood, H. G. Darling, W. Jamieson, H. V. McKay and D. W. H. Patterson. **Essington Lewis** gen. mgr.; E. J. Horwood, works mgr. at Broken Hill; R. T. Slee, mine mgr.; D. Baker, steel works mgr. at Newcastle; J. A. Lindsay, chief engr.

Inc. Aug. 13, 1885, in Victoria, Australia. **Cap.** originally £320,000; shares £20 par; increased to £3,000,000, shares £1, of which 2,520,000 are issued. **Debentures:** £1,000,000 of 6% A's authorized; £747,400 outstanding; £1,500,000 of 7% B's, all outstanding.

Dividends:

Year	Net Profits, £	Dividends, £
1914.....	294,488	203,050
1915.....	321,839	177,150
1916.....	486,529	236,201
1917.....	426,199	177,151
1918.....	650,587	236,201
1919.....	652,343	302,634
1920.....	517,663	315,000
1921.....	351,331	341,108

Surplus of liquid assets over liabilities, May 31, 1921, was £1,739,048.

Property: the Broken Hill, one of the world's largest and most famous silver-lead-zinc mines is now past the zenith of its career. Company also owns iron mines at Iron Knob, S. Australia. It holds 200,000 shares in Broken Hill Associated Smelters Proprietary.

Development: by shafts down to 1,300', huge open-cuts and many miles of workings. The mine still has fairly large ore reserves which contain 14% lead, 8 oz. silver, and 12% zinc. Tailings on hand are also in large quantity.

Equipment: at Broken Hill; power plant, hoists, compressors, tramways, crushing plant, 1,000-ton ore concentrator, flotation plant, etc. At Port Pirie, S. Australia, up to June, 1915, company operated a large smelter with roasters, Huntington-Herberlein and Dwight-Lloyd sintering machines, briquetting plant, blast-furnaces and complete lead-silver refinery. This plant was transferred to the Broken Hill Associated Smelters Proprietary (which see) in June, 1915. At Iron Knob, Spencer's Gulf, S. Australia, company has mining plant for extraction of twenty-one million tons of 68% iron ore, which is shipped by rail to Uhyalla, 33½ miles, then by boat to Newcastle, N. S. W. Normally 220 men are employed at the iron mine.

At Bellambi, N. S. W., company has 66 coke ovens. At Port Waratah, near Newcastle, N. S. W., company owns 2 blast furnaces making 800 tons of pig iron daily; also a small blast furnace for making ferro-manganese, 7 basic open-hearth steel furnaces making 1,200 tons per week, and has a rolling mill of 90,000 tons per annum capacity, producing rods, rails, ship plates; a by-product plant is to be erected.

Production: in 1920 (last 6 weeks) the mill treated 4,420 tons producing 801-ton lead concentrate. In same period 17,028 tons of tailing produced 557

and 226,760 tons in 1920.

Since 1918, labor troubles have interfered seriously with the mine the whole field being closed down from May, 1919, to Oct., 1920.

BROKEN HILL SOUTH, LTD.

N. S. W.

Head office: J. R. Edwards, sec., Collins House, 360 Collins St., Melbourne, Victoria, Australia. R. N. Kirk, agent in Sydney; C. S. Stokes, agent in Adelaide; E. E. Garner, sec. in London.

Directors: B. A. Moulden, chairman; W. M. Hyndman, Colin Fraser, L. K. S. MacKinnon and Hon. D. J. Gordon, G. W. W. MacKinnon, director in London. W. E. Wainwright, gen mgr.

Inc. Oct. 11, 1893, in Victoria. **Cap.** £800,000; shares £1 par; all issued and paid up otherwise than in money; increased from £200,000 in September, 1918. **Debentures:** £200,000 of 6%, issued in bonds of £100; £171,500 outstanding at June 30, 1920.

The company owns an interest in the following companies; Broken Hill Associated Smelters Pty., Ltd., 200,000 £1 shares; Zinc Producers Association Pty., Ltd., 720 £1 shares; Barrier Roaster Co. Pty., Ltd., 10,000 £1 shares; and Electrolytic Zinc Co. of Australasia Pty., Ltd., 120,000 £1 shares; Globe Pty. Ltd., 11,250 £1 shares British Australian Lead Mfg. Pty., Ltd. 20,000 £1 shares; a total of £361,970 at cost.

Statement for the year ended June 30, 1919, showed that the value of the production was £709,392, of which £384,999 was operating profit, less £40,886 for general charges, interest, taxes, and depreciation. Dividends paid amounted to £120,000. The appropriation for income taxes, new plant development, etc., was £160,000 and £64,113 was carried forward. Investments, supplies, metals and concentrates, cash on hand and on deposit totaled £984,325; while current liabilities, exclusive of debentures, were £31,386.

Operations during year ended June 30, 1920, were entirely suspended but receipts from previous production and income from investments totaled £164,531; expenses, £98,645; profit and loss items, £52,286; net profit, £13,600. Investments and current assets, £907,593; current liabilities, £29,763.

Financial report for year ended June 30, 1921, showed a loss of £36,701; receipts from ore sales were £24,881, and expenses, £49,809. Investments and current assets, £783,662; current liabilities, £36,633.

Dividends: since 1902 total £12 1c. 6d p. share, on 200,000 shares (old company) and 3s. per share on 800,000 shares (new company). Last distribution in March, 1919, of 1s 6d per share.

Property: 69 acres of mineral ground at Broken Hill, N. S. W.

Development: to 1,500' depth by six shafts and extensive workings. On the lowest stoping level, 1,270' below the surface the ore averages 15.2% lead, 8.4 oz. silver, and 14.7% zinc. In 1918-19, company did 3,349' of diamond-drilling, and 3,595' of new underground work. All underground work is by contract, and during 1918-19 miners averaged 21/3 (\$5.07) and truckers 18/11 (\$4.43) per 8-hour shift. There are 639 men normally employed in the mine. Reserves total 3,500,000 tons.

Equipment: includes modern chain grate coal-fired-boilers super-heating to 550° F. with automatic induced draft and coal supply, two 3,000 k. w. high pressure steam turbo alternators, 1,000 B. h. p. turbo geared reciprocating air compressor, all of above sets complete with condensing plant and kinetic air pumps and water cooling plant. Also two 440 B. h. p. motor-driven reciprocating air compressors, main shaft hoist, three 300 B. h. p. motor-driven geared hoists on 3 shafts, 1,000' per min. hauling speed. Concentrating plant capacity 1,100 long tons crude ore daily. Slime flotation plant capacity 500 long tons slimes daily. Sandy zinc tailing is treated

malgamated Zinc (De Bavay's) Ltd. on joint account, at the rate of long tons per annum when at full-capacity. Old tailings dumps sold to Zinc Corporation are being removed at of 250,000 tons per annum. Sand on hand totals 700,580 tons, slime ons and deleded slime residues (13.7% zinc) 121,083 tons. The lead concentrate produced is sent to Broken Hill Associated Pty. Ltd., Port Pirie, South Australia, for smelting. About 555 normally employed on surface work.

Production, years ending June 30:

Ore treated tons	Old slime, tons	Concentrates, tons	Lead saved, %	Lead tons	Metals in products	
					Silver, Oz.	Zinc tons
37,923	54,864	14,307	79.8	7,801	510,560	1,730
164,560	36,145	36,074	83.6	22,671	1,031,440	3,272
197,790	32,717	83.3
279,700	24,867	38,695	1,880,792
244,990	44,635

Production has risen from 20/9 (\$4.89) in 1915 to 31/4 (\$7.48) in 1918, and to \$8.94 in 1919. Broken Hill South is not only the premier lead-silver-ine of Australia, but one of the greatest in the world.

Following a strike productive operations were entirely suspended from 1919 to November, 1920.

The mill was reconstructed 1920 at a cost of £76,794, beginning work end of January, 1921 and by June had treated about 1,700 tons of crude ore weekly.

BROKEN HILL SOUTH SILVER MINING CO. N. S. W.
Reorganized in 1918 as Broken Hill South Ltd., which see.

BARGLADSTONE MINING CO. N. S. W.
Main office: Wrightville, Robinson county, N. S. W., Australia.
No recent returns received; probably idle. See Vol. XIV.

A. MINES, LTD. N. S. W.
Address: Cobar, N. S. W.
Financial report for year ended June 30, 1921 showed a loss of £8, total debit balance, £15,711.

The mine was closed down in 1920 owing to a fire in the workings and not be reopened until the copper market improves.

ARBRELL BYGOO TIN MINING CO. N. S. W.
Address: Ardlethan, N. S. W.
Inc. in 1920.

Property: a tin mine in Ardlethan district, equipped with 10-stamp mill. Mill was operated from March 9 to April 19, 1920, treating 352 tons of ore for 6 tons of concentrate at a loss of £1,297.

ELECTROLYTIC REF. & SM. CO. OF AUSTRALIA, LTD., THE
Office: 118 Pitt St., Sydney. Works office: Port Kembla (50 miles S. of Sydney), County of Camden, New South Wales, Australia.

Directors: R. G. Casey, chairman; Kelso King, P. V. McCulloch, J. M. Hill, W. L. Baillieu, and J. L. Wharton. S. W. Thornton, sec.; E. A. White,

The plant covers an area of approximately 53 acres and contains a crushing mill, blast furnaces and converter plant, anode furnaces, electrolytic tank house, refining furnace, etc., etc. 33,950 tons ore were treated in 1920, and 24,700 tons blister copper handled.

Production: 21,300 tons of electrolytic copper (registered brand "E. S. S."); 8,969 tons of fire-refined copper, (registered brand "ESA F. R."); and 371 tons of bluestone (registered brand "ESA Bluestone").

These works are an important adjunct to the copper industry of Australia.

No recent information.

ELSMORE TIN SLUICING CO.

N. S. W.

Address: Elsmore, N. S. W.

Report for first half of 1921 shows No. 1 plant treated 15,350 cu. yd. of material for 6 tons 12 cwt. tin oxide, at a cost of 16,881 d., and resulting in an operating loss of £1,254. No. 2 plant was sold for £4,050, of which £2,400 was distributed to shareholders as a return of capital.

GREAT COBAR, LIMITED

N. S. W.

Head office: 4b Fredericks Place, Old Jewry, London, E. C., England.

Mine office: Cobar, N. S. W., Australia.

Officers: Sir John Taverer, chairman; C. H. Wayte, Sir E. V. Evans, directors; E. Hogan Taylor, mgr.

Inc. May 22, 1906, in England. Cap. £1,000,000, in 200,000 shares of £5 each; 186,542 issued. Also 6% first mortgage debentures totaling £750,000, of which £667,300 are outstanding.

Property: copper mines, smelters, coal mines, coke works and refining plant, at Cobar and other parts of New South Wales. The price paid the Great Cobar Copper Mining Syndicate, which had operated profitably for years, was £800,000 cash, £55,000 in paid-up shares, and £151,000 in cash, shares, or debentures. Several well-known engineers examined the Cobar mine, including C. M. Rolker, J. D. Kendall, W. J. Barnett, and Pellew-Harvey.

A new shaft was sunk to 1,540', and new 1,200-ton smelter erected. In 1913 reserves were estimated at 2,705,161 tons, 2,081,735 tons of which contained 2.5% copper.

Many troubles arose in the mine and plant, and in April, 1914, operations ceased and receivers (A. F. Whinney in England and W. H. Fletcher in Australia) were appointed. An independent report was made, which gave 3 years ore opened. At £65 per ton for copper, the profit would be £88,800, and if no more ore were found, the plant might realize £63,700. The total profit of £152,500 would yield debenture-holders 23%. To enable the new scheme to be worked out, £62,000 was borrowed from debenture-holders, and £40,000 from the New South Wales Government. Net proceeds in 1916, 1917, and 1918 went to certificate-holders on certain terms.

Mining and smelting were resumed during 1917 under the new arrangement.

Production: from 1876 to 1906, inclusive, the Great Cobar mine yielded 1,592,895 long tons of ore, returning 138,593,280 lb. fine copper. Production under the former ownership, was 7,000,000 to 9,000,000 lb. copper yearly, having been 9,027,200 lb. fine copper in 1906; and production by present company was about 10,000,000 lb. in 1907; 10,586,240 lb. copper, 64,949 oz. silver, and 13,002 oz. gold in 1908; 12,762,080 lb. copper 83,208 oz. silver, and 14,452 oz. gold in 1909; 13,847,680 lb. copper, 107,932 oz. silver and 21,524 oz. gold in 1910. Production for the year ending June 30, 1912, was 339,494 tons of ore from the company's own mines and 88,924 tons of custom ore, producing 15,089,760 lb. copper, 178,760 oz. silver and 37,696 oz. gold; in 1913, 13,016,640 lb. copper, 27,136 oz. gold and 127,542 oz. silver. The 1919 output was 1,147 tons of copper.

From the results it is evident an error was made in original estimates of the mine, the new smelter was unsuitable, and the capitalization was too heavy.

In November, 1918, debenture-holders decided to continue operations until September, 1920, when the mine was finally closed. Assets are to be liquidated.

r, and A. Rigby. H. V. Seale, act. gen. mgr. T. H.

2, in Victoria. Cap. £375,000; shares £1 10/- par;

presented half-yearly, and for the period ending Sept. 30, 1921, of £5,720. Current assets exceed liabilities by £161,000. On March 31, 1921, there was a loss of £29,783; current liabilities by £124,841. Loss for half year ending Sept. 30, 1921, £1,000.

Production: 100 tons in 1917; 3/6 in 1918; 1/9 in 1919; 9d in 1920.

Area: 200 acres at Broken Hill, N. S. W. The mine which is fully equipped, contains 192,000 tons of ore that averages 12.3% lead and 6% zinc.

Production: 10,989 tons of 60% lead and 10,435 tons of 50% zinc in 1918-19; 17,215 tons of 60% lead and 20,094 tons of 45% zinc in 1918-19; 637 tons of 53% lead and 461 tons of 40% zinc in 1920-21 (to March). There was no production during half year ending Sept. 30, 1921. Owing to strikes, production was practically nil.

MOLYBDENITE, N. L.

N. S. W.

A. Hulme, gen. mgr., Kingsgate, N. S. W.

Cap. £100,000; in 100,000 shares, 10s par.

Year ended Feb. 29, 1920, total receipts were £9,494; working expenses £5,252; loss, £2,741; creditors, £4,822; liquid assets, £2,059.

Location: at Kingsgate, N. S. W.

Plant: includes 35-ton mill making a recovery of 53.8% molybdenite and 6% bismuth. The mill treated 3,765 tons to March, 1920.

MOLYBDENITE CO., LTD.

N. S. W.

Location: Yetholme, New South Wales, Australia. See Volume XIV for further information available.

ALONG MOLYBDENITE MINES

N. S. W.

Location: James Rankin, 97 Elizabeth St., Melbourne, Victoria, Australia. Supt. J. Wardle; supt. J. Wardle.

Area: 110 acres in Victoria. Cap. £150,000.

Location: 110 acres in New England district of N. S. W., containing 100 tons of molybdenite ore in pegmatite granite; the ore averages 1.9% molybdenite and 1% sulphide. Ore is mined by open-cut.

Plant: includes an elevator, aerial tram, and 160-ton mill using the Rankin System. Concentrates carry 96% MoS₂.

Information received since 1919.

PPY, LTD.

N. S. W.

Location: construction (1919) of Mt. Boppy Gold Mines Co., Ltd.

Location: W. F. Garland, sec., 5 and 6 Queen St. Place, London, E. C. 2.

Location: office: J. Negus, supt., Boppy Mount, N. S. W., Australia.

Location: directors: S. F. Hoffnung-Goldsmid, chairman; with B. J. Levenson, V. Taylor, E. Taylor, and R. Taylor, directors. John Taylor & Sons, cons.

Location: c. Nov. 24, 1899, in England. Cap. £125,000, in 30,000 pfd. and 220,000 ord. shares at 10/- par, all issued. Preferred shares are entitled to first dividend of 10% per annum, plus 10% in ordinary profits; after that has been paid they rank as common.

Location: Report for year ended June 30, 1920, showed a debit balance of £13,000. Cash assets exceeded liabilities by £2,208.

Location: Dividends: were 5% in 1901, 6¼% in 1902, 3½% in 1903, 40% in 1904, 45% in 1905; 45% in 1906; 47½% in 1907; 47½% in 1908; 27½% in 1909; 20% in 1910; 20% in 1911; nil in 1912 and 1913; 7½% in 1914; 5% in 1915; 5% since; total, £446,000.

Location: Property: 200 acres mineral land and 230 acres for water supply in Co-

bar district of New South Wales. Company also has an option on the Occidental mine, which is nearby.

Development: by shafts. Ore reserves estimated at 165,714 tons, June 30, 1920.

Equipment: includes mill with sixty stamps 4 tube-mills, and cyanide plants.

Production: in 1918, 61,176 tons, yielding 15,511 oz. gold compared with 9,526 tons yielding £119,508 in 1916. Operations have been intermittent since 1917, owing to shaft sinking, remodelling the mill, and a shortage of water.

Operations were finally stopped in 1920, because of high costs of labor and supplies and exhaustion of reserves, the mine having a total production to its credit of 420,965 oz. gold, valued at £1,756,138.

MT. BOPPY GOLD MINING CO., LTD.

N. S. W.

Now Mt. Boppy, Ltd., which see.

NORTH BROKEN HILL, LTD.

N. S. W.

Offices: G. Weir, gen. mgr., 360 Collins House, Melbourne, Victoria; Broken Hill, New South Wales; and E. Habben, Palmerston House, London, E. C. 2, England.

Directors: W. M. Hyndman, chairman; M. H. Baillieu, W. L. Baillieu, T. B. Birbeck, A. Campbell and H. Sheppard.

Inc. Dec. 4, 1912, in Victoria, Australia. Cap. £600,000, shares £1 par; all issued. Debentures: £250,000 of 6% authorized; £141,000 outstanding.

Company has interests in Broken Hill Associated Smelters. 200,000 shares; Zinc Producers Association, 750 shares; Electrolytic Zinc Co., 50,000 shares; British Australian Lead Mfgs. Pty., 20,000 shares; Globe Proprietary, Ltd., 5,000 shares; Barrier Roasters, 10,000 shares; and Zinc Investigation, 2,000 shares.

Report for year ended June 30, 1920, showed a profit of £25,728, with surplus of assets over liabilities, £469,777. In 1921 there was an operating loss of £62,242, changed to a profit of £8,128 after sale of concentrates produced before the strike.

Dividends: 30% in 1913; 25% in 1914; 25% in 1915; 40% in 1916, 1917, and 1918, and 10% in 1919, to March.

Property: 452 acres at Broken Hill, New South Wales, developed by 3 shafts, deepest 1,770', and extensive underground work which has blocked out 2,600,000 tons of ore mostly above the 950', 1,100', 1,250', and 1,400' levels.

Equipment: includes a concentrating plant whose tailings are sold to Amalgamated Zinc (De Bavay's) for treatment by flotation.

Owing to the strike, the mine was closed from May 8, 1919 to November 0, 1920.

Production: for year ended June 30, 1921, 32,300 tons treated yielded 4,461 tons lead concentrate averaging 65.5% lead, 7.3% zinc and 28.4 oz. silver and 6,010 tons zinc concentrate, averaging 48.1% zinc, 7.4% lead and 9.6 oz. silver.

OCCIDENTAL CONSOLIDATED, N. L.

it was £30,009. Reserve fund was £230,000, accumulative profit account, £439,880. Investments, £92,055; cash, £230,400.

Dividends: since 1898 total 297% on pfd. and 240% on ord. shares; in 1917-18, 25% was paid on each class of shares and in 1918-19, 15%; none in 1919-20.

Property: a large lead-silver-zinc mine at Broken Hill, N. S. W.

Development: by shafts and extensive openings. Work during year ended June 30, 1921 totaled 1,614½'. Reserves amount to 1,506,950 tons.

Equipment: complete mining and 1,000-ton milling plants employing flotation at the mine, lead smelter at Cockle Creek, N. S. W., and zinc works at Seaton Carew, Durham, England. Company is a pioneer in flotation processes, and is said to have developed the frothing process prior to or simultaneously with Minerals Separation.

Production was suspended, owing to strike at Broken Hill, May, 1919-November, 1920. Smelting works ran on restricted basis, May 1919 to December, 1919; restarted, December, 1920.

Production: for seven months ended June 30, 1921, output was 62,419 tons. The mill treated 74,763 tons ore and old slimes yielding 13,571 tons lead concentrates, assaying 43.7 oz. Ag., 63.3% Pb. and 10.4% Zn., and 21,538 tons zinc concentrates, assaying 13.9 oz. Ag., 6.7% Pb. and 47.4% Zn. The refinery treated 15,102 tons of bullion, yielding 6,189 oz. gold, 1,298,985 oz. silver, 12,649 tons soft lead and 35 tons antimonial lead.

TUNGSTEN MINES, LTD.

N. S. W.

Inc. 1915, in Sydney.

Property: two miles from Frogmore, which is 17 miles N. of Boorowa, the nearest railway station. Tract shows Silurian slates near a granite intrusion, cut by lodges carrying short lenses, up to 12' long and 20" to 42" wide, consisting of quartz containing tungsten, as scheelite and wolframite, averaging 2% tungstic oxide.

Development: 180' shaft and 280' second level and by 1,200' of surface work with stopes 600' long.

Equipment: includes hoist and mill.

Production: 6,580 tons of ore that yielded 101 tons concentrate and in 1920, 577 tons gave 22,900 lb. concentrate.

VEGETABLE CREEK TIN MNG. CO.

N. S. W.

Address: Emmaville N. S. W.

Operations for year ended April 20, 1921, showed a net profit of £5,183 before payment of 1/ dividend, absorbing £6,750. Tin production for period was valued at £32,337. The mine is reported nearing exhaustion.

Y-WATER (EMMAVILLE) TIN CO.

N. S. W.

Office: E. H. Shackell, 360 Collins St., Melbourne, Victoria, Australia.

Directors: J. L. Wharton, chairman, Clive Ballieu, C. G. Lyon, and W. H. Hyndman. F. G. Wilson, gen. mgr.

Inc. in Victoria. **Cap** £90,000; shares £1 10/- par; £76,088 issued.

The half year ended July 31, 1921, showed a loss of £6,300, compared with a loss of £10,709 for previous half year.

Property: alluvial tin areas at Emmaville, N. S. W., equipped with hydraulicking apparatus.

Production, for half-years:

Year	Yardage	Yield per yard.	
		lb. black tin	Total yield tons
1921.....	311,469	0.899	125
1920-21.....	173,400	0.888	69
1920.....	268,750	0.940	113
1919-20.....	295,800	0.983	130
1918-19.....	284,700	0.701	89
1918.....	296,300	0.663	88
1917-18.....	346,875	0.681	105
1917.....	261,825	0.837	98

The "Black tin" carries 71.8% metallic tin.

Sluicing operations were finally suspended, April 13, 1921.

INC CORPORATION, LTD.

N. S. W.

Office: F. A. Crew, 20 Copthall Ave., London, E. C. 2, England; Collins House, Melbourne, Victoria, Australia. Broken Hill, N. S. W., Australia. Lewick, Moreing & Co., gen. mgrs.; C. G. Hylton, supt.

Directors: F. A. Govett, chairman and managing director; J. A. Agnew, V. S. Robinson, H. W. Pelham Clinton, W. C. C. Romaine, R. W. Skipwith, T. White, P. L. Gell, (T. B. Birkbeck and W. M. Hyndman local).

Inc. July 8, 1911, in Great Britain. **Cap.** £575,000, in 245,792 pfd. £1, and 658,616 com. 10s., shares, all issued. Company is interested in the Broken Hill Associated Smelters Proprietary, Zinc Producers Association Proprietary, Electrolytic Zinc Co., and Barrier South, Ltd.

Report for 1920 shows an income of £109,132, and profit of £31,910, out of which a preferential dividend (£24,569) was distributed. Balance forward, £9,840. Operations were suspended from May, 1919 to November, 1920.

Dividends: 15% on pfd. and 10% on ord. in 1911; 37½% and 35% in 1912; 35% and 30% in 1913; 20% and nil in 1914; 25% and 10% in 1915; 7½% and 35% in 1916; 40% on each in 1917; 35% and 30% in 1918; 20% on pfd. in 1919; 10% on pfd. in 1920.

Property: the South Blocks mine and claims, a total of 160 acres at Broken Hill.

Development: to depth of 1,590' by two vertical shafts (one 1,210' deep), and extensive underground workings. Reserves given as 2,115,700 tons, containing 14.6% lead, 2.6 oz. silver and 9.4% zinc.

Equipment: includes a complete and modern mill using rolls, tables, and flotation plant with Minerals Separation, and the Lyster and Horwood selective processes, (described in Mining Magazine (London), of November, 1918).

Company buys tailings from other Broken Hill mines besides treating its own ores.

Summary of operations:

Year	Zinc plant tailings, tons	Lead plant, ore, tons	Zinc	Lead
			concentrate, tons	concentrate, tons
1920.....	28,110	6,908	7,670	1,620
1919.....	98,910	51,141	15,954	10,735
1918.....	257,300	135,580	61,470	33,581
1917.....	257,590	134,618	63,700	31,993
1916.....	200,510	136,901	45,464	37,376

Galena concentrate carries 66% lead, and blende concentrate 48% zinc. Costs are about 33/- (\$7.92) per ton.

ZINC PRODUCERS' ASSOCIATION PROPRIETARY, LTD. N. S. W.

Offices: E. H. Shackell, Collins House, Melbourne, Victoria, Australia, and A. J. M. Sharpe, Pinners Hall, London, E. C. 2, England.

Directors: W. L. Baillieu, chairman; A. Campbell, M. Cohen, W. Jamieson, C. Fraser, C. J. McArthur, J. S. Palmer, F. A. Govett, W. M. Hyndman, F. A. Keating, Bowers Kelly, B. G. Moulden, J. L. Wharton, and V. H. Woodhead. J. M. Higgins represents the Federal Government.

Inc. May 20, 1916, in Victoria, to market all zinc concentrate or ore produced in Australia, the various companies contracting to deliver their output to the Association for a period of 50 years. An agreement was also made with the British Government to purchase 300,000 tons zinc concentrate yearly with an option over the balance of production, for a period of nine years from January, 1921.

Cap. £100,000; shares £1 par; all held by the Broken Hill companies, the Broken Hill Associated Smelters, and the Mt. Lyell companies.

BLOCK 10 MISIMA GOLD MINES, LTD.

PAPUA

Controlled by Broken Hill Proprietary Block 10 Co.

Office: 31 Queen St., Melbourne, Australia.

Officers: J. Brandon, sec.; R. Williamson, mgr.

Inc. December, 1916, in Victoria, Australia. Cap. £250,000; shares 25s. par; increased in 1918 to £350,000; £1 15s. par; all issued.

Operations for 1921 showed a loss of £6,735 and for first half of 1921, a further loss of £9,879, making an accumulated debit of £36,192.

Property: a group of gold-bearing claims on the island of St. Aignan, Papua. is equipped with a stamp-mill and cyanide plant of 50 tons daily capacity, which is to be enlarged to treat 200 tons daily. The first six months' run produced 7,045 tons of 30/10 (\$7.40) ore. Extraction by cyanidation was 88.7% in the 6 months of 1919; 5,580 tons of 26/1 (\$6 25) ore were mined, and the ore reserve increased. For five months ended June 30, 1920, 5,019 tons of ore yielded £5,350. During 2nd half of 1920, plant treated 2,553 tons. In first half of 1921, 8,909 tons yielded £12,976. Reserves estimated Dec. 31, 1920, at 262,401 tons, averaging 33.51/.

LALOKI (PAPUA) COPPER MINES

PAPUA

Now New Guinea Copper Mines, Ltd., which see.

NEW GUINEA COPPER MINES, LTD.

PAPUA

Address: Erle Huntley, gen. mgr., Port Moresby, Papua.

Inc. 1920 as successor to Laloki (Papua) Copper Mines, N. L.

Property: the Laloki and Dubuna mines, 18 miles from Port Moresby and connected with railway at Bootless Inlet. Opened to depth of 150'

Company reported to have spent £200,000 in development work and equipment, and reserves estimated, December, 1921, at 200,000 tons in Laloki and 25,000 tons in Dubuna, averaging .5% copper 40% sulphur and 12s gold per ton.

Ore is to be shipped to the plant of the Electrolytic R. & S. Co. at Port Kembla, at the rate of 1,500 tons per month in 1922.

QUEENSLAND

CHILLAGOE, LIMITED

QUEENSLAND

Property sold to the Queensland Government. Fully described in Copper Handbook, Volume XI.

See Chillagoe State Smelters.

CHILLAGOE STATE SMELTERS

QUEENSLAND

P. L. Goddard, gen. mgr., Chillagoe, Queensland.

Property: in 1919 the copper holdings of Chillagoe, Ltd. were acquired; early in 1921 the Lady Jane and Girofla mines of Mungana Mines Ltd., were acquired and in June the Muldiva mines. The Einasleigh copper and Girofla lead mines are the main producers. During 1920-21 the lead furnace worked 187 days treating 19,309 tons and the copper furnace, 165 days, treating 29,621 tons.

Production, year ended June 30, 1921:

	Tons	Gold, oz.	Silver, oz.	Copper, tons	Lead, tons
Lead Bullion.....	1,248	383	95,835	1,196
Blister copper.....	1,122	353	56,218	1,109

CLARK'S GOLD MINES, LTD.

QUEENSLAND

Paid 3 dividends in 1920, amounting to £6,750 with total dividends of 8s 6d per share, to end of 1921.

Property: on Charters Towers, developed to depth of 900' vertical. New work at rate of 100' per month.

Equipment: 10-stamp mill and cyanide plant.

Production: in 1920, 2,445 tons crushed yielded 6,020 oz. gold, and 1,930 tons sand cyanided yielded £5,025.

CORELLA COPPER CO.

Operations ceased in 1917. Stock valueless. See Vol. XIII.

DEREK'S TIN MINES, LTD.

Address: Bright & Galbraith, Ltd., 7 Martin's Lane, Cannon St., London, E. C., England.

J. Campbell, mine engr.

Inc. 1920. Cap. £115,000; £1 par; 100,000 shares issued. Debentures at mortgage, £4,500. First report for 16 months ended June 30, 1921, showed development expenditures, £8,343; London expenses, £2,546; preliminary expenses, £5,344; debtors, £597; stores, £3,291; cash £242; creditors, £10,589.

Property: tin mines, covering 128 acres at Stannary Hills, Herberton Tin Field formerly owned by Lass Gowrie, Ltd. Reserves estimated at 1,000 tons containing 1,140 tons tin concentrate. A 10-stamp mill was operated for six weeks from May, 1921, making a recovery of 70.5%.

PINNEY HILL UNITED SILVER MINES, LTD. QUEENSLAND

Inc. 1920. Cap. £100,000; £1 par.

Property: a silver-lead group at Indooroopilly, near Brisbane. Ore deposits consist of schist breccia with interstitial sulphides, oxidized above ground water level to carbonates and sulphates.

Development: by 175' shaft and crosscuts. Developing and shipping about 30 tons per month to the Cackle Creek (N. S. W.) plant. Sixteen men employed.

GREAT FITZROY MINES, LTD. QUEENSLAND

Liquidated. See Vol. XIII for organization and former operations. The New Guinea Copper Mines, Ltd., now owns the property in Papua, formerly held by the Fitzroy.

HAMPDEN-CLONCURRY COPPER MINES, LTD. QUEENSLAND

Officers: E. H. Shackell, Collins House, Melbourne, Australia; and E. Haben, sec., Palmerston House, London, E. C. 2, England.

Directors: J. L. Wharton, chairman; W. L. Baillieu, F. G. Hughes, W. Orr, H. H. Schlapp, and R. M. Turner. **London directors:** W. D. Reid, G. W. W. Mackinnon, and G. W. Staples. Erle Huntley, gen. mgr., Friezland, via Cloncurry, North Queensland.

Inc. July 31, 1909, in Australia, as a reorganization of a company of same name. Cap. £400,000; shares £1 par; 350,000 issued.

Profit for 6 months ended Aug. 31, 1921, was £1,283; current assets exceed liabilities by £88,676. There was an operating loss of £6,694 for previous half year (Feb. 28, 1921), compared with a loss of £49,031 for six months ending Aug. 31, 1920.

Dividends: in 1913, 40%; 1914, nil; 1915, 20%; 1916, 40%; 1917, 15%; 1918, 10%.

Company owns 5,263 shares of the Electrolytic Ref. & Sm. Co. of Australia, Ltd., and 39,248 shares of Metal Manufacturers stock; both having works at Port Kembla, New South Wales; and 1,000 shares in the Copper Producers' Association.

Property: about a dozen mines, with 450 acres mineral claims, in the Cloncurry mining district, North Queensland, include the Hampden, Duchess, Trekelano and Macgregor mines. Mines are connected by 2' gauge railway with the Cloncurry Copper Mines, Ltd. The mines contain auriferous copper ores, the combined reserves being 172,100 tons of smelting ore containing 9,050 tons of copper plus over 60,000 tons of low grade fluxing ore.

Equipment: includes railways, complete mining plant, mill and flotation plant, and 375-ton smelter with converters.

in Queensland. Cap. 81,640 shares, 6d. (12c) par, originally 11 par, changed in 1911 to present amount.

owns a cupriferous pyrite deposit from which the Mt. Morgan formerly drew its supply of fluxing material at a royalty of 2s. 6d. per ton.

For year ending June 30, 1917, amounted to £6,222, plus credits making £8,757. Of this £6,803 was distributed in dividends. Dividend was £1,165. For 1918, revenue was £4,156, of which £3,742 retained.

Assets: total £56,383 or 13/6 (\$3.18) per share to June, 1918.

Property: 320 acres, well timbered, on terminus of Boyne Valley railway. Property shows promising vein up to 90' in width, having no sulphides, the zone of oxidation being succeeded by chalcopyrite out 3.5% copper tenor. Development is exclusively by tunnels, tunnel being on the 470' level, with 3 levels above, at 100' intervals. Opens the deposit to 570' depth. The ore is very pyritic and is used by the Mt. Morgan company as a flux. Its copper content is about 1½%.

Production: 33,245 tons in the year ended June 30, 1918, making 497,927 lbs. of copper, on which royalties totalled £62,241. No productive work is done, but 6,495 tons of ore were sold to Mount Morgan in 1920.

THE COOLON GOLD MINING CO.

QUEENSLAND

Property: the Reward claims, in Mount Coolon district, under development in 1920 and 10-stamp mill erected.

MOUNT CUTHBERT, N. L.

QUEENSLAND

Offices: W. B. Arnold, sec. 39 Queen St., Melbourne, Australia; Edwin W. B. Arnold, sec., Palmerston House, London, E. C. 2, England; and Mount Cuthbert, Queensland.

Officers: P. Pigott, chairman; Robert Philip, T. P. Power, F. E. Power, G. Robertson and J. Forsyth, directors. Stephen Harris, gen. mgr.

Inc. Feb. 21, 1907, in Victoria, Australia. Cap. £240,000; shares £1 10s. par. Reorganized October, 1909, and August, 1916, in Victoria. Capital increased in Feb., 1919 to £419,394; shares £1 10s. par; 26s 3d paid. Original debentures outstanding, £55,500. At the reconstruction in August, 1916,

£50,000 7% prior lien debentures were created to secure creditors; £35,000 issued.

Call (assessments) made in 1919, totaled 4s. per share, a total of £55,918; 1s. Aug. 1920.

Report for six months ending Aug. 31, 1921, shows a loss of £10,263; debit balance, £159,686. Previous half year (Feb. 28, 1921), showed a loss of £4,998.

Property: 575 acres at Mount Cuthbert in the Cloncurry district, 70 miles from Cloncurry, Queensland.

Geology: the orebodies occur both in veins cutting the schist and limestone and as intimately disseminated sulphides in the schists. In the dolomitic limestone the veins carry good ore. Reserves amount to 193,500 tons of 6.8% ore.

The ore contains glance, chalcopryrite, pyrite, and bornite at depth. Deepest workings are 484'. Considerable chalcotrichite (a hair-like form of cuprite) occurs in places. In 1919 company had opened an orebody in the Kalkadoon mine, varying from 15 to 40' wide.

Equipment: includes 200-ton smelter, started in March, 1917. The Cuthbert and Kalkadoon mines have equipment to mine at a depth of 2,000'. The Government railway from Cloncurry runs to Mount Cuthbert, and sidings have been built to connect with several of company's mines.

Production: to Aug. 31, 1921, a total of 136,192 tons of ore had been smelted, yielding 7,878 tons of blister copper. Of this, 13,099 tons were treated at Mount Elliott, the remainder at Mount Cuthbert.

The mines and smelter have been closed down since Dec. 18, 1920, owing to high costs, and only limited development work has been done at the Orphan and Little Wonder mines.

MOUNT ELLIOTT, LTD.

QUEENSLAND

Offices: E. Habben, Palmerston House, Old Broad St., London. E. C. 2, England; F. G. Hughes, Collins House, Melbourne, Victoria, and Mt. Elliott, Selwyn, via Townsville, Queensland, Australia.

H. J. Hill, chairman of board in London. General representative in Australia and cons. engr., W. H. Corbould.

Inc. June 14, 1907, in Great Britain. **Cap.** £1,250,000; shares £5 par; 240,518 issued; 82,000 shares owned by Mt. Oxide Mines, Ltd.

An option on stockholdings held by Hayden Stone & Co., in 1920-'21, was not taken up.

Operations for the year ended June 30, 1918, showed a loss of £56,890; in 1918-19, loss was £41,034; in 1919-20, £8,940; in 1920-21, £22,178.

Dividends: 10% in 1910-'11; 15% in 1911-'12; 27½% in 1912-'13; and 5% in 1913-'14; none since; a total of £425,000.

Property: a group of copper mines situated in the Cloncurry copper district of Queensland, covering approximately 4,600 acres, about half of which can be classed as good and probable copper area. The holdings include those of **Mt. Oxide Mines Ltd.** (£450,000 in £5 shares), acquired in 1915, and the Dobbin and Cloncurry Mines, Ltd., transferred to Mount Elliott in 1916. The vendors of the original Dobbin & Cloncurry Mines, Ltd., receive a proportion of profits equal to 120,259 fully paid £5 shares.

Development: is not deep nor very extensive, including shafts of various depths, at the different mines. The Mt. Oxide workings include a 300' shaft with 5 levels and an 840' adit level.

Reserves, (June 30, 1921):

cludes receipts from sale of 2,528 tons of copper on hand at end of

dividends: paid quarterly, have ranged from a minimum of 8d., at the ng, 1886, to a maximum £1 2s., in 1889. To end of 1916 the com- ad paid about 825% in dividends, which were 6s. yearly, 1892-97; 6s. 1898; 7s. yearly 1899-1900; 5s. 10d. in 1901; 5s 9d. in 1902; 3s. yearly 6; 4s. 3d. yearly 1907-08; 4s. yearly 1909-13; 3s. in 1914; 4s. in 1915; 1916; 5s. in 1917; 3s. in 1918; 3s. in 1919; 1s. in 1920. The total is £9,- 6.

Property: 140 acres under perpetual leasehold, and 530 acres freehold out Morgan; also flux quarries, and magnetite deposits, and a coal : at Baralaba.

Company has a large interest in the Electrolytic Refining & Smelting of Australia, Ltd., (which refines Mt. Morgan and custom copper) and the Metal Manufacturers, Ltd., (which makes copper products from stralian metal) and in the Australian Fertilizer Pty. Ltd., (which pro-

duces superphosphates). Mt. Morgan is about 25 miles west of Rockhampton, and was one of the greatest gold producers of the world.

Geology: the Mount Morgan gold deposit proved to be the leached siliceous outcrop of a great deposit of gold and copper bearing ore. As the ore showed increased copper content at depth the company began extensive diamond-drilling in 1903, and this proved an immense tonnage of copper ore. The original opencut workings, from which rich oxidized gold ore was obtained, have been carried down to the 363' level, but the oxidized ores were exhausted in 1910, and only sulphide ores are now mined. The greater part of the copper ore lies N. W. of and deeper than the siliceous gold ore that lies beneath the great gossan ore body. This copper ore is a mixture of chalcopyrite and copper bearing pyrites.

Development: includes 2 principal shafts, one the 1,050' Main depth, and in the other the 1,500' Linda incline shaft. The ore now mined comes mainly from the 650' to 950' levels. Depleted stopes are filled with concentration-mill tailings.

Ore reserves have been estimated as follows:

Date	Tons	Copper, %	Gold, Dwt.
May, 1921.....	3,257,28	2.57	6.04
Dec., 1920.....	3,318,134	2.58	6.04
June, 1920.....	3,347,000	2.59	6.11
Dec. 1919.....	3,538,000	2.59	6.12
June, 1919.....	3,622,000	2.58	6.13

This includes both concentrating and smelting ore.

Equipment: is very complete and up-to-date, having been remodelled in recent years. It includes a concentration mill, sintering plant, smelter and large power plant. The smelter has blast furnaces.

Experiments are being made in leaching, as an auxiliary step in the treatment of the leaner ore.

The district being arid, extensive dams have been built for water storage, there being 8 dams, of which 5, in commission, have an aggregate capacity of 282,000,000 gal., No. 7 holding 230,000,000 gal.

Production: the total from 1883 to Dec. 1920, was 5,054,772 oz. of gold and 120,670 tons of copper. Recent returns were:

	Ore concentrated, tons	Ore smelted, tons	Copper	Gold, Oz.
1921 (year May 30)....	167,802	148,574	5,149	76,463
1920 (½ yr. June 1)...	91,818	87,580	3,130	39,387
1919 (½ yr. Dec. 1)...	83,840	90,475	2,749	41,191
1919 (½ yr. June 1)...	75,138	90,687	2,688	50,042
1918 ½ yr. Dec. 1)....	115,466	105,264	3,580	42,942
1918 (½ yr. June 1)...	123,854	102,872	3,505	38,138
1917 (year May 27)...	141,430	278,380	8,042	98,950

During the last 13 years, the ore mined has yielded £3,619,105. This has been used in the following proportions; wages, 44.9%; Government, 10.7%; royalties, etc, 7%; stores, 14.1%; dividends, 18.6%; and balance, (reserves) 4.7%.

Mount Morgan is still one of the great mines of the world, though it has passed the zenith of its profit earning capacity and production. It must now be regarded as a low grade copper-gold proposition.

MOUNT QUAMBY GOLD MINING CO., N. L. QUEENSLAND
M. Sheard, gen. mgr.

Property: gold reefs on Mount Quality, 7 miles W. of Quality on the Mt. Cuthbert branch, 28 miles N. of Cloncurry.

Development: by 235' tunnel and 50' shaft, said to prove 6,000 tons of ore averaging 25 dwt., and 20,000 tons averaging 10 dwt. per ton. (Sept. 1921).

MUDLO MINING SYNDICATE, LTD.

QUEENSLAND

Address: Bundaberg, Queensland, Australia.

C. H. Powell, mgr., Mudlo Copper Mine, Kilkivan, Queensland.

Directors: C. P. Christoe, managing; Geo. A. Buss, chairman, with C. H. Buss.

Inc. December, 1917. Cap. £50,000; £1 par.

Property: 2 patented claims, 80 acres, in Marodian Mineral field, 7½ miles from Kilkivan, Gympie district, Queensland. Ore occurs in a fissure vein in granite, that averages 3' in width and carries chalcocopyrite, tetraedrite and bornite.

Development: by 565' main tunnel. Equipped with 5-stamp concentrating mill. **Reserves:** estimated at 17,600 tons averaging 10.2% copper. Developing.

MUNGANA MINING CO., LTD.

QUEENSLAND

Company out of existence. See Vol. XIII. Property now owned by Chillagoe State Smelters.

RAVENSWOOD GOLD MINES, LTD.

QUEENSLAND

Company reorganized and capital increased in 1921.

Property: in Ravenswood goldfield. Under development, 1920-21.

Production: in 1920, 91 tons yielded £259 in bullion; 59 tons treated at Charters Towers yielded £184. Ore and concentrate sales for year totaled £2,614.

SARDINE TIN MINES, N. L.

QUEENSLAND

Address: J. H. Pryor, mgr.; J. Lennox, managing director; Daniel McCallum, sec., Ewan, or Charters Towers, Queensland, Australia.

Property: a 21 year mineral lease on 20 acres, in Kangaroo Hills Tin Fields, 4 miles from Ewan and 15 miles N.-N. W. from Charters Towers. The veins occur in quartzite and slate.

Development: by 173' shaft with levels at 40', 80', 135' and 173'. An internal shaft is being sunk to 273' depth. Reported on by A. Lawrence Wilson, who estimated reserves at 5,609 tons containing 1,401 tons concentrate and valued at £127,090.

During half year ended July 2, 1921, 340' of work was done, and 147 tons ore crushed yielded 34 tons of tin. The ore is treated in the mill of the Tin Syndicate, at Ewan.

SCOTTISH GYMPIE GOLD MINES, LTD.

QUEENSLAND

Head office: Dunlop & Murray, secs., 188 St. Vincent St., Glasgow, Scotland. **Mine office:** Mary St., Gympie, Queensland, Australia.

Officers: G. B. Hoggan, chairman; R. G. Campbell, J. B. Hilliard, and W. Walker, directors. D. E. Reid, gen. mgr.; T. Jobling, mine mgr.; H. Walker, surveyor.

Inc. June 11, 1902, in Scotland. Cap. £700,000; shares £1 par; 600,000 issued.

The year ended May 31, 1920, resulted in a loss of £7,423. A debit balance of £11,798 was carried forward. The year ended May 31, 1921, showed a loss of £4,742, increasing debit balance to £17,040.

Dividends: since 1898, total about £6 2s. per share; £5 8s. to 1902; since when profits have been small. The total to July, 1917, was £597,742.

Property: 126 acres, at Gympie, Queensland. Opened to depth of 2,413'. Results from development on 1,265' level of No. 1 shaft, said to be promising in 1920.

Equipment: complete for treatment of about 9,000 tons per month.

Production: in year 1915-16, 83,800 tons of ore and 27,950 tons of tail-

ing cyanided for \$6.44 per ton. In 1917-18, 72,300 tons of ore and 29,100 tons of tailing yielded 20,285 oz. of gold, at a cost of 22/- (\$5.28) per ton; in 1918-19, 7,020 tons crushed and 10,600 tons cyanided yielded 7,291 oz. gold; in 1919-20 (4 months) 6,000 tons crushed yielded 2,271 oz. gold; 1920-21 (18 months to May 31), 6,950 tons crushed yielded 2,096 oz. gold.

Property has been a large producer, but the mine is near depletion.

SILVER SPUR, LIMITED

QUEENSLAND

Office: Parbury House, Eagle St., Brisbane, Queensland, Australia.

Alexander Corrie, chairman of board of directors; Edgar Hall (mgr.), Silverspur, Q.; M. A. Corrie, sec.; H. I. Stey, supt.

Inc. November, 1917, in Queensland, as reorganization of the Silver Spur Mining Co. Cap. £75,000; shares 10s. par. Dividends: paid by old company totaled £25,000.

Property: 49 acres at Silverspur, Stanthorpe district, 3½ miles from the border of New South Wales. A 44-mile railroad to the mine has been authorized by the Government. Examined by Lionel C. Ball, Government Geologist, in 1918. Ore contains galena, sphalerite, and chalcopryrite, averaging 12% lead, 25% zinc, 1% copper, \$1 gold, and 26 oz. silver per ton. A promising new lode, opened in 1919-20, containing 90 oz. silver ore, is under development.

Development: by 520' shaft and extensive workings. Dumps were reported to have a recoverable value of £500,000.

Equipment: includes hoist, compressor, crushing plant, roasters, and reverberatory and blast furnaces.

Production: total to May 31, 1921, 2,031,987 oz. silver; 4,797 oz. gold; 1,049 tons copper; 1,438 tons lead, valued at £324,349. Regular shipments made to N. S. W. for refining.

THE OAKS, N. L.

QUEENSLAND

J. J. Tully, mgr.

Property: in Oakfield, equipped with 15-stamp mill.

Production: in 1920, 9,720 tons yielded 1,002 oz. gold, valued at £3,508.

TOWERS TIN MINING CO.

QUEENSLAND

Address: Herbert Poole, sec., Charters Towers, Queensland.

Inc. 1921. Cap. £40,000; 10/ par.

Property: Shrimp tin group, covers 20 acres on Oakey creek, in Kangaroo Hills tin field, about 5 miles N. W. of Ewan and 93 miles from Charters Towers. Developed by several shallow shafts. Formation consists of altered clay slates and schists, with occasional bands of quartzite, intruded by belts of granite and felsite. The ore so far opened in the workings, appears to average 10-15% metallic tin.

A 10-stamp mill started operating, Dec. 1920.

NORTH COLUMBIA & SMITHFIELD GOLD MNG. CO., LTD Q.

Reorganized 1920. Cap. £18,000; in 48,000 shares 7s. 6d; 5s paid.

Production: 1920, 55 tons 12 cwt. yielded 73 oz. 15 dw. gold.

WONBAH MOLYBDENITE MINING CO., LTD. QUEENSLAND

Address: Mt. Perry, Queensland, Australia.

Property: a molybdenite mine at Wonbah on the R. R.

Is largest molybdenum producer of Australia.

Geology: ore occurs in a nearly vertical pipe of white quartz, 42' to 60' in diameter, enclosed in granite near a slate contact. The payable ore forms the outer part of the "pipe" and consists of milky quartz with flakes of molybdenite, the output as milled averaging 0.8% molybdenum sulphide. Lenticular amounts of pyrite, chalcopryrite and galena, occur in small segregations.

The mill handling 30-40 tons ore per 24 hours, contains ten 1,000 lb. stamps, with 12 units Minerals Separation plant (De Bavay's patent), Calow settlers, Dorr thickeners, etc.

Office: T. H. Sears, sec., 360 Collins St., Melbourne, Victoria, Australia.

Directors: W. L. Baillieu, chairman, C. Fraser, W. S. Robinson, Bowes Kelly, F. A. Govett, B. A. Moulden and H. G. Darling. H. L. Shackell, mgr.

Staff: Gilbert Riggs, chief met. eng.; H. St. J. Somerset, gen. supt.; W. Robertson, cons. engr.

Inc. May 7, 1915, in Victoria. Cap. £1,000,000; shares £1 par; 730,000 issued and held by the Broken Hill Proprietary (£200,000), Broken Hill South (£200,000), North Broken Hill (£200,000), Zinc Corporation (£100,000); and British Broken Hill (£30,000).

Works: the largest lead smelting plant in the world, formerly owned by the Broken Hill Proprietary Co. at Port Pirie, S. Australia. The plant includes railroads, blast-furnaces of 6,000-ton per week capacity on 60% lead concentrate, roasting furnaces, Dwight-Lloyd and H. H. sintering machines, a 3,000-ton per week lead refinery, and 200-ton per week spelter works, limestone quarries in S. Australia and coke works at Bellambi, N. S. W. The ore supply for these works comes from 9 Broken Hill companies, also from outside sources. The smelter can produce 165,000 tons of lead, 5,000 ton spelter, and 6,500,000 oz. silver per year. The coke plant makes 100,000 tons yearly. Antimonial lead, assay lead, litharge, zinc dust, lino metal, and bar and granulated silver are made. The brand is B. H. A. S. in a diamond.

MT. LYELL CONSOLS WALLAROO COPPER MINES, N. L. S. A.

Dead. Reorganized as New Lyell Consols Copper Mine, also defunct.

NEW LYELL CONSOLS COPPER MINE S. A.

(Formerly Mt. Lyell Consols, Wallaroo Copper Mines).

In liquidation. Fully described in Volume XIV.

WALLAROO & MOONTA MINING & SMELTING CO. S. A.

Head office: Steamship Bldg., Currie St., Adelaide, S. A. Mine offices: Wallaroo mines and Moonta mines, S. A. Works office: Port Wallaroo, South Australia.

Sir J. L. Stirling, chairman of board of directors; C. B. Jennings, sec.; H. Lipson Hancock, gen. mgr.

Inc. 1889, in South Australia. Cap. £400,000; shares £2 par; 160,000 issued.

Financial Statement, years ending December 31:

Year	Revenue	Net profit	Dividends	Surplus cash assets
1920-21.....	£283,088	£ 71,863x	£198,905
1919-20.....	288,751	38,914x	24,000	267,201
1919*.....	166,800	53,265**	330,218
1918.....	755,918	69,907	80,000	381,144
1917.....	855,189	125,736	100,000	421,945
1916.....	852,670	231,505	120,000	250,851

*Half year. **Loss. xLoss after paying £29,083 for taxes.

During the periods 1919 and 1919-20, productive operations were suspended for 15 and 21½ weeks respectively, owing to labor strikes affecting shipping.

The financial period for the company's accounts, has been altered and now covers July to June.

Dividends: to end of June, 1920, totaled £2,638,000, of which £1,040,-

000 have been paid by the present company, the remainder by the old Moonta and Wallaroo companies.

Property: the famous Wallaroo mines at Kadina and the Moonta mines, at Moonta, S. A., which have yielded 723,118,400 lb. copper valued at £19,765,000 up to June 30, 1920.

The Wallaroo lodes traverse highly indurated schistose rocks of sedimentary origin, while the Moonta lodes are found in a mass of hard and brittle feldspar-porphry. Minerals at Wallaroo are chalcopryrite, pyrite, pyrrhotite, with a little galena, blende, and gold; at Moonta, chalcopryrite, bornite, chalcopryrite, pyrite, a little gold and silver, etc. During the past 11 years copper content averaged 3.8%.

Development: at Wallaroo the main lode has been opened for a length of over 3,400' and a depth of nearly 3,000'; at Moonta the main lode is opened for 3,840' and to a depth of 2,500'. During 1918 new openings, including 464' of diamond-drilling, totaled 4,455', less than half of that in 1916. Since 1918 the development work has been greatly restricted, owing to shipping and labor strikes. Total openings in the Wallaroo mines amount to over 39 miles, and in the Moonta mines to 40 miles. At Wallaroo, there are 2 main and 3 ventilating shafts. Owing to swelling ground, part of shafts is lined with cement concrete, which is also used in underground storage-bins.

Equipment: includes electric power plant, steam plants, complete mining and pumping plants, ore sorting and concentrating works, tailing leaching plant, smelter, sulphuric acid works, electrolytic refinery, etc.

Production:

Year	Ore mined, tons	Dressed Ore Smelted, tons	Copper, ib.	Gold, oz.	Silver, oz.	Sulphuric acid, tons
1920-21**	86,045	30,144	7,066,024	1,600	1,400	2,851
1919-20	77,901	22,613	5,156,480	301	...	2,430
1919*	39,285	13,210	3,888,640	835	440	1,289
1918	204,530	63,418	21,033,600	2,992	1,608	6,745
1917	208,836	66,064	19,185,600	2,970	1,675	6,190
1916	216,369	67,754	19,248,320	3,100	3,014	6,930

*Half year. **Operations suspended during 2nd half.

Costs from 1909 to 1915 varied between 11 and 12 cents per lb., rising from 17 to 22 cents from 1916 to 1920, due to high cost of wages, material, and fuel. About 1,500 men are employed.

TASMANIA

BRISELS TIN & GENERAL MINING CO., LTD. TASMANIA
Office: T. P. Husband, Royal Bank Chambers, Collins St., Melbourne, Victoria, Australia.

Directors: (in London) F. S. E. Drury, chairman; W. Clarke, D. Currie, cons. engr., and H. W. Lake in Melbourne; Sir A. J. Peacock and F. G. Hughes. L. C. Clark, gen. mgr.

Inc. Nov. 25, 1899, in England. Cap. £600,000; shares £1 par; all issued.

Operating profit for year ended Dec. 31, 1920, was £15,467; compared with £3,198 in 1919. Cash assets, £15,702; reserve fund, £25,559.

Dividends: 17/3 per share, or £517,500, from 1906 to 1920, inclusive, 1s being paid in 1918 and 6d, July, 1919.

Property: 180 acres alluvial tin claims at Derby, Dorset county. Tas-

ores alluvial gold claims on Yackandandah and Sandy toria.

cludes ditch lines and full hydraulic plants at the tin ledges at the Victoria property.

3 tons metallic tin in 1918; 180 tons in 1919; 244 tons in

ount to about 5,000,000 cu. yd. of gravel containing 4,000 the Victoria area is nearly exhausted, but new properties and in New South Wales.

ELC ZINC CO. OF AUSTRALASIA PROPRIETARY, TASMANIA

olytic Zinc Co. of Australasia, Ltd., which see.

ELC ZINC CO. OF AUSTRALASIA, LTD TASMANIA

rietary Company, May 16, 1916, in Victoria. Inc. Limited . 5, 1920. Cap. £3,000,000; £1 par; 2,200,000 issued; 900- tributed to Proprietary share holders; 1,100,000 shares owned mal. Zinc (de Bavay's), 300,000; No. Broken Hill, Ltd., 150- Hill South, 150,000; Zinc Corporation, 150,000; Mt. Read & Mt. Lyell, 350,000. Debentures: £400,000, 8% 1st mortgage, y, 1922.

is: 2s. in 1918; 1s. in 1919.

or year ended June 30, 1921, showed deposits and accrued in- ,320; debtors, £31,673; products and by-products on hand, ncentrates and calcines on hand at cost, £84,754; stores, £259,- in other companies, £48,859; creditors, £38,604; deposits, loan d interest, £177,150; owing to bankers, £158,079; depreciation \$2,574.

have been erected at Risbon, near Hobart, in Tasmania, for olytic treatment of zinc concentrate from Broken Hill, and prof high-grade spelter. The plant has a capacity of 25 tons daily. plant is in course of construction. Hydro-electric power is used. 920 the plant treated 17,243 tons of concentrate from Broken Hill, 5,838 tons of spelter, valued at £93,577.

920 company acquired holdings of Mt. Read and Rosebery Mines, om Mt. Lyell M. & R. Co.

Mt. Read & Rosebery Mines, Ltd.,

liquidation. Subsidiary of Elec. Zinc Co. of Australasia, Ltd.

ices: D. G. Lumsden, sec.; W. G. Moss, asst. sec., Collins House, urne, Victoria, Australia; and E. Habben, sec., Palmerston House, n, E. C. 2, England.

owes Kelly, chairman of board of directors; R. C. Sticht, gen. mgr.; . Crucher, metallurgist.

nc. Sept. 21, 1916, in Victoria. Cap. £1,000,000; £1 par; 256,503 is- and 97,500 shares to be issued to the Tasmanian Copper Co., Ltd. Mt. l will receive 30,000 def. ord. shares of Elec. Zinc for its interest in Read & Rosebery (100,000 sh.) and 180,000 shares for money advanced, (80,000), with a right to apply for 90,000 participating cumul. pfce. shares.

Property: 2,066 acres, being a consolidation of the leaseholds held by Hercules Gold & Silver Mining Co. Tasmanian Copper Co., and Prime Mining Co., near the town of Rosebery, in West Coast region of Tasmania. The Hercules North Blocks were acquired in 1919 for 6,500 fully- id shares.

Development: in recent years mainly by diamond-drilling, while the old workings were reconditioned. Openings are entirely by adits.

Ore reserves:

Mine	Tons	Zinc, %	Lead, %	Silver, oz.	Gold, oz.
Hercules	411,836	30.26	7.25	8.12	0.143
Rosebery	652,351	25.60	7.34	10.48	0.118
Total	1,064,187	27.40	7.30	9.57	0.127

The ore is complex being a dense intimate mixture of blende, galena, and iron pyrite, and the former owners had great difficulty in treating and marketing it. Trial lots were sent to Broken Hill for flotation, and to Great Falls, Montana, for electrolytic treatment.

Electric power will be obtained from the Mt. Lyell plant, and from a 15,000-h. p. plant to be erected at Lake Rolleston, near Zeehan. Late in 1919 it was proposed to erect electrolytic works at Zeehan, with an initial capacity of 50 tons of zinc daily.

Production: total prior to 1916 was 280,000 tons of ore for £354,000.

FEDERATION TIN MINE, N. L.

TASMANIA

Address: South Heemskirk District, Tasmania.

Inc. 1919. **Cap.** £120,000; £1 par.

Property: an old tin mine in the Western Mining Division of Tasmania, idle for several years. In Oct., 1919, preparatory work was commenced with 7 men. During 1920, new work amounted to 3,000' of prospect trenches, 226' of levels, and 228' of shafts and winzes said to prove 57,700 tons of 1% ore and 450,000 tons probable ore.

Equipment: 40-head battery. A tramway from the mine to Zeehan, 1½ miles, is being constructed.

KING ISLAND SCHEELITE CO.

TASMANIA

A subsidiary of Broken Hill Block 14 Co.

Office: John Brandon, sec., 31 Queen St., Melbourne, Victoria, Australia. Alex Campbell, chairman of board of directors. J. Venn-Brown, mgr.

Inc. March, 1917, in Victoria. **Cap.** £50,000; 10/- par; all issued; 6/ paid; 39,450 shares owned by Broken Hill.

Report for half year ended March 31, 1921, showed a loss of £4,039; credit from reserve, £5,000; credit balance forward, £5,692; liquid assets, £10,276; liabilities, £1,382.

Report for half year ended Sept. 30, 1920, showed a loss of £1,902; credit balance, £4,731. Previous half year showed a net profit of £5,911; credit balance, £8,526.

Dividends: No. 5 1/ paid Dec. 16, 1920.

Property: 153 acres at Grassy, King Island, Bass Strait, between Victoria and Tasmania, Australia. The orebody consists of scheelite with garnet in a metamorphosed limestone and schist, and is somewhat similar to that near Bishop, Inyo county, Calif. The ore as mined averages from .8 to 1.1% tungstic acid.

Development: by 300' tunnel, with a 190' back at the face. Mining is by open-cut work, using a 2½-yard steam-shovel. Reserves are estimated at 780,000 tons. Overburden is moved at cost of 1/11 (46c.) per cubic yard.

Equipment: includes a 100-ton gravity concentrating plant, cottages, school, etc.

Production: in 1919-20, 27,832 tons of ore yielded 199 tons of concentrate scheelite worth £43,181; in 1920, 20,705 tons, yielded 172 tons concentrate. During first half of year costs were 14s. 6d per ton of crude ore,

MAGNET SILVER MINING CO.

TASMANIA

Address: R. G. Hales, mgr., Waratah, Tasmania.

Property: a large silver-lead mine in northwestern part of Tasmania.

Geology: the Magnet lode is the hanging-wall portion of a dike of ultra-basaltic igneous rock which is known as websterite-porphry. The dike runs N. E.-S. W. and dips N. W. The lode is made up of a number of parallel bands of galena, alternating with siderite and dolomite, forming a lode or belt that averages 40' in width with a maximum width of 100'. The mine workings have three parallel drifts on each level, in order to mine the three paystreaks or veins. The galena contains some blende. The precious metal content was high in the upper part of the lode—averaging \$2 gold p. ton, and 4 oz. of silver for each unit of lead. This zone of enrichment persisted downward to considerable depth, fading into leaner primary ore, with an increased amount of blende. Siderite, dolomite, and calcite compose the gangue, quartz being absent. The ore carries some of the rarer lead and antimony minerals.

Development: by 1,200' main shaft with 14 levels. Shaft sinking was continued during 1919, a depth of 220' below No. 12 level being reached. The lode was cut on No. 13 at 330' from the shaft. Good ore was opened.

Equipment: 650-h. p. hydro-electric power plant, two 75-h. p. motor-driven centrifugal pumps of 12,500 gal. per hour capacity on No. 13 level, one 155-h. p. hoist, and concentrator. About 80 men employed in 1920.

Production:

MT. BISCHOFF EXTENDED TIN MINING CO. TASMANIA

Offices: John Ditchburn, sec., 17 Queen St., Melbourne, Victoria, Australia; and Box 4, Waratah, Tasmania. H. B. Schell, mgr.

Directors: H. W. C. Smith, chairman; A. T. Robb, D. McRorie, M. J. Sheehan, and J. H. Gillies.

Inc. April 20, 1905, in Tasmania and Victoria. Cap. £16,000; shares 10/-par; all issued.

Half year ended March 31, 1921, showed a loss of £4,133; debit balance, £2,723.

Dividends: total 4/- per share, equal to £6,400.

Property: 433 acres at Waratah, Tasmania, containing a tin-bearing fissure vein cutting through slate, quartzite, and porphyry. Ore carries 1% of tin, and occurs in a 12" streak.

Development: by 3 crosscut tunnels, 1,600, 1,200 and 720' long, the lowest with a 1,000' back. Total work aggregates about 30,000'. Reserves total 31,000 tons of ore blocked out, plus 24,000 tons probable ore, assaying 0.96% tin.

Equipment: includes steam power plant, two 450 cu. ft. compressors, 3 centrifugal pumps, 1,900' incline haulage tram, a 20-stamp mill, with 4 concentrating tables treating 100 tons of ore daily, with a recovery of 69-72% of the tin content.

Production:

Year	Ore, tons	Tin oxide,* ton

Total to date.....	145,458	1,807

**Six months to March 31.

*The oxide contains 70.63% tin.

The mine was closed down, February, 1921.

MT. BISCHOFF TIN MINING CO.**TASMANIA**

Offices: H. Ritchie, mgr., 51 George St., Launceston; and Waratah, Tasmania.

Officers: L. G. Thompson, chairman; A. Evans, F. P. Hart, J. L. Craw, J. B. Waldron, Jr., directors. C. W. Gudegon, gen. mine mgr.; F. B. Jackson, smelter mgr.

Inc. 1872, in Tasmania. **Cap.** £60,000; shares £5 par; all issued; 4,400 fully paid, and £7,600 £1 paid-up, making paid-up capital £29,600.

Balance sheet for half year ended Dec. 31, 1920, shows operating profit, £3,414; dividends, £4,500; total assets, £104,816; credit balance, £71,017.

Dividends: to June 30, 1921, £211 15s per share.

Property: a tract of tin-bearing lands at Waratah, West Coast region of Tasmania, which shows an orebody surrounded by a semi-circular dike of barren eruptive rock cutting through pyritized slate.

Mining in this wet region, in which the rainfall is 80 inches a year, is by opencut work. Ore reserves: (Jan. 1, 1921) 253,850 tons positive ore and 259,900 tons probable; average grade, 0.353%.

Equipment: includes a complete mining plant, aerial trams, electric railway, power-plant, concentrating mill, shops, sawmill, and reverberatory smelter at Launceston, which treats both company and custom ore.

An average of 250 men employed

Production: to end of 1919, 75,968 tons of tin oxide valued at £5,224,608.

	1919	1920

*4,921 tons from tributers.

The mine was closed down, October, 1921.

MOUNT LYELL MINING & RAILWAY CO., LTD.**TASMANIA**

Head office: Collins House, Melbourne, Australia. **London office:** Palmerston House, Old Broad St., London, E. C. 2, England. **Operating and works office:** Queenstown, Tasmania. **Mine office:** Gormanston, Tasmania. **Chemical works:** Melbourne, Victoria; Fremantle, Western Australia.

Bowes Kelly, chairman of board of directors; A. Williamson, chairman of London board; D. G. Lumsden, sec.; W. G. Moss, asst. sec., Melbourne office. Edwin Habben, London, sec. **Staff:** Robt. C. Sticht, gen. mgr.; Robt. P. Roberts, chief metallurgist; R. M. Murray, mine supt.; G. F. Jakins, asst. mine engr.; G. W. Wright, mech. engr.; H. J. Clark, engr. for supplies; Thos. W. Haynes, business mgr. of chemical works.

Inc. August 11, 1903, in Victoria, as a merger of a former company of the same name, (formed in 1893), with the North Mount Lyell Copper Co., Ltd. **Cap.**, £1,300,000; shares £1 par; 1,289,195 issued. Annual meeting in December.

Year	Net profit	Dividends	Current assets	Current liabilities
1921.....	£ 51,830	£ 980,884	£ 472,455
1920.....	76,008	193,379	1,095,023	561,160
1919.....	130,233	80,575	1,070,553	367,673
1918.....	247,229	209,494	1,066,514	442,660
1917.....	268,611	161,149	1,176,182	633,186

Dividends: began in 1904. In recent years were: £64,460 in 1914; £145,034 in 1915; £209,494 in 1916; £209,494 in 1917; £161,150 in 1918; £128,919 in 1919; £64,460 in 1920. Total £2,833,433. The old company paid dividends of £996,574, making total dividends, to end of 1920, £3,830,007.

Operations of the company include mining and smelting copper ore in Tasmania, and the manufacture of acid and superphosphates in the States of Victoria and Western Australia, also the manufacture of coke in New South Wales. The operations of the company are of a high technical order.

The Electrolytic Zinc Co. has acquired the holdings of the Mt. Read & Rosebery Co.; upon liquidation of the latter company. Mt. Lyell will own 216,470 dfd shares of Elec. Z. and 102,149 cum. pfce. shares.

Property: 2,124 acres, inclusive of 5 consolidated claims, leased for 21 and 30-year periods, and 565 acres of mill and smelter sites, in the Mt. Lyell district. The principal mining operations at Gormanston, in the Mt. Lyell district, on the west coast of Tasmania, 14 miles in an air line from the post of Strahan, on Macquarie harbor.

The Mt. Lyell pyritic orebody was discovered 1882, but its value for copper was not then recognized. Other mines in the same district were unsuccessful, though the value of the North Mt. Lyell mine was recognized in 1897, but it was not profitable until it was merged in the present company in 1903. Owing to the silicious nature of the North Lyell ore, neither concentration nor smelting was successful and the undertaking was a failure financially after the expenditure of about £800,000. The amalgamation of the 2 mines, effected 1903, gave a single magnificent property, the pyritic ore of the Mt. Lyell and the silicious ore of the North Mt. Lyell being natural smelting complements.

Geology: rocks of the Mt. Lyell mine are hydromica schist conglomerate quartzite and sandstone, with mineralization occurring along a schist-conglomerate contact that is a crush-zone formed by an overthrust fault. The orebody is a huge lenticular mass, measuring 270' wide by 660' long, on the 4th level, with a vertical depth of 800'. This lens originally contained 6,500,000 long tons of ore, but about two-thirds of it has been extracted. The ore as now mined average 0.54% copper, 1.96 oz. silver and 0.04 oz. gold per ton; it is an ordinary pyrite, carrying up to 12% silica, 2% alumina, and 2.5% barium sulphate, with a very little zinc and a trace of lead.

The copper content occurs as chalcopyrite and tetrahedrite, disseminated through the pyrite. On the southern end of the orebody there was an enrichment, consisting of chalcopyrite and bornite, with some chalcocite, in a silicious gangue, which commenced 350' below the surface and persisted to within 150' of the bottom of the lens. In about the center of the footwall side a second enrichment was found, commencing 100' below the surface, and extending downward for 75'. In 1894 this high-grade ore streak yielded 850 tons of this ore, which was enriched by stromeyerite, and ran 21% copper, 1.010 oz. silver and 0.1 oz. gold per long ton. This bonanza oreshoot netted the old company £105,000.

Development: the orebody is opened by shafts with 10 levels, in 8 of which crosscuts and contour drifts encircle it. The 5 upper levels are obliterated by an enormous open-cut, from which the ore is extracted in a

series of benches with simultaneous removal of overlying or underlying country rock, the ultimate bottom of the quarry being the fifth level, 450' below the surface. Only underground extraction is feasible below the fifth level. A vertical 400' shaft sunk underground from the fifth level and an incline shaft open up the lower levels. Depleted stopes are filled with waste from the schist and conglomerate overburden.

The South Lyell orebody, though smaller and without outcrop, and lower in metal content is similar to that of Mt. Lyell. It lies 300' S. of the Mt. Lyell, not connected. Its top is 350' below the surface and it is proven for 500' downward, or 150' below the lowest level in the Mt. Lyell mine; its further extension is being explored. The orebody has been developed from the Mt. Lyell workings on each of the 5 lower levels, and it is now worked as a part of that mine.

Combined reserves in the Mt. Lyell and South Lyell mines are:

Year	Tons	Copper,		Silver, oz.	Gold, oz.
		%	oz.		
1921.....	1,711,088	0.50	1.50	0.04	
1920.....	1,802,509	0.50	1.50	0.04	
1919.....	1,910,388	0.50	1.50	0.04	
1918.....	2,028,747	0.49	1.48	0.04	
1917.....	2,013,439	0.50	1.60	0.04	
1916.....	1,815,505	0.53	1.96	0.04	

The daily production during 1920 was 400 tons, compared with 1,000 tons in previous years; South Lyell contributed 200 tons.

During the year ended Sept. 30, 1920, the mines produced 107,685 tons of ore, principally from underground workings, the lower benches of the open-cut supplying only a minor amount. In 1921 the Mt. Lyell output was 91,421 tons, all from underground work, averaging 0.40% copper; 0.91 oz. silver and 0.040 oz. gold.

Equipment: all machinery is electrically operated, with current from the company's Lake Margaret hydroelectric power station, 7 miles distant. The incline shaft raises all ore from the mine by an electric hoist geared to a 200-h. p. induction motor, current 550 volts, having capacity of 600 tons in 8 hours. Self-dumping skips containing 3 tons of ore are used. Compressed air is supplied by 3 high-speed compressors with an aggregate capacity of 3,600 cu. ft. of air per minute at 90-lb. pressure, direct coupled to 300-h. p. synchronous motors taking current at 3,000 volts. The air supply is diverted, when required, to the North Lyell mine by means of a 6,000' pipe-line. Mine water is lifted by 3-throw electrically-driven pumps, capacity 100 g. p. m. There are 2 units in the station, though one is sufficient to handle the normal flow of water. The drill shop is equipped with machine sharpeners and there is a complete machine shop.

North Mt. Lyell Mine.

Geology: the North Lyell ore contains bornite and chalcopyrite with some chalcocite and occasional tetrahedrite, all associated with a small amount of pyrite. The ore lies on the contact between schist and conglomerate, which are intensely silicified and pyritized on each side of the contact plane. Very rich ore, carrying up to 60% copper, as bornite and chalcocite frequently occurs. Only one of many closely-associated orebodies—more properly called enrichments in the mineralized contact zone—outcropped at surface. The other and more important bodies, are first seen on the 500' level, where the dip of the conglomerate is reversed. The ore-shoots follow the hanging wall, lengthening rapidly with depth, until in the lower levels, they form an almost continuous orebody some 1,500' long,

th Lyell has excellent prospects of finding further orebodies, is not only persistent to the greatest depth yet reached, but is er; although too siliceous for straight smelting, it blends with ore of the Mt. Lyell to make an ideal smelter charge.

ent: the main North Lyell shaft has a 400-h. p. electric hoist, 500' depth; the other shafts have air-driven hoists, at 90-lb. pressure mine water is very corrosive, and is lifted by 3-throw plunger .00 g. p. m. capacity, in 2 lifts of 400' each.

t for year ended Sept. 30, 1920, North Lyell produced 73,781 tons rraging 6.45% copper, 1.11 oz. silver, and 0.01 oz. gold. In 1921, t was 98,556 tons of ore averaging 6.66% copper, 1.24 oz. silver oz. gold.

Lyell Tharsis mine, contiguous to the North Lyell, contains a antity of low-grade choloritic schist, carrying disseminated chalcod pyrite; it is not being worked.

South Tharsis and Royal Tharsis mines are idle. These properties alcopyrite and pyrite, disseminated sparingly in schist. The Mt. omstock property, 339 acres, is contiguous to the North Lyell, and s the northern extension of its orebodies as well as a separate def ore. The ore is chalcopyrite in schist, the mine producing 50 tons averaging 2.17% copper.

new property recently acquired. is the Mt. Lyell Blocks mine, cons to the North Lyell on the E., though without commercial ore, has a 1,300' shaft useful to the North Lyell. The 1921 output was tons assaying 3.27% copper; 0.34 oz. silver and 0.031 oz. gold.

Reduction Works and Accessories.

A 1½ mile aerial ropeway can transport 1,000 tons ore daily from the Lyell mine to the smelter. There also is a 4,500' incline surface tram, necting with a ¼ mile 2' gauge steam railway to the smelter, also serv- for the delivery of North Lyell ore, and for general traffic.

The company owns a 22-mile railway that connects the Queenstown duction works with the seaport of Strahan, giving rail connections with l parts of the State. A second line connects Gormanston with Kelly asin, near the head of Macquarie harbor, 25 miles from Strahan.

Power-plant: a model hydroelectric station at Lake Margaret is connected with the reduction works by 6 miles of 2' tramway.

Smelter: the reduction works are at Queenstown on the Queen river, $\frac{1}{2}$ and $2\frac{1}{2}$ miles from the Mt. Lyell and North Lyell mines, respectively. The first permanently successful pyrite smelting ever accomplished was done here in 1896, under the direction of Robert Sticht.

The smelter has four 54 and 210" blast-furnaces, 29 $\frac{3}{4}$ ' high from tapping floor to feed floor, with box type cast-iron water-jackets, and of solid construction, suitable for pyrite smelting. The furnaces have special mechanical feeders and lifts, hydraulically operated.

The charge, averaging 6% copper, is brought to a matte containing 40% in one operation. Slags average 0.40% copper, 35 to 38% silica, 42 to 48% iron protoxide, 6.5% to 7.5% alumina, 1.5 to 2% barium oxide, and 6% calcium oxide.

The amount of coke used was formerly as low as 1% or less, but is now from 3 to 5% as the charge contains less pyrites than formerly.

Owing to much increased mining costs at the Mount Lyell the use of pyrite from that mine is restricted to a minimum. To permit this, the North Lyell ore is hand picked so as to secure a richer direct smelting product, and the fine and reject are concentrated (by jigging and flotation) for the elimination of silica.

Flotation concentrate and flue-dust are either sintered or treated in a sintering plant, preparatory to blast furnace smelting.

The furnaces have a stationary oval, sheet steel, chrome-brick lined rehearth, 19' long, cooled by water sprays. This is followed by the older rectangular, uncooled cast-iron forehearth, from the last of which the slag flows into a stream of water for granulation, and is lifted to the dump by means of centrifugal pumps.

A new converter plant, erected in 1918, contains 2 Great Falls upright electric vessels, 10' in diameter and 11' 7" high, electrically operated.

The final product, blister copper carrying 99% copper, 36.7 oz. silver, and 1.13 oz. gold per long ton, is refined by the Electrolytic Smelting & Refining Co. at Port Kembla, New South Wales.

The flotation plant is treating about 300 tons daily of 4% copper ore, recovering 90% of this metal and making a 15% concentrate.

The company owns acid and fertilizer plants, all having Herreshoff calciners, sulphur burners, and the ordinary chamber process for making sulphuric acid. Crude phosphate rock from Ocean and Christmas Island is made into a variety of superphosphates and commercial fertilizers, the demand for which is rapidly increasing in Australia. The raw material for this is furnished by Spanish pyrite, and sulphur from Japan and Italy. Unfortunately, it is as yet commercially impracticable to utilize the sulphurous fumes from the Mt. Lyell smelter, because of the high freight rates, either in carrying the acid away from Mt. Lyell, or bringing in the crude phosphate rock. The superphosphate works are in Victoria and Western Australia.

The company employs about 1,700 men in Tasmania; about 850 men at the mines, 150 on the railways, and 700 at the reduction works.

Costs: average cost of mining, smelting, and converting, from 1896 to 1918, was 22/10 (\$5.48) per ton, and by this company for 6 years ending 1921 the total mining and smelting cost per ton was 14/10 (\$3.56).

Recent advances are due to increased underground work, high cost of supplies, higher wages and scarcity of labor.

Production: the present output is less than the normal tonnage treated. The total production from 1896 to September, 1920, was 7,336,021 tons of ore, yielding 167,135 tons of copper, 12,742,385 oz. silver and 370,462 oz. of gold. Of this ore tonnage, Mt. Lyell contributed 5,189,241; North Lyell, 1,763,126; Lyell Comstock, 13,032; concentrates, 31,642; purchased ores, 168,504, and metal-bearing fluxes, 170,476 tons. The total production in 1921 was 196,429 tons of ore, compared with 192,925 tons in 1920.

Recent returns are as under:

The Mt. Lyell enterprise has had to contend with a series of grave financial, mining and metallurgical problems, all solved with skill and success. The geographical isolation has always been a great drawback. A serious handicap is the heavy rainfall, averaging 110" yearly, hampering surface operations. Of late years the lowgrade porphyry mines have deprived Mt. Lyell of the distinction of handling the lowest average grade of copper ore in the world, but for combined mining and smelting concerns it probably still enjoys this unenviable, but highly creditable record. The management is excellent, in all departments, and the success of the company is due to an effective combination of financial ability with high technical skill.

MT. READ & ROSEBERY MINES, LTD.

TASMANIA

Company in liquidation. Assets sold to Electrolytic Zinc Co. of Australasia, Ltd., which see.

MOUNT ZEEHAN (TASMANIA) SILVER-LEAD MINES, LTD.

TASMANIA

Address: T. H. Vincent, mgr., Mount Zeehan, Tasmania.

A. D. Foggio, sec., 5 Bucklersbury, London, E. C.

Inc. 1889. **Cap.** £275,000; £1 par; 41,982 pnce. and 151,140 ord. shares issued. Report for year ending June 30, 1921, showed a loss of £18,217; debit balance, £31,227.

Property: 584 acres, silver-lead claims operated by tributers. Company also owns shares in Dundas Cuni (10,600) and Zeehan Queen (21,000).

NORTH MOUNT FARRELL MINING CO.

TASMANIA

Address: O. B. Williams, gen. mgr., Tullah, Tasmania.

Report for half year ended June 30, 1921, showed an operating loss of £3,674; debit balance, £2,163.

Property: a lead-silver mine in West Coast district of Tasmania, opened by shaft and 5 levels. On No. 4 level the north drift, out 580', opened an average of 11' of good ore.

THE MINES HANDBOOK, 1922

Equipment: includes a concentrating plant.
Reserves estimated at 20,270 tons developed and 5,580 tons probable

Production: in 1919, 5,462 tons yielded 929 tons of concentrate, containing 572 oz. silver and 1,142,460 lb. lead, valued at £12,453.
 The total to Dec. 31, 1919, is 46,384 tons of ore, 2,375,884 oz. silver, and 800 lb. lead, worth £436,843 net.

PIERCE & WARRER TIN MINING CO.

Address: C. G. Ryan, Bradshaw's Creek, Tasmania.

Property: the Argonaut and Pioneer mines, working alluvial tin ground consisting and hydraulicking. Company has an hydro-electric plant, which generates power at 0.05 pence (0.1 cent) per unit. To bring in more water for the mining company laid a 28" wood pipe 2,750' long.
Profit for year ended June 30, 1920 was £34,219, of which £28,217 was retained.

Pioneer Mine.

L GEORGE TIN MINING CO.

Address: A. R. Fowler, mgr., Avoca, or Launceston, Tasmania.

Property: a lode tin mine in the Eastern Mining Division, 12 miles from Avoca. Ore is concentrated in a plant driven by a 220-h. p. suction engine. In 3 months to April, 1919, 3,223 tons of ore yielded 1,000 tons of tin oxide worth £4,726. Output in 1920 from 18,667 tons was 6,000 tons of tin oxide worth £14,808.

LYELL & CROWN LYELL EXTENDED MINES

TASMANIA

Office: W. B. Arnold, sec., 39 Queen St., Melbourne, Victoria, Australia.
Property: S. Fitchett, chairman of board of directors; D. W. Welch, supt. in Victoria. **Cap.**, £150,000; shares 10/-par; all issued.
Revenue from ore sales for 9 months, ending June 1, 1919, was £1,334, and expenses £3,690.

Property: in Mt. Lyell district, Tasmania, contains lenticular contact lenses in schist, the ore being a sulphide that assays 30% lead, 20 oz. silver, and some iron.
Development: by 1,800' of tunnels, reaching depth of 240'. Reserves estimated at 100,000 tons above the 120' level.

Equipment: includes a concentrating plant, to which flotation is to be added.

The mine was practically closed in April, 1919, due to unsuitability of the ore and a desire to do more exploration below the 120' level.

DO MINE, LTD. TASMANIA
gold of a total value of £3,610,180, and paying £772,671
property at Beaconsfield, near Launceston, has been
company liquidated.

VICTORIA

ALGAMATED GOLDFIELDS, LTD. VICTORIA
Bendigo Amal. Goldfields, N. L.

nonwealth Chambers, Bendigo, Victoria, Australia. A. H.
mgr.; J. G. Stanfield, mgr.; B. V. Barton, asst. mgr.
re-constructed May, 1921 as a Limited company. Stock-
pro rata amount of new shares and 1s. per share return of
£750,000; 7s 6d par; 1,519,038 shares paid up to 5/2, reduced
1/2 par; 607,615 shares issued as fully paid.

Statement: for 11 months ending May 31, 1921, operations
of £52,929; surplus of liquid assets over liabilities, £127,665;
since been paid to old stockholders as return of capital). The
to June 30, 1920, showed a net profit of £110,881; dividend,
plus liquid assets, £76,178.

this company was organized in 1917 to consolidate about 40
in the center of the Bendigo Goldfield (which has yielded over
since 1850), explore them systematically by new openings and
drilling, and equip them, if warranted, with modern plant. Oper-
concentrated at a number of central points. Eight lines of "reef"
in the area, ranging from 4,500 to 22,000 ft. in length, totaling
Most of the shafts are over 2,000 ft. deep, some being over

development: new work in 1921 (to June) totaled 16,260'. Continuous
examination is made, as the structure of the field is complex. A
few minor discoveries were made, but no high-grade shoots of any
kind were found. Tributaries are at work in certain parts of the mines.

equipment: includes 30 hoists, 3 compressor stations capable of gen-
erating enough air for 150 to 180 drills, and stamp-mills of 566 tons daily

production: for year ended May 31, 1921, was 81,852 tons company
yielding 43,853 oz. gold, and 13,586 tons tributaries yielding 4,666 oz. gold,
average of 10.09 dwt. per ton. Output for previous year was 102,194 tons,
average 12 dwt.

DO'S TIN & GENERAL MINING CO., LTD. VICTORIA
operates same title under Tasmania for office, etc.

DO'S PIONEER GOLD & TIN MINES, N. L. VICTORIA
office: E. H. Shackell, Collins House, Melbourne, Victoria, Australia.
J. L. Wharton, chairman of board of directors. H. Falconer, gen. mgr.,
Bendigo, Victoria.

incorporated May 14, 1913, in Victoria. Cap. £150,000; £1 par; 100,000 issued.
Financial report for half year ended Nov. 30, 1921, showed an operating
profit of £6,500; dividend No. 12. £5,000; surplus liquid assets over liabilities,
£6,753.

Dividends: 5% in 1915; nil in 1916; 15% in 1917, 1918, and 1919; 10%
in 1920; 5% in 1921. Total to date is £60,000.

Property: 752 acres of alluvial ground on Eldorado creek, 13 miles from
Bendigo, Victoria. Equipped with hydraulic plant, capable of
producing 880,000 cu. yd. per annum.

THE MINES HANDBOOK, 1922

Production: in recent half-years:

Period	Yardage	Gold, oz.	Tin, tons	Cost per yd.
Nov. 30).....	247,300	1,658	21
May 31).....	432,000	3,896	41
Nov. 30).....	503,000	3,422	44	6.53d
May 31).....	254,000	2,256	29	8.52
Nov. 30).....	443,000	4,023	49	8.71
May 31).....	462,000	3,786	52

Management estimated (Nov. 30, 1921) the life of the mine at 12 years, including the south side section, 68¾ acres, which contains 8,250,000 cu. yd.

MINERALS SEPARATION & DE BAVAY'S PROCESS. VICTORIA AUSTRALIA PROPRIETARY, LTD.

Office: E. H. Shackell, sec., Collins House, Melbourne, Victoria, Australia.

Directors: W. L. Baillieu, chairman; A. E. Bright, M. Cohen, C. F. Mearns, and J. L. Wharton.

Inc. June 27, 1912, in Victoria, to acquire the Australian and New Zealand rights to the Minerals Separation, Ltd., De Bavay's Sulphide Process (Australia) Ltd., Potter's Sulphide Ore Treatment, Ltd., and Amalgamated Zinc (Australia) Ltd., patents.

Cap. £300,000; shares £1 par; 265,000 issued.

Loss for the year ending June 30, 1920, showed a loss of £6,303, as a result of industrial dispute at Broken Hill.

Dividends: 10% in 1912; 13¾% in 1913; 5% in 1914; 7½% in 1915; 10% in 1916; 10% in 1917; 6¼% in 1918; 10% in 1919.

Company grants licenses to use its process on royalty basis.

THE NEW MOON GOLD MINING CO., N. L. VICTORIA

Office: G. H. Green, High St., Eaglehawk, Bendigo, Victoria, Australia.

Chairman: R. Williams, chairman board of directors. **Supt.:** Wm. Williams, supt.

Inc. in Victoria. Cap. £32,000; shares £1 par; all issued; 17/7 paid.

Dividends: £16 8/6 per share.

Property: a gold mine in Bendigo field.

Development: by vertical shaft 2,010' deep, and extensive workings.

Equipment: steam power, hoist, 20-drill compressor, and 40 stamp-mill.

Production: totals 447,585 tons, yielding 245,030 oz. gold. The mine is worked by tributaries, 1921.

WESTERN AUSTRALIA

SEPARATED GOLD MINES OF WESTERN AUSTRALIA, LTD.

Office: R. Davidson, sec., 20 Copthall Ave., London, E. C., England.

Office: Kalgoorlie, W. A.

Directors: E. Hooper, chairman; D. F. McAulay, gen. mgr.

Inc. Dec. 19, 1894, in England. Cap. £500,000; shares £1 par; 495,000 issued.

Company is heavily interested in the Porcupine V. N. T. Mines, Ltd., and Keeley Silver Mines, Ltd., (681,603 shares). See notes on these companies in the Ontario Canada section of this book.

Revenue for the year ended March 31, 1918, was £103,660, but there was an operating loss of £746, and debit balance is now £8,577. In 1919 revenue was £9,991. Cash assets were £43,893 at the end of 1919, and liabilities, £8,426; £36,602 was spent on the Keeley mine in Ontario. For 1920 profit was £9,704; debit balance, £8,964. For 1921 there was a net profit of £25,624; credit balance, £16,760.

Dividends: from 1898 to 1909 totaled 150%. In 1913 and 1914 2½% nothing since. The total is £703,833.

Property: 54 acres on the "Golden Mile," Kalgoorlie, W. A. which has

produced a large quantity of sulpho-telluride.

Development: Equipment: is a 350-ton plant and filter-press.

Production: 93,430 tons, compared with 71,603 tons in 1921, valued at £1,000,000.

BLOCK 50 CO. Successor to the Victoria Block 50 Co. Ltd. Address: Victoria. The Syndicate: John McDermott.

Property: Block 50, which was leased in mid-1919, and lease was acquired by the company in London. The purchase price was £100,000.

BULLFINCH A reorganised company. Office: C. G. P. Bewick, Moreland, Inc. Dec. 1919. 994 shares issued.

Property: 4 leases at Westport. Lease on Block 50, gold placers in 1922 that produced 80,000 lbs. of gold.

Development: Equipment: plant. Productive.

supplies-technical.

Development: by 2,200' vertical shaft and extensive workings.

Equipment: complete mining, hoists, compressors, electric power. Mill is a 350-ton plant using crushers, ball-mills, roasters, pans, cyaniding equipment and filter-presses.

Production: for the year ended March 31, 1917, was £124,611 from 93,430 tons, compared with £103,579 from 81,528 tons in 1918; £101,510 from 71,603 tons in 1919; in 1920, 54,484 tons realizing £95,940; 64,462 tons in 1921, valued at 28/4 per ton and realizing £121,614.

BLOCK 50 COMPANY, LTD. WESTERN AUSTRALIA

Successor to Celebration Syndicate.

Address: Wm. Thomas, sec., Kalgoorlie, W. A.

The Syndicate is composed of P. Fitzgerald, A Francis, Richard Hamilton, John McDermott and J. W. Sutherland, mining engineers of Kalgoorlie.

Property: an option on a mine on Block 50 of Hampton Properties, Ltd., which see for full description. Gold deposit was discovered about mid-1919, and by November the reserve was estimated at £100,000. The lease was acquired by Lionel Robinson, Clark & Co., who floated a company in London called Hampton Celebration (W. A.), Ltd., which see. The purchase price was £25,000 cash and £75,000 in shares.

BULLFINCH PROPRIETARY (1919), LTD. W. A.

A reorganization of Bullfinch Proprietary (W. A.), Ltd.

Office: C. Hay, 20 Cophthall Ave., London, E. C. 2, England.

Sir G. P. Doolette, chairman of board of directors. A. L. Hay, mgr.; Bewick, Moreing & Co., gen. mgrs.

Inc. December, 1919, in Great Britain. **Cap.** £175,000; 5/ par; 507,094 shares issued.

Property: 162 acres in the Bullfinch field, near Southern Cross; and 4 leases at Wombola on Hampton Plains, 10 miles S. E. of the Celebration Lease on Block 50, acquired late in 1919. Also, an option on 2 sq. miles of gold placers at Jebba, Northern provinces of Nigeria. Reported early in 1922 that prospects were not encouraging.

Development: at Bullfinch by shaft to 510'. Reserves were estimated to be 80,000 tons, averaging 21/- (\$5.04) per ton.

Equipment: hoist, compressor, shops, 20 stamps, 2 tube-mills, cyanide plant.

Production, years ended Sept. 30:

Year	Tonnage	Gold yield	Profit	Cost per ton

mine was flooded in 1921, pumps handling 60,000 gallon per hour, unable to hold the inflow. On Nov. 28, 1921, company's shareholders asked the State government for assistance as £13,000 was needed for all additional plant etc., and, if no help was given, to wind up the com-

MAY GOLD MINING CO. WESTERN AUSTRALIA

Address: Hugh Williams, gen. mgr., Westonia, near Southern Cross, Western Australia.

Location: in Victoria. Cap. 42,850 shares of 10s. each.

Dividends: regular of 1/- (25 cents) per month were paid, the total to 1919, being £325,660, equal to £7 12/- per share.

Property: a gold mine at Westonia, in the Kunanalling district, Western Australia.

Development: by vertical shaft to depth of 480'. Water has been very troublesome, and up to 60,000 gal. per hour has been pumped.

Equipment: steam power, pumps, hoist, compressor, turbo-generator, 10 stamps and cyanide plant.

Production: for 1918 was 20,022 oz.; for 1919 10,197 oz. and for 1920,

October, 1919, operations ceased, owing to exhaustion of reserves.

FREMANTLE TRADING CO., LTD. WESTERN AUSTRALIA

Formed to acquire the business of the Fremantle Smelter, Ltd.

Office: E. H. Woolcott, sec., Salisbury House, London, E. C. 2, Eng-

Directors: E. P. Jones, chairman; A. E. Lund, and J. A. Morris. Mine

Manager: W. G. Sutherland, gen. mgr., Freemantle, W. A.

Capital: July 28, 1909, in Great Britain. Cap. £75,000 in 45,000 pfee. and 20,000 ord. shares, £1 par, of which 26,100 pfd. and all ord. shares are issued and fully paid.

Accounts for year ending July 31, 1921 showed, receipts from pig lead etc. £47,959 and operating expenses of £45,581. A loss of £6,367, leaving credit balance of £239, left debit balance of £6,128. Assets in-cash, £1,156; debtors, £4,140; stock on hand, £18,092; creditors, £1,000; bank overdraft, £7,478; mortgage debentures, £5,500.

Dividends: from 1909 to 1918, a total of 108% on pfee. and 48% on ord. shares, £10% on each in 1917-18; 1918-19, 15%; 1919-20, 10% on pfee. only; 1920, nil.

Property: 1,115 acres, near Northampton, W. A., including the Badgers Consol. lead mine, McGuire, Narra Tarra, and Wheel Ellen lead mine and the Fremantle Smelting Works.

Geology: the mines are in a region of garnetiferous granitic schist, with dolerite and later pegmatite dikes, which contain nearly vertical galena, with orebodies a few feet to 30' wide. The Baddera lode contains galena only, the Wheel Ellen, galena and zinc blende. The ores are primary and expected to continue to much greater depth, than any other workings.

Equipment: includes a concentrator at the mines, and a smelter at Fremantle.

Owing to slump in price of lead, the mines were closed from February 1920 and smelting temporarily suspended April 29, 1921.

Production: in 1919, 25,139 tons mined contained 3,057 tons metallic lead. In 1920, 11,594 tons smelted, contained 852 tons lead. In 1921, 1,072 tons ore, etc., yielded 579 tons lead. Average price received was £29 10s. per ton.

Production in 1919 and £40 16s. in 1920. Production in 1920 was 14,804 tons from Narra Tarra; 4,401 tons from the Baddera and 208 tons from the Wheel Ellen containing 1,744 tons of lead. Total production to date is 9,469 tons from Narra Tarra, 13,888 from Baddera and 647 from Wheel Ellen.

The Baddera is practically exhausted.

HAMPTON CELEBRATION (W. A.), LTD. **W. A.**
Office: T. C. Hancock, sec., Finsbury House, London. E. C., Eng-
Mine address: Civiall Hawkins, gen. mgr., 23 Macdonald St., Kalgoo-

rie, W. A.
inc. December, 1919, in Great Britain. **Cap.** £250,000 all issued and
paid. Company acquired the Celebration gold lease from the Cele-
bration Syndicate (which see), for £50,000 cash and £100,000 in shares.
Promoters got £25,000 in shares, and £75,000 is available for work-

capital.
Property: the Celebration lease on Block 50 of the Hampton Prop-

erty, Ltd., 20 miles south of Kalgoorlie.

By a new system of prospecting, called 'loaming', by which the gold in
soil and surficial material is traced to its source a gold vein was un-
covered in June, 1919, which proved to be 20' wide. Samples for a length
of 100', averaged £5 (\$24) per ton. A shaft 100' deep in November, proved
the value persisted downward. The lode is traceable for 1,400' on the
surface, and estimates based on a length of 1,400', a width of 20', a depth of
100' and value of £5 per ton, at 20 cu. ft. per ton for this class of ore, give
a total value of £700,000.

Geologic conditions at the Celebration are said to prove it to be a con-
tinuation of "The Golden Mile" of Kalgoorlie, which has yielded over \$360,-
000 in gold. If the lode is in quartz-dolerite it should prove persistently
rich but if it is encased in calc-schist the outlook is not so good, judged by
past experience at Kalgoorlie.

Development: by 2,856' of workings. The main shaft (200') is being
driven to 300' depth. Reserves estimated by management at 35,000 tons
of ore averaging 42/6, above the 100' level. A 10-stamp mill being installed,
1922.

URLI GOLD MINES, LTD. **WESTERN AUSTRALIA**
 fice: F. H. Carlton, sec., 39 Lombard St., London, E. C. 3, England.
 Black, gen. mgr., Kalgoorlie, W. A.
 ic. June 14, 1895, in England. Cap. £120,000; shares £1 par; all

Report for year ended July 31, 1921, showed total income, £103,660; credits, £82,086; operating profit, £21,574, compared with £30,270 and £17,262 in 1919.
 Dividends: total £1,681,500 to April, 1921.
 Property: 18 acres on the "Golden Mile," Kalgoorlie, W. A.
 Development: by 1,900' shaft. The lode is of peculiar shape, being a "rimney" which is wider than it is long, and has no defined walls, as the ore fades out; below the 1,800' level the vein passed from quartz-diorite to calc-schist in which the ore became low-grade. A total of 24,180' of diamond drilling failed to reveal any other shoots of sulpho-telluride ore.
 Equipment: complete with 350-ton dry crushing and a roasting plant.
 Production: for year ended July 31, 1921,—49,320 tons treated, of which 4,493 tons were purchased, realizing £99,377; compared with 60,803 tons

(25,624 tons purchased) in 1920, realizing £102,440. Total to July 31, 1921, 1,880,000 tons yielding £4,580,000.

The mine is considered worked out and was definitely closed down in 1921. Kalgurli Gold Mines is to be liquidated and assets distributed. Mine and equipment sold to the Oroya Links, Ltd., in 1921 for £20,000.

Company has been worked since 1916. The mines are worked by tributers. In 1920 ore mined came from leasehold in Boulder district.

Equipment: includes 50-stamp mill and cyanide plant.

Production: in 1919, 12,176 tons yielding £106,979; in 1920, 16,714 tons yielding £117,878, (17,892 oz. gold and 937 oz. silver), or a total to 1921 of 860,622 tons yielding 336,894 oz. gold and 28,462 oz. silver. Costs were 44/ in 1919 and 46/5 in 1920.

PARINGA MNG. & EXPLORATION CO., LTD.

W. A.

Address: S. A. Lancaster, sec., 87 Bishopsgate, London, E. C., Engo.

Inc. 1909 as Paringa Mines (1909) Ltd., name changed in 1920. **Cap.** £200,000; shares 5/ par.

Report for year ended Oct. 31, 1921, showed an operating loss of £1-096; debit balance, £14,141.

Property: Paringa lease 392 E, 24 acres, in East Coolgardie goldfield, developed by 1,325' shaft.

No production 1920. Total to date 26,890 tons ore giving 15,599 oz. gold. The mine was worked by tributers, 1921.

Company with Paringa Celebration Mng. Synd., has an interest in the Cactus gold group in Southern Rhodesia.

PILBARA COPPER FIELDS, LTD.

W. A.

Succeeds **Whim Well Copper Mines, Ltd.**

Address: British & Continental Investment Trust, Ltd., sec., 62 London Wall, London, E. C., England. H. R. Sleeman, mgr.

Inc. Jan. 21, 1917. **Cap.** £60,000; shares 5/ par; 100,000 issued. **Debentures:** 7% first, £20,000; 7% second, £42,760.

Report for year ended June 30, 1920, showed an operating loss of £2-143; debit balance forward, £5,749.

Property: the old Whim Well and Mons Cupri copper mines, 100 acres, freehold and 200 acres leasehold at Whim creek, in West Pilbara goldfield, W. A., 13 miles S. of Balla Balla, first worked in 1888. At the Whim Well the country rock is a "corrugated chloritic siliceous slate." Copper sulphide ore occurs associated with iron pyrites, zinc blende and a little galena, in an orebody 10-50' wide. Developed to depth of 1,000'.

The Mons Cupri is developed by two adits and opencuts, proving about 6,000 tons of 4½% copper ore. The mine is credited with past production of 2,009 tons, containing 166 tons copper valued at £12,036.

Equipment: includes an experimental leaching plant (Pechey process). Milling operations have been hampered by lack of water. A narrow gauge tram line connects the mine with Balla Balla.

Production: of copper in 1920 was 893 tons ore yielding 160.53 tons copper valued at £15,783; total to date 1,223 tons ore yielding 219.53 tons copper valued at £21,683. The Whim Well mine yielded a total to September, 1920 of 72,562 tons of ore averaging 12.95%, giving 9,343 tons of copper worth £604,492.

SONS OF GWALIA, LTD.

WESTERN AUSTRALIA

Office: E. Pears, sec., 20 Copthall Ave., London, E. C. 2, England.

D. Richards, chairman and managing director. Bewick, Moreing & Co., gen. mgrs. J. Adam, supt., Gwalia, W. A.

Inc. Jan. 7, 1898, in England. **Cap.** £350,000; shares £1 par; 325,000 issued.

Report for year ended Dec. 31, 1920, showed an operating profit of £60,257; balance forward £10,837.

Dividends: 59 payments to end of 1920, including 5% in 1919; 5% in 1920.

Property: 863 acres, near Leonora, Western Australia, 500 miles by rail from Perth. Lenticular orebodies, averaging 9' wide consists of free milling ore, mined by rill stopes.

Development: by incline shaft 3,991' deep with extensive workings. Ore reserves approximate 600,000 tons. Recent prospecting has not been as successful as formerly, and the grade of ore has fallen off.

Equipment: complete mining and milling plants were destroyed by fire in 1921. Mill had 50 stamps, concentrators, pans, tube-mills and cyanide plant.

Production, years ending December 31:

Year	Ore, tons	Gold yield
1920.....	135,230	£255,235*
1919.....	147,652	239,478
1918.....	148,394	190,100
1917.....	159,397	232,550
1916.....	158,956	232,924

*Includes £77,353 premium.

Mine in Peak Hill Goldfield yielded 10 tons copper ore in 1920 giving 4 tons metallic copper.

Company has acquired an interest in the California Exploration Co., Ltd. and Cornish Kaolin, Ltd.

SOUTH KALGURLI CONSOLIDATED, LTD.

W. A.

Office: W. Bramall, sec., 529 Salisbury House, London, E. C. 2, England. **Mine office:** Kalgoorlie, Western Australia. F. G. Brinsden, gen. manager.

Inc. March 11, 1913, in England, as a consolidation of the South Kalgurli Gold Mines and Hainault Gold Mine companies. **Cap.** £150,000; shares 10s. par; 250,007 issued.

Financial report for year ended March 31, 1921, showed an operating profit of £36,372.

Dividends: 5% in 1913-14; 7½% in 1914-15; 10% in 1915-16; 2½% in 1916-17; 7½% in 1918-19; 7½% in 1919-20; 25% in 1920-21; 7½% in 1921-22.

Property: 36 acres in the "Golden Mile," of Kalgoorlie, Western Australia, productive since 1896, contains the Perseverance, Nos. 1 and 2 East, Middle and Lake View lodes, each averaging 5' to 6' in width, and opened to 1,800' level.

Development: by vertical shafts 1,000' and 1,800' deep.

Reserves: estimated (Sept. 30, 1921) at 125,000 tons of 8 dwts. per ton ore and 58,000 of 6 dwts. per ton ore blocked out and 16,000 tons of 8½ dwts. and 70,000 tons of 5½ dwts. per ton probable ore.

Equipment: complete mining and milling plants electrically driven, the latter including crushers, 4 ball-mills, 10 roasting furnaces, grinding pans, cyaniding apparatus and filter-presses, also 40-stamp mill and cyanide plant.

Production: during 21 months ended Dec. 21, 1916, 199,640 tons of ore yielded gold worth £243,710. In 1918, 12 months ended March 31, returns were £119,736 from 108,236 tons; in 1919, £128,556 from 96,239 tons; in 1920, £115,775 from 71,309 tons; in 1921, £182,277 from 80,270 tons.

Development: 680' vertical shaft, and extensive drift and crosscut work. In 1920, 5' of 102s (\$24.48) ore was cut by a drill, this orebody has been met with in upper level.

Equipment: 80-ton per day plant, including ball-mill, roasters and cyanide plant. To treat the oxide ore, company originally had a 20-stamp mill and cyanide plant.

Production: totalled £730,109 from 690,286 tons to Aug. 1, 1920; for year ended June 30, 1921, 18,677 tons yielded £61,074. Costs were 65/4 in 1920 and 69/ in 1921.

NEW ZEALAND

BLACKWATER MINES, LTD.

NEW ZEALAND

Office: O. M. Panton, sec., Finsbury House, Blomfield St., London, E. C. 2, England. **Mine address:** G. E. Stephenson, gen. mgr., Alta, Reefton, N. Z.

For officers and directorate, see **Consolidated Gold Fields**, of New Zealand.

Reg. Dec. 19, 1906, in Great Britain. **Cap.** £250,000; shares £1 par; 249,992 issued.

For year ended Dec. 31, 1920, operations showed a net loss of £2,876, after writing off £5,062 for depreciation and £6,169 on development. Assets include gold £11,651, cash £87, concentrates, £2,049, stores, £11,421; investments £4,818. Creditors £26,804.

Dividends: 70% from 1909 to 1918.

Property: a gold mine with 299 acres of mineral ground, water and timber rights near Reefton, South Island, N. Z.

Development: by main shaft 1,316' deep. **Reserves** are given as 87,562 tons of 10.29 dwt. ore in 1918, and 82,704 tons of 11 dwt. ore in 1917.

Equipment: complete with 30 stamp-mill and cyanide plant.

Production, years ending December 31:

Year	Tons	Gold yield	Operating profit
1920.....	24,969	£52,612	£10,547*
1919.....	31,728	61,309	10,884
1918.....	31,528	63,993	26,355
1917.....	34,417	67,206	28,000
1916.....	40,247	80,565	35,528

*Before deducting for depreciation, development and tax.

Costs are around \$5.50 per ton.

CONSOLIDATED GOLD FIELDS OF NEW ZEALAND, LTD. N. Z.

Office: O. M. Panton, sec., Finsbury House, Blomfield St., London, E. C. 2, England.

Directors: Sir W. B. Perceval, chairman; L. Ehrlich, E. T. McCarthy, E. W. Spencer, L. Welstead, A. L. Foster, G. A. Jones. G. E. Stephenson, gen. mgr.; Alta Reefton, N. Z.; R. Burley, mine supt.; F. Campbell, adviser in New Zealand.

Inc. Feb. 22, 1896, in England. **Cap.** £300,000; shares £1 par; 250,000 issued. Company holds 91,325 shares in the **Blackwater Mines** and 160,000 in the **Progress Mines** companies of New Zealand, which see.

Report for year ended Dec. 31, 1920, showed a loss of £12,109; credit balance, £7,368; current assets, supplies, £4,839; debtors, £3,550; cash, £1,364; loans to subs, £30,166; investments, £2,452; Progress Mine debentures, £21,160; other shares and properties, £243,558; liabilities; creditors, £3,827; overdraft, £45,736.

Dividends: totalled 18/6 per share to 1911, since then none has been paid.

Property: about 271 acres in the Inangahua valley, 3 miles from, Reef-ton, on the West coast of South Island, N. Z. The Wealth of Nations mine, in the same district as the Blackwater and Progress mines was shut down 1918, owing to a fire. Mine plant and concentration mill were re-built 1919-20, but operations have not been resumed.

NEW ZEALAND QUICKSILVER MINES, LTD. N. Z.

Succeeded **Whangarei Cinnabar Co.**

Address: H. C. Lewsley, Chamber of Commerce, Auckland, N. Z.
Mine address: L. E. Antridge, mgr., Puhipuhi, Whakapara, N. Z. H. R. Cooke, chairman.

Inc. in New Zealand. **Cap.** £15,000; par 5s: 25,000 shares fully paid; 25,000, 3s paid, 10,000 in treasury. Earnings 1920, £1,067; ore sales, £2,184; operating expenses, £2,435.

Property: a cinnabar mine at Puhipuhi, 95 miles N. of Auckland, showing basalt flows underlaid by limestone quartzite, etc., that rest on andesite. Ore 78" wide and averaging 2% Hg., occurs in fractured chert, against a "12" band of iron oxide.

Development: 600' drift at depth of 85'. **Equipment:** includes a Novak shaft furnace. **Reserves:** 14,000 tons 2% ore including 5,000 blocked out.

Production: 33,375 lb. sold for £8,000.

PROGRESS MINES OF NEW ZEALAND, LTD. N. Z.

For office and directorate see Consolidated Gold Fields of New Zealand. F. W. Robinson, sec., Reef-ton, N. Z.; G. E. Stephenson, gen. mgr., Alta, Reef-ton, N. Z.

Inc. Dec. 8, 1896, in Great Britain. **Cap.** £275,000; shares £1 par; all issued. Debentures outstanding, £27,614, 6%. Company owns 74,920 shares of the Blackwater Mines, Ltd.

Report for year ended Dec. 31, 1920, showed a loss of £10,553; debit balance: £64,174; cash £37; bullion and concentrates, £2,933; invest. £12,842; debtors, £477; debenture interest unpaid, £3,706; loan £14,823; creditors, £3,875.

Dividends: 23/5 per share from 1899 to 1910; nothing since.

Property: 816 acres near Reef-ton, South Island, N. Z., including two alluvial areas and 48 acres of coal land. Ore reserves are reported to be 60,000 tons.

Equipment: complete with 65-stamp mill and cyanide plant.

Production, years ending December 31:

Year	Tons	Gold yield	Operating profit
1920.....	8,102	£12,620	£2,890 (loss)
1919.....	15,980	23,419	3,066 (loss)
1918.....	16,230	22,175	1,069
1917.....	19,840	31,480	6,000
1916.....	26,780	31,405	4,605

Mine practically worked out in 1920.

TALISMAN CONSOLIDATED, LTD. N. Z.

Head office: W. Wright, 116 Victoria Parade, Auckland, New Zealand.

Property: the Talisman mine worked out, and as diamond drill work was fruitless, mine was shut down and equipment removed at end of 1920. Company organization and record described in Vol. XIV. of this book.

WAIHI GOLD MINING CO., LTD. N. Z.

Offices: H. Akers, sec., Coronation House, 4 Lloyds Ave., London, E. C. 2, England. **Mine office:** Waihi, N. Z.

Directors: A. M. Mitchison, chairman; H. E. Beddington, Sir W. B. Perceval, W. Bristow, G. R. Mitchison, S. T. George, C. Rhodes. **Staff:**

Inc. Dec. 7, 1887, in England. Cap. £5,000,000; shares £1 par; 495,907 issued.

In 1921, company reduced its capitalization returning £250,000 cash to its shareholders, and changing its shares from £1 par to 10s par.

Assets, include £212,000 N. Z. bonds, and as much more cash reserves after paying a capital return distribution.

Report for year ended Dec. 31, 1920, showed gross operating profit £146,811, with balance forward, £175,877; dividends, £99,181; depreciation, £14,907; tax, £47,630; balance forward, £14,159. Current assets—cash, £31,439, bullion, £17,418, treasury bills, £198,619; investments, £424,614; debtors, £6,075, creditors, £73,424.

Dividends: recent distributions, 20% annually 1913- 1918; 20% in 1919 and 1920; 15% in 1921.

Property: 518 acres of mining claims, 3 large millsites, extensive timber lands, power sites, etc., at Waihi and adjacent areas in New Zealand. Mine has had an interesting history, being one of the first in the world to use the cyanide process for gold extraction. It has produced over £12,980,000 in gold and silver. The quartz veins vary up to 50' in width, and ore averages about 54s per ton.

In all, the mine has about twenty separate reefs, the principal being the Martha, Royal, Edward and Empire. Extraction is maintained at a fairly regular level. In 1918 it was 91.7%, in 1919, 91.1% and in 1920, 91.9%. Recent developments have not shown a high grade of ore, apart from some small rich vein strikes.

Development: by 4 shafts, deepest over 1,300'; two of them equipped with large electric and Cornish pumping plants, lifting over 1,100,000 gal. daily. A new pump was installed in 1921. **Reserves** are estimated at 523,828 tons averaging 31/1 with an additional 254,737 tons of 38/ ore in the pillars. Eighty-five rock-drills are employed.

Equipment: extensive mining plant, 6-mile railway, 50-mile transmission-line from power plant on Waikato river, 200-stamp Victoria mill driven by water and electricity; also sand, slime, and concentrate cyanide plants. The power-plant was sold for £212,500, to the New Zealand Government in 1919, under a working agreement.

Recent production:

Year	Tonnage	Bullion yield	Year	Tonnage	Bullion yield
1920.....	159,308	£341,432	1914.....	183,405	£332,165
1919.....	192,613	380,401	1913.....	184,768	336,652
1918.....	188,998	387,065	1912.....	147,828	332,886
1917.....	191,742	370,567	1911.....	350,699	679,116
1916.....	194,232	371,520	1910.....	442,020	926,100
1915.....	192,333	349,581	1909.....	416,813	959,594

In 1921 the output was 164,042 tons containing 365,634 oz. silver and 46,797 oz. gold.

Although the Waihi gold mine is not the great and valuable property it formerly was, it still apparently has several years' life ahead of it. In its early career the Waihi was regarded as one of the great investment mines of the world, and to date it has distributed over £5,000,000 in dividends and paid £646,000 in income tax, from gold and silver obtained of a value of £12,987,000.

WAIHI GRAND JUNCTION GOLD CO., LTD. NEW ZEALAND

Office: A. Stewart, 10 Throgmorton St., London, E. C. 2. England.
Mine address: W. McConachie, mgr., Waihi, N. Z. P. R. Allen, cons. engr., Runcorn, Cheshire.

Inc. Dec. 29, 1897, in England. Cap., £400,000; shares £1 par; 384,375 issued.

Financial Statement, years ending December 31:

Year	Profit	Dividends	Current assets	Cur. liabilities
1920.....	£21,016*	£.....	£212,399	£77,782
1919.....	18,427*	220,331	63,115

1915.....	39,344	38,437	103,611	12,807

*Loss.

Dividends: total 70% from 1910 to 1918, 5% being paid in 1918; the grand total is £269,000.

Property: 280 acres of mining land, and a timber area, covering 2,220 acres, at Waihi, New Zealand. The Waihi Extended mine was acquired in 1919, and exploration started on the Mary lode, on the 3rd to 6th levels, exposing a large amount of high grade ore. In the main mine workings the Empire lode below the 8th level is showing strong values.

Development: has been carried on since 1893 in order to cut an extension of the Waihi company's lodes, which were found at a depth of over 500'. The main shaft is 1,357' deep.

Reserves: estimated at 120,500 tons, December, 1920.

Equipment: complete power and mining plants, with 60-stamp mill, 10 tube-mills, and cyanide plant.

Production: in 1916 about 115,000 tons of ore yielded gold and silver valued at £194,461; 116,130 tons giving £220,090 in 1917; 80,210 tons for £141,755 in 1918; 66,483 tons for £97,898 in 1919; 57,450 tons for £109,506 in 1920.

NEW CALEDONIA

CHROME CO., LTD.

Office: H. W. C. Dermer, 19 St. Swithin's Lane, London, E. C. 4 England.

Directors: E. Davis, chairman and managing, S. H. Boileau, asst., E. Chalas, Jr., A. A. Lavino, D. C. Haldeman.

Inc. Feb. 1, 1911, in England. **Cap.** £190,000; shares £1 par; all issued. **Debentures:** £29,340, 5% outstanding. Company owns the entire capital stock (100,000 francs) of the **Soc. Anon. de la Tiebaghi**.

Report for year ended Jan. 31, 1921, showed profit, £43,523; credit balance, £45,511. Current assets, £103,283; current liabilities, £21,035.

Dividends: 5% in 1913; 5% in 1914; 10% in 1915; 5% in 1916; 24% in 1917; 5% in 1918; 10% in 1919.

Property: Tiebaghi chrome mines, near Port Pagoument, New Caledonia.

Production: (years ended January 31.) 61,416 tons in 1914; 65,585 tons in 1915; 35,303 tons in 1916; 42,437 tons in 1917; 28,560 tons in 1918; 27,382 tons in 1919; 30,303 tons in 1920; 64,314 tons in 1921.

Mines are arranged alphabetically under the name of each State or Country.

CAPE COLONY

CAPE COPPER CO. LTD.

CAPE COLONY

Office: 9 Queen St. Place, London, E. C. 4, England, P. J. Franks, sec. **Mine office:** O'okiep, Little Namaqualand, Cape Province; James Crozier, gen. supt. **Works office:** Briton Ferry, Glamorganshire, Wales. T. Blair Reynolds, chairman of board of directors; John Taylor & Sons, general managers; Chas Olden, supt., Rakha Hills mine; H. Phillips, smelter supt.

Inc. April 30, 1888, as a reconstruction of Cape Copper Mining Co., Ltd., under the laws of Great Britain, capitalization £950,000, in 75,000 cumulative 6% preferred shares of which 45,000 are issued and fully paid, and 400,000 ordinary shares, par £2; issued 360,000. **Debentures:** 4,200 first mortgage 8s. of £100 each, due 1930; 1,200 were taken up by public and 3,000 issued as collateral vs. loans. Annual accounts are made up to April 30, at the Cape, and to August 31, in London and India, and are submitted in December.

Profits have been as follows, years ending August 31:

Year	Amount	Year	Amount
1921.....	£184,535*	1913.....	£ 83,500
1920.....	163,628*	1912.....	80,494
1919.....	171,007*	1911.....	160,862
1918.....	641,146*	1910.....	124,659
1917.....	147,842	1909.....	90,223
1916.....	131,248	1908.....	144,366
1915.....	33,212	1907.....	379,910
1914.....	17,244		

*Loss.

Profits since the beginning of operations amount to £4,057,356. Current assets at August 31, 1921, were £175,710, and liabilities, £357,584, largely loans. Surplus account shows a debit balance of £373,975. Reserve and sinking funds amount to £349,803.

Dividends: from 1864 to 1888 total £67 13s. 9d per share paid by the old company; from 1888 to 1918 inclusive, the preference shares received £8 19s. 3.8d; while the ordinary shares received £10 5s. 3d to January 1, 1918; none since. The grand total of dividends is £3,512,175.

Property: copper mines in Little Namaqualand, Cape Colony, lands including about 280 acres of freehold and a few lease-hold tracts. The first mines were opened, 1856, by Phillips & King, and were taken over, 1860, by the predecessor of this company. Also the Rakha Hills mines in India, the company's only active property.

Cape Colony Mines.

The Nababeep mine, 5 to 6 miles W. of O'okiep, opened 1890, including the Nababeep South, is developed by tunnels and a shaft. The Narrap mine, about a mile E. of the O'okiep East, with somewhat similar ore, has an aerial tram, electric hoist, and crusher. The Narrap South mine, opened to a depth of 120', is without important developments. The Spektakel, 28 miles W. of O'okiep, is an old mine with orebodies in both the granite and the basic intrusive rocks. The Carolusberg mine, 6 miles S. E. of O'okiep, opened by tunnel, and the Carolusberg East mine, about 2 miles further E.

Other properties include the Flat mine, 4 miles N. of Nababeep, which was reopened, 1907; the Koperberg mine, near the Carolusberg, 5 miles S. W. of O'okiep; and the abandoned Coetzee mine.

Recent (1916-1919 incl.) operations resulted in production of 162,113 tons of about 4% copper ore from Nababeep and 39,412 tons of high grade (11%) ore from O'okiep. At suspension of operations, there were 90,000 tons in reserve at Nababeep.

Equipment: includes electric power supplied by a central power station at the O'okiep mine, having 2 suction gas engines with an old steam plant held in reserve. Both the O'okiep and NababEEP properties have smelters and mills, though the O'okiep plant has been idle since 1912. The smelter turned out 48 to 50% matte, which was shipped to the Briton Ferry works for re-smelting and refining.

The company owns a 99-mile railway, with 16 miles of sidings, running from O'okiep to Port Nolloth, where there are docks, wharves, cranes, tugs and lighters for handling freight. Company also owns 4 tugs at Port Nolloth. A tram line connects the principal mines with the smelters.

All operations in Africa, save prospecting, were suspended in May, 1919, and so continued throughout 1920 and 1921. Drilling at Koperberg West and Carolusberg W. has indicated presence of ore of 4 to 5% copper content.

In addition to its mines in South Africa, company had a lease on the Terra Nova mine in Newfoundland, ore from which assayed 2.4% copper and 37% sulphur. Also, company has title to some claims in Alaska, which will be developed when a railway reaches the district. Work on 2 properties in Asia Minor has been suspended.

Rakha Hills Mine, India.

The Rakha Hills, or Rajaoka, property, at Surda, India, shows an extensive belt of cupriferous schist, with seams of copper ore of 2 to 6% tenor. Development aggregates 15,000', including the main shaft which is 1,440' deep. During 1910-12, a number of boreholes were drilled with a total of 9,700', proving the copper belt for nearly 1¼ miles. Reserves in August, 1921, were 329,151 tons of 3.60% ore, compared with 354,688 tons in 1920, carrying 3.66% copper. The average width of the lode is 42'.

In February 1920, a working option on 20 sq. miles of company's Indian holdings was granted to the Cordoba Copper Co., q. v.

Equipment: electric power, steel head-frame, hoists, compressors, shops, 300-ton flotation plant employing Minerals Separation units, blast-furnace, converter, refinery, assay office, and dwellings for staff and employees. Reduction plant has a monthly capacity of 250 tons of copper.

Production: from the mine was small in 1919-20. In 1920-21 it was 19,941 tons assaying 4.07% copper.

Briton Ferry Smelter.

The Briton Ferry smelter, which is the largest in Wales, in addition to treating the company's own ores, does a general custom business, smelting the ores of the Namaqua Copper Co., Ltd., under contract. The Briton Ferry works are on the Great Western and Rhondda railways, also having canal connection with Swansea, receiving ores mainly by rail. The works have revolving cylindrical calciners up to 80' in length, heated by gas, and four 70-ton blast furnaces, making matte. Ores are smelted, without calcining, in reverberatories to a 76% white metal, which is refined by the Nichols direct method, by which some of the white metal is calcined and mixed with uncalcined white metal, the consequent reaction eliminating the remaining sulphur. Tilt Cove sulphide ores are burned in kilns for their sulphur content, fumes going to an acid plant, which makes 30,000 tons of chamber acid yearly. The works include an electrolytic refinery, constructed in 1912.

Production: of fine copper from the African mines has been as follows: 8,960,000 lb. in 1901; 6,061,000 lb. in 1902; 10,371,200 lb. in 1903; 12,264,000 lb. in 1904; 11,256,000 lb. in 1905; 8,825,600 lb. in 1906; 9,475,200 lb. in 1907; 10,035,200 lb. in 1908; 10,404,800 lb. in 1909; 9,867,200 lb. in 1910. Later metal figures are not obtainable.

The record of the Cape Copper Co., Ltd. as a steady dividend payer, for 40 years past, is a remarkable one and the company issues full monthly reports to stockholders that are models, and could be imitated by other companies to the advantage of the investor.

and paying class, but delays in plant delivery, the unrest in India and the general business depression, have placed the company in an embarrassing financial position during the past few years.

DE BEERS CONSOLIDATED MINES, LTD. CAPE COLONY

Offices: E. F. Raynham, sec., Kimberley, Griqualand West, So. Africa; and 15 St. Swithin's Lane, London, E. C. 4, England. Sir C. Meyer, deputy chairman of board of directors; T. J. Ford, asst. sec.; J. Bruce and J. H. Bovenizer, secs., in London.

Officials: A. F. Williams, gen. mgr.; I. R. Grimmer, J. Harbottle and R. S. G. Stokes, asst. gen. mgrs.; J. Liddell, mech. engr.; R. W. Smith, elec. engr.; and D. W. Smith, diamond valuer and broker.

Inc. March 13, 1888, in Cape of Good Hope Province, with original capital of £100,000 to consolidate all of the diamond properties in the district.

Cap. £4,500,000; in 800,000 pfd. and 1,000,000 dfd; £2 10s. par; all issued. Transfer agt. for U. S. stockholders, Central-Union Trust Co.; registrar, Chase Natl. Bank; both New York. Listed on New York Stock Exchange.

Debentures: £1,750,000 at 4½%, redeemable January, 1930; £1,635,-495 outstanding.

Financial statement for year ended June 30, 1921, shows a revenue of £2,940,029, of which £228,522 was profit. Reserves consist of £700,000 general, £746,475 for debentures redemption, £1,719,186 for blue ground, £2,476,900 for stabilization of the diamond trade, and £450,000 to cover investments in other companies. Excess current assets were £497,229 and surplus £110,350.

Dividends: total many millions sterling, the amount in 1917-18 being £1,990,000 and £2,740,000 in 1918-19, or at the rate of 40% on preference and 80% on deferred shares; £740,000 on pfd. and £3,000,000 on defd. in 1919-20; £740,000 and £500,000 in 1920-21.

Property: 5 diamond mines at Kimberley, the Cape Explosives Works at Somerset West (output of 370,760 cases of dynamite in 1920-21); controlling interest in the Premier (Transvaal) Diamond Mining Co., and Koffyfontein Mines, Ltd., also the pre-emptive right to any diamond deposits discovered in the territories of the British South Africa Co. (Rhodesia) and South-West Africa Co., operating in former German territory.

The mines are near together in an area of about 5 miles square, 3 only being producers at present. The diamonds occur as separate crystals in a rock altered to blue clay, from which they are separated by washing.

Development: by 10 main shafts, deepest being 3,600' at the Kimberley mine. Reserves total 74,000,000 loads of 1,600 lb. each. Stocks of "blue ground" on surface amount to over 9,000,000 loads. Mud outbursts, or rushes and heavy flows of water are troublesome.

Equipment: complete and far too extensive to enumerate, but sufficient for extraction, hoisting, tramping, and treatment of 6,000,000 loads per annum, or 22,000 loads per day for a 300-day year.

During 1920 it was decided to discontinue the weathering system for disintegrating the diamondiferous ground, and substitute the crushing method, as practised at the Premier mine in the Transvaal. Gyrotory crushers of 40,000 loads per day capacity are now being erected, to be completed by mid-1922.

Production: in 1919 the quantity washed was 4,252,809 loads; 5,790,710 loads in 1919-20; and 2,333,773 loads in 1920-21 yielding from 0.16 to 0.35 carat per load, at a cost of 9s. 8d. to 11s. 10d. Value of diamonds found varied from 109 to 248s. per carat.

Operations were suspended Dec. 31, 1921, to await better market conditions.

NAMAQUA COPPER CO., LTD., THE CAPE COLONY

Head office: A. W. Outram, sec., 120 Fenchurch St., London E. C. 3, England. **Mine office:** James Garland, supt., Concordia, Namaqualand, Cape Province, South Africa.

Officers: William Rich, managing director; Thomas V. Anthony, Harry von Berg, H. Loeffler, directors.

Inc. April 23, 1888, in England. **Cap.** £200,000; £2 par; 94,331 issued and fully paid.

Financial Statement, years ending December 31:

Year	Revenue	Profit	Previous Balance	Dividends	Balance Forward
1920..	£ 8,376*	£ 4,839	£13,215+
1919..	£ 21,029	5,050*	211	4,839+
1918..	50,399	6,671*	6,882	211
1917..	173,242	13,055	16,241	6,882
1916..	249,111	78,407	£61,314	16,241

*Loss. +Debit balance.

Current assets at end of 1920 were £109,761, and liabilities, £37,596. Reserves were £90,000.

Dividends: since 1888 total 426% including 25% for 1916; none since. **Property:** over 700 acres, at Concordia, Little Namaqualand, including the Tweefontein, Wheel Julia, Henderson's Jubilee, Homeep, and Hester Maria mines in which copper occurs as bornite and chalcopyrite in a fine-grained, dark quartz gangue.

Development: in 1919 totaled 1,666', compared with 1,248' in 1918. Recent exploration at the Tweefontein mine has been rather disappointing, for while the eastern section showed much mineralized ground, it was of no commercial value. In 1919, results in western section of the Homeep mine were very satisfactory, but were much less so in the Jubilee.

Reserves are as follows:

Year	Ore, tons	Copper content, lb.	Tailings, tons	Copper, %
1920.....	63,203	10,059,840	85,800	3 to 6
1919.....	50,004	7,580,160	46,000	3 to 6
1918.....	37,655	4,903,336	46,000	3 to 5.5
1917.....	40,563	5,304,320	49,500	3 to 5.5
1916.....	51,264	6,630,000	59,000	3 to 5.0

Equipment: includes complete mining and sorting plants, concentrator with flotation unit, briquetting plant, precipitating tanks, a railway and power-plant. At the smelter a converter plant was installed, 1921.

Production: was 3,763,200 lb. of copper from 32,958 tons of charge smelted in 1916; and 3,064,320 lb. from 21,355 tons in 1917. In 1918, 1,242,371 lb. of copper was produced in the form of regulus and precipitate; in 1919, 231,571 lb. as precipitate only; and in 1920, 235,200 lb. as precipitate.

Smelting operations were suspended in May, 1918, owing to abnormal conditions, but the precipitating plant is kept going and development continues.

. 500 par, and 16,000 common without par value; all of each class owned by the Colonial Government.

Dec. 31, 1919 shows total assets Fr. 28,322,276, of which are fixed, Fr. 9,559,893 cash and Fr. 11,624,883 other include reserves Fr. 93,895 and accounts payable Fr. 1,212,595. Total was Fr. 5,118,457, which after deductions, including Fr. 1,212,595, left a balance forward of Fr. 72,265. Gross revenue of which Fr. 3,250,121 came from sale of diamonds, and as Fr. 593,626.

Concession in southwestern part of Belgian Congo covered 100,000 ha. The tract shows beds of sandstone, shales and at overlie schists, granites and gneisses. The diamonds occur in conglomerates and also as alluvial deposits. At present the only one being exploited, 10 different placers being worked by hand panning and jig concentration. The stones average about 0.10 carats, the largest thus far found being 32 carats. At end of 1919, 372 natives were employed.

NIKA CONCESSIONS, LTD.

CONGO

L. Scotland, mgr.-sec., Friars House, New Broad St., London, England. Mine office: Kambove, Katanga, Belgian Congo; and Northwestern Rhodesia

Directors: Tyndale White, chm., Earl Grey, Theo. P. Heyvaert, Thos. C. Hutchinson, Sheffield Neave, Marquess of Ormonde, Chas. Pell and Sir C. L. Budd. Robt. Williams, mng. dir. Managers and Robt. Williams & Co., F. E. Sudt, A. A. Thomson, and R. W. D. S. Carnahan, mining engineer.

Jan. 20, 1899, in Great Britain. Cap. £2,200,000; par £1; 2,189,000 shares issued. Original capitalization was £100,000, successively increased to £184,000, in 1902 to £194,000, in 1903 to £264,000, in April, 1905 to £450,000, in July, 1905, to £525,000, in November, 1906 to £1,000,000 and in December, 1919, to £2,200,000, to retire debentures,

Debentures: redeemable Jan. 1, 1917, and extended as provided by Proclamation until after the war, have been retired except for £514,-

Tanganyika owns (Jan., 1921) a 47.12% share interest in the Union Minière du Haut Katanga (amounting to 59,800 shares of 100 francs par share and 58,000 dividend shares); 70% of the issued stock of the Rhodesia-Katanga Junction Railway & Mineral Co., Ltd. (amounting to 494,814 ordinary shares, 64,450 B s. shares), the Kansanshi copper mine having been sold to this company; 1,600 shares of 250 francs par in the Compagnie du Chemin de Fer du Katanga; £2,700,000 stock of Companhia do Caminho de Ferro de Benguela; 2,297 shares of £4 each of the Intertropical Anglo-Belgian Trading Co., and £5,000 of the 3% debentures of the Rhodesia Railways, Ltd. Late in 1920, company acquired 10,000 shares in the Nile-Congo Divide Syn. (q. v.) with option on 5,000 shares additional.

Tanganyika has an arrangement with the Zambesia Exploring Co., Ltd., by which the latter is ready to finance the former until it is indepen-

dent. The Zambesia Co. has practically the same officers as Tanganyika, and floated the latter, and owns 214,674 of its shares.

During 1918, revenue was £538,978, including £521,354 received as dividends paid by Union Miniere du Haut Katanga. Of this amount £352,800 was credited to profit and loss in 1917, so that 1918 is only credited with £168,554. After paying interest, etc., balance forward to 1919 was £10,683, making a surplus of £214,898.

For 18 months ended June 30, 1920, revenue was £135,744 including £86,726 received from Union Miniere as dividend. The balance was £89,667 and surplus £304,565. Excess current assets were £991,922.

Property: Tanganyika was formed to acquire from the British South Africa Co. a 2,000 sq. mile concession in Northern Rhodesia for a terminal and town-site of the Cape to Cario railway at the S. end of Lake Tanganyika; a 2-year exclusive right to prospect and locate for minerals in an area of 2,000 sq. miles N. of the Zambesi river, and to locate 1,000 claims in British South African territory. For these concessions the company gave £60,000 in fully paid shares, besides which the B. S. A. Co. retains a 35% interest in all mines. Having made important discoveries and located various mines in the borderland of the Belgian Congo, the Tanganyika sought and obtained another mineral concession, covering 60,000 sq. miles of the Belgian Congo region, known as the Katanga, and adjacent to the Rhodesian properties of the company. The Special Committee of Katanga reserved 60% of the net profits, and received £30,000 in fully paid shares. An extension of this concession and an interest in the Benguela railway later increased to 90%, was acquired in July, 1902, for £10,000 in fully paid shares.

The mineral discoveries in the Belgian Congo cover a copper belt 200 miles long with over 100 known copper deposits; also a tin belt, 100 miles long, with workable deposits, also gold and iron mines and diamondiferous areas.

Tanganyika has sold its holdings to subsidiary companies controlled by it, and thus becomes a parent holding company only. In the Belgian Congo, 72 large mining concessions were located, the company engineers estimating in 1908, that 5 of these claims showed 9,500,000 tons of 6.3 to 14% copper ore, most of which could be extracted by open-cut; while on another group the company estimated 1,600,000 tons of 13% copper tenor.

The copper interests of the Tanganyika Concessions, Ltd., consist at present of the holdings mentioned above in the Union Miniere du Haut Katanga (which see), the Rhodesia Katanga Junction Railway & Mineral Co., Ltd. (Kansanshi), and the Benguela Railway.

UNION MINIERE DU HAUT KATANGA

CONGO

Office: 3 Rue de la Chancellerie, Brussels, Belgium. **U. S. office:** care A. E. Wheeler, cons. engr., 25 Broadway, New York. Works at Elizabethville, Katanga, Belgian Congo, Africa.

Officers: Jean Jadot, pres.; Robt. Williams, v. p.; Baron de Moor, managing director; Geo. Velge, sec.; P. K. Horner, gen. mgr.; Edgar Sergier, technical mgr.

Inc. Oct. 28, 1906, in Congo Free State. **Cap.** Fr. 15,000,000; Fr. 100 par; all issued; increased from Fr. 12,500,000, Nov. 1920, to which it was increased May 1912, from Fr. 10,000,000. There are also 150,000 dividend shares without par value. **Debentures:** Fr. 20,000,000 at 4½% and Fr. 40,000,000 at 7% authorized Nov. 4, 1920. Holders of the 4½% had right to exchange for 7s at par. Company is controlled by Tanganyika Concessions, Ltd. (47.12% holding), and Societe Generale de Belgique. Annual meeting, second Monday in July.

Balance sheet of Dec. 31, 1919, shows assets Fr. 203,208,693, including reliable assets Fr. 104,284,579 and cash Fr. 1,511,319. Liabilities include current Fr. 85,439,567, reserves Fr. 5,229,364, share premium Fr. 7,500,000.

Fr. 59,161.321. Credit balance was Fr. 13,429,441, of which \$1,000,000 is allotted to reserves.

The initial one of 150 francs per share was paid Dec. 31, 1918. The accumulated profits of 5 years; and 50 francs per share in 1920, for the year 1919.

The company has a mining concession covering a copper belt of 100 miles long, containing upwards of 100 copper outcrops; and a tin belt of 100 miles long. Both concessions are situated in the southern part of Katanga, Belgian Congo, bounded on the south and east by the Rhodesia and on the west by Portuguese West Africa, and on the north from a seaport. The mines are widely separated, the Kambove and the Congo being 100 miles apart. Company also owns other mineral rights and other mineral rights, including iron.

The deposits and mines owned by the Union Miniere were discovered by prospectors employed by Tanganyika Co., under terms of the concession granted by the Comite Special du Katanga. These deposits are scattered along a practically uninterrupted belt of country extending from the S. E. corner of the Katanga region to the W. bank of the Congo river, a distance of 180 miles in a N. W. and S. E. direction. The copper belt consists of a region of rounded hills and valleys, 4,000 to 5,000' above sea level, the copper areas being composed of copper salts. The copper ores occur in sandstones and in limestones, and limestone, the beds running W.-N.W., and dipping steeply to the east, are oxidized, malachite being the most abundant mineral as well as chrysocolla and azurite, while melaconite is found mixed with malachite. There are also bodies that vary from small deposits up to mammoth deposits such as Kambove No. 2, said to be 3,000' long, 240 to 400' wide.

The principal mines, in the order of their present ore reserves, are the Kambove, Likasi, Star and Chituru. The Kambove is the largest and most important copper mine owned by the Union Miniere. A 2-compartment haulage tunnel has been driven from the surface through the deposit for 1,500' half through pay ore. The tunnel is equipped with rope haulage and a double track. Ore is quarried and milled in the shafts, and hauled out through the tunnel. Management estimates 3,000,000 tons of 13.4% copper ore in sight above the tunnel-level. A similar quantity of probable ore 100' below. The Kambove is situated 100 miles from the seaport of Beira, by rail.

The Star was the first to be developed. The deposit is mined by open-pit methods, the broken ore being milled through winzes to levels below and hauled up to the main tunnel to the surface. The Luiswichi and Luusha mines, situated 100 miles from the Star, have been developed and the Fungurume is being developed.

On all the other deposits forming the copper belt varying amounts of prospecting and development have formed the basis of estimates, some of which are as high as 300,000,000 tons of copper ore in sight, over the whole copper belt.

The Union Miniere company estimates 40,000,000 tons of 8% ore above tunnel-level in all the Katanga mines.

The tin belt, 175 miles long, of the Miniere is an area in the Katanga, near Bukama on the navigable Lualaba-Congo route from the West Coast, and 210 miles from Kambove, with which place it is connected by rail.

The Busanga tin mine was reopened in 1916 and is now worked under contract. Reserves are 10,000 tons of 1% cassiterite. First shipment of 10% concentrate was made early in 1920. A special organization is to take over the tin holdings.

The Kansanshi mine, transferred in 1909 to the company's subsidiary, the Rhodesia-Katanga Junction Railway and Mineral Co., Ltd., lies at an elevation of 5,000', 12 miles S. of the Congo-Zambesi divide, which forms the boundary between Rhodesia and the Belgian Congo. The Property

THE MINES HANDBOOK, 1922

extensive remains of ancient open-cut workings, there being trenches for a distance of 6,000', which form 6 chains or lines of workings, in the pits vary from 1 to 30' in width, 5 to 30' in depth and 300 to 1,300' h.

Kansanshi copper deposits consist of beds, 1 to 10' thick, of sand-impregnated with copper and resting on limestone and schist. The ore is micaceous and fissile in places and more or less charged with fine particles and flakes, the upper beds carrying malachite and chrysochalcite with occasional occurrences of azurite and melaconite, and some with silicious gangue, and some manganese dioxide in the superstratums. The gangue carries a little limonite, usually ochrous. Surveys are said by John R. Farrell of San Francisco to show no evidence of alteration of sulphides in place, the facts leading to the opinion that the malachite was deposited from hot solutions, especially in fissures. The ore is highly silicious.

The main ore bed, known as D reef, averages 8 to 10' thick, with 5 to 10' of sandstone impregnated with malachite on each wall of the vein; the ore as mined is said to average 18.7% copper with \$2 gold per long ton. The ores, with bornite and chalcopryrite associated with pyrite, show deeper workings, but the depth of the oxidized zone has not as yet been determined.

Equipment: includes 7 blast furnaces of 1,000 tons daily charge capacity at Lubumbashi, near Elizabethville. A leaching plant to produce 1,000 lb. of copper annually from tailings, a 4,000 ton concentrator at Lubumbashi, and a 60,000-h. p. hydro-electric plant are being erected, total cost of which will be Fr. 135,000,000. Coke is supplied to the Wankie in Rhodesia, 725 miles distant by rail. There is a battery of 44 cells capable of making 2,400 tons of coke monthly. White employees 1,800, native 12,000.

Production, years ending December 31:

	Copper Long Tons	Year	Copper Long Tons
(to 30 mos.).....	16,262	1915.....	14,054
.....	23,028	1914.....	10,722
.....	20,237	1913.....	7,407
.....	27,463	1912.....	2,492
.....	22,149	1911.....	997

The ultimate output anticipated is 40,000 tons (89,600,000 lbs.) per annum.

The Union Miniere is still in the transition stage. It is erecting enormous plants, and is saddled with a large debt, but it is producing a lot of copper and making a good profit.

EGYPT

AMIA MINING & EXPLOR., LTD., THE EGYPT
 (Incorporated in Egypt). All work ceased Sept. 1919; entire plant was sold leaving net assets of £6,966, including £6,000 of 6% debentures. W. F. Garland, 10, St. Place, London, E. C. 4, England, appointed liquidator on March 19, 1920.

EGYPT

Sec. S. Blake, sec., Throgmorton House, 15 Copthall Ave., London,
England.

Directors: H. A. Stanhope, chm., A. E. Radford and W. M. Steward.
Incorporated Nov. 18, 1911. Cap. £200,000; 4s. par; 554,576 issued, fully paid.
Incorporated in 1920 from Star of Egypt, Ltd.

Annual financial statement, Dec. 31, 1920, shows liquid assets £24,138, lia-
bilities £1,968.

Property: a lease on the 200 acre Um Garaiart tract, in Upper Egypt,
near the Nile river and the Red Sea, taken over in 1915 from Nile Val-
ley Mng. Co. Gold-bearing quartz veins, 8 to 30" wide, have been de-
veloped by 200' shaft; value is apparently from 0.25 to 0.75 oz. gold per
ton. Mine is equipped with a 10-stamp mill. Company has interests also
in other mining enterprises.

THE GOLD FIELD CO., LTD.

EGYPT

Office: 6 Queen St. Place, London, E. C. 4, England.

Directors: Lord Vaux of Harrowden, chm., Robt. and Edgar Taylor,
and F. Garland. John Taylor & Sons, mgrs.

Incorporated in Great Britain. Dec. 2, 1908. Cap. £150,000; 10s par; 127,749

Annual revenue account for 1919 shows a loss of £12,746, with debit balance
of £40,781 after depreciation; in 1920 there was a loss of £1,418 making
total debit balance £42,199. Excess of current assets Jan. 1, 1920, was £22,
including salvage value of plant; on Jan. 1, 1921, it was £21,729.
Dividends: 10% in 1914, 1915 and 1916; nothing since.

Property: the concession covering gold-bearing ground at Om Nabardi,
in the Sudan, has been relinquished, operations being discontinued Sept. 1,
1919, and machinery, etc. sold.

Production: 33,300 tons, yielding 15,598 oz. gold in 1917, and 20,880
tons, giving 12,419 oz. in 1918. Value of 1919 output (8 mos.) was £22,445.

Company has acquired a prospecting license over auriferous country
in Southern Sudan and one covering the Dul district, Abyssinia. Also, an
interest has been taken in the Anatolia-Serdjiller Syn., of Asia Minor,
which see.

WADY OYO (SUDAN) GOLD MNG. SYN., LTD.**EGYPT**

Inc. Jan. 27, 1920. Cap. £20,000; par 5s; 41,500 fully paid shares issued.

Property: a 415 acre concession in the Red Sea province, Sudan.

NIGERIA**AMALGAMATED TIN PROPERTIES OF NIGERIA, LTD. NIGERIA**

Office: G. D. Cahill, sec., 8 Adam St., Adelphi, London, W. C. 2, England. Directors: C. Wallington, chm. and mng. director, and A. Purchase.

Inc. June 7, 1912. Cap. £200,000; par 10s; 301,220 shares issued. Current liabilities over assets were £300 on Oct. 31, 1919.

Property: prospecting licenses over tin placer ground in Northern Nigeria.

ANGLO-CONTINENTAL MINES CO., LTD.**NIGERIA**

Office: A. W. Berry, sec., 22 Austin Friars, London, E. C. 2, England.

Directors: W. F. Turner, chm., et al.

Inc. Dec. 23, 1909. Cap. £155,000; 10s par; 310,000 fully paid shares issued. Company holds a controlling stock interest in the **Mongu Tin Mines**.

Financial statement, Dec. 31, 1920, shows: credit balance of £33,249, which after deductions gave a surplus of £13,835. Liquid assets were £191,321, and liabilities £3,572.

Dividends: from 1910 (initial) to 1913 were 55%; none in 1914; 1915 to 1918, 45%; 17½% in 1919; 10% in 1920, paid in May 1921.

Property: tin bearing placer ground in Nigeria. Beginning with 1919, company acquired, or had applied for, 6 different new areas on the Bauchi plateau in Northern Nigeria and have concentrated work on prospecting these properties. They include the Anglo-Jos area, 3 sq. miles which adjoin that of Jantar company, 3 miles from Jos; the West Areas near Northern Nigeria company's holdings; the Boguru embracing 7½ sq. miles; and the Moguna containing 5 distinct tracts aggregating 31 sq. miles, with 1,300 tons of recoverable tin concentrate, or 1 lb to the yd., and also available water power up to 5,500-h. p. During 1919-20, a 32-sq. mile group in the Ropp district was sold to the Mongu company.

Production: 271 tons of black tin in 1917; 207 tons in 1918; 148 tons in 1919; all from company's original holdings.

Considerable money was spent in exploring the new holdings during 1920, but because of the low price of tin, all work was stopped except at Angle Jos, on which gravel containing 750 tons of tin concentrate has been proven.

ASSOCIATED NIGERIAN TIN MINES, LTD.**NIGERIA**

In liquidation, beginning June, 1921; holdings and other assets sold to **Keffi Cons. Tin Co.** (q. v.), on a share for share basis. G. E. Bance, liquidator, Capel House, New Broad St., E. C. 2, and A. H. Dwight, 32 Sackville St., London, W. 1, England.

BALLARAT GOLD FIELDS, LTD.**NIGERIA**

Office: R. H. Purver, sec., 80 Coleman St., London, E. C. 2, England. Directors: A. F. W. Johnson, J. C. Kent and J. B. Prince.

Inc. Oct 5, 1895. Cap. £75,000; par 5s; 253,888 fully paid shares issued. On Oct. 31, 1921, current liabilities exceeded assets by £1,230.

Property: tin-bearing ground in Nigeria acquired in 1920. The Rosalind Gold Mines near Ballarat, Victoria, Australia, have been abandoned.

BENUE (NORTHERN NIGERIA) TIN MINES, LTD. NIGERIA

Office: H. St. J. Hodges, sec., 20 Conthall Ave., London, E. C. 2, England. C. E. Pearson, chm. of directors; Pawlet & Brelick, cons. engrs.

Cap. £30,000; 10s par; all issued fully paid. For 1920, there was a loss of £1,791. Current assets over 15; tin on hand was £2,493 and inventory £1,313. Company owns an interest in Premier Hydraulic Tin

1915-16; 2s in 1916-17; 2s 6d in 1917-18; 1s in 1918-19;

-bearing placer leases, 729 acres, in Zaria province.

RIA) TIN FIELDS, LTD.

NIGERIA

Lulley, act. sec., Friars House, 39 New Broad St., London. Directors: A. Armitage, F. N. Best, and Sir G. C.

, 1912. **Cap. £185,000;** par £1; 175,000 shares issued. Tin Fields and Lucky Chance Mines were responsible for Berrida and have substantial stock interest in it. Dec. 30, 7s due Jan. 1, 1927. Total expenditure in all under-£4,496 up to June 30, 1919.

Alluvial tin-bearing ground in the Tokos and Wada districts, 200 acres on the Delimi river (229 acres), in Nigeria. Also, 100 acres, near Redruth, Cornwall, England, which shows tin-ore and is equipped with a 30-stamp mill. Treatment of ore begun late in 1919. The Poldice was not operating 1921-22.

N. CO. (NIGERIA), LTD., THE

NIGERIA

J. W. Evans, sec., 33 Cornhill, London, E. C. 3, England.

Director, chairman of board of directors; A. W. Hooke, gen. mgr. Dec. 13, 1910, in Great Britain. **Cap. £500,000;** par 10s; increased from £200,000, par £1; 744,078 shares issued.

In 1919 was £20,139, and surplus £25,524. Excess of current £17,444. Tin on hand was £28,212 and inventory £3,780. In 1920 was a loss of £4,467; current assets including investments and liabilities were £43,013, and liabilities £26,638. Surplus Dec. 31, 1920 was £17,444. Dividends: totaled 65½% to January 1920.

Property: 6,743 acres of leases, about 6 miles of mining rights and 700 acres of prospecting licenses in Bauchi, Ninghi, Bukuru and other districts in Bauchi province, embracing tin-bearing ground. During 1921, department was most encouraging, 3,266,740 cu. yd. of alluvium having been won, which can carry 3 lb. of tin per yd. Reserves as of Oct. 31, 1921, were 1,000 tons of concentrate. Company also owns certain mining rights on the Poldice mine in Cornwall, England. Equipped with pipe-lines, 700 ft. and 5 elevators.

Production: 278 tons of 70% tin concentrate in 1917; 275 tons in 1918; 251 in 1919; 251 in 1920; 412 in 1921.

Dec. 1920, a consolidation was effected by which entire assets and liabilities of the Forum River Tin Co., Ninghi Tin Co., and The Northern Nigeria Trust were taken over by Bisichi, these companies receiving for disbursement among their shareholders, 142,550, 110,928 and 90,600 Bisichi shares, respectively.

NGWELLI (NIGERIA) TIN SYN., LTD.

NIGERIA

Office: F. J. Wheeler, sec., 24 Coleman St., London, E. C. 2, England. Directors: Sir R. Pole-Carew, A. W. Kitson and T. L. Field, managing.

Inc. Feb. 12, 1913. **Cap. £62,500;** par 5s; all issued. Increased twice to £125,000 figure during 1918 to permit of acquisition of new properties.

Financial statement for 4 years ended July 31, 1918, showed a loss of £2,035 and debit balance £6,534. Liquid assets, including tin on hand were £4,418.

Property: tin lands at Bongwelli on Delimi river, Northern Nigeria, 40

miles from Naraguta. Holdings aggregate 25 sq. miles with additional area at Chow and Dadahowa under lease.

Production: 1918 to 1920 was 96 tons of concentrate.

BRITISH WEST AFRICAN TRADING CO., LTD.

NIGERIA

In liquidation beginning Feb. 1921. Official Receiver, 33 Carey St., London, W. C. 2, England, liquidator. Formerly **Tin Areas of Nigeria, Ltd.**, name changed Aug. 1920.

CHAMPION (NIGERIA) TIN FIELDS, LTD.

NIGERIA

Office: A. J. Cullley, sec., Friars House, New Broad St., London, E. C. 2, England. Sir Geo. C. Denton, chm. of directors; R. W. Hannam, cons. engr., in Nigeria.

Inc. May 3, 1919. Cap. £50,000; 5s par; all issued. Company has been responsible for the promotion of other tin mining companies, including, Lucky Chance Mines in which it holds a $\frac{2}{3}$ stock interest, and with which it acted jointly in forming Berrida Tin Fields. Report of June 30, 1921, shows a loss of £11,958; cash and accounts receivable was £15,944 and accounts payable £6,654. There was a debit balance of £6,292.

Property: 6 sq. miles of tin areas under license and several mining rights. Company controls also gold areas in Minna district, including the Shop reef, which is said to have promise. Operations on the tin-bearing ground was suspended Jan. 1921, but the gold holdings continue to be prospected.

DALOWEN NIGERIAN TIN SYN., LTD.

NIGERIA

Office: J. O. Ketttridge, sec., 10 New Broad, St., London, E. C. 2, England. W. Owen, director.

Inc. April 17, 1920. Cap. £20,000; £1 par; increased Nov. 1920, from £5,000; 5,000 shares issued.

Property: mineral holdings at Lymn, Tafa Belewa, and elsewhere in Northern Nigeria.

DAMO (NIGERIA) TIN CO., LTD.

NIGERIA

Office: P. S. Fitzer, sec., Blomfield House, 85 London Wall, London, E. C. 2, England.

Directors: C. G. Lush, chm. and J. Waddington.

Inc. Feb. 20, 1912. Cap. £50,000; par £1; 45,007 shares issued. Net expenditures to Sept. 30, 1920, were £10,588; current liabilities exceeded assets by £1,581.

Property: the Upper and Lower Shirkatoo tin-bearing leases, 308 acres, and Atumba and Bumbatoo leases, 606 acres, in Kano district, Northern Nigeria. The Ida H. Mng. Co. has contracted to operate the ground, paying Damo $\frac{1}{3}$ of net profit.

DOGONDAJI MNG. CO., LTD.

NIGERIA

Office: E. Dovey, sec., 646 Salisbury House, London Wall, London, E. C. 2, England. Mine office: W. A. Pope, mgr., Jos, Nigeria, Africa.

Inc. Nov. 10, 1913. **Cap.** £25,000, increased from £20,000 in Dec., 1920; par 5s; 63,000 shares issued, of which Kaduna Syn. owns nearly one-half. Company joined with Kaduna Syn. (q. v.) in a £30,000 note issue. There was a net loss in 1920 of £750, and debit balance of £327 written off from reserve. **Dividends:** 30% in 1918-19; no other.

Property: leases and rights on tin-bearing ground in Dress and

With Kaduna Syn. and Naraguta Tin Mines, taken an interest in a tin smelter at Falmouth.

KADUNA SYNDICATE, LTD.

NIGERIA

Same address as Kaduna Prospectors, which see; and same officers, with Lake & Currie, cons. engrs., additional.

Inc. Aug. 5, 1910. **Cap.** £40,000 increased Dec. 1920, from £30,000; par 5s.; 111,200 shares issued. **Notes:** £30,000 10s. due Oct. 31, 1930, issued jointly with Kaduna Prospectors, each £50 note carrying a certificate entitling holder to 40 shares of each company at 12s. 6d per share. Company holds a 29,000 share interest in Kaduna Prospectors.

There was a loss of £483 for year ended Oct. 31, 1920; including investments, stocks and stores, realizable assets were £39,240; liabilities £5,204, with reserve of £7,500; and surplus £4,883.

Dividends: from 1912 to 1918 were 270%; 35% in 1919; 10% in 1920.

Property: 1,730 acres of alluvial tin ground, held under lease together with certain mining rights and licenses. Operations are conducted by sluicing.

Production: 180 tons tin concentrates in 1917-18; 205 in 1918-19; 169 in 1919-20; 170 in 1920-21.

Company joined Naraguta Tin Mines and Kaduna Prospectors in acquiring a tin smelter at Falmouth, in 1920-21.

KASSA MINING CO., LTD.

NIGERIA

Controlled by Mawchi Mines, Ltd., of Burma.

Office: J. A. Henderson, 2 Broad St. Place, London, E. C. 2, England
Mine office: Kassa, Jos, Nigeria. W. B. Dick, chm. of directors.

Inc. July 5, 1919. **Cap.** £80,000; par 5s.; 280,000 shares issued, of which Mawchi Mines owns 157,193 and Niger Co. 120,000, shares. On June 30, 1920, there was a debit balance of £3,126; excess current assets was £2,277.

Property: a license on 11 sq. miles of tin-bearing ground on North Ropp river, between Ropp and Bukuru, Northern Nigeria, adjoins the Kassa-Ropp holdings. Idle.

KASSA ROPP TIN CO., LTD.

NIGERIA

Office: G. E. Bance, sec., Capel House, New Broad St., London, E. C. 2, England. O. Wethered, chm. of directors.

Inc. April 25, 1917. **Cap.** £40,000; par 10s.; all issued. For year ended June 30, 1919, profit was £6,743. Cash and accounts receivable were £12,665 and accounts payable £7,070. The surplus was £8,607.

Dividends: 10% in 1917-18; 15% in 1918-19; 10% in 1919-20 to March, plus right to one Kuru Syn. share for each 8 Kassa-Ropp shares held. The former now forms a part of Jantar Nigeria Co.

Property: originally held, sold Aug., 1919, to Associated Nigerian Tin Mines, for 200,000 shares; latter in turn has transferred holdings to Keffi Cons. Tin Co., which see. Company is to acquire new areas.

KEFFI CONS. TIN CO., LTD.

NIGERIA

Office: A. H. Dwight, sec., 32 Sackville St., London, W. 1, England. G. T. Broadbridge, chm. of directors.

Inc. Nov. 13, 1920, as a consolidation of the Keffi Tin with other companies; in 1921, the Associated Nigerian Tin Mines was also amalgamated. **Cap.** £775,000, increased May, 1921, from £500,000; par 5s.; 2,667,004 shares issued, of which 15,356 are only one-fifth paid.

Property: alluvial tin deposits in Jemaa and South Ropp districts and on the Bauchi plateau, Northern Nigeria, consisting of 57 sq. miles under license and 2,705 acres under lease. Estimates of reserves give 3,400 tons of recoverable black tin on the Keffi area and 4,200 tons on the Kassa-Ropp area. Equipped with hydraulic plant.

Production: has been curtailed and averaged about 20 tons of concentrate per month in 1921.

Cons. Tin Co.

KURU SOUTH, LTD.

Office: W. Pocock, asst. sec., 18 St. Swithin's Lane, London, E. C. 4, England. **Directors:** F. Allen, F. P. Lousada and P. C. Tarbutt.

Inc. Oct. 23, 1919. **Cap.** £60,000; par 5s; 120,000 shares issued. **Cash.** investment and debtors were £19,588 on Dec. 31, 1920; creditors £356.

Because of low tin prices, company in Dec., 1920, sold its mineral holdings to the Jantar Nigeria Co. (q. v.) for 120,000 Jantar shares; later purchased 60,000 additional shares.

KURU SYNDICATE, LTD.

Dead. Amalgamated in Dec., 1920, with **Jantar Nigeria Co., Ltd.**, which see.

LAFON RIVER TIN AREAS (NIGERIA), LTD.

Office: W. W. Evans, sec., 33 Cornhill, London, E. C. 3, England.

Directors: J. Gardiner, chm. and A. H. Young. **Laws,** Rumbold & Co., mgrs.

Inc. Dec. 7, 1911. **Cap.** £50,000; £1 par; all issued. No financial statement since 1918 when current liabilities exceeded assets by £574.

Property: a license on 13 sq. miles of tin-bearing areas on Lafon river. **Bauchi** plateau, Northern Nigeria, 20 miles from Jos. Also leases on 427 acres and some 5 miles of rights.

LOWER BISICHI (NIGERIA) TIN MINES, LTD.

 F. G. C. E. Robellaz (managing.)

Inc. Sept. 11, 1911, in Great Britain. **Cap.** £250,000 in 235,000 ord.
 res of £1 and 150,000 dfd. shares of 2s. par, all issued. Profit for 1920

£4,571, with a debit balance carried forward of £20,430. Current
 ets including mineral were £14,884 and liabilities £32,876. Reserves
 e £35,637.

Property: 614 lode and 75 alluvial claims in Manica district. The Bra-
 nza, a lode mine is closed down but a dredge operating on the placer
 und recovered 19,698 oz. of gold from February, 1914, to December,
 15, making a profit of £45,234.

Production: in recent years was £19,591 gold from 338,757 cu. meters
 1919 (5 mos.); £40,107 gold in 1920.

ZAMBIQUE CO. (COMPANHIA DE MOCAMBIQUE) P. E. A.

Office: M. Vinet, London sec., Thames House, Queen St. Place, E. C.
 gland. **Head office:** 10 Largo da Biblioteca Publica, Lisbon, Portugal.

Inc. March 8, 1888, given Royal Charter, Feb. 11, 1891, and reconstit-
 ed May 5, 1892. **Cap.** £1,500,000; £1 par; all issued.

Dividends: 7½% in 1898; 5% in 1911; 5% in 1913; 5% in 1919.

The company, which possesses sovereign rights over an area of 65,000
 miles, is also the owner of all unalienated land and mining rights in this
 a, which embraces the central and richest portion of Portuguese East
 rica.

The Manicaland goldfield or mining district lies within a radius of 16
 les around Macequece. Geologically speaking the field is part of the
 ntali mining field of Rhodesia. It is a belt of schistose rocks traversed
 gold-bearing quartz veins, the gold also being occasionally found in the
 ist wall rock. Dredging for alluvial gold is benign successfully carried on.
 Copper ores also exist in the district, the Edmundian mine being in this
 ality.

Company issues for £1 a mining license that gives the holder a right
 prospect for 12 months. Each license gives the right to peg-off (stake)

and about 1,000 meters for non-metallic minerals. Claim rents, corresponding to claim licenses in Rhodesia and the Transvaal, are 10 shillings per claim in the second year, increasing 50% yearly to a maximum of £3. Rent for a non-metallic claim is £5.11 the second year, doubling each year thereafter up to £55.11 per claim annually. Royalties payable to Companhia de Mocambique for gold are on a sliding scale on the gross output, in the case of monthly outputs up to 800 oz. of fine gold, and vary from 1 to 4%. Above 800 oz. gold output the royalty is 10% of the net profits. For all other metals and non-metallic substances the royalty is 10% of the net profit.

Activities for year 1920 resulted in a profit of £15,710, and a surplus of £63,794 after deducting taxes and depreciation. Reserves were £28,816. Value of gold output was £40,031, compared with £20,610 in 1919. The Edmundian produced 132 tons of copper.

ZAMBESIA CO. (COMPANHIA DA ZAMBEZIA) PORTUGUESE E. A.

Office: 53, Rua do Alecrim, Lisbon, Portugal.

Company was incorporated in 1892 and holds a long term concession on about 155,000 sq. miles on either side of Zambesi and Shire rivers. The mining rights are in the hands of the Zambesia Mng. Devel. Co., which see.

ZAMBESIA MNG. DEVEL., LTD. PORTUGUESE E. AFRICA

Offices: J. L. Alexander, sec., 2 Thames House, Queen St. Place, London, E. C. 4, England; 7, Rue Chauchat, Paris, France; 45, Rua do Alecrim, Lisbon, Portugal. Mine address: V. A. Rorbotham, Tete, Portuguese East Africa.

Sir Alfred Sharpe, chm., L. E. J. A. Oury, managing director, and 5 other directors.

Inc. Dec. 21, 1911 in England. **Cap.** £252,000, divided into 240,000 £1 ordinary and 240,000 ls. deferred shares; 132,000 ordinary and all deferred are issued.

Company has under concession the sole mining rights on about 35,000 sq. miles of territory, covering the Zambesi river and tributaries and adjoining holdings of Mozambique Co. on the N., taken over from the Zambesia Co., which received 36,200 Zambesia M. D. ordinary shares, some cash, and is to get 20% of annual receipts. Engineers were engaged in 1921 in a thorough examination of the mineral possibilities of the tract.

RHODESIA

ANTELOPE GOLD MINE (RHODESIA), LTD.

In liquidation from Jan. 6, 1920; W. F. Moore, liquidator, 8 Old Jewry, London, E. C. 2, England.

BRITISH SOUTH AFRICA CO., THE

RHODESIA

Head office: A. P. Millar, sec., 2 London Wall Bldgs., London, E. C., England. Administrator of Southern and Northern Rhodesia: Sir D. Chaplin, Salisbury, Rhodesia, Africa; F. B. Philip, sec. at Cape Town, So. Africa.

Board of Directors: P. Lyttelton Gell, pres., R. Maguire, Hon. Sir L. Michell, Sir H. Birchenough, Marquess of Winchester, Otto Beit, H. W. Fox, Baron E. B. D'Erlanger, D. O. Malcolm, Br.-Gen. E. Baring, Duke of Abercorn and Major P. S. Inskipp.

Inc. Oct. 29, 1889. **Cap.** £9,000,000; par £1; having been increased at intervals from £1,000,000 in 1890; 8,937,533 shares are issued and fully paid.

Bonds: £1,250,000 5% mortgage debentures due by extension, August, 1835.

For year ended March 31, 1920, revenue exceeded expenses by £166,899, with total credit of £949,819. Liquid assets one year later were £1,570,000.

Lands: about 440,000 sq. miles. The company was organized to acquire (a) the Rudd-Rhodes Concession from the Central Search Ass'n. This

cession covers the mining rights over the territory of the King of Mate-land; the C. S. Ass'n being entitled to one-moiety of the net receipts over the territory of the chiefs Khama and Gungunhana; (c) admin- by the issue of 1,000,000 fully paid shares of the company; (b) mining s over the territory of the chiefs Khama and Gungunhana; (c) admin- utive power over the whole British sphere north of Zambesi river and of Nyasaland; (d) rights of the African Lakes Co. (acquired in 1894); (e) through the Victoria Falls Power Co., in which this company holds ge interest, the right to develop electrical energy at Victoria Falls.

The company adopted the name "Rhodesia" to describe all the terri- s under its administration; the portion south of the Zambesi being de- ed as Southern Rhodesia. Company controls Bwana M'Kubwa and al other important South African copper properties by ownership of ge stock interest. Company is a gigantic corporation and is the owner e mineral rights not only throughout Rhodesia but also in the Nyasa- and Bechuanaland protectorates.

AWANA M'KUBWA COPPER MINING CO., LTD. RHODESIA

Was controlled by British So. Africa Co.

In liquidation; R. E. Bayliss, liquidator, 19 St. Swithin's Lane, London

4, England.

Current liabilities exceeded assets by £16,235 on June 30, 1920.

Property: 47,097 acres in Northern Rhodesia, containing the Bwana kubwa mine, 1,450 miles by rail from Beira, Portuguese East Africa.

A new company with 1,600,000 5s shares capital is to be formed, stock e exchanged on equal basis for old stock (925,035 10s shares) plus an sment of 2/6 per share. This reorganization will yield £115,631 cash, underwriting of additional shares will bring in £168,736. The ad- adional capital is to be used to materially increase scale of operations. A t report by A. B. Emery of the Messina mine estimated reserves to be 0,000 tons of 4% copper ore to 450' depth. Flotation will probably be ted, as a 100 ton experimental plant is said to have shown a fair ex- sion from oxidized ore.

Production: during the year ended June 30, 1918, the mill treated 16,295 of ore, yielding 1,419 tons of 40% copper concentrates.

Mine has been a long time reaching the stage of profitable operation, rom now on should yield a satisfactory return despite its large capitali- n.

LI & MOTOR GOLD MINING CO., (1919), LTD. RHODESIA

Reorganized in 1919 to provide additional working capital; see Vol.

for old company.

Offices: The London & Rhodesian Mng. & Land. Co., Ltd., sec., herston House, London, E. C. 2, England; and Salisbury, Rhodesia, a. **Mine office:** Eiffel Flats, Hartley district, Rhodesia, Africa.

Officers: L. E. B. Homan, chm. of directors; D. V. Burnett, cons.

; E. H. Bulman, mine mgr.

Inc. July 17, 1919, in England. **Cap.** £617,500; £1 par; 604,235 fully shares issued in exchange for stock of old company on a 50-50 basis an assessment of 7s. 6d per share. London & Rhodesian company owns 88 shares.

For year ended June 30, 1921, there was an operating loss of £45,054. ent assets, including £23,979 for bullion, were £41,051; liabilities 5,943. Premium reserve was £15,566. Working profit during 1921-22 from 3 to 6.4s per ton.

Property: 286 claims, 429 acres, in the Hartley district of Southern esia, includes the Cam and Motor mines, held under license from sh So. Africa Co.

Development: by 1,100' steel-lined main shaft at the Motor mine. Dur- 1917-18, 4,338' of new work was done.

. C. Prinsep, chairman of board of directors; H. T. Brett, gen. mgr. . Parsons, cons. engr., Bulawayo. So. Rhodesia, Africa.

Inc. Feb. 26, 1910. Cap. £600,000; £1 par; 400,000 shares issued. ds, £250,000 authorized, 6%; £67,963 outstanding due July 31, 1922. Working profit for year ended June 30, 1921, was £15,755, which after ing interest and taxes, became a debit balance of £15,800. Current ilities exceeded assets by £28,278. Surplus was £180,867; debenture lempion reserve £180,000.

Dividends: 20% in 1916-1917; none since.

Property: 397 claims, 619 acres, includes Falcon and Athens mines in linkwater section of Gwelo district, Southern Rhodesia, 60 miles N. E. of iwelo. Also 298 claims showing base metals, including iron ore, and a considerable acreage of farm lands.

The orebodies are large, varying from 17' in width on the 3rd level to

THE MINES HANDBOOK, 1922

the 9th level. Metal contents also increase from 2.45% copper and 6 dwt. gold per ton on the 3rd to 2.3% copper and 6 dwt. gold on the 9th

Development: by a 1,100 (main) shaft, and two others 540 and 480' with a total of over 7 miles of workings. On No. 10 level the orebody is 1,100' long, 70' less than on No. 9, but the width and value are similar. Reserves in 1919-20 were 2,979' and in 1920-21, 3,453'. On the 12th, the lowest level, the ore shoot is 33' wide and 180' long. For the sake of development, development was suspended March 1921.

Reserves: (June 30, 1921) amount to 569,000 tons, averaging \$4.70 gold and 22% copper, of which 195,000 tons are broken.

Equipment: crushing plant, equipped with 3 jaw-breakers and 4 trommels for separating the fine and coarse ores. Sorted ore of 5½% copper content and 9% of total output is sent to furnaces. The 500-ton mill, installed in 1915 has 26 Nissen stamps, 2 tube-mills, Dorr thickeners, vanners and all Minerals Separation flotation plant. All concentrate is briquetted. The smelter includes 12 hemispherical blast roasting pots, two blast-furnaces, each of 300-ton daily capacity, two 12,500 cu. ft. turbo-blowers, a crane and 12 converters of 15-ton copper capacity. Copper is cast into bars of 360 lb., containing 10 oz. gold and 20 oz. silver. The plant equipment is similar to that of the standard plants in the United States.

Production, years ended June 30, not including custom ores.

1920 was £41,696 with credit balance, £34,519. Current assets exceeded liabilities by £46,036.

74% from 1912 to 1918, inclusive; 40% each in 1919, 1920

94 claims (1½ acres each) in Penhalonga valley, Umtali. Work done by shafts, the deepest being 1400' on incline. A new shaft is being sunk. Reserves at end of 1920 were 140,268 tons of gold per ton; available ore in central section of mine because unpayable under present cost basis.

Plant complete at mines, and stamp mill and cyanide plants. All activities are employed.

Production: 54,000 tons in 1918, yielding £125,528; 59,500 in 1917, £53,200; 54,000 tons yielding £129,102 in 1918; 61,800 tons yielding £66,550 in 1919; 66,550 tons yielding £141,322 in 1920; 65,136 tons yielding £3,800 in 1921.

A. BROKEN HILL DEV. CO., LTD.**RHODESIA**

R. E. Bayliss, sec., 19 St. Swithin's Lane, London, E. C. 4,

Manager: E. Davis, chm. and mng. dir.; Bechuanaland Expl. Co., Ltd., Salisbury, Africa; R. K. Macartney, mine mgr.; Hooper, Speak & Co., cons.

Aug. 19, 1910. Cap. £350,000; 5s par; all issued.

1920, there was a profit of £89,949. Current assets (including depreciation) exceeded liabilities by £111,339. Surplus was £69,700, less depreciation account, £32,437.

Property: 1,690 claims (1½ acres each) 374 miles from Victoria Falls, Rhodesia. Fully described in "Mining Magazine," October, 1919. Geology: the ground contains a number of hills locally "Kopjes", composed of lead and zinc ores. The mining work has disclosed two lodes about 1000 ft. apart. The one which passes through Kopjes Nos. 1, 3 and 4 carries 10% zinc ore, and the second which goes through Kopje No. 2 contains 10% zinc and 2½% lead; and 300,000 tons averaging 27% and 10%, respectively.

Other lodes carry a small amount of vanadium, and prospecting has disclosed 3,750 tons of 7-13% vanadic oxide ore, besides 6,000 tons ore of 10% grade.

Development: by open quarry work which is hampered by a large inflow of water, as much as 170,000 gal. per hour being pumped 40' to surface and by 175' shaft.

Equipment: mine pumps, tramways, 2 blast-furnaces for lead ore and zinc ore to be erected. A plant for treating zinc ore is under consideration.

Production: 26,000 tons of lead to October, 1919; 14,602 tons of lead from 42,806 tons of ore in 1920; 19,122 in 1921.

Property is yet in its infancy, and is thought to have a prosperous future.

RHODESIA CHROME MINES, LTD.

RHODESIA

Office: R. E. Bayliss, sec., 19 St. Swithin's Lane, London, E. C. 4, England.

Inc. June 27, 1908. **Cap.** £60,000; shares £1 par; 59,457 issued.

Dividends: 10% in 1911; 20% in 1912; 20% each in 1913 and 1914; nil in 1915; 45% in 1916; 20% in 1917; 20% in 1918.

Property: 885 acres, in the Gwelo and Selukwe districts, Southern Rhodesia.

Production of chromic-iron ore:

Year	Tons	Value	Year	Tons	Value
1920.....	60,269	£245,378	1915.....	60,581	£175,792
1919.....	35,282	142,541	1914.....	48,207	107,612

Surplus was £145,000.

Company floated the Aberdorn Concessions, Ltd., which see.

Company consists of about 31,668 acres farm lands; 19 townsites; an interest in 20 mining claims; an 85% interest in 20 other mining claims, and a half interest in 19 mining claims. Company also owns 214,674 Tanganyika Concession, Ltd.; £973,840 Benguela Railway bonds, and 100,000 Miniere du Haut Katanga shares and £11,425 Rhodesia Railway shares. Company has also taken an interest in the Nile-Congo Divide

SOUTHWEST AFRICA

OTAVI EXPLORING SYN., LTD.

SOUTHWEST AFRICA

Office: C. Launspach, sec., 1 London Wall Bldgs., London, E. C. 2, England, E. Davis, chm. of directors.

Inc. Dec. 15, 1909; organized by Otavi M. & R. Co., which see. **Cap.** £63,000 in 60,000 ordinary £1 and 60,000 deferred 1s. shares; all issued, in part to The South West Africa Co., Ltd. At end of Dec. 31, 1920, net development expenses was £25,977 and general, £7,151. Excess of current assets was £25,430.

Property: the right to explore for mineral in 1,000 sq. miles until Nov. 17, 1923, acquired from Otavi M. & R. Co., which receives 35% of net profits. Company is exploiting a mottramite (vanadium ore) deposit; 700 tons of high grade concentrate shipped to end of 1920.

OTAVI MINES & RAILWAY CO.

SOUTHWEST AFRICA

(Otavi Minen & Eisenbahn Gesellschaft.)

Offices: Unter dem Linden 31, Berlin, Germany, and 1 London Wall Bldgs., London, E. C. 2, England. E. Davis, chm. of directors.

Inc. April 6, 1900, in Germany. **Cap.** £800,000; par £1; all issued. Capital in 1914 was 200,000 20 mark shares, plus 200,000 shares without par value held by South West Africa Co., Ltd. This was converted into sterling and increased to present amount in Sept., 1921; 200,000 £1 shares issued to redeem 200,000 deferred shares, and 200,000 £1 shares in exchange for 200,000 20 mark shares, plus a bonus of 20 marks per share; remaining 400,000 shares were underwritten and offered to shareholders at 25s. Old shares were made invalid after Feb. 1922.

On March 31, 1921, there was a surplus of 193,231 marks. Reserves were 2,450,000 marks.

Property: formerly owned by German interests, and taken over during the war by the S. A. Government, comprises 1,000 sq. miles of mining rights and 500 sq. miles of freehold in Otavi district, taken over from The South West Africa Co., Ltd., includes the Tsumeb copper mine. Company formed Otavi Exploring Syn. (q. v.) to prospect the area.

Tsumeb Mine: is developed by 6 shafts and open-cast workings to 434' depth. High grade ore averages 16% copper and 25% lead, and low grade 7½ and 5¼%. Equipment includes power plants, 2 small blast furnaces with 50 tons total capacity, etc. Ore reserves at end of 1921, were 758,000 tons. Production for 8 months ended Nov. 30, 1921, was 26,000 tons of ore shipped, 1,100 tons of copper matte and 200 tons pig lead. See Copper Handbook, Vol. XI, for more complete description of this company's holdings.

SOUTH WEST AFRICA CO., LTD., (THE) SOUTHWEST AFRICA

Secretary and offices: C. Launspach, 1 London Wall Bldgs., London, E. C. 2, England.

E. Davis, chairman of board of directors; T. Toennesen, agt. at Grootfontein, S. W. Africa.

Inc. Aug. 18, 1892, in England. **Cap.** £300,000, increased successively to £400,000, £500,000, £1,000,000, and finally, in 1902, to £2,000,000; £1 par; 1,750,000 issued. Company has arranged to take over from the Public Trustee 1,200,000 ex-enemy shares at 11/6 per share. Capital will be correspondingly reduced.

Dividends: were 5% in 1908; 7½% in 1909; 5% in 1910; 7½% in 1911; 5% in 1912 and 1913, none since. During 1920 the income totaled £36,714, including £33,710 dividends on investments, which were valued at £1,284,-457 at the end of the year. These consist mainly of British and foreign Government bonds. There was a loss of £4,134. Over and above government bonds and farm debtors, current assets were £521,698 and liabilities,

Property: about 1,600,000 acres of unsold freehold land in Damaraland; a two-thirds interest in the South African Co., Ltd., owning about 66,000 sq. miles of mining rights, in Angola, Portuguese S. W. Africa; nearly one-half interest in the Hanseatice Mining Co., owning mining rights covering about 15,000 sq. miles; a 200,000 share interest in the Otavi Mines & Railway Co., and interest in the Southwest African Mining Syndicate and the Otavi Exploring Syndicate, Ltd.

In March, 1920, a mandate was given the Union of South Africa over "German Southwest Africa," by the Allied Powers and proclamations by it have recognized company's title to Damaraland concession and granted company sole right to prospect and exploit minerals until Nov. 17, 1923; other rights have been cancelled. Exploration is underway to determine what properties are to be permanently secured.

CROWN MINES, LTD.

TRANSVAAL

Offices: A. Moir & Co., London secs., 1 London Wall Bldgs., E. C. 2, England; and Rand Mines, Ltd., secs., The Corner House, Johannesburg, Transvaal, Africa.

S. Evans, chairman and managing director; H. C. Boyd, director. The Central Mng. & Invest. Corp., Ltd., cons engrs.; A. J. Walton, gen. mgr.; A. V. Lange, and E. Beamont, joint managers.

Inc. March 31, 1892, in the Transvaal. **Cap.** £1,000,000, 10s. par; par; 1,880,212 issued. Debentures: £1,000,000, 5% first mortgage authorized, £320,000 outstanding.

Gross income for 1920 was £3,711,735 and net £1,067,182, debtors, cash and bullion on Dec. 31 totalled £1,006,878 and current liabilities (excluding annuities to U. of S. A. Government, were £811,685. Surplus was £457,352.

Dividends: totaled 727% from 1898 to 1910; 120% in 1910; 110% in 1911, 1912 and 1913; 85% in 1914; 65% in 1915; 50% in 1916; 40% in 1917; 30% in 1918; 40% in 1919; 77½% in 1920; 32½% in 1921.

Property: 2,339 claims and freehold rights over 3,609 morgen, and also Ophirton, Booysen Reserve and Lakeview Twps., all situated on the Rand, Transvaal.

Development: by 14 shafts. Ore is hoisted through No. 5 and 7 shafts which are connected by two main haulage-levels.

Ore reserves estimated as follows:

Year	Tons	Gold per ton, dwt.
1920.....	8,131,700	6.40
1919.....	8,451,400	6.30
1918.....	8,298,106	6.40
1917.....	8,988,000	6.30

Equipment: immense mining and reduction plants, including 835 stamps, 26 tube-mills, sand and slime plants capable of treating 7,666 tons of ore daily.

Production, years ending December 31:

Year	Ore treated, tons	Gold Yield	Working Profit	Cost per ton
1921	2,177,000	£3,358,304	£ 672,067	...
1920	2,201,000	3,704,474	1,093,336	23/9
1919	1,945,000	2,992,204	750,442	23/1
1918	1,861,000	2,528,760	410,642	22/9
1917	2,100,000	2,700,096	673,966	19/4

This company is probably the largest gold producer in the world.

Inc. Jan. 13, 1888, in the Transvaal. Cap. £950,000; £1 par; 886,500 issued.

Revenue in 1919 was £650,369, of which £146,989 was profit; balance forward was £70,898. In 1920, revenue was £774,031 and profit £153,353. Current assets were £157,812 and liabilities £141,602. Surplus was £88,049.

Dividends: total 609% since 1889; of which 15% in 1919; 12½% each in 1920 and 1921.

Property: covers a large area on the Rand opened by the Hebbard and Main shafts, 3,418 and 3,276' deep. New work in 1920 totaled 9,913'. The Langlaagte mine is worked out. Ore reserves at end of 1920 estimated to be 1,016,800 tons averaging \$6.40 over 55"; they were 1,002,400 tons averaging \$6.50 per ton in 1919.

Equipment: complete with 200-stamp mill containing 5 tube-mills and cyanide plant.

Production: in 1918 was 152,282 oz. of gold from 533,690 tons of ore, with a total cost of 19/ (\$4.56) per ton. In 1919, 475,480 tons of ore yielded 139,082 oz. gold, at cost of 21½ per ton; in 1920, 465,300 yielded 138,773 at cost of 26/8; in 1921, gold from 479,300 tons was valued at £773,588.

MESSINA (TRANSVAAL) DEV. CO., LTD.

TRANSVAAL

Head office: 11 Queen Victoria St., London, E. C. 4, England. **Mine office:** Messina, Zoutpansberg, Transvaal, South Africa.

Officers: J. P. Grenfell, chm.; G. R. Newman, sec.; A. B. Emery, gen. mgr.

Inc. Jan. 30, 1905, in England. Cap. £250,000; 5s. par. 727,154 issued. Capital increased from £110,000 to £200,000 in 1908, and to present amount in 1911. **Bonds:** £250,000 6% issued April, 1912, at 95%, redeemable at 105% by drawing or purchase in open market at or under that price; £125,000 outstanding.

The year ended June 30, 1919, resulted in a loss of £39,373; after allowing £55,600 for depreciation and railway guarantee, and surplus was £46,757. In 1920, operating revenue was £174,089 and a net loss of £124,424. On June 30 cash, debtors and products were £333,989; creditors totaled £124,247 and advances on products £100,519. There was a debit balance of £77,667.

Dividends: in 1915-16 were 40%; 20% in 1916-17; none since.

Property: about 22,432 acres of copper-bearing lands, including the Messina and Vogelsang mines; also coal and lime claims in the Zoutpans-

occurs in veins in granite.

A new company, Transvaal Smelting & Refining Co., has been formed, with a new and larger smelting plant to treat Messina and other ores as well.

Development: by the 1,033' Messina and 1,742 Vogelsang shafts, and extensive workings.

Ore reserves: in 1919, reserves were 415,000 tons of 3.25% ore; also 325,000 tons of 1.4% jig tailings. On June 30, 1920, they were 518,710 tons of ore assaying 3.23% copper.

Equipment: includes a 250-ton mill and 2 reverberatory furnaces.

Production, years ending June 30:

Year	Ore treated, tons	Cop., %	Copper long tons
1920.....	92,147	2.85	2,100
1919.....	2,703
1918.....	120,899	3.47	3,537

Inc. July 2 1917, in Transvaal. **Cap.** £1,215,624; par £1; all issued. **Debentures**: £500,000 6½%; £410,760 outstanding.

Revenue in 1920-21 £663,482 and **profit** £174,339. **Cash assets** on June 30 were £677,552; **sundry creditors** £518,710.

Property: 800 claims, a lease on 650 claims, and the unproclaimed freehold Farm Klipfontein No. 11 of 3,451 morgen. On proclamation of farm, 800 to 1,000 additional claims will be acquired; making in all 2,250 to 2,450 claims in the Boksburg district. **Reefs** thus far opened show an average width of 24" carrying 0.94 oz. in gold. The western area only is now being attacked.

Development: by 3 shafts sunk and equipped by former companies and 2 new shafts. Three only are in present use. **Extensions** in 1921 were 25,-076' compared with 20,270 in 1920. **Reserves** as of June 30, 1921, are 1,611,700 tons of \$7.70 ore over stope width of 57"; with 338,600 tons additional of lower grade not profitable under present scale of operations.

Equipment: includes mill of 55 stamps, 4 tube mills and cyanide unit, with 27,000 ton monthly capacity, 7 miles away, leased from New Kleinfontein Co. An 80,000 ton reduction plant was purchased in situ in 1920-21. but will not be moved to company's ground until later. **Natives** employed number 2,000.

Production: years ended June 30: in 1919-20 (last 2 mos.) 7,559 oz. gold from 39,500 tons of ore; in 1920-21, 118,938 from 297,800 tons. **Cost** in latter year was 30s 5d per ton.

. March 26, 1907, in the Transvaal Cap. £4,750,459; £1 par; all

issued. **Debentures:** £3,000,000 6% authorized, of which 2,315,600 are outstanding.

Financial Statement, years ended December 31:

Year	Revenue	Working Profit	Balance forward
1920.....	£2,300,696	£158,100	£4,821*
1919.....	2,215,695	309,089
1918.....	1,991,839	108,072	27,669
1917.....	2,462,635	478,063	336,018
1916.....	2,835,892	834,555	418,200

*Debit balance.

Dividends: 17½% from 1912 to 1918; none since 1915.

Property: 3,511 claims in one block, and 6 water rights on the W. Rand, covering reef for over 7 miles. In September, 1920, the Randfontein Deep, Ltd. holdings and assets (except cash) were purchased for 250,459 Randfontein Central shares.

Development: by 14 shafts; the North and South being 3,896 and 4,712' deep at end of 1920. Mine workings are being reorganized and the northern section is to be gradually abandoned. The W. reef where cut at 4,130' averaged 0.605 oz. gold over 48" width. Reserves Dec. 31, 1920, were 3,593,410 tons of 0.31 oz. ore.

Reserves: consist of ,494,302 tons of \$7.80, 3,486,917 tons of \$4.60, and 3,268,654 tons of \$2.80 ore, a total of 11,699,873 tons. The last mentioned is at present unprofitable. At the end of 1918 the total was 4,254,000 tons of 6.8 dwt. gold ore across width or thickness of 50".

Equipment: extensive and modern, including 1,000-stamp mill, 26 tube-mills, and cyanide plant, capable of treating 3,100,000 tons per annum. Hoists capable of raising 5 tons from 5,000' depth at speed of 4,000' per minute are being installed. Employs 1,400 whites and 14,261 natives.

Production, years ending December 31:

Year	Ore treated, tons	Gold Yields	Cost per ton
1921....	1,465,500	£2,249,847
1920....	1,560,000	2,300,596	27/6
1919....	1,729,400	2,215,695	22/1
1918....	1,745,000	1,991,839	21/6 (\$5.10)
1917....	2,017,181	2,467,636	21/7
1916....	2,209,622	2,890,000	18/1 (4.34)

The above tables show steadily decreasing returns, which have been due to floods, labor troubles, and epidemic. When the new shafts and pumping stations are completed a larger output and gold production is expected as development work is satisfactory.

*Includes estimated premium on gold.

The Modder and Spring companies in the Far East Rand are believed to have a long assured life with continuance of dividends and the Rhodesia Broken Hill paid its first dividends (10%) in Aug. 1920. The holdings are so varied that depletion at one property is offset by development in another mine.

Disbursements to company shareholders for the 14 years ended December 1921, total £11,742,723 or 175% per annum on the shares issued. As this company is interested in mines producing 40% of the Rand output, and the Rand produces 40% of the world's gold, it dominates 16% of the gold output of the entire world

ROBINSON DEEP, LTD.

TRANSVAAL

London office: J. T. Bedborough, 8 Old Jewry, London, E. C. 2, England. Mine address: Consolidated Gold Fields Bldgs., Johannesburg, Transvaal. D. Christopherson, chairman of board of directors.

Inc. 1887, in Transvaal. Cap. £2,750,000; £5 par; all issued.

Report for year 1921, showed £488,046 from ore sales with working profit £23,978; other income, £17,022; net profit £21,958; giving total surplus of £145,470 on Jan. 1, 1922. Current assets exceed liabilities by £49,618.

Dividends: a total of 436% from 1889 to 1921, inclusive; or £11,980,937; 3% in 1920, 2% in 1921.

Property: 172 claims, 5 mining rights and 1 water right on the Rand, and freehold. The property has been fully developed, and has reserves of about 115,200 tons, Jan. 1, 1921, with a large amount of low grade Main Reef ore. The estimated life should end in 1922. Mine has been one of the great gold producers. Company also owns 40,000 fully paid 10s. shares in Crown Mines, Ltd.

Equipment: includes 230-stamp mill and cyanide works.

Production: year ended Dec. 31, 1920, 475,200 tons yielded £573,571, with profit of £86,203. or 3s. 8d per ton. Costs were 20s. 6d per ton, an increase of 2d over 1919. Tonnage mined in 1921 was 460,300 tons yielding £482,645, with profit of £23,978.

and profit of £8,265. For same time period in 1919 the revenue was £54,587, and expenditures £70,178. In 1920, revenue was £68,827 and expenditures, £61,164. Current assets exceed liabilities by £19,935.

Dividends: has paid 107½% since 1910; 5% in 1916-17; 5% in 1919-20.

Property: tin lode claims in the Waterburg district of the Transvaal, covering over 5,000 morgen.

Development: by 619' main shaft with 5,164' of new work in 1918; this work costing \$9.30 per ton of ore mined. Surface prospecting is done by hydrauliclicking.

Equipment: a mill with 10 stamps, tube-mill and concentrators.

In 1920 company mined and milled 15,420 tons ore containing 1.62% tin with a recovery of 76.3%, with a total output of 330 tons of tin, practically the same as in 1919.

SPRINGS MINES, LTD.

TRANSVAAL

London office: J. H. Jefferys, sec., 5 London Wall Bldgs., London, E. C. 2, England. **Main office:** Cons. Mines Selection Co., Box 5657, Johannesburg, Transvaal.

F. R. Lynch, chairman of board of directors; A. A. Coaton, mine mgr.; C. R. Davis, cons. engr.

Inc. May 4, 1909, in Transvaal. **Cap.** £1,500,000; £1 par; £1,267,236 issued. **Debentures:** £315,000 authorized of 6% first mortgage; £86,945 outstanding.

Accounts for 1920, show gold receipts £1,157,052 and a net profit of £435,124, giving a surplus of £483,699.

Dividends: 10% in fully paid £1 shares of West Springs for every 10 of Springs held, on July 2, 1918; and 12½% on December 30, 1918; none in 1919; 20% in 1920; 15% in 1921.

Property: 3,568 acres, on De Rietfontein No. 14 farm, East Rand, adjoining the West Springs, Ltd.

Development: by two 7-compartment shafts, both over 3,500' deep, which cut the reef at 3,433' and 3,692' respectively.

Equipment: electric and steam power, hoists, compressors, shops, 80 heavy (2,000 lb.) stamps, 8 tube-mills, and cyanide plant of 40,000 tons monthly capacity.

Production, for the past three years is as follows (for comparison's sake, the standard price of gold has been taken):

	1918	1919	1920
Tons milled	427,610	434,610	465,800
Working profit	£ 423,696	£ 248,574	£ 166,984
Revenue per ton milled	42s. 4.37d	38s. 2.41d	37s. 10.15d
Working costs per ton milled	22s. 6.57d	26s. 9.14d	30s. 8.11d
Working profit per ton milled	19s. 9.80d	11s. 5.27d	7s. 2.04d
Development footage	17,890 ft.	18,560 ft.	18,408 ft.
Ore Reserve—tons	2,367,636	2,417,298	2,726,178
Ore reserve—value.....	9.26 dwt.	8.74 dwt.	8.76 dwt.

In addition to the working profit £166,984, the premium on gold, after allowing for exchange on remittances and insurance, and the pro rata loss on the joint purchase of stores during the war period, resulted in a credit of £271,504, the total working profit for the year being increased to £437,488, as compared with £343,665 for the preceding year. The results indicate a gradual improvement in breaking and transport facilities, supplemented in the south shaft section by the completion of the ore bins and loading station at the junction of the west, north-west and south-west haulages, and the bringing into use of the new station and bin to serve the area contiguous to the 8th Level west haulage.

Ore reserves: Jan 1st, 1922; 3,056,231 tons of \$8.92 ore.

UNION CORPORATION, LTD.

TRANSVAAL

Offices: 94 Main St., Johannesburg, South Africa; **London office:** Pinners Hall, Austin Friars, E. C. 2, **Paris office:** 34 Rue Vignon, Paris, France.

Directors: J. Temperley, chairman of board; **London staff:** Sir Henry Strakosch, managing director; Joseph Kitchin, mgr.; E. J. Hess and C. T. Pott, joint sub-mgrs.; Henry Clark, sec.; **Johannesburg staff:** P. M. Anderson, mgr.; V. J. Ronketti, sec., Paris; M. Turret, agent.

Inc. Dec. 29, 1897, in the Transvaal. **Cap.** £1,015,000, in 1,000,000 ordinary and 15,000 founders shares, £1 par. In 1898 200,000 fully-paid ordinary shares were issued at £1.12 6d. and 100,000 such shares in exchange for the 15,000 founders shares. In 1904 225,000 shares were issued at £2.10 each; in 1905, 75,000 shares at £2.10, making total capital of £1,400,000. In 1917, in order to meet depreciation on several of the shareholdings, capital was reduced by writing off 7/6 per share. Present capital is £875,000 in 1,400,000 shares of 12/6 each. All the shares are issued and fully paid.

Net profits for 1921 were £179,516 including £68,355 brought forward from 1920; £30,000 was placed to reserve account, £140,000 was paid as dividend (20 per share or 16%) and £77,872 carried forward.

Property: company is a holding corporation, and controls or is heavily interested in the following African mining companies:

Geduld Proprietary Mines, Ltd., Modderfontein Deep Level, Ltd., Princess Estate & Gold Mining Co., Ltd., Randfontein Deep, Ltd., Van Dyk Proprietary Mines, Ltd., and Withok Proprietary Company, Ltd.; also in Klerksdorp Exploration, Land & Estate Co., Ltd., holding mining and land interests in South Africa. In Mexico, company controls La Fe Mining Co., Ltd., a silver-lead-gold property in Mexico, and in the San Francisco Mines of Mexico, Ltd., a silver-lead-zinc property in Mexico. It also owns other claims and land interests in the Ojo Caliente district, Zacatecas.

The company carries on a general finance business, and is also in the administration and management of industrial undertakings, mainly mining or those allied to the mining and metallurgical industries.

Company employed 5,999 natives and 700 whites in 1921.

The operations of the subsidiary companies are described under their own titles.

E. C. 2, England.

A disastrous collapse of the mine workings on the 16th level in Oct. 1921, coupled with the practical exhaustion of the mine led management to stop all mining operations and to liquidate company. See Vol. XIV for description of company.

WEST SPRINGS, LTD.

TRANSVAAL

Promoted by Anglo-American Corporation of South Africa, Ltd.

London Office: E. Shephard, 5 London Wall Bldgs., Finsbury Circus, London, E. C. 2, England.

Ernest Oppenheimer, chairman of board of directors; H. W. Pridgeon, mine mgr.; C. R. Davis, cons. engr.

Mine office: Box 4567, Johannesburg, S. A.

Inc. June 14, 1918, in the Transvaal. **Cap.** £1,400,000; £1 par; all issued; 453,449 being fully paid and 947,581, 14s paid. In 1921, 200,000 shares were subscribed for and taken in South Africa.

Balance sheet Dec. 31, 1920 showed general expenses to date £23,293. Shaft sinking and equipment, £663,029; stores, etc., £55,654; cash, £50,987. Loan, Springs Mines, Ltd., for development £22,199.

Property: a Government lease of mineral rights on 2,236 claims on Farm De Rietfontein No. 14, Far East Rand, Transvaal, immediately west of the Springs Mines, Ltd., with which arrangements were made for mine development by west haulage level of Springs Mines S. shaft. A share of profits is payable to the Union Government.

Development: two shafts are being sunk, the reef was cut at 4,105' in first shaft, and proved to be 100' wide but too low grade to pay at that point, but exploratory work at rate of about 3,500' yearly, has shown reef to have a width of 22-26" of ore that assay \$5.73 to \$7.04 per ton, part of it with a width of 35" of \$8.56 ore. Late in 1921, new work showed 26" of \$8.50 ore for a length of 65' on reef.

Second shaft is 2,940' deep with diamond drill hole reaching reef at 4,800'.

Main level connects with working of Springs Mines, Ltd., and that company is also doing development work on West Springs.

ZAAIPLAATS TIN MINING CO., LTD.

TRANSVAAL

Office: E. G. Crake, Pinners Hall, Austin Friars, London, E. C. 2, England. A. Gilbertson, mgr.; W. J. Gau, cons. eng.

Inc. Aug. 18, 1908, in the Transvaal. **Cap.** £63,750, in 255,000 shares of 5s. par, all issued.

Loss for quarter year ended July 31, 1921, was £799.

Dividends: from 1908 to February, 1919, inclusive, 625%; 30% in 1918-19.

Property: 234 tin claims, 23 miles W. of Potgietersrust, Transvaal, equipped with 15 stamps, crushing 13 tons a day, 4 tube-mills, and concentrator; there is also a smelter.

Production: for quarter ending July 31, 1921 was 30.45 tons of 65.92% tin concentrate, from 2,562 tons of crude ore. In 1918 company produced 355 tons of 70% concentrate from 28,132 tons of ore. Costs are around 60/- (\$14.40) per ton.

ASHANTI GOLDFIELDS CORPORATION, LTD.

GOLD COAST

Office: H. Morgan, sec., 6 Southampton St., Holborn, London, W. C. 1, England.

Officers: Jeremiah Colman, chm.; Sir Geo. L. Johnston, deputy chm.; W. R. Feldtmann, cons. engr.

Inc. May 25, 1897, in England. Cap. £250,000; 4s. par; all issued.

Profit for 1920 was £122,332. In 1921, for year ended June 30, revenue

profit £80,621. Cash, bullion and debtors totalled £110,000. Liabilities £73,596. Surplus was £73,514. Reserves were

in 1900 total 999½%, 70% being paid in 1918, 75% in 1920, 20% in 1921.

1,000 sq. miles at Obuasi in Gold Coast Colony, West Africa, on the west coast, includes the Ashanti, Ayeinm and Justice mines. Obuasi is the principal producer in the region.

Obuasi shoot occurs in disturbed ground, close to the surface, along fissure planes. The normal fissure filling or vein formation is a graphitic schist, in places very friable. The main vein is usually 1,000' long on some levels, and from 3 to 40' wide. The parallel streaks of graphite, has a banded structure. Some of the remainder being in pyrite and other sulphides. The Ayeinm mine main fissure, is pear-shaped in horizontal section, being from 4 to 60' wide. Gold content in both shoots is erratic.

Work is done by shafts to 2,000' depth. Mining is rendered difficult by the irregular and great thickness of the quartz, and the shoot and the graphitic selvage on the footwall.

Yields have varied as follows:

	Tons	Dwt. per ton	Gross Value
.....	511,400	22.6	£2,451,500
.....	510,100	23.01	2,490,000
.....	529,500	27.2	2,644,000
.....	526,200	28.5	2,735,000
.....	534,100	24.5	2,772,000
.....	436,600	24.9

Plant is complete for mining, with mill containing 50 stamps, 7 Edwards' roasting furnaces, fine grinding and cyanide plant of 100 tons monthly capacity. Because of increasing difficulty in obtaining water, wet concentration treatment will be adopted.

Production: years ended June 30:

	Ore treated, tons	Yield	Cost per ton
1918 (s.).....	66,020	£274,771
.....	71,411	313,301	84/5.....
.....	60,563	283,027	85/3.....
.....	85,566	429,271	59/- (\$14.24)
.....	105,452	464,102	54/- (12.96)
.....	116,883	483,911	49/3 (11.79)
.....	136,994	475,958	44/7 (10.70)

Ashanti only was operated 1919-21.

Dividends: 1885-1912, 6%; 1913, 5%; 1914, 2½%; 1915, 6%; 1916, 10%; 1917, 25%; 1918, 20%; 1919, 11%; 1920, 20%; 1921, 10%. In addition, 15% was paid in 1916 and 10% in 1917 from amortization reserve; and also a stock dividend in September, 1920, in ratio of 1 share for each 10 held. The total is over \$23,000,000, or 373%, since 1874, exclusive of stock distributions of 33 ⅓% in 1891, 50% in 1902, 25% in 1905, 100% in 1906 and 10% in 1920.

Net profits earned per share have been; \$2.47 in 1915; \$3.32 in 1916; \$3.98 in 1917; \$1.29 in 1918; \$0.75 in 1919; \$1.94 in 1920, nil in 1921.

The St. Joe Lead Co. owns directly, the mineral rights to 6,484 acres of lead bearing land in southeastern Missouri, 4,244 acres of which lie in the Flat River-Leadwood district and 2,240 acres in Bonne Terre. Through ownership of the Doe Run Lead Co., also owns mineral rights on 7,054 acres in the Flat River-Leadwood and Doe Run districts.

The company is the largest independent lead producer in America, and the second largest after the A. S. & R. Co.

Property: 13,498 acres of lead-bearing land in southeastern Missouri, in St. Francois and Jefferson counties, 7,054 acres of which are owned by Doe Run; power plants, mill, smelting plants, the entire \$3,000,000 capital stock and \$1,102,000 par value bonds of the Miss. River & Bonne Terre Railway; also \$499,450 of the \$500,000 capital stock of the Bonne Terre Farming & Cattle Co.; and 96% of the capital stock of The Doe Run Lead Co. The Miss. & Bonne Terre Ry. owns the St. Francois County R. R. Co.

The Baker Lead Co.'s 357 acre tract near Leadwood, St. Francois county, was purchased in 1920 for \$357,000.

All told, the St. Joseph company controls 26,885 acres of mineral land. Company owns 1,000 houses tenanted by employees, and operates mercantile stores.

Although stock control of The Doe Run company is held by St. Joe, by a court decree, June 18, 1920, property of the former taken over in 1917, was reconveyed to Doe Run, which now again becomes a subsidiary of St. Joe.

The holdings are in the disseminated lead ore region in the Flat River-Leadwood, Bonne Terre and Doe Run districts, of S. E. Missouri, where production from ores in the lower Bonne Terre dolomite began in 1869. The producing area is within 5 miles of the towns of St. Francois and Desloge. There are six companies operating and seven concentrating mills in commission, those of the St. Joe Co. and its subsidiary handling 8,6000 tons out of a total of 20,000 tons daily output.

Development: by 17 shafts to depth of 480'.

The mines are estimated to contain 19,450,000 tons of developed and 15,525,000 tons of undeveloped ore.

Equipment: includes the modern 2,400-ton mill at Bonne Terre, that of 2,000 tons at Leadwood, and that of 4,200 tons at Rivermines; all in St. Francois county. Together these mills include 28 gyratories, and 140 Wilfley tables. Flotation is used, the company operating under license of Minerals Separation. Also the smelter at Herculaneum, near St. Louis, capable of treating 12,000 tons of concentrates per month from the company's mills, an output of 120,000 tons of lead yearly. Concentrates assay from 65 to 74% lead, 14% sulphur, and 1 to 5% zinc. Electrical dust precipitators are used at the smelter.

Milling practice is described in "Met & Chem. Eng." of Sept. 15, 1917, and July 15, 1916; concentration methods are given in Bulletin 130 (1917) of the A. I. M. E.; the baghouse and matte granulation plants at Herculaneum in the "Eng. & Min. Jour." of Feb. 17 and Dec. 16, 1917; and in same journal of June 29, 1918, and Sept. 18, 1920 describes the property and mill tests.

CONSOLIDATED COPPERMINES COMPANY. NEVADA

Supplementing statement on page 1170 of this book.

Under date of June 5, 1922, announcement was made of a plan and agreement for re-organizing the Company. Under this plan, the mortgage securing the bonds of the old Company would be foreclosed and the properties acquired by a new company with an authorized capital of \$8,000,000, divided into 1,600,000 shares, par value \$5.00; no bonds. Approximately 740,000 shares of stock in the new company at \$5.00 per share to be issued for the face value of all bonds and other outstanding obligations of the old company. Approximately 500,000 shares to be offered to stockholders of the old company on the basis of two shares of old stock and a cash payment of \$2.50 for each share of stock of the new company, this stock offered to stockholders having been underwritten. The announcement further states:

The plan of reorganization clears the new company from debt with the consequent heavy burden of interest charges and provides, besides 335,000 unissued shares, approximately \$1,250,000 cash in its treasury for working capital and future corporate purposes.

"The plans of the old company for some time past have contemplated stripping certain porphyry deposits and erecting concentrating and smelting works for treating low grade porphyry ores in connection with high grade oxidized ores and a limited tonnage of low grade sulphide ores. Inability to secure the necessary finances prevented the consumation of these plans. In the meantime the Nevada Consolidated Copper Company fortunately discovered, at moderate depth, a large body of high grade direct smelting contact sulphide ores on ground which adjoins Minnesota claim of the old company. Upon the Minnesota and other claims of the old company high grade sulphide ores of the same character are indicated and actually exposed. It is expected that the work on such claims will develop valuable sulphide orebodies. Such direct smelting sulphide ores are favorably regarded by smelters and should, when opened up, provide a revenue for the new company without immediate expense for smelting or other reduction works. If ever advisable, a smelter (the only plant required for such ores) can be erected at reasonable cost. The Committee believes that the exploitation resulting from the execution of the Plan of reorganization insures the success of the company by operations along these lines and will recommend that the new company proceed accordingly."

TROY ARIZONA COPPER CO.

ARIZONA

Address: Henry Rudolph, sec.-treas., 170 Broadway, New York City.

In 1922, a new directorate was elected.

Officers are now as follows: John F. Galvin, pres.; Augustus K. Sloan, Howard C. Rogers, Benjamin F. Einbigler and Henry Rudolph, directors.

Work under J. C. Devine, mgr., to be resumed July, 1922. Company's property favorably reported on by Roy G. Mead, G. G. Wald and J. C. Devine.

HOLTYREX COMPANY.**ONTARIO****Address:** W. C. Young, 301 Bank of Hamilton Bldg., Toronto, Canada.**Officers:** A. J. Young, pres.; C. G. Knott, sec. L. H. Holland, mine mgr. Inc. in 1922, in Ontario. **Cap.** \$3,000,000; par \$1; 1,500,000 shares issued for property. Chartered Trust & Ex. Co., and Prudential Trust Co., Ltd., of Toronto, registrars.**Property:** 160 acres, N. E. of the McIntyre and N. of the Plenaum and is represented to be on the strike of the Hollinger-McIntyre ore zone to show the main contact and to have seven vein outcrops, one of which carries visible gold, but the government map (1921) shows No. 5 vein of the Hollinger running into Plenaum ground, not Holtyrex.**Development:** by 23 pits and a 50' shaft. Diamond drill exploration being done, and company being financed by stock sales, June, 1922.**SINCLAIR SILVERS CONSOLIDATED****NEVADA**

One of a half dozen more or less suspicious promotions fathered by Chas. S. Cresser & Co. of New York City, in 1920, in connection with the Lawson-Van Riper attempt to get the Public's money in Universal Silvers and its associated affiliated promotions of similar character. Cresser's activities failed to finance Cons. Silver, one of the brood, and in May, 1922, stockholders in Sinclair Silver Cons. were offered ten shares of new stock for each old share in Cons. Silvers, Inc., reorganized and renamed the Cons. Mining & Refining Co. Cons. Silvers shares were sold by the company at 3c. a share, by Cresser at 25c. a share. Circulars and letters of Cons. Mng. & Ref. Co. do not give the capitalization or number of shares, but do offer "Preferred rights" at 25c. each, preferred up to 10% dividends and subscribers to each right to get also, same dividends (if there are any) as holder of 1,000 shares Cons. Mng. & Ref. Co. stock and the "Right" is convertible into 1,000 shares of common stock.

GREAT WESTERN MINING & DEVELOPMENT CO.**OREGON****Address:** Medford, Oregon.**Property:** the Lone Pine quartz mine, acquired, and reopened late 1921, by this new company.**GREAT NATIONAL MEXICAN SM. CO.****MEXICO****Address:** 120 Broadway, New York. **Mine Address:** San Juan, Coahuila, Mex.; W. A. Conley, supt.**Officers:** Fred Hellmann, pres.; W. E. Bennett, v.-p.; A. E. Thiele, treas.; John Russell, mgr.**Property:** the Reforma mine, 140 acres, patented, in Coahuila. Silver-lead ore, averaging 30% lead and 11 oz. silver per ton, occurs in a mineralized zone, 100' in width. The formation consists of brecciated limestone.**Development:** by tunnels and shafts.

Acquired in 1890, the property has been operated nearly continuously since, with a normal annual production of about 15,000 tons of smelting ore. Stock of company is closely held.

EL PORVENIR MINING CO.**MEXICO****Address:** Cusiuhiriachic, Chih., Mex. Is an American company owning the Porvenir mine and producing in 1921.**MINA LA OLVIDADA****MEXICO****Address:** No. 9, Calle Aldama, Chihuahua, E. de Chih., Mex. Mine at Cusi. Active 1921.**CONCHENO MINING CO.****MEXICO****Address:** First National Bank, El Paso, Texas. This American company owns and operated the Concheno mine in 1921-22, at Ocampo, Chih., Mex.

MINERA EL REFUGIO**MEXICO****Address:** Parral, Chih.; Mex.

is controlled by the Alvarado Mining & Milling Co., whose address is Madison Ave., New York City.

owns the Refugio mine at Parral.

BUNKER HILL COPPER CO., erroneously printed: **Bunker Hill Mines Co.**, on first description under that title on page 234.**CUPINE DAVIDSON GOLD MINES, LTD.****ONTARIO**

The following paragraph from the editorial column of the Canadian Mining Journal is reprinted for our readers benefit: "We must confess that Davidson is not in the same class as the Associated Goldfields. It, the Davidson, has something to show in the way of ore. Also it has a very capable directorate. But its finances have been juggled so wonderfully fearfully that only an expert accountant could tell a shareholder where ands. Neither concern is a credit to Canadian gold mining."

CONTINENTAL SOUTHERN ARIZONA MINING CO.**ARIZONA**Erroneously printed **Continental Cons. Copper Co.** in third heading on 254.**CANADIAN ASSOCIATED GOLDFIELDS MINING CO., LTD.****ONTARIO**

Merged 1921 with other companies to form Canadian Associated Goldfields, Ltd.

The Canadian Mining Journal of June 16, 1922 says this new company is an "illicit promotion," and "Against a capitalization of \$30,000,000, its own properties are given a book-value of \$20,985,398. This, of course, is an arrant absurdity. It would be much nearer the truth to cut off the figures to the right of the dollar sign and let it go at that."

KITTIMAC MINING & MILLING CO.**COLORADO**

Herbert E. Curran, receiver, Room 44 Capital Bldg., Denver, Colo.

This company was organized in Colorado in 1916, as a reorganization of the Kittimac Mines Co. of Wyoming, thus acquiring title to the Kittimac mine and the mill and flotation plant put up by J. M. Hyde, the flotation expert. In Oct., 1916 mill was started and shipments of concentrate made. Various changes in the mill made in November and December of 1916, failed to make the work a commercial success, and mine and mill were shut down and company went into hands of a receiver.

In Oct., 1921, work was resumed under H. G. Brent as manager, and the property optioned to Pittsburgh people, who organized the San Juan Consolidated Mine & Milling Co., to take over the property.

SAN JUAN CONSOLIDATED M. & M. CO., INC.**COLORADO****Office:** 626 Wabash Bldg., Pittsburgh, Pa. **Mine address:** Silverton, Colo.

Property: the Kittimac group, formerly owned by the Kittimac Mines Co. (1915), in the Eureka mining district, better known as the San Juan tract, 8½ miles N. of Silverton and 3½ miles S. E. of Eureka.

Property consists of 76 claims in a solid block, 7,200' long by 2,900' wide, crossed by 9 vein outcrops, viz. Calibre vein, a gold bearing vein, 30' deep, traceable 9,000'; Isabella, 3'-5' wide traceable 6,000', and at 450' depth 19' thick; Little Joe vein, 3' wide and outcropping for 3,300'; Midnight vein, No. 1 and No. 2 veins, Stanton, London; Esmeralda and Elvina veins. The Isabella vein is reported to show 12'-19' of silver lead (sulphide) ore, averaging \$23 for 12' width.

Reports by A. S. Walter (1915) and Morris Stockder (1910), show that the property had an orebody of commercial size opened up at that time, but operations in 1916 were unprofitable. Veins, like that of Camp Bird mine, occur in San Juan andesite (1,000' thick) capping Silverton formation.

Development: has not been done below the main haulage tunnel. There are 2 tunnels on Little Joe vein; the upper, only used for air, is 160' above main tunnel on which 3,000' of work was done up to 1915. At 1,745' drifts were run on ledges. Before the Isabella vein is reached, tunnel opens the Little Joe vein for 1,000', with 3 oreshoots on which the Martin, Harper & Kelly stopes, were opened and worked.

The Isabella vein is opened by a 600' drift exposing 6'-18' of milling ore fro 400' in length and developing 10,000 tons of ore, said to be left on stope (1915). An output of 100 tons daily can it is said be maintained, when mine is in full operation.

Equipment: at mine includes compressor, rock crusher and orebin and a 10,400' rope tram (Bleichert) to the Kittimac mill of 100 ton capacity, but without flotation units.

Pre-war costs are reported to have averaged \$115 per day for labor alone on a 100 ton basis.

BACA FLOAT MINING & CATTLE CO.

ARIZONA

Office: 811 Great Southern Life Bldg., Dallas, Tex.

New York Office: 50 E. 42nd St., New York City.

Officers: A. Robt. Grund, pres., New York City, with Wm. T. Connelly

Officers: A Robt. Grund, pres., New York City, with Wm. T. Connelly, sec.; Jas. E. Bouldin, treas., with Albert T. Walraven and Jos. W. Bailey, directors, all of Dallas, Texas.

Inc. in Delaware. **Cap.** \$5,000,000; par \$100.

Property: 45,000 acres of grazing and mineral lands, comprising the north half of the Baca Float No. 3 in Santa Cruz county, Ariz., 8 miles from Tubac. The mineral claims cover 8,500 acres and include six mines worked by leasors until Jan. 1, 1922.

Development: reported to include a 428' Alto shaft at the mine of that name, a 185' shaft and 3 tunnels at the Royal Blue mine, an 1,800' tunnel and 322' shaft at the Eureka mine, a 450' shaft at the Soledad mine, and prospect shafts at the Trenton-Georgia mine. These properties were developed by various mining company's, who became trespassers, when the courts decided the ground belonged to the Baca grant No. 3. We are told that five of the mines were operated and shipments made by leasors in 1921, who paid comapny 25% royalty, but these leases were cancelled when a warrantly deed to the property was received by the government on March 9, 1922. According to estimates made by the company's president, these mines have 55,000 ton of siliceous ore of milling tenor on dumps, that will it is said assay \$30 in silver-lead and copper.

There is an 100 ton mill on the Royal Blue mine erected in 1919 by a former leasor. Proerty examined by Clarence King (1919) H. R. Plate and Josiah Trerise, but the reports are not obtainable. Total workings said to be about 65,000', said to expose 450,000 tons of ore averaging \$15 per ton net. We hope this is so.
