DESCRIBING
THE MINING COMPANIES OF THE WORLD

BY

WALTER HARVEY WEED, E. M.

Former Geologist in the United States Geological Survey, 1883-1906;
Member of Mining and Metallurgical Society of America;
Fellow Geological Society of America; Author: Copper
Mines of the World; Geology of Butte,
Montana; Classification of Ore
Deposits, etc.

The MACKAY SCHOOL OF MINES

UNIVERSITY OF NEVADA, RENO, NEVADA

Endowed by Marie Louise Mackay and Clarence Hungerford Mackay

Offers a four-year course leading to the degree of Bachelor of Science in Mining, a year's post-graduate course leading to the degree of Master of Science in Mining, the professional degree of Engineer of Mines to graduates, and a Prospector's Short Course of one month.

Individual instruction; fine equipment; the big Nevada mines within easy reach; delightful climate; low expenses; no tuition fees.

Michigan College of Mines

A state institution offering engineering courses leading to the degree of Engineer of Mines. Located in the Lake Superior Mining district. Mines and Mills accessible for college work. For Year Book and Booklet of Views, address President or Secretary.

PREFACE

This issue of The Mines Handbook covers the many and varied changes which have occurred during 1920, 1921 and part of 1922. The book has been entirely rewritten, and as the index contains 10,004 titles, it will be seen that the task was not a light one.

The book is as full a record of all active mining companies, whether producing, developing or dormant, as we are able to present. The prospects and small mines of today are the children of the industry, some of which will grow to be big factors in the future life of the industry. While the large successful companies are described in other publications, The Mines Handbook is the only work covering the entire field, and its preparation has involved constant unremitting effort in gathering information from every possible source, verifying same if possible and separating the wheat from the chaff. Every description has been revised and wherever possible, official verification obtained.

An earnest effort has been made to get the actual facts and the opinions given, while not guaranteed, are believed to be correct conclusions deduced from the facts available. It is the only book published in America dealing with the mining industry, giving unbiased independent facts and opinions, instead of statements written by interested parties.

When information has been refused or our letters have not been answered, we present the facts as we obtain them. In many cases our opinions are unfavorable or the company is considered to be working the public and not the mine. Many suspicious promotions are however not positively condemned because we lack adequate evidence, but our cautionary remarks should lead our readers to investigate.

Besides the usual details of capital, officers, financial condition, etc., we have given full particulars of the properties owned, or leased, and instead of bare statements concerning operations, as given in the manuals, an account of the geology, development, equipment, production, etc. is given enabling the reader to determine the merit of the mining property, which itself is the only reason for the company's existence and operation.

The editors welcome criticism and information and will be glad to hear of changes, betterments or even of failures.

We feel that the worth of the volume is largely due to the work of Mr. Edward B. Sturgis, the assistant editor, of M. Stencil, and a cheerfully industrious staff.

WALTER HARVEY WEED

July 1, 1922.

AERO BRAND CYANIDE

Although first produced only five years ago, Aero Brand Cyanide has become the principal source of cyanide used for gold and silver ore extraction throughout the American continent.

Thousands of tons have been used in the United States, Canada and Mexico, on practically every variety of gold and silver ores on which cyanide is employed.

There are two basic reasons for the extraordinary development in the use of this product—(1) extraction efficiency always up to established standards or better, and (2) cost lower than for any other grade—both on the basis of 100 per cent sodium cyanide equivalent.

Copy of our booklet, and any other desired information, will be gladly sent on request.

A tougher, stronger, lighter shovel

MO-LYB-DEN-UM Steel is the *hardest*, and at the same time the *toughest* steel made. It has a greater elastic limit than any other steel. And it is lighter for a given strength.

Think of the energy saved and the extra work done in a day, by one man using a shovel just a few ounces lighter. Think of the slow, even, almost imperceptible wear. Think of the battering it will stand without breaking or cracking—just the shovel for mining.

You get all those steel qualities in the new Wood Mo-lyb-den-um mining shovel plus the exacting workmanship and the careful finishing that have always characterized the Wood line.

And mark this—you get the steel qualities in the same degree in *every* Wood Mo-lyb-den-um shovel. Whether you buy a dozen or a thousand dozen, the quality is uniform because our method of handling the steel assures it.

A special folder dealing with the application of Wood's Mo-lyb-den-um Steel Shovels to the mining industry will be mailed upon request.

ORE CARS THAT LAST

HYATT ROLLER BEARING equipped ore cars speed up production. They roll easily, travel faster and last longer than plain bearing cars. Hyatt Roller Bearings eliminate more than 50% of the friction of plain bearings, permit more cars to be hauled every trip, need lubrication but three or four

times a year, and give many years of successful service.

If you hand-tram, these advantages are multiplied.

Lower your cost per ton, cut down repairs and delays and increase production—equip your ore cars with Hyatt Roller Bearings.

THE MINES HANDBOOK

(Descriptions of Mining Companies begins in Chapter IV)

CHAPTER I

GLOSSARY OF MINING TERMS

The following glossary of mining, milling, and trade terms will be found useful by our non-technical readers.

Acicular. Needle-shaped.

Acid. An acid of silicious rock is one in which bases are combined with silica. The antithesis of basic.

Adit. A level mine opening driven into a hill or mountain.

Adobe. Sun-dried brick used in all Latin-American countries.

Air-blast. A violent explosion caused by the escape of air compressed by the settling down of rocks in the upper workings of a mine.

Air-Compressor. A machine for condensing air to a pressure sufficient to actuate machinery. The compressed air is forced through pipes to various parts of the mine, or surface plant, and used in the same way as steam for driving drills, pumps, hoists, etc.

Air-doors. Doors built in mine passageways to stop air currents.

Air-drill. A drill driven by the elastic pressure of compressed air.

Air-shaft. A shaft used to provide ventilation for deep workings. Two shafts, one opening on slightly higher ground than the other, will provide natural ventilation underground, when connected by a drift, the longer shaft becoming a chimney, and the shorter an inverted syphon, down which the air is sucked with great force.

Alkali. Potash and soda are the common alkalis. An alkali is the opposite of an acid; it turns red litmus blue, and forms salts with acids.

Alloy. Two or more metals united mechanically, but not chemically by fusion.

Alluvium. Soil or broken rock deposited by the action of water.

Altered. An altered rock is one that has undergone changes in its chemical and mineralogical structure since its original deposition.

Aluminous. Containing aluminum.

Amalgam. An alloy of mercury with another metal such as gold, silver or copper. Mercury will not amalgamate with iron.

Amalgamation. The process of extracting gold and silver from crushed ores by amalgamation with mercury. The quicksilver is expelled later by heat, and recovered for further use.

Amorphous. Without form.

Amygdaloid. A trap rock, containing vesicles or small rounded cavities filled by mineral matter such as calcite, agate, etc. Rock is spotted and in outcrop often pitted as amygdules weather out, leaving cavity. In the Lake Superior district copper-bearing amygdaloids frequently show native copper in the cavities left by the leaching out of the soft minerals originally therein.

Analysis. A determination of the constituents of a chemical substance.

Anhydrous. Devoid of water.

Anode Copper. Copper from a converter, cast in molds into plates with ears, and used in cells of electrolytic refineries.

Anticline. An arch or fold of rock-strata bulging upwards, in U shape; is the reverse of syncline.

Antigua. In Mexico, is a mine worked by Spaniards or Mexicans at a time so remote—from 50 to 300 years—that particulars have been forgotten; sometimes valuable, but "every antigua is not a bonanza."

Antimonide. An ore of any metal chemically united with antimony.

Apartado. Aparatado de correos is Spanish for postoffice box; usually abbreviated to Ap.

Apex. The top or uppermost part of a vein. In the United States the ownership of the outcrop or apex carries the right to follow the vein downward beneath another's ground, if within one's end lines extended.

Arastra. A circular rock-lined pit in which broken ore is pulverized by stones attached to horizontal poles fastened in a central pillar and dragged around by mules.

Arenaceous. Sandy; carrying silica as sand.

Argentiferous. Silver-bearing.

Argillaceous. Clayey.

Arroba. A Spanish weight of 25.36 lbs. avoirdupois; Portuguese, 32.38 lbs.

Arroya. A gulch.

Arsenide. A mineral composed of arsenic combined with another metal.

Arsenopyrite. A mineral composed of arsenic sulphur and iron; often carries gold or silver also.

Assay. A test of ore or metal to determine the exact amount of any metal or metals contained in it. Usually fire assay; smelting on a small scale.

Assessment Work. The work required annually by the U. S. government, on an unpatented mining claim to keep title.

Attle. Cornish term for waste rock.

Auriferous. Containing gold.

Back. The rock above mine opening like the ceiling of a room. The part or section of a vein between two levels or between a level and the surface.

Bad Air. Air vitiated by powder fumes, noxious gases or insufficient ventilation.

Ball Head or Stamp. A steam stamp, named after its inventor.

Barilla (De Cobre). Spanish term for particles of native copper, cleaned (concentrates). Equivalent to the "mineral" of Lake Superior mines. Used mainly in Bolivia among tin producers.

Barranca. A deep gulch or canyon, with precipitous sides.

Barrel Work. Masses of crude native copper, picked out by hand before ore passes beneath stamp. Was formerly shipped in barrels to the smelter.

Barrow. A wheelbarrow.

Basalt. A dark colored heavy igneous rock, carrying much iron; a trap rock.

Base. Impure; an alkaline element.

Base Bullion. Copper or lead carrying much gold or silver.

Base Metal. Any of the non-precious metals.

Basic. Low in silica; containing more than enough iron and lime to form a good slag.

Basin. A syncline; a trough in the earth's surface.

Battery. A set of stamps; usually five in a stamp mill.

Bearing. The course of direction, as that of a mineral outcrop in degrees, east or west of, north (meridian).

Bed. A seam or layer of stratified rock. Used in some mineral districts for flat veins or lodes.

Bed Rock. The solid rock underlying stream gravel or rock.

Bedded Vein. One parallel with the bedding of the country rock.

Bells. Signals for lowering and hoisting the bucket, skip or cage in a

shaft usually are given by bells, the number of strokes indicating the nature of the load, the place for stopping, etc.

Bit. The cutting end of a boring tool. A steel drill; a short hollow cylinder of soft steel, used in diamond-drilling. The diamonds are set around the inner and outer edges of the bottom of the bit, and cut into the most refractory rocks when the bit is rotated.

Black Copper. Impure copper, smelted, but containing impurities requiring refining.

Black Jack. Sphalerite, zinc blende of dark color.

Blanched Copper. Copper containing a large amount of arsenic, practically forming an alloy.

Blast. (N.) Air forced through tuyeres into a blast furnace or Bessemer converter. (V.) to explode gunpowder or dynamite.

Blast-Furnace. A cupola furnace in which ore is smelted, with the aid of air pumped in under pressure.

Blasted. A blasted miner is one who has been injured by the explosion of dynamite or gunpowder.

Blasting. The breaking of rock by means of high explosives, inserted in holes bored in the rock for the purpose.

Blende. Zinc-blende or sphalerite; sulphide of zinc.

Blind Drift. A drift connected with other workings of the mine at one end only; a cul de sac.

Blind Lode. A lode not outcropping at surface.

Blister Copper. Copper of 96 to 99% purity; applied to product of Bessemer converter.

Blocking Out. Exposing the ore in a mine so that it can be extracted by stoping. Properly speaking, ore is not blocked out for stoping until opened on three sides.

Blossom. The oxidized, softened outcrop of an orebody altered by weathering.

Blout. A mass of quartz, often mineralized, that is often isolated and not connected with a vein; an abbreviation of blow-out.

Blower. A fan used to force air into a mine; a blowing engine.

Blowing Engine. An engine for forcing air into blast furnaces under pressure, often about one pound avoirdupois per square inch.

Blowing In. A smelting furnace is blown in when charge is ignited, fusion begins and the process of reduction by fire is begun.

Blowing Out. A smelting furnace is blown out when the metal and slag are tapped out, and the fires are allowed to die out.

Blowout. An outcrop larger than the orebody beneath; see blout.

Bluestone. Copper sulphate.

Bonanza. Spanish for pay-ore. Usually applied in United States to a body of exceptionally rich ore, especially in silver mines.

Bonnet. The cover or roof of a cage; also a steel casting connecting the piston-rod with the upper end of a stamp-shaft.

Bostonite. A light colored igneous rock composed mainly of potash feldspar.

Bore Hole. A drill hole bored for test purposes.

Bort (Bortz). A form of crystallized carbon between the diamond and the black diamond.

Botryoidal. Resembling a bunch of grapes.

Bottom. A mass of impure copper formed below the matte, in matting copper ores.

Boulders. Loose, rounded masses of rock, larger than cobbles.

Box Canyon. A canyon closed at one end.

Branch. A vein branching off from the main orebody.

Brattice. A screen for the regulation of air currents in a mine.

Breast. The face or innermost end of a mine working.

Breccia. A rock formed of angular fragments cemented together.

Brecciated. Broken into angular fragments partly or wholly cemented together.

Broken. A vein is broken when dislocated by faults.

Broken Ground. Rock strata where the walls are poorly defined and the general formation shattered.

Bucket. An iron or steel bucket used for hoisting men or ore in a mine. In a vertical shaft a bucket swings free, but in an incline shaft the bucket runs on a skidway of plank timbers.

Buddle. A conical table on which ore is dressed; formerly used in Cornwall, etc., and recently applied to a new concentrator.

Bulkhead. A wooden or masonry partition walling off part of a mine or protecting it against soft or creeping ground; also a damming back water.

Bullion. Includes any of the base metals containing gold and silver; also mixture of gold and silver.

Bullion Bars. Unrefined gold and silver melted and cast into bars.

Bunch. A small mass or pocket of exceptionally rich ore.

Bunchy. An orebody containing small scattered masses or bunches of ore.

Cable. The steel wire rope used in shafts for hoisting buckets, skips or cages.

Case. The elevator used in vertical shafts for hoisting ore and rock, and for lowering men, timber, etc.

Calcareous. Limey.

Calcine. To drive off sulphur, carbonic acid gas, or other volatile constituents of an ore by heating.

Calcining Furnace. A furnace for roasting ore to drive off sulphur, previous to smelting; also for heating cement materials.

Calcite. Crystallized calcium carbonate.

Cam. A double-curved tooth, fixed on a shaft, for lifting gravity stamps.

Camp. A mining town.

Canyon. A deep gorge with precipitous walls.

Cap. The top piece of a framed set of mine timbers; copper caps containing fulminate of mercury, used to explode dynamite in blasting rock.

Capping, or Cap-Rock. The rock or other ground above a mineral deposit.

Captain. In most mining fields where Cornishmen are employed the foreman in charge of mining work is termed a captain.

Carbonaceous. Any mineral in which carbon and oxygen are chemically united.

Carbonates. A term commonly applied in the western part of the United States to oxidized lead ores, usually argentiferous.

Carboniferous. Rocks of the coal age of geological eras.

Carga. A Mexican weight of 300 lbs. avoirdupois.

Cartridge. Dynamite put up in cylindrical cases of oiled paper to fit the holes bored by drills.

Casing. The wooden lining of a shaft; an iron pipe put down outside of a diamond drill hole when passing through soft or broken ground, to prevent the hole becoming clogged by matter intruding from outside.

Casting Copper. Impure copper better suited for casting into various forms than for drawing into wires or rolling into sheets.

Cave. A natural opening or vug in a rock formation; the part or complete falling in of a mine.

Caving System. A plan of mining, by which the worked out upper levels and surface are allowed to subside gradually, as the mine workings are deepened.

Cement Copper. Regulus; the loose and usually impure copper deposited on iron by copper-bearing waters.

Cerro. Spanish for a mountain or hill showing rock outcrops.

Chalybeate. Iron-bearing waters.

Chamber. A large stope.

Change House. Building where miners change their clothing before entering a mine.

Change Day. The day when miners are transferred from day shift to night shift, or the reverse.

Chapeau de Fer. French term for an oxidized iron outcrop; gossan or iron hat.

Charge. The amount of ore, flux and fuel fed to a smelting furnace.

Chert. A coarse impure chalcedony or flint.

Chile Bars. Bars of Chilean blister copper, weighing about 200 lbs each.

Chilean Mill. A grinding apparatus with three heavy wheels running around in a circular pan.

Chimney. An orebody of pipe shape in an approximately vertical position.

Chloride. A mineral (or ore) of any metal united chemically with chlorine; usually applied to hornsilver ore.

Chloride. (V.) To work the oxidized part of an ore deposit on a lease or tribute; a term used in the western part of the United States.

Churn Drill. A drill having a churning motion, used for boring oil wells, test-holes, etc.

Chute. A hole usually lined with planks, used for dropping ore or waste to a lower level of a mine.

Claim. The area of 600' x 1,500', or 20 acres of U. S. public land staked off and claimed by a prospector or miner. Size of claims varies in different countries.

Classifier. A machine which separates mineral particles according to their weight.

Clay Gouge. A thin seam of clay separating ore, or ore and rock.

Clay Slate. An argillaceous slate.

Clean-up. The collection or gathering together of accumulated ore or metal in a mill or smelter.

Cleavage Planes. The more or less regular lines along which slates and other metamorphic rocks break into slabs or leaves.

Coarse Jigs. The jigs used to handle the larger sizes and heavier grades of ore or metal.

Coarse Metal. Matte resulting from the first smelting in old-style smelting of oxidized copper ores.

Cobbing. Breaking masses of ore into lumps by hand hammers and sorting ore out.

Collar. The top of a shaft; surface timbering of a shaft.

Colloids. Non-crystalline materials.

Compartment. Mining shafts usually are divided into two or more compartments or sections, separated by framed timbers and planking.

Concentrate. The ore or metal, after part or complete elimination of gangue rock.

Concentration. The process of separating the metallic part of an ore from the waste rock or mineral in which it has been enclosed. It involves crushing to free the metallic particles. The separation may be by gravity, either dry or in water; by oil or froth flotation, or magnetic separation.

Concentrating Table. A table on which a stream of finely crushed ore and water flows downward and the heavier metallic minerals lag behind and flow off in a separate compartment.

Concentrator. A plant where ores are constructed; a jig or machine for separating ore or metal from gangue-rock, the process usually employing a rocking or oscillating motion, aided by jets of water, whereby the worthless gangue is carried off and the heavier mineral remains.

Conchoidal. Breaking with a curved or shell-like face, or fracture.

Concretion. A rounded mass or nodule formed of mineral matter gathered about a center.

Conductivity. Electrical conductivity is measured by the resistance offered to the passage of an electrical current.

Conglomerate. A rock formed of pebbles and rounded boulders cemented together. Sedimentary conglomerates are ancient shore deposits whose pebbles and sands are hardened into rock. Volcanic conglomerates are formed of rounded masses ejected from volcanic vents cemented together by volcanic sand or ash (tuff) rock.

Construction Account. Many mining companies summarize their finances so that the cost of operation is divided into two classes, one being for general working expense and the other for construction, sometimes classed as capital account. It includes new buildings and machinery on surface and frequently new mine openings.

Contact. The junction of two dissimilar bodies of rock, as limestone and porphyry.

Contact Deposit. A mineral deposit found between two unlike rocks, usually applied to an orebody at the contact between a sedimentary rock, limestone, shale or sandstone, and an igneous rock.

Contract. In mining applies to an agreement between operator and workman to pay latter so much per foot for excavating drift or stope. These men are known as contract miners and are usually skilled workmen. They work harder than men on wages, due to the incentive of higher earnings.

Copper Ore. Rock carrying copper mineral or minerals. See detailed descriptions of copper-bearing minerals in Chapter III.

Core. A drill core.

Cornish Pump. A form of mine pump actuated by long rods reaching from surface down mine shafts.

Costeaning. Proving an ore deposit or vein by trenching across its outcrop at approximately right angles.

Counterbalance. Hoisting plants usually are worked in counterbalance for deep shafts. The weight of the descending cage or skip is used to partly offset the weight of the ascending cage or skip.

Counter Vein. A cross vein running at approximately right angles to the main orebody.

Country Rock. The predominant rock about an ore deposit.

Course. The direction or strike of a vein; a stretch of mineralized matter in a vein.

Crab. A hand winch.

Creeping. The slow movement of the rock in mine workings caused by the pressure of super-incumbent and adjacent rock masses.

Cretaceous. A geological age characterized by chalky beds in England, The limestones of Arizona and Mexico are largely of Cretaceous age, and so are the coal-bearing beds of the Rocky Mountain region.

Cribbing. Close-set round timbers supporting an underground roof, or lining a shaft.

Croppings. Outcrops.

Cross-Course. An intersecting vein.

Crosscut. A mine opening, similar to a tunnel, that is driven across the rocks at approximately right angles to the orebody; a drift follows the lode or vein.

Cross Vein. An intersecting vein.

Crucible. A vessel of refractory material in which ores and fluxes are melted.

Crystals. Geometrical forms, with plane faces, of infinite variety, assumed by the majority of minerals.

Cupola. An upright furnace used in smelting.

Cupriferous. Copper-bearing.

Cut. To intersect an orebody; the portion of a working face of mineral removed at one operation.

Cwt. A hundredweight, or 112 lbs avoirdupois.

Cyanide. (V.) To treat crushed rock with a weak solution of cyanide of potash or of soda, dissolving the gold and silver, which is recovered by precipitating it with zinc (or aluminum for certain silver ore.)

Datum Level. The level (usually sea-level or mean level of nearest considerable body of water) from which altitudes are measured in surveys.

Dead Roasting. Sulphide ores are dead roasted when all the sulphur possible to drive off by roasting has been eliminated.

Dead Work. Underground work which is not in ore; the opening of new shafts, drifts, and winzes preliminary to the stoping of the mineral bodies.

Debris. Broken down rock material; the fragmental material broken off by frost, etc., from rock exposures; talus.

Decomposed. Rock or ore altered and leached by air and water.

Decrepitate. To break into fragments with violence, under the blow-pipe or great heat.

Dendrite. A moss or fern-like mineral stain or film usually of manganese or iron oxides.

Denouncement. In Mexico, the formal filing of a claim to mineral land.

Denudation. The uncovering of rock or an ore deposit by the weathering of wind and water, or glaciation.

Dessication. Drying out; loss of water from any given substance.

Detritus. Debris; broken down rock, usually applied to gravel, etc., moved and deposited by streams or glaciers.

Development Work. Mining work performed to develop or expose an ore deposit and to open up new and further amounts of ore.

Diabase. A dark trap rock composed largely of a felt of lathe shaped crystals of plagioclase feldspar, plus ferro-magnesian minerals, etc.

Diamond-Drill. A machine used for boring holes in rocks, with a hollow cylinder for a bit, whose end is set with black diamonds or bort.

Die. The iron block in a mortar, onto which ore is fed for crushing by a stamp.

Dike. A vein of igneous rock; locally a reef or wall of rock projecting above the ground; also applied to the hardened waste material filling fissures.

Diorite. A crystalline granitic rock with predominant plagioclase feldspar.

Dip. The inclination or angle at which a lode or vein pitches downward into the earth.

Dip Compass. A compass having the needle fixed to swing in a vertical plane, so it can be readily deflected by magnetic rocks.

Dirt. Frequently used to designate ore broken underground; for instance, in Joplin district, Missouri.

Disintegration. The breaking down of rock through weathering.

Disseminated Ore. Ore carrying fine particles of metallic minerals, usually sulphides, scattered through rock or gangue matter

Disturbed. An orebody is disturbed when lacking defined walls and settled character.

Dolomite. Magnesian limestone; carbonate of calcium and magnesium.

Donkey. A small auxiliary hoisting engine, usually operated underground and actuated by compressed air, or used for preliminary work at new shafts or exploring pits.

Downcast. A shaft having a downward air current.

Draftage. An arbitrary allowance claimed by some British smelters to cover loss of weight in transport.

Dress. To separate ore from gangue rock by hand or machinery.

Dressing Floor. A floor where ore is sorted by cobbing and picking.

Drift. A horizontal passage in a mine following the lode or vein.

Drift Copper. Native copper found in gravel and clay, far from original orebody, from which it has been carried by glaciers.

Drifting. Opening drifts; driving.

Drill. A steel bar with chisel shaped end used for boring in rock; is

struck on the other end by a hammer, or is forcibly driven against rock by air piston.

Drill-Core. Solid, cylindrical cores of rock cut out by a diamond drill. These form a record of the strata through which the drill has passed.

Driving. Extending a drift horizontally.

Drum. The cylinder of a hoisting engine, around which the rope is wound.

Druse. The crystallized crust lining a cavity in rock or ore.

Dry Ore. Argentiferous ores containing insufficient lead for fluxing in a smelter.

Ductile. That which is capable of being extended in length by tension, as into wire.

Ductility. The capacity of a metal to elongate, when under pull from the ends, without cracking or breaking.

Dump. A place for depositing rock taken from a mine; a pile of ore or rock.

Dyke. See dike.

Dynamite. Nitro-glycerine held in wood pulp, infusorial earth, or some similar article, to render it safer in use. Strength varies according to percentage of nitro-glycerine contained.

Eisener Hut. German for iron hat, or gossan, occurring above an ore-body.

Electrolyte. The solution in which electrolytic separation of metals is carried on.

Electrolysis. The separation and redeposition of metals by electrolytic action.

Electrolytic. Applied to copper means copper made from impure metal by electrical decomposition and redeposition. The bar of impure copper is gradually dissolved and the pure metal redeposited at the opposite pole of the battery, while other metals fall as black slime to the bottom of the tank in which the solution (electrolyte) is held.

Elvan. Cornish name for dikes of greenstone, porphyrite and granite.

Erosion. The wearing away of surface masses of rock and soil by the elements, or by glacial action.

Eruptive. Igneous rocks, brought to the earth's surface or outer crust by volcanic activity.

Escarpment. A rock wall, nearly or quite vertical.

Exfoliation. The separation of thin leaf-like layers from a rock mass.

Exploders. A fulminating cap for setting off high explosives.

Exploitation. The productive working of a mine or ore deposit.

Exploration. Prospecting work; looking for ore.

Face. The inner or working end of any mine opening. A face of ore is the ore shown at the extreme end of a drift, stope, or tunnel.

Fahlband. A zone or band of crystalline rock, carrying finely disseminated metallic sulphides.

Fall of Ground. Rock falling from the roof into a mine opening.

False Set. A temporary set of timber.

Fan. A machine for forcing or sucking air into or out of a mine.

Fathom. Six feet. In stoping, a fathom is a cube of six feet.

Fault. Dislocation of a vein or of a rock stratum.

Feeder. A branch or small vein joining a larger one.

Ferruginous. Containing iron.

Filling. The waste material used to fill up old stopes or chambers; allowing a mine to fill with water.

Filter. A machine for removing the solution or moisture from crushed ore, either by forcing it under pressure or sucking it through canvas or cloth, leaving the muddy ore behind.

Fines. The finer particles of ore or metals saved in concentrating processes.

Finisher Jigs. The jigs used to save the smaller particles of ore in a concentrator or stamp mill.

Fire. The miner's warning cry when a blast is to be set off is "fire."

Fissile. Splitting easily into plates.

Fissure Vein. A fissure in the earth's crust filled with mineral matter.

Flake Copper. Very thin scales of native copper.

Float. Loose ore or rock, away from its parent mass, on the surface.

Float Copper. Drift copper.

Float Ore. Loose ore, often water worn ore, found at a distance from its outcrop.

Flocculent. Resembling tufts; cloudy masses of slightly coherent material floating in a liquid.

Floor. The floor of a drift or other horizontal mine opening; the rock bed beneath an orebody.

Flour Copper. Very fine scaly native copper that floats on water and is difficult to save in milling.

Flotation. A process of concentrating or separating out the valuable metallic sulphide minerals of an ore, by mixing the pulverized ore with acid and oil and agitating it by air or paddles to make a scum or froth that takes up the metallic minerals and floats them off, leaving the waste behind.

Flume. A launder or conduit for carrying water.

Flux. Substances used in furnaces to form a fusible compound with the waste matter and make slag. In assaying, borax, soda, salt, etc., are used; in smelting, limestone, ironstone, etc.

Fluxing Ore. An ore containing appreciable metallic minerals, but smelted mainly because containing fluxing agents required in the reduction of richer ores.

Foliated. Having a laminated structure.

Foot. The foot-wall.

Foot-wall. The rock wall under a vein or underlying inclined mineral deposit.

Fork. The branching of a vein.

Formation. A term used by miners for any particular body of rock, as a granite formation, a sandstone formation. Geologists limit term to groups of rock beds of similar age.

Founders Shares. The few shares issued to the individuals organizing a stock company. In companies owned outright by other companies, founders shares are issued to as many individuals as are required to incorporate and hold the offices required for corporate management, as the laws do not permit a corporation, which is an artificial person, to form another corporation, or to serve as a director of another corporation.

Free. A metal is free when virgin or native, and not combined chemically with any other element.

Free Milling. An ore that readily yields metallic contents by simple means, such as amalgamation or cyanidation.

Freeze. A furnace freezes when the molten charge solidifies.

Friable. That which may be pulverized or broken up easily.

Froth. Foam; a mass of bubbles.

Furnace. A structure for the smelting or roasting of ore.

Fuse. A cotton cord with a gunpowder core, so made as to carry fire to an explosive.

Fusible. That which may be melted.

Fusion. Melting; alloying metals while liquid, through heat.

Gabbro. A rock composed mainly of plagioclase feldspar and iron magnesia minerals.

Gad. A small steel wedge or chisel.

Galena. Lead sulphide; see Mineralogy.

Gallery. A drift or level.

Gallows Frame. The timber or steel framework over the mouth of a

shaft, carrying a sheave-wheel, over which the hoisting rope passes to the engine; now commonly called head frame.

Gangue. The waste rock or mineral in which ore or metallic particles are held.

Gash Vein. A gash-shaped fissure vein, rapidly pinching downward.

Geode. A hollow crystal-lined cavity or the rounded mass containing such a cavity.

Geological Horizon. Rocks of one geological age.

Geology. The science of the formation of the earth and the rocks of which it is made.

Giant Powder. Dynamite.

Girt (or Girth). A horizontal brace in direction of a drift in mine timbering.

Glaciation. The erosive effect produced by glaciers.

Glance. A metallic sulphide showing a bright shining surface. Copper glance is chalcocite; silver glance is argentite.

Glory Hole. A large open pit from which ore is or has been extracted.

G. M. B. Good Merchantable Brands, an English grade of refined copper. Term replaced by "Standard."

Gneiss (pronounced nice). A banded coarse-grained rock often formed of the same minerals as granite, often in patchy and irregular arrangement. May be a diorite gneiss, granite gneiss, etc.

Gob. Waste used to fill worked-out openings.

Gophering. Prospecting work confined to digging shallow pits or starting adits. Term used from similarity of this work to the crooked little holes dug in the soil by gophers.

Gossan. Iron hat; is the leached capping, usually quartzose, showing yellow to reddish brown iron stains found overlying veins.

Grade. The percentage, or value of ore and partly refined metals; the percentage of rise in roads or mine openings driven on an approximately horizontal plane.

Gram. A metric weight of 15.4 grains or 1-500 of a pound avoirdupois.

Granite. A dense, granular rock of igneous origin, composed of varying proportions of quartz, feldspar and mica.

Granulated. In the form of grains.

Gravity Stamp. A stamp, usually set in batteries of five, in which the piston is raised by a cam, the stamp crushing the charge in the mortar by its weight, when allowed to fall.

Greenstone. An altered basic porphyry; usually andesite or diorite.

Grizzly. A screen or grating of heavy iron rails or steel bars, through which the smaller pieces of rock or ore fall through.

Groundsill. The bed-piece of a set of mine timbers.

Guides. Perpendicular square wooden strips or stringers for guiding cages in vertical shafts. Cables or steel rails are used instead in some mines.

Gut. To rob, or extract, only the rich ore of a mine.

Hade (American). Inclination or pitch of a vein, measured from the vertical, while dip is measured from the horizontal. Becoming obsolete, and should not be confounded with rake of an ore-shoot.

Hanging. The hanging wall; the rock on the upper side of a mineral vein or deposit.

Hardinge Mill. A cone-shaped cylinder, resting horizontally and half filled with pebbles, which fall and crush ore when mill is revolved.

Haulage Plant. A mechanical installation for the underground tramming of rock, operated by ropes, compressed air, or electricity.

Head or Heading. An underground level or airway in a mine; also water pressure.

Head Frame or Gallows Frame. A framework of 2 or 4 legs, made of wood or steel, fitted with sheaves, over the mouth of a shaft.

Heap-Roasting. Burning the sulphur out of ores piled in heaps, with a small amount of wood or other fuel.

Heave. A horizontal dislocation of a vein or bed caused by a fault. Also applied to the rolling out of line of a lode in making depth.

Hectare. An area 100 meters on each side; called *pertenencias* in Mexico; equals 2.471 acres.

Hoist. An engine for raising ore from a mine and for lowering men and material.

Holing Through. A drift or other mine opening is holed through when a connection is made between two separate sections working toward each other.

Horizon. The sky-line, commonly used in the sense of absolutely flat, as shown by a spirit level. Geologically, all rock strata of the same geological period.

Horse. A mass of country rock enclosed in a mineral vein or deposit.

Horsepower. A measure of power of an engine. One horsepower is rated as equivalent to raising 33,000 lbs. *avoirdupois* to a height of one foot in one minute.

Horse-Whim. A windlass operated by horses.

Hot Blast. Heated air supplied to a blast-furnace.

Hungry. Nearly or quite barren.

Hunt & Douglass Process. A leaching process, using chloride of iron and salt, to dissolve oxide ores of copper.

Huntington Mill. Somewhat similar to a Chilean mill.

Hutch. See *Jig*.

Hydrated, Hydrous. Containing water combined chemically.

Hydro-Metallurgy. The reduction of ores by wet processes.

Igneous. Rocks consolidated from a molten state; includes not only volcanic rocks but those deep-seated rocks, hardened under cover, which have been exposed to view by erosion, or artificial openings.

Impregnated. Containing metallic minerals, scattered or diffused through the mass; properly used in referring to country rock carrying mineral similar to that in the vein.

Incrustation. A solidified coating, usually crystallized.

Infiltration. The deposition of mineral matter from percolating water.

Ingot. A mass of metal cast in a peculiarly formed mold; applied only to gold, silver, or copper. Iron and lead are cast in pigs.

In Place, In Situ. Rock or ore that is in the position where deposited by nature.

Intrusive. Igneous rock masses pushed up through other and older rock formations.

Iridescent. Showing the colors of the rainbow.

Iron Hat. Gossan; outcrop of iron-stained material over an ore deposit or vein.

Jack. A miner's term for sphalerite; is called black jack, ruby jack, or rosin jack, according to color.

Jig. A machine for concentrating ore; i. e., separating the metallic mineral from the waste, by means of oscillatory or vibratory motion, aided by jets of water. The heavier minerals sink, and the lighter rock or gangue is carried off by the current.

Jump. To locate and take possession of mineral lands held or claimed by another party.

Kaolin. China clay.

Keweenaw. Pertaining to or of the Keweenaw formation of rocks in which the Lake Superior copper veins occur.

Kibble. A bucket used for hoisting material in a shaft.

Kilo or Kilogram. A metric weight of 2.2046 lb.

Kilometer. 0.621,376 miles. For rough computations may be figured as 3/5 of a mile.

Kin. A Japanese weight of 1.31 lb. *avoirdupois*.

Kindly. The appearance of rock carrying or promising to carry good mineral value.

Ladderway. The series of ladders giving ingress and egress to a mine; the compartment in which the ladders are located.

Lagging. Timber, usually of small diameter, placed over the cap-timbers of incline shafts and drifts, to prevent damage from falling rock.

Lamina. A thin plate; plural is laminae.

Lamellar. In thin sheets of laminae.

Lander. The top man at the mouth of the shaft who receives signals from below, and attends to the unloading of rock sent up in buckets, skips or cages.

Launder. A wooden flume or sluice, used to convey water, or tailings held in suspension in water.

Lava. Rock from volcanoes.

Leach. To dissolve metals out of ore by water or acid, or both.

Leaching. The process of extracting a metal from its ores or salts by treatment with a solvent, such as weak acid.

Lead. (Pronounced leed). A mineral body.

Leader. A small vein running into a larger one.

Ledge. The solid vein or lode.

Leg. An upright timber supporting the cap of a set of timber.

Lens. An orebody of lenticular form.

Lenticular. Having the shape of a double convex lens.

Level. A horizontal opening in a mine, usually connected with a shaft. Levels are commonly opened at stated intervals as depth is gained—usually at 100 feet in modern mining practice. The word "level" frequently is used interchangeably with the word drift, but is more comprehensive. Both drifts and crosscuts may be opened on a level, though a crosscut is not a level.

Limestone. A rock composed of lime carbonate.

Lixiviation. The process of leaching out the metallic contents of ores.

Locate. To locate a mining claim is to file a notice claiming ownership at the point where mineral is discovered, and to put up stakes or monuments at the corners of the rectangular area claimed.

Location Work. Labor required by law to be done on mining claims within 60 days of location, in order to establish ownership.

Lode. A metalliferous vein. In Lake Superior region refers to the mineralized beds; is used generally as synonymous with vein; used by geologists as meaning an aggregation or congerie of mineralized veins.

Long Ton. An English ton of 2,240 lbs. avoirdupois.

Low Grade. Ore whose recoverable value yields but slight profit per ton. Carrying mineral value but sparingly.

Magma. An originally molten mass of rock coming to the earth's crust from depth.

Magmatic Segregation. The process by which the different constituents of molten rock masses crystallize at varying temperatures with a tendency to separate themselves, so far as circumstances allow, from the other compounds.

Malacate. A horse whim with vertical drum used for hoisting in Mexico. Sometimes is called a Zacatecas malacate.

Mass. Copper; a solid chunk of native metal.

Massive. Rock without defined lines of cleavage; ore occurring without appreciable gangue, as contra-distinguished from ore disseminated throughout a gangue.

Matrix. The rock between imbedded objects, such as a particle or mass of ore or native metal. More rarely a metallic mineral is the matrix cementing together rock particles.

Matte. A furnace product composed of copper and iron sulphides, produced by shaft or reverberatory fusion. Usually contains 30-40% copper, but varies from 20-60%. Is blown to blister copper 98-99% fine in bessemer converters.

Matting. The process of smelting sulphide ores into matte.

Mesa. Spanish for tableland or plateau.

Mesh. The size of openings in a screen.

Metalliferous Carrying metal.

Metallurgy. The science and practice of reducing metals from ores and minerals.

Metamorphic. Rock that has been changed from its original condition by pressure, chemical action, heat, or other causes.

Metamorphosis. The process by which changes in structure are affected in a rock form by heat or percolating waters.

Metasomatic. Replacement, particle by particle, so that original structure is often preserved.

Meter or Metre. 39.37 inches.

Metric Ton. A weight of 2,204.6 lb avoirdupois.

Mica. A scaly transparent mineral. Biotite is brown or black mica; muscovite or isinglass is the clear mica used in stoves, lanterns, electric apparatus, etc.

Mill. Works for treating ores without smelting.

Milling. Dressing ore in a mill; also dumping ore in a winze to be drawn off into cars or wheelbarrows on a lower level.

Mill Run. The treatment of a definite quantity of ore in a mill; also the result or yield thereof.

Mill Test. The determination of the metallic contents and recoverable values in any given ore by the milling of a sufficient quantity to afford average milling conditions.

Miner. In strict construction, the man that does the drilling and blasting in a mine. In a broader sense, all men working underground.

Mineral. Ore or rock containing metal. In the Lake Superior district the term mineral has a special use, being employed to designate the concentration of native copper, with its small amount of admixed amygdaloid or conglomerate, as it comes from the mill, before going to the smelter.

Mineral Belt. The strip or zone of mineralized territory in a given formation or district.

Mineral Right. The ownership of mining rights under the surface of land owned by another holder. Mineral rights sometimes are reserved in selling land in some districts.

Mineralized. Carry metalliferous minerals.

Miner's Inch. The amount of water that will flow through an opening one inch square under a six-inch head, which is 2,274 cubic feet in 24 hours, or 94¾ cubic feet per hour, equal to 655 wine gallons or 593 imperial gallons hourly.

Mining Engineer. Graduates of technical mining schools are given the degree of engineer of mines and sign the letters E. M. after their names. The letters M. E. stand for mechanical engineer, when given by a school, but are often used by men engaged in mining, who lack scholastic degrees, as an abbreviation for mining engineer, or mining expert.

Missed Hole. A drill hole, charged with explosives, which fails to be set off by the fulminating cap.

Moil. A steel bar, like a drill, except that it is sharpened to a point instead of having a cutting face.

Molybdenite. A graphite-like, flaky lead-colored mineral found in some ores; composed of molybdenum and sulphur.

Momme. A Japanese weight equal to 3.75 grams or 2.4113 pennyweights.

Monocline. Upturned beds of rock that have a practically uniform dip.

Monzonite. A granitic rock intermediate between diorite and granite.

Morgen. A South African land measure—2.1165 acres, or 1.44 claims.

Mortar. An assayer's mortar in which rock or ore is crushed with a pestle. A mortar is the box, about the stamp of a mill, in which the ore is stamped and crushed.

Mother Lode. The main lode of the district. In America applies to the mineralized belt of the principal California gold region.

Mouth. The surface entrance or opening of an adit, tunnel or shaft.

Mucker. Ore shoveller, who loads the mine cars and in most mines is also a trammer, pushing the cars to the shaft or tunnel mouth.

Mullock. Australian for waste rock broken underground.

Mundic. Pyrrhotite, magnetic pyrite; iron sulphide.

Mynpacht (South Africa). A part of (10%) of a farm, which the owner has the first right to locate or peg out, when the farm is proclaimed a public goldfield.

Nickeliferous. Carrying nickel.

Nodule. A small concretionary, rounded mass of mineral matter.

Non-Conformable. Rock strata not associated originally in the position now occupied.

Nugget. A lump of native metal; usually applied to gold.

Open-Cast, Open-Cut. A mine worked as a quarry, or pit open to the sky.

Ore. Metallic minerals; mineralized material or rock, holding metallic minerals. Called pay ore when it can be profitably worked; low-grade ore when it yields but slight profit.

Ore-Car. A mine car for carrying ore or waste rock.

Ore-Chute. An opening in ore or rock through which ore is dropped downward. Also used for ore bins and pockets.

Ore Dump. A heap or pile of ore at the tunnel mouth or top of shaft.

Ore-Shoot. An orebody or portion of a vein carrying high-grade, or payable ore. Usually has a vertical or diagonal dip on the plane of the dip of the vein.

Orthoclase. A white, or pale-colored feldspar composed of silicate of potassium and aluminum. Occurs as white crystals or spots in porphyry.

Outcrop. The apex, or part of a vein or mineral deposit that is exposed at the surface of the earth.

Outlier. An isolated mass of rock or group of rocks lying at a distance from the main body, and separated therefrom, on the surface by a different rock formation.

Output. Production.

Overburden. Waste material, usually drift or alluvium above the solid rock, or orebody.

Overhand Stopping. Removing ore in ascending steps.

Oxide. An ore of any metal or metals chemically united with oxygen.

Oxidize. To unite with oxygen. Many minerals and most metals oxidize with greater or less rapidity when exposed to air or water.

Panning. To wash gravel, etc., in a pan, so that the sand and gravel is loosened and thrown out and the gold or heavy metallic minerals left in the pan.

Patent. A deed given by the Government, to mineral lands.

Patio. A walled yard with paved floor in houses and mine plants, in Mexico and other Spanish countries.

Paystreak. The rich band, part, or zone in a vein or ore deposit which carries the profitable, or pay ore.

Pegmatite. Very coarsely grained granite; a giant granite.

Penthouse or Pentice. A shed-roof erected in the bottom of a shaft, when sinking, to protect miners from accidental fall of rock, timber or tools from above.

Peroxide. The oxide of any metal containing the greatest proportion of oxygen.

Pertenencia. The unit of a mineral claim in Mexico; 100 meters square, or one hectare, 2,471 acres.

Peter Out. To pinch out, or feather out and end.

Petrology. The study of rocks by thin sections and microscope.

Phosphate. An ore of any metal or metals with which phosphorous and oxygen are chemically united.

Picul. A Chinese weight of 133½ lb.; commonly used in the Orient.

Pillar. A section, or block of ore left in place to support shafts or roofs.

Pinching. The narrowing of a vein.

Pinching Out. The narrowing of a vein to extinction.

Pipe Vein. An orebody of chimney form.

Pitch. The angle and direction of dip or rake of an ore-shoot in a vein. If a vein dips east, an ore-shoot may pitch at a flatter angle than the vein, to the N. E. or S. E.

Plain. A flat or nearly level country.

Placer. A deposit of metal-bearing gravel or alluvium.

Plant. The machinery equipment of a mine or reduction works. In general use the term includes buildings, housing, machinery.

Plat. To draw to scale. In Lake Superior and Australian usage it is the station or enlargement of a level, to give extra space for loading and unloading the cage, skip, or bucket.

Plumbiferous. Carrying lead.

Plutonic. Rocks of deep-seated, igneous origin.

Pocket. An orebody of small extent; a natural underground reservoir of water; a cavity cut in the rock underground to hold ore; a bin at shaft house or mill, in which ore, flux, or fuel is stored.

Pockety. Carrying only occasional bunches of good ore.

Poling. The process of deoxidizing molten copper and tin in a reverberatory furnace by stirring with long poles of green timber.

Poll-Pick. A tool having a pick on one end, and a poll, or hammer head, on the other.

Pood. A Russian weight of 36.112 lb. avoirdupois.

Poppet-Head. Framework or gallows frame over a shaft, for sheave-wheel and hoist rope.

Porphyritic. Carrying isolated crystals in a ground mass, like plums in a pudding.

Porphyry. Properly, is any igneous rock showing phenocrysts, i. e., distinctly isolated crystals in a dense or crystalline matrix. Porphyry may be granite, quartz, or one of several other rocks.

Pound. The troy pound alone is used for gold, silver, and platinum only. It is 0.82286 of an avoirdupois pound. A pound of gold weighs 12 troy ozs. or 5,760 grains and the avoirdupois pound 7,000 grains.

Primary. The first; primary ores are those first or originally formed in an ore deposit, before alteration began. Also applies to the oldest rock formations.

Prop. A heavy timber placed with its foot against the floor of a mine opening, and its top against the roof, to support the rock above.

Prospect. To seek for mineral; a new mining property that has not yet been developed enough to be called a mine.

Prospector. A searcher for mineral deposits.

Protioxide. The oxide of any metal containing the least proportion of oxygen.

Puddingstone. A coarse conglomerate showing rounded pebbles.

Pulp. Pulverized ore or concentrate.

Pulverize. To crush to powder.

Pulverulent. That which may easily be reduced to powder.

Pyrrhotite. Iron sulphide, often called mundic or magnetic pyrite.

Pyrite. Iron disulphide; fool's gold.

Pyrites. A local term for pyrite and for sulphide ores; more properly, iron disulphide.

Pyrolusite. A black manganese ore containing 63% manganese.

Quarry. An open pit, of varying size, sometimes several acres, from which stone or ore is mined.

Quarter-Section. In the United States a quarter of a square mile; 160 acres, laid out in a parallelogram, each side of which is one-half mile in length.

Quartz. Crystalline silica; any hard silicious ore, in miners' usage.

Quartz Claim. In the United States mining claims are of two classes: placer claims, carrying mineral, usually gold, in alluvium; and quartz lode claims, any prospect carrying metalliferous bodies in place.

Quartzite. An altered (metamorphosed) crystalline sand-stone.

Quartzose. Rock having much quartz in its composition.

Quicksand. Fine sand, which flows easily when wet.

Ragging. Cornish for rough cobbling; broken lumps of ore of medium size.

Raise or Rise. A shaft or winze that is being opened from below. Sometimes called upraise or uprise.

Rake. The pitch of an ore-shoot on the plane of the vein. Also applied to cross veins, which are sometimes called rake, or counter veins.

Range. A mineral belt; also in many American states a surveyor's term for describing and locating lands. The state is surveyed in sections, towns, and ranges. A township comprises 36 sections and is a square of six miles. Each township receives a double number, one for the town and one for the range. The towns are numbered consecutively from south to north, and the ranges are similarly numbered from east to west. Thus T. 2 N., R. 5 W. means Township 2 north or 12 miles north and Range 5, or 30 miles west of the State meridian.

Reamer. A tool like a bit, used to enlarge a hole previously drilled.

Reduction. The separation of metals from their ores.

Reef. A quartz vein or lode; a projecting ledge or inclined wall like an outcrop. The gold deposits on the Rand are termed reefs.

Refining. The elimination of impurities from crude metals, or separation of metallic alloys obtained in the reduction of ores.

Refractory. A refractory ore is one that cannot be smelted or otherwise treated by ordinary metallurgical processes. A refractory stamp-rock is one that is pulverized with unusual difficulty.

Regulus. The metallic material that separates and settles in the bottom of a pot of molten matte, or slag.

Reniform. Kidney-shaped.

Reserves. The amount of payable ore, developed and ready for extraction, or blocked out ahead of immediate requirements.

Reverberatory Furnace. A smelting furnace in which the flame from the grate below is reflected back by the roof on the charge of ore.

Rise. A raise or opening driven upward.

Roasting. Driving off sulphur and other volatile elements from ore, by heat. When done in a furnace, under great heat, the process is called calcining.

Rob. To remove pillars and other supports from a mine for their mineral content, regardless of the future of the property.

Rock. Lake Superior; applied to ore mined and ready for the stamp mill. In English practice ore is called "Stone." More properly applied to the stony matter surrounding ore, or constituting the earth's crust; is a synonym for stone.

Rock-Crusher. A machine for reducing rock or ore to smaller sizes. Crushers are of two types, the jaw and the gyratory. The jaw-crusher works by means of swinging jaws; the gyratory operates on the plan of a coffee-grinder, only that the motion is somewhat eccentric.

Rock-Drill. A power drill.

Rock Filling. Waste rock, used to fill up worked-out stopes to support the roof.

Rock-House. Lake Superior; the building (usually the one over the shaft) where copper-bearing ore from the mine is dumped from the ore skip

(or bucket), is screened, crushed and stored in a bin, ready for shipment to the mill.

Rolls. Heavy steel rolls, worked in pairs, like a clothes wringer, for crushing rock and ore.

Roof. The rock overhead in a mine opening.

Room. Similar to a stope; term usually applied to mines working mineral bodies lying nearly horizontally.

Royalty. A percentage of the ore or value thereof paid to the land owner by the lessee of the mine; often a fixed sum for each ton of ore extracted.

Run. See mill run. A bar or course of ground better or worse than the average value of the mine.

Running Ground. Superincumbent material that breaks off readily and falls into the mine openings.

Saddle. Depression or U-shaped fold; the reverse of an arch or anticline.

Safety Cage. A cage furnished with automatic appliances to stop its descent in case the cable breaks.

Salting. Placing rich foreign ore, minerals or substances in a mine to deceive intending purchasers or other interested parties.

Sample. A specimen of ore from a mineral deposit. A selected sample is misleading because containing far above average value, and splendid samples frequently come from the poorest mines. An average sample is what its name purports—if it be an average sample.

Sampling. Cutting a representative part of an ore deposit, which should truly represent its average value. Most usually a trench-like cut 4 inches wide and 2 inches deep, cut into the clean face of ore and across its course. Honest sampling requires good judgment and practical experience.

Sand Pump. A pump, usually centrifugal, designed to lift water carrying large quantities of coarse tailings or sand in suspension.

Sand. Tailings from the stamp mills of Lake Superior copper mines; in fact, from any mills.

Sand (or tailings) Wheel. A large wheel, having buckets on its inner perimeter, for elevating water carrying stamp-sand.

Scale Copper. Copper in very thin flakes.

Schist. A crystalline, usually micaceous rock of foliated structure, made up of superimposed flattened particles.

Scoria. Slags from copper smelters; volcanic ash.

Scoriaceous. Of the nature of scoria.

Scram. To search for ore in a mine that is apparently worked out and to extract it.

Screen. A grating of perforated metal or woven wire.

Seam. A thin layer of rock or ore.

Secondary Enrichment. An enrichment of a vein or an orebody by material of later origin, often derived from the oxidation of decomposed overlying ore masses. Nature's process of making high-grade out of low-grade ores. First discovered by Weed and announced by publication in Geol. Soc. of America program, Dec. 8, 1899. Confirmed by Emmons and by Van Hise, Feb., 1900.

Sectile. Easily cut.

Section. A field or district; also, in the U. S. a square mile of land.

Sedimentary. Rocks formed by deposition from water, as distinguished from rocks formed by igneous action.

Selvage. A clay seam along which parting occurs; also called fluccan.

Set. A framed form of timber, used for supporting ground in a mine.

Shaft. A pit or deep mine opening.

Shaft-House. A building at the mouth of a shaft, where ore or rock is received from the mine.

Shale. A hardened clay with fissile structure.

Shear-Zone. A belt in which the rocks are crushed by many parallel fissures.

Sheave. A grooved wheel, notched to carry rope; an open pulley.

Shift. A miner's work period of 8 to 10 hours' time; a force of men employed on one turn.

Shift Boss. A mine boss, or under-captain, in charge of a gang or shift of miners.

Shoot. See ore-shoot. To fire or explode dynamite in holes drilled for that purpose. An erroneous spelling for chute.

Short Ton. A weight of 2,000 lb. avoirdupois.

Shot. A blast of some explosive.

Shot Copper. Small rounded particles of native copper, somewhat resembling small shot in size and shape.

Shrinkage Stoping. Taking out ore by blasting it down on a heap of broken ore. Working space for drilling is kept open by drawing out part of the ore from an opening beneath. Is a method of overhead stoping.

Silica. Quartz, a compound of oxygen and silicon. Ordinarily sand is composed largely, if not wholly, of silica.

Silicate. A mineral composed of any metal or element chemically united with silica.

Silicious. Containing much silica or quartz.

Sill. The floor-piece of a set of mine timbers.

Sinking. The process of deepening a shaft or winze.

Sinking-Pump. A movable pump, usually vertical, hung in a shaft, and lowered, as the shaft is deepened.

Skip. An iron box, open at the top, running on guides, on four wheels, and hauled by a cable; used for hoisting ore and rock, and for lowering timber.

Skip-Road (or Way). A track of T-rails, spiked to wooden sleepers, on which a skip runs.

Slag. The melted rock or waste separated from the metal in a smelting furnace.

Slice. To remove ore in mine in pillars, or by successive slices.

Slickenside. A polished rock surface, showing striations produced by the opposing walls of a fracture rubbing and grinding against each other in the movement produced by earth stresses.

Slide. A bedding fault, or slipping caused by the subsidence of the overlying rock formation; also applied to masses of loose rock, or ore on a mountain slope.

Slime. Exceedingly small particles of rock and mineral held in suspension in water. This mud is called slum.

Slime Table. A circular revolving table, on which slime flows and minute particles of mineral are saved.

Slip. A fault.

Sludge. The mixture of rock and water, or slime, formed by a diamond-drill.

Sluice. A wooden trough, box, flume, or launder.

Smelter. Works where ores or crude metals are reduced by fusion.

Soapstone. Steatite; a soft unctuous rock.

Soft Ground. Heavy ground; rock about underground openings that does not stand well and requires heavy timbering.

Sollar. A platform or ladder landing in a shaft.

Spathic. Containing carbon dioxide; a carbonate.

Specimen. A sample of mineral selected because typical, unusual or exceptionally rich.

Speiss. Impure metallic arsenides produced in copper smelting; ore particles finely disseminated through a rock, usually occurring as impregnations.

Spelter. The common term for metallic zinc.

Sphalerite. Zinc blende; zinc sulphide; the most common zinc ore mineral; is often found associated with galena and chalcopyrite.

Spile. Lagging driven ahead of the regular timbering in treacherous ground.

Spitzkasten. Pyramidal boxes wherein ores are concentrated and sized by a jet of water fed from below.

Spoon. A long-handled spoon, used to scrape out drill holes.

Sprag. A prop or cross-timber set to secure the hanging wall in a stope. A short piece of wood used to block the wheels of a mine car.

Spur. A short, small branch from a vein.

Square Sets. A frame of mine timbers with mortised and tenoned sill top piece and uprights of equal length, joined at right angles.

Squib. A fuse.

Squeeze. The slow settling down of the roof in mine workings without fracture.

Stack. The chimney of a furnace; usually employed to designate a number of furnaces, when used in the plural.

Stamp-Mill. A mill for crushing and concentrating minerals by stamps and jigs, etc.

Stamp-Rock. Ore containing fine copper that must be crushed and jigged to recover the metal. Use restricted to Michigan.

Stamps. Machines to crush rock or ore by heavy blows.

Stamp-Shoe. The heavy chilled iron casting attached to the lower end of a stamp piston, and does the actual crushing of rock in a stamp-mill. It hits against a round steel block called a die.

Stanniferous. Tin-bearing.

Station. A chamber in a shaft, cut out for pumps, landing place, etc.

Station-Pump. A mine pump permanently placed, as distinguished from a moveable sinking-pump.

Steatite. Soapstone; a greasy mineral, having a talc base.

Step-Fault. A series of faults, rising like steps.

Stockwerk. A mass of rock penetrated by numerous small stringers of ore, the entire mass averaging sufficiently rich in metallic material to warrant its mining and treatment.

Stone. See Rock.

Stope. (V.) To mine or extract ore. (N.) The workings between levels or drifts, in which ore is broken down in a series of chambers and taken away for treatment.

Stoping. Breaking down the mass of pay-rock or ore above a drift. When stoping in an orebody of average width, miners can break rock much more quickly and cheaply than when driving the drifts.

Stoping Ground. Part of an orebody opened by drifts and raises and ready for breaking down.

Strata. The successive beds or layers of sedimentary rocks.

Stratified. Having regular layers of varying rock varieties.

Stratum. A layer or bed of rock.

Streak. The color given by a mineral when scratched or when rubbed on porcelain.

Strike. The horizontal direction of a vein, measured by the points of the compass; a discovery of ore.

Stringer. A thin seam of ore.

Strip. To remove the overburden of waste, drift, or alluvial soil overlying an orebody.

Stripping. The waste or overburden above an orebody.

Structure. The form of a mineral, whether granular, crystalline or amorphous.

Stull. The top-piece of a set of mine timber. A timber prop supporting the roof of a mine opening.

Sulphate. A chemical compound (or a mineral) of a metal combined

with sulphuric acid; an ore of any metal or metals with which sulphur and oxygen are united chemically.

Sulphide. A mineral or ore of any metal or metals with which sulphur is combined chemically.

Sulpho-antimonite. A mineral in which sulphur and antimony are united chemically with a metal.

Sulpho-arsenite. An ore mineral of any metal or metals with which sulphur and arsenic are united chemically.

Sulphuret. A sulphide; term becoming obsolete, but used in California.

Sump. The pit at the bottom of a shaft, where water collects; also in cyanide plants.

Surface Rights. The ownership of the surface of land only, where mineral rights are reserved.

Swabstick. A stick used to clean out drill-holes.

Syncline. Canoe or U-shaped fold of rock layers; the reverse of an anticline.

Table. A concentrating machine for separating finely crushed particles of ore from gangue.

Table Land. A plateau.

Tailings. The sandy and gravelly residue or refuse matter from a concentrating mill.

Tamp. To closely pack clay or other sticky earth into a drill-hole above the cartridges, to give greater force to the blast.

Tap. To draw off molten metal or slag from the vent of a furnace.

Taper Off. Cornish for stopping work temporarily.

Tenor. The percentage or average metallic content of an ore, matte, or impure metal.

Terrero. Spanish for heaps of partly leached ore.

Tertiary. The third great geological period preceding the present Quarternary period.

Test-Pit. A shallow pit sunk to look for mineral.

Texture. A rock structure; is fine or coarse grained, porphyritic, etc.

Throw. The displacement of a vein caused by faulting.

Timber. The wooden logs and sticks used for underground supports.

Timberman. One who works at timbering a mine.

Ton. Long, 2,240 lb.; metric, 2,204 lb.; short, 2,000 lb.

Tonelada. Spanish for long ton.

Township. Abbreviated T. or Twp.; see Range.

Trachyte. A light-colored volcanic rock made of alkaline feldspar with black mica and hornblende.

Tram. To load rock or ore in cars and push same to the shaft, a tramway.

Trammers. Men who load and tram the broken rock underground.

Trap. A dense gray, blue or greenish rock of volcanic origin; usually an old and altered basaltic rock.

Trend. The general direction of a mineral body.

Trestle. A frame-work of timbers, carrying tram-tracks.

Tribute. The money per ton or percentage of ore extracted which is paid by lessees to owners for the privilege of working a mine.

Tripod. The three-legged iron frame on which the working parts of a power-drill rest; a three-legged wooden frame over the mouth of a pit or shaft.

Trommel. A revolving cylindrical sieve for sizing ore.

Troubled. A vein is sometimes called troubled when disturbed or faulted.

True Fissure Vein. All mineralized fissures are true fissure veins. Term commonly used as meaning a fissure vein with promise of holding to great depth, in contra-distinction to a gash vein.

Tsubo. A Japanese measure of 6 feet square, equalling 36 square feet.

Tube-Mill. A steel cylinder half lined with flint pebbles or steel balls, which crush ore when the tube is revolved.

Tufa. A limestone formed by spring waters. Name frequently used in place of tuff.

Tuff. Volcanic ash, cinder, and lapilli, ejected from volcanic vents and deposited in layers from air or water and solidified by time and superincumbent pressure. Name also used for coarser volcanic debris, including breccia and conglomerate.

Tunnel. A practically horizontal opening entirely through a hill or mountain. Term is commonly used instead of adit, which is a horizontal gallery having only one opening to surface.

Turbine. The most efficient form of water-wheel; also a new form of steam-engine in which the entire movement of the power-producing parts is rotary instead of reciprocating.

Tuyeres. The pipes in a furnace wall by which air is supplied under pressure, to either blast furnaces or bessemer converters.

Unconformable. With a break between rock beds lying at different angles or with erosion surface between.

Underhand Stopping. Cutting out ore from the floor of an opening. Removing ore in descending steps.

Underlay, Underlie. The downward extension of a vein or bed beneath the ground. Is technically the horizontal departure of a vein from the vertical measured in feet, per fathom (or 100'). Mineral bodies lying under a given tract, though not outcropping on surface.

Unpatented. Mining claims to which a deed from the U. S. Govt. has not been received. They are subject to annual assessment work, in order to maintain ownership.

Unstratified. Rock that is not bedded in layers.

Unwater. To free from water; to pump out or drain a mine.

Upcast. A shaft having an upward air current.

Upraise. A raise, an upward opening in a mine. Term almost obsolete, "raise" being preferred.

Van. To wash ore on a shovel, like panning.

Vanner. A concentrating table or machine for dressing ore by means of vibratory motion, aided by jets of water to carry away waste rock.

Vara. A Spanish-American measure of length, of 33 inches.

Vein. A rock fissure filled with mineral matter; a mineral body having defined walls. See contact vein and fissure vein.

Veinstuff. Vein filling; also used for gangue.

Vertical Shaft. One sunk at an angle of 90° with the horizon, or directly downwards toward the center of the earth.

Virgin. Native metal occurring elementally, as distinguished from ore minerals, which are chemical compounds.

Vitreous. Of a glassy nature.

Volatile. That which can be driven off as vapor, by heat.

Vug. A cavity in the rock; usually lined with a crystalline incrustation.

W. The chemical symbol for tungsten.

Wall. The side of a mine opening or drift. The waste or country rock on each side of a vein.

Wall-Plates. Are the two side pieces of a set or frame of shaft timbers, as distinguished from the end pieces.

Water-Jacket. An outer casing for a blast-furnace, in which water circulates, to keep the metallic furnace-walls from melting because of the intense heat of the charge.

Water-Level. The level above which water does not rise, when a mine is allowed to fill. The water-level is often the point below which altered and enriched ores are succeeded by base unaltered sulphides.

Weathered. Changed by long exposure to air and water.

Wet Process. Leaching or lixiviation.

Wheal. Cornish for mine.

Whim. A windlass with a vertical drum revolved by horse-power and used for hoisting.

Whip. A fixed pulley with hoisting rope passed through it and pulled by a horse or mule.

Wilfley. A Wilfley concentrating table; about 20,000 in use throughout the world.

Winch. A windlass.

Winding. Hoisting with rope and drum.

Windlass. A device for hoisting from a pit or shaft, by means of coiling a rope or cable around a drum, with crank handles.

Winze. A shaft, usually short, extending downward from the floor of a mine opening.

Wire Bars. Refined copper cast into bars for wire drawing.

Workings. The underground openings of a mine.

Wulfenite. See molybdenum in minerals.

Zinc Blende. Sphalerite; sulphide of zinc.

Zinckiferous. Carrying zinc.

Zinc Sulphide. A compound of zinc and sulphur. See minerals.

Zn. The chemical symbol for zinc.

CHAPTER II

MINERALOGY OF THE ORE MINERALS

ORE MINERALS:

Ores as mined are very seldom composed entirely of ore minerals, usually consisting of a mixture of quartz, or other non-metallic mineral, or of altered rock and metal-bearing minerals. The mixture constitutes ore when it contains enough value, in one or more metals, to pay for the cost of mining, concentrating, transportation, smelting, and marketing. As this cost varies with each mine and locality, and the price of every metal, save gold, also fluctuates, there is a wide range of value to ore. The Alaska gold quartz mines operating on a gigantic scale can mine, mill, and extract their product for less than \$1 per ton, whereas many smaller mines cannot make a profit on \$3 ore of similar character. Copper ores show a much greater margin, between the costs at the Utah Copper Co. and those of small vein mines.

In the following pages I have given a list of the more important ore minerals of each metal. It is intended only for general reference, the minerals being arranged under the name of the metal. For sight tests and recognition of ore minerals, see "Practical Field Mineralogy," Farrell-Moses, 1912.

ALUMINUM.

Bauxite. 74% alumina. Hydrated alumina. Regarded as a hot spring deposit. Occurs in pockets in clay in Arkansas.

Corundum. 53% aluminum. A bluish-grey, brown or white mineral which is harder than and will scratch any other mineral except diamond; will scratch steel. The clear red is the gem ruby and the blue, sapphire, found in many basic igneous dikes in Montana, especially in the sapphire mines at Yogo.

Cryolite. 12.8% aluminum, sodium alumina fluoride. A Greenland ore, essential to aluminum reduction.

Gibbsite. 65.4% alumina. Hydrated alumina, derived in Arkansas deposits from decomposition of a granite rock (Elaeolite syenite).

ANTIMONY.

Stibnite. Antimony glance 71.4% antimony. Is the common ore; a sulphide of the metal. Is in process of deposition at Steamboat Springs, Nevada. Antimony occurs in many silver ores. Is common in tetrahedrite or silver-bearing copper minerals. Antimony ores are mined at Pine Creek, near Wardner, Idaho. Specific gravity, 4.5.

ARSENIC.

This metal is largely derived from arsenopyrite deposits, from nickel or cobalt arsenides, common at Cobalt, from enargite, copper arsenide, at Butte.

Arsenopyrite, or Mispickel, a sulpharsenide of iron, with 45% arsenic, which looks like iron pyrite, but emits a garlic odor when struck. Occurs in fissure veins, with gold ores. Ruby silver and other minerals rich in silver also contain arsenic. Gravity, 6.

Bismuthinite. Bi_2S_3 , 81.2% bismuth, a sulphide of bismuth. Gravity, 6.4 The metal is a subordinate constituent of many gold, tin, and silver ores, especially those of Leadville, Colo. It is obtained mainly as a by-product from gold-silver and lead ores and not from ores mined for this metal itself.

CADMIUM.

Greenockite. Is the only important ore mineral, the yellow sulphide, which occurs with zinc (sphalerite) ores in the Mississippi states.

CHROMIUM.

Chromite. FeO , Cr_2O_3 , or chrome iron ore, with 68% chromium, is the sole ore of commerce. Gravity, 4.5. It resembles magnetite, the black iron oxide ore.

COBALT.

Cobaltite, or cobalt sulpho-arsenide, with 35.4% cobalt.

Erythrite. A cobalt bloom. 37.4% cobalt, a creamy raspberry red mineral, formed by oxidation; a hydrated arsenious oxide.

Smaltite. Cobalt arsenide with 28.2% arsenious oxide. A silver-white mineral, harder than cobaltite; garlic odor when struck. Gravity, 6.5.

COPPER. **.Cu.** Native copper. The chemical symbol Cu is an abbreviation of cuprum, the Latin word for copper. The metal, native or refined, has the following names in modern languages; kupfer in German; koppar in Swedish; kobber in Norwegian; cobre in Spanish and Portuguese; cuivre in French, rare in Italian.

Atomic weight, 63.2. Belongs in the first group and is the leader of the fifth series of Mendeleef's Periodic System. The group is as follows: 1, hydrogen; 2, lithium, 3, sodium; 4, potassium; 5, copper; 6, rubidium; 7, silver; 8, caesium; 9, unknown (possibly terbium, atomic weight 160); 10, gold; 11, unknown. The fifth series, of which copper is the basic leader, is as follows: 1, copper; 2, zinc; 3, gallium; 4, germanium; 5, arsenic; 6, selenium; 7, bromine. The three metallic elements falling between series four and five in Mendeleef's table are iron, cobalt, and nickel. The frequency with which these three elements are found associated with copper, and the ease with which all four metals replace one another, is notable. The general resemblance between copper, silver and gold, which form ascending steps in the same group, is readily apparent.

System of crystallization, isometric. Tetrahexahedral forms are the most common, with much twinning. Crystals often show cavernous faces and occasionally elevations, are often distorted and pass gradually through distortions into filiform and arborescent forms. Native copper also occurs massive, in granular form, and in laminae. In the Lake Superior mines the metal occurs in all observed forms and sizes, including lamellae from microscopic flakes up to sheets of immense size and weight, crystals of greatly varying form and size, grains from microscopic size to considerable nodules, and druses, often of considerable size, show various filiform and arborescent shapes. The finest particles are grains and exceedingly minute flakes, occurring in an upper sandstone of the Keweenaw series, while the largest masses, weighing upwards of 500 tons, have been found in contact and fissure veins.

Cleavage, none; fracture hackly; tenacity, second only to that of iron. Is perfectly sectile and highly ductile and malleable, ranking in these particulars with the precious metals. Electrical conductivity, 931, as compared with 1,000 for silver, which possesses the most perfect electrical conductivity of any known metal or alloy. Conductivity for heat, 898, as compared with 1,000 for gold, the most perfect conductor of heat.

Hardness, 2.5 to 3. Specific gravity, in vacuo, at degrees Centigrade (equal to 32°, or freezing point, Fahrenheit); when chemically pure and devoid of porosity, is 8.945. Specific gravity of the ordinary copper of commerce, none of which is free from impurities, varies from about 8.75 when cast, to about 8.95 when rolled, hammered or drawn, the exact gravity depending upon how handled, as well as upon the extent and nature of the impurities contained.

Lustre, metallic. Color, copper-red. Streak, copper-red, metallic, shining. Tarnishes upon exposure to air to brownish red, and is liable to form a coating of verdigris or oxide upon long exposure to air. Atmosphere-

laden with moisture and carbonic acid is especially favorable to the formation of verdigris.

Fusibility: Copper is fusible at approximately 2,000° Fahrenheit, or a trifle less than 1,100° Centigrade. Color, when fused, sea-green. Copper becomes volatile under the high temperature of the electric arc.

Solubility: Copper is soluble in nitric acid, aqua regia, and strong boiling sulphuric acid, also slowly, in dilute hydrochloric and sulphuric acids, with admission of air. When in solution in nitric or sulphuric acids will deposit metallic copper on iron immersed therein.

Affinities: Copper has a greater affinity for sulphur than for any other element, possessing also marked affinities for oxygen, carbon dioxide, arsenic, antimony and bismuth, and unites with many other elements.

Alterations: Native copper alters on exposure, especially in damp air, to the simpler oxide and carbonate ores, such as cuprite malachite and azurite, and occasionally, in time, to the more complex ore forms.

Occurrence: Native copper occurs, usually in small quantities, in most of the principal copper districts of the world. The native metal is mined upon a considerable scale only in Lake Superior, U. S. A., and Bolivia. The Lake Superior native copper carries considerable silver, mechanically admixed, though not alloyed, but carries no gold. In districts outside of Lake Superior and Bolivia the metal occurs most frequently in connection with the oxide and carbonate ores, and occasionally with the secondary sulphide ores.

Impurities: Native copper frequently contains silver, arsenic, bismuth, antimony, zinc and occasionally mercury. Commercial copper, refined from ores, may contain any of the elements already named, and also gold, tin, lead, selenium and tellurium, the latter two elements in very minute quantities.

Azurite. $2\text{CuCO}_3\cdot\text{Cu}(\text{OH})_2$. A basic copper carbonate containing 53.3% copper. Common names, blue carbonate of copper, blue malachite, azure copper ore. Crystallization, monoclinic. Fracture, conchoidal. Tenacity, brittle. Hardness, 3.5 to 4. Gravity, 3.77 to 3.83. Lustre, vitreous. Color, azure blue. Streak, lighter blue. Is subtranslucent to transparent. Occurs frequently in the oxidized zone of copper ore bodies, almost invariably with malachite, but is much less common than malachite. Is a valuable commercial ore of copper.

Bornite. Cu_5FeS_4 . A copper and iron sulphide, containing 55.5% copper, 16.4% iron, 28.1% sulphur. Common name, peacock copper ore. Crystallization, rare isometric, with many hexagonal penetration twins. Structure, granular or compact. Fracture, small conchoidal to uneven. Tenacity, brittle. Hardness, 3. Gravity, 4.9 to 5.4. Lustre, metallic. Color, copper red to bluish brown, quickly tarnishing to iridescence, often most brilliant. Streak, pale grayish-black. Is soluble in nitric acid, with separation of sulphur. Is a primary mineral, at Butte and in contact metamorphic ores, but also occurs as the first alteration product from chalcopyrite among the secondary copper sulphides, and often carries nodules and occasionally larger masses of chalcocite. Is one of the most important ores of copper.

Bournonite. $3(\text{Pb}, \text{Cu})_2\text{S}_3\cdot\text{Sb}_2\text{S}_3$. A lead and copper sulphantimonite, containing 13% copper and 42.5% lead. Crystallization orthorhombic. Structure, massive, granular and compact. Cleavage, imperfect. Fracture, subconchoidal to uneven. Tenacity, rather brittle. Hardness, 2.5 to 3. Gravity, 5.7 to 5.9. Lustre, brilliant metallic. Color and streak, steel-gray, inclining to blackish gray or iron-black. Fuses easily on charcoal and is soluble in acids. Occurrence: in many copper fields.

Brochantite. $4\text{CuO}\cdot\text{SO}_3\cdot 3\text{H}_2\text{O}$. A basic copper sulphate containing 56.2% copper. Crystallization, orthorhombic. Fracture, uneven. Hardness, 3.5 to 4. Gravity, 3.9. Lustre, vitreous. Color, emerald-green to blackish green. Streak, paler green. Is translucent to transparent. Is found in many copper fields, and is an important commercial ore in the Clifton district. Graham county, Arizona, and Chuquicamata, Chile.

Chalcantinite. $\text{CuSO}_4\cdot 5\text{H}_2\text{O}$. A hydrous copper sulphate containing

25.4% copper. Common names, blue vitriol, bluestone, copper sulphate. Crystallization, triclinic. Structure, massive, stalactitic and reniform, sometimes fibrous. Fracture, conchoidal. Tenacity, brittle. Hardness, 2.5. Gravity, 2.12 to 2.30. Lustre, vitreous. Color, sky-blue. Streak, uncolored. Is translucent to subtransparent. Is soluble in water. Occurs as deposits from mine water in most sulphide copper mines, and is found in impure state, in beds, in Chile.

Chalcocite. Cu_2S . A copper sulphide carrying 79.8% copper. Common names, copper glance, cuprous sulphide. Crystallization, orthorhombic; also occurs massive, with structure granular to compact and impalpable. Cleavage, indistinct. Fracture, conchoidal. Tenacity, brittle. Hardness, 2.5 to 3. Gravity, 5.5 to 5.8. Lustre, metallic. Color and streak, blackish lead-grey, tarnishing to dull green or blue. Is soluble in nitric acid. Occurs in all copper districts, frequently in large quantities. Is the richest commercial ore of copper and yields more than one-half of world's copper supply.

Chalcopyrite. Cu S Fe S_2 . A copper and iron sulphide containing 34.5% copper and 30.5% iron. Is the primary ore of copper. Crystallization, tetragonal, sphenoidal, often twinning, also frequently massive and compact. Fracture, uneven. Hardness, 3.5 to 4. Gravity, 4.1 to 4.3. Lustre, metallic. Color, brass-yellow, often tarnishing to iridescence. Streak, greenish black. Is soluble, except sulphur, in nitric acid, and, on being heated, yields a portion of its sulphur. On exposure to moisture and heat becomes hydrated, and copper and iron change readily to sulphates. Alters to azurite, malachite, melaconite, chalcocite, covellite, bornite, brochantite, chrysocolla, tetrahedrite, and tennantite. Is found in practically every copper field in the world, and is second only to chalcocite in importance among the commercial ores of copper.

Chrysocolla. $\text{CuSiO}_3 + 2\text{H}_2\text{O}$. A hydrous copper silicate carrying 36% copper. Common names, mountain green and mountain blue. Structure, cryptocrystalline, enamel-like, sometimes botryoidal. Fracture, conchoidal. Is brittle and somewhat sectile. Hardness, 2 to 4. Gravity, 2 to 2.24. Lustre, vitreous to earthy. Color, mountain green, bluish green and sky blue to turquoise-blue, with impure varieties brown to dull black. Streak, white, from pure green and blue varieties. Is opaque to translucent. Is decomposed by acids, without gelatinization. Commonly occurs with carbonate ores in the oxidized zones of copper orebodies, and is a commercial ore of value in many districts.

Covellite. Covelline. CuS . A beautiful bright blue copper sulphide containing 66.4% copper. Chemical name, cupric sulphide. Crystallization, hexagonal; also occurs massive. Is flexible in thin layers, with basal cleavage. Hardness, 1.5 to 2. Gravity, 4.6. Lustre, submetallic on crystals, dull when massive color, indigo-blue. Streak, lead-gray to black, shining. Occurs in most sulphide copper districts, as a secondary ore and is a valuable commercial ore of copper, when found in sufficient quantities as in Butte, Mont., Utah, Wyoming and elsewhere.

Crednerite. $3\text{CuO } 2\text{Mn}_2\text{O}_5$. A copper manganate containing 34.4% copper. Crystallization, monoclinic. Cleavage, basal, perfect, less distinct in other directions. Hardness, 4.5. Gravity, 4.9 to 5.1. Lustre, metallic. Color, iron-black to steel-gray. Streak, brownish black. Is soluble in hydrochloric acid.

Cuprite. Cu_2O . A copper oxide, containing 88.8% copper, being the richest copper ore. Chemical names, cuprous oxide, copper protoxide. Common names, ruby copper, red glassy copper ore, octahedral copper ore. Crystallization, isometric, commonly in octohedrons; also occurs massive, granular and sometimes earthy. Fracture, conchoidal. Is brittle. Hardness, 3.5 to 4. Gravity, 5.85 to 6.15. Lustre, adamantite to earthy. Color, light to dark red; when fresh, usually ruby-red, but fades to duller red. Streak, brownish red, shining. Is subtransparent to subtranslucent. Occurs in most copper districts in the upper oxidized zone, frequently shading into crystals of native copper.

Enargite. $3\text{Cu}_2\text{As}_2\text{S}_5$. Enargite grades into famatinite. A copper sulpharsenite containing 48.3% copper. Crystallization, orthorhombic; also occurs massive and granular. Fracture, uneven. Tenacity, brittle. Hardness, 3. Gravity, 4.45. Lustre metallic. Color and streak, grayish-black to iron-black. Is soluble in aqua regia and fusible on charcoal. Occurs in many copper fields, notably at Butte, Montana, where it is a common and valuable ore.

Epigenite. Formula probably $4\text{Cu}_2\text{S}_3\text{FeS}_2 \cdot \text{As}_2\text{S}_5$. A copper and iron sulpharsenite, carrying about 41% copper. Crystallization, orthorhombic, in short prisms. Fracture, uneven. Hardness, 3.5. Lustre, metallic. Color, steel-gray. Streak, black. Is soluble in nitric acid. Occurrence: Wittichen, Baden, Germany.

Famatinite. $3\text{Cu}_2\text{S}_2\text{Sb}_2\text{S}_5$. A copper sulphantimonite carrying 43.3% copper. Crystallization, orthorhombic; is isomorphous with enargite; also occur massive. Fracture, uneven. Tenacity, brittle. Hardness, 3.5. Gravity, 4.57. Color, gray with copper-red tinge. Streak, black. Is fusible on charcoal. Decrepitates in closed tube. Occurrence: Sierra de Famatina, Rioja, Argentina; and Cerro de Pasco, Junin, Peru.

Glance. Common name for sulphide ores with dark metallic lustre, Copper glance is chalcocite.

Malachite. $2\text{CuO} \cdot \text{CO}_2 \cdot \text{H}_2\text{O}$. A basic copper carbonate carrying 57.5% copper. Common names, green copper carbonate, basic cupric carbonate. Crystallization, monoclinic. Commonly massive, but frequently incrustive and sometimes granular or earthy, and disseminated as stains. Fracture, subconchoidal to uneven. Tenacity, brittle. Hardness, 3.5 to 4. Gravity, 3.9 to 4.03. Lustre, of crystals, adamantine, frequently with concretionary bands of varying shades from pistachio-green to bluish-green. Streak, green. Is opaque to translucent. Is soluble in nitric acid. Occurs in most copper districts, in the upper portions of the oxidized zones of ore bodies, and frequently is an important commercial ore. When massive and beautifully marked is a semi-precious stone, used for table tops, etc.

Melaconite. Massive, compact, shining or earthy dull, black copper oxide of same composition as tenorite.

Mohawkite. $(\text{Cu}, \text{Ni}, \text{Co})_2\text{As}_2$. A copper, nickel and cobalt arsenide, carrying 63 to 69% copper, 3 to 7% nickel and 0.5 to 2% cobalt, usually somewhat argentiferous. Crystallization, hexagonal, by synthesis, no crystals being found in nature. Cleavage, indistinct. Fracture, uneven. Tenacity, slight. Hardness, 4. Gravity, 8.05. Color, light gray on fresh fractures, tarnishing to purple or brassy yellow. Streak, gray. Is soluble in nitric acid. Occurrence: Mohawk mine, Keweenaw county, Michigan.

Tennantite. $4\text{Cu}_2\text{SAs}_2\text{S}_5$. A copper sulpharsenite containing 57.5% copper when pure, but shading into a great number of varietal forms. Common name, gray copper ore, in common with tetrahedrite, to which tennantite is closely related and joined by a chain of rather obscure minerals shading gradually from tennantite into tetrahedrite. The many varietal forms of this mineral are brought about by part replacement of copper by silver, lead, zinc, iron, mercury, cobalt, nickel, tin, and platinum, with a marked tendency toward mutual substitution of the antimony of tetrahedrite for the arsenic of tennantite, and vice versa, rendering the tetrahedrite-tennantite group unusually prolific. Crystallization, isometric; also occurs massive and granular, compact. Cleavage, none. Fracture, subconchoidal. Tenacity, brittle. Hardness, 3.5 to 4.5. Gravity, 4.4 to 5.1. Lustre, metallic. Color and streak, flint-gray to iron-black. Diapheneity, opaque to subtranslucent in small splinters. Is soluble in nitric acid and fusible on charcoal. Occurrence: at numerous points, being found in greater or less profusion in most copper districts. Is not regarded usually as a commercial ore, except where argentiferous, which is commonly the case.

Tenorite. Earthy form is known as melaconite. CuO . A copper oxide, containing 79.8% copper. Common names, **Black Copper**, **Black Oxide of Copper**. Chemical names, copper monoxide, copper peroxide, cupric oxide.

Crystallization, monoclinic; also occurs massive, pulverulent and earthy. Fracture, conchoidal to uneven. Hardness, 3 to 4. Gravity, 5.8 to 6.25. Lustre, metallic. Color, dull grayish-black when massive, steel-gray in flakes. Is soluble in nitric and hydrochloric acids. Is found in most copper districts, and is a valuable ore of copper when occurring in quantities, but much of what has been considered tenorite in the past really was chalcocite, for which it is easily mistaken when disseminated. Found in very thin, long, flexible, minute scales of glistening gray color in Vesuvian lavas.

Tetrahedrite. $4\text{Cu}_3\text{Sb}_2\text{S}_6$. A copper sulphoantimonite containing 52.1% copper. Shades into tennantite, which see, for reference to protean forms of these two closely related and frequently indistinguishable minerals. Common name, gray copper ore. Crystallization, isometric; also occurs massive and granular, coarse to fine, compact. Cleavage, none. Fracture, subconchoidal to uneven. Tenacity, brittle. Hardness, 3.5 to 4.5. Gravity, 4.4 to 5.1. Lustre, metallic, brilliant. Color, flint-gray to iron-black. Streak, grayish-brown to cherry red. Opaque in quantity, but occasionally subtranslucent in very thin splinters, giving cherry red transmitted light. Is soluble in nitric acid and fusible on charcoal. Occurrence; in most copper districts, but commonly is not regarded as a commercial ore, except when argentiferous, which frequently is the case.

GOLD.

Calaverite. A pale bronze yellow telluride of gold with 40% gold, 1-2% silver and balance tellurium. Breaks with uneven fracture and scratches easily. If burned in a forge gives beads of gold. Common at Cripple Creek and Kalgoorlie, Western Australia.

Native. As clean metallic gold; as rusty and mustard colored gold, and as pale colored electrum, an alloy with silver.

Petzite. Tellurides of gold and silver, a steel or iron gray metallic lustered mineral easily scratched with knife, slightly scaly, 20% to 25% gold; 18% to 25% silver.

Sylvanite. A silvery telluride of gold and silver, with brilliant metallic lustre, very soft, and carries 26% gold, 12.5% silver. Common in Cripple Creek, Colorado, ores.

IRON.

Hematite. 70% iron; black to brick red color; 5.5 to 6.5 hardness; 4.9 to 5.3 gravity. Mined in enormous quantities in Lake Superior region.

Magnetite. 72.4% iron; a black, sandy material or as coarse and fine-grained masses; is magnetic; 5.5 to 6.5 hardness; 4.9 to 5.2 gravity.

Pyrite. 46.7% iron; 53.4% sulphur; brass color; occurs frequently in crystalline masses; 6 to 6.5 hardness; 4.9 to 5.2 gravity. Rarely used as a direct source of iron.

LEAD.

Galena. The common ore of lead; lead sulphide, 8.6% lead, a steely, silvery mineral that crystallizes in cubes, occurs massive, resembling pig iron, or with sheeted structure. Breaks with perfect cleavage. Is often silver-bearing. Gravity, 7.5 to 7.7.

Cerussite. White lead ore, lead carbonate, 77.5% lead, a white or gray brittle mineral with waxy lustre. Is the most common oxidized ore of lead and effervesces with acid. Gravity, 5.5.

Anglesite. Lead sulphate, 73.6% lead; a brittle, colorless, or white mineral, often coating a kernel of galena and mixed with cerussite; very common. Gravity, 6.3.

Pyromorphite. Lead phosphate, 76.30% lead, a green, gray or brown mineral fusing easily to crystalline globules. Occurs in six-sided crystals and mossy fibres.

Jamesonite. Feather ore, lead sulpho-antimonide 50.8% lead, 29.5% antimony, 19.7% sulphur, steel gray, metallic hairs and needles, also compact.

Bournonite. Lead copper sulphide. See Copper.

Vanadinite. A lead chloro-vanadinite, containing 18.7% lead oxide,

19.4% vanadium oxide, 2.5% chlorine, a bright yellow, orange or brown mineral, occurring in small, sharp hexagonal crystals; fuses easily.

Wulfenite. See molybdenum.

MANGANESE.

Ores to be valuable must contain at least 40% of the metal. Only the oxide ores are valuable.

Braunite. 69.6% manganese. Occurs as brown and black bands in clay in Arkansas.

Franklinite. See under zinc.

Psilomelane. 77% manganese; earthy manganese.

Pyrolusite. 63.2% manganese; black manganese ore resembling limonite. Is the common form of the Virginia deposit.

Wad. A soft earthy brown or black ore of variable composition, generally 20 to 45% manganese, also 10 to 25% water, and oxides of iron and copper.

MERCURY.

Cinnabar. 86.2% mercury. Sulphide of mercury, a red mineral, which is easily decomposed by heat.

MOLYBDENUM.

Molybdenite. The sulphide carries 60% molybdenum. Is a soft, lead colored, scaly metallic mineral resembling graphite, but malleable and giving a greenish streak on unglazed porcelain. Easily scratched by finger-nail. Gives sulphurous odor when heated, thus distinguishing it from graphite.

Molybdate. Oxide with 66.7% molybdenum. Is an earthy yellow powder, formed by oxidation, but has never been found in commercial quantity.

Wulfenite. Lead molybdate, contains 39.3% molybdenic oxide. It usually occurs in flat, resinous, lustered, yellow, orange or red crystals, in the oxidized parts of lead deposits. Arizona has several deposits.

Nickel-Scheelite

NICKEL.

Nicolite. Arsenical nickel, copper nickel, 43.6% nickel, 56.4% arsenic; somewhat resembles native copper. Has brownish, black scratch; metallic lustre and melts on heating.

Millerite. Sulphide of nickel, 64.4% nickel, a brass yellow, easily tarnished mineral, easily scratched by a knife.

Pyrrhotite (magnetic iron pyrite). Contains 2 to 6% nickel at Sudbury, Ont. Sulphur content is about 30%.

PLATINUM.

Metallic. In America is found in the black sand of gold placers, also at the Boss mine in Nevada, and as minute crystals of sperrylite in Sudbury, Canada, nickel ores.

RADIUM.

Carnotite. See Uranium.

Pitchblende. See Uranite (uranium).

SILVER.

Argentite. Silver glance; 85% silver; a silver sulphide of leaden-gray, metallic appearance; scratches with thumb nail.

Embolite. Silver bromide, 67% silver; resembles horn-silver.

Frieslebenite. Gray silver; 22% silver, 30% lead, 28% antimony, 18% sulphur. Resembles gray copper ore (tetrahedrite), but contains silver.

Galena. Lead sulphide. Is usually silver-bearing in our Western ore deposits.

Hornsilver. Cerargyrite; 75.3% silver, 24.7% chlorine. When pure resembles wax and cuts like it. A fragment put on zinc and wetted turns black and is reduced to silver.

Polybasite. 50.6% silver. A brittle, metallic mineral formed of silver and copper, combined with arsenic and antimony.

Proustite. Light red or ruby silver, with 65% silver; also called arsenical silver; a brilliant red or ruby colored mineral that is sub-translucent, and is bright red, when powdered.

Pyrrargyrite. Dark ruby; 60% silver; antimonial silver; a dark red to black metallic lustered mineral with brilliant red streak, or purplish powder.

Stephanite. Brittle silver, 68.5% silver; an antimonial sulphide of silver with iron black color and streak.

Tetrahedrite. Gray copper ore, often rich in silver, with up to 17% silver. Usual composition, copper, 30-40%; antimony, 15-25%; sulphur, 20-25%. Brittle iron gray to black metallic mineral; an important silver ore. See under Copper.

TIN.

Cassiterite. Oxide of tin, 78.67% tin. Is the common ore of tin; when weathered, looks like wood, but is very heavy.

Stannite. Tin sulphide, rare.

TUNGSTEN.

Wolframite. Iron manganese tungstate, 76.4% tungstic acid (WO_3). Has a hardness of 5; gravity 5, and a dark brown streak. The name covers all transitions and variations of iron-manganese tungstate from iron tungstate ferberite to manganese tungstate hübnerite.

Occurs in long, dark brown crystals, or short, stoutish columnar masses, varying to black, brilliant, lamellar masses in quartz and pegmatite. The brown varieties are softer and more brittle than the blacker form, whose thin flakes are deep red in transmitted light. Is the most common ore of tungsten.

Ferberite. Iron tungstate, 76.3% tungstic acid. A dull, coal black mineral, sometimes in an aggregate of cubic crystals, more often massive in black, sooty looking material in veins in pegmatite. Is thus far only found commercially in Nederland district, Boulder Co., Colo., and is a desirable ore.

Hübnerite. Manganese tungstate, 76.6% tungstic acid. A light brown mineral often in needle-like crystals of hair brown color, in quartz.

Scheelite. Tungstate of lime, 80.6% tungstic acid. Hardness 4.5, gravity 6. Streak white, gray or pale brown, very heavy mineral with peculiar glitter to fractured surfaces. Occurs massive, and as crystals imbedded in quartz, and also in garnet (Hawthorne, Nev., and Bishop, Calif.). Also in gold ores, as at Grass Valley, Calif.; Seoul, Korea; Murray, Idaho; and in New Zealand.

The field test for tungsten is to crush the specimen and "pan" it, to get the heavy residue; powder a part of the residue and put it in a glass or porcelain dish; add a half ounce (tablespoonful) of muriatic acid and heat to near boiling for fifteen minutes. Then add a few drops of nitric acid and boil one minute. Set aside a moment to settle and pour off liquid into a large tumbler of cold water. Also add cold water to residue and stir. Set aside both dishes a few minutes to settle, then pour off liquid. Canary yellow sediment in dish shows tungstic acid.

The more common test is to wrap tin foil about the specimen and boil hard in hydrochloric (muriatic) acid for 15 minutes, remove foil; a blue color indicates tungsten, but the test does not always show the color.

URANIUM.

Carnotite. 52 to 57% oxide of uranium. A vanadate of uranium and potassium; a canary yellow powdery mineral occurring in large bedded deposits of impregnated sandstone in southern Utah and southwestern Colorado. Is the chief ore of uranium.

Uraninite. Pitchblende. 65%-80% uranium. A black to dark brown, olive green, very heavy mineral, found in Connecticut, Texas, Colorado, South Dakota, and in Austria. (See Bull. 70, U. S. Bureau of Mines, for description of mines.)

VANADIUM.

Carnotite. (See above.) 18% vanadium.

Roscoelite. 21%-29% vanadium; a scaly green to brown micaceous mineral mined at Vanadium, Colo., by the Primos Co., and also found in California quartz mines.

Vanadinite. 19.4% vanadium oxide. See under lead minerals.

ZINC.

Calamine. Hydrated zinc silicate, 67.5% zinc oxide, balance water and silicon; gravity, 3.9.

Is also the trade name for oxidized zinc ores. Often occurs in clay. Is yellow to brown, rarely pale blue or green.

Franklinite. An iron manganese zinc mineral with 5.54% zinc, 51.8% iron and 7.5% manganese; found at Franklin, N. J.

Smithsonite. Zinc carbonate, 64.8% zinc oxide. Dry bone, the white carbonate of zinc, differs from calamine by effervescing in acid; hardness, 5.

Sphalerite. Blende, black jack, zinc blende, 67% zinc. Is the chief source of the metal; varies from brown to black, rarely clear resinous. Gravity, 4. Hardness, 3.5-4. Knife scratch, brown to yellow.

Willemite. Zinc silicate, with 72.9% zinc oxide. Is a greenish yellow to applegreen mineral with resinous lustre. Is only important as an ore mineral at Franklin, N. J.

Zincite. Red zinc ores, 80.3% zinc. Occurs at Franklin, N. J.

CHAPTER III

RESUME AND STATISTIC OF THE MINING INDUSTRY

The essential, vital facts concerning the mining industry, both of the United States and of all other countries are presented in this chapter in a series of tables, giving price and production of the various metals. A list of all the metal smelting plants and refineries with their capacities and outputs is also given.

From 1900 to 1914 the total value of the metal production of the United States varied between \$513,700,000 and \$904,000,000 per annum. The total value of the metals produced for each of the past seven years is: \$691,000,000 in 1914; \$991,730,000 in 1915; \$1,620,500,000 in 1916; \$2,086,200,000 in 1917; \$2,153,100,000 in 1918; \$1,351,600,000 in 1919; \$1,724,300,000 (approx.) in 1920.

Early reports indicate that the production for 1921 was about \$51,186,000 of gold; 45,051,000 oz. silver, 515,546,000 lb. copper, 196,500 tons of zinc, 390,000 tons of lead and 16,650,000 tons of iron.

PRODUCTION OF METALS IN THE UNITED STATES*

Metal	1917	1918	1919	1920
Aluminum, pounds	(e) 200,000,000	(e) 225,000,000	(e) 119,000,000	(e) 124,000,000

*U. S. Geol. Survey figures. (e) estimated. Mineral Industry figures. (f) approximate.

METAL PRICES

The price of each metal (gold excepted, which is fixed by law at \$20.67+ per fine ounce) is based upon averages of daily market prices current at New York for silver, copper and lead, and at St. Louis for metallic zinc or spelter. The prices used by the U. S. Geological Survey for calculation of values for years 1850-1920, inclusive, are as follows:

YEARLY AVERAGE

PRICES OF SILVER, COPPER, LEAD, AND ZINC

Year	Silver	Copper	Lead	Zinc	Year	Silver	Copper	Lead	Zinc
	Fine oz.	Pound	Pound	Pound		Fine oz.	Pound	Pound	Pound

1915..	3,425	1,735,105	2,100	1,063,860	3,100	1,811,568	25.33
1916..	3,496	1,775,968	1,770	4,480	2,270,016	25.37
1917..	2,759	1,142,226	390	4,961	2,061,700	20.69
1918..	2,566	646,632	50	5,226	1,317,000	12.58
1919..	1,943	318,652	4,399	717,900	8.19
1920..	2,033	345,203	5,600	938,560	8.49

The price was but 5.5cts in Dec. 1920., and the average New York price in 1921 was 4.96c.

(a) Estimated from the average content of the ore. (b) Figured as 60% of domestic ores only. (c) None produced from domestic ore. (d) Includes actual marketed value of a few tons of antimony made as a by-product in the electrolytic refining of copper.

The average price for 30 years preceding 1914 was 7.5 cts. per pound.

The antimony deposits of the U. S. may be classed as those containing antimony only, and those whose antimonial content is a valuable by-product. Though many deposits of stibnite are known, they cannot be worked with normal prices, because in ordinary years the Chinese and Japanese smelters can supply it cheaper than we can produce it, and because the market for the metal is limited and easily glutted, resulting in still lower prices. In recent years, 60% of the world's production has come from China, the Wah Chang Mng. & Sm. Co., being perhaps the most important individual producer. The domestic production has therefore come almost entirely from the electrolytic refining of antimonial lead and copper metal. Antimonial ores to be valuable must be free from arsenic, zinc and lead.

Uses of Antimony. The principal uses of antimony are in making type metal, babbit and other anti-friction bearing metals, battery plates, siphon

tops, cable sheathing, white metals for the foundation of silver-plated ware, and other plated ware, such as clock-cases, table-ware, coffin trimmings, and toys.

Its compounds are used in enamels, rubber vulcanizing, pigments, glass making, and safety matches.

ARSENIC

U. S. PRODUCTION OF WHITE ARSENIC, As₂O₃, IN SHORT TONS

Japan, white arsenic.....	15	560	1,803
United States white arsenic..	4,990	5,430	5,579	5,735	5,468	10,432

The occurrence of arsenic in metal-bearing ores is so common as to be practically universal. This is shown at the smelters treating lead, copper, and zinc ores, which send over 20,000 tons of arsenious trioxide yearly into the atmosphere in the form of smelter smoke or fume. A small amount is saved at the Anaconda, Mont., smelter, and at the Ontario smelters treating Cobalt ores, and also in Mexico by the Mapimi smelter of the American Metal Co. The amount lost yearly from the Anaconda smelter is greater than the American production.

With such an enormous wastage, it is, only in exceptional cases, that it is profitable to work arsenical ores for the arsenic alone. The chief use of the metal is in glass-making and for insecticides in agriculture; the glass industry uses about half of the amount produced in this country.

BISMUTH

Occurrence. Bismuth ores are comparatively rare, though the metal occurs in many of the lead ores of the Rocky Mountain regions. The U. S. production comes entirely from electrolytic lead refineries at Grasselli, Ind., Omaha, Neb., and a few other plants. The world's supply comes mainly from Bolivian mines owned by Aramayo Francke Mines Ltd., at Chorolque and Tasna. Another producer is the Seoul Mining Co, Korea. New South Wales and Tasmania produce a moderate amount. Occasionally lots of gold-silver or lead ore containing from 10 to 20% bismuth have been marketed in the West, but buyers gave nothing for the bismuth contained.

Prices. The price for bismuth in America, formerly about 65 cents a

pound, was \$2.75 per lb. at the beginning of 1915. In 1920, price ranged from \$2.85 early in year to \$2.40 per lb.

The price and market for bismuth ores and metal is artificial, being fixed by Johnson Matthey & Co., of London, who absolutely control the market. Were American production constant, domestic producers could have secured the American market. At present the A. S. & R. Co., and U. S. Smelting Lead Refinery, Inc., East Chicago, Ind., are the main producers and dealers.

The Anaconda smelter dust carries over 1% bismuth, equal to a daily production of 1,580lbs., and this plant will probably be a factor in the market.

Uses. Metallic bismuth is employed in making low-fusing alloys or cliché metals which are used in automatic fire sprinklers, fuses for electric wiring, and solders. Some of the salts have a smooth, unctuous feel, and are used in toilet powders, and in medicinal preparations. It is also employed to a small extent in making optical glasses.

*U. S. IMPORTS OF METALLIC BISMUTH IN POUNDS

Year	Quantity	Value	Year	Quantity	Value

*From Mineral Industry 1920.

CADMIUM

The bulk of the world's supply of cadmium used to come from the zinc smelters of Upper Silesia, Germany, but over half the supply now comes from American smelters. The U. S. production is as follows:

UNITED STATES PRODUCTION OF CADMIUM

Year	Quantity	Price	Year	Quantity	Price	
1913... 54,198	lb....	\$0.77	Av. price	1917... 207,408	lb.... \$1.47	Av. price
1914... 91,409	"....	0.89	"	1918... 127,164	"....	1.48
1915... 91,415	"....	1.19	"	1919... 99,939	"....	1.22
1916... 135,212	"....	1.56	"	1920... 129,283	"....	1.17

In 1921, the domestic production fell to 65,101 lb. and the price to 98c.

In addition to the above metallic output, the United States produces 30,000 to 50,000 lb. of cadmium sulphide per annum, selling for a few cents per pound less than the metal.

A recent use for cadmium is for electroplating with after heating, by the udylite process to make rustless cutlery, locks and hardware.

CHROMIUM

The chromium produced in the U. S. all comes from chromite or chrome ore.

U. S. CHROMITE PRODUCTION* (Long Tons)

Year	Quantity	Value	Price	Year	Quantity	Value	Price

* U. S. Geol. Survey.

** price per ton.

Chromic-iron ore is sold on the basis of 40% chromic oxide and 80% silica. Production in 1920 was mainly from Oregon.

Occurrence. The chief producing areas are the belts of serpentine in the Sierra Nevada and Coast ranges, the foothill regions being the important producers. Most of the orebodies are small and lenticular in shape, containing only from 1 to 200 tons ore. An interesting occurrence of disseminated ore is found near Red Bluff, Calif.

Use. Chromic iron ore is used in the manufacture of ferrochrome and steel for high-speed tools, armor plate and projectiles, bichromates of soda and potash, chromic acid, chrome alum and chrome tannage, and in steel industry as refractory brick. A recent use is for stainless steel cutlery.

COBALT

The Haynes Stellite Co. and Missouri Cobalt Co. are the only U. S. producers. The material used in making high-priced steels and stellite is generally reduced from the imported oxide. (Stellite is an alloy, 75% cobalt and 25% chromium, valuable for making high-speed steels and non-tarnishable cutlery.) Experimental work has shown that cobalt may be substituted for nickel in plating. Canadian production, mainly from Cobalt, Ont., is as follows:

Year	Metallic Cobalt (a)	Cobalt Oxide	Total Metal (b)
1915	211,610	379,219	477,063
1916	215,215	670,760	841,859
1914, pounds.....	242,572	899,027	871,891
1917	393,773	802,448	1,079,572
1918	294,476	476,053	737,157
1919	113,943	429,359	530,371
1920	166,375	536,457	546,023

(a) as shipped (b) metallic content of all salts, etc.

Prices varied from \$3 to \$6 per lb. for metal and \$2 to \$4.10 for oxide, in 1920.

COPPER

The Copper industry shared the very great War prosperity of the country early in 1917, but the fixation of the price by the government, September 21, 1917, at 23½ cts., did not give the industry the same ratio of profit granted other industries, and the raise to 26 cts. on July 2, 1918, was so tardy a recognition of this condition that the entire advance was taken up in advanced freight, smelter and labor costs.

A report by the Federal Trade Commission on the cost of producing copper shows that the average cost of producing a pound of copper, in 1918 was 16.167 cents per pound. This figure is based on the returns from the 85 largest producers, whose costs varied from below 12 cents, for two companies that turned out over 122,000,000 pounds jointly, to over 34 cents above which level five small concerns produced approximately 7,000,000 pounds.

Several small Michigan companies which came into being during the regime of high prices were the highest cost properties, as five of them, contributing in all 6,975,960 pounds, had an average cost of 34.614 cents a pound, thereby showing a big loss from the fixed prices of 23½ and 26 cents.

The items making up the average cost are as follows:

	Cents per Pound	% of Total Cost
Mining.....	6.94	42.97
Depletion of ore.....	.72	4.45
Purchases of ore.....	.51	3.19
Transportation of ore.....	.83	5.18
Reduction of ore.....	5.89	36.44
Trans. to refinery.....	.85	5.28
Refining.....	1.02	6.36
Administrative.....	.89	5.56
Selling Expense.....	.18	1.16
Credits for precious metals	1.71	10.59
Total.....	16.17

The above averages are reckoned against an output of 2,258,234,125 lbs. of copper by 85 producers. The costs for each state or country are as follows:

Arizona & New Mexico	15.175c
Utah, Nevada and California	16.801
Montana, Idaho & Washington	17.245
Michigan	17.622
Other United States	19.910
Mexico, Cuba & South America	15.648
Canada and Alaska	16.263

Another highly interesting analysis is that showing amount expended directly for labor, materials, etc. In this table we have:

	Cents per Pound	% of Total
Materials and supplies.....	3.76	23.28
Labor.....	5.30	32.83
Overhead.....	2.14	13.27
Depreciation.....	.94	5.85
Depletion.....	.72	4.45
Tolls.....	4.99	30.91
Credits.....	1.71	10.59

The largest companies as a rule were the cheapest producers. The average of the porphyry group was 14.886 cents.

The allocation of production of copper in 1918 according to cost per pound as figured in the Federal Trade Commission report is:

Range of Cost	Companies	Production	% of Total
Cost less than 12 cents	2	122,245,051	5.41
Cost between 12 and 13 cents	4	208,571,191	9.24
“ “ 13 “ 14 “	4	314,553,177	13.93
“ “ 14 “ 15 “	4	359,617,743	15.92
“ “ 15 “ 16 “	2	98,307,293	4.35
“ “ 16 “ 17 “	8	460,528,645	20.39
“ “ 17 “ 18 “	9	255,399,696	11.32

MINING INDUSTRY

39

“	“	18	“	19	“	3	72,373,388	3.20

Cost over		26 cents				18	46,119,555	2.04
Total all companies.....85							2,258,234,125	100.00

The above figures include several companies that buy and sell ores so that a duplication approximating 63,700,000 pounds is involved. Of the 85 companies used in the tabulation 75 are in the United States, one in Alaska and the remaining nine in Canada, Cuba, Mexico and South America.

Up to the year 1917, few companies reported depletion as a cost; whereas practically all companies now include such a charge based on the re-valuation of their mineral land. This is one of the largest single factors accounting for the large increase in the cost of producing copper in the last year or two.

Depreciation appeared on the books of mining companies at about the same time as depletion and for the same reason. Unfortunately the rates are not based on the life and residual value of particular assets, but are more often arbitrary amounts based sometimes on what will be allowed as deductions on tax reports and sometimes on the best judgment and opinion of officers or directors.

The commission did not equalize depreciation for the various companies, accepting the depreciation charges made by the company, save where the cost of shafts, tunnels, openings, and underground equipment charged to cost in prior years was called depreciation and again charged into cost.

(2) U. S. Geol. Surv.

In considering the copper production of America it is noteworthy that a very large part of the silver production of the United States and a respectable part of the gold output come from our copper mines. Moreover, several copper companies have also become zinc producers. Thus the copper mines around Kennett, Calif., yielded 315,549 tons copper ore in 1915 with a value of \$17.97 per ton, made up as follows: gold, \$1.51 per ton; silver, \$1.26 per ton; copper, \$11.96 per ton; zinc, \$3.24 per ton. The descriptions of several companies at Butte, Montana, in another part of this volume will show the advance made along this line.

 (Engineering and Mining Journal).

Grades of Copper

Lake.—Copper from the native copper mines of the Lake Superior district. The standard of conductivity is 99.5%.

Electrolytic.—Copper refined by the electrolytic process and running 99.93% upwards for cathodes. Conductivity to 103%.

Casting.—Copper analyzing 99 to 99.75% made from ore and scarp. Used for casting purposes.

Best Selected.—British copper averaging 99.75% fine. Largely used in the British brass trades.

Tough.—British copper used for casting, rolling, and drawing; has about 99.25%.

Chile Bars.—Copper smelted in Chile, running 95 to 99% pure.

Standard.—Practically anything running from 96% upwards; dealt in on London Metal Exchange.

Matte.—A smelter product usually running from 25 to 55% copper; an intermediate product between the ore and the finished copper.

Description of Copper

Wire Bars.—About 3 to 4" square and 3 to 7' long. Average weight 135 to 175lbs. Used for wire drawing.

Ingots.—Average weight about 18 to 20lb. Notched. Used for casting.

Ingot Bars.—Notched bars for casting. Weight about 55 to 60lb.

Cakes.—Weight 100 lbs. and upward. Used for rolling.

Anodes.—About 2 by 3', and 1½" thick, weighing 250lb. Crude copper used by electrolytic refiners.

Cathodes.—About 2' by 3' but thicker at the top than the bottom. Refined copper from the electrolytic tanks which is run down to wire bars, etc.—*From American Metal Market.*

COPPER CONSUMPTION

The following table, listing the largest copper consumers in the United States, compiled by the Boston News Bureau, though 3 years old, is of value.

	Monthly lb.	Per annum lb.
American Brass Co.....	25,000,000	300,000,000
Buffalo Brass Co.....	12,000,000	144,000,000
Chase Rolling Mills.....	12,000,000	144,000,000
National Conduit & Cable Co.....	10,000,000	120,000,000
Detroit Copper & Brass Co.....	8,000,000	96,000,000
Scoville Manufacturing Co.....	8,000,000	96,000,000
Roebling Sons Co.....	6,000,000	72,000,000
Standard Underground Cable Co.....	6,000,000	72,000,000
Bridgeport Brass Co.....	6,000,000	72,000,000

COPPER CONSUMPTION—Continued

	Monthly, lb.	Per annum lb.
Rome Brass & Copper Co.....	6,000,000	72,000,000
American Electrical Works & Phillips Insulating.	6,000,000	72,000,000
Waclark Manufacturing Co.....	4,000,000	48,000,000
Baltimore Copper Smelting & Rolling Co.....	4,000,000	48,000,000
Seymour Mfg. Co.....	3,500,000	42,000,000
American Steel & Wire Co.....	2,500,000	30,000,000
Michigan Brass Co.....	2,000,000	24,000,000
Plume & Atwood.....	1,500,000	18,000,000
Bristol Brass Co.....	1,250,000	15,000,000
Baltimore Tube Works.....	1,000,000	12,000,000

STOCKS

The U. S. Geological Survey supplies the following estimate (in pounds) of refined copper in stock on the first day of each calendar year:

1917.....	128,000,000	1920.....	631,000,000
1918.....	114,000,000	1921.....	659,000,000
1919.....	180,000,000	1922.....	496,000,000

AMERICAN COPPER IMPORTS (In Pounds)

The following table, showing imports of copper, in various forms, into the United States, is summarized from the official figures of the United States

ernment. The Government statisticians have seen fit to vary the methods employed in presenting these figures, from time to time, but the present plan giving contents in the fine copper of imported ore and matte is preferable to the old plan of giving actual weight of imported ore and matte:

Year	Copper Contents Ore and Matte	Raw Copper	Old Copper	Total Fine Copper
0)	3,448,237	5,189	284,789	3,960,053
1	8,391,554	2,556	134,407	11,472,436
2	7,669,978	22,097	71,485	8,066,647
3	7,256,015	554,348	59,375	11,045,297
4	4,804,614	606,415	160,592	11,445,441
5	5,300,000	7,979,322	1,336,901	14,616,223

						1920..	337,759,000

Total \$13,689,745,811

IRIDOSMINE AND IRIDIUM—See Platinum.

IRON

The United States produced more pig iron than the remainder of the world combined in 1918; while in a normal year, say 1913, the domestic output is 40% of the total. From 1820 to 1865, production increased irregularly from 20,000 to 1,000,000 ton per annum; from 1886 to 1898 it gained from 1,205,663 to 11,773,934 tons per annum, after which were the following yields:

Year	Long Tons	Year	Long Tons
1899.....	13,620,703	1910.....	27,303,567
1900.....	13,789,242	1911.....	33,649,547
1901.....	15,878,354	1912.....	29,726,937
1902.....	17,821,307	1913.....	30,966,301
1903.....	18,009,252	1914.....	23,332,244
1904.....	16,497,033	1915.....	29,916,213
1905.....	22,992,380	1916.....	39,434,797
1906.....	25,307,191	1917.....	38,612,546
1907.....	25,781,361	1918.....	38,230,440
1908.....	15,936,018	1919.....	30,130,231
1909.....	25,795,471	1920.....	35,710,227

Pig iron production is generally considered a good barometer of a country's prosperity, as the above table will show.

Prices of Bessemer pig iron at Pittsburg ranged from \$18.96 to \$9.98 per long ton from 1886 to 1897, then:

Year	Per ton	Year	Per ton
1898.....	\$10.31	1910.....	\$16.20
1899.....	18.89	1911.....	14.81
1900.....	18.84	1912.....	15.09
1901.....	15.73	1913.....	16.19
1902.....	20.07	1914.....	13.98
1903.....	18.64	1915.....	14.87
1904.....	13.66	1916.....	22.93
1905.....	15.48	1917.....	42.63
1906.....	18.48	1918.....	35.48
1907.....	21.74	1919.....	29.91
1908.....	16.14	1920.....	44.45
1909.....	16.53	1921.....	25.15

Steel production of the United States, including all grades, is as follows for 15 years:

Year	Long Tons	Year	Long Tons
1906.....	23,398,136	1914.....	23,513,030
1907.....	23,361,946	1915.....	32,151,036
1908.....	14,023,247	1916.....	42,773,680
1909.....	26,094,919	1917.....	45,060,607
1910.....	26,094,919	1918.....	44,462,432
1911.....	23,676,106	1919.....	34,671,232
1912.....	31,251,303	1920.....	42,132,934
1913.....	31,300,874		

The U. S. Steel Corporation produced 40% of the pig iron and 45% of the steel made in 1920.

Principal producing countries are as under:

Iron production of the World in metric tons:

Country	1914	1915	1916	1917	1918	1919	1920
Australia	76,352	77,539	128,616	148,762	210,266	237,446
Austria	2,020,000	1,960,000	2,418,322	60,000	120,000

Japan	385,647	122,782	180,930	209,005	377,616
Russia	4,261,008	3,696,560	4,350,000	3,215,000
Spain	435,000	419,000	501,667	357,699	386,550	294,167	251,412
Sweden	635,100	767,600	743,031	838,948	767,922	494,033	452,300
United Kingdom	9,005,898	8,793,659	9,062,181	9,487,514	9,253,558	7,536,450	8,136,827
United States	23,721,115	30,414,817	40,065,754	39,239,155	39,679,518	31,513,161	37,518,649

Iron-ore production of the United States from 1810 to the end of the 1919 season approximated 1,400,000,000 long tons. By 1886 the year's output was 10,000,000 tons, then a gradual increase to 19,433,716 in 1898, followed by considerable gains to 28,887,479 in 1901. From then the figures were as follows:

Year	Gross Tons	Year	Gross Tons
1902	35,554,135	1912	55,150,147
1903	35,019,308	1913	61,980,437
1904	27,644,330	1914	41,439,761
1905	42,526,133	1915	55,526,490
1906	47,749,728	1916	77,870,553
1907	51,720,619	1917	75,573,207
1908	35,983,336	1918	72,021,202
1909	51,294,271	1919	56,372,784
1910	57,014,906	1920	69,281,341
1911	43,786,552	1921	29,547,000

The Lake Superior region (Michigan, Minnesota, and Wisconsin) contributes 80% of the American total output of iron ore, followed by Alabama with 10%. The U. S. Steel Corporation produces about 60% of the country's iron ore, through its subsidiary, the Oliver Iron Mining Co., whose operations, with other iron companies, are described in the Minnesota section of this Volume.

Prices of Mesabi ore were \$2.50 per ton for Bessemer and \$1.75 for non-Bessemer at Lake Erie docks, in 1894. Up to 1903 prices rose irregularly to \$4 and \$3.50 per ton, after which were the following:

Year	Bessemer	Non-Bessemer	Year	Bessemer	Non-Bessemer
1904	\$2.75	\$2.35	1912	\$3.50	\$2.85
1905	3.50	3.00	1913	4.15	3.40
1906	4.00	3.50	1914	3.50	2.85
1907	4.75	4.00	1915	3.45	2.80
1908	4.25	3.50	1916	4.20	3.55
1909	4.25	3.50	1917	5.70	5.05
1910	4.75	4.00	1918	6.08	5.43
1911	4.25	3.50	1919	6.20	5.55
			1920	7.20	6.55

LEAD

The lead production of the United States comes largely from the Tri-state field of Missouri, Oklahoma and Kansas, with notable amounts from the mountainous region of Idaho and from Utah.

The great bulk of Missouri's output comes from the south-eastern part of that State, where a half-dozen companies work on 3 to 4% disseminated ore. The characteristic of this district is that lead alone, without zinc, is produced. Idaho's production comes from the lead-silver-zinc ores of the Coeur d'Alene district, which in some years leads all others. Utah's production comes mainly from the silver-lead ores of Park City, Alta-Cottonwood, and Bingham, and the mixed ores of the Tintic district.

Next to the United States, the two important lead-producing countries of the world are Spain and Australia.

The vital figures of the industry are given in the following tables:

U. S. LEAD PRODUCTION, (in short tons) PRICE AND VALUE

Year	Desilver- ized Lead	Soft Lead	Total Prod'n	Base Bullion	foreign ores	foreign Bullion	N. Y. Price	Value
1720-1868.	755,400	755,400	755,400	\$79,829,200

LEAD SMELTERS AND REFINERIES

UNITED STATES.

Mowry—Consolidated Mines, Smelter & Transportation Co. (Idle.)

California:

Keeler—Four Metals Mining & Smelting Co. (Idle.)

Selby—Selby Smelting Works. Refinery also. American Smelters Securities Co., controlled by A. S. & R. Co.

Colorado:

Durango—Durango plant, American Smelting & Refining Co.

Georgetown—Western Metals Co. Malm dry chlorination process.

Leadville—Arkansas Valley plant, American Smelting & Refining Co.

Pueblo—Pueblo plant, American Smelting & Refining Co.

Salida—The Ohio & Colorado plant.

Idaho:

Kellogg—Bunker Hill & Sullivan Mining & Concentrating Co.

Clayton—Clayton Mining & Smelting Co.

Illinois:

Aurora—Aurora Metal Co. Secondary Metals, but some ore also.

Chicago—Goldsmith Bros. Smelting Refining Co. Secondary lead, but some ore.

Chicago—Great Western Smelting & Refining Co. Secondary lead, but some ore.

Collinsville—St. Louis Smelting & Refining Co. Refinery also. Nat'l lead Co.

Federal—Federal Lead Co. Am. Smelters Sec. Co., controlled by A. S. & R. Co.

Granite City—Hoyt Metal Co. Smelts secondary lead, but also some ore.

Indiana:

East Chicago—International Lead Refining Co. Refinery only. Anaconda Copper Mng. Co.

East Chicago—U. S. Reduction Co. Smelts secondary lead and some ore.

Grasselli—U. S. S. Lead Refinery, Inc. Refinery only. Betts electrolytic process. Controlled by U. S. S. R. & M. Co.

Kansas:

Galena—Galena Smelting & Manufacturing Co. Controlled by Eagle-Picher Lead Co.

Missouri:

Desloge—Desloge Consolidated Lead Co.

Granby—Granby Mining & Smelting Co., controlled by A. Z. L. & S. Co.

Herculaneum—St. Joseph Lead Co.

Joplin—Eagle-Picher Lead Co.

Webb City—Webb City Smelting & Manufacturing Co. Controlled by Eagle-Picher Lead Co.

Montana:

Cooke—Western Smelting & Power Co. (Idle.)

East Helena—East Helena plant, American Smelting & Refining Co.

Nebraska:

Omaha—Omaha & Grant Smelting Co. Converters and refinery only. Betts electrolytic process. Am. Sm. & Ref. Co.

Nevada:

Spruce Mtn.—Bullshead Mining & Smelting Co.

Tybo—Louisiana Cons. Mng. Co.

New Jersey:

Newark—Balbach Smelting & Refining Co. Refinery also.

Perth Amboy—Perth Amboy plant, American Smelting & Refining Co Refinery also.

Oklahoma:

St. Louis—Ontario Smelting Co.

Pennsylvania:

Carnegie—Pennsylvania Smelting Co. Refinery also.

Texas:

El Paso—Cons. Kansas City Smelting & Refining Co. (Am. Sm. & Ref. Co.)

Utah:

Midvale—U. S. Sm., Ref. & Mng. Co.

Murray—Murray plant, American Smelting & Refining Co.

Tooele—International Smelting Co.

Washington:

Northport—Northport Smelting & Refining Co.

CANADA

British Columbia:

Trail—Consolidated Mining & Smelting Co. of Canada, Ltd. Refinery also. Betts electrolytic process.

Ontario:

Kingston—North American Smelting Co., Ltd.

MEXICO

Chihuahua:

Chihuahua—American Smelting & Refining Co.
 Uruachic—Uruachic Mining & Smelting Co., Ltd.

Coahuila:

Saltillo—Mazapil Copper Co., Ltd.
 Torreon—Compania Metalurgica de Torreon.

Durango:

Velardena (Asarco)—American Smelters Securities Co., controlled by A. S. & R. Co.
 Mapimi—Compania Minera de Penoles (American Metal Co.)

Guerro:

Campo Morado—Reforma Mining & Milling Co. (Idle.)

Nuevo Leon:

Cerralvo—Cia. Min. de Penoles, controlled by Cia de M. & M. (Am. Metal Co.)
 Guadalupe—Cia. Min. de Penoles, controlled by Cia. de M. & M. (Am. Metal Co.)
 Monterrey—Cia. Min. de Penoles, controlled by Cia. de M. & M. (Am. Metal Co.)
 Monterrey—American Smelting & Refining Co.

San Luis Potosi:

San Luis Potosi—Compania Metalurgica Mexicana.

Sonora:

Guaymas—Pacific Smelting & Refining Co. (Mexican-American Smelting & Refining Co., Ltd.) (Idle and never operated.)

MANGANESE

Manganese ore, to be saleable, must contain 35% or more manganese, and for ferro-manganese or ferro, 4% or better, with less than 8% silica, and not over 0.2% phosphorus. As 90% of the manganese ore used in the United States goes into ferro, the demand is chiefly for high-grade ore. For dry batteries, the ore must contain a minimum of 50% manganese, present as the dioxide, and less than 1% iron or ½% copper, nickel or cobalt.

MANGANESE ORE PRODUCTION OF THE UNITED STATES

	Long tons		Long tons		Long tons
1838-1879.....	43,860	1894.....	6,308	1909.....	1,544

1893.....	7,718	1908.....	6,144		

The above does not include ferruginous-manganese manganiferous-iron, manganiferous-silver, or manganiferous-residuum ores. In 1920, production of the first named class was 481,249 tons and of the second class, 286,415 tons, and in 1921, 72,000 and 14,000 tons, respectively.

MOLYBDENUM

The amount of molybdenum produced in the U. S. never exceeded a few tons a year until 1913, but from thence onward, due to war needs, the output increased rapidly until 1918; since then the return to normal conditions has been even more rapid. The records for 1920 show that one U. S. producer only was operating.

Year	Sales lb.	Value	Price per lb.
1914.....	1,297	\$1,297	\$1.00
1915.....	181,769	114,866	0.63
1916.....	206,740	205,000	0.98
1917.....	350,200	495,350	1.41
1918.....	861,637	1,257,000	1.46
1919.....	297,926	341,814	1.14

In U. S. Bureau of Mines Bulletin 111, by E. W. Horton, the American deposits are fully described. Six Western States contain large low-grade deposits that can be concentrated.

Uses: Molybdenum has rather limited uses and while it can be used instead of tungsten in high speed steels and in the manufacture of ordnance, such use was practically prohibited in the U. S. by the Halcomb patent. The metal is also used in electric resistance furnaces, as supports for filaments in electric light bulbs, and Roentgen ray tubes and in alloys. The salts have a limited use in chemical technology.

As noted above the use of molybdenum by American steel manufacturers has been greatly retarded if not prohibited by the Halcomb patent, issued in 1903, and held by the Crucible Steel Co. This controls the manufacture of the best grades of molybdenum-steel, using quantities of 6 to 15% molybdenum, less than 1.2% carbon and 2% silicon; the patent also controls the use of chromium in practicable amounts in conjunction with steels of the composition specified. France and Germany make large quantities of molybdenum steel. The results in those countries make it certain that when the Halcomb patent expires, the use of molybdenum in America will be quickly extended and its production receive a sudden stimulus. The metal is more abundant than tungsten.

NICKEL

Nickel ore, as such was not mined in the United States until 1919, but in that and the following year, the Missouri Cobalt Co. produced shot nickel and nickel hydrate from mixed sulphide ores. Much the larger part of the nickel output however is derived as a by-product in electrolytic refining of copper, and marketed both in the form of sulphate and as the metal; it collects in the electrolyte slime and is obtained from there.

The world's supply comes mainly from Ontario and is imported into the United States, in the form of copper nickel matte, or as Monel metal from the International Nickel Co.'s smelter at Copper Cliff, Ont., from ores mined at Sudbury, Ont. The refineries are at Constable Hook, Bayonne N. J., and Port Colborne, Ont. A much smaller quantity of rich matte has also been imported from Belgium and refined at New Brunswick N. J., by the United States Nickel Co. The British-American Nickel Corporation had its reduction works and refinery near Sudbury, Ont.

Canada also produces nickel from the silver ores of the Cobalt district and those of the Alexo mine at Temiskaming.

Use: large amounts of nickel are used in the manufacture of armor plate, which requires 3 to 4% nickel; it is used in bridge and structural steel; in automobile manufacture, in axles, steering gear, etc.; in the manufacture of German silver, and is a constituent of Monel metal, the con-

verter product of the Sudbury ores which carries 67% nickel, 28% copper, and 5% other metals. Coinage also consumes a large amount of the metal.

NICKEL PRODUCTION OF CANADA (ONTARIO) IN TONS (2,000 POUNDS)

	Ore mined	Ore Smelted	Bess. matte	Copper in matte	Nickel in matte	Value of matte

PLATINUM (AND PALLADIUM)

The United States production of platinum is very small; Russia and Colombia are the largest producers. The domestic output of crude metal was 390 oz. in 1910; 628 in 1911; 721 in 1912; 483 in 1913; 570 in 1914; 742 in 1915; 750 in 1916; 605 oz. in 1917; 647 oz. in 1918; 742 oz. in 1919; 613 oz. in 1920. Prices for the corresponding years were: \$32.70 per oz.; \$43.12; \$45.55; \$44.88; \$45.14; \$49.63; \$83.40; \$102.82; \$105.95; \$114.60; \$111.58. The average price in 1921 was \$75.03.

Use: One of the most important uses of platinum is as a catalyzer in the manufacture of fuming sulphuric trioxide; in this use it is technically known as "contact mass," some of which contains as much as 7 to 8% of platinum. The loss in good practice is small. Platinum dishes and utensils are a necessity in chemical laboratories. Its use in the electric industry and in dentistry is becoming less each year, nichrome replacing it in electrical appliances. The increased use of silica-ware is also reducing the consumption of platinum in concentration of sulphuric acid and for other purposes. The consumption of platinum in jewelry is increasing fast, especially in recent years.

The embargo placed upon the export of platinum from Russia at the beginning of the war and the revolution were the cause of the greatly reduced imports since 1914.

PLATINUM IMPORTS.

THE PLATINUM METALS

Iridium. The price of iridium remains much higher than that of platinum. It is a mistake to speak of iridosmine as "iridium." Iridosmine is an alloy of osmium and iridium, with osmium varying from 17 to 49%. There is practically no market for osmium, except for use in pen points; iridosmine is valuable for the iridium content only. The extraction of osmium is both very costly and dangerous, on account of the poisonous character of the osmium vapor. In 1920, the price of iridium reached \$450 per ounce.

Palladium: The marketable supply increased on account of the greater care taken by the copper refineries in extracting it from the electrolytic slimes in which it occurs with gold, silver, etc., particularly in the slime of Canadian matte, and the base bullion from Australia and elsewhere. The use of palladium, as a catalyzer is well known, and is largely used as an alloy for platinum, as it renders the platinum lighter and of a more brilliant white. In 1920, the price was but \$75 per ounce.

Osmium: The supply of this metal of the platinum group exceeds the demand, tungsten having replaced it in electric light bulbs, and its use in medicine and in silk dyeing being slight.

PYRITE

Pyrite mining is an important industry at several localities in the United States, its sole use being for sulphuric acid manufacture. The market is limited by transportation costs and by the competition of the copper and zinc smelting plants, at which such acid is made, the principal ones being at Anaconda, Montana; Garfield, Utah; Douglas, Arizona; Trail, B. C.; Ducktown, Tenn., and Hillsboro, Danville, Peru, La Salle, Springfield and East St. Louis, all in Illinois; Langeloth and Donora, Penn.; Argentine, Kansas, and Clarksburg, and Moundvills, W. Va. The bulk of the pyrite consumed in America still comes from Spain. Domestic pyrite and pyrrhotite deposits, and the use of "coal brasses" were exploited during the war, but production from these sources has since materially decreased.

QUICKSILVER

Most of the domestic supply of quicksilver comes from California and Texas, Nevada producing the remainder, as Arizona has as yet only a small output. In recent years much of the Californian output has been from old mines, whose richest ore was extracted long ago, and which are now difficult to operate profitably, except when the price is high.

Beside the new supply each year there is also recovered an annual output of old quicksilver in the clean-up of old amalgamation mills, and from other sources; this supply has but little effect on the market. Austria, Italy, and Spain furnish 5/6 of the world's supply.

Quicksilver is used mainly in the manufacture of fulminate of mercury for explosive caps, of scientific and electric apparatus, of drugs and in the recovery of precious metals; the latter use is gradually diminishing. It is also used in manufacturing paints for protective coatings.

The primary domestic market for quicksilver is San Francisco; the price is averaged from the market quotations published in the **Mining and Scientific Press**. Prices are given in dollars per flask of 75 lb.

Production and prices in this country have been as under:

Year	Flasks	Average Price
1914	16,548	\$49.05
1915	21,033	85.79
1916	29,932	125.89
1917	36,159	106.34
1918	32,883	123.46
1919	21,415	90.29
1920	13,392	79.66

RADIUM—(See Uranium Vanadium)

Radium, uranium, and vanadium are closely connected in occurrence and always found together in an ore. Colorado and Utah contain the largest known radium-bearing deposits of the world, but Europe has been the chief market for the ore, which accounts for the greatly reduced output for 1915.

PRODUCTION FROM CARNOTITE ORES

Year.....	Uranium oxide tons	Radium, grams	Vanadium, tons
1920.....	159.6	30.9	510
1919.....	137.6	35.2	247
1918.....	105.5	21.7	276
1917.....	484
1916.....	8 to 10	460
1915.....	23.4	6	635
1914.....	87.2	22.3	435
1913.....	41	10.5	432
1912.....	26	6.7	...

Carnotite is a complex ore consisting essentially of vanadium oxide or with potassium as double silicate, and associated with or loosely combined with uranium oxide. A ton of ordinary carnotite ore assaying about 2½% uranium oxide contains only 12.5 milligrams radium, or one part out of a hundred million recoverable radium. The following firms are producers of radium:

- Standard Chemical Co., Pittsburg, Pa.
- W. L. Cummings Chemical Co., Lansdowne, Pa.
- Radium Company of America, Sellersville, Pa.
- Radium Co. of Colorado, Box 1316, Denver, Colo.
- Radium Luminous Materials Corp.
- National Radium Institute, Denver, Colo.
- Pittsburgh Radium Co., Denver, Colo.
- Ore Products Corp., Denver, Colo.

SELENIUM

The commercial supply of selenium is obtained from the slime or mud resulting from the electrolytic refining of blister copper. In 1919-20, its recovery as a by-product was reported by A. S. & R. Co., Nichols Copper Co., Raritan Copper Works and U. S. S. R. & M. Co. The total U. S. output was 60,025 lb. in 1919 and 92,411 lb. in 1920. The principal use of selenium is as a red coloring for glass and the like.

SILVER

Average monthly prices of silver per ounce, as published by The American Metal Market:

TIN

Very little tin is produced in this country, and the most of it comes from Alaska, which yielded 68 tons metal during 1918. In 1914 South Dakota furnished a few hundred pounds of stream tin, and there are

promises of a revival in lode mining in that State. Tin occurs also in a few other states, but hardly in commercial quantities. Practically all the tin used in the United States is brought from the Straits Settlements and Bolivia, the latter ranking second to the former as a tin producer.

UNITED STATES TIN PRODUCTION (U. S. GEOL. SURVEY)

Year	Tons Concentrates	Percent Tin	Value
1920(approx).....	31	65	\$20,000
1919.....	86	65	72,000
1918.....	130	60	118,000
1917.....	141	60	111,000
1916.....	232	66	122,000
1915.....	200	66
1914.....	157.5	66	66,560
1913.....	84	60	36,970
1912.....	147	60	124,800

Secondary tin recovered in the United States:

Year	Tons	Value
1920.....	23,500	\$22,705,700
1919.....	24,033	29,868,200
1918.....	23,837	41,381,000
1917.....	19,400	23,920,200
1916.....	17,400	15,131,040
1915.....	13,650	10,544,180
1914.....	12,447	8,887,158

The United States is the largest user (50% of the world's output) of tin among the countries of the world, and hence a large importer of the metal. The U. S. Steel Corporation is the greatest single user of the metal.

TIN PRICES IN NEW YORK

Extreme fluctuations and yearly average prices (from the Am. Metal Market) of Pig Tin in New York:

Year	Highest	Lowest	Aver.	Year	Highest	Lowest	Aver.
1885.....	23.50	16.10	19.50	1904.....	30.12½	25.75	28.08
1886.....	23.25	20.45	21.55	1905.....	36.45	28.65	31.55

1895.....	15.15	13.00	14.06	1914.....	65.00	28.50	35.70
1896.....	13.70	12.62½	13.24	1915.....	57.00	32.00	38.66
1897.....	14.12½	13.00	13.60	1916.....	56.00	37.50	43.48
1898.....	19.00	13.70	15.64	1917.....	86.00	42.50	61.65
1899.....	33.12½	19.87½	27.19	1918.....	110.00	70.00	86.80
1900.....	35.00	25.20	30.00	1919.....	72.50	52.75	65.54
1901.....	33.50	23.12½	26.94	1920.....	65.00	32.50	50.36
1902.....	30.62½	22.60	26.95	1921.....	32.11	25.66	28.58
1903.....	30.80	24.95	28.19	Average price for 41 years			31.03

During 1919, owing to Government restriction, the price of tin was held at around 72 cents, but by October it had dropped to 55 cents.

TITANIUM

Titanium is obtained from the two minerals; rutile, titanic oxide 60% titanium; and ilmenite or titanic iron, FeOTiO_2 , with 31.6% titanium. The supply of rutile comes from Virginia, being mined by the American Rutile Co. at Roseland, Nelson county. Its output in 1919 was 102 tons of rutile, containing 95% oxide, and 106 tons of ilmenite, with 49% oxide. Beginning with 1919, ilmenite was recovered by the Titanium Alloy Mfg. Co. from beach sands at Pablo Beach, Fla. but no production figures were available for 1919. Total U. S. production for 1920 was 277 tons of rutile and 268 tons of ilmenite concentrates.

Rutile is used for making ferro-titanium, used in cast iron and steel, in electrodes for arc lamps, in dyeing leather and wool and in chemicals. A little ilmenite has been used in making ferro-titanium and arc lamp electrodes.

TUNGSTEN

Prior to 1914, the domestic output of this valuable metal, used mainly in tool-steel and incandescent lamps, varied from 1,100 to 1,800 tons of concentrate (carrying 60% WO_3) per annum, since when the yield has been as below:

Year	Tons	Per Unit	Total Value
1910.....	1,821	\$7.62	\$832,992
1911.....	1,139	5.97	407,985
1912.....	1,330	6.28	502,158
1913.....	1,537	7.30	672,118
1914.....	900	7.31	435,000
1915.....	2,332	29.33	4,100,000
1916.....	5,923	33.97	12,074,000
1917.....	6,144	18.40	6,783,000
1918.....	5,061	23.24	7,049,300
1919.....	330	18.02	357,000
1920.....	216	6.00	77,760

Wolframite, the most important tungsten ore, is obtained in Korea and in the United States. Extraction from the ore is comparatively simple. Metallic tungsten in the form of powder of various densities is obtained, which is formed into ingots by great hydraulic pressure—not by fusion. The melting point of tungsten is about 3350° C.; higher than that of any other known metal. From ingots to fine wire there are many steps, every one important, in the complicated process.

The tungsten filament has doubled the efficiency of incandescent lamps and provides a white light of far purer quality than any lamp heretofore known. It has provided new targets for X-ray tubes, phonograph needles 50 times as efficient as any that preceded them, better ignition contacts for automobiles, and many other new articles and improvements of old ones.

URANIUM

As uranium is the source of radium, the production of uranium has already been given under radium. Uranium ores occur in many places in the United States, but are found in greatest abundance in the Paradox Valley region of Colorado and Utah.

Ore production in U. S. was 16,839 tons in 1918, 10,146 in 1919—compared with 18,125 in 1916 and 41,964 in 1915.

VANADIUM

Vanadium occurs with uranium in carnotite, the mineral of greatest commercial importance. When vanadium is 14% and uranium but 3% the

mineral is a dark olive green; when the uranium content is 20%, the mineral is a beautiful yellow. The ore is usually low-grade, 2 to 4%, but of wide-spread occurrence, the sandstone looking as if dusted with sulphur.

The Vanadium Corporation of America is said to control 92% of the world's vanadium supply. The demand is for vanadium steel, used in airplane construction, in automobiles, for military helmets, and wherever extreme strength and lightness are required. For the U. S. production of metallic vanadium see under radium.

The two principal producers are:

Standard Chemical Co., Pittsburgh, Pa.

Vanadium Corporation of America, Pittsburgh, Pa. Minas-ragra, Peru.

VANADIUM MINES

Vanadium Corporation at Minas-ragra, Peru, and Vanadium, San Miguel Co., Colo.

Shattuck-Arizona C. Co., Arizona, Standard Chemical Co., Colorado.

Production of metallic vanadium was 411 tons in U. S. and 689 in Peru in 1916; 432 in U. S. and 733 in Peru in 1917; 246 in U. S. and 209 in Peru in 1918; 221 in U. S. in 1919 and 1,000 tons for both countries in 1920.

ZINC (Spelter)

The United States is a large producer of zinc and contains several of the largest zinc mines in the world.

CHAPTER IV

THE MINING COMPANIES AND MINES OF THE UNITED STATES

Those of other countries are in separate chapters. See alphabetical index in front of book.

The descriptions of the active and most of the inactive mining corporations, and operating mines of the various States are arranged by States. The arrangement permits ready identification of companies whose exact titles may often be difficult to recall and it enables the reader to tell what companies are operating in each state.

The descriptions of foreign mining companies are grouped under the name of each country, arranged alphabetically by countries and by companies.

UNITED STATES

A complete index in the front of the book makes quick reference possible if the name of the company is known.

The companies given under this general heading, operate properties in so many places that the descriptions cannot be properly given under any one State. References are, however, given in the appropriate places to the local holdings

ALUMINUM COMPANY OF AMERICA.

Offices: Oliver Bldg., Pittsburgh, Pa., and 120 Broadway, New York.

Officers: Arthur V. Davis, pres.; G. R. Gibbons, v. p.-sec.-asst. treas.; R. E. Withers, v. p.-treas.-asst. sec.; Roy A. Hunt, E. K. Davis, E. S. Fickes and C. H. Moritz, additional vice-presidents, Hy. K. Spalding, mgr. in New York.

Directors: Geo. H. Clapp, A. V. Davis, D. L. Gillespie, R. A. Hunt, Alvah K. Lawrie and R. B. Mellon.

Inc. 1888 in Pa., as the Pittsburgh Reduction Co.; name changed to present title, Jan. 1, 1907. Cap. authorized, \$20,000,000; \$100 par; outstanding, \$18,729,600. Transfers made at company's Pittsburgh office. Annual meeting, 3rd Thursday in February.

Debentures : \$12,000,000, 6% serial gold notes dated March 1, 1919, \$4,000,000 maturing annually from March 1, 1921 to 1923 inclusive. These notes are a direct obligation of the company. Also \$12,000,000, 5-year, 7% gold notes, due Nov. 1, 1925. Bankers Trust Co., New York, trustees. Proceeds are to retire current debts and for repayment of \$4,000,000 6% notes maturing March 1, 1921. Also \$18,000,000, 12-year, 7% bonds sold Sept. 30, 1921, to Guaranty Trust Co., New York, and Union Trust Co., Pittsburgh, proceeds to retire loans and increase working capital.

In a statement made by the president on Oct. 29, 1921, it was shown that in no year since 1915 have the company's earnings after payment of interest, taxes, etc., been less than \$10,000,000; while in 1920 they were over that sum. In no year has more than \$2,350,000 been paid as cash dividends.

On July 1, 1921, current assets exceeded liabilities by \$18,000,000, including 1920 notes.

Company does not issue an annual report.

Dividends: 1906, 3½%; 1907, 11%; 1908, 1%; 1909, 2%; 1910-1913, 4% yearly; 1914, 6%; 1915, 6½%; 1916, 10%; 1917, 8%; 1918, 10%; 1919, 10%.

The St. Lawrence Securities Co. was formed in 1906 to take over St. Lawrence River Power Co., St. Lawrence Transmission Co. and 2 other companies, all at Massena, N. Y. On Nov. 1, 1915, acquired control of the Southern Aluminum Co. and organized the Tallassee Power Co., with \$1,000,000 capital, to complete its unfinished hydro-electric and aluminum manufacturing plants at Badin, N. C. This company was controlled by French interests until the outbreak of the European war in 1914. The plants were to have cost upward of \$10,000,000.

Also owns **Northern Aluminum Co., Demerara Bauxite Co.** (q. v.). of British Guiana, and U. S. Aluminum Co. Is reported to control Aluminum Manufacturers, Inc.

Property: Extensive bauxite deposits in Saline county Ark., from which it secures most of its aluminum ore. About 6 tons of ore yields one ton of metal. Equipment at the property consists of crushing and drying machinery. The bauxite is shipped to a refining plant at East St. Louis, Ill., where the impurities are removed. There are also reduction works at Niagara Falls and Massena, N. Y., where there is also a wire and cable mill, at Maryville, Tenn., and at Badin, N. C. The company has a general fabricating plant at New Kensington, Pa., also a plant for the manufacture of aluminum bronze powder and aluminum foil. Also, there are rolling mills at Niagara Falls, N. Y. and Edgewater, N. J.

The Northern Aluminum Co. is a Canadian corporation, which has a reduction plant and wire mill at Shawinigan Falls, Que., and a fabricating plant at Toronto, Ont.

Production: about 80% of the total aluminum product of the U. S. which, in 1919 was about 130,000,000 lb. Annual capacity of all plants estimated at 175,000,000 lb.

In 1919, all of the bauxite used in America in the manufacture of aluminum, amounting to 272,270 tons, came from Arkansas, so probably this company consumed 220,000 tons. The average price for ore was \$5.85 per long ton, and for aluminum 32.30c. per lb.

AMALGAMATED COPPER CO.

Company dissolved in 1916. Fully described in previous issues of this book. Vols. XI and XII.

AMERICAN FINANCE & SECURITIES CO. (THE)

Involuntary petition in bankruptcy filed June 22, 1915. Adjudicated bankrupt, May 15, 1916. Henry J. West, Camden, N. J., trustee. See Mines Handbook, Vol. XII.

AMERICAN METAL CO., LTD., THE

Home office: 61 Broadway, New York. Branch offices: Oliver Bldg., Pittsburgh, Pa.; Boatman's Bank Bldg., St. Louis, Mo.

Offices in foreign countries: care Marshall Bros. & Co., London; L. Lamy, 6 Ave. du Coq, Paris; Cia. de Minerales y Metales, S. A., Mexico City, and Monterrey, Chih., Mexico; Picart & Beer, 224 Rue Royale, Brussels, Belgium; The South American Metal Co., Valparaiso, Chile and Lima, Peru.

Officers: Berthold Hochschild, New York, Chairman of the Board; C. M. Loeb, pres.; Otto Sussman, Henry Bruère, Julius Loeb, Ludwig Vogelstein, and Harold K. Hochschild, v. p's.; Julian B. Beaty, sec.-treas.; with Julius Goldman, Henry V. Putzel, L. T. Haggin, E. H. Clark, J. P. Grier, Theo. Stanfield, and H. Bernstorff, directors. Moritz Roos, asst. treas.

Voting Trustees: Berthold Hochschild, J. P. Grier, Ludwig Vogelstein, John T. Morrow, J. F. Pauley, Dirlle Chaney and Daniel J. Layton.

Inc. May 1887 in New York, as producers, refiners, exporters, import-

ers and dealers in metals and chemicals. Cap. \$25,000,000; \$100 par; 140,000 shares issued, 70,000 being subscribed in June, 1920. The capital in 1891 was \$200,000.

For an analysis of the ramifications and connections of this company, reference should be made to the report made by the Alien Property Custodian in April 1919. This includes the partnerships with Aron Hirsch & Sohn; Beer, Sondheimer & Co.; The Metallgesellschaft and Vogelstein & Co., the last-named being absorbed by American Metal Co. in December, 1919, thereby controlling the U. S. Metals Refining Co., which see below.

When the Alien Property Custodian seized the 34,644 shares of German-owned stock, these shares and all but 200 of the American held shares were put into a five-year voting trust. This voting trust does not include 16,736 shares formerly belonging to the old firm of H. R. Merton & Co., recently dissolved. The German-owned shares sold at public auction for \$5,750,904, were bought by a syndicate, in which Ludwig Vogelstein acquired a 20% interest, making him one of the largest individual stockholders. The Cerro de Pasco Copper Corporation owns 4,500 shares; L. T. Haggin, 1,000; J. Horace Harding, 1,000; H. C. Frick, est., 1,000; C. D. Barney, 1,200, and E. H. Clark, 1,500 shares.

The American Metal Co. owns or controls the following companies: **American Zinc & Chemical Co.**, Langeloth, Pa.; **U. S. Metals Refining Co.**, Chrome, N. J.; **Arkansas Zinc & Smelting Corp.**, Van Buren, Ark.; **Bartlesville Zinc Co.**, Bartlesville and Blackwell, Oklahoma; **Chanute Spelter Co.**, Joplin, Mo.; **International Metals Selling Co.**; **South American Metal Co.** of Chile, which in turn controls the **Fundicion de Guayacan**, at Guayacan, Chile; and **South American Co.** of Peru. Company also owns entire share capital of the **Cia. de Minerales y Metales, S. A.**, of Mexico, which in 1920 sold all mines, reduction works and railroads to **Cia. Minera de Penoles, S. A.**, and thereby become a holding company for Penoles shares, and for certain real estate and leases. All of the above corporations are described herein, either under their individual title, or under the controlling company, with such information concerning them as is obtainable.

Company also owns the **American Metal Transport Co.**, which in turn owns the **So. American, No. American** and **Columbus Steamship** companies and is associated with the **Climax Molybdenum Co.** (q. v.) of Colorado. Former subsidiaries, **Metallurgical Co. of America** and **Ohio & Colorado Sm. & Ref. Co.** have been dissolved. The latter's **Salida smelter** (q. v.) was acquired in 1920 by **Everly M. Davis** of the **Chemical Industries Corp.** The **Clarksburg Clinkering Co.** and **International Metals Selling Co.** are to be dissolved: former discontinued operations in 1920, and the latter has been inactive for several years. At time of taking over interests of the **U. S. Metals Rfg. Co.**, **American Metal** sold to **U. S. S. R. & M. C.**, the **Grasselli refinery** at East Chicago, Ind.

Also among other investments, it owns $\frac{1}{3}$ of the capital stock of the **Balbach S. & R. Co.**, and a substantial interest in **Cerro de Pasco Copper Corp'n** and **Granby Cons. Mng., Sm. & Power Co.**, Anyox, B. C.

The corporation, through its subsidiaries and allied companies, owns or controls the following products, the average annual quantities produced being as indicated below:

Electrolytic copper, pounds	125,000,000	to	150,000,000
Zinc (Spelter), all grades, tons	75,000	"	100,000
Lead, bonded (Mexican), tons	60,000	"	75,000
Lead, domestic, tons	12,000	"	15,000
Sulphuric acid, tons	80,000	"	100,000
White arsenic, tons	4,000	"	6,000
Coal in Pennsylvania, tons	500,000	"	600,000
Coal in Mexico, tons	350,000	"	400,000
Silver, ounces	12,000,000	"	15,000,000
Zinc oxide (Polar and Arctic brands), tons	7,000	"	10,000

Zinc-dust (American extra pure and Zenith brands),	3,000 "	4,000
Antimonial lead, tons	1,000 "	1,500
Molybdenum concentrate, tons	500 "	1,000

In addition to its own production of metals, the company buys and sells metals in the open market and also contracts to take the entire output of various mines, smelters and refineries in the United States, Canada, Mexico and South America.

The company has contracts with large mines in North America calling for their entire production, totaling 159,000,000 lbs. of copper per annum. Copper received during 1918 from these and others amounted to 141,398,982 lb. Refineries in which the company has an interest, treated this metal. The entire yearly turnover of the company, in copper, is 250,000,000 lb. In 1920 a contract was made for the sale of Cerro de Pasco copper.

Contracts with zinc mines called for 546,919,000 lb of ore during the year ended June 30, 1917. This was treated at the company's smelters. In 2 years, ended June 30, 1917, the zinc ore purchased amounted to 1,700,000,000 lb., plus 585,000,000 lb. of spelter bought in the open market.

The lead turnover in 1917 was 168,000,000 lbs.

The growth of the company is indicated by the following statistics:

Total sales and net earnings of the corporation, after deducting all expenses, profit-sharing, taxes, fixed charges, etc., during the past 10 years, have been as follows (year ending July 1):

	Cap. Stk.	Total	Net		Cap. Stk.	Total	Net
Year	Issued	Sales	Earnings	Year	Issued	Sales	Earnings
1909	\$3,120,000	\$64,274,040	\$ 854,719	1919..	7,000,000	29,268,252	330,004
1910	3,500,000	84,402,083	685,334	1918..	7,000,000	106,166,089	832,157
1911	3,500,000	68,519,484	842,780	1917..	7,000,000	149,216,409	2,892,387
1912	3,500,000	57,060,048	1,365,816	1916(b)	3,500,000	82,615,281	4,899,750
1913	3,500,000	79,243,602	1,001,895	1916(a)	3,500,000	153,796,848	7,638,336
1914	3,500,000	68,835,488	1,088,770	1915..	3,500,000	\$68,468,179	\$2,498,639

(a) Half year ending June 30.

(b) Half year ending Dec. 31.

Current assets at the end of June, 1919, amounted to \$13,963,830, and current liabilities, \$7,265,339.

The company's operating reports have hitherto been kept closely guarded, but a more liberal policy is apparently now to be followed. The company is really one of the few big metal companies of the world, and although its shares are closely held and not listed on any exchange, its operations are matters of great public importance.

United States Metals Refining Co.

Formerly owned by U. S. S. R. & M. Co., but control secured by American Metal Co., in Dec. 1919.

Officers: Ludwig Vogelstein, pres., F. Y. Robertson, v. p. and genmgr.; Otto Sussman, v. p.; J. B. Beaty, sec. treas., with J. A. Schloss, C. V. Drew, and A. G. Todd, directors. R. E. Empey, comptroller; J. A. Schloss, asst. sec.

Staff: R. W. Deacon, gen. supt.; B. B. Hood, asst.; supt.; F. R. Pyne, asst. plant supt.; C. L. Colbert, smelter supt.; M. A. Koehert, production supt.; J. C. Clark, supt. of silver refinery; August Marks, supt. of casting dept. C. E. Smith, purch. agt.

Inc. Nov. 16, 1903, in New Jersey. Cap. \$2,000,000 7% cumulative pfd. and \$2,000,000 com., both \$100 par value. 15,500 shares of each kind are issued, all owned by Am. Metal So., except 1,400 pfd. shares. Annual meeting, 2nd Tuesday in May.

Works: the U. S. M. R. Co. owns electrolytic copper refinery, having

a capacity of refining 240,000,000 lb of copper annually, a copper smelter, consisting of two blast-furnaces, with an annual capacity of smelting 200,000 tons of charge. The copper smelter purchases its ores under long contracts with mines in Canada, Spain, Cuba, and the western coast of South America; and consequently is assured a long life, as it is not dependent on any one mine. The refinery enters into long time contracts for the refining of other copper besides that produced by the U. S. S. R. & M. Co. These two plants are located on 159 acres of ground at Chrome, N. J.. This property is at tide water, permitting ocean going steamers to discharge direct into the plant and is also connected with the Central Railroad of New Jersey.

The **smelter** has two 42x186" blast furnaces, 3 converter stands using 84x120" basic lined converters, two 60x6' rotary kilns sintering fine material, and one Dwight-Lloyd sintering machine. The smelter is further equipped with a 500' steamship dock, with berth for 2 steamers; the most modern type of Fairbank scales, having a sensitiveness of 10 lb. on a load of 200,000 lbs., and a very complete automatic sampling mill equipped with Brunton samplers.

The **refinery** has two 225-ton and two 175-ton anode furnaces and three 225-ton wire-bar furnaces, equipped with charging cranes, casting wheels, waste heat boilers and the most modern devices for mechanical handling. The tank house has 1,228 tanks arranged on the Walker system. The weighing is done on tandem Fairbanks scales, sensitive to 1 lb. in 15,000 lbs.

The power house is steam-driven and arranged for highest economy with economizer and superheater equipment, 3 compound condensing units and 2 triple expansion units, using exhaust steam turbines for the third expansion. Current is generated at the rate of 11,000 amperes. Three circuits are carried in the tank house with a voltage of 115 volts each, 1 power unit being carried in reserve.

The anode slimes are refined by the usual processes, the doré bullion produced being parted electrolytically. Some of the rarer elements are recovered as by-products. A Cottrell plant is used to precipitate fumes from the silver refinery.

A new \$100,000 laboratory with the most modern equipment completed in 1917, is described in the "Eng. & Min. Jour." of March 9, 1918.

The plants of the United States Metals Refining Co. are strictly modern in design and equipment and are noted for the technical excellence of their practice and the purity of their commercial products.

Arkansas Zinc & Smelting Corp.

American Metal owns 85% of common, and has under contract about the same percentage of pfd. stock.

Operates a zinc smelter 1 mile E. of Van Buren, between St. L., I. M. & S. R. R. and St. L. and San F. R. R. Plant includes ore storage bins of 4,000 tons capacity, weighing apparatus, 2 Ropp type kilns of 20 to 25 ton daily capacity, crusher and mixing house, sampler, 4 blocks of 800 retorts each, pottery, electric power plant, and necessary buildings.

The ore and concentrate supply for this plant comes from northern Arkansas and Oklahoma mines.

AMERICAN SMELTING & REFINING CO.

Gen. Offices: 120 Broadway, New York; Corporate office: 15 Exchange Place, Jersey City, N. J.; City of Mexico office: Edificio 'La Mutua' Despacho No. 200, Mexico, D. F. Valparaiso office: Casilia 12, Valparaiso, Chile.

General Officers: Simon Guggenheim, pres.; F. H. Brownell, William Loeb, Jr., H. A. Guess and H. A. Prosser, v. p.'s; R. W. Straus, asst. to pres.; J. C. Emison, treas.; F. W. Hills, compt.; L. A. Chapin, asst. compt.-asst. treas.; W. E. Merriss, sec.; Chas. Earl, asst. sec.; R. P. Reese, aud.

Directors: E. L. Newhouse, chrm.; Daniel and Simon Guggenheim, G. P. Bartholomew, F. H. Brownell, H. M. Brush, Lyman Candee, Merrel P. Callaway, Chas. Earl, J. C. Emison, H. A. Guess, F. W. Hills, E. C.

Insurance Department: Samuel Metzger, mgr.

Foreign representatives: Geo. T. Ewart, fin. agt., El Paso, Texas; R. E. Mora, gen. rep., and W. A. Price, asst. treas. for Mexico.

On January 15, 1919, Murry Guggenheim and S. R. Guggenheim retired from the directorate, after 18 years' active participation in the company's varied operations. Since 1901, when they became connected with the company, the annual turn-over increased from \$82,000,000 to \$390,000,000, and the profit and loss account from \$2,900,000 to \$27,000,000.

Incorporated. April 4, 1899, in New Jersey. **Cap.**, \$115,000,000, with \$65,000,000 common and \$50,000,000 cumulative 7% preferred stock, \$100 par. Original capitalization was \$54,600,000, increased to \$100,000,000 and again increased Jan., 1911, by \$15,000,000 common stock authorized to exchange for 6% debenture bonds of American Smelters Securities Co.. Annual meeting, first Wednesday in April. Has about 19,000 shareholders.

Sales on N. Y. Stock Exchange in 1920 were 761,050 com., range from \$72 in January to \$29½ in December; 78,025 pfd., range from \$100¼ in January to \$64½ in December, and \$6,482,000 first 5s. range from \$86½ in January to \$70 in December. In 1921 to November, range of common was \$44¾ to \$29½ and of pfd., \$83 to \$63¾.

Transfer agt., D. A. Crockett, 140 Broadway, New York; registrar, Chase National Bank, New York.

The A. S. & R. Co. owns all the common stock of the American Smelters Securities Co. and \$35,000,000, 90% of pfd. B and 35% of pfd. A. This was acquired by giving its 1st mtge. 5% bonds in exchange for the series B,

5% preferred stock of the Securities Co., par for par. The 5% cumulative preferred stock, series B, of the Securities Co. is guaranteed by the Smelting Co., both as to interest and principal, and is, therefore, an obligation of the Smelting Co., prior to its preferred stock.

The company owns also the entire capital stock of the **Cons. Kansas City Sm. & Ref. Co.** with reduction works at El Paso, Texas; **United States-Zinc Co.** with the zinc smelters at Sand Springs, Henryetta, Okla., and at Pueblo, Colo., and a lease on one at Kusa, Okla.; **National Metallurgical Co.** (Cia. Metalurgica Nacional) holding title to the Tiro General Mines and Matehuala Smelter, both in Mexico; and **Soc. de Minas Y Fundiciones de Carrizal**, of Chile. It owns also an equal interest with the Utah Copper Co. in the **Garfield Chemical & Mfg. Corp.** Through Am. Sm. Sec. Co., it owns the **Federal Lead Co.**, **Baltimore Copper Sm. & Rolling Co.**, and **Garfield Sm. Co.**; the smelting plants at Tacoma and Selby; the Velardena, Tecolotes, Veta Colorado, Veta Grande mines, and the Asarco smelter, in Mexico. Through the same source, it holds controlling interest in the Western Mng. Co., of Colorado, and Dairy Farm Mng. Co., of California. Many of these subsidiaries, or their plants, are separately described.

The United Sm. & Rfg. Co. and San Juan Sm. & Rfg. Co., former subsidiaries, have been dissolved.

In Feb., 1921, the A. S. & R. Co. took a 5% interest, \$2,000,000 total amount, in the \$40,000,000—8% note issue of the Copper Export Association.

The following financial statements cover both A. S. & R. Co. and A. S. S. Co.:

Consolidated Income Account

	1920	1919	1918
Net earnings, smelters, etc.....	\$11,933,494	\$11,569,384	\$13,234,711

Sulphur dioxide, lb.	8,154,734	4,988,000

The business of the company is so varied that it almost defies analysis, save by a certified accountant. It mines gold, silver, copper, lead, zinc ores and coal. It smelts its own ores of all these metals, and also most of the ore produced by the lesser mines of America. It refines not only these five metals, but manufactures them into copper sheets, rods, tubes, etc., at Baltimore; makes white lead, sheet lead, etc., at Selby; zinc white, etc., at its zinc smelters; sulphuric acid at Perth Amboy, N. J., and Garfield, Utah, and coke at its mines. It refines and sells bismuth, cadmium, arsenic, nickel and platinum, palladium and selenium largely from the slime of its electrolytic refineries, and makes blue vitriol; also smelts tin ore and concentrate from Bolivia.

It owns and operates over 30 mines in Mexico and a number of railways under the title of the Mine Lines of Mexico, and the Mexican Union R. R., and owns and operates the following smelting plants, etc.

Lead Smelters

Plant	Location	Manager	Superintendent	Furnaces	(c) Tons

Tacoma	Tacoma, Wash.	H. Y. Walker, mgr.; R. F. Barker, supt.	102,000

The smelting and refining capacity of the company is equal to 1,175,000,000 lb of electrolytic copper per annum.

The Globe plant at Denver, Colo., produces refined arsenic and cadmium; the Tacoma and Omaha plants produce arsenic and bismuth, respectively. The Saco smelter at Saco, Ariz., was dismantled in 1920. The more important smelters are described under individual titles.

The Mining Properties.

The company's mineral holdings are widespread, covering both American continents, but Mexico has been its particular field of operations, the mines owned or controlled in that country having a possible productive capacity of 2,500,000 tons of ore per annum. The mines owned by the company, and operating 1920-21, follow:

Mine	Location	Metal	Mgr. or Supt.
Federal Lead	Flat River, Missouri.	Lead	H. G. Washburn
Dolores	Mathuala, S. L. P., Mex.	Copper	E. E. Reyer
Bonanza	Bonanza, Zac., Mex.	Lead	M. P. Wylie
Sta. Eulalia	Sta. Eulalia, Chih., Mex.	Silver, Lead, Zinc	W. J. Deavitt
Tecolotes	Sta. Barbara, Chih., Mex.	Silver, Lead, Zinc	W. P. Schumacher
Veta Grande & Veta Colorado	Parral, Chih., Mex.	Silver	Bernard MacDonald
Velardena	Velardena, Dgo., Mex.	Silver, Lead, Copper	R. E. Adams
Durango	Durango, Dgo., Mex.	Iron	R. E. Adams
Sierra Mojada	Sierra Mojada, Coah., Mex.	Silver, Copper, Lead	W. B. Gates
Tiro General	Charcas, S. L. P., Mex.	Silver, Copper	S. H. Sherman

Operating mines leased, or owned in part, but managed by the A. S. & R. Co.

Mine	Location	Metal	Manager
Yak	Leadville, Colo.	Silver, Lead, Zinc	E. L. Hartwell
Premier	Stewart, B. C., Can.	Silver, Gold	D. L. Pitt
Jesus Maria (a)	Sierra Mojada, Coah., Mex.	W. B. Gates
Anganguco	Anganguco, Mich., Mex.	Silver	A. W. Edelen

(a) Under lease from Negociacion Minera da Jesus Maria, S. A.

Mines owned or controlled by the A. S. & R. Co., but not operating 1920-21:

Mine	Location	Metal
Orizaba, etc.	Magistral, Chih., Mex.
Prieta, etc.	Calera, Chih., Mex.
La Luz, etc.	Cordero, Chih., Mex.
Sta. Francisca	Asientos, Ags., Mex.	Copper
Guadalupe	Parral, Chih., Mex.
Imperial	Silver Bell, Ariz.	Copper
Aspen	Silverton, Colo.
Silver Lake	Silverton, Colo.	Silver, lead
Douglas	Blue Hill, Maine	Copper

The Tecolotes, Velardena and Veta Colorado are all equipped with mills, the latter having perhaps the largest cyanide plant in Chihuahua. The Yak, Premier, Federal Lead and Dolores are more completely described under their respective titles, as are a number of the non-operating mines.

Company owns also 5 coal mines, situated in Colorado and Washington and in Mexico.

American Smelters Securities Co.'s properties and those of all other subsidiaries are included in the above.

The Federal Smelter is supplied with ores principally from the company's mining operations in southeast Missouri. At present the output of ore is, roughly speaking, 1,500,000 tons per annum, which is concentrated into approximately 75,000 tons of concentrates, containing about 60,000 tons of lead. About \$750,000 has been spent in enlarging the milling and smelting works, and extending the development of the company's mines in Missouri.

The installation of an electrolytic zinc plant at the Murray, Utah, smelter, and construction of a 200-ton sulphuric acid plant, using the chamber process, at Garfield, Utah, show that the company is still in the fore in its metallurgical practice.

None of the Mexican smelters were operated during 1916. In the first half of 1917, the Aguascalientes, Mathuala, and Monterrey plants were started, continuing through 1918. Four out of the five were in blast early in 1919, and were sufficient to smelt the product of the mines listed above ex-

cepting copper ores at Chihuahua. By August, 1919, all smelters were in blast and continued so throughout 1920 at about 90% capacity, but early in 1921, two Mexican plants were closed down for the remainder of the year, the other continuing on a curtailed basis. In the United States the smelting situation during 1920-21 was far less satisfactory largely because of the depressed copper market; and by mid-1921, the company's operations were about 40% of normal.

The company, during 1916, entered the mining and smelting business in Chile and bought the Caldera smelter including many mines—imperfectly developed—and the stock of the Carrizal smelter.

The American Smelting & Refining Co. is the largest general smelting and metallurgical enterprise in the world. The company will continue to expand and prosper because of its superior metallurgical and business ability, backed by large and modern works and adequate capital.

In 1917 the company suffered from the entire lack of economic law, as the value of its metal products were fixed by the Government, while the cost of labor and supplies mounted high, the latter from 50 to 150% above normal. In 1918, the company obtained no direct advantage from the increased value of the metals, and, on account of the complexities of the ore and metal markets, a conservative program had to be maintained, so that dividends were not increased beyond 6%. The high costs of smelting and refining have been discouraging, but these items have lately been lowered; and although pre-war costs may never be realized again, the directors expect that pre-war profits per ton of ore smelted will obtain as soon as normal business is resumed. In 1919, the business was affected seriously by (1) less ore for smelters and metal for refineries; (2) lack of demand for metals locked up in company's liquid capital; and (3) the burden of long-time contracts.

The company is keen on safety and welfare work among employees. The accident rate for 1919 was 19% less than in 1918, which itself was 28% less than in 1917.

The company is a dominating factor in the lead business of the United States, handling nearly 50% of the domestic output of primary lead. The company practically makes the price of lead, the St. Joseph Lead Co. being the only other concern that makes an independent price. The company's policy is to make exclusive contracts for the smelting of lead ores. In April, 1918, a bitter dispute over smelting contracts with the Bunker Hill & Sullivan company was settled out of court, after the B. H. & S. company had erected a large smelter at Kellogg, Idaho.

The A. S. & R. Co. also smelts a great deal of custom copper ores in various States, but many mine-owners protest against its methods of payment, especially when the market is erratic. On Jan. 1, 1921, the company discontinued marketing the copper of other companies treated in its refineries, this being undertaken by the new firm of Guggenheim Bros., which see.

For some time there have been rumors of internal dissension among the directorate and others of the A. S. & R. Co. In May, 1920, Karl Eilers, Sr., vice president, dropped out of the directorate. In December he was granted permission, by the Supreme Court of New York, to examine and copy the list of shareholders, in order to circularize them and obtain sufficient backing to overthrow the present management by the Guggenheims. Mr. Eilers alleges that the company is losing money by selling copper for future delivery; it should sell all metals as fast as refined; copper has been withheld from sale in a falling market; at least \$5,000,000 was lost to stockholders of the Braden, Chile, Chino, Kennecott, Nevada, Ray and Utah companies by this practice; in April, 1920, the A. S. & R. had 1,600,000 tons of copper on hand; and other charges were made. To these allegations Simon Guggenheim made a general denial. In Jan., 1921, the A. S. & R. Co.'s statement to shareholders repudiated the use of the word 'gambling' in copper in Mr. Eiler's charges; claimed 'marketing' as the correct term.

The management claims it has been faithful to the interests of shareholders, and that the influence and value of services of the Messrs. Guggenheim has been coincident with the great growth and signal success of the corporate enterprise. The statement was signed by all of the directors. On Jan. 6, 1921, Mr. Eilers addressed a letter to fellow stockholders, urging that a board of directors be elected at the annual meeting, April 6, whose interests will be only those of the A. S. & R. Co. When the Guggenheims first joined the company, their interest was about thirty-five millions; now it is only about one-tenth of that sum. Mr. Eilers also mentioned that the selling agency of seven of the largest copper producers had recently been transferred to Guggenheim Bros., Inc., thus depriving the A. S. & R. Co. of up to \$1,000,000 per annum in commissions. At the annual meeting, the Guggenheim management was endorsed by a vote of 3 to 1.

Apart from the Eilers-Guggenheim controversy, an impartial committee was formed in March, 1921, by a large number of stockholders to investigate the management and affairs of the company. This committee, with Ernest Sturm as secretary, at 80 Maiden Lane, N. Y. City, is composed of Henry Evans, Chrm.; Clarence H. Kelsey, Henry K. Pomroy, Willis D. Wood and Henry Whiton. In a published statement, the committee mentions the following as among the matters which need investigation: (a) that practically the entire directorate draw salaries from the company, (b) that those in control are interested in conflicting or competing companies, and (c) that the selling agency has been transferred to Guggenheim Bros. without consideration to the company.

American Smelters Securities Co. United States & Mexico.

Office: 120 Broadway, New York.

The directorate and executive committee are nearly the same as those of the A. S. & R. Co.

Inc. March 25, 1905, in New Jersey, and name changed to present title, May, 1905. **Cap.** \$65,000,000 reduced in 1919 from \$77,000,000; \$100 par; in \$17,000,000 Series A cumulative 6% pfd. stock; outstanding, Jan. 1, 1921, \$9,451,800; \$30,000,000 series B cum., 5% pfd. stock; \$2,848,200 outstanding, and \$18,000,000 (reduced from \$30,000,000) com. stock, all outstanding. Series A has preference as to dividends, and both preference series have equal rights as to assets, both having priority rights to assets and dividends over common stock. A sinking fund, started July 1, 1914, provides for the calling each year of 1% of the original \$17,000,000 preferred A shares outstanding, and an additional sum equal to 6% of the aggregate amount of the issue previously retired. Financial statement is consolidated with that of the A. S. & R. Co.

Company owns, in fee, mines in different districts in Mexico, and copper and lead smelting and refining plants in the United States. It also owns all or a controlling part of the stock of a number of subsidiary companies. These mines, smelting plants and subsidiaries are noted under A. S. & R. Co.

For economic reasons, the A. S. & R. Co. is apparently endeavoring to absorb the A. S. Co., of which it already owns the entire common stock, 90% of pfd. "B" and 40% of pfd. "A"; to this end pfd. "A" stockholders are given the opportunity to exchange stock for A. S. & R. Co. 1st mortgage 5% bonds on a par for par basis.

AMERICAN ZINC, LEAD AND SMELTING CO.

General Offices. 55 Congress St., Boston, Mass. Sales office: 120 Broadway, New York. Operating office: 1012 Pierce Bldg., St. Louis, Mo. Corporate office: 85 Exchange St., Portland, Maine, H. P. Sweetser, clerk.

Officers: C. W. Baker, chairman of directors; W. A. Ogg, pres.; L. A. Coolidge, C. A. Hight, P. E. Coyle, W. F. Rossman and H. A. Wentworth, v. p.'s; H. L. Smith, v. p.-compt.; F. W. Batchelder, sec.-treas.; M. A. Donovan, asst. sec.-treas.; A. W. Dod, mgr of sales; L. E. Wemple, mgr. oxide

dept.; H. I. Young, mgr. of mines; W. E. Wampler, mgr. Missouri mines; C. B. Strachan, supt. Tennessee mines.

Directors: term expires 1921—C. W. Baker, W. H. Coolidge, J. N. Lovell, F. W. Batchelder, and C. D. Spalding. Term expires 1922—L. A. Coolidge, B. P. Bole, C. A. Hight, F. H. Goff, and H. S. Kimball. Term expires 1923—E. P. Brown, E. A. Clark, G. L. Stone, and W. A. Ogg.

Inc. Jan. 26, 1899, in Maine. Cap. \$500,000; \$25 par; increased on April 22, 1889, to \$2,500,000; on October 16, 1906, decreased to \$1,250,000; on December 18, 1906, increased to \$3,750,000; on April 10, 1912, increased to \$7,500,000; outstanding December 31, 1915, \$4,828,000. At the annual meeting in April, 1916, the authorized capital stock consisting of \$7,500,000, divided into 300,000 shares of the par value of \$25, was classified as follows: 100,000 of the authorized shares unissued and in the treasury at that date were classified a pfd. stock, and the remaining 200,000 shares were classified as common stock, so that the present authorized capital consists of 100,000 shares of pfd. stock and 200,000 shares of common stock, of which 96,560 and 193,120, respectively are outstanding. Stock is listed on Boston and New York Stock Exchanges. Annual meeting, second Wednesday in April.

Transfer agents: the company, at 55 Congress St., Boston, and Guaranty Trust Co., New York. **Registrars:** First National Bank, Boston, and Bankers Trust Co., New York.

Sales on N. Y. Stock Exchange during 1920 were 167,500 com., ranging from \$21 $\frac{3}{8}$ in January to \$5 $\frac{3}{4}$ in December; and 20,400 pfd. ranging from \$59 $\frac{1}{2}$ in January to \$25 $\frac{1}{2}$ in December. Range for com. in 1921 to November was \$10 $\frac{1}{2}$ to \$7 $\frac{3}{4}$.

Bonds: \$1,481,700 of Granby M. & S. 5s due June 1, 1926; \$2,000,000 authorized, but \$518,300 retired.

Dividends: \$2 in 1899, \$1 in 1900, \$1.25 in 1907, \$1.50 in 1910, \$2 in 1911 and 1912, and \$1 in 1913. In June, 1916, a stock dividend was declared, each share of com. stock issued received one-half share of pfd. stock, equivalent at par to \$12.50. In 1917 the com. shares received \$2; none since. The pfd. stock is entitled to cumulative dividends of \$6 per annum. In the event of any liquidation or dissolution of the company, holders of the pfd. stock are entitled to be paid \$100 per share and accrued dividends. During 1916, \$3 per share was paid on the pfd., \$6 in 1917, 1918, 1919, and 1920; none in 1921.

The A. Z. L. & S. Co. is an operating and holding company, owning the following: American Zinc Co. of Tenn., American Zinc Co. of Ill., American Limestone Co., American Zinc Ore Separating Co., American Zinc Co. of Arkansas, American Zinc Oxide Co., American Zinc Sales Co., and 649,774 shares of the 925,000 shares issued of the Wisconsin Zinc Co.; all described below.

The American Pipeline Co., another subsidiary, was sold in 1917 with its lands, wells, pipelines, etc., to the Cities Service Co. of Kansas, for \$870,000 of its 6% cum. pfd. stock.

In 1916, company purchased all the assets of the Granby Mining & Smelting Co., consisting of mineral and coal lands and reduction plants as described below.

Company is a purchaser of zinc and lead ores and has an Exploration Department at Boston address for the purchase of metal mines and companies.

In August, 1919, company sold at a profit of \$430,000 the 28,000 shares of Carson Hill Gold Mining Co. it held, having received this as a bonus for the loan of \$600,000 made to the Carson Hill for its development. The latter paid off the loan in October.

Property: in the Joplin district, Mo., the company owns 2,160 acres of mineral land. The principal operations are at the Davey mines on the 655-acre Davey property and at the Vogey mine on a 40-acre tract in the Porto Rico district. There are 4 mines in the Davey group, 2 worked out and 2 producing.

The ore, sulphides of lead and zinc, occurs in bands between the barren zones of flint that comprise the Grand Falls chert. It is from this formation that the term 'sheet-ground mines' is derived, and in it the ore is generally uniform in character and covers large areas. In the Davey mines, 124 acres have been mined out in one continuous chamber. Ore faces are from 14 to 20' in height.

Development: by 6 vertical 2-compartment shafts, all in the ore formation. Two shafts are used for mining purposes, and 4 for ventilation. The ore level is at 250' depth. The ore is very low grade, zinc concentrates recovered representing 1.79% and the lead concentrates 0.67% of ore treated. Ore output has been approximately 50,000 tons ore per acre, from 15 to 20% ore being left as pillars. Reserves are about 1,500,000 tons. Timbering is not necessary. The blanket formation permits of development, in wide areas, average yearly advance on all faces in the mine is 125'.

There are two mills on the property, No. 3 mill of 1,200 tons, and No. 4 of 1,000 tons daily capacity.

The Vogey mine is similar to the Davey. Operations have been irregular, depending on price of zinc and lead concentrates. Zinc concentrates recovered represent 1.76% and lead concentrates 0.20% of rock hoisted. There is a mill on the property, with daily capacity of 1,000 tons.

Reported that a long-term option was taken in fall of 1921 on the High Five mine (q. v.) at Waco, Mo.

Company has a zinc smelter in the gas belt at Caney, Kan., comprising 6,080 retorts with a yearly charge capacity of 60,000 tons of concentrate. The plant at Dearing has been dismantled because of the limited gas supply.

American Zinc Co. of Tennessee

H. I. Young, mgr., Mascot, Tenn.

Inc. Feb. 24, 1911, in Maine. **Cap.** \$10,000; \$1 par; all issued and owned by A. Z. L. & S. Co.

Principal mining operations of the Tennessee Co. are at Mascot, Knox county, where the company owns 2,400 acres, and in Jefferson county, adjoining Knox on the east, where company owns 400 acres of land.

Orebodies of the Mascot and Roseberry mines occur in the Knox dolomite, in lenses of varying sizes and in well-defined brecciated areas which lie in certain recognized zones or bedding planes. The ore is a light colored sphalerite. The zinc formation may be followed for many miles from Knoxville, in an easterly direction. In 1910 the company obtained an option on the Holston property, started drilling and proved up a large tonnage of pay ore.

Development: by 3 shafts; Nos. 1 and 2, 300 and 800' deep, at the Mascot, and one 200' deep at the Roseberry. A 3-compartment shaft. (No. 1) was sunk in 1911 and the orebody developed in 1912. The main orebody is developed on the 280' level, and, as exposed, is 1,300' long, 700' to 880' wide, and 30' to 40' thick. Limits of the orebody have not been reached. In 1913, a 4-compartment shaft (No. 2) was sunk 2,000' east of No. 1, and a second orebody developed with length of 1,500', thickness of 40' to 125', width of 300' and limits not yet reached. Average grade of ore as shown by drill records is 5% to 5½% zinc. Greatest depth of workings, 800', is at mine No. 2. A tramway connects No. 2 mine with No. 1 mill. Development has shown the ore to be continuous between No. 1 and No. 2 orebodies. Further drilling 3,000' east of eastern limits of mine No. 2 has indicated a third orebody; this will not be developed until some future time.

Mining methods at the Mascot mines are described by H. A. Coy and H. B. Henegar in Vol. 58, Trans., A. I. M. E.

From the east to west the ore development as now shown is 7,900' in length. There has been blocked out 4,000,000 to 5,000,000 tons of ore, which will average 4% zinc. Ore reserves were materially increased in 1919 and maintained in 1920.

In May, 1913, the Mascot mill with 1,000 tons daily capacity, was completed. Additions to this mill were finished in July, 1915, bringing its daily capacity up to 2,400 tons; equipment consists of crushers, rolls, jigs, and tables, followed by flotation treatment of slime and fine sand. Power is obtained from the Tennessee Power Co. The company has developed the town of Mascot, owning 350 houses, a company store, and hotel.

Mascot concentrate averages about 60% zinc, is of high quality and is in fact the lowest in lead and iron of any produced in quantity in the U. S.; spelter produced therefrom commands a substantial premium over Prime Western.

These mines were steady producers throughout 1919, but in 1920 the Roseberry was abandoned and its 500-ton mill dismantled.

Wisconsin Zinc Co.

A. M. Plumb, mgr., Platteville, Wis.

Inc. June 27, 1908, in Maine. **Cap.** \$1,000,000; \$1 par; issued 925,000; 649,774 owned by A. Z. L. & S. Co.

Property: in S. W. part of the State. The ore deposits exist in the forms of flats and pitches, the flats being horizontal deposits along the bedding planes of the rocks, while the pitches are dipping crevices. The chief deposits lie in the lower part of the Galena limestone at a depth of 100' to 200' and vary in length from 1,000' to 5,000', in width from 30' to 300', and in height from 12' to 60'. The ores consist of the sulphides of zinc, lead and iron, the latter in the form of marcasite; 6% is average zinc content.

The principal operations in the Wisconsin field are as follows:

The C. A. T. at New Diggings is opened by 2 shafts, Nos. 1 and 2, connected in 1919 by a drift.

Champion property, 434 acres at New Diggings, on which there has been developed an orebody 1,500' long, 800' wide, and 40' high. A mill of 500 tons daily capacity is in operation. The life of this property, with surrounding leases is, as estimated at present, from 5 to 10 years. In 1920, the Black stone property was acquired and extension of Champion orebody will be opened through its shaft.

Longhorn property, at New Diggings, operated on leased land on 10% royalty, has ore reserves of 175,000 tons high grade ore. A 350-ton mill is in operation.

The Thompson mine, at New Diggings, operated on leased land on 10% royalty, has ore reserves of 200,000 tons high grade ore; equipped with 350-ton mill.

The Copeland mine in the Shullsburg district, equipped with a 200-ton mill erected in 1917. The Winskell property, in the same district was exhausted and abandoned in spring of 1919, and its 450-ton mill dismantled. A 170' shaft was sunk on the Booty lease, ½ mile to the W.

Company owns a number of other leases in the district in which valuable ore reserves have been proved by drilling. The policy of the company is to maintain a drilling campaign for new orebodies, with the purpose of keeping 5 to 10 years' production in sight.

In Wisconsin, the grade of zinc wet-concentrate is low and necessitates treatment by means of part roast and magnetic separation. The company has a plant for this purpose, equipped with a 7-hearth roaster of the Skinner type near the Champion property. This plant has 200 tons daily capacity, producing a finished concentrate assaying 58 to 60% zinc. Cleveland-Knowles and Dings separators are largely employed in this plant, also the McDougall furnace. A wet mill was erected during the summer of 1917 to wash out fine and slime. The Overstrom sludge-table is mostly used. Power supplied by the Inter-state Light and Power Co. of Galena, Ill., is steady and good.

The C. A. T., Champion and Longhorn can produce from 800 to 1,000 tons of green blende concentrate per week. The output of the Champion alone was 15,727 tons in 1917; and 17,004 tons in 1919, making it for the latter year the second largest producer of blende in Wisconsin.

Company is one of the largest zinc-ore producers of this country, operating a number of mines and an industrial railway that connects its several properties with the main line of the Galena Division of the Chicago & Northwestern railroad. It also combined with the Vinegar Hill Zinc and New Jersey Zinc companies to construct and operate at their own expense an industrial spur that is of great benefit to all.

Sales of dressed ore are made in open market to the highest bidder, although the Wisconsin Zinc Co. is a subsidiary of the American Zinc, Lead & Smelting Co., and is in this manner affiliated with the latter's smelter, at Hillsboro, Ill., to which point much of the finished ore finds its way. Heavy shipments are made at intervals of pyrite saved as by-product in the separation of zinc ore. The pyrite carries 30 to 35% sulphur.

Mining operations were suspended in January, 1921.

American Zinc Co. of Illinois.

Inc. Aug. 15, 1911, in Maine. Cap. \$10,000; \$1 par; all issued and owned by the A. Z. L. & S. Co.

Property: at Hillsboro, Ill., consists of 600 acres, on which has been built a modern smelter plant of 48,164 retorts furnace capacity, capable of distilling 48,000 tons of concentrate per year; 3 Hegeler muffle kilns pottery, machine-shop, warehouse, ore storage bins and sulphuric acid plant producing 45,000 tons of 60° acid annually; also a zinc-oxide plant of 24 furnaces, enlarged during 1918.

American Zinc Ore Separating Co.

Address: Platteville, Wis.

Inc. Oct. 13, 1908, in Maine. **Cap.** \$25,000; \$5 par; all issued and owned by A. Z. L. & S. Co. This company owns certain patents for the separating of zinc ores by the Huff electrostatic method. Its business is to lease machines constructed under these patents on a royalty basis.

It also owns and operates a plant using this method, and by which iron is removed from semi-roasted mill concentrate.

American Limestone Co.

Inc. Nov. 9, 1911. **Cap.** \$2,000; \$1 par; 5 shares issued and owned by A. Z. L. & S. Co. A modern plant was built in 1916 to dispose of the tailing of the Mascot mill of the American Zinc Co. of Tenn. Table and flotation tailings are pulverized and sold for fertilizing purposes; other tailings are sold for railroad ballast, road construction, etc.

American Zinc Oxide Co.

Inc. Sept. 9, 1919, in Maine. **Cap.** \$1,000,000; \$100 par; \$500,000 issued and owned by the A. Z. L. & S. Co.

Property: a zinc oxide plant at Columbus, Ohio, with a capacity of 9,000 tons of lead-free zinc oxide per year from ores supplied by the Mascot mines of the A. Z. Co. of Tenn. Reported that another unit is to be added. In 1921, operations were conducted on a 50% basis.

American Zinc Co. of Arkansas.

Inc. Aug 8, 1917, in Maine. **Cap.** \$10,000; \$5 par; all issued and owned by the A. Z. L. & S. Co.

Property: 1,700 acres of zinc lands in Newton county, Arkansas.

American Zinc Sales Co.

Inc. March 1, 1919, in Maine. **Cap.** \$10,000; \$10 par; all issued and owned by the A. Z. L. & S. Co.

This company sells zinc oxide produced by the American Zinc Co. of Illinois and American Zinc Oxide Co.

Granby Mining & Smelting Co. of Missouri

Address: Granby, Newton Co., Mo.

Inc. in 1864. In June, 1916, net quick assets exceeded \$2,750,000, of which nearly \$1,000,000 was in cash; current liabilities, less than \$300,000. Reported in June that company had declared a dividend of \$2,000,000 in the form of 10-year, 5% bonds, secured by mortgage of its real estate, and the company subject to this mortgage, had been taken over by the Granby M. & S. Co. of Maine, to be then taken over by the American Zinc, Lead & Smelting Co. Purchase price, \$8,000,000. The \$2,000,000 bond issue has been taken as part payment; and it is proposed to furnish \$2,000,000 additional by an issue of 40,000 shares of common stock of the A. Z. L. & S. Co., to be offered stockholders at \$50, stock to be underwritten without commission; remaining \$4,000,000 to be paid for out of earnings. Value and earning capacities of properties based on a 5-ct. spelter market.

Property: owns in fee simple about 30,000 acres of land in the zinc district of southwestern Missouri. For nearly 50 years its revenue has come from royalties paid by lessees operating on these lands. It has developed a large tonnage of rich ore near Granby. Company has been a dividend payer almost from its inception.

The Klondike, Mascot, and Golden Rule mines, near Granby, Mo., are in sheet-ground formation. Recovery in zinc concentrates represents from 2:

to 4% of rock hoisted. The Klondike is developed by 3 shafts and equipped with a 1,000-ton mill; the Mascot, by 3 shafts, and a 350-ton mill; the Golden Rule by 1 shaft and a 300-ton mill; the B. & H. mine, near Joplin, by 1 shaft and a 250-ton mill. All mills are operated by electric power, with the exception of the B. & H., which has a steam plant.

There are also many mines being operated under lease on a royalty basis on the company's lands in the Granby district. An extensive drilling campaign has been carried on to determine values and possibilities on these holdings.

In East St. Louis, Ill., occupying 143 acres, there is a modern smelter of 5,620 retorts capacity, capable of treating 54,000 tons of zinc concentrate annually; a Hegeler & De Spirlet roasting kiln, pottery, sulphuric acid plant, 8 furnace oxide plant, with auxiliary buildings. The zinc plant at Neodesha, Kansas, has been dismantled. Company has also a lead smelter at Granby with a yearly capacity of 20,000 tons of ore. It also owns 10,000 acres of coal land in Illinois.

Operations of the smelting properties purchased from Granby M. & S. met expectations during 1919, but production and ore developments were not satisfactory.

ANACONDA COPPER MINING CO.

Office: 25 Broadway, New York City. **Butte Office:** Hennessy Bldg., Butte, Mont.

Officers: John D. Ryan, chairman of board of directors; C. F. Kelley, pres.; B. B. Thayer, v. p.; A. H. Melin, sec-treas.; R. D. Cole, asst.-sec.; J. T. Roberts, gen. aud.; D. B. Hennessy, asst. treas.

Directors: John D. Ryan, B. B. Thayer, George H. Church, Nicholas F. Brady, Wm. Rockefeller, C. F. Kelley, J. Horace Harding, Andrew J. Miller and A. H. Melin.

Inc. June 18, 1895, in Montana, as successor of Anaconda Mining Co. **Cap.** \$150,000,000; shares \$50 par; 2,564,375 issued.

Funded debt: \$16,000,000 2-year 5% gold notes, due March 1, 1917, were paid off in cash at maturity.

On December 31, 1918, an issue of \$50,000,000 ten-year secured gold bonds was authorized. Of these, \$25,000,000, designated as Series A, bearing 6% interest, were issued on January 2, 1919, under a trust agreement with the Guaranty Trust Co. of New York. The issue was sold to bankers. The amount of this loan is for equipment of the Andes Copper Mining Co. and Santiago Mining Co., and to replace in current account part of the earnings which have been invested by the company. It was deemed best to raise money this way rather than add permanently to the capitalization.

In a statement issued at the time this loan was raised, company reported that on September 30, 1918, its current assets totaled \$73,000,000, and current liabilities \$41,000,000. The excess of assets increased by \$11,200,000 from Jan. 1, 1913, to Sept. 30, 1918. Fixed assets of company and subsidiaries aggregated \$155,687,253, an increase of \$59,109,458. During that period, earnings totaled \$165,060,981, and dividends \$82,687,500.

In Oct., 1920, the balance of the 10-year bonds, namely, \$25,000,000, was offered. They are designated as Series B, bearing 7%, and due Jan. 1, 1929. The sum of \$1,500,000 annually is to be set aside as a sinking fund to repay the Series A and B notes.

In a statement issued at the time of this second issue, current assets as of June 30, 1920, were \$79,838,011, and current liabilities, \$18,023,738, leaving an excess of \$61,814,273.

In December, 1921, 233,155 shares of Anaconda were offered to stockholders at \$50 each, the entire amount being underwritten by a syndicate. The \$11,656,250 thus raised, together with a like amount of cash was used to acquire a 51% interest in the capital stock of the American Brass Co., shares being bought at \$300 each.

The Anaconda company has a very broad charter, permitting it to acquire mortgage, lease, assign and transfer the capital stock, bonds or securities of

any other corporation. Transfer agent, National City Bank, N. Y.; registrar, Bankers Trust Co. N. Y. Pogson, Peloubet Co., auditors. Annual meeting, third Wednesday in May at Anaconda. Stock listed in New York, Boston, London exchanges.

Copper Export Association: in Feb., 1921, company took a 12.26% interest, \$4,904,000 total amount, in the Copper Export Association's \$40,000,000 8% note issue.

Balance Sheet, including subsidiaries, years ended December 31:

Current assets Dec. 31, 1920 totaled \$77,367,243, and current liabilities, \$32,990,041. Net working capital Dec. 31, 1920, \$67,861,301.

Taxes paid to Silver Bow county during the past 5 years were \$429,224; \$982,428; \$420,377; \$76,031; and \$148,396.

Dividends: paid quarterly; 13% in 1901, 4% in 1902, 1903, 1904; 11½% in 1905, 19¼% in 1906, 26% in 1907, 8% in 1908 to 1911, inclusive; 9% in 1912, 12% in 1913, 10% in 1914, 6% in 1915, 14% in 1916, 17% in 1917, 16% in 1918, 9% in 1919, 4% in 1920. The total is \$170,835,625. The distribution for the last quarter in 1920 and all of 1921 was passed on account of the metal markets.

Investments made in 1916 amounted to \$7,968,836. This includes total cost of the Andes Copper Co. stock acquired to Dec. 31, 1916; 20,740 shares of Alice Gold & Silver Mining Co.; 26,100 shares of Greene Cananea; 50,000 share of Inspiration Cons., and 188,300 shares of Butte Copper & Zinc.

In 1917, investments with \$4,550,600 of Liberty Bonds, totalled \$9,066,389, this amount including the cost of stock issued during the year by the South American companies to reimburse Anaconda for advances made; 28,740 shares of Butte Copper & Zinc; 50,900 shares of Inspiration Cons., and 2,700 shares of Greene-Cananea.

In 1918, the sum of \$8,883,628 was invested. Aside from advances made to the South American companies, the International Smelting Co. (a subsidiary), exercised its option on 630,000 of the total of 1,250,000 shares of the Walker Copper Co. in California (which see), and \$794,668 in purchasing land and organizing the Arizona Oil Co., which has producing wells in California.

In 1921, company owned 285,300 shares of Inspiration Con. Cop. Co.

In the suit of minority shareholders of the Alice G. & S. M. Co., the U. S. Supreme Court in Jan., 1921, set aside the previous decision in favor of Anaconda, ruling that the price paid was not enough. As Anaconda holds 95% of the Alice shares, the status will not be much altered.

The Anaconda company has become a large holding company, owning or controlling a considerable number of industrial and mining corporations, not merely in the United States, but also in South America. These widespread and varied interests, have been gradually acquired, and are held by stock ownership, often exclusive ownership of the various subsidiary corporations mentioned hereunder.

Anaconda now owns a 51% interest in the American Brass Co., controlling 40% of the brass trade of the United States, as described farther on, and owns the entire stock issue of the **International Smelting Co.**, which holds all the Utah and Arizona properties of the former International Smelting & Refining Co., bought by the Anaconda and transferred to its subsidiary in May 1914. All other assets, including stock of the **Raritan Copper Works** and **International Lead Refining Co.** were taken over by the Anaconda company itself. The International Smelting Co. and the two works just named are described under their own titles farther on in this description.

Company also owns **Anaconda Lead Products Co.** formed in 1919 to engage in the production of white lead by electrolytic methods. A plant put up at East Chicago, Ind., near that of the International Lead Ref. Co. was started Jan. 25, 1920, producing 18 tons of white lead per day up to Dec. 31, 1920.

The Anaconda also has a substantial interest in the **Copper Export Association** described elsewhere, and in the various subsidiaries described below.

The **Montana Holdings** include: 36 mines, covering a very large part of the productive area of Butte, Montana, including former holdings of the Boston-Montana, United Copper, Butte & Boston, etc., also, former **Pilot Butte Co.** properties acquired by purchase in 1916, the **Alice Gold & Silver Mining Co.** properties, controlled by ownership of 95% of the entire issued capital stock of that company, a lease till July 8, 1931 on the Butte Copper & Zinc Co. mines terminable on 6 months notice to that company, and providing for equal division of profits. As of Dec. 31, 1920, the Ana-

conda Co. owned \$1,085,200 out of the 3,000,000 stock of the Butte Copper & Zinc Co. These properties are described in the following pages.

The Zinc Plant at Great Falls is part of the smelting plant at that place, completed Sept., 1916 and outputs 150 tons per day. Operations suspended Feb., 1921.

Electrolytic Copper Refinery at Great Falls, a plant completed 1916, with a capacity of 16,000,000 lb. per month.

Wire and Rod Mill at Great Falls is capable of rolling 100 tons copper rods, or drawing into wire 80 tons of copper per day.

Phosphate Mines, include a large acreage of rich phosphatic limestone at Conda near Soda Springs, Ida., with 480 acre plant and townsite area. In 1920 Anaconda built 7½ mile railroad to the property, from Strahan station on the Oregon Short Line R. R.

The Northern Montana Natural Gas Co. formed 1918, was dissolved Sept., 1919, gas wells proving too small for profit.

The Washoe Reduction Works at Anaconda, and its various industrial appendages, and the Great Falls Plant, at Great Falls, Montana, are described in the succeeding pages.

The **California Holdings** include:

Walker Mining Co.

The Anaconda Co. through its subsidiary the International Smelting Co. holds 630,000 shares out of a total of 1,250,000 shares of the Walker Mining Co. stock. For description of property see under this title in California section of this book.

Arizona Oil Co.

To ensure an adequate oil supply for its Miami smelter (of the International Sm. Co.), company purchased jointly with Inspiration Cons. Mining Co., 160 acres of producing oil land in the Bakersfield district, Calif. The Arizona Oil Co. was formed with a capitalization of \$2,500,000; par \$100; of which \$1,632,000 has been issued, half of it to Anaconda and half to Inspiration Cons. Copper Co. In 1920, the oil company made a profit of \$40 per share, on an output of 395,641 barrels of oil Anaconda receiving \$326,400 in dividends.

SOUTH AMERICAN HOLDINGS

The Anaconda company owns several large producing properties and various others under exploration and development, in South America. In 1916, the Andes Copper Co. was organized as a holding company, with a capitalization of \$50,000,000; par \$25; all owned by the Anaconda company. The Andes Copper Co. owns all the stock of the Andes Copper Mining Co., the operating subsidiary and of the Potrerillos Railway Co. (See description in Chilean section of this book).

Santiago Mining Co. organized 1917 in Delaware. Cap. \$10,000,000; par \$25; is controlled by the Anaconda Co. The Santiago company took over various properties which Anaconda had acquired and developed, issuing stock in payment for cost of lands, equipment and development.

Properties: Lo Aguirre Mines, 5 groups 500 acres, 12 miles from Santiago, Chile; **Africana Mines**, 3 miles east of Lo Aguirre and **Lo Aguirre and Farfana Farms.** See under Chile in this volume.

The Anaconda company will advance funds for development of above properties taking stock of the Santiago company in payment therefor. When financing is completed the Anaconda company will own 80% of the issued stock and Wm. Braden and associates 20%. The Africana is to be developed to give a production of 500 tons per day and Lo Aguirre of 750 tons per day. Development was continued 1920, 1921. Mining and metallurgical construction has been deferred until normal conditions prevail in the copper mining industry.

MONTANA PROPERTIES

Office: Hennessy Block, Butte, Montana.

Operating officials:

Mining Department

General: John Gillie, gen. mgr. of mines; W. B. Daly, asst. gen. mgr.; C. W. Goodale, chairman Safety First committee. C. L. Berrier, gen. supt. of mines; John O'Neill and E. M. Norris, asst. gen. supts.; C. D. Woodward, chief, elec. engr.; A. S. Richardson, ventilation engr.; Reno H. Sales, chief geologist; F. A. Linforth, asst. geol. The mine superintendents are as follows:

Anaconda Group

Ed. Renouard, Badger State mine.	Dan Cronin, Never Sweat mine.
Roy Hughes, Badger State mine.	Dan. P. Sullivan, Original mine.
Jas. S. Egan, Mountain Con. mine	Charles Bonner, Steward mine.
E. G. Kane, Bell-Diamond mine.	Jos. Merrick, Moonlight mine.
T. H. Oass, High Ore mine.	Thos.. McGrath, Gray Rock mine.
D. H. Crowley, St. Lawrence mine.	Jas. L. Quinn, Belmont mine.
Wm. Nevin, Anaconda mine.	J. L. Boardman, Safety engr.

Boston & Montana Group

John Varker, Mountain View mine.	John Bartlett, Tramway mine.
Herbert R. Tunnell, Penn. mine.	Geo. Bennett, Leonard mine.
K. P. Krueger, West Colusa mine.	John C. Gaul, Berkeley mine.
G. E. Moulthrop, Tramway mine.	J. H. Rogers, Silver Bow mine.
Jas. W. Tippett, East Colusa mine.	Jas. McQuay, Tropic mine.
J. L. Boardman, Safety engr.	

Zinc Group of Mines

J. J. Carrigan, gen. supt.	Jas. Brennan, Emma mine.
Herbert Tonkin, Poulin mine.	Leo McGrath, Alice mine.
J. F. Dugan, Nettie mine.	H. J. Rahilly, Reins shaft.
J. L. Boardman, Safety engr.	John Berkin, Orphan Boy mine.

Great Falls Reduction Works

A. E. Wiggin, supt.	W. T. Burns, supt, elec. refinery.
J. O. Elton, asst. supt.	P. Cudahy, supt. furnace refinery.
E. S. Bardwell, metallurgist.	Peter Thill, cons. engr.
W. H. Gunniss, mgr. brick dept.	James Moore, supt. surface dept.
A. T. Elliott, gen. smelter foreman.	A. McDonald, supt. trammng dept.
Edgar C. Maclay, chemist.	George Tryon, mech. supt.
Edwin Young, Safety eng.	

Coal Department

F. W. C. Whyte, mgr., Anaconda.
 T. C. Russell, supt. Diamond Coal & Coke Co., Diamondville, Wyo.
 Thos. Good, supt. A. C. M. Co., Coal Department, Washoe.
 C. A. Sederholm, supt. A. C. M. Co., Coal Department, Sand Coulee, Mont.

Lumber Department

Kenneth Ross, mgr., Missoula, Mont.
 M. M. Ross, supt., St. Regis.
 J. E. Totman, Hamilton.

B. A. & P. Railway

H. A. Gallwey, mgr., Anaconda.	C. F. Murphy, supt.
C. H. Spengler, master mechanic.	J. H. Schuch, chief engr.

Labor Commissioner Thomas J. Chope

Reduction Departments**Washoe Reduction Works, Anaconda**

Fred. Laist, manager	H. H. Nell, Sec. of Safety Com.
L. V. Bender, gen. supt.	W. M. Kelly, gen. smelter foreman.
H. S. Ware, asst. supt.	W. N. Tanner, chief engr.
L. E. Jones, supt. elec. dept.	W. C. Capron, asst. chief engr.
R. B. Kelly, Engr.	B. S. Morrow, supt. of Concentration.

Department.	Superintendent.
Converting and casting	Pat Dalton
	R. E. Howe, asst.
Carpenter shop	Carl Johnson
Boiler shop	John Casey
Blacksmith	J. A. McDonald
Laboratory	J. A. Root
Sampling mill	Rod Munn
Local terminal and weighing	W. H. Nutting
Concentrator	B. S. Morrow
Blast	{ P. Barker
	{ G. Brolin, asst.
Surface	W. C. Cadwell
Power house	{ M. M. Adams
	{ P. J. Grush, asst.
Arsenic plant	E. M. Dunn
Foundry	H. N. Blake
	S. T. Blair, asst.

Research	F. F. Frick
Stock bins	Thos. Marron
Leaching plant	H. T. Maguire
Reverberatory	Ed. O'Brien
Briquette	H. S. Ware
Acid plant	M. R. Hoyt
Masons	A. N. Jette
Roaster No. 2 and McDougalls	J. K. Murphy
Coal dust	H. I. Silvester
Zinc concentrator	S. S. Rodgers
Brick plant	H. H. Coe
Electric department	L. E. Jones
Mechanical	H. N. Blake, asst.
Machine-shop	Clarence Bardon
Pipe-shop	John Bills
Paint-shop	James Sweeney
Lead burning	G. C. Detrich
Water works and Street Railway	H. M. Johnson
Chief clerk	Geo. C. Jackson

The Butte Property: consists of 1,168 acres mineral claims at Butte, including all the claims formerly held by the following companies: (1) **Boston & Mont. Cons. C. & S. Mng. Co.**; (2) **Butte & Boston Cons. Mng. Co.**; (3) **Red Metal Mng. Co.**; (4) **Washoe Copper Co.**; (5) **Parrot Silver & Copper Co.**; (6) **Alice Gold & Silver Mng Co.**; (7) **Trenton (formerly Colorado) Mng. & Dev. Co.**; (8) **Big Blackfoot Lumber Co.**; (9) **Diamond Coal & Coke Co.**; (10) **Original Cons. Mng. Co.**; (11) **Colusa Parrot Mng. & Sm. Co.** (12) **Alex Scott Mining Co.** at Butte, and the (13) **Pilot Butte Mining Co.**

Company owns 1,100,000 acres lumber land (**Big Blackfoot Lumber Co.**) and sawmills at Bonner, Hamilton, Hope, St. Regis, Mont.; and 13,280 acres coal lands at Diamondville, Wyo.; Washoe, Belt, and Sand Coulee, Mont.

The Raven mine was bought August 4, 1915, for \$65,000. Company has a 5-year lease on the Emma mine (Butte Copper & Zinc Co.) operated as a zinc producer, and bought the Czarroma claim fraction, containing the continuation of the Emma vein for \$225,000 late in 1915. Options were secured on several placer claims in the S. W. part of Butte. The E. portion of the Alex Scott claim, and the Little Annie claim, were purchased for \$750,000. Company has stopped work on the low-grade gold property, called the Porphyry Dike, near Rimini, Mont.; also on the Bonanza claims in the S. W. part of Butte, because of failure to find zinc-silver ore in commercial amount. The Gambrinus mine was purchased in July, 1918; and company bought a half interest in the Kit Carson claim for \$48,000, the ground lying

between the company's Orphan Girl mine and Hibernian of the Davis-Daly Co.

Geology: Butte hill is a network of metalliferous veins, the older lodes with nearly east and west strike being displaced by a number of northwest fault veins cut in turn by still later northeast fault veins and these all cut by the Rarus fault. The geology is fully described by Walter Harvey Weed in Prof. Paper 74 (1912) of the U. S. Geological Survey, which can be had free of charge from that Bureau. Briefly, the Butte ores, consist of a mixture of chalcocite, bornite and sometimes covellite, with a gangue of quartz sericite and altered granite. On the outskirts of the district, zinc sulphide occurs. These ores are contained in fissure veins in granite (quartz-monzonite), ranging from 5' to 20' wide. These veins are cut by at least 4 successive series of faults, the earlier of which also contain ore shoots. The matter of clearly defining apex and extra lateral rights, under the present Federal mining laws, is one of the greatest possible difficulty, and in the past has led to litigation costing millions of dollars, all of which ultimately had to be paid out of the profits from copper produced. The last dispute of this kind was settled in Aug., 1920, Anaconda reaching a compromise with the Elm Orlu M. Co. concerning the Emily vein in the Pilot-Butte claim. Early in 1920 Anaconda claimed that part of one of the David-Dalys main veins apexed in its ground, but this has not yet been proven by development work, and will be the subject of mutual work and friendly negotiations.

The mine waters of certain properties are highly charged with copper, and precipitation tanks have been built at practically all of the big mines. Old scrap iron, tin cans and wire rope are used as precipitating agents, these articles commanding a standard price of 1 cent per pound. The flow of the water in the precipitation tanks and launders is much more rapid than is the case in the large Spanish lixiviation plants. The principal plant, at the Leonard mine, cost about \$20,000 and treats water from all of the Boston & Montana mines. It has a building for drying and shipping the copper precipitate.

Mines and shaft equipment: by the merger of the Anaconda and Boston & Montana, both among the six largest copper producers of the world, and the addition of a number of other mines of second and third rank in productive capacity, the Anaconda became the largest copper company in the world. Employment is normally given to over 10,000 men in all departments, and a payroll in Butte alone of over \$1,000,000 monthly, with large additional payrolls at its works in Anaconda and Great Falls. In Feb., 1921, there were only 4,500 men employed. The company's interest in its employees is genuine, and in addition to a department of labor, and a safety-first organization, a large area of ground near Anaconda called "Opportunity" has been drained and cut up into large lots for farming and residences.

As property lines have been practically eliminated, so far as underground work is concerned, by the merging of various companies, and workings have been connected, the property can be most usefully described in sections called by the familiar names used under former ownership, or by the names of the 22 operating shafts of the company.

Development: for 1920 totaled 22.5 miles.

Engineering features at the company's mines are described in 'The Anode' for Nov., 1920, by W. J. McMahon, surveyor of the Steward mine. The system is based on that in use for many years at the Boston & Montana mines.

Reserves: The many mines of the Anaconda Company have immense reserves of ore of all grades, and each year's development maintains the required tonnage.

It is currently reported that, during the period 1920-21, reserves have been enormously increased, that of the Mountain Con mine alone, being said to amount to over 1,000,000 tons of 3.5% copper ore. Production from all the mines of the company, during 1920 was 2,152,763 tons of ore and 7,557 tons of precipitates.

The **Anaconda** mine was opened, 1880, as a silver producer, but at about 150' depth the oxidized silver ores were succeeded by high-grade copper ores, mainly chalcocite and bornite, while at depth there is a large amount of enargite. Net earnings of the mine, during the 15 years, 1880-1894, are unknown, but may be safely estimated at not less than \$50,000,000. At a depth of about 1,600' quartz pyrite veins of the Anaconda showed impoverished values, there being considerable pyrite, but the fault veins showed large ore-bodies at depths of 1,200' to the deepest level yet reached in mining which is 3,400' in the High Ore mine.

The **Anaconda** mine proper has a 3-compartment shaft, 2,800' deep, connected underground with the Never Sweat, St. Lawrence, Bell, Belmont and Moonlight mines. The mine has electric locomotives for tramping on several levels. Hoisting is by 8-ton skips, swung under double-deck cages and worked in counter balance. The main shaft was re-timbered in 1919.

The **St. Lawrence** mine has a 2,600' three-compartment main shaft, connected underground with the Anaconda, Never Sweat, Mountain View and Pennsylvania mines. The St. Lawrence has been on fire since 1889, in an extensive area above the 1,100' level. The fire has been fought constantly, and walled off by cement bulkheads, and while it cannot be extinguished and is troublesome, it does not result in the loss of copper, as the sintered ore remaining after the burning of the sulphur can be mined later, and the mine waters are strongly charged with copper, much of which is recovered by precipitation on surface where it is run over scrap iron and cement copper is made. The hoist has 32"x72" cylinders, raising 5-ton skips swung under single-deck cages. The main shaft and stations were partly retimbered during 1919.

The **Never Sweat** mine has a 2,500' three-compartment main shaft. Square-set timbering is used in stoping, as well as back filling. Some trouble has been had with fire from the St. Lawrence. The surface plant includes a 28"x48" double drum hoist, raising 3-ton skips swung under single-deck cages; also a 7,500 cu. ft. compressor. During 1919, the Ramsdell-Parrot shaft was retimbered, also deepened from 900 to 1,200'. The Parrot shaft was partly retimbered. A head-frame and hoist were erected.

The **Belmont** mine, about 1 mile south of the main shaft of the Anaconda, and 375' lower, has a 2,400' four-compartment working shaft, the largest in the district. Connections have been made with other mines and a 1,500-ton ore bin erected. Equipment includes a hoist, with capacity of 3,500', taken from the Corra mine.

The **Diamond** mine has a 3,400' three-compartment shaft, developing the Corra vein and other veins to the bottom level. Equipment includes a 34"x72" hoist, operating single-deck cages with 5-ton skips; and 2 electrically-driven compressors of 7,500 cu. ft. capacity each. Part of the main and Corra shafts were re-timbered in 1919.

The **High Ore** mine is one of the deepest in Butte, having a 3,600' three-compartment shaft, producing high-grade chalcocite. The High Ore does the pumping for a number of connecting mines of the Anaconda, handling all water from the Anaconda, Washoe and Parrot properties. The mine has 9 electric pumps, each good for 600 gals. per min., with 1,200' lift. These are located on the 1,200', 2,200' and 2,800' levels. Relief pumps to run by steam or air are also installed on different levels.

The **Modoc** mine has a 2,500' three-compartment shaft, connected with the 2,800' level of the High Ore mine. The Modoc has several veins besides the one of this name, its chief ore supply coming from the veins, which are stoped up to the North Butte Co.'s boundaries on the north and to the Ballaklava mine on the south.

The **Mountain Chief** mine, area 1.15 acres, lies north of the Butte-Ballaklava, and is said to have produced about \$1,500,000 worth of ore from a shallow shaft. The Mountain Chief is developed to 500' by its own shaft, but its deeper levels are worked through the High Ore mine.

The **Parrot** group of properties includes the former holdings of the Parrot Silver & Copper Co., 19 fractional claims, area 40.6 acres, embracing

the Parrot, Little Mina, Bellona, Original No. 6 and the Oro Butte, Champion and Copper Reef mines, and various other small properties. Main shaft of the Parrot mine is now used as an air shaft, and the ground is worked from the West Steward and Never Sweat shafts.

The **Little Mina** 1,200' shaft is now used for air only.

The **Original, Steward and Gagnon** shafts are on a western continuation of the Anaconda and Steward veins, and in 1912 a continuous ore shoot of good grade, over 2,700' long, was opened in the bottom level of these mines.

The **Original mine** has a 3,100' shaft with three compartments below 1,100'. The mine was located, 1864, in the first stampede to the new Silver Bow diggings and was the first mine patented in Butte. During 1919, part of the shaft was retimbered.

The **Steward mine** has a 3,800' vertical shaft, showing, in the bottom workings, a 30' vein, carrying good copper ore, with silver. By mid-1920, a large vein of high-grade copper ore was opened at 3,740' in this shaft. Assays yielded up to 40%. This is a probable downward extension of the orebody developed 200' north of the shaft on the 2,800' level, where assays gave 25%.

Equipment includes a 120' steel headgear and a 34"x72" first-motion duplex hoist, good for 3,500'.

The **Pilot mine**, purchased for \$1,125,000 cash, in 1916, is now part of the **Badger State mine**. The Emily shaft of the **Badger State mine** is 1,600' deep.

The **Gagnon** is the westernmost of the productive copper mines of Butte. Its ores have carried more silver than those of the mines farther east and have held a number of minerals such as hubnerite unusual elsewhere in the camp.

The **Gagnon** old 2,800' three-compartment incline shaft, sunk at an angle of 74°, is now used as an auxiliary shaft, ore being hoisted through the **Original** shaft. The new vertical 2,800' shaft, near the west end of the property, is as yet used for ventilation only. Equipment includes a 22"x48" hoist.

The **Moonlight mine**, once the principal producer of the Washoe Co., has ore averaging about 1 oz. silver for each unit of copper. The **Moonlight** has a 1,700' three-compartment shaft, connected underground, with the **Blue Jay**, **Never Sweat** and **Anaconda**. All the stations were re-timbered during 1919.

The **Poulin mine**, formerly owned by the Washoe Co., has a 1,200' shaft, but is operated through the 1,500 **Buffalo** shaft, and is to be operated for zinc ore. A new hoist and buildings were erected in 1919.

The **Silver Bow No. 1 mine** has a 1,100' shaft, connected with the **Pennsylvania**, **Berkeley** and **No. 3** mines. It has been a good producer for many years.

The **Berkeley** 1,500' three-compartment shaft has a 28"x48" double drum hoist, handling 3-ton skips in each compartment.

The **Rarus mine** has a 2,800' three-compartment shaft, connected with the **Tramway mine**. The veins have divergent branches, and constitute a sort of stockwork, with an ore zone up to 300' in width, in places. It has been equipped with steel head-frame and 34 by 72 in. air-operated hoist.

The **Tramway mine**, lying between the **Minnie Healy** and **Rarus**, formerly owned one-third by **Butte Coalition**, and two-thirds by **Butte & Boston**, has a shaft that is the central shaft for the **Minnie Healy-Rarus** group. The **Tramway** shaft, 2,800' deep, has 3 compartments, each 5'x4 2" in the clear. The first of the new levels in the **Minnie Healy** is the thirteenth, about 50', below the old 1,500' level, in which fire was burning, 1908-1909. The **Tramway** has numerous bodies of 5 to 6% copper ore, with good gold and silver values, the really great ore-bodies coming in between the 1,300' and 1,400' levels, and on the 1,700' level there is an orebody up to 75' in width, averaging nearly or quite 7% copper.

At the **Tramway mine** equipment includes a 92' steel head-gear with 12' sheave wheels. A 34"x72" **Allis-Chalmers** 2-cylinder **Corliss** hoist, with 12'

drums, using $1\frac{1}{2}$ " round wire cables, has capacity to raise 7-ton skips from a depth of 3,500'. Each compartment has 5-ton skips changeable to 4-deck cages, for lowering men, an auxiliary hoist being used for sinking and handling supplies through the third compartment. The main surface plant of the department, at the Tramway shaft, includes a boiler house, engine house, carpenter shop, machine shop, office buildings, warehouse and changing house with hot and cold water and shower baths.

The **Nipper** mine of the Red Metal group, includes the Nipper, Chief Joseph, Balm and L. E. R. claims. The Nipper mine, area 15.18 acres, has 2 shafts, of 1,000' and 1,200' depth, with 12 exits, being connected underground with the Parrot, Never Sweat and Little Mina mines, and has been operated to some extent through the Parrot shaft.

The **Green Mountain** mine has a 2,200' three-compartment shaft, not deepened for several years.

The **Mountain Consolidated** mine has a 2,500' three-compartment shaft, with a good ore showing on the 1,400' level and below, and an especially good showing on the bottom level, at 2,500'. A Nordberg first-motion hoist was erected in 1918. The East Grey Rock shaft is used for ventilation only.

The **West Grey Rock** mine, producing ore carrying values mainly in gold and silver, with a small percentage of copper, has a 1,826' shaft, the 1,800' being the deepest level open in 1916. The veins, though small, carry good ore, rich in silver. The Corra shaft is kept open for ventilation.

The **Leonard** has an old 1,800' shaft, used for men and supplies, and the main, or No. 2, a new shaft of 4 compartments, 2,800' deep. Mine is timbered with 12x12" and 14x14" square sets, requiring monthly an average of about 1,000,000' of mine timber, board measure. The 2,000' level shows equally large and good orebodies. Water from the Mountain View, Pennsylvania, Tramway, East Colusa and West Colusa mines drains to the 1,200' level of the Leonard and is forced thence to surface by 4 electric pumps. Valves are of pot form, and the entire water end is phosphor-bronze, columns being lined with wood, thoroughly soaked in oil, to withstand the corrosive action of the mine waters. Part of the main shaft was re-timbered during 1919.

The Leonard surface equipment is the show plant of Butte, and is very complete, including a 152' steel headgear and 2,000-ton ore bins. The power plant has ten 250-h. p. boilers, and a 34x72" hoist, good for 3,500' depth, raising cages with 5-ton skips swung under, with $1\frac{1}{2}$ " round cable. There also is a 12x14" sinking engine. Plant includes 3 air compressors of 3,000, 4,000 and 5,000 cu. ft. capacity per minute, respectively, and 2 of 7,500 cu. ft. each.

The **West Colusa** mine has a 2,200' three-compartment shaft, with levels at 100' intervals to depth of 1,200', and thereafter at 200' intervals. Shaft re-timbered, early in 1910, and cut down to 3 compartments, being given false sets, to obviate squeezing, which caused much trouble in the past. Mine is timbered with 10x10" and 12x12" square sets, and shows vein matter up to 400' in width. Connection is had underground with the Mountain View and Leonard mines. Surface equipment includes a 23x60" hoist, operating 2 double-deck cages, a tramway and a 28x48" single drum auxiliary hoist.

The **East Colusa** mine has a 2,000' three-compartment shaft with levels opened at 100' intervals from 300' to 700'. The mine has a vein of about 65' width, formerly averaging 3 to 4% copper, but mine is now an important producer of zinc ore for the new electrolytic zinc plant. Production is about 200 tons daily.

The **Pennsylvania** mine has a 2,800' three-compartment shaft, with levels at 100' intervals from 100' to 1,000', and at 200' intervals below. This property has extensive stopes above the 600' level, ore lying nearer surface than in most of the Butte mines. Equipment includes a 350-gal. electric pump on the 1,800' level, forcing water to a crosscut to the Leonard mine, whence it goes to the precipitation plant. Surface equipment includes 2,000-ton ore bins, a 34x72" Allis hoist, operating two 5-ton skips and a 28x48" single drum hoist sinking engine.

The **Badger State** mine in the northwestern part of the camp, develops

the Badger State, Jessie, Edith May, Emily and several other veins. Mine has a 2,800' four-compartment shaft with extensive orebodies opened up on the 1,100', 1,300', 1,400', 1,600', 2,000' and 2,200' levels. The Emily shaft auxiliary to the Badger, was deepened from 400' to 817', or 1,000' level of the Badger and connection made in 1912. Property is now an important producer of copper and zinc ore.

The **Mountain View** mine has a 2,249' three-compartment shaft, and a 2,000' air shaft. The Mountain View shows 6 veins of 8' to 60' width, ore averaging nearly 5% in copper tenor, being among the richest mines in the camp. Equipment includes 4,500-ton ore bins, a hoist good for 3,000' depth, and a 28x48" single drum auxiliary hoist.

The **Tropic shaft** on one of the most easterly claims of the company is 900' deep and mine is now a producing property.

The **Greenleaf** mine, located east of the proven ore zone of Butte, has a 1,000' shaft, with about 800' of lateral workings. Work was suspended, July, 1908, but the property is by no means devoid of promise.

The **Southern Cross** mine, situated in the Georgetown district, west of Anaconda, purchased 1912, for \$370,800, is a gold property developed by a 500' shaft, equipped with electrical machinery. It was extensively worked because its oxidized ore is good iron flux, but was closed permanently Dec., 1919, on account of exhaustion of orebodies.

The air-compression plant at the High Ore mine has eight 1,200-h. p. air compressors, each with a capacity of 7,500 cu. ft. of free air per minute. The air is compressed to 90 lb. and is used in the hoisting engines in place of steam. A building 300' long contains 25 receivers each 10x30' on the ground, for the compressed air, this air-storage plant having reserve power for 8 hours. In connection with this plant is the largest steel water-tank in the world, 100' in diameter.

Electric power, supplied by the Montana Power Co., is brought from Great Falls, 130 miles, and from Canyon Ferry, near Helena, 70 miles distant, current being wired to the mine with a primary voltage of 50,000 volts, reduced to 2,000 volts in a transformer station, just outside of Butte, power being distributed to the various workings from a main station at the Never Sweat mine, the current being used at 440 volts.

Ventilation and fire protection have been given much attention by Anaconda engineers, and in 1917 a systematic plan covering all underground workings was adopted, electrically-driven surface fans with a capacity of 696,100 cu. ft. of free air per minute being installed. In 1918, five Sirocco double and single-inlet fans, of 228,000 cu. ft. capacity, were put in. To increase the velocity of air currents in shafts, experiments were made at the Parnell shaft, inserting concrete slabs between the timbers. Results were so good that all shafts will be so arranged. During 1919, ten motor-driven fans were erected on the surface, having a capacity of 1,100,000 cu. ft. Six fans were installed underground, while 87 blowers were put in the different mines.

As a protection against fire, shaft and station timbers are covered by metal laths and cement coating at the Belmont, High Ore, Leonard, Moonlight, Mountain View, Parnell, Pennsylvania, Rarus, and Tramway shafts. At other points underground, timbers are covered with cement by the "Gumite" method.

New development—the total at all mines:				Cost of
Year	All work miles	Shafts deepened, feet	Ore mined, tons	Mining per ton
1920.....	22.55	829	2,152,763
1919.....	20.39	1,749	2,103,099	\$8.22
1918.....	41.85	4,991	4,918,468	6.07
1917.....	34.60	2,809	4,193,624	5.86
1916.....	42.10	2,879	5,582,077	4.42
1915.....	35.33	4,383,339	3.93

The normal daily output of ore is 16,500 tons.

A feature of work in 1917 and 1918 was the mining of pink manganese ore (rhodochrosite) from the Emma and other mines. This was concentrated, and partly sold or used in making ferro-manganese at Great Falls.

Coal mining—the quantity raised and its disposition.

	Mined tons	Used at coal mine, tons	Used by Anaconda, tons	Sold tons
1920.....	895,334	56,144	458,881	380,309
1919.....	717,410	50,972	359,082	311,346
1918.....	1,065,743	56,589	632,012	374,138
1917.....	1,054,510	66,238	551,533	436,740
1916.....	964,122	64,733	616,910	282,418

Lumber Department—the mills at Bonner, Hamilton, Hope, and St. Regis had the following record:

Year	Timber cut, feet	Purchased, feet	Used at mills, feet	Sent to mines, feet	Used at factory, ft.	Sold, feet	Stock, feet
1920.....	92,856,620	358,115	1,318,034	38,185,389	2,003,362	32,027,243	48,451,078
1919.....	29,793,693	18,058,369	2,119,374	36,010,965	1,788,389	33,199,523	28,761,371
1918.....	82,950,859	41,219,939	1,415,915	72,162,891	2,208,966	35,765,541	54,027,560
1917.....	87,330,500	16,476,014	1,455,703	57,205,887	4,172,414	50,534,133	41,410,075
1916.....	105,495,846	30,005,910	1,361,549	91,321,061	6,215,378	80,800,144	50,971,698

Profits from the coal and lumber departments were \$1,295,119 in 1916; \$363,312 in 1917; \$354,187 in 1918; \$203,140 in 1919.

The **Washoe sampler** at Butte, a \$150,000 steel-concrete custom ore plant, is on the main line of the B. A. & P. R. R. The Taylor & Brunton system is used, and handles 1,200 tons in 24 hours. (See H. B. Pulsifer, Bull. 3, Nov., 1920, of the University of Montana.)

The Washoe Smelter

The Washoe smelter, where all the Anaconda company's copper ore is concentrated and smelted, is about 2 miles from Anaconda and 26 miles from Butte, all ore being hauled by electric power over the Butte, Anaconda & Pacific R. R., owned by the company. In 1914-15 the entire plant was remodeled, the capacity increased to 15,600 tons per day, leaching and flotation plants installed, an acid plant erected, a zinc plant put in operation and brick works built, the improvements costing, it is said, over \$6,000,000. The saving of the remodeled plant was due to coal-dust firing of reverberatory furnaces with greatly increased capacity (583 compared with 239 tons per day) with less slag loss; the abandonment of briquetting and blast furnace smelting in favor of the new reverberatory practice; the treatment of all ore in the Anaconda concentrator, instead of sending it to Great Falls; the introduction of Minerals Separation flotation and the operation of the leaching plant. The saving increased from 75 to 96%, the tailings formerly carrying 0.62% copper now carry but 10.2% copper—that is, 14 lb. of copper to the ton. The saving amounts to 8.4 lb. copper per ton, and paid the entire cost of reconstruction in the first half year of operation. This work has put the Anaconda company in the ranks of low cost producers and was a great triumph for its metallurgists.

The **Washoe Smelter**: can treat 16,000 tons of ore per day using 500 tons coke, 900 tons coal for reverberatory furnaces, 3000 tons limestone flux and 260 tons coal for power and heating. Sixty millions gallons of water are used each day and 42,000 gals. per min. Three thousand, two hundred men are employed at a monthly wage of \$400,000 in and around the works.

From the storage bin, the ore passes through a sampling plant having a capacity of 2,000 tons in 8 hours. Then it goes to the concentrator plant of 2 great buildings, each housing 4 units comprising Blake crushers, Harz jigs for coarse and Evans jigs for medium and fine concentrates, 4 sets of 55x24" rolls, 8 Wilfley tables using Butchart riffles, six 8' Anaconda classi-

fers, six 7½'x72" Hardinge mills, each with 225-h. p. motors and using steel linings and steel balls; 6 Dorr classifiers, 4 Minerals Separation flotation machines, each having 15 agitators and 14 spitzkasten with 150-h. p. motors. Anaconda operates under license from Minerals Separation, the royalty being from 4 to 12 cents per ton of ore treated, depending on quantity.

No. 1 section differs from the other 7 in having Hancock instead of Evans jigs, and 8x12' tube mills using Forbes liners and pebbles.

The coarse concentrate goes to the blast furnace, the fine to settling tank, the flotation concentrate to Dorr thickeners, 12x50', discharging 60% solids to Oliver filters.

There are 2 roaster divisions, one having Evans-Klepetko type of McDougal roasters, each handling 215 tons per day of fine concentrate, fine lime rock and first-class screenings. A Ruggles-Coles dryer prepares concentrate for the acid plant and for converter. Roaster No. 2 contains 28 Anaconda roasters, a modified Wedge-McDougal furnace and treats material from the tank house and Oliver filter cake.

The reverberatory furnace plant is in 2 buildings, each with 4 furnaces and 5 boiler sets. Each furnace is 143x23' and handles 700 tons material per day when burning 100 tons coal in 24 hours. The coal previously ground in Raymond Bros. 5-roller pulverizer to 100-mesh, is blown into furnaces through Warford burners under 16 ounces pressure. Coal dust firing is much more efficient than grate firing, and each furnace develops 6½ boiler h. p. per ton coal burned, hot gases passing through Stirling boilers. Furnaces are fed from top, banking concentrates against side walls. Slag flows off continuously instead of being intermittently skimmed and matte is tapped at intervals, runing into 10-ton ladles trammed direct to converters.

The blast furnace building contains two 51' furnaces, and one 87' long, each 56" wide at tuyeres, the latter handles 3,000 tons per day, the others 1,600.

Converter building contains 7 stands for Great Falls type converters. Latter are 20' diam., 17' high, and weigh 450,000lbs. with magnesite brick lining. The charge for each converter is 85 tons matte, 35 tons ore, blown to blister copper in one converter. Blister copper is poured into 2 casting furnaces, each of 140 tons capacity, with one in reserve. Air at 15 lbs. pressure oxidizes copper which is then skimmed and poled and poured into a casting machine. All handling of material is done by electricity.

The sand leaching plant, 2,000 tons capacity, recovers the copper from sands of the old tailing dump. These sands are roasted in McDougal furnaces, cooled in a rotating drum, wetted to lay dust and conveyed to tanks 50' in diam. and 14' deep, each holding 1,050 tons, where it is leached by hot solution of salt and sulphuric acid and copper precipitated from solution by scrap iron.

The arsenic plant treats flue dust in White-Howell rotary furnace, the dust-laden gas going to a Cottrell electrical treater for removal of dusts, then cooled and condensed arsenic trioxide removed by a second Cottrell treatment, the fine powder being discharged by a screw conveyor into barrels. The new arsenic refining plant, completed during 1920, can produce 400 tons per month.

A brick plant making 11,000 standard fire brick per day and another making 50,000 building brick from retreated tailings is one of the newer features of the works.

In 1917, work was started on a new stack at Anaconda, 585' high, with an inside diameter of 70' at bottom and 60' at top. This was finished and connected with the 20 Cottrell electric precipitators in May, 1919.

The reverberatory costs have been reduced from \$1.75 to \$1.25 per ton of ore by coal firing and other changes in practice, as compared with \$1.35

per ton of charge for the blast furnaces, but so much limestone has to be used in the blast furnaces charge that the cost, per ton of copper ore, is higher.

It has been found that leaching produces cleaner tailings than flotation, though other factors equalize the 2 processes, since for leaching the roasting costs are 25 to 30c., excavating 14c., hauling 8c., and other costs 33c., a total of 80c. per ton, using 65 lb. of 60% acid for 9 lb. copper. Over 500,000 tons of tailing and ore are leached annually.

Full description of the Washoe smelter plant and the technical treatment have been published in the *Trans. Am. Inst. M. E.* and in *Mining & Scientific Press*, Feb. 26, 1916, and *Mining World*, March 4, 1916.

The acid plant produces 200 tons a day of 60% acid, but a much bigger plant will be built in the next few years to supply acid for the zinc plant and phosphate rock.

The Great Falls Plant

The Great Falls Plant, originally operated as a concentrator and smelter, has been so remodelled and rebuilt to meet changing conditions, that it is no longer a smelter, but an electrolytic copper refinery, an electrolytic zinc reduction works, Rod and Wire mill and general industrial plant.

The wire mill, the first to be built in the West, has alone drawn into rods and copper wire, a total of 166,000,000 lb. of copper and made a manufacturing net profit from June, 1918 to Dec. 30, 1921, of \$850,000 on an investment of \$1,057,730. In 1919, 43,241,497 lb. of copper were rolled into rods, of which 13,914,008 lb. were drawn into wire.

The refinery can now turn out 200,000,000 lb. of refined copper per year.

Probably the most important event of recent years was the production on a large scale of high-grade electrolytic zinc. The 10-ton test plant showed such good results that a 2,000-ton concentrator, using flotation, was erected at Anaconda, and a refinery of 100-ton capacity of metal per day at Great Falls. Both company and custom ore is treated. The refinery was increased to 150 tons of spelter daily. Changes in practice are ably described by Frederick Laist in "*Eng. & Min. Jour.*" of October 7, 1916. The works are described by Mr. Laist, F. F. Frick, J. O. Elton, and R. B. Caples in a paper presented to the A. I. M. & M. E. in Feb., 1921.

Five electric furnaces, for the manufacture of ferro-manganese, were erected in October, 1918, but were closed on account of lack of demand resulting from the end of the war. In 1919, this plant was re-modeled for the production of calcium carbide. In January, 1920, manganese ore was again being sent to this plant. The manufacture of fertilizer is also under way, utilizing acid from the reduction works and a deposit containing 25,000,000 tons of phosphate rock near Maiden Rock, 45 miles from Anaconda.

The product is marketed as Treble Acid Phosphate and contains 48% of soluble phosphoric acid. By Dec., 1920, a 250-ton brass furnace had been erected.

The production of aluminum from bauxite is also under consideration, a large deposit of this ore in Washington, having been purchased.

In order to secure additional roasting capacity for the zinc plant at Great Falls, 14 of the 28 furnaces for the copper-leaching plant were re-modeled for roasting zinc concentrates.

The zinc plant at Great Falls was closed in Feb., 1921, on account of large accumulations of spelter.

Production of the other smelters and refineries will be found under the proper headings below.

The Anaconda properties have for years produced one-third of the copper output of the United States and one-sixth of the world's production. The splendid technical force and equipment of the company and the excellent showing of its mines indicate that it will maintain its pre-eminence for years to come. The cost of producing copper is never published, but it is thought that in normal times the cost was around 9 cents per pound.

Production—omitting outside ore and metal, excepting zinc:

Year	Copper ore treated, tons	Copper out-put, lb.	Gold, oz.	Silver, oz.	Zinc ore treated, tons	Zinc, lb.

INTERNATIONAL SMELTING CO.

Subsidiary of the Anaconda Copper Mng. Co.

General office: 25 Broadway, New York. Ore purchasing dept.: J. B. Whitehill, agt., 618 Kearns Bldg., Salt Lake City.

Officers: Cornelius F. Kelley, pres.; Wm. D. Thornton, 1st v. p.; L. D. Ricketts, 2nd v. p.; Albert H. Melin, treas.; with C. E. Mills, Benj. B. Thayer and John D. Ryan, directors. David B. Hennessy, sec.

Inc. May, 1914, in Montana. Cap. \$15,000,000. Stock entirely owned by Anaconda Copper Mining Co. Company is a reorganization of the International Sm. & Ref. Co.

Company operates smelters at Tooele, Utah, and Miami, Ariz. The Raritan Copper refinery at Perth Amboy, N. J., and the International Lead Refinery Co., at East Chicago, Ind, although managed by International, are actually subsidiaries of Anaconda.

The Miami Smelter.

Smelter address: Miami, Ariz. Officials:

T. H. O'Brien, gen. mgr.; L. O. Howard, supt. This copper smeltery built primarily to smelt the concentrates produced by the mills of the Inspiration Cons. Copper Co. and the Miami Copper Co., is equipped to handle custom ores. The plant is situated about a mile E. of Miami and 6 miles W. of Globe, on the Inspiration Co.'s industrial railway connecting with the Arizona Eastern R. R. at Miami.

The smelter is essentially a reverberatory plant, which on account of the high copper content of the concentrates treated has been built to minimize losses in the handling of material from one department to another, and the prevention of dust losses, as far as possible.

Material from both Miami and Inspiration mills which is flotation concentrate is hauled to the smelting plant in 60-ton steel cars especially designed to handle sticky, fine material of this nature. The smelter also treats the flotation concentrate of the Iron Cap Copper Co., and flotation concentrate, gravity concentrate and flue dust of the Old Dominion Co.

Bins: concentrates are first bedded in three 3,000-ton V-shaped bins with the necessary limestone, pyrite, first-class ore and secondaries to give a proper smelting mixture. First-class ores go to receiving bins with capacity of 2,700 tons.

Crushing and Sampling Plant: 22'x40', 5-stories high, contains: 18"x30" Blake crusher: 1 set 54"x16" rolls; 3 sets 42"x16" rolls; 16" Snyder sampler; three 27" Snyder samplers; two 24"x8" rolls.

Steel storage bins of 1,500 tons capacity are provided for the storage of crushed ore and fluxing material.

Roaster and Dryer Plant: 67'x150' and 93' high, contains 10 Wedge roasting furnaces, 22'6" in diam., each having 5 regular hearths and a dryer hearth. Two oil burners on the 4th and 1 on the 5th hearth supply the heat for drying. Roasting has not been found necessary, and in some cases pyrite is added to give the proper grade of matte.

Each furance is fed from a 190-ton storage bin directly over it. The gases pass directly to a header flue, and then into Cottrell treaters located above the charge floor. The Cottrell treaters in this plant practically prevent the loss of any flue dust.

Reverberatory Plant: the reverberatory building, 134'x234', contains reverberatory furnaces, 1 with a 25x120' and 3 with 21x120' hearth areas. The furnaces are oil fired and discharge their gases through Stirling boilers. There are eight 713-h. p. and one 850-h. p. waste heat Stirling boilers.

Converter Plant: is 58'x380'x49' to the top of crane rail. Two 40-ton magnet-switch-controlled electric traveling cranes are provided.

The plant contains 5 converter stands of 12' electrically operated Great Falls type converters; 2 straight line casting machines with 5'6"x16'6" tilting furnaces, 1 skullbreaker, etc. Silica bins filled by belt conveyors discharge into weighing hoppers, which measure out a pre-determined charge, delivering it directly into the mouth of the converter through pivoted spout.

The gases from the converters are passed through Cottrell treaters before being discharged into the chimney, which give a high recovery of the precious metals contained in the gases.

Power Plant: at the smelting works is operated by the Inspiration Co., the smelting plant selling its steam to, and purchasing its power from the Inspiration company. The power plant buildings are of steel and reinforced concrete construction throughout. The main units consist of three 6,000-k. w. turbogenerators, and 4 cross-compound 15,000 cu. ft. blowing engines, switchboard, etc. Modern auxiliary apparatus is provided for condensing, automatically measuring steam and feed water, recording temperatures, pressures, etc. The boiler houses contain twelve 713-h. p. oil fired Stirling boilers equipped with superheater and economizer.

Shops, Offices, Etc.: a steel shop building, equipped with traveling crane, is divided into departments, viz., machine, blacksmith, boiler, electrical and carpenter shops, all well equipped with modern tools. The warehouse, general office and laboratory buildings, and 8 staff cottages at the smelting plant are of reinforced concrete throughout. Water for the plant is obtained from the Inspiration Co.

On account of the high copper content of the concentrates which the plant receives, it has a production capacity of 20,000,000 lbs. of copper per month, not including two spare reverberatory furnaces.

Production:

Year	Concentrate tons	Ore tons	Copper lb.	Gold oz.	Silver oz.
1920.....	298,211	47,157	166,001,982	5,727	378,647
1919.....	295,318	46,137	160,621,734	5,461	279,893
1918.....	332,644	45,290	173,043,136	4,256	252,437
1917.....	242,936	26,839	138,762,411	2,954	201,860
1916.....	295,075	37,891	181,518,396	2,882	257,543

Operations were suspended in March, 1921, but one reverberatory was reported blown in on Dec. 1, to take care of accumulated Miami concentrate.

The Tooele Smelter

Addresses : Wm. Wraith, gen. mgr., 25 Broadway, New York; Utah office J. O. Elton, mgr. Kearns Bldg., Salt Lake City., Works address: Tooele, Utah; A. B. Young, supt.; B. L. Sackett, asst. supt.

This lead and copper smelter is $6\frac{1}{2}$ miles from Warner on main line of the Los Angeles & Salt Lake R. R., where connection is made with the Tooele Valley Ry. Co., and plants and yards cover one-half square mile.

Crushing and sampling 5-story building, 2 complete sections using the Brunton system and sampling, contains 8 Blake type crushers, 9 to 12"x15"x15" to 24" in size and 8 rolls, 12 to 15" wide and 26", 42" and 48" diameter. Each sampling section contains 4 Brunton sample cutters. In the copper plant ore is crushed to $\frac{3}{8}$ ", conveyed from sample mill to roaster storage bins (5,000 tons capacity) by belt conveyor, thence to roaster feed hoppers by belt conveyor .

Copper Department: The McDougall roaster building contains 2 sections, each 64x162' holding 32 furnaces. These furnaces are 16' in diameter, 18' high and have 6 hearths. Roaster gases passing thru 120x140' hopper-bottom brick dust-chambers 30' high above the hopper, thence to flue type Cottrell treater, thence thru brick flue to stack. Each unit of the Cottrell treater has an effective electrode length of 40' and effective cross section of 113.5 sq. ft. The brick stack is 350' high and 25' inside diameter at the top. The reverberatory plant receives the calcine by electric tram system. It contains 5 coal-fired furnaces, Anaconda type, 1 with 19'x90' hearth, 4 with 19'x102' hearth. Each furnace is equipped with 750-h. p. waste-heat Stirling boiler. Gases go through a brick flue 1,360' long to stack.

The converter plant has 5 electric-driven stands for 96x150" shells and a 60-ton crane. Converter shells are basic lined. Gases from plant go through a steel flue to a 50x126' brick baghouse containing 960 31x16" woolen bags. From the baghouse the gas is discharged through a 150' stack 15' in diameter at the top.

The power house contains 2 Corliss engines direct-connected to 250-k. w. 500 v. d. c. generators; one 350 k. w. 500 v. d. c. turbo generator set; 2 vertical triple-expansion engines direct-connected to 750-kva. 2,200-v. generators; one 750 k. w. 2,200 v. turbo generator set; 2 converter blowing engines, 15 lbs. air; 1 steam-driven 90 lb. air compressor; 1 electric-driven 90 lb. air compressor; 2 No. 10 Roots blowers, direct-connected to tandem compound Corliss engines; and 2 Leblanc condensers and necessary auxiliaries. Condensing water is cooled in natural draft cooling tower. In addition to the waste-heat boilers, there are 3 hand-fired 350-h. p. Stirling boilers.

Lead Department: The lead plant contains blast furnaces, sinter plant and charge bins. There are 26 double steel bins with a capacity of 10,000 tons of ore and concentrate, receiving material from the crushing plant by belt conveyor. Fine concentrates and ores already sampled can be dumped direct. Charges for blast furnaces are weighed in scale hoppers dropped into charge cars, going direct to furnaces.

Copper is cast in steel moulds by 30-ton electric crane. Slag is granulated in an inverted cone-type granulating tank, from which it is withdrawn by a bucket elevator, loaded into railroad cars, and sent to the lead blast furnaces.

Charges for sintering plant are made up by rotating table feeders underneath each bin, and are discharged onto belt conveyor, which delivers material into continuous mixer, whence it is taken by other conveyors to sintering machines.

The sinter plant contains 10 Dwight-Lloyd machines, 42x164", capacity 225 tons per day per machine. Sinter from machines goes to blast-furnace charge bins by standard railway cars. Gases from this plant pass through standard Cottrell treater of 4 units of 220-15"x12" diameter pipes each.

The blast-furnace plant is a steel and concrete building with five 52x180" furnaces whose daily capacity is 250 tons of charge. Gases pass through balloon flue to brick bag house containing 1,440 bags, lead to dressing plant and the lead-copper matte to the converter plant. The dressing plant has four 30-ton kettles and uses a Howard press.

Industrial equipment includes four 18-ton and four 12-ton electric locomotives, with necessary slag trucks, matte trucks, calcine and coal cars, a fully-equipped assay office and laboratory, shops, weather observation department, emergency hospital, office, etc. All buildings are of steel and concrete construction.

The smelting practice of copper ores largely follows Anaconda methods. The sulphide fines are roasted with a certain amount of silicious ore added upon the fifth hearth of the roaster to heat the ore and keep the temperature at the right point. The ore is roasted down to 0.7% sulphur corresponding to a matte fall of 15 to 18 tons per day. The reverberatory slag, carrying 40 to 42% silica, is tapped at the back of the furnace and the matte, carrying 20 to 30% copper, conveyed in ladles to the converters. The converters, when operated only on day shift, are kept hot over night by filling them with cinders from the reverberatory furnaces. Silica is applied to the converter in lump ore, 2 boats to each 8-ton charge. The bag-house dust from the smelter fumes is removed by reversing the fan and direction of current, drawing the dust into the chamber beneath.

Direct connection with the mines at Bingham, is made through the Utah Metal & Tunnel Co.'s 11,500' tunnel, completed in 1913.

Production:

Raritan Copper Works

Subsidiary of the Anaconda Copper Mng. Co.

Local address: E. C. Clark, supt., Perth Amboy, N. J.

The works on New York harbor, completed 1899, and since enlarged repeatedly, is one of the largest and most modern electrolytic copper refineries in the world.

The smelting department consists of one 200-ton, one 150-ton and one 100-ton furnaces for casting anodes, and two 225-ton, one 150-ton and two 100-ton furnaces for casting wire bars, ingots and cakes.

The electrolytic refinery includes 2 tank houses with their respective power houses; power consumption being about 7,000 k. w. The department has special shears for trimming cathode sheets and Morrow loop machines for attaching copper lugs to the cathode starting-sheets.

No. 2 tank house, 210x582', has 3 bays running lengthwise, with two 10-ton 3-motor Whiting cranes in each bay, equipped with special devices for handling an entire tankful of anodes or cathodes at 1 load. There are 3 electric circuits running lengthwise, 1 in each bay, each circuit of 396 tanks being handled from the power house by an electric generator. Current is 7,500 amperes, giving a current density of 20 amperes per sq. ft. The main conductor has a cross sectional area of 1234". There are 1,188 depositing tanks arranged in 108 nests of 11 cells each, with electrode arrangement on the Walker system. Tank house No. 1 has 1,800 tanks and a capacity

of 22,000,000 lb. of copper per month; its general arrangement, and method of operation, is very similar to that in No. 2.

No. 1 power house, which furnishes power for No. 1 tank room, contains four 1,000 k. w. triple expansion Corliss engines and barometric condensers. The engines are direct-connected to four 1,000 k. w. electric generators. Beginning with 1920, fuel oil was substituted for coal throughout the plant; two 55,000 bbl. storage tanks were installed.

Production:

Year	Bullion Treated,		Copper lb.	Gold oz.	Silver oz.

* Production 46.3% only of plant's capacity.

International Lead Refining Co.

Subsidiary of the Anaconda Copper Mng. Co.

Address: East Chicago, Ind. Wm. Wraith, gen. mgr.; G. P. Hulst, supt.

An extensive plant located at 151st St. and McCook Ave., East Chicago, Ind., on 64 acres of ground. Construction work started April 20, 1912, and plant was in operation Oct. 3, 1912. Plant comprises main refinery building, all steel and concrete, with 3 standard-gauge tracks entering the building. There are 2 crane runways running the full length of the building, with 3 traveling cranes. A change-house, of brick, is equipped with toilets, shower-baths, steel lockers, and a dining room. Bag-house is constructed of brick and concrete, divided into 4 compartments of 114 bags, 30'x18".

Equipment: consists of one 12,000-ton battery Parkes process, two 300-ton softeners, four 60-ton desilverizing kettles, one 300-ton refining furnace, and one 200-ton molding furnace. The bullion comes in on a high track, is charged into furnace with charging machine and flows by gravity through the plant. Lead is hand-molded and trucked into cars. Sampling is done in two 40-ton kettles and bullion pumped into softeners with centrifugal pump. Residues are worked up in three 30-ton reverberatory furnaces. There are two 40-ton blast furnaces, 1 for antimonial slag, and 1 for by-products and ores; 8 retort furnaces for treating zinc skim and two 5-ton cupels for treating high-grade retort metal.

Common lead is double refined by crystallization in kettles in the corrodng lead plant. All furnace gases except from softeners and retorts are drawn through a sheet flue 700' long and passed through the bag house.

According to Mr. Hulst (Bull. 153 Sept., 1919, A. I. M. & M. E.) the works are able to treat both oxide and sulphide ores of antimony. All silver-bearing antimony ore is heated in the residue furnace, while antimony slag produced was low enough in silver to warrant being smelted in two 42" round blast furnaces to antimonial lead. When the domestic output of antimony ore increased in 1916, the International was ready to treat it. The two furnaces reduced from 60 to 90 tons of lead and antimonial material daily, producing 30 to 35 tons of metal carrying 13% antimony, 86.1% lead, 0.15% copper, and 0.75% arsenic.

Power is supplied by the Northern Indiana Gas & Electric Co. Two waste-heat boilers supply steam for compressors and refinery. High-pressure air is supplied by centrifugal air compressors and air for blast furnaces is supplied by a Connersville blower. Water is supplied by East Chicago Water Co. to 50,000 gal. tank, to which waste water also is pumped from a 100,000 gal. sump-tank. Oil storage capacity, two 12,000-gal. oil tanks.

Year	Production:					
	Lead bullion tonnes	Other ore and bul- lion tons	Com. and cor'd'g lead lb.	Antimonial lead lb.	Gold oz.	Silver oz.
1920.....	23,457	4,267	49,173,237	2,811,008	11,897	3,438,371
1919.....	32,238	6,536	69,884,930	6,402,350	24,428	6,311,227
1918.....	31,766	34,119	113,074,263	13,018,043	36,361	7,004,176
1917.....	41,682	23,558	117,922,724	11,525,365	24,673	5,259,738
1916.....	58,769	6,148	108,009,116	15,682,151	20,580	4,468,775

The International is not burdened by old smelters acquired at exorbitant prices, but has new and up-to-date plants, capable of handling ore as cheap, if not cheaper, than any of its competitors and is a big factor in the mining world. It is in strong and competent hands, both technical and financial, and its profitable operation is assured.

AMERICAN BRASS CO.

(Controlled by Anaconda Copper Mining Co.)

Control of this company was acquired by the Anaconda company because the company officials found that "in order to place the business of the company upon a sound foundation it would be necessary for the company to acquire manufacturing and fabricating plants through which the product of the Company in refined copper and zinc might find an outlet to the various industries which utilize such products in their respective lines of manufacture and distribution." It was stated that 32 concerns with a total output of 1,800,000,000 pounds annually, were engaged in manufacturing and fabricating copper products from raw material. As this is more than twice as much as pre-war consumption, and 80% more than 1919 or 1920 needs, new plants are not warranted and as the American Brass Co. dominated the industry, controlling 40% of the business, co-operation with that company was advisable. For that purpose the Anaconda Co. acquired 51% interest in American Brass, paying \$300 per share therefor.

American Brass Co. is a consolidation made in 1912 of the Ansonia Brass & Copper Co., Benedict & Burnham Mfg. Co., Coe Brass Mfg. Co., Waterbury Brass Co., Chicago Brass Co., Holmes, Booth & Haydens Co. and in 1917 of Buffalo Copper & Brass Rolling Mill.

Company has an authorized capital of \$15,000,000; par \$100. Assets on Dec. 31, 1920 were \$49,064,112, with accounts payable of but \$632,811, or a net value of \$323 per share, mostly in live quick assets. On Sept. 30, 1921, liquid assets were \$24,335,176 and plant value \$20,664,823, with good will, patents, etc., valued at merely \$1,000. In past 20 years' operations, company earned an average of \$18.88 per share or \$59.68 per share for past five years.

BEER, SONDHEIMER & CO., INC.

Succeeded by International Mineral and Metals Corp., which see.

Was a branch of Beer, Sondheimer & Co. of Frankfort, Germany, which was a large shareholder in and acted as agent for Minerals Separation American Syndicate, succeeded in 1916 by Minerals Separation North American Corp. (q. v.). Principal business was trading in metals. Owned entire capital stock of Cuba Leasing Co. and Norfolk Smelting Co., and a 49% interest in the National Zinc Co. Assets, except interest in Minerals Separation, sold in June, 1920, by alien property custodian to James B. Colgate & Co. for \$1,202,000, equalling outstanding capital stock at par.

COPPER EXPORT ASSOCIATION, INC.

Office: 60 Broadway, New York City.

Officers: F. H. Brownell, chairman of the board; R. L. Agassiz, pres.; Walter Douglas, 1st v. p.; C. W. Welch, sec.—treas.

Directors: Murry Guggenheim, Simon Guggenheim and F. H. Brownell for A. S. & R. Co.; John D. Ryan, Cornelius F. Kelley and Benj. B.

Thayer for Anaconda Copper Mng. Co. and Inspiration Cons. Copper Co.; Chas. Hayden, Chas. M. MacNeill and D. C. Jackling for Utah Copper Co.; Nevada Cons. Copper Co., Ray Cons. Copper Co. and Chino Copper Co.; Walter Douglas and C. A. Austin for Phelps Dodge Corporation; R. L. Agassiz and Jas. MacNaughton for Calumet and Hecla Mng. Co.; Stephen Birch, for Kennecott Copper Corporation; Wm. A. Clark for United Verde Copper Co; Archibald Douglas for United Verde Extension Mng. Co.; Gordon R. Campbell for Calumet & Arizona Mng. Co.; Murry Guggenheim and Jos. Clendenin for Guggenheim Bros.; Sherwood Aldrich for Chino Copper Co. and W. D. Thornton, for Inspiration Cons. Copper Co.

Executive Committee: F. H. Brownell, R. L. Agassiz, C. A. Austin, W. A. Clark, Jos. Clendenin, W. Douglas, M. Guggenheim, C. F. Kelley, Jas. MacNaughton J. D. Ryan.

Selling Committee: Jos. Clendenin, Guggenheim Bros.; T. Wolfson. United Metals Selling Co.; C. A. Austin, Phelps Dodge Corp.; F. S. Gourley, Calumet & Hecla Mng. Co.; H. M. Brush, A. S. & R.

Inc. December, 1918, in Delaware. **Cap.** 2,500 shares, 7 per cent Pfd., par \$100, also 500 shares common, no par value. Annual meeting 2nd Tuesday in May.

Funded debt: \$40,000,000—8% gold notes issued Feb. 15, 1921, \$6,000,000 maturing in 1 year, \$10,000,000 in 2 years, \$12,000,000 each in 3 and 4 years; interest Feb. 15 and Aug. 15; redeemable at par value 1% premium for each year. These notes are secured by 400,000,000lb. of refined copper purchased (10c. per pound) by the Association from its members, or copper producing companies, payment being guaranteed to the Guaranty Trust Co. of New York, Trustee, by the members in their several proportions. The Association agrees that it will not create other funded obligations during life of gold notes.

The notes are guaranteed as to principal and interest by the following producing companies in the proportions as stated:

	Proportion,%	Proportionate Principal Sums	Allotment lb.
Am. Sm. & Ref. Co.	\$5.00	\$2,000,000	\$20,000,000
Anaconda Copper	12.26	4,904,000	49,040,000
Braden Copper M. Co. †	5.95	2,380,000	23,800,000
Calumet & Hecla	6.00	2,400,000	24,000,000
Chile Exploration*	7.58	3,032,000	30,320,000
Chino Copper	3.66	1,464,000	14,640,000
Greene-Cananea	4.63	1,852,000	18,520,000
Inspiration Copper	8.45	3,380,000	33,800,000
Kennecott Copper	5.06	2,024,000	20,340,000
Nevada Cons. Copper	4.45	1,780,000	17,800,000
New Cornelia Copper	4.07	1,628,000	16,280,000
No. Butte M. Co.	1.75	700,000	7,000,000
Phelps-Dodge Corp.	10.90	4,360,000	43,600,000
Ray Cons. Copper	4.00	1,600,000	16,000,000

United Verde Ext. M. Co.	2.70	1,080,000	10,800,000
Utah Cons. M. Co.	.34	136,000	1,360,000
Utah Copper Co.	8.20	5,280,000	32,800,000
Total	\$100.00	\$40,000,000	\$400,000,000

* Chile Copper Company owns all outstanding stock of Chile Exploration Company. †Stock all owned by Kennecott Copper Corporation.

The object (permissible by the Webb export trade act of 1918) of this corporation is to handle export sales of copper on a basis whereby orders for export copper will be allocated to members according to production and at the same price f. o. b. seaboard. All producers of copper, large or small,

are invited to join on the same terms. It is stated 75% of the U. S. production, amounting to 1,200,000,000 lb. copper during 1920, is represented by membership in this corporation.

In Feb. 1921, there was a surplus of 600,000,000 lb. of refined copper in America, and the Association arranged for the financing of 400,000,000 lb. of copper and for giving ample time (4 years) for marketing it in the export trade only, thus relieving "the producers of the financial burden of carrying it and the necessity of pressing it for sale." These words are from a statement of John D. Ryan, which continues as follows:

"The 400,000,000 pounds is only about three-fourths of the export trade done by this country last year and if marketed over a reasonable period will be easily absorbed. The present rate of production being below the rate of deliveries of copper in 1919 and 1920 should not result in any accumulation." Exports during 1920 totaled 551,000,000 lb. compared with 438,000,000 lb in 1919 and 690,000,000 in 1918.

The above described note issue was the outcome of this plan, the notes being underwritten by a syndicate headed by the National City Co. and Guaranty Co. of New York. Withdrawals of copper from the pool are permissible upon payment to the trustee of 12½c. per pound in cash or notes.

GENERAL DEVELOPMENT COMPANY

Office: 61 Broadway, New York.

Inc. Jan. 6, 1906, for the purpose of exploring and developing mining properties in the United States, Canada, Mexico, etc. The company has extensive stock interests in **Miami Copper Co., South American Gold & Platinum Co. (in Columbia, S. A.), Kerr Lake Mines, Limited, Rimu Gold Dredging Co. (in New Zealand), San Cayetano Mines, Limited**, with other mining interests in the United States, Canada and Mexico.

Capital Stock: authorized and outstanding \$3,000,000; \$25 par, fully paid.

Transfer Agent: company's office; Registrar: Equitable Trust Company of New York. Annual meeting, 2nd Wednesday in February.

Officers: Adolph Lewisohn, pres.; J. Parke Channing, v. p.—congr.; Sam A. Lewisohn, v. p.—treas.; E. H. Westlake, v. p. Theo, L. Herrman, sec.; with Alvin Untermyer, D. M. Hyman, W. T. Rosen, A. S. Rossin, J. H. Susmann, Arthur Lehman, B. Hochschild, and F. W. Eastbrook, directors. Herman Cook, asst. sec.

Dividends: paid 1½% in 1908; 90% in 1909; 15% in 1910; 1½% in 1913; 6% in 1915; 23% in 1916; 28% in 1917; 11% in 1918; nil in 1919; 6% in 1920 to Aug.; none since.

The **General Development Co.** is a parent corporation examining, developing and financing mining properties which, when they have reached the self-supporting producing stage, are turned over to operating companies.

GOLD FIELDS AMERICAN DEVELOPMENT CO., LTD.

Offices: 233 Broadway, New York, and 8 Old-Jewry, London, E. C. England.

Officers: S. Christopherson, chairman; E. S. Birkenruth, Lord Brabourne, Lord Harris, J. C. Prinsep, and H. L. Sapte, directors. Managers: The Cons. Gold Fields of South Africa, Ltd. New York advisory committee: J. McDougall (mgr.), Amor F. Keene (cons. engr.) and L. A. G. Dru.

Inc. March 10, 1911, in England. **Cap.** £2,500,000; £1 par; 2,000,000 issued, 1,000,000 being fully paid and 1,000,000 with 10s. paid; Cons. Gold Fields of So. Africa owns all of former and 800,000 shares of latter. Reports are issued to shareholders only.

Dividends: 5% paid in 1918, 1919 and 1920.

Company acquired from Consolidated Gold Fields of South Africa, Ltd. (which see) latter's interests in America, including shares in **Nato-**

mas Consolidated, Oroville Dredging, Sierra Pacific Electric, Mississippi River Power Co., Yuba Consolidated Gold Fields, Granville Mining, North West Corp., Ltd., Canadian Klondyke Mng. Co., Ltd., South American Gold & Platinum Corp., American Trono Corp., and others. The mining companies named herein will be found described under their respective titles. The last named is essentially a chemical producer, extracting potash, borax, and other salts from the brine of Searles Lake, California.

In the year ending June 30, 1920, many mining propositions were given consideration and a syndicate was formed to take over oil leases.

GRASSELLI CHEMICAL CO., THE

Office: Guardian Bldg., Cleveland, Ohio.

Officers: C. A. Grasselli, chairman; T. S. Grasselli, pres.; E. R. Grasselli, 1st. v. p.—treas.; G. E. Fisher, E. W. Furst and A. C. Bailey, v. p. s.; E. R. Bailey, sec.; W. T. Cashman, asst. sec. with W. J. Bever, H. P. Mansfield, J. H. D. Rodier, Andrew Squire, J. H. Wade and J. H. Dunbar, directors.

Inc. 1885 in Ohio. **Cap.** \$35,000,000 com. and \$15,000,000 6% cum. pfd., \$100 par. of which \$19,393,452 com. and \$8,224,220 pfd. is outstanding. No funded debt.

Financial statement: profit was \$1,680,000 in 1914; \$4,895,000 in 1915; \$9,935,000 in 1916; \$4,340,602 in 1917; \$4,000,018 in 1918; \$3,970,297 in 1919; \$3,181,441 in 1920.

Dividends: regular on pfd. shares, while com. shares now get 6% per annum; previously it was 8%. Extra dividends, paid since 1915, total 29% in cash and 49% in stock.

Business: company is listed in The Mines Handbook as its operations are of importance to the mining industry. It has 17 treatment and manufacturing plants east of Chicago, and is a large buyer of zinc ores and concentrates from Wisconsin, the Tri-State region, and Western States. The two largest smelters are at Meadowbrook and Clarksburg, W. Va. with 8,544 and 5,760 retorts, respectively; the aggregate annual capacity is over 55,000 tons of spelter. A third smelter, at Terre Haute, Ind., has 4,200 retorts.

Company also operates pyrite mines in Virginia and at Lanark, Ont.; for the former, see Arminius Chemical Co., and for the latter, The Grasselli Chemical Co., Ltd.

GUGGENHEIM BROS.

Office: 120 Broadway, New York. Joseph Clendenin, mgr. of selling department, and who, with Murry Guggenheim, represents Guggenheim Bros. in the Copper Export Association.

This new metal-selling agency, which commenced operations on Jan. 1, 1921, has control of the selling of the entire copper production of Braden, Chile, Chino, Kennecott, Nevada, Ray, and Utah companies, formerly handled by the American Smelting & Refining Co.

GUGGENHEIM EXPLORATION CO.

Dissolution completed in 1916. See Vol. XII and Yukon-Alaska Trust in this volume.

INTERNATIONAL AGRICULTURAL CORPORATION

Office: 61 Broadway, New York City.

Officers: S. B. Fleming, pres. Albert French, v. p.; I. J. Watson, Jr., v. p.—treas.; J. R. Floyd, sec.—asst. treas.; with E. B. Sweezy, W. Schmidtman, D. E. Pomeroy, F. M. Weld, Douglas I. McKay, E. R. Stettinius and A. H. Wiggan, directors. F. F. Ward, v. p.—asst. sec.

Inc. June 14, 1909, in New York. **Cap.** authorized 7% cumulative preferred \$18,000,000 and \$18,000,000 common; \$100 par. Issued \$13,055,500 pfd., \$7,260,000 com., and \$9,476,900 in bonds.

Results have been as follows, years ending June 30:

Year	Gross profit	Operating profit	Net profit	Surplus for year	Current assets	Current liabilities
1920.....	\$5,735,652	\$3,031,062	\$2,549,887	\$2,129,490	\$14,621,128	\$6,789,302
1919.....	4,734,553	2,764,844	721,889*	721,889	12,657,029	5,584,092
1918.....	4,504,583	2,595,723	1,944,933	1,168,270	10,336,947	4,961,641
1917.....	2,851,408	1,894,003	636,812	7,075,523	3,845,338
1916.....	2,793,898	2,051,303	1,034,054	1,279,832	5,201,549	1,863,274

* After paying interest, amortization reserves, and dividend.

Dividends: Pfd. shares received 7% per annum until January, 1913; then 2½% in 1918; and 1¼% quarterly since Oct., 1918; none paid on common.

Company has 16 large acidulating and fertilizer plants, mostly in the South, a large number of distributing plants, and holds considerable interests in 27 phosphate and fertilizer companies, also a 50% interest in some German potash mines.

Property: 42,226 acres of phosphate lands in Florida; also extensive areas in Tennessee. In 17,000 acres explored, reserves are estimated at 41,500,000 tons. In all properties there is supposed to be nearly 100,000,000 tons. To make this rock soluble, sulphuric acid, bought from the Tennessee G. & C. Co., and Ducktown Copper, Sulphur & Iron Co., is mixed with it. A contract with the former runs for 3 years from Jan. 1, 1921.

Production: the annual output of phosphate rock is now 900,000 tons.

The company is included herein, because it is carrying on extensive mining operations, and has important relations with large mining companies.

INTERNATIONAL METALS SELLING CO.

Subsidiary of American Metal Co., Ltd.

Office: 61 Broadway, New York.

Officers: L. Vogelstein, pres.; H. K. Hochschild, v. p.; Julian B. Beaty, treas.; J. A. Schloss, sec.; R. E. Empey, asst. treas.

Originally a subsidiary of L. Vogelstein & Co., incorporated to handle importations of copper ores from Chile, was taken over by American Metal Co. (q. v.), when it absorbed the Vogelstein company. Company is dormant and is to be dissolved after expiration of pending contracts.

INTERNATIONAL MINERALS AND METALS CORP.

Successor to Beer, Sondheimer & Co., Inc., (q. v.).

Office: 61 Broadway, New York.

Officers: Jas. S. Colgate, pres.; Benno Elkan, 1st v. p.; Otto Frohnknecht, 2nd v. p.; Jas. S. Dennis, sec., with Edw. W. Harden, directors. Martin Weil, treas.

Inc. in New York. **Cap.** \$1,202,000; par \$100. Annual meeting, 2nd Monday in February.

In taking over properties and assets of Beer, Sondheimer, the corporation became the holding company of the **National Zinc Co., Inc., Norfolk Smelting Co. and Cuba Copper Leasing Co.** The **Anselmo Mining Corporation** is also a subsidiary. The two latter companies are described in this volume, under their own titles.

Beer, Sondheimer, which held 49% of **National Zinc** share capital, is reported to have brought suit in May, 1920, to recover \$873,342, alleged to have been loaned to the latter.

National Zinc Co., Inc.

Office: 61 Broadway, New York.

Officers: Benno Elkan, pres.; Jas. S. Colgate, 1st v. p.; other officers and directors the same as above.

Inc. in New York. **Cap.** \$300,000; \$100 par; all owned by parent company. On June 27, 1921, **National Zinc Co., Inc.**, took over all properties of **National Zinc Co.** in consideration of the satisfaction of a \$1,010,946 judgment vs. **National Zinc Co.** and held by **National Zinc Co., Inc.** as assignee.

of International Minerals & Metals Corp. Annual meeting, 2nd Monday in January.

Works: comprise zinc smelters at Bartlesville, Okla, Argentine, Kans., and Springfield, Ill., which see under those states. These are custom plants; company is not in the mining business.

INTERNATIONAL SMELTING AND REFINING CO.

Properties and assets purchased 1914 by Anaconda Copper Mng. Co. for \$10,392,709. Company dissolved and properties transferred to International Smelting Co., which see.

METALLURGICAL COMPANY OF AMERICA

Dead; see Vol. XIV for description. Wsa a subsidiary of Am. Metal Co. (q. v.).

MINERALS SEPARATION NORTH AMERICAN CORPORATION

Succeeding Minerals Separation American Syndicate.

Offices: 61 Broadway, New York; engineering office and testing laboratories, 220 Battery Street, San Francisco; experimental and research laboratories, Long Island City, New York.

Officers: John Ballot, pres.; S. Gregory, v. p.; with Frank Altschul, Alfred A. Cook and F. Perry, directors; Chester B. Allen, sec.; Edward H. Nutter, chief engr.

Inc. in Maryland, Dec. 1, 1916. Cap. 500,000 shares of no par value; all stock placed in voting trust. The voting trustees are J. Ballot, S. Gregory and F. Altschul.

Dividends: May 29, 1918, \$1.50 out of capital assets and 50c out of current earnings; July 1, 1919, \$1.50 out of capital assets and 50c out of current earnings; Dec. 31, 1920, 75c. out of capital assets and 25 c. out of earnings; all distributions made in U. S. Government Liberty Loan bonds.

For 5 years beginning 1911, Minerals Separation American Syndicate was represented in the U. S. by Beer, Sondheimer & Co., Inc. (q. v.), a branch of company of same name of Frankfort, Germany.

Company owns: all United States, Canadian, Mexican and Cuban patents for flotation processes of ore concentration originally owned by Minerals Separation, Ltd., of England. Rights to use processes are licensed on a royalty basis, licensees being given privilege of electing any one of four different methods of royalty payments applicable to their ores, namely, (1) Flat Rate—based on payments per ton of total ore milled (this is limited to straight copper ores); (2) Unitage Rate—based on payments per unit of various metals recovered from total ore milled; (3) Percentage Rate—based on percentage of value of all metals recovered from total ore milled; (4) Poundage Rate—based on payments per pound (or per ounce, in case of precious metals) of all metals recovered from any material treated by flotation. Details of these royalty payments will be found in a 24-page booklet published by the company in 1919. The Scott patents were acquired early in 1920, but no royalties are collectible on this from the Jackling-Hayden, Stone companies.

Ore treated by licensees in North America during 1915, was about 4,500,000 tons; in 1916, about 12,000,000 tons; in 1917, about 22,000,000 tons; in 1918, about 28,000,000 tons. It is estimated that during 1918 between 55,000,000 and 60,000,000 tons of ore was treated in whole or in part by flotation, of which about one-half was treated by 110 licensees of Minerals Separation, the remaining one-half by some 400 users of flotation methods. Licensees of the company include Anaconda, Inspiration, Arizona Copper, New Cornelia, Greene Cananea, Consolidated Copper mines, Calumet & Hecla and affiliated companies, Phelps Dodge Corp., Federal Mining & Smelting, American Zinc Lead & Smelting, Elm Orlu, St. Joseph Lead, Doe Run Lead, Britannia Copper (B. C.), and many others, totaling about 140 active users in 1920.

The flotation processes are now used extensively throughout the world for treating various ores of copper, zinc, lead, gold, silver, graphite and molybdenum. Their economic value for treatment of base-metal ores is firmly established and, although not universally applicable, flotation is an

invaluable adjunct to almost every concentrating plant. At Calumet & Hecla it has insured the recovery of the very fine metallic copper and combined with a special method of leaching, it has practically created a large new and profitable source of copper in that company's old dumps. In several important mills, notably Inspiration, substantially all sulphide recoveries are effected by means of flotation. In other mills the coarser minerals are rouged out by gravity concentration methods and the fines recovered by flotation. Differential flotation is finding a wider range of application in the treatment of complex sulphide ores, close separations being made as between exceedingly fine lead and zinc sulphides, or between valuable copper pyrite and relatively worthless iron pyrite. The Callahan Zinc & Lead (Idaho) and the Sunnyside (Colorado) mills afford excellent examples of the great economic value of this development of the process.

If the various methods of flotation now in use should prove to be infringements of its patents, large sums would be due to Minerals Separation as royalty.

Litigation over United States patents was first provoked by the installation made in 1911 by James M. Hyde (formerly an employee of Minerals Separation, Ltd.) at the mill of the Butte & Superior Mining Co. In that suit (*Minerals Separation v. Hyde*) the District Court at Butte, Montana, sustained U. S. Patent No. 835,120 and found infringement as to 7 claims. In 1914, the Ninth Circuit Court of Appeals, at San Francisco, reversed this decision, but on writ of certiorari the U. S. Supreme Court on Dec. 11, 1916, unanimously adjudged this basic patent for air-froth flotation valid as to 10 of its 13 claims. The remaining 3 claims, which specified the use of "a small quantity of oil," and which the court held to be invalid, have since, by disclaimer, been brought within the scope of the Supreme Court's decision.

Following this decision of the Supreme Court in the Hyde case, the Butte & Superior began using oil in minimum quantities of $\frac{1}{2}$ of 1%, contending that this relieved it of liability for infringement. This issue was tried in the suit of *Minerals Separation v. Butte & Superior*, and on May 4, 1917, the United States District Court at Butte, Mont., found validity and infringement as to the 10 claims (3 modified by disclaimer) previously litigated. On May 13, 1918, the Ninth Circuit Court of Appeals at San Francisco partly reversed this decision, holding the patent limited to $\frac{1}{2}$ of 1% of oil on the ore. The United States Supreme Court reviewed this case on writ of certiorari, and on June 2, 1919, partly reversed the decision of the Circuit Court of Appeals, holding that the patent extended to and covered the use of oils in amounts equal to any and every fraction of 1% on the ore. Pursuant to this decision, the District Court of Montana entered its decree on July 19, 1919, issued a permanent injunction against the Butte & Superior, and held it to account for all profits made by reason of its infringements. This accounting was set for October 27, 1919, but settlement has not been reached.

In the suit of *Minerals Separation v. Miami Copper Co.*, before United States District Court at Wilmington, Del., three patents were involved, namely 835,120 for air-froth flotation, 962,678 for soluble frothing agents, and 1,099,699 for the use of aromatic hydroxy compounds in cold circuit. In September, 1916, the Court found the first two patents valid and infringed, except as to one claim of 835,120, which has since been modified by disclaimer, but held the third patent to be void. On appeal to the Third Circuit Court of Appeals at Philadelphia, this decision was affirmed except as to the third patent, which was also held to be valid and infringed. Miami did not appeal from this decision, and the District Court issued a permanent injunction against that company. Accounting proceedings are now being held before a Master who is also trying out numerous variations of alleged infringements which the Miami company has used since being placed under injunction.

It results from these litigations that infringement of Minerals Separation's main patent, No. 835,120, cannot be avoided by any variation in the form of apparatus so long as a mineral-bearing froth is produced by the use, at any stage of the operations, of less than 1% of oil on the ore. The type of apparatus, character and extent of agitation are held to be immaterial. In addition to this, the validity of patent No. 962,678 precludes the use of soluble frothing agents in any form or amount whatsoever, except under license from Minerals Separation, as the Third Circuit Court of Appeals held that the Miami company infringed this patent when using oils that were partly soluble in water. This point is especially important because most of the effective oils used in flotation operations have soluble components. This seems to place Minerals Separation in an exceedingly strong position and appears to exhaust the possibilities of successfully evading its patents.

In September, 1919, Minerals Separation brought suit against Nevada Consolidated Copper Co., alleging infringement of its patents claiming damages, and seeking an injunction against further infringement. In August, 1920, defendant admitted infringement, but only of that patent governing the use of oil in amounts less than 1%. Minerals Separation has brought suit also against Ray Hercules Copper Co., Magma Copper Co., Ray Cons. Copper Co., Chino Copper Co., Utah Copper Co., John M. Callow and General Engineering Co. In a further case against the Miami Co. in Dec., 1920, the ruling dismissing applications by Minerals Separation for supplemental bills was affirmed and no injunction was granted enjoining Miami from using flotation.

During 1920, there was a widespread interest in flotation processes, and a great deal was published concerning the legal status of patents. Minerals Separation was the center of interest, and came in for considerable criticism during hearings of the Federal Trade Commission and at the meeting of the American Mining Congress at Denver in November.

On May 10, 1922, Mineral Separation Corporation settled out of court with those mining companies it was suing for patent infringement "without penalties of any kind for past use," but requiring payment of regular license fee upon tonnages milled in past by flotation. Companies will operate hereafter under license, and fee will be as low as that of other companies, that have not fought the patent. This gives Mineral Separation a practical monopoly in the froth flotation field.

MINES EXPLORATION SYNDICATE

Office: Makeever Bros., Mgrs., 170 Broadway New York. Operating dept., 1553 Harvard Ave., Salt Lake City. Walter Neal, engr.

Inc. Aug., 1916. "to investigate and develop worthy mining properties." Over 200 mines were examined but only 3 taken over for development, at last accounts.

Property: Lookout mines in Montana, the Herb Lake (Rex) mines in Northern Manitoba, Can., and the Candelaria mines in Jalisco, Mex.

See Herb Lake Gold Mines, Ltd., in this volume and Vol. XIV, for description of other properties.

MINES HOLDING & OPERATING CORP.

Address: 50 Broad St., New York City.

Officers: Wm. R. Jones, pres.; Jackson B. Sells, 1st v. p.; E. L. Kerstetter, sec.-treas., with B. Brown Barker and E. F. Carlson, directors.

Inc. July 3, 1919, in Delaware. **Cap.** \$3,000,000; \$1 par; 1,090,836 issued.

Organized for the purpose of developing and operating promising mining properties either by direct purchase or by stock ownership. It may also hold securities for investment.

Company controls through stock ownership the following companies: Midnight Mining Co., a silver-lead property at Mullan, Idaho (1,345,104

shares), and Snake & Opportunity Mines Co., a gold property at Hillsboro, New Mexico (650,000 shares).

Corporation Trust Co., New York, registrar and transfer agent. Annual meeting second Tuesday in February. The companies are in the development stage and are described under their respective titles, in the Idaho and New Mexico sections of this volume.

MINING & DEVELOPMENT CORPORATION

Address. E. O. Holter, 60 Broadway, New York.

Officers: Edwin O. Holter, pres.; Howard D. Smith, v. p.; Robert Frese, sec.-treas., with Norman B. Holter, directors.

Inc. Feb., 1918, in Maine. **Cap.** 3,000 shares of no par value.

Is an exploration and development company having varied interests in many parts of the United States, Mexico, and South America.

In October, 1919, obtained a 3-year lease and bond on mines of the Richmond-Eureka Mng. Co. (q. v.), which was then assigned to the Ruby Hill Development Co. (q. v.) Report of H. P. Henderson on the Richmond-Eureka made for the corporation was favorable, but property is now idle owing to excessive railroad rates. Company has spent a large sum investigating and bonding properties, but its operations are suspended until political conditions in Mexico are settled.

NATIONAL LEAD CO.

Main office: 1 Montgomery St. Jersey City, N. J. Executive and transfer office: 111 Broadway, New York.

Officers E. J. Cornish, pres.; Geo. O. Carpenter, R. P. Rowe and N. B. Gregg, v. p's.; M. D. Cole, sec.; Henry O. Bates asst. sec.; Fred R. Fortmeyer, treas.; Chas. Simon, asst. treas.; H. T. Warshaw, compt.; Harry W. Dickerson, asst. compt.

Executive committee: E. J. Cornish, chairman; E. F. Beale, R. P. Rowe, N. B. Gregg, J. R. Wettstein and G. D. Dorsey.

Directors: Edward F. Beale, Geo. O. Carpenter, Fred M. Carter, R. R. Colgate, E. J. Cornish, G. D. Dorsey, Chas. E. Field, Geo. W. Fortmeyer, E. C. Goshorn, Norris B. Gregg, R. P. Rowe, W. N. Taylor, Walter Tufts, J. R. Wettstein, and G. W. Thompson.

Committees:

Manufacturing—C. P. Tolman, chairman; L. T. Beale, H. P. Cavarly, Evans McCarty and G. W. Thompson.

Metal: E. J. Cornish, chairman; W. H. Baker, L. T. Beale, W. C. Beschorman, A. F. Curtis, G. D. Dorsey, S. E. Lindsley, H. J. McBirney, Sheldon Thompson, C. F. Wells, Jr. and J. R. Wettstein.

Metal department: A. B. Hall, manager; J. P. Wilson, asst. mgr.

Branches of National Lead Co.:

Atlantic, R. P. Rowe, mgr., 111 Broadway, New York, N. Y. Buffalo, Sheldon Thompson, mgr., Buffalo, N. Y. Cleveland, C. C. Foerstner, mgr., Cleveland, Ohio. Cincinnati, E. C. Goshorn, mgr., Cincinnati, Ohio. Chicago, Chas. E. Field, mgr., Chicago, Ill. St. Louis, Geo. O. Carpenter, mgr., St. Louis, Mo. John T. Lewis & Bros. Co., Edward F. Beale, pres., Philadelphia, Pa. National Lead & Oil Co., of Pennsylvania, W. N. Taylor, pres., 316 Fourth Avenue, Pittsburgh, Pa. National Lead Co., of Massachusetts, Walter Tufts, treas., 131 State Street, Boston, Mass. National Lead Co., of California, Jas. B. Keister, v. p., Merchants Exchange Building, San Francisco, Cal. National Lead Co., of Argentina, G. D. Dorsey, pres., 25 de Mayo No. 158, Buenos Aires, Argentina. Hirst & Begley Linseed Wks., John W. Hirst, mgr., Chicago, Ill. and St. Louis Sm. & Rfg. Wks., J. A. Caselton, asst. mgr., 722 Chestnut St., St. Louis, Mo. The last named is described separately.

The National Lead Co. is interested through ownership of all or part of the capital stock in the following:

Baker Castor Oil Co., F. C. Marsh, pres., New York. Bass-Hueter Paint Co., Norris B. Gregg, pres., manufacturers of mixed paints, varnishes, and paint specialties, San Francisco, Cal. Carter White Lead Co., Fred M. Carter, pres., white lead corrodors, Chicago and Omaha. Cinch Expansion

Bolt & Engineering Co., Grafton D. Dorsey, pres., manufacturers of expansion bolts, New York. Magnus Co., Inc., H. H. Hewitt, pres., brass founders' New York. Matheson Lead Co., W. J. Matheson, pres., white lead coroders and manufacturers of oxides of lead, Long Island City, N. Y. River Smelting & Refining Co., Edward J. Cornish, pres., smelters and refiners of range of \$87 on Dec. 22 and \$67¾ in July; and 9,200 pfd., 108½ in Dec. and v. p. and sec., miners, smelters, and refiners of lead, St. Louis, Mo. United Lead Co., J. R. Wettstein, pres., manufacturers of all products of lead, smelters of drosses and residues New York. Titanium Pigment Co., Inc., Wm. F. Meredith, pres., manufacturers of titanium oxide pigment, New York. United States Cartridge Co., E. J. Cornish, pres., manufacturers of metallic and sporting ammunition, Lowell, Mass. Williams Harvey & Co., Ltd., Fred. W. Thomas, managing director, smelters and refiners of tin, Liverpool, England. Williams Harvey Corp., Edward J. Cornish, pres., smelters and refiners of tin, New York. A number of these companies are separately described.

Inc. Dec. 7, 1891, in New Jersey. Cap. \$25,000,000 common and \$25,000,000 preferred stock; \$100 par; \$20,655,400 common stock and \$24,367,600 preferred stock outstanding. Listed on New York Stock Exchange. Bankers Trust Co., New York, registrar. Annual meeting, third Thursday in April. Company had 6,640 stockholders in 1916; 7,152 in 1917; 7,286 in 1918; 7263 in 1919; 7636 in 1920.

Sales on N. Y. Stock Exchange during 1921 were 64,950 com., with range of \$88 in December and \$63¾ in July; 9,200 pfd. at 108½ in Dec. and 100 in January. To November of 1920, range of com. was 93-63½.

Comparative General Balance Sheet for year ending Dec. 31:

Year	Assets

Company is said to do about 50% of the lead business of America.

NEW JERSEY ZINC CO., THE

Offices: 160 Front St., New York; 810 Broad St., Newark, N. J.

Officers: Edgar Palmer, pres.; A. P. Cobb, J. E. Hayes, Edwin S. Marston, v. p.'s; A. B. Schultz, sec.; R. G. Hudson and F. P. Nolan, asst. secs.; H. S. Wardner, treas.; W. P. Sutphen, asst. treas. G. F. Wolff, comp; F. H. Baxter, asst. comp.

Directors: Edgar Palmer, C. W. Cox, August Heckscher, T. D. Jones, E. S. Marston, J. J. Riker, E. M. Squier, W. P. Hardenbergh and Walter Douglas. E. V. Peters, gen. sales mgr.; H. Hardenbergh, gen. purch. agt.

Inc. Oct. 30, 1880, in New Jersey as the New Jersey Zinc & Iron Co. Name changed 1897 to present title and capital increased from \$3,000,000 to \$10,000,000. Stock increased to \$35,000,000 by payment of stock dividend of 250% July 7, 1915 and again increased by stock dividend in June 1920 to \$42,000,000; \$100 par, all outstanding. Stockholders received the right of subscribing at par to \$7,000,000 new stock on the basis of one share of new stock for each five shares held; and in addition \$1,000,000 of stock was authorized for sale to employees. When all stock has been disposed of, there will be issued and outstanding a total of \$50,000,000. Transfer office: 160 Front St., New York. Registrar: Farmers' Loan & Trust Co., N. Y. Annual meeting, last Wednesday in February.

Bonded debt: the unretired balance of bonds authorized Oct. 1, 1901, due Oct. 1, 1926, First Gold, 4%. Original authorized issue, \$10,000,000, of which \$4,000,000 were issued, the balance to be issued only for the purchase of new property, stock of new corporations, the erection of new plants, etc. Of the \$6,000,000 of unissued bonds, \$3,800,000 had been retired up to Jan. 1, 1921, leaving a present authorized amount \$6,200,000. The mortgage provides for the cancellation of \$200,000 of unissued bonds yearly on Oct. 1, beginning 1902, the authorized amount of bonds to be reduced accordingly, and after all such unissued bonds have been canceled, the company is required to pay to the trustee, annually, on Oct. 1, \$200,000 as a sinking fund for the purchase or redemption of outstanding bonds at not exceeding par and interest.

Dividends: regular quarterly at rate of 20% per annum have been paid from 1907 to May, 1915, and quarterly at rate of 2½% in Aug. and Nov. 1915. On Feb. 10, 1916, until Dec., 1920, quarterly at rate of 16% per annum. In 1921, the rate was reduced to 2% quarterly.

Extra distributions: 10% in 1907, 5% in 1909, 10% each in 1910 and 1911, 10% each 3 times in 1912, 10% each 3 times in 1913, 10% each twice in 1914 5% each twice in 1914, 2%, 10% and 30% in 1915, 250% stock dividend in July, 1915, 10% each 4 times and 5% 4 times in 1916, 10% in Jan., and 4% each Mar., April June, July, and Sept., 1917; 4% June, 1918; 2% each July and Dec. 1919; 20% stock dividend in June, 1920.

Balance sheets are not available, but table below will give a general idea of financial conditions:

Year	Net Income	Dividends	Surplus
1920.....	\$7,583,863	\$5,600,000	\$1,983,863
1919.....	8,580,095	7,000,000	1,580,095
1918.....	10,954,292	7,000,000	3,954,292
1917.....	14,704,952	12,600,000	2,104,952
1916.....	32,668,240	26,600,000	6,068,240

Net income for 9 months of 1921 was \$1,525,141 and surplus was \$615,813 after one 2% dividend; 2 previous dividends were paid from total surplus as of Dec. 31, 1920.

Property: the Mine Hill and Sterling mines at Franklin, New Jersey. The different original holdings were consolidated as a result of litigation and to effect better mine operations. It was upon the economies due to a single control of the great orebody and to the discovery by J. P. Wetherill of a process for treating the manganese-zinc ores that the fortunes of the company were built. For geology of mine see Lindgrens "Ore Deposits," p. 709; also U. S. Geological Survey Folio, No. 161.

In Carrol county, New Hampshire, the company operated the Silver Lake mine until 1919, when work was suspended.

Company owns **The New Jersey Zinc Co.** (of Pa.), with a 7,192-retort zinc smelter at Palmerton, Pa. and another plant at Freemansburgh, Pa.; **Mineral Point Zinc Co.**, which see; **Prime Western Spelter Co.**; **Tulsa Fuel & Mfg. Co.** with a 6,232 retort zinc furnace at Collinsville, Okla.; **Bertha Mineral Co.**; (q. v.) **Hyatt Ore Corporation**; the **Empire Zinc Co.** (of Missouri), not at present active; and **The Empire Zinc Co. (of Colorado)**, which see. The spelter plants of the Prime Western at Gas and Iola, Kansas, are no longer operated.

The mines in New Jersey produce the high-grade ore from which the Horsehead brand of spelter is made. Custom ores are bought for treatment. The products include oxide of zinc, slab zinc, sheet zinc, zinc dust, spiegeleisen, sulphuric acid, lithopone, and zinc chloride.

Production: no reports are published, but it is known that the company has a yearly smelting capacity of 160,000,000 to 170,000,000 lb. of slab zinc. In 1919 the output from New Jersey mines was 615,680 tons of ore, containing 185,824,000 lb. of zinc; in 1920, 535,207 tons containing 154,742,000 lb.

Company apparently carefully conceals its vast financial operations from a curious public, but it is well if somewhat "closely" managed, and is doing excellent educational work in spreading knowledge of the uses and properties of zinc.

PHELPS DODGE CORPORATION

Office: 99 John St., New York.

Officers: Walter Douglas, pres.; Cleveland H. Dodge, Arthur Curtiss James, v. p.'s.; Geo. Notman, sec.-treas., with Geo. B. Agnew, Francis L. Hine, Wm. Church Osborn, Matthew C. Fleming and E. Hayward Ferry, directors; C. W. Parsons, asst. sec.- asst. treas.; W. K. Flora, ass.-sec.; A. T. Thomson asst. to president; John Macnair, comptroller; P. G. Beckett, gen. mgr. (Douglas, Ariz.); H. Kenyon Burch, cons. eng.; Gerald Sherman, cons. min. eng. J. S. Williams, gen. repres. in Mexico.

James Douglas, through whose efforts and foresight the company attained its present importance as a metal producer, died in 1918, a loss to the entire mining profession. James McLean, an important member of the firm who held 18,500 shares died in 1920.

Phelps Dodge Corporation assumed all the assets and liabilities on April 1, 1917, of Phelps, Dodge & Co., Inc., and continued the business of the former company with the same board of directors and official staff.

Phelps, Dodge & Co., Inc., was the holding company for its subsidiary companies. Under the new plan the name of the **Copper Queen Cons. Mining Co.** was changed to the Phelps Dodge Corporation, its capital stock increased, and the properties of the **Detroit Copper Mining Co.**, the **Burro Mountain Copper Co.**, and the **Stag Canon Fuel Co.** were transferred to it, also stocks of the **Moctezuma Copper Co.**, **Bunker Hill Mines Co.** and the **Phelps Dodge Mercantile Co.**, together with the remaining assets of **Phelps Dodge & Co., Inc.** This gives direct ownership and operation by a single company.

Phelps, Dodge & Co., Inc., was organized as the successor of the firm of Phelps, Dodge & Co., which had a history of nearly a century,

its founder, Wm. Earle Dodge, having been one of the great pioneer merchants of America and a noted philanthropist.

On Oct. 3, 1921, Phelps Dodge purchased for 50,000 of its shares, the entire holdings of **Arizona Copper Co.**, which see, for full description, Property in part adjoins that of the Morenci Branch, and includes holdings of **Coronado Mng. Co.** (q. v.) in which Phelps Dodge held already a substantial interest.

In Feb., 1921, the Corporation took a 10.9% interest, \$4,360,000 total amount, in the Copper Export Association's \$40,000,000 8% note issue.

Inc. Aug. 10, 1885, in New York. **Cap.** \$2,000,000; \$10 par; increased to \$50,000,000 in March, 1917; \$100 par; \$45,000,000 of which is now outstanding, having been exchanged share for share for stock of Phelps, Dodge & Co., incorporated, Dec. 14, 1908, in New York. The capital stock was issued for the purchase of the entire stock of the Copper Queen Consolidated Mining Co., at \$135 for each \$10 share, \$27,000,000; Moctezuma Copper Co., at \$307 9/13 for each \$100 share, \$8,000,000; Detroit Copper Mining Co. of Arizona, at \$150 for each \$25 share, \$6,000,000; Stag Cañon Fuel Co., at \$800 for each \$100 share, \$4,000,000; held for future issue, \$5,000,000. Total \$50,000,000 Stock listed on New York Stock Exchange. Annual meeting, first Tuesday after first Monday in April, at 99 John St., New York. Books close 10 days before and reopen day after annual meeting. Stock transferred at office of the company. Farmers' Loan & Trust Co., New York registrar.

Twenty Phelps Dodge shares were sold for \$230 each at public auction in New York on March 3, 1920.

Comparative General Balance Sheet:

* Deficit. ** Depletion and depreciation included from 1919 on.

Dividends: company pays a regular quarterly dividend of \$2.50 per share and also extra dividends; these were \$2 per share in 1909, 1910, 1911; \$5 in 1912; \$6.50 in 1913; \$4 in 1914; \$10 in 1915; \$22.50 in 1916; \$14 in 1917; \$14 in 1918. In 1919 and 1920, no extra dividends were paid, but regular rate continued to Jan. 3, 1921; thereafter at the rate of \$1 per quarter. A total of 216% has been paid to the end of 1920.

Company controls through personal holdings of its officers, the **Old Dominion Co.** Members of the old firm also control the **El Pasco & Southwestern Ry.**, a road that, while built originally as an outlet for the Copper Queen mine, has expanded steadily and bids fair to develop eventually into a transcontinental trunk line. The same interests are very large shareholders in the Rock Island and Great Northern railways. It controls also some of the richest and most productive copper mines in existence, all able to make copper at unusually low cost.

Production: Comparative statement of total production, of company's branches, years ending Dec. 31—

Year	Tons of Ore				From Co. Ores

Phelps Dodge Corporation, is one of the few new companies in the copper mining industry that is under-capitalized rather than over-capitalized, and this is but a detail in a general business policy that, while thoroughly progressive and abreast with the times, retains the fundamentally sound and conservative policies developed by the old firm in nearly a century of honorable and markedly successful business life.

Branches and Subsidiaries

Burro Mountain Branch.
Bunker Hill Mines Co.
Copper Basin Branch.

Copper Queen Branch.
Moctezuma Copper Co.
Morenci Branch.
Phelps Dodge Mercantile Co.
Stag Canyon Branch.

Bunker Hill Mines Co.

Mine office: Tombstone, Cochise county, Ariz. John H. Davis, supt. Inc. to take over the property of the old **Tombstone Cons. Mines Co.** at Tombstone, discovered in 1878, and at one time one of the largest producers of gold-silver-lead ore in the Southwest. At a depth of 560' the volume of water became so great all attempts to handle it were unsuccessful and operations were discontinued until Phelps Dodge Corp. acquired possession.

The Tombstone company had been a subsidiary of the Development Co. of America.

Development: extensions were 5,049' in 1915; 8,177' in 1916; 11,598' in 1917; and 2,996' in 1918. Results from prospecting in the old working and in new ground have not yet shown orebodies of great size or commercial importance. Lessees were granted blocks of ground in 1918, shipping 1,000 tons monthly. The leasing system has been extended, work being confined largely to the extension of known orebodies.

The Oregon mine, 1½ miles S. W. of Tombstone, has produced upwards of 50,000 tons of argentiferous manganese ore.

The old cyanide plant of the Tombstone Cons. was converted into an experimental plant for the testing of Tombstone ores and was put into operation in June, 1915. Flotation of the gold-silver-lead ore was unsatisfactory. Half of the plant was utilized in concentrating manganese ore, and silver-bearing tailing is still shipped to the smelter at Douglas.

Power is supplied by a central plant.

Production:

Year	Tons	Gold Oz.	Silver Oz.	Lead lb.	Copper lb.	Manganese lb.

BURRO MOUNTAIN BRANCH

Mine office: Tyrone, Grant Co., New Mexico. E. M. Sawyer, mgr.; E. F. Pelton, supt.

Property: 60 claims, 1,000 acres, owned formerly by Burro Mtn. Copper Co. and acquired by Phelps Dodge about 1909. In 1912, the 55 claims, 953 acres, of the **Chemung Copper Co.** were added and in 1916, 150 claims, 2,577 acres, of **Savanna Copper Co.**'s holdings were acquired, bringing the total acreage up to 4,530 acres. Property shows 36 porphyry dikes, carrying 5 orebodies of disseminated ore having 2 to 5% copper. The old St. Louis mine, 15 claims, is said to have produced under former ownership, \$1,000,000 worth of ore; shipping ore ranging 15 to 25% in copper.

Geology: property contains a number of large orebodies of disseminated chalcocite, so-called porphyry ore, that are genetically dependent upon intrusions of monzonite, in pre-Cambrian granite, both rocks being shattered and faulted. The largest orebody is entirely in porphyry, the next largest in a brecciated zone, associated with dikes of aplite and dark felsite (phases of the porphyry), cutting through granite.

Development: in 1914-15, work consisted mainly in completing opening by underground work and churn drilling of orebodies already known. At the end of 1914, thirteen holes, with an aggregate of 11,571', had been

drilled. This work continued throughout 1915 and 1916. The orebodies on the Mohawk and Thistle claims were considerably extended in the latter year. An unusual feature is the prospecting of the Mangas valley where several holes passed through as much as 1,000' of recent valley gravel before reaching bed rock.

Ore from the East orebody goes to the 4,700' Niagara tunnel, where it is loaded directly into standard gauge railway cars. The Breccia orebody is mined through No. 3 shaft.

The Burro Mountain and Chemung mines have been united by the Niagara haulage tunnel, starting at the Tyrone terminus of the Burro Mountain branch of the A. T. & S. Fe railroad; this tunnel, 8x9', was driven to Leopold, a distance of about 1 mile, and serves the double purpose of drainage and haulage. While driving this tunnel the so-called Bison orebody was found. Development increases its size, but the oxide content is high.

In 1917, there were 52 holes drilled an average depth of 587'. Discoveries were satisfactory. The Azure Mining Co.'s ground, held under option, was also partly drilled, without encouraging results. To open the Thistle and Mohawk deposits, widely separated, considerable work was started for their extraction.

In 1918, drilling was done in 23 holes to an average depth of 489'. Nothing important was found. Although development decreased by 7,519', reserves were increased by 235,000 tons. The cost of ore extraction was reduced by the better condition of stopes and to increased drawing from the broken ore reserves in shrinkage stopes. The caving system is employed successfully.

In 1919, 26 drill-holes were completed to an average depth of 468'. A few discoveries, warranting further exploration were made. Other development amounted to 71,079', resulting in important extensions to the Thistle and Michigan ore-blocks. In 1920, development work was curtailed but ore reserves were slightly increased. Of the 34 drill-holes sunk, that on the Racket claim disclosed 125' of good grade ore.

Equipment: the old concentrator, built 1905, and twice remodeled, has been dismantled. A standard-gauge 18-mile spur was built in 1913, at a cost of \$350,000, from the main line of the Santa Fe railroad to the mine and mill. A central power plant equipped with four 1,000-h. p. Diesel engines was built at Tyrone, near the collar of No. 2 shaft. There are also two 4,000' Diesel compressors, three 350-gal. triplex and 1 centrifugal pumps. The labor is almost exclusively Mexican, only the bosses being Americans. The concentrator at Tyrone of daily capacity of 1,700 tons, with flotation equipment, went into operation April 12, 1916; remodeled 1919-1920, the daily capacity is now 2,000 tons. It is an all-steel 5-floor concrete structure covering 500 sq. ft., 3 miles from portal of haulage tunnel; it is equipped throughout with Kohn ventilating system. J. T. Hall is mill supt.

Lands include a complete town, improved with waterworks, electric light, substantial buildings, numerous dwellings, bank, store, theatre, etc.

Production:

	Ore m'ld. tons	Copper %	Conc. tons	Cop. %	Recovery, %	Copper lb.	Silver oz.
1920.....	231,152	2.043	25,669	13.182	72.241	6,480,384	22,366
1919 (5 mos.)	184,946	2.087	18,965	14.869	73.042	5,482,834	13,232
1918.....	585,083	1.928	53,146	44.875	70.232	15,188,619	43,150
1917.....	473,443	1.972	45,681	14.775	72.258	13,139,053	39,403
1916.....	253,782	2.117	26,362	13.937	68.390	7,510,674	20,763

Leaching of old partly sulphatized dump ore was started early in 1917. During that year, 280,090 lb. of copper, equal to 25% of the original metal, was extracted, while in 1918, another 8.9% was extracted, making 33.9% in two years.

Operations were indefinitely suspended on April 1, 1921.

COPPER BASIN BRANCH

A. B. Peach, acting manager, Prescott, Arizona.

Property: acquired from **Commercial Mng. Co.**, consists of **Copper Basin, Senator and Snoozer** mines in Yavapai county, 18 patented claims, 6 miles from the railroad; also the **Copper World** mine in Cedar Valley district, Mohave county, 14 miles E. of Yucca. The Senator mine yields high grade copper sulphide ore from fissure veins; in the Copper Basin disseminated ores are found as segregations in monzonite, but despite a promising outcrop, no great amount of commercial ore has been uncovered; the Copper World produces copper ore, with lead and a little silver.

Year	Development ft.	Ore shipped, tons	Copper, lb.
1919		2,264	112,795
1918	1,320	38,323	1,907,205
1917	1,250	17,299	934,781

COPPER QUEEN BRANCH

Operating and works office: Douglas, Cochise Co., Ariz. **Mine office:** Bisbee, Ariz.

Officials: G. H. Dowell, mgr.; W. H. Webster, ass't. mgr.; H. H. Stout, supt. of reduction works; P. B. Butler, asst. supt. of works; Arthur Notman, supt. of mines; R. R. Boyd, asst. supt.; G. B. Lyman, geologist.

The Copper Queen Consolidated Mining Co., retaining its charter, has changed its name to Phelps Dodge Corporation. Its properties in Bisbee and Douglas, Ariz., are now known as the Copper Queen Branch of that corporation. The company was operated for many years as a close corporation, but is said to have paid from 1888 to 1907, inclusive, dividends aggregating \$30,000,000 or more. Recent dividends, \$3,000,000 in 1908; \$4,025,000 in 1909; \$6,300,000 in 1910; \$5,200,000 in 1911; \$5,707,351 in 1912; \$5,700,000 in 1913; \$4,500,000 in 1914; and \$7,000,000 in 1915.

Property: comprises the Copper Queen and other mines at Bisbee, a large smelting plant at Douglas, on the Mexican border, 30 miles from mines. Mineral lands in the Warren, or Bisbee district, comprise 176 patented claims, 2,298 acres. Reported that 5 claims and 7 fractions, additional, were acquired in mid-1921.

The Copper Queen, one of the best known copper mines of the world, was opened 1880, on an outcrop of oxidized copper ore in massive limestone, opposite the Copper Queen hotel in Bisbee. The original orebody, now represented by a large cave, averaged 23% copper. The ore was smelted in a 30" water-jacket furnace, with English coke, brought via San Francisco. This orebody was exhausted in 3 or 4 years and the mine experienced many vicissitudes, until additional orebodies were developed, by following seams and stringers of ore leading to further large and rich deposits.

Geology: the ore-bearing formation of the Copper Queen and other mines of the Bisbee district, consists of thickly bedded limestone beds, dipping to the southward and cut by intrusive porphyritic dikes. Until 1902, the principal orebodies were found at the base of the Carboniferous limestone beds, which are broken by igneous rocks, that evidently have a strong genetic bearing upon deposition. The ore deposits occur as pockets, lenses, chimneys, bunches, shoots, veins, stringers and seams, the larger bodies being connected in most cases, by small veins, or mere knife-blade seams. The limestone and its included orebodies have a general gentle dip to the southeast, necessitating deeper shafts as distance is made toward the southeast. Extensive bodies of high-grade ore have been found, since 1902, in the deeper levels driven in the older limestones (Cambrian), and developments prove these underlying orebodies to be persistent to great depth. The oxidized part of the mine shows beautiful caves, lined with calcite crystals and stalactites and wonderfully fine crusts of azurite, mal-

achite and cuprite; some of these caves are of considerable size. Many of the shafts are bottomed in sulphide ores of high-grade, but like the oxide orebodies, they are flat or have a gentle S. E. dip, and a thickness of 50 to 200' or so. New orebodies are developed yearly and the ultimate lateral limits of payable ore are unknown.

In the Copper Queen mine, much of the ore has occurred in a zone encircling the west boundary of the porphyry intrusion of Sacramento hill. It has a width varying from 800 to 1,200', and a thickness of about 400'. It reaches the surface in the older part of the mine to the N. W., but dips to the S. E., where it is reached at 1,400' below the Czar collar, in its farthest extension at present developed on Copper Queen around. There is one major extension from the N. W. end of the zone toward the west along the Czar fault, and others of minor importance.

Individual orebodies are scattered through the zone in an eccentric manner, only matched by their own irregularities of form and size. Their most general characteristics are the softness of the ore and their great horizontal rather than vertical extent. It has been estimated that the average vertical thickness of ore in the Czar and Lowell divisions is between 30 and 35'. It is calculated by assuming it to be uniformly distributed over its horizontally projected area.

In this zone, and for some distance above it, the ground has been subjected to intense alteration and intense but irregular oxidation. It has resulted in an enormous quantity of earthy or clayey material, which may be either ore or waste, which, when wet, is both heavy and tenacious. Below alteration, the ground is fairly hard, and the limestones contain primary ores differing from those heretofore considered typical of the camp, and which have not yet been thoroughly exploited.

Development: the Copper Queen mine has 7 shafts, all connected on the even numbered levels. The mines are opened ahead for several years, development averaging about 1 mile monthly of new workings, or at the rate of 1 linear foot of new work for 10 tons of ore extracted, which figure is proven by past experience to maintain practically constant ore reserves, while avoiding excessive advance openings that require useless maintenance cost. In 1920, 11.73 tons of ore were mined per development-foot as compared with 11.16 tons in 1919. The stopes are filled throughout and the mines are timbered with square sets, mainly Washington fir, an average of 30' in timber, board measure, being required for each ton of ore won in the oxidized zone.

The 4-compartment Sacramento shaft, 1,700' deep, concreted, handles the entire output of the mines. There are loading bins on the even-numbered levels from 400 to 1,600', reached by the electric haulage lines from all other workings of the mine; ore from intermediate levels being dropped through chutes. To complete the underground traction system, many drifts and crosscuts, in solid ground wherever possible, have been opened. The shaft was sunk in rock for practically its entire depth, insuring as great a degree of immunity from drawing as is possible in this district. The Sacramento shows some rich ore, discovered 1913, on the 1,500' level near the Hoatson claim line.

The **Uncle Sam** mine has an old shaft, and a new shaft, sunk in 1908, of 224' depth. This mine is connected with the Czar, Holbrook, and Sacramento shafts, and has a large orebody, discovered 1913, that compares favorably with the bonanza deposits of the adjoining Shattuck mine. The **White Tail Deer** mine lies across the range on the edge of the mesa near Don Luis, being reached by wagon road through a detour of several miles. Development by the Boras and Night Hawk leasing companies indicates that ground surrounding this mine may become an important factor. Near the White Tail Deer a manganese deposit of some size has been worked.

The **Dallas** shaft is to be sunk from 1,400 to 1,800', and connected

by drifts with the Sacramento shaft and winze at that level. It is being concreted, and will eventually be the main outlet for the mines, as the Sacramento will be put out of commission by steam-shovel operations.

Sacramento Hill: exploratory work in the porphyry stock of Sacramento Hill, which is the geological keystone of the Bisbee ore deposits, has during the past few years revealed a large tonnage of concentrating ore and churn drilling has developed what are known as the East and West orebodies, containing respectively, over 14,000,000 and 7,660,000 tons. The latter carries 2.2% copper. The West orebody, because of its nearness to the surface will be mined by steam-shovel. The ore being of concentrating grade, tests on a working scale have demonstrated that the best saving is effected by a combined roughing table and flotation flow sheet. Ore with a 1.3% copper content was found to be workable and it is probable that 1% material can be worked. A 4,000 ton mill under erection is to be completed by mid-1922.

Removal of overburden commenced in Jan., 1917; there were 290,771 cu. yd. stripped in that year, 1,099,660 yd. in 1918; 2,056,700 yd. in 1919 and 2,500,889 in 1920. By Sept., 1920, about \$5,000,000 had been spent on this project, while before production commences, the total will be \$8,000,000.

Geology: the ore is disseminated and lies in the intrusion of the porphyry between the Pinal schist on the north and the limestone on the south. The two orebodies separated by a strip of ore are too low-grade to be worked.

The following articles describe mine operations: Arthur Notman, on drilling, in *Trans. A. I. M. E.*, Vol. 52, Sept., 1915; and R. T. Banks, drilling, 'Eng. and Mine. Jour.,' April 19, 1919.

New work in the Limestone mines, i. e. exclusive of Sacramento hill, was 80,853' in 1916; 55,518' in 1917; 58,360' in 1918; 48,907' in 1919; 48,271' in 1920. Reserves were maintained in 1919-20.

Equipment: the hoist at the Sacramento is a powerful tandem-compound engine, having 7' drums with 5' face, operated by steam, with 6 auxiliary engines, actuated by oil, under 150 lbs. pressure. Hoisting is done in 3-ton skips, and the hoist can raise a skip each minute, giving the shaft a capacity of fully 4,000 tons daily.

The Sacramento shaft has, perhaps, the most elaborate and ingenious system for mixing and loading ores to be found at any copper mine. The ventilation of the whole property with its 6 downcast and one upcast (Lowell) shafts is well described by Chas. A. Mitke, in *Bull. A. I. M. E.*, Sept., 1915, p. 1941.

The central power plant near the Sacramento shaft, includes a boiler house, having four 400-h. p. Stirling water-tube boilers, furnishing steam direct to the hoists at the nearby Sacramento and Gardner shafts, the hoists at the other shafts being operated by compressed air. Equipment of the engine house includes three 500-k. w. turbo-generators, 3 air compressors, of about 100 drills aggregate capacity, a 70-drill air compressor, the largest in the Southwest, and a 7,000 cu. ft. compressor. Fuel is Texas and California petroleum, with large tanks for oil storage. All of the shafts, and the principal mine buildings, are reached by spurs of the El Paso & Southwestern railway.

The underground haulage system is very extensive, with 21 miles of tracks, covering every second level from the 4th to the 16th, and includes electric locomotives and side-dumping ore cars. The system is fully described by Gerald Sherman, *supt.*, in *Trans. A. I. M. E.*, Sept., 1915, p. 1837.

Great attention is paid to fire prevention and ventilation, these systems being improved continually.

The 4,000 ton all-steel concentrator, situated on the flat west of Doug-

las, was designed by H. Kenyon Burch and will have 4 equal units. The coarse-crushing plant includes a 66x84" jaw crusher, 2 No. 9 gyratories and four 48" disk crushers, and has a capacity of 4,000 tons of milling ore, to 1¼", per 8 hour shift. Plant will also handle smelting and leaching ores. Each concentrating unit will have four 6½x12' Marcy roller mills, one 6x18' Dorr classifier, 10 Plato roughing tables, one Dorr duplex classifier, two 4½x18' Dorr classifiers, two 22 cell and two 6 cell Callow machines. Flotation tails will be treated on 20 Plato finishing tables. After rewatering, both flotation and finishing-table concentrate will pass to five 14x14' Oliver filters.

Each ton of ore treated requires 1,516 gal. of water of which 376 gal. are fresh obtained from the C. & C. shaft. The Douglas smelter will supply power but an emergency 6,000 h. p. Diesel plant has been installed.

THE DOUGLAS SMELTER

The **Reduction Works**, at Douglas, Ariz., 28 miles from the mine and one-half mile from the Mexican border, treat 3,000 tons daily, handling the output of the Copper Queen mines, that of the Burro Mountain branch and that of the Moezuma Copper Co., as well as doing a general custom-smelting business. The works occupy a site of 320 acres and are served by a very complete standard-gauge railroad system, reaching every building. The plant was blown in March, 1904, since which time there has been almost continuous enlargement, the works costing fully \$4,000,000, smelting about 3,000 tons daily, there being no concentrator to eliminate part of the tonnage from the final furnace charges. The plant is described by J. Moore Samuel, in Bull. A. I. M. E., June, 1916, p. 1079, in a paper on dust losses.

Water for the works is secured from artesian wells, of about 300' average depth, the water rising nearly to the surface, with 1 well, of about 1,000' depth, flowing 200 gal. per minute. A large reservoir and cooling tower have been built in connection with the water supply.

The ore-bedding system consists of 5 pits, each 40x800' in size, and 11' deep, having an aggregate storage capacity of 900,000 tons. Ore, received from the mine in sidedumping steel cars, is discharged into the pits, which are lined with white tufa rock. The pits are filled with the different grades of ore required to constitute a normal furnace mixture, and the ores mixed by a mechanical plow. Ore is removed, as required by the furnaces, with steam shovels, running on permanent tracks laid upon the floor of the pits.

The blast-furnace building, 150x900' in size, of steel frame, also covers the converter department. Three 60-ton traveling cranes, 60' span, run the entire length of the building. There are ten 400-ton blast furnaces, each 44x240" with forty 4" tuyeres, and 16' in height from the tuyeres to the charging floor. The 10 furnaces are set 15' apart, in a single row, with a 10x20' settler between each pair, the lower half lined with chrome brick and the upper half with ordinary brick. Ore is charged on either side; alternately, charging being done from trains of twenty 2,500-lb. cars, hauled by 13-ton electric locomotives. Slag flows from the settlers into 18-ton slag cars, hauled by electric locomotives. The slag dump is 1,700' long, and is kept trim by a special leveling machine, operated by electric power. The blast-furnaces consume 350 to 400 tons of coke daily.

The dust chamber is of steel frame with brick and tile walls, roofed with reinforced concrete supported by steel trusses and has a bottom of tiled hoppers.

Molten matte is taken from the blast furnace to the converters by 60-ton electric traveling cranes, each having two 15-ton auxiliary hoists. The converter department has 7 stands, operated hydraulically, with 10 shells, of the Great Falls type, basic lined. Copper is poured in a Walker

casting machine, and product is blister copper of about 99% tenor, with considerable gold and silver values. The converter plant has a flue, taking the gases from the 7 stands to a dust flue 11' in diameter at the hoods and 13' at the dust chamber.

The 260' steel stack of the blast furnace building is 30' in diameter at the base and 25' at the top.

The calcining and reverberatory plant is 100x850' in size, of steel frame. Ore is brought in over an elevated railway track on steel trestles, 400' in length, and dumped into concrete storage bins, and drawn from the bins to the roasters by belt conveyors. There are three 100' reverberatory furnaces and sixteen 75-ton McDougall calciners. A slag tunnel, 30' wide, 15' deep and 276' long, has electric cars, connecting with the slag tracks. The tunnel is lined with 4' concrete walls, with a 2' separating wall in the center. The reverberatory furnaces are next to the old building, succeeded by the slag tunnel, on top of which there is a battery of four 400-h. p. water-tube boilers, followed by a dust chamber; the McDougall roasters occupy the northern end of the building. The reverberatory department has a separate 300' stack, of 22' inside diameter, built of special hollow bricks, with walls 42" thick at the bottom and 12" at the top, requiring 1,250,000 brick and standing on a base of 60' diameter requiring 1,100 cu. yd. of concrete. A pulverizing plant, for making powdered coal for one reverberatory was finished early in 1919.

Investigations concluded in 1920 indicate that a decided economy would result by converting the smelter into an all-reverberatory plant.

The power house, of steel and brick, was enlarged to transmit electric energy 72 miles to El Tigre mine, in northern Mexico. The power plant has about 20 units, of various sizes and types, aggregating more than 6,000 h. p. Equipment includes 4 cross-compound blowing engines, each direct connected to a 400-k. w. 250-volt direct current generator; Nos. 9 and 10 Connersville blowers, set staggering; a cross-compound 2-stage condensing air compressor, with piston capacity of 2,000 cu. ft. of free air per minute, at 100 lbs. pressure, for running the pneumatic tamping devices, operating charging doors of the blast furnaces and pumping water; 3 triplex motor-driven pumps, delivering water into compression tanks, at 350 lbs. per square inch, with automatic regulation; four 400-k. w. 250-volt direct-current generators, supplying power for cranes, slag locomotives and electric lights; two 750-k. w. turbo-generators and a number of minor engines and dynamos. The power plant is equipped with a complete set of gauges and meters, keeping record of the distribution of power to every department and sub-department. During 1919, two new turbo-generators of 5,000 k. w. each, and a transmission-line to Bisbee, were erected to furnish power for the mining department, but the mine power plant will not be completely abandoned until 1923.

The steel boiler house has six 500-h. p. and four 1,000-h. p. Stirling water-tube boilers, with a Green fuel economizer, and a Foster superheater with capacity of 90,000 lb. of steam per hour. The stack of the boiler house is of brick, 177' high and 13' in diameter at the base. Boilers are arranged to burn either coal or petroleum, but latter is used exclusively. Consumption of Californian and Texan petroleum, at the mine and works, amounting to about 500,000 gal. monthly. Oil for fuel is at present cheaper in first cost, easier and cleaner to handle, and effects a great saving in the wages of 3 daily shifts of stokers, formerly required at every boiler plant.

A limestone quarry, at Lee station, 7 miles east of Douglas, has a large crusher and storage bins, the smelter requiring 400 to 500 tons of limestone daily for flux. A saw mill is operated, in the forests of the Chiricahua mountains, though the bulk of timber and lumber requirements of the mine and works are met by importation from the Pacific coast.

Production:

There were employed 3,671 men in 1916; 3,773 in 1917; 3,910 in 1918; 3,272 in 1919; 3,505 in 1920.

Although development and construction have continued, both mine and smelter were closed down on April 15, 1921.

MOCTEZUMA COPPER CO.

Mine office: Nacozari, Sonora, Mexico. H. T. Hamilton, mgr.; C. I. Schultz, gen. supt.

Inc. 1896, in West Virginia. **Cap.** \$3,000,000; issued, \$2,600,000. Is controlled through entire stock ownership by Phelps Dodge Corporation, and holds direct title to lands through Moctezuma Copper Co., S. A.

Inc. Feb. 4, 1896, in Mexico. **Cap.** 500,000 pesos. **Dividends:** were 77% or \$2,262,000, 1902-07; none in 1908; \$998,000 in 1909; \$468,000 in 1910; \$754,000 in 1911; \$2,118,569 in 1912; \$1,950,000 in 1913; \$1,170,000 in 1914.

Property: about 2,500 acres of mineral land in the Moctezuma and Arizpe districts of Sonora, including the Pilares de Nacozari mine 6 miles E. of Nacozari. Company also owns the Juarez and Nicolas ranches of about 35,000 acres, which carry considerable valuable timber.

Geology: the Pilares mine lies in a high and precipitous country near the divide of the Yaqui and Oposura rivers. The ore deposit is an oval shaped brecciated mass of latite having a major axis of 2,000' and a minor axis of 1,000', formed by two parallel systems of faults, one coursing nearly N. and S. and the other nearly E. and W. The N. and S. faults dip about 80° to the east. There were two flows of latite; the first while cooling was interrupted by the second causing the partly cooled mass to break up into the bombs and fragments which are barren of mineral and which are cemented together by

the second and mineral bearing flow. The latite gives way to andesite and this to monzonite with depth. A "caliche" dike from 4' to 10' wide runs through the entire west side of the mine. The ore occurs mainly on the border of the breccia "pipe," but lesser bodies are found inside it as well. The ore carries chalcopyrite with pyrite and some bornite, chalcocite and some covellite, the ore being mostly of concentrating grade, averaged about 3.39% copper as mined, in 1918. There is a "chimney" outcrop with carbonate ore, but croppings are mainly brown, a dull red-stained porphyry, carrying hematite. The leached zone is about 20' in depth only, with payable ore coming in at depth of about 60'.

Geology and mining methods at the Pilares mine were discussed by W. R. Wade and Alfred Wandtke in Bull. 152 of the A. I. M. & M. E., Aug., 1919. They summarize by saying that the Pilares ore deposit is of the pyrite-chalcopyrite type, and occurs in latite and andesite breccias, perhaps of early Tertiary age. The ores are genetically related to monzonitic intrusives. Enrichment of commercial importance is confined to the upper 200' of workings, but primary ore of excellent grade continues downward to the deepest workings.

In addition to the Pilares mine, the company owns a number of other properties that have been operated for several years past by lessees, including the Churunibabi, Bella Union, Fortuna, San Francisco, El Vaquero, El Promontorio (about exhausted), La Caridad, and San Pedro. The Bella Union has highgrade ore, including oxides and native copper, shipments assaying up to 39% copper, with small value in gold and silver. The Churunibabi property, yielding \$100,000 worth of silver ore to the lessees, from a rich gold-silver-copper orebody struck July, 1913, has been operated by the company for the past few years.

Development: at Pilares mine includes 4 shafts; three 3-compartment main working shafts, the Guadalupe 918', Pilares 1,200' and Esperanza 1,355' deep. The Guadalupe shaft is an underground shaft: running from the 500' level to the 1,400' level. The Pilares and the Esperanza shafts are on the extreme ends of the orebody and run from the surface, 100' level to the 1,300' level. The new 5-compartment Pilares shaft is 400' S. W. of the old one, and is down 1,000', fully equipped with electrically-driven hoist, compressors, etc., similar to that at the Esperanza. During 1919, sinking of Pilares shaft was continued, and in 1920, all efforts were concentrated in placing mine in condition, at a cost of \$168,000, for larger production and in exhausting the ores remaining in upper levels.

The mile long Porvenir tunnel opens the deposit 600' below surface; 25-ton narrow gauge railway cars run from Nacozari into the tunnel direct to the mine ore chutes. The tunnel has storage bins in a 25x100' chamber, to which ore is milled down from the upper workings, no ore being hoisted.

The mine has some enormous stopes, the 646 stope is 60' wide by 600' long. The ground stands very well and the systems of extraction used give minimum timber requirements at a cost of only a few cents per tons of ore mined. No water is hoisted above the Porvenir tunnel level and very little water is raised from the workings below. The mine is well ventilated and is equipped with electric lights. Two methods of ore extraction are employed, the room-and-pillar with waste filling as work progresses, and shrinkage stoping with waste filling after all the ore has been extracted.

New work in the mines totaled 23,252' in 1916; 33,823' in 1917, 33,833' in 1918; 24,228' in 1919; 45,734' in 1920.

Ore reserves in the Pilares deposit were estimated Jan. 1, 1916, as 3,220,000 tons; for Jan. 1, 1917, a decrease was reported due to inadequacy of hoisting facilities on lower levels; reserves increased both in 1917 and 1918; decreased somewhat in 1919 and increased again in 1920.

At the outside properties, extensions in 1918 were 4,938', the major part of which was at Churunibabi. Operations on the latter were limited in 1919 and in 1920 it was reported that but little ore was in sight. No work of importance was done at the other properties in the last 3 years.

Equipment: includes electric hoists, two 25-drill air compressors, and two blacksmith shops, one at Pilares and one at Esperanza. Two 4,000 cu. ft. compressors were erected at Pilares in 1920. There is an emergency steam plant at the mine having 2 boilers held in reserve in case of accident, but electricity is used throughout.

The power plant, at Nacozari, built in 1908, has 435-h. p. Stirling water-tube boilers, equipped with Green fuel economizers, Foster super-heaters and Rooney stokers (burning New Mexican coal), and a 196' reinforced concrete stack. The plant has three 1,000-k. w. Curtis turbo-generators giving a 6,600-volt current, and an auxiliary 50-k. w. steam turbo-generator set is used as an exciter. Current is transmitted at 6,600 volts to the mine and mill and at the mine is stepped down to 230 volts for the pumps, while the hoists and electric locomotives use a 250-volt direct current. During 1919-20, an extension to the power plant was completed to house two 1,200 h. p. and three 1,800 h. p. Diesel engines, additional.

The mine is connected with the mill by a 6-mile 30" gauge railway. Rolling stock includes four 60-ton locomotives and twenty 30-ton Ingoldsby steel side-dumping cars.

The 2,000-ton concentrator, designed and built by H. Kenyon Burch, at a cost of about \$1,000,000, was one of the most complete and efficient in existence. During 1920-21, it was remodeled, and now has a daily capacity of 3,000 tons. The crushing plant receives ore from the mine in 6,000-ton bins, whence it is fed by 2 automatic ore feeders, of special design, to grizzlies, with bars set 2½" apart, oversize, going to a No. 8 gyratory crusher, and undersize to a belt-conveyor, meeting material from the crusher, and going by belt conveyor to two 4x10" manganese trommels, with 1¼" perforations. Undersize from the trommels goes to belt conveyors and oversize from the trommel goes to No. 5 gyratory crushers, breaking the material to 1" cubes, which joins the material from the trommels and is sent by belt conveyors to 4,000-ton storage bins.

Each 1,000-ton unit of the mill is equipped with 6 coarse and 12 fine jigs, 3 sets of rolls, Swain classifiers, Callow screens, 44 Wilfley tables and 72 Johnson vanners. From the storage bins the ore is fed by a portable ore feeder to a belt conveyor, passing over an automatic weighing machine and sampler, delivering it to an 18-mm. trommel. This trommel screens the ore, the coarse pieces going to bull jigs and undersize to 11-mm. trommels; the latter feed oversize to coarse jigs and undersize to 7-mm. trommels. These trommels in turn feed oversize to intermediate jigs and undersize to 4mm. trommels, whose oversize goes in its turn to 2-mm. trommels; oversize from latter goes to fine jigs. The undersize from the 2-mm. trommels goes to 22-mesh Callow screens and thence to Wilfley tables handling oversize and undersize.

Slimes from the Wilfleys go to the vanner settling tanks and middlings from the Wilfleys go to the Chilean mills by elevators. Tailings from the bull jigs, coarse jigs and intermediate jigs go to either of 3 sets of 42x16" rolls, then by elevator to the mixing-box at the head of the trommels. Tailings from the fine jigs go to dewatering machines, and overflow from dewatering machines goes to vanner settling tanks, dewatered material going to the jig tailings bin and thence to Chilean mills, crushing to pass a 2½-mm. screen and thence to Callow screens of 22-mesh. Product is a concentrate of about 12% copper, about 85% of the assay value being saved.

Regrinding, flotation, and filtering machines were first installed during 1916, and have been added to each year since, a large pneumatic unit being erected in 1919. Flotation has improved the recovery.

An aerial tramway carries tailings from the concentrator to a dump on the hillside, far above the river level.

Water is pumped from a well sunk at the side of the river by 1 triplex and 3 Worthington pumps, of 500 gal. capacity per minute, to 500,000-gal. tanks at the mill. Wash water from the concentrates is settled and re-used.

A large dam 3 miles east of Nacozari, 90' in height, stores water sufficient for 2 years steady operation of the mill.

The company built and owns the town of Nacozari, and a town at the Pilares mine. At Nacozari the company maintains both English and Spanish schools for the children of employees, a well-equipped hospital, free library, and amusement hall.

Production:

Year	Milled, Copper, Concen.		Rec.		Copper, lb.	Gold, oz.	Silver, oz.	Molyb- denum, lb.

1914....	29,591,658	1,006	435,482
1913....	36,598,132

Forces normally are 1,750 men at the mine and mill, of which the great majority are Mexicans, with a few Japanese, no American labor being employed at the mine aside from shift-bosses and timbermen. Mining and much of the tramming is done by contract.

The Moctezuma is one of the world's really great copper mines and the management is of the best.

MORENCI BRANCH

(formerly known as Detroit Copper Mng. Co.)

Mine and works office. Morenci, Greenlee County, Arizona.

Officers: J. P. Hodgson, mgr.; W. M. Saben, asst. mgr.; John Kiddie, mine supt., Morenci; W. G. Scott, mine supt., Metcalf. Arthur Crowell, mill supt.; J. Owen Ambler, smelter supt.; J. A. McDougall, power supt.; C. J. Bury, purch. agt.

Property: is extensive, including the Ryerson, Arizona Central, Copper Mountain, Yankee, W. Yankee, Montezuma and Santa Rosa mines, at and near Morenci.

Geology: these mines cover varied types of copper deposits, all dependent upon and co-extensive with a big intrusive body of quartz porphyry and its dikes. The ores are chalcocite, chalcopyrite and pyrite with various oxidized products occurring either in altered limestones, or as fissure veins in the impregnated rocks adjacent to them, or in large masses of altered, impregnated, shattered porphyry. The geologic relations are fully treated in a monograph by Waldemar Lindgren, Prof. Paper 43, U. S. Geol. Surv.; see also Weed, "Copper Mines of the World," page 287.

Ores are mainly sulphide with a little gold and silver, and high silica and alumina content. The oxidized and limestone ores are still produced in small quantities, but 98.8% of the ores mined consists of small particles of chalcocite, associated with chalcopyrite and pyrite, in a leached and whitened, decomposed porphyry, averaging 2.39% copper. The high-grade ore from fissure veins carries 6 to 18% copper.

Development: is very extensive, with numerous shafts and long cross-country connections. The earlier workings were shallow, 400' being for many years the greatest depth. In 1912, development on the 600 and 700' levels of the Yankee mine, north of the Yankee fault, opened 194,939 tons of 2.36% ore and similar deep exploration in the Arizona Central mine upset previous ideas that ores would not go deeper. Total amount of development work in 1914 was 26,375'; in 1915, 14,709'; in 1916, 20,513'; while abnormal conditions in 1917 and 1918 prevented much being accomplished. The new footage in 1919 was 24,850, and in 1920, 54,193.

About 90% of the output is now mined by the slicing system, costing about 21% of the square set and fill cost, which is necessarily still used in some parts of the mine. Block caving is still cheaper, uses but little timber, and costs but 54.8% of the square set and fill method, but like the gopher and fill method, which is slightly cheaper, can only be used where favorable conditions prevail.

The New England mine has 2 shafts, deepest 750', and a 2,000' tunnel. The Clifton mine has 7 shafts, of 70 to 315' depth, with tunnels of 220', 450', 700', 800', 1,000' and 1,700'.

The Copper King mine is as yet but slightly developed, but was reported to show 40,000 tons of ore. An aerial tram from the Copper King mine was completed in 1909.

Of the 465,807 tons mined in 1918, the Ryerson contributed 43%; the Yankee, 20%; the Copper Mountain, 11%, and the Arizona Central, 20%. In 1919, a total of 494,480 tons was mined, and the respective percentages were 17, 27, 18, and 39. In 1920, the prospect and development campaign begun the year before was continued and important extensions of the higher grade ore bodies were found on Colorada, Montana and Wellington claims; large tonnages of low grade ore also were proven; 29,200 tons of ore were mined.

Equipment: includes steel-frame power house, with one steam-driven blowing engine, 9,000 cu. ft. per min., one gas-driven blowing engine, 6,000 cu. ft. per min., one motor-driven No. 10 Connersville blower and one No. 9 Connersville blower driven by a 200-h. p. gas engine, two steam-driven air compressors, one of 4,000 cu. ft. capacity, the other of 1,300 cu. ft., one 600-k. w. turbo generator delivering 2,300 v., 2-phase, 60-cycle current, four 250-k. w. and one 100-k. w. belted generators driven by gas engines, delivering 230 v., 2 phase, 60-cycle current, running in parallel with turbo generators through transformers. Recent additions to the power-plant were three 1,000-h. p. Diesel engines, direct connected to generators, and one 3,700 cu. ft. Diesel air compressor.

The concentrator, designed by H. Kenyon Burch, has proved remarkably successful, running 95% of the time. It consists of two 650-ton units, is 166x240' in size, and cost about \$1,000,000. Equipment includes Chilean mills, 6 sets of 16x42" rolls, 28 revolving screens, 80 Frue vanners, 40 Wilfley tables, and Deister tables, the mill putting about 7 tons into 1.

A re-grinding and flotation plant was started in 1916, being enlarged in successive years. The mill power plant has 3 gas engines of 200-h. p. and 2 of 175-h. p. each, in conjunction with electric motors driven from the smelter power house.

The concentrator uses about 500 gal. of new water per ton of ore treated, the balance being obtained by reclamation of water from the tailings in a series of concrete tanks with Dorr mechanism. The water is purchased from the Morenci Water Co., which has a pumping plant about 6 miles distant on Eagle river. This also supplies the town and practically all of the mines of the district. Tailings are conducted from a slag lined launder along the walls of Chase Creek canyon to a point below bunkers 14,000' away where it is stored in impounding reservoirs in the small canyons which empty into Morenci canyon.

The smelter has one 44x396" blast furnace, and 3 stands of small basic lined converters. Flue dust is mixed with concentrate residue before being re-charged into the furnace. About 70% of the total charge of new metal bearing material in 1918 was concentrates. The smelter has 2,000-ton ore bins, surmounted by a steel railroad trestle.

A 36" gauge railway connects the mines and smelters with the Arizona & New Mexico railroad, at Guthrie. A tunnel through Longfellow hill, completed 1909, gives direct rail connection with the mill.

The company operates an excellent hotel, and maintains a library and club room for its normal force of 1,200 employees.

Production:

Year	Tons Milled	% Copper	% Recovery	Tons Smelted	Copper, lb.
1919.....	223,135	2.37	80.22	54,346	11,414,031
1918.....	449,990	1.91	76.22	154,216	17,130,209
1917.....	312,225	2.33	70.78	118,596	13,203,401
1916.....	451,395	2.39	71.25	140,938	17,541,258
1915.....	376,604	2.83	15,333,976

Both the concentrator and smelter were closed down in September, 1919, and remained so throughout 1920, because of the depressed copper market.

PHELPS DODGE MERCANTILE CO.

Office: Bisbee, Ariz. W. A. Meyer, gen. mgr.; T. L. Houston in charge at Tyrone; C. H. Hyde at Morenci; J. B. Winfrey at Bisbee; C. A. Lindsay at Douglas, and A. Maas at Nacozari.

REPUBLIC IRON & STEEL CO.

Offices: 15 Exchange Place, Jersey City, N. J.; 17 Battery Place, New York; Republic Bldg., Youngstown, Ohio; Duluth, Minn., and Birmingham, Ala.

Officers: J. A. Topping, chairman; T. J. Bray, pres.; H. L. Rownd and J. W. Deetrick, v. p's.; R. Jones, Jr., sec.; H. M. Hurd, treas.; Francis J. Webb, gen. mgr. of the northern, and C. T. Fairbairn, mgr. of southern, divisions; L. L. Wilcox, chief engineer.

Inc. May 3, 1899, in New Jersey. **Cap.** \$30,000,000 com., \$25,000,000 pfd.; \$100 par; all outstanding. **Funded debt** outstanding, \$12,510,000 ten to thirty-year sinking fund mortgage gold 5s; and \$964,000 mortgage bonds of associated companies. The New York Trust Co., New York, transfer agt.; Chase National Bank, New York, registrar.

Dividends: 1¼% quarterly on pfd. and 1½% on com. stock.

Among the many properties which are owned entirely, or in part, are those of the **Antoine Ore Co., Mahoning O. & Co., Vermillion Mng. Co., Townsite Mng. Co.** and **Union Ore Co.**, each described under its title.

Property: includes the following iron mines in Michigan, Minnesota and Alabama, which yielded a total of 1,693,450 tons in 1916; 1,706,555 tons in 1917; 1,512,071 tons in 1918; 1,272,707 tons in 1919; 1,677,699 in 1920.

Ore reserves: 47,325,343 tons in the northern mines and 79,442,211 tons in the southern group, a total of 127,067,554 tons. Lands in Wisconsin, near Hurley, have been under investigation by drilling and shafts.

In December, 1920, the Spaulding mine was closed down, and all Minnesota mines were closed early in 1921, to await better market conditions.

UNITED COPPER CO.

Dead. Stock valueless. Fully described Vol. XI, Copper Handbook, See also Vol. XIV., 1920 Mines Handbook.

UNITED METALS SELLING CO.

Office: 25 Broadway, New York.

Officers: John D. Ryan, pres., T. Wolfson, v. p.; C. W. Welch, sec.-treas.; with Wm. Rockefeller and C. F. Kelley, directors.

Inc. Jan. 29, 1900, in New Jersey, **Cap.** \$5,000,000; shares \$100 par; dissolved in 1915 and reorganized March 15, 1915, in Delaware. Is controlled by the Anaconda Copper Mng. Co., through ownership of entire share capital.

The company does a general commission business in metals, mainly in copper, and is the largest copper broker in the world, being the sales agent for the Anaconda Copper Mng. Co. and affiliated corporations, and for a number of other producers, having the marketing of upwards of 600,000,000 lb of copper yearly.

UNITED MINES CO.

Address C. J. Walker, Boatman's Bank Bldg., St. Louis, Mo.

Officers: C. J. Walker, pres.; Jesse F. McDonald, 1st v. p.; J. C. C. Waldeck, 2nd v. p.; E. T. Cash, sec.; H. W. Mann, treas., with T. T. Nardin, directors.

Inc. Aug. 23, 1919, in Delaware. **Cap.** 115,000 pfd. shares, \$10 par, and 235,000 com. shares of no par value, of which 15,000 and 35,000 respectively, have been issued. No public offering is to be made.

President advises us, company represents the "efforts of a group of men that is mainly interested in the Down Town Mines Co. at Leadville, Colorado, to find something worth-while in the way of metal mines, on which effort considerable work has been done with fair promise of satisfactory results."

UNITED STATES SMELTING CO.

Fully described under U. S. S. R. & M. Co. in Vol. XIII. Was a subsidiary of latter company until absorbed, December, 1917.

U. S. SMELTING, REFINING & MINING CO.

General office: 55 Congress St., Boston. **Operating offices:** 120 Broadway, New York City; Kennett, Calif.; Goldroad, Ariz.; Eureka, Colo.; 912 Newhouse Bldg., Salt Lake City; Baxter Springs, Kans.; Pachuca, Hidalgo, Mexico. **Corporate office:** 85 Exchange Pl., Portland, Maine.

Officers: C. G. Rice, pres.; S. J. Jennings, v. p. in charge of exploration and min. investments; G. W. Heintz, v. p. in charge of western operations; C. F. Moore, v. p. in charge of foreign operations and cons. engr.; D. S. Calland, v. p. and gen. mgr. of operations in Mexico; F. Y. Robertson, v. p. and mgr. of metal sales; N. W. Rice, 2nd v. p.; F. W. Batchelder, sec.-treas.; John Laurie, comptroller.

Directors: S. L. Bartlett, R. J. Edwards, J. J. Phelan, C. G. Rice, E. P. Brown, C. F. Brooker, B. P. Clark, C. A. Hight, S. J. Jennings, R. T. Paine, 2nd, E. B. Bayley, A. W. Preston, D. A. Ritchie, S. W. Winslow, Jr., R. S. Bradley, J. J. Storrow, N. W. Rice, R. F. Herrick, E. V. R. Thayer, and D. G. Wing.

Executive committee: B. P. Clark, C. G. Rice, J. J. Storrow, D. C. Wing, E. P. Brown, R. F. Herrick, and S. W. Winslow, Jr.

General officials: A. P. Anderson, cons. mng. engr.; L. D. Anderson, chief engr.; G. H. Clevenger, cons. metallurgist; G. W. Cushing, traffic mgr.; G. W. Metcalfe, metallurgist.

Inc. Jan. 9, 1906, in Maine. **Cap.** \$75,000,000; \$50 par. in \$37,500,000 of 7% pfd. cum. stock and \$37,500,000 com. stock; 486,350 pfd. and 351,115 com. shares issued; 160,000 of com. in reserve for conversion purposes.

Sales on N. Y. Stock Exchange during 1920 were 129,200 com., at 76 in January and 29½ in December; and 15,190 pfd. at 47½ in March and 39½ in December. In 1921, to mid-October, range for common was 35½ to 24, and for pfd. 44½ to 37¼.

National Shawmut Bank, Boston, and Guaranty Trust Co., New York, registrars; Old Colony Trust Co., Boston, and Bankers Trust Co., New York, transfer agents. Annual meeting in May. Listed on Boston and New York Exchanges. Company had 9,499 pfd., and 2,634 com. stock holders at end of 1918; 9,765 and 2,613 for 1919; 10,077 and 3,052 for 1920.

Bonded debt: \$12,000,000 six per cent convertible gold notes, dated Feb. 1, 1916, due same date in 1926, interest payable Feb. 1 and Aug. 1 of each year. First National Bank, Boston, trustee; First National Bank, Boston, and Guaranty Trust Co., New York, registrars. Principal and interest payable at first mentioned and Hanover National Bank, New York. There is no other bonded indebtedness except \$200,000, as of Dec. 31, 1920. "joint first mortgage bonds" against Cons. Fuel Co., which includes \$150,000 against So. Utah R. R. Co. and for which these two companies are jointly liable.

In December, 1917, the **U. S. Smelting Co.**, with smelter at Midvale, Utah, was absorbed. The **U. S. Metals Refining Co.** was acquired by the **American Metal Co.** in December, 1919. During 1919 company purchased a half interest with the Sinclair Oil Co. in some oil-land in Louisiana.

Dividends: rate is 7% on preferred stock, payable quarterly (Jan., April, July, and Oct.), first dividend paid April 15, 1906. Dividends on common stock are given in the table below.

The United States Smelting, Refining & Mining Co. owns or controls through affiliated companies, and operates, the following properties and reduction plants, and railroads:

UTAH PROPERTIES.

Address: 912 Newhouse Bldg., Salt Lake City.

Operating officials: Geo. W. Heintz, v. p. in charge C. E. Allen, gen. mgr.; D. D. Muir, Jr., mgr. of mines; W. A. Howard, smelter mgr.; J. C. Brumblay, field representative.

Near Bingham: a large number of patented and unpatented claims in one block, producing lead, silver, copper, gold, and zinc ores. They are connected by means of the Niagara tunnel with the Garfield-Bingham railway, which permits the delivery of ore to any of the smelters in Utah. These mines have been operated since 1899 under the present control, and since about 1870 by earlier ownership. In 1920, they produced 99,698 tons of ore, as against 138,626 tons in 1919 and 177,921 tons in 1918. The 1919 output yielded 21,814 oz. gold, 575,868 oz. silver, 20,061.757tb lead, 1,045,060tb copper and 130.911tb zinc, with gross value \$2,438,385 and net \$156,307. There are large unexplored areas and mines are susceptible to development at a much lower horizon.

At Topliff: a quarry producing lime rock for the smelters in Utah valley.

At Midvale: a lead smelter and a lead and zinc concentrating mill. These plants are situated on an area of 235 acres, and are connected with the Denver & Rio Grande and the Oregon Short Line railway systems. The smelter and mill not only treat the ores produced from company mines, but purchase ores in the open market and by contract in all the inter-mountain states, thus making of this unit a permanent custom lead smelter and concentrator.

The smelter has 7 blast-furnaces with a capacity of 481,800 tons of charge per year. It is equipped with the most modern type of blast and roasting furnaces and charging apparatus, and a system of baghouses to filter the smelter fumes. The primary object of the baghouses was to prevent the smoke becoming a nuisance, but their installation has permitted the company to recover as by-products arsenic and cadmium on a profitable scale. The smelter treated 222,666 tons of ore during 1919, yielding 32,580 tons of bullion; in 1920, 215,757 tons yielded 31,740 tons of bullion.

The concentrating mill has a capacity of 210,000 tons of ore per year. It produces lead concentrate containing gold and silver, which is reduced in the adjoining lead smelter, and a zinc-iron middlings product. This latter is separated in the dry mill by means of the Huff electrostatic process into a zinc concentrate and an iron-silver-gold concentrate. The latter is smelted at Midvale; the former is sold to zinc smelters. By means of this concentrating plant, complex ores, which formerly could not be profitably handled, are now treated so as to yield a profit both to the mine and smelter. In 1919, 135,782 tons of ore were treated; in 1920, 106,874.

At Eureka: a number of patented and unpatented claims of the old Centennial-Eureka Mng. Co. (fully described in Vol. XIII) and 85 acres of agricultural ground for water rights. The ore is essentially a replacement deposit in limestone, the oreshoots making along N. S. and also N. W. and S. E. fracture zones. The claims have been worked since 1887, and have produced a large quantity of high-grade ore. Recent developments have shown the new ore to be of much lower grade, and although the possibilities of finding more ore have not been exhausted, this mine can no longer be depended upon as a large source of ore supply for the Midvale smelter.

It is opened by a 2,300' shaft with levels at about 100' intervals and is equipped with a plant sufficient for an annual production of 120,000 tons. Exploration was under way on the 1,800' level during 1920; upper levels are worked by lessees. Absorbed by the U. S. S. R. & M. Co. Dec. 31, 1917, the mine has been a steady small producer, output in 1920 being 10,679 tons of copper and lead ore compared with 21,288 tons in 1919. The 1919 output yielded 7,458 oz. gold, 230,007 oz. silver, 54,712tb lead, and 601,567tb copper, with gross value of \$514,017 and net, \$19,223. Majority interest of Centennial in the Bullion Beck (see below) was automatically transferred to the U. S. company. Operations were suspended for first six months of 1921.

Bullion-Beck and Champion Mining Co.

Mine office: John Enlund, supt., Eureka, Utah.

Officers: Geo. W. Heintz, pres.; C. E. Allen, v. p.; W. W. Rager, sec-treas., with J. H. Horlick, J. Fewson Smith and M. C. Morris, directors. D. D. Muir, Jr., mgr. of mines.

Inc. in Utah. Cap. \$1,000,000; shares \$10 par; 63,787 issued; last assessment of 20c called in April, 1914. Dividends: to end of 1909, were \$2,738,400, last dividend being 10c. July 11, 1908. Listed on Salt Lake City Exchange. Company is a veteran of the Tintic district and a close corporation, the U. S. S. R. & M. Co. holding 54,824 shares through its absorption of the Centennial-Eureka Mng. Co.

Property: 31 claims, adjoining the Centennial-Eureka. Mine was discovered, 1876, and has been a producer since 1880.

Development: 1,300' shaft, with 200' winze below the bottom level. Ore is mainly carbonate and chloride in limestone formation, carrying copper, gold, silver, lead and zinc values. Operations are conducted almost entirely by lessees.

Production: in 1919, 2,018 tons and in 1920, 5,575 tons of silver-lead-copper ore.

Niagara Mining Co.

Officers: C. A. Hight and G. W. Heintz, v. ps.; F. W. Batchelder, sec-treas.; with N. W. Rice, F. Y. Robertson, C. H. Schermerhorn and Geo. H. Sherwood, directors.

Inc. in Maine. Cap. 1,000,000 shares; \$1 par; 650,005 shares issued. Of these, the U. S. S. R. & M. Co. owns \$574,605 shares; of the balance, 36,958 are held by other shareholders, and 38,442 are treasury shares.

Property: several patented and unpatented mining claims adjoining mines of the U. S. S. R. & M. Co. at Bingham, Utah. The property is being worked through the Niagara tunnel, which connects at its portal with the Bingham & Garfield Railroad for delivery of ores to the Salt Lake Valley smelters. The property is fully equipped for mining operations and is a continuous small producer; output for 1920 was 3,144 tons.

United States Fuel Co.

Officials: S. J. Jennings, pres.; Moroni Heiner, v. p.; R. M. Magraw, gen. supt.

Inc. in Utah. Cap. \$10,000,000, of which \$3,000,000 is pfd. \$1 par, and \$7,000,000 com., \$10 par; 2,355,690 pfd. and 700,000 com. issued, of which U. S. S. R. & M. owns 1,361,442½ pfd. and all of common.

Bonds: this company has outstanding \$3,636,900 first and refunding 6% bonds, of which \$3,424,400 are owned by the U. S. S. R. & M. Co.

The U. S. Fuel Co. has acquired the properties of the **Castle Valley Coal Co., Black Hawk Coal Co., Consolidated Fuel Co., Panther Coal Co.**, and has assumed the joint first mortgage bonds of the **Consolidated Fuel Co.** and **Southern Utah Railroad Co.**, par value \$200,000.

The U. S. Fuel Co. also owns all the outstanding capital of the following companies:

	Shares.
Utah Coal Sales Agency	7,500
Mohrland Mercantile Co.	18,000
Southern Utah Railroad Co.	749
Price Reservoir & Irrigation Co.	20,000
King Coal Co	100

The Utah Coal Sales Agency owns all the outstanding capital of the Western Fuel Co.—361 shares.

By acquisition of the above properties, the U. S. Fuel Co. owns and controls four coal mines, each equipped with haulage system and separate tipples. The joint output of these mines in 1920 was 1,548,216 of coal as against 1,058,833 in 1919.

Utah Railway Co.

Officers: G. W. Heintz, pres.; G. S. Anderson, v. p. and gen. mgr.

Inc. in Utah. Cap. \$3,500,000; \$100 par; 30,652 issued and owned by the U. S. S. R. & M. Co.

The funded debt of Utah Railway Co. is \$4,500,000 in 5% gold coupon notes, maturing April 1, 1922, all owned by the U. S. S. R. & M. Co.

Property: company owns and operates 46.56 miles of track, and has trackage rights over 52 miles of road (double track entire distance) of the Denver & Rio Grande company, between Thistle, Utah, and Utah Railway Junction, Utah, aggregating 98.56 miles of road operated exclusive of other trackage rights, yard tracks, and sidings. All the coal produced by the U. S. Fuel Co. and other coal mines along the road is hauled by the company which is fully equipped with the latest type of engines and coal cars. Tonnage of all kinds carried in 1919 was 1,196,314, with an expense of 55% of revenue; in 1920, 1,762,538 tons and 56%.

United States Stores Co.

Officers: J. H. Horlick, mgr.; A. K. Bell, asst. mgr.

Inc. in Utah. Cap. 500 shares, all issued and owned by U. S. S. R. & M.

Operates the stores and supply department of U. S. S. R. & M. and its subsidiaries, including stores at Gold Road, Ariz. and Kennett, Calif.

Carbon-Emery Stores Co.

Inc. in Utah. Cap. \$150,000; par \$5; 27,000 shares issued and owned by U. S. S. R. & M. Co.

San Pete Valley Coal Co.

Inc. in Utah. Cap. \$20,000; par \$10; 1,877 shares owned by U. S. S. S. R. & M. Co.

NEVADA PROPERTIES

Address: 912 Newhouse Bldg.; Salt Lake City.

Operating officials: the same as under U.ah.

Richmond-Eureka Mining Co.

Officers: C. A. Hight, pres.; F. Y. Robertson, v. p.; F. W. Batchelder, sec.-tres.; with Albert Fries, S. J. Jennings, C. G. and N. W. Rice, A. J. Seligman and C. A. Wimpfheimer, directors.

Inc. Sept. 28, 1905, in Maine. **Cap.** \$3,600,000; \$10 par; all issued of which U. S. S. R. & M. Co. owns 182,213 shares. Annual meeting, 4th Wed. in September.

Property: several patented and unpatented claims, including property of old **Eureka Consolidated company**, in Eureka district, Eureka county, Nevada. Geology of the district and deposit fully described in Monograph 7 of the U. S. G. S. Mining began in 1869 and continued with interruptions up to 1910, when part of Eureka & Palisade R. R., connecting mine with the Southern Pacific and Western Pacific lines was washed away. When railroad was repaired, an increase in freight rates made extraction of available low-grade ore unprofitable.

Development: by shafts, including the Locan 1,200' shaft, and extensive openings. Mine has not been prospected below water-level, and there remains a large unexplored section above that level.

Production: prior to 1896, reported to have been \$33,283,000 net. More recently (up to 1909), the U. S. S. R. & M. Co. has shipped a large yearly tonnage of \$9 to \$10 ore desirable for fluxing purposes. Speiss from old slag dumps has, because of a high arsenic content, become a material asset estimated to be between 50,000 and 100,000 tons; 3,941 tons shipped in 1920.

Equipment: 1,400 h. p. steam plant, 1,500 cu. ft. compressor, hoist capable of reaching 2,200', etc.

In October, 1919, mine was leased, with option to purchase, to the

Mining & Developing Corp. (q. v.), which assigned its interest to the Ruby Hill Development Co. Lease was for 3 years and option called for a price of \$9 per share on 254,000 shares; but was relinquished in April, 1921. Mine has been closed for several years.

CALIFORNIA PROPERTIES

Addresses: Kennett, Calif. and for Needles plant, Gold Road, Ariz.

Operating officials: Geo. W. Heintz, v. p. in charge; O. J. Egleston, mgr., Mammoth plants; L. E. Hanley, gen. supt., Mammoth mines; D. R. Muir, mgr., Needles plant.

The **Kennett Smelter** in Shasta county, is equipped with 5 furnaces with a capacity of 450,000 tons of charge per year, and a converter plant from which the blister copper is shipped for refining. Besides the usual auxiliaries, the smelter has a large baghouse which renders the emissions of the smelter harmless to agricultural interests, and for this reason is the only one of the smelters in Shasta county permitted by decree of the Federal court to operate. The smelter treats the whole output of the Shasta county mining territory which the company is exploring. The smelter also treats custom copper ores from northern California, and silicious ore from California, Nevada and Oregon. It has also a sorting plant for copper-bearing ores that have a high zinc content, as frequently found in the Mammoth mines, and turns out a high-grade zinc product. The smelter is liberally equipped with a power-plant, machine-shop, boiler-shops, round-house, etc., to allow uninterrupted and economical operation. From 1905 to 1919, the smelter treated 3,420,410 tons of ore; in 1919, 113,735 tons of ore yielded 6,665,929 lb. of copper. Operations were suspended May 17, 1919.

The **Mammoth mine**, although closed in May, 1919, on account of abnormal conditions is one of the most important mines in the state. Exploration in 1920 added 25,000 tons of 4-6% copper ore to the reserves. Both it and the adjoining Keystone mine have large bodies of pyrite carrying a small copper content. Mine was originally operated by a subsidiary, the **Mammoth Copper Mng. Co.** until latter was discontinued. See under latter in Vol. XIII for full description.

A lime quarry, with kilns and 2½ mile electric railroad to Kennett, was acquired in 1920.

The **Needles plant** at Needles, in San Bernardino county, has a lead and zinc concentrating mill of 125 tons daily capacity, equipped with crusher, jigs, tables and a flotation plant, the latter for the recovery of zinc from tailings. Plant idle in 1921.

ARIZONA PROPERTIES

Address: Gold Road, Ariz.

Operating officials: Geo. W. Heintz, v. p. in charge; D. R. Muir, mgr. of Gold Road plant.

At Gold Road: 15 patented claims and water-rights, 22 miles S. W. of Kingman, formerly held by the **Gold Road Mines Co.** until merged with U. S. S. R. & M. Co. in December, 1917. The gold-bearing quartz, ore occurs in a fissure vein, which strikes easterly and westerly, for 1¼ miles through the claims. The production prior to its purchase in 1912 was large, the stoping operations having been carried down to the 500' level. On taking control the U. S. Co. extended stoping operations on the strike of the vein and also down to the 900' level. The assay value of the ore diminishes with depth as thus far explored, only a small percentage of the ore found on the 800' level being of pay grade, though the vein continues strong and permanent.

The mine is worked through 2 shafts, 800 and 900' deep, equipped with cages and skips. Values are recovered by cyanide process in a mill of 300 tons daily capacity, located within a few hundred feet of the mine.

The property is fully supplied with power house, air-compressor, shops, warehouse, dwellings, e. c. Little work was done in 1917 and none in 1918, save that part of the mill was leased. During 1919 and 1920 the mine remained closed.

At Cerbat; the **Champion** mine, 4 claims, 53 acres, 12 miles N. W. of **Kingman**. Recent development has yielded a small tonnage of gold-silver-lead-zinc ore which was shipped to U. S. S. R. & M. plant at **Needles**. Reserves estimated to be 60,000 tons of \$12.50 ore. Production prior to 1917 was \$200,000. Closed down in 1918.

Also, the **Stockton Hill** group, including the **Banner** mine, near the **Champion** and formerly part of the holdings of **Needles Mng. & Sm. Co.**, shows narrow veins of lead-zinc ores; now under lease and option to the **Kingman Cons. Mines. Co.**, which see for further details.

The two foregoing properties, together with the **Needles** mill were absorbed in December, 1917, by the U. S. S. R. & M. Co. from its subsidiary, the **Needles Mng. & Sm. Co.**

PROPERTIES IN OTHER STATES

Address: Eureka, Colo.

Officers: Geo. W. Heintz, pres.; E. L. Young, gen. mgr.; B. Marquand, mill supt.

Sunnyside Mining & Milling Co.

Inc. in Maine. **Cap.** \$1,800,000; \$100 par; all issued, of which the U. S. S. R. & M. Co. owns 9,001 shares, control being secured in 1917.

Property: a large group of patented and unpatented claims at Eureka, San Juan county, Colorado. The ore carries zinc, lead, silver, gold, and copper; in 1919-20, the average metal content was 6.8% zinc, 4.8% lead, 4.5 oz. silver, 0.08 oz. gold and 0.40% copper, with 3.2% iron. The adjoining **Brenneman** mine was leased in 1920.

Development: by two 5,000' tunnels, 2 shafts, 300' and 500', and a number of levels. In 1920, at depth of 500', orebody was of good size and values were better than the average.

Equipment: four 1,500 cu. ft. compressors, electric underground haulage, 33,000' tramway with capacity of 50 tons per hour, and 600-ton mill. This has 2 crushers, three 1,400-ton steel bins, tube-mills, ball-mills, flotation machines, Dorr thickeners, and Portland filters. The process employs selective flotation, producing a lead concentrate and a zinc concentrate carrying gold and silver. Electric power is purchased from the **Colorado Power Co.**

Production: in 1918, an average of 300 tons per day for 8 months; in 1919 a fire limited ore extraction to 4 months, and mill treated only 14,524 tons; in 1920, output was 161,632 tons of ore. Active operations stopped in December, 1920.

ZINC PROPERTIES

Address: Baxter Springs, Kans.

Officials: Geo. W. Heintz, v. p. in charge; D. R. Muir, mgr.

U. S. S. No. 1: the **Ritz** mine on a 60 acre leasehold, near **Cardin**, Oklahoma, in which majority interest was acquired in 1916. Drilling cut good ore from 280 to 312' and **Ravenswood** mill was moved to this mine from **Joplin**. Development in 1917 and 1918 was favorable; company operations suspended 1919 and 1920, due to low metal prices; in latter year, mine was however operated by sublessee, who produced 2,195 tons of zinc and 732 tons of lead concentrate.

U. S. S. No. 2: the **Naylor** tract, a 160 acre leasehold, 7½ mile; W. of **Baxter Springs**, Kansas, acquired in 1917. Covers an extension of **Miami**, Okla., deposits and drilling revealed enough ore to open mine and erect 400-ton mill; developments have come up to expectations and

mill has operated steadily since erection until low prices caused suspension in 1920. Exploration work only now under way. Production in 1920, 3,608 tons of zinc and 1,367 tons of lead concentrate.

At **Checotah, Oklahoma**: D. R. Muir is manager of a zinc smelter, acquired in 1916, which uses natural gas fuel and reduces both carbonate and sulphide ore. This plant provides an outlet for U. S. S. R. & M. Co.'s mines in California, Colorado, Utah and Kansas. Idle in 1920, and much of 1921.

Company also had zinc smelters at Altoona, Iola and La Harpe, Kans. These 3 smelters at Checotah and that at Midvale, Utah, together with the Bingham properties and lease on Ritz mine in Oklahoma were held by a subsidiary, **United States Smelting Co.**, until it was merged with parent company in December, 1917. During 1916-17, supply of natural gas for fuel became so irregular that Kansas smelters were closed.

U. S. S. Lead Refinery, Inc.

Address: East Chicago, Indiana.

Officers: F. Y. Robertson, pres.; F. F. Colcord, v. p.

Inc. in Maine **Cap.** 10,000 shares of no par value, all issued and owned by U. S. S. R. & M. Co.

Operates an electrolytic lead refinery, known as the Grasselli refinery, purchased from the U. S. Metals Refinery Co. During 1919, it treated 33,637 tons of lead bullion, etc. and in 1920, 29,143 tons. Other products are antimony, bismuth and hydro fluoric acid.

Hanover-Bessemer Iron & Copper Co.

Address: S. L. Houghton, supt., Fierro, Grant county, New Mexico.

Officers: Sidney J. Jennings, pres.; N. W. Rice, v. p., with D. M. Barringer, C. F. Moore, F. Y. Robertson, J. W. Brock, directors. F. W. Batchelder, sec.-tres., L. M. Kniffen, mgr.

Inc. Nov., 1914, in Delaware **Cap.** \$1,000,000; \$1 par; 745,000 issued of which the U. S. S. R. & M. Co. owns 319,353. Annual meeting, in May.

Property: at Fierro, Grant county, shows shipping ore averaging 50%-60% iron and milling ore containing 1% copper and 40% iron. Company is under contract to ship 20,000-30,000 tons of high-grade iron ore per month to the Pueblo plant of the Colorado Fuel & Iron Co.; 244,410 tons were shipped in 1920. Equipped with electrostatic mill; not in operation 1920-21.

Ebner Gold Mines Co.

The U. S. S. R. & M. Co. owns all of the capital stock and for a number of years has been developing the Ebner mine, 240 acres, at Juneau, Alaska, adjoining Alaska-Juneau on N. W. Reported to have 6 veins, 15 to 60' wide, opened by 2 tunnels. The main tunnel was 4,600' long in 1919 and a branch is being driven from the 3,200' point. Property was at one time controlled by **Alaska-Ebner Gold Mines Co.**

Cia de Real del Monte y Pachuca,

Address: M. W. Beckwith, gen. supt., Pachuca, Hidalgo, Mexico.

Officers: Salvador M. Cancino, pres.; D. S. Calland, director; J. E. Smith, asst. dir.

Inc. 1867, in Mexico. **Cap.** 2,554 shares of which U. S. S. R. & M. Co. owns 2,546.

Property: 180 claims, 4,270 acres, including the Barrera mines, in Pachuca and 200 acres, in extreme western part of Pachuca district, acquired in 1919 by purchase of 90% of \$2,200,000 capital of the Cia. de Minas San'a Ana y Anexas. In September, 1920, a majority interest in the Arevalo mines at Atotomilco el Chico, 6 miles N. of Pachuca was bought for \$1,250,000. Real del Monte is one of the most important mines

in Mexico; **Santa Ana**, and **Arevalo** have been producers for several years, but the latter on a small scale only.

The first discovery of ore was made shortly after the Conquest of Mexico by the Spandiards, and several of the principal properties were large producers prior to 1780.

Geology: of the district is extremely simple, as the ores occur in fissure veins in andesite. The capping rocks of marl and limestone have no relation to the veins. Vein filling is quartz with a little calcite. The total mineral content of the veins is never more than 4 or 5%, almost wholly composed of iron pyrite with insignificant sprinklings of lead and zinc sulphides, carrying gold and silver. **Santa Ana** covers part of the famous **Viscaira** vein.

Development: at **Real del Monte:** to depth of 2,000', with over 100 miles of underground workings in 50 mines, 8 of which are producing at present time. The bulk of the ore now mined comes from below the 1,300' level. In 1917, former company opened the **Purissima** vein whose ore is much higher grade than that extracted from other mines; in 1919-20, development of a large ore shoot gave highly satisfactory results.

Ore reserves: of **Real del Monte** are not maintained at a large figure because of the great pumping expense; at end of 1920, tonnage and grade of ore were expected to exceed previous estimates. At **Santa Ana**, a large body of rich ore is available.

Equipment: includes 2 concentration-cyanidation mills; one of 1,000 tons daily capacity, with a 50-ton flotation unit, in **Real del Monte** district and the **Loreto** plant of 1,800 tons for the **Pachuca** district. The **Loreto** mill is connected with **Santa Ana** by a 5,100' aerial tram and is to be connected with **Arevalo** by one 6 miles in length. Approximately 90% of silver and 96% of gold is recovered, 20% of total recovered value being in form of concentrate shipped to custom smelters, the remainder is exported as bullion.

Production: prior to present management was about 390,000 tons annually, the ore averaging 13.9 oz. silver and \$1.48 gold. In 1919, it was 917,982 metric tons, and in 1920, 990,849.

The proportion of the total known mineral-bearing territory developed is small and operations are assured for many years to come.

United States Smelting, Refining and Mining Exploration Co.

Offices: 55 Congress St., Boston; 120 Broadway, New York; Newhouse Bldg.; Salt Lake City; 1504 Hobart Bldg., San Francisco.

Officials: S. J. Jennings, v. p. in charge of exploration and mining investment; Geo. W. Heintz, v. p. and gen. mgr. of western exploration; C. E. Allen, mgr. of inter-mountain district; D. S. Calland, mgr. in Mexico; A. P. Anderson, mgr. of Pacific Coast.

Inc. in **Maine Cap.** \$50,000; par \$50; 900 shares issued, all owned by U. S. S. R. & M. Co. The Exploration Co. was formed for the purpose of developing new properties, which, when acquired, would be turned over to the U. S. S. R. & M. Co.

The **Cardonal** mines, 12 miles from **Ixmichilpan** and 64 miles N of **Pachuca** were taken over in 1920; it is an old-time lead producer and there are large possibilities of developing more lead and zinc ores. Also in 1920 leased a part of the property of **Dragon Cons. Mng. Co.** (q. v.) at **Tintic**, **Utah**, from which it was reported to be shipping from 50 to 100 tons daily, of iron fluxing ore. A lease on claims of **American Flag Mng. Co.** at **Park City**, **Utah**, was relinquished late in 1920.

Options have been taken on other properties in Mexico and the U. S. including that on the **Horseshoe Copper Co.** in August, 1919, on which some 2,000' of work has been done and some shipments of oxidized lead ore made. Operations were suspended early in 1921.

The U. S. Sm., Ref. & Mng. Co. despite depressed conditions, has shown an operating profit for both 1919 and 1920, although not quite large enough to cover dividends in the latter year.

United States Smelting, Refining and Mining Exploration Co.

Subsidiary of U. S. S. R. & M. Co., which see for detailed description.

Office: 55 Congress St., Boston. District offices: 120 Broadway, New York; 1504 Hobart Bldg., San Francisco; Newhouse Bldg., Salt Lake City.

Business is the examination and purchase of metal mines, which, if and when acquired, are turned over to the parent company.

UNITED STATES STEEL CORPORATION.

Offices: 71 Broadway, New York and 51 Newark St., Hoboken, N. J.

Officers: Elbert H. Gary, chrm.; Jas. A. Farrel, pres.; David G. Kerr and John Reis, v. p.'s; Rich. Trimble, sec.-treas.

Inc. Feb. 25, 1901 in New Jersey. **Cap.** \$508,302,500 com. and \$360,281,000 pfd., outstanding; \$100 par. **Funded debt.** \$554,828,231. Transfers made by company; registrars, The New York Trust Co. for pfd. and Guaranty Trust Co. for common, both of New York.

Through its subsidiaries, the **Oliver Iron Mining Co.** and **Tennessee Coal, Iron & Railroad Co.**, which see, this company controls about 127 iron mines in Alabama, Michigan, Minnesota, and Wisconsin, of which all but about 50 were active in 1920. The most important subsidiaries are described under their respective titles. Recent production:

Year	Tons	Year	Tons
1920	27,021,009	1917	31,781,769
1919	25,423,093	1916	33,355,169
1918	28,332,939		

Also, through its subsidiary, the **Am. Steel & Wire Co.**, U. S. Steel controls the **Edgar Zinc Co.** and **Donora Zinc Co.**, which see elsewhere in this volume.

Company has recently acquired the Moro da Mina (q. v.) in the Lafayette district, Minas Geraes, Brazil, reputed to be the largest known high-grade manganese deposit.

As company is an industrial corporation, fully described in various manuals, no detailed description is needed herein.

YUKON-ALASKA TRUST.

Successor in part to Guggenheim Exploration Co.

Office: 120 Broadway, New York.

Trustees: Wm. Loeb, Jr., chrm.; W. E. Bennett, sec.; Chas. Earl and Roger W. Straus.

Cap. 208,433 shares of no par value, all outstanding; distributed among Exploration Co. shareholders on basis of $\frac{1}{4}$ share of Yukon-Alaska for each share of Exploration.

Dividends: beginning on June 30, 1916, quarterly dividends of \$1 have been paid to Sept. 30, 1920. Due to the financial needs of Yukon Gold, cash distributions were indefinitely suspended on Dec. 31, 1920.

Organized Feb. 4, 1916, to take over residuary assets of **Guggenheim Expl. Co.**, comprising cash and demand loans, \$11,000,000; 2,842,625 shares (out of 3,500,000) Yukon Gold Co.; eight 5% notes of \$625,000 each of **Yukon Gold Co.**, issued Feb. 1, 1916, and due one each year thereafter; this \$5,000,000 covers purchase price of the property, dredges, and loans made Yukon Gold by Guggenheim Exploration Co. Also 500 shares preferred stock, series A of **American Smelters Securities Co.**; also various causes of action, interests, and miscellaneous property rights of uncertain and in part speculative value in various mining properties, prospects and contracts relating thereto. See Vol. XII for other details.

Thus far only one note has been met by Yukon Gold (q. v.), the others having been extended.

YUKON GOLD CO.

Controlled by the Yukon-Alaska Trust, (q. v.), Incorporated, 1916, to take over the residuary assets of the dissolved Guggenheim Exploration Co.

Office: 120 Broadway, New York.

Officers: Wm. Loeb, Jr., pres.; R. W. Straus, v. p.; W. E. Bennett, v. p.-sec.; O. B. Perry, gen. mgr., with Isaac, Daniel, Morris and S. R. Guggenheim, E. L. Newhouse, F. R. Foraker, and Charles Earl, directors. L. Fredrick, treas.; C. E. Moran, asst. sec.; F. R. Raiff, traffic mgr.; G. G. Thomson, purch. agt.; E. E. McCarthy, res. mgr. at Dawson; C. H. Munro, J. F. Newsom, and F. R. Short, engineers.

Inc. Feb. 28, 1907, in Maine. **Cap.** \$25,000,000 reduced, Jan., 1915, to \$17,500,000; \$5 par; all issued; \$14,213,125 stock owned by the Yukon-Alaska Trust. Guaranty Trust Co., New York, registrar; D. A. Crockett, 149 Broadway, New York, transfer agent. Listed on New York and Boston Curb. Annual meeting 2nd Monday in January, at Augusta, Me.

The Guggenheim Exploration Co. had loaned the Yukon Gold Co. \$5,000,000, at 5% covered by 8 serial notes for \$625,000 each, one payable each year for 8 years, from Feb. 1, 1917, to the Yukon-Alaska Trust, successor in part to the Exploration Co. When the first note was due, re-payment was extended one year from the date of maturity of the last of the series of 8 notes. In 1917, it was calculated that earnings from the holdings would be insufficient to meet the notes and continue dividends. The second note became due on Feb. 1, 1918, but was extended to 1926, No. 3 note, due Feb. 1, 1919 was paid, but note No. 4 due Feb. 1, 1920, was extended for 7 years, in order to be able to finance the project in Malaya.

Dividends: 8% quarterly from Sept., 1909, to Dec., 1911; 6% annually from April, 1912, to Dec. 31, 1917; and 1% in 1918. Payments were suspended in Sept., 1918, on account of abnormal conditions. The total amounts to \$9,858,110.

1914.....	2,213,126	489,169	534,073	61,577	1,084,819	1,128,307

Property: includes placer and lode claims in Yukon Territory, placer claims in Alaska, California and Idaho, and a tin property in the Federated Malay States, all hereinunder described. The company also holds a 60% interest in the **Elkoro Mines Co.** operating in Nevada, which see.

In Yukon and Alaska: company owns 650 placer claims near Dawson, Yukon, and 24 placer claims on Flat and Greenstone creeks, Iditarod district, Yukon Basin, Alaska, operated in part by hydraulics and in part by dredges. By 1911, there were 9 large dredges, 70 mile ditch, power plant, steam-thawing apparatus, complete machine shops, etc. As dredging area is becoming exhausted, two 7½ cu. ft. boats only were operated in 1920, others having been sold or shipped to Malaya, etc. Estimates as of Nov. 5, 1920, give a life of 3 years and net profit of \$350,000 for Dawson operations. Except for that of lessees, work in Iditarod was abandoned and dredge dismantled in 1919. At Bunker Hill, 10 mines were worked by the hydraulic method, operations were completed at end of the season and plant was dismantled. A plant was installed at Gold Hill.

Production (in recent years):

Yukon (Keno Hill) Property.

Mine address: Jas. O. Greenan, Mayo Landing, Yukon, Canada.

Property: 7 lead-silver claims on Keno hill, Mayo district, Y. T., 40 miles by wagon-road N. E. of Mayo, on the Stewart river, between the head of Lightning creek, a tributary of Duncan creek, and Christal creek. Transportation is down the Stewart to Stewart on the Yukon, thence S. W. via rail by White Pass and Yukon route, to Whitehorse and Skagway.

Geology: the rock exposed on Keno hill consists of gneissoid quartzites, quartz-mica, schists, and mica-schists. They are cut by a dike of greenstone, considerably sheared and subjected to differential erosion, resulting in its being an important topographic feature. It forms the top of Keno hill, which has an elevation of 6,400'. Principal veins, 3 to 7' wide, are in transverse faults, with dense argentiferous galena ore occurring in shoots.

Development: surface work has exposed rich ore, especially on the Rico claim. Estimates give a net operating profit of \$1,000,000 from ore developed Oct. 1, 1920.

During the winter of 1920-21, the company expected to ship 3,000 tons of ore assaying up to 60% lead and 200 oz. silver per ton, to the Selby smelter.

To Nov., 1920, \$150,000 had been spent on this property, and to July, 1921, a further expenditure of \$800,000 was expected.

California Properties.

Company operates considerable acreage of placer ground on the American, Trinity and Yuba rivers, and Butte Creek, in Placer, Trinity, Yuba

and Butte counties, under the name of **Pacific Gold Dredging Co.** Work on Feather river has been suspended. During 1919 and 1920, 4 dredges, one of 7½, one of 6 and two of 9 cu. ft. capacity were operated. It is estimated that life of these placers is 4½ years.

Production: from 3 boats in 1915 and 1916; from 5 in 1917 and 1918; from 4 in 1919 and 1920.

Year	Yardage	Gross gold Value	Cents per yd.	Cost cents. p. yd.
1920	4,900,726	\$494,490	10.10	7.31
1919	5,026,264	454,654	9.00	7.63
1918	4,444,404	310,008	7.00	6.00
1917	6,161,941	517,603	8.40	3.71
1916	4,032,476	414,135	10.27	3.94
1915	3,919,127	437,557	11.46	4.51

Idaho Properties.

D. H. Ferry is in charge at Murray, Shoshone county, of dredging operations on Prichard creek, on property under lease from Coeur d'Alene Mng. Co. Estimates to end of 1917 showed 10,600,000 cu. yd. of gravel, containing \$1,530,000. A 7½ cu. ft. dredge, electrically driven, is employed. A few claims were acquired by purchase in 1919. A 4½ year life is the estimate for this area; including California operations, a net profit of \$770,000 is expected.

Production: the 1918 figures include one month of 1917:

Year	Yardage	Gross gold value	Cents per yd.	Cost cts. per yd.
1918	1,448,306	\$96,332	7.43	6.42
1919	1,579,035	157,806	10.39	7.06
1920	1,295,900	187,845	12.97	7.30

Malaya Property.

In Malaya tin-bearing placer ground has been acquired, 2,892 acres of which had been developed by 5000 drill holes to Dec. 31, 1920, estimated to contain 95,000,000 lb recoverable tin. It is also estimated that the net profit, after allowing for depreciation, etc., will be between \$10,500,000 and \$16,500,000 realizable over a period of 15 years, depending on the price of tin.

Examined in 1919 by C. H. Munro and J. F. Newsom, and in 1920 by O. B. Perry; the first named is to be resident manager.

Equipment: Three 7½ cu. ft. dredges have been shipped from Yukon; also a 300-k. w. turbo-generator set, machine-shop and spare parts. Other dredges will follow as needed.

Up to Nov., 1920, \$1,200,000 had been spent on this property, and a further expenditure of \$1,000,000 in 1921 was contemplated. One dredge began operating in October, 1921; reported that 2 others would be in commission a few months thereafter.

Summary.

A few years ago, company was operating 14 dredges in California, Alaska and Yukon, today because of exhaustion of placers, less than half are in operation, and in order to prolong its life the ventures in Malaya and lode mining in the Yukon have been undertaken.

Company's financial and technical direction is excellent.

ZINC CONCENTRATING CO.

Presumably dead; see Vol. XIV for description.

ALABAMA

The mining industry of Alabama is dominated by the iron and coal producers, and the non-ferrous mines are few and of no great size. As this book, though intended primarily as a manual of the non-ferrous mining companies, also gives the addresses and very often the more vital facts about the iron mining companies, a full list of the iron ore producers of the State is presented below:

MANGANESE MINES OF ALABAMA.

The four Manganese producers of Alabama, are as follows:

Company & address	Mines at
Southern Manganese Corp., Anniston, Ala.	Fields, Calhoun Co.
Vassar L. Allen & P. King (lessees), Birmingham, Ala.	Altoona and Cave Springs, Etowah Co. Allen & King, Clay Co.
Hebert, Sewell & Pasquier, 612 Broad St., Gadsden, Ala.	Lodo, Etowah Co.
Nickles & Northern, Talladega, Ala.	N. & W., Talladega Co.

ALABAMA COMPANY, THE**ALABAMA**

Office: H. W. Coffin, gen. mgr., Union Trust Bldg., Birmingham, Ala.

Inc. April, 1913, in Delaware as successor to Alabama Cons. Coal & Iron Co. **Cap.** \$2,000,000 common; \$600,000 7% cum. 1st. pfd. and \$1,500,000 7% non-cum. 2nd pfd.; \$100 par; all outstanding.

Funded debt; \$1,291,000 Alabama Cons. C. & I. Co., 1s; consolidated gold 5s, dated May 1, 1903, due May 1, 1933; \$670,000 Alabama Co. general gold 6s dated May 1, 1913, due May 1, 1933.

Financial report for year ended Dec. 31, 1920, shows gross earnings, \$5,512,477; operating expenses, \$3,801,703; net earnings, \$1,710,774; surplus, \$578,873. Current assets total, \$1,273,375 and current liabilities, \$1,034,918.

Dividends: initial 21% on 1st pfd., July, 1917, and quarterly thereafter. 7% on 2nd pfd. in 1917 and quarterly thereafter. Common, 3% in 1917; 6% in 1918; 7% in 1919; 9% in 1920; 3% in Jan., 1921. All dividends deferred since April, 1921.

Property: 10,984 acres of iron-ore land in Etowah, Talladega and Jefferson counties, Ala; and in Polk county, Ga. Also has coal mines and coke ovens in Alabama.

Plant, has 4 blast-furnaces, capacity 300,000 tons.

Production: ore mined was 166,582 tons in 1915; 257,958 tons in 1916; 336,135 tons in 1917; 315,229 tons in 1918; 270,889 tons in 1919; 306,829 tons in 1920.

ALABAMA SULPHUR ORE & COPPER CO.**ALABAMA**

Dead. See National Pyrites & Copper Co.

BIRMINGHAM ORE & MINING CO.**ALABAMA**

Address: American Trust Bldg., Birmingham, Ala.

Reported operating the Helen Bess mines on Red mountain, Jefferson county.

CENTRAL ALABAMA C. & I CO.**ALABAMA**

Office: Jenifer, Ala.

Reported in 1919 that company would rehabilitate the Jenifer iron furnace plant, erect hot blast stove and machine shop, install complete electrical equipment, add 50 coke ovens at coal mine, and build additional washery at brown ore mines near furnace. No recent report.

GULF STATES STEEL CO.**ALABAMA**

Offices: Brown-Marx Bldg., Birmingham, Ala.; 55 Cedar St., New York City.

Officers: James Bowron, pres.; N. Sanborn Smith, v. p.; C. A. Moffett, v. p.-gen. mgr.; A. R. Forsyth, v. p.-treas.; W. H. Moore, sec. Wm. H. Coverdale, cons. eng.

Inc. Nov. 1, 1913, in Del. as reorganization of Southern Iron & Steel Co. **Cap.**, authorized \$12,500,000 com. and 6% non cum. 2d. pfd. taken together. Outstanding \$11,138,150 com. and \$84,100 2d pfd. Par \$100. 1st pfd. 7% cum. authorized \$3,000,000, issued \$2,000,000. Bonds \$195,000. Self Fluxing Ore & Iron Co. gold 6s, due Jan. 1, 1943, subject to call at 105.

Dividends: Feb., 1916, accumulated dividends of 15 1/6% paid on 1s pfd.; regular quarterly dividend of 1 3/4% paid since. On 2nd pfd. initial dividend of 1 1/2% paid Aug., 1916, regular quarterly dividends since, also extra of 1 1/2% paid Nov., 1916. On common, initial quarterly dividend paid Jan., 1917, continued regularly with extras. Common received a 25% stock dividend, June, 1918.

Property: owns and operates blast-furnaces, steel plants and rolling mills at Alabama City; owns entire capital stock of Clinton Mining Company operating red-ore mines 5 miles S. of Birmingham; also has 401 acres of limestone and 15,277 acres of coal land in Jefferson county;

also coal lands near Bessemer; by-product coke-ovens, etc. The Shannon mines near Birmingham have been under development since 1918. Developed to depth of 2,700' and in Spring of 1921 were producing at rate of 400 tons of 68% iron ore daily.

L. M. MINING ASSOCIATION**ALABAMA****Address:** Pyrition, Ala

Property: the old Mattison mine, 2 miles from Pyrition, Clay county, which contains a pyrite deposit, 8' thick near surface thinning to 2' at 135' below. Ore carries 42% sulphur and 2% copper. Mine was producing in 1917 and 1918.

NATIONAL PYRITES & COPPER CO.**ALABAMA****Address:** Pyrition, Ala.

Property: near Pyrition, Clay county, formerly owned by Alabama Sulphur Ore & Copper Co., contains pyrite deposits. The pyrite occurs in irregular lenses in schist, up to 300' long and 35' thick. Ore carries 40% sulphur and 1% copper.

Development: by 30' incline shaft, 450' deep. Mine was reopened in 1917 and was shipping a considerable tonnage at the end of that year. Probably closed at present.

REPUBLIC IRON & STEEL CO.**ALABAMA**

See same title in U. S. section of this book.

SLOSS IRON & STEEL CO.**ALABAMA**

See Sloss-Sheffield Steel & Iron Co.

SLOSS-SHEFFIELD STEEL & IRON CO.**ALABAMA**

Office: Birmingham, Ala. Corporate office: 243 Washington St., Jersey City, N. J.

Officers: J. W. McQueen, pres.; Hugh Morrow, v. p.; with Harry Bronner, T. C. Camp, Waddill Catchings, Henry Evans, W. H. Goadby, A. H. Larkin, J. C. Maben, Henry Parsons, Geo. W. Davison, Jas. N. Jarvie, W. W. Crawford and E. W. Rucker, directors. Executive committee: Waddill Catchings, chairman, W. H. Goadby, T. C. Camp, Henry Evans, A. H. Larkin, Harry Bronner, Geo. W. Davison, Russell Hunt, sec.-treas. Central Union Trust Co., New York, transfer agen.; Lawyers Title & Trust Co., registrar.

Inc. Aug. 16, 1899, in N. J. Company is a consolidation of the Sloss Iron & Steel Co. and various other steel and iron companies in Alabama. Annual meeting 1st Wednesday after 2nd Tuesday in April.

Cap. authorized \$10,000,000 com. and \$10,000,000 7% non-cumulative pfd.; \$100 par; issued \$10,000,000 com. and \$6,700,000 pfd. Funded debt: \$5,700,000 ten-year 6% sinking fund gold notes dated Aug. 1, 1919, due Aug. 1 1926.

Dividends: on pfd. stock, 7% quarterly from April, 1900, to Oct., 1914. Jan. 1, 1915, 6% scrip due Jan., 1916; Oct., 1, 1915, 6% scrip due Oct., 1916; Jan., 3, 1916, 3½% cash; since April, 1916, 1¼% cash paid quarterly. On common stock, 1905, 5% cash (semi-annually); Oct. 1905, 33⅓% in com. stock; 1906, 5%; 1907, 5%; 1908, 4¼%; 1909, 5¾%; 1910, 3¾%; Feb. 1, 1917, 1¼%; May 10, 1918, 1¼%; June 29, 1918, 6% extra; since Aug. 10, 1918, 1½% quarterly.

Financial report for year ended Dec. 31, 1920, showed operating profit, \$3,847,364; dividends, \$600,000; surplus, \$824,779; current assets, \$4,841,376; current liabilities, \$2,457,903.

Property: in Alabama, includes 43,000 acres of ore land, 62,500 acres of coal land, and blast furnaces with a total capacity of 600,000 tons of pig iron per annum.

SOUTHERN MANGANESE CORPORATION**ALABAMA****Office:** Birmingham, Ala. Theo. Swann, pres.

Was in 1918 a producer of manganese ore from mines in Georgia and Tennessee, but operations in these states have been entirely abandoned.

See Vol. XIV. The company was awarded \$62,898 by the War Minerals Relief Commission in 1919, being 67% of the amount claimed.

Company owns a complete treatment plant and electric smelting furnaces at Anniston, Ala.

SOUTHERN SULPHUR ORE Co.

ALABAMA

Address: 700 Broadway, Nashville, Tenn.

Property: at Pyriton, Clay county, Ala.

Conditions are similar to those of the National P. & C. Co., which see. Shipments were made in 1917 and 1918.

TENNESSEE COAL, IRON & RAILROAD CO.

ALABAMA

A subsidiary of the U. S. Steel Corp.

Office: Brown-Marx Bldg., Birmingham, Ala.

Officers: G. C. Cramford, pres.; H. C. Ryding, v. p.-gen. mgr.; L. T. Beecher, sec.-treas. C. E. Abbott, gen. supt., of iron mines, Bessemer, Ala. Inc. 1860, in Tenn., as Tenn. Coal & Ry. Co.; name changed 1881. Cap. com. \$50,000,000; issued \$32,528,698; and \$75,900 8% cum. pfd., par \$100. The U. S. Steel Co. owns all but \$66,092 of the common stock. Authorized bonded debt, \$15,000,000 general gold 5s, dated July 1, 1901, due July 1, 1951; outstanding \$12,393,000, Dec. 31, 1920. Hanover Natl. Bank, transfer agent; Central Union Trust Co., registrar; both of New York.

Property: consists of many coal and iron mines, coke ovens, steel mills, etc. Company has a number of subsidiaries, including **Alabama Steel & Shipbuilding Co.** and **Fairfield Steel Co.**, with works at Eusley and Fairfield, respectively. Other works are at Bessemer, Birmingham and Oxmoor. The iron mines are in the Red Mtn. Range, near Birmingham and include the Muscoda and Ishkooda groups; and at Greeley, company mines brown-ore pockets on the Greeley and Champion groups. All but one of 12 mines were active in 1920.

Production: not published, but is probably about 3,000,000 tons; this State yields 5,000,000 tons annually.

WOODWARD IRON CO.

ALABAMA

Office: Woodward, Ala.

Officers: A. H. Woodward, pres.; R. H. Banister, v. p.; D. E. Wilson, treas.; H. E. Smith, sec.

Inc. Nov., 1911, in Del. Cap. \$10,000,000 com. and \$3,000,000 6% cum. pfd.; par \$100; all issued.

Property: consists of 5 blast-furnaces, with annual capacity of about 450,000 tons of pig iron, by-product coke ovens, and coal and iron mines near Birmingham. Reserves of iron ore are 296,290,000 tons. A 1,400' shaft, 14x22", was sunk in 1920, but is not yet in operation.

Production: 877,637 tons of iron ore in 1917.

ALASKA

Metal production of this Territory was valued at \$41,000,000 in 1917; \$29,000,000 in 1918; \$19,620,000 in 1919; \$22,070,000 in 1920. The total since 1880 is \$460,000,000. It is interesting to recall that the Territory was purchased for \$7,500,000. Production of the principal metals for the past seven years is as follows:

Year	Gold, value	Copper, lb.	Copper, value
1921	\$8,000,000	56,214,000	\$6,971,000
1920	8,365,560	70,435,363	12,960,106
1919	9,426,000	44,800,000	8,783,000
1918	9,481,000	69,225,000	17,099,000
1917	14,657,000	88,793,000	24,241,000
1916	17,242,000	119,858,000	29,484,000
1915	16,702,000	86,509,000	15,139,000
1914	15,764,000	21,450,000	2,853,000
1880-1920	\$320,000,000	672,000,000	135,000,000

ADMIRALTY-ALASKA GOLD MINING CO.**ALASKA**

Address: W. S. Pekovich, mgr., Juneau, Alaska. L. S. Robe, supt., Funter, Alaska.

Financed by the A. A. Sales Corporation, 115 Broadway, New York.

Officers: Henry Roden, pres.; W. S. Pekovich, v. p.; I. Friedman, v. p.; W. E. Nowell, sec., with Max G. Niman, directors.

Inc. October, 1915, in Alaska. **Cap.** \$5,000,000; \$1 par; 3,800,000 shares outstanding. Security Transfer & Registrar Co., registrar and transfer agent.

Property: 52 claims, 1,040 acres, at Funter Bay, Admiralty Island, South-Eastern Alaska, 15 miles W. of Juneau, discovered 1886 and operated by the Alaska Willoughby M. Co. from 1895-96 and by the Funter Bay Mng. Co. until 1904. Ore occurs in fissure veins in schist, and is said to average better than \$10 per ton in gold, silver, copper and nickel. Twenty-nine veins, from 2-100' in width, have been disclosed. Geology and early development fully given in U. S. G. S. Bull. 662.

Development: to depth of 1,400' by 1,500' tunnel and 280' shaft. In 1920, work was done for 8 months. Reserves: estimated at 3,000,000 tons blocked out, averaging \$10 per ton.

Equipment: includes compressor, concentrating mill of 31 tons daily capacity, 4,000' tramway. A 500-ton reduction plant is planned.

ALASKA-CHITNA EXPLORATION CO.

Presumably dead. See Vol. XIV. of Mines Handbook.

ALASKA CONSOLIDATED COPPER CO.**ALASKA**

See Alaska Copper Corporation.

ALASKA CONSOLIDATED MINING & SMELTING CO.**ALASKA**

Mines at Copper Mount, Sulzer P. O., Prince of Wales Island, Alaska.

Officers: Geo. H. Crosby, pres.-gen. mgr., Lonsdale Bldg., Duluth, Minn.; A. M. Sellwood, v. p.; I. M. Lennan, sec., with A. L. Warner and Henry W. Armstrong, directors, at last accounts.

Inc. Oct., 1912, in Ariz. **Cap.** \$2,500,000; \$5 par; \$1,500,045 outstanding.

Property: purchased of the Alaska Copper Co. at sheriff's sale. Consists of 23 claims, 18 patented and 5 being patented, with 15-acre mill site, known as the Copper Mountain group, situated on Copper Harbor, Prince of Wales Island, Alaska.

Geology: mine covers a contact metamorphic zone between granite and limestone with a porphyry intrusion along the contact. Orebodies are from 3 to 50' wide with mineralized zone 900' wide and quite attractive surface showings.

Development: by 4,600' of tunnels and several shallow shafts.

Equipment: includes smelter, sawmill, tramway and many buildings, put up before sufficient ore had been developed to keep smelter in operation.

Reports made by W. H. Weed and other engineers on file in company's office. No ore shipped since 1907. Idle, but is a meritorious prospect.

ALASKA COPPER CORPORATION**ALASKA**

Address: F. B. Bard, Singer Bldg., New York.

Directors: Samuel D. Warriner, Alvan Markle, John W. B. Bausman, W. F. B. Stewart, George R. Bedford, Edwin Barr, Frank P. Lauer, Frederic B. Bard and D. George Dery.

Inc. November, 1912, in Delaware. **Cap.** \$10,000,000; \$5 par; 1,740,000 shares issued. **Bonds:** Authorized and issued in 1917, joint mortgage bond for \$1,000,000 with Alaska Consolidated Copper Co. at par, of which 1,137,6% \$500 10-year Gold Bonds convertible into stock of the Alaska Copper Corporation have been subscribed and paid for to March 1919. **Proceeds** expended in and about the enterprise. **Guaranty Trust Co.**, New York, transfer agent; **Columbia Trust Co.**, New York, registrar.

Company controls by ownership the majority of the capital stock of the **Alaska Consolidated Copper Co.** and holds an operating lease for 99 years from the latter company.

Property: 35 claims, 700 acres; eleven claims patented and balance in process of patent. Holdings comprise Nuggett group, situated about 18 miles from railroad station of Strelina, on the Copper River and North Western R. R., at an elevation of about 3,500'.

Geology: property is crossed by a series of parallel fault fissure veins, in amygdaloidal greenstone, containing mostly hornite and some chalcopyrite, in a siliceous limestone gangue. The several parallel veins dip 83° N. W. and strike N. 40° E. One vein system has been followed on the surface along its strike for 3,500', by means of test pits sunk at frequent intervals.

Development: by about 5,500' of workings to depth of 420' failed to find commercial ore and all work was discontinued.

Production: since 1916 about 160 tons of hand-sorted concentrate. Entire equipment sold to **Hubbard-Elliott Copper Co.** for a one-fourth interest in that company.

ALASKA-DANO MINING CO.**ALASKA**

Address W. E. Nowell, or Chas. Ottesen, Juneau, Alaska.

Property: 30 claims on Funter Bay, Admiralty Island, developed by 250' tunnel. The main orebody, cut August, 1921, is said to show free gold.

ALASKA DOME MINING CO.**ALASKA**

U. G. Myers, representative, Eagle, Alaska; Rufus Buck, mgr. Placer ground on Dome Creek, Eagle district. At last account, reported completion of dam, enlarging 6-mile ditch and laying of 2,000' of pipe preparatory to hydraulicking.

ALASKA DOUGLAS GOLD MINING CO.**ALASKA**

Idle. Office: 259 Mills Bldg., San Francisco, Calif.

Officers: F. W. Bradley, pres.; F. A. Hammersmith, sec-treas.

Cap. \$100,000; \$1 par; all issued.

Property on Douglas Island, Alaska. Assessment work only being done.

ALASKA EBNER GOLD MINES CO.**ALASKA**

Successor, 1912, to California-Nevada Copper Co.

Probably dead; see Vol. XII. Owned, among other property and assets, 100,000 shares of **Ebner Gold Mines Co.**, entire capital stock of which is now owned by the **United States Smelting, Refining & Mining Co.**, which see.

ALASKA-ENDICOTT MINING & MILLING CO.**ALASKA**

Address: C. W. Mason, pres.; Juneau, Alaska, or 621 W. R. Rust Bldg., Tacoma, Wash.

Property: 16 claims, 11 surveyed for patent, near William Henry Bay, Juneau district, 8 miles W. of Point St. Mary, at the entrance to Berners Bay. Ore carries copper sulphide.

About 2,000' of development work was done in 1920 and a dock and saw-mill completed. Management plans installing a 4,500' pipe line, a tram line to connect mine and mill, compressor plant, and erecting a 30-stamp mill.

ALASKA FREE GOLD MINING CO.

Described Vol. XIV. Became a part of Kelly Mines Co. (q. v.) in 1920.

ALASKA GOLD BELT MINING CO.**ALASKA**

Address: 170 Broadway, New York. **Mine office:** Juneau, Alaska.

Officers: Sanford Makeever, pres.; A. B. Dodd, v. p.; M. M. Makeever, sec.; J. Makeever, treas.; preceding officers and D. C. Bard, directors; A. B. Dodd, supt.

Inc. 1915, in Alaska **Cap.** \$1,000,000; \$1 par, none outstanding Feb. 3, 1916.

Property: 93 lode claims, 13 tunnel claims and 18 wharfage claims claims, total area, 2,500 acres, located 4 miles south of Juneau and adjoining property of the Alaska Gastineau on the southeast. They cover the extension of the Juneau gold belt and the ore is supposed to be of the same general character as that of the Alaska Gastineau.

Development started 1915 on the Lott-Nelson group in upper Sheep Creek basin. Roads were built, buildings constructed, and an air compressor put in, preparatory to driving a 3,000' exploratory and development tunnel in Sheep Creek mountain to cut upper part of orebody. In July, 1916, this tunnel had been driven 2,880' and \$100,000 spent on the development work. Diamond drilling was done to cut the Gould & Curry orebody. April, 1916, this horizontal drill hole had reached a length of 1,575', without results. No information reported since September, 1916.

ALASKA GOLD HILL MINING CO.**ALASKA**

Address: A. E. Rucker, Valdez, Alaska.

Property: a gold mine in the Black district on west side of Valdez bay. In October, 1919, it was reported that a rich shoot had been revealed in a new tunnel.

ALASKA GOLD MINES CO.**ALASKA**

Office: 25 Broad St., New York. Mine near Juneau, Alaska.

Officers: Chas. Hayden, pres.; D. C. Jackling, v. p.; C. W. Peters, v. p.; J. R. Dillon, treas.; A. J. Ronaghan, sec.; directors, Chas. Hayden, D. C. Jackling, J. R. Dillon, C. M. MacNeill, Sherwood Aldrich, F. H. Goff, E. A. Clark, B. L. Thane, mng. directors, F. L. Ames, and J. B. Hardon.

Inc. Aug. 1912, in Maine. A holding company, owning \$11,749,850 of the \$12,000,000 capital stock, and \$3,269,000 of the \$3,500,000 bonds of the Alaska Gastineau Mining Co. Property is described under title of Alaska Gastineau Mining Co.

Cap. \$7,500,000, increased Jan., 1915, to \$10,000,000; \$10 par, outstanding \$7,500,060. Of the unissued stock, \$999,940 is reserved for conversion of 10-year, 6% debentures. Transfer agents. Guaranty Trust Co., New York, and National Shawmut Bank, Boston. Registrars: Banker-Trust Co., New York, and First National Bank, Boston. Listed on the New York and Boston Stock Exchanges.

181,500 shares sold on N. Y. Stock Exchange during 1920, and the range was \$2 $\frac{3}{4}$ in March to \$ $\frac{3}{4}$ in December; in 1921 to June, \$1 $\frac{1}{2}$ to \$ $\frac{3}{4}$. The price in 1915 was \$40.

Sales on N. Y. Stock Exchange during 1920 were 197,000 con. deb., 6s due 1925, with range of \$11 in May to \$21 $\frac{1}{2}$ in November, and 112,000 of Series B., due 1926, with range of \$10 in July to \$20 $\frac{1}{4}$ in November; in 1921 to June Series A ranged from \$14 to \$19 $\frac{3}{4}$ and Series B, \$13 $\frac{1}{2}$ to 19 $\frac{3}{4}$.

Bonded debt: \$2,999,800, consists of \$1,500,000 10-year, 6% convertible gold debentures, series A; dated March 1, 1915; due March 1, 1925; int. M. & S. 1, at Guaranty Trust Co., New York, Trustee, and \$1,500,000 10-year 6% convertible gold debentures, Series B; dated March 1, 1916, due March 1, 1926: Coupon, \$100, \$500 and \$1,000; principal may be registered. Authorized, \$1,500,000. These bonds were sold for purpose of

providing funds for increasing the mining and milling operations of the Alaska Gastineau Mng. Co. Convertible at any time into stock of the company at \$30 per share. Subject to call as a whole, or in part, at 110 and interest at any time on, or after 3 years from their date. Company agrees that it will not, while any of these debentures are outstanding, mortgage or otherwise encumber any of its assets. Company is not, however, prohibited from issuing other debentures similar to series A and series B, at any time and to any amount, provided that said debentures shall not be given priority over series A, and series B, debentures. Normal income tax deducted from interest.

A comparative consolidated balance sheet of Alaska Gold and Alaska Gastineau shows the following, years ending Dec. 31:

Assets:	1920	1919	1918
Property	\$14,371,480	\$14,371,120	\$14,370,921
Development, construction, plant	7,884,928	7,985,863	8,041,080
Current	714,015	859,914	692,476
Deferred charges to operation	141,403	319,252	481,420
Total assets	\$23,111,826	\$23,536,151	\$23,585,897
Liabilities:			
Alaska Gold Mines Co.:			
Capital stock issued	\$7,500,060	\$7,500,060	\$7,500,060
Debenture bonds A and B	2,999,800	2,999,800	2,999,800
Alaska Gastineau Mining Co.:			
Capital stock held by public	250,150	250,850	250,150
First mortgage bonds	231,000	231,000	231,000
Current	619,143	740,878	498,797
Deferred liabilities (interest accrued, etc.)	709,845	515,865	322,005
Reserves for depreciation and insurance	1,283,318	966,896	642,605
Surplus	9,518,510	10,331,500	11,141,480
Total liabilities	\$23,111,826	\$23,536,151	\$23,585,897

Notes payable by Alaska Gold were reduced from \$650,000 to \$500,000 in 1917 and to \$400,000 in 1918, but were \$575,000 in 1919, and \$475,000 in 1920. Interest due March 1, 1918, on the A and B debenture bonds was not paid, and all subsequent payments have been in default.

Comparative Consolidated Profit and Loss Account, years ending Dec. 31.

ALASKA GASTINEAU MINING CO.

Operating company for **Alaska Gold Mines Co.**

Address: Thane, Alaska

Officials: G. T. Jackson, mgr.; D. J. Argall, mine supt.; Fred Hodges, mill supt.; W. T. Tolch, chief engineer; Wm. Carlberg, railroad supt.; E. M. Gastonguay, chief electrician; H. E. Biggs, auditor.

Inc. Jan. 14, 1911, in New York. **Cap.** authorized and outstanding,

\$12,000,000; \$5 par. Is controlled by the Alaska Gold Mines Co., which owns \$11,749,850 of the outstanding stock.

Bonded debt: \$3,500,000 (entire issue) first gold 6%; dated Feb. 1, 1911, due Feb. 1, 1931. The Alaska Gold Mines Co. owns \$3,269,000 of the issue.

Properties: in the vicinity of Juneau, Alaska, in what is known as the Juneau Gold Belt, comprise a net area of 2,166 acres, consisting of 1,672 acres of lodes, 219 acres of placers, and 275 acres of mill sites and homesteads. The company owns a 310-acre mill site near the mouth of Sheep creek, on the Gastineau channel. In addition to the above the company owns and controls lands, reservoir sites, power plant sites and rights-of-way on Salmon creek, emptying into Gastineau channel, in connection with its principal water power development; and also on Annex creek and Carlson creek, streams emptying into the Taku inlet about 10 miles east of the mill, and on Granite creek, Gold creek and Lurvey creek. The property of the Alaska Juneau Gold Mng. Co. adjoins the Alaska Gastineau on the west.

Mining costs are discussed in Bull. 153, Sept. 1919, of the A. I. M. & M. E. The average cost of underground work and delivering ore to the mill was 47.859 cents per ton, representing 6,533,873 tons in 4 years; in 1919 this cost was 44c. and in 1920, 46c.

The recovered value per ton was remarkable in its percentage but the amount was much less than expected.

In 1915 the estimate of fully developed, partly developed, and probable ore, was from 75,000,000 to 100,000,000 tons having a recoverable value of \$1.50 per ton. Allen H. Rogers reported in 1916, that tonnage developed and partly developed, amounting to 5,500,000 tons would average about \$1.45 gross, and that after the newer areas are developed and contribute their proportion of milling ore, the mine should be able to supply the maximum capacity (10,000 tons) with ore that would yield a profit of 45 to 50c. per ton.

The mill was designed to treat 1,500 tons daily in each of its 4 sections. but after operations started it was demonstrated that the mill would handle from 10,000 to 12,000 tons of ore per day.

Production: the first ore was run through the mill Feb. 15, 1915. Towards the end of the year a daily capacity of 6,000 tons was reached, but the grade of ore falling for a time, this tonnage was reduced to 4,000 tons daily, but again increased to average 6,169 tons in 1919 and 5,829 tons in 1920.

Year	Tons Milled	Gross Value	Extraction %	Value Recovered	Oper. Misc.	Exp. less Inc.	Profit or Loss
1920.....	2,133,458	\$0.875	\$0.178	79.66	\$0.697	\$0.820	—\$0.123
1919.....	2,251,658	0.826	0.171	79.34	0.655	0.780	—0.125

It was officially announced that it was better to operate the property at a loss than to close down and maintain the equipment in good condition, but that in a very short time, company would discontinue operations as a mining industry. Mine was shut down June, 1921, and property partly dismantled. It is planned to convert as much of plant and equipment as may be adaptable to the making of wood pulp, etc.. Company has disposed of such movable equipment as cannot so be used. A bondholder's view of the whole affair is that by R. B. Brinsmade in the Mng. & Sci. Press of Jan. 29, 1921, and a very complete description of the enterprise is contained in Vol. XIV of The Mines Handbook.

This is the unfortunate end of a great gold mining promotion.

ALASKA HOMESTAKE MINING CO.**ALASKA****Address.** Edmund Smith, American Bank Bldg., Seattle, Wash.**Officers:** Edw. Eckern, pres.-mgr.; S. A. Pepper, v. p.; Edmund Smith, sec., with L. L. Bair, directors; C. P. Toppliff, supt.**Inc.** May 1916, in Washington. **Cap.** \$1,000,000; \$1 par; 800,000 shares outstanding.**Property:** 2 claims, about 40 acres, at Port Wells, Prince William Sound, said to show shoots of gold-silver-lead ore, 12"-36" wide, in a contact deposit in granite, averaging \$50 per ton. Developed to depth of 250' by 300' tunnel. About 7,000 tons of ore reported blocked out.**Equipment:** includes gas hoist, 20-ton concentrating plant and compressor. About \$25,000 expended in development work to date. Mill, started Jan., 1919, was stated to be producing concentrates worth \$10,000 per month. Values practically all in free gold.**ALASKA INDUSTRIAL CO.****ALASKA****Office:** 115 Broadway, New York. **Mine office:** Sulzer, Prince of Wales Island, Alaska.**Officers.** J. H. Shockley, pres.; S. I. Frankenstein, v. p.; Samuel T. Grossman, sec.; S. B. Thomas, treas.**Inc.** in Washington. **Cap.** \$1,000,000; \$1 par. Annual meeting, second Saturday in January.**Property:** The Jumbo group of 35 claims, patented, area 700 acres, also 60 acres in mill sites and miscellaneous properties. Main holdings are near the head of Het a inlet, 2 miles from the beach and 1,000-3,000' above tidewater.

The Jumbo mine has a mineralized metamorphic contact zone from 500 to 2,000' in width, with granite foot and green stone hanging, ore fading into the lime. Property shows 7 irregular lenses of chalcopyrite, and some bornite, in a gangue of garnet epidote and other contact minerals. Shipping ore, averages 4 to 5% copper, with \$2.50 gold and silver per ton. A very large tonnage of ore averaging a little less than 2% in copper, and about \$2.50 in gold and silver, has been developed, which can be profitably mined when a concentrator with a flotation unit, is installed.

Development: the mine has over 3 miles of underground workings; greatest depth of workings is between 600' and 700'. The tunnels are in series, 100' apart vertically, connected by winzes. The ore sands well, requiring no timbering.**Equipment:** includes 200-h. p. electric hoist and duplex air compressor, electrically driven. Buildings include a 35x40' warehouse, 30x35' powerhouse, smith, store, office, dwellings, bunkhouses and various smaller buildings.

The property carries an available water power, rated at 3,000 h. p., and this has been partially developed by a 36" Pelton wheel, taking water from Beaver creek and actuating a 6-k. w. generator, and a 16" Pelton wheel taking water under a 330' head from Jumbo creek, through a 10" pipe line of 3,000' length, this actuating a 55-k. w. 3-phase 2,300-volt 60-cycle generator, current being stepped down to 220 volts for lighting and power. Mine is equipped with electric fans, blowers and Temple-Ingersoll electric drills.

A 9,000' Riblet aerial tram has 14 wooden towers with 22 half-ton buckets, operated by gravity with a capacity of 10 tons per hour. The tram has 200-ton ore bins at the mine and 4,000-ton storage bins at tidewater, where there is a 200' wharf.

Production: began 1908. All profits have gone back into the property for development and permanent improvements. Shipped about 1,000 tons monthly to the Tacoma smelter in 1919. Mine closed down owing to death of Chas. A. Sulzer, mgr., but is to be reopened as soon as the

ore can be sold. The Jumbo Copper Mines are considered valuable, but need further development and a concentrating mill to become commercially profitable.

ALASKA JUNEAU GOLD MNG. CO.**ALASKA**

Office: 1022 Crocker Bldg., San Francisco. **Mine office:** Juneau Alaska.

Officers: F. W. Bradley, pres.; Wellington Gregg, and A. B. Davis, v. ps.; G. D. Abbott, sec.-treas.; J. S. Wallace, asst. sec.-treas. **Directors:** A. B. Davis, C. A. Norris, and F. A. Hammersmith. P. R. Bradley, gen. supt.; John Richards, mine supt.

Inc. Feb. 17, 1897, in West Va. **Cap.** \$150,000, consisting of 1,500,000 shares, increased April, 1915, to \$15,000,000; \$10 par; outstanding, 1,400,000 shares. 241,300 shares sold on N. Y. Stock Exchange during 1920, with range of \$3 in March to 75c in December; range in 1921 to June was \$1.75 to \$1.

Bonds authorized: \$3,500,000, 7%, dated March 15, 1919, payable same date in 1929, unless redeemed at option of company prior to maturity at 110% of face value thereof with accrued interest. Denominations are \$1,000 and \$500. On April 5, 1921, \$1,774,300 were outstanding. Sinking fund to be provided for purchase of outstanding bonds. This issue was for paying indebtedness and re-modeling of the mill. There is also outstanding a 6% guaranteed note for \$500,000.

Registrar, Metropolitan Trust Co., New York; transfer agent, Central Union Trust Co., New York. Listed on the New York Stock Exchange. Annual meeting first Tuesday after first Monday in April.

1916	149,744		230,474	68,367	147,456

On April 5, 1921, total funded and secured indebtedness was \$2,274,300, including \$1,774,300 of bonds of the \$3,500,000 issue.

Property: consists of 50 patented claims; 29 claims surveyed by patent; 54 claims held by location, 2 patented placer claims, 1 placer claim held by location; 9 patented mill sites; 15 mill sites surveyed for patent; 17 water rights held by location, with a total capacity of 94,000 miner's inches; ¼ interest in water rights on the Speel river, with a

total capacity of 295,000 miner's inches; also 22 lots in the town of Juneau, a $\frac{1}{4}$ interest in 9 lode claims, 2 placer claims, and 4 mill sites.

The mineralized area adjoins the property of the Alaska Gastineau Mng. Co. on the west and that of the Ebner Gold Mines Co. on the east, one mile inland from Gastineau channel. Company also owns a large tract of land, one along Gold creek and the other farther south; on the former as a mill site, connected with the mineral area by two narrow strips of land, one along Gold creek and the other farther south; on the former, a long transportation tunnel connects the mine with mill.

Geology: the property covers the outcrop of the mineralized zone, for over a mile in length. The lode has a width between walls of 900' and dips 70° east. The orebody is composed of slate with gold bearing quartz, irregularly distributed through it in the form of veinlets, stringers and masses. Meta-gabbro dikes, intrusive into the vein, carry gold bearing quartz similarly distributed; the quartz contains pyrite, pyrrhotite, galena and a little sphalerite as well as gold. The foot-wall is green-stone, the hanging wall schist.

Deep development was begun 1910, when a main working crosscut, 8'x10', called the Gold Creek tunnel, was commenced at an elevation of 425' above sea-level, starting from a point immediately behind the town of Juneau. At 6,540' from the portal, an 800' inclined raise in the hanging-wall was put through to surface. The true width of the vein is 500' with average assay value close to \$2 per ton.

Ore extracted from the Gold Creek tunnel and the intermediate level opened from the incline raise at an elevation of 495' above the tunnel was milled in the new 40-stamp mill on Gastineau channel. A total of 50,000 tons milled up to Dec 1, 1914, averaged \$1.36 per ton, the low value being due to the dilution of ore with waste attendant upon the opening of the two levels preparatory to stoping.

The payable ore in the vein occurs as quartz stringers and so far as developed in the Alaska Juneau property, has averaged about \$6 in gold per ton, in addition to some lead and silver; it can be sorted out from the enclosing vein-matter, because the quartz is much more friable than the vein matter and thus lends itself to a partial mechanical separation, both when mined and when subjected to coarse crushing in the mill.

The assay-value of all development and preparatory mining work 'muck' samples (10,017) taken between January, 1913 and December, 1920, averaged \$1.09 per ton. Including 409 milled samples taken since 1912 the average becomes \$1.11.

The mine development work as outlined was designed to give a daily tonnage of not less than 8,000 tons, making available for caving and extracting 75,000,000 tons of ore in one section of the vein. All tunnels are double-tracked and so equipped that 8,000 tons of ore daily can be transported from the mine to the mill.

During the years 1911 to 1920, mine development cost \$1,962,050, opening 101,738' of workings.

Briefly, the milling plant included: two revolving triples, 2,000-ton coarse-ore bin, four 60" apron-feeders, four 8x5' grizzlies, with 8" openings, four No. 9 Gates gyratory crushers, four 30" conveyors, 4 distributing boxes, two 36" shuttle conveyors, twenty-four 30" apron feeders, twelve 8x6' ball mills, 12 revolving screens, 12 V-shaped tanks, 12 mechanical distributors, 48 roughing tables, 24 classifiers, 12 shovel wheels, twelve 6x12' tube-mills, 24 settling tanks, 24 mechanical distributors, 96 finishing tables, and 12 Wilfley tables. There is a retreatment department containing two 5x5' ball-pebble mills, pumps, classifiers and tables. Power plant contains four 825-h. p. Stirling water-tube boilers, with economizers, and forced draft apparatus, one 9-stage Curtis 6,000-k. w. turbo-generator, condensers and auxiliaries. Electric installations at the property are described in the "Salt Lake Mining Re-

view" of Nov. 30, 1919, and "Mng. and Scientific Press" of Feb. 14 1920, by F. Seward Rice.

The railway between mine and mill cost \$167,144. To the end of 1920 construction and equipment had cost \$3,271,088.

In May, 1917, the daily capacity was only 1,200 tons, and 3,274 in December, the highest being 3,833 in November, less than half that expected. The cost of milling was 53c. per ton during 1917, and all costs 80c. The recovery from 87c. ore was 75%, so that a loss of 15c. per ton was recorded.

During 1918 there was spent \$104,675 on the new mill, \$30,508 on the power plant, and \$10,806 on the stamp-mill. In 1920, total new construction cost \$190,292, of which mill used \$164,933.

The principal changes during 1919 were a rearrangement of mill so that $\frac{1}{3}$ of the material from the mine is sorted out as waste; the converted ball-mills are fed with 2" ore, only consisting of the most friable portion; and the mills are run in close circuit with a return of the oversize. Eventually, of the 16,000 tons delivered daily to the mill, $\frac{3}{4}$ is to be rejected as waste. The present rejects carry less gold than the mill trailings.

Production:

Year	Ore milled, tons	Ore rejected, tons	Gold assay p. t. of rock	% Gold Recovery	Value of gold, silver and lead	Cost per milled ton
1920	637,321	305,549	\$1.09	71.56	\$791,390	\$1.19
1919	616,302	76,593	1.00	72.00	542,714	1.14
1918	574,285	16,230	0.92	79.35	459,445	1.13
1917	672,424	0.88	72.72	460,666
1916	180,113	0.94	68.08	121,379	2.74
1914-15	239,918	2,410	1.45	71.72	261,326	2.85
1893-1913	330,278	176,976	1.71	81.28	707,730
Total	3,250,641	577,758	\$1.11	74.77	\$3,344,650	

The mill started making profits in December, 1919, and by February, 1920, the net return was \$10,000. Officially stated (March 22, 1920) that 2 years' time and \$850,000 would be required to bring property to a contemplated capacity of 16,000 tons. One year later, a 7,000-ton capacity was in sight, but further increase was to be suspended until indebtedness had been substantially decreased. Present estimates call for \$1,000,000 in order to develop transportation facilities for handling 16,000 tons of rock per day, or 500,000 tons per month.

Alaska Juneau may now be said to be turning the corner although profits will not mean dividends until the indebtedness is repaid. The indomitable courage and technical skill of F. W. Bradley, will bring the enterprise to a successful point.

ALASKA METALS CO.

ALASKA

Idle. **Mine office:** Bruce, Prince of Wales Island, Alaska. Harry Corbin, supt., at last accounts. Property on the west coast of Prince of Wales Island, formerly known as the Corbin mine, and the Copper Mountain mine. No recent returns secured. Slightly developed.

ALASKA MEXICAN GOLD MINING COMPANY

See Alaska Treadwell Gold Mining Co.

ALASKA MINES CORPORATION

ALASKA

Norman C. Stines, receiver, Nome, Alaska.

Office: 71 Broadway, New York City.

Officers: M. W. Newton, pres. E. E. Powell, v. p.; H. S. Newman, sec.-treas., Louis Eisenlohr, C. S. Funk, J. T. Howe and T. Howe, directors. John H. Miles, mgr.

Inc. July 9, 1916, in Virginia. **Cap.** \$10,000,000; \$1 par; \$6,000,000

outstanding. Transfer office, Empire Trust Co., New York; registrar, Bank of America, New York. Stock listed on New York and Boston curbs.

Property: the dredging rights on 3,000 acres of placer claims at Nome, formerly owned by the **Anvil Hydraulic & Dredging Co., Alaska Dredging Co., Nome Mining Co., and Wonder Dredging Co.** Drilling revealed 350,000,000 cu. yd. of gravel. The Nome M. Co. recovered 39 cen.'s a yard. Operated one dredge in 1919.

Also controls the Schlo-ser mine in the Prince William Sound region now being developed. In 1920, the main adit was driven 1,450'; and selected ore was shipped to the Tacoma smelter.

ALASKA PEERLESS MINING CO.

ALASKA

Property: the Basin Queen lode (Yellow Jacket group), at Windham bay, Juneau district, is developed by 400' tunnel and 300' of crosscuts, said to expose a belt of highly mineralized talcose schist, 70' in width. Only assessment work done in 1920, but a long crosscut tunnel, 630' below present workings, is contemplated.

ALASKA PITTSBURGH GOLD MINING CO.

ALASKA.

Office: 702 Arrott Bldg., Pittsburgh, Pa. **Mine office:** Valdez Alaska. **Officers:** B. C. Wiltse, pres.; A. L. Miller v. p.; O. A. MacVay, sec.; Wilber Galbraith, treas. with V. H. Chlebus and W. E. Flick, directors.

Inc. in Delaware. **Cap.** \$1,000,000; \$1 par; 425,000 outstanding. Annual meeting, first Tuesday in March.

Property: the Dailey-Bennett mine, 8 claims, 160 acres, on Bettles Bay, Prince William Sound, Alaska, Ore, carrying gold and silver, occurs in a porphyry dike, cutting through slate. Course is northerly, with dip of 20'. The orebody has been opened up for about 5,000' at surface, showing galena, sphalerite and arsenopyrite, also free gold. Mill tests reported to average \$13.59 p. t. Developed by 400' tunnel. Ore reserves estimated by management at 18,000 tons. Probably idle.

ALASKA STANDARD COPPER MINING CO.

ALASKA

Idle.

Former office: suite 921, 115 Broadway, New York, M. L. Hewitt, pres.; John L. Steele, mgr.

Inc. in South Dakota. **Cap.** \$2,000,000; \$1 par; 700,000 issued. Security Transfer & Registrar Co., N. Y., transfer agents and registrar.

Property: 7 patented claims and a millsite, 150 acres, said to carry a 6' vein of copper-gold-silver ore.

Development: by 3 tunnels to depth of 430', reported to have proved 300,000 tons of 4% and 10,127 tons of 8% copper ore. Is a Marcus L. Hewitt promotion. One thousand shares were sold at auction in New York on July 16, 1919, for \$23 the lot.

ALASKA SULPHUR CO.

ALASKA

Address: 8 So. Dearborn St., Chicago, Ill.

Officers: W. W. Johnston, pres.; Otto L. Erickson, v. p.; Thos. W. Landswick, sec.-treas.

Inc. in Delaware, **Cap.**, \$500,000; \$10 par.

Company owns a large sulphur deposit on Akun Island, equipped with an aerial tramway and refining plant. Operations restricted 1919-21 by lack of regular steamship service.

ALASKA THREE METALS MINING CO., INC.

ALASKA

Office: 328 Lyon Bldg., Seattle, Wash. **Mine office:** Anchorage, Alaska.

Officers and directors: Fred P. Davy, pres.-mgr.; Joe Stewart, v. p.; Chester F. Lee, sec.-treas.

Inc. Nov., 1919, in Washington. **Cap.**, \$1,000,000; \$1 par; 86,026 shares outstanding. Transfer office, 245 Main St., Buffalo, N. Y. Annual meeting 2nd Friday in May.

Property: 4 claims, 80 acres, in Pangar mountain, at head of North Fork Kashurtna river, Knik district. Ore occurs in a fissure vein in granite Drifting on vein begun August, 1920.

ALASKA TIDEWATER COPPER CO.**ALASKA**

Dead. Fully described in Volume XIV. Office: 602 Alaska Bldg., Seattle, Wash.

ALASKA TREADWELL GOLD MINING COMPANY**ALASKA MEXICAN GOLD MINING COMPANY,****} ALASKA****ALASKA UNITED GOLD MINING COMPANY,**

The affairs of these three Douglas island companies are so interlocked that to be logical, they must be discussed together, particularly so since April 21, 1917, when the Treadwell, 700, and Mexican mines were flooded by the sea, leaving only the Ready Bullion mine intact. This disaster is described in Vol. XIII. in the account of the Alaska Treadwell mine. Financial particulars of the three companies are given under the respective titles, but mine development will be considered as a whole. The 1918. report of F. W. Bradley, president of the three companies, says:

"Future developments in the Ready Bullion mine will determine the fate of the others. It is 3,600' east of the flooded workings, with a direct connection with them on its 1,350' level, but was saved from flooding by a strong concrete bulkhead. Unlike the other mines of the group, the Ready Bullion workings extend beyond the shore-line and are under the deep water of Gastineau channel. In order to remove all risks it was decided to fill with waste the cavities left in the mine as the broken ore and caved pillars were drawn and hoisted for the mill. In order to secure waste for this purpose, an Alaska Juneau type of caving stope was cut above the 450' level, 600' inland from the shore line. It cost \$120,000 to prepare for this waste filling, and filling will continue at a cost of 15c per ton of waste. The shaft was sunk and a cross-cut started for the 2,800' level. Development continues at 2,600', the stopable area being 29,025 sq. ft., averaging \$2.59 per ton. This compares fairly well with the 14 levels above it. Ore reserves in the Ready Bullion total 2,300,000 tons to the 2,800' level. Of these, 1,400,000 tons will be recovered, giving 5 years' supply to the mill, or 3 years with the Mexican mill. If the 2,800' level finds an orebody of profitable size and value, the shaft will be deepened to 3,000 and 3,400'. If this last level should also open ore, it will be driven westerly along the ore-channel to prospect any continuation in depth of the Treadwell-700-Mexican lodes. If these were of sufficient value, the high tides of Gastineau channel would be dammed off from the break on surface, and the workings pumped out. This may be in 5 to 10 years' time. The combination shaft is in solid ground, and could be used for future operations in the Treadwell-700-Mexican orebodies."

In an effort to secure new mining property tributary to Douglas island, many prospects were examined. Finally a molybdenum deposit was taken up at Shakan, Prince of Wales island, 180 miles by water from Treadwell. Reserves were estimated at 100,000 tons of 1.58% and 6,270 tons of 2.28% MoS₂ ore. During 1919, further search was made for molybdenum, as well as chrome, tungsten and nickel-bearing properties. In 1920, the Douglas island companies concentrated their local prospecting on gold and platinum properties at or near Juneau.

The three hydro-electric plants on Douglas island have been tied-in with the steam plant of the Alaskan Juneau company on the mainland opposite.

Dismantling and marketing saleable equipment continues, the quantity sold to June 30, 1918, being \$294,398, with \$209,950 awaiting sale. During 1920, equipment salvaged amounted to \$41,831. All three companies benefit from this salvaging.

The Exploration Co., Ltd., is the London agent for the Douglas island companies. See below under **Alaska Treadwell** for activities of the associated companies.

The following table gives the results of the interlocked operations of the three companies during 1917 and the first half of 1918:

	1917 (full)			1918 (half)		
	Mexican	Treadwell	United	Mexican	Treadwell	United

Dividends to Jan., 1917, aggregate \$78.93 per share.

For later years, see joint tables.

Property: The Treadwell group of mines, consisting of the Alaska Treadwell, the Alaska Mexican and the Alaska United, which operates the

700' mine and the Ready Bullion, are under one management and are located on the east side of Douglas island near the shore of Gastineau Channel. The A. T. property is farthest west. Geological conditions are the same in the mines of the 3 companies. Hanging wall of Treadwell is 1,000' distant from present shore line, while that of the Ready Bullion lies for the most part under tidal water. Though several orebodies have been found, the mines are all situated on the same lode and ore is practically of identical origin throughout. In the Alaska Treadwell, 700' and Alaska Mexican mines, the lode has been developed continuously for 3,500'. Between the Mexican and Ready Bullion mines is an undeveloped interval of 2,500'. Width of orebodies is from 300' to 400'.

Geology: the orebodies consist mainly of mineralized albite-diorite occurring in the form of intrusive dikes in black slate, whose structure they closely follow. They strike N. W.-S. E. and dip 50 degrees toward the N. E. The slates are metamorphosed shale. The ore-bearing dikes belong to a series of intrusives that appear interruptedly along the strike for a distance of about 3 miles in a zone 3,000' wide. Next to the shore of Gastineau Channel the border is defined by a heavy bed of greenstone that forms the hanging wall of both the orebodies and the intrusion zone. Many of the dikes of albite-diorite at a distance from the hanging wall have been greatly altered and impregnated with pyrite and no workable orebodies have yet been found in them. The ore consists mainly of rock impregnated with sulphides, principally pyrite, and in part shattered and filled by veins of calcite and quartz, which also contain sulphides. The ore-bearing dikes are considerably mineralized throughout, and often the whole mass can be mined. The characteristics of the deposit are believed to indicate that it was formed by ascending waters, with little, or no subsequent secondary concentration. If this is correct there is little doubt that the ore will continue to a much greater depth than has been reached, and the limit of mining will probably depend finally upon increased costs, attendant upon operating at great depth.

The production, condition of the property, its history, development, equipment, etc., are fully described in Vol. XIII of this work. The mine has been flooded since April 1, 1917, and is practically a total loss.

Alaska Treadwell has a 60% interest in the joint utilities and outside ventures undertaken by the Douglas island group.

Associated Companies: Bunker Hill and Sullivan Mng. & Conc. Co., of Idaho, together with Alaska Mexican and Alaska United, has joined Alaska Treadwell in taking over (1920) working options on 3 claim-groups in Alaska to be operated on joint account by the latter. Proportionate interests are Bunker Hill, 50%; Treadwell, 30%; Mexican and United, 10% each. Livingston Wernecke is in charge.

Property: the Whelan, Pearson-Strand and McGowan groups, of 13, 6 and 13 claims, respectively, in the Nixon Hills district, between Nixon Fork and Kuskokwin rivers, 36 miles E. of McGrath, a U. S. Government wireless station. These groups adjoin and cover a limestone granite contact for 13,500'; gold-silver-copper ore, assaying \$20 to \$60 gold; 0.9 to 2.5 oz. silver and 2 to 8% copper, occurs in cross fractures and pockets. Development is by shaft and on the Whelan 6,000 tons of ore are available. Extensions in 1920 amounted to 525'. A 10-stamp mill is to be installed.

An option on silver-lead claims on Keno Hill, Mayo district, Yukon, has also been secured.

Alaska Mexican Gold Mining Co.

Address: Mills Bldg., San Francisco, Calif. **Mine office:** Douglas island, Alaska. Under same management as the Alaska Treadwell, which see.

Inc. April, 1892, in Minnesota. **Cap.** \$1,000,000 in 200,000 shares, \$5 par; 120,000 of which went to pay for the Alaska Mexican Gold Mine, and 60,000 were issued to the public by the Exploration Co., Ltd., of London. Annual meeting in May. Registration and Security Co. of San Francisco, registrars.

For later years, see joint tables.

Property: Located on the east side of Douglas island, between the 700' claim of the Alaska United on the west and the Ready Bullion mine of that company on the east. For a general description see Alaska Treadwell.

On July 27, 1916, surface evidences of a hanging-wall subsidence near the Treadwell—700 Ft. Claim boundary became apparent, and to protect the Treadwell, 700 Ft., and Mexican mines, heavy drawing of reserves of caved and broken ore was stopped. In April, 1917, the Mexican, Treadwell, and 700 Ft. mines were flooded and shut down indefinitely. For details see Vol. XIII. under Alaska Treadwell.

As the Mexican may not produce any more ore, its total output may be given from 1894 to 1917; 4,445,807 tons, averaging \$2.61 per ton at cost of \$1.67. Out of profits, \$4,161,657, dividends absorbed \$3,507,381, or \$19.47 per \$5 share.

In addition to its 20% interest in joint utilities, company has some interest in outside properties, such as the Shakan, etc. Otherwise inactive. See Vol. XIV for description of development, equipment etc.

Alaska United Gold Mining Co.

Address: Mills Bldg., San Francisco, Calif. Mine office: Douglas Island, Alaska. Under same management as the Alaska Treadwell.

Inc. Aug. 6, 1895. **Cap.** \$1,000,000, shares \$5 par, issued \$901,000.

† Mine flooded since April.

(a) Total for both mines. (b) Dec. 16, 1910-Dec. 31, 1911.

(c) Loss due to heavy development charge.

Alaska United is the only mine now being operated on Douglas island. On April 21, the 700-Foot Claim, Treadwell, and Mexican mines were lost by flooding. The Ready Bullion mine is some distance away from these mines and escaped. From 1898 to 1917 the 700-Foot Claim yielded 2,400,868 tons of \$2.05 ore, at a cost of \$1.66 per ton, giving a profit of \$946,259. The Ready Bullion produced 3,967,135 tons of \$2.08 ore at a cost of \$1.56 per ton, and total profit of \$2,049,406. Of combined profits, \$2,995,664, \$2,045,270 was paid in dividends.

Early in 1920, after every effort to continue normal operations in the Ready Bullion at a profit had proved unsuccessful, President Bradley offered two courses of procedure, (a) to suspend operations and (b) to deplete or work out the mine as rapidly as possible. The second plan was adopted, and operations in 1920 showed a profit of \$94,053.

Company has a 20% interest in undertakings of the Douglas island companies.

For a more complete description of the property, development, etc., see Vols. XIII and XIV.

ALASKA UNITED COPPER EXPLORATION CO. ALASKA

Mail returned from former address, 551 Coleman Block, Seattle, Wash.

Mine office: Dan Creek, Copper River district, Alaska.

Officers: L. C. Dillman, pres.-gen. mgr.; Jas A. Munday, v. p.; E. V. Dillman, sec.; W. A. Mears, treas. with A. Ingraham, W. Hughes, Frank L. Huston, Jas. I. O'Keane and Thos. M. Dunn, trustees; C. C. Jones, cons. engr.

Inc. Nov. 14, 1906, in Washington. **Cap.** \$12,500,000. \$1 par. Debentures, \$150,000 6% bonds. Annual meeting, first Monday in January.

The company is primarily a holding company, prospecting and developing properties in its possession for sale to other parties.

Company controls the **Alaska Westover Copper Co.**, which see.

ALASKA UNITED GOLD MINING CO. ALASKA

See Alaska Treadwell Gold Mng. Co.

ALASKA WESTOVER COPPER CO. ALASKA

Controlled by **Alaska United Copper Expl. Co.** **Former office:** Coleman Block, Seattle, Wash. Mine, 18 miles from Copper River railroad in the Chitina district.

Officers: L. C. Dillman, pres., W. A. Mears, sec.-treas., with F. B. Whiting, F. J. Perine, F. B. Chandler, trustees.

Property: the Westover group on Boulder creek, title to which was transferred from the Alaska United Copper Explor'n Co., 23 claims, about 460 acres, covering a contact between limestone and greenstone. The contact lies horizontally and the ore outcrop is from 6 to 14' thick and 43' long in a perpendicular bluff at 4,990' elevation.

Development: 11000' of tunnels. One tunnel started at the south end is reported to have shown 4 to 20' of ore for 45' in a S. E. direction, and a crosscut on the ore body shows 2' of glance claimed to assay 50% copper. It widens to 14' for about 36'; is then cut off by a fault, but continues about 12' to the north. Bornite, chalcocite, chalcopyrite have replaced limestone along irregularly distributed fissures.

Presumably idle.

ALASKA ZINC & COPPER CO. ALASKA

Office: Green Bldg., Seattle, Wash.

Officers: M. O. Goodner, pres.-treas.; A. Goodner, v. p.-sec.

Inc. Jan. 3, 1917 in Washington. **Cap.** \$1,000,000. \$1 par; 800,000 issued 650,000 in escrow for two years with H. C. Loup & Co., New York. U. S. Corporation Co., agent.

Property: a prospect on Prince Sound, showing zinc, copper, gold and silver ores.

Probably idle.

ALICE MINING CO. ALASKA

Last address: Valdez, Alaska.

Property: consists of the Alice mine, situated at sea level on west side of Shoup bay, 1½ miles N. W. of the Cliff mine. The vein, found in 1910, is a well-defined fissure, strike N. 60° W., dip 70° S., width from a few inches to 2½'. Ore minerals include gold, pyrite, chalcopyrite, arsenopyrite, and sphalerite. The country rock is composed of graywackes, and green schists.

Development: by 247' tunnel, a two-compartment shaft, 170' deep, and 100' of drifting at the bottom of the shaft.

Equipment: includes 100 h. p. boiler, 3-drill air compressor, 50-light dynamo, 5 h. p. steam engine, steam hoist, pumps, blacksmith shop, mess house and bunk house.

Small shipments were made in 1913 and 1916. Assessment work only

done in 1915 and 1916, and nothing reported since. See U. S. G. S. Bull 622 and 662.

AMERICAN TIN MINING CO.**ALASKA**

Operates a dredge on Buck Creek, Seward Peninsula.

AUK BAY MINING & DEVELOPMENT CO.**ALASKA**

Address: P. J. Wiley, mgr., Juneau Alaska; Henry Brie, sec.-treas.

Property: 19 claims, 380 acres, at Auk Bay, 12 miles N. of Juneau, Harris district, said to show a contact vein in diorite, containing gold and silver values. Has small testing mill of 12 tons daily capacity. Property idle on account of high cost of supplies and materials.

BANGOR CREEK DREDGING CO.**ALASKA**

Address: Union Construction Co., 604 Mission Street, San Francisco; or Nome, Alaska.

Property: Gold-bearing placer ground near Nome.

Equipment: includes a dredge with 3½ cu. ft. buckets, run by semi-Diesel engines.

BEATSON COPPER CO.**ALASKA**

Entire property, assets and liabilities acquired by the Kennecott Copper Corporation, and company dissolved Oct. 4, 1915.

BEAVER MOUNTAIN MINING CO.**ALASKA**

Idle. **Mine office:** Sulzer, Prince of Wales Island, Alaska. Henry Miller, pres.; George Comer, mgr., at last accounts. **Property:** on the southern side of Beaver mountain, Hetta inlet. **Development:** by tunnels, showing ore carrying copper, nickel and cobalt. Operations confined to annual assessment work.

BILLY SUNDAY MINE**ALASKA**

Property: known also as Smith & McGonnigle, on St. Patrick creek, a tributary of Happy creek, in the Fairbanks district, developed by winzes, crosscuts and drifting, following the main vein for 175'. Operations were continued in 1920. A small producer.

BON ALASKA MINING CO.**ALASKA**

Offices: 35 Wall St., New York, and 620 Alaska Bldg., Seattle, Wash.

Officers and directors: Jeremiah G. Galvin, pres. gen.-mgr.; Justin C. O'Brien, v. p.; Geo. J. Hurst, asst. sec., and Maurice D. Lechey. Thos. M. Bains, Jr., cons. engr.

Inc. July 10, 1916, in Washington. **Cap.** \$1,000,000; \$1 par. Stock listed on N. Y. Curb, Feb., 1920. American Trust Co., N. Y., registrar and transfer agent.

Property: 28 lode mining claims, 5 mill sites, 2 water rights, about 585 acres, in Wrangell district of S. E. Alaska. Ore said to occur in veins from 4 to 12' wide, the mill ore averaging \$20 and direct shipping ore running \$100 per ton, or 30 oz. silver and 50% lead.

Property examined in 1917 by W. J. Elmendorf, Seattle.

BROOKLYN DEVELOPMENT CO.**ALASKA**

Was merged 1920 into Kelly Mines Co., which see.

CACHE CREEK DREDGING CO.**ALASKA**

A subsidiary of Metals Exploration Co.

Offices: 63 Columbia St., Seattle, Wash. and Thos. D. Harris, mgr. Marigold, California.

Officers: Bulke Wells, pres.; A. D. Snodgrass, sec.-treas.

Inc. Feb., 1914, in Washington. **Cap.** \$150,000; \$1 par.

Property: a lease on placer ground of the Cache Creek Mining Co., on Cache Creek, Yentna mining district. A 7' bucket dredge has operated with good results, reported showing as high as 75c. per yard.

CAMERON-JOHNSON GOLD MINING CO.**ALASKA**

Reorganized in 1916 as Valdez Gold Co., which see.

CHICHAGOF MINING CO.**ALASKA**

Chichagof Island, Alaska. Controlled by Hugh C. Wallace and W. R. Rust of Tacoma, Wash. James L. Freeburn, supt.

Property: the Chichagof mine, 60 miles from Sitka, 170 miles from Juneau, shows high-grade, free milling quartz. A new shaft is being sunk 800' N. W. of the main working shaft. Extensions in 1920 were 1,422'.

Equipment: 30-stamp mill with tube mill section, flotation unit, and daily capacity of 110 tons of ore. Company has hydro-electric plant with dam at Rust Lake. In 1920, a new tender was put into commission to handle local transportation and shipments of concentrate to Tacoma smelter. 150 men employed. See U. S. G. S. Bull. 504, p. 22 and 692-B.

The bond and lease on the Apex (Cann) group on Lisianski inlet was relinquished, October, 1921. High-grade surface ore was not found to continue with depth.

In August, 1920, company lost suit brought by John Tuppolo who was awarded a half interest in the property and in all profits made since 1914, when he was committed to an asylum and his claims sold to the defendant company for \$1,000.

CHITINA KUSKULANA COPPER CO.

ALASKA

Louis Kleyle, mgr.

Property: 21 claims, includes War Eagle and Calcite groups, near the North Midas, Kuskulana, Copper River district, about 13 miles from Strelna. Ore carries pyrite and chalcopyrite. The same interests control Mount Wrangell Copper Co.

Development: by 600' Calcite and 100' War Eagle tunnels.

Equipment: power-plant, 125 h. p. boiler, 80 h. p. steam engine, electric generator and air compressor.

CLIFF MINE

ALASKA

Controlled by H. E. Ellis.

Property: the Cliff mine, near Valdez, credited with production of \$1,000,000. Litigation over ownership reported settled in 1920, the mine unwatered and a crosscut driven 119'.

COLUMBIA RED METAL MINING CO.

ALASKA

Office. 1109 First Ave., Seattle, Wash.

Officers: Wm. Uder, pres.-treas.; A. D. Thompson, v. p.; O. Roberts, sec., with W. E. Smith, C. C. Elwood, gen. mgr., C. H. Voll and R. J. McChesney, directors.

Inc. 1917 in Wash. **Cap.** \$3,500,000; \$1 par; divided into 1,500,000 shares common, all issued and paid to owners for property, and 2,000,000 preferred, outstanding 222,650 shares.

Property: 9 claims, on Glacier bay, Prince William sound, 8 miles from tidewater, Valdez district. Management reports a vein averaging 16' in width, showing chalcopyrite, in greenstone, varying from concentrating ore to 24% smelting ore, with some gold and silver.

Development: by tunnels. Reserves are estimated at 50,000 tons.

Equipment: includes sawmill of 12,000' capacity, cable, supplies, cabins, tents and 20-ton tug-boat. A tractor and trailers are required. Operations resumed. July, 1920, with 50 men. See Vol. XIV. for history.

CONSOLIDATED ALASKA CO.

ALASKA

Idle. Is a successor of Alaska Bonanza Mng., Trading and Trans. Co., reorganized 1900. Owned property at Nome, Alaska.

CONSOLIDATED GOLD MINES

ALASKA

Address: Earl B. Gibbs, pres., 601 Savings & Loan Bldg., Spokane, Wash. Frank H. Beyer, v. p.-mgr.; A. H. Featherstone, sec., Wallace, Ida

Property: 66 claims in Willow Creek district. Ore occurs in fissure veins in quartz-diorite, with gold-silver-copper content averaging \$33.90 per ton. Developing in a small way.

CRITES AND FELDMAN GROUP

ALASKA

Property: 10 lode claims and 1 placer claim on Too-Much Gold

creek, a tributary of Fairbanks creek, in the Fairbanks district. under development since 1912.

Development: by 1,300' adit, shallow shafts and open cuts. A small production was made in 1920.

Equipment: includes 5-stamp mill, crusher, 40 h. p. steam boiler engine, compressor.

A small but evidently profitable producer.

CRYSTAL GOLD MINING CO.

ALASKA

Owners, Bernard Heins, and partners, Snettisham, Alaska.

Property: 6 claims near Snettisham, containing gold quartz veins in diorite, course S. E., dip 40°. Ore shoots are 4½' wide, 60-70' long; ore is sulphide averaging about \$8.50 per ton.

Development: by shaft and 400' tunnel; workings total 4,000'.

Equipment: includes 5 stamp mill and 2 Frue vanners.

Plant reported in operation, but no production figures available.

CUBE MINING CO.

ALASKA

Jeff Devinney and M. F. Hendrickson, Valdez, have a bond on the Three-in-One claims, Port Valdez district, one mile W. of Gold Creek. The country rock is schistose graywacke, and argillite, cut by quartz vein running N. 30° W., with dip 50° to 80° W. It averages 2' wide and contains chalcopyrite, sphalerite, galena, and arsenopyrite, with gold values.

Development: by 800' tunnel on vein, 11' wide, with raises, giving depth of over 1,000'.

Equipment: 3 semi-Diesel engines, Hardinge conical mill, amalgamation and concentration plant.

CULROSS ISLAND M. & M. CO.

ALASKA

Reported developing a group of claims near Valdez.

Equipped with Lane mill and concentrator. A 50-ton flotation mill to be added.

CYMRU COPPER CO.

ALASKA

Idle. Fully described in Vol. XIV.

DICKEY COPPER CO., W. A.

ALASKA

Office: 31 Nassau St., New York. **Mine office:** Ellamar, Alaska. W. A. Dickey, pres.-gen. mgr.; care J. A. Whalley & Co., Coleman Bldg., Seattle, Wash. Duncan Edwards, v. p.-treas.; H. C. Bryan, sec.

Cap. \$50,000. Is a close corporation.

Property: 2 miles from tide water at Irish Cove, Prince William sound, is developed by tunnels and over 1,000' of workings. Ore, containing chalcopyrite, is in lenses along shear zones, in greenstone, with gold and silver; lenses of gold ore have been developed to a depth of 300'. Shipping ore said to average 12% copper. Last shipment to Tacoma smelter was made April, 1916. Now idle, awaiting improved shipping conditions.

Company bought the Mason-Glea-on group, on Fidalgo Bay, for \$15,000; shows high-grade ore, but nearest shipping point is Irish Cove, 3 miles distant.

DISCOVERY MINING CO.

ALASKA

Property: 3 placer claims on Wattamus Creek, Goodnews Bay district, operated since 1917. Mining is done by the open cut method. the gold assaying \$16.40 per ounce. Production in 1917 and 1918 was \$35,000. About 10 men employed.

DUNTON GOLD MINING CO.

ALASKA

Property taken over by Kasaan Gold Mng. Co., which see.

EAGLE RIVER MINING CO.

ALASKA

Address: care B. L. Thane, Crocker Bldg., San Francisco, Calif. G. T. Jackson, mgr., Amalga, Alaska.

Property: the Eagle River, a group of gold quartz claims 4 miles from Echo harbor and 25 miles from Juneau, Alaska, has been consoli-

idated with the Yankee Basin adjoining and on the same belt as the Cottrell group. Ore occurs in 8 small shoots in black slate zone, broken by an elaborate faulting system and reported to average \$20 per ton.

Development: by tunnel, 2,000' long, that tapped ore at a depth of 700'. In 1915, 2000' of diamond drilling in 7 holes was done. Property worked since 1903, producing upwards of \$500,000, according to reports. Only annual assessment work has been performed of late due to abnormal conditions.

EBNER GOLD MINES CO.

ALASKA

Capital stock owned by the U. S. Smelting, Refining & Mng. Co., which see. See Alaska-Ebner Gold Mines Co. in Vols. XII and XIII for early history.

ELLAMAR MINING CO.

ALASKA

Office: 211 American Bank Bldg., Seattle, Wash. **Mine address:** L. L. Middlekamp, supt., Ellamar, Prince William sound, Alaska.

Officers. F. M. Jordan, pres.-treas.; C. S. Packer, sec., with W. R. Rust and Chas. de Steigure, directors.

Inc. 1900, in Washington. **Cap.** \$10,000,000; \$100 par. Reorganized in 1916 with \$2,500,000 capitalization; \$5 par. Controlled by F. M. Jordan.

Property: 14 claims, patented, known as the Ellamar mine, at Ellamar, on Virgin Bay, 20 miles S. W. of Valdez.

Ore: occurs in a lens 80x200' and lies wholly within the slate, pinching out 30' below the 500' level. Ore is mainly chalcopyrite associated with pyrite, pyrrhotite, and sphalerite in a gangue of slate, graywacke, and quartz, assaying from 3 to 25% copper, 3 oz. silver, and up to \$50 gold. Mine was the first copper producer in Alaska, beginning shipments in 1901. A cofferdam has been built to permit mining orebody outcropping on the beach, below sea-level, and from 1910 to 1913 mining was confined to that part of orebody between surface and 200' level. Geology fully described, p. 90, U. S. G. S. Bull. 605, 1915. During 1916, the water level had been lowered to the 500' level. Ore is mined by underhand stoping.

Development: by 600' three-compartment vertical shaft, with levels at 100' intervals, and 3 miles of workings, said to block out about 250,000 tons of ore for stoping.

Equipment: includes 300 h. p. steam plant, with 3 boilers, 1,200 cu. ft. compressor, a 12x25" engine, and 60 h. p. hoist. In 1914 a 200-ton per hour aerial tram and new loading dock were completed. The tram conveys ore from mine bunkers a distance of 2,200' across shallow water to the loading dock, having 25' of water at low tide. Buildings include a machine-shop, smithy, laboratory, mess-house, and 12 other buildings.

Costs are said to be about \$3 per ton, for ore loaded on vessels, with about \$3 transportation charges to the Tacoma smelter.

Production:

Year	Tons	Copper, %	Gold, oz.	Silver, oz.
1918.....	27,184	2.03	0.14	0.52
1917.....	54,759	1.74	0.17	0.70
1916.....	46,000	2.83	0.15	0.60
1915.....	36,000	2.18	0.17	0.61
1914.....	31,000
1913.....	25,000
1912.....	22,000	2.50	0.30	0.90
1911.....	16,000	6.00	0.24	0.80

Operations were entirely suspended in 1920.

EL NIDO MINING CO.

ALASKA

Officers: J. H. Cann, pres., Juneau, Alaska; J. R. Cann, v. p.; L. D. White, sec.-treas.; D. J. Williams, supt.

Inc. July 1921.

Property: El Nido group of claims on Lisianski peninsula, adjoining the Apex group of the Chichagof Mining Co.

Development: by opencuts and trenching, exposing the outcrop for 200'; ore is quartz carrying free gold. Work was started early in 1921.

FAIRBANKS GOLD MINING CO. ALASKA

Property: placer ground on Fairbanks creek, Fairbanks district. Company operates 2 dredges of 1000 and 2500 cu. yds. capacity per day. Thirty men employed.

FAIRHAVEN POWER & MINING CO. ALASKA

In Sept. 1919, it was reported that a syndicate had been formed to underwrite 200,000 shares. Company had a placer property in Alaska, but is presumably out of business.

FALCON MINING CO. ALASKA

Address: Maynard Bldg., Seattle, Wash.

Officers: J. A. Liljestrom, pres.-gen. mgr.; M. Sando, v. p.; J. A. Helstrom, treas.; N. E. Gustafson, sec. Elmer Strom, supt.

Inc. In Washington. **Cap.** \$500,000.

Property: 9 claims at Pinta Bay, on Chichagof island.

Development: by crosscut, in 850', July, 1921 and opening several veins from 2-15' in width, containing gold and silver.

Equipment: compressor, drills, 600' incline tram and wharf, bunk and boarding house. About 14 men employed.

FERN GOLD MINING CO. ALASKA

Address: Jerome L. Drumheller, Columbia Bldg., Spokane, Wash.

Property: on Archangel creek, Willow creek district, adjoining the holdings of the Consolidated Gold Mines. A crosscut tunnel was driven in 1920.

FIDALGO-ALASKA COPPER CO. ALASKA

Thos. Donahue, pres.; L. A. Levensaler, mgr., Hoge Bldg., Seattle, Wash. E. D. Reiter, supt.

Property: 24 claims, about 15 miles from Ellamar and one-half mile east of Irish cove, on the southern side of Fidalgo bay, an inlet of Prince William sound.

Development: by 650' main tunnel following a well-defined fracture zone in slate, carrying 2 lenticular ore-shoots, said to be 5x50' in cross-section, cut at 200' and 300' from portal, with many small stringers. Report good ore outcrops about 300' W. of the old workings.

Ore: mainly chalcopryrite, said to give average assays of about 10% copper, occurring as cementing material of fractures, irregular stringers, disseminated grains and as lenticular replacements of country rock, the fracture zones being very erratic in size and extent.

Equipment: includes 1,000' aerial tram, ore bins and wharf, besides several mine buildings and a 36" Pelton wheel operating under 400' head, driving single-stage air-compressor. Company employed 6 men and did 284' of development work in 1920.

Geology described on page 118, U. S. G. S. Bull. 605.

FISH CREEK MINING CO. ALASKA

Office: 558 Empire Bldg., Seattle, Wash. Mines at Hyder, Alaska, Harry Tanner, supt.

Directors. W. R. Tonkin, pres., Seattle; W. J. Palmer, v. p.-treas.; Maurice McMicken, sec.

Inc. 1918, in Washington. **Cap.** \$600,000; par 25c; 290 shares in treasury. Security Transfer & Registrar Co., N. Y., transfer agent.

Property: 17 claims with two mill-sites on Salmon river, about 7½ miles from tidewater, on same mineralized zone 1½ miles south of the Premier mine, and on U. S. side of the International boundary.

Ore: contains silver sulphides accompanied by a little galena and chalcopryrite, occurring in 4 well-defined veins.

Development: by several tunnels aggregating 1,000' with greatest

depth of 250'. Principal work is on the Olympia Extension, exposing a body of silver-lead ore, 3' wide and 600' long.

Production: several small shipments of ore, mined in development work, sent to Tacoma smelter, varied from 78 oz. silver per ton, with 10% lead, \$10 gold and 1½% copper, up to 200 oz. silver, \$20 gold, 16% lead and 2½% copper.

Is a promising prospect.

FLUME GOLD DREDGING CO.

ALASKA

Address: 1090 Mills Bldg., San Francisco, Calif.

Inc. 1912, in Calif. **Cap.** \$30,000; \$100 par; all issued. **Dividends:** total to end of 1920, \$67,500.

Company operates a gold dredge on Melsing creek, Council district, Seward Peninsula.

FORTY MILE POWER AND DREDGING CO.

ALASKA

Office: Chas. L. Peabody, v. p., 10 Wall Street, New York City.

Officers: John H. Stedman, pres.; Chas. L. Peabody, v. p.; E. R. Hollenbeck, sec.-treas. Satterlee, Canfield & Stone, 29 William St., attorneys. Walter G. Clark, 149 Broadway, cons. engineer. R. E. Jordan, gen. mgr.

Inc. 1918 in Del. **Cap.** \$5,000,000; \$1 par; about 3,500,000 issued.

Property: gold placer ground reported to extend for 119 miles on Forty Mile river in Alaska and Yukon Territory, from which \$152,000 was recovered in 149 days by dredging. Also, company is stated to have sunk 5,000 test pits, proving a block of 1,500,000 cu. yds. averaging 60c. with other extensive areas of pay gravel. Both dredging and hydrauliclicking used.

FREE GOLD PIGOT BAY MINING CO.

ALASKA

Address: W. R. Millard or C. B. Smith, Valdez, Alaska.

Inc. Aug., 1919. **Cap.** \$350,000. \$1 par.

Property. on Pigot bay, Prince William sound.

GALENA BAY MINING CO.

ALASKA

Idle. Offices: Albert Barge, 540 Orchestra Bldg., Chicago, Ill., and L. C. Smith Bldg., Seattle, Wash.

Officers: J. B. Carter, pres.; Albert Barge, sec; J. S. Jurey, asst. sec.; L. J. Rusk, treas., Chas. Simenstad, supt.

Trustees: J. B. Carter, Arthur W. Cutien, E. C. Badenoch, R. E. Tearse, B. G. Proctor, L. J. Rusk, C. A. Hayes and John S. Jurey.

Inc. 1906, in Washington. **Cap.** \$500,000; \$1 par; 486,001 outstanding. Annual meeting, second Tuesday in October.

Property: acquired in 1907, on Galena Bay, about 30 miles from Valdez, and includes the Sunnyside, Copper Crown, Starvation, Sheep Run, Vesuvius, and 15 other claims, all patented.

Development: by 2,200' adit on the Starvation, 400' on the Sunnyside, with only surface work and diamond drilling on the Copper Crown and Sheep Run claims. Ore occurs in lenses 4-5' long and up to 14" in width, and contains chalcopryrite, pyrrhotite, quartz and calcite. On the Copper Crown a 4' vein of solid sulphide ore was opened up in a N. E. shear zone, assaying \$3-\$4 gold per ton. Geology fully described, p. 100, U. S. G. S. Bulletin 605. Only assessment work done in recent years.

GOLD BULLION MINING CO.

ALASKA

Fully described in Vol. XIV. Property owned by Willow Creek Mines, which see.

GOLD CORD MINING CO.

ALASKA

Address: 602 S. Kingsley Drive, Los Angeles, Calif., and Willow Creek, Alaska.

Control held by Frank Bartholf, of Billings, Mont., John Smith, pres., Los Angeles, Calif., and J. B. Swan, of Henrietta, Okla. William Martin of Anchorage, was operating under a lease.

Ore: gold values in vein said to be 10' to 14' wide. Mill test on 40

tons reported to have yielded \$70.46 per ton and tailings assaying \$12 were reduced to 80 cents in the cyanide plant. No recent information.

GOLD KING MINING CO.**ALASKA**

Probably dead. Described, Vol. XII.

GRANITE GOLD MINING CO.**ALASKA**

Valdez, Alaska. **Officers:** B. F. Millard, pres.-treas.; W. R. Millard, 1st v. p.; O. S. Larsen, 2nd v. p.; Miss Shanstrom, sec., with Jafet Lindeberg, directors.

Inc. 1913, in Alaska. **Cap.** \$500,000; \$1 par; outstanding, 430,000 shares. Annual meeting, first Tuesday in October. **Transfer office:** Alaska Bldg., Seattle, Wash.

Company claims to have spent \$330,000 to March, 1916, on the property, and to have had a total production of \$277,000. Surplus March 1, 1916, \$21,000. Initial dividend, 2 cts. per share, paid April 10, 1916, and 2 cts. paid in May.

Property. 3 claims, 60 acres, on W. side of Port Wells, on the coast between Hobo Bay and Harrison Lagoon. Two veins course N. 60° W., dip 58° N. Country rock consists of interbedded slates, graywackes and argillites cut by large masses of granite. Present development is said to show a third vein on the 210' level. Metallic ore minerals are gold, and the sulphides of iron, zinc, lead and antimony. Ore said to run from \$6 to \$50 with average of \$12 per ton. See U. S. G. S. Bull. 622, pp. 136-138.

Development: 200' incline shaft and tunnels, with 4 levels opened up from 300' to 700' in length. Total workings, over 5,000', all connected with 800' tunnel at mill level.

Equipment: former machinery sold with exception of 10-stamp Hendy mill, crushers and concentrators, as company plans installing 160 h. p. hydro-electric plant to furnish power.

Production: 1916, averaged 60 to 70 tons per day, yielding about \$20,000 gross per month.

In 1917, the mine and mill were closed down on account high cost of material; intend to resume when costs become lower.

GREAT BRITAIN GROUP**ALASKA**

Owned by a Vancouver and Victoria syndicate. **Property:** at Whalebone cove, on the western shore of South Valdez island, comprises 4 claims, showing bornite, tetrahedrite and chalcocite ore, occurring in the contact between limestone and altered lime.

Development: by 3 tunnels, showing 4 to 12% copper ore. Ore blocked out estimated at 1,800 tons by F. J. Crossland. Shipments of 700 to 800 tons have been made to the Tacoma smelter, said to average 3% copper. A 500-ton bunker was erected on the beach for loading shipments on vessels. No recent information. Probably idle.

GREAT NORTHERN DEVELOPMENT CO.**ALASKA**

Mine and works office: Phillips, Alaska.

Officers: Jas. Phillips, Jr., pres.; E. F. Gray, v. p.; Walter M. Briggs, sec.-treas.; Edwin F. Gray, gen. mgr., with J. C. Fairchild, H. F. Knoblauch and H. I. Gaskill, directors.

Inc. 1906, in Maine. **Cap.** \$1,000,000; \$10 par; issued, 70,100. Is a holding company. Annual meeting, first Tuesday in November. Petley, Morse & Co., auditors, 43 Exchange Place, New York.

Property: a solid tract of about 165 claims, 3,000 acres, in process of patenting, on the south bank of the Kotsina river, below the mouth of Roaring creek, near the Copper River railroad, and about 60 miles from the Bonanza mine of the Kennecott Co. Ore is greenstone containing chalcocopyrite in small amount. Also controls the Regal Mines Co., which see.

Development: work totals 8,000', and is said to have opened up a large tonnage of low grade ore. Only assessment work done pending an improvement of the metal market.

HELM BAY MINING CO.**ALASKA**

Property: a group of claims, including the old Gold Standard mine, on Helm bay, S. shore of Cleveland peninsula, in Ketchikan district, covers a shear zone in greenstone schists showing quartz veinlets carrying gold and some pyrite. The ore is said to average \$6 gold per ton. Surface openings expose the mineralized zone 10 to 50' wide, for several thousand feet; a tunnel was being driven late in 1920.

HEMPLE COPPER MINING CO.**ALASKA**

Valdez, Alaska. **Mine office:** Landlock, Alaska. **Officers:** S. A. Hemple, pres., and gen. mgr.; S. I. Hemple, sec., with Arthur Lang and I. J. Devenney, directors.

Inc. March, 1910, in Alaska. **Cap.** \$1,000,000; \$1 par.

Property: 6 claims, 4 patented, 120 acres, with a 2-acre mill site, all timbered, near the Standard and Three Man mines, at Landlock bay. Shows greenstone, slate and quartzite, carrying 3 veins with 5 or 6 shoots, said to be 24' wide in places and traceable for 3,000', carrying chalcopyrite, giving average assay of 3 to 6% copper. Mine is opened by tunnels of 50', 300', 575' and 800', with about 3,000' of workings, to a depth of 1,000'. On 350' level, vein shows width of 24' in 3 crosscuts. Reserves estimated at 150,000 tons; concentrating ore running 2-4% copper, 40c silver and 80c gold. Equipped with gasoline engine and 6 buildings.

HIRST-CHICHAGOF MINING CO.**ALASKA**

Address: W. A. Castleton, 316 First Ave. S., Seattle, Wash. **Mine address:** Juneau, Alaska. Earl Thompson, supt.

Officers: W. A. Castleton, pres.; C. W. Fries, v. p.

Property: at Hirst cove, Chichagof island, Sitka district, developed by 3 tunnels, and total workings of 1,100'.

A 10-stamp mill being installed; 15 men employed, June, 1921.

HOUGHTON-ALASKA EXPLORATION CO.**ALASKA**

Company dissolved and property sold. Fully described in Vol. XII.

HUBBARD-ELLIOTT COPPER CO.**ALASKA**

Offices: 738 Singer Bldg., New York; 35 N. Dearborn St., Chicago; 657 New York Blk., Seattle, Wash.; Elliott Creek, Chitina district, Alaska.

Officers: R. Reichardt, pres.; J. F. Wessels, v. p.; A. J. Elliott, sec. & treas; Louis G. Hinckel, gen. supt.

Inc. Jan., 1911, in Washington. **Cap.** \$3,500,000; \$1 par; 1,500,000 shares issued in exchange, share for share, for stock in the old Hubbard-Elliott Copper Mines Development Co. of Alaska; 2,000,000 shares treasury stock. A one-fourth interest in the Hubbard-Elliott is owned by the **Alaska Copper Corp.** A stockholders' meeting held at Seattle on Nov. 19, 1920, ratified an agreement with the "Hubbard Elliott Development Syndicate." This syndicate has a capital of \$500,000 in 5 series of shares at \$100,000 par for each, to exploit and develop the property. When operations reach the productive stage, the Syndicate will either continue or will organize a new company to be called the Elliott Creek Copper Co., in Delaware, with a capital of not less than \$8,500,000, nor more than \$10,000,000.

Property: 35 patented claims, 5 mill sites with U. S. government titles and 84 unpatented claims, over 2,500 acres, covering 6 miles in Elliott Creek valley. Elliott creek is an affluent of the Kotsina river, about 15 miles above junction of the Kotsina with the Copper river. The U. G. I. group of 8 claims has been acquired by the Development Syndicate.

Geology: Copper ore occurs in fissure veins and associated replacement orebodies in greenstone, with limestone beds above it. The prominent outcrops are practically all on the north side of Elliott creek, near the contact, which runs N. 75° W. and dips 80° N. All outcrops are in the greenstone underlying the limestone beds except on the Leland and Lawton claims, which are in a well-defined porphyry dike. Above the limestone is found a heavy capping of conglomerates.

The principal ore minerals are bornite, glance and chalcopyrite. The total

absence of surface oxidation due to glacial action is notable, and sulphides occur in a calcite matrix in the veins and with a greenstone matrix.

Development: by tunnels.

Complete new equipment being installed.

INDEPENDENCE GOLD MINING CO.

ALASKA

Formerly Alaska Gold Quartz Mng. Co.

Described in Vol. XIV. Absorbed, 1920, by **Kelly Mines Co.**, which see.

INDEPENDENT GOLD MINING CORP.

ALASKA

Address: F. Ketchmark, pres.; Windham, Alaska.

Property: at head of Windham Bay, Juneau district, developed by 150' tunnel in a belt of silicified schist, 10' wide and containing sulphides of iron, gold and galena. Developing at last account.

JOSEVIG-KENNECOTT COPPER CO.

ALASKA

Address: W. H. Seagrave, mgr., L. C. Smith Bldg., Seattle, Wash.

Officers: D. K. McDonald, pres.; J. B. MacDougall, v. p., with M. E. Hay, W. L. Gazzam and J. W. Roberts, directors.

Inc. in Washington. **Cap.** \$2,500,000; \$1 par.

Property: 19 lode claims, 1 placer claim, 7 miles from Kennecott, Alaska. Glowing reports were made regarding this property by the promoters, when appear to have misrepresented the facts. One statement claimed that the mine was superior to the Kennecott Copper Corporation. More conservative estimates made by the consulting engineer give a very small tonnage of ore, averaging about 3¼% copper. Due to location, transportation difficulties, small amount and grade of ore, etc., the future of this property is very uncertain. No work being done now on account of litigation and internal dissension between the promoters and the board of directors. Investors brought suit against the promoters for misrepresentation, and in April, 1918, were offered a settlement of 37½ cents a share for stock sold by subscription between Nov. 26 and Dec. 13, 1916. Stricken from New York Curb May, 1918. On October 3, 1919, G. F. Rowe, D. McDonald, G. E. Snyder, W. B. Hancock, J. P. Gearon and Christian Josevig, all of Seattle, were indicted by the Federal Grand Jury on charges of having used the mails to defraud and of conspiracy. These men were alleged to have sold worthless shares, receiving \$400,000 therefor.

JUALIN ALASKA MINES CO.

ALASKA

Company is a subsidiary of the **Algunican Development Co.** Jean Vanophem, pres., 16 Rue de Turin, Brussels, Belgium.

Property: 30 claims, on the north shore of Berners bay, in the Juneau region, developed by 360' main shaft, crosscuts and drifts. A drainage-tunnel to be 7,800' long has been driven 2,500'. Ore reported to be 80% free milling.

Equipment: includes 5½-mile tram, connecting the mine with the wharf, 450-h. p. compressor and hydro-electric plant and 4 semi-Diesel engines of 150-h. p. each.

Production: under former owners said to total 50,000 tons of \$11.20 per ton gold ore. Property was closed in Aug., 1914, but reopened in May, 1915. To May, 1917, the output was 22,366 tons of \$11.10 ore. Reported production in 1918 of \$200,000 from ore extracted in driving the tunnel and treated in the 10-stamp mill.

Operated from Jan., 1919, to April, 1920, when the mill was destroyed by fire, and company forced to close down the mine, owing to adverse mining conditions and prohibitive rate of foreign exchange.

The Algunican Development is now busy developing claims in the Salmon River district of British Columbia.

KASAAAN GOLD MINING CO.

ALASKA

Took over, in 1920, holdings of **Dunton G. M. Co.**

Property: the Harris creek (Dunton) mine, 2 claims, on Harris creek, 2 miles from Hollis P. O., on Prince of Wales island. Ore occurs in quartz

veins in graphite slate, containing auriferous pyrite, gold and a small amount of galena.

Development: by 364' adit and four drifts, the deepest at 250'.

Equipment: includes 5-stamp mill of 20-ton daily capacity. Both mill and mine plant were overhauled in 1920.

KELLY MINES CO.

ALASKA

Address: 1213 L. C. Smith Bldg., Seattle, Wash. **Mine Address:** Milo Kelly, mgr., Anchorage, Alaska.

Officers: Milo Kelly, pres.; C. L. Harrison, v. p.; R. E. Tobin, Jr., sec-treas., with H. E. Turner, H. W. Kent, Leo J. Bradner, and Walter Nossaman, directors.

Inc. April 27, 1921, in Washington. **Cap.** \$1,700,000; \$1 par; 700,000 treasury shares. Company is a consolidation of the Independence Gold Mng. Co., Brooklyn Dev. Co. and Alaska Free Gold Mng. Co.

Property: 33 claims and 2 mill sites, surveyed for patent, on Fishhook creek, Willow Creek district, at head of Cook inlet. Gold-silver ore occurs in fissures in granodiorite. Two orebodies have been opened on 2 different principal veins, one ore shoot being 500' in length.

Development: by numerous tunnels, the longest 500'; greatest depth of workings, 450'. Season is short, 100 to 150 days, and development apparently keeps pace only with production.

Equipment: includes 5 aerial tramways, water power, 2 Lane mills, cyanide plant, compressor, 16-h.p. gas engine, etc.

Production: to Oct., 1921, \$750,000, with an average value of \$30 per ton of ore.

KENAI-ALASKA GOLD CO.

ALASKA

Jas. Hayden, mgr., Seward, Alaska. **Property:** on Great Falls lake, adjoining the Skeen-Lechner, shows a 2' vein, cut on the 260' level, which is said to carry ore mining better than \$25 per ton.

Developed: by 1,700' of tunnels and stopes.

Equipment: includes 5-stamp mill, and 8,000' aerial tram connecting mine and mill.

KENNECOTT COPPER CORPORATION

ALASKA

Office: 120 Broadway, New York.

Officers: W. C. Potter, chairman; Stephen Birch, pres.; W. P. Hamilton, v. p.; C. T. Ulrich, sec., with S. J. Clarke, H. O. Havemeyer, Seward Prosser, E. A. and H. F. Guggenheim, directors; E. T. Stannard, v. p.-gen. mgr.; E. S. Pegram, treas.; J. N. Steele, gen. counsel; E. R. Reets, purch. agent; J. C. Lane, met. supt.

Inc. April 29, 1915, in New York. **Cap.** \$6,000,000; increased May, 1915, to \$15,000,000, in 3,000,000 shares of no par value; 2,787,081 outstanding Jan. 1, 1921. There were 20,000 shareholders early in 1920.

Range of shares during 1920 was \$33½ high and \$15¼ low. A total of 839,200 shares changed hands; in 1921 to June, range was \$22½ to \$16.

Bonds: authorized (June 1, 1915), \$10,000,000 6 per cent, 10-year convertible sinking fund gold bonds. In April, 1917, all outstanding bonds of this issue had been converted into stock.

On Mar. 21, 1917, company issued \$16,000,000 of two-year, 6% notes, to finance purchase of more Utah Copper shares. Of this amount, \$7,150,000 had been retired by Dec. 31, 1917, and \$12,000,000 a year later, leaving \$4,000,000 outstanding.

On Mar. 1, 1919, a new issue of \$12,000,000 one-year 6½% notes was authorized, in order to finance further development, to enable the company to carry its accumulation of copper, over 50,000,000 lb. at that date, and to retire the \$4,000,000 notes due.

On February 1, 1920, company sold \$15,000,000 of 7%, 10-year, convertible notes, secured by 500,000 shares of Utah Copper Co., to retire \$12,000,000 note issue and to provide additional working capital.

D. A. Crockett, 149 Broadway, transfer agent; Bankers' Trust Co., New

York, registrar. Annual meeting first Tuesday in May. Stock listed on New York Stock Exchange.

Company controls the **Braden Copper Mines Co.**, of Chile, through ownership of 99% of its capital stock. It has also a 38% interest in the Utah Copper, and through its subsidiary, Alaska Dev. & Mineral Co. has control of the Bering River Coal Co.

In 1918,, Kennecott secured control of the **Mother Lode Coalition Mines Co.**, whose property adjoins it.

*Adjusted.

Dividends: initial on Mar. 31, 1916; \$5.50 in 1916; \$5.70 in 1917; \$4 in 1918; \$2 in 1919; \$2 in 1920; none in 1921. The grand total is \$53,502,152.

Property: Alaskan holdings include the Kennecott and Beatson mines; also 17 patented claims, 216 acres, at Latouche, and 11 lode claims bought in 1916. During 1918 39 new claims were located. Two placer claims were added in 1919 and 58 lode claims were located during 1920.

The **Kennecott group**, 3 miles from Kennecott, on the C. R. & N. W. R. R., includes the Bonanza and Jumbo mines, with 23 additional patented lode claims and 14 patented placer mines, 2,314 acres.

The **Bonanza mine** had one of the most remarkable ore bodies ever found by a prospector. A great mass of high-grade ore, much of which carried over 60% copper, outcropped on the crest of precipitous mountain overlooking the Kennecott river, a tributary of the Chitina, which flows into Copper river.

There were no large masses of oxides or carbonates present, as glaciation and active erosion prevented the formation of an oxidized capping. The ore outcrops were massive chalcocite averaging about 50% copper and 0.2 oz. silver to each per cent. copper.

Geology: the claims show Nicholai greenstone, consisting of a number of basaltic flows of lava, a hard close grained rock considerably altered and in places amygdaloidal, overlaid by massive beds of Chitistone limestone of Triassic age, with bedding planes parallel to the flow planes of the lava, the limestone being of a bluish color, weathered to gray at the surface. There also are diabase and andesite intrusions and dikes.

Ore occurs in irregular replacement masses more or less parallel to vertical planes of a fault zone, ore following to some extent, minor fault planes, as well as the bedding planes of the limestone making stockworks and irregular masses in the crushed limestone. The outcrop is 20 to 40' wide, and over 400' in length, the southern half showing 2 nearly parallel bands of chalcocite, 4 to 10' in width, separated by about 10' of limestone. At the northern end of the outcrop the chalcocite bands give place to stringers and interlacing seams of ore which thin out northward and fade into barren limestone.

In addition to the Bonanza outcrop there was a large amount of ore in the talus, or slide rock, broken off from the outcrop. This mass of broken ore and rock was about 300' wide, extending for about 500' or more down the slope from the outcrop, varying from 3 to 20' in depth. A number of test-pits, sunk to the outcrop, showed an average of 4' depth, with an average assay of 13% copper, this including both boulders of chalcocite up to 200 lbs. in weight and barren limestone. Ore is extracted from the slide by a system of cuts. Two grades of ore were mined, with 70% and 15% copper, respectively.

Further notes on the geology, ore, and mining were published in "Min. and Sci. Press," June 8, 1918, and Jan. 11, 1919. Also 80 pages in 'Economic Geology' for Jan.-Feb., 1920, the results of 5 years of field and laboratory study.

Development: by tunnels and inclines. At the Bonanza, the 2-compartment incline is down 1,150', and that at the Jumbo is 1,100' deep. These two mines are connected by a 4500' crosscut, completed during 1919.

Underground openings at all the company's mines during 1916 were extended 15,340'; 10,770' at Kennecott in 1917; 11,790' in 1918; 12,889' in 1919, plus 4,199' of drilling; 13,630' in 1920, plus 14,396' of drilling.

The most important recent developments include the discovery of ore-bodies on the 600-ft. level of the Bonanza mine, and on the 900-ft. level of the Jumbo mine, both about 400 ft. northwest of the main fissuring. Ore-bodies on the 500' level are larger and higher grade than on the upper levels.

The Bonanza mine is connected with the mill at the lower camp by a Bleichert aerial tram, in 2 sections, the upper of 7,000' and the lower of 8,000' with a drop of 4,000'. The tram line has 40 towers, longest span 1,500', with

ore bins at both terminals, and has an estimated daily capacity of 600 tons. A 5,500'-ft. aerial tram has been erected to connect the Jumbo mine with the Glacier mine, so that ore from the latter will be available for the mill. The upper terminal is now in solid rock, and the skips are filled direct from the top of the Jumbo incline, thus affecting a considerable saving. At the lower camp are the mine buildings, power plant and mill.

Equipment: includes steam plant, hoists, air compressors, etc. Buildings include a bunk house, mess-house, assay office and 10,000' sawmill.

The 700-ton concentrator is equipped with Blake and Symons crushers, Hancock iigs, bull iigs, rolls, Wilfley and Deister tables, and 600-ton ammonia leaching plant. (Described by L. Eddy in "Eng. & Min. Journ.," June 28, 1919.)

Guggenheim interests constructed the Copper River & Northwestern railway, at a cost of about \$20,000,000, this line of 195 miles length starting at Cordova, on the sea, and ending at the lower camp. Results have been as follows:

Year	Revenue	Profit
1920.....	\$1,765,140	\$ 534,973*
1919.....	1,145,662	177,896
1918.....	1,846,585	581,329
1917.....	2,496,670	1,210,304
1916.....	2,911,207	1,768,671

* Loss.

The Alaska Steamship Co. is also controlled by Kennecott. It carries ore to the smelter at Tacoma and returns with supplies for the mines. Recent results are as under:

Year	Revenue	Profit	Dividends	Year's Surplus
1920.....	\$4,587,461	\$339,884	\$270,000	\$169,884
1919.....	4,791,231	957,379	270,000	687,379
1918.....	3,733,938	429,190	450,000	176,530
1917.....	4,018,667	979,524	360,000	513,239
1916.....	3,816,087	1,366,666	1,740,000	130,216

The **Beatson** mine comprises 17 patented claims, 268 acres, about 3 miles from the northern end of Latouche island, within one-half mile of tide-water, where there is a good natural harbor. Mine was located, July 4, 1897, by the late Andrew K. Beatson, and began shipping, 1903. Country rock is slate; ore is chalcopryrite, pyrite and pyrrhotite, occurring in brecciated portions of the country rock. The orebody is a large lens; total length developed is about 800' with an average width of 100'. Ore assays up to 30% and as shipped returns 7.23% copper and 2 oz. silver per ton.

Development: includes over 34,000' of underground workings, in addition to diamond drilling. New work in 1919 covered 5,268' and in 1920, 8,652' plus 4,846' of drilling. The ore is mined in an open pit and dropped through to the main tunnel level. Mine and mill are connected by an aerial tram. A 700-ton concentrator, employing oil flotation and completed Feb., 1915, was enlarged in 1918 to treat 1,500 tons a day. Buildings include rooming, mess and change houses, office, store and a hospital.

Situation, geology, ore, mining and milling methods and leaching of copper tailings with ammonia, were briefly described by H. M. Lawrence in the "Eng. & Mng. Journal," Nov. 3, 1917. A 300-ton plant was erected 1917, and one of 800-ton capacity is under construction. Four 30' diam. leaching tanks with dome tops, hold 500 tons of tailing per charge in a depth of 15'.

The following figures show past production, costs and profits of the two Alaska companies prior to their acquisition by the Kennecott Corporation:

Kennecott Mines Co.:

*Includes 7,893 high grade yielding 4,685 tons of copper. **Mill treated 67,567 tons from Mother Lode Coalition additional.

Rich ore and concentrates are sent to Tacoma, Wash., for reduction and refining. Copper is sold through the new agency of Guggenheim Bros.

In 8 months of 1921, copper production was 44,956,000 lb., or 40% less than for same period in 1920.

Copper production was at its highest by mid-1916, when the yield was 10,750,000 lb. in July. From then on, there was a steady drop to 5,500,000 in Sept., 1918. After that, the published output includes Braden with Kennecott, thus concealing individual outputs. Despite the depletion of its very rich ores, Kennecott has a profitable future in the treatment of low grades ores. (The Braden and Mother Lode Coalition companies are described under their respective titles.)

KENSINGTON MINING CO.**ALASKA**

Address: Juneau, Alaska.

The Kensington has been idle for many years.

KNIGHTS ISLAND ALASKA COPPER CO.**ALASKA**

Address: J. J. Dieringer, Valdez, Alaska.

Property: on eastern arm of Drier bay, Knights island district.

Geology: a shear zone, 20' to 50' wide, crossing greenstone with a strike N. 15° E., shows slight mineralization with chalcopyrite, sphalerite and pyrrhotite for several hundred feet.

Development: by a 650' crosscut tunnel with three short drifts and some shallow surface pits.

KUSKOKWIM DREDGING CO.**ALASKA**

Address: McGrath, Alaska.

Operates a dredge on Candle creek, in the McKinley district, Kuskokwim region. In 5 months of 1920, 74,597 cu. yds. of gravel were handled by a force of 22 men.

LADYSMITH SMELTING CORP., LTD**ALASKA**

Address: S. De Witt, sec.-treas., 600 Leary Bldg., Seattle, Wash., and Latouche, Alaska.

Property: an operating lease on the holdings of the Latouche Copper Mng. Co., which see.

LAKINA KENNECOTT MINING CO.**ALASKA**

(Formerly the Lakina Copper Co.)

Address: E. A. Patrick, v. p., Rookery Bldg., Spokane, Wash.

Directors: E. A. Patrick, J. J. Kinnan, E. J. Hurley, E. E. Younge, T. A. Brady, V. C. Hill, J. S. Ross, and T. E. Coleman.

Cap. \$2,000,000; \$1 par; 770,000 outstanding; 750,000 owned by Lakina Copper Co. of Idaho.

Property: 30 claims and a mill site on headwaters of Lakina river, Chitina district. S. E. Alaska. about 12 miles from the holdings of the Kennecott Copper Corporation.

Geology: a well-defined shear-zone in greenstone, running N. 10° W. dip 70° W. has evidences of leaching and is traceable up the mountain for a distance of over 1,000' vertically. The ore is bornite, although chalcocite occurs along fracture planes with a calcite gangue. Some native copper is also found. See U. S. G. S. Bull, 662, page 161.

Development: by 235' tunnel driven near the mouth of Mill creek, elev. 2,100', and by numerous open-cuts.

LAKINAW TAGISH AND MOIRA MINES CO.**ALASKA**

No recent returns.

Mail returned from Carcross, Y. T. and Cymru mine, Moira Sound, via Ketchikan, Alaska. Had bond on Cymru mine, the Portland (or Westlake King) group and the Yukon properties, formerly held and operated by the Conrad Consolidated Mines, now dead.

LANDLOCK BAY COPPER MINING CO.**ALASKA**

Out of business. Fully described in Vol. XIV and U. S. G. S. Bull. 605, p. 97.

LATOUCHE COPPER MINING CO.**ALASKA**

Office: 600 Leary Bldg., Seattle, Wash.

Mine office: Latouche, Latouche Island, Alaska.; W. J. Rattle, gen. mgr.

Property: 7 claims, includes the Girdwood mine, adjoining Beatson-Bonanza mine of the Kennecott Copper Co., at the northern end of Latouche Island. The vein has been traced about 750', by trenches and pits, and is developed by a 750' tunnel, showing chalcopyrite, associated with pyrite and pyrrhotite, having small gold and silver values. There is an 1,175' ground tram to a shipping wharf.

Shipment of 300 tons of sorted ore reported made to the Tacoma smelter in 1917, and 600 tons of 6% copper ore shipped in 1919. Property under development by the **Ladysmith Smelting Corp.**

LATOUCHE ISLAND COPPER MINING CO. LTD. ALASKA

Office: 330 Burke Bldg., Seattle, Wash. Mine office: Latouche, Latouche Island, Alaska.

Officers: Jas. A. Murphy, pres.; L. G. Wheeler, v. p.; A. E. Fraser, 2nd v. p.; C. P. McCormick, sec.; A. L. Cohen, treas.; with Tenning Carlson and H. J. Jacobs, directors.

Inc. in Washington. Cap. \$5,000,000; \$5 par.

Property: 42 claims, with about 4 miles of tidewater frontage, on the N. E. shore of Latouche Island, 60 miles S. of Valdez. The mine has 3 practically parallel N.-S. shear-zone veins in graywacke of 5 to 15' estimated average width, with dip of 65°, proven by trenches for about 3 miles.

Ore carries bornite and chalcopyrite, with quartz gangue, averaging about 4% copper, with some gold-silver values. It closely resembles that of the Beatson mine, and is said to be amenable to flotation.

Development: by shallow shaft and 4 short tunnels.

Equipment: includes small hydro-electric plant with water wheel and an air compressor.

Little progress has been made during the past few years, but considerable development is planned.

LONDON AND CAPE CO. ALASKA

Property: 14 patented claims near Trail creek, Chitina district, S. E. Alaska. Copper stains found along fracture planes in quartz diorite in 245' tunnel. Property reported idle for several years.

LOST RIVER TIN MNG. CO ALASKA

Property: 100 miles from Nome, in York district, Seward peninsula, has been under development since 1903.

Development: by 300' shaft.

Equipment: includes compressors, drills, hoists. A mill is planned.

LUCKY STRIKE MINE ALASKA

John Hirshey, owner, Hope, Alaska.

Property: on Palmer creek, Kenai peninsula.

Ore: free gold occurs in quartz fissure vein, averaging \$75 per ton. Amalgamation recovers 60%.

Development: by 400' of tunneling. A 150' adit was driven in 4 months of 1920.

A 400-lb. prospectors' stamp-mill is used.

MABEL MINING, MILLING & POWER CO. ALASKA

Address: Anchorage, Alaska.

Officers: W. E. Bartholf, pres.; F. Laubner, v. p.; T. Caveny, sec.-treas.; with J. H. Bartholf, F. McCoy and W. Martin, directors.

Inc. Nov. 1, 1915, in Alaska. Cap. \$100,000; shares \$1 par.

Property: 11 claims in Willow Creek district, said to show a quartz vein in diorite, dipping 42° S. W., with N. W.-S. E. course. Orebody varies from 1" to 7' in width, and yields over \$50 gold per ton.

Development: by tunnels. During 1920, about 1,000' of new work was done, and production reported.

Equipment: includes 3,500' aerial tram, 1 mile of ditch, 10-stamp mill, crusher, and water power.

Production: \$12,000 in 1916, and \$10,000 from May 28 to June 26, 1917. Seasons are short, with probably not over 120 days available for surface work.

MAYFLOWER MINE ALASKA

Address: G. F. Johnson and J. McConnell, Strelna, Alaska.

Property: 3 claims, 60 acres, 2½ miles above foot of Kuskulana glacier and 18 miles by wagon-road from Strelna on Copper River railroad, shows a quartz vein in greenstone, cut by a prominent fault. Main copper exposure is 1,000' above the glacier, on east side of a deep gulch. Copper minerals are bornite and glance.

Development: by 75' tunnel, opening 100 tons of 30% copper and 18 oz. silver ore. A prospect. See U. S. G. S. Bull. 662, p. 159.

McKINLEY GOLD PLACERS, INC.**ALASKA****Address:** Prudential Bldg., Newark, N. J.

Company is a consolidation of the McKinley Placers, Valdez Creek Placer Mines, Oregon Susitna Mining companies, and other holdings near Mt. McKinley, 100 miles S. W. of Fairbanks.

Officers: P. H. Woodward, pres.; Louis C. Hay, v. p.; Geo. Flatow, sec.; Leo Flatow, treas.; with Wm. M. Brown, Glenn G. Congdon, Geo. C. Hollister, Eugene Mackey, Geo. A. Mahoney and Geo. W. Sias, directors. Geo. J. Strachan, mgr.

Inc. 1920, in Delaware. **Cap.** \$11,500,000; \$5 par; in 1,999,000 common, 116,000 8% 1st pfd., and 185,000 8% 2nd pfd. shares. Guaranty Trust Co., transfer agent; Equitable Trust Co., registrar; both of New York. \$2,000,000 common stock offered at par in 1920 to secure funds for retirement of preferred stock.

Property: 145 claims and water rights in Valley Creek district, covering about 3,000 acres of placer ground. Examined by Forbes Rickard who reports 45,000,000 yds. of gravel available for hydraulicking with a possible gold extraction of \$25,000,000. The plant, in operation, July, 1920, has a capacity of 15,000 yds. of gravel per day. Estimated operating cost placed at 5c. per yard. For geology of the district see U. S. G. S. Bull. 480, p. 114.

Equipment: includes 3½ mile ditch, 6,000' of piping, hydro-electric power plant with dynamos, Pelton water wheels, drills, compressors, aerial tram, and 27 buildings equipped with electric light and water. Credited with past production of \$400,000. Property is in a remote district and the cost of securing supplies is high, with a short operating season of about 120 days per year.

McKINLEY PLACERS**ALASKA**

See Valdez Creek Placer Mines and McKinley Gold Placers, Inc.

MINERAL CREEK DEVELOPMENT CO.**ALASKA**

Property: Hercules and Millionaire claims on Mineral creek, Port Valdez district, Prince William Sound. Country rock is graywacke. Numerous short tunnels with drifts have opened up a vein about 20' wide carrying gold, galena, sphalerite, pyrite. Strike N. 80° W., dip 70° N. A small mill has been built to treat the ore. Season is short, from March to October.

MOTHER LODE COALITION MINES CO.**ALASKA**

Offices: 120 Broadway, New York, and Kennecott, Alaska.

Officers: Charles Earl, pres.; R. F. Foraker, v. p.; C. T. Ulrich, sec.; F. W. Hilles, treas., with F. R. Raiff and J. K. MacGowan, directors.

Inc. May 1, 1919, in Delaware. **Cap.** 2,500,000 shares of no par value, of which Kennecott Copper Corporation interests receive 1,275,000, equal to 51% and Mother Lode Copper Mines Co., 1,225,000, or 49%. The directors consist of 4 and 3, respectively, from these companies. Shares exchanged on basis of 1 (\$10 par value) of Mother Lode Copper Mines for 1.63 in the Coalition Co. Stock quoted at \$5.50 in February, 1921. The Coalition Co. paid off the Mother Lode Copper Mines Co.'s \$500,000 bonds, and provides working capital not exceeding \$1,000,000, to develop the property on a large scale. The Coalition Co. has a contract with the Kennecott Copper Corporation for the treatment of its ores, and is to have the benefit of the same milling, smelting, refining, freight and selling charges enjoyed by the Kennecott Copper Corporation. Corporation Trust Co., Jersey City, transer agent; Commercial Trust Co., Jersey City, registrar.

The property owned by the Mother Lode Copper Mines Co. was deeded May 20, 1919, to Mother Lode Coalition Mines and the former company is in process of liquidation.

Financial report for year ended Dec. 31, 1920, shows: receipts from ore sales \$2,472,057, operating costs, \$1,251,453; net earnings, \$1,168,649. Total assets, \$18,076,390, include current, \$1,844,470. Liabilities include: capital stock, \$16,822,274; 1st mortgage, 6% 10-year sinking fund gold bonds, \$1,000,000; current, \$346,931. Debit balance of undivided profits, \$92,815.

Property: about 100 lode and placer claims, about 1,640 acres, includ-

ing the Smith-Haglund Sall group, adjoins the Bonanza Mine of the Kennecott Copper Corporation, in the Copper River district.

The Houghton-Alaska Exploration Co.'s property to the east and adjoining the Jumbo mine of the Kennecott Corporation was acquired in Nov., 1916. It consists of 12 lode and 1 Association placer mining claims.

Geology: conditions at this property, according to Herman Keller, are similar to those at Bonanza mines. The base of the mountain is formed of amygdaloidal basalt, highly altered and called the Nicolai greenstone. This is covered by thick beds of Chitina limestone, dipping north. The ore-shoots occur in the limestone, and exploration has shown that contrary to general belief, the ore does not occur along the greenstone contact, but in a favorable bed 90' above it, and then only in connection with the Bonanza fault, or shear-zone. This shear-zone, 20 to 24' wide, cuts both greenstone and limestone and the ore is found in chimneys, and as irregular bunched masses along the zone and as impregnations in the limestone walls. The ore consists of nearly pure glance with minor and unimportant amounts of covellite and very little malachite, etc. Principal copper mineral is chalcocite. Like the Bonanza ore, it carries gold and silver.

Development: during 1920, new work totaled 4,351' and 4,285' of diamond drilling, giving very satisfactory results. A 1,400-ft. tunnel has been driven to connect the Mother Lode and Kennecott workings. Electric locomotives are used on this level to haul ore to the Kennecott tramway. A large hoist has been installed and a 2,300 volt transmission line completed.

Production: in 1920, 72,457 tons mined containing 9,929 tons copper and 153,170 oz. silver. Cost of copper produced was 8.66 c. per lb. and the 13,803,911 lb. sold realized 16.93c. per lb.

Property has been fully and favorably reported on by Herman A. Keller, Arthur W. Jenks, and Alan M. Bateman.

MOTHER LODE COPPER MINES CO. OF ALASKA **ALASKA**

Address: 29 Broadway, New York.

Company in process of liquidation. Holdings deeded to Mother Lode Coalition Mines Co., which see.

MOUNT ANDREW IRON & COPPER CO. **ALASKA**

Defunct. Former Office: Empire Bldg., Seattle, Wash. W. J. Rogers, supt., Ketchikan, Alaska, at last accounts.

Property: held under lease from the Mount Andrew Mining Co., 1¼ mile from Mount Andrew harbor on S.W. side of Kasaan peninsula, Prince of Wales island, Alaska.

Geology: ore carries chalcopyrite disseminated in magnetite, with hornblende gangue, and is practically unaltered at surface, masses of sulphide ore even showing glacial striations. Ore averages about 3.75% copper and \$1 to \$1.60 per ton in combined gold and silver values. The orebody has been stripped for about 2 acres and is developed by tunnels of 300' and 700', with a 70' blind shaft from the tunnel, and 10 small glory-holes, opened upwards to surface from the tunnels.

Equipment: includes two 150 h.p. boilers with 5-drill and 7-drill air compressors. A 4,600' aerial tram of 40 tons hourly capacity leads from a 50-ton loading bin at the mine to a shipping bunker 500' from tide water. Buildings include office, boarding house, bunk-house and smithy.

In Sept., 1917, reported shipping 1,000 tons high-grade copper ore per month to the Tacoma smelter.

MOUNT ANDREW MINING CO. **ALASKA**

Property leased to Mt. Andrew Iron & Copper Co. and described thereunder.

MOUNT WRANGELL COPPER CO. **ALASKA**

Controlled by same interests as Chitina-Kuskulana Copper Co.

Property: Copper Queen or Rarus group, Broken Leg and Mineral King groups on Chokosna river, Chitina valley, Alaska.

NEW MABEL MNG., MLG. & POWER CO. **ALASKA**

Office: Loveland, Colo.

Officers: Carlton E. Clark, pres.; I. J. Henderson, v. p.; Emily Kelim, sec.; J. R. Handy, treas., with L. R. Rinker, F. G. Barthold and Mary B. Sutherland, directors.

Inc. 1917, in Colorado. **Cap.**, \$100,000; par \$1; in treasury, 25,000 shares. Annual meeting, Sept. 1.

Property: 4 claims, 82 acres in Willow Greek district, purchased from F. Laubner and Wm. Bartholf.

Ore: occurs in vein in granite, dipping 45 degrees, and said to yield \$46 in gold per ton. Only assessment work being done.

NIBLACK COPPER CO.

ALASKA

Niblack anchorage. Prince of Wales island, Alaska. A. A. Wakefield, agent. Property formerly worked by the Niblack Copper Development Co., afterwards the Niblack Copper Co., is reported to have reverted to the Geo. M. Wakefield Mineral Land Co. Fully described in Vol. VIII, Copper Handbook. No work done on the property since 1912 and 1913 save annual representation. Niblack Copper Co. is said to still have a corporate existence.

NIKOLAI BUTTE COPPER MINING CO.

ALASKA

Officers: Harry F. Goetz, pres.; Fred E. Grimmer, v. p.; H. G. Twomey, sec., Old Natl. Bank Bldg., Spokane, Wash.; Gus F. Eilers, treas., with A. P. Witherspoon, directors. C. A. Bode, gen. mgr., McCarty, Alaska. E. F. Wann, cons. eng.

Inc. Dec. 15, 1916, in Washington. **Cap.** \$2,500,000; par \$1; 1,500,000 issued. Annual meeting, July 25, in Spokane, Wash.

Property: 20 claims on Dan creek, Chitina district, about 15 miles S. E. of Kennecott Copper Corp. High grade copper ores carrying bornite, chalcocite and chalcopyrite said to occur at contact of greenstone and limestone.

Development: by tunnel to open up ore body stated to be 18' wide, averaging 35% copper. No recent return.

NORTHERN LIGHT MINING CO.

ALASKA

Address: 1059 Mills Bldg., San Francisco, Calif.

Operates a gold dredge on Ophir Creek, Council district, Seward peninsula.

NORTHLAND COPPER-GOLD GROUP

ALASKA

Dead. Last address, 518 Hinckley Bldg., Seattle, Wash., in 1917. See Vol. XIII.

NORTH MIDAS COPPER CO.

ALASKA

Office: 50 Congress St., Boston, Mass. **Mine office:** Strelna, Alaska.

Officers: Willis D. Rich, pres.; F. A. Ball, v. p.; James F. Crane, sec.-treas., with A. A. Nye, W. L. Hall, J. E. Kelley, O. J. Berg, and G. M. Wheeler, directors.

Inc. Dec. 10, 1915, in Maine. **Cap.** \$1,500,000; \$1 par; 1,400,000 outstanding. Stock listed on Boston Curb. Annual meeting first Tuesday in June. Old South Trust Co., Boston, transfer agents. Company's secretary is registrar.

Debentures: \$60,000 mortgage notes due April 1, 1921.

Property: 18 lode and 4 placer claims with mill site, near the Kuskulana river, in the Chitina district, Copper River region. Twelve mile wagon road connects with the railroad at Strelna on the Copper River and Northwestern R. R., 146 miles from the terminus at Cordova. Silver-gold occurs in a quartz vein, 1-7' thick, in porphyry, dip 45°. Copper is also present as chalcopyrite; gold and silver occur with iron pyrite.

Development: by 5 tunnels and incline shaft, aggregating 2,300'. No. 1 tunnel cut a series of alternating limestone beds and porphyritic intrusions. Cupriferous pyrite in small quantity appears in the tunnel face. Above this, another tunnel has exposed copper pyrite.

Equipment: includes compressors, 4500' aerial tram, mill with daily capacity of 20 tons, 10-ton cyanide plant, 2,200' wooden pipe line, water power, etc. Twenty men employed.

Development continued in 1920, but mill was idle.

OREGON SUSITNA MINING CO.**ALASKA**

Former holdings now owned by **McKinley Gold Placers Inc.**, which see.
PANDORA GROUP **ALASKA**

Address: Ellamar, Alaska. Geo. Valentine, Chas. Wallace, James McPherson, owners.

Property: 6 claims, on Bay of Isles, Knights island, Prince William sound, showing small lenses of chalcopryrite ore in a shear zone 2' to 20' wide in greenstone, said to assay 3% copper. Developed by 90' shaft with 400' of workings.

PARDEE-MEIER COMPANY**ALASKA**

Property: 14 claims on Steel creek, 14 miles from Fairbanks. Several narrow veins showing scheelite (a tungsten mineral) and molybdenite with copper, lead, gold, silver and antimony.

Development: by open cuts and short tunnels. Strike of lode system N. 20° W., dip 30° E.

Reported idle since Feb., 1918.

PATTEN CO-OPERATING CO.**ALASKA**

Address: Valdez, Alaska. W. E. Patten, mgr.

Cap. \$100,000; \$100 par.

Property: 23 claims, 475 acres, in Valdez district. Ore occurring in a contact deposit in shale contains bornite, carrying gold, silver and nickel values.

Development: by 400' of underground workings. Small shipments were made in 1917.

Equipment: includes compressor, steam power, pump, tramway.

PEABODY ALASKA COPPER CORPORATION**ALASKA**

Office: Chas. L. Peabody, Room 707, 10 Wall St., New York.

Property: the Addison-Powell group of 33 claims, on sulphide gulch, Valdez district, 4 miles from Lowe river, near Granby Cons. M. S. & P. Company's property. Said to have shear zone 1,000' wide of green schist impregnated with chalcopryrite.

Development: by short tunnels and prospect pits.

Reported optioned to an English syndicate; if sold, the corporation will be dissolved.

PEABODY DEVELOPMENT CO.**ALASKA**

Office: Chas. L. Peabody, 10 Wall St., New York.

Inc. 1913, in Del. **Cap.** \$700,000; par \$1; fully paid.

Property: several claims on Passage Canal, Valdez district, stated to contain a gold quartz vein 3' wide, in slate and graywacke.

Development: 113' tunnel and crosscuts.

Reported in litigation.

PETERSON MINE**ALASKA**

Address: P. O. Box 198, Juneau, Alaska, or Amalga, Alaska.

Owners: Mrs. J. G. Peterson, Miss I. M. Peterson, Miss M. W. Peterson.

Property: 12 claims, 40 miles N. W. of Juneau, in the Harris district.

Gold associated with arsenopyrite occurs in quartz veins, 4-6' wide.

Development: 60' vertical shaft with tunnels 127' and 360' long.

Equipment: 4 mile tramway, 3-stamp mill. Wilfley concentrator, etc. About 80% of the gold is free and is recovered on the plates. Shipments made to Tacoma smelter. Was being operated in a small way in 1920. Examined by H. S. Brockunier.

PINTA BAY MINING CO.**ALASKA**

Inc. 1921, in Alaska. **Cap.** \$1,000,000; \$1 par.

Property: gold-copper group, 6 claims on Pinta bay, 20 miles from Chichagof, Portlock Harbor, Chichagof island, fully described in U. S. G. S. Bull. 692-B.

PIONEER MINING CO.**ALASKA**

See Pioneer Mining and Ditch Co.

PIONEER-MINING AND DITCH CO.**ALASKA**

Formerly Pioneer Mining Co.

Office: 509 Balboa Bldg., San Francisco, Cal., and Nome, Alaska.**Officers:** Jafet Lindeberg, pres.-mgr.; E. O. Lindblom, v. p.; J. E. Chilberg, sec.; G. W. Campbell, treas., with W. H. Metson and J. L. Hagelin, directors.**Inc.** Dec. 27, 1901, in Washington. **Cap.** \$2,500,000; \$1 par; all issued.

Profit for year ended Dec. 1, 1916, was \$242,904, of which \$100,000 was paid as No. 17 dividend. Surplus at end of year was \$240,153. No recent returns.

Dividends: 8% in 1902; 11% in 1906; 12% in 1907; 3% in 1908; 9% in 1909; 6% in 1910; 3% in 1911; 2% in 1915, and 4% in Jan., 1917; a total of 58% or \$2,900,000.

Property: placer areas in the Nome district, Alaska, worked by hydraulic since 1899. They are fully equipped and plant stands in accounts as worth \$57,428. Company controls the Miocene Ditch and United Ditch companies.

The president, Jafet Lindeberg is under indictment for various offences and company involved in litigation.

PLATINUM PALLADIUM PRODUCING CORP.**ALASKA****Address:** 1414 Alaska Bldg., Seattle, Wash. Mine address: Ketchikan, Alaska.**Officers:** J. E. Chilberg, pres.-mgr.; H. R. Chilberg, v. p.; M. Chilberg, sec.-treas., with J. A. Moore, A. G. Larson, directors.**Inc.** Nov. 8, 1920, in Wash. **Cap.** \$1,500,000; \$10 par; all outstanding. U. S. Corp. Co., N. Y., registrar and transfer agent. 150,000 shares listed on N. Y. Curb. Bonded debt; \$300,000 1st mortgage 8% convertible gold bonds.**Property:** 29 claims, 16 fractional claims and a mill site, 700 acres, includes the Salt Chuck mine on Kasaan bay, Ketchikan district, Prince of Wales island. The ore contains mainly bornite and chalcopyrite in a gabbro country rock, averaging 7.5% copper; 0.02 oz. gold; 0.20 oz. silver; 0.01 oz. platinum; 0.09 oz. palladium. For geology see U. S. G. S. Prof. Paper 87.**Development:** by 1,225' tunnel to depth of 300'.**Equipment:** compressor, engine, surface tram, 150-ton mill and flotation unit. The mill will be enlarged to 250 ton capacity. About 25 men employed.**Production:** in 1920 was 13,862 tons of ore, or 554 tons concentrate, containing 405,525 lb. copper; 599 oz. gold; 3,356 oz. silver; 23 oz. platinum; 1,422 oz. palladium.**QUIGLEY MINE****ALASKA****Owners:** Quigley & Dalton.**Property:** 20 claims on Quigley Mtn., in the Kantishna district of the Yukon Basin. Silver-lead and copper ores occur in 2 shoots, a few hundred feet apart, one 200' in length.**Development:** by shafts, 40 and 100' deep, and tunnels, 130 and 300' long. Equipped with grizzly and sorting table, as only 200 oz.-silver ore can be shipped with profit.

Thos. P. Aitken has been operating the property under an option for the past three years.

RAE-WALLACE MINING CO.**ALASKA****Address:** A. G. Kennedy, Gyde-Taylor Bldg., Wallace, Idaho. **Mine address:** D. S. Rae, Wasilla, Alaska.**Officers:** Don S. Rae, pres.-mgr.; A. G. Kennedy, sec.-treas.; with J. Wood, H. M. Childs, Fred Porter, directors.**Property:** 11 claims, and an option on the 3 Sylvanite claims adjoining on Fish creek, near the Martin and Marble mines, in the Willow creek district, Alaska, 21 miles from Wasilla, the nearest R. R. station. Six veins have been opened. Ore carries free gold and averages \$35 per ton. Work is only done during the summer and fall.

Development: by tunnels and drifts, 300' of the latter having been done recently. Reserves are said to be fairly large. With equipment, \$50,000 has been spent to 1921.

Equipment: includes 3 oil engines, 2-drill compressor, hoist, crusher, 2 Gibson mills and amalgamating tables, 2,000' aerial tram, shops, and complete camp.

RAMSEY-RUTHERFORD GOLD MINING CO. ALASKA

Mail returned from Valdez marked "Out of business". Inc. in Sept., 1913.

Property: 10 miles N. E. of Valdez at an elevation of 3,500'.

Ore: free milling gold quartz in fissure veins in graywacke.

See U. S. G. S. Bull., 642, p. 190, and The Mines Handbook, Vol. XIV.

READY BULLION MINE ALASKA

See Alaska Treadwell Gold Mining Co.

READY BULLION MINE ALASKA

Address: Hollis, Prince of Wales island, Alaska, formerly called the Puyallup mine.

Ore: free milling, occurs in quartz vein, averaging 6" to 1" in width, and in places 3' wide, having well defined walls, inclosed in quartz-diorite.

Development: by 3 tunnels; one, 1,160' long, is driven along vein, stoped for length of 1,100' to an average height of 150' to 250'.

Equipment: includes Pelton wheel, compressor, electric-light plant, 5-stamp mill. See U. S. G. S. Bulls. 642 and 662, pp. 79 and 65.

Produced both bullion and concentrate.

REGAL MINES CO. ALASKA

Subsidiary of the Great Northern Development Co., which see.

Office: 77 Franklin St., Boston, Mass. **Mine Office:** Kennecott, Alaska.

Officers: Walter M. Briggs, pres.; H. I. Gaskill, sec.-treas.; with James Phillips, Jr., C. Hartman Kuhn, Chas. S. Farnum, Mulford Martin, E. F. Gray, W. M. Briz, J. M. Satterfield, directors. E. F. Gray, gen. mgr.

Inc. 1912 in Maine. **Cap.** \$250,000; \$5 par; issued \$28,011. Annual meeting, November 2.

Property: 17 claims, 340 acres, near Kennecott, Copper River district. Developed by 115' shaft sunk on a contact between limestone and greenstone and showing copper glance ore. Assessment work only in recent years.

REYNOLDS-ALASKA DEVELOPING CO. ALASKA

Office: 1182 Broadway, New York. **Mine office:** Latouche, Latouche Island, Alaska.

Officers: Marvin F. Butler, pres.; H. M. Coffin, v. p.; J. Frank Birdsall, sec.-treas.; with A. T. Austin, F. A. Reynolds, W. C. Gilbert, John Yule, O. C. McGilvara, Geo. K. Hinds and G. B. Wrigman, directors.

Inc. 1903 in Washington. **Cap.** \$3,000,000; \$1 par; in \$1,000,000 cumulative 6% preferred and \$2,000,000 common stock. Authorized March 3, 1908, a \$500,000 twenty-year 6% gold bond issue; issued, \$125,000. Annual meeting, first Tuesday in April.

Company was in receiver's hands until June, 1910, when discharged by court order. Former management fully described in Vol. X, Copper Handbook.

Property: 102 claims, about 2,000 acres, in Valdez district, Prince William sound.

The Boulder Bay group of 31 claims, 620 acres, is on the mainland at eastern side of Prince William sound. Claims shows a contact deposit between greenstone and slate, carrying chalcopyrite said to assay up to 11% copper and \$3 gold per ton, but averaging 2 to 4% copper. Developed by 2 tunnels. Equipment includes a 60 h. p. boiler and a 5-drill air compressor.

The Iron Mountain group of 62 claims includes the Duchess and Duke properties, on Horseshoe bay, Latouche island. The footwall in both properties is black slate; graywacke forms the hanging wall. The ore consists of chalcopyrite with pyrite and pyrrhotite. The Duke mine has a 4' vein

of ore, said to have averaged 7% copper, slightly developed by a shaft now filled with water.

The Duchess mine, last worked in 1916, when 400' of drifting was done on the lower tunnel, is developed by 2 tunnels, the upper a 375' drift tunnel, and the lower having 500' of drifts on the orebody, which has an average width of 25'. This group shows massive sulphide ore, estimated by the management to average about 3% copper. Assessment work only has been done since 1916.

In 1916 the Duke shaft was unwatered and sunk to depth of 110' and the orebody reported to show a maximum width of 27' along a length of 140' of undeveloped ore. Drifts are 300' below the lower Duchess tunnel. Ore is of similar character and value to that in the Duchess. Estimated ore opened above lower Duchess tunnel is said to be over 600,000 tons, averaging 2% copper, \$2 gold, 40% iron and 43% sulphur; maximum width of orebody in last completed crosscut was 124', with average width of 25' for a developed length of 500'.

Equipment: includes a 200 h. p. hydro-electric installation, with a flume and steel pipe leading from Big Falls creek to a Pelton wheel, direct-connected to two 40 k. w. generators; a 50 h. p. hoist and 2 air compressors, of 5 drills aggregate capacity, with 6 air drills and 10 electric drills. In 1920 company obtained U. S. Gov. patent to 16 claims of the Iron Mountain group, covering 6,000' of the lode line, the water power and harbor frontage. See U. S. G. S. Bull. 662, pp. 206-208.

RICH HILL MINE

ALASKA

Owner and Operator: Henry Andrews, Kasaan, Alaska.

Property: 5 claims containing a fissure vein in lime and granite, developed by 54' shaft and 130' tunnel. Ore is chalcopryite with some gold and silver. Gross production 1918, \$14,036; expenses, \$6,548.

RUSH & BROWN MINE

ALASKA

Address: Kasaan, Prince of Wales island, Alaska. U. S. Rush, owner and operator.

Property: 24 claims, 480 acres and two 5-acre mill sites, near the head of Kasaan Bay, 8 miles N. W. of Kasaan. The claims show greenstone intruded by granodiorite and carry three orebodies, 2 in E. W. shear zones in the greenstone, the third orebody along the greenstone-diorite contact. The latter carries magnetite-chalcopryite ore in a body of unknown extent, but opened for 200' in length, width of 63' and to a depth of 120'.

One shear zone contains the sulphide body. The ore occurs as massive chalcopryite in stringers, bunches and lenses, and also as a commercial impregnation of the greenstone and chloritic schists. The massive chalcopryite, without waste, assays 20% to 30% copper, with \$12 to \$18 gold. The lenticular shoots of the clean ore run with the shear zone, and are as much as 7' thick. Pyrite, quartz and calcite are practically absent. The sulphide body, in which this ore occurs has an average width of 14', varying from 8' to 20' between the walls, with dip of 55'.

On the footwall side, and at a distance of 30' from the hanging wall, a parallel vein, evidently in the same shear zone, has been exposed for 45' on the 200' level.

Development: includes 177' vertical shaft connecting by drift with incline shaft to 500' vertical depth, with drifts at 50' intervals. On 400' level, drift is 450' long. In last few years, work has been largely confined to the smaller orebody, consisting of a rich chalcopryite ore shoot in a mineralized gangue of graywacke.

Equipment: includes a steam plant with 2 hoists, necessary mine buildings, saw-mill and 528 cu. ft. compressor. Ore is taken over a 3-mile private railway of 42" gauge to Venus Bay.

Production: for 1918, 403,512 lbs. copper, 3,460 oz. silver, 609 oz. gold. No later figures available. Mine considered promising. Seventeen men employed, and shipments made to Anyox smelter, 1920-21.

RUSSELL BALL COPPER CO. ALASKA

Probably dead; see Vol. XIV.

SALT CHUCK MINING CO. ALASKA

Inc. July, 1917, to operate the Salt Chuck mine on Kasaan Bay, taken over in 1920 by Platinum Palladium Producing Corp., which see.

SEA COAST MINING CO. ALASKA

Holdings taken over by Alaska Hercules Mining Co., described in Vol. XIV.

SEATTLE-ALASKA COPPER CO. ALASKA

Probably dead. Fully described in Vol. XIV.

SHELIKOF MINING CO. ALASKA**Address:** Kodiak, Alaska, and Carroll Hendron, 701 New York Blk., Seattle, Wash.**Officers and directors:** Z. T. Halferty, pres.; F. S. Golding, v. p.; Carroll Hendron, sec.-treas.**Inc.** Jan., 1916, in Washington. **Cap.** \$500,000; \$1 par; 105,000 issued. Annual meeting in April.**Property:** 7 claims, 154 acres, on Alaska peninsula, in the Katmai reservation. Claims show a contact deposit, carrying copper in granite and diorite. Shoots said to be 10' wide, assaying 36% copper. Openings by tunnels.**SNOWSTORM GROUP ALASKA**

M. B. Anderson, owner, Ellamar, Alaska.

Property: 4 claims, at Unakirk Bay, Prince William sound.**Ore:** occurs in quartz vein in limestone, carrying gold, silver, copper and some zinc. A 65' tunnel has opened ore to a depth of 40'. A prospect.**STANDARD COPPER MINES CO. ALASKA**

Probably out of business. Fully described in Vol. XIV.

TALKEETNA MINING CO. ALASKA**Address:** Wasilla, Alaska. Reported under lease to W. R. Hocking, of Seattle, Wash.**Officers:** D. M. Fulton, pres.; E. H. Bartholf, v. p.; C. T. Hatcher, sec.; K. I. Fulton, mgr.-treas., with H. McGregor, directors.**Inc.** Sept. 25, 1915, in Washington. **Cap.** \$1,000,000; \$1 par; 800,000 issued. Annual meeting 1st Monday in October.**Property:** 8 claims in Willow Creek district, about 40 miles N. of Anchorage, said to show a 2' quartz vein in diorite, carrying gold ore assaying \$10-\$200 per ton.**Development:** by several tunnels, longest 130'.**Equipment:** includes 2' aerial tramways and 15-ton mill.

Producing 1919-20, but no figures available.

TEIKELT GOLD MINING CO. ALASKA**Address:** E. E. Ritchie, Valdez, Alaska.

Is a development company working on a small scale.

THOMAS-CULROSS MINING CO. ALASKA

Probably dead. See Vol. XIV.

THREE MAN MINING CO. ALASKA**Office:** 31 Nassau St., New York. Mine office: Landlock, Prince William sound, Alaska.**Officers:** H. C. Bryan, v. p.-sec.; Duncan Edward, treas.; officers are the directors. W. A. Dickey, gen. mgr.**Inc:** in New York. **Cap.** \$1,000; \$100 par; fully issued. Is a close corporation, having only 3 shareholders.**Property:** 43 claims, 10 patented, 812 acres, on tidewater, at Landlock bay, in the Valdez district of Alaska, giving the company nearly a mile along a great shear zone, only one end of which has been developed. The property, which has been under continuous development since 1903, is said to show 10 orebodies with a general E.-W. strike, occurring as fissure veins and as replacement deposits in shear zones in greenstone and slates. Orebodies reported to average 8' in width and to carry chalcocopyrite ore in lenticular shoots averaging 10% copper. Low-grade ore is continuous, with rich ore

found mainly on the footwall in paystreak of 1 to 8' width, the largest shoot carrying massive chalcopryrite, assaying 10% copper, 1 oz. silver and 50cts. gold per ton. The quantity of low-grade ore of concentrating tenor is very much greater than that of the smelting ore, but it is not available for present use.

Development: by tunnels, with 6,000' of workings. Six levels have been opened up on one orebody, giving a little over 600' of stoping depth on the ore. Another orebody has been opened up on 3 levels, giving about 500' of stoping depth. No stoping has been done, all ore produced having been extracted from levels and upraises. Company claims to have over 200,000 tons of 3% copper ore developed.

The mine has no machinery or power equipment, owing to development by tunnel, but has 14 buildings, with ore bunkers on a wharf at tidewater, connected by a short ground tram with the portal of the 5th level.

Production: about 600 tons of 10% ore were shipped, 1910, to the Tacoma smelter, yielding 120,000 lb. fine copper, and over 3,000 tons of 10% ore yielding 610,000 lb. fine copper in 1912. No shipments were made in 1913, 1914 and 1916, but in 1915, 300,000 lb. copper was produced. Over 5,000 tons of 10% ore have been shipped. Total production to date is about 1,000,000 lb. copper, shipments being under name of W. A. Dickey. Property considered promising.

UNITED METALS CO.

ALASKA

See Alaska Metals Co. Property is the Corbin mine, near Coppermount.

VALDEZ CREEK PLACER MINES

ALASKA

Office: 705-8 Newport Bldg., Boston, Mass. Mine office: McKinley, Alaska.

Officers: G. W. Sias, pres.; F. E. Nye, v. p. and sec.; R. B. Griffin, treas.; J. M. Bruce, chm. trustee.

Inc. Nov. 1, 1911, recognized as an Express Trust Co., in Massachusetts, called McKinley Placers. **Cap.** \$2,500,000; shares of no par value; 2,408,186 issued. **Bonds:** \$500,000 authorized, of which \$454,100 are outstanding. Property fully described in Vol. XIV, was taken over by **McKinley Gold Placers, Inc.**, which see.

Bondholders of the Valdez Creek agreed to accept 1st preferred stock of the McKinley Gold Placers at par; and to discharge mortgages and foreclosure proceedings instituted at time of the reorganization.

VALDEZ GOLD CO.

ALASKA

Formerly Cameron-Johnson Gold Mining Co.

Address: R. B. Kenyon, treas., Yakima, Wash., or Valdez, Alaska.

Directors: Geo. S. Rankin, W. A. Bell, Geo. Ker, Alex. Miller, Chas. S. Mead, J. M. Bruce, and H. Y. Saint. J. D. McDougall, supt.

Cap. \$750,000; 50c par; \$600,000 outstanding January, 1919.

Property: 26 claims on the right side of Shoup Glacier, N, W. of Valdez, which show fissure veins in gravwacke and argillite.

Ore: free milling gold quartz. About 3% of the ore is said to be sulphides of iron, lead and zinc.

Development: by tunnels. The upper workings are mainly on the Treasury Note vein, said to show from 3" to 36" ore. Lower workings are chiefly on the Mazuma claim, said to have the largest vein, as well as lowest grade on the property. A 2,000' tunnel is being driven to cut 9 veins. A little ore was produced in 1920.

Equipment: includes a 3,850' aerial tram, 5-stamp mill, a 7' Lane mill, concentrator and bunkhouse. Power is supplied by a No. 3 Pelton water wheel operating under a 240' head. Fifteen men are employed on the property. See U. S. G. S. Bull. 662, p. 192.

VALDEZ MINING CO.

ALASKA

Property: a group of claims on W. side of Valdez glacier, Port Valdez district, 8 miles inland from Prince William sound. A 3 to 8' quartz vein cuts interbedded schistose graywacke and slate; the ore value is in gold, sometimes high-grade.

Development: by adits, longest 800' of which 400' was driven in 1920. Equipped with mill which operates on ore produced by development.

VICTORY COPPER MINING CO. **ALASKA**

Probably dead. Fully described in Vol. XIV.

VIRGINIA MINE **ALASKA**

Property: a gold mine on the Kenai peninsula, equipped with mill which was operating in 1920.

WARD COPPER CO. **ALASKA**

Office: J. S. Eaton, 141 Broadway, New York. Mine office, Teller, Alaska.

Officers: J. S. Eaton, v. p.; T. A. Ward, sec.; Francis Purnell, treas.

Inc. 1918. **Cap.** \$250,000; 50,000 outstanding.

Property: on Kougrak Mtn., 50 miles inland from Port Clarence bay, developed by shallow shafts. Ore is mainly azurite and malachite, small shipments running 30% copper. Present high cost of transportation delays profitable operation of the property.

WILD GOOSE MNG. & TRADING CO. **ALASKA**

Address: 354 Pine St., San Francisco.

Operates a gold dredge on Ophir Creek, Council district, Seward peninsula.

WILLOW CREEK DEVELOPMENT CO. **ALASKA.**

Address: M. D. Leehey, 620 Alaska Bldg., Seattle, Wash. **Mine office:** Wasilla P. O. via Seward, Alaska.

Officers: L. C. Thompson, pres.; H. Doheny, v. p.; Archibald Beck, treas.; M. D. Leehey, sec.; N. B. Bothwell, mgr.

Property: Gold Bullion mine, 14 claims, on Willow creek, 185 miles from Seward, operated spasmodically since 1911 and credited with a total production valued at \$1,200,000. **Ore:** free milling, occurs in quartz vein 24' wide and said to be proven for length of 3,500'.

Development: by several tunnels. Present owners purchased the mine in 1920 from the Gold Bullion Mng Co. for \$500,000, did 700' of drifting and installed a large cyanide plant. A 500-ton hydro-electric power plant and compressor to be installed in 1921.

WILLOW CREEK MINES **ALASKA**

Probably dead. See Vol. XIV.

YORK TIN DREDGING CO. **ALASKA**

Operates a dredge on Grouse creek, Seward peninsula, 100 miles N. W. of Nome. Produced 55 tons concentrate averaging 69.76% tin in 1918.

ARIZONA

Arizona leads all other states in copper production. Its metal production has been as follows:—

Year	Copper lb.	Gold oz.	Lead lb.	Zinc lb.	Silver oz.	Value
1921.....	163,087,000	147,363	5,182,000	2,179,000
1920.....	558,256,302	231,528	14,355,929	1,457,296	5,355,303	\$114,609,077
1919.....	538,101,844	217,997	10,203,078	1,717,000	5,266,605	111,157,872

A. B. C. MINING CO. **ARIZONA**

Address: Phoenix, Ariz.

Officers: Ned Creighton, pres.; Jas. Letson, v. p.; C. P. Lee, sec.-treas., with D. F. Gary and W. P. Kyne, directors.

Property: A. B. C. Mine, developed to depth of 600'. Operated intermittently in 1920.

ABE LINCOLN COPPER CO. **ARIZONA**

Address: E. W. Getter, sec.-treas., Citizen's Nat'l Bank Bldg., Los Angeles, Calif.

Officers: G. W. Platner, pres.; V. P. Unitt, v. p.; W. H. Dudley,

v. p.; with W. H. Wood, A. E. Mack, J. H. Bulla, W. F. Denny and R. McPhail, directors, all of Omaha, Nebr. C. E. Nathorst, mgr.

Property: the Abe Lincoln mine 12 miles N. E. of Wickenburg, near the Monte Cristo, Silver Bar and Eagle mines.

Development: by 2,000' of workings, with shaft completed to the 700' level. Assays gave 12% copper, 12 oz. silver, \$5 gold per ton. In the tunnel being driven to connect with shaft the vein is stated to be 10' wide with high copper content, 12 oz. silver and \$10 gold per ton. Other lower grade veins exist.

Equipment: includes 50 h. p. hoist, 5-drill compressor and a 50-ton mill with flotation unit.

Shipped high-grade chalcopryite ore from tunnel in 1919-20. Reserves claimed to be sufficient for 200 tons daily output for some time.

ACME MINING & REDUCTION CO. ARIZONA

Idle. Mail returned from former address in Tucson, Ariz. See Vol. XI, Copper Handbook.

ADAMS EXTENSION M. CO. ARIZONA

Address: Leslie C. Monks, 739 Merchants Natl. Bank Bldg., Los Angeles, Calif.

Property: in Katherine mining district, Mohave country, near Oatman.

ADAMS GOLD MINING CO. ARIZONA

Address: 636 I. W. Hellman Bldg., Los Angeles Calif. **Mine address:** Thos. Kilker, Supt., Kingman, Ariz.

Officers: E. H. Newlan, pres.; N. A. D'Arcy, sec.-treas.-gen. mgr., with C. H. Palmer, Jr., and M. Lines, directors.

Inc. Dec., 1915, in Arizona. **Cap.** \$100,000; 10c. par; assessable; issued 734,000. Annual meeting, first Monday in February. Listed on Los Angeles Stock Exchange. Assessment of 1c. per share levied Nov., 1920.

Property: 9 claims in the Black Range section of the Oatman district, adjoining the Nellie mine. These claims were abandoned in 1920 after an unsuccessful attempt to find a commercial ore body. Company reported to have since acquired new holdings near the Sunbeam group in the Katherine-Union Pass district.

ADAMS MINING CO. ARIZONA

Property transferred to Adams Gold Mining Co.

ADJUST MINING CO. ARIZONA

Address: Winkelman, Arizona.

Officers: P. R. McDowell, pres.-treas.; C. L. McDowell, v. p.; B. C. Burgess, sec.-gen. mgr.

Inc. in Arizona. **Cap.** \$1,000,000; \$1 par.

Property: 10 claims in Saddle Mountain district, traversed by 4 fissure veins. Developed by tunnels and drifts. Shipments from June to December, 1920, totaled 325 tons averaging \$42.18 per ton. The mine is 2 miles by trail from Christmas, the nearest station on the Arizona Eastern R. R.

AJAX METAL MINING CO. ARIZONA

Office: 312 Cooper Bldg., Denver Colo.

Officers: Nat P. Wilson, pres.; W. H. Wilson, v. p.; S. O. Foxworthy, sec.-treas., with C. S. Campbell, M. E. Peters, directors. M. H. Wilson, mgr., 1440 Stanley Ave., Hollywood, Calif.

Inc. Oct., 1916, in Arizona. **Cap.** \$1,500,000; par \$1; issued 824,897. Transfer office and registrar: Peters Trust Co., Omaha, Nebr. Annual meeting, first Tuesday in October.

Property: 24 claims, patents pending, totalling 498 acres, California district, Chiricahua Mts., Cochise county. Said to show "disseminated" ore occurring in a porphyry dike 220' wide. Values reported to average 8% copper, 9% lead, 6 oz. silver.

Development: by 210' shaft and 3000' of workings: will sink to a depth of 650' in near future.

Equipment. includes electric hoist, compressor and pumps. Management proposes to erect a flotation mill.

AJO CONSOLIDATED COPPER CO.

ARIZONA

Property purchased in 1917 by New Cornelia Copper Co., which see. Fully described in Vol. XII.

AJO CORNELIA COPPER CO.

ARIZONA

The State Corporation Commission, after inspection of the company's books, ordered a public sale of the Ajo Cornelia property to be held March 8, 1919, to satisfy a claim of the E. J. Longyear Co. for \$2,000. Fully described in Vol. XIV. Property now owned by Copper Ridge Mng. Co., which see.

AJO GUNSIGHT MINING CO.

ARIZONA

Address: Ajo, Ariz.

Property in the Gunsight mountains, 20 miles S. E. of Ajo, is said to show a main vein 25' wide, with gold values of from \$10 to \$20 per ton for small block of developed ore.

AJO MINES CORPORATION

ARIZONA

Address: J. F. Dietrich, supt., Douglas, Arizona.

Officers: P. L. McCabe, pres.; J. F. Dietrich, v. p.; M. C. Hankins, sec.-treas., with J. E. Newbury, Gus Nelson, A. R. Wood and A. B. Murchinson, directors.

Inc. August 2, 1920, in Arizona. **Cap.** \$1,000,000; \$1 par; 24,000 shares outstanding.

Property: 7 claims, in Quijotoa district, Pima county, 85 miles W. of Tucson and 42 miles S. of Ajo. Ore, found in a contact fissure reported to average \$25 per ton.

Development: by 150' shaft. A prospect.

AJO PIMA COPPER CO.

ARIZONA

Address: Harvey B. Thomas, care Valley Bank, Ajo, Ariz.

Controlled by Harvey B. Thomas, C. B. Zingg, Emory Orr, W. B. Hager, J. W. Moyes, J. R. Grant, Theo. C. Thomas and R. M. Boller.

Property: .24 claims, 480 acres; one group of 20 claims adjoining and lying contiguous to New Cornelia Copper Co., the remainder lying separate and apart from main group, about 2,000' in a southerly direction, all in the Ajo district, Pima county. The general geology is said to be identical with that of New Cornelia and Ajo Consolidated, and surface indications are considered good.

Development: by shallow shafts and trenches on numerous outcrops. One shaft is down 25' on a stringer of high-grade copper ore pitching toward the contact which is highly mineralized and can be traced through property for several thousand feet. Shallow pits along this formation have exposed good ore. Company is seeking capital for development.

ALADDIN MINING CO.

ARIZONA

Presumably defunct.

W. A. Kent, mgr., Prescott, Ariz., wrote in 1919: "I do not feel at liberty to fill out blanks you send. All those entitled to receive the information asked for receive it direct." Company had a 5-year lease on Paymaster mine and 8 other claims, the property of the Oriental Mining Co., in Big Bug district, near Poland. Lottie mine of same group has 4,400' tunnel and 20-stamp mill.

ALAMO GOLD MINING CO.

ARIZONA

Office: Rol. King, 304 Wilcox Bldg., Los Angeles, Cal.

Officers: B. A. Kipp, pres.; Calvert Wilson, v. p.; Rol. King, sec. and mng. director; with I. S. Parlin, directors. J. V. Allison, supt.

Inc. Aug., 1917. **Cap.** \$1,000,000; \$1 par; 700,000 issued. All owned by officers.

Property: 6 claims in Alamo Springs district, Yuma county. Development: by 507' incline shaft and 55' Kipp shaft.

Equipment. includes 12 h. p. hoist, compressor, jack-hammers.

ALCYONE MINING CO.

ARIZONA

Office: Oatman, Ariz.

Officers: W. O. Wright, pres.; Niels Buck, v. p.; Chas. F. Pugh, sec.-treas.-mgr., with H. C. Topp and H. T. Becker, directors.

Inc. Nov., 1915, in Arizona. Cap. \$100,000; par 10c; 700,000 issued.

Property: 4 claims, now being patented, in San Francisco district, 2½ miles south of Oatman. Mine shows a quartz fissure vein in andesite; strike N. 80° E., dip 68°. Ore, free milling gold, said by company to run \$42 per ton.

Development: by 415' incline shaft and 800' underground workings. The crosscut west on the 400' level was in 450', May, 1921, cutting numerous small veins.

Equipment: 60 h. p. hoist, compressor, etc. Management plans further drifting, diamond drilling, and sinking.

ALGONKIAN MINES CO.

ARIZONA

Office: 8 W. 40th St., New York. **Mine address:** Crown King, Yavapai county. A. J. Heath, mgr.

Officers: Geo F. Shurtleff, pres.; John B. Frich, v. p.; John L. Schelleng, sec.; J. Edward Michel, treas., with Ralph H. Cameron, directors.

Inc. 1910, in Arizona. Cap. \$1,000,000; \$1 par; 402,645 outstanding. Registrar & Transfer Co., N. Y., transfer agent.

Property: 17 claims, 5 patented, 335 acres, in Bradshaw mountains, 4 miles east of Crown King, Yavapai county. Fourteen claims are said to be along a shear zone, paralleling a diabase monzonite contact. The schist is intruded by several porphyry dikes or sheets parallel to the schistosity. Mineralization is said to occur in the porphyry at the diabase contact.

Development: by tunnels and shaft totals 2,400'. The lower or Algonkian tunnel, 1,100', runs along the dike contact, on the Anaconda claim. For 350' it is reported to follow the apex of an ore shoot; a raise run from the tunnel to the surface at 322', is said to be on the orebody. This air shaft continues as a 50' winze below the tunnel and a drift N. from the bottom shows galena with occasional bunches of glance and chalcopryrite. Equipment, sold, 1919.

Presumably idle. Company is a Cameron-Michel corporation.

ALPHA COPPER MINING CO.

ARIZONA

Office: 34 S. Stone Ave., Tucson, Ariz.

Officers: John W. Bogan, pres.; R. J. Monahan, v. p.-mgr.; Geo. P. Myers, sec., with F. S. Lockwood, J. L. Toohey, J. W. Bogan and John Nelson, directors.

Inc. Oct. 7, 1916, in Ariz. Cap. \$1,000,000; \$1 par; increased from \$500,000 March 16, 1917; 350,000 shares in treasury. Last offering of 100,000 shares at 50c. made in May, 1917.

Property: 22 claims, about 450 acres, including the Pima and Fries groups, situated midway between Mineral Hill and Twin Buttes camps, San Xavier district, Pima county. The tract is underlain by granite capped on the hills by quartzite and traversed by two different sets of veins, both metalliferous. The fracturing is complex and the veins associated with porphyry and andesite dikes, and wide breccia zones.

Ore: carries silver and copper as chalcopryrite and gray copper (tennantite) with silicious gangue. The Pima mine, opened to 150' in depth, 1876, produced \$85,000 in silver.

Development: by 215' shaft on the Pima vein with levels at 150' and 200' cutting 2 veins, 4' to 5' wide, with stopes above 150' level yielding ore that ran 37.2 oz silver and 3.55% copper.

Equipment: adequate for existing needs only, includes 2 gasoline engine hoists, pumps.

Reported on by W. Tovote, who said property appears to have merit. Assessment work only being done.

ALTA MINING & SMELTING CO. ARIZONA

Idle. Mail returned, 1916, from former offices at Superior, and Florence, Pinal county, Ariz.

Property reported sold, 1917. Fully described Vol. XIV.

ALVIN DEVELOPMENT CO. ARIZONA

Office: Houghton, Mich. Controlled by **Tank Pass Consolidated Mining Co.**, Salome, Yuma county, Ariz. Idle except for annual assessment work. Described Vol. X.

AMERICAN BOY MINE ARIZONA

Owned by Geo. Clarke, J. Petersen and J. B. David, Patagonia, Santa Cruz county, Ariz., but bonded to A. F. Gross of Duluth, Minn. Harry Armstrong, supt.

Property: 6 claims near Patagonia, shows several veins from 6" to 18" wide. Ore contains gold, silver, copper and lead, and is said to average \$5 gold, 12 oz. silver and 10% copper.

Development: by an 80° incline shaft, 120' deep and a 370' tunnel that cuts the bottom of shaft. On the 40' level 200' of drifting has been done, on the tunnel level 250'. The small shipments made have consisted of ore extracted by development work. The tunnel was reported being retimbered early in 1921.

AMERICAN CELTIC COPPER CO. ARIZONA

Out of business. See Vol. XIII for description.

AMERICAN EAGLE CO. ARIZONA

Probably dead. Former address: E. C. Lane, mgr., Parker, Ariz.

Property: in the Cienega district, Yuma county, reported to have made several shipments of copper ore to smelter averaging 20%.

AMERICAN FLAG SILVER MINING CO. ARIZONA

Office: Kingman, Ariz.

Officers: H. K. Le Claire, pres.; W. C. Rannels, v. p.; Albert J. Rigalli, sec.-treas.

Cap. \$1,000,000; par 50 cents. 1,000,000 shares were paid for the property and for organization purposes.

Property: 7 claims. in Maynard district, Mohave county, said to have produced rich silver ore in past; idle for about 30 years. Some high grade ruby silver ore has been extracted recently by prospectors.

Mine reported taken over early in 1921 by F. P. Aylwin and associates.

AMERICAN MOLYBDENUM CO. ARIZONA

Dead. See Vol. XIV.

AMERICAN ORE CORPORATION ARIZONA

Address: R. S. Billings, Kingman, Ariz.

Reported to have taken over the property of **Copper Butte Mines Co.**, which see.

ANACONDA COPPER GROUP ARIZONA

Owner: D. W. Arte, P. O. Box 741, Bisbee, Ariz.

Property: 11 claims, 3 patented, in Warren district, covering a lime-quartzite contact, 2,600' west of the Shattuck, 1,600' west of the Higgins, and adjoining the Copper Queen on S. E. and N. W. A 35' shaft has been sunk on the contact. Assays along contact reported to carry \$1.30 gold and 1.65% copper.

ANDERSON & BIRCH ARIZONA

Operated a mill and mine, 2 miles west of Humboldt, Yavapai county, in 1918. See Vol. XIV.

ANGLO SAXON SMELTING & REFINING CO. ARIZONA

Officers: J. E. Russell, mgr.-dir. Bank of Ariz. Bldg., Prescott, Ariz.

Hugh Rose Croup, pres.; Robt. L. Service, sec., with G. G. Lemons, directors.

Inc. 1916, in Arizona. Cap. \$1,500,000. The company was to be financed in England.

The corporation had a lease on 200 acres of land from the City of Prescott for a smelter site and had also acquired several water rights. During the war no active work was carried on. Reported June, 1919, that the company died during the war.

ANTELOPE MINING CO.

ARIZONA

Property: near Kelvin, Pinal county, owned by W. E. Hanney and associates of Kansas City, Mo. Examined 1919 by Alfred Roos of Tucson.

ANTELOPE PEAK COPPER CO.

ARIZONA

Officers: F. A. Meyer, pres.; W. F. Hannay, mgr.; M. G. Tarr, supt. Inc. 1909.

Property: 15 claims, 12 miles from Winkelman, said to show a vein of 7% copper ore, 7' wide, and opened for 200' in length.

Development: to depth of 400' by shafts and drifts.

Equipment: includes compressor, drills and 25 h. p. hoist. Development work is in progress and small shipments reported made in 1919-1920.

AOTMAN PIONEER GOLD MINES, INC.

ARIZONA

Idle.

Address: Oatman, Ariz. Officers: R. G. Tryon, pres.; Geo. F. Moser, sec.-mgr.

Inc. in 1915. Cap. \$1,500,000; \$1 par; all outstanding.

Property: 6 patented claims, including the Pioneer, formerly owned by the Pioneer Cons. Mines Co., 2 miles from Oatman. The Pioneer vein, one of the largest of the district, is covered for 4,000' by company's claims.

Development: by 420' main Pioneer shaft and drifts on the 100', 200' and 400' levels, exposing above the 200' level 17,000 tons of \$9.20 ore north of the shaft and \$100,000 south, or a total of \$256,400 gross. No estimate is made of the lower-grade ore below the 400' level, and the high-grade shoot is bottomed.

In the Treadwell mine a 340' shaft with levels at 100', 200' and 300' exposes 12,800 tons of an average value of \$5.62, which is about the cost of handling such ore in the district.

The 35 Parallel mine has a 220' shaft connecting on the 150' level with a tunnel. The work is all in ore, exposing 8,500 tons of \$13.30 ore.

Equipment: includes 10-stamp mill, 80 h. p. engine, compressor and 2 hoists.

APACHE CHIEF MINING CO.

ARIZONA

The secretary, W. G. Lentz, 218 National Bank of Arizona Bldg., Phoenix, Ariz., reported in Oct., 1919, that company had not kept up its corporation tax and was probably dead. See Vol. XIII. Property: reported taken over in 1920 by Arizona Cave Creek Mines Corporation, which see.

ARABIAN DEVELOPMENT CO.

ARIZONA

Address: Chas. D. Ridgeway, mgr., Union Pass, via Kingman, Ariz.

Property: an option on the Arabia mine in Union Pass section of San Francisco district, Mohave county.

Development: by 300' shaft and crosscuts at 100' and 300'. The workings have been cleaned out and lateral work reported under way. April, 1921.

ARAVAIPA LEASING CO.

ARIZONA

Address: F. Wickes, sec., 55 Congress St., Boston.

Officers: H. A. Wentworth, pres.; W. D. Ticknor, v. p.; H. L. Smith, treas., with R. V. Dey, W. A. Ogg, T. H. Leggett, directors. C. E. Minor, supt. Operated as a close corporation.

Property: Grand Reef mine, 24 claims, 7 patented, 420 acres, in Aravaipa district, Graham county, purchased from R. V. Dey in 1920.

Ore: occurs in fissure veins in granular igneous rocks.

Development: by adit and winze to 300' depth, with 4,100' of workings.

Reserves: estimated at 90,000 tons of ore, averaging 67 oz. silver, 1.7% copper, 7.4% lead.

Production: to date about 30,000 tons of ore mined. Shipments by lessees have amounted to 4,477 tons ore and concentrates averaging 22 oz. silver and 31% lead; in 1920, they shipped 448 tons, netting \$17,747.

ARGENTA MINING COMPANY

ARIZONA

Last Address: E. J. Bessett, Prescott, Ariz. See Vol. XIV.

ARGO MINES CO.

ARIZONA

Address: Oatman, Mohave Co., Ariz.

Officers: S. S. Jones, pres.-gen. mgr.; J. M. Francis, v. p.; J. E. Shank, sec.-treas., with J. S. Withers and Wm. Bates, directors.

Inc. in Arizona. Cap. \$1,000,000; \$1 par; 410,000 shares held in treasury. Listed on Los Angeles Stock Exchange.

Property: 9 claims in the Oatman district, shows a vein 40' to 130' wide on surface, stated to be a continuation of the Tom Reed vein.

Development. a two-compartment shaft 605' deep. Crosscutting on 350' level at last account.

Equipment: includes a hoist with 1,000' capacity, and a 360 cu. ft. air compressor.

ARGONNE COPPER CO.

ARIZONA

Address: Box 462, Prescott, Ariz. Mine near Cordes, P. O., Yavapai county.

Inc. 1919, in Arizona. Cap. \$500,000; 50c par; 320,000 issued for property. Hall and Finlayson, incorporators. Personal promotion stock held by Arizona Corp. Comm. Company was granted permission to sell 300,000 shares at 50c. in 1919, less 15% selling commission.

Property: 27 claims including the Gil Ferguson group and 4 other claims near the Stoddard mine. Shows a blow-out 20 to 100' across with 3' of shipping ore in 60' shaft, and 4½' of 20% glance ore in a new foot-wall shaft sunk in 1918-19. No recent returns.

ARGUS COPPER & GOLD MINING CO.

ARIZONA

Idle. Last address: care D. M. Jones, v. p., Planet, Ariz.

Officers: A. B. Jones, pres.; A. B. Hardwick, sec.; Ernest C. Lane, mgr.

Inc. in Arizona. Cap. \$2,000,000; \$1 par; 500,000 shares in treasury.

Property. 46 claims, 920 acres, adjoining the Planet mine in Yuma county, said to show several well-defined veins, carrying gold-copper ore, assaying from \$5-\$20 gold and 10% copper per ton. No information since 1916.

ARIZONA AMERICAN COPPER CO.

ARIZONA

Address: B. T. MacMasters, principal owner, 135 Broadway, New York.

Inc. 1917, in Ariz. Cap. \$1,000,000; \$1 par; operated as a close corporation. About \$150,000 has been expended on the mine.

Property: 3 claims, 66 acres, located in Mohave county, 75 miles easterly from the St. Thomas, Nevada, terminus of a branch of the Los Angeles and Salt Lake R. R.

Geology: sandstone in flat beds total 450' thick, underlain by limestone and cut by fissure veins containing copper-gold-silver.

Development: by several tunnels and a 70° incline shaft, 218' deep, with 5 levels. Shipments total 40 cars said to have averaged 5 oz. silver per ton.

ARIZONA-BAGDAD COPPER CO.

ARIZONA

Formerly Bagdad Copper Co.

Office: Suite 708, 111 Broadway, New York. Mine at Bagdad, via Hill-side, Yavapai county.

Officers. L. H. Taylor, Jr., pres.; E. B. Bronson, v. p.-treas.-pur. agt.:

E. C. Christensen, v. p.; Frederick C. Hart, sec.; with Wm. L. Austin, E. A. Julian, H. B. Richardson, F. C. Hart, P. Chrystie, directors. H. A. Geisendorfer, gen. mgr., Luning, Nevada.

Inc. March, 18, 1918, in Delaware. Cap. \$1,750,000 \$1 par; outstanding, 785,000 shares. No bonds. Security Transfer & Registrar Co. transfer office; The New York Trust Co., registrar; both of New York. Annual meeting, first Tuesday in March.

Property : 62 claims (9 patented), over 1,000 acres, in the Copper Creek region, Eureka district, Yavapai county, 26 miles by wagon road from Hillside, on the Santa Fe line to Phoenix. About \$1,000,000 has been expended to date in purchase price, development and equipment.

Development: by tunnels and churn-drilling with about 8,000' of underground workings and 51,000' of drilling. In 1914 H. A. Geisendorfer made detailed estimates of 6,031,000 tons of blocked ore, averaging 1.77% copper and 7,246,200 tons probable ore, averaging 1.60% copper, a total of 13,277,200 tons of ore, averaging 1.68% copper, underlying 67.88 acres. Average thickness of ore is estimated at 58.4'.

Work planned for 1921 includes churn drilling to increase tonnage. Reported on by A. H. Rogers, W. H. Weed, J. Parke Channing, F. H. Clark, H. A. Geisendorfer and others.

ARIZONA BASE ORES MINING & MILLING CO. ARIZONA

Letters returned unclaimed from former address: c/o C. R. Harris, Kingman, Ariz.

Inc. 1917, in Ariz. Cap. \$100,000; 10cts. par.

Property: in the Hualpai Mtns., Mohave county.

ARIZONA BELMONT MINING CO. ARIZONA

Described in Vol. XIV.

ARIZONA BINGHAMTON COPPER CO. ARIZONA

Address: 405 Lexington Ave., New York. **Mine:** Stoddard, Yavapai county, Ariz. Company absorbed the **Stoddard Mines Co.** and **Stoddard Milling Co.**, described, Vol. XII.

Officers: Wm. H. Reynolds; E. W. Wells v. p.; Geo. W. Johnson, gen. mgr.; E. V. Davies, supt.

Inc. Feb. 1917, in Arizona. Cap. \$1,700,000; \$5 par; changed late in 1918 to \$2,000,000; \$1 par; 1,713,250 shares issued plus 286,750 issued Dec., 1920, in payment of loan to the president. Exchange basis 5 of new for 1 of old. Stock listed on New York Curb. Security Transfer and Registrar Co., New York, transfer agent; Empire Trust Co., New York, registrar.

Dividend: an initial dividend of 2c. a share was paid Jan. 20, 1919.

During year ended May 31, 1919, there was an operating profit of \$21,217, changed to a loss of \$6,306 on deducting other charges, the result of non-settlement for 1,000,000 lb. of copper on hand.

Property: 10 claims, 6 patented, about 175 acres, in the Copper Mountain district, 5 miles from Humboldt. Mine was discovered in 1882 and reopened by present company, 1916. The Binghamton mine shows a broad shear zone in green chlorite-sericitic schist. The ore carries chalcopyrite, with little pyrite, in silicified schist, oxidized to the 600' level. Main ore-shoot has been opened from the 100' to 600' levels, and yields 5% ore, though the mill feed averages but 2.2% copper. Reserves are reported as 100,000 tons 3% ore and 150,000 tons of a lower grade.

Development: by 1,000' tunnel and 600' shaft, with about 4,000' of workings. The new 3-compartment shaft is to be sunk to 1,200' and was down 900' in Sept., 1919. At 750' the orebody is 15' wide and averages 5% copper. In 1918-19 \$38,626 was spent on development.

Equipment: includes double-drum electric hoist, a 10-drill compressor, pumps, and 150-ton flotation mill, to be enlarged to 350 tons.

Production: during year ended May 31, 1919, the mill treated 36,605 tons of ore yielding 1,873,358 lb. of copper at a total cost of 19.84c. per lb. Concentrates contain about 25% copper; extraction is reported as 92.5%.

During part of 1920 production averaged 300,000 lb. copper monthly. Concentrate is shipped to Cons. Arizona smelter. Operated intermittently during 1920-21.

ARIZONA-BISBEE COPPER CO.**ARIZONA**

Mine office: Bisbee, Ariz.

A Phoenix corporation fathered by Mr. Ned Creighton and others formerly interested in the Higgins lease. About 20,000 additional shares offered to the public at 50c., September, 1920.

Property: 19 claims S. W. of the White Tail Deer property of the Copper Queen. Sinking a two compartment shaft and drifting on 400' and 600' levels.

ARIZONA BONANZA MINING & MILLING CO.**ARIZONA**

Dead; formerly held claims near Miami. See Vol XIV.

ARIZONA BRUNSWICK MINING CO.**ARIZONA**

Address: Wm. Cook, Jr., supt., Chloride, Mohave county, Ariz.

Property: 3 claims, south of the Tennessee mine, developed by 320' shaft. Drifting underway on the 250' level is said to have opened up 5' of \$24 ore.

Equipment. includes electrically driven pumps, compressor and hoist.

ARIZONA BULLION CO.**ARIZONA**

Address: Wm. D. Grannis, mgr., Kingman, Ariz.

Officers: A. H. Smith, pres., Wm. D. Grannis, v. p.; Ross H. Blakely, sec.-treas.

Inc. 1915, in Arizona. **Cap.** \$250,000; \$1 par; 25,000 shares issued.

Property: 11 claims, 200 acres, includes the Great Republic mines, in Cedar Valley district, Hualpai range, Mohave county. Ore occurs in a contact deposit in granite porphyry. The orebody is 6'-4' wide, has N. W.-S. E. course and dips E., the output averaging \$25 per ton in silver, lead and copper.

Development: by shafts and tunnels. About 300' of new work was done in 1920-21. Hoist and compressor to be installed.

ARIZONA BUTLER MINES CO.**ARIZONA**

Address: F. D. Friend, San Francisco, Cal., or Bouse, Ariz.

Officers. F. D. Friend, pres.; M. L. Strong, v. p.; E. E. Henuee, treas.; D. H. Jackson, engr.

Property: 700 acres, near Bouse, Yuma county, including claims worked in 1870. There are 18 shafts from 30' to 300' deep, exposing ore with gold, silver, copper, and lead values.

Equipment: includes oil engine and compressor.

ARIZONA & BUTTE COPPER MNG. CO.**ARIZONA**

Address: care Edw. W. McKay, Suite 307, 230 Fifth Ave., Pittsburgh, Pa. **Mine office:** Ray, Ariz.

Officers: G. H. Harn, pres.-mgr.; Eva G. Titus, sec.

Inc. in Arizona, 1916. **Cap.** \$1,000,000; par \$5; 155,000 shares issued; 45,000 shares in treasury. Shares offered, 1917, at \$3; 5,000 offered at \$10 in Feb., 1919. Pittsburgh Trust Co., transfer agent and registrar.

Property. 32 claims, 560 acres in one group, on west side of Ray district, adjoining Ray Cons. ground. **Ore:** chalcopryrite and tetrahedrite occur as cementing material in granite breccia and as boulders and streaks of sulphide in quartz and clay matrix filling crush zone or fault vein in altered Pinal schist cut by wide diabase dikes and intruded by offshoots of the Ray granite mass. Surface indications are regarded as favorable at granite contact on Overlook claim. in S. W. part of group.

Development: by 670' Overlook shaft with 800' of workings on 200', 450' and 550' levels. On upper level oxidation has leached the ore; on 450' level a crosscut still in ore shows 3.66 oz. silver per ton, 1.46% copper and 50c. gold, across a 10' face. On 550' level, a 150' drift shows 50' of milling ore carrying boulders and bunches and streaks of high-grade chalcopryrite ore with tetrahedrite.

The Overlook shaft encountered ore at 412' that extended down for 30', assays running as high as 17% copper and 80 ounces silver. Stringers of high grade ore were also cut at 620' extending down to 670', where water level was cut. Tunnel work and several shallow shafts on other claims show values, but conditions are less promising than at Overlook.

Equipment: 15-h. p. gasoline hoist, compressor, jackhammers, build-ings, etc.

Presumably idle 1920-21.

ARIZONA-BUTTE CORPORATION ARIZONA

Address: Columbia National Bank Bldg., Pittsburgh, Pa.

Officers. Wm. Schafer, pres.; E. R. Schafer, v. p.; Wm. Perry, sec-treas., with C. S. Jamison, Jas. M. Rae, A. C. Held, Jr., and J. H. Faught, directors.

Inc. April, 1917. **Cap.** \$1,000,000; \$1 par. National Security Co., New York, transfer office.

Property: 15 claims, 300 acres, 8 miles west of Miami and 4 miles from the R. R., said to show numerous veins in granite, carrying pyrite, chalco-pyrite, and bornite. Veins said to average about 5' in width.

Development: on one vein by a 600' tunnel with a 240' winze—here the vein is said to be 23' wide; 700' lower is a tunnel 1,700' long which was expected to cut the vein within the next 100'.

Equipment: includes a 100-ton concentrator, which will need remodel-ing before being able to treat the several thousand tons of medium grade ore that the management claims is opened up..

ARIZONA BUTTE MINES CO. ARIZONA

Fully described in Volume XIV. Property taken over by Kingman Cons. Mines Co., which see.

ARIZONA CACTILONE COPPER CO. ARIZONA

Dead. Former address Phoenix, Ariz.—See Vol. XIII.

Officers. (at last account) J. G. Hardis, pres.; S. C. Kingsbury, v. p-gen. mgr.; I. J. Lipson, 2nd v p.; C. D. Montgomery, sec.-treas.

Inc. Feb. 8, 1917, in Arizona. **Cap.** \$3,000,000; \$1 par; 400,000 sold at 25c. each.

Property: 21 claims of the Slocum Copper Co., in Maricopa County, 22 miles N. of Phoenix. Examined by C. H. James in 1917, who recom-mended expending up to \$50,000 in exploration.

Geology: schistose pre-Cambrian granite and an altered diabase, is traversed by ledges of iron-stained quartz showing copper carbonate and pyrite.

Development. by shafts 106' and 200' deep, midway between the 2 quartz dikes.

ARIZONA CALIFORNIA MINING CO. ARIZONA

Probably dormant. Former address: Prescott, Ariz.

Officers: Dr. E. A. Butler, pres.; G. W. Lavender, v. p.; H. G. Wil-helm, sec.-treas.; William S Wilhelm, mgr.

Inc. April, 1915, in Arizona. **Cap.** \$250,000; \$1 par; outstanding, \$100,000.

Property: the Shamrock and Ruth mines, 6 claims, 122 acres, patented, in the Hassayampa district, 6 miles S. of Prescott, shows a quartz vein containing gold, silver, zinc and lead ore. Developed by a 300' shaft.

Equipment includes a 10 h. p. hoist and 40-ton mill, with Hunting-ton mill and Wilfley tables. Concentrates said to assay 36% zinc, 55% lead and 30 oz. silver. An oil flotation plant was planned at last accounts.

ARIZONA CAVE CREEK MINES CORP. ARIZONA

Address: Alfred Strong Lewis, Phoenix, Ariz.

Inc. 1920 to take over a group of claims covering 4,000 acres and in-cluding the Maricopa, Apache Chief and Pocahontas mines, in the Cave Creek district, 28 miles N. of Phoenix. The property is to be explored by 2 diamond drills.

ARIZONA-CELTIC COPPER CO.

Out of business. Property formerly owned by the **Arizona Morenci Copper Co.** See Vol. XIII.

ARIZONA CENTRAL GOLD MINES CO.

Now controlled by **Arizona Divide Mining Co.** of Nevada, which see.

ARIZONA CHLORIDE MINING CO.

Address: 332 I. W. Hellman Bldg., Los Angeles, Calif.

Officers: John B. Hughes, pres.-treas.; Edw. B. Hughes, v. p.; I. M. Thompson, sec.; F. W. Jacques, supt.

Inc. in Arizona. Cap. \$200,000; par 10 cts.; 1,100,000 issued.

Property: 138 acres, in the Chloride district, Mohave county. The Windy Point mine is developed by a 145' shaft in gneiss. Ore containing mainly pyrite, arsenopyrite and chalcopyrite, occurs in a fissure vein, 2-4' wide, with strike N. 42° W. and dip 77° N. E., said to run 3 oz. gold, 486 oz. silver and 21.5% copper p. t. The Bobby Burns group of 7 claims in the same district, acquired in February, 1917, is developed to depth of 250' by tunnels said to have proved copper ore of commercial value. New shaft now 72' deep.

Production: totaled \$300,000 to end of 1916. Property considered very speculative. Presumably idle.

ARIZONA COMMERCIAL MINING CO.

Offices: 50 Congress St., Boston, Mass., and 188 Middle St., Portland, Me. Mine at Globe, Gila Co.; H. S. Plumer, supt.

Officers: Chas. S. Smith, pres.; Harry M. Stonemetz, v. p.; C. H. Alt-miller, treas., with E. S. Goulston, J. Waldo Smith, Chas. Sumner Cook, clerk, and Wm. E. Chandler, directors.

Inc. April 4, 1912, in Maine. **Cap.** \$1,500,000; \$5 par; 265,000 issued. Listed on Boston Stock Exchange. American Trust Co., transfer agent; National Shawmut Bank, registrar; both of Boston. Annual meeting second Wednesday in April.

Company is successor of the Arizona Commercial C. Co.; bond-holders of the old company receiving 70 shares of new stock for each \$500 bond held and the stockholders being privileged to subscribe, share for share, for fully-paid stock in the new company upon payment of \$3 per share.

Financial Statement, years ended Dec. 31:

Year	Revenue	Expenses	Deprec. and depletion	Dividends	Surplus
1920.....	\$1,020,223	\$811,537	\$241,821	\$.....	\$33,135*
1919.....	1,390,888	1,101,633	228,734	60,521
1918.....	862,307	560,784	188,277	530,000	416,754*
1917.....	818,523	416,415	98,143	424,000	120,035*
1916.....	888,346	339,578	60,020	132,500	356,248

* Deficit.

Dividends: Initial of 50c. per share was paid Oct. 31, 1916; similar payments were made each quarter from April, 1917, to Oct., 1918, both inclusive; none since. A special Red Cross dividend of 10c. a share, was paid July, 1917. Total disbursements to Jan. 1, 1920 were \$4.10 per share, equal to \$1,086,500.

Property: 11 claims, 3 fractional, in 2 groups, known as the Black Hawk and Copper Hill groups, separated by the Iron Cap mine of the Iron Cap Copper Co. Lands are at Copper Hill, 3 to 4 miles N. E. of Globe lying just north of the Old Dominion, and adjoining the United Globe and Superior & Boston mines in Gila county. The Copper Hill group, 56 acres, carries the Old Dominion and Copper Hill veins for about 1,500'.

Ore: is a mixture of pyrite and chalcopyrite, contains 5% copper, 20% sulphur, 30% iron.

Development: in 1917 was confined to the Copper Hill mine, with 2,659' of level work and 565' of raises from the 8th to the 15th levels. In 1918, there was 6,729' of work done; in 1919, 7,524'; in 1920, 7,544'.

The working shaft at the Copper Hill mine, 1,600' deep, has extensive workings on the 10th, 12th, and 14th levels, along the Old Dominion vein, and ore has been extracted eastward until cut off by the Budget fault, ore being exposed along the bottom of the 14th level for 400'. The most important development includes the opening up of the orebody for 400' horizontally and 75' vertically on the 8th level, east of the fault where it is from 5' to 40' wide, averaging 5% copper; indications point to its extension downward to the 16th. Above the 13th level, a new vein of high-grade ore was opened in the hanging wall; it does not show on the 13th and continues some distance above the 12th level.

In 1919, the 16th level was opened and in 1920 it was officially reported to show "the best orebody ever encountered in the mine". In the east end, the 6th and 7th levels were developed from the 8th level, and in 1920 work above the 6th level gave satisfactory results. The 1920 ore reserves are said to show an increase over 1919 both in tonnage and copper content. The new (No. 2) shaft 1,300' deep has been completely equipped.

In Feb., 1919, company began two suits in Massachusetts against the Iron Cap Copper Co: (1) for \$500,000 for ore alleged to have been illegally removed; and (2) for \$150,000 for share of pumping expense. In Sept., the Supreme Court of Massachusetts sustained the pleas of the Iron Cap, that suit must be brought in Arizona Courts. Immediately after this decision, Arizona Commercial brought the same suits under Massachusetts laws to be tried by a court and jury. In October, this company asked for an injunction in the Maine courts restraining Iron Cap from disposing of any of its assets until the suit was settled. In June, 1920, the Supreme Court decided that the Massachusetts courts had no jurisdiction, but the Maine court accepted jurisdiction of one suit, trial to be delayed pending legal action begun in Arizona.

The Black Hawk group, 97 acres, which carries the Black Hawk and Old Dominion veins for about 3,000', has a surface capping of low-grade iron ore, above a 25 to 50' vein, leached to considerable depth, followed by silicious ore, estimated to average about 4% copper, with excess of iron. There also is a hematite vein of 3 to 4' width giving assays of 4.5% copper, with small silver values. In Dec., 1920, it was reported that the Black Hawk vein was 10' wide on the 400' level, and assayed 5½% copper, also that the future possibilities of this area were good.

Equipment: at Copper Hill shaft includes a 72' steel headgear, hoist, good for 1,500' driven by 175 h. p. motor; 500-gal. electric pump; 20,000 cu. ft. Sturtevant fan; and 300-ton ore bins.

The power smelter plant was remodeled in 1916; new equipment includes two 600 k.w. turbo-generators. All power used is generated at this plant, which is connected with the Copper Hill mine by a 6" pipe line for compressed air and an electric transmission line. On the 14th level two 500-gal. p. m. pumps, electrically driven, were installed, pumping all water from the Copper Hill mine to surface.

Production:

Year	Ore, tons	Copper, lb.	Silver, oz.	Gold, oz.
1920.....	77,972	7,913,836	31,028	1,722
1919.....	76,572	7,280,861	16,918	1,310
1918.....	62,797	6,076,303	15,981	831
1917.....	39,702	3,860,949	5,208	374
1916.....	48,889	4,178,474	21,163	302

Opinion: "in proportion to its output this company has one of the largest showings of ore of any of the vein mines. The shaft is down to the 1,600' level and, indeed, in Dec., 1919, the crosscut on this level has encountered the orebody finding it well up to the average grade.

The "Budget" fault throws the ore up several hundred feet, so that east of this fault the ground is almost virgin. At present the company is mining about 6,000 tons per month. It is, however, sinking a new shaft, which will have a capacity of 400 tons in six hours. With this the company should have no difficulty in mining easily 10,000 tons per month.

The relations between cost and price of copper production have been so upset of recent years that it is difficult to take any definite basis for estimating earnings. The ore, however, running 5½ to 6% is decidedly above the average of vein mines and should make for a cost somewhat lower than the average. With a normal spread between cost and price on a full production, it would not seem unreasonable to figure on a profit of \$2.50 to \$3 per share."

It is estimated that there is in sight about 750,000 tons of ore, so that even on this larger rate of production there is some six years' supply of ore in sight. At this rate of mining it should not be difficult to produce 12,000,000 pounds of copper per year, as against a rate hitherto attained of about 8,500,000.

Mine and mill closed down Dec. 16, 1920, to await a better copper market.

ARIZONA CONSOLIDATED COPPER MINES, LTD. ARIZONA

Office: H. S. Blake, sec., Throgmorton House, Copthall Ave., London, E. C. 2, Eng. Mine office. Clifton, Ariz. Hon. H. A. Stanhope and W. M. Steward, directors.

Inc. June 17, 1899, in Great Britain. Cap. £150,000; £1 par; issued £135,007, which was paid to the Continental Finance Syndicate, Ltd., 1909, for property, and £10,000 cash working capital. Balance sheet, Nov. 1919. showed cash. £564; loans at call, £232; expenditure £10,578; creditors £1,367.

Property: 120 acres, known as the Scioto, Lowland and Chilicothe mines, in the Copper Mountain district, Clifton, Greenlee county, adjacent to the Arizona Copper Co. and the Detroit Copper Co. Location includes a millsite on the San Francisco river. The claims are said to show a vein 2½ to 8' and in places 30' wide, proven for 3,500'. Company also owns 8 claims at Armstead, Mont., showing copper.

Development: at the Clifton properties by 3 adits; No. 1 in ore for 55'. No. 2 110'; No. 3, 100'. No record of recent development work.

ARIZONA CONSOLIDATED COPPER & MINING CO. ARIZONA

Name changed in Feb., 1919, to Liberty Silver Mines Co., which see.

ARIZONA COPPER BELT MINING CO. ARIZONA

Office: 120 Liberty St., New York. Mine office: Constellation, Yavapai county, Ariz.

Officers. Wm. J. Diltthey, pres.; Percy H. White, v. p.; R. A. Camp, treas.; E. Rappold, sec.; with Samuel Bloom, directors. W. C. Diltthey, supt.

Inc. Feb., 1906, in Arizona. Cap., \$1,000,000; \$1 par; issued 753,758.

Property: 19 claims, exclusive of water rights and millsite, comprising the Texas and the Wren groups, in the Black Rock district, Yavapai county, about 15 miles N. E. of Wickenburg, the nearest railroad station on the Santa Fe Railroad.

The groups are 2 miles apart and work is mainly on the Texas group, adjoining the Monte Cristo silver mines, some 2 miles nearer the railroad. The working shaft is about 320' deep; a crosscut on the 300' level has been extended 700' to the S. W. and has crosscut 4 mineral ledges, one carrying 4' of gouge said to assay \$45 in gold per ton. Another crosscut is being driven W. on the 100' level. The company has a well established camp, 25 h. p. gasoline engine, air-compressor, 1,000-gal. oil tank, machine shop and camp buildings.

ARIZONA COPPER CO., LTD. (THE)**ARIZONA**

Head office: 44 Charlotte Sq., Edinburgh, Scotland. Mine and works office: Clifton, Greenlee Co., Ariz.

Board of directors: G. Readman, chairman; Young J. Pentland, F. L. MacLeod, H. A. Rose, T. E. Salvesen, and David Paulin; William Exley Miller, sec.; Norman Carmichael, gen. mgr. John Kiddie at Longfellow, R. W. Macfarlane at Metcalf, and W. G. Scott at Coronado, mine supts.; Arthur Crowfoot, supt. of mills; J. Owen Ambler, smelter supt.; J. G. Cooper, cashier and purch. agent.

Inc. August 5, 1884, in Great Britain. (For early financial details see Copper Handbook, Vol XI, 1914, p. 72.)

Cap. authorized. £755,000; issued £703,984 10s as follows: 160,000 "A" preference shares of 5s each, all uncalled but £7,480 10s paid in advance of call; £316,530 preference stock; £379,974 ordinary shares (1,519,896 shares of 5s each fully paid). Profits are divided thus: 10% cumulative dividends on "A" preference less 5% interest on amount uncalled and unpaid; 7% cumulative dividends on preference stock; balance to ordinary shares.

Funded Debt: 5% terminable debentures were redeemed in 1918. Company guarantees the \$1,294,533 first-mortgage 6% bonds, due May 1, 1928, of the Arizona & New Mexico Ry. This line runs from Clifton, Arizona, to Hachita, New Mexico, connecting with El Paso & South Western Ry.

Balance sheet for 1916-1917 showed a profit of £317,717, after setting aside £137,805 for redemption of debentures, paying preferred dividends, transferring £50,000 to reserve (now £678,731), and £255,000 to reserve (now £613,563) for contingent liabilities. Ordinary shares received a total of £303,979. There was £13,737 carried forward.

For 1919-20, operating loss was £39,087; reduced by other income to £5,986. Net loss was £178,747 after taxes and general expense; reserves and dividends were £165,457, making a deficit of £344,204. Claim for repayment of taxes of £388,948, if allowed, will give a surplus of £44,744 for the year. Deficit for 8 months ended May 31, 1921, was £309,234, and profit and loss account showed a deficiency of £244,124.

Dividends: on ordinary shares for recent years have been as follows: 10s 3d, 1913-16; 4s 9d in 1917; 3s 3d in 1918; 2s 3d in 1919; 9d in 1920, to May 31.

In Oct. 1921, company sold its entire holdings to the Phelps Dodge Corporation, for 50,000 shares of latter Company's stock.

Property: about 3,770 acres in the mineral belt of Clifton-Morenci district. Principal producing mines: Humboldt, Clay, Longfellow, Coronado, King, Metcalf and Boulder, others in reserve or process of development. Produces about 4,500 tons of concentrating ore and about 175 tons of direct smelting ore daily. Concentrating ore is chalcocite, disseminated in porphyry, carrying about 2.45% copper. Top-slicing is principal mining method used. Metcalf mining division supplies concentrator at Clifton. Morenci and Coronado divisions supply concentrator at Morenci. All mines connected by electric haulage to main hoisting shaft at concentrator, except Metcalf, which is connected by 36" gauge steam road (Coronado R. R.) to Clifton.

In 1919, acquired from the Shannon Copper Co. 73 claims, 1,078 acres, sidelining Arizona Copper claims at Metcalf and 550 acres at Clifton, together with former's stock holdings (53%) in Coronado Mng. Co.

Electric haulage operated by 21 6-ton locomotives, used singly, and two-unit and three-unit. Coronado-Morenci ore tram consists of 36 10-ton cars hauled by three-unit locomotive over track of 20" gauge of 50 lb. rails.

Longfellow division, principal mines, Humboldt, Clay and Longfellow. Orebodies disseminated chalcocite in porphyry dikes and faulted or brecciated areas. Mining conducted principally through adits at present.

There are 8 working levels and 2 shafts. Commercial ore proven to depth of 900' below surface. Concentrates transported by gravity incline 2,515' long to Coronado R. R., thence 6.1 mile to smelter, 2.2 miles below Clifton.

Metcalf division: principal mines, King and Metcalf. Other smaller producers. King mine produces disseminated chalcocite ore from faulted areas in porphyry and granite. Metcalf mine yields oxide ore from deposits in limestone and shale and small porphyry dikes. Ores transported by gravity inclines to bins on Coronado R. R. and treated at the Clifton concentrator. Outlying mines served by cable tramways. Ores mined by open-pit and shrinkage underground methods.

Coronado division: principal mines, Coronado Horseshoe, and Pyramid. Orebodies disseminated chalcocite and surface oxide ore in porphyry dike filling fault fissure in granite. Developed by 5 shafts (deepest 1,100') and nine levels; an adit level 1,100' below surface is part of electric haulage system to concentrator at Morenci.

At the Clay mine further development work opened up a large but very low-grade orebody, not yet being mined. In the Coronado vein, the oreshoot is bottomed between the 7th and 11 levels, but ore reserves have been maintained by additional ore developed east of the Matilda shaft.

The Horseshoe orebody is connected with the main haulage, or 1,100' level. In the King mine, a shoot of 8-10% ore, 10' thick and 200' long, was found in the pyritic vein on the 3rd level.

In 1919, openings in the Humboldt gave satisfactory results as did those in the King mine until shut down in April; work was suspended also at the same time in the Longfellow and at Coronado a month earlier. The 1,100-level adit was in 12,253' on Sept. 30. Smelting ore averaged 6.45% and milling ore 2.123%, in 1919.

During 1920, the Humboldt supplied $\frac{3}{4}$ of ore extracted, but reserves notwithstanding were materially increased. Development of the Bluebell ore shoot was continued through the 1,100-level adit and 35,000 tons of better than 3% ore were opened. The grade of smelting ore was 6.97% and of concentrating ore 2.08% copper.

After November, 1920, development work practically ceased, and on May 31 following, operations were entirely suspended, except for ore extraction in the Coronado where workings are endangered by fire only partly under control.

The incline top-slicing method of mining at the Coronado was described by W. G. Scott in a paper for the A. I. M. E., February, 1918.

The reduction works consist of two concentrating plants, No. 4 mill at Clifton with 500 tons daily capacity; and No. 6 mill at Morenci, with 4,000 tons daily capacity. A 500-ton experimental mill for the treatment of low-grade ores was erected at Morenci. Both concentrating plants have been equipped with the Callow system of pneumatic flotation, with the necessary thickener and filter equipment for handling the flotation concentrate. An addition of 8 Dorr pulp thickeners has been made to the water reclaiming equipment; tables have replaced jigs, and a dust-catching system has been installed in crushing department at No. 6 plant.

Recent improvements include 12 Allen cones for de-watering and re-grinding mill feed; 12 Dorr classifiers, Dorr thickeners, and 8 Callow cells.

The smelting plant, is situated 2 miles below Clifton, on the east bank of the San Francisco river. This plant is entirely of steel, brick and concrete, and consists of a receiving bin system with a capacity of 1,000 tons of ore and 1,500 tons of concentrates, a crushing, grinding and sampling plant, and a bedding plant with a storage capacity of 20,000 tons for mixing and storing the ores and concentrates, supplementary bunker bins being provided for the fettling ores, converter ores and fluxes.

The mixed charge is fed to the roasting plant, consisting of eight 7-hearth Herreshoff air-cooled roasters, equipped for firing with coal if

needed. The roaster gases pass through a large dust chamber to a central stack, and the roaster charge and dust to the reverberatory plant, consisting of 3 oil-fired furnaces 22x100' (2 operating). The waste gases from this plant pass through a set of six 712 h. p. Stirling boilers, which, with 5 oil-fired boilers, supply the steam necessary to operate the power plant. The matte is tapped into ladles by 40-ton cranes for treatment in the converter plant, which consists of 4 stands with 5 shells of the Great Falls type converter, 12' in diameter. The bullion produced is cast in pigs for shipment on two straight-line casting machines. Both the reverberatories and the converters are provided with suitable dust chambers, the gases ultimately discharging into a common stack. The plant is served by both standard and narrow gauge railroad, in addition to electrified industrial tracks and is equipped throughout with belt conveyors for the transportation of material.

In addition to its interest in the Arizona & New Mexico Ry., company owns Shannon-Arizona Ry., acquired, together with mill and smelter, from the Shannon Copper Co. The latter two have since been dismantled.

The power plant is housed in a brick-steel concrete structure, and consists of 3 General Electric turbines of 2,000 k. w., three 10,000 cu. ft. Nordberg blowing engines for converter air, and a compressor for high-pressure air; the auxiliary pumps, motors, generators, transformers, condensers, cooling towers, spray ponds, etc., necessary for operations. The plant supplies all power needed at the smelter and also, through a 13,200-volt transmission line 10 miles long, the power needed for the town of Clifton, the concentrators and mines.

Well-equipped machine, blacksmith, boiler, tin, carpenter and electrical shops are maintained, as well as a large warehouse and brick shed.

Miscellaneous enterprises operated by the company include foundry, machine shop, saw-mill, a 30-ton ice plant and town lighting plant. The company also has general merchandise stores at Clifton, Morenci, and Metcalf.

Production: for fiscal years ending September 30: 1907, 27,404,349 lb.; 1908, 33,980,291 lb.; 1909, 32,017,487 lb.; 1910, 32,161,205 lb.; 1911, 34,569,019 lb.; 1912, 38,150,000 lb.; 1913, 34,230,000 lb.; 1914, 38,942,455 lb.; 1915, 37,416,010 lb.; 1916, 34,100,000 lb. (operations suspended by strike five months) from 905,486 tons of ore; 1917, 42,480,000 lb.; from 1,178,087 tons; 1918, 40,468,000 lb. from 1,095,568 tons; 1919, (due to general curtailment) 36,460,000 lb. of copper from 1,147,659 tons of ore; 1920, 35,692,000 lb. from 1,046,331 tons of ore; 1921 (8 mos.) 18,550,000 lb. from 573,397 tons of ore.

ARIZONA COPPERFIELDS, INC.

ARIZONA

Company is dead. Was one of the many promoted by George Graham Rice. Fully described in Volume XIII.

ARIZONA COPPER-GOLD MINES CO.

ARIZONA

Office: 1011 Pabst Bldg., Milwaukee, Wis. **Mine office:** Cherry, Yavapai county, Ariz. R. H. Burmeister, pres.-gen. mgr, at last accounts.

Inc. Oct. 12, 1903, in Arizona, as **Gold Lode Mines Co.**, and reorganized, April 10, 1906, under present title. **Cap.** \$1,500,000; \$1 par. **Company** thrown into receivership and property acquired February, 1914, by bondholders, who planned reorganization and continuation of development work.

Lands: 17 claims, 340 acres, in the Cherry Creek district, 15 miles N. E. of Humboldt, including the Bugler group of 4 claims. **Development:** by several short tunnels, and the 600' Leghorn shaft, with about 3,500' of workings, on a 2' fissure vein. The ore apparently averages about 2% copper, with gold values.

Equipment: includes a 40 h. p. hoist, good for 1,000' depth, and a 3-drill air compressor. A 40-ton mill, at the Leghorn shaft, has a 10'

Lane slow-speed Chilean mill. For early history, see Vol. XI, Copper Handbook.

ARIZONA COPPER MINES CORPORATION ARIZONA

Presumably dead. See Volume XIV.

ARIZONA COPPER MINING CO. ARIZONA

Office: Tucson, Ariz.

Officers: John U. Mettler, pres.; V. Brunner, sec.-treas., Mishawaka, Ind., with Leo J. Wachs and Jos. Brunner, directors.

Inc. Aug. 1, 1901, in Arizona. Cap. \$1,000,000; \$1 par; 168,000 shares outstanding, February, 1921.

Property: 20 claims, 400 acres, 16 miles W. of Tucson, in Amole district, Pima county. Developed by 100' tunnel and 300' shaft, said to show a vein carrying 2% copper. Ore occurs in porphyry and limestone and carries much iron

Equipment: includes hoist, engine and several buildings. Developing.

ARIZONA COPPER QUEEN MINING CO. ARIZONA

Address: 814 New York Life Bldg., Kansas City, Mo.

Officers: S. C. Douglass, pres.; E. S. Herider, sec.-treas., with E. J. White, W. D. Coldren, W. Burr Douglass, W. E. Trossell and S. C. Casey, directors.

Inc. July 24, 1907, in Arizona. Cap. \$5,000,000; \$1 par; 2,641,000 shares outstanding. Annual meeting, first Tuesday in October.

Property: 8 claims, 160 acres, in Yavapai county, about 26 miles S. E. of Mayer, shows a number of narrow quartz veins in granite. The ore is quartz carrying copper sulphides and their oxidation products with fair gold-silver values.

Development: by 325' shaft and some crosscutting. Shaft in ore nearly entire depth.

Equipment: includes 75 h. p. boiler, 2 hoists, one good for 1,500', 8-drill compressor and steam power.

The company has been idle since September, 1918.

ARIZONA COPPER SHIPPING MINES CO. ARIZONA

Idle and apparently dead. Fully described in Vol. XIV.

ARIZONA CORNELIA MINES CO. ARIZONA

Probably idle. See Vol. XIV.

ARIZONA CORONADO COPPER CO. ARIZONA

Former address. E. M. Fisher, pres., Superior, Ariz.

Property: 24 claims, 9 miles, south of Superior, Pinal County. Developed by 260' shaft. Ore, copper with gold. At depth of 138', ledge said to be 13' wide of commercial ore, widening with depth.

Probably dormant.

ARIZONA DIXIE COPPER CO. ARIZONA

Officers: R. I. Schultz, pres.; J. W. Ambrose, v. p.; F. H. Larson, sec.-treas., all of Phoenix, Ariz.

Inc. 1917 in Ariz. Cap. \$1,500,000; 25c par.

Property: 13 claims, 25 miles S. W. of Hassayampa, developed by 80' shaft and 40' drift, said to show a 5' vein carrying ore that assays 4% copper, with gold and silver values.

ARIZONA EAGLE MINING CO. ARIZONA

Dead. See Vol. XIII of this book.

ARIZONA-EASTERN MINING CO. ARIZONA

Mail returned from Los Angeles, Calif. and Kingman, Arizona.

Officers and Directors: Wm. Schuette, pres.; S. W. Odell, v. p.; Lewis Lusk, sec.-treas.

Inc. July 9, 1915, in Ariz. Cap. \$1,500,000; \$1 par; issued 700,000 Bonds authorized, \$100,000, none issued.

Property: 23 claims, 1 patented, 375 acres, 2 miles east of Hancock siding, on main line of Santa Fé R. R. and 10 miles south of Kingman, Ariz., includes the Red Hill and Fay mines, showing gold quartz fissure

veins in granite porphyry. The mine was worked years ago by Mexicans. Mill tests said to show average value of \$11.78 gold per ton, with a 93% recovery in cyanide plant.

Development: by 200' incline and two 50' shafts with 400' of workings.

Equipment: includes gasoline hoist and a 5-ton stamp mill for testing purposes. Idle since 1918.

ARIZONA EMPIRE COPPER MINES CO.

ARIZONA

Mine office: Parker, Yuma county, Ariz.

Officers: W. A. Moses, pres.; Gen. E. Bouton, v. p.; L. H. Knowlton, sec.; Newton Evans, treas.; with F. X. Pfaffinger, directors; Jas. H. Watson, gen. mgr., at last accounts.

Inc. Aug., 1909. Cap. \$5,000,000; \$5 par.

Property: bought of Carnation Mining Co., comprises 41 contiguous claims, 820 acres, about 10 miles north of Parker and 3 miles from Eagle Landing, on the Colorado River. Company also has 160 acres of ranch lands on the Colorado River, including Eagle Landing, held for a smelter site. Geological conditions are markedly similar to those at the Planet and Clara mines.

Development: by about 6,000' of workings, deepest 300' showing a large amount of copper carbonate, with sulphide zone not yet reached. On the 200' level of the Carnation shaft is an orebody said to assay 5% copper and \$5 gold per ton, carrying a 10' paystreak estimated to average 10% copper and \$6 gold per ton.

Surface showing interesting and shallow excavations show irregular areas, often 50' wide, with well stained copper carbonate; much could be shipped. Development usually reveals a sheared zone, copperstained, but only a few feet wide. Throughout this region there are occasionally encountered pockets of rich gold ore with the copper. These seem to be lenses interbedded in the schist, and while one or two important orebodies have been found in the region, no mines of importance have been developed. Letters returned unclaimed and company probably dead.

ARIZONA EUROPEAN MINING CO.

ARIZONA

Office: Nogales, Ariz.

Officers: Manuel Escalada, pres.; W. M. Schuckman, sec., with Geo. Januel, directors. Jas. Ritchie, supt.

Property: the Buena Vista group. 2 miles from Patagonia, at an elevation of 5,500', said to show a 6' ledge of high grade copper-gold-silver ore.

Development: by shaft 115' deep and 700' of drifts. Average of 36' of drift opened is reported to be 2.58% copper. During 1918, shipments of about 50 tons of ore monthly are stated to have carried 12% copper, 40 oz. silver and \$3 gold per ton.

Employs 16 to 20 men. Developing at last account.

ARIZONA-GLOBE COPPER CO.

ARIZONA

Office: 110 North First Ave., Phoenix, Ariz.

Officers and directors: P. J. Hickey, pres.; Harry Kay, v. p.; with Geo. M. Mickie of Phoenix; J. T. Brown, Globe; and J. P. Hickey, Jr., mine supt.

Cap. \$2,000,000; \$1 par; listed on New York Curb. Registrar & Transfer Co., New York, transfer agents.

Property: the Cole & Goodwin mine located on N. fork of Mineral creek, 10 miles S. E. of Globe, held under lease and bond from P. J. Cole of Globe (Cole Dev. Co. q. v.).

Operations reported temporarily suspended, October, 1920.

ARIZONA GOLD & COPPER MINING CO.

ARIZONA

Clerk's office: Burlington, Vt. **Mine office:** Gleeson, Ariz. **Officers:** L. V. Hastings, v. p.; Hamilton S. Peck, sec.

Inc. July 28, 1911, in Vermont. Cap. \$100,000; \$5 par. Is successor of the Vermont & Arizona Copper Co.

Property: 11 claims, 220 acres, 4 miles from Gleeson, Cochise county, in the Turquoise district, on the western slope of the Dragoon mountains, show 2 gold and silver veins and several copper veins, giving average assays of \$6 gold and 3% copper per ton.

Development: by 230' main shaft and 2 tunnels, longest 125'. Company to have developed a large body of low-grade milling ore.

Equipment: includes steam power and 12 h. p. hoist. Property idle, owing to lack of funds.

ARIZONA GOLD RANGE MINING CO.

ARIZONA

Address: J. E. Nelson, mgr., 828 W. P. Story Bldg., Los Angeles, Calif.

Inc. in Ariz. Cap. \$150,000; 10¢ par; 750,000 shares in treasury.

Property: 7 claims, 140 acres at Oatman, shows gold bearing ore in a fissure vein.

Development: by 275' shaft. **Equipment:** includes hoist and compressor. Inactive.

ARIZONA GOLD STAR MINING CO.

ARIZONA

Company is supposedly dead. Fully described in Vol. XIV.

ARIZONA-HANCOCK COPPER CO.

ARIZONA

Idle many years. **Office:** Hancock, Mich. **Mine office:** Florence, Pinal county, Ariz.

Officers: John D. Cuddihy, res.; Alfred C. Sieboth, v. p.; Henry L. Baer, sec.-treas., with C. D. Hanchette, F. C. Mayworm and Philip Carroll, directors.

Inc. in Arizona, as successor to Arizona-Hancock Cons. Mng. Co.

Property: 4 claims, patented, 2 miles S. of Superior, showing a vein traversing 2 claims, parallel to the vein of the Lake Superior & Arizona, with diabase footwall and limestone hanging, opened by a short tunnel and a winze of 55', with drifts on 2 levels, showing lead above and copper below.

ARIZONA HERCULES COPPER CO.

ARIZONA

See Vol. XI for full description.

Stock control passed to Ray Hercules Mining Co., which sec. A bond issue of \$3,000,000 7s, maturing Jan. 8, 1924, is held by **Ray Hercules** as security for monies advanced for equipping and developing property. Interest on bonds had not been paid up to mid-1921.

ARIZONA HILLSIDE DEVELOPMENT CO.

ARIZONA

Addresses: 801 Kearns Bldg., Salt Lake City, and Hillside, Ariz.

Officers and directors: E. R. Pembroke, pres.; Philip Clark, v. p.; J. H. Winwood, sec.-treas.

Inc. Sept., 1917, in Arizona. **Cap.** \$1,500,000; \$1 par; 934,000 issued. Annual meeting second Monday in January, Prescott, Ariz.

Property: 730 acres (140 recently purchased) in Eureka district, Yavapai county, 30 miles by new road to rail at Hillside; also has 186 acres under option. Examined in April, 1919, by J. W. Neill of Pasadena, California.

Deposit is in a crushed or sheeted zone in schist, dipping 35° W. with N.-S. course. Orebody is up to 14' thick. Ore carries zinc, silver, copper and lead, shipments returning 47% zinc, 5 oz. silver, 4 to 6% lead, and 1 to 2% copper.

Development: work has been concentrated on the Copper King claim, in center of the group, by 624' incline. Reserves are estimated by Mr. Neill to be 15,000 tons of shipping ore and 10,000 tons of second-class ore. These ores carry 47.5 and 30% zinc, respectively. This tonnage is to a depth of 380'. The 400' level does not show any sulphide ore. Whether the copper content will improve at depth remains to be seen. Now drifting on 600' level.

The Rudkins-Pinto claims, 3 miles S. E. of the Copper King, are considered a good prospect for copper; while the Pinafore group, 20 miles from the Copper King carries zinc and copper.

Equipment: gasoline hoist, compressor, fan, shops, orebins, and living quarters. Power plant is insufficient for deeper exploration and company must be financed for new compressor, etc., if deeper development is to be done to prove the existence of the copper ore indicated by geologic evidence.

ARIZONA LEAD & COPPER CO. ARIZONA

Address: unknown as letters are returned unclaimed, from Wickenburg, Ariz., and from Edw. E. Northrup, pres. and mgr., El Paso, Texas.

ARIZONA MAMMOTH MINES CO. ARIZONA

Mail returned, from Needles, Ariz. W. C. Rannels, mgr.

See Vol. XIV.

ARIZONA-MAYFLOWER COPPER CO. ARIZONA

Dead. Fully described Vol. XIV. Property sold at sheriff's sale, May 1917, to Krakauer, Zork & Moyer, El Paso, Texas, and now owned by S. D. Conley, Duncan, Ariz. See Arizona Wampum Mine, Ariz.

ARIZONA MCGINNIS COPPER CO. ARIZONA

Mail unclaimed, Parker, Ariz.

Officers: B. L. Vaughn, pres.-gen. mgr., San Diego, Cal.; E. C. Fleet, sec. C. E. Boydston, supt., at last accounts.

Inc. 1916, in California. Cap. \$1,000,000; \$1 par.

Property: 13 claims, adjoining the holdings of the Empire Copper Co. about 12 miles N. W. of Parker, Yuma county, developed by 200' shaft and 200' tunnel. Ore occurs as a contact deposit in limestone and quartz schist, running N. 65° E., with 30-70° dip. The orebody is reported to be 50' wide and 200' long, opened to depth of 20', with 2' shoot of shipping ore containing cuprite, malachite and chrysocolla, said to run 10% copper and \$8 gold.

Equipment: includes 35 h. p. oil engine, compressor and 1,100' aerial tram. Several carload shipments made in 1917.

ARIZONA MERGER GOLD & COPPER CO. ARIZONA

Idle. H. C. Hillwell, S. L. Herron, Henry Reefson, Alonzo Hall, Robert M. Bazel and Geo. D. Birch, directors, at last account.

Inc. 1909, in Arizona, as a reorganization of the Lyon Copper Co. Cap. \$5,000,000; \$1 par.

Property: 64 claims, near Mayer, Yavapai county, shows fissure veins developed by a number of tunnels and crosscuts with 250' shaft.

ARIZONA & MICHIGAN DEVELOPMENT CO. ARIZONA

Mail returned unclaimed, March, 1919. Property taken over August, 1919, by Mines & Development Co., which see.

ARIZONA MIDDLEMARCH COPPER CO. ARIZONA

Office: Middlemarch, Pearce, Ariz.

Officers: W. A. Potter, pres.; D. E. Wellcome, v. p.; E. D. Elson, sec.-mgr., with F. C. Austin, D. R. Weller, H. H. Bones, Paul Legrande, W. E. Austin, J. W. A. Off, all of Los Angeles, Calif., directors. Geo. Brown, gen mgr.

Inc. Dec., 1916, to take over the property of Middlemarch Copper Co., under lease and bond. Has since acquired 8 additional claims adjoining. Cap. \$1,000,000; \$1 par; 700,000 shares issued April 1, 1919.

Property: 43 claims, over 860 acres, in Dragoon Mts., 9 miles west of Pearce. Sedimentary rocks are intruded by granite stocks and quartz porphyry dikes of great width, making contact zones of garnet, epidote, pyroxene, etc., with limestone, hematite, copper oxides and carbonates. The Cobrelena workings show a 2'-4' vein between granite and slate, with ore along a 200' drift. Most of such outcrops are undeveloped, but commercial ore is shown on the Cobrelena and Missouri claims.

Development: principal development on Missouri claim, shows a chimney of contact metamorphic ore. Stopes on fifth level 40 to 50' in

diameter. Oxidized ore was high-grade, but below a thin zone of enrichment primary chalcopyrite ore of approximately 2% copper was encountered. Workings include a 250' incline and a 300' vertical shaft. High silver values were encountered on the seventh level.

Equipment: includes compressor, hoist and steam pump. Mill is a straight flotation plant of 150 tons daily capacity erected in 1917 and operated as steadily as the limited water supply permits.

The ore is crushed to 1½" max., then fed to 6' by 6' ball mill in closed circuit with an Akins classifier, pulp going to 2 launder flotation machines. A K. & K. flotation machine is used as a cleaner. Tailing from roughers goes to a Dorr thickener for recovery of water. Power for mill and 25 k. w. alt. current generator is obtained from a 200 h. p. oil engine. Mill makes recovery of 90% of copper content, concentrates averaging 16% copper and 6 oz. silver per ton.

Shipments to April, 1919, total 51 cars concentrate and 3 cars crude ore. Enlargement of mill contemplated when mine development warrants. About 20 men employed.

ARIZONA MIDWAY MINING CO.

ARIZONA

Consolidated, 1920, with Arizona Rex Mining Co. as Western Mines Co.

ARIZONA MOLYBDENITE CONSOLIDATED

ARIZONA

Office: 300-304 Los Angeles St., Los Angeles, Calif.

Officers: Theo. F. Bentel, pres.; J. A. Brown, v. p.; J. N. Beardslee, sec.; J. C. Oscher, treas. with J. W. Dubbs, L. H. Dutton, and R. L. Van Dusen, directors. E. C. Bradshaw, supt.

Inc. Feb., 1918, in Arizona. Cap. \$500,000; 10cts. par; 3,500,000 issued. Annual meeting, third Saturday in January.

Property: 21 claims, 28 miles from Yucca, Mohave county.

Development: by tunnels which have opened molybdenum-copper ore, in quartz veins cutting granite. The veins are considerably faulted.

Equipment: includes an 80-ton flotation plant.

ARIZONA MOLYBDENUM CO.

ARIZONA

Address: F. J. Wharton, pres. Tucson, Ariz.

Inc. 1917, in Ariz. Cap. \$300,000.

Property: 10 claims, about 200 acres, in the Baboquivari mountains, Pima county, about 35 miles from Twin Buttes, slightly developed by several shallow shafts.

Ore: carrying molybdenite, chalcopyrite and galena, occurs in veins of quartz-feldspar, 4-10' wide, with S. E. strike, traversing coarse-grained granite. Samples reported to assay 2.2 oz. silver, 1.8 oz. gold and 3.9% copper. **Equipment:** a 50-ton flotation plant constructed in 1917, was reported to be producing 1,500 lb. of concentrate daily, running 18% molybdenum.

ARIZONA MOSSBACK MINES CO.

ARIZONA

Office: Oatman, Ariz.

Officers: Jesse W. Speidel, pres.; W. A. Shirley, sec-treas.; with Lee C. Paul, D. Garth Hearne, and C. H. Burlock, directors. E. A. Ritter, mgr.

Inc. Sept. 4, 1917, in Arizona. Cap. \$1,000,000; increased to \$2,000,000; \$1 par; issued 900,000. Bonds authorized, \$500,000. Annual meeting, second Monday in January.

Property: 5 patented claims, 100 acres, 4 miles northerly from Oatman, Mohave county.

Geology: andesite-porphry is cut by a fissure vein having a dip of 76° S. E. down to depth of 400', where it changes to N. W. and S. E. course. Ore-shoots are 250' and 300' long. Ore is free milling gold and silver.

Development: by 700' vertical shaft with 2,500' of underground workings.

Equipment: includes 40 h. p. hoist, compressor, 60 h. p. gas engine, pump.

ARIZONA NATIONAL COPPER CO.**ARIZONA**

Property: sold at foreclosure sale in 1920 and company dissolved. See Volume XIV. for description.

ARIZONA NATIONAL MINING CO.**ARIZONA**

Address: F. M. Anderson, Humboldt, Ariz.

Inc. July, 1916. Cap. \$250,000; increased March, 1917, to \$500,000; \$1 par.

Operates the Anderson silver-lead-copper mine, about 2 miles west of Humboldt.

Equipment: includes a small mill and flotation unit. Developing and shipping in a small way since 1917.

ARIZONA ORE REDUCTION CO.**ARIZONA**

Main Office: 1002 Citizens National Bank Bldg., Los Angeles, Calif.

Mine Office: Chloride, Ariz.

Officers: R. M. Martin, pres.; Geo. F. Goerner, v. p.-cons. engr.; C. B. Guittard, sec.-treas., with L. B. Wood, W. C. Fry, Nelson Ward, and A. F. McKee, directors.

Inc. 1916, in Arizona. Cap. \$1,250,000; issued 1,015,310 shares.

Property: 11 claims, in process of patenting, 1.5 miles S. of Chloride, Mohave county, include the Copper Age, Blossom, Diana and other mines containing 9 parallel fissure veins in granite with strike of N. E.-S. W. and dip of 70-80°, averaging about 2' wide.

Ore: carbonates and oxides of silver, zinc and copper with gold, changing to sulphides at about 60' depth; antimony also occurs. A representative sample of the sulphide ore is reported to carry: gold 0.02 oz.; silver, 6.6 oz.; lead, 2.1%; copper, 0.10%; zinc, 4.7%; antimony, 2.2%. Estimate of ore reserves are given as 138,178 tons, gross value, \$1,617,907, based on metal prices of 1918.

Development: and ore extraction, has been mainly at the Copper Age mine and includes a 360' shaft, a 2,120' working tunnel, and 1,450' of workings. On the 170' level the ore shoot is said to be 300' long, 3' wide, and worth \$40 per ton in gold, silver, and copper.

Equipment: a 150-ton wet concentrator has been used to work out the best method of treatment. The machinery on hand consists of a 7"x24" Sturtevant jaw crusher, Standard ball mills, tables and Deister slimers. To obtain an adequate continuous supply of water for milling is a serious problem. A 153,000 gallon reservoir and Dorr thickeners are now installed, and a 750,000 gal. cement tank was being built. The complex nature of the ore makes careful experimental work a prerequisite to success. Three hundred and fifty electric h. p. is used in mine and mill, auxiliary boilers in reserve. Houses, tools, compressors, etc., have been provided.

ARIZONA PACIFIC COPPER CO.**ARIZONA**

Succeeded by Ripsey Copper Co., which see.

ARIZONA PATAGONIA SILVER MINING CO.**ARIZONA**

Address: Jas. M. Layman, mgr., Patagonia, Arizona. Richard Kingdon, supt.

Officers: Jas. M. Layman, pres.; R. W. D. Barger, v. p.; John S. Eberman, sec.-treas., with J. C. Callaghan and Chas. E. Beach, directors.

Inc. November, 1919, in Arizona. Cap. \$500,000; 50c. par; 475,000 in treasury. Pittsburg Trust Co., transfer agent and registrar.

Property: 13 claims, about 180 acres, includes the Blue Nose mine, 8 miles from Patagonia, shows a contact deposit between limestone and rhyolite, with N. W.-S. E. course, reported to assay 23 oz. silver, 108% copper and 2% lead.

Development: by 213' shaft and 1,600' of workings. **Equipment:** includes 360 cu. ft. compressor and 75 h. p. engine. A 100-ton mill and flotation unit contemplated.

Reserves, estimated by management at 35-40,000 tons ore, available July, 1921.

ARIZONA PAYMASTER MINING & MILLING CO. ARIZONA

Address: Edmund E. Walton, supt., Twin Buttes, Ariz.

Property: about 27 miles south of Tucson, is an old silver-lead mine. Has shaft 100' deep.

ARIZONA PORPHYRY COPPER CO. ARIZONA

Dead. See Vol. XIV.

ARIZONA PORTLAND MINES, LTD. ARIZONA

Taken over by the **International Syndicate of Mines & Smelters** which see.

ARIZONA-RAND GOLD MINE, INC. ARIZONA

Address Kingman, Ariz.

Directors: Thad. M. Boggs, pres.-treas., Charleston, W. Va. S. S. Jones, v. p.; Chas. D. Wagner, sec.

Inc. May 27, 1921, in Arizona. **Cap.** \$1,500,000; \$1 par. Annual meeting 3rd Monday in April.

Property: 12 claims, 240 acres, includes the Roadside mine, in Union Pass district, Mohave county, 3 miles from the Katherine mine and 25 miles from Kingman, shows a quartz vein in granite, with N.-S. course and dipping W. The vein carries free milling gold ore.

Development: by 300' shaft and crosscuts on the 50', 100' and 300' levels. Reserves estimated at 36,000 tons ore blocked out. Development a depth planned for 1921.

Equipment: 25 h. p. gas hoist, 10 x 10 compressor and pump.

ARIZONA RAY COPPER CO. ARIZONA

Name changed to **New Arizona Ray Copper Co.**, which see.

ARIZONA REVENUE COPPER CO. ARIZONA

Officers: at last accounts, David F. Johnson, pres., Phoenix, Ariz.; W. L. Williams, v. p.; Oscar M. Spence, sec.-treas., Parker, Ariz., with A. J. Beecher and Paul C. Thorne, directors. H. A. Morse, supt.

Inc. Dec., 1916, in Ariz. **Cap.** \$2,500,000; 50c par; of which 2,200,000 shares were given the owners for the claims and 200,000 shares offered to the public, March, 1917, at 15c.

Property: 72 claims, about 1,400 acres, in Cienega district, Yuma county, includes the Echo, Milton, Cecil, El Moline, Revenue and Elephant groups.

Development: about 3,000' of workings, at a cost of \$40,000. A 185' shaft on the Echo group is said to show ore running better than 8% copper. The Revenue group has 2 incline shafts, 285' and 150' deep. Ore consists of hematite containing oxidized copper minerals, and occurs as a replacement of limestone lenses in schistose rocks. Surface showings are promising and warrant further development at depth. Geology of the district fully described in U. S. Geol. Survey Bull. 451.

Ore reserves: about 400 tons of high-grade ore on the dumps. Property formerly owned by E. E. Osborne. No recent returns.

ARIZONA REX MINING CO. ARIZONA

Fully described in Vol. XIV. Company absorbed 1920 by **Western Mines Corporation**.

ARIZONA SAMPLING & REDUCTION CO. ARIZONA

A Geo. M. White promotion. Operated a reduction plant at Wickenburg, handling custom ores.

Out of business.

ARIZONA SILVER QUEEN MINING CO. ARIZONA

Probably dead. Former address: care L. E. Troxel, mgr. and owner, Ray, Ariz.

Cap. \$1,000,000; \$1 par; 100,000 shares offered for sale, 1918, at 15c. to provide funds for development.

Property: 11 undeveloped claims in Mineral Hill, Pinal county. Reported to have a vein 4' wide containing some gold. Regarded as a prospect of doubtful merit.

ARIZONA SMELTING CO.**ARIZONA**

Merged with Consolidated Arizona Smelting Co. in 1914.

ARIZONA SMELTING & POWER CO.**ARIZONA**

Office: Benson, Cochise county, Arizona.

Officers: C. E. Goetz, pres.; Martin Fishback, gen. mgr.-sec.; R. L. Lee, supt.

Inc. in Arizona. Cap. 100,000 shares; \$5 par. Company was organized to purchase the old lead-silver smelter at Benson, and engage in the reduction of copper-silver-gold ores from nearby districts.

Property: 60-acre site formerly occupied by a smelter that was operated 30 years ago, treating ore from Mexico, sent in via Nogales. These operations produced 75,000 tons of neutral slag, now available for resmelting by this company. It carries 5 oz. silver, 50 c. gold, and 15 lb. copper, equal to \$8 per ton.

Equipment: modern 200-ton blast-furnace for copper ore, 32 by 100 in. at tuyeres; a No. 7 Connersville blower, 250-ton mechanical sampling plant of the Vezin type to handle car lots, crushers, boilers, engines, water-supply, etc.

ARIZONA-SOUTHWESTERN COPPER CO.**ARIZONA**

Office: 622 Higgins Bldg., Los Angeles, Cal.

Officers: R. H. Weber, pres.; Fred Hessel, v. p.; J. H. Hoffman, sec.; C. Hoffman, treas.; with W. G. Laidley, T. A. McNeal, and E. B. Schermerhorn, directors.

Inc. in Arizona. Cap. \$4,000,000; \$1 par; issued 3,300,000. Authorized bond issue, \$150,000; all outstanding.

Property: 14 claims, 9 patented, 276 acres, including the Pittsburgh mine, in Crow canyon, Cedar Valley district, Hualapai Mountains, 25 miles from Yucca, the nearest rail point. Mine has 2 orebodies, estimated to average 30' in width and to be traceable 2 miles, opened by tunnels of 500' and 682', and shafts 400' and 300' connected on the 200' level, with about 5,000' of workings. Mine, which is quite wet, shows chalcopyrite, galena and sphalerite, estimated by the company to average 0.25% copper, 3% lead, 4% zinc, 10 oz. silver and \$1 gold per ton, which seems too high for a large orebody of this type. Company claims to have 100,000 tons of \$12 ore on the 200' level.

Equipment: includes an 85 h. p. electric hoist, steel head-frame, a 12-drum air compressor, smithy and 300-ton concentrator, with 14 Overstrom tables.

Company reported to have lost its property.

ARIZONA STANDARD COPPER CO.**ARIZONA**

Office: Pacific Finance Bldg., Los Angeles, Calif. Mine address: T. J. Carrigan, mgr., Parker, Ariz.

Officers: J. P. Sweeney, pres.; W. E. Carrigan, v. p.-treas.; E. W. Gillett, sec., with F. M. Hall, T. J. Carrigan and Carl Leonardt, directors. C. J. Brinkmeier, supt.

Inc. 1917. Cap. \$5,000,000; \$1 par; permitted to sell 300,000 shares in Dec., 1920; 2,415,078 shares outstanding, April, 1921.

Property: 39 claims, 780 acres, 14 miles E. of Parker, and about 4 miles from Midway, on the Swansea railroad, reported to show surface indications of a disseminated copper deposit, samples assaying 5½-20% copper, \$2-\$4 gold, \$2-\$10 silver.

Development: by 210' shaft. A 3-compartment shaft is planned.

Equipment: 300-ton mill being installed, April, 1921. Reserves estimated by T. E. Kelso, at 400,000 tons blocked out, Feb., 1921.

ARIZONA SUPERIOR COPPER CO.**ARIZONA**

Address: 243 Washington St., Jersey City, N. J.; also 115 Broadway, New York City.

Officers: Samuel Bell Thomas, pres.; S.T. Grossman, sec.-treas.

Inc. 1920, in N. J. Cap. \$500,000; \$1 par; no bonds.

Property: Prince Albert group, 9 patented claims, 160 acres, in the Hassayampa mining district, Yavapai county, 7 miles from Prescott. Claims show an E.-W. vein, 10-20' wide, with orebodies at intersections with several N.-S. veins, that of No. 4 vein showing 11' of 6% copper ore, carrying \$19 per ton gold and 12 oz. silver per ton.

Development: by 115' shaft, with 90' drift on 100' level.

Equipment: 25 h. p. hoist, 220 cu. in. air compressor and buildings, etc. Power line on property.

ARIZONA SUPERIOR MINING CO.

ARIZONA

Office: 403 Fleming Bldg., Phoenix, Ariz.

Officers: A. A. Fairchild, pres.; V. E. Messenger, v. p.; James E. Nelson, sec.-treas., with Meade Clyne, directors.

Inc. Dec. 11, 1916, in Arizona. **Cap.** \$1,500,000; \$1 par; issued for property 722,804 shares. Annual meeting, first Tuesday in February.

Property: 17 claims and 2 millsites, about 5 miles N. W. of the Ray Consolidated, midway between Ray and Superior, Pinal county.

Prospectus reports a contact of quartzite and limestone with 2 parallel veins dipping 43° E. and several fissures or cross fractures. Veins are 2' wide on surface, widening to 12' at shallow depth, showing traces of gold, silver, copper and lead. Developed by 100' tunnel.

A prospect. Closed since the war because of excessive cost of material and labor.

ARIZONA SYNDICATE MNG. & DEV. CO.

ARIZONA

Address: E. Hunt, pres., Globe or Phoenix, Ariz.; **Other officers:** Ernest van de Vord, v. p.; L. E. Troxel, treas.

Inc. Jan., 1918, in Arizona. **Cap.** \$500,000; \$1 par.

Reported to have owned a group of 6 claims near Price, Pinal county. No record of development work.

ARIZONA TELLURIUM MINES CO.

ARIZONA

Mail returned unclaimed, from Kingman, Ariz.

Officers: Thos. H. Condon, pres.; Geo. A. Shea, sec.-treas., with Carl Beitchinger, and W. C. Pedlar, directors.

Property: claims in the Maynard district, 15 miles E. of Kingman.

Development: by 200' tunnel and shaft. Presumably idle.

ARIZONA TIP TOP MINES CO.

ARIZONA

Succeeds Tip Top Cons. Mines Co., described in Vol. XIV.

Address: P. O. Box 1209, Boston, Mass. Mine address: Carl J. Barth, Jr., res. mgr., Canon, Yavapai Co., Ariz.

Officers: J. S. Coupal, pres.-gen. mgr.; Geo. S. Adams, sec.-treas., with Carl J. Barth, Jr., L. S. Dumesnil and A. G. Gabriek, directors.

Inc. Jan., 1920, in Arizona. **Cap.** \$2,000,000; \$1 par.

Property: the old Tip Top mine, 6 claims, in Bradshaw Mts. about 25 miles S. of Prescott, also a lease and bond on the Security group of 6 claims, ¼ mile from the Tip Top, on a parallel vein.

Development: the Tip Top was originally developed to the 800' level; new work on the 350' level reported to have opened up a high grade silver ore.

Equipment: a 50-ton mill is to be installed, to treat new ore and the 40,000 tons of ore on dump and in stope fills.

ARIZONA TOM REED GOLD MINES CO.

ARIZONA

Address: Oatman, Mohave Co., Ariz. **Officers:** Geo. F. Moser, pres.-gen. mgr. Chas. S. Seeley, sec.; C. L. Moser, v. p.

Inc. July, 1915.

Cap. \$1,000,000; \$1 par; issued 657,903. Stock listed in Los Angeles and San Francisco.

Property: 7 claims, 97 acres, and a lease and bond on the Snowball group, 90 acres. all adjoining the property of Aotman Pioneer Gold Mines, Inc., on the north. Main ledge of the Pioneer continues into the company's claims.

Development: by several shafts 10' to 100' in depth, and at the 400' level by a crosscut from the Pioneer. Company was sinking a main working shaft on the Trio claim at last accounts. Presumably idle.

ARIZONA-TONOPAH MINING & MILLING CO. ARIZONA

Office: 503 Delta Bldg., Los Angeles, Calif. **Mine office:** 30 E. Congress St., Tucson, Arizona.

Officers: Jos Dixon, pres.; Alfred Auger, v. p.-sec.; Geo. Ankers, treas.-gen. mgr. A. J. Harchberger, supt.

Inc. Jan., 1916, in Arizona. Cap. \$1,000,000; \$1 par; 750,000 outstanding. Annual meeting, first Monday in January.

Property: about 1,050 acres, in Amole district next to the Arizona Tucson and Saginaw mines in Pima county, 9 miles S. W. of Tucson, shows granitic schists, limestone, andesite and rhyolite, carrying a sulphide deposit, said to assay from 1-5½% copper, with gold and silver.

Development: by 185' tunnel with several shafts, deepest 145'. Development at depth and installation of mill planned.

ARIZONA-TUCSON COPPER CO.

ARIZONA

Office: Hibernian Bldg., Los Angeles, Calif.

Officers: Harwood Robbins, pres.; Riverside, Calif.; J. J. Freeman, sec.; Glendale, Cal.; B. F. Dogett, treas.; T. E. Kelso, gen. mgr.

Permitted to sell shares in Dec., 1920, and again in Sept., 1921.

Property: 32 patented claims, in Amole district, next to the Arizona-Tonopah and Saginaw mines, 8 miles S. W. of Tucson. Ore carries gray copper, and selected samples assay about 26½% copper, \$18 gold, and 12 oz. silver per ton.

Development: by shaft and lateral work. Good ore reported cut on the 650' level, January, 1921.

Equipment: 60 h. p. Fairbanks-Morse crude oil engine, 20 h. p. distillate engine, hoist, head-frame, dwellings, etc. Several carload shipments of ore have been made.

ARIZONA UNITED MINING CO.

ARIZONA

Office: 1420 Chestnut St., Philadelphia, Pa. **Mine office:** Johnson, Cochise county, Ariz.

Officers: Alfred S. Miller, pres.; Alfred C. Harmer, Jr., v. p. gen. mgr.; David H. Ross, treas.; Alfred H. Miller, sec., with Chas. B. Cox, Geo. E. Barnett, M. D. Brown, W. M. Houston, J. N. Stetson, J. K. Kane, G. M. Jones and Earl P. Mendelhall, directors. J. M. Libby, mgr. Kirby Thomas, cons. engr.

Inc. Aug. 12, 1910, in Arizona, as successor to Arizona United Mining Co. of Delaware. Cap. \$5,000,000; \$1 par; \$2,500,000 outstanding.

Dividends: 1% quarterly, begun October, 1916. Company is a close corporation.

Treasurer's statement for year 1918 showed total receipts of \$208,247, including \$161,541 from ore shipments. Disbursements totalled \$192,270, including \$25,000 paid on purchase of lease from Goodrich-Lockhart Co. Cash on hand, Dec. 31, 1918, \$15,976.

A 10-year lease on the property given to the Goodrich-Lockhart Co. in 1913, was surrendered July, 1918, for \$75,000, property reverting to the company. During the life of the lease the Arizona United paid all debts, including the mortgage, and distributed \$100,000 in dividends from its 45% of net earnings received. The \$75,000 payment to the Goodrich-Lockhart Co. was also paid out of royalty under the lease. These earnings came from ore containing 4% or more copper.

Property: 45 claims, 30 patented, 900 acres, 7 miles N. E. of Dragon, in the Johnson mining camp including the Mammoth, Republic Copper King and Southern group. Principal development is on the Republic claim, opened by a 1,500' shaft, with about 1,200' of lateral workings. The most important ore deposit developed after the company resumed

control was between the 900' and 1,100' levels, where there has been exposed a deposit 150' long, 11' average thickness, 150' on the dip, with the bottom not reached; assays from this deposit are said to average 6.2% copper. Another deposit, but of lesser importance has been opened on the 900' level. At the time of suspending operations, Feb. 1, 1919, on account of low price of copper, company states it had enough ore blocked out to give a daily output of 200 tons for sixty days. In addition an ore deposit on the Mammoth claim has been opened up by lessees. The mine has a considerable tonnage of low grade ore opened up.

Equipment: includes a 200 h. p. oil-burning boiler, with hoists at the Republic and Mammoth mines, an electric plant, 4 electric drills and an air compressor. Transportation is by a standard-gauge railway from Johnson to Dragoon, connecting with the Southern Pacific Railway.

During first 6 months of 1918 lessees shipped 24,902 tons of ore, with a value of \$290,216, and in last 6 months the company shipped 18,041 tons, value, \$174,223, while the Mammoth furnished 2,480 tons of ore with net smelter value of \$38,196. No record of 1921 work.

ARIZONA VENTURE CORPORATION **ARIZONA**

Reorganized as the Waldron Mining Co., which see.

ARIZONA VERDE COPPER MINE CO. **ARIZONA**

Presumably dead.

Mail returned from the advertised postoffice address: care W. M. Lazenby, P. O. Box 814, Phoenix, Ariz.

Property: 26 claims, near Clarkdale, a $\frac{3}{4}$ interest in 16 claims in the New River district and 41 claims in the Cave Creek district, all in Yavapai county. Company also had a 2-year option on 1,700,000 shares of stock in the Golden Reef Mining Co. (which see), owning the Golden Reef mine, 35 miles from Phoenix. Offered stock at 50¢ a share, May, 1917, solely on the prospective value of its holdings, calling itself "a corporation, with the possibilities of another Guggenheim Exploration Company," which is interesting if true.

ARIZONA VICTORY MINING CO. **ARIZONA**

Address: R. B. Cross, treas., Room 916, 30 Broad St., New York.

Controlled by U. S. Continental Mines Co., a promotion of Irving K. Farrington & Co.

Cap. \$750,000; 50¢ par; 400,000 shares in treasury after issuance of 200,000 shares of treasury stock offered at 6¢ a share, Dec. 1920.

Property: that of Mark Bradley in the Walker district, adjoining the Sheldon, 14 miles from Prescott, opened by 500' of workings, showing gold, silver and copper ore. A two-compartment shaft is down 78'.

Equipment: includes 60 h. p. hoist, Cameron pump, buildings, etc.

ARIZONA VIRGINIA COPPER CO. **ARIZONA**

Selling agent, T. D. Hosmer, 306 Colorado Bldg., Colorado Springs, Colo.

Officers: G. W. Lewis, pres.; E. C. King, sec.-mgr., with George S. Elstrum and George Birdsell, directors.

Cap. \$1,500,000; \$1 par; outstanding 550,000 shares; including 250,000 shares paid to former owners for property; \$20,000 cash still due.

Property: 14 claims in the Castle Creek district, Yavapai county, said to show two lodes, 40' to 50' wide, traceable for 3,500', forming a junction at the N. W. end of the property, on which small prospect holes have been sunk. Now driving two tunnels at depths of 250' and 350'. Shipments reported of 269 tons of ore yielding 15% copper. Ore is hauled 32 miles to railroad at Hot Springs Junction. Reported on by Louis S. Noble.

ARIZONA WAMPUM MINE **ARIZONA**

Address: S. D. Conley, owner, Duncan, Ariz.

Property: 40 claims, formerly owned by the Arizona Mayflower Copper Co., in the Mayflower district, Greenlee county, 10 miles from Dun-

can. Ore occurs as sulphides and oxides in fissure veins, 7' to 10' wide, dip 55° S. W., course S. E.-N. W., with dacite foot and limestone hanging wall; reported to average 5 oz. silver, 2.5% copper and 9 oz. silver, 7% copper, with \$2.50 gold per ton. Developed to a depth of 100' by 3 shafts and 160' tunnel. Equipped with compressor, drills, gasoline engine and hoist.

ARIZONA WESTERN MINES CO.**ARIZONA**

Address: W. H. Little, 33 Fremont St., San Francisco.

Officers and directors: A. T. Dunbar, pres.; F. H. Crafts, v. p.; W. H. Little, sec.-treas.

Inc. 1913, in Arizona. Cap. \$1,000,000; \$1 par; 605,549 shares issued.

Property: 7 patented claims, 123 acres, at Chloride, Mohave county.

Ore contains gold-silver lead-zinc.

Development: by 250' shaft and 1,000' tunnel. Inactive several years.

ARIZONA YUCCA MINES CO.**ARIZONA**

Offices: 934 Central Bldg., Los Angeles, Calif.; 320 Fleming Bldg., Phoenix, Ariz. Mine office: J. R. Rawl, supt., Yucca, Ariz.

Officers: R. W. Coleman, pres.; F. E. Blessington, v. p.; N. K. Potter, 2nd v. p.; D. M. Lacey, sec.-treas.-mgr.

Inc. April, 1920, in Arizona. Cap. \$1,000,000; par \$1; 370,685 shares issued in payment for Franconia property, but held in escrow.

Property: 22 claim. 320 acres, includes James Rawl group and former holdings of the Franconia M. & M. Co., in Buck Mts., 46 miles S. W. of Kingman and 12 miles S. of Franconia on the Santa Fe R. R.

Development: by shafts to depth of 215', said to cut several fissure veins averaging 5' in width and running \$20 per ton in gold content.

Management plans deep development and installing necessary equipment.

ARIZONA MINING CO.**ARIZONA**

Probably dead. See Vol. XIV.

ARKANSAS & ARIZONA COPPER CO.**ARIZONA**

Office and mine: Jerome, Yavapai county, Ariz.

Officers at last accounts: John F. Boyle, pres.; H. P. Tear, v. p.; J. E. Leeper, mgr., Jerome, Ariz.; H. N. Jasper, sec.-treas., Little Rock, Ark., and W. D. Tickner, directors; W. H. Galligan, supt. Controlled by the Goodrich-Lockhart Co., 60 Broadway, New York.

Inc. June 25, 1906, in Arizona. Cap. \$1,500,000; increased Jan., 1912; to \$3,000,000, and 1916 to \$6,700,000; \$1 par. Company refinanced in 1915 and bond issue of \$150,000 authorized for further development work; \$68,800 issued.

Property: the Royal Irish group, 14 claims, 280 acres in the Verde district. Claims show felsite porphyry and diorite cut by olivine basalt dikes running north and south and dipping 60° to the east. Orebodies lie on each side of the basalt in the porphyry and quartz schist. Orebody said to be 85' wide where encountered on 1,400' level and shows chalcocopyrite and some bornite. Extent of shoot not yet determined. Company acquired the adjoining claims, 230 acres, of the **Mowles Copper Co.** in May, 1916.

Development: by 1,650' shaft with about 6,000' of workings.

Equipment: includes three 150 h. p. boilers, hoist good for 2,000', air compressors, machine shop, power house, and a mile of road, connecting with United Verde Copper Co. railroad.

The property was shut down indefinitely, August, 1917, after spending \$100,000 in a crosscut on the 1,000' level. The pumps are out, but conditions warrant drifting on the pyrite bodies cut in the crosscut, in the hope of getting copper ore.

ARMOUR MINING CO.**ARIZONA**

Idle. Former address: J. A. Armour or E. A. Williams, 311 N. First St., Phoenix, Arizona.

Property: 900 acres located 16 miles east of Florence and 5½ miles from Price, Pinal county.

Reported prospecting with churn-drills in 1918.

ASH CREEK GOLD MINING & MILLING CO.

ARIZONA.

Address: Winkelman, Ariz.

Officers: E. W. Childs, pres.; J. H. Pool, v. p.-mgr.; F. M. Pool, sec.-treas., with P. M. Butler, and E. Rargel, directors, at last accounts.

Inc. in Arizona. Cap. \$1,000,000; \$1 par; 150,000 shares outstanding.

Property: 10 claims, 200 acres, 5 miles E. of Winkelman, Gila Co., Ariz.

Ore: occurs in fissure vein, 4' wide, in andesite, diorite and diabase, said to show a 30" shoot of sulphide ore, assaying 0.42 oz. gold and 2.13% copper.

Development: by tunnels and shaft, totaling 600'. Property reported on by R. W. Hollis, Los Angeles, who recommended development at depth and erection of a small mill.

ASH PEAK EXTENSION MINING CO.

ARIZONA

Address: J. Horgan, Duncan, Ariz.

Inc. 1917, in Arizona.

Property: 14 claims in the Clifton district, said to show good gold-silver values at surface.

Development: by 500' shaft and drifts on a vein said to be 9' wide, assaying 25-30 oz. silver per ton. Shipments of 20 tons daily from development work reported made to El Paso smelter, September, 1920.

ASH PEAK MINES CO.

ARIZONA

Address: Arthur Murphy, Jr., mgr., Duncan, Ariz.

About 30% or \$90,000 of the issued stock is owned by the Gold-field Cons. Mines Co., Nev.

Property: claims in the Duncan section below Clifton, said to show good gold and silver values. **Development:** by 800' Shamrock and 500' Commerce shafts, with about 8,000' of drifting on vein, said to develop ore-bodies averaging 14 oz. silver and \$1 gold per ton.

Equipment: includes compressor plant and new hoisting machinery. A 100-ton cyanide plant under construction.

ATLANTIS MINING CO.

ARIZONA

Address: Payson, Ariz. J. D. Riley, gen. mgr.

Property: Ox Bow mine, 15 claims, 7 miles S. of Payson, said to show a 6' vein of free milling ore. New equipment being installed and development work on 200' level underway.

ATLAS COPPER CO.

ARIZONA

Inc. 1917, in Arizona. Cap. \$1,000,000; \$1 par. Is a reorganization of the San Juan Copper Co.

Property: the San Juan mines, 13 claims, 260 acres, in the Lone Star district, Graham county, 8 miles N. of Safford. Ore occurs in veins in granitic porphyry traversing diorite and is said to average 3.6% copper, with gold and silver values. Developed by 330' main shaft, 750' of drifting, and 2,500' of diamond drilling, and equipped with hoist, compressor, churn-drills, and pump.

Shipments in 1916 to Douglas and El Paso smelters said to have netted the company \$50,000. No output during 1917 and 1918.

Property closed mid-1919, and company in bankruptcy.

ATLAS DEVELOPMENT CO.

ARIZONA

Had an option on the Lake Shore mine, near Casa Grande. Ceased operations 1919, and has gone out of business. Described in Vol. XIII.

ATLAS MINING CO.

ARIZONA

Defunct. L. & K. W. Gano, Cincinnati, Ohio, owners. J. F. O. Reilly, Silverbell, Arizona, agent.

Property: 6 claims, 5 mill sites, all patented, one mile N. W. of the Silverbell post office. Property located 1879, and equipped with 40-ton

smelter in 1888, which operated for years on rich surface ores, but, unable to handle sulphide ores at a profit, was closed down. Operation by lessees since then, with extraction of small tonnages of rich copper sulphide ore and of zinc carbonate.

AUSTERLITZ GROUP OF MINES**ARIZONA**

Owned by A. H. Noon, Nogales, Ariz. Under lease and option to Camphius & Rives, of El Paso, Texas.

Property: 5 claims, about 100 acres, in Oro Blanco district, Santa Cruz county.

Development: by 150' shaft and 2 tunnels, 600' and 300' long, said to show quartz fissure vein in porphyry assaying from \$4 to \$40 in copper, gold and silver. Ore shipments, totaling over \$200,000, said to have been made to date. The property has been an intermittent producer.

AZTEC MINES CO.**ARIZONA**

Apparently dead. See Vol. X of the Copper Handbook.

AZTLAN GOLD SYNDICATE**ARIZONA**

Address: Hiram Whitcomb, Patagonia, Ariz.

Inc. 1920 as a close corporation and reported to have taken over the holdings of the **Lavell Gold Mining Co.**, fully described in Vol. XIV.

Property: the Apex group, 19 claims, 386 acres, in the **Banner** district, 6 miles N. of Hayden Junction. Ore contains gold, copper, silver-lead. Developed by tunnels and shallow shafts. **Equipment:** includes 50-ton mill.

Management plans building aerial tramway and enlarging mill to 100-ton capacity.

BACHMAN-MERRITT METALS CO.**ARIZONA**

Address: Nogales, Ariz., or R. T. Barton, Prescott, Ariz.

Property: the old Tres de Mayo mine, 10 claims, in **Palmetto** district, 14 miles N. E. of Nogales, said to contain vanadinite and silver ores. Main vein is a well-defined fissure in mononite, with a width of 10 to 50'. Reserves are estimated at 8,000 tons of vanadinite. Shaft is to be sunk to 600' and a mill erected.

In 1920, a lease was taken on the **World's Fair** mine in the **Patagonia Mtns.**, credited with a past production of \$1,000,000. The ore is a sulphide, carrying silver, lead, gold and copper. For geology see U. S. G. S. Bull. 582.

Development: at **World's Fair**, by 15,000' of drifts, tunnels, stopes, shafts and winzes, to depth of 600'.

Equipment: includes concentrator, flotation plant, crushers, compressors, hoists, drills and necessary buildings.

BAGDAD COPPER CO.**ARIZONA**

Name changed to **Arizona Bagdad**, which see.

BALLARD GROUP**ARIZONA**

Address: F. C. Bolen, 312 E. Van Buren St., Phoenix, Ariz.

Property: 7 miles south of Palo Verde station, on the **Arizona Eastern** line, **Maricopa** county, a few miles north of **Rawley** mine.

Examined by D. C. Nicholson in June, 1919, who says that the formation consists of altered schist, much decomposed. Three immense "bars" of red oxidized silicious porphyry which run through the ground from north to south, seem to be favorable for prospecting. Secondary enrichment is expected at depth, as the rock at surface has been leached. Drilling is suggested.

Development: by open-cuts and two 30' shafts. In most of the trenches the ore exposed is said to carry from 3.8 to 31.35% copper.

Mine formerly operated by the **United Verde, Jr. Co.** and the **United Verde Cons. Co.**

BALL COPPER CO.**ARIZONA**

Office: 416 Investment Bldg., Los Angeles, Cal. **Mine office:** Hayden Junction, Gila county, Ariz.

Officers: Chas. E. Finney, pres.; F. B. Pugh, v. p.; Robt. J. Simpson, sec.-treas., with S. F. Parrish and D. Carl Kurtz, directors.

Inc. Feb. 1, 1908, in Arizona. **Cap.** \$3,000,000; \$10 par; \$1,250,000 issued. Bonds, \$9,000 outstanding at 6%. Annual meeting, third Tuesday in January. Company owns 40,000 shares of the London Arizona Consolidated Copper Co., and has transferred its mineral claims to that company; they are described under that title.

BALTIC MINING CO.**ARIZONA**

Address: W. K. Ridenour, pres.-mgr., Oatman, Ariz.

Officers: W. K. Ridenour, pres.-treas.; J. L. McIver, v. p., with Geo. MacKay, directors. L. G. Hand, sec.

Inc. 1920, in Arizona. **Cap.** \$300,000; 20c par; 600,000 shares issued.

Property: 8 claims at Oatman, Mohave county, shows gold bearing ore in a fissure vein. No development work done.

BANNER GOLD MINING & MILLING CO.**ARIZONA**

Office: Kingman, Ariz.

Officers: B. L. Vaughn, pres., San Diego, Calif.; J. C. Brian, v. p.; E. E. Bollinger, sec., Kingman, Ariz.

Cap. \$1,000,000; \$1 par; issued 779,250 shares; 500,000 shares paid for property. May, 1918, offered 50,000 shares at four cents.

Property: 9 claims in the Union Pass section of San Francisco district, Mohave county. Mine is said to carry the extension of the rich Sheep Trail vein, and a 400' shaft has been sunk on milling ore. Shipping ore reported on 400' level in drift 300' west of shaft.

BARBARA MINE**ARIZONA**

Formerly owned by **Monte de Cobre C. Co.**

Address: Robertson & Walker, owners, Mayer, Arizona.

Property: on South Copper Mtn., near Mayer, Yavapai county, shows chalcopryite and oxidized copper ore.

Development: by shaft and adit tunnel, opening up 7' of 15% copper ore. Idle, pending an improvement of the copper market.

BARNEY COPPER CO.**ARIZONA**

Absorbed with the Porphyry Copper Co. by **Porphyry Consolidated Copper Co.**, which see.

BEACH MINES, INC.**ARIZONA**

Address: 38 N. Church St., Tucson, Ariz. Arthur Cook, supt.

Officers: Geo. N. Beach, pres.-gen. mgr.; John B. Wright, v. p.; Wm. Truehart, sec.-treas., with Jas. M. Treahey, J. W. Hopkins, Geo. R. Darnell, all of Tucson, and Arthur Allen of Dallas, Texas, directors.

Inc. June, 1917, in Ariz. **Cap.** \$2,500,000 \$1 par; 1,000,000 shares issued.

Property: 40 claims, 800 acres, in Ventana and Baboquivari mining districts, Pima county, 65 miles S. W. of Tucson, said to show veins in quartz-schist with copper, gold and silver values.

Development: by tunnels and 125' shaft. Sinking to 400' depth. Property is in the prospect class.

BEE HIVE GOLD CO.**ARIZONA**

Office: Hotel Zeiger, El Paso, Texas. Chas. Zeiger, pres.

Cap. \$100,000; 25c par.

Property: 9 patented claims, adjoining the Octave mine, near Congress Junction, Weaver district, Yavapai county. **Ore:** carrying gold values occurs in quartz vein on contact between granite and schist.

Management claims to have spent \$60,000 in development work, driving tunnels, 1,000' and 2,000' long respectively, and to have 10,000 tons of \$8 ore on the dump besides 500,000 tons blocked out above tunnels and between two winzes sunk below the tunnel level.

Equipment: engine, compressor and drills. Idle.

BEEMER CONSOLIDATED GOLD & COPPER CO. ARIZONA

Owens the Stormcloud Mine at Mt. Union, 12 miles S. of Prescott, Yavapai county, Ariz. Idle.

BELCHER MINE ARIZONA

Formerly part of the Belcher Mining Co., but bought at tax sale by George Demain, Prescott, Ariz.

Property: 5 claims, including the Belcher, Mammoth and the Eugene in the Big Bug district, 13 miles south of Prescott. Vein carries gold and silver, reported to average \$5.90 per ton.

Said to be under option 1919 to John R. McEwen and E. C. Evans representing Phoenix parties, for \$100,000.

BELCHER MINING CO. ARIZONA

Defunct and assets reported sold for taxes. Fully described, Vol. XII. See Belcher Mine and Red Rock Mine.

BELLA UNION MINE ARIZONA

Mine at Chloride, Mohave county, Ariz.

Operations were to be resumed in 1920 and 125' shaft sunk to 500' level. Mine is equipped with a 10-ton cyanide plant. C. H. Fay and C. B. Schoenmehl reported in charge.

BERKLEY MINE ARIZONA

Address: T. J. Sparks, Kingman, Ariz.

Property: an old silver mine in the Deluge Wash section. Was pumped out, and said to be operating through a 40' shaft on a 6' vein, from which high-grade ore was mined.

BIG BLUE MINING CO. ARIZONA

Mail returned unclaimed, from Constellation, Arizona.

Fully described in Vol. XIV.

BIG BUG COPPER CO. ARIZONA

Office: Mayer, Ariz.

Officers: Frank Thornton, pres.-gen. mgr.; E. B. Bunker, v. p.; Uri Embody, sec.-treas., with Frank W. Giroux and Jas. Hill, directors.

Property: 6 claims, 5 miles east of Maver, Yavapai county; 21 claims, adjoining the Blue Bell, 2 near the smelter at Mayer, and 2 on Copper mountain.

Development: work on the Copper mountain property consists of shaft now 235' deep, reported in ore assaying from 15 to 45% copper. Ore is a sericitic schist containing lime spar shot through with chalcopyrite and black oxide of copper. A 30' shaft, 1,000' away, is stated to show the same ore with more glance and gray copper. Machinery was installed in Aug., 1919. Property to be developed to depth of 500' when necessary capital is available. Is a promising prospect.

BIG BUTTE COPPER CO. ARIZONA

Address: H. E. Shumate, sec., Prescott, Ariz.

Officers: Geo. L. Reed, pres.; Ed. Shumate, v. p.; Geo. C. Ruffner, treas.

Inc. April, 1917, in Montana. Cap. \$1,500,000; \$1 par.

Property: 43 claims in Copper Basin district, 12 miles from Prescott, developed by tunnel, shafts and open cuts, from which some copper and silver ore has been shipped. Reported driving tunnel to cut vein at point below rich outcrop. Idle in 1920-21, pending improved conditions in copper industry.

BIG COPPER CHIEF CO. ARIZONA

Address: care Thomas Boyd, pres., Mound City, Ill.; S. E. Jordan, sec.-treas., Phoenix, Ariz.; R. E. Grace, v. p. **Mine address:** Canon, via Bumblebee, Ariz.

Property: the Jasper N. Nellis groups, 1½ miles S. W. of Bumblebee, Yavapai county, shows schist mineralized by copper glance, etc., in a zone 300' wide.

Developed by 50' shaft, 250' tunnel and many pits.

BIG DOME MINES**ARIZONA**

Owner: C. Benjamin Hayes, care Walker Stage, Prescott, Ariz.

Property: 4 patented claims, in Walker district, Yavapai county, about five miles W. of Prescott. Reported showing an 8' fissure vein in porphyry andschist, with gold, silver and lead values from \$8 to \$200 per ton in a 10-inch streak. **Developed** by vertical shaft 85' deep, equipped with 3 h.p. hoist made by owner, small compressor and pump.

Expended \$1,800 in 1918; planned to continue sinking.

BIG JEROME COPPER CO.**ARIZONA**

Mail returned unclaimed, March, 1919, from Los Angeles, Calif., and from former Fiscal Office, Arizona Securities & Trust Co., Phoenix, Ariz.

Officers: L. L. Wallace, pres.; F. M. Dorsey, v. p.; Fred T. Sheppe, sec.; with C. T. Talbert and J. B. Bourne, directors.

Inc. in Arizona. **Cap.** \$2,500,000; 25c. par; 5,000,000 shares given in payment for property are pooled, balance said to be treasury shares.

Property: 32 claims, about 640 acres, 1½ miles S. W. of the United Verde Co. and adjoining the Pittsburgh Jerome property and the Copper Shoe group in the southern part of the camp, near the Shea group.

Company's promotion stock was advertised luridly at 10c. a share in December, 1916, during the Jerome boom.

No development work of importance has been done on the property. Unfavorably regarded. New York Tribune showed it to be a twin fake of the Ray Arizona of Wilson & Co.

BIG JIM CONSOLIDATED MINING CO.**ARIZONA**

Office: 591 I. W. Hellman Bldg., Los Angeles, Calif. **Mine office:** Oatman, Mohave county, Ariz.

Officers: C. C. Spicer, pres.; Lester M. Dull, v. p.; S. M. Warmbath, sec.-treas., and Elmer M. Bray and C. W. Pope, directors. A. G. Keating, supt.

Inc. 1917, in Arizona. **Cap.** \$1,500,000; \$1 par; 1,250,000 shares outstanding. Stock listed on Los Angeles exchange. Is the successor of **Big Jim Gold Mng. Co.**, which see.

1,000 shares sold for \$12 the lot at public auction in New York on Dec. 22, 1920.

Property: 7 claims in the Tom Reed-Gold Road region. The Bluebird group, W. of the Tom Reed, shows gold bearing veins in andesite.

Development: by 400' shaft on the Bluebird group, reported to cut the vein in a crosscut on the 200' level.

Equipment: includes 25 h. p. gasoline hoist and compressor. There has been no production and property is still in the development stage. Idle.

BIG JIM GOLD MINING CO.**ARIZONA**

Dissolved by vote of stockholders, April 24, 1917. The Big Jim and Monarch claims were sold to the **United Eastern Mng. Co.** in 1917, the owners of Big Jim G. Mng. Co.'s stock receiving one-sixth share of United Eastern stock and one share of Big Jim Cons. Mng. Co. stock for each share of old stock.

BIG LEDGE COPPER CO.**ARIZONA**

Successor to Big Ledge Dev. Co.

Office: 512 Sellwood Bldg., Duluth, Minn. New York office: 7 Dey Street.

Mine address: W. W. Lytzen, mgr., Huron, Ariz.

Officers: John Borg, pres.; Nelson Gray, v. p.-treas.; William C. Sherwood, sec., with Joseph B. Cotton, M. C. Cole, Alexander Garbe and H. A. Bingham, all of New York, directors.

Inc. Jan. 20, 1915, in Arizona. **Cap.** \$15,500,000; in 3,000,000 shares common and 100,000 preferred; \$5 par; 2,865,587 common shares outstanding. Registrar and Transfer Co., transfer agent; Empire Trust Co., registrar; both of New York. Listed on N. Y. Curb; quoted in 1921, high 30c., low 13c.

Financial statement for year ended Dec. 31, 1918, showed receipts from sale of shares, \$220,883 and \$102,278 from sale of ore; disbursements totaled \$358,196. Current assets were \$94,690; liabilities, \$168,991.

In June, 1918, the former management was succeeded by the same interests that control the Callahan Zinc Lead Co. of Wallace, Ida.; under the new control, payment on all claims under option was completed, and systematic development of the mine begun.

In October, 1921, it was officially announced that pfd. stock was being sold to provide capital to liquidate \$128,000 of debts.

Property: two groups, a mile apart; (1) the **Henrietta**, 7 patented and 12 unpatented claims, forming a compact tract covering 5,750' along the Henrietta vein, and (2) the **Butternut**, of 2 patented claims and 10 locations, surveyed for patent, covering 7,500' along the main line of mineralization.

Henrietta Group

The Henrietta mine was in the nineties a steady producer of gold ores from the oxidized portion of the Henrietta vein. The ore occurs in bands in a fissure vein averaging 5' in width, and contains cuprifera pyrite, chalcopyrite, a small amount of zinc and lead sulphides and quartz. All the sulphides carry gold and silver, the average grade being about 3.25% Cu, \$4.00 gold and 2 oz. silver.

Development: comprises a main haulageway, 2,300' long, with the Henrietta incline shaft at the 2,000' point. The shaft is 600' deep with levels at 150, 300, 450 and 600'. The first level runs 1,100 feet north and in Nov., 1921, had entered one of the main shoots of gold ore mined 60' above this level in the early days of the Henrietta. A 5' face, sampled 4.81% Cu., \$3.20 gold and 4.12 oz. silver, showing that below the oxidized zone good ore is to be found. The face is 1,500' from the end line, where on this same vein in the Gladstone-McCabe mine immediately north of the Big Ledge, rich copper-gold ore was mined 1,000' feet lower than the Big Ledge level. A raise 600' to 450' samples 3.9% copper, \$5.50 gold, 8.2 oz. silver. Other levels about 400' north of the shaft are connected by raises. Stopes have been started and necessary chutes and manways built.

Butternut Group

This group is on the schist side of the contact, and the ore zone shows sulphide replacement for width of 10 to 20'.

Development: by a 3-compartment shaft, which should reach the mineralized zone at about 800', where lateral development will be done. Though the Butternut has no ore reserves actually blocked out, the new work is expected to develop a wide zone of concentrating ore that can be mined by low-cost methods, because surface indications and the shoot already mined up to the surface make this a reasonable expectation.

Equipment: both mines have electric power, high voltage lines going on each property, compressors, shops, dries, etc.

Mill: of 100 tons initial capacity was completed in 1920, to treat the ore already developed in both mines. It follows standard practice throughout. Crushers are followed by a Hardinge ball mill to 12 mesh and tabling; the tails being reground to 48 mesh in a 4 by 10' tube mill and then flotation. All the concentrates being dewatered in an Akins classifier. The overflow after being thickened going to a Portland Filter. The concentrates are carried by a conveyor to the loading bin on the railroad 200' from the mill.

The Santa Fe Ry. has a spur to the Henrietta ore-bins and a 3,800' aerial tram will convey Butternut ore to the mill.

With the mill completed, the Henrietta mine should make a fair profit over its cost of operation as soon as conditions are normal. It must be admitted however that the 1921 price of the stock, about 33c., gives a current valuation of \$3,000,000, which is excessive for the property and

its prospective earnings. The hope that bonanza orebodies may be found to the north, near the McCabe Gladstone line, while natural, is not a fact that can be capitalized.

BIG LEDGE DEVELOPMENT CO. ARIZONA

Merged into **Big Ledge Copper Co.**, which see.

BIG PINE CONSOLIDATED MINING CO. ARIZONA

Address: C. H. Dunning, mgr., Prescott, Ariz.

Officers: A. Bjorkman, pres.; Richard Lamson, sec.; A. Berquist, treas.; with Felix Durochur and C. H. Dunning, directors.

Inc. April 30, 1915, in Arizona. Cap. \$500,000; \$1 par; outstanding, \$400,000. Annual meeting 1st Monday in April. Commercial Trust & Savings Bank, Prescott, registrar. Is a consolidation of the Big Pine Mng. Co., and the Lake Superior & Western Mng. Co., each of companies receiving 200,000 shares for its property.

Property: 14 claims in Senator district, 12 miles south of Prescott, which show gold ore in 3 parallel veins.

Development: by 7 tunnels, principally on a vein claimed to show ore for 700' in one tunnel, 1,100' in a second, 1,600' in a third, and 400' in a fourth. Company claims ore reserves of 60,000 tons with average grade of \$9.50 per ton.

Mill: the 100-ton cyanide plant of the Mascot mine, Lake Sup. & Western Co., was moved to the Big Pine property and erected near portal of tunnel No. 6. This treated 5,000 tons of ore said to average \$10.00 per ton, making an extraction of about 93%. The plant was burned and the property was closed down in October, 1918, owing to prevailing excessive costs of reconstruction.

BIG REEF COPPER CO. ARIZONA

Address: Box 857, Prescott, Ariz.

Officers: O. G. Griffin, pres.-mgr., Phoenix, Ariz.; L. F. Wilson, v. p.; R. E. Donovan, sec.-treas., with Frank Giroux and Judge M. K. Knapp, directors.

Inc. in Ariz. Cap. \$1,000,000; \$1 par; 519,997 shares in treasury.

Property: 19 claims, 380 acres, located 2¼ miles from Mayer, in Big Bug mining district, Yavapai county, Ariz., formerly owned by **Great Western Sm. Co.** The mines of the **Cons. Ariz. Smelting Co.** and **Big Ledge Copper Co.** are but a few miles distant. Claims cover an area of Yavapai schist traversed by a wide zone of silicification containing disseminated copper ore chiefly oxidized, with segregations in quartz veinlets.

Development: about 300' of shallow work has been done to date and chalcopryrite ore reported in 60' shaft. Property favorably reported on, 1917, by J. H. Shockley, of New York and Val De Camp of the U. V. Copper Co.

Equipment: compressor, gas engine, hoist. Company inactive

BIG SEVEN GROUP ARIZONA

Near Harrington, Yavapai county, Ariz. Mine, developed by 1,200' tunnel, shows a well-defined vein with high value in gold, silver and copper.

Mail returned unclaimed; presumably idle.

BILLIE MACK MINING CO. ARIZONA

Dead and former property reported to be owned by **Illinois Arizona Copper Co.**, which see.

BISBEE AJO COPPER & DEV. CO. ARIZONA

Officers: W. E. Holm, representative, Bisbee, Arizona; Ed. Sweeney, pres. and gen. mgr.

Cap., increased during 1917 from \$650,000 to \$3,000,000.

Property: consists of 2 groups; the first of 9 claims, 5 miles from the Mexican border, has a shaft 140' deep; assays are said to have shown from 3% to 73% copper; shales and porphyry predominate. The second group of 26 claims, south of the town of New Cornelia, is undeveloped.

BISBEE COPPER MINING & DEVELOPING CO. ARIZONA

Idle and mail returned from former office: Bisbee, Ariz.

Officers: Daniel B. Seed, pres.-mgr.; Joseph Waters, v. p.-upt.; W. Hubbard, treas.; A. H. Livingston, sec.-mgr., with Jack Sheldon, directors.

Inc. 1916, in Arizona. **Cap.** \$1,000,000; \$1 par; 600,000 issued. U. S. Corporation Co., transfer office; Empire Trust Co., registrar; both of New York. Annual meeting, first Saturday in September.

1,000 shares sold for \$6 the lot at public auction in New York on Dec. 31, 1920, and 100 shares for \$1 on Oct. 15, 1921.

Property: 21 claims, 12 patented, 273 acres in Warren district, comprising the Arizona and Winwood group and other claims, located ½ mile north of Lowell and a mile east of Bisbee. Lands are north of the Denn Arizona, and north of the Dividend fault and lie outside of the recognized ore belt. Claims are said to show iron outcrops and some copper carbonate ore, but the U. S. Geological Survey map shows that although schist and a very small acreage of porphyry occur on the southerly claims, most of the group is covered by barren Cretaceous rocks.

The tract does show some 2-6½% oxidized ore probably deposited by surface waters, as the Cretaceous rocks do elsewhere in the district, but in such cases the ore is only surficial, and rapidly fades out at a few yards or so in depth. It may be added that company's officers make affidavit to such ore being 50' wide and going down to bottom of shaft 12' deep. Although one drill-hole was down over 892' July, 1917, sampling of the drill cores failed to show any commercial value.

Equipment: a 10x12" electric hoist.

If the above facts are correct the claims are entirely outside of the mineralized area and have little, if any, chance of becoming profitably productive.

BISBEE-SONORA DEVELOPING CO. ARIZONA

Owned several mining locations S. W. of Bisbee in 1906-7, but failed to do assessment work and lost property. No meeting was held for over 4 years, and company is insolvent.

H. C. Beumler, pres., Douglas, Ariz., wrote in 1917: "Company out of business." Was the holding company for Badger Hall, Bisbee & Duluth M. & D. Co. and Paradise Mng. Co. Fully described, Vol. XII.

BISBEE-WARREN COPPER CO. ARIZONA

Address: Box 1129, Bisbee, Ariz.

Officers: Fred Sutter, pres.; M. Newman, v. p.; R. A. Bretherton, sec.-treas., with W. H. Brophy, M. J. Cunningham, Walter B. Congdon and Jos. Walker, directors.

Inc. Nov. 6, 1916, in Ariz. **Cap.** \$1,000,000; \$1 par; 12,000 issued.

Property: 12 patented claims, 196 acres, in Warren district, Cochise county, 1½ miles E. of Lowell. Is a prospect.

BISHOPS KNOLL MINING CO. ARIZONA

Main office: Gila Co., Gila Co., Ariz.

Officers: E. B. Simanton, pres.; Wm. Brown, v. p.; John McCormick, sec., A. J. Hammons, treas. M. J. Kane, gen. mgr., Payson, Ariz.

Inc. 1917, in Arizona. **Cap.** \$3,000,000; \$1 par; 1,000,000 issued. Permit to sell stock was issued, June, 1921.

Property: 50 claims, 1,000 acres, 15 miles S. of Payson. Ore said to contain copper sulphides, occurs in porphyry dikes.

Development: by tunnel and shallow shaft. Company is developing and prospecting the property.

BLACK BESS MINING CO. ARIZONA

Address: I. N. Potter, 33 Davison Ave., Highland Park, Mich.

Officers: I. N. Potter, pres.; J. W. Travers, v. p.; H. L. Hall, sec.; Levi Stanton, treas.; J. L. Austin, counsel; with A. W. Bramwell and S. E. Hall, directors.

Inc. 1918, in Arizona. **Cap.** \$600,000; \$10 par.

Property: 10 claims near the Bullion Bar, 7 miles W. of Gunsight, Pima county, known as the Submarine group. Shaft 200' deep. Vein on the 50' and 80' levels said to have 20" of excellent free milling gold ore, containing molybdenum.

Equipment: 5-stamp mill and two 20-ton cyanide tanks, within one mile of the Black Bess main shaft. Idle.

BLACK CANYON MINING CO.

ARIZONA

Address: Claude Baker, gen. mgr., Turkey, Yavapai county, Ariz.

Officers: W. A. Moses, pres., Kansas City, Mo.; A. L. Harroun, v. p.; Edna Harroun, sec., Kansas City, Mo.

Property: 12 claims and mill site in the Black Canyon district, Yavapai county, 3.5 miles S. E. of Turkey on the P. & E. R. R. Claims show a vein, 5-16' wide, opened by 1,500' adit which follows vein for 960' and by 230' incline; maximum back is about 300'. Portal of adit is on the adjoining Silver Zone property. The highly altered vein material carries silver, with some lead and a little zinc; ore is largely of milling grade but high grade streaks occur.

At last account (April, 1920) manager was operating property under a lease.

BLACK CHIEF COPPER CO.

ARIZONA

Former address: Dewey, Yavapai county, Ariz.

Officers: John Milligan, pres.; J. M. Sullivan, Welsh, La., v. p.-mgr.; Eugene Milligan, sec.-treas.;

Inc. 1908, in Arizona. **Cap.** \$2,000,000; \$1 par; 1,170,000 shares issued. Annual meeting, 2nd Tuesday in July. About \$30,000 expended to date.

Property: the Uncle Sam group, 6 claims, 10 miles S. of Jerome, has 200' shaft, with a total of 1,300' of workings, showing ore said to give assays up to 25% copper, \$4 gold, \$3 silver, 6% zinc and 10% lead. Has a hoist and 2 pumps. A prospect.

BLACK DIAMOND MINING & DEV. CO.

ARIZONA

Address: Gus Dalahn, mgr., P. O. Box 403, Prescott, Ariz.

Officers: Geo. S. Walters, pres.; F. J. Parr, v. p.; Geo. E. Weatherby, sec., 106 E. William St., Decatur, Ill.; J. C. Mitchell, treas.

Property: 17 claims, located in the Walker district, 7 miles S. of Prescott said to be producing gold-silver-lead ore from a vein 24-36" wide, worth \$50 per ton. Shaft 300' deep, with numerous drifts.

Equipment: includes steam hoist, air compressor, 30-ton mill and buildings.

Holdings taken over by a trustee for the bondholders (1921).

BLACK EAGLE COPPER CO.

ARIZONA

Address: W. Perry Howle, Box 99, Superior, Ariz.

Officers: W. Perry Howle, pres.; Henry Benning, v. p.; Geo. King, sec.-treas., with John Hofman and J. Stove, directors.

Inc. in Arizona. **Cap.** \$1,000,000; \$1 par; fully paid.

Property: 11 claims, 220 acres, in Pioneer district, Pinal county, ¼ mile from the Silver King mine, developed by 2,500' of workings. Is said to have produced \$50,000 in silver ore taken from a 100' shaft. Six quartz veins have been cut containing chalcopryrite, chalcocite and hornite. Examined by H. B. Starbird and W. W. Simon.

Company has been financed and considerable development work planned.

BLACK EAGLE GROUP

ARIZONA

Address: C. A. Pierce, Patagonia, Ariz.

Property: 6 claims, 84 acres, in Santa Cruz county, Arizona, contains a fissure vein in limestone, dipping 45° N. E. and pitching S. W. Ore occurs as shoots, said to assay 36 oz. of silver, 0.2% copper and 16% manganese.

Development: by 110 ft. incline and 400 ft. of workings. Reserves estimated at 500 tons. Only equipment is a 10 h. p. Fairbanks-Morse hoist.

Production: \$80,000 received from ore sales during 1918 and 1919 of which \$45,000 was expended.

BLACK GIANT MINES CO.

ARIZONA

Operating the Black Giant and little Giant Mines, at last account.
Main office: Mobile, Ala. **Mine office:** Wenden, Ariz.

Officers: A. Meaher, pres., Mobile, Ala., Dick Wick Hall, v. p., Salome, Ariz., C. R. Hall, sec.-treas.; G. S. Leatherbury, A. Meaher, Pat. J. Lyons, A. Hubbard and Tom Stevens, directors, all of Mobile, Ala. S. B. Serf, supt.

Inc. April 3, 1917, in Arizona. **Cap.** \$1,500,000; \$1 par; 1,300,000 outstanding. Annual meeting, first Monday in January. Transfer office, Mobile, Alabama.

Property: 8 claims, 160 acres, located in the Harcuvar mountains, 10 miles N. of Wenden, in Cunningham Pass. In 1918, work was started on an incline shaft, down 240' and sinking on ore. Ore opened up on the 110' level. Orebody reported to be from 25-100' long, nearly vertical, and running N. W.-S. E. It is in a fissure vein with iron gossan, with copper and gold values; 11 carloads of ore are said to have been shipped.

Equipment: 25 h. p. gasoline hoist and 4-drill compressor. Is an attractive prospect.

BLACK HAWK COPPER CO.

ARIZONA

Address: J. E. Pemberthy, Gleeson, Ariz.

Inc. 1921, in Arizona. **Cap.** \$1,000,000 Par \$1.

Property: Pemberthy group in Turquoise district, near Gleeson, Cochise county.

BLACK PRINCE COPPER CO.

ARIZONA

Office: 467 Gas & Electric Bldg., Denver, Col. **Mine office:** Johnson, Cochise county, Ariz.

Officers: Robt. N. Bell, pres-gen. mgr., Denver, Colo.; J. C. Thom* pson, v. p.; J. B. Wright, sec.-treas., with M. A. Hoag and F. T. Henry, directors.

Inc. May 10, 1901, in Arizona. **Cap.** \$1,000,000; \$1 par; issued 1,320,100 shares. Annual meeting, last Wednesday in May.

Property: adjoins Peabody mine and comprises 8 patented claims, 147 acres, showing replacement deposits in limestone. Mine has a 950' two-compartment shaft, sunk in limestone and showing copper oxides and carbonates, bornite and chalcopryite, with silver, on various levels.

Equipment: includes two 100-h. p. boilers, 175-h. p. steam hoist, compressor, gas engine, 3 pumps and electric generator.

BLACK PRINCE METAL PRODUCTION CO.

ARIZONA

Mail returned unclaimed from Ajo and from Tucson, Arizona. Company probably dead.

Officers: J. D. Johnson, pres.; O. H. Finn, v. p. E. W. Oakely, sec.

Cap. \$1,000,000; par 50¢

Property: 16 claims, also bond and lease for \$25,000 on three more in the Sierra Blanca or Quijotoa Mountains, 40 miles southeast of Ajo.

Assays reported by an optimist for a block of ground 40' wide and 80' long are 30% lead, 4.9% copper, 6 oz. silver.

BLACK RANGE MINING CO.

ARIZONA

Address: Oatman, Mohave county, Ariz.

Officers: D. P. Wright, pres. and mgr.; Theodore Peterson, v. p.; Del Sherer, sec.-treas.

Inc. Oct. 30, 1913, in Ariz. **Cap.** \$1,000,000; \$1 par; outstanding, 700,000. Listed on Los Angeles exchange. Annual meeting, first Tuesday in November.

Property: 8 claims, 2 patented, 155 acres, 5 miles south of Oatman. Shows quartz veins in andesite. Ore is said to run from \$2 to \$20 per ton. Developed by 300' shaft, with 600' of workings.

Equipment: includes a gasoline hoist, air-compressor, and pumps. Property is still in the development stage.

BLACK REEF COPPER CO.**ARIZONA**

Office: 17 W. Adams St., Phoenix, **Mine address:** Wenden, Ariz.

Officers: H. E. Willhalm, pres.-mgr.; F. H. Larsen, v. p.; T. M. Burroughs, sec.-treas.

Cap. \$250,000; 25¢ par; 650,000 shares in treasury.

Property: 8 claims, 160 acres, on the south side of Cunningham Pass, Harcuvar mountains, 8 miles north of Wenden. Claims adjoin property of the **Desert M. & D. Co.**

Development: by 400' working shaft. The 170' level runs 45' W. and 180' E. on the vein, which, though leached, shows some shipping ore. The vein is practically vertical and the shaft is bottomed in ore. Mine yields 1,000 gals. of water per day.

Ore: carries chalcopryite and bornite associated with limonite and siderite. An ore shoot on the 300' level is said to show \$3-\$40 gold, 3-35% copper and high iron values. Vein is 2'-3' wide with swell to 6' at 100' in depth.

Equipment: includes 25 h. p. steam hoist, 50 h. p. gasoline engine and compressor.

In 1917 company offered the public 100,000 shares at 25¢ for a development fund. It was reported that the company was fully financed September, 1917, but the Arizona corp. com. requested the officers to explain sale of stock after expiration of selling permit of July 1, 1917.

BLACK ROCK (LTD) MINING & MILLING CO.**ARIZONA**

Idle or possibly dead. **Former address:** Constellation, Ariz. Inc. 1910, in Arizona.

Property: 3 patented claims, about 12 miles E. of Wickenburg. Developed by 360' shafts, drifts and crosscuts, on a vein from which some ore is reported to have been extracted.

Equipment: includes hoist and 2 Huntington mills.

BLACK ROCK MINING & RED. CO.**ARIZONA**

Address: Paul Kimball, agent, Yuma, Arizona.

J. B. Johnson, pres.; F. B. Johnson, of Fresno, Calif., sec.-treas.

Inc. 1921, in Arizona. **Cap.** \$500,000; \$1 par.

Property: Black Rock and Silver Glimpse groups, N. of Yuma, Yuma county, developed to depth of 350'. Ore contains silver. Is a prospect

BLANCHE ROSE MINING CO.**ARIZONA**

Practically dead. At Twin Buttes, Pima county. Company relocated land of the bankrupt **Chesterfield Copper Co.**, described in Vol. XI, Copper Handbook.

See Esperanza Mine.

BLAND MINING CO.**ARIZONA**

Address: F. S. McGinley, lessee, Patagonia, Santa Cruz Co., Ariz.

Property: Bland and Trudy claims in the Tyndall district, Santa Cruz county, said to carry ore in a 3' vein, assaying 70 oz. silver per ton. Developed by tunnels. The property now is operated under bond and lease and ore will be treated at the R. R. Mason custom mill.

BLANTON GOLD BULLION MINE CO.**ARIZONA**

Address: Oatman, Ariz.

Officers: Chas. P. Blanton, pres. and gen. mgr.; B. Ginsberg, v. p.; Herman Marks, sec.-treas.; with Louis Dorfman, directors.

Reported to have a gold property in the Mossback section.

Idle, but likely to be revived by Katherine boom of 1921

BLOCK MINES CO.**ARIZONA**

Address: Care Ed. Block, Prescott, Ariz.

Officers: A. J. Head, pres.; E. Block, v. p.-treas.-mgr., with H. Brinkmeyer and M. Goldwater, directors.

Inc. August, 1913, in Arizona. **Cap.** \$1,000,000; par \$1; \$500,000 shares in treasury.

Property: the Billy Boy and Christmas groups on the Hassayampa river, Yavapai county. Billy Boy mine developed by 225 tunnel showing 14" paystreak carrying gold, silver, lead and copper ore, said to assay \$70 per ton.

Is a prospect with merit but needs financing and competent management to prove its possibilities.

BLUE BELL EXTENSION COPPER CO.

ARIZONA

Address: L. A. Denman, sec., Humboldt, Arizona. **Mine address:** C. J. Murdock, mgr., Mayer, Ariz.

Officers: J. E. Garber, pres.; C. J. Murdock, v. p. and mgr.; L. A. Denman, sec.

Property: adjoins the Blue Bell, on south. A shaft was sunk 1919 in expectation of finding ore on an extension of the Blue Bell vein of the Consolidated Arizona Smelting Co. of Humboldt.

BLUE BELL MINE

ARIZONA

See Consolidated Arizona Smelting Co.

BLUE BELL MINING & REDUCTION CO.

ARIZONA

Last address: Swansea, Yuma county, Ariz.

Officers: W. P. Martin, pres.; E. T. Miner, v. p.-supt.; K. E. Newcomb, sec.

Property: 23 claims, about 5 miles from Swansea, just across the Bill William's Fork river from the Swansea pumping plant.

Development: 200' two-compartment shaft and several hundred feet of tunnels, showing ore carrying up to 10% copper, with fair gold and silver values. No recent returns.

BLUE BIRD SILVER MINING CO.

ARIZONA

Address: Thos. N. Wills, Winkelman, Ariz. **Mine office:** Copper Creek, Arizona.

Officers: Thos. N. Wills, pres.; George C. Young, v. p.; Miles Miller Carpenter, treas. and cons. eng.; S.W. Purcell, sec.; I. B. Winsor, mgr., with Chas. E. Walker, Tucson, Ariz., directors.

Inc. 1918, in Arizona. **Cap.** \$1,500,000; \$1 par; 750,000 shares were issued to the owners and were to have been placed in trust until one year after commencement of dividends.

Property: 10 claims, Copper Creek district, Pinal county. Reports by both Young and Carpenter state that previous shipments are estimated at 1,000 tons of ore worth \$150,000 in silver, besides further values in lead, copper and gold. Mr. Young stated he shipped 32 tons, which returned \$4,200 net. Stock offered by Boston broker at 35¢ 40¢ and 50¢ in 1918, accompanied by intensive advertising campaign of alluring claims. Reported idle, and in 1918 machinery was reported removed.

BLUE JACKET MINING CO.

ARIZONA

Address: Crown King, Ariz.

Property: 3 claims, surveyed for patent, in Pine Grove district, Yavapai county, near Crown King.

BLUE JOHN MINE

ARIZONA

Address: J. H. Cavanaugh, mgr., Walker, Ariz.

Property: 2 claims, at Walker, Yavapai county, shows a 2' fire vein in granite and porphyry, with N. E. S. W. course and dip of 82° W. Ore said to contain gold-silver-copper-lead and zinc.

Development: by shafts and drifts to depth of 110' with 400' of workings. Reserves estimated at 2,100 tons of ore averaging \$20-\$30 per ton.

BLUE MONSTER COPPER CO.

ARIZONA

Addresses: Room 817, 7 Water St., Boston, Mass., and Cherry, Ariz.

Officers: L. N. Wombacher, pres.; Thos. Sutcliffe, v. p. and supt. Jos. H. Morgan, sec., Prescott; P. J. Keohane, treas., with Jos. Lee, directors.

Inc. Dec. 26, 1916, in Arizona. **Cap.** \$2,000,000; \$1 par. Property acquired for 640,000 shares, which are held in pool until \$75,000 has been raised for development work.

Property: 33 claims, and a water right on Cherry Creek, in the Verde district, Yavapai county, 12 miles S. E. of Jerome, 32 E. of Prescott. The group is said to be located along the great Verde fault, which drops limestones against schist, and this group is in places covered by conglomerate and lava flows. The crushed zone, 300' or more wide, is iron stained, and shows green copper stains, and on Blue Jay claim 4' of 2% ore. W. B. Fisher reports that he believes valuable ore in commercial quantities will be found by development. Experience at the various other Jerome properties shows the faulting to be post mineral and the ore seen in the fault either drag or due to deposition by surface waters.

Development: by 400' shaft; crosscuts being run east and west on 400' level.

Property favorably reported on by W. C. Thomas and Cyril Wigmore.

BONNIE MINING CO.

ARIZONA

Address: R. M. Garrett, Prescott, Ariz.

Mine on upper Lynx Creek, Yavapai county, Ariz., is an old one reopened in 1916. The shaft is 360' deep, and is being sunk to 1000' depth.

BORAS LEASING CO.

ARIZONA

Address: M. J. Elsing, supt., care Phelps Dodge Corporation, Bisbee, Ariz.

Officers: J. L. Winters, pres.; Fred Henderson, v. p.; John P. William on and M. E. Kawn, directors.

Property: a lease on part of the Copper Queen ground at Bisbee, adjoining the **Night Hawk Leasing Co.** Work at present is at 700' depth, where sulphide ore was opened. The shaft is being enlarged to 2½ compartment and sunk an additional 500'. Six men employed.

Production: reported to have averaged 1,250 tons of 8% copper ore per month in 1920. Eight disbursements of 10¢ per share have been paid to Feb., 1921.

BOSTON & ARIZONA MINES CO.

ARIZONA

Mail returned unclaimed since 1918, from former address, Tucson, Arizona.

Officers: Geo. P. Gregory, pres.; Henry C. Young, Jr., v. p. and gen. mgr., Gerald S. Howland, treas.

Inc. 1915. **Cap.** \$100,000; shares \$1 par. Stock listed on Boston curb. Federal trust Co., Boston, transfer agents; Exchange Trust Co., registrars.

Property: 5 claims in the Old Hat district, 25 miles N of Tucson, Pinal county, said to show an orebody 25' wide and 100' long, with copper, silver and gold. Ore occurs between granodiorite foot and quartz limestone hanging-wall. Developed by 247' tunnel A prospect.

BOSTON & JEROME COPPER CO.

ARIZONA

Office and mine: Jerome, Ariz.

Directors: include Richard Kingdon, supt. U. V. Extension; J. S. Acker, L. E. Hesler of Prescott, and E. C. Farrel of Clarksdale.

Inc. 1907, in Ariz. **Cap.** \$1,500,000; \$1; par; increased May, 1908, to \$2,500,000; shares \$5; issued \$129,090. Listed on San Francisco Exchange.

Property: the Juniper group of 9 claims, 146 acre, 2 miles south of Jerome, north of the Verde King (or Verde Central) and adjoining

outlying detached claims of the U. V. Copper Co. There is a limestone cap over much of the property, but copper staining is said to show in some places.

Development: includes 3 tunnels of 400' aggregate length and 130' shaft, sunk on a large porphyry and schist reef carrying copper sulphide in small amount in bottom. Property was idle from February, 1908, to 1917. Is a prospect, that is west of the well-recognized mineral belt of the district, though considered to be worthy of exploration. In 1921, property idle, company without funds.

BOTSUM HOLDING CO., C. A.

ARIZONA

Property: Vampire gold mine, N. E. of Parker, Yuma county. A 25-ton mill was installed early in 1921.

BOUNDARY CONE GOLD MINES CO.

ARIZONA

Address: Oatman, Ariz. Officers at last accounts: F. H. Biles, pres.; J. D. L. Williams, sec.; Calvin Hartwell, treas.; preceding, with W. F. Ball, S. M. Barnes, T. C. Job, directors. Frank Dryden, supt.

Inc. in Arizona. **Cap.** \$1,500,000; shares \$1 par; outstanding 1,198,000 shares. Listed on Los Angeles Stock Exchange.

Property: 8 claims, 82½ acres, patented, 1 mile S. W. of Oatman.

Ore: gold.

Development: shaft 775' deep, January, 1919, with about 4,500' of workings. On the 450' level management reported an ore-shoot 150' long, 15' in width, with average assays of \$14 per ton, and on the 550' level to have a shoot that was 150' long when work was stopped and shaft-sinking resumed. Also said to have opened up considerable milling grade of ore in rather thin stringers. Shaft makes 15,000 gal. of water daily, handled by bucket.

Equipment: hoist, 300 cu. ft. air compressor, blacksmith shop.

BOWYER GOLD & COPPER CO.

ARIZONA

Office: Quartzite, Yuma Co., Ariz.

Officers: Jos. Bowyer, pres.-treas.; H. C. Wohler, v. p.; C. M. Robins, sec., with J. D. Bowyer and O. T. Hodge, directors.

Inc. July 15, 1909, in Arizona. **Cap.** \$5,000,000; \$5 par.

Property: the Bowyer group, of 7 claims, and 160 acres placer ground, in the Plomosa district, on the western slope of the Dome Rock Mtns., about 30 miles W. of Bouse, on the Santa Fe R. R. Property has 3 contact deposits, between schist hanging and limestone foot, showing 50 to 200' gossan outcrops, ore carrying malachite and chalcocite, said to average 2 to 15% copper and \$1 to \$10 gold per ton.

Development: by 625' incline, sunk in ore to depth of 100'. A crosscut is being driven on bottom level to reach the main ore body near the hanging wall.

Company reports being out of debt and having funds on hand to complete development work and erect concentrator.

BRADFORD MINE

ARIZONA

See Sonoita Copper Co.

BRADSHAW COPPERMINES CO.

ARIZONA

Office: 229 Broadway, New York.

Officers: W. J. Peterman, pres.; John J. McNamara, sec.-treas. and supt.; J. G. M. Browne, asst.-sec.-asst.-treas.

Inc. Dec., 1916, in Arizona.

Property: 21 claims near the Senator mine, Copper Basin district, Yavapai county.

It is said that this was a rank promotion, floated by a New York house, investigation proving that the company did not own the mines; that over \$17,000 was missing from the treasury, and that the officers were merely dummies acting for a clever crowd of apparently unscrupulous men.

Reported that Mr. Alex. Ratcliff, apparently the real owner, had reclaimed the property, but it was under foreclosure proceedings at last account.

BRADSHAW REDUCTION CO.**ARIZONA**

Company dissolved. Fully described in Vol. XIV. See Yavapai Cons. Gold-Silver-Copper Co.

BROOKLYN ARIZONA MINING CO.**ARIZONA**

Address: J. B. Hill, sec., Andover Mass. Mine near Mayer Yavapai county, Ariz. Benj. B. Tuttle, v. p.; Jas. S. May, treas.

Inc. March, 1907, in Me. Cap. \$2,500,000; \$10 par; fully issued. Bonds authorized \$500,000; about \$75,000 outstanding. Was promoted by the **American Securities Co.** Annual meeting first Wednesday in April.

Property: 82 claims, about 1,600 acres, including the Brooklyn group of 14 claims, in the Squaw Creek district, about 20 miles S. E. of Mayer, shows auriferous and argentiferous copper sulphides.

Development: by 750' main shaft and 2,500' tunnel.

Equipment: includes compressor, double-drum hoist, 3,000' cable and Partridge smelter. Former rank mismanagement fully described in Vols. X and XI. Company reported in new hands, 1915, but no later returns received.

BROWNELL-ARIZONA MINING & SMELTING CO.**ARIZONA**

Mail returned unclaimed from former address: Casa Grande, Pinal county, Ariz.

Property: formerly held by Producer Mining & Smelting Co., is supposed to include the Jack Rabbit mine, 80 acres, in Pinal county, together with the Producer and Century-Chief group of 320 acres, and Inceux group of 220 acres, all in the Quijotoa Mountains. Company sold stock, 1910, on the strength of a clever brochure, written by Alfred Henry Lewis, the talented writer, whose statements were not hampered by a knowledge of copper mining. Company not favorably regarded. Presumably idle.

BROWN WHITLOW GROUP**ARIZONA**

Mine address: Superior, Pinal Co., Ariz. Owned by J. C. Brown and J. W. Whitlow.

Property: 5 claims, in Pioneer district, near Superior; adjoins the old Silver King mine, once the richest silver property of Arizona.

Development: by tunnel, which cuts a 7' contact vein of ore low in copper and silver. Probably idle.

BUCKEYE COPPER & GOLD MINING CO.**ARIZONA**

Bankrupt. Property sold. See Buckeye Group.

BUCKEYE GROUP**ARIZONA**

Address: Sam Parker, Turkey, Yavapai Co. Ariz., who with others bought the mine, formerly owned by the Buckeye Copper & Gold Mining Co., under execution of judgment.

Property: 35 claims, 720 acres and 20-acre smelter site, in 3 groups, is 2 miles from Turkey, in Black Canyon district of Bradshaw mountains. Claims show chloritic schists and diorite, carrying fissure veins with occasional native copper and malachite, but mainly azurite, chalcocopyrite and bornite, estimated to average 4% copper, 3.5 oz. silver and from a trace to \$6 gold per ton.

Development: 726' two-compartment shaft on the Columbia claim, a 520' two-compartment shaft on the Sullivan claim, with 2 other 200' shafts, and tunnels of 87' and 314', with about 5,000' workings.

Equipment: includes 15 h. p. and 40 h. p. gasoline hoists a small air compressor and several mine buildings.

Property idle at last account.

BUCKHORN & BOULDER MINING CO.**ARIZONA**

Probably dead. Described in Vol. XIV.

BULLARD MINE**ARIZONA****Address:** John C. Bullard, Aguila, Ariz.

Reported bonded to B. C. Wilson, W. Douglas and E. Bemdrant of Wickenburg.

Property: 36 claims, 10 miles N. of Aguila, in Cunningham Pass, Harcurvar mountains, Yuma county. Shaft 225' deep and 400' adit tunnel. Reported to have 300,000 tons ore in the mine averaging 4% copper and \$5 gold per ton. Shipments made 1918-'19.**BULLION BAR MINING & DEVELOPMENT CO.****ARIZONA****Address:** I. N. Potter, 33 Davidson Ave., Highland Park, Mich.**Mine Address:** A. W. Bramwell, Ajo, Arizona.**Officers:** I. N. Potter, pres.; J. W. Travers, v. p. and gen. mgr.; H. L. Hall, sec.; S. E. Potter, treas.; J. L. Austin, counsel; Levi Stanton, supt., with A. W. Bramwell, directors.**Inc.** 1918, in Arizona. **Cap.** \$300,000; shares \$10 par.**Property:** 8 claims, 24 miles east of Ajo, in the Gunight district, showing a 5' vein on a contact between basalt and granite. Values as given are from \$4 to \$50 free milling gold per ton with about 1½% tungsten. Developed by 150' shaft. Planning erection of 10-stamp mill.**BULLION HILL MINES CO.****ARIZONA****Address:** Knight Investment Co., Provo, Utah, who control company.**Officers:** O. Raymond Knight, pres., Provo, Utah; A. M. McDonald, v. p., Eureka, Utah; R. E. Allen, sec.-treas., with J. W. Knight and M. C. Godbe, directors.**Cap.** \$100,000; par 10c; all issued. Annual meeting 2nd Wednesday in February.**Property:** 4 claims, near the Tennessee mine at Chloride, Ariz. Reported that vein cut on the 300' level is 16' wide.**BUNKER HILL MINES CO.****ARIZONA****Address:** F. M. Pool, Winkelman, Ariz.**Officers:** F. M. Pool, pres.; H. S. Bailey, sec.-treas.; with B. H. Norton, A. N. Lewis, Chas. Dixon, P. Figueroa and Thos. Quarrelli, directors. J. W. Mangum, supt.**Inc.** 1917, in Arizona. **Cap.** \$1,500,000; \$1 par; \$600,000 issued.

Annual meeting in March.

Property: 39 claims, 780 acres, in Bunker Hill district, Pinal county, 35 miles from Winkelman. Vein is in diorite, and sulphide ore carries gold, silver, copper, and lead. Shoots are 4' wide.**Development:** by 300' shaft and 450' tunnel; total workings, 1,500'. A crosscut being driven on the 300' level, in 400'. May, 1921, reported to have cut a 5' ledge assaying 4½% copper, 7 oz. silver, 5% lead.**Equipment:** 15 h. p. hoist and Sullivan 2-drill compressor. Nine men employed.**BUNKER HILL MINES CO.****ARIZONA**

Subsidiary of the Phelps Dodge Corporation, which see.

BUSH-BAXTER MINING CO.**ARIZONA**

A close corporation. Fully described in Vol. XIII.

BUTTE & ARIZONA COPPER MINING CO.**ARIZONA****Office:** 619 Hennessy Block, Butte, Mont. Mine near Hereford, Co-chise Co., Ariz.**Officers:** B. H. Dunshee, v. p.; A. S. Nichols, sec.; John C. Adams, treas.; with L. O. Evans, Chas. S. Shoemaker, A. P. Henningson, C. B. Mosely, John E. Corette and D. M. Watts, directors.**Cap.** \$1,250,000; \$1 par.**Property:** 14 claims, 11 patented, costing considerably over \$60,000, was exchanged for \$450,000 stock. Property is in the Huachuca mountains, 35 miles S. W. of Bisbee, and about the same distance north of Cananea.**Geology:** claims show ochrous gossan of 10 to 300' width, covering a contact vein between syenite and limestone carrying occasional copper ox-

ides, carbonates, pyrite and argentiferous gray copper, and chalcocite of fair tenor, though not in large quantities.

Development: by a long main tunnel cutting several small veins giving assays up to 18% copper with an average of 4.5% tenor, mine having upwards of 3,900' of workings. Main vein, 350' from mouth of tunnel, is claimed to show 39' of 6% chalcopyrite, which is an overestimate.

Nearest railroad is 15 miles, with a fair wagon road. Has steam power and an air compressor. Company reported to have no debts, considerable treasury stock and is being carried by the directors, who are advancing the money required to pay taxes and maintain the property.

CABABI MINING CO.

ARIZONA

Address: E. H. Emerick, 321 Law Bldg., Indianapolis, Ind. **Mine P. O.:** Camp Cababi, via Tucson, Pima co., Ariz.

Officers: Allen W. Conduitt, pres.; with E. J. Scoonover, Albert Off and R. A. Wilcox, directors.

Inc. 1908, in Arizona. **Cap.** \$1,500,000; \$1 par; issued \$1,250,000. Annual meeting, third Monday in June.

Property: 50 claims, about 1,000 acres, 35 claims patented, also 2 mill sites of .5 acres, situated in the Cababi mountains, 69 miles S. W. of Tucson.

Development: by numerous shallow shafts, and 450' main shaft on the Picacho claim, includes an antigua, reopened about 1860, and which, years ago, was a small producer of silver-bearing copper and lead ores.

Equipment: includes a steam hoist good for 500'.

A full report on the property made Oct., 1912, by C. J. Price, mg. engr., shows 2,240 tons of ore, valued at \$28,485, on dumps. Manager reported 10,000 tons high-grade ore blocked out April 25, 1913. Mine operated under lease by S. G. McWade in 1920.

CACTUS QUEEN

ARIZONA

Office: Phoenix, Ariz. **Mine office:** Congress Junction, Ariz.

Officers: H. H. Barbee, pres.; H. Borders, v. p.; A. G. Barbee, mgr.; with P. B. Wing, P. A. Hildebrand, R. H. Carrick, directors.

Inc. 1906, in Arizona. **Cap.** \$5,000,000; shares \$1 par.

Property: 130 claims, located about 50 miles west of Congress Junction, Yavapai county. Developed by a shaft 200' deep, drifts on this level are reported to be in ore averaging 6% copper with some gold. Reported on by E. A. Ritter.

CALUMET & ARIZONA MINING CO.

ARIZONA

Office: Calumet, Mich. **Mine office:** Warren, Cochise county, Ariz. **Works office:** Douglas, Cochise Co., Ariz.

Officers: Gordon R. Campbell, pres.; Capt. Jas. Hoatson, v. p.; Capt. Thos. Hoatson, second v. p.; Peter Ruppe, treas.; with Thos. Cole, Walter B. Congdon, William B. Mershon, Chas. Briggs, G. A. Newett, T. H. Collins, and J. C. Oliver, directors; Jas. E. Fisher, sec.; Henry B. Paull, auditor.

Operating officials: John C. Greenway, gen. mgr.; Ira B. Joralemon, asst. gen. mgr.; E. E. Whiteley, mine supt.; D. M. Rait, asst. mine supt.; H. A. Clark, smelter supt.; R. H. Dickson, engr.; Geo. Jay, acting purch. agt.; K. I. Mohler, supt. at 85 Mine, Valdeon, New Mex., and M. Curley, supt at Ajo.

Inc. March, 1901, in Arizona. **Cap.** \$2,500,000; shares \$10 par, increased Feb. 15, 1911, to \$6,500,000; shares \$10 par; issued 642,521 shares; held for exchange, 273 shares. The company, which already controlled the **Superior & Pittsburgh Copper Co.**, through ownership of 1,494,333 shares out of a total of 1,499,792 shares issued, took over the property in Feb., 1916. All S. & P. assets were transferred to the C. & A. Co., effective Dec. 31, 1915, basis of exchange being 3½ shares Superior & Pittsburgh for 1 Calumet & Arizona, and a bonus of \$1 per share for quick delivery of stock

American Trust Co., Boston, and Mechanics and Metals National Bank, New York, registrars; State Street Trust Co., Boston, and Bankers' Trust

Co., New York, transfer agents. Stock is listed on the New York and Boston Stock Exchanges. Annual meeting, second Monday in April.

Range of shares in 1920 was \$69 high, \$40 low, and 21,000 shares were sold in New York. In 1921 to June, the range was \$53½-\$42½.

Financial statement: years ending Dec. 31:

Year	Assets						Total
	Property & equipment	Investments	Notes, ac. receivable	Cash, etc.	Metals on hand	Supplies	
1920.....	\$24,943,502	\$8,635,189	\$1,086,249	\$1,236,085	\$4,699,143	\$1,060,048	\$41,660,216
1919.....	25,643,041	7,804,531	1,487,791	886,341	5,315,859	1,069,410	42,206,973
1918.....	27,341,057	7,679,153	1,307,053	3,699,287	2,484,381	1,273,327	43,784,258

Year	Liabilities				Total
	Capital	Accts. payable	Reserves	Surplus	
1920.....	\$6,425,210	\$1,710,777	\$376,092	\$33,148,137	\$41,660,216
1919.....	6,425,210	1,031,270	611,473	33,869,020	42,206,973
1918.....	6,425,190	781,183	1,305,698	35,272,187	43,784,258

Year	Income Account			Dividends	Year's Surplus
	Total revenue	Oper. charges, deprec., taxes	Ore depletion		
1920....	\$11,418,574	\$8,206,403	\$1,362,969	\$2,570,084	—\$720,882
1919....	10,286,478	8,381,973	1,380,089	1,927,563	—1,403,147
1918....	15,528,530	9,943,009	1,499,283	5,140,062	—1,053,824
1917....	20,035,866	11,518,420	1,888,945	7,067,241	— 438,740
1916....	20,587,941	9,432,936	5,777,296	+5,377,709
1915....	11,683,724	6,229,376	2,006,557	+3,447,325

Dividends: \$2 in 1903; \$6.50 in 1904; \$8.50 in 1905; \$13 in 1906; \$16.50 in 1907; \$4 in 1908, 1909, 1910, 1911, \$4.25 in 1912, \$5 in 1913, \$3 in 1914, \$3.25 in 1915; \$9 in 1916; \$11 in 1917; \$8 in 1918; \$3 in 1919, and \$4 in 1920. The total is \$45,630,471.

In 1911 the company took an option on the New Cornelia claims, 243 acres in the Ajo district, 42 miles south of Gila. The C. & A. was to receive treasury stock of the **New Cornelia Copper Co.** (described under its own title), for all money expended in development work on the property. It exercised its option in 1913 and now owns 1,229,741 shares, or 68.3% of the stock of the subsidiary company. It built jointly, with the E. P. & S. W., the 43 mile Tucson, Cornelia and Gila Bend Railroad, running from Gila Bend to Cornelia. The New Cornelia Co. entered the producing class in June, 1917.

The C. & A. also owns a majority of the capital stock of the **Gadsden Copper Co.**, at Jerome, Arizona. Property consists of 39 claims adjoining the United Verde Extension Mining Co. on the south, developed by 1,200' shaft. Operations discontinued in 1920, after work had failed to show ore.

Property: includes the original claims at Bisbee, claims formerly owned by the Superior & Pittsburgh C. Co., bought Dec. 31, 1915 the American Saginaw group, bought in 1912; the Calumet & Bisbee group and the Higgins group brought in 1913; total area of about 2,068 acres, patented, within the mineral zone of the Warren district, Ariz.

Side-line agreements with the Copper Queen Cons. Mng. Co., the Denn-Arizona Mng. Co. and the Shattuck Arizona Copper Co., insure freedom from litigation, and continuance of the friendly feeling and neighborly co-operation existing from the very inception of this company.

The Copper Giant group, at Copper Creek, Graham County, Ariz., includes 35 claims, known as the Scanlon or Clark-Scanlon property, 16 miles northeast of Mammoth. This property, bought Sept., 1908, has been extensively tested by diamond drills, giving good cores, and has a 600' two-compartment working shaft, with several levels opened, and considerable medium to high-grade sulphide ore is blocked out. A 15-mile railway will be required to render this property a producer.

In June, 1920, company bought property of the **85 Mining Co.**, comprising 34 claims, 577 acres, in the Virginia district, Grant county, New Mexico, near Lordsburg. It shows a persistent 4' quartz vein in rhyolite in which ore occurs in shoots, up to 200' long. Ore averages \$1.60 in gold, 1.25 to 7 oz. silver and 2.50 to 3.75% copper, and as it is silicious, it is particularly desired for the C. & A. smelter.

Geology: the Calumet Arizona mines are in limestone, near a porphyry contact, with occasional porphyritic intrusions. The surface gives small indications of values, showing but small and infrequent outcrops, the existence of the original orebodies in the Irish Mag claim, farthest to the north, having been inferred from underground work in the adjoining territory of the Copper Queen, after careful study of the general geological conditions of the district. Ore occurs in highly irregular bodies, the mine having native copper, cuprite, melaconite, azurite, chalcocite, bornite and chalcopyrite, usually with an iron oxide or sulphide gangue, and with considerable hematite and manganese ores, the latter carrying malachite in small disseminated nodules, frequently averaging 10 to 18% in copper. The ore, which is practically self-fluxing, averages about 2 oz. silver and 0.05 oz. gold per ton, as smelted.

Development: by 6 main working shafts penetrating the limestone formation to a maximum depth of 2,300'. The orebodies are extensively developed, but are not developed in advance, owing to the constant shifting of the ground, caused by the creeping of the ground, as is the case at the neighboring Copper Queen mine, requiring very heavy timbering, with frequent bulkheading, and constant care for all openings, which renders it prudent to keep costs down by blocking out ore but a comparatively short time ahead of actual stoping requirements.

The working shafts are the 1,390' Irish Mag, 1,375' Oliver, 1,480' Briggs, 1,680' Hoatson and 2,358' Junction shafts, through which a rhomboidal area a mile long is being actively developed and worked. The new Campbell shaft, located on the Regular claim in unprospected territory, and originally begun in 1917, is now (1921) being sunk from the 1,400 to 1,800' level. Underground work totals about 164 miles, 50% of which is open and in use. New openings in 1919 amounted to 99,355', including 16,281' of diamond drill holes. During 1918, 7.1 tons of ore were mined per foot of development; in 1919, 9.9 tons; in 1920, 9.4 tons. Mines have electric traction on the 1,400', 1,600' and 1,800' levels.

During 1919, new work covered 57,090', including 3,281' of drilling; in 1920, the total was 53,824', and drilling was 3,741'.

A 4-compartment 1,390' **Irish Mag** shaft, sunk on a single 20-acre claim, was the original mine; the shaft is sunk in hard limestone throughout, except where occasional orebodies were cut, rendering it unusually safe from drawing. The Irish Mag has yielded some of the best copper ever mined, including some entire stopes of 30 to 40% copper. The Irish Mag shaft has a 78' steel headgear, a 114' ore bin and a 250' h. p. electric hoist, raising 3-decked cages. The **Oliver** shaft, 4 compartments, 1,375' deep, is equipped with 600 gal. Nordberg electric pump and hoist. It serves both the Senator and Buckeye claims, cutting ore at 710'.

The **Powell** shaft, started Nov., 1918, is on the line between the Hope and Wagner claims, which lie 2,000' S. W. of the Irish Mag shaft. This ground was explored by a crosscut from the Irish Mag that traversed 600' of the Copper Queen ground, stopping about half way across the group, as it showed nothing of value. This shaft, about 600' deep, has an electric hoist.

The Washington, Angel and Old Republic claims lie on the porphyry side of the gulch, and were secured mainly as a possible smelter site, being considered of little promise for ore, when purchased, but 5,165' of churn drilling on this group in 1915 developed a substantial tonnage of low-grade disseminated ore in an irregular body from 170' to 450' below the surface.

The **Cole** shaft handles the output from the southwestern part of the company's holdings. The greater part of the recent production has come from a body of oxide ore of great size between the 800' and 1,100' levels. Smaller bodies have contributed sulphide ore from the 1,000' to 1,400' levels. This shaft has Prescott and Cameron station pumps caring for a flow of 225 gals. of water per minute.

The **Congdon** shaft, on the Black Bear claim, only 650' from the Mag, is 1,267' deep, but has been out of commission for several years, as the territory can be worked to better advantage through the Cole shaft. Surface equipment includes a 300-h. p. steam plant, with a 12x36" double-drum hoist.

The **Hoatson** shaft, on the Del Norte claim, 2,500' from the Briggs, has 5 compartments, and is 1,680' deep. Ore is being mined from a large body on the 1,300' level. Equipment at the Hoatson shaft includes a steel head-gear, double-drum hoist, good for 2,000' depth. Lower plant has 9 boilers.

The **Junction** shaft has 5 compartments and is 2,358' deep, being the deepest of any shaft in the Bisbee district. Shaft is concreted to 1,800' level. The Junction is the main hoisting shaft of the Briggs-Hoatson-Junction division, and virtually the entire production of the 3 mines is hoisted through it. Ore is hoisted in 5-ton skips, crushed in Allis-Chalmers gyratory crusher, and loaded by belt conveyor into railroad cars.

Large bodies of both oxide and sulphide ore have been opened up from the 1,200' to the 1,800' levels. Important recent development is on the 1,400' and 1,600' levels driven from the Junction shaft south towards the Denn, where important ore bodies were found. In addition to the ore of shipping grade developed, immense bodies of solid pyrite, carrying between 1% and 2% copper, have been found on the 1,400', 1,500' and 1,600' levels. Smaller bodies of oxide ore, only, occur between the 770' and 1,200' levels.

The Junction shaft drains the entire Calumet & Arizona and Copper Queen group of mines. Water pumped during 1918 was 1,664,518.500 gals.

Pumping plant has been much simplified by installation of a 1,500-gal. electric pump on the 1,800' level of the Junction. They are now handling 1,500 gals. p. m. from the 1,500' and 1,900 gals. p. m. from the 1,800' levels.

Surface plant consists of fifteen 250 h. p. Marine boilers, a 4-cylinder Nordberg, double-reel main hoist, good for 2,500' depth, and a Sullivan single-drum hoist, used as an auxiliary hoist for handling men and timbers.

There is a 5,000' Nordberg compressor having compound air cylinders driven by a four-cylinder triple expansion steam engine. This machine has an attached air pump and condenser. In addition, there is a 3,500' Nordberg compressor, having compound air cylinders, driven by a cross compound steam end.

The **Briggs** shaft, about 3,000' south of the Junction shaft, is 1,630' deep and 3,000' east of the Lowell shaft of the Copper Queen. Large bodies of enriched sulphide ore of much greater horizontal than vertical extent, averaging about 5½% copper, have been developed between the 1,200' and 1,400' levels. A substantial tonnage of oxide ore of good grade is being mined from the 900' to the 1,400' levels from nearly vertical fracture zones. On the 1,400' level, 500' south of the shaft, an important sulphide orebody 300' long by 30' wide was developed. Ore from this mine is handled by electric haulage on the 1,400' level to the Junction shaft and hoisted.

Equipment at the Briggs shaft includes steel gallow's frame. Power plant has 2 boilers of 250 h. p. each, burning crude petroleum.

A fire in the heavy sulphide area at 1,400' depth gave trouble early in 1920, but has been controlled by means of bulkheads and a ventilating shaft.

During 1920 and 1921 development was reduced to a minimum, being very largely confined to known orebodies; the Oliver and Cole mines were closed down in February, 1919, and at end of 1920, the Briggs mine was operated through the Junction shaft.

At the **85 mine** in New Mexico old work includes 4,000' of laterals and a 750' blindshaft. In 8 months of 1920, total extensions were 5,602', of which 2,452' was drilling; ore mined amounted to 31,016 wet tons, averaging \$2.33 gold, 2.6 oz. silver and 2.6% copper.

Ore reserves: in Oct., 1916, were estimated as 1,976,815 tons, averaging 4.99% copper plus 831,000 tons of 1.75% copper and \$1.25 gold-silver ore. For 1919 and 1920, due to limited exploratory work a slight decrease in ore reserves is reported.

Equipment: surface equipment is very complete. The original machinery plant was clustered about the Irish Mag shaft, on a steep hillside, where limited room was secured by grading, but the principal plant is now at the Junction shaft, including complete machine and plate shops, sawmill, warehouses, etc. Electric power for mine plant is brought from the smelter at Douglas, generated by steam from waste heat boilers.

Fire protection is furnished by direct pipe lines to large storage tanks, all hose couplings being made to connect with those of the Bisbee fire department. Other mine equipment is described above under individual shafts.

The 85 mine is equipped with complete hoisting plant and a 300-ton mill with 6 vanners and flotation unit; the latter is not now in use.

The company's smelter is located at Douglas, 25 miles from the mine, receiving ore over the El Paso & Southwestern Railway, at a very favorable freight rate. The original smelter was blown in Nov. 15, 1902, and has been twice enlarged, giving the old works a capacity of nearly 3,000 tons daily.

The C. & A. Smelter

The smelter completed 1913 at a cost of about \$2,000,000, was designed by C. H. Repath, and A. G. McGregor described by R. H. Vail, in the "Eng. and Min. Journal," Vol. 98, p. 102, July 18, 1914. The works consist of a sampling mill, crushing plant, calcining plant, reverberatory, blast furnace and converter departments and 6 mixing beds, each of 10,000 tons capacity, together with a 5,000-ton coke storage bed.

The crushing and sampling plant, 40x84' on the ground and 5 stories high, is built of steel and concrete throughout, and is divided into 2 sections, operating independently of each other. Each section has a crushing and sampling department. Ore from the crushers at the receiving bins is delivered over an incline conveyor to the crushing and sampling plant, where the large sizes are screened out for the blast furnaces. The sampling department, equipped with Snyder automatic samplers, cuts the ore 4 times, making a sample weighing 1.6 or 3.2 lbs., as desired, per ton of ore passing through. The plant is flexible and ore may be crushed and screened and discharged at any desired size.

The material from the sampling and crushing plant is passed to mixing beds similar to those in use at the Cananea smelter, there being 3 beds for coarse and 3 for fine ore. The coarse ore mixed with coke is conveyed directly to the coke charge bins over the blast-furnace charge floor, the fine ore going directly to the calciner or roaster plant.

The roaster plant has twenty-four 258" Herreshoff roasters, having a capacity of approximately 80 tons of fine ore per day. The plant is equipped with a tile and steel dust chamber, 60x140x70' high, equipped with baffles and wires and roofed with copper, discharging into a brick-lined steel chimney, 20' inside diameter by 279' high.

Twelve of these roasters completed early in 1917, are used in connection with a sulphuric acid plant, which is furnishing 200 tons of 60 degree Baumé acid to the New Cornelia Copper Co.

A 22x460' building of steel frame, sheathed with iron, covers the blast furnace, reverberatory, converter, and copper-casting departments. The blast-furnace department consists of two 48x40' blast furnaces, and has a steel dust chamber, 60x180x70' high, equipped with suitable baffles and wires. The gases from the converters will also pass through this

chamber and be discharged into a brick-lined steel chimney, 25' inside diameter by 305' high. Ore and coke is discharged directly from the bin over the charge floor into cars resting upon platform scales, the charge car being propelled from the scales to the charge doors of the furnace by an electric motor.

The reverberatory department contains 4 reverberatory furnaces, 19x-100' in size, with a foundation and building for a fifth furnace in place. Each furnace is equipped with two 712 h. p. Stirling boilers. Steam at 80 lb. pressure is generated by using waste heat, driving a 3,000 k. w. turbine alternating-current generators. The furnaces are charged directly from the calcine cars running on a track overhead. Matte is tapped into 20-ton pots, and transferred by cranes to the converters, slag being skimmed directly into 25-ton pots, running on tracks underneath and just in front of the skimming end of the furnaces.

The converter department, having a main converter aisle 55' wide, and two 40-ton electric traveling cranes, has stands for 6 Great Falls type converters. There are also 2 straight-line casting machines and other necessary equipment. The converter slag is poured directly into the reverberatory furnace.

The power house, formerly 80x160' in size, was increased, 1907, by the building of a transverse section 100x100' in size, the new building being driven through the center by a row of columns into 2 bays, each 50' wide, and each served by a 10-ton hand-power traveling crane. Equipment includes two 14 & 28x36 Allis-Chalmers Tandem Corliss engines, all driving No. 10 Connorsville blowers. One 22 & 48 & 52 & 52x48 and one 22 & 42 & 48 & 48x48 Nordberg cross compound Corliss blowing engines, and one 20 & 40 & 44 & 48 Allis-Chalmers blowing engines.

There are also a 750 k. w. and a 500 k. w. Allis-Chalmers steam turbine, driving 440-volt, 60 cycle, 3-phase generators and one 165 k. w. and one 200 k. w. motor generator sets for converting alternating current to direct current for cranes and locomotives.

There are also 2 triple expansion steam pumps, size 8" x 12" x 20 & 22x24, and 3 motor-driven centrifugal pumps for water service; also two 14 x 25 and 2-36x24 Prescott steam condensers. Steam is supplied from the boilers over the reverberatory furnaces.

The smelter plant includes a machine-shop and smithy, both of steel frame, and a considerable number of dwellings. The whole plant is fully described in "Mining and Scientific Press" of August 10, 1918.

Tonnage: Ore treated by smelter in 1920 amounted to 591,914 including 193,266 tons of custom ore. This compares with 850,894 tons, dry weight, including 245,443 tons custom ores, in 1918, and 701,450 tons, of which 189,463 tons were custom ores, in 1919.

The Acid Plant: M. E. Jacks supt.

The sulphuric acid plant, to produce the sulphuric acid for leaching the Ajo ores, designed by the Process Engineering Co., is complete and modern in every respect. Capacity is 200 tons 60° B. acid per day, of which Ajo uses about 75%, the balance finding a ready market with other mining companies and with the farmers. The works were fully described in "Min. & S. Press" of March 30, 1918. Production in 1918, 1919 and 1920 was 67,110, 48,596, and 39,996 tons of acid, respectively.

The Safety Department, organized in 1915, has been very effective, reducing cost of mine accidents by over 70%.

Production: since 1910 is as follows:

Year	Lb. Copper	Oz. Silver	Oz. Gold	Net Cost Selling Price	
				Copper (a)	Copper
1911.....	49,945,905	453,947	18,114	7.34 cts.	12.49 cts.
1912.....	53,108,628	594,319	22,881	7.02 ctc.	16.25 cts.
1913.....	52,987,383	880,915	18,989	7.65 cts.	15.57 cts.
1914.....	52,667,929	922,143	24,122	8.19 cts.

1915.....	65,268,910	1,381,077	35,264	8.00 cts.
1916.....	74,898,788	1,863,149	46,377	9.04 cts.	24.70 cts.
1917.....	62,397,017	1,257,081	37,130	13.00 cts.
1918.....	51,357,154	1,133,801	33,868	15.50 cts.
1919.....	50,236,013	1,363,253	35,844
1920.....	45,087,408	1,214,049	37,911	18.50 cts.
1921 (2 mos.)	5,768,000

(a) Per pound copper, after crediting gold and silver.

The gold and silver content in 1919 was \$76.25 per ton of refined copper; in 1920, \$88.51.

In 1920, ore mined was 493,672 tons, of which 393,227 tons were shipped to Douglas.

During 1918, 676,888 tons of ore were mined, dry weight, of which amount 105,074 tons were shipped to various smelters. In 1919; 552,078 dry tons mined including 54,429 tons of high sulphur ore.

Production has been greatly curtailed, since February 1919; copper production was but 59% of normal in 1919, and only 47% in 1920. Except for development work, operations were suspended at both mine and smelter in May, 1921.

Summary: The company's holdings of 1,229,741 shares out of a total of 1,800,000 issued shares of New Cornelia stock ensures a return of about \$2 per share to C. & A. stockholders for each \$1 dividend paid by New Cornelia. The Bisbee property is a low cost producer, making copper at 12.52¢ per pound in 1920 compared with 8 or 9¢ in pre-war years; the mines are said to be far from exhausted and the company's cash balance is large.

The management is very generally regarded as energetic and competent and a model for others to follow.

CALUMET & CORNELIA DEVELOPMENT CO. ARIZONA

Mail returned unclaimed from former office: National Bank of Arizona Bldg., Phoenix, Ariz.

Cap. \$1,000,000; \$1 par; in treasury, 740,000 shares.

Property: 370 acres, 25 miles from Phoenix. Shaft 50' deep said to show carbonate and oxide ores averaging 6.7% along a contact vein in schistose rocks cut by intrusive dykes. Reported on by R. W. Hollis.

Unfavorably regarded; presumably idle.

CALUMET & JEROME COPPER CO. ARIZONA

Idle. Office and mine: Jerome, Yavapai county, Ariz.

Officers: G. W. Avery, pres. and gen. mgr.; John Rauber, v. p.; Geo. H. Avery, sec.-treas.; with Chas. P. Avery, directors.

Inc. May, 1907, in Arizona. Cap. \$1,500,000; \$1 par; issued \$600,000. Money on hand May 1, 1919, \$25,000. Listed on Boston Curb; 600 shares sold at auction in New York, July 23, 1919, at 37 cents.

Property: 10 claims, patented, 160 acres, one-half mile S. of the United Verde mine, and adjoining the Cleopatra. Claims show schist and quartz porphyry in part cut by basalt and covered by basaltic tuff. Rocks are identical with those of adjacent properties. During 1918, acquired a two-third interest in the 101, 102, and 103 claims adjoining the United Verde and a one-half interest in the Ohio claim.

Development: includes a main 3-compartment shaft now 600' deep, sunk on the N.-S. fault on Remington claim; several tunnels, one 1,115'; a main tunnel. 2,100' long which at 360' is reported to have passed through the fault into mineralized green schist. Headings on the 600' level are said to show "schist impregnated with pyrite and chalcopyrite, and similiar rock is cut in a winze sunk from the 600' level." Underground workings total 7,000'.

Diamond-drill holes reaching a depth of about 450' below the 600' level continued in schist and greenstone showing pyrite and chalcopyrite, but failed to reveal ore of commercial grade. Company reports "a drill-

hole on the Calumet claim cut body of pyrite and chalcopryrite ore for approximately 200'." Over 2,500' of drilling had been done in 1919, to August. Ore opened on the Gadsden property, 1000' on the E. of the C. & J. tract is regarded as a favorable factor.

Equipment: a 285 h. p. Diesel engine direct connected to a 200 kva., C.-W. generator and exciter with panel board and current regulator for 480 volts; a No. 10 Imperial, 513 cu. ft. compressor by a 75 h. p. Westinghouse motor; a double-drum hoist counter-balance, driven by a 75- h. p. Westinghouse motor, good for 1,600' depth; No. 17 Buffalo blower driven by 10 h. p. a. c. motor; No. 5 Leyner drill-sharpener and oil furnace; 9 jackhammer drills; 2 No. 148 Leyner-Ingersoll drilling machines; No. 7 Cameron special sinking pump; 2, 4 stage No. 3 electric station pumps, cap. 170 gal. per. min. against 540' head, driven by two 50 h. p. a. c. motors. There are two 5,000 gal. cooling towers; two 5,000 gal. water tanks; two 10,000 gal. crude oil tanks.

The market manipulation of the stock and the misleading and often false statements given by various newspapers concerning alleged ore-bodies disclosed by crosscuts and drifts of the mine in 1917, 1918 and 1919, hurt the good name of a promising prospect. At last accounts company was to be refinanced, but operations have not been resumed.

CAMELBACK GOLD & SILVER MINING CO. ARIZONA

Address: Superior, Pinal county, Ariz.

Reported developing a property near the Silver King mine.

CAPITAL COPPER CO. ARIZONA

Address: Chas. E. McKinley, Prescott, Ariz. Company succeeds

McKinley Mng. & Dev. Co., described in Vol. XIV.

Property: in Copper Basin district, includes Dixie group of 6 claims. showing veins 5-15' wide, and the Peacock group with a vein 60' wide said to average 3.7% copper.

Development: by 700' shaft, equipped with hoist good for depth of 1,000'.

Company said to be involved in litigation with creditors of the McKinley Co.

CARDIGAN COPPER CO. ARIZONA

Company dissolved. Fully described in Vol. XIV. Property at Ajo reported under lease in 1920.

CARMELITA MINING & MILLING CO. ARIZONA

Last address: 142 W. Washington St., Phoenix, Ariz.

Officers: P. P. Parker, pres.; M. S. Weyant, v. p.; J. A. Marr, sec-treas., with H. J. McCoy and J. H. Williams, directors. Geo. Waymire, superintendent.

Inc. in Arizona. Cap. \$350,000; \$1 par; 30,782 outstanding.

Property: 17 claims, 340 acres, in the Harqua Hala mountains, Maricopa county, 14 miles from Wenden, said to carry a body of free milling ore, from 2 to 8' wide and assaying \$17 per ton. Shaft 200' deep with 100' crosscut to vein. **Equipment:** small mill, using tables and flotation process, compressor, air drills and gasoline hoist.

Presumably idle.

CARNEY MINING CO. ARIZONA

Probably dead. Described Vol. XIV.

CARTER GOLD MINING CO. ARIZONA

Oatman, Ariz. E. A. Shaw, pres.; Henry Lovin, v. p.; W. K. Ridenour, sec.; H. H. Watkins, treas. Dan Bosque, in charge.

Inc. in Arizona. Cap. \$1,000,000; \$1 par. Ariz. Central Bank, Kingman, transfer agent.

Property: New York, Giant and Gold Cross patented claims, 55 acres, in Tom Reed-Gold Road mining district, near Oatman, Mohave county, Ariz. Developed by incline shaft 350' deep, with several hundred feet of workings on the 150 and 250' levels. The vein on the 150' level was said to

be 12' wide, but of small value. On the 250' level management reported that the vein was over 7' wide and averaged \$8 60 gold per ton. On the 350' level 1,200' of drifting was done.

Company probably defunct.

CASANEGA-DALY MINING & REDUCTION CO. ARIZONA

Last address: Amadoville, Santa Cruz county, Ariz., A. D. Daly, supt.

Property: 7 claims, 140 acres, in the Tyndall district, Santa Rita Mtns., near Amadoville, Santa Cruz county. Sulphide ore said to contain copper, gold, silver, lead and molybdenum, occurs in orebodies 3 to 8' wide in monzonite.

Development: by 600' tunnel, said to have blocked out 50,000 tons ore.

Equipment: includes a 50-ton concentrator, that started operating in Dec., 1915. Management planned driving a 1,000' development tunnel and increasing mill equipment. Idle 1921.

CASEY JONES MINING CO. ARIZONA

Address: Oatman, Ariz. **Officers:** J. M. Francis, pres.; V. S. Rowley, v. p.; J. E. Shank, sec-treas., with J. J. Casey and H. M. Caswell, directors. **Inc.** in Ariz. **Cap.** \$100,000; 10¢ par; 600,000 shares in treasury. Listed in San Francisco.

Owens the Swallow group, 14 claims, 176 acres, adjoining the Oatman Gold, and the Argo and Tom Reed properties. Property in the development stage.

CASH MINE ARIZONA

Address: Prescott, Ariz.

Property: leased to N. E. Getchell, Maxton, Yavapai Co., Ariz., shows veins with gold-silver-copper-lead ore. Developed by a shaft with extensive workings.

Equipment: includes a 10-stamp mill. Six men employed at last account.

CASTLE BUTTE MINES. ARIZONA

Address: Patagonia, Ariz.

Owned by Jas. Keating and E. H. Evans.

Property: group of 6 copper-silver claims, 2½ miles S. W. of Patagonia, Santa Cruz county, Ariz., developed by 65' shaft and tunnels. Several cars of carbonate ore shipped during 1918. Indications said to be good.

CASTLE COPPER CO. ARIZONA

Property: the Dunkirk or Mt. Tritle group, 11 claims, 12 miles S. of Prescott, on the southern slope of Mt. Tritle, near the head of Slate creek, in Hassavampa district. Formerly owned by **Dunkirk Gold & Silver Mining Co.**, later by **Mt. Tritle Copper Co.**, and purchased in 1914 by D. M. Clark of Prescott, Ariz. Is an old mine, with tunnels of 150', 160', 170' and 300', driven at vertical intervals of 100', showing copper and lead sulphides, with value in copper, gold, and silver, in about the order named.

Equipment: includes steam and gasoline power, air compressor and electric light plant. A 40-ton mill has 4 Nissen stamps, 3 Wilfley tables, 100-ton ore bin and a 10,000-gal. water tank. Oil flotation unit reported to be an unqualified success, saving as high as 98% on assay value of ore. No recent information available.

CASTLE DOME DEVELOPMENT CO. ARIZONA

Address: 43 Cedar St., New York City.

Officers: Garrett Mott, pres.; Mulford Martin, v. p.; E. C. Curnen, sec.-treas., with H. A. Tingley, John Kasser, S. D. Wright and L. B. Pearson, directors. T. R. Drummond, gen. mgr., Box 1717, Globe, Ariz.

Inc. in Maine. **Cap.** \$3,000,000; \$5 par; 500 shares sold for \$110 the lot at public auction in New York on Dec. 22, 1920.

Property: 35 patented claims, in Castle Dome group, 5 miles W. of Miami, Gila county; owns 97% of the outstanding shares of, and has bond

and lease, on the Inspiration Extension Copper Co. (q. v.); also controls small group of patented claims adjacent to holdings of Inspiration Cons. C. Co.

Development: by 8 tunnels, and 4,500' of workings to depth of 600'; churn-drills reported to show a diabase intrusion 20' wide in granite, course N. 50° E., dip 18°. Company has developed a substantial deposit of copper ore on its main property. Ore runs from 1 to 2½% copper, estimated to average 1.4% for 10,000,000 tons.

CATHERINE MINE.

ARIZONA

See New Comstock Mining Co., and Katherine Gold Mng. Co.

C. B. S. MINING CO.

ARIZONA

Office: care Granite Securities Co., Citizens Natl. Bank Bldg., Los Angeles, Calif.

Property: near Prescott, Ariz., in the Copper Basin district, Yavapai County, shows several veins, with 62' shaft developing a 6' orebody, assaying 9% copper, \$10 silver and \$3 in gold. Vein dipped out of shaft and bottom of workings show a 10" ore streak of native silver. Shaft has been sunk 100'. Owned by same people as the Climax Mining Co., near Prescott, Ariz.

C. & B. VANADIUM MINE.

ARIZONA

Address: % Wilson & Stone, Christmas, Arizona.

Property: 6 claims in Dripping Springs district, 10 miles N. W. of Christmas, Gila county. The orebody, 25' by 50; on a limestone—diabase contact, is opened by 1,000' of shafts and tunnels. For geology see U. S. G. S. P. P. 115.

Production: about 500 tons of ore, said to average 1-3% V₂O₅, yielding 50 tons of concentrate.

CEDAR MINES CONSOLIDATED.

ARIZONA

Address: I. M. George, Kingman, Ariz.

Property: Arnold and Queen mines in Cedar Valley district, on W. slope of Hualpai Mtns. Mohave county. Ore occurs in fissure veins in granite carrying gold and silver. Development work to be resumed in 1921.

CENTRAL BUTTE MINING CO.

ARIZONA

Office: Box 973, Douglas, Ariz.

Officers: A. H. Struthers, pres.-mgr.; F. F. Williams, v. p.; Z. T. Phillips, sec.-treas., with A. J. Thompson and Chas. M. Seaman, directors. H. W. Evans, supt.

Inc. 1917, in Arizona. **Cap.** \$750,000; 50¢ par.

Property: 145 acres, in the Pearce mining district, Cochise county, 4 miles south of Pearce. Shaft 180' deep. Shipped some copper ore from the 70' level, from a stoping length of 42' on the vein. Ore carries from 1 to 10% copper, with some gold and silver.

Company installed an oil-driven air compressor and expended \$25,000 on property. Presumably idle.

CENTRAL COPPER CO. OF ARIZONA, INC.

ARIZONA

Offices: 71 Broadway, New York; Harris Trust Bldg., Chicago. **Mine address:** J. W. Prout, Jr., gen. mgr., Dos Cabezos, Ariz.

Officers: T. N. McCauley, pres.; D. S. Stevenson, v. p.; F. M. Utt, sec.; Geo. L. Ramsey, treas.; with D. B. Falter, A. W. Rathbun, Axel Johnson, J. A. Véness, H. A. Morgan, H. J. Gilbert, and A. R. Orr, directors.

Inc. 1919, in Arizona. **Cap.** \$10,000,000; 50¢ par; 1,296,397 shares outstanding.

Assets: include

Property investment of \$500,000 in mining claims and \$930,562 for mine operations, improvements and general developments; also general expenses to be charged against income.

Current: bank balances and cash on hand, \$250,433, securities, \$1,230, capital stock Central Mercantile Co., \$6,500, accounts receivable, \$75,090,

Central Joint Lease, \$168,880, material and supplies, \$29,200; total for current assets, \$531,335.

Installments: amount receivable on shares of stock sold, \$1,017,104, a total of \$2,979,002.

Liabilities: include

Fixed; capital stock authorized, \$10,000,000, less unissued, \$8,022,894 and unissued stock sold on deferred payment, \$1,145,376, a total of \$9,168,270, leaving the amount of capital stock issued, \$831,729. Premium on stock sold, \$470,744, which with the deferred payments noted above makes a total of \$2,447,850.

Prospective: balance payable in future, half in royalties on ore sold as partial payments on property purchase; development, mine betterments and operations, \$531,152, or total liabilities of \$2,979,002.

Property: 30 claims, about 520 acres, 18 miles W. of Wilcox, adjoining property of the Mascot Copper Co. Surficial exposures are said to be good, and the ore deposits similar to those in the Mascot property. An 81' orebody opened up at 100' depth is claimed to show sulphide ore averaging 4% copper with small gold and silver values. Company also has 20-year lease and bond on holdings of the Mascot Copper Co., consisting of 56 claims. The Central and Mascot properties are being developed simultaneously. Employed about 100 men during 1920 on road work.

Development: by numerous open cuts and shafts, totaling 3,000'. The 200' Elma tunnel reported to have developed 60,000 tons of 4% copper ore, to January, 1921. A 3-compartment shaft, down 200' in Oct., 1921, is being sunk to 1,000' depth, with levels at 100' intervals.

Equipment: under the leasing agreement the equipment of the Mascot company is available for the treatment of Central Copper company ore.

CENTURION ARIZONA MINING CO.

ARIZONA

Dragoon, Cochise Co., Ariz.

Officers: J. P. Richardson, pres.-gen. mgr.; Samuel Bennett, v. p.; H. A. Morgan, sec.-treas., with H. C. Arnold, J. W. Angle, W. H. Purdy, M. S. Richardson, E. F. Woodworth, directors. Willcox Bank & Trust Co., treas.

Inc. July 26, 1906, in Arizona. **Cap.** \$1,000,000; \$1 par; issued 789,186.

Property: 23 claims, 430 acres, in two groups, 1st group about 2 miles N. W. of, and 2d group about 5 miles N. E. of Dragoon, in the Dragoon mountains, shows a contact deposit between pre-Cambrian limestone and altered schist, averaging about 15' in width and carrying azurite and malachite, associated with hematite. Ores carry an average of 2.7% copper.

Development: by a 660' incline, several shafts from 40 to 100' in depth, and a 2,000' tunnel, with about 4,500' of workings, estimated by management to show 165,000 tons of ore. Work on the 600' level said to be in 8.12% ore for 50'.

Equipment: includes a 15 h. p. gasoline hoist, good for 800', a small air compressor, machine shop, smithy and other necessary mine buildings. Water encountered on 600' level has retarded development, but shaft is to be deepened when conditions permit. Property considered promising.

CERBAT SILVER MINES CO.

ARIZONA

Officers: M. S. McEniry, pres.; T. W. Hokom, sec.-treas., with W. L. Hokom and J. M. Sheridan, directors.

Property: a lease and option on the Imperial and White Elephant claims in the Wallapai district, 12 miles from Kingman and 3½ from Cerbat.

Development: White Elephant claim has a 285' shaft. The Imperial claim is being developed on the 125' level, using a 15 h. p. hoist.

Production: to end of 1916, said to have been \$300,000.

CERBAT SILVER MINING & MILLING CO.

ARIZONA

Officers: C. C. Perdoe, pres.-mgr.; F. E. Steele, sec.; P. Potter, treas. **Inc.** 1919, in Delaware. **Cap.** \$1,000,000; \$5 par; issued 80,000 shares. Is reorganization of original company, whose capital stock of \$1,000,000, \$1

par, was exchanged on basis of 5 shares of old for 1 of new company. Transfer agent, Registrar & Transfer Co., N. Y.

Property: company has 10-year lease with 10-year renewal privilege on 8 claims and 3 millsites in the Chloride district, including the Elkhart, Argyle, Edgar, and Victoria mill site, with 9 veins showing. The Elkhart mine, owned by Elkhart Mines Co., and which adjoins the Tennessee mine 1 mile E. of Chloride, is traversed by a strong vein, in places 10' wide, with 1' 5" of pure galena and 8 feet of galena and silver with some gold and zinc.

Developed by shafts 200' and 500' deep, short tunnels, and about 2 miles of workings. Operations were resumed in 1920 and the Elkhart shaft unwatered to 300' level.

Gross production in past is said to have been about \$1,000,000.

Ore reserves are estimated at over \$500,000 proven ore, and \$1,000,000 probable ore.

Equipment: crude oil hoist, 150-ton concentrating mill, etc. Propose sinking shaft deeper and installing flotation plant. Reported on by F. E. G. Bery.

CHAPARRAL MINING CO.

ARIZONA

Officers: J. F. Rogers, Columbus, Ohio, sec.-treas.; W. H. Jones, supt.

Company has a lease on the Little Jessie gold mine, owned by the Ohio Mines Co., in Big Bug district, Yavapai county.

Production: to 1897 was \$750,000; not much since. According to the management, active operations have ceased because of lack of capital.

CHARCOAL CANYON MINING CO.

ARIZONA

Property: 5 claims, near Cerbat, 9 miles S. of Chloride, Mohave county, Arizona.

Development: by open cut that exposed ore 50' wide and 200' long.

Thirty tons of this yielded \$27 gold per ton. Exploratory work was under way at last accounts.

CHASE CREEK COPPER CO.

ARIZONA

Idle many years.

See Volume XIV. Was controlled by Lone Star Cons. Copper Co.

CHERRY CREEK MINES CO.

ARIZONA

Believed to be dead.

Former office: Cherry, Yavapai county, Ariz. Main shaft, 115' said to show a vein with 3' paystreak giving assays of about 12.5% copper, 4 oz. silver and \$9.60 gold per ton.

CHERUM PEAK SILVER, INC.

ARIZONA

Address: M. B. Dudley, Kingman, Ariz.

Property: 17 claims, on Cherum Peak, in Mineral Park district, Mohave county, N. W. of the Rural and managed by same interests.

CHLORIDE CERBAT COPPER CO.

ARIZONA

Owners: J. T. Winn, C. P. Richards, Dr. A. W. Kirsch of Prescott.

Property at Mineral Park, near Chloride, Mohave county, opened by about 400' of workings. Said to show a 3' vein, with values up to 60 oz. silver and 20% lead, with some copper.

CHLORIDE GOLD MINING CO.

ARIZONA

Taken over by the Chloride Samoa Mines Co., which see.

CHLORIDE MINING CO.

ARIZONA

Address: F. C. Smith, Chloride, Ariz., or W. B. Twitchell, Phoenix, Ariz.

Officers: W. B. Twitchell, pres.; F. C. Smith, v. p.-mgr.; Geo. A. Macdonald, sec.-treas., with W. T. Smith, and Geo. Christy, directors.

Inc. May, 1916, in Arizona. **Cap.** \$200,000; 10c. par; 1,950,000 shares issued.

Property: 8 patented claims, 126 acres, includes Hidden Treasure Revenue, Chenango and Oro Fino claims, in Wallapai district, 2½ miles E. of Chloride, shows lead-zinc-copper-silver-gold ore.

Development: by tunnels with 4000' of working, estimated to block out 100,000 tons of ore. Company has been developing for years and plans building a mill in 1921.

CHLORIDE QUEEN MINING CO.**ARIZONA****Office:** Phoenix, Ariz. J. M. Kellogg, mgr.; Sam Rhea, supt.**Officers:** C. C. Thompson, pres.; R. C. Sanfley, v. p.; R. A. Jarrott, sec.; W. S. Goldworthy, treas., all of Phoenix, Ariz.**Property:** 5 claims and 2 fractions, better known as Sunday School and Silver Mtn. groups near Chloride., Mohave county.**Development:** by shaft 300' deep, with 650' drift and tunnels 100' and 200' long.**Equipment:** includes air compressor and hoist.

A carload shipment of \$35 ore was made in 1920.

CHLORIDE SAMOA MINES CO.**ARIZONA****Office:** 622 Higgins Bldg., Los Angeles, Cal. **Mine Office:** Kingman, Mohave county, Ariz.**Officers:** L. Hoffman, pres.; A. B. Seelye, v. p.; J. H. Hoffman, sec.-treas., with C. Hoffman and R. Mangold, directors.**Inc.** Feb. 26, 1917, in Arizona. **Cap.** \$1,500,000; \$1 par; 1,019,050 issued.**Property:** the Samoa mine, formerly owned by Chloride Gold Mining Co., consists of 6 claims, 1 patented, 125 acres, in Wallapai district, 3½ miles E. of Chloride, Ariz., said to show vertical quartz vein in granite, 8 to 36" wide and 400' long. Ore is a sulphide said to carry gold, silver, lead and iron, worth \$40 per ton. Lead content is given as 8% and iron 24%.**Development:** by 300' shaft and 3,500' of workings. Crosscut tunnel was to be driven 1,664' to open deposit to depth of 710'.**Equipment:** 15 h. p. Witte hoist and 2 compressors.**Production:** 96 cars of ore, 1903-1908, the last 30 tons assaying 1.2 oz. gold, 11.5 oz. silver, 3% lead, worth \$28.79 per ton. Total yield about \$250,000.**CHLORIDE & TELLURIDE MNG. MLG & LEASING CO. ARIZONA**

Property abandoned, company dead. See Vol. XIV.

CHLORIDE X-RAY MINING CO.**ARIZONA****Main office:** 33 N. First Ave., Phoenix, Ariz. Mine at Chloride, Ariz.**Officers:** T. A. Barker, pres.; S. Chittick, v. p.; A. W. Galpin, sec.; W. H. Mann, treas.; J. Spargo, mine mgr**Inc.** in Arizona. **Cap.** \$1,500,000; par \$1; issued 700,000 fully paid.**Property:** Hillside group of 6 claims, in the Chloride district near base of Rainbow Mountain. Developed by a 74.3' tunnel; reported to have 400' of vein 3½' wide carrying \$30 per ton. Values are in gold, silver and lead. Tunnel was being driven to intercept the X-Ray vein.**CHOLLA COPPER CO.****ARIZONA**

Mail returned unclaimed from former office: Winkelman, Ariz.

Officers: E. R. Rice, J. F. Shaw, D. R. Williamson, R. J. Rice and A. Williamson.**Inc.** Jan., 1917, in Arizona. **Cap.** \$1,000,000; shares \$1 par.**Property:** Henry Owen group of 12 claims, about 18 miles from Hayden. Values are in copper and gold.**CIRCLE PEAK MINING CO.****ARIZONA**

Mail addressed to John A. Peacock, Fort Worth, Texas, returned unclaimed.

Property: the Old Corkscrew. 10 claims, 8 miles W. of Mayer, Yavapai county, stated to show a porphyry dike, 1 mile long, with copper and some gold and silver. Presumably idle.**CLARA CONS. GOLD & COPPER MNG. CO.****ARIZONA**

Declared bankrupt. Jan. 27, 1912. See Vol. XIV. Reorganized as the Swansea Consolidated Gold & Copper Mining Co., which see in this book.

CLARISSA MINING & MILLING CO.**ARIZONA**

Out of business. See Vol. XIV.

CLEOPATRA COPPER CO.**ARIZONA**Is controlled by Chas. W. Clark, trustee for himself and associated interests, Jerome, Yavapai county, Ariz. **Executive office:** Clarkdale, Ariz.

Officers: R. E. Tally, pres.; R. K. Duffy, LeRoy Anderson, sec.; H. V. Young, asst. sec.-treas.-transfer agent.

Inc. 1901 in Arizona. **Cap.** \$10,000,000; shares \$1 par; assessable; 8,644,156 shares issued.

Property: 11 patented claims, about 149 acres, S. of the United Verde mine in the Verde district, shows fissure and gash veins carrying ores assaying 1 to 65% copper and 1 to 500 oz. silver per ton, with fair gold value. Has 6 shafts, of 25 to 150' depth, and 9 tunnels, the Dillon tunnel 3,200' long, planned to connect with the "1888" shaft.

As company is now practically owned by W. A. Clark (United Verde Copper Co.), no further exploration work will be done from the old workings.

CLEOPATRA COPPER & GOLD MINES CO.

ARIZONA

Idle and probably dead.

Officers: E. F. Thompson, pres.; Anson H. Smith, v. p.; J. W. Morgan, sec.-treas., with Harvey Hubbs, directors, all of Kingman, Ariz.

Inc. 1917 in Arizona. **Cap.** \$3,000,000; \$1 par; 1,510,000 outstanding Annual meeting, third Wednesday in January. Arizona Central Bank, Kingman, Ariz., transfer office.

Property: the Cleopatra and Palo Verde groups, 19 claims, in the Owens district, Mohave county, 15 miles from Swansea by road, shows gneiss and schist capped by 1 to 20' of limestone, and cut by quartz porphyry dikes. A zone of brecciation and crushing, 600' wide and exposed for 1,200' in length, shows iron and copper staining. The ore contains gold, and copper, present as carbonate and sulphide; assays of extensive sampling work show values of 2.9% copper with \$1.32 gold, 0.3 oz. silver, 87.6% insoluble, and 4.5% iron.

Development: by shallow pits and open cuts. Claim 600,000 tons ore in sight, which is excessive. Stock issue was offered at 50 cents.

CLIMAX MINING CO.

ARIZONA

Working under lease to Stewart Duncan at last account.

Address: Prescott, Ariz. Owns the Climax gold mine on the Has-sayampa river, near Prescott.

Development: by 5 tunnels, longest 1,000', showing a pay shoot 2" to 3' in width. Average grade of mill ore, oxidized, is said to be \$35. Sulphide ore in No. 5 tunnel is said to average \$21 per ton. Property is equipped with 10-stamp mill, air compressor and good camp buildings. No recent report received.

CLINTON COPPER CO

ARIZONA

Idle and practically dead.

John F. Campbell, pres., 40 Court St., Boston, Mass.; A. F. Parker, treas. Inc. in Arizona. **Cap.** \$5,000,000; par \$5.

Property: the O'Connor mine, about 20 miles E. of Nogales and ½ mile N. of the Mexican border.

COBALT & COPPER MINING CO.

ARIZONA

Address: J. B. Taylor, cor. Third & Pacific Aves., Long Beach, Calif.

Officers: J. Stewart, pres.-mgr. J. B. Taylor, sec.-treas., with W. M. Monroe, I. N. Vining and B. Brown, directors.

Inc. Nov., 1913, in California **Cap.** \$500,000; \$1 par; 50,000 shares outstanding; assessable.

Property: 6 claims, 120 acres, in Grape Vine canyon, Black Hills district, Yavapai county, 15 miles S. of Jerome, said to show a vein carrying cobalt, gold, copper, nickel.

Development: by 187' tunnel and shafts to depth of 60'. Only assessment work being done.

COBRITA MINES CO.

ARIZONA

Address: Salome, Ariz.

Inc. 1916. In Jan., 1918. mines were leased to the Cobrita Verde Co., which see in Vol. XIV. for complete description of property.

Property: 14 claims, 295 acres, developed by 390' tunnel and 200' two-compartment shaft with 40' crosscut at 100' and 300' drifting at 200' level.

Sixty thousand dollars claimed to have been spent on equipment of property. This was a promotion of "Dick Wick Hall," which caught many small investors.

COBRITA VERDE COPPER CO.**ARIZONA**

Mail returned and company presumably out of business. See Vol. XIV.

Address: G. J. Kahn, pres., 1707 Leighton Ave., Los Angeles Cal.

Officers: Judge W. M. McCrea, v. p.; J. W. Whittington, sec.; above with C. A. Wilson, P. E. Parentean, directors.

Inc. Nov. 13, 1916, in Utah. **Cap.** \$2,500,000; \$1 par; increased 1918 from \$1,000,000; 1,400,000 issued; 500,000 pooled. In January, 1918, company took lease and bond on property of Cobrita Mines Co., and relinquished Leatherby bond and lease on Vindicator and Little Grant Mines.

COBRIZA MINES DEVELOPMENT CORP.**ARIZONA**

Out of business. Described in Vol. XIII.

COCHISE DEVELOPMENT CO.**ARIZONA**

Address: Bisbee, Cochise county, Ariz.

Officers: Lemuel C. Shattuck, pres. Chas L. Jones, v. p.-gen. mgr.; T. O. McGrath, sec.; Jos. M. Muheim, treas.

Inc. Aug. 1, 1905, in Arizona. Succeeding the Cochise Copper Mining Co. **Cap.** \$1,000,000; \$10 par. Annual meeting, second Tuesday in January.

Property: 16 claims, 176 acres, abutting on the Holbrook mine of the Copper Queen mine and lying north of the Dividend fault and Dubacher gulch.

Development: by a 900' three-compartment shaft. Drifts on the 300', 600', and 900' levels show small bunches of sulphide ore.

Equipment: includes a 100 h. p. boiler, a 10x30' first-motion double-drum hoist, good for 1,200', and a 6-drill straight-line air compressor. Buildings are an engine house, boiler house, 20x40' carpenter shop, 20x30' smithy, and a coal trestle. Idle since 1907.

COCHISE MINERAL MINES CO.**ARIZONA**

Address: H. D. Buford, mgr. Paradise, Ariz.

Property: in the Chiricahua Mtns., near Paradise, Cochise county, developed by tunnel in 1,050', said to cut a mineralized zone showing lead-silver and manganese ore. The tunnel is to be 1,700' long.

C. O. D. MINES, INC.**ARIZONA**

Address: M. B. Dudley, gen. mgr., Kingman, Ariz.

Officers: Walter Heyn, pres.; Chas. L. Simonson, sec.-treas.; with M. B. Dudley, Jas. Lehy, directors. C. H. Urquhart, gen. supt., George Williston, supt., M. Pressler, mill supt.

Inc. 1920 in Delaware. **Cap.** \$5,000,000; \$1 par; all outstanding. Operating expenses for 1920 reported as \$125,000.

Property: 6 claims, 120 acres, in the Cerbat range, Mohave county, 16 miles N. of Kingman. Ore occurs in fissure veins, with shoots of high-grade ore, from 6" to 7' wide, containing gold, silver and lead.

In September, 1919, the mine was taken over by M. B. Dudley, was unwatered to 300' level and machinery installed. The shaft had reached a depth of 500' by December, 1920, with drifts on the 300' and 400' levels. A new 3-compartment shaft is planned.

Equipment: includes 100 h. p. electric hoist, 1400 cu. ft. compressor and a remodeled 175-ton mill. The dumps are estimated to contain 100,000 tons of ore.

COLE DEVELOPMENT CO.**ARIZONA**

Office and mine: Globe, Gila county, Ariz. P. J. Cole, pres.; M. L. Cole, Jr., sec.-treas.

Inc. Sept., 1909, in Arizona. **Cap.** \$300,000; \$1 par; 151,000 issued. Company holdings reported under bond and lease to Arizona-Globe Copper Co. Only a limited amount of development work has been done under the option.

Property: the Cole & Goodwin groups, 17 claims, extending along Mineral creek, 3 miles S. of the Gibson mine and about 10 miles S. W. of

Miami, the nearest available rail point, and 10 miles N. E. of Ray, but is separated from Ray by some extremely rugged country.

Geology: country rock is Pinal schist with diabase intrusions, carrying the Cole and Goodwin fault, traceable about 2 miles, that cuts the schist diagonally. This property shows fissure veins and also disseminated ore in schist.

Development: by the 450' Cole incline shaft, with 5 drifts, cutting several bodies of low-grade disseminated ore and some high-grade from which regular shipments of 6% to 17% copper and \$2 to \$4 gold and silver were reported in 1917. There also are several short tunnels, there being a 135' crosscut tunnel about one-half mile from the shaft, and a 480' crosscut tunnel, 1,700' west of the shaft, with portal 500' vertically below the collar of the shaft.

Equipment: includes a 22 h. p. gasoline hoist. Examined by G. M. Butler in 1919.

COLE-TENNESSEE MINING CO. ARIZONA

Successor to Schuykill Mining Co.; Controlled by Richard H. Cole, Pasadena, Calif.

Officers: R. H. Cole, pres.; David B. Gemmill, v. p.; Byron C. Hanna, Los Angeles, Calif., sec.; with Roy T. Richards and Allison L. Jones, directors. J. W. Crenshaw, Phoenix, Ariz., agent.

Inc. 1921. Cap. \$2,000,000: \$10 par; 60,000 shares issued to stockholders of Schuykill Mining Co. in exchange for the 150,000 issued shares of Schuykill stock. The Cole-Tennessee company assumed all liabilities of the old company, including \$300,000 due Frank A. Garbutt.

Permit to sell stock issued, August, 1921.

Property: the Tennessee and Schuykill mines in Chloride district, Mohave county. The ore contains gold, silver, lead and zinc in varying proportions and occurs in a fissure vein between pegmatite and schist, striking N. and S. The ore shoot averages about 300' in length and 6' in width and has been followed down to the 1,170' level. The ore is being extracted through a shaft which has reached a depth of 1,400'. Indications are that the ore shoot will be followed in undiminishing strength to a much greater depth than has been yet achieved. Reported, September, 1921, that 100,000 tons of milling ore are available.

The Schuykill is developed by 800' incline and levels at each 100'. The vein dips slightly E. and strikes N. of 9° W. At 500' the shoot is 5' wide. In a tunnel connected with the 200' level, the shoot is 8' wide.

Equipment: 100 h. p. steam hoist, 108 h. p. gas engine, 460 cu. ft. angle-compound compressor, lighting plant, etc.

COLONIAL COPPER CO. ARIZONA

Norwood, Mass. Geo. H. Morrill, former president, reported that company was sold out on foreclosure sale, March, 1916. See Vol. XIII.

COMBINATION SILVER MINES CO. ARIZONA

Address: Hackberry, Ariz. **Inc. 1920,** by J. H. Townsend and Sam Martin.

Property: an old silver mine north of Hackberry, reported reopened in 1920 and under development.

COMMERCIAL MINING CO. ARIZONA

Dead; see Vol. XIV. Absorbed by Phelps, Dodge Corporation and described thereunder, as Copper Basin Branch.

COMMONWEALTH DEVELOPMENT CO. ARIZONA

Office: Pearce, Ariz. **Mine office:** Patagonia, Ariz.

Officers: Andrew Y. Smith, pres.-gen. mgr.; Chas. E. Knox, v. p.; F. L. Bryant, sec.-treas., with C. M. Renaud and H. H. Brown, directors.

Property: a lease on the Commonwealth mine, near Pearce, Co-chise county, reported to be shipping several cars of silicious silver-gold ore a week to the Douglas smelters.

COMMONWEALTH EXTENSION MINING CO. ARIZONA

Control held in Bisbee, Ariz. Operated under lease by Emmons & Layman, Pearce, Arizona.

Property: a tract adjoining the Commonwealth mine on the E. and S. E. shows the same mineralized contact that carries high-grade ore in that mine.

Development: by a 250' shaft sunk in andesite with 230' level, corresponding to 7th level of the Commonwealth and to the water level of the district.

Equipment: includes steam plant, hoist and compressor.

COMMONWEALTH MINING & MILLING CO. ARIZONA

Described in Vol. XII.

Property: the Commonwealth mine at Pearce, Cochise county, operated under lease by the Commonwealth Dev. Co.

COMOBABI CONSOLIDATED MINES CO. ARIZONA

Address: G. W. Miller, pres; Box 776, Tucson, Ariz.

Inc. Oct. 1, 1919, in Arizona. **Cap.** \$5,000,000; par \$1; 400,000 shares issued for property and 22,000 shares sold.

Property: 43 claims in Comobabi district, Pima county, developed by 100' shaft, and drifts, opening four veins containing silver. Developing.

COMSTOCK CONSOLIDATED MINES CO. ARIZONA

Address: Jas. Curtin, Kingman, Ariz.

Property: in Union Pass section, San Francisco district, Mohave county, adjoins Gold Chain on E. Reported that Atterbury & Tuttle, Inc., of Los Angeles, will assist in financing this undertaking. Permit to sell stock was authorized, October, 1921.

CONE MINING & MILLING CO. ARIZONA

Office: 132 Edgerly Bldg., Fresno, Cal.

Officers: J. P. Eaton, pres.; M. J. Walsh, v. p.; Hugh Sparkman, sec-treas.

Inc. Aug., 1911, in Arizona. **Cap.** \$1,500,000; \$1 par; 778,875 shares issued; 1,200 shares sold for \$20 the lot in New York on Dec. 8, 1920.

Property: 12 claims, 240 acres, 2½ miles S. W. of Oatman, in the Tom Reed-Gold Road section, Mohave county. Ore occurs in veins in rhyolite dike, traversing ground from E. to W.

Development: 275' shaft with crosscutting to reach ledge on 200' level.

Equipment: includes a 15 h. p. Fairbanks-Morse hoist.

CONSOLIDATED ARIZONA COPPER CO. ARIZONA

J. A. Ritsler, pres., Kansas City, Mo.; W. J. Mitchell, supt.

Property: 12 claims, in Patagonia district, comprising the El Paso and Olive groups. A 270' shaft, said to show high-grade chalcopryrite and chalcocite ore will be sunk to 1,000' depth. Stock underwritten by Mid-Continent Securities Co. of Chicago.

Equipment: includes 25 h. p. gasoline hoist.

CONSOLIDATED ARIZONA SMELTING CO. ARIZONA

Office: 15 Broad St., New York City. Mine, smelter, and works office: Humboldt, Ariz.; G. M. Colvocoresses, receiver.

Officers: C. A. Kittle, pres.; E. S. Hooley, v. p.; F. A. Dillingham, v. p.; F. W. Thompson, sec-treas., with A. E. Cortis, J. A. Heitzmann, Donald G. Ross and J. H. Flagler, directors. O. F. Janssen, aud.

Inc. Dec. 22, 1908, in Maine. **Cap.** \$9,200,000; \$5 par; 1,663,000 issued. 177,000 reserved for bond conversion. **Bonded debt:** \$1,200,000 5% 30-year income bonds authorized, \$885,000 outstanding; and \$1,000,000 6% 20-year refunding and improvement bonds, of which \$652,000 were pledged as of Dec. 31, 1919, against loans and notes. Listed on Boston and New York curbs.

Columbia Trust Co., trustee of 6% bonds; Equitable Trust Co. trustee of 5% bonds; Guaranty Trust Co., transfer agent; all of New York.

Acquired at foreclosure sale the properties of the Cons. Ariz. Sm. Co. (see Vol. X), and the Ariz. Sm. Co. The intricate relationship of the old company and its subsidiaries is fully described in Vol. X.

Company acquired in 1920, 75% of capital stock of **Swansea Lease, Inc.**, (q. v.) and holds also an interest in the **Western Metallurgical Co.** The **Swansea Lease, Inc.**, holds a 10-year's lease on holdings of **Swansea Cons. G. & C. Co.** and owns the mine plant and reduction works. In March, 1920, a 3-years' lease was secured on the Planet mine of the **New Planet Copper Mng. Co.** (q. v.) in Yuma county, 9 miles W. of Swansea.

Financial statement: on Dec. 31, 1918, current assets were \$627,539, and current liabilities, \$342,549, a net excess of \$285,990. The operating profit for 1918 was \$580,406.

On Dec. 31, 1919, current assets were \$530,580 and current liabilities, \$624,641; and as of July 31, 1920, they were \$553,077 and \$747,858. The operating profit for 1919 was \$96,294.

The surplus account shows the following changes: credit of \$613,876 in 1916; and \$261,031 in 1917; and deficits of \$112,294 and \$243,761 in 1918 and 1919. These are net amounts after paying interest, taxes, depreciation and dividends. The profit and loss surplus on Jan. 1, 1920, was \$172,077.

By about June, 1920, the financial position became such that reorganization was necessary, and negotiations were started with the Southwest Metals Co. (q. v.) to this end. On Dec. 24, 1920, G. M. Colvocoresses was appointed Federal receiver.

Dividends: initial dividend was declared in 1917. Payments have been as follows: 10¢ in 1917; 20¢ in 1918; none since.

Property: Reduction works, with mill and smelter at Humboldt and 40 claims, 20 patented, 725 acres, near Mayer and near Middleton, Yavapai county, Ariz. The most valuable mines owned are the Blue Bell and De Soto mines.

The Blue Bell Mine: 3 claims, carries composite fissure veins in Yavapai schists; the ore has quartzite foot and sheared granodiorite hanging wall.

Development: 6 shafts, deepest, 1,200' and 2 short tunnels, with about 30,000' of underground workings. Ore contains pyrite and chalcopyrite, both slightly argentiferous and auriferous. The deposit has been opened to the 1,200' level and explored by underground workings and by diamond drill holes. Nine lenses of ore have been worked, six extending from near the surface to the 1,200' level. Ore lenses vary from 100' to 400' in length and from 5' to 25' in width, the ore averaging about 2.8% copper, 1.2 oz. silver and .04 oz. gold. Shrinkage stoping is used wherever practicable.

New work in 1919 totaled 1,227' of drifts, etc., and 1,594' of drilling; 122,069 tons of ore were produced at cost, plus development, of \$4 per ton. Indications are that orebodies will continue with depth and perhaps laterally.

Ore reserves estimated to be 390,000 tons carrying 2.65% copper and \$2.80 in gold and silver in Dec., 1919. With increasing depth the gold-silver content is increasing while the copper values are decreasing.

Mine is connected with the Prescott & Eastern R. R. by an aerial tramway.

The De Soto mine: also in schist and in the Bradshaw range a few miles from the Blue Bell, is developed by 4 tunnels, 5,000' in length, to depth of 1,000' with total workings of 14,400'. Reserves estimated, Dec. 31, 1919, to be 21,000 tons, averaging \$2.30 gold and silver and 2.15% copper. New work in 1919 was 2,584', including drilling; 27,067 tons of ore were produced at cost of \$4.75 per ton. Exploration work was disappointing.

Ore reserves: total for both the Blue Bell and De Soto mines are officially given as 411,000 tons, of which 54,548 tons are broken in stopes. In addition there is a considerable tonnage of low-grade material, some of which averages \$1.50 in gold and silver, and 1.75% copper.

The Smeltery: the reduction plant, well located for custom business, includes sampling, concentrating, roasting, smelting and converting departments, with a machine shop and smithy. All buildings are of structural steel

with brick walls or corrugated-iron sheathing, floored with cement. This plant was reconstructed in 1914, and many improvements and additions have been installed since then at a cost of over \$1,597,266; it is considered a modern and efficient plant in every respect.

A 350-ton Minerals Separation flotation plant was installed in 1913. The concentrator has two 200-ton units, each having one 10x20" and two 7x10" Blake crushers, 1 Symons disc crusher, 3 elevators, 2 sets of rolls 2 ball-mills, 10 Wilfley tables, 8 Overstrom tables, 8 vanners, 4 trommels, 8 Callow tanks, classifiers and flotation machines. The mill has a large slime pond, and overflow water is returned to the mill for re-use.

During 1919, 100,610 tons of ore were treated at a cost of \$1.56 per ton; 33,614 tons of concentrate were produced, with a copper recovery of 90.34%.

The smelter has four 7-hearth Wedge roasters. 22'6" dam, fitted with auxiliary oil-burners and supported on step bearings instead of trunnion. There are two reverberatory furnaces, burning oil and rated at 400 tons daily capacity. Matte from the reverberatory furnaces is tapped into a launder, which delivers it to a ladle in the converter room. Production averages 1,800,000 lbs. blister copper per month from company ore and custom material. Smelting is done in a 250-ton water-jacket blast-furnace for copper. Slags are granulated. The stack is of reinforced concrete, 180' high, 18' in diameter at the base and 11' at the top.

The converter department has 2 stands, with shells of barrel type, rotated electrically. Equipment includes a 40-ton Whiting electric crane with a 15-ton auxiliary crane, cranes also taking hot slag from the converters and pouring same into the reverberatories and delivering shells.

The smelter treated 97,941 tons of ore and concentrate in 1919, as compared with 160,328 tons in 1918, of which 14,723 tons were custom ore; total yield was 9,403 oz. gold, 256,927 oz. silver, and 8,689,227 lb. of copper; copper recovery was 92.83%; cost per ton was \$3.69. In first quarter of 1920, copper output was 2,810,000 lb.

The power plant has four 345 h. p. Stirling water-tube boilers, burning waste gases from the reverberatories, steam being sent therefrom through a 10" pipe line, under 150-lb. pressure. Machinery includes 2 Connorsville blowers, a Nordberg duplex cross-compound air compressor, with 40x42" air cylinder and 18x36x42" steam cylinders. There are two 300 k. w. 480-volt 3-phase 60-cycle generators, direct-connected to two 16x32x36" Nordberg cross-compound engines, and an electric turbine pump. Electric power is furnished the Blue Bell mine, 18 miles distant, current being transmitted at 15,000 volts, stepped down to 440 volts, at the Blue Bell transformer station.

Production:

	Tons Mined	Copper Lb.	Silver Oz.	Gold Oz.	Profit
1919.....	149,136	7,578,282	203,546	8,706	\$96,894
1918.....	173,960	9,472,075	254,583	10,509	580,406
1917.....	147,256	9,229,113	207,600	8,620	881,816
1916.....	109,452	7,242,347	127,228	4,858	859,015
1915.....	90,531	5,473,740	100,682	3,174	194,943

Average copper price realized in 1919 was 18.514¢; cost of domestic copper production was 17.064¢ after crediting gold and silver.

Company has been handicapped by debts incurred prior to 1915, liquidated since in part only, and these, coupled with the return of 6,000,000 lb. of copper by the Government and a falling copper market, brought on the receivership.

Reported, Fall of 1921, that Southwest Metals Co. had purchased, in part for cash and in part for stock, most of the outstanding debts of the Cons. Arizona. A petition for the sale of the property was to be heard on Oct. 24.

It is hoped that the reorganization under the auspices of the Southwest Metals Co. will safeguard the interests of the security-holders.

CONSOLIDATED HOMESTEAD MINES, INC.**ARIZONA**

Subsidiary of U. S. Continental Mines Co., an I. K. Farrington promotion, which see.

Address: care I. K. Farrington, 30 Broad St., New York.

Cap. \$600,000; \$1 par; 364,514 shares owned by U. S. C. Mines Co.

Property: Homestead mine, in Lynx-Creek district, near Walker, Yavapai county, shows a vein yielding a complex sulphide ore containing copper, lead and zinc, with gold and silver. Will eventually be consolidated with **Arizona Victory Mining Co.**

CONS. KING DEV. & COLUMBIA COP. MG. CO.**ARIZONA**

Controlled by Chas. W. Clark, trustee for himself and associated United Verde C. Co. interests.

Address: Clarkdale, Ariz.

Directors: R. E. Tally, pres.-treas.; R. K. Duffey, v. p.; Leroy Anderson, sec. H. V. Young, asst. sec.

Inc. in Arizona. **Cap.** \$6,000,000; shares \$1 par.

Property: 11 claims, 154 acres, S. of the United Verde mine, Jerome, Yavapai county, showing several bodies of oxidized and sulphide ores, carrying fair values in copper, gold and silver. Mine has a 100' shaft and a 750' tunnel, with about one-half mile of workings. Idle since 1913.

CONTINENTAL CONSOLIDATED COPPER CO.**ARIZONA**

A reorganization of the **Southern Arizona Mng. Co.**, described in Vol. XIV.

Address: 317 Ridge Bldg., Kansas City, Mo. **Mine address:** C. A. Pierce, supt., Patagonia, Ariz.

Officers: Henry C. Page, pres.; C. E. Sweet, sec.; Chas. L. Cookson, treas., with A. E. White, E. Thielman, H. J. Richards, E. P. Greenwood and R. W. Pierce, directors.

Property: the Sweet group, 23 claims, 3 patented in Wrightson district, district, 10 miles N. W. of Patagonia, shows gold-bearing copper ore, occurring as contact deposit between granite and monzonite. Mine has 365' shaft equipped with steam hoist, pumps, and air-compressor.

See Mansfield M. & S. Co.

CONTINENTAL COMMISSION CO.**ARIZONA**

Office: Winkelman, Arizona.

Officers: Lee Reagan, pres.-gen. mgr.; Alice McFadden, sec.-treas., with R. A. Chastang, directors. Tom Sanford, supt.

Property: 23 claims, including the old 79 mine near Winkelman, Gila county, held under lease and bond, and said to cover 3 parallel veins, 1-4' thick, carrying gold, silver and lead.

Present management has done 2,000' of development work and estimates 45,000 tons of ore blocked out. Shipments made to the El Paso smelter, totaled 70 cars to February, 1921, averaging \$1,200 per car net.

CONTINENTAL CONSOLIDATED COPPER CO.**ARIZONA**

Office: 517 Thacher Bldg., Pueblo, Colo.

Officers: F. E. Wallace, pres.-treas.; G. E. Wallace, v. p.; G. S. Treader, sec. F. E. Wallace, G. E. Wallace, D. E. Arnitt, J. C. McCoy, F. J. Weber and L. T. Gray, directors.

Inc. 1918, in Arizona. **Cap.** \$1,500,000; shares \$1 par; outstanding 135,000 shares.

Property: 400 acres, Owens district, Mohave county, 40 miles N. of Wenden. Ore occurs in 2' vein in altered schist, course N. W., dip 45°. Developed by prospect pits and 60' incline shaft. Assays reported as 5.6% copper and \$3 to \$100 gold.

A prospect which has merit if transportation difficulties are overcome.

CONTINENTAL COPPER & GOLD MINING CO.**ARIZONA**

Out of existence. Described in Vol. XIII.

COPPER AGE MINE.**ARIZONA**

Owned by the Arizona Ore Reduction Co., which see.

COPPER BUTTE MINES CO.**ARIZONA**

Offices: 906 New York Life Bldg., Minneapolis, Minn. and Phoenix, Ariz.

Officers: Ace. P. Abell, pres.; Wm. H. Lucia, v. p.; E. B. Crabtree, sec.-treas.

Inc. 1904, in Arizona. **Cap.** \$6,000,000; shares \$10 par.

Property: 16 claims, 8 patented, 4 miles N. W. of the Ray Cons.

The ore deposit is a mineralized breccia, consisting of schistose rock with fragments of quartz, diabase, granite and limestone; the ores are the oxides and silicates of copper. Mine is fully described in Vol. XII.

Development: by several shafts, deepest 300', and 6 tunnels, said to open orebody 85' wide at depth of 185' containing 4 to 7% copper.

Property reported taken over by **American Ore Corporation** in 1921 and active development under way.

COPPER CHIEF MINES CO.**ARIZONA**

Offices: Chas. W. Chubbuck, 20 W. 34th St., New York Mine at Quartzite, Yuma county, Ariz.

Officers: Richard Darling, pres.treas.-mgr. Quartzite, Ariz.; Richard Darling, Jr., v. p.; B. A. Darling, sec.

Inc. 1910, in Arizona. **Cap.** \$5,000,000; \$1 par; outstanding, 3,000,000.

Property: 28 claims, patented, 560 acres, in Plomosa district, Yuma county, 20 miles S. W. of Bouse, shows schist and greenstone with a contact deposit dipping at 35° and containing copper and gold ore that assays 1.3% to 20% copper. Gold runs from \$1 to \$12.80 per ton.

Development: by 2-compartment 650' vertical shaft, which has passed through greenstone into a replacement body of copper ore in limestone. Shaft is down to water-level, and crosscutting has reached 490' on the 648' level, 165' on the 420' level and 100' on the 250' level, in ore said to assay 6-20% copper.

Examined by L. A. Dunham, who reported that the remarkably favorable iron outcrops on all the claims of this company would probably be underlain by high-grade copper ore.

Equipment: includes a 25 h. p. gasoline hoist, a small compressor, 50 h. p. engine, triplex pump, two 20 k. w. generators, 20 h. p. motor, auto-trucks, and complete camp site.

COPPER CHIEF MINING CO.**ARIZONA**

Address: J. T. Matson, gen. mgr., Clarkdale, Ariz.

Officers: J. T. Matson, pres.-treas.; W. S. Fulton, v. p.; W. J. Wolf, asst. treas.-sec.; G. W. Bierhauer, asst. sec., with M. K. Hayden, R. H. Fulton, R. W. Gordon, Thos. B. Stearns and N. P. Rathvon, directors.

Cap. \$1,500,000; \$1 par; 649,897 shares issued.

Property: 21 claims, 11 patented, adjoining Senator Clark's Iron King mine in the Black Hills range, 3½ miles S. E. of Jerome, and a mill site. The claims are in the belt of metamorphosed igneous rocks and schists forming the southern extension of the United Verde or Jerome schist area. The Copper Chief-Iron King ore-body, is a boat shaped mass which runs across 3 of the claims, is 60 to 95' wide, and consists of copper-bearing iron oxide carrying gold, silver and a little copper, the total value being from \$8 to \$13 per ton. Was under lease to **Hayden Dev. Co.**, 1916 to 1918.

Development work on this deposit shows that it extends downward about 315' below the outcrop. Material composing this lens is completely oxidized from the surfate down to a depth of 226'. The bottom of the lens consists of massive pyrite with about 5' of enriched ore between the sulphide and the overlying oxidized material. Less than half of the ore has been payable ore in the oxidized zone and about 15% of the lower lying sulphides can be mined at a profit.

Development: by 350' shaft, 2,225' of work on the 100', 160', 220' and 280' levels. The wonderful shaft is 200' deep with 250' of drifts. A cross-cut tunnel is being driven to connect with the bottom of the shaft. Mine

reported to have a large tonnage of low-grade oxidized ore, which cannot stand transportation to a distance. Future of the property depends upon development of sulphide ore in quantity.

Ore reserves: 5,800 tons of oxidized ore of \$12 gold and silver content; 8,240 tons of mixed oxide and sulphide, 1,000 tons of \$50 per ton enriched ore and 8,000 tons of other ores running from \$15 to \$25 per ton.

The Wonderful claim has been developed by a 160' tunnel and 4 winzes with ore estimated at \$25,000.

Equipment: includes 125-ton cyanide mill, electric power, air compressor and hoist.

Production: total output for 1916 to 1918 (by Hayden Co.) was 71,849 tons returning \$875,800. The mine was returned to Copper Chief company and was closed in November, 1918, owing to high costs.

COPPER DOG MINING CO.

ARIZONA

Mail returned unclaimed and company probably dead. See Vol. XIV.

Property: 12 undeveloped claims in the Huachuca district, Cochise county, held under bond and lease. Ore is gold, with some silver and copper. Values as high as \$90 per ton are reported in a narrow vein.

COPPER EXPLORATION CO.

ARIZONA

Office: 8 West 40th St., New York. Is a Cameron, Michel & Co. promotion.

Officers: D. K. Jeffris, pres.; W. L. Detmold and G. H. Stetson, v. p.'s.; with P. J. Cogan, H. D. Critchfield, Melville Gillett, J. S. Jenkins, R. P. Marshall, W. L. Martin, and Wilson Potter, directors. Transfer agents, Security Transfer & Registrar Co., N. Y.; registrars, Metropolitan Trust Co., N. Y. Annual meeting, first Monday in August.

Inc. 1918, in Delaware. Cap. \$1,000,000 cum. 8% participating pfd.; and \$1,000,000 common shares; \$10 par; outstanding \$400,000 pfd. and \$1,000,000 common.

Balance sheet of March 3, 1920, shows cash, \$17,083; accounts receivable, \$56,162, and deferred charges, \$10,034. Current liabilities were \$104,380, and surplus \$18,871.

In 1919, company is said to have owned a stock interest (100,000 shares) in Canario Copper Co., London-Arizona Cons. Copper Co., Owl Head Copper Co. (100,000 shares), Tortillita Copper Co., and 80% of the stock of the Compañia Cobre Mexicana, S. A., a Mexican corporation, capitalized at \$10,000.

At various periods these companies were reported to be nearing the dividend stage, and shareholders advised to expect large profits, but no official record of actual operations or dividend disbursements is obtainable.

At last account, January, 1920, company had paid \$22,000 on an option on the London-Arizona property, but being delinquent for \$60,000 due, the contract was cancelled. Company's holdings in Oct., 1921, are said to be 100,000 shares Canario Copper Co., this Mexican holding company owning shares in two development propositions, the El Canario Copper Co. and Mountain Cons. Copper Co., which see.

COPPER FAME MINING CO.

ARIZONA

Mail returned unclaimed from former address: P. O. Box 692, Kingman, Ariz.

Officers: S. E. Barron, pres.-treas.; R. L. Gray, v. p.; E. L. Betsworth, sec.; above with F. L. Rogers and C. W. Herndon, directors.

Inc. 1917 in Ariz. Cap. \$1,500,000; \$1 par; 250,000 shares offered the public at 10c. to raise funds for development and equipment. Company paid 700,000 shares of stock to the Gold Cliff Exploration Co. for its property.

Property: 10 claims, 153 acres, in the Cerbat range, Wallapai district, Mohave county, 16 miles N. of Kingman, adjoins the Union Basin Mining Co. property and shows quartz bearing fissure veins in igneous rocks, with ore in shoots.

Development: by many shallow shafts, deepest 60', and a 110' tunnel with 15' crosscut. All openings reported to expose ore, assays being given as \$4 to \$20 gold, 10 to 20 oz. silver, 3 to 30% zinc and 5 to 23% copper, higher values undoubtedly from picked samples. Presumably idle.

COPPERFIELD PORPHYRY COPPER MINING CO. ARIZONA

Dead. See Vol. XIV.

COPPER HILL ARIZONA MINING CO. ARIZONA

Address: Lon D. Hall, Prescott, Ariz.

Officers: Lon D. Hall, pres.; C. H. Hooker, v. p.; M. Ford, sec.-treas. Inc. April, 1917 in Arizona. **Cap.** \$1,500,000; \$1 par; none issued.

Property: 7 claims, 140 acres, in Agua Fria district, Yavapai county, 2 miles from the idle Big Ledge smelter. Quartz ore containing gold and copper occurs in lenses. **Development:** by 190' shaft.

COPPER HILL GROUP ARIZONA

Idle. Formerly operated by the **Garford Syndicate**, described in Vol. XIV.

Property: 14 claims, 245 acres, in Copper Basin district, Yavapai county.

Ore: copper bearing, with molybdenite, gold and silver, in shoots and streaks in breccia, surrounded by granite, diorite and porphyry. Ore shoots vary from 5' to 15'. Average assays reported as copper, 3.75%; molybdenite, 4.25%; gold and silver, \$1.15. Property has shipped about 200 tons.

Development: by three shafts 45', 50' and 140' deep.

COPPER LODE MINES CO. ARIZONA

Mail returned from former address: care Industrial Dev. Corp., 608 South Dearborn St., Chicago, Ill.

Probably defunct. Described in Vol. XIII.

COPPER MOUNTAIN MINES CO. ARIZONA

Is a reorganization of the Stoddard Copper Co.

Address: Celora M. Stoddard, Phoenix, Ariz.

Officers: Celora M. Stoddard, pres.; Wm. H. Reynolds, v. p.; M. A. Pickett, sec.-treas., Phoenix, Arizona. S. C. Chaney, supt. Inc. 1912, in Arizona. **Cap.** \$5,000,000; shares \$5 par.

Reported that 120,000 shares had been allotted to the president in lieu of salary, November, 1921. Protest has been entered against allowing the sale of 194,000 shares at 5c.

Property: the old Stoddard mine on Copper Mountain, a mile from the Arizona Binghamton, and near Mayer, Ariz.

Development: by 250' shaft. Operated by lessees to October, 1919. Is a promising prospect, but needs cheaper transportation facilities to be commercially profitable.

COPPER QUEEN CONSOLIDATED MINING CO. ARIZONA

Company merged into **Phelps Dodge Corporation**, which see.

COPPER QUEEN GOLD MINING CO. ARIZONA

Address: Chas. Cramp, supt., Stoddard, Ariz.

Officers: Louis Goldman, pres., Los Angeles Calif.; E. G. Ball, v. p.-mgr.; A. B. Owens, sec.; V. S. Wardlaw, treas.; with J. K. Bywaters, A. Goldman, C. R. Caldwell, J. H. Gooch and A. N. Rogers, directors.

Cap. \$2,000,000; shares; \$1 par.

Property: 25 claims, 23 patented, about 360 acres, and a mill-site on the Agua Fria river, 6 miles east of Humboldt, adjoins the Arizona Binghamton. Claims show great beds of silicified schist, cut in places by rhyolite dikes.

Development: by tunnels; No. 1, 593' long with about 2,500' of workings, including shaft and workings on 300' level; No. 2, 600' long, with 2,100' of workings on adit level, a 500' inclined shaft and 3,900' of workings. On the 900' level there are two orebodies, 7' to 12' wide, containing chalcocopyrite and tetrahedrite, with some gold and silver. Diamond drilling said to show good results.

Equipment: consists of two 400 cu. ft. electric driven air compressors and 30 h. p. electric hoist.

Ore reserves are said to be 50,000 tons of 3% copper ore. A 100-ton mill with flotation unit was ordered in July, 1919 and completed February, 1920.

COPPER REEF CONSOLIDATED MINES **ARIZONA**

Address: Wm. A. Griffith, sec., 1409 Park Bldg., Pittsburgh, Pa.

Inc. Feb. 19, 1910, in Arizona. **Cap.** \$5,000,000; \$5 par.; issued 632,000 shares. Union Trust Co., Pittsburgh, registrar. Annual meeting, first Monday in February.

Property: 125 claims, 2,800 acres, including 600-acre mill site, in the Stanley Butte district, Graham county, 12 miles S. W. of San Carlos, on the Arizona & Eastern Railroad from Bowie to Miami.

Geology: claims are on the W. slope of a high mountain ridge whose E. face shows granite overlaid by 600' of quartzite covered by limestone, while the western slope is mantled with massively bedded gray limestone. The carboniferous rocks are cut by numerous fractures carrying small replacement bodies of silicious copper ore. The rocks dip down the slope at 35°, and most of the orebodies are either in gash veins or occur along fractures, conformable to the bedding. In the many older pits and shallow shafts, the narrow gash veins were not over 2' wide and the ore pinched out at 20 to 30' in depth.

Development: said to aggregate 1 mile, is by main 1,600' tunnel, the 800' North Star and 125' Jessie shafts. The manager estimated in 1914, 80,000 tons developed by 3,600' of work, which is a liberal estimate. Ores average about 5.4% copper and 68% silica, the copper being partly in the form of chalcopyrite and bornite, mixed with chrysocolla, malachite and azurite, etc. Management claimed average value of 8.65% copper with varying gold and silver up to \$12 per ton. Operations were suspended in 1915, and resumed in 1919.

Equipment: includes 240 h. p. gasoline hoists, 4-drill air-compressor and all necessary mine buildings.

Examined by Kirby Thomas.

COPPER RIDGE MINING CO. **ARIZONA**

Address: Fred Z. Steele, mgr., Ajo, Ariz.

Officers: Fred Z. Steel, pres.-mgr.; John H. Tait, v. p.; Leo E. Rager, sec., E. A. Diehl, treas., with Fritz Schroeder and Wm. Kruse, directors.

Inc. 1920, in Arizona. **Cap.** \$1,500,000; \$1 par., 635,000 shares issued. Company acquired holdings of Ajo Cornelia Copper Co. and has settled all claims against that company.

Property: 14 claims, adjoining the New Cornelia Copper Co. at Ajo, covers a lenticular deposit of carbonate and sulphide ore in rhyolite. **Development:** by 3 shafts, 40', 45' and 70' deep. **Equipment:** gas engine, hoist and necessary tools.

COPPERROX MINING COMPANY OF ARIZONA **ARIZONA**

Mail returned unclaimed from former address, 96 Harris Ave., Providence, R. I.

Inc. Jan. 17, 1910, in Arizona, as successor of the Arizona Copper Syndicate of Providence. **Cap.** \$1,000,000, \$1 par.

Property: .28 claims, 18 patented, and 2 patented mill sites, in the Dragoon Mountains, 3 miles from Courtland, Cochise county.

Development. by 236' shaft and about 500' of tunnels on a contact said to be traceable 3 miles, with surface ores carrying gold, copper and manganese, said to assay up to 16.5% copper.

Idle and probably dead.

COPPER & SILVER ZONE MINES **ARIZONA**

Claims sold to Globe Dominion Copper Co., which see.

COPPER SPRINGS MINING CO. **ARIZONA**

Office: Globe, Ariz.

Officers: Capt. E. Storer Tice, pres.; R. L. Springer, v. p.; E. F. Hiatt, sec.-treas., with Dr. W. H. Meler, B. G. Stewart and W. H. Hiatt, directors.

Inc. in Aug., 1916, in Arizona. **Cap.** \$1,000,000; par \$1; 696,230 issued. Exchange Trust Co., Boston, transfer agents; Fidelity Trust Co., Boston, registrar.

Property: 25 claims, about 500 acres, on Mt. Madera, in the Schultz ranch section of the Pinal mountains, about 6½ miles from Miami, in a rough section of the country. Property is reached by wagon road.

Development: by 8 tunnels, aggregating about 1,400'. Work reported to show considerable leaching and some silicates of copper in the upper tunnels. Nos. 5 and 6 tunnels are reported to have cut carbonates and sulphides of copper running from 1½% to 4%.

Property is a prospect promoted by the firm of Temple H. Fay & Co., of Boston.

COPPER STATE MINING CO.

ARIZONA

Office: 936 Plymouth Bldg., Minneapolis, Minn. **Mine address:** Copper Creek, Ariz.

Officers: Martin E. Tew, pres.; John A. Nelson 1st v. p.; E. E. McCarthy, 2nd v. p.-treas.; S. H. Hudson, sec., with Otto Hanson, A. M. Anderson and Walter De La Hunt, directors.

Operating officials: W. C. Steubing, mgr.; Geo. S. Croyle, supt.; Gilbert O. Tew, store mgr.

Inc. 1915 in Ariz., as a successor to the **Calumet & Copper Creek Mining Co.**, the **Old Reliable Copper Co.**, the **Copper Creek Mining Co.** and other companies. **Cap.** \$7,500,000; \$2,000,000 issued. All stock certificates held in trust under a pooling agreement until the financing of the company has been completed.

The president, Mr. Tew, informs us that "all stock is still pooled. No officer or director receives salary or cash commission and all the money raised in 1918-19 has come from business men who have visited the property."

Company is controlled (51%) by **Chemical Copper Recovery Co.** The loss of company's quasi-title to the Sombrero Butte property by adverse decision of the Court, ends that controversy, but does not affect the principal holdings on Copper Creek.

Property: 55 claims, including 100-acre mill and smelter-sites, and 100 acres miscellaneous lands; also 28 patented claims under option, making total area 1,500 acres in the Copper Creek, or Bunker Hill district, Graham and Pinal counties, Ariz. Properties are in the Copper Creek basin, on the western slope of the Galiuro Mountains, 31 miles S. E. of Winkelman and Hayden, on the Arizona Eastern R. R. Claims include the Sycamore Flat, Cumberland, Sioux Chief, Silver Reef, American Eagle, Copper Giant and Old Reliable groups.

Geology: and **Development** fully described in Volume XIV.

Equipment: includes a 150-ton concentrator, electric hoist, compressors, drills, smithy, machine-shop, etc.

Production: by former owners in 1914 was 8,400 tons of ore, making 758 tons of concentrates averaging 28.26% copper, or a total of 428,421 lb. copper. Production from Nov., 1916, to Jan. 1, 1918, was 746 tons of concentrates, averaging 24% copper, from ore extracted in development work. The total output has been 8,000 tons of 3% and 12,000 tons of 1.75 to 2.5% ore, yielding 650,000 lb. of copper, equal to 1.6% recovered. This product was hauled 31 miles by wagon, and then 400 miles by rail to smelter.

COPPER VALLEY MNG. CO.

ARIZONA

Inc. April, 1917. **Cap.** \$1,000,000; shares \$1 par.

Property: the Ehle group, 10 claims, in Copper Basin, about 4 miles from Skull Valley, Yavapai county, said to show a mineralized schist belt over 100' wide and carrying some ore of commercial grade.

Development: by 3 shafts. 30', 45', 60' deep.

A prospect only. Idle and company probably defunct.

COPPER VAULT MINING CO.**ARIZONA****Owner:** J. J. Sherwin, Bellevue, Ariz. Not incorporated.**Property:** 28 claims, 8 miles N. E. of Ray Cons. A 4' vein is said to contain 6 to 34% copper, 10 oz. silver, \$3 gold per ton. This vein is in diabase and schist with N. E.-S. W. strike and dip of 55°.**Development:** by tunnels and shaft to depth of 150'; 500' of workings. No shipments by present owners, but was worked for silver in early days.**COPPER WORLD MINING CO****ARIZONA**

See Commercial Mining Co., Arizona.

CORDOVA COPPER CO.**ARIZONA**Property taken by creditors who organized new company called **Lecora Copper Co.**, which see.**CORNCOB MNG. & DEV. Co.****ARIZONA**

See Korncob Mng. & Dev. Co.

CORNELIA AJO COPPER CO.**ARIZONA**Name changed to **Cornelia Cons. Copper Co.**, which see.**CORNELIA CONSOLIDATED COPPER CO.****ARIZONA**Name changed from **Cornelia Ajo Copper Co.**, April, 1918, to avoid confusing it with other Ajo companies. Company was promoted by Cameron, Michel & Co.**Office:** W. O. Mickel, sec., 9 Colt St., Paterson, N. J. **Mine address:** F. G. Myer, supt., Ajo, Pima Co., Ariz.**Officers** at last account: J. A. Hunter, pres.; J. S. Keegan, v. p. H. B. Haines, H. H. Munroe, H. L. Martin, and J. B. Wright, directors. Security Transfer & Registrar Co., transfer agent; Corporation Trust Co., Wilmington, registrar.**Inc.** 1916, in Delaware. **Cap.** \$2,500,000; \$1 par; 449,700 outstanding; fully paid. 200 Cornelia Ajo Copper Co. shares sold for \$31 the lot at public auction on Dec. 16, 1920.**Property:** 46 claims, 800 acres, adjoining the New Cornelia Copper Co. holdings at Ajo. Ore contains gold and silver. **Development:** by shallow shafts and some diamond drilling.**CORNELIA EXTENSION MINING CO.****ARIZONA**

Reported to be developing the Myers group, adjoining the New Cornelia at Ajo, Pima county.

CORNELIA WEST MINING CO.**ARIZONA**

E. E. Ganz, trustee, Phoenix, Ariz. See Vol. XIV. for such information as is available.

CORONADO COPPER & SILVER MINING CO.**ARIZONA****Addresses:** 503-4 K. of P. Bldg., Indianapolis, Ind.; and care E. W. Fisher, 35 E. Adams St., Phoenix, Ariz.**Officers:** E. W. Fisher, pres.; J. W. Pringle, v. p.; C. A. Chambers, sec.-treas., with C. O. Patton and H. H. Dils, directors.**Inc.** June 5, 1918, in Arizona. **Cap.** \$35,000; par 1c; 1,500,000 issued.**Property:** 24 claims, 250 acres, in Pioneer district, Pinal county. Ore occurs in a fissure in schist and porphyry, and carries gold, silver, copper and lead. The outcrop is 1,500' long. Examined by W. M. Owens of Phoenix, Ariz.**Development:** by 400' incline shaft and 1,000' of workings.**Equipment:** 65 h. p. hoist, compressor, pump, etc.**Production:** one carload of 20% copper ore has been shipped.

No recent report received

CORONADO MINING CO.**ARIZONA****Address:** Clifton, Greenlee county, Ariz.**Inc.** July 12, 1902, in Maine. **Cap.** \$1,000,000; shares \$1 par. Phelps Dodge Corp. owns nearly the entire capital stock, the larger part acquired through the Arizona Copper Co. (q. v.) merger.

Property: 30 claims, 400 acres, patented, near Metcalf, adjoins the mines of the Morenci Branch of Phelps Dodge Corp. and the Coronado mine (see Arizona Copper Co.). Mine has a 2-compartment shaft, on the Garnet claim, showing some ore on the 200' level; also several shallow shafts and short tunnels.

Property sold Sept. 26, 1921, at public auction to satisfy judgment obtained by the Arizona Copper Co.

COWBOY MINING & SMELTING CO.**ARIZONA**

Address: A. Bell, Twin Buttes, Ariz. **Owners:** O. S. Stapley and associates of Mesa.

Property: 18 claims in the Twin Buttes district, Pima county, formerly known as the Old Mormon claims. Ore reported to average 7 oz. silver and carries arsenic. Developed by shaft 300' deep besides numerous old caved shafts and tunnels. Old workings stated to have shown large bodies of disseminated chalcopryite ore.

Equipment: includes 25 h. p. gasoline engine and a 3-drill compressor. Small shipments made.

CRATER MINING CO.**ARIZONA**

Controlled by U. S. Sm., Ref. & Mng. Explor'n Co., 55 Congress St., Boston, Mass. C. W. Plumb, mgr.

CRESCENT MINING CO.**ARIZONA**

For which, see Vol. XIV.

CRITIC MINE**ARIZONA**

Address: Joseph Nolachek, lessee, Wenden, Ariz. Geo. B. Layton, New York, owner.

Property: in Cunningham Pass, Yuma county, developed to depth of 440'. Ore contains gold, silver and copper. Has been operated by leasers during recent years who have made regular shipments assaying from \$15 to \$75 gold, 10 to 25% copper, with a few ounces of silver. Calaverite, a telluride of gold reported from 400' level. Equipped with 15 h. p. hoist.

Production: said to total about \$700,000.

CROWN CITY GOLD MINES CO.**ARIZONA**

Idle. **Last address:** John C. Dalton, 6 Union Savings Bank Bldg., Pasadena, Cal. Tom Reed Gold Mines Co. has a \$40,050 investment in company. See Vol. XIII.

CUPEL MINING CO.**ARIZONA**

Described in Vol. XIV.

CUPRITE COPPER CO.**ARIZONA**

Mine near Clifton, Greenlee county, Ariz.

Officers: N. W. Lord, pres.; Isaac N. Stevens, v. p.-mgr.; L. B. Kauffman, sec.; Geo. B. Kauffman, treas.; Frank A. Ray, engr., with Frank B. Laine, directors.

Inc. March, 1904, in Arizona. Cap. \$1,000,000 \$1 par.

Property: 26 claims. 490 acres, in the Copper Mountain district, opened by shafts of 30' and 320' and tunnels of 150' and 260'. The leached zone carries isolated pockets of rich ore. Company also owns about 2,000 linear feet of strong hematitic outcrops, ranging 5 to 100' in width. Property considered promising, but company doing only limited amount of work since 1916; awaiting developments on adjacent properties.

CUPRITE INVESTMENT CO.**ARIZONA**

Address: Wenden, Ariz.

Property: the Wikinson mine, 9 miles north of Wenden, Yuma county, adjoins the Little Giant on the S. W. Developed by shallow tunnels and a 100' shaft. At 50' depth, report vein 18" wide showing gold and copper.

CURRY MINING CO.**ARIZONA**

Wm. Curry, mgr., Superior, Ariz.; John T. Rurey, Phoenix, sec.; J. D. Cox, Hornell, N. Y. and Fred H. Schulz, directors.

Inc. 1917, in Arizona. Cap. \$1,000,000; authorized to sell 200,000 shares

Property: 7 claims, the Curry group, 3 miles north of Magma, near Silver King, shows a vein of silver-lead ore.

Development: mostly by open cuts and pits, which show copper and lead ore.

CYCLOPIC MINE.

ARIZONA

Property: 6 claims in Gold Basin district, 25 miles north of Chloride, in the Cerbat range. Ore occurs in fissure vein, said to average \$12 gold per ton. Developed by shafts 75' deep.

Equipment: includes 150-ton mill, 50-ton cyanide plant, 12 h. p. hoist and compressor. Operations resumed in 1919 and shipments of \$12 ore made.

DAILY ARIZONA CONSOLIDATED COPPER CO.

ARIZONA

Address: 48 West Pennington St., Tucson, Ariz.

Officers: Dr. W. H. Martin, pres., Kokomo, Ind.; J. G. Hancock, v. p.; R. W. Langworthy, sec., Tucson; W. H. Daily, v. p. and gen. mgr., Tucson; J. W. Daily, treas. and supt.

Cap. \$2,000,000; shares \$1 par; 1,000,000 shares issued in payment for property; 627,000 shares in treasury.

Property: 22 claims, 5 patented, about 400 acres, in the Old Hat district, near Oracle, Pima county, developed by 2,000' of work, mostly by tunnels, longest 400', but including several shallow shafts. This work develops 70,000 tons of sulphide ore averaging 3% copper and \$2 in gold and silver. The Princess orebody is said to be 300' long, 50' wide and opened to depth of 500'. The Road, the Bull Dog and the Precious metal orebodies are barely prospected as yet. A new tunnel, in 300', cut 6' of ore assaying 4% at 175'. Ore as shipped averaged 6% copper and \$2.00 in gold.

Geology: the ore is a garnet rock carrying chalcopyrite; it is an inclined bed of limestone altered and mineralized by contact metamorphism. Though of low average grade, there are local masses of richer shipping ore. The deposit is quite similar to that of the adjacent mine owned by Phelps Dodge Corp. The deposits are large, and if a sufficient tonnage is proven by development, can be mined and milled by flotation methods at a profit, provided cheap transportation is possible, since the mine is on a high mountain top and far from a railway. A new State highway from Oracle to the Old Hat district, a distance of 22 miles, was completed in 1920.

Equipment: includes 100 h. p. boiler, compressor, several buildings, a 2½-ton truck, drills, assay office, and dwellings.

DAISELL MINING CO.

ARIZONA

Address: M. B. Dudley, pres.-mgr., Kingman, Ariz.

Property: the old Twins mines, a group of 5 claims, at Cerbat, Mohave county. Ore occurs in a vein 6-20' wide, showing gold, silver, lead, zinc and copper.

Development: by an old 300' incline with main working level at 130'.

Considerable development work was done during 1918-19, but discontinued in 1920 to allow concentrating of all efforts on developments of the C. O. D. mine, operated by same interests.

DARDANELLES MINING CO.

ARIZONA

Address: Chloride, Arizona.

Officers: Anna E. Durkee, pres.; S. Ford Eaton, mgr. Inc. 1920.

Property: Memphis group of 5 claims, 75 acres, a mile from Chloride, Mohave county, developed by 175' shaft and 225' of drifting, said to expose an orebody for 300' in length and up to 12' in width, averaging 1.5 oz. gold and 20 oz. silver. Ore occurs in quartz veins in granite. Shipments of 9 cars of ore from development work made to the Humboldt smelter up to July, 1921, reported to have averaged \$40 per ton.

DAYLIGHT MINING CO.

ARIZONA

Probably dead. Had a lease on part of property of Rosemont Copper Co., which see.

DEAN MINING CO.**ARIZONA****Address:** F. P. Aylwin, Kingman Ariz.**Property:** in Hualpai Mtns., Mohave county, about 15 miles E. of Kingman, developed by 400' shaft and tunnel. Ore contains gold and silver.**Equipment:** includes 60-ton mill and flotation unit, completed July, 1921.**DENN-ARIZONA COPPER CO.****ARIZONA****Office:** Bisbee, Cochise County, Ariz.**Officers:** Thos. Bardon, pres.; Lemuel C. Shattuck, treas.; J. G. Williams, sec.; with Byron M. Pattison, Thos. Bardon, A. M. Chisholm and H. L. Mundy, directors. Arthur Houle, supt.**Inc.,** Jan. 14, 1907, in Minn., as successor of Denn-Arizona Development Co. **Cap.** \$3,500,000; \$10 par; fully issued; increased June, 1917, to \$5,000,000, and 55,000 shares new stock offered for sale, at \$10. Listed on Boston Curb.**Property:** 13 claims, patented, 200 acres, in the Warren district Cochise county, immediately east of the Junction shaft of the Calumet & Arizona. The Dividend fault traverses the company's ground for about 4,500', and big orebodies have been found on adjoining properties near this fault.**Development:** by 1,800' shaft, started in conglomerate, but penetrating limestone at 840', with over 3 miles of workings. The 1,000' and 1,100' levels show considerable leached ore, with little commercial ore, though carrying occasional small bodies of rich cuprite. The 1,250' and 1,350' levels also show large areas of leached ore, with some low-grade sulphides on the 1,250' level, and a little native copper on the 1,350' level. The 1,600' level has a little ore of 12 to 15% copper tenor. The 1,700' and 1,800' levels show small bodies of rich oxide and carbonate ore running about 14% copper. The leached ore bearing zone is about 300' wide, containing ore in the form of oxides and carbonates. About \$1,500,000 has been expended in development work since 1917.

Management estimates the average tenor of ore developed almost exclusively oxides and carbonates, at 8% copper. Apparently some good orebodies may be developed at 1,800', or deeper, though the ore is erratic. The mine is wet, and has two 1,000-gal. triple-expansion pumps on the 1,000' level and five 800-gal. sinking pumps.

Equipment: includes a 1,600 h p. steam plant, with 6-drill and 25-drill air compressors and an 18x36" Ottumwa Corliss first-motion hoist, raising doubledeck cages. There is a railroad spur to the mine.**Production:** in 1920, was 2,768,362lb. copper, 168 oz. gold and 6,557 oz. silver.

In November, 1920, all operations except pumping ceased, pending an improvement of the copper market.

The Denn has an excellent chance of making a big mine, the claims covering an extension of the big ore zone of the camp, but the ore horizon at this point is lower than on the other properties. The deep development of the Junction, C. & A., and Saginaw properties will drain this ground as well as prove it, and further exploration will be easily and cheaply done. Property is splendid prospect. It may be several years before it makes a mine, but eventually, we believe, will be a very valuable one.

DESERT MINING & DEVELOPMENT CO.**ARIZONA**

Dormant or defunct. See Vol. XIV for description.

DETROIT COPPER MINING CO. OF ARIZONA**ARIZONA**

Fully described under title of Phelps Dodge Corporation (Morenci Branch.)

DEVELOPMENT COMPANY OF AMERICA**ARIZONA**

Practically defunct. T. G. Norris receiver, Prescott, Ariz.

Company has small interests in several subsidiary concerns, none of them prosperous. Stock considered worthless. Fully decried in Volumes X-XIII. Property of its subsidiary, **Tombstone Cons. Mines Co., Ltd.**, acquired in 1915 by Phelps Dodge Corp., and now operated by its branch, **Bunker Hill Mines Co.**

DIAMOND JOE MINE. **ARIZONA**

Taken over by **Silver Trails Mining Co.**, which see.

DIANA MINE **ARIZONA**

Taken over by **Arizona Ore Reduction Co.**, which see.

DISTAFF CHLORIDE MINING CO. **ARIZONA**

Officers. J. R. Evans, pres.; D. L. Parham, v. p.; B. W. Evans, sec.-treas. Inc. 1916 in Arizona.

Property: 4 claims, 70 acres, in Chloride district, Mohave county. Ore carries silver, with some gold and lead.

Development: by 285' shaft with 5 levels. All work on the Distaff vein has been done by lessees.

Equipment: includes 25 h. p. gas. engine, compressors, etc.

Production: totaled \$200,000 to end of 1916. Presumably a regular shipper, but no later figures available.

DOLPHIN MINE **ARIZONA**

Frank Ritzel, mgr.

Property: near Poland, Yavapai county. Shaft 125' deep. Gold predominant near surface, changing to silver content at 100'.

A suit for foreclosure of a labor lien was filed in Prescott against the company, July, 1921. A prospect.

DOME MINING CO. **ARIZONA**

Property is a prospect, idle, and company probably moribund. See Vol. XIV.

DOS CABEZAS GOLD RIDGE MINING CO. **ARIZONA**

Office: P. O. Box 987, Tucson, Ariz. **Mine address:** A. J. Welty, gen. mgr., Dos Cabezas, Ariz.

Officers: J. H. Huntsman, pres.; S. B. Brown, v. p. and W. A. Julian, sec.-treas.

Inc. in Ariz. **Cap.** \$1,000,000; shares \$1 par; 600,000 issued. Annual meeting first Monday in January.

Property: 10 claims, in the Dos Cabezas district, said to show a schistose fissure vein in granite and limestone carrying silver and copper sulphides with gold. Oreshoot reported as 4 to 34' in width with assays from \$12 to \$1,912.

Development: by new 700' tunnel, a 200' shaft and old 1,700' tunnel to be connected by winze with new tunnel 125' below. Equipped with 30 h. p. hoist. Said to have 75,000 tons of ore partly developed. No recent returns.

DOS ORIS SILVER MNG. CO. **ARIZONA**

Address: care J. B. Tomlinson, Prescott, Ariz.

Property located 14 miles from Prescott, consisting of the Dos Oris, Buzard and Raven silver mines, formerly property of R. H. Burmister, reported to have produced about \$200,000 in the '80's. **Development:** by shaft and drifts, opening a 7' orebody on the 160' level. Under development and shipments made to Hayden smelter in 1920-21.

DOUGH BOY COPPER CO. **ARIZONA**

Address: Geo. A. Thayer, Globe, Ariz.

Directors: Frank L. Littleton, John A. Hook, Chas. Zoller, Jos. Lauler, Wm. Burnett and E. E. Sluss, all of Indianapolis and Geo. A. Thayer, Globe, Ariz.

Inc. 1921, in Arizona. **Cap.** \$50,000; 1c. par.

Property: 11 claims, surveyed for patent, in Globe mining district, Gila county.

DOUGLAS COPPER CO.**ARIZONA**

Officers: at last account: T. C. Hendricks, pres.; H. M. Foster, v. p. Chas. Davis, supt.

Inc. Aug., 1910, in Arizona. **Cap.** \$1,125,000.

Property: 35 claims, about 30 miles from Globe on the wagon-road, and midway between the towns of Ray and Superior, Pinal county. Lands are traversed by several N. W.-S. E. fissure veins in limestone and quartzite, carrying gold, silver and copper in oxidized ores or as bornite and chalcopyrite.

Development: by 2 tunnels, a shallow shaft and a number of open cuts, all on one large vein. Property lies west of the limestone uplift in which the Newman group is located. From personal inspection, the claims are regarded as of highly speculative value.

Nothing is known of operations since 1917 and mail is returned from former address, box 421, Globe, Ariz.

DRAGOON MINING & DEVELOPMENT CO.**ARIZONA**

Address: Wickenburg, Ariz.

Officers: J. G. Scarborough, pres.; F. L. LaForce, v. p.; E. P. Truitt, sec.; H. Hertz, treas.

Property: 248 acres in Wickenburg district. In May, 1918, shaft was 250' deep with 1,000' of workings. The ore is said to contain gold, silver, and vanadium.

Equipment: includes 25 h. p. gas engine and hoist, compressor, 60 h. p. gas engine, No. 2 Cameron pump, and a 50-ton mill.

Mine is operated by lessees.

DRAGOON MOUNTAIN MINING CO.**ARIZONA**

Mine office: Johnson, Cochise County, Ariz.

Developed: by 300' vertical and 400' inclined shafts. Reported to have shipped 11 cars of ore in Aug., 1918.

DRIPPING SPRINGS COPPER CO.**ARIZONA**

Amalgamated October 5, 1920, with the **Universal Mines Co.** and described under **Dripping Springs Mines Corporation**, which see.

DRIPPING SPRINGS MINES CORPORATION**ARIZONA**

A consolidation of the **Dripping Springs Copper Co.** and the **Universal Mines Co.**

Offices: Central Bldg., Phoenix, Ariz.; 303 Farwell Bldg., Detroit, Mich.; 1112 Story Bldg., Los Angeles, Calif.

Officers: A. P. Campbell, pres.; A. D. Bailey, v. p.; W. Scheifele, sec.; A. MacLaren, treas.; A. L. Water. cons. engr.; C. H. Gowman, gen. mgr.

Inc. 1920. **Cap.** \$1,500,000, \$1 par.

Property: Columbia group, 415 acres, in Dripping Springs Wash, Gila county, 10 miles from Christmas; and the Pearl group near Mammoth. The ore occurs in fissure veins and along contacts of a diabase intrusion in limestone. Vein "D", is reported to be 42' and vein "E" 14' wide, assaying 4-10% copper with gold and silver.

Development: in 1920 about 3,000' of work was done.

Equipment: dry concentrating plant, compressor, hoist and drills.

DUNDEE-ARIZONA COPPER CO.**ARIZONA**

Address: 404 Natl. Bank of Arizona Bldg., Phoenix, Ariz.

Officers: Alex. Mackay, pres.; W. C. Foster, v. p.; Arthur J. Smith, sec.-treas.; with L. H. Chalmers, F. S. Stephen, Wm. Ferguson, C. A. Stauffer, directors. W. E. Defty, cons. engr.

Inc. March 21, 1916, in Arizona. **Cap.** \$500,000; increased March, 1921, to \$1,000,000; \$1 par; 637,500 shares issued. Equitable Trust Co., New York, transfer agent. U. S. Corporation Co., New York, registrar. Listed on New York Curb as a prospect.

Financial report covering operations from March 31, 1916, to December 31, 1920, shows current assets, \$25,839; mine development, \$183,160;

machinery and equipment, \$38,241. Liabilities include, loans and interest, \$108,320; accounts payable, \$10,512, profit and loss, \$8,075.

Property: 2 claims, the Greenup and Greenflower, lying between United Verde Extension on the east and Jerome Verde on the west, at Jerome; also a half interest with the United Verde Extension Co. in Jerome Tunnel Co., consisting of 5 claims and tunnel rights.

Claims show a blanket deposit of 5% conglomerate ore on the surface, 900' long.

Development: shaft sinking, temporarily stopped by water, was completed to 950' depth, December, 1920. Property gradually draining through tunnel of United Extension Co., which is connected with the Dundee, providing also an outlet for ores. Total workings on 940' level amount to 2,750'. Company reports about 69,000 tons of oxidized ore in sight, averaging 4-5% copper, also that a promising contact of schist and quartz-porphphy passes through the property, which it considers important geologically. During 1920 a total of 978' of development work was done, including drifts, raises and crosscuts, proving the continuation of the orebodies, said to be 10-12' wide.

Equipment: includes 75 h. p. hoist, 800 cu. ft. compressor, 3 electric motors, pumping plant, etc. A one-ton experimental leaching plant was in operation for 4 months in 1921, making a product that averages 75-80% copper.

In Dec., 1921, company announced that an examination of the company property by H. V. Winchell, has shown that conditions do not warrant expense of pumping and deep exploration, unless work from other mines should drain the ground.

Ore reserves reported increased during 1921.

DUQUESNE MINING CO.

ARIZONA

Closed down since 1917. Fully described in Vol. XIV.

DUQUESNE MINING & REDUCTION CO.

ARIZONA

Main office: 53 State St., Boston, Mass.

Officers: Geo. Westinghouse, Jr., pres.; H. H. Westingham, v. p.; W. Grosvenor Calkins, sec.-treas.; Murray G. Day, gen. mgr.

Property: the Duquesne or Westinghouse mines, comprises half a dozen mines, 84-claims, patented, 1,000 acres, near the Pride of the West and 5 miles south of the Mowry, in the Washington camp, Patagonia district.

Mine shows a contact deposit between limestone and granite-porphphy, carrying argentiferous and auriferous chalcoppyrite, sphalerite, galena and pyrite. Molybdenite occurs with the copper in the contact metamorphosed limestone, and is concentrated to a product carrying 45% molybdenum sulphide.

Development: by shafts, 650' and 120' deep.

Equipment: includes a 50 h. p. electric hoist, compressor, mill and oil flotation unit.

From 1917-19 the company is said to have made a profit of \$185,000 from operations. Closed down owing to the low prices of copper.

The property and its history, geology, etc., is fully described in U. S. Geological Survey Bull. 582, pp. 321-334, 1915.

EAGLE GOLD & COPPER MINING CO.

ARIZONA

Idle and perhaps dead. See Vol. XIV.

EAGLE MOUNTAIN COPPER CO.

ARIZONA

Probably dead. Col. P. T. McGrath, gen. mgr., at last account.

Property: the Copper Queen group, 27 claims, in the Riverside district, is slightly developed. Idle several years and lands of doubtful value.

EAST BLACK RANGE MINING CO.

ARIZONA

Address: W. S. Tarbell, 307 Denham Bldg., Denver, Colo.

Inc. 1916. Fifty thousand shares of stock were offered to the public in April 1916, at 15c a share.

Property: 6 claims, adjoining the Black Range Mng. Co., at Oatman, Arizona. It is a prospect.

EL CAPITAN COPPER & SILVER M. CO **ARIZONA**

Address: M. A. Williams, supt., Miami, Ariz.

Property: 5 claims in Globe district, Gila county, said to show a vein 3' wide, carrying up to 30 oz. silver and 7¼% copper per ton. The old workings have been unwatered and a 100-ton mill erected. Reported, September, 1921, that 2,000 tons of ore, assaying 24 oz. silver, are available.

ELEPHANT HEAD MINING & MILLING CO. **ARIZONA**

Probably closed down. Mail returned unclaimed. Described in Vol XIV.

ELKHART MINES CO. **ARIZONA**

See Cerbat Silver Mining & Milling Co.

EL TIRO COPPER CO. **ARIZONA**

For full description of property, See Vol. XIII.

Address: G. D. Bouton, v. p.; Drexel Bldg., Philadelphia, Pa.

Company reports "all properties, real and personal, of El Tiro Copper Co., were sold at public sale at Tucson, Ariz., Jan. 15, 1919, under mortgage foreclosure sale instituted by the Empire Trust Co., trustee for bondholders, and brought a sum only sufficient to refund the Receivers' certificates that had been issued for the preservation of the properties, the Trustees' fees, attorney's fees. Receiver's compensation, court costs, etc., etc., leaving nothing for distribution to bondholders." It is reported the property was purchased by G. D. Bouton as trustee for the bondholders, and is being operated under a 5-year lease and option. See *El Tiro Leasing Co.*

EL TIRO LEASING CO. **ARIZONA**

Address: Percy Williams, mgr., Silver bell, Ariz.; J. C. Low, supt.

Officers: H. S. Corbett, pres.; Percy Williams, v. p.; W. H. Buchman, sec.-treas., with R. K. Shelton, Ernest Russell, Victor Palmer, C. Stonecypher, Wm. G. Moore, M. Clyne, directors.

Inc. April, 1919. **Cap.** \$500,000; \$1 par; 100,000 shares outstanding.

Receipts from ore sales in 1920 amounted to \$227,062, and a 5% dividend or \$5,000 was disbursed.

Property: 13 claims, 234 acres, Bell district, Pima county, adjoining the Imperial mine 70 miles west of Tucson and formerly owned by the El Tiro Copper Co. Claims show contact deposits between quartz porphyry and limestone carrying cuprite, melaconite, chalcocite and chalcopyrite with a gangue of decomposed porphyry and limestone. Two orebodies under development are irregular in shape, of about 10 acres in combined area and proven to depth of 400'.

Development: by several shafts to depth of 400', with 25,000' of workings. Recent work on the 300' level reported to have opened a body of ore assaying 7.18% copper.

Equipment: includes a steam plant, electric plant and a 120 h. p. gasoline plant, with a 16x20" 250 h. p. doubledrum hoist, good for 1,000'; 3 gasoline hoists and air compressors of 18 drills aggregate capacity.

EMERALD ISLE COPPER CO. **ARIZONA**

Address: Robt. Jacobson, cons. engr., Chloride, Ariz.

Officers: A. J. Brawley, pres.; J. C. Stricker, v. p.; J. H. Conway, treas.; Carl G. Krook, sec., with James Robertson, W. C. Gould and R. C. Jacobson, directors.

Cap. \$500,000, increased May, 1920 to \$1,500,000; \$1 par.

Property: about 3 miles S. of Chloride. Reserves said to be 200,000 tons of 2.85% copper ore.

Equipment: electric power, compressor, hoist, 50-ton electrolytic precipitating plant. Closed down, February, 1919.

EMERSON MINE. **ARIZONA**

Property: 6 claims, 5 patented, in Chloride district. Mohave Co., has an 18" vein said to carry 19% copper, 3 oz. silver and \$2.80 gold per ton.

Development: by 175' shaft and 3 tunnels, longest 600', also 108' winze below one tunnel.

Equipment: 80 h. p. gas engine, 6-drill compressor, 25-ton mill, etc.

No recent returns, presumably idle.

EMERY-WHITCOMB TUNGSTEN CO.

ARIZONA

Acquired by **International Tungsten Corp.**, which see. The claims and milling plant were sold at sheriff's sale, December, 1919, to satisfy a judgment obtained by Jas. H. Emery, who held a mortgage for \$25,000 on the **Emery-Whitcomb Tungsten Co.** and the **National Tungsten Co.**

EMPIRE COPPER & GOLD MINING CO.

ARIZONA

Mail returned unclaimed from Los Angeles, Cal., and from Dragoon, Cochise Co. Ariz.

Officers at last account: Leon V. Shaw, pres.-treas.; P. E. Woods, v. p.; Chas. R. Van Tilburg, sec., with M. J. Gress, H. Hermanson, C. J. Nordquist, R. W. Pigeon and C. R. Lawrence, directors.

Inc. Jan 31, 1905, in Arizona. **Cap.** \$1,500,000; \$1 par; issued 953,814
Annual meeting, second Monday in October.

Property: 3 separate groups of claims, near Johnson and Dragoon, on the Southern Pacific Railway. The Empire group, 16 claims, 2 miles S. E. of Johnson, shows limestone and quartzite cut by porphyry and traversed by N. W. fissures carrying ore.

Development: by the 380' Empire 2-compartment incline shaft, with about 500' of drifts, so wet that it was abandoned, temporarily; also the 125' Bridge, 158' Copper Whale and a 2,000' tunnel shaft started. Mine shows auriferous and argentiferous copper ore.

Equipment: includes a 25 h. p. hoist and 1-driU air compressor. Buildings include an engine house, smithy, bunk house and boarding house.

No recent returns. Probably idle.

EMPIRE STATE MINING CO.

ARIZONA

Last address: 182 Buick Ave., Utica, N. Y.

Idle since June, 1914, and probably dead. Fully described in XIV.

EMPRESS COPPER MINING CO.

ARIZONA

Company formed, 1917, to reopen and work the old Swallow mine, 12 miles east of Wickenburg, in the Castle Creek district.

Mail returned, and company probably defunct. See Vol. XIV.

ENTERPRISE MG., REDUCTION & IMPROVEMENT CO.

Kingman, Mohave county, Ariz. Maj. W. A. Mensch, Pres. and gen. mgr., 1729 29th St., San Diego, Cal.

Property and equipment reported sold at sheriff's sale for a debt of \$2,169 in 1914. Described in Vol. XI. Copper Handbook.

EQUATOR MINING & SMELTING CO.

ARIZONA

Office: 20 Exchange Place, New York, N. Y. **Mine office:** Jerome, Yavapai county, Ariz.

Officers: Wm. A. Clark, pres.; Jas. A. MacDonald; v. p.; Harry H. St. Clair, sec.-treas., with Chas. W. Clark and Jas. H. Anderson, directors.

Inc. March 19, 1900, in West Virginia. **Cap.** \$500,000; shares \$5 par; issued, \$250,000. Annual meeting, third Monday in February.

Property: the Iron King mine, on Equator hill, adjoining the Copper Chief, 6 miles by wagon road, south of Jerome, shows a lenticular, canoe-shaped body of pyrite ore in schist near a granite porphyry contact. Mine owns north half of the Copper Chief orebody.

Closed down since 1904.

ESPERANZA EXPLORATION CO.

ARIZONA

Address: Joseph Krauss, pres.-mgr., P. O. Box 149, Qatman, Ariz.

Officers: E. L. Terwilliger, v. p.; Jos. Kielen, sec.-treas.

Inc. Dec. 6, 1915, in Ariz. **Cap.** \$150,000; shares 10c par; 884,000 issued, plus 100,000 to be issued at 25 cents in Dec., 1920.

Property: 10 claims, 170 acres, in San Francisco district, Mohave county, which shows an E.-W. 15' fissure vein, with 15° dip N. Ore carries gold, average value being \$3 per ton.

Development: by 217' shaft. **Equipment:** 25 h. p. engine, 320 cu. ft. compressor, etc.

ESPERANZA MINE**ARIZONA**

Near Twin Buttes, Pima county, Arizona. Operated by E. A. Pike, J. C. Shell and Edward Thornton, at last account.

Mine was owned in 1913 by the **Chesterfield Copper Co.** which went into bankruptcy. Company was reorganized in 1914 as the **Blanche Rose Mining Co.** (g. v.), but has not operated since 1914 and is practically dead.

ESTALEAH CERBAT SILVER MINING CO.**ARIZONA**

Property: formerly owned by J. H. Kane of Cerbat, said to have produced rich gold-silver-lead ore. Reported taken over by **Columbia Divide Mining Co.**, Nevada, in December, 1919.

EUREKA GOLD AND COPPER MINING CO.**ARIZONA**

Last address: Jerome, Yavapai county, Ariz. Dr. A. J. Murietta, pres.; A. A. Macpherson, sec.-treas.

Property: 8 claims, 7 miles south of Jerome, near the Iron King mine, is opened by 2 tunnels, showing a 30' vein with an 8' paystreak carrying bornite and chalcopyrite, with occasional visible gold, but has not developed ore in commercial quantities. Mainly idle, for some years, excepting annual assessment work.

EVA CONS. MINING & LEASING CO.**ARIZONA**

Property taken over in 1920 by the **Magwood Copper Mines Co.**, which see.

EXCELSIOR GOLD & COPPER CO.**ARIZONA**

Address: Gus Mudersbach, pres., Bouse, Yuma county, Ariz.

Inc. Aug. 1, 1902, in Arizona. **Cap.** \$2,000,000; \$1 par; stock owned by two Flagstaff men and the president. Is the successor of the Record Mines Co.

Property: the Mudersbach mine, with 34 claims, 8 miles S. of Bouse.

Fully described in Vol. XIV.

EXPOSED REEF TUNGSTEN CO.**ARIZONA**

See **Tungsten Reef Mng. Co.**

EYRICH GOLD MINES CO.**ARIZONA**

John F. White, mgr. Reported developing a property in Winifred district, Maricopa county, 18 miles north of Phoenix. A 360' shaft is said to have opened ore averaging \$28 gold per ton. Equipped with 15-ton Nissen stamp mill.

FAIRVIEW GOLD & COPPER CO.**ARIZONA**

Address: John Slak, mgr., Mayer, Ariz. Fully described in Vol. XIV. Property now owned by **Grand Central Copper Co.**, which see.

FERGUSON GROUP (AZTEC GROUP OR LOGOS MINE) ARIZONA

Under lease and bond to Argonne Copper Co., at last account.

Address: F. E. Andrews, Prescott, Ariz., owner. Property formerly under bond and lease to the Logos Mng. Co. and previously to Aztec King Mng. Co., described in Vol. XIV.

FESSENDEN GOLD MINING CO.**ARIZONA**

Property closed down, and company practically out of existence. Described in Vol. XIV.

FLUX MINE**ARIZONA**

Address: Patagonia, Ariz.

Officers: F. B. Kollberg, mgr.; Thos. Safford, supt.; John McGregor, sec.-treas. R. R. Richardson, owner.

Property: at Patagonia, Santa Cruz county, was formerly owned by Hardshell-Flux Mng. & Dev. Co., dissolved in 1910.

Development: by 130' shaft and 5,000' of workings, including a 130' winze. There is said to be 60,000 tons of carbonate ore assaying 5 oz. silver and 10% of lead, and 40,000 tons of sulphides blocked out. Recent work reported to have disclosed 22' of ore running \$25 in lead, silver and zinc.

Equipment: includes compressor, gas engine, jack-hammer drills and a mill completed in 1920.

FORD GOLD & SILVER MINING CO.

ARIZONA

Address: Prescott, Ariz.

Reported having acquired the Promoter group in Crook canyon from C. E. Warren and B. F. Peters of Prescott.

A tunnel and shaft are said to have developed a 4' vein of concentrating gold ore. Company intends to sink shaft deeper and install a hoist and compressor.

FORD MINING CO.

ARIZONA

Probably dead. Described in Vol. XII.

FORTUNA CONSOLIDATED MINING CO.

ARIZONA

Mail returned from former office: Superior, Pinal county, Ariz.

Officers: H. K. Welch, pres.; E. D. Farley, v. p.; Calvert Coates, cons. eng. D. M. Stevenson, Patrick Miller and Sanford Makeever, directors.

Inc. in Arizona. Cap. \$1,000,000; \$1 par; outstanding 750,000.

Property: described in Vol. XIV.

FORTUNA MINES CORPORATION

ARIZONA

Presumably idle.

Addresses: 31 State St., Boston, Mass., and F. G. Hobbs, Sharon Bldg., San Francisco, Calif.

Officers: F. E. Boland, pres.; Frank G. Hobbs, sec.-treas., with Thos. Pascoe, J. E. Manders, directors. T. C. Woodworth, cons. eng.; F. B. Keever, mgr.; W. H. Enderton, supt.

Inc. 1913, in California. Cap. \$500,000; \$1 par; 423,960 issued. Listed on Boston Curb. Federal Trust Co., Boston, depository.

Property: the Fortuna mine, 18 claims, 7 patented, 359 acres, 15 miles S. of Blaisdell station on the S. P. R. R., and 22 miles S. E. of Yuma, Ariz.

Mine has a good record and company has several eminent stockholders, but promotion record has been disappointing.

No recent information is available. See Vol. XIV for detailed description.

FORTUNA MINING CO.

ARIZONA

Now property of the Fortuna Consolidated Mining Co., which see.

FORTUNE MINING CO.

ARIZONA

Dead. See Vol. XIV.

Property: the Wizard mine and other claims in the Big Bug mining district, Yavapai county, purchased at mortgage sale by the Boone County Bank. Is a gold mine in which some high-grade copper ore occurs.

Development: 1,200' tunnel on the vein.

FOUNTAIN HEAD MINE

ARIZONA

A. C. Goodwill, Kingman, Ariz., has an option on this mine at Stockton Hill, near Kingman. The vein on the surface is reported to be 80' wide with values of gold, silver, copper and lead. Developing and shipping, but no figures available.

FRANCO-AMERICAN COPPER CO.

ARIZONA

Office: Box 338, Prescott, Ariz.

Officers: F. S. Clark, pres.; Fred Bowler, v. p.-mgr.; J. E. Russell, sec.-treas. G. W. McGarvey, supt.

Inc. Nov. 15, 1918, in Arizona. Cap. \$5,000,000; 10c par; issued 50,000 shares; 250,000 shares reported under option to English interests.

Property: 15 claims, 5 patented, 8 miles S. E. of Humboldt, Yavapai county. Ore with gold, silver and copper occurs in a steeply dipping 8' contact vein between schist and porphyry.

Development: shaft is 250' deep with 900' of workings said to block out 300 tons of ore. Operated in 1912 by Yavapai Metals Mining & Red. Co.

A small production of copper-silver ore was shipped to the Humboldt smelter in 1920.

FRISCO GOLD MINES CO.**ARIZONA**

Address: C. A. Lindsley, sec.-treas., 23 Conn. St., Orange, N. J. Ray L. Dimmick, mine supt., Kingman, Ariz.

Officers: C. S. Merrill, pres.; P. G. Bartlett, v. p., with Robt. Brown, directors.

Inc. 1913 in Maine. **Cap.** 3,000,000 shares; 2,920,000 issued.

Property: the Tragedy group, 8 claims, at Union Pass, San Francisco district, Mohave county, shows a highly silicified rhyolite flow with gentle dip, carrying gold. Developed by several tunnels and a 200' shaft. Production ceased in 1914, but some development has since been done.

Equipment: includes 125-ton cyanide plant, crude oil engine, etc.

GADSDEN COPPER CO.**ARIZONA**

Office: Bisbee, Arizona. **Mine office:** Jerome, Ariz.

Officers: M. J. Cunningham, pres.; Arthur Houle, v. p.; Fred Sutter, sec.; M. Newman, treas., with W. B. Gohring, W. H. Brophy, and L. C. Shattuck, directors. J. K. Hooper, supt.

Inc. Dec. 2, 1916, in Delaware. **Cap.** \$1,000,000; shares \$1 par; 300,000 issued for property. Control is held by the Calumet & Arizona Mining Co., which has an option on 70% of the stock. For each dollar expended in development work by the C. & A. Co. it receives one share of the stock of the Gadsden Copper Co. To July, 1921, approximately \$664,044 had been spent in this development work. Annual meeting, second Wednesday in January. Listed on Boston Curb.

Property: 39 claims, about 600 acres, including the Monster, News Mining Co., Walker-Larrimore and Howe groups. Land lies between the United Verde Extension and Green Monster properties.

Development: a 4-compartment shaft to 1,200' depth with 5,619' of drifting and cross-cutting. Work was retarded by bad ground and much water, but a depth of 1,230' had been reached by September, 1918. Cross-cut on 1,200' level driven towards the North and South fault, cut it about 1,800' to N. W. in December, 1919, and in their S. W. drift opened up ore running 8-10% copper, 3 oz. silver, and \$3 gold. The rock is a decomposed schist showing occasional evidences of chalcopyrite and bornite.

The site selected for the shaft is in the limestone covered area, north of the great Verde fault and about ½ mile from the Verde Combination shaft. Although this site shows no mineralization whatever, it was calculated by C. & A. engineers to reach underlying geological conditions of promise. Schist was cut at 400' and quartz and jasper at 700' in depth. Operations were discontinued in 1920, after work had failed to show ore.

Equipment: includes electric hoist good for 2,000' depth and pump. Average flow of water is 600 gal. per minute.

GALIURO MOLYBDENUM CO.**ARIZONA**

Address: W. R. Ramsdell, Tucson, and Mammoth, Ariz.

Property: the E. W. Childs mine, 7 claims, on Copper Creek, 14 miles N. E. of Mammoth, developed by tunnels, raises, etc., totaling 850'. Ore is said to carry gold with about 2% molybdenite.

GARFORD SYNDICATE**ARIZONA**

Out of business. See Vol. XIV. One of Geo. M. White's questionable promotions.

Property: known as the Copper Hill group, and described under that title.

GATES AJAR MINING CO.**ARIZONA**

Address: J. L. Craig, 246 S. Thirteen E. St., Salt Lake City, Utah, or N. Bigler, mgr., Kingman, Ariz.

Property: near Kingman, Mohave county, developed by 390' tunnel driven on a vein said to be 9½' wide.

GENERAL METALS CO. **ARIZONA**
Described in Vol. XIV. Operated the Copper Age mine, S. of Chloride, owned by the Arizona Ore Reduction Co.

GENERAL MINES CO. **ARIZONA**
Property: the Amulet mine, near Walker. An old mine, with previous production estimated at \$100,000. From drifts on 200' level of new shaft a shipment of 200 oz. silver ore was reported. The ore is a silver galena with some gold.

Equipment: includes hoist, compressor. No recent returns.

GEORGIA MINING CO. **ARIZONA**
Probably dead. Fully described in Vol. XIV.

GERMAN COPPER CO. **ARIZONA**
Idle. **Office:** Chas. H. Trotter, sec., 10 No. New Jersey St., Indianapolis, Ind. Mine at Globe, Ariz.

Officers: John H. Murdoch, pres.; Chas. H. Zollner, v. p.; John A. Hook, treas., with Wm. Elwarner, Jos. Laufer, Wm. Burnett, John I. Carson and J. B. McMurray, directors. P. H. Pernot, cons. engr

Inc. March 25, 1911, in Arizona. **Cap.** \$3,000,000; \$5 par; 142,373 issued; outstanding debt, \$95,000. Annual meeting, second Tuesday in October. Company is successor, 1911, of the Arizona-Colorado Belt & Gold Mining & Milling Co.

Property: 14 claims, 270 acres, in the Globe district, Gila county. Ore occurs in a large fissure vein cutting through diabase, quartzite and limestone, and as contact ores between diabase and sedimentary rocks. Vein strikes N. E.-S. W., dips 55°, is reported as 9' wide, proven to depth of 900', and said to carry 2% copper, 2 oz. silver and slight gold values per ton, principally as chalcopyrite, on 800' and 900' levels. Ore developed above 800' estimated at \$125,000.

Development: by 863' shaft, and a total of 3,000' of underground work. The 800' level is said to block out 2,000 tons of ore with 18,000 tons of 2½% ore reasonably certain.

Equipment: includes 100 h. p. steam hoist, pump and 7-drill air compressor. Arizona-Eastern railroad is 1 mile from property, which is well located and has merit. Assessment work only being done at last accounts.

GERONIMO MINING CO. **ARIZONA**
Address: Miami, Ariz.

Inc. in Arizona, 1916. **Cap.** \$3,000,000; \$1 par.

Incorporators: N. C. Dandy, D. J. Shea and A. M. Cobb, of Miami. J. W. Sterling, cons. engr.; R. F. Fitzgeralds, gen. mgr.

Property: at Geronimo, Graham county. Churn-drilling for copper ore was started in 1916, one hole cutting 4½% ore at 85'.

This is one of the many companies launched during the boom in 1916. Presumably dead.

GIBSON CONSOLIDATED COPPER CO. **ARIZONA**
Successor to Gibson Copper Co.

Address: 505 5th Ave., New York, or N. P. Moerdyke, sec., 811 Washington Bldg., Los Angeles, Calif. **Mine office:** Bellevue, Ariz.

Officers: A. B. Harlan, pres.; F. F. Towle, v. p.-treas.-gen. mgr.; N. P. Moerdyke, sec., with Geo. Beidler, H. T. Wayne, L. M. Brown and C. E. Kaltenhach, directors.

Inc. May, 1917, in Delaware. **Cap.** increased to \$1,250,000; \$1 par; 1,024,605 shares issued. Authorized funded debt, \$200,000. 1st sinking fund convertible gold 7s dated March 15, 1920, due March 15, 1930; \$123,000 issued. Financial statement for 1920 shows current assets, \$15,556 and current liabilities, \$31,372. Columbia Trust Co., New York, registrar.

Property: the Gibson mine, 16 claims, 8 patented, 300 acres, about 8 miles W. of Globe, Gila county. For history of mine, see Vol. XIV of this book.

Geology: country rock is Pinal schist and granite carrying 3 approximately parallel fissure veins, having a N. E. strike. The Summit and Pasquale are the principal veins, the former, of 4 to 7' width, traceable for the entire length of the property, a distance of 1¼ miles. These 2 veins are about 250' apart, and the Intermediate vein is about 75' E. of the Pasquale. Ore occurs in the Summit and Pasquale veins in well-defined shoots, pitching 50 to 65° S. their lenticular form being in some cases due to strike faulting and movements. Ore is mainly massive chalcopyrite, with a little bornite. Gangue is quartz with some calcite and small quantities of specular hematite and gypsum. Two veins show high-grade ore and some low-grade ore has been developed in 5 veins. The McKinley vein, undeveloped, shows a strong outcrop.

Development: to 500' depth by main incline shaft 600' deep with 26,000' of work, from shaft and tunnels. The Pasquale tunnel, driven on the Pasquale vein, is about 200' below the collar of the incline shaft. The Reynolds tunnel is to intersect the vertical shaft at 1,800' from the portal, a depth of 500'. Six levels show that the Summit vein runs N. 21° E., dips 56° N. W., the main pay streak carrying 8 to 15" of chalcopyrite ore assaying 20 to 30% copper, throughout the various levels. The shaft has 5,915' of workings on the Summit vein, besides drifts on the Pasquale and Intermediate vein, reached by crosscuts on the 3rd and 4th levels.

The Pasquale vein differs from the Summit in that it cuts across the bedding of the schist, instead of following the bedding planes as does the Summit, having a strike of N. 20° E., with dip of 35 to 50°. Apparently the Pasquale vein is better defined, more continuous and stronger than the Summit, the fissure being of 5 to 10' width, carrying a pay-streak, from a few inches to 3' in width, of ore assaying up to 33% copper. Ore occurs in the Pasquale vein in shoots pitching to the south, similar to the ore occurrence of the Summit.

The Intermediate vein, with drifts of 225' length on the 3rd and 4th levels, has a strike of 12° E., with dip of 5° N. W., and is only about 8" wide, with firm walls and, as developed, is not of great importance, but has possibilities. The ground is heavy and treacherous, requiring timbering for practically every foot of drifting and concrete posts have been used.

Ore reserves: in 1919, the official estimate of ore exposed and on dumps was 550,000 tons; while the total possible ore was 1,000,000 tons of which 80% can be extracted. The average is 2.25% copper.

Equipment: at the incline shaft includes two 250 h. p. boilers, a 14x16" hoist and a 6-drill air compressor. The plant at the vertical shaft includes two 200 h. p. water-tube boilers, a 16x20" double-drum hoist, good for 1,000' depth and a 10-drill cross-compound air compressor, with a 132' smokestack of 42" diameter. The vertical shaft has pumps with a capacity of 192,000 gal. daily. A 150 ton mill and flotation plant started work in Aug., 1919.

Production: the gross value of ore produced by the old Gibson Copper Co., 1906-09, has been estimated at \$1,250,000. It was shipped to the Old Dominion smelter, a distance of about 18 miles, by 10-horse teams, and required careful selection, owing to the extremely high cost of transportation, returning better than 20% copper. In 1917 production was 1,262,275 lb. copper; in 1918, 662,033 lb.

GIBSON COPPER CO.

ARIZONA

Fully described in Vol. XII of this book. Property sold May, 1917, to Gibson Cons. C. Co., which see.

GILA CANON CONSOLIDATED COPPER CO.

ARIZONA

Mine Office, Chilito, Pinal Co., Ariz.

Inc. 1916 in Ariz. Cap. \$750,000; shares 50c. par.

Officers: J. C. Callaghan, Phoenix, Ariz., pres.; R. W. Hollis, E. M., v. p.-gen. mgr.; R. A. Lewis, sec-treas, with C. H. McArthur and F. J. Dawson, directors.

Property: the Schneider group 17 claims, adjoins that of London Arizona on W., in Banner district, Gila county, 4 miles from Ariz. Eastern R. R. and only 6 miles from A. S. & R. smelter at Hayden. Was purchased from Gila Canyon Copper Co.

Development: principal work done from crosscut tunnel 1,800' long at depth of 350' to 400', with total of over 3,950' work. During 1918, new work totaled 425', exclusive of surface work.

Property shows ore at many places, but gives no indication of disseminated or porphyry ore, such as those of Miami and Ray, and though it is a contact metamorphic deposit, it is quite unlike that of Christmas. The geologic character observed and the presence of commercial ore at many points is indicative of diffused mineralization, with workable concentrations of ore in one marked bedding horizon, where cut by fractures. Deep development work to date disappointing, ore not going down to tunnel level, but several very promising veins are practically undeveloped, as yet. Can be operated at a profit if development expenses were eliminated, shipments having paid for all development to date. Forty men employed. Company derives revenue from lessees' production. Much surface ore is too low grade to ship and experiments have been made with leaching but owing to lime content, acid treatment cannot be used; the Benedict ammonia process, used by Calumet & Hecla Co. in Michigan, is applicable.

Production: from Aug., 1916, to Jan., 1919, 225 railway cars of ore were shipped to the Hayden smelter, netting \$129,384.

Examined and reported on by W. H. Weed in 1917.

GILA CANYON COPPER CO.

ARIZONA

Dead. Described, Vol. XII. Property sold to Gila Canon Consolidated Copper Co., which see.

GILA COPPER SULPHIDE CO.

ARIZONA

Office: 26 Cortland St., New York. **Mine office:** Christmas, Ariz.

Company was in hands of receivers, Allan Forbes and Geo. D. Morris, and was operated by them until reorganization late in 1919. F. T. Perkins, Boston, pres.

Inc. 1909, in Ariz., as a subsidiary of the Development Co. of America, which bought the property from the Saddle Mountain Mining Co., which still retains a 20% interest. Cap. \$2,500,000; \$10 par; 150,000 issued in treasury for bond conversion, \$690,800; treasury stock, \$309,200. Before their maturity, company had retired \$309,200 of its \$1,000,000 outstanding 1st mtge. 5-r. 6% convertible bonds due April 1918.

On Sept. 18, 1919, stockholders approved a contract with the Western Securities Co., which provides that latter company shall supply \$690,800, the amount of the par value of the Gila Co. bonds outstanding and due since April 1st, 1918, and extension of these bonds until Oct. 14, 1926, at 8%, and for issuance to the Securities Co. of 50,000 shares of treasury stock.

Company spent over \$500,000 developing its property at Christmas, before it was obliged to stop operations and give a lease on it to the American Smelting & Refining Company. This was cancelled in 1918 by mutual agreement, but a smelting contract is still in force.

Property: 2 groups, 53 claims, 817 acres, 49 patented, and 640 acres coal land. Holdings include Christmas mine and claims in Banner district, Gila county, and coal, gold and copper claims in the Saddle Mountain district, Pinal county, all within a radius of 10 miles.

The Saddle Mountain group of gold and silver patented claims, 265 acres, with 3,450' of workings, shows base dry ore, with little lead and zinc and traces of copper, an average of 300 assays showing \$13 per ton in gold and silver values.

There are also 640 acres of patented coal lands, in the lower basin of Deer Creek, showing two veins of dirty bituminous coal, developed by a 175' incline shaft and 800' of workings, equipped with a small steam hoist and pump. There is a bee-hive coke oven for testing the coal.

The Saddle Mountain group and the coal lands have not been sufficiently developed to prove or disprove their value.

The Christmas mine is at the junction of Christmas canyon with the Gila river, on the north side of the stream, 8 miles from Hayden. The mine was opened 1883, but being on the San Carlos Indian Reservation, was idle until the lands were restored to the public domain, 1902.

Geology: the basal rock is a pre-Cambrian formation, known as Pinal schist, overlain by conglomerates, shales and quartzites of probable Cambrian age, covered by Paleozoic limestone. All these rocks are cut by intrusions of a quartz-mica-diorite porphyry and granite, and altered by intense contact metamorphism, to marble garnetite, etc.

Ore occurs mainly as replacements in limestone, largely garnetiferous, extending outward for a distance of 10' to 100' from the contact. The ore carries copper sulphides, mainly chalcopyrite, but with bornite and some copper glance. The contact zone has shown copper ore for 4,000'. The orebodies so far mined range from 4 to 135' in width. In places the ore contains nuclear blocks of undigested limestone reducing the average grade, which as mined assays about 3% copper and 30 cents gold per ton.

Development: at Christmas is by 4 shafts to depth of 850', all showing oxidized and sulphide ores. The mine has 30,000' of workings. Mining is confined to a block between the 350' level and surface, but orebodies are developed on the 500' and 800' levels. Improvements include the construction of an aerial tram, connecting the mines with the Arizona Eastern Railroad, crusher plant, compressor, pumps, etc., all electrically operated.

Production: from the time mining operations were begun in 1916 to Dec. 31, 1918, the company produced 1,800 oz. gold, 70,000 oz. silver and 14,500,000 lbs. copper, valued in excess of \$3,360,000. During 1920 regular daily shipments of 250 tons running 3% copper were made to the Hayden smelter. Closed down December, 1920, owing to high costs and low metal prices. The Saddle Mountain group is being operated by lessees (1921).

GILA COUNTY CINNABAR MINING CO.

ARIZONA

Mail returned unclaimed from Phoenix, Ariz. Owned claims in the Sunflower district, Mazatzal mountains, Maricopa county, 30 miles from Phoenix. Ores occur in ancient schists, and consist of cinnabar and opaline silica.

Erected a 30-ton furnace for recovery of the quicksilver. Geology described by Ransome, U. S. Geological Survey Bull. No. 620, pp. 111-128.

GILA COUNTY EAST VERDE MNG. & SM. CO.

ARIZONA

Address: Payson, Gila county, Ariz.

Inc. 1917 in Ariz. **Cap.** \$750,000; shares \$ 1 par.

Directors: W. W. Brooker, E. R. Oliver, F. H. Gardner, T. S. Rush, O. L. Scribner, E. R. Lindsey and F. W. Washichek.

The articles of incorporation show the usual preamble, but specify no special property to be developed as yet.

GILA DEVELOPMENT CO.

ARIZONA

Address: C. H. Barney, 185 Devonshire St., Boston, Mass.

Officers: Ralph W. Bartlett, pres.; Chas. M. Barney, sec.; J. C. Devine, mng. director.

Cap. \$1,000,000; \$1 par; 850,000 shares outstanding, October, 1921. State Street Trust Co., Boston, registrar.

Property: in Cave Springs wash, 3 miles N. E. of Kelvin, Pinal county, shows an 8' vein containing free-milling gold ore, opened by 200' shaft with drifts on the 100' and 200' levels. A 30-ton Lane mill was installed early in 1920 and company estimates 20,000 tons of free milling ore available for treatment.

GILA MONSTER MINING CO.**ARIZONA****Address:** W. H. Seaman, mgr., P. O. Box 561, Globe, Ariz.**Officers:** W. E. Clark, pres.; Dr. J. L. Adams, v. p. Dr. J. Q. Grave, sec-treas., with O. O. Clark, directors. Transfer office, Monroe, La. Stock control reported held by Albany Divide Mng. Co. of Nevada, a Boston promotion.**Inc.** 1917, in Arizona. **Cap.** \$1,000,000; \$10 par; 40,000 outstanding.**Property:** 27 claims, in Richmond Basin, 9 miles from Globe, including the MacMorris, Richmond and La Plata mines. Said to show a NE-SW contact vein between diorite and diabase, the ore running 40 oz. silver and 1% copper.**Development:** by shaft and tunnel to a depth of 800', 3,000' of workings.**Equipment:** 50-ton cyanide plant, 90 h. p. engine and crusher. Operated by lessees.**GILLESPIE MINING CO.****ARIZONA****S. A. Hobson**, mgr., Mayer, Ariz.**Property:** Gillespie mine in Bumblebee district, S. of Mayer, Yavapai county, closed down June, 1921.**GILT EDGE MINES CO.****ARIZONA****Address:** Oatman, Ariz.**Officers:** E. A. Burns, pres.; E. A. Shaw, v. p.; S. W. Klass, sec-treas., Kingman, Ariz.**Inc.** in Arizona. **Cap.** \$150,000; 10¢ par; 800,000 in treasury. Listed on San Francisco and Los Angeles exchanges.**Property:** 95 acres, 2 miles S. W. of Oatman, adjoining the Old Vivian mine, said to show 4 parallel veins varying from 4' to 60' in width.**Development:** 4 tunnels, one claimed to have opened a vein for 50', with gold values from \$5 to \$12 per ton. Company sank a shaft, 250' deep, April 26, 1916, at which depth altered andesite was found, said to show quartz and spar of fair value. Crosscutting done on the 100' and 200' levels.**Equipment:** includes 25 h. p. hoist and a 52 h. p. air compressor. Presumably idle.**GIRARD MINING CO.****ARIZONA****Address:** Oatman, Mohave county, Ariz. H. B. Magill, sole owner.

Company is not incorporated.

Property: 4 claims, adjoining the Della claim of the Tango group. The ore is free milling and amenable to flotation treatment.**GLADSTONE UNITED METALS CO.****ARIZONA****Address:** Phoenix, Ariz. F. C. Smith, supt. Chloride, Ariz.**Officers:** F. C. Smith, pres.; W. B. Twitchell, v. p.; W. T. Smith, sec-treas.**Inc.** 1916, in Arizona. **Cap.** \$150,000; \$1 par.**Property:** 7 claims, 3 miles E. of Chloride, Mohave county, Ariz. Claims show igneous rocks, which at surface show much alteration and subsequent mineralization. Rhyolite dikes run into one main dike, in which are the veins.**Development:** by 140' shaft sunk on hanging wall, drifts, and tunnel.**Equipment:** hoist, blacksmith-shop, bunk-house.

No recent reports; presumably idle.

GLANCE MINE**ARIZONA****Address:** J. E. Wood, city collector, Tucson, Ariz. Dan Ellison, supt.**Property:** formerly known as the Providencia, 1 mile W. Lincoln Camp, Papago district, bonded by J. E. Wood and W. G. Hurd. Ore occurs in 40' vein in andesite. Assays reported as high as 100 oz. silver, 58% copper per ton.**GLANCE MINING CO.****ARIZONA****Address:** Twin Buttes, Ariz.**Officers:** E. G. Bush, pres., treas. and gen. mgr.; G. H. Langworthy, sec.; S. J. Gunn, supt. Is a close corporation.

Inc. in Ariz., in 1916

Property: 3 claims, patented, held under option for Twin Buttes Mng. & Smelting Co., and a 2-year lease on the Twin Buttes railroad. The ore occurs in shoots at intersection of cross fractures with a main fissure in altered limestone near and roughly parallel to a granite contact. The ores contain copper glance, chalcopyrite and iron pyrite, with rather low gold-silver content, and run 7% to 9% by smelter return.

▲ small but presumably regular shipper.

GLOBE BULLION MINING CO.

ARIZONA

Inc. by P. J. Minck of New York, W. Buckland and G. B. Pert of Globe.

Property: south of Miami, shows gold-bearing ore. Press reports stated that the company's slogan was, "Pick your own samples and the company will pay for the assay." Caveat emptor. Mail returned unclaimed. Presumably dead.

GLOBE COMMERCIAL COPPER CO.

ARIZONA

Property: the California group, near Copper Hill, Gila county, shows silver and manganese ore. Developed by 45' shaft.

Shipped about 1,500 tons of ore from lessees' operations, 1916-17. Idle.

GLOBE DOMINION COPPER CO.

ARIZONA

Address: P. O. Box 432, Globe, Ariz.

Officers: H. W. Clark, pres.; M. S. Clarke, v. p.; T. A. Pascoe, treas.

Inc. in Arizona. **Cap.** \$1,500,000; \$1 par; 1,213,108 outstanding; 1,000 shares (with other stocks) sold at public auction in New York on Dec. 22, 1920, for \$100 the lot.

Property: 25 claims, about 425 acres, in diabase area, 1 mile east of Globe, adjoining the Old Dominion on east and south, was originally worked for silver, lead and copper, found near the surface. Development has proven the existence of copper at depth. Property was formerly known as the Copper and Silver Zone Mines, owned by W. R. Martin, El Paso, Texas.

Development: by the 103' Clark and 108' Faught shafts on the Old Ironsides claim from which ore shipped has returned 1.25 to 3.5% copper, \$19 to \$236 silver, or an average of \$21.60 per ton. Shipments from development work near surface said to have been worth \$16,000. Present company has sunk the shaft to 800 level. Property was reported on by Sydney H. Ball for Luke, Banks & Weeks, of 14 Wall St., who are financing it.

Production: in January, 1921, 70 tons of ore shipped to old Dominion smelter returned 18.59 oz. silver, .5% copper, 32% manganese and 9% iron.

GLOBE & LOST GULCH SILVER-COPPER MINES CO. ARIZONA

Mary E. Brooke, pres. and gen. mgr.; H. A. Wimbush, sec.

Inc. April 1, 1907, in Arizona. **Cap.** \$1,000,000; \$1 par.

Property: 10 claims, patented, 180 acres, and other locations; also a mill site at the head of Lost Gulch, Gila county, 1½ miles N. of Inspiration and Miami, showing quartzite, granite and limestone, cut by porphyritic dikes.

Development: shows silver-lead ore in diabase, with indications that copper ore will come in at depth; also shows silver-chloride ore in granite and limestone, and copper carbonate ore in dacite. Mail returned unclaimed, from Denver office; company probably defunct.

GLOBE-MIAMI COPPER CO.

ARIZONA

Address: D. F. Beggs, pres., 286 Fifth Ave., New York.

Officers: Victor Gilsey, sec.-treas., with F. W. Geiler, J. F. Daley, and E. R. Terry, directors.

Inc. 1917 in Delaware. **Cap.** \$200,000; \$1 par.

Property: 21 claims near Inspiration and Black Warrior ground in Globe-Miami district, upon which \$200,000 is said to have been spent in development and purchase. Some gold ore has been extracted.

All the literature available on the property is from a brokerage house in New York. No record of operations obtainable.

GLOBE MINING CO.**ARIZONA**

Globe, Gila Co., Ariz. Now the Moline & Arizona Copper Co., which see.

GLORIANA MINE**ARIZONA**

Address: Andrew Smith, owner, Cordes, Ariz.

Property: 4 claims, 100 acres, in Bumblebee district, Yavapai county, S. of Mayer, adjoining the Gillespie mine and first operated about 75 years ago. Ore occurs in shoots, containing gold and silver.

Development: by 125' shaft. A prospect.

GLORY HOLE BONANZA MINES CO.**ARIZONA**

Address: Salome, Yuma county, Ariz.

Officers and Directors: Dick Wick Hall, pres.-mgr.; E. S. Jones, v. p.; H. W. White, treas.; E. G. Jesson, sec.

Inc. Feb. 5, 1916, in Arizona. Cap. \$150,000; 10¢ par; 1,250,000 outstanding.

Property: 12 claims, seven 8 miles N. W. and five 10 miles N. of Salome.

Geology: quartz vein, with N. W.-S. E. strike, in andesite and schist, shows small high-grade and large low-grade shoots of gold ore and some copper.

Development: by 4 tunnels aggregating 825' in length. Workings to 175' depth total 1,500'.

Equipment: Fairbanks-Morse engine, 4-drill compressor, machine-drills.

Is an aftermath of the spectacular discovery of specimen gold ore made a few years ago. Advertising was decidedly lurid in local Arizona papers.

GOLCONDA CONSOLIDATED**ARIZONA**

Taken over by Union Metals Corporation, which see.

GOLCONDA EXTENSION MINING CO.**ARIZONA**

Address: O. D. M. Gaddis, Kingman, Ariz.

Officers: J. E. Perry, pres.; C. Metcalfe, sec.-treas.; with O. D. M. Gaddis, directors.

Cap. 1,000,000 shares, all issued, 85% held by Messrs. Gaddis and Perry.

Property: 19 claims, 3 patented, includes the Oro Plata mine, adjoining the Golconda mine on the N., 16 miles N. of Kingman. A number of mineralized veins run through property.

Development: by main 354' shaft, and considerable openings. Lessees extracted 2,500 tons of \$80 ore. At 280' there is said to be 4' of ore running 17-27% zinc and \$6-\$27 gold and silver per ton.

Production: totaled \$500,000 to end of 1916.

Regarded as promising but needs development. Idle several years and property for sale.

GOLCONDA MINE.**ARIZONA**

See Union Basin Mining Co., and Highland Mining Co.

GOLD BACK MINING CO.**ARIZONA**

S. S. Wold, pres.; H. T. Widney, sec.; both of Pasadena, Cal.

Property: 2 claims owned and 2 under option, 2 miles south of Chloride, Mohave county, showing fissure vein carrying complex gold-silver-lead-copper-zinc ore. **Development,** on 150' level said to show 7' of ore assaying \$5 gold and silver, \$20 lead, \$15 copper, and \$9 zinc. No recent report.

GOLD BAR MINES CO.**ARIZONA**

Address: F. A. Muller, mgr., Wickenburg, Ariz.

Officers: J. W. Miner, 2nd v. p.; H. W. McMunn, sec., 615 Union Bank Bldg., Pittsburg, Pa.

Property: 34 claims of the Interior Mining & Trust Co., 15 miles N. E. of Wickenburg. Developed by 750' shaft. At 300', ore is gold-copper, at 500', copper sulphides beginning to appear.

Equipment: includes 12 Nissen stamps of 100-ton daily capacity. Idle.

GOLD BLOSSOM MINING CO.**ARIZONA**

Address: G. M. Spicer, Prescott, Ariz. Inc. in Arizona.

Property: the old Perry silver mine, 40 acres, patented, 9 miles S. of Prescott, Yavapai county. Lies immediately W. of Mary E. mine. Shows complex silver-gold-lead copper-zinc ore.

Development: by 360' incline shaft and levels.

Equipment: 25 h. p. engine, hoist. Idle. Mine under water.

GOLD CHAIN MINING CO.**ARIZONA**

Office: 625 Market St., San Francisco. Mine address: C. F. Nourse, supt., Kingman, Ariz.

Officers: Edwin S. Shanklin, pres.; D. W. Shanks, v. p.-gen. mgr.; Andrew Aitken, sec.

Inc. 1920, in Nevada **Cap.** \$2,000,000; par \$1. Transfers at company's office. Annual meeting, Dec. 20.

Property: 11 claims, 220 acres, in Union Pass section of the San Francisco district, 3 miles E. of the Katherine, shows a quartz vein in granite porphyry, with 45° dip to N. Gold-silver ore occurs in shoots.

Development: by 100' shaft and 1,100' total workings.

Equipment: includes 15 h. p. gasoline hoist.

Mine is still in prospective stage.

GOLD CLIFF EXPLORATION CO.**ARIZONA**

Address: Geo. B. McDevitt, P. O. Box 412, Oatman, Ariz.

Officers: Thos. Devine, pres.; Harry C. Keyes, v. p.; Geo. B. McDevitt, sec.-treas.-mgr., with Walter L. Kohlberg, and Robert Rae, directors. **Ex. Com.:** F. L. Sims, H. L. Rice, and J. P. Connolly.

Inc. April, 1914, in Arizona. **Cap.** \$1,000,000; \$1 par; 500,000 shares outstanding.

Property: 18 claims, 285 acres, adjoining the Tom Reed Gold Mines Co.'s property, near Oatman, Mohave county. Developed by shallow openings.

Is a prospect.

GOLD DUST MINING CO.**ARIZONA**

Successor to the Orion Mining & Milling Co.

Officers: G. E. Burnell, pres.; C. J. Rhodes, v. p.; Wm. H. Wise, sec.-treas.; F. Weidman, supt.

Inc. 1919 **Cap.** \$1,000,000; 10¢ par; issued 700,000 shares. Listed on Los Angeles Stock Exchange. 25,000 shares sold for \$55 the lot at public auction in New York on Dec. 31, 1920.

Property: 170 acres, all patented, at Oatman. Has been developing for several years by different companies. Vein said to be 8' wide on 200' level with milling ore of \$8 to \$15 per ton in gold, increasing in width and value on 300' level. Several thousand tons of milling ore were reported developed.

Development: by several shafts from 100 to 550' deep, a 100' tunnel, drifts and crosscuts.

Equipment: includes 360' cu. ft. compressor, 75 h. p. electric hoist, old stamp-mill and cyanide plant. The mill is to be re-modeled.

Regarded favorably as a prospect. Idle in 1921.

GOLDEN BELL MINING CO.**ARIZONA**

Address: care E. W. St. Charles, pres. and mgr., Kelvin, Ariz.

Officers: above with E. F. Goodwin, treas.; W. R. Blackman, sec., Hibernian Bldg., Los Angeles, Calif., with D. S. Enison, directors.

Inc. 1910. **Cap.** \$1,000,000; outstanding 550,000 shares.

Property: 56 claims, near the Southern Pacific railway, 5 miles west of Kelvin, shows gold-silver-copper ore in veins in altered diorite.

Developed: by 270' tunnel, 175' shaft and crosscuts, with about 1,500' of workings. Equipped with 25 h. p. hoist and air compressor.

GOLDEN CROSS METALS CO.**ARIZONA**

Address: 10 N. Second Ave., Phoenix, Ariz.

Officers: W. B. Twitchell pres.; W. J. Sims, v. p.; Shirley Christy, sec.-treas.; F. C. Smith, supt., Chloride, Ariz.

Cap. \$150,000; par 10¢; outstanding 882,800 shares.

Property: 3 claims near Chloride, said to show a fissure vein in granite with 8' of gold ore; pay streak said to be 12" in width and to assay \$20 in gold and 2 to 3 oz. in silver.

Development: by 75' shaft and drifts.

Equipment: includes a 15 h. p. hoist.

GOLDEN DRAGON M. & M. CO.**ARIZONA**

Address: J. Gardner Scott, pres.-gen. mgr., Prescott, Ariz. Leo Stephens, sec.-treas.

Property: the Emporia and Briganza groups, near Groom creek.

Development: by 180' shaft and 400' of drifting on the Briganza claim.

GOLDEN HAMMER.**ARIZONA**

Owner at last account: F. C. Smith, Chloride, Ariz.

Property in Mineral Park, south of Chloride, developed during 1918 by Mineral Development Co., reverted to owner and was reported sold in June, 1920. Ore carries gold-lead-zinc. Developed by shaft and 300' tunnel.

GOLDEN REEF MINES CO.**ARIZONA**

Property: the "Boyer" claims, 35 miles north of Phoenix. Slightly developed claims, said to have 4 quartz veins, 4' wide carrying free milling gold.

Idle and company presumably dead.

GOLDEN STAR MINES CO.**ARIZONA**

Office: 32 Broadway, New York. **Mine:** Polaris, via Mohawk, Yuma county.

Officers: D. M. Hyman, pres., J. L. Tilton, sec.; H. B. Baruch, treas.; with Rich. P. Lydon, E. M. Rogers, E. L. Grover, H. M. Robinson, directors.

Inc. Dec., 1908, in Maine. **Cap.** \$2,000,000; \$5 par; 400,000 issued Empire Trust Co., registrar.

Property: undeveloped gold claims at Polaris, 50 miles N. of Mohawk.

GOLDEN STAR MINES, INC.**ARIZONA**

Address: Geo. Williston, supt., Mineral Park, via Kingman, Ariz. Controlled by M. B. Dudley interests.

Property: at Mineral Park, Mohave county, adjoins the Rural on the south. **Ore:** occurs in fissure vein, 2-9' wide, carrying gold and silver.

Development: a 2-compartment shaft is being sunk and lateral work is in progress on the 160' and 200' levels.

Equipment: includes hoist, compressor and 150 h. p. motor.

Regular shipments to Humboldt smelter were said to have started, December, 1920.

GOLD KEY MINING CO.**ARIZONA**

Probably idle. Mine near Old Trails, Mohave county, Ariz.

Officers at last account: W. H. Wise, pres.; H. M. Hall, v. p.; E. B. Shaw, sec.; with W. K. Ridenour and Raymond A. Carr, directors.

Inc. 1915, in Arizona. **Cap.** \$1,250,000; shares \$1 par. Stricken from New York Curb listing, August, 1918.

Property: the Treasure Key group, 4 claims, 50 acres, between the Boundary Cone and Orion groups, west of Old Trails and near Oatman, Ariz. Contains the Oatman type fissure veins in andesite, showing gold quartz ore.

Development: by a 310' shaft with drifts on 300' level. The east drift exposes an ore-shoot 75' long and 4'-6' wide, showing 3' of \$30 ore. A

second shoot 75' to the west is said to average \$12. No recent information received. Property is a likely prospect.

GOLD KING MINING CO.**ARIZONA**

Office: 518 Pythian Bldg., Indianapolis, Ind.

Officers: E. O. Hind, pres.; W. E. Toohey, v. p.; Geo. A. Brownlee, sec.-treas.; with John F. Rissing, Wm. Purcell, I. C. Strohm, Jos. Stafford, Fred Elliott and Grover Plummer, directors.

Inc. Jan., 1904, in Arizona. Cap. \$100,000; \$10 par; 500,000 outstanding. Bonds authorized, \$100,000; issued, \$10,000. Annual meeting second Monday in January. Operating expenses amounted to about \$20,000 in 1919 and in 1920, with a cash balance on hand of \$4,000 and \$5,000 respectively. Stock was being offered in 1920 at \$1 per share to raise \$50,000 for further development.

Property: 22 claims, 450 acres, in the Peck and Crown King districts in Bradshaw mountains, 22 miles S. E. of Prescott.

The deposit is a contact in slate and porphyry, ore carrying copper, silver, and gold, the two former predominating.

Development: 4 tunnels, 600, 800, 1,100 and 1,500' long, have opened the mine to depth of 600 ft. Total workings amount to 7,000'. Developing.

GOLD ORE MINING CO.**ARIZONA**

Address: A. C. Werden, Goldroad, Ariz.

Officers: A. C. Werden, pres.-mgr.; S. M. Warmbath, v. p.; I. W. Werden, sec.; A. F. Pollack, treas., with E. A. Shaw, directors.

Inc. in Arizona. Cap. \$1,000,000; shares \$1 par; 819,310 issued. Listed on Los Angeles Stock Exchange. H. E. Teter & Co., Los Angeles, transfer agents; Security Trust & Savings Bank, Los Angeles, registrar.

Property: 6 claims, 120 acres, ½ mile N. of the gold Road mine, Mohave county, which the Gold Ore is said to resemble and which has yielded \$5,000,000.

Development: by 700' main shaft and over 2000' of drifts, etc. Levels have been driven at 350', 530', 650' E. and W. along the vein. On the 650' level is a shoot 4'-6' wide, 75' long and 200' high. Drifting under way on 650 and 700' levels.

GOLD PRINCE MINING CO.**ARIZONA**

J. H. Huntsman, pres.; A. J. Welty, mgr., Dos Cabezas, Arizona.

Property: a group of 17 claims, including the Basin mine, at Dos Cabezas, Cochise county, reported under development and shipping in 1919-20. Equipped with concentrating mill and 100 h. p. oil engine.

Herbert A. Lowdermilk, as receiver for the Central Bank of Willcox, filed suit against the company, June, 1921 for \$1,849 and the holdings are under attachment by the sheriff.

GOLD RANGE DEVELOPMENT CO.**ARIZONA**

Office: Oatman, Ariz.

Officers: F. T. Toipey, pres.; M. M. Miles, sec., Los Angeles, Calif. E. M. Rogers, supt.

Inc., 1918 Cap. \$150,000; 10¢ par.

Company planned to purchase 7 claims formerly owned by the Gold Range Mining & Milling Co. in the San Francisco district, near Oatman. Shaft 300' deep. Some gold ore developed, said to assay \$4 to \$8. Both companies presumably moribund.

GOLD RANGE MINING & MILLING CO.**ARIZONA**

See Gold Range Development Co.

GOLD REED MINING & MILLING CO.**ARIZONA**

T. L. Welp, supt., at last account.

Property: claims in Oatman district, developed by 570' shaft and drifts. Presumably moribund.

GOLD ROAD ANNEX MINING CO.**ARIZONA**

Office: Goldroad, Mohave Co., Ariz. L. M. Hopkins, pres.

Company received permit to sell 300,000 shares at 25¢ each in Dec., 1920.

Property: near Gold Road mine, Oatman district. Prospects fair. Presumably idle.

GOLD ROAD BONANZA MINING CO. ARIZONA

Address: Goldroad, Ariz. **Officers:** F. T. Torpey, pres. and treas.; W. B. Ross, v. p.; W. P. DeWolf, sec. E. M. Rogers, supt.

Inc. in Arizona. **Cap.** \$1,000,000; shares assessable; \$1 par. In treasury, 250,000 shares. Assessment of 1¢ per share levied June, 1919.

Property: 90 acres, adjoining the Gold Road mine on the S. W. Shaft sunk 600', with considerable drifting. Vein on the 450' level said to be 2' to 6' wide and for 100' averaging \$12 per ton. Holdings reported taken over by Kingman Silver-Gold Mines Co. in 1920.

GOLD ROAD MINES CO. ARIZONA

Dead; see Vol. XIV for description. Consolidated in 1917 with the U. S. Smelting, Refining & Mining Co., which see.

GOLD TRAIL MINING CO. ARIZONA

Out of business. See Volume XIV.

GOLD TRAILS MINING & MILLING CO. ARIZONA

Succeeded by Gold Trail Mining Co., now defunct.

GOLD WARRIOR MINING CO. ARIZONA

Officers: O. S. Wakeling, pres.; A. M. McOmie, v. p.; D. C. MacIver, sec.-treas.; foregoing, with P. H. Osborne and J. R. Esposito, directors.

Inc. 1916 in Arizona. **Cap.** \$500,000; \$1 par; outstanding, 210,000.

Property: 6 claims in the Hassayampa district, 11 miles from Prescott and about three-fifths mile from the Big Pine mine, at which mill Warrior ore was to be treated.

Geology: gold-silver contact deposit in blue diorite and quartz-diorite, dipping 45° with N. E.-S. W. course.

Development: by 100' tunnel on the vein.

Mail returned and company probably dead.

GOLDZONA-SCOTCHMAN MINING CO. ARIZONA

Address: Bouse, Yuma county, Ariz.

Inc. by R. King, W. C. Miller, B. A. Kipp and others, of Los Angeles

Property: 600 acres, on which \$100,000 was reported spent.

Equipment: gasoline hoist, compressor, drills, buildings. Probably dead.

GOOD HOPE GOLD & COPPER CO. ARIZONA

Name changed in 1920, to Grand Central Copper Co., which see.

GORDON COPPER CO. ARIZONA

Former Address: Tucson, Ariz.

Property: 10 undeveloped copper claims in the Rincon district, 15 miles east of Tucson.

GOULD PROPERTY. ARIZONA

Was under bond and lease to R. McClelland, Newhouse Bldg., Salt Lake City, Utah, at last account.

Property: 12 claims in the Amole district, 18 miles W. of Tucson, adjoins Mile Wide mine. Shaft 350' deep. Ore on 100' level said to average 3.5% copper. Presumably idle.

GRANBERG SILVER MINES CORPORATION. ARIZONA

Office: Oshkosh, Wis. **Mine office:** H. Johnson, Kingman, Ariz.

Officers and Directors: H. O. Granberg, pres.; H. Johnson, v. p.; N. Granberg, sec.-treas.

Inc. March, 1918, in Arizona. **Cap.** \$500,000 \$1 par; issued 270,000.

Property: 4 unpatented claims in the Black Mtns., Chloride district, Mohave county, said to show 3.5' fissure vein in pegmatite and schist, course S. 35° E., dip 78°. Ore carries silver and lead, with some gold and zinc.

Development: by 90' incline shaft with 110' of workings, showing 18" to 24" shipping and 18" low-grade mining ore. Assessment work only being done.

GRAND CENTRAL COPPER CO.**ARIZONA**

Successor to **Good Hope G. & C. Co.**, which succeeded **Fairview G. & C. Co.**

Address: John Slak, Mayer, Ariz.

Officers: John Slak, pres-gen. mgr.; D. H. McDonald, v. p.; E. H. Ford, sec.-treas., with J. A. Martin and B. C. Jones, directors.

Inc. October, 1920, in Arizona. **Cap.** \$1,500,000; \$1 par; 59,000 shares issued, March, 1921. Security Transfer & Registrar Co., transfer agent.

Property: 9 claims, 180 acres, in the Peck district, Yavapai county, 1 mile E. of Turkey Creek, and said to lie on Blue Bell contact. Claims reported to show an orebody, 200 to 300' wide, of oxidized ore, strongly leached, with gold, silver, and copper.

Development: plan sinking vertical shaft with drifts and crosscuts at 100' intervals.

GRAND GULCH MINING CO.**ARIZONA**

Office: 204 McIntyre Bldg., Salt Lake City, Utah.

Officers: Wm. H. McIntyre, pres.; Frank R. Snow, v. p.; W. P. Jennings, sec.-treas.; with Jas. E. Jennings, F. W. Little, Jos. A. Jennings, directors. W. P. Jennings, mgr.

Inc. Sept. 15, 1874, in Utah. **Cap.** \$30,000; 10¢ par; issued 240,000.

Dividends: total \$64,758 to Dec. 31, 1918. Annual meeting, first Monday in February.

Property: 9 claims, 1 patented, 180 acres, in the Bentley district of Mohave county, but more easily accessible from Nevada than from southern or central Arizona.

Geology: property shows sandstone and limestone carrying an apparently circular zone of copper impregnations, also having copper in the bedding planes. Ores carry cuprite, melaconite, malachite, azurite and chalcocite, estimated by management to assay 10% to 35% copper and 4 oz. silver per ton. Shipped some cars of 50% ore.

Development: by a 500' shaft. Mine is 45 miles from St. Thomas, Nev., railroad terminal on the Salt Lake Route. The mine has been in practically continuous operation since 1899.

Equipment: includes a 22 h. p. gasoline hoist, good for 800' depth, 50 h. p. semi-Diesel engine, air-compressor, etc. There are 9 buildings and a small and antiquated smelter, of no present value.

Production: in 1918 shipped 1020 tons of ore containing 11% to 35% copper. Property temporarily closed down.

GRAND ISLAND MINING CO.**ARIZONA**

Address: Jerome, Yavapai county, Ariz. Chas. Anderson, supt.

Officers: R. E. Moore, pres.-mgr.; H. M. Gallagher, v. p.; E. Rucker, sec.; F. P. Jones, treas. with J. S. Eberman, directors.

Inc. 1908 in Arizona. **Cap.** \$1,500,000; \$1 par; 1,422,710 shares issued.

Property: 14 claims, in the Jerome copper district, adjoining the Copper Chief and Shea mines on the south. Idle from 1912, until company secured funds during the boom of 1916. Claims show a quartz vein 4' wide on surface and 8' wide on 200' level, in porphyry-schist and sheared diorite. Ore carries copper with gold-silver values; 3 other narrow veins said to outcrop on property.

Development: by 520' three-compartment shaft with S. W. crosscut on 200' level in jasper and schist. Small hoist, compressor, etc., installed.

Considered a fair prospect.

GRAND PACIFIC COPPER CO. OF ARIZONA.**ARIZONA**

Company address: W. E. Barrow, sec.-treas., Franklin, Pa. **Mine address:** L. I. Rehfus, mgr., Superior, Ariz.

Officers: J. French Miller, v. p.; with Chess Lamberton, Dr. T. A. Irwin, J. J. Van Dresser, and H. W. Breckenridge, directors.

Inc. August 17, 1916, in Arizona. Amended, May 14, 1919. **Cap.** \$2,000,000; \$1 par; 1,242,000 outstanding. Listed on New York Curb. Security Transfer & Registrar Co., New York, transfer agent. Annual meeting on April 1.

Financial statement on June 1, 1919, showed current assets of \$9,548 and liabilities of \$5,000. Buildings, mine equipments, roads, development, were valued at \$174,000. Income account showed \$265,358 from sale of shares and loans, and \$38,738 from ore shipments.

Property: 35 claims, 7 patented, 2 miles S. of the Magma mine, Pioneer district, Superior.

Geology: there are 5 principal and 2 lesser mineralized fault-fissures crossing the uptilted limestone and quartzite beds at right angles. The Sandal fissure lode cuts obliquely through limestone with course N. 60° E., dip 60° N. and is similar in geological occurrence to the nearby Magma mine. The Sandal vein, 20' to 50' wide, is developed for a total length of 600', showing two main ore shoots. The ore usually occurs in the hanging-wall limestone above a clay gouge seam, the rest of the vein is oxidized and leached.

Ore occurs in both bedded veins and fault fissures as shoots with 30° dip and E. W. course. Oxide ore shipped averaged 17% copper, with some precious metals. A bedding plane lode and a silver lode also occur on the claims. Geologic conditions are favorable and sulphide ore should be found at water-level.

Development: mainly on the Sandal vein by 3 tunnels; the lowest one, with branch, 1,405' long, should cut the ore-shoot if continued. A 530' shaft has been sunk from No. 3 tunnel, water being found at that depth. Shaft sunk in hanging of vein which appears to straighten and pitch in the opposite direction, similar to an occurrence in the Magma mine. At 450' in shaft, a station was cut and a crosscut driven several hundred feet, cutting a fault which has shifted the vein. Workings total 3,620'.

Equipment: includes Fairbanks-Morse hoist and Sullivan compressor, and accommodation for 25 to 50 men.

Production: 990 tons of 17% ore in 1918.

GRAND REEF MINE

ARIZONA

Now owned by Aravaipa Leasing Co., which see.

GRAND TRAVERSE & ARIZONA MINING CO.

ARIZONA

Idle since 1910.

Office: Manistee, Mich. Mine near Cave Creek, Maricopa Co., Ariz. Owns 3 patented claims. Fully described Vol. X, Copper Handbook.

GRANITE POINT SILVER-LEAD MNG. DEV. CO.

ARIZONA

Property: old-time silver-lead mine in the Hualpai range, Mohave county, near the Leviathan molybdenum mine, reported reopened by E. Hausman and W. D. Kinsey, of Jerome, Ariz., in 1917.

Development: by 300' tunnel. Average sample of the main ledge is reported to assay \$16.40 in gold-silver-lead.

Mail returned unclaimed, and company probably dead.

GRAY EAGLE REDUCTION CO.

ARIZONA

Plant at Gray Eagle, via Mayer, Arizona, leased to Mayer Ore Purchasing Co., which see.

GRAY METALS CO.

ARIZONA

Office: 408 Fleming Bldg., Phoenix, Ariz.

Officers: Douglas Gray, pres.; John True, v. p.; Maurice Clark, gen. mgr., with C. D. Garrison, W. H. Stilwell, H. R. Tritle, and Geo. H. N. Luhro, directors. Frank J. Orth, sec.-treas.

Cap. \$150,000; \$1 par.; 40,000 shares of stock offered at 50¢ a share, June, 1920.

Property: 6 claims and a fraction, in the Huachuca Mtns., Cochise county 16 miles from Hereford, the nearest railroad point, showing an interbedded deposit of lead-zinc ore in limestone and a copper deposit along a lime granite contact.

Development: by 350' shaft, and 1,390' of diamond drill holes from the 350' level, said to have opened up 20' of ore running 4-6% copper and \$5 in gold and silver. Work estimated to have exposed 5,000 tons of ore in the mine, with 1,200 tons on the dump. About 500 tons have been shipped, averaging 17 oz. silver, 7.5% lead and 22% zinc.

Equipment: includes pump, 30 h. p. boiler, gas engine and buildings. A 20-ton mill is planned.

GREATER AJO COPPER CO.

ARIZONA

Address: Miami, Ariz. **Officers:** G. F. Senner, pres.; A. E. Soderman, v. p.; J. Considine, sec.-treas., with A. B. Saling, R. L. Payne, E. Becher and B. S. Garcia, directors. **Cap.** \$5,000,000.

Property: 68 claims, at Palomas; Yuma county, Ariz.

The prospectus—if it can be called such—of this company was unique. It predicts the Greater Ajo will be "The biggest mine in the State of Arizona."

Presumably died a natural death.

GREATER MIAMI COPPER CO.

ARIZONA

Address: Box 14, Miami, Ariz.

Officers: A. Dumontier, pres.; F. Kiernan, v. p.; J. W. Murphy, sec.; T. M. Jackson, treas.; with C. Stewart and E. Graham, directors.

Inc. Feb., 1916, in Arizona. **Cap.** \$1,500,000; \$1 par; 8,000 outstanding.

Property: 32 claims. Pinal county, 9 miles N. of the Ray Cons., and 16 miles S. W. of Globe and Miami.

Reported July, 1918, under bond and lease to Major A. E. Pickerel and associates, of Jerome. No recent information.

GREAT RAY COPPER CO.

ARIZONA

Address: C. A. McDonald, Citizens Bank & Trust Co., Bisbee, Ariz.

Property: 44 claims on both sides of Sulphide canyon, about 1 mile W. of the town of Ray, Pinal county adjoining holdings of **Ray Consolidated Copper Co.** and the western group of the Ray Hercules Co.

Geology: Great Ray is outside the area of secondary enrichment—unlike the developed deposits of the district—but shows abundant copper stains and some copper sulphide in both the granite and schist rocks exposed in the walls of Sulphide canyon. The area of most intense primary mineralization is at least 1,500' broad and 3,000' long. This ground warrants drilling to determine the copper content.

Considered a speculative mining venture to see if the ground contains a primary deposit with 1% or better copper in it.

GREAT VERDE EXTENSION COPPER CO.

ARIZONA

Address: Shea Bldg., Jerome, Ariz. J. W. Hubbard, supt.

Officers: W. P. Geary, pres.; O. S. Wakeling, v. p. and gen. mgr.; H. H. Major, sec.-treas.

Inc. 1916 in Arizona. **Cap.** \$750,000; shares 25¢ par. U. S. Corporation Co., New York, registrar & transfer agent.

Property: 9 fractional claims, adjacent and E. of the United Verde Extension, at Jerome.

Development: by 3-compartment shaft, down 53', Oct., 1917, in sand stone and limestone and reported to show carbonates, chalcopryrite and some copper glance.

One of the many speculative promotions formed during the 1917 boom at Jerome. No recent information.

GREAT WESTERN COPPER CO.**ARIZONA**

Address: Courtland, Cochise County, Ariz. Wm. J. Young, Jr., pres. Courtland, Ariz.; Edward A. Young, sec.; C. H. Young, treas., Clinton, Ia. Wm. Holmes, gen. supt.

Inc. Oct. 22, 1900, in Arizona. **Cap.** \$1,000,000, \$10 par; fully issued.

Property: 23 patented claims, 407 acres, in the Turquoise district, Cochise county, acquired 1899.

Geology: limestone is intruded and altered by monzonite and quartz-monzonite porphyry. The Humboldt, first opened, yielded high-grade ore from the surface to 150', where it apparently ended. In 1908, good ore was opened in the Mary to 200', and high-grade ended here also. Five diamond-drill holes during 1918 failed to disclose ore at depth, but a 6th encountered good ore in virgin ground. On this a 265' prospect shaft was sunk and a 250' crosscut opened up a body of chalcopyrite and bornite ore. Lessees are mining ore from the Mary, Humboldt, Maine and Chance claims. Sulphide ore opened in the Maine in 1909, and produced until 1914.

Development: 26 000' of workings—from 5 shafts, 310', 300', 430', 200 and 365' deep, respectively.

Equipment: includes a 150 h. p. electric plant driven by steam power and having one 150 k. w. generator, a 600 cu. ft. air compressor, 2 electric hoists, electric pump, etc.

In 1919, 830,321 lb. copper; 356 oz. gold; 1,076 oz. silver; in 1920, 561,884 lb. copper; 232 oz. gold and 2,563 oz. silver.

GREAT WESTERN GOLD & SILVER CO.**ARIZONA**

Idle for years. Dragoon, Cochise Co., Ariz. Inc. about June, 1908.

Property: in the Dragoon Mountains, shows lead and copper ores with gold and silver.

GREAT WESTERN SMELTERS CORPORATION**ARIZONA**

Dead. Property and assets transferred December, 1919, to **Mayer Smelter Corporation**, described in Volume XIV. The plant is now owned by H. A. Wagner, Mayer, Arizona.

GREEN MONSTER MINING CO.**ARIZONA**

Address: G. S. Wallace, sec.-treas., Jerome, Ariz.

Officers: W. W. Lawhon, pres., Phoenix, Ariz.; David Morgan, v. p. and cons. engr., Jerome, Ariz.; with T. A. Riordan and N. E. Bailey, directors.

Inc. Dec. 8, 1915, in Arizona. **Cap.** \$750,000; 50¢ par; 1,200,000 shares outstanding. Annual meeting first Monday in December.

The financial statement of October 31, 1920 shows cost of properties, \$365,081; buildings, machinery, etc., \$61,137; current assets, \$62,826; supplies, \$6,940 accounts payable, \$475; reserves, \$216,143.

Liquid assets on Oct. 31st, 1921, were cash, \$39,464.30 and Liberty Bonds at par, \$15,000, total \$54,464.30.

Property: 70 claims, 32 patented, all but two in one group, situated 3 to 4 miles S. E. of Jerome the 2 other claims adjoin the Calumet & Jerome and the Verde Combination. The group includes the Cliff mine, once the property of the **Geo. A. Treadwell Mining Co.**; also the Brookshire mine. The tract shows several large jasper outcrops, that of the Cliff claim showing commercial ore at the surface.

Development: is centered at two points, the Gorge tunnel and the 930' Dorothy May, shaft, where the company camp and power plant are located—work for 1918 included 620' of shaft sinking and 2,312' of tunnels; in 1919, a 155' tunnel was driven, and a 200' incline shaft sunk on the Silver Tip claim. In the Gorge tunnel on the Cliff claim the ore-body appears to have bottomed in a quartz porphyry formation.

The Dorothy May shaft is 930' deep, bottomed in diorite. On 500' level, the N. W. crosscut cut, the Revenue Vein and encountered quartz-porphyrv contact at 600', which contained some chalcocite and chalcopy-

rite in a highly kaolinized leached zone. On 900' level contact 160' from shaft showed slight iron mineralization. The Cliff shaft connects with the Gorge tunnel. Drifts started both east and west on a mineralized quartz porphyry-diorite contact developed a low grade ore-body which 100' below seemed to be bottoming in quartz-porphvry when work was discontinued.

Property contains very promising surface outcrops, perhaps the best seen in the undeveloped ground of the district, but failing to find ore in commercial amount, directors decided, in March, 1919, to suspend operations for an indefinite period.

GREEN QUARTZ GOLD MINING CO.

ARIZONA

Address: Oatman, Ariz.

Officers: R. H. Hodges, pres.; L. Harpending, v. p.; C. C. Bryant, sec-treas., with Frank Champion, directors.

Inc. 1917 in Arizona. Cap. \$1,000,000; \$1 par; 500,000 treasury shares.

Property: has 3 veins all of usual Oatman type, with gangue of quartz calcite, adularia, etc., containing free gold and telluride. Vein croppings are from 4' to 20' wide and show 3' to 4' of pay ore at several points.

Development: by 160' shaft being sunk to 400 depth. A Gibson mill reported installed, June, 1920.

GREY EAGLE DEVELOPMENT CO.

ARIZONA

Office: Oatman, Ariz.

Property: in the Oatman district, Mohave county, developed by 3 inclined and 1 vertical shaft, deepest 400', connecting with 1,600' adit tunnel at 340' depth. Vein is in granite; ore-shoot is stated to be "over 500' long on the 200' level and to have yielded shipments of 500 tons that averaged 0.83 oz. per ton."

Production during the '70's and '80's said to have been about \$750,000.

GRIJALVA NUEVA MINING CO.

ARIZONA

Company started operations in Dec., 1915, and went out of business in 1917. See Vol. XIII for details.

GROWLER MINES

ARIZONA

Owner: Geo. H. Morrill, 155 Pearl St., Boston, Mass. Bought at sheriff's sale.

Property: 26 patented claims, 15 miles S. W. of Ajo, Pima county, with a quartz vein, developed by shafts 330" 260' and 135' deep, and a tunnel 185' long. Ore carries copper with precious metal values.

Equipment: 26 and 70 h. p. steam hoists and an 8 h. p. pump.

Shipments: last shipment of ore made in Sept., 1917, netted \$1,000 or \$20 per ton. Property worked for many years, though only in a small way.

GUNSIGHT DETROIT MINING & MILLING CO.

ARIZONA

Property: included the Bullion Bar and the Black Bess mines, in Gunsight camp, Pima county, about 24 miles E. of Ajo. Ore carries gold and tungsten.

GUNSIGHT GOLD & TUNGSTEN MINING CO.

ARIZONA

Described in Vol. XIV. Succeeded by Gunsight Mines Co., which see.

GUNSIGHT MINE

ARIZONA

Operators: J. D. Mitchell, L. L. Scott and Paul Fernald, of Ajo, have 10-year bond and lease.

Owners: First National Bank, Canyon City, Texas.

Property: the old Gunsight mine bought at sheriff's sale in 1918. Reported to show a fissure vein in granodiorite, pay streak varying from 12" to 6' in width, with lead and silver value. Old workings said to show ore averaging above \$20 per ton.

Development: 400' shaft, various tunnels, etc., totaling over 2,000'.

Property seems to warrant development.

GUNSIGHT MINES CO.

ARIZONA

Address: A. W. Bramwell, Gunsight, via Ajo, Ariz.

Property: holdings of **Gunsight Gold & Tungsten Mng. Co.**, acquired in 1920, includes Wonder and Burro claims, in the Gunsight district, Pima county. Ore contains copper, silver and gold. Equipped with cyanide plant.

HACKBERRY CONSOLIDATED MINING CO. ARIZONA

Address: Wm. Neagle, mgr., Hackberry, Ariz.

Inc. March, 1917. **Cap.** \$2,000,000; \$1 par; 1,000,000 shares issued. Security Tr. & Reg. Co., N. Y., transfer agent.

Property: the old Hackberry mine, located in 1874 by W. B. Ridenour, in the Peacock district, 26 miles N. W. of Kingman, Arizona.

The mine is credited with a production of \$2,000,000 in high-grade silver ore. In the early days a 500' incline, giving a vertical depth of 360', was sunk on the vein. At this depth water stopped operations. A new shaft sunk on vein to depth of 900', has, it is said, developed 200,000 tons milling ore above the 600' level, containing 20 oz. silver, \$1.50 in gold, besides lead and zinc. Vein is said to be from 4 to 16' wide, stopes up to 400' long. High-grade ore is also found in the vein. The 600' level has been driven 700', and 278 samples averaged 32 oz. silver per ton.

Equipment: over \$500,000 has been spent on development and machinery, including a 250-ton flotation mill finished in April, 1919, employing ball-mills and four K. & K. flotation machines. Recovery was 85% in September. The monthly income was then between \$30,000 and \$40,000.

In Dec., 1919, the mill was closed down on account of insufficient ground open for stoping, but high-grade silver ore was to be shipped to smelter.

HALE MINING & MILLING CO. ARIZONA

Constellation, Yavapai County, Ariz. Felix X. O'Brien, supt. Has gold and copper ores in veins. Equipped with gasoline power. Inactive save for yearly representation work.

HALF MOON COPPER CO. ARIZONA

Officers: F. I. Hobson, pres.; O. B. Kemp, treas.-mgr., Mayer, Ariz.; C. L. Wilson, sec., Prescott, Ariz.

Inc. June 23, 1916, in Arizona. **Cap.** \$1,500,000; \$1. par; 750,000 shares in treasury. Registrar & Transfer Co., N. Y., transfer agents.

Property: 14 claims, 280 acres, in Agua Fria district, Yavapai county, about 4 miles N. of Mayer, shows copper glance in sericite schist, over a zone 50' to 200' wide and traceable a half mile. Property equipped with gasoline hoist and air drills. Development work begun in 1917; and in May, 1920, a 12" streak of 49% copper ore was reported opened at 170' in a drift on the bottom, or 500' level.

HANEY COPPER CO. ARIZONA

Company owned properties at Ramsgate, 12 miles west of Prescott, with pyritic ore of very low gold-silver-copper values.

HAPPY JACK MINING & REDUCTION CO. ARIZONA

Office: 516 Land Title Bld., Philadelphia, Pa.

Mine office: Patagonia, Santa Cruz county, Ariz.

Officers: Alfred W. Barnett, pres. gen. mgr.; W. H. Barnett, v. p.; Henry W. Scattergood, sec. treas.; with Martin Stotz and Theo. Myers, directors.

Inc. Oct., 1908, in Arizona, as successor of Happy Jack Mining Co. **Cap.** \$1,000,000; \$1 par; fully paid; issued 304,709 shares.

Property: 12 claims, being surveyed for patent, 9 miles from Patagonia, shows several veins, carrying silver-lead ore with gold and copper.

Development: by 3 tunnels, longest 950'. Total workings, 4,000'.

Has shipped considerable ore averaging 42% lead, 2½% copper, 20 oz. silver and \$2 gold. Several hundred tons of concentrating ore reported on dump.

Assessment work only being done.

HARDSHELL MINING CO.**ARIZONA**

Address: 101 Park Ave., New York City. **Mine address:** H. K. Welch, pres.-mgr., Patagonia, Ariz. Thos. Fraser, supt.; Calvert Coates, chief engr.

Officers: H. K. Welch, pres.; W. Murray Sanders, v. p.-treas.; D. M. Stevenson, sec., with Malcolm S. McKay and E. M. Steiger, directors.

Inc. 1918 in New Mexico. **Cap.** \$1,000,000; increased to \$2,000,000; \$1 par. U. S. Corp. Co., New York, registrar and transfer agent. Listed on New York Curb.

Mine formerly worked by the Hardshell-Flux Mng. & Dev. Co., dissolved in 1910.

Property: 45 claims, in Harshaw district, Santa Cruz county, 9 miles from Patagonia, 20 claims of which are being developed under 5-year lease and bond to 1923, from the owner R. R. Richardson. The other claims are operated by lessees.

Development: a new shaft is 435' deep and exploratory work is in progress to cut the vein on the 420' level.

Production: in 1920 by lessees amounted to 500 tons averaging 40% lead and 34 oz. silver per ton.

HAROUA HALA GROUP**ARIZONA**

Owned by Yuma Warrior Mining Co. and described thereunder.

HARQUA HALA RIDGE M. & M. CO.**ARIZONA**

Controlled by Ranier Mines Corporation (q. v.) through ownership of 90% of stock.

Offices: Room 216, 27 School St., Boston, Mass. **Mine office:** Wenden, Ariz.

Officers: Angus McEachren, pres.; M. A. Blood, sec.-treas., with W. A. Dean, directors. W. T. Gnash, mgr.

Inc. Feb. 28, 1917, in Arizona. **Cap.** \$3,000,000; \$1 par 1,800,000 outstanding. Annual meeting first Wednesday in February.

Property: 30 claims, in the Harqua Hala mountains, Elsworth district, Yuma county, about 7 miles S. of Wenden, said to show a contact deposit between quartzite and porphyry, 100' wide and traceable for 1,200' in length, containing copper, gold and silver.

Examined by W. J. Stake in 1919.

Development: by tunnels and shafts, with a total of 1,200' of workings.

HARRIS COPPER CO.**ARIZONA**

Address: C. C. Harris, of Findlay, Ohio, pres.

Officers: W. J. Martin, v. p.-mine supt.; Harry W. Moore, sec.; W. J. Sease, Los Angeles, and Fred F. Harris, directors.

Inc. July 10, 1910, in Arizona. **Cap.** \$1,000,000; \$1 par; issued, \$710,001. Annual meeting, second Tuesday in January.

Property: 34 claims, 550 acres, in the Tip Top district, Yavapai county, about 50 miles north of Phoenix and 30 miles east of Wickenburg, on the Agua Fria river, at the mouth of Black Canyon creek. Claims, partly purchased with stock and partly located by the company, show schists cut by diabase intrusions. The company's map shows 2 groups, the Cascadilla, or western, being in part 3,000' wide and 1,200' long, and covering 3 veins running N. and S. Development is meagre; one shaft in diabase and 2 tunnels with an aggregate of 800' of work, costing \$9,000.

The Copper Reef, or east group, covers 2 veins, one along the Agua Fria river claimed to be an extension of the vein mined by the Kay Copper Co. Company claims 1,000 tons of \$15 ore blocked out, which is reasonable. One vein said to be 500' wide and another 90' in width, the observers evidently including altered schist as vein matter.

The president of the company wrote the editor as follows: "We insist that the report speaks the truth quoted as we make the report to you, and if any establishment is placed on the wording of our report, it must conform in meaning to give the information that can be construed from the wording that we give."

The property may have a great outcrop and it may contain copper in commercial quantities, but we defy any mining engineer to find out what the company does have on its property, from the report issued by the management and reprinted as a gem of humor in the "Mining & Scientific Press," and in part reproduced herewith. "COPPER—A red, ductile, tenacious, malleable metal of great and varied use, originally called brass of cypress, copper sand, alacaunte, C group of minerals, mostly soft, included C. suprite, malaconite, malachite, cheesylite, chrycopyrite, olivnite, etc. Black C ore, malaconite, gray C ore, Chalcocite, C Purite, yellow C ore, variety Chalcopyrite, the common ore.

"The formation of the Harris Copper Co. have blended with the iron lime and porphyry with quartz. Many of the above minerals, but more especially the commoner forms with oxides condensed formation on the top with the iron and lime, with a great amount of carbon and sulphur in the schist formation, with an amalgamated condition of the various mineralizations where gold and silver predominates. The schist in the lower rocks, I am led to believe from the geological lay of the uplift that is now held and owned by the Harris Copper Co., there is beneath the surface of this great iron-capped ledge a great body of copper ore."

Despite the unfavorable impression created by the company's literature, it is understood that the property has genuine merit, has orebodies, and with cheaper transportation will make a good mine. Part of property reported leased to Wilson Foster of Los Angeles in 1914 for ten years; lessee is required to spend \$20,000 and company to receive 15% of gross output.

HARTFORD-ARIZONA COPPER MINING CO.

ARIZONA

Address: Hamburg, via Garces, Cochise Co., Ariz. Henry Hamburg, pres. and mgr.

In Sept., 1913, the Arizona Corporation Commission authorized the company to incur a \$100,000 6% bond issue, for further mine development.

Property: the Wisconsin group in the Huachuca Mts., Cochise county. Surveyed a line for tramway to wagon-road and planned shipping to Hereford or to a point on Fort Huachuca branch of the El Paso & S. W. R. R. Developed by tunnels, has steam plant and compressor. Company employed 30 men at last accounts. No recent returns secured.

HAUXHURST MINE

ARIZONA

Jas. Hauxhurst owner and mgr. at last accounts.

Property: 900 acres, in the Big Horn district, Maricopa county, about 65 miles W. of Phoenix and 27 miles S. W. of Wickenburg. Mine formerly owned by the Hauxhurst Copper Co., was under bond for about 3 years to the United States Copper Mines, Inc., which forfeited same, 1909; leased to F. C. Alsdorf, 1913, but relinquished. See Vol. XI, Copper Handbook.

Shipments of copper ore, carrying gold and silver, were made in 1919.

HAVALINA MINING CO.

ARIZONA

Sold its Santa Nino property, Patagonia Mtns., S. W. of Duquesne, Santa Cruz county to J. Wells Smith, Feb., 1913. Property was being developed by 800' tunnel to reach a rich copper shoot said to have been found in the mine. Claims said to show molybdenum ore. Litigation has stopped work.

HAYDEN COPPER SMELTER

ARIZONA

Owned by the A. S. & R. Co.

Office: 120 Broadway, New York. **Operating address:** Kuno Doerr, gen. mgr., El Paso, Texas. **Works address:** H. A. Eye, mgr., Hayden, Ariz.

Has an annual capacity of 580,000 tons.

HAYDEN DEVELOPMENT CO.

ARIZONA

Operated the Copper Chief mine of the Copper Chief Mining Co., from 1916-1918. Lease cancelled and mine returned to owners, November, 1918.

HAYES & GRACEY SYNDICATE**ARIZONA**

M. P. Hayes and T. H. Gracey, Los Angeles, Cal., owners. Succeeds the Dragoon Copper Mining & Smelting Co., now dead.

Property: the Christmas and Eureka claims, carries replacement deposits with silver-lead-copper ores. **Development:** by a 550' shaft.

Equipment: includes steam power and air compressor. Presumably defunct as no returns have been secured for years.

HAYNES COPPER CO.**ARIZONA**

Succeeded 1916, by **Jerome-Victor Extension Copper Co.**, which in 1917 was absorbed by **West United Verde Copper Co.**

HELENS DOME MINING CO.**ARIZONA**

Operating company holding bond and lease.

Owner: T. J. Quillin, Bowie, Cochise Co., Ariz.

Property: 18 claims, 14 miles S. of Bowie in Apache Pass, Paradise district. Ore contains gold, silver and lead with 2% copper. Hoist and small mill on property.

HELVETIA COPPER CO.**ARIZONA**

General offices: 907 Metropolitan Life Bldg., Minneapolis. **Secretary:** 1140 McKnight Bldg., Minneapolis; **Treasurer:** 85 Devonshire St., Boston; **Oil operations:** 513 Natl. Bank of Commerce Bldg., San Antonio, Tex.

Officers: C. C. Prindle, pres.; Wm. A. Paine, v. p.; Robt. H. Gross, treas., with John S. Pillsbury, Russel M. Bennett, B. H. Woodworth, and John R. VanDerlip, directors. H. C. Machall, sec.

Inc. March 3, 1899, in New Jersey, and reorganized Oct. 4, 1905, in Arizona. **Cap.** \$5,000,000; \$25 par; 10,000 shares fully paid and 190,000 shares, \$16.50 paid, are outstanding. Listed on Boston Stock Exchange. Levied 50¢ assessments, payable July, 1908; April, 1909; February, 1910; Feb., 1911; June, 1918; July and Sept., 1919. Last assessment, No. 11, of 50¢ was paid in Sept., 1920, making the stock \$16.50 paid in. State Street Trust Co., Boston, registrar. Boston Safe Deposit & Trust Co., transfer agent; both of Boston. Annual meeting, first Monday after first Tuesday in October.

Financial statement of July 1, 1920 shows: total assets, \$3,294,447, which includes mining properties, \$2,158,260; oil account including supplies and leases, \$246,842; current assets (cash and accounts receivable) \$46,424. Capital stock was \$3,290,000; current liabilities, \$4,447. Oil operations showed net receipts from sale of 5,600 bbls., \$11,740; production cost, \$4,015; royalties, \$559. May 31, 1921, current assets were \$29,804; current liabilities, \$1,376, receipts from ore sales, \$22,460.

Property: 38 patented claims, also 8 patented mill-sites and 960 acres of scrip land, giving total holdings of 1,673 acres, 30 miles S. E. of Tucson, at Helvetia, Pima county, at the west foot of the Santa Rita mountains, 18 miles S. of Vail, on the Southern Pacific, and El Paso & Southwestern railroad.

Geology: the formations resembling those of Bisbee, include Carboniferous and older limestones lying north of a great granite mass with porphyritic intrusions. The limestone has many iron outcrops, underlain by orebodies occurring as replacements. These have an average strike of N. 35° W., with average dip of 45°, carrying ore of 2 to 4% copper.

For full description of properties and developments, see Vol. XI, Copper Handbook.

It is said that company spent over \$2,000,000 trying to develop property into a paying copper mine, but was unsuccessful in discovering any large body of commercial ore. During the war some molybdenum and copper ores were shipped at a profit.

Company now has leases on 1,650 acres of oil-land near San Antonio, Texas, and has 25 producing wells, which were yielding a total of 4,000 bbl. of high gravity oil per month. The oil sells for \$1 per barrel (July, 1921).

One drill is still at work in place of four. Considerable stock speculation resulted from these developments.

HERSHEL MINING CO.**ARIZONA**

Douglas Gray, mgr., Tombstone, Ariz.

A silver-lead property in the Charleston district which shipped during 1919. Small mill on property.

HICKEY COPPER CO.**ARIZONA**

Address: Canon, Ariz.

Incorporators: Philip J. Hickey, Philip J. Hickey, Jr., and Geo. Elias. Inc. in Arizona. Cap. \$2,000,000; \$1 par.

Property: at the mouth of Black Canyon creek, on the Agua Fria river, Yavapai county, near the Kay mine, 22 miles S. of Turkey, the nearest railroad point. Legal notice of resumption of operations given November, 1921.

HIGGINS ESTATE, THE**ARIZONA**

Address: 201 Higgins Bldg., Los Angeles, Calif. Mine office: Bisbee, Ariz. Jas. L. Flanagan, mgr., M. F. Ryan, supt.

Officers: Jas. O. Sword, pres.; P. J. Higgins, v. p. D. P. Kearney, sec-treas., with T. S. Word and M. A. Keancey, directors.

Inc. April, 1914, in California.

Property: Higgins mine, 10 patented claims, 180 acres, in the western end of Warren district, Cochise county, lying between the Copper Queen property on the E. and W. and the Wolverine-Arizona on the S. Shaft is 300' deep. A large body of copper oxide ore was reported opened up early in 1921, between 100 and 200' levels.

Production: 1916, 1,250,452lb. of copper; 1917, 951,368lb.; 11 months 1918, 3,013,000lb and about 12,000 oz. silver, and about 300 oz. gold yearly. A considerable production is reported for 1919. In 1918, lessees shipped 6,087 tons of 40% manganese ore.

HIGGINS LEASING CO.**ARIZONA**

Inc. 1912, to prospect the Higgins property for silver-lead and copper ores. Lease has expired and property reverted to owner, Thos. Higgins, estate in 1916.

HIGHLAND CHIEF GOLD MINING CO.**ARIZONA**

Offices: Alliance, Ohio and Oatman, Ariz.

Officers: Chas. Thompson, pres.; Carl Tanner, v. p.-gen. mgr.; F. W. Fuller, sec.-treas.; with John Eyer, and Creighton F. Thompson, directors. Frank Aspen, supt.

Inc. Aug., 1919, in Ohio. Cap. \$30,000; par 2¢.

Property: 15 claims, 4 patented, 200 acres, in the Black Mtns. near Oatman, shows 4 quartz veins in andesite. Ore is free milling and is said to assay \$4 to \$20 gold per ton.

Development: by 2 tunnels, 200' and 2,050' in length.

HIGHLAND MINING & MILLING CO.**ARIZONA**

Address: Chloride, Ariz.

Officers: C. B. Bell, pres.-mgr.; W. J. Cook, v. p.; Alexander Rose, sec.-treas.

Inc. April, 1919.

Property: 30 claims, 18 patented, and a mill site, formerly owned by the Union Basin M. Co. and about 6 miles S. E. of Chloride. The Middle Golconda, Golconda, and O'Dea mines were consolidated in April, 1919.

Geology: veins in igneous rocks carry zinc ore, with small amount of lead, in shoots, or expansions of the vein, 6 to 20' wide. Average samples said to run 20.90% zinc, 11.91 oz. silver, 1.75% copper, 1.50% lead and 0.1 oz. gold.

Development: the Golconda has been opened by 1,400' shaft and is credited with zinc production of 15,000,000lb. A 2,000' adit is being driven on the Big Bethel claim of the Middle Golconda group.

Equipment: includes 80 h. p. gasoline engine, compressor, tramway and buildings. A 100-ton mill is under construction. \$60,000 reported spent on development work and equipment.

HI HENRY MINING CLAIMS

ARIZONA

Address: H. W. Fabrenbrick, Polaris, via Mohawk, Yuma Co., Ariz.

Property: 23 claims including fractions in the Polaris district, 1.5 miles N. W. of King of Arizona mine, about 50 miles N. of Mohawk, Yuma county. A report states that the quartz-porphry ledge is 28' wide with andesite and dacite walls, striking E.-W., and dipping 45° N., traceable for 1,000' on surface. Ore said to carry gold with a little silver, varying from \$2 to \$25.

Development: by 50' shaft with 53' crosscut also a 293' crosscut tunnel. Elevation of mine is about 3,500'.

HILLTOP EXTENSION MINES CO.

ARIZONA

Office: Box B. B., Douglas, Ariz. **Mine office:** Rodeo, N. M.

Officers: W. E. Hawley, pres.; J. G. Erickson, v. p.; F. H. Fisher, sec.-treas., J. Blumberg, mgr., with John Gaughran, directors.

Inc. in Arizona. Cap. \$750,000, \$1 par; 250,000 shares are promotion stock.

Property: the Lily and Whale groups in the Chiricahua Mountains, Cochise county, 18 miles N. W. of Rodeo, N. Mexico, claimed to have the N. W. and S. E. extensions of the Hilltop veins.

Development by 570' tunnel, vein said to be 3' wide, shipping ore carrying 60% lead with 50 oz. silver. Molybdenum is also reported. Developing since 1917.

Examined by Louis D. Huntoon.

HILLTOP METALS MINING CO.

ARIZONA

Formerly the Hilltop Mines (not incorporated).

R. O. Fife, trustee-mgr., Rodeo, N. Mexico.

Office. 1321 Otis Bldg., Chicago, Ill. **Mine Office:** Rodeo, N. M.

Officers: J. O. Fife, pres.; P. J. Kasper, v. p.-treas. with F. A. Rehm, J. R. Scott, Phil Hoffman, C. H. Putnam, F. J. Kasper, O. Kastrop, Jr., directors. A. C. Jones, sec.

Inc. 1916 in Arizona. **Cap.** \$10,000,000, \$1 par; outstanding 2,000,000 shares.

Property: 42 unpatented claims, 800 acres, in California district, Chiricahua Mountains, Cochise county, said to show copper-lead-silver ore in quartz veins and contact deposits; strike N. W.-S. E., dip 60° S. W. Ore-shoots reported as 2' to 50' wide, and 30' to 110' long, averaging 1 to 3% copper and 6 to 10 oz. silver. Examined by L. D. Huntoon, Walter Vidler, and Charles Berkey.

Development: by 4 tunnels, longest 3,600', reaching a depth of 1,500'.

Equipment: includes a 300-h. p. engine and a 1,000 cu. ft. compressor. Construction of a railway from the mine to Rodeo, in New Mexico, there to connect with the El Paso & Southwestern, is contemplated; also a mill and smelter. Management estimates 1,000,000 tons of \$30 ore blocked out. Forty men employed.

It is to be hoped that this heavily capitalized company will actually block out ore reserves before attempting further ambitious equipment schemes.

HILLTOP MINES (not Inc.)

ARIZONA

Now property of the Hilltop Metals Mining Co., which see.

HOLMES MIDNIGHT MINES CO.

ARIZONA

Reported sold to 1916 to G. H. Holmes, Salt Lake City, Utah, for \$250,000 and transferred to company; 85% of stock held by Mr. Holmes and by Jim Murray estate, Butte, Mont.

Property: 6 claims, 1½ miles S. of Chloride, Mohave county, said to have 25,000 tons of gold-copper ore developed above 300' level. Orebody on 100' level. 56' thick, averages 10% zinc and \$7 gold.

Equipment: includes 10-stamp mill and concentrator, with hoist good for 1,000'.

Production: total \$100,000 to end of 1916; no data since then.

HOME COPPER CO.

ARIZONA

Address: Morenci, Graham county, Ariz.

Officers: H. J. Degener, pres.; W. A. Leonard, v. p.; W. P. Gee, sec.-treas.

Inc. April, 1901.

Property: 35 claims, 700 acres, in 2 groups, also a mill-site on Eagle river. Promoters were unable to inspire confidence and could not raise enough money to prospect the property sufficiently to prove if it has merit. Not a "wild cat," but a mistake. See Vol. XI. Copper Handbook.

HOME PASTIME MINE.

ARIZONA

Address: J. M. Prisk or J. E. Hoover, Mineral Park, via Chloride, Ariz.

Property: formerly known as the Rattlesnake, a producer of rich silver ore is in the Wallapai district, Mohave county. Main shaft is 300' deep. A 4' vein opened on the 80' level reported to average 34 oz. silver and \$340 gold per ton. Was shipping in 1919 and 1920.

HORSESHOE BASIN GOLD MINING CO.

ARIZONA

Now the Lowell Gold Mining Co., which see.

HOSEY GROUP

ARIZONA

John and N. A. McDonald, owners, Patagonia, Arizona.

Property: 7 claims, including the Hosey and Augusta mines, in the Wrightson district, Santa Cruz county, 12 miles from Patagonia. The Augusta has 1,000' of development showing 3 veins, 3-15' wide, carrying copper, gold and silver. **Equipment:** includes compressor and machine drills.

HOWARD COPPER CO.

ARIZONA

Address: Ralph Roseberry, managing director, 612 I. W. Hellman Bldg., Los Angeles, Calif.

Officers: H. O. Howard, pres.; J. J. Fagan, sec.-treas., with Ralph Roseberry, directors.

Inc. July, 1919, in Ariz. **Cap.** \$1,000,000; \$1 par; 500,000 issued.

Property: 17 claims and 2 fractions, 360 acres, 6 miles S. E. of Turkey, Yavapai county, on the Crown King branch of the Santa Fe R. R. The vein at the outcrop is 46' and in the workings 20' wide, with greenstone schist hanging wall and sericite schist foot wall. Ore assays 2-16% copper with low values in gold and silver.

Development: by 1,200' of tunnel work. A new shaft is to be sunk to get below the orebody.

Equipment: includes 35 h. p. engine, compressor, drills, pump and buildings.

HOWARD SILVER MINING CO.

ARIZONA

J. J. Fagan, trustee, Phoenix, Ariz.

Property: in the Turkey Creek district, Yavapai county said to show 3' of sulphide ore in a fissure vein. **Development:** by 210' Laheno shaft and 160' drift.

Equipment: compressor being installed and buildings erected.

HUACHUCA TUNGSTEN MINING & MILLING CO.

ARIZONA

Probably dead. See Vol. XIV.

HUGHES ARIZONA COPPER CO.

ARIZONA

Dead. Fully described in Volume XIV.

HULL COPPER CO.

ARIZONA

Address: H. V. Young, asst. sec.-asst. treas. and transfer agent., Clarkdale, Ariz.

Officers: Robt. E. Tallv, pres.-treas.; Geo. Kingdon, v. p.; Le Roy Anderson, sec.; with Thos. Taylor and L. E. Kehr, directors.

Inc. 1906, in Arizona **Cap.** \$10,000,000; \$1 par; non-assessable; all issued

Chas. W. Clark, trustee, holds 5,181,173 shares, as a result of a compromise of the suit brought in 1917 by minority stockholders.

For year ended Sept. 30, 1921, receipts were \$3,120, including \$1,795 from leases. Expenses, including \$1,537 taxes, were \$2,095; cash on hand \$1,025; Acct. payable \$25,811. Property is valued at \$10,001,139 and supplies etc. at \$7,933.

Property: 21 claims, partly fractional, 258 acres, shows syenite, diorite and slate, a continuation of the formation of the United Verde adjoining. The "1888" shaft, of 475' depth, has produced a small amount of ore, but not a profit.

Development: the Hull property and that of the Cleopatra Copper Co. have been developed by a 5,200' adit driven from Deception gulch, through Cleopatra ground into the Hull property. A winze has been started on the lode at 5,000' from the portal.

The Dillon tunnel extends completely around two sides of the United Verde ground. There are many drifts branching out from the tunnel and these usually follow a fracture plane in the rock showing 1 or 2' of fractured country rock, which usually shows pyrite and may be slightly copper-stained. These drifts twist and turn in a manner showing lack of system and finally branch out like a tree each branch following a fracture plane, some of which show 2 or 3" of copper ore, and some are not even copper-stained. These fracture planes are described as being "leaders" from the big ore-bodies below, and because the country rock contains a small amount of pyrite disseminated through it, these ragged workings were stated to block out low-grade concentrating ore.

On the Silent claim a drift from the tunnel exposed an irregular body of excellent chalcopyrite from which 2 shipments were made, the ore assaying 8½% copper. The stope is about 60' long, in places is 12' wide and of irregular height. A 160' raise shows it to branch into 2 seams of 2' and 3' wide. An inaccessible winze was said to show 13' of ore, but inasmuch as shipments had ceased, this seems questionable. Beyond this ore-body the tunnel turns the southwest corner of the United Verde property and follows along its western boundary to the "1888" shaft. For part of this distance the tunnel follows a lens of quartz devoid of copper. Aside from the one lens of chalcopyrite mentioned the showing in the tunnel is exceedingly discouraging. The mine has upward of 2 miles of workings. No development work of importance done since 1916, nor is any contemplated.

Equipment: includes a 94 h. p. steam plant and a gasoline engine, with 2 hoists, one being a steam hoist, installed 1909, at the "1888" shaft. There also is a small air-compressor.

HUMBOLDT CONSOLIDATED COPPER CO.

ARIZONA

Formerly Shill Gold Mining Co., and name changed, 1917.

Address: Mesa, Ariz.

Officers: F. J. Davis, pres.; G. W. Silverthorne, sec.-treas.; M. G. Shill, Frank Griffin and W. J. Lempke, directors.

Inc. 1914, in Ariz. **Cap.** \$1,200,000; shares \$1 par. Company offered 50,000 shares at 50¢ in Jan., 1917.

Property: the Mesa Copper group, in Big Bug district, Yavapai county, 1 mile S. of Humboldt smelter, shows veins in Yavapai schist belt.

Development: two shafts with levels at 100', and 200', said to block out 12,500 tons of \$12 to \$75 ore.

No recent returns. Probably dead.

HUMBOLDT ORE CO.

ARIZONA

Dead. Absorbed by Consolidated Arizona Smelting Co.

ILLINOIS ARIZONA COPPER CO.

ARIZONA

In 1917 acquired holdings of the Billie Mack Mining Co.

Office: 19 South La Salle St., Chicago, Ill. **Mine office:** Parker, Ariz.

Officers: L. W. A. Bunge, pres.; H. M. Higinbotham, v. p.; Jerome Smith, sec.-treas., with C. Horix, F. W. Peck, Jr., D. N. Condit, F. C. Low-

ney, W. C. Little, directors. United States Corporation Co., N. Y., transfer agent and registrar.

Inc. 1917, in Arizona. Cap. \$2,000,000; \$1 par; 971,378 outstanding.

Property: 26 claims 11 surveyed for patent, Cienega district Yuma county, 8 miles S. of Parker, including the Billie Mack, Lion, Butte, Jack Rabbit and Malpais groups.

Geology: claims cover an area of pre-Cambrian schist, with limestone whose beds dip steeply N. W. Intrusions of quartz-monzonite, and diabase are said to form dikes or stocks from 100' to 1,500' wide, mineralized with iron and showing copper stains, which, it is hoped, indicate copper ore below. The ore found thus far occurs in veins in the limestone and consists mainly of malachite, chrysocolla, and specularite with free gold in porous quartz. As a rule the ore though often very rich, occurs in short bunches.

Development: by 200' shaft with levels at 100', 150', and 200' and by numerous short tunnels and shafts, totaling over 4,000'.

Production: returns from 489 tons shipped were 8% copper, 1.1 oz. gold per ton. Total production to date estimated at \$125,000. Some ore was shipped in 1919, but now idle.

Equipment: includes small hoist, air-compressor, gasoline engine, air drills, etc.

Reported on by H. E. Olund, J. B. Rossman and Y. S. Young.

ILLINOIS EXPLORATION CO.

ARIZONA

No recent report. See Vol. XIV.

IMPERIAL COPPER CO.

ARIZONA

Company is supposedly dead. Property acquired by the A. S. & R. Co.

Office: 120 Broadway, New York. Operating address: J. Kruttschnitt, mgr. **Mine address:** Edward Thornton, supt., Silver Bell, Ariz.

Property: 52 patented claims, including the Silver Bell mines, in Silver Bell district, Pima county, 35 miles S. of Tucson. Orebodies occur as irregular lenses along shear planes in limestone. Ore is an altered porphyry impregnated with copper sulphides. See Vol. XII for more complete description.

Mine is normally a regular shipper, producing 73,729 tons of 3% ore in 1916; 123,729 tons of 3% in 1917; 120,320 tons of 2.8% in 1918. Production in 1919 was much curtailed and mine was idle in 1920.

INLAND COPPER CO.

ARIZONA

Idle. Letters to 1017 Commerce Bldg., Kansas City, Mo., and to the mine at Planet, Yuma Co., Ariz. returned. See Vol. XIV.

INSPIRATION CENTRAL MINING CO.

ARIZONA

Address: Chas. B. Yett, mgr. Safford, Ariz.

Officers and directors: W. E. Tester, pres.; J. A. Karlson, v. p.; C. B. Yett, sec.-treas.

Inc. Sept. 28, 1916, in Arizona. Cap. \$1,000,000; 50¢ par; 800,000 issued. Annual meeting second Monday in February.

Property: 43 claims about 14 miles W. of Geronimo, in the Turnbull and Santa Terressa Mountains, Black Rock district, Graham county.

Geology: vein occurs at contact of schist, porphyry, and limestone, dipping 85° S. Ore in streaks, is from 2 to 10' wide, and contains copper carbonates and sulphides. Average assay is 10% copper, with silver and gold.

Development: by 250' and 150' tunnels. Workings total 500' to depth of 400'. In June, 1919, of 2 lots of ore sent to smelter, one assayed 27% copper and 17 oz. silver, the other 7% copper and 4.3 oz. silver.

Ore is hauled to Geronimo on the Arizona Eastern line, thence to smelters at Globe or Miami. New work in 1920 consisted of 3 miles of mountain road.

INSPIRATION CONSOLIDATED COPPER CO.

ARIZONA

Office: 25 Broadway, New York. Mine at Miami, Ariz.

Officers: C. F. Kelley, pres.; W. D. Thornton and L. D. Ricketts, v. p.'s.; Joseph W. Allen, sec.-treas.; W. S. Harper, asst. sec.-asst.-treas.; Thos. H. O'Brien, gen. mgr. D. A. Welch, purch. agt.

Directors: Wm. D. Thornton, Jos. W. Allen, Wm. E. Corey, Chas. A. Corliss, L. D. Ricketts, Wm. G. Rockefeller, John D. Ryan, Chas. H. Sabin, C. F. Kelley, W. Wraith, B. B. Thayer, Theo. Schulze and Albert H. Wiggin.

Inc. Dec. 18, 1911, in Maine. **Cap.** \$30,000,000; \$20 par; issued and outstanding Dec. 31, 1920, 1,181,967 shares. All bonds have been retired. Guaranty Trust Co., New York, and Old Colony Trust Co., Boston, transfer agents; Bankers' Trust Co., New York, and National Shawmut Bank, Boston, registrars. Annual meeting fourth Monday in April. Listed on New York and Boston Exchanges.

Range of shares in 1920: \$61 $\frac{1}{4}$ high, \$28 low; sales on N. Y. Stock Exchange totaled 685,465 shares. In 1921 to October, range was \$37 $\frac{1}{4}$ to \$29 $\frac{1}{4}$.

In Feb., 1921, company took a 3.45% interest, \$3,380,000, in the Copper Export Association's \$40,000,000 8% note issue.

(a) Includes \$151,034 interest paid, (b) deficit.

Dividends: \$5.25 in 1916; \$8.25 in 1917; \$8 in 1918; \$6.50 in 1919; \$5.00 in 1920; none in 1921 to October.

Net earnings per share: \$0.65 in 1915; \$17.45 in 1916; \$9.37 in 1917; \$6.96 in 1918; \$3.50 in 1919; \$1.65 in 1920.

Company took over properties owned by the Inspiration Copper Co. and the Live Oak Development Co., paying for same in stock. In May, 1912, the mill and camp site of the Black Warrior copper mine was purchased from the Warrior Copper Co. for \$175,000. Early in 1914 the property of the New Keystone Copper Co., lying between the Inspiration and Live Oak groups, 219 acres, was purchased for \$795,940, payable in 39,797 shares of stock at \$20 per share, 9 shares of New Keystone for 1 share Inspiration.

To provide a supply of oil, purchased jointly with the Anaconda Copper Company in 1918, 160 acres of oil land in Bakersfield district, California, organizing the Arizona Oil Company. **Cap.,** \$2,500,000; shares, \$100 par; issued 16,320 shares. Inspiration owns 50% of the stock issued at a cost of \$794,668. The output in 1919 was 456,174 bbl.; in 1920, 395,641 bbl. of oil were produced. I. C. C. dividends were \$69,360 and \$326,400 for 1919 and 1920, respectively.

In 1920, joined with other Southwest mining companies in forming the Apache Powder Co. and subscribed \$60,000 to build plant at Benson, Ariz., for manufacturing powder.

Company reported to have purchased in May, 1921, entire holdings of **Porphry Cons. Copper Co.** (q. v.) for \$1,000,000.

Property: the holdings of the company are as follows: mining lands, 2,103 acres; millsite, tailing disposal, water supply, etc., total 4,449 acres, 8 to 10 miles W. of Globe, includes Montgomery group of 16 patented claims, 233 acres, acquired from the Warrior C. Co. in 1920 for \$400,000.

Geology: property carries about 1½ miles of the strike of a mineralized belt of Pinal schist, much crushed, altered and silicified by contact action, due to the intrusion of the great mass of granite forming the hills to the S. W., the shattering having allowed the free circulation of secondarily enriching solutions. The oxidized zone shows carbonates, occasionally of commercial tenor, as in the Clipper tunnel but ore occurs mainly in secondary form as disseminated chalcocite, forming an enriched zone of commercial ore of 50 to 575' in thickness, estimated by the management to average 180', with an average of 90 to 100' of overburden, underlaid by a primary zone of cupriferous pyrite below commercial tenor. About 40% of the values occur in small fissures and veinlets and along the jointing planes and planes of schistosity, copper being mainly in the form of flakes and grains of chalcocite, the balance of about 60% of ore values being disseminated through the gangue of friable Pinal schist, with some quartz. The mineralization also extends into the granite-porphry contact, about 10 to 15% of the ore developed in the Colorado orebody being in granite. The cupriferous schist is faulted, just east of the Woodson orebody, by the Bulldog fault zone, of about 300' width.

See Professional Paper, 115, U. S. Geological Survey, 1919, by F. L. Ransome for further details.

The Live Oak group of 14 claims, 200 acres, is about 1½ miles W of Miami, at the western end of the Miami ore belt and separated from the

Inspiration group by the New Keystone group. The geological conditions are similar to those of the Miami belt generally, save that much of the surface is covered by leached white granite, showing brilliant, green-stained outcrops of far more attractive appearance than any other part of the belt. This granite is underlain by schist carrying the ore, but part of the orebody is in granite.

The mine was originally opened on a flat dipping vein, 5 to 12' thick, carrying high-grade chrysocolla ore, from which shipments running 17 and 18% were made for several years. Much of this material was quartzose and valuable as a gemstone. The vein ended at water level in a mass of low-grade chalcocite ore similar to that of the Miami mine. Orebody was developed by tunnel work and drilling by the Live Oak Development Co. by over 50 drill-holes with 20,000' of drilling and 5,000' of underground work. This work blocked out a body of disseminated ore 1,400' long, 75 to 200' deep beneath a capping of oxidized material averaging 435' thick. The orebody as developed averaged 114' thick and contained 15,000,000 tons of 2.11% copper ore.

The New Keystone Group has about 60 acres underlain by Pinal schist, covered in part by a sheet of granite porphyry, 25' to 200' thick. A strong fissure vein crossing the property was mined by the old Keystone Copper Co., the vein being 12' thick with a paystreak averaging 15", from which shipments of 19 to 22% copper and 2 to 5 oz. silver per ton were made for some years. Mine yielded, according to report, about \$1,000,000. The New Keystone Copper Co. explored and opened up a deposit of disseminated glance ore similar to that of the Miami mine.

The Montgomery group developed by 2 tunnels, 1,000' and 1,200' in length, shows extensive bodies of oxidized copper ore of good average value; ore mined in 1920 averaged 5.02% copper.

Development: by the new company consisted in blocking out this orebody by underground workings and churn drilling. The Keystone shaft is 330' deep and at the time the company was absorbed by the Inspiration Cons. Copper Co., had a total of 14,996' of workings. Churn drilling along 200' squares was discontinued June, 1912, after company had put down a number of holes with an aggregate of 21,947' of work. Development blocked out 2,516,000 tons of ore, which sampling showed to have an average of 2.25% copper.

Development under the present company has been of a dual nature, including both extensive underground openings, and churn-drill borings along the same general system as followed in the development of the Ray and Chino mines.

Underground work (in miles) shows:

Year	New work	Total	Destroyed during year	Destroyed previously	Net openings
1920....	17.17	166.35	28.61	70.03	67.71
1919....	21.33	149.18	6.13	63.90	79.15
1918....	14.88	127.85	10.01	53.89	63.95

The Inspiration orebody is being worked by 2 main trammig levels at 326' and 450' in depth respectively. The Live Oak orebody is accessible through the Live Oak shafts, but all ore is hauled through the main haulage-tunnel, 6,600' long, connecting with the bottom level of the Inspiration shafts.

Ore is mined by the so-called Ohio system, locally termed the "Finger Raise" system, undercutting and caving in blocks of about 70' vertical dimension; the broken and caved ore is drawn off through a system of inclined raises delivering to the haulage-ways below; these raises have a sufficient number of branches immediately below the caved area to reduce the interval between the heads of the raises that tap the caved ore to a minimum of about 8'. The ore is carried in trains of 5-ton cars by air locomotives to the working shafts, where it is delivered to one set of double concrete bins

underground holding 3,700 tons and hoisted to surface through 2 shafts, delivering to a bin of 2,000 tons capacity located between the shafts. Skip loading and hoisting is automatically controlled. Ore extraction is entirely confined to these 2 cement and steel-lined shafts. 585' deep and 107' apart, in Webster gulch, on the north side of the mountain, while men and supplies are lowered and water pumped at the Incline, or Supply shaft on the opposite, or Miami side of the mountain. The 2 shafts are operated from the same hoist house, but have entirely independent units, capable of handling 1,000 tons per hour. The total lift is 630'. The ore is hoisted in skips, passed through crushers and put in 25,000-ton storage bins. From these bins it is carried over the company's 1.6-mile railroad, with 3% grade, to the mill at the old Black Warrior townsite.

Ore extraction: 1916 was a complete operating year, mining confined almost entirely to the Inspiration ground. The output was 5,353,880 tons, averaging 1.548% copper. The greatest day's output was 21,289 tons. The average output of over per shifts work was 17.46 tons. The area undercut was 18.4 acres. The cost of mining was 60.7¢ per ton.

The area undercut in 1920 was 8 acres compared with 7.6 acres in 1919. The output of 1919 was entirely of milling grade, but in 1920, 16,494 tons of ore were shipped direct to smelter, and 2,745 tons of mixed oxidized and sulphide ore to the leaching plant.

From the time the ore is dumped from the chutes into the mine cars no manual labor is required, all operations being entirely mechanical.

The company owns its own railroad of 4½ miles standard-gauge track, connecting the mine with the mill and the mill with the smelter of the International Smelting Co.'s Miami plant, where concentrates are smelted.

The mine and mill are connected with both U. S. Reclamation hydroelectric plant at Roosevelt and with the company's own steam plant, consisting of three 6,000 k. w. turbo-generator units. Additional power installed during 1921.

Ore reserves: at end of each year were:

Year	Mined, tons	Net reserve, tons
1920.....	5,102,382	72,374,741
1919.....	4,196,903	77,477,123
1918.....	5,139,132	82,735,246
1917.....	3,914,742	87,874,378
1916.....	5,353,880	91,789,120
1915.....	97,143,000

No attempt was made during 1918-20 to develop additional ore, but acquisition of property in 1920 will increase reserves.

Equipment: the surface and underground plant is capable of handling 20,000 tons of ore daily. A feature at the main shafts is the electric automatic hoists; coarse-crushing station, ore bins, and tramway to mill. The treatment plant, designed by H. K. Burch, consists of 20 sections, each one with rated capacity of 900 tons per day, making a total of 18,000 tons per day.

The scheme of treatment, stated in general terms, is as follows: at the mine—crushing ore to 4", maximum size in gyratory crushers, crushing this ore to 1½" maximum size by Symons disc-crushers. At the mill—crushing product from the Symons disc-crushers in Marcy ball-mills to pass 48-mesh screen, treatment of this product in flotation machines with separation of flotation tailing into sand and slime. Sand is treated on concentration tables and the slime retreated in flotation machines. Concentrates are dewatered in the filter plant.

While plans were for a 7,500-ton mill to cover 8 acres, adoption of the flotation process has permitted doubling originally planned capacity within space of 3 acres. As a result of this compactness, elimination of elaborate classification and some crushing, the costs of the combined oil flotation and

water concentration in 1916 were 50.385¢ per ton. Mill is equipped with Minerals Separation and Callow flotation machines, also one designed by Rudolf Gahl, formerly metallurgist. Coal tar is the chief component in the frothing mixture. The first unit of the mill went into operation June 29, 1915, the 18th in Feb., 1916, and the 20th a year later. The first ore was caved underground and actual mining started July 25, 1915.

By Aug., 1919, a 35-ton leaching plant had been erected to try this method of treatment on the carbonate and silicate ores.

Production:

	1918	1919	1920
Ore treated, tons	5,110,101	4,151,806	5,078,338
Average per day, tons	14,172	11,501	14,067
Mill feed, per cent copper	1.361	1.304	1.139
Tailings, per cent copper	0.380	0.346	0.320
Extraction, per cent	72.99	74.36	72.68
Concentrates, per cent copper	30.398	28.750	30.161
Water per ton ore, gallons.....	310	405	374
Steel balls, used per ton ore, lb.....	1.82	1.71	1.76
Flotation oil, used per ton ore, lb...	1.35	1.34	1.01
Refined copper, lb.....	98,540,041	78,038,306	79,543,740
Cost per lb. of copper, cents.....	11.259	13.412	14.173

Production for first two months in 1921 was 9,500,000 lb.

In 1917, production was decreased by the I. W. W. strike which caused a shut down of the property early in July. Work was resumed in the mill Sept. 1, but production was slow in returning to normal.

An average of 15 mill-sections were operated in 1918, 12 in 1919 and 14 in 1920. During 9 months ended May, 1920, company treated 28,640 tons of ore for account of the Iron Cap Copper Co.

"As the stocks of metal were as large as should be carried, while curtailed production could only be made at excessive cost," property was closed down in March, 1921, except for development work and maintenance.

INSPIRATION EXTENSION COPPER CO. ARIZONA

Address: F. O. Augustin, 433 Broome St., New York. Wm. H. Correa, pres.; A. L. Rosengarten, v. p.

Inc. Feb. 11, 1913, in Delaware. **Cap.** \$1,000,000, increased to \$1,500,000 in 1915; \$5 par; all issued. Annual meeting February 11th. Company's holdings are under bond and lease to the Castle Dome Development Co., 43 Cedar St., New York, which owns 97% of this company's stock.

Property: 95 acres, patented, in the Miami district, Gila county, partially surrounded by claims of the Inspiration Cons. Copper Co., underlain by schist. Also 29 claims, unpatented, about 500 acres, on Porphyry Mountain, about 5 miles W. of the first group and adjoining the Continental mine of the Old Dominion Copper Co. This group shows disseminated ore in granite, said to be enriched near an intrusion of diabase, developed to date principally by tunnels and churn drill holes.

Development: of the Miami tract includes a 500' shaft disclosing primary sulphides.

INSPIRATION-MIAMI COPPER CO. ARIZONA

Mine address: Geo. W. Danehy, sec.-treas.-mgr., Box 1287, Globe, Ariz.

Officers: H. Kjershow, pres., 207 Monihon Bldg., Phoenix, Ariz.; F. A. Shaffer, v. p.; with Geo. W. Danehy, F. C. Carlsen and Tor Folkedal, directors.

Cap. \$10,000,000; \$1 par; 6,000,000 shares outstanding.

Property: several detached groups, 77 claims, adjoining the Inspiration Miami Extension, 3 miles W. of Burch, a station on the Ariz. Eastern R. R., in the Sleeping Beauty district, Gila county. The Kleinfelder group of 30 claims, is the only one considered promising by the management. Orebody part of same mass of altered monzonite porphyry said to average 1.5% copper, as that of the Louis D'Or and Inspiration-Miami Ext.,

lying above lime-diabase contact of Sleeping Beauty mountain. Controlled by same interests as Inspiration Miami Extension.

In October, 1920, suit was filed by the original claim owners against the Inspiration-Miami and Inspiration-Miami Extension companies, for \$500,000, plaintiffs alleging that the claims were never paid for.

11,000 shares sold, with 2,100 shares of Ins. Miami Ext., for \$60 the lot at public auction in New York on Dec. 22, 1920.

INSPIRATION-MIAMI EXTENSION COPPER CO. ARIZONA

Address: Geo. W. Danehy, sec.-treas.-mgr., Box 1287, Globe, Ariz.

Officers: H. Kjershow, pres., 207 Monihon Bldg., Phoenix, Ariz.; F. A. Shaffer, v. p., with Geo. W. Danehy, directors.

Cap. \$2,000,000; \$1 par; 1,200,000 shares outstanding.

Property: 5 patented claims, adjoining Louis D'Or M. & M. Co. and Inspiration-Miami C. Co., in Sleeping Beauty district, Gila county, near Globe, and supposed to have the continuation of the Louis D'Or orebody.

INSPIRATION NEEDLES COPPER CO. ARIZONA

Office: P. O. Box 1056, Miami, Ariz.

Officers: D. R. Williamson, pres.; Wm. Phillips, v. p.; F. W. Hamm, sec.; A. D. Williamson, treas., with Geo. J. Stoneman, directors.

Inc. Jan. 4, 1912, in Ariz. **Cap.** \$2,000,000; \$1 par; issued 1,465,213. Security Transfer & Registrar Co., New York, transfer agent and registrar. Listed on New York Curb. Annual meeting first Monday in February.

Annual statement dated Dec. 31, 1920, shows current assets, \$6,146 and current liabilities \$1,254 (acct. payable).

Property: 42 claims, 740 acres, 3 miles from Miami, Globe district, Gila county adjoins Southwestern Miami on the W., lies 1 mile S. W. of Inspiration Cons. property. Surface shows Gila conglomerate, Pinal schist and Schultze granite formation.

Development: consists of a number of shafts, none over 100' in depth, and tunnels, none over 200' in length.

August, 1916, two churn-drills operating at holes No. 1, 1,000' deep, and No. 2, 551' deep. Both holes were in Pinal schist, the last 100' of No. 1 was in leached schist, showing small amounts of native copper.

Idle since 1917.

INTERNATIONAL COPPER & MINING CO. ARIZONA

Dead. Described in Volume XIV.

INTERNATIONAL SYND'TE OF MINES & SMELTERS ARIZONA

Officers at last account: Judge E. C. Whitesitt of Kansas City, pres.; Dr. L. P. Morgan, cons. engr.

Property: 100 claims in the Copper Basin district, Yavapai county, about 12 miles S. W. of Prescott, including the Arizona Portland 30 claims, Martin Schuber group 26 claims, the Ruth, Brown and Rainy Day groups. The Arizona Portland adjoins the Loma Prieta, and the mines of the Phelps Dodge's Copper Basin Branch on the S., and is reported to carry the extension of the Loma Prieta orebodies. The orebody is reported to be from 50' to 250' wide with N. S. strike and easterly dip, carries chalcopyrite with a little gold and silver disseminated through monzonite porphyry.

Development: by 1,000' of workings, including a 250' incline shaft and 4 tunnels.

Equipment: includes a 2 drill compressor, hoist and steam power. Operating expenses for 1918 were \$8,000. Values so far developed are too low grade to be profitably mined, even with a flotation plant.

Presumably idle.

INTERNATIONAL TUNGSTEN CORPORATION ARIZONA

Office: 42 Broadway, New York.

Officers: Hiram Whitcomb, pres.; Richard Lounsbury, treas.; C. E. Greenough, sec.; A. A. Westerhouse, asst. sec.

Inc. June 16, 1916, in Virginia. **Cap.** \$10,000,000; shares \$10 par. Company acquired entire capital stock of the Emery-Whitcomb Tungsten Co. and the National Tungsten Co., both incorporated in Arizona.

Property: 26 claims, 8 patented, 493 acres, in the Arivaca mining district, Pima county 65 miles S. W. of Tucson and 23 miles from Amada on the So. Pac. R. R., fully described in Volume XIV.

Reported in Dec., 1918, that James H. Emery had filed suit in the Superior Court to foreclose on a mortgage for \$25,000 held on the Emery-Whitcomb Tungsten Co. and the National Tungsten Co., subsidiaries of the International Tungsten Co.; holdings were sold at Sheriff's sale, Dec., 1919.

IRISH MAG LEASING CO.

ARIZONA

M. J. Elsing, mgr., Bisbee, Ariz. Has a lease on the Irish Mag claim of the Calumet & Arizona Mining Co., extended in March, 1920. No shipments were made in 1920, but shaft was retimbered between 450 and 1,050' levels.

IRON CAP COPPER CO.

ARIZONA

Office: 50 Congress St., Boston, Mass. Mine at Copper Hill, Gila county, Ariz.

Officers: Frank P. Knight, pres.; J. Judson Dean, v. p.; R. H. Knight, sec.-treas.; F. A. Woodward, gen. mgr.; with Alvin T. Baldwin, directors; David Cole, cons. erect. engr.

Inc. Feb. 7, 1911, in Maine. **Cap.** \$2,000,000; \$10 par; 50,000 preferred and 150,000 common, 4 pfd. and 142,100 com. shares, outstanding. Stock listed on Boston Curb. Annual meeting, third Tuesday in March.

Bonds: \$500,000, 8%, 20-year, dated Oct. 1, 1918. State Street Trust Co., trustee and transfer agent. Federal Trust Co., registrar.

Dividends: \$2.20 in 1917; \$3.75 in 1918; 50¢ in 1919; 50¢ (cap.) in 1920. Revenue during 1919 totaled \$1,248,841. Operations cost \$905,017. After deducting \$410,967 for interest, taxes, management, and depreciation, there remained a deficit of \$67,143. Current assets totaled \$946,751, and liabilities, \$323,228.

In 1920, gross income was \$1,599,438 and net \$268,877, after deducting operating expense of \$1,163,909 and \$166,652 for taxes litigation, etc. After depreciation and depletion there was a net loss of \$142,271 for the year. Current assets amounted to \$824,263 and liabilities, \$303,831.

Property: the Iron Cap and Bird groups at Globe, 20 patented claims, dividing two Arizona Commercial groups and adjoining the Old Dominion property. Also 7 claims in Lone Star district, Arizona.

Geology: claims show shale and quartzite cut by diorite at depth, traversed by a fissure vein running N. E. and S. W., and dipping at 70°

Development: by 1,300' Williams shaft, with levels at 660', 765', 868', 968 and 1,068'. Vein is opened for about 1,000' in length.. The Iron Cap shaft is 1,551' deep, with levels at 800' 920', 1,020', 1,120', 1,400' and 1,500'. Vein is opened for about 1,400' from that shaft.

During 1920, good ground was opened on 1,000 and 1,100' levels, and work at 1,500' indicates that vein is wider and more mineralized than on 1,400'.

Smelting ore contains from 1 to 6 oz. silver, 4 to 11% copper. Concentrating ore runs from 0.5 to 0.7 oz. silver, with about 3% copper.

Litigation: in Feb., 1919, the Arizona Commercial Mining Co. brought two suits against the Iron Cap (1) alleging wrongful extraction of ore, and (2) for a share of pumping expense. This was brought in the State of Massachusetts, but in September, the Supreme Court of that State refused to hear the charges, on the plea of Iron Cap, and directed that they be heard by a court in Arizona. Arizona Commercial immediately brought suit again under Massachusetts laws to be tried by court and jury, and also brought suit in the courts of Maine asking an injunction against Iron Cap from disposing of any of its assets until a settlement was made. Iron

Cap however brought action in Arizona in October, 1920, to quiet title to property in dispute and proceedings in Maine were stayed pending a decision.

Equipment: 2 double-drum hoists, 2,200 cu. ft. and 3,600 cu. ft. air-compressors, and a 750 h. p. boiler plant and power-line to the Inspiration Cons. plant. A 300-ton concentrator was completed in June, 1920, connected with I. C. shaft by 24" gauge railway, transportation to cost 7c. per ton. Preliminary crushing is done at mine; mill is equipped with rod mills, roughing tables, classifiers and flotation section. A mine fire protection system has been installed.

Production: including smelting and concentrating ore:

Year	Tons	Copper, lb.	Silver, oz.	Rec'd*
1920.....	91,326	8,235,670	113,323	17.44
1919.....	64,540	7,156,270	104,458	18.92
1918.....	84,690	9,441,000	153,585	24.18

*cents per lb of copper.

During 1920, 15,180 tons of ore were shipped to the Inspiration mill and 50,186 tons were treated by company mill. Average assay of mill feed was 5.04% copper and 1.49 oz. silver, and tailings assayed 0.38% copper and 0.18 oz. silver; copper extraction was 93.73%. Milling cost was \$2.17 per ton of ore; cost of production for all copper was 4.178c. per lb. Ore and concentrate are shipped to the International smelter.

Operations were curtailed at end of 1920 and in March, 1921, mill was running at one third capacity.

The future of this property appears to be good.

IRON QUEEN MINING & SMELTING CO.

ARIZONA

Address: Wm. T. Read, 15 William St., New York City. **Mines near** Mayer, Yavapai County, Ariz.

Directors at last account: F. W. Wood, Wm. T. Read, A. D. Barnhart I. D. L. Williams and H. B. Bishop.

Cap. \$3,500,000; shares \$10 par. Company formed to take over, subject to a mortgage for \$130,000, the greater part of the former holdings of the George A. Treadwell Mining Co. sold at tax and foreclosure sales. The organizers of the Iron Queen offered stock at 75c a share to stockholders of the Treadwell Co.

Property: fully described in Vol. XIV.

Smelter was bought by the Big Ledge Copper Co. interests and an operating company formed, known as the Great Western Smelters Corp., which in turn was unloaded on the Big Ledge Co.

No recent returns.

IVANHOE CONSOLIDATED MINES CO.

ARIZONA

Reorganized April, 1918, as Ivanhoe Gold Mining Co. which see.

IVANHOE GOLD MINING CO., REORGANIZED

ARIZONA

Office: 591 I. W. Hellman Bldg., Los Angeles, Calif. **Mine office:** Oatman Ariz.

Cap. \$150,000; 10c par; assessable. Formerly Ivanhoe Consolidated Mines Co., but reorganized April, 1918, under above title. Assessment of 1c per share was due June 10, 1918, to pay debts and to continue exploration.

Property: 5 claims and 2 fractions in N. W. part of Oatman district, Mohave county, and covering 3,000' along the strike of the veins.

Development: by 500' shaft and total working of over 2,500', up to mid-1919, when work was resumed on 500' level of the Nancy Lee claim, where 60' of low grade ore was cut at 204' from shaft.

Property considered of promise.

IVANHOE MINE

ARIZONA

Address: Patagonia, Santa Cruz county, Ariz. Formerly owned by Ivanhoe Mining Co., which has been dissolved. Property now owned by A. H. Ives, of Minneapolis, and J. E. Hurd.

Property: the Ivanhoe mine and various claims, 25 in all, 500 acres, in the Wrightson district, 4 to 6 miles S. W. of Patagonia, the nearest rail point. The group shows rhyolite, andesite and diorite, with brecciation zones carrying orebodies of which 5 are estimated by owners to average 27' in width, carrying silver chloride ore, gray copper and chalcocite, estimated by management to average 16% copper, 6% lead and 225 oz. silver per ton.

Development: by the 200' Commercial shaft, with considerable cross-cutting, developing, it is said, large bodies of milling ore. There are also several tunnels, with 2,700' of workings, estimated to show 100,000 tons of ore.

Equipment: includes a 70 h. p. steam plant with a 50 h. p. hoist good for 1,000' depth. There are 5 buildings, and water is supplied by a 6 h. p. gasoline pump.

Was producing in 1919.

I. X. L. MINE

ARIZONA

Address: Kingman, Ariz. Controlled by M. B. Dudley. G. D. Atlee, supt.

Property: in the Stockton Hill section of the Kingman district, 1½ miles S. of the C. O. D. mine. Developed to depth of 350' and equipped for further work to 500' depth. Report a vein of high-grade ore on the 250' level, 19' wide and running 200 oz. silver, 29% lead and \$2 gold.

JEMISON MINES CO.

ARIZONA

Head office: Wallace, Idaho. **Mine office:** Chloride, Ariz.

Officers: G. W. Kays, pres.; Henry Kehoe, v. p.; Charles McKinnis, sec-treas. and gen. mgr., with C. G. Crook and J. P. Smith, directors.

Inc. 1917, in Arizona. **Cap.** \$1,500,000; shares \$1 par.

Property: 4 claims and fractions, 17 miles N. of Kingman in the Walapai district, Mohave county, ½ mile from the well-known Golconda mine.

Development: main tunnel 500' long, being extended E. 350' to connect with old workings above. Ore shoot has been proven continuous for 300' and is from 3 to 7' wide, with \$25 to \$48 per ton in gold, silver and copper values. Operated by lessees at last account.

Equipment: 25 h. p. Fairbanks-Morse hoist, 5-drill compressor, pump, houses, etc.

JEROME BISBEE COPPER CO.

ARIZONA

Formerly Jerome Portland Copper Co.

Office: Jerome, Ariz.

Officers: Geo. Brockshire, pres.; L. H. Beyerle, sec-treas.

Cap. \$750,000; par 50¢; outstanding about 800,000 shares, issued in exchange for Jerome Portland stock.

Property: in Jerome district, at site of old Equator smelter, near Copper Chief mine.

Development: shaft over 500' deep, cutting diorite at 515' with 2,800' of workings. Idle and mine under water.

JEROME CENTRAL MINING CO.

ARIZONA

Address: E. L. Bartholemew, supt., Jerome, Ariz.

Officers: C. T. Joslin, pres.; Peter Gordon, v. p. and treas.; Dr. Almer Harding, sec.

Inc. 1918, in Arizona. **Cap.** \$1,000,000; shares \$1 par; 500,000 shares issued; permitted to sell 100,000 additional shares treasury stock at 50¢., Dec., 1920.

Property: 3 claims, adjoining the Verde Combination, 2 miles from United Verde. A 12' vein of ore opened in May, 1921, said to average 7% copper. Developing.

JEROME COPPER MINING CO.

ARIZONA

Idle.

Officers at last account: E. A. Kastner, pres. and treas.; H. Brinkenmeyer, v. p.; G. N. Hoffman, sec., all of Prescott, Ariz.; with Homer King,

F. M. Burdick, Gus Zorke, B. M. Orde, F. Wellington Hay, Geo. A. Gilbert and H. E. Crawford, directors.

Inc. Nov. 25, 1916, in Arizona. **Cap.** \$2,000,000; shares \$1 par.

Property: 5 patented (one fractional) claims, N. and W. of the Green Monster at Jerome, and long known as the Hooker Ewing group.

Development: 1,025' tunnel to cut a diorite-schist contact exposed in a 98' shaft at 860' from portal. About 1,800' of tunnels, crosscut, etc., were driven, the results of which are said to have been unsatisfactory.

Option held by the General Development Co. has been abandoned.

JEROME DAISY COPPER CO.

ARIZONA

Address: Box L., Jerome, Ariz., or P. O. Box 502, Phoenix, Ariz.

Officers: J. F. Mowles, pres.; R. Kingdon, v. p.; A. J. Kieselburgh, sec.; J. J. Cain, treas., with J. F. Hubbard, H. D. McVay and A. G. Dulmage, directors. J. F. Mowles, supt.

Inc. Oct. 5, 1916, in Arizona. **Cap.** \$1,000,000 50¢ par; 1,129,975 issued.

Property: 22 claims at Jerome, said to show a copper bearing contact vein between quartz porphyry, schist and diorite with limestone capping.

Development: by 235' shaft, bottomed in sandstone, making 70 gal. water per min. Crosscutting under way on 230' level in 1917 was said to have exposed a gossan body 17' wide, on which a winze is sunk.

Equipment: 500 cu. ft. compressor, 75 h. p. engine, 25 h. p. hoist, pump, etc.

A prospect. Idle.

JEROME DEL MONTE COPPER CO.

ARIZONA

Office: Room 1018, 50 Congress St., Boston, Mass. **Mine Address:** Harry D. Stull, supt., Jerome, Ariz.

Officers: Thos. S. Woods, pres.; A. B. Ewing, treas.; with E. P. Thompson, Fred Sutter, E. S. Armstrong, Tasker L. Oddie, directors.

Inc. in Arizona. **Cap.** \$2,000,000; \$1 par; 303,000 issued. Bankers Trust Co., N. Y., registrar.

Property: 41 claims, about 700 acres, surveyed for patent, in the Verde district, Yavapai county. Property being developed by 3-compartment shaft down 500' in 1917 and sunk in limestone; much water encountered.

Equipment: electrically-driven hoist of 1,500' capacity, compressor, 400-gallon centrifugal pump.

A prospect. Assessment work only being done since January, 1918.

JEROME GRANDE COPPER CO.

ARIZONA

Address: Box 836, Jerome Ariz.

Officers: J. J. Cain, pres.; J. W. Hubbard, v. p.; J. C. Scott, sec-treas.; with A. B. Colwell, and W. Hales, directors.

Inc. July, 1917, in Arizona. **Cap.** \$1,000,000; shares 50¢ par.

Property: 5 patented claims, 71 acres, on southern slope of Smelter Hill, the United Verde mine being on the opposite slope. Lands formerly owned by Verde Grande Copper Co., which suspended operations in 1909. In 1917 bondholders, who were also stockholders in that company, foreclosed mortgage and the property was bought in at Sheriff's sale by J. C. Scott, as trustee, for the bondholders, who then organized present company.

Development: by 838' shaft, with 560' crosscut from it. Also two tunnels with about 400' of workings. Claims show diabase, diorite, slate, and altered schist, with stringers of ore carrying chalcocite, and auriferous chalcopyrite disseminated through the schist, but not in commercial quantity. Management offers treasury stock to finance the company, planning to extend the crosscut beyond 400', where ore in commercial quantity is expected. Property is favorably situated, but like most of the non-producing Jerome properties is a mining gamble.

Idle, pending financing of company. Authorized, September, 1921, to sell 119,249 treasury shares at 25¢ each.

JEROME NEW YORK COPPER CO.**ARIZONA**

Mail returned unclaimed from Jerome, Ariz.

Inc. June, 1917, in Arizona. Cap. \$2,000,000; shares \$1 par.**Property:** 2 claims in the Verde district with reported good surface indications. Stock offered at 25¢, October 20, 1917. Probably dead.**JEROME-OATMAN MINING CO.****ARIZONA****Office:** Jerome, Ariz. **Mine office:** Oatman, Ariz.**Officers:** Walter C. Miller, pres.; D. J. Shea, v. p.; S. F. Denison, sec.; H. W. Lewis, treas.; with H. E. Campbell and Henry Lovin, directors. **Jas. P. Rice, supt.****Inc. July, 1915, in Arizona. Cap. \$150,000; shares 10¢ par; 442,251 shares in treasury, Oct., 1915.****Property:** 11 claims, in San Francisco district, 3 miles N. W. of Oatman, Mohave county, shows gold-silver ore in quartz cutting andesite and rhyolite. The veins run N. W.-S. E. and dip N. 70°.

Shut down in 1917 on account of water on the 390' level. As practically no commercial ore was proved by 390' shaft and 600' of drifts, the resumption of work is indefinite. No recent returns.

JEROME-PACIFIC MINING CO.**ARIZONA****Address:** Jerome, Ariz.**Officers:** C. V. Hopkins, pres.; Wm. P. Harlow, v. p.; C. Earl Cree, sec., Raymond Sargeant, treas., with L. R. Ford, I. M. Sutton and J. B. Harper, directors.**Inc. Sept. 16, 1916, in Arizona. Cap. \$750,000; 50¢ par; 750,000 issued****Property:** 36 claims in Verde district, Yavapai county, 5 miles S. E. of Jerome, on the E. slopes of the Black Hills.**Geology:** replacement bodies in schists, dipping 80° N. and pitching E.-W. Surface conditions are similar to those at the United Verde and United Verde Extension mines, that is, they carry large jasper outcrops, and show oxidized ore, which assays up to 18% copper, 8 oz. silver, and \$6.80 gold per ton.**Development:** by 2 vertical shafts, 35' and 65' deep; also 6 tunnels from 35 to 270' in length. Expenses in 1916 totaled \$9,000, covering 2½ miles of road and assessment work.

The property warrants development work, which will, it is said, be started when company is financed.

JEROME PORTLAND COPPER CO.**ARIZONA**Reorganized as **Jerome Bisbee Copper Co.**, which see.

The decision rendered in the suit filed by the minority stockholders in 1917, against the president of the company, A. B. Frame, stipulated that Frame return to the treasury 469,000 shares of stock fraudulently obtained by him. The company assets were bought in for debts at receivership sale for \$14,000, by parties interested in the welfare of the company and an option given to the Jerome-Bisbee Copper Co. to purchase the property at the same figure. According to advices, stock was exchangeable share for share into Jerome-Bisbee stock until July, 1919, upon payment of transfer charge of 3¢ per share.

JEROME PRESCOTT COPPER CO.**ARIZONA****Address:** W. A. Cline, Prescott, Ariz.**Officers:** W. A. Cline, pres.; A. J. Matthews, v. p.; F. R. Dyas, sec.-treas.; with F. O. Smith and W. E. Sanders, directors.**Inc. in Arizona. Cap. \$1,500,000; shares \$1 par; 500,000 issued. Registrar and Transfer Co., New York, registrar and transfer agent. Kastel & Co, 20 Broad St., N. Y., fiscal agents.****Property:** the Hub, or Sanders group, of 33 claims, about 660 acres, several miles west of Copper Basin in Skull Valley, 4 miles from the railroad and 12 miles from Prescott, Yavapai county. Claims cover a schist belt 30' wide, along a monzonite contact, which shows green copper stains;

also several quartz veins carrying gold values and one containing hornblende with associated chalcopyrite. Some development work was reported in 1920 and in April, 1921, property was leased for three years to W. E. Sanders and associates.

An examination by W. H. Weed showed the property worthy of very modest development for gold, but lacking any of the earmarks of a successful copper mine. Promoters distributed garbled copy of above report, with all unfavorable comments and opinions eliminated. Stock was boosted by rigging to \$6.75 per share, breaking to 25¢. per share, when manipulation ceased.

JEROME-ST. LOUIS COPPER MINING CO. ARIZONA

Address: W. P. Burke, pres., Jerome Ariz.

Officers: A. Brockman, v. p.; J. M. Sullivan, sec.; G. Brookshire, treas.; with J. E. Burke, E. E. McFarland and J. H. Sontag, directors J. Riley, supt.

Inc. Nov. 13, 1916, in Arizona **Cap.** \$750,000; shares 50¢. par.

Property: 8 claims, 3 miles S. of Jerome, between the Green Monster and the Jerome Portland, crossed by great Verde fault.

About \$10,000 said to have been spent on the property to date. No recent information.

JEROME SUPERIOR COPPER CO. ARIZONA

Address: Bert Campbell, supt., Clarkdale, Ariz. or 644 Title Insurance Bldg., Los Angeles, Calif.

Officers: Melville T. Frasier, pres.; H. G. Bockins, v. p.; G. D. Case, sec.-treas.; Geo. Mitchell, gen. mgr., with M. P. and L. J. Selby, directors. At a meeting held Nov. 24, 1920, the directorate was ousted and the following directors elected: G. A. Kobold, pres.; L. J. Selby, sec.-treas., with Jas. A. Brower, Wm. Steel, F. A. Flory, E. C. Joannes and G. Egelhoff-Rindell.

Financial: statement dated April 15, 1920, shows cash in bank, U. S. bonds and notes totaling \$225,000; accounts payable \$2,400.

Inc. May, 1916, in Arizona. **Cap.** \$750,000; 50c. par. Stock offered at \$3 per share, April, 1920; 1,300,000 shares outstanding. Permit for additional stock sales issued, late summer of 1921.

Property: 202 claims in Verde district, Yavapai county, 1 mile N. of Jerome and 1 mile N. W. of Clarkdale includes Sutcliffe and Stanridge groups.

Development: shaft 900' deep, Sept. 1, 1920 said to have an encouraging showing of chalcocite and copper iron sulphides. Water handled 160,000 gal. daily.

Equipment: includes 80 h. p. hoist, 6-drill compressor, pump, electric power, assay office, etc.

The new Verde Tunnel and Smelter R R. crosses the property for 2½ miles.

Stockholders and management are involved in litigation, and the Arizona Corporation Commission is investigating the books of the company on the complaint of stockholders charging mismanagement. Property closed down, December, 1920.

JEROME VERDE COPPER CO. ARIZONA

Fully described in Vol. XIV. Property sold to Jerome Verde Development Co., which see.

JEROME VERDE DEVELOPMENT CO. ARIZONA

Mine office: Jerome, Ariz.

Offices: care Edwin O. Holter, 60 Broadway, New York; and 845 Title Ins. Bldg., Los Angeles, Calif.

Officers: E. O. Holter, pres.; Thos. J. Edwards, v. p.; I. M. Sutton, sec.-treas.; Robt. Trease, asst. sec.-asst. treas.; with Chas. B. H. Deller, Walter Cook, Jr., and F. V. Henshaw, directors.

Inc. April 18, 1921, in Delaware, to take over property of **Jerome Verde Copper Co.**, for details of which see Vol. XIV. **Cap.** \$750,000; par 50¢; 1,151,000 shares outstanding.

Sale of property by J. V. C. Co. to the J. V. Development company was ratified May 5, 1921. Stockholders of J. V. C. were offered 1 share of J. V. D. for each 10 shares of J. V. C.; at same time agreeing that an option on 628,078 shares of new company should be given to the United Verde Extension for \$464,039 and to permit the latter to develop property. Proceeds will be used to meet debts of J. V. C. of about \$80,000 and future development expense. October 9, 1921, was the final date for exchange of stock. Reported that deeds of conveyance for a \$420,000 consideration were filed in November, 1921.

Property: 28 claims patented, 480 acres, lying E. of the United Verde and adjoining the little Daisy mine of the United Verde Extension, shows an iron gossan with outcrops of copper ore in limestone capping on the Verde and Columbia claims.

Development: by 1,060' three-compartment Columbia shaft, with 12,000' of workings, mainly on the 1,100' level, which corresponds with the 1,400' level of the U. V. X. The workings expose the typical mineralized schist of the ore-bearing formation beneath limestone and lava capping; and in many places oxides, carbonates, and sulphides of copper occur. Average assays were reported by former management, at 8.4% copper. Recent work has been confined to the shear zone on the Maintop claim, largely on the 1,100' level.

Old company and U. V. X. under a former option, have persevered in exploration and diamond-drilling, and indications have from time to time been encouraging, but commercial ore has been found only in small bodies.

Equipment: includes electric hoist, good for 1,500' depth, and 1,500 cu. ft. air-compressors. Current is taken from the Arizona Power Co.

Production: by former management was intermittent; but fairly steady shipments to the Humbolt smelter were made in 1919 and were continued up to March, 1920. Total, probably 10,000 tons of ore with copper value of 8 to 12%. Operations ceased in August, 1920.

JEROME-VICTOR EXTENSION COPPER CO. ARIZONA
Property sold in October, 1917, to the **West United Verde Copper Co.** described in Vol. XIV, and now owned by **United Verde Extension Mining Co.**

JEROME-WENDEN COPPER CO. ARIZONA
Address: A. J. Humbert, Wenden, Yuma county, Ariz.

Is a reorganization of the **Nuevo Mundo Mining Co.** Vein said to be up to 5' wide, carrying copper, developed by 3 short tunnels. A prospect, and presumably idle.

JEROME YEAGER COPPER CO. ARIZONA
Officers at last accounts: J. W. Hudgeons, pres.; H. Wilson, v. p.; F. Hawkins, sec.-treas.; also directors.

Cap. \$1,000,000 50c par. Of the 2,000,000 shares, 800,000 are pooled, being given to the owners of the property, subject to complete financing. Stock was offered at 25c in 1917.

Property: 360 acres in Yeager canon, developed by shafts.
J. & J. MINING CO. ARIZONA

Address: O. W. Blickenstaff, mgr., Prescott, Ariz.
Officers: O. W. Blickenstaff, pres.; F. H. Herbert, v.-p.-supt.; G. W. Worthrup, sec.-treas., with Mrs. Emma Klein, directors.

Inc. June 24, 1919, in Arizona. **Cap.** \$1,500,000; \$1 par; 330,000 shares outstanding.

Property: Silver Reef mine, 21 claims and mill site, 430 acres, in Copper Basin district, Yavapai county. Ore occurs in fissure vein in porphyry schist, reported to average 40 oz. silver per ton.

Development: by 3 tunnels, 215', 425' and 235' long, with a total of 871' of workings. Reserves estimated at 100,000 tons blocked out.

Equipment: includes compressor, and 150 h. p. engine. Developing.

JOHNSON COPPER DEVELOPMENT CO.

ARIZONA

Office: Frankfort, Ky. **Mine address:** J. T. Tong, mgr., Johnson, Co-chise Co., Ariz.

Officers: Henry S. Krug, St. Louis, Mo., pres.; Ralph R. Wilson, v. p.; A. A. Hazelrigg, sec.-treas., Mt. Sterling, Ky.; with P. S. Head, R. R. Wilson, E. H. Elliott, Baily D. Berry, A. C. Van Winkle, R. O. Duncan and H. P. Hubbell, directors.

Inc. March 13, 1908, in Arizona. **Cap.** \$2,000,000; \$1 par; issued 1,650,000. Annual meeting, second Monday in October.

Bonds: \$100,000 5-year 6% 1st mortgage gold bonds authorized, interest payable on Dec. 21. Principal due Dec. 21, 1921; \$38,000 outstanding.

Property: 8 claims, 3 fractional, unpatented, 125 acres, known as the Climax group, in center of the Johnson camp, between the Peabody, Peacock, Republic and Black Prince mines. Claims show granite and limestone, with replacement deposits carrying malachite, chrysocolla, bornite and chalcocite, averaging 4% copper and 5 oz. silver per ton for the several thousand tons thus far developed. Orebody has a flat dip, averaging 32°, and is about 2' wide on the 250' level.

Development: by 240' shaft giving a depth of 740' on the orebody, with total of 2,500' of workings. Shaft reported to be bottomed in bornite disseminated in limestone. The 100' level has about 500' of crosscuts and drifting, much of it in ore, but ground is leached and broken. The 250' level has N. and S. drifts, 500' of workings on a 2' vein. A 500' winze was sunk from the S. drift. Development is said to show large bodies of low-grade carbonates near the surface and some sulphides at 400' depth. Only work done in 1919 was a crosscut to the Republic mine on the 740' level.

Equipment: includes a 40 h. p. gasoline hoist, 5-drill compressor and 5 buildings.

JUANITA MINING & MILLING CO.

ARIZONA

Company defunct. Fully described in Vol. XIV.

Property: 16 claims, 300 acres, and a 5-acre mill site about 4 miles from the Senator mine in the Hassayampa district, Yavapai county, about 17 miles S. of Prescott.

In June, 1917, D. M. Jennings, and others of St. Louis, received a deed on the property from the Sheriff.

JUNIATA GOLD & COPPER CO.

ARIZONA

Dead. See Vol. XIV.

JUNO MINE

ARIZONA

Property: one of the earliest locations in the Chloride district, Mohave county.

Development: by 570' shaft and 2,000' open-cut. **Production:** totaled \$500,000 to end of 1916. No recent information received.

KAABA MINING & MILLING CO.

ARIZONA

Address: C. H. Wagner, Round Valley, Mail Box, Kingman, Arizona.

Property: consists of several vanadium bearing claims.

KAIBAB CONSOLIDATED SMELTING CO.

ARIZONA

See Union Metals Corporation.

KAIBAB SMELTING CO.

ARIZONA

Name changed to Kaibab Cons. Smelting Co., which late in 1921 was in process of consolidation with Union Metals Corp.

Office: 336 Citizens Natl. Bank Bldg., Los Angeles, Calif.

Officers: J. H. Hull, pres.; Jas. Westervelt, sec.

Inc. in Arizona. **Cap.** \$1,000,000; par \$10; 100,000 shares issued. Annual meeting in August.

Property: a copper mine, 10 claims (2 patented); 200 acres, on Buckhorn or Kaibab plateau, Coconino county, N. of the Colorado river, about 154 miles from Lund, Utah, the nearest rail point. Freight is taken into Ryan by way of Hurricane, Utah. Is a likely prospect, but inaccessible.

KATHERINE EXTENSION MINING CO.**ARIZONA**

Controlled by C. N. Miller, 617 Pacific Bldg., San Francisco, Cal.

Mine address: E. R. Abadie, Katherine City, Ariz. E. A. Shaw, agent, Kingman, Arizona.

Officers: Wm. M. Steele, pres.; C. N. Miller, v. p.; E. N. Bannon, sec.-treas., with Chas. F. Ainsworth and E. A. Shaw, directors.

Inc. June 16, 1921, in Ariz. Cap. \$2,000,000; par \$1; 950,000 issued; no bonds. Annual meeting in September.

Operating expenses for 1921 were \$27,000; cash, \$10,000 and \$15,000 receivable, Nov., 1921.

Property: 14 claims, 260 acres, patent applied for, N. E. of the Katherine mine, in the Union Pass section, San Francisco district, near Gold Roads, Mohave county.

Geology: claims cover gold bearing fissure veins of quartz and calcite in pre-Cambrian granite.

Development: by 245' shaft, with 130' of cross-cutting to reach the Katherine vein.

KATHERINE GOLD MINING CO.**ARIZONA**

Office: Kohl Bldg., San Francisco.

Mine address: L. H. Whitney, asst. supt., Kingman, Ariz.

Officers: Chas. Sutro, pres.; R. L. Dimmick, v. p.-gen. ingr., Kingman, Ariz.; Sidney L. Schwartz, sec.-treas., with E. L. Dow, Allen E. Ware, W. C. Howard and Phillip I. Manson, directors.

Inc. in Arizona. Cap. \$2,000,000; \$1 par; fully paid. Registrar, Mercantile Trust Co., San Francisco. Property acquired from New Comstock Mng. Co. (q. v.) on Aug. 29, 1921. Permit to sell stock has been granted by Arizona Corp. Com.

Property: the Katherine mine, 9 claims (1 patented) covering 4,700' along course of the Katherine vein, in the Union Pass (San Francisco) district, Mohave county, $1\frac{3}{4}$ miles E. of the Colorado river, 30 miles W. of Kingman, and 26 miles from Union Sta. on Chloride branch of A. T. & S. Fe R. R. The Katherine is a quartz-adularia vein in gneiss, with value largely in gold, which outcrops a short distance before disappearing beneath overlying gravels; width at surface 60' to 75', average 32'. Ore is chiefly low grade, but high grade lenses occur.

Development: by 400' shaft, with 4 levels at 100' intervals, and cross-cut through vein at 50' intervals, has opened an ore shoot from 287' to 533' in length; total workings, 7,800'. In November, 1921, a winze from the 400' level had been sunk 90' in ore said to assay \$20 to \$50; to be continued to the 700' level. Official estimates give 190,000 tons of ore blocked out, of which 94,000 tons average \$11 and 96,000 tons, \$14.45. a total of over \$2,500,000.

Equipment: includes hoist and compressor. Preliminary plans already made for a 300-ton all sliming continuous counter-current decantation cyanide mill.

On Aug. 25, 1921, 500,000 shares were offered for sale, at a price of \$1.25 for first 100,000 shares only. Property appears to have the making of a first class gold mine.

KATHERINE MOHAWK MINING CO.**ARIZONA**

Controlled by F. T. Torpe.

Inc. 1921. Company has permission from the California Corp. Commission to sell 200,000 shares of treasury stock.

Property: the Mohawk group, 6 claims, in the Union Pass section,, San Francisco district. **Developing:** 1921.

KATHERINE-NEVADA MINING CO. ARIZONA

Address: care Geo. Probasco, Kingman, Ariz.

Property: a prospect in Union Pass section, San Francisco district, Mohave county.

KATHERINE RAND GOLD MINES CO. ARIZONA

Address: Carson City. Nev. F. M. Walsh, mgr., 330 Sansome St., San Francisco, Calif. Wm. Smith, supt., Kingman, Ariz.

Officers: F. M. Walsh, pres.; W. A. Smith, v. p.; Wm. H. Houston, sec.-treas., with Wm. Y. McGill and E. S. Dougherty, directors. Wayne Hubbs, asst. sec.-asst. treas.

Inc. October 25, 1921. **Cap.** \$1,500,000; 25¢ par.

Property: 6 $\frac{1}{3}$ claims, about 130 acres, in Union Pass section, San Francisco district, Mohave county.

Development: by 40' shaft. Work begun late in 1921.

KATHERINE REVENUE MINES CO. ARIZONA

Successor to **Oatman Revenue Mines Co., Inc.**

Address: J. M. Savage, mgr., Kingman, Ariz.

Officers: Henry Johnson, pres.; T. J. Hudspeth, v. p.; C. M. Leonard, sec.-treas., with E. E. Armour and Chas. J. Phillips, directors.

Inc. 1921, in Arizona. 100,000 shares treasury stock offered at 10¢ per share, June, 1921. Permission to sell additional stock was granted, late summer, 1921.

Property: in the Union Pass section, San Francisco district, Mohave county. An undeveloped prospect, upon which operations were to be resumed, November, 1921.

KATHERINE TREASURE VAULTS CO. ARIZONA

Address: E. A. Shaw, Kingman, Ariz.

Incorporators: C. T. Cohee, C. B. Outten and L. S. Mackey, all of Wilmington, Del.

Inc. 1921, in Delaware. **Cap.** \$1,500,000; \$1 par.

Property: a prospect in Union Pass section, San Francisco district, Mohave county.

KAY COPPER CO. ARIZONA

Address: Heard Bldg., Phoenix, Ariz.

Officers: Geo. W. Long, pres.-gen. mgr.; S. J. Tribolet, Phoenix, Ariz., v. p.; F. J. Elliott, sec.-treas., with F. W. De Foe and Frank R. Poss, directors.

Inc. 1909, in Arizona. **Cap.** \$2,000,000; \$1 par; 1,570,633 $\frac{1}{2}$ shares issued. Principal stockholders are: The William H. Yawkey Estate and Frank R. Poss, of New York, Geo. W. Long and S. J. Tribolet, of Phoenix, Ariz.

Property: 42 claims, 4 patented, and townsite of 592 acres, situated at mouth of Black Canyon creek, on the Agua Fria river, in Yavapai county, about 40 miles south of Prescott. About \$400,000 has been expended in developing the property to date. Ore occurs in Yavapai schist. Considerable chalcopryite ore has been shipped and company estimates 296,000 tons of commercial ore developed.

Development: by inclined shaft 600' deep, drifts, crosscuts and diamond drilling. Work at present is confined to the new 1,000' 3-compartment working shaft, which is electrically equipped and 600' deep, July, 1921.

Equipment: 75 h. p. compressor and 112 h. p. hoist being installed.

KELVIN-SULTANA COPPER CO. ARIZONA

Fully described in Vol. XIII. Company was a reconstruction of the **Sultana-Arizona Copper Co.**, financed by the Baldwin Syndicate of Chicago.

Property was sold by receivers in January, 1919, to bondholders, who then reorganized under the name of **Ray Boston Copper Co.**, which see.

KEYSTONE CONSOLIDATED MINING CO. ARIZONA
Mail returned from former address: 908 City Natl. Bank Bldg., Los Angeles, Calif.

Officers: G. S. Holmes, pres.; W. O. Kay, v. p.; T. H. Fitzgerald, sec.-mgr.; John Schneider, treas., with A. Patterson and A. McNally, directors. Inc. May, 1916, in Arizona. **Cap.** \$2,000,000 \$1 par; assessable; all outstanding. Bonds authorized \$660,000; outstanding \$125,000.

Property: 5 claims, including the Keystone mine, in Mineral Park, Cerbat range, formerly owned by Ross D. McCausland of Kingman.

Ore: lead-silver-zinc-copper bearing, containing 2 to 4% copper, 12 to 24% zinc and over 30 oz. silver per ton, as sampled from dumps.

Development: by 300' shaft, with 3 levels and total of 3,500' workings. Probably a fair mine, but had a wrongly-designed plant rushed up before it was needed. Company was consolidated with the Silver Keystone Co. in 1917.

Production: totaled \$150,000 to end of 1916.

Property was sold at sheriff's sale, August, 1921, to G. S. Holmes, the president, to satisfy judgment of \$30,000 obtained by him.

KEYSTONE COPPER MINING CO. ARIZONA

Office: Newton, Kans. Mine at Johnson, Cochise Co., Ariz.

Officers: W. W. Miller, pres.-gen. mgr.; A. Bannow, v. p.; T. C. Miller, sec.; W. J. Trousdale, treas.; Doane Merrell, state agt.; U. R. Miller, supt. Inc. 1908, in Ariz. **Cap.** \$900,000; \$1 par; 823,000 shares outstanding.

Property: the Bannon group, 16 claims, surrounding the St. George claim and 1½ miles from the Arizona United property, said to show a large deposit of iron ore and to have cut several veins dipping 38°.

Development: by 635' shaft, to be sunk deeper; 3,000' underground workings said to block out 500,000 tons of sulphide ore. Reported, October, 1921, that power plant and mill were under construction.

KEYSTONE DEVELOPMENT CO. ARIZONA

Property: the Isabella mine, 20 miles from Casa Grande, Pinal county. Reported to have some 7% copper ore. No recent returns; probably idle.

KING COPPER CO. ARIZONA

Office: W. F. Dreher, sec., 536 First Natl. Bank Bldg., Denver, Colo.

Mine office: Rodeo, N. M.

Officers: N. P. Wilson, pres.-mgr.; C. E. Welch, supt.

Inc. 1917, in Arizona. **Cap.** \$1,000,000, 50c par.

Property: about 1,000 acres in the Paradise district, Cochise county, Arizona, 12 miles north of Rodeo, N. M. Company says a 200' dike crosses property, also several fissure veins. Assays as given are 5.2% copper, 8.6% lead, 2.5 oz. silver per ton.

Development: by 2,000' and 300' shafts and numerous tunnels. Good grade ore reported on 300' level.

Equipment: includes 200 h. p. gas engine, 700 cu. ft. compressor and concentrating mill.

KINGMAN CONS. MINES CO. ARIZONA

Address: Will Halloran, Kingman, Arizona.

Officers: H. H. Patterson, pres.; W. H. Robinson, v. p.; J. H. Palmer, sec.; H. C. Veeder, treas.; Robt. Linton, cons. engr.

Inc. 1920, in Arizona. **Cap.** \$3,000,000; \$1 par Company succeeds

Arizona Butte Mines Co., described in Vol. XIV. Stock exchanged share for share.

Property: the Stockton Hill group, 30 claims, 18 patented, 250 acres, including the Banner mine, 12 miles from Kingman, Mohave county. The mine is held under lease from the U. S. Smelting Ref. & Mng. Co. **Ore:** sulphides of lead and zinc with gold and silver, occurs in fissure veins.

Development: by 165' and 400' shafts, with 5,000' of lateral workings, including 2,300' Banner tunnel.

Equipment: includes compressor, drills, and 150-ton mill, put into commission, October, 1920.

KINGMAN ZINC MINING CO.

ARIZONA

Office: B. X. Dawson, Kingman, Ariz

Cap. \$1,000,000; shares \$1 par; 800,000 shares outstanding.

Property: 6 miles from A. T. & S. F R. R. in the Chloride district, Mohave county. Some hand-sorted silver-zinc ore has been shipped by lessees.

Not favorably regarded, as the promotions of Mr. B. X. D. are looked upon with suspicion by many people.

KING PLACER CO.

ARIZONA

Address: Juan Brittingham, mgr., Quartzite, Ariz.

Property: placer ground in Quartzite district, Yuma county, purchased 1916 from the Yuma Cons. Mng. Co. Idle.

KIRKLAND ARIZONA COPPER CO.

ARIZONA

Property: in the Walnut Grove district, Yavapai county, 12 miles S. E. of Kirkland.

In October, 1921, is reported to have filed suit vs. Zonia Copper Co. to quiet title to certain claims.

KOFA QUEEN M. & M. CO.

ARIZONA

Address: Wm. H. Westover, agent, Yuma, Arizona.

Inc. June, 1921, in Arizona. **Cap.** \$1,000,000; \$1 par.

KORNCOB MINING & DEVELOPMENT CO.

ARIZONA

Address: care Chas. E. Walker, v. p. of Consol. National Bank, Tucson, Ariz.

Is a dormant corporation. Bond and lease on the Apache & Del Monte group of claims at eastern base of Catalina Mountains, 75 miles by road from Tucson, has expired.

Claims show garnet containing copper pyrite, as a contact metamorphic product, along a granite limestone contact.

Geological report on property made by A. F. Tolman, Jr., of Leland Stanford University, May 24, 1912.

LA ANOZIRA GOLD MINING CO.

ARIZONA

Dead since 1917. See Vol XIII.

LA BELLE MINING CO.

ARIZONA

See Vol. XIV. **Last address:** Vicksburg, Yuma Co., Ariz.

Property was abandoned as development proved it of no value. All machinery and improvements sold, and company probably defunct.

LADY MINES CO.

ARIZONA

Address: care S. H. Beecher, Kingman, Arizona.

Property: in Union Pass section, San Francisco district, Mohave county.

LAKE SHORE MINE.

ARIZONA

Address: Frank M. Leonard, owner and mgr., 3543 Third St., San Diego, Cal. **Mine address:** Casa Grande, Ariz.

Property: 35 claims, 3 patented, 50 miles W. of Tucson and 35 miles S. of Casa Grande, in Pinal county, carries a contact deposit in granite and andesite. The ore zone runs N.-S. and dips 45°. Over one million tons of oxidised copper ore, averaging 3% copper, have been developed above water level.

Development: by 285' shaft, bottomed in sulphide ore of payable tenor.

Mine produced and shipped about 3,000 tons of 5 to 6% ore in 1917. Is regarded as a good mine, needing further capital for equipment and development.

Churn drilling was under way in 1919.

LAKE SUPERIOR & ARIZONA MNG. & SMG. CO. ARIZONA
Fully described in Vol. XII. Properties sold in 1916 to **Superior Arizona Copper Co.**, which was absorbed by **Magma Copper Co.** in 1920.

LAKE SUPERIOR & WESTERN MINING CO. ARIZONA
Office: 208 Glencoe Bldg., Duluth, Minn.

Officers: A. Hagberg, pres.; A. Bjorkman, v. p.; A. Borgquist, sec.; A. Johnson, treas., with Magnus Olson, John Peterson, A. R. Norman, Ed. Falk and A. Kolstad, directors.

Inc. 1912 in Arizona. Cap. \$1,000,000; \$1 par; \$250,000 issued; assessable, subject to calls from 60¢-\$1. Authorized bond issue \$300,000; \$134,000 outstanding. Annual meeting, first Tuesday in February. Is a holding company, owning a ½ interest in the **Big Pine Cons. Mng. Co.**, which see.

Property: the Mascot gold mine and a 100-ton cyanide plant at Crown King. After expenditure of \$250,000 on the mine and mill, ore proved to be too low-grade to pay and property was abandoned. In 1915 a consolidation was effected with the **Big Pine Cons. Mng. Co.**, a \$500,000 corporation, on the following basis: 200,000 shares of the **Big Pine C. M. Co.** stock were issued for the **Big Pine** properties and 200,000 shares and \$32,150 in cash paid the **Lake Superior & Western Co.** for its mill, which was moved to the **Big Pine** ground. No recent information received. Corporation is now a holding company, whose only asset is apparently its 200,000 shares **Big Pine Cons. Mng.** stock.

LAUREL CANYON MINING CO. ARIZONA

Property: a lease on a group of claims in Graham county, owned by R. V. Dey. The mine has been sub-leased and is presumably producing.

LAVELL GOLD MINING CO. ARIZONA

Fully described in Vol. XIV. Property reported sold at sheriff's sale, August, 1920, and now owned by **Aztlan Gold Syndicate.**

Officers at last account: G. B. Leighton, pres.; C. P. Woodbury, v. p.; St. John Smith, sec.-treas., 66 Broadway, N. Y.

LAWLER; ESTATE OF JOHN ARIZONA

Address: care Ed. W. Wells, Prescott, Ariz.

Property: 6 patented claims in the Eureka district, Yavapai county.

Vein is 1.5' wide, 3,330' long, developed by tunnel, shaft and 10,000' of lateral work. Average grade of ore is given as \$23 in gold and silver; ore reserves 40,000 tons.

Mill equipped with 5 stamps, Wilfley tables and slimers, capacity about 15 tons. Now idle.

LAWTON MINES FINANCE CO. ARIZONA

Address: 1265 Broadway, New York, and Bank of Arizona Bldg., Phoenix, Ariz.

Owns a 50-ton custom mill near Turkey, Yavapai county, known as L. T. S. mill. Also controls the **Silver Cross Mining Co.**

LAYMAN SYNDICATE ARIZONA

Address: B. B. Smith, mgr., Patagonia, Ariz. Not an incorporated company.

Property: owned by Jas. M. Layman, consists of 13 claims, 220 acres, in Harshaw district, Santa Cruz county, known as the "Blue Nose," and also as the Abe Lincoln mine. **Development:** to depth of 160'. Credited with past production of \$250,000 in lead-silver ore. See p. 278, Bull. 582, U. S. Geological Survey.

The mine had been closed down for 30 years. Present management cleaned out the old shaft, added a new compressor, and, at last account (1919), was shipping 4 cars of silver ore per week, yielding \$1,000 net each.

LAZY BOY GOLD MINES CO. ARIZONA

Idle. Address: Oatman, Ariz.

Officers: W. K. Ridenour, pres.-treas.; J. A. George, sec.; J. H. More.

Inc. Sept. 9, 1915, in Ariz. **Cap.** \$1,000,000; \$1 par; 604,500 issued. Listed on San Francisco Exchange.

Spent \$51,000 on development work, 1916-1917. Had \$4,000 cash on hand, March 1, 1919. Authorized, November, 1921, by the state to sell 25,000 shares at 5c.

Property: 9 claims, 150 acres, in San Francisco district, Mohave county, shows several veins in andesite carrying gold values.

Development: by 220' vertical shaft, with total workings of 750'.

Equipment: includes 300 cu. ft. compressor, 3 jackhammer drills, 40 h. p. gasoline hoist. Is considered one of the good prospects of the camp.

LEADVILLE ARIZONA MINES CO.

ARIZONA

Office: Wenden, Ariz.

Officers: J. H. Finnegan, pres.; R. O. Worley, v. p.; A. F. Kinsman, sec.; J. M. Campbell, treas.

Cap. \$150,000; 10c par.

Property: 5 claims on the south side of the Harqua Hala mountains.

LEADVILLE MINING CO.

ARIZONA

Address: Courtland, Cochise county, Ariz.

Officers: Wm. Holmes, pres.-gen. mgr.; W. D. Monmonier, sec.; Pearce, Ariz.; Calvin Glenn and W. A. Stilson, directors.

Inc. 1905, in Arizona. **Cap.** \$600,000; \$1 par.

Property: 13 claims, 199 acres, patented, in the Turquoise district, includes the Leadville and Maid of Sunshine mines, showing contact deposits between monzonite and limestone. Ores are mainly malachite, azurite, and chrysocolla, with some chalcopryrite, and pyrite showing in the Maid of Sunshine mine. The orebodies said to carry an average of about 8% copper. Company is developing the Lower group on the 300' level. There are 5 shafts, deepest 365', and a 60' tunnel.

Equipment: includes a 250 h. p. steam plant, 2 hoists and air compressor.

Property was under bond, 1916-17, to the **Needles M. & S. Co.**, for \$600,000, and extensively churn-drilled, but bond given up in July, 1917. In 1920 the property was operated intermittently on company account.

LECORA COPPER CO.

ARIZONA

Idle. Office: 500 Lonsdale Bldg., Duluth, Minn. **Mine office:** Globe, Gila county, Ariz. David Fairchild, treas. The old **Cordova Copper Co.** was taken over by its creditors and renamed.

Property: 21 claims, aggregating 270 acres, north of the Old Dominion mine and west of the Arizona Commercial.

Development: by the 1,225' three-compartment Gem shaft with extensive crosscuts on the 1,100' and 1,200' levels, cutting the Gem and Future veins, which have shown a little ore occasionally, but nothing of commercial size.

Shipments made from a vein 5 to 8' wide on the 1,200' level, averaged 3.35% copper, 33% iron, 35% sulphur, with \$1.30 in gold and silver.

Equipment: includes hoist and 12-drill air compressor. Management has struggled faithfully to make a mine, both east and west of Globe. No recent information received.

LEONARD COPPER CO.

ARIZONA

Address: Gleeson, Cochise county, Ariz. J. W. Bennie, gen. mgr., Clifton, Ariz. J. E. Penberthy, supt., Gleeson.

Inc. 1910 as a subsidiary of the **Shannon Copper Co.**, which see.

Property: the Copper Belle mine, 8 claims, in the Turquoise or Courtland district, is opened by a vertical shaft and about 1 mile of workings, developing several orebodies on 3 different contacts. Ore is nearly solid pyrite, with considerable chalcopryrite and some bornite.

Equipment: includes steam plant with 2 hoists, compressors, repair shop, etc. Output normally about 150 tons per day, loaded directly into railway cars at mine and shipped over the A. E. & S. P. Railroad to Clifton.

LE ROY CONSOLIDATED MINES CO.**ARIZONA****Address:** Norman D. Lindslev, supt., Dos Cabezos, Arizona.**Property:** a group of 7 claims near Dos Cabezos, Cochise county. Ore contains gold, silver, lead. A prospect.**LESZYNSKY COPPER MINE****ARIZONA****Address:** J. Leszynsky, owner, 32 Broadway, New York. **Mine address:** Clifton, Ariz. John Christy, lessee.**Property:** 38 claims, 24 patented, in Morenci-Metcalf district, Greenlee county, showing a deposit of low-grade disseminated copper ore, said to average 2½%.**LEVIATHAN MINES CO.****ARIZONA****Office:** 512 Sellwood Bldg., Duluth, Minn. **Mine office:** Yucca, Ariz.**Officers:** Theo. Hollister, pres.; G. Carlson, v. p.; W. T. Smith, sec.; C. S. Tremelling, treas.**Inc.** Oct. 14, 1914, in Arizona. **Cap.** \$1,000,000; \$1 par; 893,902 shares issued. Annual meeting first Tuesday in December.**Property:** the Whale & Copper Wonder mines, 7 claims, about 120 acres, in Copper canyon, Cedar district, Mohave county, shows copper-molybdenite-silver ore in 2 quartz veins traversing an altered granite. The main orebody, said to be 7' wide and proven for 600' in length, runs N. 8° E. and dips 80° E. Ore said to average 1% molybdenum, with some copper and silver. Veins reported to be 14' wide at 100' level.**Development:** 250' shaft and 2 tunnels, 60' and 400' long, with 252' and 400' drifts.**Ore reserves:** estimated at 100,000 tons blocked out.**Equipment:** includes 100 h. p. and 50 h. p. oil engines, with complete concentrating plant of 50-70 tons daily capacity and flotation unit Refining plant at Vernon, Cal., for retreating concentrates and manufacture of ammonium molybdate, molybdic acid, calcium molybdate, etc.

Operations suspended December, 1919, owing to poor market for molybdenum.

LEXINGTON-ARIZONA MINING CO.**ARIZONA****Office:** I. W. Hellman Bldg., Los Angeles, Calif. **Mine office:** Oldtrails, Arizona.**Officers:** Dr. C. H. Phinney pres.; Dr. C. M. Heberton, v. p.; H. R. Woods, sec.-treas., with R. M. Keeney and C. E. Woods, directors. H. E. Woods, mgr.**Inc.** Feb. 12, 1912, in Ariz. **Cap.** \$1,000,000; shares \$1 par; 894,000 shares issued. Stock listed on Los Angeles Stock Exchange. Annual meeting, 4th Tuesday in September.**Property:** 15 claims, 8 patented, 155 acres, at Oldtrails, in the Tom Reed-Goldroad district, Mohave county, shows fissure veins, from 6'-25' wide, running N. W.-S. E. and dipping 75° N.-N. E. Ore occurs as quartz-spar, in andesite, and is said to assay from \$2-\$14 gold per ton.**Development:** by numerous shafts from 45' to 280' in depth, the 3-compartment vertical shaft is to be sunk deeper.**Equipment:** includes hoist, compressor, Cornish pump and electrical pumping equipment. Company also owns the townsite of Oldtrails. Idle.**LIBERTY COPPER MINES****ARIZONA****Office:** I. W. Hellman Bldg., Los Angeles, Calif.**Officers:** E. M. Coplen, pres.; J. A. S. Furlonge, v. p.; G. C. Barnes, v. p.; J. L. Richardson, sec.-treas., with F. Huttig, C. B. McClusky and F. W. Morrissey, directors.**Inc.** 1917, in Ariz. **Cap.** \$10,000,000; \$1 par; outstanding 4,915,937 shares. Annual meeting, 2nd Monday in June.**Property:** the Jean group, 27 claims, 540 acres, near Copper Mountain, 3½ miles N. E. of Mayer, traversed by a ledge of mineralized schist, said to be from 50 to 150' wide, and to carry gold, silver and copper values.**Development:** 3-compartment vertical shaft to depth of 340'.

Equipment: 35 h. p. hoist, 200 cu. ft. compressor and pump.

Reported on by F. J. Hobson, D. G. Kidder, G. R. Fansett, R. W. Hart, C. P. Basye.

Mine still in prospective state; company too heavily capitalized.

LIBERTY SILVER MINES CO.

ARIZONA

Formerly the **Arizona Consolidated Copper and Mining Company**, name changed by permission of the Arizona Corporation Commission, February, 1918.

Officers: C. H. James, pres.; M. J. Fink, v. p.; E. A. Abrahams, sec-treas., with J. C. Forney, J. B. Anderson and J. C. Anderson, directors.

Inc. 1918, in Ariz. **Cap.** \$1,500,000; \$1 par; issued in payment for properties 750,000 shares. Security Transfer & Registrar Co., N. Y., transfer agent.

Property: St. Louis group, 15 claims at Greaterville, Pima county, reported to show 10 veins varying in width from a few inches to 20'. occurring as a stockwork. A 30" sample at 90' depth reported to have assayed \$2.80 gold, 16.9 oz. silver, 2.2% copper, 41.2% lead, 12.1% zinc. Developed by several shafts, deepest 200'.

Mail returned from former New York office and property reported sold at auction. Sept. 27, 1921, to satisfy a judgment.

LITTLE AJO COPPER MINING CO.

ARIZONA

Officers: W. A. Knox, pres., Apex, Mo.; C. C. Wheeler, v. p.; O. T. Richey, sec.; C. E. Walker, treas., all of Tucson, Ariz.

Inc. 1917. **Cap.** \$1,000,000; shares \$1 par. First allotment of 100,000 shares treasury stock offered at 25 cents.

Property: 3 claims adjoining the mines of the New Cornelia, Ajo Consolidated and Cornelia Ajo, at Ajo, Pima county. Greater portion of the claims is covered with conglomerate, while the bottom of a 50' shaft is said to show slightly altered porphyry. Prospected by diamond-drilling, at 1,000', low-grade copper ore is said to have been encountered, continuing to bottom or 1,900' in sulphides. No recent returns.

LITTLE BOBBIE MINING CO.

ARIZONA

Office: I. J. Lipsohn, sec.-treas., Phoenix, Ariz. Scott Lintner, mgr., Ray, Ariz.

Officers: W. J. Graham, pres.; J. Pollard, v. p.; S. J. Ross, sec.-treas., with Geo. Hershman and J. A. Ganz, directors.

Inc. 1917, in Arizona. **Cap.** \$450,000; \$1 par; 312,500 issued.

Property: the Bisbee group, 9 claims, 175 acres, 1½ miles S. E. of Ray, Pinal county, Ariz., adjoining the Ray-Broken Hill and Ray-Silver-Lead mines.

Ore: silver-lead in limestone, with some gold and copper.

Development: by 465' tunnel.

An option on the Little Bobbie held by Ray-Broken Hill M. Co. in 1919 was allowed to expire.

LITTLE EGYPT COPPER MINING CO.

ARIZONA

Address: Mayer, Ariz.

Wm. A. Davidson, of Prescott, mgr.; A. L. Blumenauer, supt.

Inc. 1918, in Ariz., to take over the copper property of C. A. Vivian of Humboldt and W. O. Belford of Mayer. A grass root tunnel was driven in expectation of taking out sufficient ore to pay for development, and shipments made in 1919. Reported to be in financial difficulties necessitating reorganization, at last account.

LITTLE GIANT MINE

ARIZONA

Operated by the **Black Giant Mines Co.**, which see.

LITTLE JUDGE MINING CO.

ARIZONA

Address: care Elmo Bollinger, Kingman, Arizona.

Property: in Union Pass section, San Francisco district, Mohave county.

LITTLE TREASURE M. & D. CO. ARIZONA

Address: T. J. Prescott, Phoenix, Ariz.

Property: in Saddle Mountain district, near Christmas, Gila county, said to contain high-grade silver ore.

LOCEY PABST GOLD MINES CO. ARIZONA

Dead. Listed in Vol. XIV.

LOGOS MINES CO. ARIZONA

Dead. Claims re-located and known as the **Ferguson Group**, which see.

LOMA COPPER CO. ARIZONA

Company is a reorganization of the **Loma Prieta Mines Co.**, stockholders getting share for share.

Address: care T. G. Norris, Prescott, Ariz.

Officers: Arthur Hendy, pres.; J. I. Gardner, v. p.; R. H. Burmister, sec.-treas.

Inc. 1918, in Arizona. **Cap.** \$2,500,000; shares \$1 par. Annual meeting, 3rd Monday in Sept. 4,000 Loma Prieta shares sold for \$31 the lot at public auction in New York, Dec. 16, 1920.

Property: 28 claims, 500 acres in the Copper Basin district, Yavapai county, 12 miles S. of Prescott, adjoining the Commercial mine of Phelps Dodge Corporation.

Ore: minerals are primary, chalcopyrite occurring with secondary quartz, and while high-grade bunches of sulphides appear, the deposit will be mined as a mass of low-grade concentrating ore of disseminated character. Samples show an average of about 2% copper, and 36 to 48c silver per ton. One carload shipped in 1917 assayed 8.6% copper, \$1 gold and 1.5 oz. silver per ton.

Development: by 414' shaft with drifts and crosscuts at 400' level.

Equipment: includes steam hoist and compressor.

Is a property likely to develop a large tonnage of low-grade concentrating ore. Idle.

LOMA PRIETA MINES CO. ARIZONA

See Loma Copper Co.

LOMA VERDE MINE ARIZONA

Address: M. N. Andrews, mgr., Humboldt, Ariz.

Property: 2 miles S. E. of Humboldt, Yavapai county, known as the Lone Pine, when it was worked as a gold mine, is said to show copper-gold values, in a small body of concentrating ore. Developed by shallow tunnel and shaft. New equipment reported installed in 1920 and shipments planned to Humboldt smelter.

LONDON-ARIZONA CONSOLIDATED COPPER CO. ARIZONA

Office: 416 Ivestment Bldg., Los Angeles, Calif. **Mine office:** Hayden Junction, Gila county, Ariz.

Officers: J. E. Cowles, pres.; Frank Benedict, v. p.; Robt. J. Simpson, sec.-treas., with W. C. Thomas, J. E. Coffin, J. Knapp, B. P. Cheney and R. E. Sloan, directors.

Inc. Sept. 18, 1913, in Maine, as a merger of the London Arizona Copper Co., London Range, London Shamrock and Ball Copper companies. **Cap.** \$12,000,000; \$5 par; 920,500 shares outstanding. **Bonds:** \$253,000 6% outstanding. Commercial Trust & Savings Bank, Los Angeles, trustee. U. S. Corporation Co., New York, registrar. Annual meeting first Tuesday in October.

Property: 132 claims, 2,100 acres, in the Banner district. (Ray quadrangle), 5 miles N. of Hayden. Claims form a compact group covering an extensive, well-mineralized area.

Geology: the tract shows a series of 1,500' of well-bedded limestone, quartzite and shales resting on a laccolithic mass of diabase; these rocks are broken, faulted and later intruded by dikes and sheets of diorite porphyry, presumably the offshoots of an underlying batholithic mass of

granite material. The ore occurs in contact metamorphic deposits and replacements, especially in the limestone. Much of the ore consists of garnet (andradite, the lime and iron species) intergrown with specular hematite, copper sulphides and a variety of iron-magnesian lime silicate minerals. The copper ore occurs largely in "blanket" deposits, but also in fissures and vertical contacts. The main ore outcrop is 10 to 30' wide and about three-fourths of a mile long, lying between beds of limestone and quartzite. Silver-lead ores do not occur in the contact deposits, but are found in limestone along the dike contacts where contact alteration is not noticeable.

Development: includes the 300' Curtain and 182' Arizona shafts developing the copper and the 90' O'Carroll shaft developing the silver-lead deposits. Total development aggregates 11,000'. The O'Carroll ore bed has been opened by 60 shallow tunnels, covering a distance of 2,000' along the outcrop, and management states ore has been extracted from practically all of them, sulphide ore having been encountered in four.

Production: to date from development, 15,443 tons copper ore, 1,016 tons lead ore, 51 tons zinc ore, 14,437 oz. silver.

The ores are shipped to the Hayden plant of the A. S. & R. Co.

LONDON-ARIZONA COPPER CO.

ARIZONA

Office: 416 Investment Bldg., Los Angeles, Calif.

Officers: Chas. E. Finney, pres.; F. B. Pugh, v. p.; Robt. J. Simpson, sec.-treas., with Edward W. Brooks, D. C. Kurtz, S. F. Parrish, R. E. Sloan and B. P. Cheney, directors.

Inc. 1907, in Arizona. **Cap.** \$10,000,000; \$10 par; 592,260 outstanding.

September, 1913, the company transferred title to its property to the London-Arizona Cons. Copper Co. for 753,045 shares of stock of the latter, which it now holds in its treasury. For description of property see **London-Arizona Cons. Copper Co.**, also under same title in Vol. XI of this Handbook.

LONE STAR CONSOLIDATED COPPER CO.

ARIZONA

Officers: Wm. H. Powers, pres., 209 Washington St., Boston, Mass.; Henry H. Folsom, sec.; A. G. Smith, treas. Chas. B. Spaulding, supt., at last accounts.

Inc. Aug. 6, 1906, in Maine, practically as successor of **Maravilla Copper Co.**, listed in Vol. VI. **Cap.** \$5,000,000; shares \$10 par.

Company controls the **Mineral Mountain Copper Co.**, through ownership of a two-thirds share interest, and, through majority stock ownership, the **Chase Creek Copper Co.** (Vol. XIV.).

Property: 32 claims, includes the Little Clara mine, developed by tunnel and shaft, and the Lone Star mine, in the Gila range, Lone Star district, Graham county, 10 miles N. of Solomonsville. The 900' shaft is said to show a 5' vein of sulphide ore carrying 8 to 10% copper, with fair silver values and a little gold, and also shows stringers of ore giving assays of 5 to 20% copper. Equipped with compressor and drills. Idle several years.

LONGFELLOW EXTENSION COPPER MINING CO

ARIZONA

Address: Clifton, Arizona.

Officers: C. H. Thompson, pres.; W. J. Riley, v. p.; I. N. Thompson, sec.

Property: 38 claims on Chase creek, Greenlee county, near Clifton, developed by 400' tunnel with still some distance to go, to be under the mineralized copper ledge showing at surface. Presumably idle.

LOOKOUT COPPER CO.

ARIZONA

Officers: T. G. Norris, pres., Prescott, Ariz.; A. W. Edwards, v. p.; Geo. D. Morris, sec.-treas.

Property: the Lookout group, 5 copper claims; Mark Twain group, 3 silver-lead claims; Davis group, 8 gold-silver-copper claims, in the Slate Creek district; Bodie group, 13 silver-lead claims, in the Hassayampa district; all in Yavapai county.

Development: a 100' shaft was sunk on the Lookout with short levels at 45, 60 and 100'; 800' north of the shaft are other workings, consisting of a crosscut to the vein and two drifts north and south with a 60' winze and raise to the surface from the north drift.

On the Bodie group of mines a good deal of development work was done: a shaft was sunk some 340', with levels at 55, 85, 170, 230 and 335', all said to show ore. The 3-compartment vertical shaft was started at a central point.

Company work was stopped on all the Lookout properties in 1910. Part of the company's property was operated under lease in 1917. No recent returns. Fully described in Vol. XIV.

LOS ANGELES GEM CO.

ARIZONA

E. E. Peck, pres. and gen. mgr.; C. W. Morrell, sec.-treas., at last accounts.

Property: includes a variscite mine in Esmeralda county, Nev., but the principal property is the George Washington group of 6 claims in Mineral Park, Wallapai district, Mohave county, near Kingman. This property carries a vein of 18 to 24" width, developed by a 143' upper tunnel and a 370' lower tunnel, said to show ore assaying up to 4% copper, 200 oz. silver and \$4 gold per ton. The company mined turquoise from the claims for some years, before developing copper.

Equipment: includes gasoline hoist. Shipping in 1919.

LOS CONQUISTADORES MINING CO.

ARIZONA

Office: Benson, Ariz.

Property: about 14 miles N. of Benson, in Cochise county, developed by 3 shafts, 80', 115' and 118' deep. Gold quartz ore occurs in diorite, pegmatite and schist dikes. Probably idle.

LOST TREASURE MINING CO.

ARIZONA

Out of business. See Vol. XIV.

LOUIS D'OR GOLD MINING CO.

ARIZONA

Reorganized 1916 as **Louis d'Or Mng. & Mlg. Co.**, which see.

LOUIS D'OR MINING & MILLING CO.

ARIZONA

Is a reorganization of the **Louis d'Or Gold Mining Co.**, which company was practically a reconstruction of the **Lost Gulch United Mines Co.** Controlled by **Baldwin Syndicate**, 732 Monadnock Bldg., Chicago, Ill.

Office: 372 Boylston St., Boston, Mass. **Mine address:** C. E. Hart, gen. mgr.-purch. agent, Box 1899, Miami, Ariz.

Officers: I. W. Whitmer, pres.; G. M. Eggleston, v. p.; G. P. Baldwin, treas., with Theo A. Steller, Chas. E. Hart, O. M. Gale and H. S. Campbell, directors. G. O. Swarts, sec.

Inc. Nov. 29, 1916, in Ariz. **Cap.** \$3,000,000; \$1 par; increased in 1921 to \$40,000,000; \$10 par; 2,400,000 shares issued and held in escrow to Jan. 1, 1922.

Property: 33 claims and fractions. 500 acres, partly patented, in Globe district, said to show disseminated chalcocite ore in porphyry, the ore zone underlying 180 acres, with a fairly uniform thickness of 400'. Entire mass is reported to average 1.15% copper.

Development: totaled 9,000' of drilling for 12 holes. A new 2-compartment shaft was down 225', October, 1921.

Company reports \$123,000 available for immediate needs and official announcement is reported to have been made, November, 1921, that \$6,000,000 is to be spent on a railroad, development and a mill of 12,000 tons daily capacity.

On the assumption that the above description is correct in every detail, this undertaking seems to be worthy of serious consideration, and might even warrant the very large capitalization, but to develop what amounts to some 250,000,000 tons of ore with but 12 bore holes is not conservative practice and certainly requires imagination.

LOUISIANA-ARIZONA COPPER MINING CO. ARIZONA

Address: R. A. Clampitt, Bisbee, Ariz.

A silver-lead prospect, 6 miles west of Bisbee, Cochise county.

LOWELL GOLD MINING CO. ARIZONA

Formerly **Horseshoe Basin Gold Mining Co.**

Mail returned address to A. F. Borrego, sec.-treas., Bisbee, Ariz. **Mine:** Quijotoa, Ariz.

Officers: J. L. Winters, pres.; J. P. Williamson, v. p.

Cap. 200,000 shares.

Property: 6 claims in the Quijotoa Mtns., Pima county, with a 28" vein said to assay from \$6 to \$28 in free milling gold. Developed by numerous pits and an 80' prospect shaft. Idle and probably dead.

LOWER CALIFORNIA METALS CO. ARIZONA

Plant sold and company defunct. See Vol. XIV.

LUCKY BOY MINING & MILLING CO. ARIZONA

Office: 581 I. W. Hellman Bldg., Los Angeles, Calif. **Mine office:** Oatman, Ariz.

Officers: F. W. Remy, pres.; N. A. D'Arcy, v. p.; W. S. Tarbell, sec.-treas.-gen. mgr.; R. A. Watson, supt.

Inc. 1915, in Ariz. **Cap.** 1,000,000 shares; 10c par; 775,000 shares outstanding. Stock listed on San Francisco and Los Angeles Exchanges.

Company received permit to sell 25,000 shares at 5 cents each in Dec., 1920.

Property: 200 acres in the Tom Reed district, Mohave county, adjoining the Telluride on the S. and the Tom Reed on the S. W., said to show gold ore occurring in stringers of quartz and calcite. The shaft on the Friday claim is 425' deep. Crosscut lacks about 100' to cut vein. The Friday, Lucky Boy, Lucky Boy Annex and Hackshaw No. 6 claims reported April 1, 1919, leased on a royalty basis for a period of 5 years. In July, work was proceeding on the 450' level, but in December, 1919, operations were reported suspended.

Equipment: includes 25 h. p. hoist, 200 cu. ft. air-compressor, 35 h. p. engine, compressor and jackhammer drills. Property considered promising. Idle in 1921.

LUCKY SAM MINING CO. ARIZONA

Mail returned from former office, 678 I. W. Hellman Bldg., Los Angeles, Calif.

Officers: W. S. Tarbell, pres.; G. M. Gilbert, v. p.; Geo. E. Fairhead, sec.-treas.; L. C. Randall, supt.

Inc. 1915, in Ariz. **Cap.** \$100,000; shares 10c par.

Property: 12 claims, 235 acres, in the Tom Reed district, Mohave county, carries 2 main parallel veins, 4-6' wide. Developed by 2 shafts, deepest 163'. A prospect and probably idle.

LUCKY SEVEN GOLD MINING CO. ARIZONA

Probably dead. See Vol. XIV.

LUCKY STRIKE MINING CO. ARIZONA

Address: J. S. Odorn, sec., Prescott, Ariz.

Property: 16 claims, including the Lucky Strike mine, in Hassayampa district, Yavapai county. Ore contains gold-silver-lead and iron.

Development: by crosscut tunnel, in 240', April, 1921.

LUCKY STRIKE MINING CO. ARIZONA

Office: 415 National Bank of Arizona Bldg., Phoenix, Ariz.

Officers: J. C. Brown, pres.; Arthur Luhrs, v. p.; A. G. Hulett, sec.-treas.

Inc. 1917, in Ariz. **Cap.** \$1,200,000; \$1 par.

Property: 160 acres, including the Old Stein property, in the Walnut Grove district, Yavapai county, 9 miles S. E. of Kirkland, said to have an iron vein, 3' wide containing gold, silver and from 1.5% to 17% copper. Developed by 160' shaft with 170' of workings. Gold values are about \$1.80 per ton. No recent returns.

LYON COPPER CO.**ARIZONA**Reorganized as **Arizona Merger Gold & Copper Co.**, which see.**MADIZELLE MINING CO.****ARIZONA****Address:** 410 Fleming Bldg., Phoenix, Ariz.**Officers:** G. U. Young, pres.; E. C. Moore, v. p.; G. N. Cunningham, sec.-treas.; above are directors.**Inc.** 1905, in Arizona. **Cap.** \$500,000; \$1 par.**Property:** 25 patented claims, 2½ miles N. of Copper Basin, Yavapai county, and 6 miles W. of Prescott, said to show a quartz vein with schist hanging and porphyry foot-wall. Ore carries copper as chalcopryrite and bornite, with gold and silver values, and assays from \$12 to \$40 per ton, 25,000 tons and 5,000 tons in reserve, respectively.**Development:** by tunnels from shafts, 500, 700, 800' and 130' long, with total of about 5,000' of workings.**Equipment:** includes steam hoist, compressor, pump, steam and gas power, and 5-stamp mill.**MAGMA CHIEF COPPER CO.****ARIZONA****Address:** Box 247, Mesa, Ariz.**Officers:** Geo. A. Johnson, pres.; K. Pomeroy, v. p.-gen. mgr.; F. T. Pomeroy, sec.-treas., with D. D. Moffat and W. T. MacDonald, directors.**Inc.** Oct. 4, 1913, in Arizona. **Cap.** \$2,000,000; \$1 par; 1,750,987 issued. Stock offered at 25c September, 1920. Annual meeting, 3rd Monday in September.

Receipts for 5 years were \$285,206; balance Aug. 25, 1921, was \$122. Current liabilities over assets were \$5,013.

Property: 17 claims in Pioneer district, Pinal county. Examined by W. H. Hollis, F. M. Gordon, C. A. Kumke. The work on this property by tunnels and drill-holes gave disappointing results.Company is now actively developing **Sombrero Butte Copper Co.'s** holdings, in the Copper Creek district, consisting of 9 claims, near Mammoth, Pinal county, which were acquired in December, 1918.**Development:** by 300' shaft with levels at 120, 200 and 300'; an adit connects with shaft on the 120' level; in 8 months during 1920, extensions totaled 665', largely in ore. Ore shipments were made in 1919 and 1920; shipping ore carries 14-28% copper and up to 10 oz. silver; copper yield in 1920 was \$8,570; total ore sales have been \$14,615. Available ore is said to total 250,000 tons, averaging 9% copper and 6 oz. silver.**Equipment:** includes hoist and 50 h. p. compressor.

The Superior property was energetically and well prospected, but is now closed down, probably for good. The Sombrero Butte mine appears to have the earmarks of a good producing property.

Operations were suspended Oct. 26, 1920. One year later a part of Sombrero Butte property was sold by the sheriff to satisfy a judgment, and plan to reorganize and refinance company was in contemplation, and to this end stockholders' proxies have been solicited on two different occasions, the last on Dec. 1, 1921.

MAGMA COPPER CO.**ARIZONA****Office:** 14 Wall St., New York. Mine office: Superior Pinal Co., Ariz.**Officers:** Chas. F. Aver, pres.; Theo. Schulze and Wilbor Judson, v. p's H. T. Dodge, sec.-treas.; with Francis J. Oakes, Jr., John F. Alvord and C. A. Corliss, directors. T. A. Mackenzie, asst. sec.-asst. treas.; W. C. Browning, gen. mgr.; E. H. Lundquist, mine supt.; John H. Wattson, mill supt.; Erich Weber, pur. agt.**Inc.** May, 1910, in Maine. **Cap.** \$1,500,000; \$5 par; 249,050 shares issued if all Superior shares are converted into Magma. Transfer agent, Guaranty Trust Co., New York. Registrar, Bankers' Trust Co., New York. Listed on New York Curb.

Controls the **Patagonia Superior Copper Co.**, which see. Company owned also majority interest in **Superior Arizona Copper Co.** and, in October, 1920, its property and assets were acquired. Shareholders of the Superior company were entitled to receive \$2 per share in cash, or during a period of 90 days from Oct. 20, 1920, they could exchange Superior shares for those of Magma on the basis of 20 shares of Superior for 1 of Magma. Also, has joined other Southwest companies in capitalizing the **Apache Powder Co.** by the purchase of \$6,000 of stock; a plant for the manufacture of powder is to be erected at Benson, Ariz.

Dividends: quarterly of 50c per share began September 30, 1915, were continued quarterly during 1917 and 1918 with an extra 10c Red Cross dividend during 1917. None since Jan. 6, 1919.

Property: in Pioneer district, Pinal Co., 531 acres, formerly known as the Silver Queen mine. Company owns a compact group of claims of 1,772 acres, of which 480 acres are patented, also 395 acres of mill sites, of which 31 acres are patented. Total, includes 358 acres of Superior Arizona, and other acquisitions of 1919 and 1920.

Geology: The known orebodies of the mine occur in a strong fault fissure filled with porphyry and cutting diabase, quartzite and limestone. The ore, with some bornite, is mainly chalcocite. Chalcopyrite appears on the 1,400' level and in the diamond-drill holes. On the east end the vein is wide and leached, and is not considered to be of commercial grade, although on the 1,500' level, a 5' orebody has been followed for 1,200', assaying 1.71% copper, 6.1 oz. silver and 0.025 gold.

On Superior ground, ore occurs along contacts of Upper and Lower Carboniferous limestones and especially where the bedding fault is cut by a cross fissure. Ore is oxidized to greatest depth developed and consists largely of iron and manganese oxides, though residual sulphides occasionally appear.

Development: on Magma, by old 800' shaft, two new shafts, 1,838 and 2,082' deep (Jan. 1, 1920) and a 1,628' lower main tunnel on 500' level connecting with all 3 shafts. Levels have been opened at 500', 650', 725', 800', 1,000', then at 100' intervals to 1,800'. No. 3 will be main working shaft and tunnel will handle shipping ore. A ventilating shaft (No. 4), 1,000' E. of No. 2, had reached 189', December, 1920. Extensions in 1919 and 1920 were 11,395 and 6,515', respectively; total workings, Jan. 1, 1921, 64,238' Consider-

able exploratory work is done by drilling also, and in 1917 commercial ore was indicated at depth of 2,200; and in 1919 one hole found 19' of ore, assaying 5.42% copper and 2.4 oz. silver.

In 1919, work was done on all levels between 1,200' and 1,800'; width of orebody was 5'8" to 13', and length was 1,000' on the 1,600' and 800' on the 1,800' level; assays showed 4.9 to 10.8% copper and 2.1 to 5.1 oz. silver. In 1920, length of orebody was opened for an additional 300' on the 1,600' and for 600' on the 1,800' level; the average width on the latter was then 21.5'. **On Superior**, the principal working is the Charlton tunnel, which for 2,000' follows the mineralized fracturing along the bedding plane between Devonian limestone and quartzite. This tunnel is 130' vertically below the Holt tunnel, is connected with the latter by a 165' winze on the dip of the vein and is 3,000' long, showing ore assaying up to 30% copper. At the northern end of this long tunnel, there is an incline shaft sunk along the bedding plane at 26° inclination for 1,800' with short levels at various intervals.

Some development was done during 1917 and 1918, when the production was 768,673 lb. copper from 4,130 tons of 10.08% ore, mainly by lessees; 90 tons of 43.78% manganese ore also was shipped. Some production is reported for 1919 also.

Development of Patagonia-Superior ground was not encouraging and work was stopped in November, 1920.

Ore reserves: estimated Jan. 1, 1921, as 827,000 tons copper sulphide ore assaying 5.0% copper, 3.0 oz. silver and .02 oz. gold per ton; 20,000 tons of lead-zinc ore, assaying 13.5% zinc, 2% lead and 12 oz. silver per ton.

Equipment: is electrical throughout but includes a 160 h. p. steam hoist, now driven by compressed air, at No. 3 shaft, a Nordberg-Westinghouse hoist good for 3,000 depth, 2 air compressors one of 1,500, the other of 900 cu. ft. capacity, driven by a 225 h. p. motor and 3 vertical Aldrich pumps, each driven by a 75 h. p. motor.

In August, 1914, the company completed a concentration and flotation mill, having a monthly capacity of 6,000 tons. Mine and mill are connected by a 2,600' aerial tram. The Callow flotation process is used in the mill and treats the tailing from the finishing tables. Recovery averages 94%. Ore and concentrates are shipped to the plant of the A. S. & R. Co. at Hayden, Ariz. Alleging infringement of its flotation patents, Minerals Separation started suit against Magma early in 1919. Mill capacity was increased in 1919-20, and further increase is contemplated..

The company owns substantially all the shares of the **Magma Arizona Railroad Co.**, completed in 1915, a 31-mile narrow gauge road from Superior to Magma Junction, a station on the Arizona Eastern R. R. This line met expenses in 1919 and 1920.

A 15-mile electric power line, with steel towers, connects with the line from Roosevelt Dam at Miami. The company has a contract for several years with the U. S. Reclamation Service for electric power, at an approximate cost of \$49 per year and has constructed a 32-mile power line, connecting at Goldfield.

Production: in 1920 was 8,854,917 lb. of copper, 303,258 oz. silver, 4,437 oz. gold. The average selling price of the copper produced was 18.-02c. per lb. and cost 18.295c. (not including depletion), compared with 14.-92c. in 1919 and 16.425c. in 1918.

Crude ore shipped was 9,219 tons, assaying 17.105% copper, 8,389 oz. silver, and \$2.21 gold per ton. Mill ore; 91,653 tons, averaged 3.704% copper and 2.911 oz. silver. Tailing contained 0.382% copper and 0.38 oz. silver per ton.

Total gross production has been 62,689,494 lb. of copper, 2,946,250 oz. silver and 27,196 oz. gold from 560,063 tons of ore. Except for development, operations ceased on March 31, 1921, to await better market conditions.

Magma is regarded very favorably. It is one of the lowest cost copper producers of this country.

MAGMA EXTENSION COPPER MINING CO. ARIZONA

Mail returned unclaimed from former address: 110 N. First Ave., Phoenix, Ariz. Mine at Superior, Ariz.

Officers: John Cowan, pres.-treas.; Geo. A. Mauk, v. p.; H. F. W. Lampker, sec. with J. W. Spray, directors

Inc. 1917, in Arizona. **Cap.** \$1,500,000; shares \$1 par.

Property: 135 acres in Pioneer district, Pinal county, between the Magma Copper, and Silver King mines, geological conditions are reported to be similar.

No information received since organization.

MAGMA QUEEN COPPER CO. ARIZONA

Officers J. C. Callaghan, C. R. Bone and G. A. Mac Donald of Phoenix incorporators

Inc. Dec. 2, 1916, in Arizona. **Cap.** \$1,500,000; shares \$1 par.

Property: 10 full and 2 fractional claims, 208 acres, known as the Black Diamond and Magma King groups, at the northern end of the Pioneer or Superior district, Pinal county.

Geology: the Black Diamond ore deposit is a gently dipping bed of garnetized limestone, 12' to 20' thick, containing scattered grains and clusters of oxidized copper ore. This occurs at the contact between the limestone series of the region and the Silver King stock of granitic rock. The ore is flecked and spotted with stellate masses of micaceous hematite. Selected material for shipment shows 15% copper, 34.5% insoluble and 25% iron, but the average copper content of the deposit, so far as opened, was less than 2%. The Black Diamond orebody is 225' long. Other claims show geological conditions which warrant prospecting work.

Development: work is limited to an incline, 48' long, and various open-cuts. The 450' Black Diamond tunnel, 100' below the ore bed, had not reached ore at last accounts.

Regarded as worthy of prospecting, at points not thus far attacked. Presumably idle.

MAGMA RAY COPPER CO. ARIZONA

Address: A. H. Woollacott, 261 I. W. Hellman Bldg., Los Angeles, Cal.

Property: 420 acres, known as the McSherry group, near Ray Junction, Pinal county. Probably idle.

MAGMA-SUPERIOR COPPER CO. ARIZONA

Address: care of Samuel Newhouse, Salt Lake City, Utah.

Property: is south of, and adjoins, what was originally known as the Lake Superior & Arizona claims, now owned by Magma Copper, at Superior, Pinal county. Geological conditions said to be favorable. Idle several years.

MAGMA SURPRISE MINING CO. ARIZONA

Idle

Officers at last account: G. J. Stone, pres.; V. B. Andreas, v. p.; J. L. Boyce, sec.-treas., with R. Krakauer and P. Howle, directors. **Cap.** \$1,000,000; \$1 par.

Property: 21 claims, 1½ miles S. W. of Superior, Pinal county.

MAGMATIC COPPER CO. ARIZONA

Address: 514 Mill Ave., Tempe, Ariz. Mine at Superior, Ariz.

Officers: J. C. Goodwin, pres.; T. J. Goodwin, v. p.; G. A. Goodman, sec.-treas.

Inc. 1917, in Arizona. **Cap.** \$100,000; shares 10c. par.

Property: 21 claims, 440 acres, 1½ miles S. of the Magma Copper Co. mine, Superior, Pinal county.

Geological conditions are similar to the other parts of the district. Shaft 140' deep is said to have passed through 20' of rock carrying 18% of manganese, 34% of iron, with small gold, silver and copper. This shaft was being deepened at last account.

MAGNATE COPPER CO.**ARIZONA**

Address: M. Brooks, treas., Liberty Bldg., Philadelphia, Pa.

Officers: C. Z. Jones, pres.; Carl M. Kneass, v. p.; J. R. Richards, sec.; Dr. T. M. Smith, gen. mgr., 44 W. Congress St., Tucson, Ariz.

Inc. Nov. 19, 1916, in Del. **Cap.** \$5,000,000; \$1 par; 2,499,500 in treasury. Empire Trust Co., New York, transfer agent.

Property: 29 claims, in Twin Buttes district, Pima county, 32 miles from Tucson and 4½ miles from railway at Twin Buttes. Reported to have option on Lucky Strike and Mesa mines.

Geology: surface shows appearance of producing "porphyry-copper" areas. Basal rock is a grano-diorite of varying grain. Most of the area is covered by a dense fine grained rock very greatly altered, but probably monzonite. Mineralization proceeded along dominant N. E.-S. W. fractures which are filled with quartz, pyrite and chalcopyrite. Erosion with oxidation of the pyrite, forming acid water, further changed the altered rock and formed a deposit of disseminated ore whose extent is not yet determined.

Development: by shafts, 150', 118' and 40' deep, also by 3 drill holes. From the 118' or No. 3 shaft, levels were driven at 35' and 85' depths with 625' of workings. The deposit thus far developed shows veins and stringers of highgrade copper glance as a network in the disseminated material. Careful sampling showed 1½ to 2½% copper, 1½ oz. silver per ton. Ore contains a cupriferous turquoise.

Diamond drilling has gone some distance in confirming favorable predictions based on surface examination. Holes No. 1 and 2, indicate a blanket deposit 65' thick; hole No. 3 is reported to show over 100' of ore. Assays ran from 1.77 to 2.2% copper as averages. The overburden is slight. Only very little development work was done 1919-21.

MAGWOOD COPPER MINES CO.**ARIZONA**

Address: Geo. W. Magwood, pres., 304 Owl Drug Bldg., San Diego, Calif.

Inc. 1920 **Cap.** 2,000,000 shares; 450,000 shares reported underwritten by the Standard Securities Co., of New York.

Property: 10 claims, formerly owned by the Eva Cons. M. & L. Co., in the Wickenburg district, Maricopa county. There are said to be 8 veins traversing the property. About 500' of work has been done, and some \$26 ore opened. Mine had been idle for several years.

MAJESTIC COPPER CO.**ARIZONA**

Office: First National Bank Bldg., Kansas City, Mo. **Mine office:** Oracle, Pinal county, Ariz.

Officers: E. A. Hosier, pres.; W. A. Neiswanger, v. p.; E. T. Wilder, sec.-treas.

Inc. as Inspiration Mining Co., but sold its property, in the Globe district, to the Inspiration Copper Co., and changed its name, March, 1909, to present title. **Cap.** \$3,000,000; shares \$1 par; \$2,707,000 outstanding; bonds authorized, \$25,000; \$14,350 outstanding.

Former property: 6 claims near Oracle, on which assessment work was done for several years, has been abandoned. Company received from the sale of the Inspiration mine about \$1,500,000. Inactive since 1917.

MALAPAI MINING CO.**ARIZONA**

W. R. Shanafelt, mgr., Kirkland, Yavapai county, Arizona or Canton, Ohio.

Property: near Kirkland, developed to depth of 320'. Ore contains gold.

MAMMON COPPER CO.**ARIZONA**Formerly the **Mammon Gold & Copper Co.****Address:** W. M. Boyce, mgr., Parker, Yuma Co., Ariz.**Officers:** E. S. Osborne, pres.; J. M. Patterson, v. p.; F. M. Hall, sec.; Geo. E. Farrell, treas., 69 E. Mohawk St., Oswego, N. Y.**Property:** 32 claims in Cienega district, Yuma county 10 miles E. of Parker. In 1904 several carloads of oxidized copper ore were mined. Property passed through several hands until present owners acquired it.**Geology:** ground largely covered with basalt. Schists show in water-courses and on lower slopes. The copper and accompanying hematite, occur in distinct but small fractures, also in a persistent bedded or blanket deposit, apparently conformable to the overlying gneiss. The bedded vein has been the source of the ore mined, and must be relied upon as the main source of ore. Where fissures cross the orebed, ore occurs in fair quantities.**Development:** by 178' shaft and 2,000' of tunneling said to have opened up a 13' vein of 10% copper ore. Churn drilling was begun in 1917 and continued to depth of 420'. In 1920 a road was built to the east side of the property and diamond drilling is planned for 1921.**Production:** about 500 tons, shipped at various times, ore averaging well in copper.

Is a property worthy of careful exploration by drilling.

MAMMON GOLD & COPPER CO.**ARIZONA**Name changed in 1920 to **Mammon Copper Co.**, which see.**MAMMOTH COLLINS MINE****ARIZONA**Owned by **Saint Anthony Mining & Development Co.**, which see.**MAMMOTH DEVELOPMENT CO.****ARIZONA**Reorganized as **St. Anthony Mining & Developing Co.**, which see.**MANHATTAN DEVELOPMENT CO.****ARIZONA****Idle. Address:** W. G. Rice, sec.-treas., Post Office Blk., Houghton, Mich., J. H. Rice, pres.**Inc. March, 1905, in Arizona. Cap.** \$200,000; \$10 par; \$5.50 paid in.**Property:** 37 claims, 600 acres, owned in fee, in the California district, near Paradise, Cochise county, covers upwards of 2 miles of the outcrop of a mineralized zone lying W. and N. of the holdings of the **Chiricahua Development Co.****Development:** by several shallow shafts, deepest 80', and a 450' cross-cut tunnel, latter showing leached ore and a little high-grade ore, with indications of persistent values at greater depth.In 1913, company purchased the **Arnold Mining Co.** property, near Santa Cruz, Sonora, for \$88,000. This property is developed by a 300' shaft and has shipped 12% ore to the Cananea smelter. The company's previous operations have been mainly in the Yaqui region of Sonora.**MANIFEST COPPER & SILVER CO.****ARIZONA****Address:** Box 494, Globe, Ariz.**Officers:** W. Kitmiller, pres.; W. R. Henry, v. p.; W. W. Crawford, sec.-treas., with J. W. Morrell and (Mrs.) C. Kitmiller, directors.**Inc. in Arizona. Cap.** \$3,000,000; \$1 par; 35,000 outstanding.**Property:** 43 claims in Pioneer district, Pinal county, 20 miles from Globe and 12 miles from Hayden. Was silver producer in the 80's.**Development:** to 85' depth, totaling 2,000 feet.**Geology:** sulphide ore occurs in a contact fissure in quartzite. It is reported to carry 10 to 30 oz. silver, \$1.50 gold, 10 to 35% lead, and 1½ to 6% copper.

Under bond in 1921 to Beard & Komiski, who erected a 10-ton concentrating plant.

MANITOU HILL COPPER CO.**ARIZONA**

Idle and probably dead. Mail returned unclaimed, 1919.

Company was a reorganization of the Pinto Creek Mining & Smelting Co., and by consolidation later acquired the property of the Five Points Copper Mining Co. Fully described in Vol. XIV.

MANSFIELD MINING & SMELTING CO.**ARIZONA**

Office: 317 Ridge Bldg., Kansas City, Mo. **Mine office:** Patagonia, Santa Cruz county, Ariz.

Officers: Frank D. Reesor, pres.; H. A. Sutermeister, v. p.; C. E. Sweet, sec.; Chas. L. Cookson, treas.; preceding with Harry J. Richards, A. W. Safford, and A. E. White, directors.

Inc. May 26, 1906, in Arizona. **Cap.** \$8,000,000; shares \$1 par; shares issued 7,156,905. Bonds, \$100,000 authorized, at 6%, all outstanding. Annual meeting second Monday in January. Company owns no mining property but in reorganization proceedings, 1914, acquired stock interests in Ruby Copper Co. and Southern Arizona Mining Co., now the Cons. Southern Arizona Mining Co., which see. Also see Vol. VIII and XI. Copper Handbook, for early history.

MARICOPA MINES CO.**NEVADA-ARIZONA**

Dead. Fully described in Vol. XIV. Property now owned by Austin Nevada Mines Co., Nevada, which see.

MARS CONSOLIDATED CO.**ARIZONA**

Probably dead. **Address:** care F. J. Webber, Colorado Springs, Colo. Company is the successor of the Heckley Gold & Copper Mining Co.

Property: 13 claims, in 3 groups, on Copper Hill, in the Black Rock district, Yavapai county, shows 3 veins developed by a 268' tunnel.

MASCOT COPPER CO.**ARIZONA**

Office: 71 Broadway, New York. **Mine Offices:** Dos Cabezos, Cochise Co., Ariz.

Officers: T. N. McCauley, pres.; D. S. Stevenson, v. p.-treas.; R. V. Dixon, v. p., H. J. Jilbert, J. W. Phillips, N. Poon Chew, A. Johnson, A. W. Rathbun, O. Rich, A. R. Orr, E. A. Ely and F. M. Utt, directors. J. W. Prout, Jr., gen. mgr.

Inc. July, 1907, in Arizona. **Cap.** \$15,000,000; \$10 par; outstanding, 1,412,200 shares.

Financial statement dated Aug. 31, 1920, shows current assets, \$12,733 and current liabilities, \$472,780, including loans, \$218,355, and matured Bond Interest coupons, \$193,140.

Property: 56 claims, 22 patented, 1,100 acres, about 800 acres being classed as mineral lands, in the Dos Cabezos district. Company also owns a town site near Dos Cabezos, and miscellaneous lands, including placer claims, total holdings over 1,100 acres.

Property shows limestone near a granitic area, intruded by diabase dikes and quartz porphyry with a covering of rhyolite, on part of the ground. The limestone shows in the lower hills on the south. Granite constitutes the two pillars known as Dos Cabezos. The ore occurs in lenses in contact deposits between altered lime and diabase. In many instances chalcopryrite is found in the diabase magma and shows a metasomatic replacement. Ores carry chalcopryrite in a gangue of contact minerals with 3 to 20% copper, the average being 5%, and small gold-silver values.

Development: by the 450' Oregon shaft, and 2 tunnels, longest the 1800' Consolidated tunnel, connecting with the shaft at the 4th level. Total underground openings aggregate 33,000', and ore in sight is estimated by the company at about 1,000,000 tons, containing 5% copper. About 32,500' of diamond drilling has been done in various parts of the property.

Equipment: includes 100-ton concentrating plant, two 250-h. p. distillate engines, two 12-drill air compressors, machine shop, electric lighting plant, smithy, telephone system and boarding house, with about 80 buildings. The company finished building the Mascot & Western R. R. a 15-mile line connecting the town of Mascot with the S. Pac. R. R. at Willcox, Arizona. A 10-

000' aerial tram, capacity 1,200 tons per day, is used for carrying ore and supplies between mine and railway.

Production: 1918, 13,276 tons containing 3% copper and 0.5 oz. silver. Property is reliably reported as promising. In 1920, **Central Copper Co.** of Arizona took a 20-year lease on holdings of the Mascot Copper and is actively developing both properties.

MASCOT MINING CO.

ARIZONA

Letters returned from last address: 1318 Majestic Bldg., Detroit, Mich. Company no: favorably regarded. See Copper Handbook, Vol. XI. for full description of properties. Presumably dead.

MATT PERRY MINING & MILLING CO.

ARIZONA

Owned a gold property, near Quijotoa, Pima county, 80 miles west of Tucson; is reported under bond and lease to A. F. Borrego, and J. R. Hibbs, at last account. Property has an old mill which needs overhauling.

MAVERICK COPPER CO.

ARIZONA

Mail returned from former address: Florence, Pinal county, Ariz.

Property: the Iron Spring mine, 35 claims shows a strong outcrop, carrying finely disseminated chalcocite, estimated to average 3% copper.

Development: by a shallow shaft and a number of prospect pits and shafts. Annual assessment work only has been done since 1910, when the Copper Queen Co. relinquished its \$100,000 bond on the group.

MAVIS MINE

ARIZONA

Address: F. G. Heath, National Bank Bldg., Long Beach, Cal.

Property: 5 patented claims in the Cienega district, Yuma county, 10 miles N. of Parker, adjoining the Empire Arizona Cons. Co.

Development: slight. A 25' shaft furnished 14 tons of ore running 19 to 30% copper, and \$15 to \$18 gold

MAYER ORE PURCHASING CO.

ARIZONA

Address: P. O. Box 134, Mayer, Ariz. H. A. Wagner, mgr.

Cap. \$300,000; \$1 par; all issued,

Does a general custom sampling business. Also buys ores, operates a custom concentrator, assay-office, ore-testing plant, etc., and is installing a leaching department for oxidized copper ores.

Company leased and remodelled the Gray Eagle mill, to which all shipments are consigned.

MAYER SMELTER CORPORATION

ARIZONA

Dead. Fully described in Volume XIV. Plant sold at foreclosure sale in 1920 to John Borg, who deeded the property to H. A. Wagner, of the Mayer Ore Purchasing Co., Mayer, Arizona.

MAY MINING CO.

ARIZONA

Office: Sidney, Ohio. **Mine:** Mayer Ariz.

Officers: M. L. Heffelman, pres.; J. D. Barnes, sec.; H. C. Heffelman, mgr.

Cap. \$200,000 \$1 par.

Property: 2 patented claims, in Big Bug district, Yavapai county, adjoining the Blue Bell on the north. Copper ore occurs in a fissure vein in schist, claimed to be 2' wide and to be a continuation of the Blue Bell lode. Developed by 200' shaft with 700' of workings. Has been idle of recent years. Appears to be worthy of further exploration and development.

MAZATZAL MINING CO.

ARIZONA

Former address: Globe Ariz.

Officers at last account: W. C. Stanley, pres.; A. J. Crossley, sec.-treas., with G. B. Peart and W. Thomas, directors.

Inc. Jan. 25, 1917, in Arizona. **Cap.** \$3,000,000; \$1 par; 1,029,000 issued

Property: 65 claims, 1,300 acres, in Mazatzal district, Gila county, said to show gold-silver-copper deposits in granite, schist and porphyry. Veins dip 70° N. E., and pitch N. W. Ore is both oxide and sulphide.

Development: by 1,000' tunnel, in which 3 fissure veins were cut varying from 1 to 3' in width, and showing copper ore assaying from \$4 to \$125 per ton. Reserves reported fairly large.

Presumably idle since 1918.

McCRACKEN SILVER-LEAD MINES CO.

ARIZONA

Office: 622 Higgins Bldg., Los Angeles, Cal. **Mine P. O.:** Yucca, Ariz. Mines at McCracken, Ariz.

Officers: W. B. Van Horne, pres.; H. H. Mather, v. p.; J. H. Hoffman, sec.-treas.; Leonard Hoffman, gen. mgr.

Cap. \$1,500,000; \$1 par; 1,200,000 issued.

Property: owns the Atlanta Extension group of 10 claims and controls the adjoining Ostego mine, in Greenwood district, Mohave county.

Development: by tunnels and 300' shaft with 2,500' of drifting. Company estimates ore reserves of about 400,000 tons, worth \$15 per ton. Mill ore contains from 5 to 15% lead and 6 to 15 oz. silver per ton. Two car-loads crude ore shipped are reported to have returned 71% lead, 4.3 oz. silver.

Equipment: includes air-compressor, hoisting engine and 100-ton mill, employing dry concentration. The first shipment of concentrate was made late in September, 1919.

McKINLEY MINING & DEVELOPMENT CO.

ARIZONA

Fully described in Vol. XIV. Company without funds, was reorganized 1920 as **Capital Copper Co.**, which see.

McMAHON GROUP

ARIZONA

Address: Zonia, via Kirkland, Yavapai County, Ariz. Owned by C. H. McMahon and brothers, under option to Zonia Copper Co., care of P. Gibbon Spilsbury, P. O. Box 1123, Phoenix, Arizona.

Property: the Cuprite mine and a group of 8 claims, south of Zonia. Ore zone reported as 700' long, containing 8 shoots 50 to 75' long and 3 to 20' wide, assaying 2 to 9% copper in oxidized zone.

Development: consists of several shallow shafts. Shipments were made in 1919 to Douglas, Arizona.

McMILLEN-STONEWALL MINING CO.

ARIZONA

Address: Globe, Gila county, Ariz. V. Y. Smith, pres.-gen. mgr.; C. N. Lightle, sec.-treas.

Inc. March, 27, 1907, in Arizona. **Cap.** \$1,000,000; shares \$1 par.

Property: 34 claims, in the Richmond Basin, 16 miles N. E. of Globe, Gila county, carry 3 miles of the strike of the Stonewall Jackson vein, of 25 to 35' average width. It includes the Stonewall Jackson mine, worked 1876-83, with an estimated production of about \$500,000 of silver ore, of high average grade.

Development: by the 300' three-compartment McMillen shaft and the old 600' Stonewall Jackson shaft, latter showing no stoping done below 230'. The mine is said to have considerable ore carrying 5 to 50 oz. silver per ton, with about 40,000 tons of low grade silver ore on the old dumps.

Equipment: includes an old stamp mill and a small cyanide plant. A full and favorable report on the property was made May, 1912, by R. B. Wagner.

In 1914, property was bonded to G. H. Hayes and explored by diamond drilling, which proved unsatisfactory owing to the broken nature of the ground. No recent reports. Mail unanswered. Probably idle.

MERRIMAC MINE.

ARIZONA

Owned by Geo. Cleeland of Philadelphia, Pa., but bonded to J. C. Rankin in June, 1917. A. W. Henning, supt.

Property: a mile west of Chloride, Mohave county, is developed by 400' incline and new shaft sunk in 1917. The vein is said to be 22' wide, and cuts through porphyry and diorite. Ore carries gold, silver, lead and zinc.

Production: totaled \$175,000 to end of 1916. Nothing reported since then.

MIAMI CONSOLIDATED MINES CO.**ARIZONA**

Address: P. O. Box 1446, Globe Ariz.

Officers: R. L. Pinyan, pres.; with J. A. Pinyan, J. H. Thomson, Theo. Phillips, G. J. Davis, Irva Linley, J. B. Kendall and E. G. Schulze, directors. Chas. W. Slack, sec.

Inc. 1916, in Arizona. Cap. \$2,500,000; \$1 par; 1,336,000 issued.

Property: about 200 acres S. of and adjoining Inspiration Consolidated, Southwestern Miami, and Inspiration Needles properties at Miami. Originally held by 19 different owners. In 1915, prospectors shipped 272 tons of 2.6 to 5% copper ore, in 1916, 100 tons of rich ore, and previously 500 tons of 3 to 6% ore, all coming from two well defined areas, north-central and southern.

Development: churn-drilling was continued during 1918. No. 1 hole down about 1,000', is said to have passed through sulphide ore at 420'; No. 2 found sulphides at 585', this ore understood to be an extension of the Live Oak ore body of the Inspiration Co. No. 3 hole reported to have struck chalcocite ore.

Property warrants further drilling to determine extent of orebody. Only assessment work being done owing to lack of funds.

MIAMI COPPER CO.**ARIZONA**

General offices: 61 Broadway, New York; Du Pont Bldg., Wilmington, Del. Mine office: Miami, Gila county, Ariz.

Officers: Adolph Lewisohn, pres.; J. Parke Channing, v. p.; cons. eng.; Sam A. Lewisohn, treas.; with J. H. Susmann, Wm. H. Nichols, Walter T. Rosen, E. H. Westlake, F. W. Estabrooke, B. Hochschild and Theo. L. Herrmann, directors; Herman Cook, sec.; F. W. MacLennan, mgr.; J. H. Hensley, Jr., mine supt.; F. W. Solomon, mill supt.; R. B. Yerxa, asst. mill supt.; F. J. Pearce, pur. agt.; W. F. Williams, chief clerk; Arthur Stonham, auditor.

Inc. Nov. 30, 1907, in Delaware. Cap. \$4,000,000; shares \$5 par; originally \$3,000,000 increased Nov., 1909, to \$3,500,000, and again increased Aug., 1910, to present amount. Of this last increase in capitalization, 60,000 shares were offered to stockholders at \$18 per share. Of the issued stock, 300,000 shares were given, Nov. 1907, in payment for lands; 20,000 share were issued April, 1908, at \$5 per share; 100,000 shares were issued Aug., 1908, at \$10 per share; 60,000 shares were issued Aug., 1910, at \$18 per share, and of the balance, 88,236 shares were set aside for conversion of bonds, and 52,886 shares remain unissued. Debentures, \$1,500,000 first-mortgage 10-year 6% gold bonds have been retired.

Sales on N. Y. Stock Exchange during 1920 totaled 163,735; range was \$26 in January and \$14½ in December. In 1921 to October 1 range was 24½ to \$15¼.

The company is controlled, through stock ownership, by the General Development Co. Mechanics & Metals National Bank, New York, and Old Colony Trust Co., Boston, registrars; Bankers Trust Co., New York, and American Trust Co., Boston, transfer agts. Shares are listed on the New York and Boston Stock Exchanges. Annual meeting, third Wednesday in April.

† Deficit.

Dividends: \$1.50 per share in 1912; \$2.00 in 1913; \$1.50 in 1914; \$2.25 in 1915; \$5.75 in 1916; \$8.75 in 1917; \$4.50 in 1918; \$2.50 in 1919; \$2.00 in 1920; \$2.00 in 1921; 50c. on Feb. 15, 1922. Shareholders have received over \$8,000,000 in the last 4 years.

Property: 222 acres, mining claims, patented, 555 acres held for the mill and power plant and 345 acres for water rights, in the Miami district, 6 miles west of Globe.

Geology: claims cover an area of silicified schist at and near a contact with a great intrusive body of granite, known as Schultz granite. The altered schist belt averages about 1,200' in width and has a generally E.-W. direction. The granite merges into granite porphyry at its borders, and this and offshoots, or dikes of the granite in the schist, are mineralized along the ore belt. This is seen in a dike with E. W. strike, of 40 to 60' width, mineralized in the same manner as the schist.

The schistose area is netted with contraction fractures and later fissuring due to metasomatic changes of volume, accompanying mineralization and alteration. The ore belt is marked by silicification and intense alteration of the schist, a change that fades out into natural gray schist a few hundred yards north of the Miami and Inspiration mines. The ore zone is oxidized and leached to an average depth of 210', this part containing small seams and veinlets of oxidized ore. Below this leached belt a few feet of mixed ore is succeeded by the zone of disseminated glance, a rather soft, much altered rock, specked with tiny grains and films of chalcocite.

See also Professional Paper 115 of U. S. Geological Survey by F. L. Ransome.

Mining Methods: the mine contains two separate orebodies known as the Main and Captain. In the former, topslicing produces 3,000 tons per day; in the latter, which consists of lower-grade ore, a system of shrinkage stoping with undercutting and caving of the pillars is used. The production by this method is also approximately 3,000 tons per day.

In the topslicing methods, haulage levels are laid out 150' apart vertically, with drifts spaced 50' apart horizontally, and along these drifts raises to the slicing levels are spaced 50' apart. One sub-level 50' above the haulage level is installed for the purpose of distributing air from the fans through the

raises to the various slices. The slices are mined in blocks 250' square and 10' high. Each block is a unit in itself, being served by its own supply raise and manway. The extreme horizontal dimensions of this orebody are 1,000' x 750'.

During 1919, the undercut caving system was adopted also for the Main orebody, the 570' haulage level being at present used for this purpose.

The Captain orebody is about 350' thick, with extreme horizontal dimensions of approximately 500' square. This is developed by a haulage level below the orebody, and hand tramping levels at suitable vertical intervals above the haulage level in the orebody. The hand tramping level consists of drifts 25' apart, with drawing off chutes spaced along them at intervals of 6¼' apart on the alternate sides of the drifts, thus tapping the orebody at intervals of 12½' apart in all directions. The ore is soft, and caving, is induced by putting up narrow shrinkage stopes at right angles to the drawing off drifts, and subsequently caving the pillars between them by undercutting. The ore is drawn off from the chutes uniformly and trammed in 20 cu. ft. cars and dumped through raises to the haulage level, where it is transported to the shaft in trains made up of 30 cars of 3.3 tons capacity, by 6-ton electric trolley locomotives.

Reported in 1919 that the ore then available in the Captain orebody would be exhausted by May, 1920.

Development: by extensive underground operations, supplemented by churn drilling. Up to the end of 1918 drill holes of 640' average depth had been drilled to the number of 117. Drill-holes were put down at the corners of 200' squares. Drill borings in the vicinity of the mine have shown commercial ore to at least 115' additional depth below the 720' level of the mine.

The mine is operated through a 4-compartment shaft, with a main hoist capable of hoisting 10,000 tons of ore per day, and an auxiliary hoist for hoisting timber and supplies. These hoists are operated from their own boiler plant using oil as fuel. California crude oil is used for fuel for which storage capacity for 1,000,000 gals. is provided.

A new shaft, No. 5, similar in size to No. 4, the present main working shaft, has been sunk to a depth of 936' so as to safeguard the continuous operation of the mine and to facilitate the segregation of the ore into two classes; it will also provide a haulage level and ore pocket for the deepest ore at present known to exist on the property. This shaft has been concreted.

During 1919-20, connection was made between old workings and No. 5 shaft on the 320, 570, 720 and 850' levels; the 720' will be the main haulage level for mining the orebody between it and the 570' level.

Extensions were 42,118' in 1916; 25,476' in 1917; 14,872' in 1918; 14,552' in 1919; 41,925' in 1920. The total is 73.4 miles.

Ore reserves: Jan. 1, 1921, figured at 10,723,410 tons of 2.26% sulphide ore and 36,000,000 tons of 1.06% sulphide ore. In addition there are 6,000,000 tons partly developed mixed sulphide and oxide ore of an approximate grade of 2% copper. These figures are reliable, because of the unusually thorough manner in which the ore has been developed and blocked out and the well-known conservatism of the management. A very large part of this ore is actually blocked out underground, and the estimated average percentage is based upon thousands of careful assays, made of samples taken at 5' intervals, throughout the workings. It is probable that further development of the mine will develop more or less additional ore, possibly above what is considered the present payable limits.

Power generation: the power house contains four 600 h. p. water tube boilers, one 530 h. p. water tube boiler, and two additional boilers, each of 610 h. p. capacity. The power house also contains two 4,000 cu. ft.

steam-driven air compressors and three 1,000 k. w. 4-cylinder triple expansion steam driven electric generators, and two independent steam driven condensers. Installations in 1919 have increased the total boiler capacity to 8,000 h. p. and that of the power plant to 7,000 k. w., with spares of about 3,500 k. w.

The main shaft has 2 Nordberg hoists, the larger for raising ore having 2 drums of 10' diameter with 55" face, capable of handling 1,000' of 1½" rope. An auxiliary hoist has 16x16" cylinders with a drum of 8' diameter and 6' face for hoisting the man cage. The ore hoist raises two 7½-ton skips which are dumped directly into the pockets of the crusher building.

The crusher building, at No. 4 shaft, of 6,000 tons daily capacity, has Chalmers-Williams crushers, breaking ore to 1¼" size, the product being fed through two 4x10' trommels to four 62x18" rolls that crush oversize to half-inch cubes. Ore then goes by belt conveyor, Miami type, heavy duty Traylor, to the mill bins.

In 1919, a new shaft-house, head frame, and 250 h. p. auxiliary hoist was installed at No. 5 shaft; equipment including crusher plant was completed in 1920-21.

The concentrator, originally designed by H. Kenyon Burch, with initial capacity of 2,000 tons daily, since increased by remodeling to 6,000 tons daily is on a hillside south of the ore deposit, permitting gravity handling, and with a large acreage nearby, available for tailings. The mill building is of steel and stands on concrete foundations and in interior construction steel and concrete are used almost exclusively.

Ore treatment: in the crusher building ore is reduced by gyratory crushers and rolls to pass a ¾" hole, and is then delivered by belt conveyors, equipped with automatic weighing device, to bins behind the mill, with a total capacity of about 10,000 tons.

The mill proper is divided into six sections described as follows: from the bins, ore is carried by belt conveyor to an 8'x36" Hardinge mill loaded with 4" balls. The product of this mill passes to a Dorr classifier, where the finished product made up to this point is separated. The oversize from this classifier is divided between two 8'x30" Hardinge mills loaded with 2" balls, each operating in closed circuit with a Dorr classifier, and in these, the reduction of the entire feed to finished size (minus 48-mesh) is completed. The ore-pulp is then subjected to treatment by flotation in pneumatic flotation cells, which are a modification of the original Callow design. These cells are fitted with air bottoms covered with a porous medium through which is admitted air for aeration of the pulp. The total area of air bottoms in one section is 539 sq. ft. Air is supplied by a Root's blower with a capacity of 5,000 cu. ft. of air per minute at 6-lb. pressure, driven by a 150 h. p. motor. After flotation, the sand contained in the flotation tailing is subjected to treatment on Deister sand and slime tables. Concentrates pass through tunnels to the concentrate handling plant. The original plant consisted of round tanks with filter bottoms subjected to vacuum, but this is no longer used, and concentrates are now prepared for shipment by filtering. This plant consists of four Dorr thickeners 60' diam. by 12' depth, from which the thickened product passes to three 12' Oliver filters. From these the concentrates are delivered by belt conveyor direct to railroad cars.

The above description represents the latest flow-sheet adopted for the plant. Concentrates produced in the mill assay about 42% copper, and are being shipped to the International smelter at Miami.

Experiments on the treatment of the oxidized ore are being tried out in a 100-ton test plant; results have been encouraging, though not definite.

Water supply for the mill comes from the Old Dominion mine at Globe, and from two 16" wells equipped with centrifugal pumps, at the lower end of the Miami wash. Here is the main pumping plant, equipped with two Nordberg pumps of a capacity of 1,250 gal. per minute each. Water is delivered to the mill through a 14" pipe to two steel storage tanks with a capacity of 500,000 gals. each.

Buildings include machine shop, ware houses, change house, store, boarding house, bunkhouse and upwards of 150 frame dwellings for employes, all lighted by electricity. There is a substantial office building, erected at a cost of \$15,000, a club house and recreation hall, and a hospital owned jointly with the Inspiration Consolidated Copper Co.

Early in 1917 a Y. M. C. A. building was erected in the town of Miami at a cost of \$85,000. This is operated by the Industrial Branch of the Y. M. C. A., and membership is open to all residents of the district.

Mine is served by an extension of the Arizona Eastern railroad from Globe to Miami.

Production: begun March, 1911—

(a) Smelter returns. * Cost and selling price is cents per pound.

In 1921, production averaged about 4,250,000 lb. per month.

Production was lessened by the 1917 strike which started July 2; the property was closed down for seven weeks and after resuming work normal production was not reached until the end of the year. I. W. W. and Union recognition were the basic troubles.

In 1914 the Minerals Separation Co. brought suit against the company for infringement of patent, and in the final decision given in 1917 by the U. S. Circuit Court on appeal, Miami was declared to have infringed the M. S. patents. An accounting is still in progress. It is said that the process now used is entirely different from that employed when the suit was started, yet in November, Minerals Separation had started further suit for alleged continued infringement, and prayed for a supplemental injunction which the court refused. The request of Miami on May 26, 1920, to reopen original proceedings, was also refused.

Exploitation of Miami orebodies has become largely a routine matter which made it possible in 1920 to reduce mining costs by 24c per ton from those of 1919. Miami sells its metal independently and has been forced to curtail its operations during 1919 and 1920 by about 25% only, and has continued to pay dividends, although at a reduced rate. It was one of the few large copper producers to continue production throughout 1921.

The Miami is a property of demonstrated worth and the management is thoroughly experienced and capable. Company is particularly frank in giving information concerning all operations.

MIAMI MERGER CO.

R. C. Ellwood, pres., Miami, Ariz.

Inc. 1916, in Arizona. Cap. \$2,500,000; \$1 par.

ARIZONA

Property: 1,350 acres of land "controlled" by the company. So far as we know, no work of any consequence was ever done on this property, promoters' efforts being confined to selling worthless stock at high prices

to the innocent speculator or investor. The market was created through the manipulations of Harry Lefkowitz, who also handled **Miami Cons. Mines Co.** and **Inspiration Needles**. Mr. Lefkowitz who has changed his name to Lefko, was arrested in Los Angeles, Dec., 1918, by the Federal authorities, put on trial, in New York and convicted Dec., 1919.

This company was a rank fraud from start to finish.

MIAMI MINING & MILLING CO.

ARIZONA

Address: Box 764, Globe, Ariz.

Officers: P. R. McDowell, pres.-treas.; W. D. Hunter, v. p.; M. W. Tanner, sec.-gen. mgr.; with K. W. Holbert and C. L. McDowell, directors. **Inc.** in Ariz. **Cap.** \$1,000,000; \$1 par.

Property: 50 acres at Doak, in the Globe districe, Pinal Mountains, is said to show 8 veins, containing gold, silver and lead.

Development: by 900' crosscut tunnel.

Equipment: 50 h. p. air-compressor installed in 1918. The 250-ton mill of the Arizona Butte was purchased from W. I. Porter, of Globe, July, 1919.

A prospect. Idle, pending reorganization.

MIAMI MOTHER LODE MINING CO.

ARIZONA

Address: Miami, Ariz.

Officers: W. Schafer, pres.; F. W. Solomon, v. p.; G. D. Barclay, sec.-treas., with A. Reid, E. Schafer, H. W. Faust and H. E. Gragge, directors. **Inc.** in Arizona. **Cap.** \$5,000,000; shares 50c par.

Property: consolidated claims of Manitou and other companies, total, ing 1,100 acres, in Miami district, Gila county.

Development: by 325' shaft said to have cut 18" vein on the 200' level and disclosed several lenses of ore in other workings.

No recent returns, presumably idle.

MIAMI NEEDLES COPPER CO.

ARIZONA

Idle and probably dead.

Officers: D. R. Williamson, pres., P. O. Box 1056, Miami, Ariz.; F. Beston, v. p.; F. W. Ham, sec.-treas., with Geo. J. Stoneman, directors.

Inc. 1912. **Cap.** \$500,000; \$5 par.

Property: 11 claims on Needle mountain, about 5 miles west of Miami, Gila county, slightly developed.

Is apparently succeeded by **Inspiration Needles Copper Co.**, which see.

MIAMI SMELTER

ARIZONA

Works address: L. O. Howard, supt., Miami, Ariz.

A copper smelter owned by **International Smelting Co.**, and described thereunder.

MICHIGAN & ARIZONA DEVELOPMENT CO.

ARIZONA

Office: 905 Metropolitan Life Bldg., Minneapolis, Minn. Mine near Helvetia, Pima county, Ariz.

Officers: C. C. Prindle, pres.; R. M. Bennett, v. p.; Chas. W. Sexton, sec.-treas. This company reorganized the **Helvetia Copper Co.**, under a plan explained in Vol. V. Formerly owned a considerable share interest in the Helvetia.

MICHIGAN VERDE COPPER CO.

ARIZONA

Probably dead. Mail returned from Jerome, care of **Western Copper Syndicate**, P. O. Box 325, Phoenix, Ariz.

Officers at last account: L. B. Eaton, pres.; A. M. McLillan, v. p. and treas.; E. D. Bowles, sec.

Inc. 1916, in Arizona. **Cap.** \$2,000,000; 50c par; 800,000 shares held indefinitely in pool by Arizona Corporation Commission to enforce its orders.

Property: 29 claims, 535 acres, which according to the company's literature and "ex-geologist" Bethune, contains "outcrops" in a connecting belt of schist and diorite. No development is claimed, but the stock-sellers advertised that the property is owned outright and the money derived

from stock sales (offered at 50c in June, 1917), would be used for development.

The Michigan Verde was one of the worst of the many very questionable promotions of the boom days in 1916. The manner of its promotion and the character of its sponsors were open scandal in the camp, and when the company lost its option and the Arizona Corporation Commission ordered the return of its promotion stock and forbade the sale of shares, it was thought that the last had been heard of it. It is apparent that in 1919 a new and different directorate was successful in getting by the Commission prohibition, since the Western Copper syndicate, which had a postoffice box at Phoenix, Ariz., was advertising stock and sending out the same old hackneyed stories about the United Verde mine, and among other misleading statements alleging that the property end-lines the United Verde Extension property, whose mine workings are 1½ miles away, though an outlying undeveloped group of claims belonging to the latter, does lie between Michigan Verde and the U. V. mine.

From the known dip and extent of the orebodies of the United Verde and its neighbor, United Verde Extension, it is certain that the Michigan Verde is entirely outside of any possible extension of those ore deposits. The geologic report published by the company is a rank example of supposedly technical writing.

MIDDLE GOLCONDA MINES CO. ARIZONA

Holdings now owned by Highland Mining & Milling Co., which see.

MIDDLE HACKBERRY MINING CO. ARIZONA

Address: Kingman, Ariz.

Officers: W. H. Raplee, pres.; T. J. Sparkes, v. p.-gen. mgr., with W. B. Ridenour, directors. J. H. Townsend, sec.-treas.; T. D. Walsh, cons. engr.

Inc. 1920, in Arizona. Cap. \$150,000; 10c. par.

Property: near Kingman, Mohave county, is to be developed by 500' shaft.

MIDDLEMARCH COPPER CO. ARIZONA

Now Arizona Middlemarch Copper Co., which see.

MIDDLETON MINE, INC. ARIZONA

Address: C. C. Clark, Tucson, Ariz. B. G. Addams, supt.

Property: 600 acres, 40 miles S. W. of Casa Grande in the Black Range district, Pinal county, contains copper, gold and silver bearing ore. Planning erection of leaching plant.

MIDLAND COPPER CO. ARIZONA

Office: E. G. Bush, P. O. Box 1206, Tucson, Ariz. Mine: Twin Buttes, Arizona.

Officers: E. G. Bush, pres.-treas.-mgr; J. R. Ricketson, v. p.; G. H. Langworthv, sec.; S. J. Gunn, supt.

Inc. 1917, in Arizona. Cap. \$2,000,000; \$5 par; issued 600,000.

Property: the Queen group, 5 claims in the Twin Buttes district, Pima county, formerly owned by the Twin Buttes M. & S. Co. Silver-copper sulphide ore occurs in contact veins between porphyry and limestone with dip of 55°, course E. W.

Development: by 600' shaft and 2,700' of workings.

Equipment: 150 h. p. semi-Diesel engine, compressor and hoist.

Production: about 600 tons of ore per month, averaging 8% copper.

MIDWAY MINING & MILLING CO. ARIZONA

Described in Vol. XIV. Succeeded by Midway Moss Mining Co., which see

MIDWAY MOSS MINING CO. ARIZONA

Successor to Midway M. & M. Co., described in Vol. XIV.

Address: A. B. Allison, sec., 1311 S. Figueroa St., Los Angeles, Calif.

Officers: Wilbur Atkinson, pres.; Jas. A. Fay, v. p.; D. A. McMillan, treas., with F. E. Shaffer, C. L. Eggar and F. A. Link, directors, all of Los Angeles.

Inc. May, 1919, in Arizona. **Cap.** \$1,000,000; \$1 par; 500,000 shares issued. Security Transfer & Registrar Co., N. Y., transfer agent. Annual meeting 2d Monday in May.

Property: 14 claims, patent pending, 173 acres, in San Francisco district, Oatman, Mohave county, adjoining the Arizona Mossback and said to cover 5,365' of the Moss vein.

Development: by 202' shaft, to be deepened to 500'.

Equipment: includes 3 gas engines, two compressors, air drills, two pumps and several buildings, installed and completed in 1920.

MILDRED GOLD MINING CO.

ARIZONA

Address: Leonard White, supt., Stanton, Ariz. H. M. Canover, pres.

Property: 14 claims near Congress Junction, Yavapai county.

Development: 4,000' of shafts, drifts, etc. Tunnel 1,150' long has been driven from mill level connecting with main vein and incline shaft at depth of 520'.

Equipment: 2 hoists, 10-stamp mill and water supply 1½ miles long.

MILE WIDE COPPER CO.

ARIZONA

Main office: Tucson, Ariz.

Officers: C. P. Reiniger, pres. and mgr.; L. E. Jettinghoff, sec.; Prescott Lyon, treas. The president with C. W. Freeman, E. C. Carter, W. H. Singer and F. C. Douds, directors.

Inc. May, 1916, in Arizona. **Cap.** \$5,000,000; shares \$5 par; all outstanding. Annual meeting, July 7th.

Property: about 55 claims and 2 mill sites, about 1,400 acres, on the south side of Amole Peak, 18 miles from Tucson. Claims are divided into groups: the Copper King, Orient, Copper Mountain and Esperanza, with the Oro Fina placer claims and Copper King and Copper Crown mill sites.

Geology: fully described in Vol. XIV.

Development: main development on the Copper King group is by 300' incline shaft with levels at 100' and 200'.

Production: During 1918 reported shipping 4 cars monthly, averaging about 8% copper, to the Sasco smelter, from three of the ore "pockets."

Equipment: 25 h. p. gas hoist, 500 cu. ft. compressor, 100 h. p. F. M. gas engine, 60 h. p. gas engine and hoist, store and buildings.

The properties of this company do not come up to the very rosily-painted descriptions given out by the brokers who held an option for 51% of the stock, the balance being owned by the company's manager.

Property closed down early in 1919 and application made for a receiver in February, 1920, stockholders claiming mismanagement and misappropriation of company funds by the company. Litigation still pending.

MINE OPERATORS CO. OF AMERICA

ARIZONA

Address: Wm. D. Steadman, Miami, Ariz.

Incorporators: W. D. Steadman, W. J. Scott, of Miami, Ed. Arhelger, J. Cubitto, J. H. Mayer and F. W. Rolando of Globe Ariz.

Inc. 1918, in Arizona. **Cap.** \$3,750,000; \$5 par.

Property: low-grade copper-manganese mine in Globe district, Gila county.

A prospect.

MINERAL HILL CONSOLIDATED COPPER CO.

ARIZONA

Office: 1014 Frick Bldg., Pittsburgh, Pa. **Mine office:** Tucson, Pima county, Arizona.

Officers: Robt. Law, Jr., pres.; E. B. Reeser, v. p.; Jas. A. Dunn, sec.-treas. and F. A. Minard, cons. engr.

Inc. March, 1904, in Arizona, as successor of Azurite Copper & Gold Mining Co. **Cap.** \$3,200,000; shares \$1 par.

Property: the Azurite mine with 26 claims, 12 patented, 520 acres, in the San Xavier district, 18 miles S. W. of Tucson, said to have produced \$555,000 worth of ore under former ownership. Company also controls the American group of 8 claims and the Mineral Hill group of 5 claims. The mine is claimed to have a large body of sulphide ore averaging about 3.5% copper.

Developments: on the 500 and 600' levels said to have disclosed a large body of 4% copper sulphide ore. Has shipped about 60,000 tons of carbonate ore in past.

Development: by 74 pits and open cuts, 8 tunnels, longest 250' and 3 shafts, deepest 600', mine having a total of about 2 miles of workings.

Equipment: includes gas engines, electric generators, air compressor, pumps, etc.

Operations suspended, April, 1921.

MINERAL PARK MINES, INC.

ARIZONA

Address: M. B. Dudley, Kingman, Ariz.

Property: includes the Toledo and Argo claims, in Mineral Park district, Mohave county, N. W. of the Rural Mines and under same management.

MINES & DEVELOPMENT CORPORATION

ARIZONA

Address: Martin Fishback, mgr., Johnson, Ariz.

Property: the Arizona & Michigan Development Co's. group of 7 patented claims, 140 acres, in Cochise county, taken over in Aug., 1919, on a 10-year lease.

Principal formations are porphyry and limestone. Claims said to carry 4 orebodies, one opened by vertical and incline shafts and tunnels, showing a 5' vein with poorly defined walls and impregnations in the limestone hanging and porphyry footwall. Has a 450' two-compartment main shaft with 24 openings showing cuprite, malachite and copper sulphides said to give average assays up to 12% copper, 18 oz. silver, and \$1 gold per ton.

Equipment: 60 h. p. gasoline engine with double-drum hoist, 200 h. p. boiler and compressor. Company owns a short railroad connecting with the Southern Pacific Railway at Dragoon. Developing at last account.

MINGUS MOUNTAIN COPPER CO. LTD.

ARIZONA

Office: 516 Grant Bldg., Los Angeles, Cal. Mine near Jerome, Yavapai County, Ariz.

Officers: W. W. Thomas, pres.; A. Gleason, v. p.; J. R. Thomas, sec.; with A. M. McDermott, A. J. McDermott, and E. R. Jeffrey, directors.

Inc. June, 1900, in Arizona. **Cap.** \$3,000,000; shares \$1 par; issued \$2,400,000.

Property: 5 claims, 100 acres, in the Black Hills district, 12 miles south of Jerome, the nearest railroad point, has good surface showings of carbonate ores. Assays from 2,800' vein traversing property, N. E.-S. W., are reported to show .02 oz. gold, \$1.45 silver and 6.39% copper. Orebody claimed to be 45' in width, with dip of 60° E., but ore has only been found in bunches and streaks.

Development: by 4 shafts, deepest 430', with several tunnels, giving a total of 4,240' of workings.

Equipment: includes 50 h. p. steam plant, with 2 hoists, good for 1,000' each, and several mine buildings. Out of cash and idle some years.

MINNESOTA-CONNOR MINING & MILLING CO.

ARIZONA

Address: P. S. Virgin, mgr., Chloride, Ariz.

Officers: H. B. Hanford, pres.; J. T. Jackson, v. p.; J. S. Freemann, sec.; J. O. Kerbaugh treas.; the first three of Philadelphia Pa.

Property: 13 claims, 1½ miles S. of Chloride, Mohave county, said to carry the outcrops of 17 distinct veins.

Development: by 725' vertical steel-lined shaft, also 4 inclines from 100 to 530' deep. At 600' depth the main vein is 15 to 25' wide, but of low grade. At 700' it is 38' wide, also poor. West of the shaft is a 20' vein, the Pluto, which is expected to join with the Minnesota below 700'.

Equipment: three 100 h. p. boilers, 75 h. p. hoist, 900 cu. ft. compressor, lighting plant, mill engine and 150-ton concentrator.

Production: totaled \$1,150,000 to end of 1916. Work was suspended late in 1916 for want of funds.

MISSOURI-MOHAVE MINING CO. ARIZONA

Address: G. W. Marks, mgr., Cerbat, via Kingman, Ariz.

Property: in the Cerbat range, Mohave county, reported to have opened up a 4' vein of lead-zinc ore carrying gold, on the 100' level. No recent returns.

MOHAVE MOLYBDENUM CO. ARIZONA

Idle; perhaps dead. See Vol. XIV.

MOHAWK CENTRAL MINING CO. ARIZONA

Property: the Mohawk mine at Mammoth, a once profitable silver-gold mine. In recent years, the lead molybdate of the dumps and old workings proved valuable here as it has at the adjacent Mammoth mine. Idle.

MOHICAN COPPER CO. ARIZONA

Office: 304 Wilcox Bldg., Los Angeles, Cal. **Mine office:** J. V. Allison, supt., Bouse, Ariz.

Officers: W. G. Miller, pres.; B. A. Kipp, v. p.; Rol. King, sec., with G. M. Swindell and Christ Walter, directors.

Inc. March 25, 1914, in Ariz. **Cap.** \$2,000,000; \$1 par; 1,200,000 issued. **Transfer office:** Security Transfer & Registry Co., New York. Listed on New York and Boston curbs. Balance sheet of March 31, 1918, showed that from March 26, 1914, to March 31, 1918, development cost \$86,514, and \$14,673 was expended for equipment. There was \$480 cash on hand, and \$3,500 notes payable.

Property: 31 claims, 9 patented, 5 miles W. of Bouse, in Plomosa district, Yuma county, said to show copper sulphide ore, with some gold.

Development: by 512' shaft with others 35, 60 and 110' deep, and total workings of 2,683'. At depth of 300', 500' from shaft, a 50' vein was cut. It was leached, but contained lenses and streaks of high-grade copper ore. On No. 1 level, and in a winze below No. 2 there is ore.

Equipment: includes hoist and compressor.

Examined by J. W. Finch, W. A. Farish, and T. A. Keegle. Reported, December, 1921, that a little development is being done.

MOLINE & ARIZONA COPPER CO. ARIZONA

Formerly the **Globe Mining Co.**

Office: Moline, Ill. **Mine office:** Globe Ariz.

Officers: B. F. Baker, pres.; J. F. Harper, v.-p.; R. C. Schallberg sec.-treas., Moline Ill. with J. F. Heckman, F. B. Walker, G. A. Schallberg, directors.

Inc. 1918, in Arizona. **Cap.** \$2,000,000; \$1 par; 860,000 outstanding.

Property: 21 claims, patented, 335 acres, 2½ miles north of Globe, shows granite-porphry, syenite, quartzite and diorite, carrying fissure veins in diorite of 2 to 100' width, with gossans giving assays of 2 to 6% copper, 4 to 30 oz. silver and \$2 to \$28 gold per ton. The Mineral Farm group includes the Vacey-Constance mine, worked 1886 for silver, and said to have produced upwards of \$100,000 worth of ore under former ownership, this group having upwards of 20 old pits and shafts, of 10 to 165' depth. The Mineral Farm group shows altered sedimentary and igneous rocks, with iron dikes and a complex fissure system. The Mineral Farm

vein, of about 4' width, gives assays of 4.8% copper and up to 132 oz. silver and \$7.44 gold per ton, and the group also shows a 20' vein, said to sample 22% copper, 9% zinc, 2 oz. silver and \$4.96 gold per ton, which seems excessive. Developed by 400' vertical shaft, short tunnels, etc. The Eagle Pass group has a 215' two-compartment shaft, between 2 iron outcrops.

Equipment: includes a 60 h. p. boiler, 10'x14" hoist and air compressor. There are 6 mine buildings. Examined and favorably reported, on by F. Tovote, J. T. Bickel.

Property idle pending financing of company.

MOLLY GIBSON-CHLORIDE MINES CO.

ARIZONA

Address: Chloride, Ariz.

Officers: R. C. Ferguson, pres.-mgr., Chloride, Arizona; E. N. Phillips, v. p.; J. A. Gilbert, sec.; J. C. Wilson, treas., with C. H. Hortenstein, F. W. Ferguson and H. M. Thompson directors.

Inc. 1916, in Arizona. **Cap.** \$150,000.

Property: 3 claims, and a fraction, 1,000' S. W. of the Tennessee mine, Chloride district, Mohave county. Ore carries silver and lead, with some gold and copper, occurring in fissure veins, 4-7' wide.

Property is a meritorious prospect, which present management plans to develop by sinking a 200' shaft, 135' deep, August, 1921, and driving a crosscut to connect the two main veins.

Equipment: includes a 25 h. p. hoist, and a 10 x 10" Sullivan compressor. **Production:** totaled \$100,000 to 1916.

Company promoted by W. B. Twitchell of Phoenix and others.

MOLYBDENUM MINING CO.

ARIZONA

Officers: F. J. Wharton, pres.-mgr.; J. M. McBride, sec. Tucson, Ariz.

Inc. 1909, in Ariz. **Cap.** \$1,000,000; \$1 par.

Property: about 200 acres of land in the Baboquivari Mtns., Pima county, 50 miles S. W. of Tucson, with 4 shafts, deepest 80'. Claimed to have a ledge 300' wide. In 1917 the State Corporation charged that company was selling stock without a permit. A prospect.

MOLYBDENUM PRODUCTS CO.

ARIZONA

Officers: F. H. Hereford, pres.; Harold Steinfeld, v. p.; Alan Kissock sec.-treas. and mgr., with Hiram Corbett, R. K. Shelton, K. G. Smith and Maxwell Miltors, directors.

Inc. June, 1916, in Arizona. **Cap.** \$100,000; \$1 par; 30,000 issued.

Company owns no mines but operated a reverberatory, and electric furnace at Tucson, buying wulfenite ores, mainly from **Arizona Rare Metals Co.** Was one of the largest producers of ferro-molybdenum in the United States in 1917.

MONARCH MINING & SMELTING CO.

ARIZONA

Closed down. **Former Address.** Wickenburg, Ariz.

Officers at last account: W. O. Donovan, Vidalia, Ga., chairman; J. H. Mulholland, pres. and gen. mgr.; Jas. R. Vaughan, v. p.; J. B. Everridge, v. p.; J. H. Mulkey, sec.-treas.; officers are directors. A. D. Akin, cons. engr.

Inc. Aug. 1904, in Ariz. **Cap.** \$1,000,000; increased to \$1,500,000 in 1913 and to \$3,000,000 in 1914.

Bonds: \$100,000 1st mtge., issued 1913; \$57,400 outstanding. Assets of company given as \$62,523 over liabilities, Jan. 1915.

Property: 6 claims, patented, 100 acres, known as the Ryland or Three Black Buttes group, in the Black Rock or White Picacho district, Yavapai county, 9 miles N. E. of Wickenburg, shows diorite and schist carrying oxidized ores changing at shallow depth to chalcopryrite and occasional bornite, said to assay 2 to 20% copper and estimated by management to average 1 to 3 oz. silver and \$3 to \$15 gold per ton.

Development: several shallow shafts and tunnels of 600 and 300' with about 1,500' of underground workings and several thousand feet of surface trenching.

Equipment: includes a 50 h. p. distillate engine, 5x8" Rumsey triplex pump, and a 4-drill Sullivan compressor. There are about 26 buildings, all owned by the company. Water is taken from the Hassayampa river through 7 miles of 4" pipe-line.

Development proved surface ores to be badly broken, not continuous and occurring in pockets. Former management counted on raising funds for deep development by milling surface ores, but with wet concentration process used in 100-ton mill, major part of oxides and carbonates was lost in the tailing. Mill was therefore closed down after trial run.

MONROE COPPER MINE**ARIZONA**

Address: John Curran, owner, Walker, Yavapai county. Mine, once owned by the **Monroe Cons. Mines Co.**, long dead, is near the junction of Knapp gulch and Lynx creek, near Prescott. Formerly worked as a gold mine and said to have a 50' dike carrying copper ore on the 300' level.

Development work consists of various tunnels.
Idle.

MONSTER CHIEF MINING CO.**ARIZONA**

Mail returned unclaimed from former office: 27 William St., New York. Mine south of Jerome, Ariz.

Officers at last account, the late Wm. Barret Ridgely, was pres.; A. P. Thompson, cons. engr.; George Graham Rice, fiscal agent.

Cap. \$2,000,000; \$1,050,000 issued for property. All available information on the company was from George Graham Rice's house organ. Stock 6c bid, 12c asked at Jerome, October 20, 1917. No present quotations obtainable.

Property: 22 claims, 400 acres, adjoining the Green Monster on the southeast and the Jerome-St. Louis on the east. Mine is wholly undeveloped and without camp or equipment. Is an undeveloped prospect.

A report by Arthur Perry Thompson, geologist, describes a big vein called the Green Monster, crossing the Revenue claim of the Green Monster Co., into the Monster Chief group. Idle and probably moribund.

MONTANA-ARIZONA COPPER CO.**ARIZONA**

Probably dead. Described in Volume XIV.

MONTE CRISTO MINING & MILLING CO.**ARIZONA**

Address: Wickenburg, Ariz.

Officers: Ezra W. Thayer, pres. and chief owner, Phoenix, Ariz.; A. G. Pickett, sec.

Inc. Nov. 23, 1903. **Cap.** \$2,000,000; \$1 par.

Property: Monte Cristo silver mine, adjoining the **Arizona Copper Belt** mine near Constellation, in Black Rock district, Yavapai county. The mine shows very remarkable high-grade native silver ore which in the bottom of the mine is changing to copper ore.

Development: by 1,100' shaft with over 6,000' of workings.

Mine reported sold in 1920, to W. H. Worthington and Grover Hubbel, Wickenburg. The new owners installed a 10' K. & K. flotation plant making a 95% recovery.

MONTE DE COBRE COPPER CO.**ARIZONA**

Dead. Listed in Vol. XIV. See **Barbara mine.**

MONTEZUMA MINING & MILLING CO.**ARIZONA**

Officers at last account: J. P. Waldron, pres.; Philip Nohe, v. p.; P. Fink, sec.; A. V. Aldron, treas., 121 N. Wasatch Ave., Colorado Springs, Colo., with F. Fink and M. Devaul, directors.

Inc. in Arizona. **Cap.** \$1,000,000; shares \$1 par.

Property: 7 claims, 5 patented, 120 acres, in Pine Grove district, Yavapai county, 4 miles from Crown King. Shafts and tunnels reported to have opened some high-grade silver-lead ore. Main tunnel 700' long. A 5-stamp mill installed in 1919 and shipments made to El Paso.

MONTORO MINING CO.**ARIZONA****Address:** 300 Wright Bldg., Denver, Colo., or Chloride, Ariz.**Officers:** A. J. Fowler, pres.; J. L. Smith, v. p.; E. L. Brock, sec.-treas.; H. L. McCarn, mgr.**Cap.** \$500,000; shares \$1 par.Company organized in 1919 to take over the property of **Rainbow Mountain Mining Co.****Property:** 9 claims, on Rainbow Mt., 2 miles E. of Chloride, Wallapai district, Mohave county. Claims said to show a vertical vein containing gold-silver-lead-zinc ore.**Development:** work totals 3,000' including 780' of tunnels and 450' shaft, with 4 levels opened up. Former company claimed to have 10,000 tons of ore partly blocked out, May, 1917, mostly on South ore-shoot.**Equipment:** includes an 80 h. p. hoist and 2-mile aerial tram, 300 cu. ft. compressor, Cornish pump.**Production:** shipments to Needles smelter, totaling 3,000 tons, of silver-gold-lead ore, to end of 1916, yielded \$140,000. Shipments of high-grade ore reported made by lessees in 1920.**MORNING GLORY MINE****ARIZONA****Address:** Chas. B. Wilson, owner and manager, Patagonia, Santa Cruz county, Ariz.**Property:** 12 claims, 240 acres, 12 miles from a railway, in the Harshaw district of the Patagonia mountains. Claims said to show 4 veins 6' wide in limestone and porphyry, carrying sulphide ore, estimated by owner to average 3% copper, 3 oz. silver, 60¢ gold, 35% iron and 35% sulphur per ton. A shoot of zinc-copper ore is reported to have been opened in 1916, from which shipments were made in 1918.**Development:** 2 shafts of 80' and 200', with about 1,475' of workings, are estimated by owner to show 50,000 tons of 3½% copper ore blocked out for stoping. Ore is hand-sorted. Crosscut tunnel is in over 700' with good indications. **Equipment:** includes a small hoist.**Production:** over 10,000 tons to date. Mine has been worked for over 30 years.**MOSS MINES CO.****ARIZONA****Office and mines:** Goldroad, Mohave county, Ariz.**Officers:** A. C. Worden, pres.; L. F. Hammel, v. p.; I. W. Worden, sec.-treas.**Cap.** \$150,000; 10c. par; 250,000 shares issued as promotion stock; total issued 513,781 shares.**Property:** one claim. This is a well-known old mine that has produced some exceptional gold ore, though only opened to a shallow depth. Idle in 1921.**MT. TURNBULL COPPER CO.****ARIZONA****Address:** C. B. Barnhard, mgr., Phoenix, Ariz.

Property is a prospect, with a group of claims that adjoins Inspiration Central ground.

MOUNTAIN CONSOLIDATED MINING & MILLING CO. **ARIZ.**

Letters returned unclaimed from Globe, Ariz., and Payson, Ariz.

Officers at last account: G. B. Reed, pres.; J. W. Reed, v. p.; W. B. Havnie, sec.; A. T. Hammons, treas., with W. H. Shenk, A. C. McKillop and J. Nugent, directors.**Inc.** March 22, 1917, in Arizona. **Cap.** \$3,000,000; \$1 par; 1,285,000 issued.**Property:** 66 claims, 1,260 acres, in Payson and Brown districts., Gila county, said to show gold-silver-copper-lead-vanadium quartz veins in schist, slate and diorite. Ore occurs as veinlets. Copper minerals are sulphides.**Development:** by 214' shaft and 270' tunnel. Estimated reserves are 36,200 tons, but as only 98 feet of lateral work had been done to June, 1917,

this amount must include probable ore based largely on outcrops. The Black Rattler claims in the Brown district are reported to have a silver-copper vein 10,500' long and from 40 to 100' wide, in a slate-schist contact, which outcrops from 50 to 75' above the surrounding country. Presumably idle.

MOUNTAIN DRIVER & CALAMITY JANE MINES **ARIZONA**

Last address: Alex Denny, Chaparral, Yavapai county, Ariz.

Property: two claims, 40 acres, near Henrietta, in Big Bug district, 8 miles from Humboldt smelter. Ore occurs in quartz-porphry and carries copper and gold.

Development: consists of 150' shaft. Idle since 1916.

MOWRY MINING CO. **ARIZONA.**

Owner: A. J. Hazeltine, Warren, Pa.

Property: 21 patented claims, near Mowry. Santa Cruz county, 12 miles from Patagonia, operated during the Civil War by Lieut. Mowry, who was accused of furnishing lead from this mine to the Confederates. The ores are lead-silver. The mine, closed down in 1917, after producing several million dollars, was re-opened in 1916. Average ore contains about 20% lead, and 20 oz. silver per ton. Reported to have crosscut a lens of ore 25' wide on the 250' level, containing carbonates and sulphides.

Shipments to El Paso smelter resumed in 1919 and continued during 1920-21.

MUDERSBACH MINE **ARIZONA.**

See Excelsior Gold & Copper Co. in Vols. XIV and XV.

MUMME MINING CO. **ARIZONA.**

Probably dead. See Vol. XIV.

MURDOCK MINING & MILLING CO. **ARIZONA.**

Address: Oatman, Mohave County, Ariz.

Officers: S. R. Porter, pres.-treas.-supt.; D. Gibson, v. p.-sec.; F. L. Porter, asst.-sec., with D. P. Wright and G. D. Page, directors.

Inc. Dec. 3 1915, in Ariz. **Cap.** \$1,000,000; \$1 par; 690,000 issued. Stricken from list on the N. Y. Curb in 1918.

Property: near Oatman, shows a vein in andesite. Ore is gold-bearing and of the usual dense quartz type. Presumably idle.

NANCY LEE MINING CO. **ARIZONA.**

Address: P. O. Box 27, Bisbee, Ariz.

Officers: John Olson, pres., F. T. Bragonier, v. p.; Robert B. Manson, sec.-treas., with Henry Lovin, Robert Ferguson and H. J. Hierl, directors. **Inc.** 1915, in Arizona. **Cap.** \$1,000,000; \$1 par; issued 420,000 shares. Permission to sell stock was given, July 1921.

Property: 6 claims, 3 fractions and mill site in Secret Pass section. San Francisco district, Mohave county, 9 miles N. of Oatman. Elevation 3,000'; water on property.

Ore occurs in a fissure vein filled with quartz, calcite and adularia, with fragments of andesite, rhyolite and a generous distribution of manganese oxide. This vein of subsequent origin cuts through the andesite, and also two N. W. fissures filled with rhyolite.

Development: by 180' incline shaft and connecting tunnel 320' long; total workings, 1,000'. Practically all work confined to the fissure vein. Vein assays from a trace to \$12.50 per ton. Values are mostly in gold, with some silver.

Examined by John Tait Milliken and R. D. Johnson. Mine warrants further development. Idle since 1916; operations resumed late in 1921.

NARRAGANSETT COPPER CO. **ARIZONA.**

Address: care W. R. Ramsdell, 30 So. Stone Ave., Tucson, Ariz.

Officers: W. R. Ramsdell, pres.; R. J. Williams, v. p.; James S. Kelso, sec.-treas.

Inc. 1917, in Arizona. **Cap.** \$3,000,000; \$1 par; \$1,250,000 shares outstanding. Gross earnings in 1918 were \$265,665.

Property: 21 claims, at Rosemont, Helvetia district, Santa Rita mountains, Pima county, Ariz. Mine is 20 miles S. of Vail on the S. P. R. R.

Geology: the ore occurs in a replacement deposit between limestone and quartzite, which dips 30° E., and has a N. E., pitch. Shoot has been opened for 1,000' along the strike. Both oxide and sulphide ores occur and contain both copper and silver. Average of 7.01% copper, 1.15 oz. silver reported for 13,248 tons shipped during 1918. During 1915-16-17-18, reports shipping 34,331 tons with a net smelter return of \$835,860.

Development: by tunnel; workings, total 3,000' to depth of 450'. said to have exposed 80,000 tons containing from 2½ to 4% copper, including ore in dumps.

Production: in 1917 was 1,611,429 lb. copper. Over 1,200 tons monthly were shipped 1918. Shipments continued throughout 1919, but no figures are available.

In August, 1919, Albert Steinfeld & Co. of Tucson, brought suit against company to recover \$300,000 loaned on notes. Judgment was awarded plaintiff, plus interest, a total of \$330,000.

NATIONAL CONSOLIDATED MINING CO. ARIZONA.

Presumably idle. Described in Vol. XI, Copper Handbook.

NATIONAL FIVE GOLD MINES CO. ARIZONA

Address: Chas. H. Burlock, Oatman, Ariz.

Property: a group of 45 claims, near Oatman, Mohave county, adjoining the Arizona Mossback holdings and reported acquired in 1921 by that company.

NATIONAL METALS RECOVERY CO. ARIZONA.

J. W. Stockholm, mgr., Tombstone, Ariz.

Company has leased several old mine dumps at Tombstone, Cochise county, and will operate the Guard mill.

NATIONAL TUNGSTEN CO. ARIZONA.

Acquired by International Tungsten Corp., which see in Vols. XIV and XV.

NAVAHO COPPER CO. ARIZONA.

Idle. Had offices in Babbitt Block, Flagstaff, Ariz. in 1918. Is a consolidation of **Navajo Pacific** and **Navaho Copper** companies.

Company was a promotion of the late E. J. De Sable and is said to have had backing of several great financiers.

Property: 120 miles N. of Flagstaff, in Coconino county, contains sandstones impregnated with copper carbonates. According to a report by H. C. Carr, the tract contains 7,000,000 tons of 2% ore. Other engineers gave one to two million tons of 5% copper ore. The ore does not persist far either horizontally or downward, but covers extensive areas. It is all oxidized, mostly carbonate and rests on fossiliferous Silurian rocks. The presence of copper chlorides indicates marine deposition of granitic sands. Shipments were made by motor truck for several months but cost proved too high for profit.

Stock nearly valueless; 50 shares selling for \$2 at auction, Dec. 22, 1920, and 500 for \$3, Oct. 15, 1921.

NAVAJO MINES CORPORATION OF ARIZONA ARIZONA.

Office: Vicksburg, Yuma Co., Ariz.

Officers: E. P. Heald, pres; William Vincent, 1st v. p.; O. B. Lefurgey, v. p.; C. Y. DeLay, sec-treas-gen. mgr., with H. M. Anthony, O. P. Posey and Eugene Schutz, directors.

Inc. in Arizona. **Cap.** \$3,000,000. \$1 par; 1,800,000 issued. National Security Co., New York, transfer agents.

Property: the Desert mines, comprising the Golden Mound and Gold Eagle quartz claims, and Safe Deposit placer, all patented, 51½ acres, 2½ miles from Vicksburg on the railroad.

Geology: rocks are pre-Cambrian schist, with overlying quartzite, cut by diorite dikes. There are reported to be 3 quartz veins 1 to 10' wide, also a mound 400' across, 140' high at center. Ore contains gold, with small lead and copper content and average assay is given as \$8 per ton. Quartz in small hill is said to carry 4.3% copper and \$17.15 gold and silver per ton.

Development: veins traced 800' by pits, tunnels, open cuts and a 275' tunnel with 2 cross-cuts, 90' and 40' long. Ore reserves were estimated by G. R. Boggs at 100,000 tons. W. Forstner estimates orebody 400' long by 140' high to contain 13,500 tons of \$20 ore and 1,500 tons of \$50 ore.

Equipment: includes concrete reservoir, buildings for 50 men, etc. Prospectus truly said: "This is not a stock for everyone." Development is, in our opinion, too meagre to warrant the estimates given of either quantity or quality and mining and milling cost of \$2 per ton will be hard to attain on a small scale. Reported June, 1917, there were 5 carloads of ore ready for shipment, nothing later known.

NAVY GROUP M. & M. CO.

ARIZONA

Office: 912 Higgins Bldg., Los Angeles, Calif.

Officers: Dr. Geo. P. Waller, pres.; F. M. Townsend, sec-treas.; R. E. Zuber, agent at Gold Road, Ariz.

Inc. 1915. **Cap.** \$1,000,000; shares \$1 par.

Property: 3 claims, 48.26 acres, in Tom Reed-Goldroad district, Mohave county, developed by 750' tunnel. Inactive or defunct.

N C-4 SILVER MINING CO.

ARIZONA.

Address: Wm. Clevenger, Prescott, Ariz.

Property: in Hassayampa district, Yavapai county, reported to show high grade silver ore. A 300' shaft being sunk and equipment installed.

NEBRASKA & ARIZONA COPPER CO

ARIZONA.

Out of business.

Inc. Jan., 1910, and merged June 25, 1910 with the California & Paradise Mng. Co., in the **California & Paradise Cons. Mng. Co.**

NEEDLES MINING & SMELTING CO.

ARIZONA.

Company was liquidated Dec., 1917, and its property and assets turned over to the **U. S. S. R. & M. Co.**, which see.

Inc. 1909, in Me., as successor of Arizona-Mexican Mng. & Sm. Co. For full description see Volumes XIII and XIV.

NELLIE GOLD MINING CO.

ARIZONA.

Address: Oatman, Ariz.

Controlled by Howland Bancroft and Julius Bache. Mine operations were carried on by the Woods Investment Co. of Los Angeles, who also control the Lexington and have a big interest in the Lazy Boy and United Western. Idle.

NELLIE MINING CO.

ARIZONA.

Idle. Mine office: Oldtrails, Mohave county, Ariz. **Address:** Woods Investment Co., Los Angeles Calif.

Officers: F. M. Woods, pres.; R. C. Wilson, v. p.; E. T. Walmsley, sec-treas.; H. E. Woods, mgr., with C. S. Buck, directors.

Inc. July 3, 1906, amended Aug. 4, 1915, in Ariz. **Cap.** \$1,000,000; \$1 par. Stock is listed on the San Francisco, Salt Lake and Los Angeles exchanges. Registration Surety Co., 205 Russ Bldg., San Francisco, registrar. Annual meeting, first Wednesday in June.

Property: 11 claims, 190 acres, in Oatman Goldroad mining district, 5 miles S. of Oldtrails, shows a fissure vein in andesite and andesite tuff, with gangue consisting principally of the grain quartz and adularia and calcite. The values are exclusively gold, although traces of copper stain are found in the 2 altered dikes which strike out from the main lode, having a general strike N. 52° W., with dip about 55° N. E. Assays said to average \$5.90 gold per ton. Developed by 530' two-compartment vertical shaft.

Reported that on the 350' level 200' of drifting opened ore worth up to \$35 per ton. At 435', in shaft No. 2, vein is reported to be 24' wide, and on 500' level 25' wide, 10' of it assaying \$5.31 per ton. Drifting on 500' level to encounter ore-shoot outcropping on surface 300' east at last account.

Equipment: includes 100 h. p. gas hoist, 55 h. p. compressor, pumps, 3,600' water pipe line, bunk and boarding houses. Property reported on by A. G. Keating.

NELSON MINING CO.

ARIZONA.

Defunct. Property acquired by **Philadelphia Mining Co.**, which see.

NEVADA-ARIZONA MINES CO.

ARIZONA.

Office: 510 Odd Fellows Bldg., St. Louis, Mo. **Mine office:** Hackberry, Mohave county, Ariz.

Officers: John Scholl, pres.; Chas. E. Hamilton, v. p.; A. E. Louis, sec.; J. Wm. Seller, treas., with J. Phillips, Aug. Richter, Jr., C. D. Morley, Edward J. Ryan and Wm. Burmeister, directors. T. D. Walsh, supt.

Cap. \$1,500,000; shares \$1 par. Reported, March, 1919, to have issued \$150,000 in bonds; indebtedness, \$28,569.

Property: 17 patented claims, about 340 acres, in the Music Mountains, said to show gold and silver values. Ore occurs in fissure veins, 4-10' wide, in granite formation. Average assays reported at from \$10-50 per ton.

Development: includes the 700' Lucknow shaft and 700' Roosevelt tunnel, latter in milling ore for 200'. At depth of 515' the Lucknow vein is reported to be 12' wide, of good grade ore.

Equipment: includes compressor, small concentrator with a Chilean mill, and gas hoist. No production data available.

NEW ARIZONA RAY COPPER CO.

ARIZONA.

Formerly the **Arizona Ray Copper Co.**

Mail returned from former address: 115 N. First Ave., Phoenix Ariz.

Officers: W. A. Stuart, pres.; F. M. Dorsey, v. p.; J. L. Milligan, sec., with Fred. E. Young, L. L. Wallace and W. Laurence Barnard, directors.

Inc. in Arizona. **Cap.** \$1,000,000; 10c par; 5,000,000 shares paid promoters for the claims.

Property: 12 claims, adjoining the Ray Consolidated, at Ray, Pinal county, considered to be outside the ore-zone and valueless.

Former company was exposed and denounced by the California Corporation Commission, by the "Mining & Scientific Press" and by the "New York Tribune." The expose drove the promoting firm out of California and to Phoenix, Ariz., where its business is said to have been bought out by the Arizona Securities & Trust Co. Arizona Ray was considered a fraud of the worst type.

Nothing new is known of operations, since name of company was changed.

NEWBURY MNG. CO.

ARIZONA.

Property near Cochran, on Ariz. Eastern R. R., east of Florence. To save property from sale, Makeever Bros. of Boston put up \$10,000, but after their engineers had examined it, the firm abandoned the property.

NEW COMSTOCK MINING CO.

ARIZONA.

Office: Ray L. Dimmick, supt., Kingman, Ariz.

Officers: Chas. Sutro, pres., 410 Montgomery St., San Francisco; W. C. Howard, v. p.-mgr., Kingman, Ariz.; Sidney L. Schwartz, sec.

Permit to sell stock has been granted by the Arizona Corp. Com.

Is a holding company controlling the **Sheep Trail-Boulevard** group of 7 claims (6 patented) and **Pyramid** group of 3 patented claims in the Union Pass (San Francisco) district, Mohave county, 30 miles from Kingman. The latter is near Katherine Gold Mng. Co. (q. v.) holdings, transferred to that company by **New Comstock**, Aug. 29, 1921.

The Sheep Trail discovered in 1865, is 7 miles E. of the Colorado river and shows a vein in granite intruded by rhyolite developed to depth of 428' by 750' tunnel, etc.; total workings over 5,000'. A quartz-hematite

ore carries gold. A 20-stamp mill at the river was destroyed circa 1918. Several thousand tons of ore have been produced. The Pyramid lies near the river and is supposed to cover extension of Katherine vein.

NEW CORNELIA COPPER CO.**ARIZONA**Subsidiary of the **Calumet & Arizona Mining Co.****Officers:** Calumet, Michigan, and Ajo, Arizona.

Officers: Gordon R. Campbell, pres.; James and Thomas Hoatson, v. p.'s; Peter Ruppe, treas.; with Chas. Briggs, W. B. Congdon, J. C. Oliver, James Phillips, Jr.; L. D. Ricketts, T. F. Cole, F. B. Augustine, John C. Greenway, W. B. Mershon, T. H. Collins, and G. N. Newett, directors.

Staff: J. C. Greenway, gen. mgr.; Warren, Ariz.; Ira B. Joralemon, asst. gen. mgr.; M. Curley, supt.; H. B. Paull, auditor.

Inc. Sept. 28, 1909, in Delaware, as a reconstruction of the Cornelia Copper Co. Cap. \$9,000,000, shares \$5 par; all issued and outstanding. State Street Trust Co., Boston, transfer agent; American Trust Co., Boston, registrar. Calumet & Arizona owns 1,229,741 New Cornelia shares. Listed on Boston Stock Exchange.

Bonds: Company authorized an issue of \$4,000,000 6% 12-year sinking fund gold bonds, dated Sept 1, 1915, maturing Sept. 1, 1927, convertible into stock at \$10 per share, to finance the purchase of necessary equipment and construction work. All subscribed at par. All bonds have been converted.

In Feb., 1921, company took a 4.07% interest, \$1,628,000 total amount, in the Copper Export Association's \$40,000,000 note issue.

Not including copper on hand, current assets were \$4,800,000; on Jan. 1, 1922.

Dividends: initial of 25¢ per share. \$450,000 was paid in Nov., 1918; none in 1919; 50¢ in 1920.

History: company's early history and its experiments with new processes are fully described in Vols. VI, VIII, and X, Copper Handbook.

In 1910, the General Development Co. bought 20,000 shares for \$20,000,

spending the money under an option for a stock control, putting down 5 diamond-drill holes, deepest 188', which showed the ground to be oxidized to a depth of about 30', followed by sulphides, estimated by the company to average 2 to 2.75% copper. The option was forfeited 1910, and property was leased to H. C. Chamberlain, who shipped concentrates from 800 tons of 4% ore to the Copper Queen smelter. In 1911 the Calumet & Arizona Mining Co. took an option on 76% of New Cornelia stock, and under the direction of John C. Greenway, general manager, and L. D. Ricketts, cons. engr. proved the existence of a large body of commercial copper ore. Laboratory tests showed that the carbonate ore could be treated by leaching with dilute sulphuric acid and the sulphide ore by flotation.

Experimental leaching plants of one ton and later of 40 tons per day capacity were erected at Ajo and tests made for over a year. Results of 310 charges showed: average heads, 1.31% copper; average tails, 0.271% copper; extraction, 79.36%, and 0.88lb per k. w. hr.

Meanwhile wells were drilled to locate a water supply, and a shaft sunk on a hole 7 miles from the property found a satisfactory water stratum. In the summer of 1915 the Tucson, Cornelia & Gila Bend Railroad from Gila to Ajo, a distance of 43 miles, was started, and completed in Feb., 1916. Work was immediately started on a 5,000-ton leaching and electrolytic precipitation plant, which started operation in May, 1917.

Property: 55 patented and 38 unpatented claims, and one patented and 14 unpatented mill-sites at Ajo, 44 miles south of Gila Bend, Ariz. Property comprises about 1,704 acres, 75 of which constitute the New Cornelia orebody.

Also, 59 claims (7 patented), 1,150 acres, acquired in July, 1917, from the **Ajo Consolidated Copper Co.**, which adjoin the New Cornelia on the S.; the orebody, an extension of the New Cornelia, covers about 21 acres.

Geology: claims cover an area of rhyolite, lava, breccia and tuff beds, intruded by a huge mass of monzonite porphyry, which cuts and uplifts the rhyolite. There were subsequent intrusions of diorite and diabase porphyry, probably connected with the great mass of Tertiary basalt and andesite lava flows which cover the surrounding country. Mineralization has formed a low-grade disseminated deposit with high-grade veins in monzonite and narrow rich veins in the adjoining rhyolite. The disseminated orebody, covering about 75 acres, has a pear-shaped outline. The depth of the ore varies from less than 50' on the outskirts to more than 600' in the center, where the bottom of orebody has not as yet been reached.

In the Ajo Consolidated property the disseminated mineralization often extends beyond the monzonite into thoroughly brecciated rhyolite, but in general the ore followed the contact of the two rocks, dipping steeply S. W. and more flatly and irregularly to the S. E. For about 300' along the contact there is a lens of ore of much higher grade than the average.

The primary mineralization is chalcopyrite and bornite with comparatively little pyrite. Surface alteration has converted the sulphide minerals to malachite to a depth of about 20' below the deepest arroyos and 150' below the highest hills. The plane of demarcation between carbonates and sulphides is almost horizontal, agreeing with the present ground water level. Chalcocite is rare in the New Cornelia orebody, but locally of much importance in the Ajo Consolidated ground, particularly in the ore in rhyolite below the water level.

Development: by diamond drill holes and a 250' three-compartment shaft, connecting with orebody through a 405' crosscut; levels have been opened at 150' and 250' to develop low grade sulphide ore; total workings, 8,875'.

On the 250' level the orebody is approximately 400' long by 265' wide, but its extent to the S. and E. has not been determined. Up to 1918, 144 holes had been drilled, of which 21 bottomed in ore of better than 1% grade; in 1918, 1,825' of drilling was done; in 1919, 1,900' in 5 holes.

In March, 1919, a sulphide orebody, 360 x 400', was uncovered on the 361' level of Ajo Cons. ground.

Ore reserves: total estimated tonnage, based on a 1% minimum basis, is 50,514,288 as of Dec. 31, 1921, of which 8,234,460 tons are oxidized ore carrying 1.49% copper and 42,279,828 tons of sulphide ore averaging 1.577%. In addition, drilling has developed 31,155,440 tons of oxidized material carrying 0.83% copper and 29,148,754 tons of sulphide ore of 0.75% copper tenor.

Gold and silver in the carbonate ore are negligibly small, but the sulphide ore carries between 30 and 50c. per ton in precious metals.

All the carbonate ore and about 22,500,000 tons of the sulphide ore are available for steam-shovel mining. The occurrence of ore at the surface obviates stripping and loss of ore or vitiation of grade through admixture of ore with capping.

Reduction Works: about one mile from the orebody, with which it is connected by a double-tracked standard gauge railroad. Ore is loaded into cars by three 100-ton steam-shovels, the cars dumping directly into the large crushers. Five thousand tons are now being treated daily.

Ore is crushed to 10" size in a large gyratory crusher; 4 smaller gyratory crushers reduce it to 3" cubes before it goes by belt conveyors to the storage bins. From the 10,000-ton storage bins the ore is carried by 4 pan conveyors to 15 Symons disc-crushers, reducing it to ¼" in size. The ore is very hard and contains many large boulders. A dust collector was added in 1919.

Crushing practice at Ajo was described by W. L. Dumoulin, in Bull. 152, August, 1919, of the A. I. M. E. The product sent to the leaching tanks ranges between plus 3 and minus 20 mesh; 56.7% is coarser than 6 mesh and 18.3% is finer than 20 mesh.

From the crushing plant the ore is carried by an overhead conveyor 100' long to 11 leaching tanks, each 88' square and 15' deep, built of reinforced cement lined with lead. The conveyor advances across the tanks at 12' an hour. Each tank holds 5,000 tons of ore, and each charge remains in the tank 8 days, the tailings are removed by Hulett excavators and hauled to the dump in a train of twelve 50-ton cars. The acid solution is handled by two 3,500 gal. a minute horizontal centrifugal pumps.

The pregnant solution from the tanks is treated in 4 sulphur dioxide gas towers, 20' in diam. and 40' high, to change ferrous to ferric iron, and then pumped into the 152 electrolytic tanks, holding 77 cathodes. The anodes are of lead, and the starting cathode sheet is 3' square, weighs 16lb., but accumulates copper by the electric current until it weighs 165lb., when it is withdrawn. The discarded solution goes over scrap iron. The sulphur dioxide gas is made by burning pyrite in 4 Wedge furnaces, and purified by the Cottrell process.

A 6-compartment settling tank was installed in 1920 to take care of slimes of the neutral solution before going to the towers and of the reduced iron solution leaving the towers; this will prevent towers becoming unduly clogged. Another change adopted in 1920 involves returning a large part of the cement copper to the solution and recovering the metal as electrolytic copper; the percentage of copper in the form of cement has been reduced from 17.7 in 1919 to 7.0 in 1920.

Acid is obtained from the mother company, Calumet & Arizona, which also does the smelting.

Results during the first year of leaching operations at Ajo are given in great detail by Tobelman and Potter in Bull. 146, Feb., 1919, of the A. I. M. E.

The \$1,000,000 power plant has 5 oil-fed 825 h. p. boilers, 2 turbo-generators of 7,500 k. w. capacity each, and four 1,750 k. w. direct current motor-generator sets.

A 500-ton experimental flotation plant was built in 1919, to study the best method for treating the sulphide ores. This plant was closed down on March 1, 1920, after a 6 months run; copper recovery was 84.07% and it was demonstrated that concentrate could be made self-fluxing and might be

smelted economically at Ajo. By 1923, under normal conditions mine will be in position to produce 5,000 tons of sulphide ore per day for treatment by flotation.

Company contemplates building its own railway to a port on the Mexican coast.

Production for years ended Dec. 31:

	Ore tons	Copper %	Elec. Copper lb.	Cem. Copper lb.	Total Copper lb.
1917*.....	780,211	1.685	12,764,848	3,361,283	16,081,131

1919.....	1,542,533	1.488	29,640,211	6,368,952	36,009,163
1920.....	1,727,859	1.525	37,331,586	2,113,985	39,445,571

*8 months.

In addition, high grade ore is shipped direct to smelter; in 1917, 3,401,060 lb. of copper were produced from 60,561 tons of ore; in 1918, 4,694,831 lb from 81,417 tons; in 1919, 3,500,298 lb from 62,120 tons; in 1920, 249,353 lb from 3,598 tons. In 1920 there were also shipped 409,569 lb of copper in the form of concentrate from sulphide ore.

Total production in 1917 was 19,482,191 lb of copper; in 1918, 46,950,139 lb; in 1919, 39,509,461 lb; in 1920, 40,104,493; in 1921, 21,150,000 lb.

New Cornelia is a big mine in strong hands, and should pay regular dividends for a long time if conditions are normal.

Operations were practically suspended in March, 1921, but leaching plant continued to run at 50% capacity.

NEW CORNELIA WEST MINING CO.

ARIZONA

Address: J. E. Sayers, Ajo, or Kingman, Arizona.

Officers: I. E. Perry, pres.; Geo. Sayers, v. p.; J. S. Amundsen, sec-treas., at last account.

Inc. Feb., 1917, in Arizona. Cap. \$7,500,000; \$5 par.

Property: 230 acres, includes the Sayer-Rowley-Thal group, adjoining the New Cornelia at Ajo, Pima county. Ore contains copper-silver-gold. Only assessment work being done.

NEW DOMINION COPPER CO.

ARIZONA

Office: 2 Rector St., New York. **Mine office:** Globe, Ariz.

Officers: E. W. Mitchell, pres.; P. M. King, v. p.; A. G. Bisgood, sec-treas., with R. E. Vandruff, F. A. Shaffer and A. C. Black, directors.

Inc. in Arizona. Cap. \$2,000,000; in 1,400,000 common and 600,000 preferred shares; \$1 par. Preferred stock is redeemable any time after Jan. 1, 1922.

Property: 21 patented claims and fractions about 1½ miles from the Arizona and Eastern Railroad terminal at Globe, Gila county adjoins the Old Dominion property on the north and the Iron Cap and Big Johnnie to the south and east.

Geology: similar to that of the Old Dominion ground, where the principal oxidized ore is cuprite. The ore occurs in lodes or veins, as masses in limestone, and as an irregular mineralization of shattered rocks. Some sulphide ore has been found along a fault-vein on the 450' level. The limestone area, according to the geologic map of the U. S. G. S., is much greater than that of the Superior and Boston, but slightly less than that of the Old Dominion. There are 9 veins showing on the surface. Although there is ore in paying quantities in the workings, no large orebody has been blocked-out, though surface ores show high silver value and copper up to 21%. The engineers report that big orebodies may be expected at 1,300' in depth. The former operator shipped several carloads in 1916, averaging 8.31% copper.

History: several shallow shafts were sunk and considerable silver ore shipped in the early 70' and 80's. In 1906, the property was purchased and some development done by the Globe Consolidated, which was forced to shut-down by the panic of 1907, when the property reverted to the original owners. The New Dominion bought the ground in 1916 and has done considerable development.

Development: by 825' shaft, with various levels. This is to be deepened to 1,400', and crosscuts driven to explore the veins at that depth. Several thousand tons of commercial ore were mined from the two veins, cut on the 800' level, the product going to the Old Dominion smelter. Company has no pumping expense, as the Old Dominion mine is working on the 1,800' level, and drains the ground.

Equipment: includes a modern machine-shop, 400 h. p. steam plant, compressor, and several large houses for quartering the men. Operated by lessees at last account, June, 1920. It is regarded as a promising property.

NEW DOMINION MINES CO.**ARIZONA**

Idle and no record of recent operations available. Described in Vol. XIII.

NEW ENGLAND & CLIFTON COPPER CO.**ARIZONA**

Sold to Phelps Dodge interests. Described in Copper Handbook, Vol. XI.

NEW JERSEY MINING CO.**ARIZONA**

Mail returned from former address. Ed. Mingle, mgr., Chloride, Ariz. Described in Vol. XIII.

NEW KING OF ARIZONA MINING CO.**ARIZONA**

W. J. Johnson, mgr., Yuma, Arizona.

Property: the old King of Arizona mine, 4 claims, in the Kofa Mtns., 60 miles N. E. of Yuma, Yuma county, which between 1896 and 1910 produced \$3,500,000 in gold and silver bullion. Much of ore in upper workings was high-grade but values decreased with depth, and at 750' was only \$3 per ton. A 200-ton cyanide mill was dismantled some years ago. The ore is a silicified andesite porphyry and occurs in brecciated zones; the gold is free and is present in the ratio of 58 to 1 of silver.

The new company is reported to have uncovered another vein, 10' wide, which it is actively developing, a 1,000' tunnel being completed March, 1921.

NEW LA PAZ GOLD MINING CO.**ARIZONA**

Office: McDaniel & Cordary, fiscal agents, 504 Pacific Finance Bldg., Los Angeles, Cal.

Directors: O. L. Grimsley, pres.-gen. mgr., G. A. Scroggs, v. p.-treas.; Geo. Renwick, sec.

Inc. May 2, 1910, in Arizona. **Cap.** \$1,500,000; \$1 par; 1,223,000 shares issued. Balance sheet of Dec. 31, 1920, includes current assets, cash, \$19,-81; current liabilities, \$3,434.

Property: 1,596 acres, in La Paz or Weaver district, Yuma county, said to show a deposit of gold-bearing gravel 6 to 40' deep, lying on decomposed granite and porphyry. There are reported to be 5,300,000 cu. yd. of gravel, averaging \$2.15 per yard. Operations to be by hydraulicking, for which a 1,750,000 gal. storage dam and 12" pipe-line from Colorado river are planned.

Property reported on by E. Shurley Wilson, A. B. Hall, Geo. R. Fannett and E. A. Rasor. Idle.

NEW MESCAL MINING CO.**ARIZONA**

Dead. See Vol. XIV.

Company originally owned 7 claims, but 4 were allowed to lapse and were jumped. The 3 remaining were sold to I. E. Russell of Prescott, who sold them to J. M. Layman, who in turn transferred them to the Verde Combination Copper Co., and they now comprise part of its Jerome holdings.

NEW PLANET COPPER MINING CO.**ARIZONA**

Office: 61 Broadway, New York.

Officers: Alex. Rae, pres.; Geo. S. Barton, v. p.; Herman Cook, sec.-treas., with Julius H. Susmann, Geo. Crompton and T. M. Lloyd, directors.

Inc. July 13, 1909, in Delaware. **Cap.** \$4,000,000; \$5 par; issued 342,905 shares in which the General Devel. Co. (q. v.) has a large minority interest. Is a reconstruction of the Planet Copper Mining Co., stock of which was retired by exchange for 240,000 shares of New Planet stock. Farmer's Loan

& Trust Co., New York, registrar. Annual meeting, third Wednesday in June.

Property: the Planet mine, with 31 patented, 10 unpatented, and 3 fractional claims, about 750 acres, in the Harcuvar district, on the southern bank of the Bill Williams Fork River, 21½ miles from Bouse on the Santa Fe cut-off and about 9 miles from Swansea.

Geology: copper occurs mainly as oxidized ore, though nuclear particles of sulphides mixed with specular hematite are seen in the deeper workings. The orebodies are replacements in limestone, the ore bed developed at the Planet shaft lying on the contact between this rock and underlying gneiss. This deposit is 3 to 20' thick and dips 15° south. Much high-grade ore has been shipped from other parts of the property in past years; it was found as crusts, or shells, about impure hematite in limestone, especially near bodies of amphibolic rock now altered to black gneiss. A deep-seated mass of granite is the not improbable source of mineralization, although later igneous activity is shown in a volcanic plug not far distant and in the basalt flows which cover the surrounding country. The geology is very fully discussed in U. S. G. S. Bull. 451, p. 47, written by Howland Bancroft.

The ore deposits show a heavy iron gossan, mainly of hematite, apparently of workable grade, and it has been estimated that the property shows about 500,000 tons of 60% iron ore. The main orebody developed in the Planet shaft is about 300' in width, has a thickness of 4' 3", and an average copper content of 5.9%, according to a report by A. H. Kellar.

Development: aside from open cut and tunnels, is mainly at the Planet shaft, an incline sunk on the ore bed at an average angle of 15° to a depth of 733'. There are drifts, crosscuts, etc., amounting to 2,500'. A vertical 350' shaft connects with these workings and gives ventilation.

The old workings include 8 tunnels, longest 225', and 12 vertical pits and shafts, of 25 to 325' depth. About \$150,000 was expended under the management of the General Development Co. in sinking the vertical shaft and putting down a number of churn-drill holes, 3 holes showing low-grade sulphide ore below the old workings.

The Planet mine is probably the oldest copper mine in Arizona. It was opened in 1864, worked in a small way until 1874, and reopened in 1884, when a 36" circular blast furnace was erected. The property was taken over, 1902, by the predecessor of the present company. The mine produced, 1864-74, upwards of \$500,000 worth of high-grade ore, ranging from 15 to 40% in copper, which was presumably shipped down the Colorado river to Guaymas, and thence to Swansea, for reduction.

Equipment: includes a 75 h. p. gasoline plant, with two hoists and a 5-drill air compressor. Buildings include a carpenter shop, smithy, 2 shaft houses and 3 dwellings.

Property considered as still unproven, churn-drilling being too limited to determine existence, or non-existence, of large orebodies, and the greater part of the area is unexplored.

Property was under lease to the Northwestern Leasing & Development Co. from October, 1915, to September, 1917, when the lease was surrendered. Since then no operations have been carried on at the property. The lessees, during their operations, shipped ore and paid royalty to the New Planet Co., which enabled it to pay off its debts and company now has about \$87,000 in its treasury, \$80,000 of which is in U. S. Liberty Bonds and U. S. Certificates.

March 1st, 1920, mine was taken under a 3 year lease by the Cons. Arizona Smelter Co. (q. v.),

NEW STATE MINING & REDUCTION CO.

ARIZONA

Idle. Office: 316 New England Bldg., Topeka, Kan.

Property: near Amadoville, Santa Cruz county, 26 claims, showing veins said to carry lead-zinc-copper ores, with gold and silver values.

Development: by 150' shaft with 950' tunnel.

Equipment: includes gasoline hoist and compressor. Was planning to erect a 100-ton dry concentrator to treat low-grade ores at last account.

NEW UNITED VERDE COPPER CO. ARIZONA.

Address: 707 Pemberton Bldg., Boston, Mass.

Officers: S. C. Mureh, pres.; L. N. Wombacher, v. p.; H. H. Patten, sec.-treas., with W. F. Burns and F. W. Farnum, directors.

Inc. in Arizona. **Cap.** \$1,000,000; \$1 par. Company reports that it incurs no debts and issues no financial reports.

Property: the Lucky Dime group of 14 claims, 280 acres, and the Logan mine, 7 claims, 140 acres, located 1½ miles from the Lucky Dime group, in southern part of Cherry Creek district, Yavapai county. The properties are 11 miles from Jerome.

Development: 216' shaft on Logan property, said by management to block out \$175,000 in gold ore. The Lucky Dime group has an 80' shaft and several test pits said to show copper, gold, lead and silver values.

Equipment: includes a 10-stamp mill on the Logan property.

Management plans starting operations after sale of stock has provided sufficient funds.

NEW YORK-ARIZONA GOLD & COPPER CO. ARIZONA.

Address: Morenci, Graham Co., Ariz.

Officers: A. L. York, pres.; J. F. Cleveland, v. p.; C. E. Tyler, sec.-treas.; John C. Molder, gen. mgr.; J. R. Wester, supt., at last accounts.

Inc. April 15, 1907, in Arizona. **Cap.** \$900,000; shares \$1 par.

Property: 30 claims, 600 acres, and a 150-acre mill site, 4 miles west of Morenci, in the Copper Mountain district, includes the Buzzard Shadow and adjacent groups. Claims show quartzite, shale and limestone cut by porphyry, with contact deposits, having orebodies, more or less developed, said to range from 10" to 4' in width.

Development: by tunnels, 100', 450' and 600' long and the Lillian tunnel, 1,800', claimed to show a vein carrying several ore shoots. There are 5 shafts, including the 260' Argentine shaft, said to show copper sulphides.

Equipment: includes a 15 h. p. gasoline hoist, 4 Nissen stamps and a tube-mill. Idle since 1917.

NEW YORK VERDE COPPER CO. ARIZONA.

Mail returned from Jerome, Ariz., and Kingman, Ariz. Is a reorganization of the Victor Copper Co.

Property: at Jerome, consists of 1,100 acres in the Southern Verde district Yavapai county, including 700 acres directly south of and adjacent to the Jerome Pacific holdings.

The Kingman property consists of 580 acres in the Maynard district, Mohave county, covering the Copper King vein. Company, at last accounts, drifting at 400' depth to cut the vein which is said to show 3 to 4' of copper ore in places. No recent information.

NIAGARA COPPER CO. ARIZONA

Dead. Mine near Bagdad, Ariz. See Copper Handbook, Vol. XI.

NIGHT HAWK LEASING CO. ARIZONA.

Address: James Z. McKenna, supt., Bisbee, Ariz.

Company has expended \$92,744 in development work and \$6,720 for equipment. Net return from 1920 smelter shipments amounted to \$95,275.

Property: a lease, until 1923, on the Night Hawk mine of the Phelps Dodge Corporation, in the Warren district.

Development: under way to depth of 750'. The main orebody said to average 10%. A strike of 20% copper ore was made late 1921.

Production: in 1920, 8,017 tons, yielded 7,019 oz. silver and 1,064,549 lb. copper.

Ore shipped to Douglas for smelting.

NORTH DOMINION C. MNG. & DEV. CO. ARIZONA

Mine at Radium Station, 3½ miles from Globe, Gila county, Ariz.

Officers at last account: L. L. Litchfield, pres.-act. treas.; A. Billard,

v. p.-act. sec.; with Wm. Richards, W. H. Mercer and C. S. James, directors.

Inc. July 31, 1916, in Arizona. Cap. \$5,000,000; 2,750,000 issued.

Property: 42 claims, about 800 acres, mostly on the east side of Pinal Creek, 3 miles north of Globe. The area is outside of the Globe district proper and is several miles from the producing mines of the Globe and Miami districts. Company claimed that it had spent \$20,000 on development to Dec., 1917.

Geology: claims said to show disabase and diorite cut by a mother-lode and offshoots from it. This lode is reported to be 20 to 80' wide and to carry oxidized ores of copper with some vanadium as well as silver and gold values.

Development: consists of 12 prospect shafts from 20 to 115' deep and 6 crosscut tunnels, the total results of 12 years' work, according to company's prospectus.

A report by J. E. Hurd, states "there is not in the whole district a property capable of producing a greater quantity of ore rich in the metals as the N. D. C. M. & S. Corp., which with careful management can be made to furnish work for several thousand people and to pay yearly very large dividends for a great number of years on the large and rich bodies of ore known to exist." Such statements are not only humorous, but in our opinion are gross exaggerations and not warranted by the limited development work done to date.

In August., 1919, 36 claims of property were advertised for Sheriff's sale to cover a judgment of \$2,405 obtained against company. No later information.

NORTHERN ARIZONA MNG. & ELEC. POWER CO. ARIZONA

Mail returned from Prescott and Supai, Ariz.

Officers: W. I. Johnson, pres., with Geo. Brookshea, W. P. Burke, W. C. Miller and F. Blucher, directors.

Inc. 1916, in Arizona. Cap. 1,000,000 shares; 50c par; pre-organization stock offered on the installment plan for 10c. per share.

Property: 5 claims, 100 acres, in Cataract Canyon district, Coconino county said to show deposits of lead-silver ore, with some vanadium in limestone.

Development: by tunnels, with total workings of 1,000'.

Equipment: includes a 20-ton mill, concentrate reported to assay 65% lead and 25 oz. silver per ton. No recent returns.

NORTH HILL-TOP EXTENSION MINING CO. ARIZONA

Address: San Simon, Ariz.

Officers: F. P. Crane, pres.; W. W. Howard, v. p.; G. H. Ebson, sec.; Jas. M. Hall, treas., with R. D. Hall, J. L. Hill and C. J. Olden, directors.

Inc. June, 1917, in Ariz. Cap. \$2,000,000 \$2 par.

Property: 30 claims, in California district, Cochise county, 20 miles S. W. of San Simon, said to show silver-lead ore in a number of veins.

Development: by several open cuts and test-pits only.

Is a speculative proposition. Presumably idle.

NORTH PINAL MINING CO. ARIZONA

Address: C. W. Cisnev, pres., Box 516, Phoenix, Ariz.

Property: formerly held by La Coronado Development Co., is in the Mineral Hill district 10 miles from Price, Pinal county.

Development: by a 300' shaft, shows a lens of copper ore at depth of 260' in the shaft, said to carry up to 70% copper. Ore is mainly hornite.

Equipment: includes a 25 h. p. gasoline hoist and an air-compressor. Idle.

NORTHWESTERN INSPIRATION COPPER CO. ARIZONA

Address: A. H. Hammond, mgr., Miami, Ariz.

Officers: L. J. Overlock, pres.; C. E. Lucas, v. p.; A. H. Hammond, sec.-treas., with I. P. Glass, J. D. Houston and A. C. McKillop, directors.

Inc. Jan. 31, 1916, in Arizona. **Cap.** \$1,500,000; \$1 par; 750,000 in escrow until 300,000 are sold.

Property: 23 claims, 483 acres, at Miami, Gila county, adjoining Inspiration Consolidated Copper Co. for about 4,500' on the north, and less than half a claim from the Black Warrior mine on the west. Examined by Carl Triechka and A. H. Hammond. Claims reported to show a deposit of disseminated copper ore in schist.

Development: by 500' shaft. A N. E. drift on the 300' level driven to reach the Black Warrior and Black copper veins was reported to have cut low grade sulphide ore at 550'.

NORTHWESTERN LEASING & DEVELOPMENT CO. ARIZONA

Described in Vol. XIII. Company had a lease on the New Planet copper mine, now leased to the Cons. Arizona Smelting Co., which see.

OATMAN AMALGAMATED GOLD M. CO. ARIZONA

Address: Flagstaff, Ariz. Sims Ely, mgr., Phoenix, Ariz.; E. A. Ritter, supt., Oatman, Arizona.

Officers: Sims Ely, pres.; T. A. Rickel, v. p.; Chas. Prochnow, sec.-treas., with Fred Hensing, Etienne A. Ritter, H. Babbitt and E. T. McGounigle, directors.

Inc. 1915, in Arizona. **Cap.** \$2,000,000; \$1 par; 226,441 shares outstanding. Treasury stock offered at 40c. per share in 1920. State permission to sell additional stock given late summer of 1921.

Property: 29 claims, 18 patented, 450 acres, 1 mile W. of Gold Road mine, at Oatman, Mohave county. Ore occurs in a quartz vein in andesite.

Development: by 640' shaft, with 960' of workings.

Equipment: 300 cu. ft. compressor, hoist, and 40 h. p. gas engine.

OATMAN CRESCENT MINING CO. ARIZONA

Mail returned from former **Address:** 25 Broad St., New York. **Mine office:** Oatman, Ariz.

Officers: Geo. W. Peirce, pres.-gen. mgr.; W. T. Esser, v. p.; Gowen Peirce, sec.-treas., with A. G. Reynolds, directors.

Inc. 1915. **Cap.** \$100,000; 10c. par; 650,000 issued. Security Transfer & Registrar Co., New York, registrar and transfer agents.

Property: 9 claims, 170 acres, 4 miles S. E. of Oatman, Mohave county, said to show 3 strong veins outcropping at surface for 3,000' in length and giving average assays of \$6.13 per ton in gold. The veins strike N. W. and dip steeply S. The Highland Chief vein, from 10-40' wide, consists of altered and brecciated wall rock with quartz and calcite, associated with black oxide of manganese.

Development: by tunnel, several shallow pits and openings, 1,200' of drifting and tunnel work.

Equipment: includes 50 h. p. engine, compressor, jackhammers, etc. Is regarded as a promising prospect. Idle and probably dead.

OATMAN-FEDERAL CO. ARIZONA

Address: Mrs. Ida J. Schultz, Kingman, Arizona.

Property in Union Pass section, San Francisco district, Mohave county. Reported October, 1921, that J. C. Callaghan, of Phoenix, with others, is preparing to finance this enterprise.

OATMAN GOLD MINING & MILLING CO. ARIZONA

Office: 1405 Corn Exchange Bank Bldg., Chicago, Ill. **Mine address:** Oatman, Arizona.

Officers: Geo. R. Turlev, pres.; H. B. Wilkins, sec. and E. McNeal, treas. Chas. H. Pugh, supt.

Inc. 1915, in Arizona. **Cap.** \$1,000,000; shares \$1 par.

Property: 10 claims, about 160 acres, in the Tom Reed-Goldroad min-

ing district, Mohave county, shows several well-defined veins with stringers of quartz and calcite carrying free gold.

The Kokomo vein is a fault fissure, 40' wide at surface, and said to show for 4,500' on company's ground, with strike N. 62° W., and dip 80° N. E. cutting the andesite, or occurring in a contact between rhyolite and andesite.

Development: by 500' shaft, sunk on the Kokomo vein in 1915, and N. and S. crosscuts.

Equipment: includes compressor and 25 h. p. hoist. Favorably reported on by E. W. Brooks.

No recent work has been done on property but equipment kept up pending resumption of development reported (Nov. 1, 1921) about to begin.

OATMAN GOLD TOP MINE

ARIZONA

J. P. Loftus and J. K. Turner of Goldfield, Nev., operators. Mine is in the Secret Pass district, 10 miles from Oatman, Ariz.

Has 30-ton ball and amalgamating mill, but whether it treated any ore cannot be said.

OATMAN-JUMBO M. & M. CO.

ARIZONA

Mail returned from Oatman, Ariz. Described in Vol. XIII.

OATMAN NORTH STAR MINES CO.

ARIZONA

Idle Address: Oatman, Ariz. A. O. Parsons, pres., with C. E. Gilman, R. R. Moore and Lloyd Trevis, directors.

Inc. 1915, in Ariz. **Cap.** \$150,000; shares 10c par.

Property: 17 claims, 250 acres, at Oatman, claimed to carry extension of Tom Reed vein system Sinking a 400' shaft, at last accounts.

OATMAN REVENUE MINES CO., INC.

ARIZONA

Name changed. November, 1921, to Katherine Revenue Mines Co., which see.

OATMAN SOUTHERN MINING & MILLING CO.

ARIZONA

Oatman, Ariz. **Property:** 11 claims, 220 acres, in S. W. end of Oatman camp, Mohave county, fully described in Vol. XIII. Operated intermittently, presumably owing to lack of funds.

OATMAN SYNDICATE MINING CO.

ARIZONA

Address: c/o Geo. W. Long, Oatman, Ariz.

Officers: J. L. McIver, pres.-mgr.; Geo. W. Long, v. p.; C. W. Haddon, sec.-treas.

Inc. Oct. 29, 1915, in Ariz. **Cap.** \$100,000; shares 10c. 500,000 shares issued. Valley Bank, Phoenix, Ariz., transfer agent.

Property: the Putney group, 11 claims, 4 patented, about 200 acres. 6 miles S. of Oatman, Mohave county, embraces about 3,500' on the main Black Range-Nellie lode system. Mine shows a quartz contact deposit surrounded by andesite, rhyolite and granite, with N. W. strike and dip of 45°.

Development: by 400' vertical shaft. Drifts run both ways on the vein from the 400' level.

Equipment: includes 40 h. p. hoist, 5 drill compressor and gasoline power. Idle.

OATMAN UNITED GOLD MINING CO.

ARIZONA

Address: Oatman, Ariz.

Officers: A. F. Andrews, pres.; O. Wimpenny, v. p.; L. Ashmun, sec.-treas.; J. K. Turner, cons. engr.

Inc. 1917, in Ariz. **Cap.** \$200,000; 10c. par, assessable; issued 1,588,143 shares. Assessment of ½c. per share called Dec. 1, 1920. Listed on Los Angeles Stock Exchange. Company took over the Oatman United Mines Co.

Property: 120 acres surveyed for patent, 1½ miles N. E. of Oatman, Mohave county, adjoining United Eastern on N. and Tom Reed on S. W.

said to show five gold bearing fissure veins in andesite and along andesite rhyolite contact.

Development: by shaft, to be sunk to 800 and 1,300' of crosscuts. Exploration by diamond drilling was underway in 1921.

Equipment: includes 5-drill compressor, 40 h. p. hoist and 50 h. p. hoist and 50 h. p. engine. A prospect.

OATMAN UNITED MINES CO.

ARIZONA

Company taken over by **Oatman United Gold Mining Co.**, which see.

OCOTILLO COPPER MINING CO.

ARIZONA

Office: 502 Corby-Forsee Bldg., St. Joseph, Mo. **Mine office.** Bisbee, Arizona.

Officers: R. A. Grant, pres.; C. A. Blair, v. p. T. G. Sorter, sec.-treas.

Inc. "under the common law" in Ariz. **Cap.** \$2,000,000; \$1 par; 1,000,000 shares in treasury. Stock offered the public, 1917, at 35c. a share, either on the installment plan or with a 10% discount for cash.

Property: 16 claims, about 320 acres, 4 miles from Bisbee, Cochise county. Formation said to be lime and granite-porphry.

Company's prospectus devoted mostly to the big producing mines of Arizona, their dividend records, etc., advises investment in the Ocotillo mine, which it states, "will prove as good as any of the large paying mines surrounding us, such as the Copper Queen, C. & A., Shattuck and the Sacramento."

This prospect is in an undeveloped area outside of Bisbee. Investors are warned to await results of development to at least 100' in depth.

OCTAVE MINES CO.

ARIZONA

Office: 882 Drexel Bldg., Philadelphia, Pa. **Mine:** Octave, Yavapai county, Ariz. J. Nelson Nevius, mgr., 809 S. Los Robles Ave., Pasadena, Cal.

Officers: H. C. Gibbs, pres., 60 State St., Boston, Mass.; H. S. Hopper, v. p.; D. S. Leas, sec.-treas.; R. M. H. Harper, Leroy P. Leas and S. T. Gibson, directors.

Inc. Feb., 1913, in Delaware. **Cap.** \$1,250,000; \$1 par; 950,000 shares issued. Bonded debt, \$300,000 1st gold 7s, dated July 1, 1913, due July 1, 1923.

Property: 380 acres in the Wickenburg district including the Octave gold mine, an old mine with a record of \$2,000,000 produced. Shows same geologic features as the Congress mine, 10 miles to east. The rocks are granite, intruded by acidic and basic dikes, including some of post mineral age.

Development: to depth of 2,000' and for 2,000' along the vein. To the east the veins were cut off by a fault. During 1915-17, new work found the veins beyond the fault and is said to have opened up an orebody 730' long on the 800' level. This ore is exposed on the 600' level and 9 raises are said to prove it between the levels. The same orebody is exposed for 300' on the 950' level, and the face of the drift is said to show 4½' of \$26.50 ore. Management claims the mine has positively developed 40,000 tons assaying \$13.89. with nearly all working faces in ore, and very important probabilities for further development.

Equipment: includes an old 40-stamp mill and cyanide plant, compressor, engine and drills.

OHIO ARIZONA COPPER CO.

ARIZONA

Address: Fred J. Siebert, Silver Bell, Ariz.

Property: in the Silver Bell range, Pima county, near Tucson, Arizona, has been worked intermittently for several years. A 400' shaft was sunk in 1919 and a 1,365' tramway from the mine to the road below was completed in 1920.

OHIO MINES CO.

Office: 614 Outlook Bldg., Columbus, Ohio.

Officers: H. W. Whitaker, pres.; L. W. Smith, v. p.; J. F. Rogers, sec.-treas.; preceding officers, R. S. Barbee, Thos. M. Murphy, W. G. Brossman, H. F. Rittenour, Anderson Skinner, and W. H. Jones, directors.

Inc. Jan. 1909, in Arizona. **Cap.** \$2,500,000; \$1 par; in \$200,000 preferred and \$2,300,000 common stock; issued 1,810,837 shares; \$250,000 first 7% mortgage notes, \$50,000 issued. Annual meeting, third Monday in January.

Property: 14 claims, partly patented, 400 acres in Yavapai county, with a 5-acre mill site, and water-rights on the Agua Fria river, 6 miles from the mine, in the Big Bug district, Yavapai county. Property was bought of the Jessie Mines Co., described in Vol. VIII.

Ore: gold, with small silver values occurring in granite.

Development: by 3 shafts, 659', 206' and 200' deep, with 7,000' of workings, and the mine is said to have produced upwards of \$750,000 in gold, under an ownership previous to that of the Jessie Mines Co. Property under lease to Chaparral Mining Co., which did some development work in 1916. Idle owing to lack of funds.

OLD DOMINION CO.**ARIZONA**

Office: 50 Congress St., Boston. **Mine and works office:** Globe, Gila county, Ariz.

Officers: Chas. S. Smith, pres. Walter Douglas, v. p.; with Cleveland H. Dodge, Cleveland E. Dodge, A. C. James, E. H. Ferry, and J. Waldo Smith, directors. Wm. M. Bradley, clerk; Chas H. Altmiller, asst. clerk-treas.; John MacNair, comptroller; W. G. McBride, gen. mgr.; I. H. Barkdall, mine supt.; H. H. Colley, smelter supt.

Inc. Jan. 15, 1904, in Maine. **Cap.** \$8,750,000; \$25 par; all issued and fully paid, as of July 12, 1921. Annual meeting last Wednesday in March. Stock listed on Boston and New York Stock Exchanges. Bankers Trust Co. and old Dominion Co., transfer agents; Hanover National Bank, New York, and National Shawmut Bank, Boston, registrars.

Financial statement: years ending Dec. 31.

Assets

Year	Property	Equip.	Metals	Supplies, Cash and etc.	accts. rec.	Total

*Loss

Reported that, through its selling agents, Phelps Dodge Corp., company has taken a \$550,000 interest in the \$40,000,000 8% note issue of the Copper Export Association.

Dividends: 50c. in 1905 and 1906; \$1 in 1907; 50c. in 1908; \$1.50 in 1909, 1910 and 1911; \$14 in 1912; \$5 in 1913; \$4 in 1914; \$5 in 1915; \$12 in 1916; \$8 in 1917; \$4 in 1918; a total of \$14,405,260. Quarterly dividend due in March, 1919, was indefinitely postponed on account of metal market conditions.

The company was formerly a securities-holding corporation only, organized to promote the operations of the **Old Dominion Copper Mining & Smelting Co.**, of New Jersey, and **United Globe Mines** holding about 96% of capital stock of former and all of that of latter; but early in 1917 it acquired all the assets of the Old Dominion Copper subject to its liabilities, paying \$10,000,000 in cash, also acquired all of the assets of the United Globe except one claim at \$5,000, subject to its liabilities, at a valuation of \$4,995,000. By this purchase the Old Dominion Copper and the U. G. mines were eliminated as separate organizations and the charter of the former was surrendered; duplication of office work and double taxation on the same income, were eliminated also.

Property: formerly owned by O. D. C. M. & S. Co., 38 claims and fractions, 5 millsite claims, and 4 placer claims, all patented; included in these is the Old Dominion mine at Globe; the Old Dominion and Keystone claims, 3½ miles north of Globe and the Continental mine at the head of Webster gulch, about 18 miles west of Globe; also the Chicago & New York group of 60 acres and the Geneva mine. The property formerly owned by United Globe Mines, consisted of 60 claims and 4 mill sites, lying west of the Old Dominion group, including the Grey Buckeye and Buffalo claims.

Geology: at the Old Dominion mine, the principal ore zone occurs along a big fault vein having a N.-E. strike with sharp easterly dip. The hanging wall is limestone and quartz, with footwall of diabase of more recent age, faulting evidently occurring both before and after the intrusion of the diabase. The ore favors the hanging wall, but also occurs in lenses along the bedding planes of the limestone and in shattered quartzite, the largest lens yet developed being 60x100x200' in size. The oxidized ores are mainly cuprite associated with a little malachite and chrysocolla in a gangue of iron oxides and quartz.

Sulphide ores first appear at a depth of about 350', as chalcocite, with gangue of pyrite and quartz, the lower workings also showing chalcopyrite. All ores are most or less argentiferous, and as a rule, are highly silicious requiring heavy lime and iron fluxes in smelting.

Development: 24,321' in 1917; 22,163' in 1918; 25,844' in 1919; 31,626' in 1920.

By August, 1919, the A shaft was enlarged to 5 compartments between No. 18 and 19 levels, and its depth was 70' below No. 19. Little work of importance was done above the 14th level; on the 1½ level near B shaft some small bodies of smelting ore were opened up. On the lower levels the greater part of the work was confined to the 16th, 17th and 18th levels east and the 17th and 18th levels west; the winze on the west side was sunk from the 18th to 20th level and a little drifting and crosscutting done on the 19th and 20th levels. Considerable work was done on the 18th level west, but what ore was discovered was very irregular and did not extend far above that level. The developments on the east side of the mine particularly on the 17th and 18th levels may be considered highly satisfactory, the ore maintaining a good copper content. The fact that Arizona Commercial a little farther east has developed rich ore on its lower levels promises well for further work on the O. D. east side. Development of the U. G. ground is mainly through the workings of the Old Dominion. The Kingdon 1,200 and the Grey are the operating shafts and

they connect with the 1,200' of the O. D. mine. There are a number of smaller shafts and several tunnels not in present use.

The production of copper from direct smelting ores has decreased somewhat during the past few years, due largely to the disappointing developments in the smelting ore zone between the 18th and 16th levels west; the tonnage developed has been small and grade of ore has been below the average prior to 1918.

In 1920, there was an encouraging discovery of 8% smelting ore on the 19th level W. and an excellent grade of ore across an unusually good vein width was uncovered on the 16th level E. near the Arizona Commercial line and on which the two properties are connected. On the 19th and 20th levels, the Maggie vein was developed from A shaft.

No important changes have been made in mining methods and the heavy wet ground on the west side is still worked by square sets and filling, while the more solid ground on the east side of the mine is stoped by cut and fill with out timber.

The "A" shaft, or main working shaft, on the eastern side of Pinal creek, in the west section of the mine, is connected with the principal workings by underground trolley lines, including a line to handle the ore of the Gladiator mine, which has yielded a notable quantity of smelting ore, and large quantities of concentrating ore. "A" shaft has 5 compartments, 2 equipped for skip hoisting, 2 with cages for lowering men and supplies, and 1 for air and steam lines, water columns and electric cables. Ore and waste, hoisted to surface, is handled in skips.

Ore Reserves: at the end of 1919 were 18,000 tons of smelting ore, 1,172,053 tons of concentrating ore, and 80,000 tons of mixed ore; reserves of former two classes were increased considerably during 1920.

Equipment: at "A" shaft includes a steel engine house, built 1910, having a 17"x31"x48" compound hoist, good for 2,000' depth.

"B" shaft, on the eastern side of Pinal creek, bottomed on the 14th level, has 4 compartments. "C" shaft has a 100,000 cu. ft. fan for ventilation, and is bottomed on the 14th level. "D" shaft, 300' deep, is located on the western side of Pinal creek, about 2,000' west of the most westerly previous workings. The "K" shaft, 1,400' deep, also has a ventilating fan. The Transit shaft is about $\frac{1}{2}$ mile east of "A". The Grey shaft has a 75 h. p. electric hoist.

Pumping: the mine is very wet, the daily average amount of water pumped being 5,237,000 gal. in 1920. The company sells part of the water pumped to the Miami C. Co., but receipts from this source reimburse it only to a slight extent for the pumping expense.

The mine is equipped with pumps of about 20,000,000 gals. capacity daily, these including a 1,500-gal. pump on the 10th level, having a 12' water column, discharging 30' above the collar of the shaft into a storage tank, whence water is drawn for use of the mill and smelter. There are 4 steam pumps on the 12th level, having a rated capacity of 8,000,000 gals. per day, with 4 Gould electric pumps, 2 on the 10th and 2 on the 14th levels. On the 18th level there are two 1,200 gals. per minute quintuplex electric pumps. New centrifugal pumps were added, 1916, driven by power generated by a Diesel engine. An electrical centrifugal pump was added in 1918.

Early in 1916 drilling in Pinal creek proved the existence of a badly broken and porous area under the creek near the mine workings. Management has been grouting this ground with slime from the mill, thus reducing flood-water entering the mine from this point. Up to 1918 a total of 2,015' of holes was drilled in the creek bed, and 23,000 tons of slime run into this area through the holes.

Mill and smelter: the mine, mill and smelter are connected by a private railway, equipped with a locomotive and 50-ton ore cars.

A new crusher plant and sampling mill were erected in 1913. Capacity is 150 tons per hour. In 1914 a 600-ton concentrator, using a 300-ton flotation plant to extract copper from the slime, was completed. The old 300-ton concentration mill, erected 1909, will be maintained as a reserve for test purposes.

The smelter does custom work, and was formerly an extensive purchaser of sulphide ores for fluxing the oxidized ores of the Old Dominion and United Globe mines, but these mines developed large quantities of sulphides in the lower workings.

The smelter has 8 double storage bins, holding 1,000 tons of coke, limestone and ore. Mixing, weighing and charging are done automatically, requiring a force of only 4 men. There are 5 blast-furnaces, 3 being 44" x198" at tuyeres, and the other 2 being 44"x231", set tandem, with settlers between, charged automatically from side-dumping cars. The furnaces have a nominal capacity of about 2,400 tons daily, but one furnace is held in reserve. Fuel is New Mexico coke. The smelter is served by an electric locomotive and three 3,000-lb. tilting cars for charging, with a steam locomotive and dump-cars for slags.

In the converter department acid converting was abandoned in January, 1913, and one stand of the basic converter type has handled all of the production since that time and has been particularly successful. A shell removed in 1915 from the stand has been there for 30 months without patching and had during that time produced over 70,000,000 lbs. of copper. Shells are handled by a 40-ton electric traveling crane. The converters take 50% matte, and turn out blister copper of 99.5% copper carrying a little silver.

The power plant at the smelter includes a 2,300 k. w. generator and two 750 k. w. generators, direct-connected to horizontal low-pressure steam turbines, utilizing exhaust steam. All machinery, except hoist and compressors, is actuated electrically. There is a 30 drill compound air compressor, with intercooler and water-jacketed air cylinders, and a complete electric light plant; 5,000 cu. ft. air compressor has also been installed. Furnace blast is supplied by blowers of 45,000 cu. ft. per minute aggregate capacity and an 18,000 cu ft air compressor furnishes converter blast. Fuel oil is used for the boilers.

Production: smelter tonnage is larger than mine tonnage because the smelter treats a considerable amount of custom ore; the tonnage concentrated also includes custom ores.

* Costs not published.

Production in 1918 included 5,071 oz. gold and 184,981 oz. silver; 5,756 oz. and 137,071 oz. in 1919; 3,484 oz. and 181,010 oz. in 1920.

In May, 1921, stockholders were given opportunity to buy 52,929 treasury shares at par before July 12, on the basis of 1 share for each 5 shares already held. Sale is reported to have been successful, company netting \$1,323,225.

Ore reserves in the Old Dominion property are usually sufficient for at least 2 years, production at the normal rate. It is not advisable to have reserves for a longer period than this as it is too expensive to keep the ground open. Ore has been found continuously and consecutively on all levels down to the 18th, (1,400') level, and company has found no difficulty

in opening ore as required. Indications are that production will increase in the future rather than decrease. Management is exceptionally capable and efficient.

Operations, except development, were suspended in April, 1921.

OLD DOMINION COPPER MINING & SMELTING CO. ARIZONA.

Fully described in Vol. XIII.

OLD DOMINION EXTENSION COPPER CO. ARIZONA

Dead. Described in Vol. XIV.

OLD DOMINION EXTENSION MNG. DEV. CO. ARIZONA

Mail returned from office, at Globe and also from Miami, Ariz.

Officers: J. F. Chisholm, pres.; R. G. Thomas, v. p.; L. M. Greenstein, sec-treas.; all of Miami, Ariz., with W. P. Geary, F. Gill and A. R. Malone, directors.

Inc. 1916, in Ariz. **Cap.** \$5,000,000; shares \$5 par; 474,000 in treasury. 226,000 shares given for property were reported in escrow for an unstated length of time.

Property: 600 acres, adjoining and dovetailed into Old Dominion C. Co. ground, at Globe, Gila county.

Development: by tunnels and several shafts, one 125' deep, sunk in quartzite and entering limestone. A 200' drift along the quartzite limestone displacement was reported to show several pockets of ore and an average sample of the black oxide of manganese found showed 13 oz. silver.

Is a prospect. Company probably dead.

OLD HICKORY COPPER CO. ARIZONA.

Address: 17½ Howe St., Passaic, N. J.

Officers: Jas. V. Parber, Passaic, N. J., pres.; J. G. Wigg, v. p.; John Post, v. p.; P. Wannemacher, sec-treas. John Parber, supt.

Inc. in Arizona. **Cap.** \$5,000,000; \$1 par; fully paid; issued 1,650,000 shares.

Property: 41 claims, 600 acres, 35 miles S. of Tucson, Pima county, and 8 miles from the S. P. R. R.

Development: 3,000' of tunnels, shafts and open cuts. The main shaft, the Jackson, was 190' deep in Nov., 1918. Prospectus states the vein widened from 1" at the 110' level to nearly 1' at 160' depth. On 150' level claimed to have 2' of copper sulphide in east drift and 1' in west drift.

Equipment: includes an air-compressor, drill, sinking pump, hoist and an auto truck.

Shipments made in 1919. While the mine is still a prospect awaiting development to prove its value, the management seems to be sincere in its beliefs and aspirations for making a mine.

OLD PUEBLO MINING & MILLING CO. ARIZONA.

Address: J. M. McBride, sec., Tucson, Ariz.

Property: 5 patented claims, Pima county, 5 miles W. of Tucson developed by the 517' Quien Sabe shaft and a tunnel. A 70' shaft cut, at depth of 30', a 15 ton pocket of chalcocite, assaying 33% copper, 16 oz. silver and \$2.50 gold per ton.

Idle for years, but company still in existence. Mine was formerly operated by Tucson Cons. C. Co., fully described in Vol. XIV.

OLD VESUVIUS MINE ARIZONA.

Address: C. H. McMahan and brothers, owners, Kirkland, Yavapai county, Ariz.

Property: the City Group, known as the Old Vesuvius, 9 claims, unpatented, 9 miles S. E. of Kirkland. Shows 4 veins at contact of diorite and granite, and of diorite and quartz diorite. Developed by several shallow incline shafts. Small shipments made in 1916-1917 are reported to have carried from 4-7 oz. gold per ton. Assessment work only being done since 1917.

- ORION MINING & MILLING CO.** ARIZONA.
Succeeded by Gold Dust Mining Co., which see.
- ORIZABA MINING CO.** ARIZONA.
Dead. Described in Vol. XIII.
- ORO BELLE DEVELOPMENT CO.** ARIZONA.
Dissolved. See Vol. XIII, also **Oro Belle** and **Gray Eagle** group.
- ORO BELLE & GRAY EAGLE GROUP.** ARIZONA.
Idle. Address: Mrs. Hattie Barnes, owner, care Theron Davis, 170 Broadway, New York. Mine formerly owned by Tiger Gold Mng. Co.
Property: 10 patented claims, 172 acres, 5 miles S. E. of Crown King, Yavapai county, shows pyrite and chalcopyrite in fissure veins, 2-15' wide. Veins strike N., dip 60° W. Ore is said to assay \$20 gold, 2 oz. silver and 1% copper per ton.
Development: by 8 tunnels, longest 1,000', and a 600' shaft.
Equipment: includes a 50 h. p. steam hoist, compressor and 20-stamp mill.
Production: 19,010 lb. of copper, 9,937 oz. silver and 4,313 oz. gold in 1907; 3,639 oz. silver and 1.23 oz. gold in 1908; 4,820 lb. fine copper, 2,725 oz. silver and 1,226 oz. gold in 1909. Mine credited with total production to date of \$700,000. Property was idle until Oct. 1915, when leased to Oro Belle Dev. Co. Again idle in 1917. Some work done in 1918; now idle.
- ORO COBRA MINING CO.** ARIZONA.
Address: Mrs. Thos. Wilkinson, pres. and gen. mgr., 715 High St., Burlington, Iowa. Mine near Wenden, Yuma county, Ariz.
Inc. Oct., 1901, in Arizona. **Cap.** \$1,500,000; \$1 par; fully issued. Annual meeting, second Tuesday, in February.
Property: 14 claims, 280 acres, in the Tank Pass section of the Har-cuar mountains, Ellsworth district, 12 miles west of Wenden, Yuma county. The claims show diorite, schist, granite and porphyry, with several fissure veins, from a few inches to 20' in estimated average width, carrying oxidized ores near surface, said to assay 12 to 15% copper, and \$1.50 to \$80 per ton in combined silver and gold values, with chalcopyrite, at shallow depth. Mine is opened by shafts of 250', 150' and 40', and a tunnel of 110', with 700' of total workings. Only assessment work done in recent years.
- ORO GRANDE MINES CO.** ARIZONA.
Idle. Office: Clinton, Ia. Mine near Wickenburg, Maricopa county, Arizona.
Officers: at last account, G. E. Lamb, pres. and treas.; Geo. B. Upton, v. p. and gen. mgr.; F. W. Ellis, sec.; and T. G. Norris, Prescott, Ariz., directors.
Inc. 1901, in Arizona. **Cap.** \$3,000,000; \$10 par; issued \$2,500,000. Is a close corporation, controlled by 6 shareholders. Annual meeting, second Tuesday in January.
Property: 9 claims, patented, 161 acres, in the Black Rock district, Yavapai county, shows contact deposits between diorite and hornblende schist. The vein estimated by management as 170' wide, traceable 4,400', and carries oxidized ores, bornite and chalcocite, with gold values.
Development: by shafts of 320', 100' and 100', with about 8,000' of workings, reported to have blocked out 980,000 tons of ore.
Equipment: includes a 55 h. p. gasoline plant at the mine, with a 15 h. p. hoist and 5-drill Sullivan air-compressor. The 50-ton mill has ten 1,050-lb. stamps with a 40 h. p. gasoline engine.
- ORO MINE.** ARIZONA.
Address: G. B. Williams, owner, 316 Meigs St., Rochester, N. Y.
Property: the Oro mine, 10 claims, 6 patented, at Old Glory, in the Oro Blanco district, 30 miles west of Nogales, Santa Cruz county. Mine

shows 3 parallel fissure veins from 6 to 30' wide. Vein on which most of the work has been done is 16' wide, with a 5' paystreak of silicious sulphide ore carrying copper, lead and gold.

Development: carried on since 1911, consist of a 350' shaft with 2 levels and ground opened for stoping. In 1916, a drift on vein at 350' said to have followed a paystreak assaying 3% copper, 5% lead and \$20 gold.

Equipment: includes pumps, tramway, mill and dam. Mine has produced about \$50,000 worth of ore to 1916.

Owner plans sinking winze and continuing drift on vein on 350' level.

ORO-PLATA MINE **ARIZONA.**

Now a part of holdings of **Golconda Ext. Mng. Co.**, which see.

OVERLAND MINING CO. **ARIZONA.**

Mine near Winkelman, Ariz., adjoins the London Range mine of the London Arizona Copper Co. and "79" mine on the south and west. Claims said to carry an extension of the main dike system of the London range, showing metamorphic contact orebodies. Hayden Junction is the nearest railway point. Mine reported under lease to M. H. Murphy and W. E. Dunlap, of Kingman, at last account.

OWL HEAD COPPER CO. **ARIZONA.**

Office: Cameron Michel & Co., 8 West 40th St., New York. Mine near Red Rock, Pinal county, Ariz.

Officers: Wm. P. Michel, pres.:

Officers: Wm. P. Michel, pres; J. E. Michel, v. p.-treas.; T. M. Simon-ton, sec., with J. B. Wright and Ralph Cameron, directors.

Inc. 1910. in Arizona. **Cap.** \$10,000,000; shares \$1 par; 3,160,000 issued. Registrar & Transfer Co., transfer agent.

Property: 24 claims, the Apache Princess group, in the Tortillita mountains, Owl Head mining district, 16 miles N. E. of Red Rock.

Development: by 150' shaft. Presumably idle several years.

Promoted by Cameron, Michel. & Co.

OXIDE COPPER CO. **ARIZONA**

Office: A. C. Burrage, owner, 85 Ames Bldg., Boston, Mass. Mine at Silver Bell, near Red Rock, Pinal county, Ariz. Albert C. Burrage, pres.; Chas. D. Burrage, sec.-treas.

Property: 46 claims, patented, known as the Copper Prince group, in the Silver Bell district, 7 miles south of the Imperial mine, shows contact metamorphic deposits carrying argentiferous copper sulphides in limestone gangue.

Development: by a 500' shaft and a 350' tunnel, with about one-half mile of workings.

Equipment: includes gasoline power and an air compressor.

Production was 49,676 lb. copper and 103 oz. silver in 1918, and less than \$3,750 worth of ore in 1910; none reported since. Idle.

PACIFIC COPPER MINING CO. **ARIZONA.**

Mortgage foreclosed by bondholders and company defunct. Fully described in Vol. XIV.

PALO VERDE COPPER CO. **ARIZONA.**

Office: Akron, Ohio, C. H. Howland, Cuyahoga Falls, Ohio, mgr.

Officers: J. P. Loomis, v. p.; I. M. Shively, sec., with Chas. Currie. E. E. Quirk and C. H. Howland, directors.

Inc. in Arizona. **Cap.** \$2,000,000; shares \$1 par; issued \$1,000,000.

Property: 8 claims, is a copper prospect about 60 miles N. of Phoenix, in the Saddleback Mtns., between White Tanks and Eagle Tail districts, Maricopa county.

Mine is opened by shafts of 50, 112 and 210' depth and a 130' tunnel. Surface ores said to contain 2 to 15% copper. Plans to resume work.

PAN-AMERICAN MINING CO. **ARIZONA.**

Is a close corporation. C. P. Collins, pres., Tulsa, Okla.

Cap. \$600,000; shares \$1 par.

Property: 8 patented claims, near Prescott, Yavapai county, developed by several thousand feet of underground workings. Ore contains gold, silver, lead values, mostly of milling grade. Mine idle for several years.

PARADISE GOLD MINING CO.**ARIZONA.**

Idle.

Address: Box 1095, Phoenix, Ariz. F. Obermuller, v. p.-mgr.; Jos. L. Obermuller, cons. engr.

Property: 6 claims and 3 mill sites in Paradise Valley district, Maricopa county, 23 miles from Phoenix, said to have 2 parallel veins about 300' apart, traceable at surface for 3,000', 45' wide at depth of 100' and averaging about \$5 in gold. Stock offered to the public at 25c., Feb., 1917. No later information

PARADISE MINING CO.**ARIZONA.**

Paradise, Cochise Co., Ariz., was controlled through ownership of 60% of stock, by Bisbee-Sonora Development Co., fully described in Vol. XII.

PATAGONIA MINES & DEVELOPMENT CO.**ARIZONA.**

Office: formerly at Patagonia, Santa Cruz county, Ariz.

No information since 1914; probably dead; described in Vol. XIII.

PATAGONIA-SUPERIOR COPPER CO.**ARIZONA.**

Subsidiary of **Magma Copper Co.**, 14 Wall Street, New York. Organized October, 1919, to exploit the **Three R. mine**. W. C. Browning, pres. mgr., Superior, Arizona.

Property: the Three R. mine, 55 claims, about 1,000 acres, on the westerly slope of the Patagonia mountains, 9 miles S. of Patagonia, Santa Cruz county, at an elevation of 5,000'.

Geology: Claims show alaskite with small, irregular areas of trachyte and rhyolite porphyries. Ore occurs mainly along several lodes in a N. S. shear zone as chalcocite in high-grade shoots and also disseminated, low-grade values. The first orebody opened had stopes 70 to 80' long and 40' wide, extending from the 50' to the 400' level, and a second parallel re-shoot, 100' from the first, was 23' wide and carried 8% ore.

Development: the Colossus tunnel, Evening Star tunnel, and the 260' Colossus shaft, with total underground workings of 10,000'. Practically all the high-grade ore has been mined. Considerable diamond drilling was done during 1920. Results were not encouraging and all in November.

Equipment: includes a 50 h. p. oil-type hoist at the Colossus shaft, 40 h. p. and 60 h. p. oil-type engines operating individual belt driven air-compressors, dwellings, etc.

Production: to end of 1919, 109, 714 tons averaging 5.07% copper.

PAYMASTER SILVER-LEAD CO.**ARIZONA.**

Address: Charles Blemman, pres., Tucson, Ariz.

Property: at Olive Camp, 25 miles S. of Tucson, developed to depth of 330'. Ore is a lead-copper sulphide, with some zinc blende. Shipments made to El Paso.

PAYROLL MINE CO.**ARIZONA.**

Address: Chloride, Ariz.

Inc. 1920 in Delaware. **Cap.** \$1,000,000; 50c. par.

Property: 1½ miles E. of Chloride, Mohave county.

Development: by 400' vertical shaft. On the bottom level over 290' has been driven in ore, the shoot being from 1 to 8' wide. At 200' the vein was 12' wide for 290'. Minerals are mostly zinc, with a little gold and silver.

Equipment: electric hoist, compressor, etc.

Production: totaled \$50,000 to end of 1916. Shipments were made to the mill at Needles. Operations reported resumed in 1920 and shaft being sunk to 600' level.

P. D. EXTENSION COPPER CO.**ARIZONA.**

Mail returned from Morenci, Ariz., marked "out of business". Described in Vol. XIII.

PEABODY CONSOLIDATED COPPER CO.**ARIZONA.**

Office: 111 Broadway, New York. **Mine office:** Johnson, Cochise Co., Ariz.

Officers: at last accounts: Leo. Schlesinger, pres.; Alex. T. Wells, v. p.; I. Niner, sec.; J. Born, treas., at last account, with Jos. B. Mayer, Morgan J. O'Brien, Jr., Herbert R. Limburg, G. M. Minzesheimer and Jas. Muir, directors. John H. Banks, cons. engr.

Inc. in Ariz. **Cap.** \$1,500,000. \$5 par. Empire Trust Co., New York, transfer agent. U. S. Corporation Co., registrar.

Property: 12 claims, 5 patented, 230 acres, covering 2,000' along the ore belt at Johnson camp, bought of the Bonanza Belt Copper Co., includes the Peabody mine, located 1879. Mine has a contact deposit between diabase and limestone and replacement veins, all within a 100' belt. Mine is credited with a production of about \$411,970. Ore is a mixture of zinc blende and chalcoppyrite in a garnetized lime gangue and is oxidized to a depth of 200'. The ore shipped claimed to run 4-6% copper, with 5% iron, 15-20% lime and 55% insoluble; silver averages $\frac{1}{2}$ oz. to each percent copper.

Development: by a 350' shaft, with crosscuts on the 200 and 300' levels, No ore reserves reported.

Equipment: includes 90 h. p. power plant, compressor and hoist.

Shipments: in 1917 were 300 tons per month to the El Paso smelter under a 3-year contract. Shipping in 1919.

Prospectus issued by company was regarded as rather unduly optimistic. Property is an old one, having been operated intermittently for 20 years.

PEAK SILVER MINING CO.**ARIZONA.**

Address: J. E. Pierson, gen. mgr. Prescott, Ariz.

Inc. 1920, in Arizona.

Officers: H. H. Keays, pres.; Chas. A. Weidler, sec.-treas.

Property: 62 claims, 1,220 acres on the Hassayampa river in Yavapai county, 10 miles S. of Prescott. The Black Horse mine developed by a 130' shaft, is said to show a 3' vein of high grade silver ore. Extensive development planned, but no recent report received, except that company was in legal difficulties, October, 1921.

PECK CONSOLIDATED SILVER MINES.**ARIZONA.**

Fully described in Volume XIV. The Peck mine has recently been acquired by the Bishop-Edwards company. Reported operating in a small way, early 1921.

PHILADELPHIA MINING CO.**ARIZONA.**

Mine address: Geo. P. Harrington, mgr., Crown King, Yavapai county.

Property: a lease on the Gladiator and War Eagle mines, formerly owned by the Nelson Mining Co. between town of Crown King and mine of that name. Has fissure vein 3' wide, developed by 2 tunnels, 225' apart vertically, the upper 1,000' long, and 300' incline shaft on vein. Drove a lower tunnel, 4,165' long, to cut ore zone 800' below old mine workings exposing 5' of gold-bearing ore, and developing a large flow of water, that is a desirable asset.

Numerous assays show gold and silver in commercial quantities; also some lead, zinc and copper. Ore was sent to the flotation mill of the Bradshaw Reduction Co. at Crown King, adjoining the Philadelphia mine. The zinc-content, a detriment in the past, is valuable, forming by flotation a concentrate desired by smelters.

Equipment: includes 25 h. p. gasoline hoist and air compressor. Company employs an average force of 15 men.

PHOENIX GOLD MINING CO.**ARIZONA**

Address: Cave Creek, Maricopa county.

Property: consists of vanadium bearing claims.

PINAL DEVELOPMENT CO.**ARIZONA.**

Address: 1401 No. 3rd St., Phoenix, Ariz.

Officers: J. C. Devine, pres.-treas., and mgr.; E. A. Tovrea, v. p.; C. T. Carpenter, sec.; E. M. Blake, J. H. Robinson, E. P. Palmer and Arthur Luhrs, directors.

Inc. Dec., 1915, in Arizona. Cap. \$1,500,000; \$1 par; 700,000 shares issued.

Property: the Renfro group, 47 claims, 940 acres, near Hayden, adjoins the Troy-Manhattan at Troy, nearly due E. of Ray, Pinal county.

Geology: ore occurs on contact between limestone and shale, as irregular replacements on bedding plane. Ore horizon is 15' thick, and ore carries oxidized copper minerals, no sulphides being found. Ore runs 10 to 20% copper with low gold-silver values.

Development: by several tunnels, main one 1,600' long, with about 2,500' of workings to depth of 600'. In June, 1917, a 3' streak of high-grade copper ore was struck, and a raise and winze were driven on it. Production started September, 1917.

Property regarded as a legitimate mining venture. No recent returns available.

PIONEER MINING & SMELTING CO.**ARIZONA.**

Offices: 1178 Broadway New York.

Officers: Garret B. Kip, pres., Tarrytown, N. Y.; W. C. Moore, sec.-treas., with G. H. Corwin and Edward Benedict, directors.

Inc. Aug. 19, 1913, in Arizona, as a reorganization of the Pioneer Smelting Co., which went into bankruptcy in 1913. Cap. \$1,000,000; \$1 par; \$690,647 issued.

Property: formerly held by the Pioneer Smelting Co., 14 claims, 260 acres, included the Plumed Knight mine, sold to Mr. Barnsdall of Pittsburgh in 1917, and the Gould mine, also sold, 1917. Mines fully described in Vol. XII.

Company owned a 150-ton custom smelter, 1½ miles west of Sahuarita, and 20 miles south of Tucson, on the Twin Buttes railroad, which was reported sold, 1919.

PITTSBURGH-JEROME COPPER CO.**ARIZONA**

Mine office: Chas. Arata, supt., Jerome, Yavapai county, Ariz.

Officers: Wm. M. McJunkin, pres.; C. A. Cooper, v. p.; E. F. Thompson, sec.; F. J. Toufel, treas., with D. M. Clemson, W. H. Nimich, W. L. Rodgers, John McLeod, Chas. J. Graham, Geo. A. Magoon and E. W. Gwinner, directors.

Inc. 1904 in Arizona. Cap. increased, March 9, 1906, to \$3,000,000; \$1 par; all issued. Union Trust Co., Pittsburg, registrar. 1,000 shares sold for \$51 the lot at auction in New York, Oct. 15, 1921.

Property: 21 claims, 387 acres, lying 2 to 3 miles S. of Jerome, Yavapai county, nearly N. W. of the Black Hills property, and about midway between the United Verde and Equator mines.

Development: by main, or 500', and the lower, or 900', tunnels and the 900' Pittsburgh shaft, said to show argentiferous and auriferous sulphide ore of about 4% copper tenor at 358' depth.

The 500' or main tunnel, 1,279' long, connects with the shaft. An east drift on this level shows copper carbonate; the west drift is in diorite. Several veins were cut, said to show leached ore average 2%; selected sulphide ore carried from 6 to 30% copper, \$2.50 gold and 75c silver per ton, leading the management to hope for increased values below water level.

Equipment: includes a 150 h. p. Fairbanks & Morse hoist, 650 cu. ft. compressor and electric power.

Holdings sold at sheriff's sale May 19, 1921 to Harry B. Wassell, who acquired title on judgement for \$173,445. This will, it is reported, be followed by a reorganization of the company.

PITTSBURG MINING & MILLING CO.**ARIZONA**

Oatman, Ariz. **Officers** P. L. Hughes, pres.-treas.; L. G. Rose, sec.; **Inc.** Jan. 31, 1912, in Arizona. **Cap.** \$1,500,000; outstanding April 1, 1916, \$723,300; shares \$1 par, assessable. Security Transfer & Registrar Co., New York, transfer agent and registrar. Listed on New York Curb as a prospect, but stricken off on Dec. 26, 1919.

Property: 11 claims, 220 acres, in Yavapai county, 1 mile W. from Gold Road and 1½ miles N. W. from Oatman, is said to show 3 distinct veins.

Development: 300' double compartment vertical shaft, sunk on E. end of Pittsburgh claim between main and hanging-wall veins; water prevented sinking deeper; at this level 125' of work has been done, but to date the ledge where opened has been low-grade. Total workings, about 1,000'.

Equipment: includes a 20 h. p. gasoline hoist.

PLOMO KING MINES CO.**ARIZONA**

E. S. Rhodes, pres., New Philadelphia, Ohio.

Property: in Vulture district, Maricopa county, about 20 miles S. W. of Wickenburg. Ore is silver-lead.

Development: by two-compartment shaft. Shipments to be made to El

Paso.

PLUMED KNIGHT MINE**ARIZONA**

Sold in 1917 to Mr. Barnsdall of Pittsburgh, Pa.

Mine, formerly owned by Pioneer Mng. & Smelting Co., is 18 miles from Tucson, Pima county, in the San Xavier district.

Development: by shafts to about 350' depth shows ore rich in iron, lime and silica at and above 100' level, succeeded by bornite at depth. Ore said to average 4% copper with small gold-silver values.

Small shipments made in 1919.

POCAHONTAS COPPER QUEEN MINING CO.**ARIZONA**

Mine office: Mayer, Yavapai county, Ariz.

Officers: W. H. Skinner, pres. and gen. mgr.; T. J. Buras, v. p.; D. A. Chapin, sec.; Benj. A. Brown, treas.; D. M. Rock, eng.

Inc. 1906, as successor of Big Bug Gold & Copper Mining Co. **Cap.** \$1,000,000.

Property: 14 claims, 3 miles S. E. of Mayer, in 2 groups, about 1,000' apart. The smaller group of 4 patented claims carries gold-copper ore. The Spar group of 10 claims has a vein up to 14' in width, carrying mainly gold, silver and lead, and the mine is said to have shipped 23 carloads of high-grade ore, under former ownership, that gave sufficient returns to pay the purchase price and the cost of development.

Development: by 200' two-compartment shaft and a 120' shaft. A level at this depth was extended to develop 2½' of ore, said to assay \$49 in gold, silver, lead.

Equipment: 50-ton mill was installed in 1920 and reported producing a concentrate running 44 oz. silver, \$10 gold, 6% copper, and 11% lead.

Property has been worked in a desultory fashion for years.

POLAND MINING CO.**ARIZONA**

Was a subsidiary of the Dev. Co. of America, now dead. Fully described in Volume XIV. Property sold and company out of existence.

POLARIS MINING CO.**ARIZONA**

Idle. **Office:** 520 Lyceum Bldg., Duluth Minn.

Officers: W. A. Eaton, pres.; J. O. Davis, v. p.; G. L. Maycroft, sec.-treas.; above with A. E. Fritz, G. A. Eaton, O. E. Dahly, B. P. Wheeler and G. D. Tulian, directors.

Inc. 1916, in Minn. **Cap.** \$1,000,000; shares \$1 par; 294,281 issued. Company is successor of the Summit Gold Mng. Co., which in turn succeeded Summit Copper Co. Stockholders of Summit Gold Mng. Co. were offered stock in Polaris, share for share with payment of 25c a share.

Property: the Klondyke mine, 21 claims, 5 patented, about 400 acres and a mill site, in the Virginia district, Mohave county, about 22 miles N. W. of Chloride, the nearest railway station.

Ore: is a gold-bearing quartz occurring in a vein up to 50' in width. In 1897, a 10-stamp amalgamation mill was erected near the property, and mine is credited with production of 3,000-4,000 tons of ore running from \$8 to \$37 per ton. Gold is finely disseminated and, as only a 32% extraction could be made, operations were suspended.

Development: by 300' tunnel.

Transportation, water, etc., are some of the difficult problems confronting the company.

POMEROY-PRUDENTIAL COPPER CO.

ARIZONA

Offices: Hornell, N. Y., and Superior, Ariz.

Officers: K. Pomeroy, pres.; J. T. Rurey, v. p.; E. Pomeroy, sec.; I. N. Brill, treas.

Inc. 1917, in Arizona. **Cap** \$1,500,000; 750,000 in treasury; 50,000 shares sold at 25c each.

Property: 9 claims, Pioneer district, Pinal county, 3 miles W. of Silver King, and known as the Silver Bell and Sulphide group, in the Pioneer district, 3½ miles N. W. of the Magma mine.

Development: 130' adit on Silver Bell group shows some copper glance ore with silver values. A 120' adit on a 4' vein on the Sulphide group shows 4% copper ore, and a 110' shaft will cut this vein at 200'. Several prospect shafts 10-20' deep show low grade copper ore.

Properly shut down during 1921, but assessment work done and taxes paid. Operations to be resumed 1922.

PORPHYRY CONSOLIDATED COPPER CO.

ARIZONA

A consolidation of Porphyry Copper Co. and Barney Copper Co.

Address: Box 1419, Globe, Arizona.

Officers: J. D. Coplen, pres.; J. B. Coplen, v. p.-gen. mgr.; K. W. Holbert, sec.-asst. treas.; E. T. Wilder, treas.-asst. sec., with Thomas Wight, directors.

Inc. 1919, in Arizona. **Cap.** \$5,000,000; \$1 par; offered at 40c per share, October, 1919. On June 2, 1919, Barney shareholders decided to re-organize under the new name. Each share issued by the Barney was exchanged for 3½ shares in the Porphyry Consolidated, and each share of Porphyry Copper was exchanged for 1½ shares of Porphyry Consolidated.

Property: 35 claims, 454 acres in the Barney and 113 acres in the Porphyry, 3½ miles N. W. of Miami, Gila county, main shaft being 400' from Inspiration Consolidated ground.

Development: on the Porphyry—a 775' shaft is said to have passed through 60' of carbonate and 85' of chalcocite. Workings total 2,000'. A winze sunk 225' below the 650' level is said to be in ore all the way. The Van Dyke shaft is 300' deep.

Equipment: pipe-line, telephone-line, and dwellings; 50 h. p. engine, hoist and compressor, etc.

Holdings reported sold to Inspiration Cons. Copper Co. in 1921 for \$1,000,000.

PORPHYRY COPPER CO.

ARIZONA

Absorbed by Porphyry Consolidated Copper Co., which see

PORTAGE LAKE & BISBEE MNG. CO.

ARIZONA

Office: care John Funkey, Hancock, Mich. **Mine address:** Bisbee, Ariz. Chas. Lewis, treas.

Inc. April, 1903, in Arizona succeeding Portage Lake & Calumet Development Co. **Cap.** \$1,000,000; \$1 par.

Property: 12 claims, 3 fractional, 191 acres, several patented, 3 miles S. E. of Bisbee, S. E. of Warren Dev. Co., in Cochise county, showing limestone, with a porphyry contact. The mine has a 2-compartment 302' shaft, with a small compressor, pump, 75 h. p. hoist, etc. Inactive many years.

POTTS CANYON MINING CO.

ARIZONA

From our files it appears that an attempt to sell some of the worthless shares of this concern resulted in F. D. Ryan of 1482 Broadway, New

York, and two others, being indicted by the Grand Jury at Baltimore, Md. Supposed to have owned a property in Pinal county.

POWERS GULCH DEVELOPMENT CO. ARIZONA

Idle. John Matson, supt., at last accounts.

Property: 23 claims in Powers gulch near Globe, Gila county, is said to show a vein carrying bornite and chalcocopyrite ore associated with pyrite. Mine idle for a long time, was reopened in 1915 and a strike of tungsten ore reported in April, 1916.

Development: by 2 shallow shafts and 2 short tunnels.

PRINCE ALBERT MINING & MILLING CO. ARIZONA

Property disposed of. Described in Vol. XIII.

PRINCE OF ARIZONA MINING CO. ARIZONA

Owned by Chas. C. McGinnis and Wm. E. Thomas. Company has stock selling permit from Arizona Corporation Commission.

Property: 20 claims in Maricopa county in foothills of the Bradshaw mountains, 31 miles N. W. of Phoenix and 8 miles N. of Beardsley, the nearest rail point, shows a series of parallel quartz veins in Yavapai schist opened (April, 1920) by shallow workings. A shipment of sorted ore averaged 52.7% lead, 39.7 oz. silver and \$5 gold; vanadium is said to be present.

PRUDENTIAL COPPER MINING CO. ARIZONA

Office: 322 Federal St., Chicago, Ill. **Mine office:** 9 Bashford Bldg., Prescott, Ariz. H. H. Linney, agt.

Officers: Shea Smith, pres.; F. B. Gibbs, sec.; G. H. Jenkins, v. p.-treas.; with W. H. Newhall, M. N. Murphy, Mrs. Emma S. Jennings and Mrs. E. A. Ewing, directors.

Cap. is 500,000 shares, and company is controlled, through the ownership of 422,778 shares, by the Estate of Maj. Shea Smith.

Property: 12 claims, patented.

Idle for years.

QUAKER GOLD MINES CO. ARIZONA

Address: care Thos. J. Brodnax, Board of Trade Bldg., Kansas City, Mo.

Property: 10 claims, patented, the Gold Note and Richinbar mines, 12 miles from railway, in Harper district, Bradshaw Mts., Yavapai county, Ariz., shows quartz vein carrying gold ores, reported to average \$8 per ton.

Development: 5,000' of work, in shafts, levels and tunnels.

Equipment: includes 20-stamp mill, hoist, etc., with electric power. Is a big low-grade proposition.

QUEEN BEE MINE ARIZONA

Address: M. B. Dudley, owner, Mineral Park, via Kingman, Ariz.

Property: an old silver-gold mine sold in August, 1919, by James Un-capher. Surface outcrops were rich, and lessees in recent years have extracted considerable shipping ore.

QUEEN CALUMET COPPER EXTENSION CO. ARIZONA

Address: 121 So. Central Ave., Phoenix, Ariz., or Bisbee, Ariz.

Officers: Jas. Wood, pres., P. L. Woodman, v. p.-gen. mgr.; J. F. Cleveland, sec.; Chas. A. McDonald, treas., with A. K. Stacy, W. W. Perkins and W. W. Searles, directors.

Inc. Dec. 12, 1916, in Ariz. **Cap.** \$1,500,000; shares \$1 par.

Property: the Don Luis group of patented claims, about 421 acres and the Gold Knob group of 253 acres in the Warren mining district, Cochise county. Structural geological conditions said to warrant drilling.

QUEEN COPPER MINING CO. ARIZONA

Property sold to **Magma Copper Co.**, and company liquidated.

QUEEN CREEK COPPER CO. ARIZONA

Address: Phoenix, Ariz.

Officers: A. Mackay, pres.; W. C. Foster and F. S. Stephen, v. p.'s; Arthur J. Smith, sec.-treas.-mng. director, with C. A. Stauffer, J. W. Cren-

shaw and C. M. Shannon, directors; C. H. Smith, supt., Superior, Ariz. W. E. Defty, cons. engr.

Inc. May 3, 1916, in Arizona. **Cap.** \$1,000,000; shares \$1 par; 564,965 shares outstanding. Listed on New York Curb as a prospect. Equitable Trust Co., New York, transfer agents; U. S. Corporation Co., New York, registrar. Annual meeting, first Monday in May.

Balance sheet dated March 31, 1921, shows cash and sundry accounts, \$1,857; accounts payable, \$299; loans and interest accrued, \$113,868.

Property: 17 claims, 9 patented, on Queen Creek, 1 mile from Superior, Pinal county said to have a contact fissure carrying gold-silver-copper values.

Development: 800' shaft, with 1,200' of drifting on contact vein at various levels. On 600' level a South drift was driven 307'. All work was suspended in 1920, awaiting more favorable market conditions.

RADIUM MINES CO.

ARIZONA

Address: W. H. Mercer, mgr., Globe Ariz.

Property: 60 claims, 4 miles north of the Old Dominion mine, Globe, Gila county, said to show vanadium ore in a vein or mineralized fault zone in diabase. The ore shows galena associated with iron oxide and manganese; vanadinite occurs as crystalline incrustations around other minerals, but has not yet been found in commercial quantities.

No recent information.

RAINBOW MOUNTAIN MINING CO.

ARIZONA

Described in Vol. XIII.

Company liquidated and property conveyed to a new company, the Montoro Mining Co.

RANDOLPH-GEMMILL DEVELOPMENT CO.

ARIZONA

Fully described in Vol. XIV. Company was organized to mill the tails of an old mill and the ore of an old mine dump, which was exhausted in 1917, and company is now practically defunct.

RANIER DEVELOPMENT CO.

ARIZONA

See Ranier Mines Corporation.

Office: 216-27 School St., Boston, Mass.

Officers and directors: S. J. Gnash, pres.; W. W. Gnash, v. p.; W. A. Dean, sec.-treas.; S. J. Gnash, mgr.; W. T. Gnash, supt. Wenden, Arizona.

Inc. July 1, 1914, in Arizona. **Cap.** \$3,000,000; \$1 par; 1,878,496 shares outstanding of which 1,777,238 shares are pooled. Annual meeting, February 15th.

Property: 44 claims including the Big Four, about 860 acres, in Ellsworth district 12 miles N. of Wenden, Yuma county. Ore occurs in exposed veins carrying gold-silver-copper-iron. The main vein is reported exposed at surface for 80-250' in width. Country rock is granite-schist, shale, porphyry and limestone. Two small shipments averaged \$59 per ton.

Development: totals 2,000' of workings, including several shafts, deepest 500' and a 130' tunnel.

Reported on by J. H. Shockley.

RANIER MINES CORPORATION

ARIZONA

Address: 216-27 School St., Boston, Mass.

Officers: S. J. Gnash, v. p.-mgr.; W. A. Dean, sec.-treas., with Angus MacEachern and W. W. Gnash, directors. W. T. Gnash, supt.; J. H. Shockley, cons. engr.

Inc. Oct., 1917, in Arizona. **Cap.** \$5,000,000; \$1 par; outstanding 3,000,000 shares, Jan. 1, 1921. Bonded debt, \$500,000 ten-year 8% Gold Bonds, dated Dec. 1, 1920. Listed on Boston Curb. Transfer office, Metropolitan Trust Co., Boston. Registrar, Equitable Trust Co., Boston. Annual meeting, second Tuesday in January.

Company is a holding company owning 98% of stock of Ranier Dev. Co. (which see), and 90% of stock of Harqua Hala Ridge M. & M. Co. (Property near Wenden, Yuma county.) The Critic mine in Cunningham Pass district, Yuma county, was acquired in 1920.

In a 45-page prospectus, the president of the company says, "The Corporation's vast holdings of 1,630 acres, comprising 90 mining claims in the very heart of the copper-gold producing district, with 2,500 outcroppings of copper ore, and 250 veins already exposed—one of them 290' in width at one place, warrant the prediction that Ranier will soon rank as one of the biggest and richest copper-gold mines in the State of Arizona." The original promoters received 2,000,000 shares for their holdings.

Promoters issue a house organ "Ranier Mining News", containing many optimistic statements, presumably intended for the stockholders.

RAY-ARIZONA COPPER CO.

ARIZONA

Address: Fritz Bock, Jr., mgr., Kelvin, Arizona.

Officers: Fritz Bock, pres.; M. A. McCabe, sec.

Property: 42 claims, on the south side of the Gila river, opposite Kelvin, Gila county, shows monzonite porphyry in mineralized granite with impregnations and veins carrying copper ore.

Development: by tunnel, shaft and churn-drilling.

Lessees shipped several cars of copper ore in 1916 to Hayden smelter. Idle.

RAY BOSTON COPPER CO.

ARIZONA

A reorganization of the Kelvin-Sultana Copper Co.

Address: Suite 400, 372 Boylston St., Boston, Mass. C. E. Hart, mgr., Box 995, Miami, Ariz.

Officers: A. H. Westfall, pres.; O. M. Gale, v. p.; G. O. Swarts, sec.; G. P. Baldwin, treas., 732 Monadnock Block, Chicago, Ill. C. E. Hart, gen.-mgr.; E. P. Worthington, supt.

Cap. \$5,000,000.

Property: 21 claims and 3 fractions, 530 acres, all patented but 2 claims and fraction, in Ray-Kelvin district, Pinal county.

Company also owns 30 acres of gold and silver lands in Ures district of Mexico.

The Arizona mines were formerly known as the Riverside and Bryan groups, and are across the Gila river from and 1½ miles S. E. of Kelvin. Management reports 21 contact deposits, between granite and diorite, of which 5 veins have been developed; reported as 18" to 6' wide, and estimated to average 5' in width, with a generally N. W. trend. The property also was said, formerly, to show a 6' vein carrying chalcocypite in the lower workings, from which shipments to the Humboldt smelter returned 8.7 to 10.6% copper. Average tenor of ore in all veins is estimated by the company at 6% copper and 3 to 4 oz. silver per ton. From published reports the deposits appear to be gash veins, pinching out at shallow depth.

Development: by 6 shafts, deepest 590' and the Hunter and Agnes tunnels, with about 10,000' of underground work. Crosscuts on the 540' level, driven 2,000' and 1,267' are reported to have intersected 3 veins. Old workings are described in Vol. XIII of this book.

Equipment: includes a 575 h. p. oil-burning electric plant, a 1-mile aerial tram across the Gila river to the railway station of Kelvin and a concentrator of 200 to 300 tons daily capacity.

Production: of old company, to end of 1909, was 422 tons of ore, yielding \$12,450. Production in 1907 was 45,838 lb. fine copper and 653 oz. silver. Daily shipments of 20 tons to the Hayden smelter were made in summer of 1913. The mill has been closed down until sufficiently large reserves have been blocked out to insure profitable operation.

To March, 1921, the new owners did 1,417' of diamond drilling in one hole at an angle of 68° to meet No. 2 vein.

RAY BROKEN HILL MINING CO.

ARIZONA

Address: Ray, Ariz.

Officers: Frank Schilling, pres.; H. H. McDonald, sec.-treas., with E. T. Ferguson, W. F. Gordon and Dr. Crawford, directors. Scott Lintner, mgr.

Property: 8 claims, unpatented, adjoins Ray Cons. on the east; also 10 claims in the Alma group. The ore is gold and copper.

Development: by a 1,200' tunnel.

Work was suspended on original holdings after an unfavorable report by C. P. Berkey, and L. D. Huntoon, late in 1919, and equipment acquired by Dripping Springs Copper Co. in 1920.

Company intends to acquire other holdings and has made application for patent on the claims adjacent to and covering the tunnel. A lease on the Little Bobbie claim was allowed to lapse.

RAY CENTRAL COPPER CO.

ARIZONA

Idle. Formerly the Finney Copper Co.

Address: Box 488, Phoenix, Ariz.

Officers: E. O. Petro, pres.; A. G. Dulmage, v. p.; H. T. Weldon, sec.-treas.-mgr., with W. O. Temple, directors.

Inc. May 20, 1916. **Cap.** \$150,000; 10¢ par; 700,000 outstanding. Annual meeting first Tuesday in May.

Property: 13 claims, 260 acres in Banner district, Gila county, said to show gold-silver-copper ore in a contact deposit in diabase and lime.

Development: by 165' shaft; and drifts on that level. A prospect.

RAY CENTRAL COPPER MINING CO.

ARIZONA

Company conveyed by direct deed all assets to Ray Consolidated Copper Co. in June, 1912.

RAY CONSOLIDATED COPPER CO.

ARIZONA

Office: 25 Broad St., New York. **Mine office:** W. S. Boyd, mgr. Ray, Pinal county, Ariz. **Mill office:** Hayden, Gila county, Ariz.

Officers: Sherwood Aldrich, pres.; D. C. Jackling, v. p. and managing director; Chas. Hayden, second v. p.; preceding, with Chas. M. MacNeill and W. Hinckle Smith, executive committee; Eugene P. Shove, sec.-treas.; L. S. Cates, gen. mgr.; preceding with Spencer Penrose and Seeley W. Mudd directors. R. C. Gemmel, asst. mng. dir.; W. S. Boyd, mgr.; C. A. Smith, supt. of mines; H. C. Smith, mill supt.; D. D. Moffatt, cons. engr. mills.

Inc., May 11, 1907 in Maine. **Cap.** \$16,000,000; shares \$10 par; \$15,711,790 issued. Original capital, \$6,000,000, increased to \$8,000,000 in 1908; increased 1909 to \$10,000,000; increased May, 1910, to \$14,000,000. The increase to \$16,000,000, March, 1912, was to provide shares for absorption of the Ray Central C. M. Co., giving 1 share of Ray Cons. for 8 of Ray Central. Company absorbed the Gila Copper Co., through exchange of stock, giving 1 share for 3. Company owns entire capital stock of the Ray & Gila Valley Railroad Co., \$1,785,100. Bankers' Trust Co., New York, and Boston Safe Deposit & Trust Co., Boston, registrars; Guaranty Trust Co., New York, and Old Colony Trust Co., Boston, transfer agents. Fiscal year, formerly ending June 30, now ends with the calendar year. Shares are listed on the New York and Boston Stock Exchanges. Annual meeting, formerly held, 4th Tuesday in September, is the 3rd Friday in April.

Range of shares during 1920 was \$22¾ and \$10½; low; total sales in New York were 349,695 shares. Range in 1921, to Oct., 15, was \$15 to \$11¾.

In Feb., 1921, company took a 4% interest, \$1,600,000 total amount, in the Copper Export Association's \$40,000,000 8% note issue.

Comparative Gen'l Balance Sheet, including Ray & Gila Valley R. R. Co.

The total to Dec. 31, 1920 was \$25,412,621.

A sinking fund of 10c. per ton of dry ore treated to extinguish cost of development was in effect from 1914 to 1916, increased to 12½c. a ton each year after 1916, except in 1919 when it was 15c. It seems improbable it will ever be needed.

Property: 1,971 acres of patented mineral land at Ray, 127 acres at Ray Junction for railroad purposes, and a tract of 4,164 acres in Gila and Pinal counties, at Hayden and 21 miles from the mines, for milling and power-plant and tailing disposal; 536.5 acres of this are leased to the A. S. & R. Co. for its smelter.

About 580 acres of the Ray property have been proven to be mineralized, and about 183 acres have been developed, with a certainty that more or less of the additional mineral ground will be found to carry workable deposits.

Geology: The ore deposit is almost identical with that of Miami, and genetically similar to those at Bingham, Ely, and Morenci. It is a flat orebody 150 to 500' thick, 1,000 to 3,000' wide and about 9,000' long, through the property. This zone consists essentially of a highly metamorphosed iron-stained schist, intruded by a granite mass, whose borders and tongues are also mineralized and cut by diabase dikes. A fault east of the orebody brings the orebody against quartzite and limestone, while unaltered schist is found to the west. The silicified and whitened rock is leached to a considerable depth, the oxidized zone being succeeded by impregnations and seams of chalcocite and pyrite. Oxidized copper ores are found near surface, though in much of the ground the top of the belt is leached to depths varying from 30 to 400' and averaging 225', this leached zone being succeeded by ore carrying copper sulphides, greatly enriched by the secondary redeposition of chalcocite, latter constituting the main ore value. At the bottom of the orebody the transition from the ore to rock mineralized with primary sulphides takes place in a few feet. This primary mineralization averages about one-half of 1% copper, whereas an average sample of ore on the 50' level gave 2.4% copper, 3.4% iron, 2.6% sulphur and 90.3% insoluble matter.

See also Professional Paper 115 of U. S. Geological Survey, 1919, by F. L. Ransome.

The many drill-holes bored have shown an average capping of 240' depth, succeeded by an average of 118' thickness of ore, on the Ray proper, with 315' of capping and 171' thickness of ore on the Gila ground. The Ray mine has been developed by both underground workings and extensive churn-drill borings. Six churn-drills have been employed, averaging about 50' each daily, boring several hundred holes to an average depth of nearly 400' each, with a total of 140,000' of drilling, holes being bored checkerboard fashion, in 200' squares.

Development: by shafts Nos. 1 and 2 about 4,000' apart, and No. 3, the Ray Central shaft, near No. 1. No. 4 Man shaft, 547' deep, sunk in the western portion of the mine and capable of handling 37 men per trip, went into commission in 1918. There are many less important workings. The ore supply now comes almost equally from the No. 1 and the No. 2 mines. The No. 3 mine furnishes a smaller tonnage of high-grade ore. No. 1 shaft is 400' deep and has 4 levels at 171' and each succeeding 100' in depth. The shafts are connected by a drift, on the second level, which is run for more than 1 mile, practically through commercial ore. By the side of each shaft is an incline shaft, with a series of stairs used by the men and a haulage way used for the hauling of material, the main shafts, being used solely for ore-extraction. The greatest depth from which ore is to be hoisted will be about 300' for years to come, and the greater part of the tonnage will be taken from the 170' level and above for some years.

During 1919 and 1920, development was largely of routine nature, but at No. 2 mine preliminary work was done to open more ground on the 3rd level and to open the 4th level. No exploratory work was performed in this period.

The Ray mine, of which the Ray Central or Globe-Isabella mine is now an integral part, has been developed for a maximum width of 3,500' and length of 8,000'. Progress in development may be shown as follows:

Year	Year's Work		Total Devel.		Total Exhaust.		Total Rem. miles
	feet	miles	miles	miles			
1920.....	38,600	148	80	68			
1919.....	31,079	140.5	75.5	65			
1918.....	61,711	134	69	65			
1917.....	84,915	123	63	60			
1916.....	66,863	107	54	53			
1915.....	45,292	94			

Ore Reserves: Jan. 1, 1921, total ore reserves to date were 83,004,043 tons, averaging 2.068% copper and underlying an area of 205.2 acres. The higher grade orebody developed by No. 3 shaft, contained Jan. 1, 1914, approximately 540,000 tons of ore averaging slightly over 5% copper. The total reserve tonnage ensures a life of about 23 years on basis of normal production, averaging 10,000 tons per day. There is a large area tributary to No. 2 shaft where there are good reasons to expect additional tonnages.

Equipment: the mine is operated electrically throughout, taking current over a transmission line from Hayden to Ray. There is a crushing plant at the mine, reducing ore to about 1" size before shipping to the mill.

The Ray & Gila Valley R. R. delivers the ore from mines at Ray to Ray Junction from where it is transported by the Arizona Eastern R. R. to the mills at Hayden. The R. & G. is standard gauge, equipped with 80 lb. rails, Mogul locomotives and 60-ton steel ore cars, and is operated as a common carrier. Late in 1920, Ray Cons. purchased a large part of ore hauling equipment and will operate its ore haulage service under a trackage license.

Concentrator: at Hayden, is in its essential features, a duplicate of the Garfield mill of the Utah Copper Co.

The mill, of 10,000 tons daily capacity, has eight units, and is so designed that it may be enlarged, on the unit plan. The crushing department

has 16 sets of 42x16" rolls, and 24 six-foot Garfield Chilean mills. Sizing is done by 48 impact screens, and Janney classifiers, and concentration is effected by Garfield roughing tables, Harz single compartment jigs, Wilfley tables, and Isbell vanners. Water, derived from the Gila river, is sent to a 4,000,000-gal. reservoir at the mill site through a 30" pipe, by pumps having a capacity of 7,500 gals. per minute.

The mill started in March, 1911, treating an average of 850 tons of ore daily. The concentrates are well adapted to smelting, as regards sulphur and iron content, only a small amount of limestone being required for fluxing. Concentrates are treated in the Hayden smelter, owned by the American Smelting & Refining Co.

The power-plant at the mill-site, of 10,000 h. p. capacity, supplies electric current for the operation of the entire property. The plant has water-tube boilers, and four 2,500 h. p. triple-expansion engines, direct-connected to four 1,750 k. w. electric generators; recently added, one 7,500 k. w. Parsons turbine direct-connected to a 6,600 volt generator. Oil and coal were formerly used for fuel, but a sure and steady supply of fuel oil for the future being uncertain, the company jointly with the Chino Copper Co. and the A. S. & R. Co., took over July 1, 1917, the coal fields formerly owned by the Victor American Fuel Co., in the Gallup district, N. Mexico. The Gallup-American Coal Co., with capital of \$4,000,000, was organized to handle this property.

*Does not include Federal income and profit taxes. †First quarter.

Copper is sold through the new agency of Guggenheim Bros.

Mine cost includes coarse crushing and loading on cars at mine, 5.8¢ per ton in 1920. Total cost calculated from income statement includes all operating charges. Cost per pound does not include credits for gold and silver, nor for miscel. income, equal to 0.579¢ per lb. in 1920. Low recovery in 1915 due to construction work in mill improvements at a time when the price of copper made it more profitable to overload such sections as were not undergoing repairs.

In 1920 production of silver was 4,365 oz., sold at 100.45¢ per oz., and 643 oz. gold at \$20 per oz.

With the signing of the Armistice, Nov. 1918, the demand for copper ceased abruptly, and to avoid a large surplus of unsold metal, production and operations were reduced approximately 50%, beginning the year 1919. Operating costs have decreased slightly. Production during the last few years has surpassed that of Chino and Nevada Cons., both older mines. The company has more constructive possibilities than any of the four porphyries. Equipment in every department is now practically complete and construction expenditures hereafter will be relatively small.

The tonnage already developed places the Ray Consolidated among the great copper mines of the world, standing sixth in point of ore reserves, with a certainty that the present enormous ore tonnage will be increased, and a possibility that it may be doubled. The management is practically the same as that of the Utah Copper Co., the pioneer among the so-called

porphyry mines of the world, and is thoroughly experienced, strong and capable.

Operations during 1919 were about 50% of normal and by the end of 1920 they were further reduced to 40% and entirely suspended in April, 1921. For the 1st quarter of 1921, there was an operating deficit of \$181,296 and for the 2nd quarter, \$370,210, which included \$289,994 for shutdown expense.

RAY HERCULES COPPER COMPANY

ARIZONA

Succeeded by Ray Hercules Mines, Inc.

The Ray Hercules Copper Company was formed in 1915. The intervention of the war delayed construction and development and, at the same time, the company lost the sale of a year's production at the high metal prices then prevailing.

In this situation certain directors and creditors of the Company evidenced their confidence in the property and their good will toward stockholders by personally procuring from time to time the funds necessary for additional costs, development and operation.

In this way, over the period ending July 1921, \$2,287,562 had been advanced by the directors and creditors on the Company's notes, for which advances they took as security the \$3,000,000 7% First Mortgage Bonds of the Arizona Hercules Copper Company which, under the plan proposed to the shareholders under date of March 7, 1921, was deposited as collateral for a proposed issue of the same amount of bonds of the Ray Hercules Copper Co. bearing 8%. This plan of March 7, 1921 was approved by the stockholders but on account of the unfavorable conditions then existing, sufficient subscriptions were not received to permit the plan to be carried out, and the proposed Ray Hercules Copper Co. bonds were, therefore, never issued.

Ray Hercules Copper Company had 1,500,000 shares outstanding. The shareholders were given the privilege upon surrender and cancellation of their old stock, to subscribe to one share of the new stock for every two shares of the old stock held by them, upon payment of \$1 per share for the new stock. The money so paid went into the treasury of the new company. The creditors of the old company foreclosed the mortgage on the properties through the Empire Trust Company as Trustee under the Deed of Trust, and the Trustee transferred the entire assets to the Ray Hercules Mines, Inc. for \$1,000,000 bonds and 250,000 shares of its stock. The properties represent a cash expenditure of over \$4,000,000 aside from what was paid for the mineral claims and mine.

RAY HERCULES MINES, INC.

ARIZONA

Office: 24 Broad St., New York. Mine at Ray, Arizona.

Officers: J. G. Hopkins, Pres., E. P. Earle, V. P., L. G. Doane, Treas., Wm. P. Maloney, Sec. **Directors:** J. G. Hopkins, E. P. Earle, Frank C. Armstrong, Geo. A. Huhn, W. F. Bartholomew, August Heckscher, Jos. B. McCall, Robert Linton, Managing Director, T. A. Wilson, Gen. Mgr.

Inc. Feb. 1922, in Delaware. Capital, 1,200,000 shares, \$5 par. 650,000 shares outstanding. \$1,000,000 First Mortgage 10-year convertible 8% bonds dated November 1, 1922. In Treasury: 200,000 shares capital stock for conversion of bonds at \$5 per share, \$300,000 cash and 350,000 shares of treasury stock.

Property: Formerly owned by Arizona Hercules Copper Co. includes 207 acres in the heart of the Ray district, Pinal county, Arizona, surrounded by the holdings of the Ray Consolidated Copper Co. 1,500 acre mill site at Ray Junction, 6 miles S. E. of mine. Mineral land shows Pinal schist, in part capped by dacite, conglomerate and wash, and invaded by diabase. Ore developed is an extension and part of the Ray Consolidated ore body.

Ore Reserves: In 1915 Henry Krumb made a report, after drilling 27 drill holes, estimating that by connecting up 17 of these holes there were 3,428,774 tons of developed and partially developed ore assaying 2.36% copper. "There is no doubt that further drilling will increase the present ore reserves as the above ore is all developed on 13.37 acres out of a total acreage of 207.24 acres. Unquestionably the area to the east and southeast of that already developed is very promising and on the whole I consider the property of great merit."

In June, 1921, Robert Linton reported 3,916,000 tons averaging 2.42% copper, as wholly or partly developed by churn drill and underground work. From this, 172,000 tons of 2.2% copper ore has been mined, leaving 3,744,000 tons of 2.43% copper.

Development: by a vertical main hoisting shaft 862' deep at N. W. corner of property and a second shaft 543' deep. Both connect with the main haulage level 472' below collar of main shaft. Also by churn drilling with holes 200' apart, and by over 22,000' of underground work.

Equipment: at the mine includes a double-drum, electrically-driven Nordberg hoist, capacity 300 tons per hour and an electrically-driven compressor plant.

The coarse crushing plant has a No. 8 Gates gyratory crusher and rolls, product going to the sampling mill and main ore bin, capacity 5,000 tons. The crushing plant can handle 3,500 tons per day. Mine and mill are served by the Ray & Gila Valley R. R., the Ray Hercules owning connecting standard-gauge railroads at either end, a total length of 3 miles, bridge and railroads, heavy main line S. P. construction. Mine is equipped with electric haulage system.

Concentrating Mill: At Ray Junction. Comprises 3 units with daily capacity of 600 tons each. First section went into commission August 12, 1918, the third about the middle of September. Equipment includes 3 No. 86 Marcy Mills, 3 six-foot Hardinge mills, 15 Diester-Overstrom tables, 42 flotation cells, 9 Dorr classifiers, 3 Oliver filters and 2 Connersville blowers for the flotation machines. Jigs have been recently added increasing the recovery of native copper of which the ore carries considerable quantities. The mill recovery was 85.8% in August 1919, treating 1.81% ore and making a 26.8% concentrate. Ample water supply is obtained from the Company's main pumping plant on the Gila River at Ray Junction.

Production: begun August, 1918, was 4,994,355 lbs. copper in 12 months of irregular operations. Up to May 1, 1920 when, by reason of the copper market, operations were suspended, total output was about 8,000,000 lbs. copper.

Old Company started production too late to enjoy the war prosperity of other copper producers. It therefore had to contend with depressed copper market of 1919-20 and did not have the opportunity to get on a satisfactory earning basis.

New Company has on hand as of April 5, 1922, \$300,000 cash and 350,000 shares of treasury stock, so that it is in good position to resume operations when the copper metal market warrants.

The Company can easily produce 1,000,000 pounds of copper per month. It is managed by experienced copper men and has good prospects.

For description of property and smelter, see Ray Hercules Copper Co., on preceding pages.

RAY-KELVIN MINING CO.

ARIZONA

Address: 418 National Bank of Arizona Bldg., Phoenix, Ariz.

Inc., March, 1918, in Arizona, by Wm. E. Cogdell, A. L. Kelly and John L. Pascale, for the purpose of operating a lead-silver property of 24 unpat-

ented claims, 6 miles N. of Kelvin. In Nov., 1918, H. E. Easterday asked that a receiver be appointed for the company. No later information.

RAY SILVER LEAD MINING CO.**ARIZONA**

Address: 215 Noll Bldg., Phoenix, Ariz.

Officers: William McDermott, pres.; J. E. Rowlands, v. p.; J. H. Page, treas.; H. H. Smith, sec.-asst. treas., with A. W. Lautz, directors.

Inc. Dec., 1916, in Arizona. Cap. \$1,500,000; \$1 par; 723,805 shares outstanding; \$94,950 8% convertible mortgage bonds outstanding.

Property: 48 claims, 960 acres, 2 miles E. of Ray, Pinal county, on top of high limestone mountains. Shows replacement deposits of high-grade lead carbonate ore in fissures and along porphyry dikes intrusive in limestone, the ore occurring just above quartzite series. There are three or four mines on the property, all showing ore. Survey for patent being made for 9 claims.

Production: began in June, 1917, and totaled 2,005 tons shipped to Jan. 31, 1919, contained 4,145,327 lbs. lead, 544 oz. gold, and 20,422 oz. silver with gross value of \$270,784. Shipments, June 1 to Dec. 31, 1918, averaged 27.5% lead, and in 1919 and 1920, averaged 33% lead. Shipments made to El Paso smelter.

Property leased to O. B. Stanton, et al, to December, 1923. Development work reported to show high grade ore.

RAY VERDE COPPER CO.**ARIZONA**

Office: 26 W. 44th St., New York. W. B. Duvall, mgr., Jefferson Hotel, Phoenix, Ariz.; Geo. Pruitt, supt., Kelvin, Ariz.

Officers: Edw. A. McSweeney, pres.; L. H. Bradshaw, sec.; F. W. Nye, treas., with L. F. Van Zelm, K. D. McAlpin and J. M. Thornton, directors.

Inc. Oct., 1919, in Arizona. Cap. \$500,000; increased to \$1,000,000 in 1920; par \$1; 450,000 shares outstanding. U. S. Corp. Co., New York, registrar and transfer agent. Stock listed on N. Y. Curb.

Property: 72 claims, 1,440 acres, 12 miles S. of Ray, said to show disseminated chalcopryrite in a large porphyry dike, also fissure veins carrying copper, gold, silver, lead and molybdenum.

Development: by 300' tunnel, shafts and open cuts. Churn drilling planned for 1921. Management estimates ore reserves at 500,000 tons.

RECORD LODGE MINING CO.**ARIZONA**

Address: J. J. McCarthy, supt., Oatman, Mohave county, Ariz.

Officers: Chas. A. L. Gehrman, pres.; Lee R. Myers, v. p.; L. L. Wallace, sec.-treas., with J. J. McCarthy, directors.

Inc. Jan., 1916, in Arizona. Cap. \$250,000; shares 25¢ par.

Property: 10 claims, located on Hardy vein.

An incline shaft was sunk on the vein to 250' level where vein left the shaft. At last accounts shaft was 500' deep.

Equipment: hoist, compressor, etc.

RED CHIEF MINING CO.**ARIZONA**

Address: Casa Grande, Pinal county, Ariz. T. P. Copening, mgr. Shipped some lead ore in 1919.

RED CLOUD CONS. MINES CO.**ARIZONA**

Defunct. See Red Cloud mine in this book and Vol. XIV.

RED CLOUD MINE**ARIZONA**

Formerly property of Red Cloud Cons. Mines Co. (q. v. in Vol. XIV) now controlled by syndicate of 6, headed by L. B. Johnson, Mesa, Ariz.

Lessee: Paul Kimball, Yuma, Ariz.

Property: 40 miles N. of Yuma, in Yuma county, developed by a 500' shaft. Is an "antigua" said to have produced \$3,000,000 in shipping ore in the 80's. All high grade exhausted to bottom of shaft, or water level, but

estimates show 60,000 tons of ore in dumps and pillars, averaging 5% lead and 10oz. silver per ton. Is leased to Salt Lake interests who have erected a small mill.

REDEMPTION COPPER MINING & MILLING CO. ARIZONA

Dead. Lost its property, 1914.

The mine near Chloride, Mohave county, Ariz., was sold to Dr. M. Taylor Uhler, Philadelphia, in 1917. See Vol. XII.

RED GAP GOLD MINES CO. ARIZONA

Officers: C. C. Ward, pres.; C.W. Hernden, v. p.; C. M. Pedley, sec.-treas. at last account.

Inc. 1917, in Arizona. **Cap.** \$1,500,000; shares \$1 par.

Property: a group of claims in the Weaver district, Mohave county, 25 miles N. W. of Chloride, developed by tunnels and drifts said to expose veins from 10-12' wide, showing gold-silver values. A prospect.

RED LION MINING CO. ARIZONA

Address: John Smeddle, mgr., Oatman, Mohave county, Ariz.

Officers: W. L. Stowers, pres.; C. D. Hendrickson, sec.

Property: lies between the Ben Harrison and Gray Eagle claims, supposedly on the Tom Reed vein.

Development: by 500' shaft and crosscuts on 225' and 320' levels. Extensive crosscutting planned on 220' level N. E. and on the 500' level S. E. and S. W.

RED METAL COPPER CO. ARIZONA

Address: Parker, Ariz.

Officers: Dr. A. H. Littlefield, pres.; Lee Pritt, v. p.; Fred M. Hall, sec.; John Pritt, treas.-supt., with J. F. Raney, directors.

Property: 12 miles N. E. of Parker, in Yuma county, adjoins the Western Arizona Copper Co. holdings on the S., and is said to show a contact deposit of porphyry, with an iron gossan, carrying gold and copper.

Development: by 225' shaft. Company offered stock at 25¢ per share, in 1917, to procure funds for further development. Idle and presumably dead.

RED MT. CONS. COPPER MINES CO., INC. ARIZONA

Probably idle. **Address:** C. W. Caulkins, sec., 99 Grand St., Brooklyn, New York.

Officers: C. E. Meyers, pres.-mgr., Jas. H. Sullivan, v.-p.; F. Brose, treas., with E. J. Widness, J. S. Smith, W. A. Anderson, J. L. Anderson and G. M. Barklay, directors.

Inc. April, 1917, in Ariz. **Cap.** \$5,000,000; \$1 par; issued 1,194,500 shares. Manager reports \$25,000 spent in 1918 on development and machinery.

Property: 21 claims in Dixie district, Maricopa county, about 35 miles N. W. of Phoenix, said to show gold, silver and copper ore. **Development:** shallow shaft, less than 100', and 2 tunnels, total length about 400'.

Equipment: includes a 50 h. p. hoist, and a compressor.

RED MOUNTAIN COPPER MINING CO. ARIZONA

Property: 60 claims, 1,200 acres, includes the Four Metals mine at Mowry, Santa Cruz county, Ariz. Was worked unsuccessfully by Oscar A. Turner, 1914-15.

Development. by several tunnels, longest 1,300', said to show pyrite and chalcopyrite ore, assaying from 1-3% copper for over 300'. No recent report.

Idle for years and probably defunct.

RED MOUNTAIN DEVELOPMENT CO. ARIZONA

Office: P. O. Box 3007, Lowell, Cochise county, Ariz.

Officers: Frank Briggs, pres., treas.-gen. mgr.; Wm. Hawley, v. p.; E. J. Briggs, sec.

Inc. Oct. 5, 1908, in Arizona. **Cap.** \$1,000,000, \$1 par.

Property: 17 claims, 340 acres, crossed by the Southern Pacific Railway, shows schist, porphyry and limestone, with a vein claimed to be 130'

wide and traceable 2 miles, carrying copper and lead ores, including copper oxides and chalcopyrite.

Development: consists of a 100' shaft. Idle owing to a lack of funds since 1917.

RED ROVER COPPER CO.

ARIZONA

Reorganized, 1917, as **Red Rover Mining Co.**, which see.

RED ROVER MINING CO.

ARIZONA

Address: care of B. A. Gillespie, owner, Phoenix, Maricopa Co., Ariz. Is a reorganization of the Red Rover Copper Co.

Property: 12 claims, known as the Red Rover Group, 12 miles north of Camp Creek and 50 miles N. E. of Phoenix, the nearest rail point.

Development: by 10,000' of workings, including a 200' tunnel and a 500' incline shaft, showing a 10 to 16' orebody between limestone and porphyry, carrying a 3' paystreak estimated to average 10% copper, 6 to 60 oz. silver.

The Red Rover mine, discovered 1882, has shipped from shallow workings about \$200,000 worth of **high-grade ore**, running about 15 to 25% copper, but value mainly in silver chloride, 1 carload of 20 tons netting \$41,000, with no allowance made for copper content.

Is a meritorious development proposition. No recent returns.

REINIGER FREEMAN MINING CO.

ARIZONA

Address: 57 N. Church St., Tucson, Ariz.

Officers: Chas. P. Reiniger, pres.-gen. mgr.; Chas. W. Freeman, v.-p. L. E. Jettinghoff, sec.-treas., with Chas. E. Walker and J. E. Jones, directors. A. B. Richmond, mgr.

Inc. Jan., 1918, in Arizona. **Cap.** \$5,000,000; \$5 par. 1,000,000 shares listed on New York Curb Security Transfer & Registrar Co., transfer agent.

The General Balance Sheet, Dec., 1918, shows total assets of \$5,169,400, which includes mining properties and options \$3,894,572; cash, \$76,450; bills receivable, \$100,126; development expenditures, \$71,892; machinery and equipment, \$20,846; warehouses and supplies, \$5,515; treasury stock, \$1,000,000. Liabilities show; capital stock, \$5,000,000; balance due on purchase price of properties, \$16,000 on Oct. 9, 1919; \$22,000 on Oct. 9, 1920; \$131,400 on Oct. 9, 1921. Statements of receipts and disbursements show receipts of \$174,703 from sale of stock, deduct disbursements, \$98,253; cash on hand, \$76,450. Company has been involved in litigation and no later report issued.

Property: the Wakefield group at Mineral Hill, also option on the Virginia group of claims, 20 miles W. of Silverbell; Belmer group of 5 claims, 20 miles S. of Tucson; Copper Prince group of claims 1 mile N. of Twin Buttes, Pima county. Virginia group is said to show contact veins, between granite and sedimentaries, that produced some copper ore from shaft 50' deep in 1917. Copper Prince is said to have contact veins between limestone and granite with development shafts, 40' and 70' deep, showing copper ore.

The Wakefield or Belmer group of 21 claims, 347.97 acres, adjoins the San Xavier, Mineral Hill and other well known mines in the San Xavier district, 20 miles south of Tucson.

This tract covers a limestone-dabase contact in an area of sedimentary rocks, surrounded by granite and altered by contact metamorphism. Mineralization occurs in contact deposits and in veins. Ore in the neighboring properties in base, consisting of lead, zinc and copper sulphides and carrying variable value in silver.

Development: work in 1918, embraced sinking the Belmer shaft to a depth of 330' and the San Carlos shaft, 80', a few hundred feet south of it. The Belmer shaft is reported to have cut the San Carlos veins.

The property is well equipped, has ample houses, offices, buildings, etc., and it is evident considerable money has been spent on this tract, but development appears to have been suspended before ore was found.

The amount of work done on the property does not warrant the character of the advertising matter put out by the company. Presumably idle since 1919.

RICHARDS COPPER CO.**ARIZONA**

Out of business. Formerly owned the Black Hills Copper Co. whose property was near the Equator mine, Jerome. Property sold in 1917.

RICO CONSOLIDATED MINING CO.**ARIZONA**

Superseded by Rico Exploration Co.

RICO EXPLORATION CO.**ARIZONA**

Address: 1101 Citizens Bank Bldg., Cleveland, Ohio.

Officers: M. A. Monaghan, pres.; C. J. Weideman, sec.-treas.; M. C. Cleveland, v. p.-mgr., Kingman, Ariz.

Inc. in Arizona. Cap. \$500,000, increased from \$100,000 in August, 1919. Company succeeded the Rico Cons. Mining Co.

Property: a lease on the Rico and C. O. D. mines, 20 miles N. of Kingman, Mohave county, which has expired. The Rico mine has since been reported under option to I. C. Bateman, and the C. O. D. mine is now owned by C. O. D. Mines, Inc.

RIO TONTO COPPER MINING CO.**ARIZONA**

Mail returned from former address, 137 No. Central Ave., Phoenix, Arizona.

Inc. Nov., 1917. in Arizona.

Property: the Patton Copper mine, 4 miles east of Mayer, Yavapai county, said to have high-grade ore exposed in several openings. Idle several years.

RIPSEY COPPER CO.**ARIZONA.**

Address: R. P. Sharpe, mgr., 1216 State Life Bldg., Indianapolis, Ind.

Officers: M. P. Woody, pres.; J. W. Sharpe, v. p.; M. W. Hopkins, sec.; Henry Severin, treas., with Dr. L. M. Green and W. H. Adams, directors.

Inc. 1914, in Arizona, to succeed Arizona Pacific Copper Co. Cap. \$6,000,000; \$1 par; all issued and owned by four directors. Securities Trust Co., Indianapolis, registrar. Stock transferred at company office. A \$400,000 bond issue was authorized in 1920 to provide funds for further development.

Property: 12 claims, 240 acres. in Pinal county, 5 miles S. of Kelvin, said to show a disseminated deposit, 1,650' x 600'; in granite diorite, with N. E.-S. W. course. The ore is mainly chalcocite with copper oxides and carbonates, averaging 1.78% copper and \$1.50 in gold and silver.

Development: by 500' vertical shaft and tunnels.

Equipment: includes hoist, compressor and pump.

Property shut down since 1907, but resumption of operations planned for 1921.

RIVER RANGE MINING CO.**ARIZONA.**

Address: c/o R. S. Billings, Kingman, Ariz.

Inc. 1921, in Ariz. Cap. \$150,000; 10c. par.

Property: in Union Pass section, San Francisco district, Mohave county.

ROADSIDE MINE**ARIZONA.**

Property: 58 claims, 1,240 acres, in Pima county, about 40 miles S. W. of Tucson. Ore said to average 3% copper and 6 oz. silver per ton.

Development: by shafts, 400', 200' and 120' deep. Developing 1920-21.

ROOSEVELT LAKE COPPER CO.**ARIZONA**

Mail returned from former address at 17 E. Adams Street, Phoenix, Ariz.

Officers: R. H. Williams, pres.; A. J. Matthews, v. p.; W. E. Laird, sec.; C. E. Ashley, treas., with C. H. Prather and J. R. Murdock, directors.

Inc. in Arizona. Cap. \$1,000,000; shares \$1 par; 400,000 issued.

Property: the Humdinger and Orocobre claims in the Mazatzal Mtns., Maricopa county, 20 miles from the Roosevelt dam, and the Virginia

claims, 9 miles from Phoenix. One claim said to have ore worth \$1,000,000 on hand.

Development: by tunnels; churn-drilling contemplated.

Extravagant statements were published about this company's possibilities, a full-page advertisement including this gem: "In this vast treasurehouse—in vaults of porphyry and quartz, with walls of adamant—what wealth awaits the drill and blast, only the most active imagination can conceive." At last report company had sold its Roosevelt Lake property and was to use the cash to develop the claims near Phoenix. Presumably defunct.

ROSALIE COPPER CO.

ARIZONA.

Letters returned from last address. Haddock & Shackelford, 424 Dwight Bldg., Kansas City, Mo. and from Los Angeles, Cal.

Inc. in Arizona. **Cap.** \$3,000,000; shares \$1 par.

Property: 9 claims, patented, 180 acres, in the Copper Creek district, Yavapai county, 25 miles S. E. of Mayer and 18 miles from Cordes siding, the nearest rail point.

The mine has numerous pits and shafts, and a 1,000' tunnel, developing a 2 to 7' vein carrying native copper, in the oxidized zone, followed by bornite, chalcopryrite and occasional chalcocite ores, said to assay 4.15 to 7% copper, with small gold and silver values.

Equipment: includes a 50 h. p. gasoline engine and air compressor. Presumably idle.

ROSEMONT DEVELOPMENT CO.

ARIZONA

Office: 11 Broadway, New York. Is controlled by Adolph Lewisohn and Lewisohn Bros. E. B. Corbet, mgr., 1st Natl. Bank Bldg., San Francisco, Calif.

Property: 45 patented claims and 7 patented mill sites, at Rosemont Pima Co., Ariz., 20 miles from railroad.

In 1919 a part of the property was under lease to the Daylight Mining Co., a Tucson company. Shipments were made regularly until the copper market became unsettled.

Geology: numerous orebodies in limestone, occurring under geological conditions superficially similar to those at Bisbee. Company has a small smelter, long idle. Property regarded as promising.

ROWLEY COPPER MINES CO.

ARIZONA.

Office: Kansas City, Mo.

Walter X. Osborn, mgr., Gila Bend, Maricopa county, Ariz.

Officers: E. D. Lysle, pres., Leavenworth, Kan.; C. D. French, v. p.-treas., Kansas City, Mo.; J. T. McRuer, sec., with Jas. O. Goodwin, and D. Rowley, directors.

Inc. June, 1909, in Arizona. **Cap.** \$10,000,000; \$1 par; fully paid.

Property: 6 claims, patents pending, 124 acres, about 28 miles N. W. of Gila Bend, and 65 miles S. W. of Phoenix, Ariz., acquired in 1909 for \$20,000 cash and 1,000,000 shares.

Development: by two incline shafts to depth of 350' with about 700' of crosscuts and drifts and 234' vertical shaft. Said to have exposed 3 strong veins of copper-gold-and silver-lead ore. Reported in 1918, that wulfenite had been found and a small mill had been built to treat it.

Equipment: includes 2 steam boilers, 200 h. p. oil engine, 2 compressors, one 300' and one 1,000' hoist; also five storage oil tanks, ore trailers, etc. Transportation is by 30-ton caterpillar 75 h. p. tractor owned by the company.

Prospectus states Mr. C. J. Price of Topeka, Kansas, a mining engineer of wide experience in both the U. S. and South Africa reports: "Your property has all the ingredients and requisites for the making of a big copper mine. Stock being offered in 1921 at 13c. cash or 14c. on the installment plan.

Legal notice of resumption of operations was given October, 1921

ROYAL BLUE SILVER & COPPER MINING CO. ARIZONA.

Inc. 1920, in Arizona.

Property: Royal Blue mine, in Santa Rita Mountains, Tyndall district, near Patagonia, Santa Cruz county, formerly owned by Apache Mining Co. Ore contains copper and silver.

Equipment: includes 15-ton Gibson mill, gasoline engine and hoist.

RUBY COPPER CO. ARIZONA.

Office: 317 Ridge Bldg., Kansas City, Mo. **Mine office:** Patagonia, Santa Cruz county, Ariz.

Officers: F. D. Reasor, pres.; E. Theilman, v. p.; C. E. Sweet, sec.; C. L. Cookson, treas., with H. J. Richards, F. P. Greenwood, A. E. White and R. W. Pierce, directors. C. A. Pierce, gen. mgr.

Inc. 1912, in Arizona. **Cap.** \$2,000,000; shares \$1 par; issued 1,735,659. Debentures, \$200,000 at 6%; issued, \$119,760. Annual meeting, third Monday in January.

Property: the Lee group of 9 claims, 6 patented, about 13 miles N W. of Patagonia, on Benson Branch of S. P. R. R.

Geology: claims show remnants of Tertiary lavas capping a series of limestones and other sedimentary rocks, altered by metamorphism and underlain by a dense black crystalline rock that carries ore. This rock, though seemingly devoid of crushed zones or fissures, contains disseminated particles of chalcopryrite with occasional bunches and patches of high-grade ore assaying as high as 27% copper and 100 oz. silver per ton. This rock also holds kidneys, or globular masses of primary copper, glance and bornite. Ores are estimated to average 6% copper, 12 oz. silver and 11 cts. gold per ton.

Development: by 460' shaft and a drift tunnel, with about 5,000' of workings. The shaft is dry, unlike that of the Hosey mine to the N., and the Happy Jack to the S., both in higher ground.

Equipment: includes 30 h. p. gasoline hoist, and Leyner compressor.

Company has prospected its disseminated deposits by a number of churn-drill holes and plans to sink a shaft upon the strength of drill results.

RUBY GOLD AND COPPER CO. ARIZONA.

Dead. Property near Parker, Yuma county, Ariz., was acquired by the **Billie Mack Mining Co.**, and later by the Illinois Arizona Copper Co., which see.

RUBY SILVER CO. ARIZONA.

Address: Prescott, Ariz.

Officers: A. C. Gilmore, pres.-mgr. R. E. Morrison, v. p.; J. E. Russell, sec.; Wm. R. Uber, treas. all of Prescott.

Cap. \$500,000; \$1 par. 100,000 shares offered at 25c., March, 1921, and permit to sell an additional 100,000 at 25c. given in September.

Property: 5 claims in Hassayampa district, Yavapai county, said to show, 3,000' of the Zero vein, 6 to 25' wide with lead-silver ore. Work was resumed in April, 1919, and the tunnel driven 420' on vein, with 70' raise, to be continued to surface. Further work contemplated, fall of 1921.

RURAL MINES CO., INC. ARIZONA

Address: M. B. Dudley, Kingman, Ariz. W. W. Widdowson, mgr.; T. D. Walsh, supt.

Property: Rural and Buckeye gold-silver mines, in Mineral Park district, Mohave county, near Kingman, controlled by M. B. Dudley and associates. The Rural has a 200' shaft, the Buckeye a 700' tunnel. Estimated to have 22,000 tons good milling ore in mine and 8,000 tons milling ore on the dumps. Ore occurs in a fissure vein in granite, carrying gold and silver.

Equipment: includes electrically-driven hoist, compressor, pump; also machine-shop, dwellings, water supply, etc. A 100-ton mill is planned.

Company also has a lease on the holdings of the Lodi Mines., near Luning, Nevada.

SADDLE MOUNTAIN MINING CO. ARIZONA.

Office: 902 Chapel St., New Haven, Conn.

Officers: Frank M. Travis, pres.; C. M. Robinson, sec.-treas.

Inc. 1902, in Arizona. **Cap.** \$2,500,000, increased from \$1,000,000; shares \$1 par; outstanding, 1,306,585 shares, 3,000 shares sold for \$10 the lot at public auction in New York on Dec. 3 1, 1920.

Property: consists only of \$300,000 par value of the capital stock of the Gila C. Sulphide Co., which, in October, 1909, acquired the property of the Saddle Mountain Mining Co., subject to the latter's authorized outstanding first mortgage bond issue of \$1,000,000. These bonds were exchanged for an equal issue, \$1,000,000 first mortgage 6% bonds of the Gila Copper Sulphide Co., at the option of the bondholders. Interest payable April 1 and Oct. 1. Of this issue, prior to December 1, 1917, \$248,600 par value were retired out of earnings, leaving outstanding, December, 1, 1917, \$751,400, due, principal and interest, April 1, 1918.

For description of the property, see *Gila Copper Sulphide Co.*

SAHUARO COPPER CO. ARIZONA

Address: Mineral Hill, via Tucson, Ariz. F. Buckout, pres.; T. R. Shacklett, v. p.; W. D. Uphaw, sec.-treas.

Property: 4 claims adjoining the Vulcan copper mine in the Mineral Hill-San Xavier district, Pima county, under development in 1920.

SAINT ANTHONY MNG. & DEV. CO. ARIZONA

Address: R. C. Gillis, Chapman Bldg., Los Angeles, Cal. **Mine office:** Schultz, Pinal county, Ariz.

Officers: R. C. Gillis, pres.; A. H. Fleming, v. p.; Epes Randolph, treas.; C. L. Bundy, sec.; Horace Pomeroy, gen. mgr.

Cap. \$1,000,000; \$1 par; 300,000 issued.

Property: the Mammoth and Collins groups, at Schultz, near Mammoth, and south of Ray, developed by 833' shaft. A strong vein shows gold, lead and wulfenite ore. An 1,800' drift on the 700' level connects both groups.

Equipment: 200-ton concentrator and flotation plant. Mine and mill closed down.

SAN CARLOS MINING CO. ARIZONA

Address: D. Rowley, Gila Bend, Ariz.

Officers: Dora Rowley, pres.; J. C. Rowley, v. p.; Daisy Rowley, sec.-treas.; also directors.

Inc. Oct., 1914, in Arizona. **Cap.** \$1,500,000; \$1 par; 500,000 issued. Stock offered for sale by Southwest Securities Co., New York, in 1920.

Property: 11 claims, 220 acres, 18 miles W. and 7 miles N. of Gila Bend, Maricopa county, said to show contact fissures in rhyolite. Orebody is 8 to 12' thick. Shoots are from 2 to 36" wide and ore carries copper, gold and silver. Ground is considered to contain extensions of the Rowley veins.

Development: incline shaft to 238' depth. No record of operations for many years.

Edwin Walters, J. F. Price, and others have examined the property.

SAN SIMON COPPER CO. ARIZONA

Office: Marquette, Mich. **Mine office:** Paradise, Cochise County, Ariz.

Officers: Nathan M. Kaufman, pres.; Hon. Norman W. Haire, v. p.; S. R. Kaufman, sec.-treas., with Thos. F. Cole, John A. Duncan, Wm. G. Rice and Thos. H. Collins, directors.

Inc. 1907, in Arizona, as a reconstruction of the Chiricahua Development Co. **Cap.** \$2,500,000; \$10 par.

Property: 40 claims, 7 patented, about 750 acres in Cochise county, 16 miles from nearest railway, at Rodeo, N. Mex. previously operated by Capt. Thos. Burns as a silver mine.

Development: a 750' crosscut tunnel with a 100' winze 700' from the portal, cutting 50' of leached ore, apparently the apex of a sulphide orebody. Also the 400' Mars shaft, bottomed in chalcopryrite ore of 2 to 4% copper tenor. The 400' Planet shaft has drifts on the 4th level.

Equipment: includes two 150 h. p. boilers, two 2,000' double drum hoists, and a 16-drill air compressor. Idle; only assessment work done in recent years.

SANTA RITA COPPER MINING & SMELTING CO. ARIZONA

Mail returned, address to P. O. Box 592, El Paso, Tex. **Mine office:** Arivaca, Pima county, Ariz.

Inc. June, 1901, in Arizona. **Cap.** 3,000,000; shares \$1 par; issued, \$2,750,000.

Property: 12 claims, 220 acres, in the Tyndall district of the Santa Rita mountains, 13 miles from Arivaca, shows granite, porphyry and diorite, carrying several veins of sulphide ore, usually at the contact of the diorite and granite. Veins range from 4 to 12' in width.

Development: 2 shafts and several tunnels, with a total of about 2,000' of workings, mostly in low-grade ore. A new tunnel, planned to give a back of 110', was 200' long, at last accounts. The mine is without power equipment. Company is a promotion of A. A. Post. Presumably moribund.

SAN VICENTE MINING & MILLING CO. ARIZONA

A. Sween, agent, Phoenix, Arizona.

Directors: J. A. Ritzler, R. O. Johnson, J. B. Burlie, R. E. Houren, A. P. Schuster, J. E. Creighton and A. Sween.

Inc. 1921, in Arizona. **Cap.** \$500,000; \$1 par.

SAN XAVIER EXTENSION COPPER CO. ARIZONA

Address: Tucson, Ariz.

Officers: E. G. Bush, pres.-gen. mgr., with Nathan Kendall and R. K. Shelton, directors. E. A. Pike, supt.

Cap. \$750,000; 50c par.

Property: 6 claims, 4 surveyed for patent, 100 acres, in San Xavier district, Pima county, developed by 440' vertical shaft, has lead-silver, copper, zinc ore.

Reported to have shipped 900 tons of ore assaying 20 oz. silver, and 4% copper from the 200' level. Idle temporarily, but company plans sinking to 500' level.

SAN XAVIER MINE ARIZONA

Owned by Empire Zinc Co. of Colorado and described thereunder.

SARATOGA MINING CO. ARIZONA

Crown King, Yavapai county, Ariz. J. L. Deming, mgr. According to report the company was reorganized in 1915, and in Dec., 1915, completed a 75-ton mill to treat Saratoga ore and also the dump ore of the adjoining Crown King mine, belonging to the Yavapai Consolidated Gold-Silver-Copper Co. No recent returns.

SASCO SMELTER ARIZONA

Acquired by the A. S. & R. Co. from the bankrupt Southern Arizona Sm. Co. Operations ceased in 1918; was dismantled in 1920. See Vol XI, Copper Handbook for description.

SCHUYKILL MINING CO. ARIZONA

Fully described in Volume XIV. Geo. N. MacBean, receiver, Holbrook, Arizona. Litigation settled and entire holdings acquired by Cole-Tennessee Mining Co., which see.

SECRET PASS GOLD TOP MINING CO. ARIZONA

Addresses: J. P. Loftus, 1615 Martel Ave., Hollywood, Cal., and Kingman, Arizona.

Officers: J. P. Loftus, pres.; C. S. Sprague, v. p.; G. P. Loftus, sec.-treas., with F. Kemp, J. K. Turner and S. L. Carpenter, directors.

Inc. May 30, 1916, in Arizona. **Cap.** \$100,000; 10c par; 587,000 issued.

Property: 5 claims, 100 acres in Oatman district, Mohave county. Open cuts and other shallow workings said to show 5,000 tons of \$6 to \$15 gold ore developed.

Equipment: 30-ton plant including 3' Hardinge ball mill. Presumably idle.

SENATE SILVER MINING CO.

ARIZONA

Officers: C. C. Spicer, pres.; A. G. Keating, v. p.; J. N. Harper, treas.; S. M. Warmbath, treas.; with P. C. Thorne, directors.

Inc. in Arizona. **Cap.** \$150,000; 10c par; 50,000 shares issued.

Property: 4 claims, 3 miles from Hackberry, and 30 miles from Kingman. Reported that development would be carried through vertical shaft of Hackberry Cons. until company sinks its own shaft, which was 200' deep, September, 1919, and still sinking on vein with 30" of 48 oz. silver ore.

Equipment: includes 25 h. p. hoist and a compressor. Is a prospect.

SESAME COPPER CO.

ARIZONA

Dead. Described in Volume XIV.

SHAMROCK MINING CO.

ARIZONA

Address: Bernard McEntee, gen. mgr., via Vicksburg, Yuma Co., Ariz.

Property: in the Plomosa district. Ore is said to carry 5% copper and 20 oz. silver per ton. Shipments amount to \$12,000 to date.

SHANNON COPPER CO.

ARIZONA

Office: 67 Milk St., Boston, Mass.

Officers: Nathan L. Amster, pres.; H. N. Stonemetz, v. p.; Chas. R. Jeffers, sec.-treas., with Wm. A. Paine, M. W. Cole, C. J. McGilravy, J. B. Beaty and Jonas Brooks, directors. J. W. Bennie, gen. mgr.

Inc. Nov. 13, 1899, in Delaware. **Cap.** \$3,000,000; \$10 par; increased July, 1909, to \$3,300,000; issued, \$3,000,000; 300,000 treasury shares. Shares are listed on the Boston Exchange. National Shawmut Bank, Boston, registrar; Boston Safe Deposit & Trust Co., transfer agent. Annual meeting, third Wednesday in March.

In 1920, the directors were authorized to invest in business outside of metal mining, more especially in oil, but neither mineral nor oil properties of sufficient merit have as yet been found.

Financial statement, years ending Dec. 31:

Year	Sales	Profit	Dividends	Year's Surplus	Current assets	Current liabilities
1920.....	\$395,263	\$5,664
1919.....	466,890	12,266
1918.....	\$2,254,774	\$277,583*	\$277,583†	234,732**	250,262
1917.....	1,824,947	161,219	\$525,000	380,032†
1916.....	2,620,950	783,216	150,000	671,055
1915.....	1,102,275	205,606	209,678

* Loss. † Deficit. ** Exclusive of \$540,710 investments.

Of the 1920 current assets, \$145,000 is deposited with the Cosmopolitan Trust Co., which was (Jan. 1, 1921) in hands of the Bank Commissioner. Company is expending \$5,000 per month in exploration work and in keeping mines unwatered.

The Arizona Copper Co., in 1919, took over the Clifton-Metcalf properties of the Shannon, including mines, reduction works, railroads, together with a 53% stock interest in the Coronado Mng. Co. The price was \$600,000. With this money company paid off \$200,000 outstanding bonds of Shannon-Ariz. Ry. Co. and paid off its floating debt. The Metcalf mines had been idle for some time, the ore having declined in grade until it could not be profitably treated.

Property: the company retains the Copper Belle mine at Gleeson, Cochise county, and the Yaeger Canyon properties, 8 miles S. W. of Jerome, Yavapai county. The Yaeger mine was closed down in March, 1919, to wait for a better demand for copper; in 1920, a little development work was done.

The mine is opened to the 1,300' level and is said to have cost \$75,000; an additional \$125,000 was spent on development. It is doubted whether this sum can be recovered from the ore developed. The Copper Belle mine is described under Leonard Copper Co., which is the subsidiary company holding title to the mine.

Production: in 1918 amounted to 9,627,987 lb. copper, 2,466 oz. gold and 77,314 oz. silver. Of the copper production, 7,164,918 lbs. were sold at 22.10c per lb.

Reported, fall of 1921, that both properties were being developed at a cost of about \$3,500 per month, and that good ore was being uncovered.

SHATTUCK ARIZONA COPPER CO. ARIZONA

Office: 120 Broadway, New York. **Mine office:** Bisbee, Cochise county, Arizona.

Officers: Thos. Bardon, pres.; H. L. Mundy, v. p.; N. E. LaMond, v. p.-sec.; A. M. Chisholm, treas., and L. C. Shattuck, gen. mgr., directors. Arthur Houle, supt.

Inc. March 22, 1904, in Minnesota. **Cap.** \$3,500,000; \$10 par, fully issued. Company is closely connected, in ownership and management with the Denn-Arizona Copper Co. The National Shawmut Bank, Boston, and Bankers' Trust Co., New York, registrars; Old Colony Trust Co., Boston, and Guaranty Trust Co., New York, transfer agents. Shares listed on the Boston and New York Stock Exchanges. Annual meeting, third Wednesday in April.

Financial statement, years ending Dec. 31:

Year	Revenue	Net profit	Dividends	Current assets	Current liabilities
1920.....	\$1,582,924	\$239,115*	\$87,500	\$1,686,537	\$72,381
1919.....	1,069,697	21,894*	875,000	2,164,483	451,876
1918.....	2,668,083	784,659	1,662,500	2,505,213	411,996
1917.....	3,652,156	1,477,500	787,500	7,307,161	329,536
1916.....	5,160,924	3,074,013	437,500	3,000,797	219,750
1915.....	2,368,548	1,174,028	262,500	1,543,417	168,230

* Loss.

A further deficit of \$150,165 is shown for first 6 months of 1921, due to the fact that production is at a minimum while development continues.

Dividends: \$2 in 1910; \$1 in 1911; \$1.50 in 1913; \$1.50 in 1914; \$2.50 in 1915; \$4.75 in 1916; \$5 in 1917; \$2 in 1918; \$1.25 in 1919 and 25c., Jan., 1920 making a total of \$21.75 per share.

Property: 8 claims, patented, 109 acres, lying in the northeastern portion of the Bisbee camp, Cochise county, about one-half mile south of the original workings of the Copper Queen, and to the north of the Calumet & Arizona. The property shows carboniferous limestone, with intrusive porphyry dikes, and a big fault covered with a silicious gossan of 30 to 50' width. The orebodies occur as irregular replacements along bedding planes and along dike contacts. Ores carry copper and lead with gold, silver and vanadium values, and are oxidized down to 800', with low-grade sulphides at depth.

Lead ore treated by mill in 1918 averaged 6.6% lead, 8.1 oz. silver and 0.07 oz. gold, and the average for copper ore is apparently 5-7% copper and about 5 oz. of silver.

Option on the Con Virginia mine (q v.) in Sonora, was dropped Jan. 1, 1921, as development had not shown continuity of ore.

Development: the mine is opened by a 1,139' three-compartment shaft 15x4' 6" in size, connected with the Uncle Sam shaft of the Copper Queen on the 800' level, with the Powell shaft of the Calumet & Arizona on the 600' level, and with the workings of the Wolverine & Arizona on the 200' level. Mining work was begun Aug., 1904, and ore shipments started Sept., 1906.

During 1919, extensions were 4,244'; in 1920, 8,250'; and 6,092' in first half of 1921, making 30.5 miles in all from the 100' to 1,100' level inclusive.

On the 100 and 200' levels a new orebody was developed by 3,270' of workings, with 18,000 tons of ore blocked out assaying 7½% copper and 6 oz. silver per ton. Further development is being carried on at 600' and 1,100'.

Some of the orebodies are only partly developed, and there is still a fairly large unexplored area of limestone geologically favorable to ore deposition.

Ore reserves: on Nov. 1, 1921, developed and partly developed, were estimated to be about 620,000 tons, of which 330,000 tons were copper and the remainder lead ores.

Equipment: includes a 400-ton mill employing gravity concentration and flotation to treat low-grade silver lead-carbonate ore; operations on limited scale began July, 1918. Total expense for construction and equipment of mill was \$294,902. For details, see article by Glenn L. Allen in Eng. & Mng. Jour. for Oct. 16, 1920.

The 750 h. p. steam plant has five 150 h. p. boilers. The main hoist is an 18x48" duplex double-drum engine, capable of handling continuously a 15,000-lb. unbalanced load at a vertical hoisting speed of 2,000' per minute from a depth of 1,500'. The air plant includes a 40-drill cross-compound air compressor. Fuel is petroleum, with a normal yearly consumption of about 20,000 bbl.

A 3,300' aerial tram of 500 tons daily capacity, with average grade of 18%, supported by 14 towers of 12 to 40' height, leads from a 1,000-ton ore bin near the shaft to the El Paso & Southwestern Railway, the buckets discharging loads direct into 50-ton ore cars. Copper ore is smelted by the Calumet & Arizona Mng. Co., at Douglas, Ariz., under contract in effect to July 1, 1923 and concentrate by lead furnaces at El Paso, Texas.

Also 12 mine buildings, including machine shop, carpenter shop, smithy, boiler house, engine house, warehouse, sawmill, and a change house with accommodations for 300 men.

Recent production:

	Copper	Lead	Silver	Gold	Copper	Per Lb.
	Lb.	Lb.	Oz.	Oz.	Cost	Sold
1920.....	2,374,148	8,279,678	401,626	4,971	23.52¢	18.25¢
1919.....	2,111,841	4,432,655	89,724	300	22.40	24.37
1918.....	9,081,959	2,420,690	233,925	2,061	14.635	25.66
1917.....	11,935,317	2,010,145	154,344	1,542	13.242	28.317
1916.....	18,161,763	3,413,445	314,718	4,721	8.71	23.18
1915.....	11,154,211	2,345,342	201,869	3,151	(b)8.44	18.5
1914.....	10,846,918		198,419	2,444	(b)8.47	14.13
1913.....	13,219,756		236,000	2,033	7.22	

(b) Under curtailed production from Aug. 14 to Oct. 23 when shipments were discontinued, resumed in April, 1915.

The 1919 production was obtained from 22,256 tons of copper ore and 49,363 tons of lead ore; in 1920, from 19,175 tons of copper and 93,061 tons of lead ore.

All production was discontinued, November, 1920, owing to high costs and low metal prices. Development with 45 men was continued until July 31, 1921, when it also ceased. Good ore was found on the 600' level.

SHEA COPPER CO.

ARIZONA

Address: O. G. Engelder, mgr., Jerome, Arizona.

Officers: D. J. Shea, pres.; E. G. Bush, v. p.; J. M. Goodwin, treas.; O. G. Engelder, sec. and mgr., together with R. E. Moore, directors.

Inc. 1916 in Arizona. **Cap.** \$750,000; 50c par; permitted to sell 161,458 shares at 10¢ each in Dec., 1920.

Property: 5 patented claims, south of Copper Chief group, carrying 8 or 9 outcrops with gold, silver and copper.

Development: to depth of 825' by incline shaft following the vein, with levels at 225', 325, 425' and 525'. An 1,800' tunnel was being driven on 525' level and the main shaft deepened to 1,000', in 1921. Total workings March, 1921, 4,720'.

Shipments in 1920 reported made to United Verde Extension smelter.
SHELDON MINING CO. **ARIZONA**

Address: care Stukey Bros., Walker, Ariz. John F. Pell, pres., Newark, N. J.; A. R. Ackerman, treas., Walker, Ariz. Operated as a close corporation.

Inc. Aug. 1916, in Arizona, as a merger of the Sheldon group, the H. T. Andrews holdings and those of the Empire Mining Co., Metals Mining Co. and the Majors Mining & Milling Co. These holdings include nine attractive copper-gold properties, several of them pioneer mines of the Walker district, Yavapai county. The tract is about 14 miles from Prescott.

Development: work in 1921 reported to have opened up 16' of shipping ore on the 400' level.

SHERWOOD COPPER CO. **ARIZONA**

Address: Y. Cavillo, mgr., Tucson, Arizona.

Property: in Comobabi district, Pima county, 60 miles S. W. of Tucson.

Development: by 145' shaft and drifting, said to have opened high grade silver ore.

SHILL GOLD MINING CO. **ARIZONA**

Name changed 1917, **Humboldt Cons. Copper Co.**, which see.

SIGNAL POINT MINING CO. **ARIZONA**

Office: 40 First National Bank Bldg., Douglas, Ariz.

Officers: G. E. Hemphill, pres.-gen. mgr.; E. G. Richards, v. p.; Z. T. Phillips, sec.-treas., with E. A. Hemphill and Charles Stephens, directors.

Inc. July 10, 1915, in Arizona. **Cap.** \$600,000; 50c par; 800,000 issued.

Property: 19 claims, 12 miles E of Douglas, Cochise county, near International Boundary.

Development: by 2 shafts, 120 and 150' deep, equipped with gasoline hoists. No. 1 shaft was sunk on an iron dike, showing traces of copper and silver, and up to \$3 gold per ton; No. 2 passed through 40' of gold, silver, copper, lead ore into a leached zone. Evidently idle, no recent returns.

SILVER BELL CONSOLIDATED MINING CO. **ARIZONA**

Office: Fithian Bldg., Santa Barbara, Calif. **Eastern office:** Paul Alexander, in charge, 31 Union Sq., New York City. **Mine address:** Price, Ariz.

Officers: Joel Remington Fithian, pres.; Geo. J. Stoneman, v. p.; Geo. C. Baker, sec.-treas.; W. Perry Howle, gen. mgr.; with Geo. W. Brown, directors.

Inc. Feb. 24, 1920, in Arizona. **Cap.** \$2,000,000; \$1 par; 1,200,000 treasury shares; 800,000 escrowed. Transfers and registration at company's office. Annual meeting, 1st Tues. in January.

Property: 25 claims, 3 patented, 480 acres, in Pioneer district, Pinal county, includes the newly discovered Martinez and the old and famous Silver Bell and Columbia mines, operated 1879 to 1882, by Pinal Cons. Mng. Co. and later by leasers. The Bell vein in rhyolite traced for 5,000' and up to 75' wide, shows silver-lead ore said to run about 13oz. silver and 5% lead; high grade ore of pay-shoots ranges from 100 to 200 oz. silver and 25 to 60% lead. Martinez vein is reported to be 45' wide. There are 7 veins on property.

Development: by tunnels and 300' incline; longest tunnel is 1,000'. Total workings, mainly by former owners, are 4,300'. Reserves, said to be based on samples cut at 10' intervals, reported to be 257,097 tons, of which 80,000 are blocked out, and 13,266 tons on dump, all of a reported gross value of \$3,257,871.

Production: in last year (1882) of early operations said to have been \$225,481 net smelter return, in part as bullion from an old smelter on Gila river.

Because of water scarcity, company contemplates reducing ore by chloridization-roast, volatilization and Cottrell precipitation. Examined by H. B. Starbird, M. H. McLean and G. W. Tibbits.

Regarded as a worthy promotion, needing financing and conservative management.

SILVER BELT CONS. MINING CO.

ARIZONA

Addresses: 212 Ideal Bldg., Denver, Colo.; Prescott, Ariz.; and Humboldt, Ariz.

Officers: John J. Mahony Jr., pres.; R. H. Burmister, v. p. H. J. Mahony, sec.-treas.; B. Rybon, mgr., with J. G. Harney, John Faubel, and J. B. Dudley, directors.

Inc. Aug. 1916, in Arizona. Cap. \$250,000; 10c par; 160,000 issued.

Property: 8 claims. 2 patented, 200 acres, in Big Bug district, Yavapai county, 2 miles from Humboldt, said to show a contact vein between diorite and Yavapai schist.

Development: by 295' shaft at S. end of property, with workings exposing a 4' vein of silver-lead ore on the 114' and 230' levels. There is also a 125' shaft at N. end of property and a third shaft 1,000' N. of the 295' shaft, was 265' deep in Sept., 1919. On the 250' level there was 20" of rich silver-lead ore.

Equipment: includes a 50 h. p. oil engine, 15 h. p. hoist, compressor, pump, blower, house, etc. A 50-ton mill planned for 1921.

Management claims to have 30,000 tons of \$11 ore on the dump.

SILVER BUTTES MINING CO.

ARIZONA

Address: C. P. Crawford, 121 South Central Ave., Phoenix, Ariz.

Inc. in Arizona. Cap. \$1,200,000; shares \$1 par; 503,839 issued.

Property: 10 claims, in Mazatzal mountains, Gila county. Geological conditions are said to be similar to those of Jerome. According to a report by A. F. Muter, there are two vein systems in diorite, really fault fissures containing ore, especially at junctions of the two. All ore near the surface shows intense leaching. An incline shaft was recommended on the N.-S. vein, which can be traced on surface for 3,000'. The Butte vein, 2 to 7' wide, is said to contain from 25 to 200 oz. silver per ton, \$2 to \$15 gold, and 2 to 12% copper. Some rich ore has been shipped.

Development: by 3,000' of workings to depth of 350'. This is an old property reported to have been worked since 1895.

SILVER CROSS MINING CO.

ARIZONA.

Address: Natl. Bank of Arizona Bldg., Phoenix, Ariz. Controlled by **Lawton Mines Finance Co.**, 1265 Broadway, New York.

Property: in the Turkey Creek section of the Black Canyon district, Yavapai county, developed by 150' shaft and 130' of drifting on a 2' vein, said to average 14-25 oz. in silver-lead.

Equipment: includes 3-drill compressor and engine. The L. T. S. 50-ton flotation mill is owned by the same interests.

SILVER CROWN MINING CO.

ARIZONA

Address: Crown King, Ariz.

Officers: L. V. Swiggert, pres.-treas.-mgr.; T. M. Anderson, v. p.-supt.; F. F. Swiggert, sec.; above are directors.

Inc. July, 1917, in Arizona. Cap. \$1,000,000; \$1 par; 600,000 issued.

Property: 3 claims, 60 acres, surveyed for patent, at Crown King, Yavapai county, said to show a contact vein between schist and granite, with copper-silver ore.

Development: by tunnels, lower tunnel in 950', said to cut an orebody, 22' wide, assaying \$11 across 20'.

SILVER CYCLE MINING CO.

ARIZONA

Address: O. O. Smith, supt., Prescott, Ariz.

Property: the Davis Dunkirk and Poverty groups on Slate creek, Senator district, Yavapai county, acquired late in 1919. Ten mines are included. Ores carry silver, gold, and copper. Developing at last account.

SILVER HILL MINING & MILLING CO.

ARIZONA

Mail marked "out of business," returned from former address, Chloride, Ariz. in July, 1919. Described in Vol. XIII.

SILVER KEYSTONE CO.

ARIZONA

Consolidated 1917 with **Keystone Consolidated Mining Co.** which see. **SILVER KING OF ARIZONA MINING CO.**

ARIZONA

John Fowle, receiver. **Office:** 1 Broadway, New York. **Mine office:** Superior, Ariz.

Officers: A. W. Hillebrand, pres.; John Fowle, v. p.-mgr.; W. F. Ainsworth, sec.-treas., with E. J. Stern, E. S. Booth, G. D. Christy and W. W. Lawhon, directors.

Inc. May, 1916, in Arizona. **Cap.** \$2,500,000; \$1 par; changed to \$5 par in 1920; and \$500,000 7% 10-year bond issue authorized. Security Transfer & Registrar Co., New York, transfer office. Annual meeting, second Tuesday in January. Listed on New York Curb.

Financial statement, December 31, 1919, showed: Total assets, \$2,365,017; current assets, \$78,328. Liabilities: capital stock, \$2,014,290; bonds, \$213,400; accounts and notes payable, \$18,405; surplus, \$99,632.

Operating account showed expenditures, \$311,403; income and receipts, \$326,006; cash balance, \$27,704.

Property: the Silver King mine, 11 claims, over 170 acres, 3 miles from Superior, Pinal county, on the Stoneman grade. It is an old silver mine, popularly credited with a production of \$10,000,000, and known to have paid \$1,950,000 in dividends up to July, 1887. Opened to a depth of 1,000', the mine was originally worked for gold and silver, copper ore in the form of tetrahedrite coming in at a depth of about 310' and continuing to depth of 510'.

Geology: the conditions are described in Bull. 540. U. S. Geol. Survey. Though currently spoken of as a vein, the ore-body is a stockwork, in which the extraordinary rich ores, carrying various silver arsenical and antimonial sulphides of silver, with argentite and stromeyerite, apparently gave out at the bottom levels. Below this level, lower grade but payable concentrating ore, amenable to flotation may be expected and lateral development is also expected to develop more ore. Old records show that copper ore was mined on the 800' level.

Company was to sink a 3-compartment 1,000' shaft and upon its completion planned erecting a 500-ton mill. The shaft was down 635' at end of June, 1920.

Equipment: includes gasoline hoist, compressor, pump, 5-ton auto-truck and a 25-ton plant using a Marcy mill and flotation apparatus. The mill started operating in November, 1918. Shipments during 1919 totaled \$97,606, and in 1918 netted the company, \$46,983.

In July, 1920, John Fowle, v. p. and gen. mgr., was appointed receiver at an annual salary of \$4,000 a year. Judgments against the company for \$361,731, resulted in foreclosure sale, July, 1921, to Walter F. Ainsworth, New York for \$250,000.

SILVER REEF MINE

ARIZONA

Address: Frank M. Leonard, 3543 Third St., San Diego, Calif. Owned by John Hays Hammond, Jas. W. Gerard, Chas. R. Leonard, Frank M. Leonard and Frank W. Royer.

Property: 12 claims, surveyed for patent, including the Silver Reef mines, at Vekol, 12 miles S. of Casa Grande, in Pinal county, formerly owned by Silver Reef M. & S. Co., now dead. Vein 35' wide, between granite and rhyolite, carries 12 to 20 oz. silver ore, also some lead and copper.

Development: by a 375' shaft and 425' tunnel.

Equipment: includes a gasoline hoist, air-compressor, and 20-stamp all slime cyanide plant.

SILVER TRAIL MINES CO.

ARIZONA

Address: E. C. Bradshaw, Kingman, Arizona.

Inc. 1920, in Arizona. **Cap.** \$250,000; 25c. par; 100,000 shares treasury stock offered at 20c., May, 1921.

Property: Diamond Joe mine, in Hualpai Mtns., Mohave county, 26 miles from Yucca, the nearest rail point. Ore occurs in quartz veins, averaging 12-16 oz. silver and 20-25% lead.

Development: by 420' shaft and about 2,000' of lateral workings. Several thousand tons of ore on dumps being treated in 50-ton mill early in 1921.

SILVER VIRGIN MINING CO.

ARIZONA

Officers: A. B. Murchison, pres.; J. F. Deitrich, v. p.; S. W. White, sec.; F. E. Caldwell, treas., with J. E. Shaw and H. D. Maynard, directors.

Inc. 1919, in Arizona. **Cap.** \$150,000.

Property: in the Quijotoa Mtns., Pima county, 85 miles from Tucson, reached by good road through the Papago Indian Reservation.

Development: by shaft. Reserves are reported as 10,000 tons of \$56 silver ore.

SILVER ZONE MNG. & MLG. CO.

ARIZONA

Address: A. W. Davis, gen. mgr., Prescott, Arizona.

Officers: H. D. Ross, pres.; H. C. Storey, v. p.-gen. mgr.; J. P. Dillon, sec.-treas., with A. W. Davis, directors.

Inc. in Arizona. **Cap.** \$2,000,000; par \$1; 1,350,000 treasury shares.

Property: the Boxer group of 4 claims, 80 acres, in the Black Canyon district, Yavapai county, 3½ miles S. E. of Turkey on P. and E. R. R., adjoins the Black Canyon Mng. Co. A 5-foot vein with a flat dip cuts across the Yavapai schists; the value of ore is chiefly silver, with some lead and zinc.

Development: by 150' incline. By agreement, the portal main tunnel of Black Canyon Mng. Co. is situated on the Boxer group; vein is followed for 960'.

It is a prospect.

SLOCUM COPPER CO.

ARIZONA

Succeeded by the **Arizona Cactilone Copper Co.**, which see.

SOLSTICE MINING & MILLING CO.

ARIZONA

Address: Tombstone, Arizona.

Officers: W. T. Boyd, pres.; M. M. Bludworth, v. p.-mgr.; H. Houston Hughart, sec.-treas., with A. Wentwort and O. Gibson, directors. H. E. Macea, supt.

Inc. July 19, 1919, in Arizona. **Cap.** \$250,000; \$1 par. Stock transferred at company office. Annual meeting first Monday in September.

Property: 4 claims in Tombstone district, Cochise county, developed by 150' shaft and 700' of workings. Ore occurs in fissure vein in syenite; reported to average 23 oz. silver, 6% lead, 0.5 oz. gold. Management estimates total reserves of 1,000,000 tons, with 100,000 tons blocked out.

Equipment: includes 10 h. p. steam hoist and compressor. Plan installing concentrator and cyanide mill.

SOMBRERO DEVELOPMENT CO.

ARIZONA

Office: Houghton National Bang Bldg., Houghton, Mich. **Mine office:** Globe, Gila Co., Ariz. Dr. Lucius L. Hubbard, gen. mgr. Company is a syndicate, not incorporated.

Property: on Cherry creek, west of Sombrero Butte, and about 50 miles north of Globe, is prospected by adits. The mine has a small water driven plant. Inactive.

SOUTHERN ARIZONA MINING CO. ARIZONA

Now Consolidated Southern Arizona Mining Co., which see.

SOUTHERN ARIZONA SMELTING CO. ARIZONA

Bankrupt. Property, the Sasco smelter, bought in by preferred creditors at public auction, March, 1915, was leased and finally acquired by the A. S. & R. Co. Sasco smelter fully described in Vol. XI, Copper Handbook.

SOUTH RAY COPPER MINING CO. ARIZONA

Office: 26 W. 44th St., New York. **Mine office:** Kelvin, Ariz.

Officers: A. N. Rice, pres.; E. A. McSweeney, v. p.; L. H. Bradshaw, sec.-treas, with C. A. Schoen and F. W. Nye, directors.

Inc. 1917, in Maine. **Cap.** \$3,000,000; par \$10; \$2,700,000 outstanding. Authorized \$300,000, three-year 7% notes. Corporation Trust Co., New York, registrar and transfer agent.

Property: 600 acres, in Pinal county, 9 miles S. of Ray, formerly worked under name of "Ripsey" and subsequently as the "Norman". Ore is gold, silver, copper.

Development: by 523' shaft.

SOUTHWESTERN COPPER CO. ARIZONA

See Arizona-Southwestern Copper Co.

SOUTHWESTERN LEASING & DEVELOPMENT CO. ARIZONA

Care of Henry Snell, Globe, Ariz. Company inactive.

SOUTHWESTERN MIAMI DEVELOPMENT CO. ARIZONA

Office: 85 Devonshire St., Boston, Mass. **Mine office:** Globe, Arizona.

Officers: Geo. F. Ruez, pres.; L. A. Thulin, sec.; W. S. Rooney, treas., with R. H. Gross, T. S. Dee, D. T. Kennedy, Morris La Croix, and A. H. Moir, directors. F. W. Hoar, gen. mgr.

Inc. June 24, 1911, in Arizona. **Cap.** \$500,000, increased Feb., 1912, from \$250,000; \$5 par; issued 23,000 fully paid shares and 95,000 assessable shares. Assessment of \$1 called Oct., 1920; previous assessments were \$1, July, 1919 and 25c. payable Jan. 12, 1914. The first annual report, dated Dec. 31, 1912, gave receipts since organization as \$276,084 and disbursements as \$197,162 of which \$65,944 was payments on options, leaving a balance of \$78,922. Shares are listed on the Boston Curb. Boston Safe Deposit & Trust Co., transfer agent.

Property: 17 claims, 4 patented, adjoining the Inspiration Consolidated holdings, in the Miami district, 8 miles west of Globe, shows silicified schist, mineralized at and near, the contact with granite-porphry, the orebody being an extension of the porphyry deposit opened in the Inspiration and Miami properties. Ore occurs as chalcocite disseminated in schist.

Development: by churn drilling, along the same lines followed by its big neighbors, Miami and Inspiration. Eighteen holes have been drilled, averaging about 1,200' deep and the total footage amounting to about 20,000'. Ore developed is estimated at 3,000,000 tons of 1.25% copper. The company has been inactive for two years, being tied up in litigation to oust trespassers. In April, 1919, the company was given authority by the court to clear its property of all trespassers.

In addition to its mining property it acquired leases in 1919 on 800 acres of oil lands in northern Texas. Assessments were called to provide funds for drilling; by October, 1920, a depth of 4,000' had been reached, with a daily production of 250 barrels of oil and 5,000,000 cu. ft. of gas.

SOUTHWEST INSPIRATION COPPER CO. ARIZONA

Mail returned from former office, 8 W. Adams St., Phoenix, Ariz.

Officers at last account: H. H. Temple, pres.; J. J. Sweeney, v. p.-treas.; J. W. Crenshaw, sec.; C. J. Price, gen mgr.; also directors, with Louis Huber.

Inc. 1917, in Arizona. **Cap.** \$5,000,000; \$1 par; 2,500,000 issued.

Property: 69 claims, 1,200 acres, adjoining Calumet & Arizona and Copper State companies' holdings on E., in Bunker Hill district, 12 miles E. of Mammoth, Pinal county. Examined by C. J. Price, N. R. Logue and Louis Huber.

Claims are said to show 5 chimney deposits in diorite, also disseminated porphyry. Ore carries copper, gold, and silver.

Development: by 1,500' tunnel and 400' shaft.

Idle and probably defunct.

SOUTHWEST METALS CO.

ARIZONA

Office: 43 Exchange Pl., New York.

Officers: Jas. A. Heitzmann, pres., Seth B. French, v. p. Percy H. Kittle, sec.-treas.

Inc. 1920 in Delaware. **Cap.** 100,000 shares without par value, of which 6,000 were issued at \$20 each, and 6,000 were reserved to be issued at the same price. As of April 4, 1921, 60,669 unissued shares were available for covering the then outstanding obligations of Cons. Arizona. The New York Trust Co. is depository.

Company was organized to finance the **Consolidated Arizona Smelting Co.**, (q.v.) and on Sept. 16, 1920, offered to exchange its capital stock for income convertible bonds and capital stock of the Cons. Ariz. Sm. Co. For each 20 shares of Southwest Metals, Cons. Ariz. bondholders pay one \$1,000 bond plus \$50 in cash or income bonds scrip, and $\frac{1}{2}$ share of Southwest Metals for 1 share of Cons. Ariz. plus 40 cents in cash, payable in installments to June 1, 1921. This offer was extended to Nov. 5, 1920. To Oct. 20, \$681,500 bonds and 415,679 shares of Cons. Ariz. had accepted the offer. When the deal is completed the 2 companies could be consolidated. This would result in a company owning the mine and smelters, with an authorized capital of 100,000 shares, of which 71,275 would be issued, and with no bonded or floating indebtedness. If the exchange is not completed, instead of only 40 cents per share, it would require at least \$1.25 per share to redeem the property and provide sufficient working capital.

On Dec. 24, 1920, a receiver was appointed for Cons. Arizona, but a further extension of the offer to May 2, 1921, was made on April 4, at which time 515,395 shares of Cons. Arizona had been deposited and the Southwest company owned or controlled \$1,203,152 of Cons. Ariz. obligations, slightly more than 50% of its total liabilities, including cost of receivership to August 1st. The money value of assets is not shown, but assessed valuation of Cons. Arizona was \$3,501,438 for 1920.

As the largest creditor of Cons. Arizona, the Southwest Metals Co. on April 4, 1921, proposed, (a) to exchange its stock at \$20 per share for C. A. refunding bonds at cost to holder (this offer is in addition to that made to income bond and stockholders), (b) to obtain participation of other creditors in general plan, (c) to arrange for settlement of chattel mortgage, and (d) to sell to subscribers unissued stock of the Southwest company.

Late in 1921, reported that most of the claims vs. Cons. Arizona had been taken over.

SQUAW PEAK COPPER MINING CO.

ARIZONA

Address: Edison Thacker, Jerome, Ariz.

Officers: J. J. Cain, pres.; H. E. Thacker, v. p.; Edison Thacker, sec.-treas., with R. Thacker and A. W. Whitaker, directors.

Inc. in Arizona. **Cap.** \$2,000,000; shares \$1 par; 100,000 issued.

Property: 21 claims, 420 acres, in Squaw Peak district, Yavapai county, 2 miles W. of Verde river and 28 miles S. E. of Jerome. Examined in November, 1916, by W. E. Defty, whose conclusions were not favorable. Claims said to show copper ore with chalcopyrite and oxide minerals in quartz, occurring in fracture planes and veinlets in granite, capped to the W. by Cambrian rocks.

Development: 400' main tunnel and several shorter ones; also a 75' shaft.

Equipment: steam boiler and compressor. Presumably idle.

STANDARD METALS CO.

ARIZONA

Mail returned from former address: Security Bond Co., 530 Title Insurance Bldg., Los Angeles, California.

Officers: O. B. Bachman, pres.; A. G. Kohnhorst, sec.; W. J. Mitchell, supt.

Inc. in Arizona. Cap. \$1,000,000; shares \$1 par.

Property: over 1,000 acres, including the Denver, Standard, Tres de Mayo, Bob Lee, Mowry and North Mowry mines, in Santa Cruz county. Ore carries silver and lead.

Development: workings said to aggregate 12,000' to 15,000'. In the Denver, G. R. Hay estimated an output of \$400,000 for 10 years. The Mowry has a large past production, and is said to have 100,000 tons on dumps worth \$5 per ton net. E. W. Brooks considers the Bob Lee "one of the most promising undertakings of its kind."

I. is to be hoped that those interested are not banking too much on past production of the mines. Presumably idle.

STANDARD MINERALS CO.

ARIZONA

Address: 116 W. Center St., Anaheim, Cal.

Officers. G. M. Simpson, pres., Box 727, Kingman, Ariz.; L. C. Deming, v. p.; C. C. Randall, sec.-treas.; with H. L. Seares, directors, all of Anaheim.

Inc. Nov., 1917, in Arizona. Cap. \$2,000,000; \$1 par; outstanding 1,500,000. The company acquired the property of the Telluride Chief Mining Co. See Vol. XIII.

Property: 25 claims, 450 acres, in Hualpai range, Mohave county, 20 miles S. E. of Kingman, has molybdenite and silver in quartz vein in granite. Reported that 50,000 tons of ore are blocked out.

Development: 355' vertical shaft, with 2,000' of workings. On 200 and 300' levels a large tonnage of 1% molybdenite ore has been opened.

Equipment: includes 100-ton flotation mill which started operating in March, 1919; a 40 h. p. hoist and 500 cu. ft. compressor, with 25, 80, and 120-h. p. oil engines. Production not reported.

STARGO MINES, INC.

ARIZONA

Office and mine address: M. J. Hannon, supt., Morenci, Ariz.

Officers: Geo. J. Stoneman, pres.; P. A. Tharaldson, v. p.; J. C. Callaghan, sec., with Chas. Beach, Hugh Campbell, E. A. Sawyer, W. A. Harmony, W. J. Graham and M. J. Hannon, directors.

Inc. 1920 in Ariz. Cap. \$500,000; par \$1. 350,000 issued.

Property: a compact tract of 26 claims, 400 acres, on the southern border of Morenci, Greenlee county, and about $\frac{1}{4}$ mile from the railway spur.

Geology: the claims cover a tilted block of limestone and limey shales resting on the basal quartzite of the district, underlain in turn by granite. This block is similar to but thicker than the block immediately north, which contains the great copper deposits of the camp. On the Stargo limestone beds dip gently westward, the block being bounded by the Copper Mountain fault in Morenci gulch and by the Apache gulch fault, both major displacements of the region. Geologically the Stargo ground lies close to the main monzonite area and the intrusive masses observed in the tract indicate that igneous rock extends under the entire area. The western claims, beyond Apache gulch, show the basal quartzite, with limestone overlying it, the rocks forming a block cut by five short cross faults.

There are eight (8) known veins on the property, three of which have been productive, notably the Stargo, Capote and Craig veins, but work on each one of the others has also shown payable ore.

Ore contains hornsilver and native silver, in a siliceous gangue; occasional spots of rich sulphides are said to occur. The ore occurs as normal fissure vein filling with lateral expansions on congenial bedding planes, forming the so-called mantas. The veins are all similar in character and content, and cut through the underlying quartzite as well as the limestone series.

Development: by 3 working shafts on the Stargo vein, one 200' deep. The main workings are on the first level 1,200' long, whose face is about 300' below the surface. The ore as mined runs between \$16 and \$40 per ton and varies from 3' to 8' thick. The workings on the Triangle vein show 4' to 6' of \$14 to \$18 milling ore for a length of 1,500', mostly in open cut work, but also 2 tunnels. The Craig vein, which averages 9' thick and is traceable 3,000', carries ore that varies from \$8 to \$30 per ton. The workings clearly indicate persistence of ore and that the tonnage of prospective ore is quite large.

Equipment: includes two hoists, an air line to the Phelps Dodge power plant, compressor and fairly complete equipment: for further development.

Shipments of ore taken out by Mexican leasers during past six years aggregate over \$100,000, the ore averaging better than \$20 per ton in silver.

STARGO SILVER BELT MNG. CO.

ARIZONA

Dead. Company owned the Stargo silver mine, near Morenci, sold to M. J. Hannon and associates, in 1920, who organized the **Stargo Mines, Inc.**, q. v.

STENE CONS. COPPER CO.

ARIZONA

(Successors to **R. M. Stene Mines, Ltd.**)

Exec. office: 40 Wall St., New York. **Mine address:** Stene's Camp, via Congress Junction, Arizona.

Officers: R. M. Stene, pres.-mgr.; C. U. Leonori, v. p.; C. B. Christy, sec.; Fred M. Dunn, treas., with L. W. Coggins, C. T. Washburn, C. W. Clawson, directors. A. P. Dittmar, gen. supt..

Inc. Dec. 3rd, 1917, in Arizona. **Cap.** \$3,000,000; \$1 par; changed to \$500,000 of 7% cumulative convertible, pfd. stock and \$2,500,000 common stock; both \$1 par. Security Tr. & Reg. Co., transfer agt. and registrar.

Balance sheet of August, 1918, shows: 333,334 shares paid for Riverside group and 650,000 shares (in 1918) for Oregonian group, besides \$5,900 cash. Smelter returns from test shipment \$1,358, cash received from sale of stock R. M. Stene Mines Co., \$24,374.

Promotion stock to directors, attorneys, etc., 135,387 shares; to R. M. Stene for stock due by Stene Mines Co., 28,680 shares; shares sold, old company, 166,666; new company, 67,166. New stock issued for leaching plant, etc., 606,267 shares. A Globe syndicate underwrote this stock in July, 1919.

Property: 785 acres; the Oregonian group, 6 claims, and the Riverside group, 34 claims, in Mohave and Yuma counties, 12 miles N. E. of Swansea. This tract on the north side of the Bill Williams river has a flat orebody in part covered by gravel. The orebody is reported to be 1,400' long, to average 250' wide and from 6' to 30' thick. Fifty-one samples are reported to average 8.1% copper. Mr. Donohue estimated 275,000 tons of 2.5% ore.

The Riverside group covers a canyon cut by the river through upturned schists with flat fault fracture showing copper ore in rather sporadic occurrence. The development work thus far done on the group is disappointing, but the waterpower right may prove quite valuable.

Company reports August 3, 1919, arrangements made to install 300-ton crushing and sampling plant, bins and power unit, with 150-ton leaching plant, also compressor, quarry track and power equipment, etc. A track drill No. 5 and a steam shovel were to be ordered and a bridge built across the river at the dam-site.

The acquisition of the Oregonian group as recommended by the examining engineer gives the company a producing property, while Riverside claims will be developed later.

The **Stene Development Corporation**, 801 Madison Ave., New York, is fiscal agent for the Stene Cons. Copper Co.

STERLING COPPER CO.

ARIZONA

Idle. **Officers at last account:** J. W. Thomas, pres.; L. C. Elliott, sec.; D. E. Nelson, treas.; with E. A. Congdon and J. A. Elliott, directors. C. H. Bean, supt.

Inc. 1906, in Arizona. **Cap.** \$1,000,000, \$1 par; 482,600 shares issued.

Property: in the vicinity of Dos Cabezos, Cochise county, is developed by short tunnels and a 125' shaft, following a limestone porphyry contact, showing copper and lead ore which is said to average 5% copper. There has been about 1,000' of work done and \$3,000 spent in development. Property is a prospect.

STEVENS COPPER MINING CO.

ARIZONA

Company dissolved and assets distributed. Fully described in Vol. XIV.

STODDARD MILLING CO.

ARIZONA

Described in Vol. XIII. Property now owned by **Arizona Binghamton Copper Co.**

STODDARD MINES CO

ARIZONA

Succeeded by Arizona Binghamton Copper Co., which see.

STORM CLOUD MINE

ARIZONA

Property: near Senator, Hassayampa district, Yavapai county, operated by M. J. O'Brien, Ltd., of Cobalt, Ontario.

STRATTON CONS. COPPER CO.

ARIZONA

(Successor to Stratton Copper Co. and Old Hat Copper Co.)

Address: Box 1116, Tucson Arizona.

Officers: C. N. Wilson, pres.; S. H. Keeney, v. p.; J. R. Dunseath, sec.-treas.; above are directors.

Inc. April, 1919. **Cap.** \$1,500,000; \$1 par; all issued.

Property: 14 claims, in process of patenting, in Catalina Mts., 54 miles N. E. of Tucson, said to show a contact deposit of copper ore in limestone with assays from 2 to 8% copper.

Development: shallow shafts and tunnels, with a total of 1,800' of workings. **Equipment:** includes compressor, 60 h. p. boiler, water system and 10 buildings. A \$40,000 highway to the mine has been completed.

Management expected to start operations in 1921.

STRATTON COPPER CO.

ARIZONA

Succeeded by **Stratton Cons. Copper Co.**, which see.

STURDY GOLD MINING CO.

ARIZONA

Address: 317 Frick Bldg., Pittsburgh, Pa. **Mine address:** Cactus, Ariz.

Officers: John Sturdy, pres.; H. Q. Turner, v. p.; N. Sturdy, sec.-treas.; R. L. Smith, cons. engr.; Judge Wm. H. Stilwell, counsel, with F. E. Miller, Geo. B. Burd and Willis Plunket, directors.

Inc. June 16, 1915, in Arizona. **Cap.** \$750,000; \$1 par; outstanding, \$500,000. Annual meeting, second Thursday in January.

Property: 7 claims, 117 acres, in the Winifred district, Maricopa county, 16 miles N. of Phoenix, formerly owned by Fortuna Gold & Copper Co., described in Copper Handbook, Vol. XI. Was acquired by present management at sheriff's sale. Claims are said to show 7 quartz veins in granite, from 2-25' in width showing gold and silver ore, that averages \$30 per ton.

Development: by two 125' vertical shafts, with 1,200' of workings.

Equipment: 25-ton amalgamating-concentrating mill, to be enlarged to 100 tons daily capacity, and cyanide unit added.

SULLIVAN COPPER DEVELOPMENT CO.

ARIZONA

Address: care P. H. Nelson, pres., 610 Lonsdale Bldg., Duluth, Minn.

Mine office: Paradise, Cochise Co., Ariz. Geo. H. Crosby, sec.-treas.

Property: 14 claims, 6 patented, 4 miles west of San Simon, Chiricahua Mts., has opencuts, showing leached copper ore and a little very rich ore, and has a 60' tunnel showing lead ore. Management considered good and property promising. Idle, except for annual assessment work, since 1917.

SULTANA-ARIZONA COPPER CO. ARIZONA

See Kelvin Sultana Copper Co., and Ray Boston Copper Co.
SUN DIAL GOLD MINING CO. ARIZONA

Was one of the big crop of wildcats born in Oatman since the strike in the United Eastern.

SUNNYSIDE MINING CO. ARIZONA

Office: Oatman, Mohave county, Arizona.

Officers: C. H. Palmer, Jr., pres.; F. A. Keith, v. p.; R. I. Rogers, sec.-treas., with S. W. Mudd, Philip Wiseman, P. L. Mullen and M. R. Sullivan, directors.

Inc. in Arizona. **Cap.** \$1,500,000; \$1 par.

Property: Sunnyside group of 3 claims, 2 miles S. E. of Oatman, said to have a vein with assay values of from \$2 to \$8 gold per ton. Development on vein at 400' level, considered promising. Property is in the development stage. Idle since 1917.

SUNSET COPPER MINES CO. ARIZONA

Address: Hayden, Arizona

Officers: Geo. H. Parsons, pres.; J. E. Steele, v. p.; Chester Bertolette, v. p.; F. W. McQuiston, sec.; T. A. Bell, treas., with F. M. Pool and E. C. Hight, directors.

Inc. in Delaware. **Cap.** \$3,000,000; shares \$1 par; issued 1,570,000 shares, 50,000 treasury shares offered in 1920-21 at 25c. per share.

Property: 14 claims, in Bunker Hill district, Pinal county, 14 miles E. of Mammoth and 34 miles from Hayden. Company also has 12 claims in Riverside district, same county, said to have gold-silver-copper ore, developed by two shafts, 140' and 190' deep and tunnels, 75' and 290' long.

Geology: ore-bearing rock is a quartz diorite that cuts the sedimentaries and volcanic breccias. Ore shoots are found as chimneys, or pipes, from 25' to several hundred feet in diameter. Ore usually occurs as a filling between fragments of breccia.

Development: by 175' shaft and 590' tunnel, said to show a body of 3½% to 5% copper carbonate ore.

SUPERIOR AND BOSTON COPPER CO. ARIZONA

Offices: 50 Congress St., Boston, Mass; and Copper Hill, Arizona.

Officers: T. R. Drummond, pres.; John F. Barry, sec.-treas.; Garrett Mott, chairman, with J. B. Hardon, W. F. Fitzgerald and B. F. Stenz, directors. E. G. Deane, mgr.; C. W. Botsford, geologist.

Inc. Nov. 23, 1906, in Arizona. **Cap.** \$6,500,000; was originally \$1,500,000, increased Sept. 5, 1908, to \$2,000,000; April 22, 1909, to \$2,500,000; July 25, 1911, to \$3,000,000; Sept. 30, 1911, to present amount; shares \$10 par; \$9.00 paid in; issued 297,827. Company has levied 10 assessments, last one of 50c. Jan. 1921. Listed on Boston Stock Exchange. State Street Trust Co., Boston, registrar; Boston Safe Deposit & Trust Co., transfer agent. Annual meeting first Monday in December.

Comparative Financial Statement: fiscal year ending Sept. 30—

(a) Lessees produced \$167,212 additional. (b) Lessees produced \$42,164 additional.

Property: 51 claims, 698 acres, of which 35 claims, 475 acres, are patented in Globe district, Gila county. The Globe & Arizona tract of 22 claims was bought for \$320,000, an adjoining group of 21 claims was bought for \$46,000, and the Collins-Doyle group of 5 claims was bought for \$150,416, giving a total cost of \$516,416 for lands. The Collins-Doyle group, added 1909, adjoins the former holdings on the north, carrying the extension of the Old Dominion fault, and is well located with respect to the Great Eastern vein. The property is a compact tract next east of the Arizona Commercial, and east of the Old Dominion. The property carries both limestone and iron ore for fluxes. It is reached by the Arizona Commercial and Arizona Eastern railways, both connecting with the main line at Globe.

In addition, the Telfair group of 12 claims, 200 acres, adjoining the Superior & Boston, was acquired in 1917 for \$7,000 cash and 14,000 shares. The ground is believed to have the extension of the Old Dominion vein.

Geology: the property shows diabase cutting through about 600' of quartzite with interbedded shale and Globe limestone. Copper ore occurs in veins filling fault fissure. There are 2 dominant fault-belts, one series including from north to south, the Old Dominion, Great Eastern or Black Hawk, Limestone, Black Oxide and Iron King fault veins, intersected at nearly right angles by other faults of later age, apparently but slightly mineralized. Three of the veins—Great Eastern, Limestone and Black Oxide have all produced considerable ore in the past. The upper portion of the Old Dominion vein has been faulted 200' to 700' to the N. and wherever opened, is barren of copper. The supposition is it has never been mineralized. The average strike of the faults is N. 70° E., with average dip of 60° N.

Development: by 4 shafts, the McGaw, Great Eastern, Limestone and Gardner, and 1 tunnel. Workings total about 57,700'. New work during year ending Sept. 30, 1919, amounted to 4,589'; for same period in 1920, 8,397 and 4,408' of drilling, and in 1921, 5,835, plus 1,036' of drilling.

At end of 1918, reserves of ore workable at the then copper prices were practically exhausted, and every effort has since been made to find new ore bodies in Great Eastern, Old Dominion and 3 other veins.

The McGaw shaft is 1,400' deep, with 3 compartments. The 10th level opened at 970' corresponds with the 10th level of the Arizona Commercial mine, next west. This shaft lies 900' north of the old shaft and is sunk between the Old Dominion fault on the north and the Great Eastern vein on the south, and is planned to intersect the Great Eastern vein at depth. This is the main working shaft of the mine and does the ore hoisting for the entire property.

One of the main hindrances to mining in the past has been water, also the largest item of expense.

The Great Eastern vein on the 6th level in the McGaw shaft, showed an ore shoot 25' to 30' wide, proven for a distance of over 800'. The 8th level exposed this vein for over 400' and also showed the zone of oxidation to continue to this depth. The 10th level discloses the first sulphide ore encountered in the McGaw workings of the mine but the 12th level shows little or no copper in this vein, as far as developed. The vein matter is heavily stained with iron, highly silicious and, when commercial, carries about 7% copper.

The Old Dominion (or North) vein has been tapped by crosscuts from the McGaw shaft, on the 4th, 6th, 10th, 12th, and 14th levels. Assay returns were in most cases disappointing. Some encouraging silver values were found on the 1,200' level, and further work is being done, in the hope of opening up a silver-bearing orebody. Drilling, chiefly in 1920, in an

effort to locate the extension of the Old Dominion vein below the Great Eastern vein, has thus far not met with success. Further drill work is planned. In 1921, a 300' crosscut on 8th level failed to find commercial ore in the O. D. vein.

The 318' Limestone shaft showed a 4' footwall paystreak of commercial ore on the 300' level; has not been operated for several years.

The Gardner 3-compartment vertical shaft at the southern end of the property, on the Black Oxide vein, is 435' deep; mine is now idle. The Black Oxide vein apparently is a continuation of the Buckeye fault, on which the Old Dominion has opened mines on the Buckeye, Carrie and True Blue claims.

The 1,054' Black Oxide tunnel has its portal about 1,000' S. W. of the Limestone shaft, and cut the Black Oxide vein at 670', giving a 400' back. Drifts on this level show a vein carrying micaceous hematite, with small quantities of copper, and a little shoot of smelting ore. Indications are favorable to the existence of good bodies of high-grade sulphide ore at greater depth. The Black Oxide is 280' east of the True Blue mine of the Old Dominion, from which lessees shipped small quantities of high-grade ore for several years. The Black Oxide vein was opened also on the 800' level by a long crosscut from the McGaw shaft; some copper glance was found but not in paying quantities. Further development is being done.

The Iron King vein, parallel with the other 4 faults of the property, shows a good gossan, and has an old 70' shaft, in leached vein material similar to that in the other faults, at similar depth.

The Footwall vein, discovered in October, 1919, had produced, up to October 1, 1920, about \$290,000. About 2,000 tons of similar grade is left in the mine, although it is known that ore of shipping grade does not extend to the 600' level. A small vein, known as the "Rigby", from 1-2' wide, was discovered on the 400' level in 1920, ore assays about 10% copper and 30 oz. silver. Work on this vein in 1921 was encouraging.

Equipment: includes a hoist at each shaft, aggregating 1,260-h. p. The main plant, at the McGaw shaft, has four 250 h. p. water tube boilers, a 5-ton hoist good for 1,600', and a 1,200 cu. ft. cross-compound air compressor, with an auxiliary compressor at another shaft. The mine has three 1,000-gal. pumps.

The company owns numerous buildings, including well-equipped machine shop, smithy, carpenter shop, office, change house, and warehouse with a number of dwellings for employees. Buildings are lighted by electricity. Fuel is mainly petroleum, with 5,000-gal. and 12,000-gal. storage tanks.

Production: was begun Feb., 1908, and to end of 1910 amounted to 27,126 tons ore, yielding 3,846,402 lb. copper and 94,698 oz. silver practically all from the Great Eastern vein above the 6th level. Known ore reserves being exhausted, production was suspended Aug., 1910, to March, 1913, when shipments were again resumed, curtailed in 1914 and resumed March 15, 1915.

Output in the year ended Sept. 30, 1918, was 22,751 tons of ore assaying 3.88% copper and 4 oz. silver per ton, compared with 17,146 tons (assay not given) the previous year. Copper production totalled 1,676,446 lb. Cost of copper sold and delivered was 22.81c per lb., with average price received of 22.42c. During the fiscal year ending Sept. 30, 1920, production amounted to 9,104 tons of ore assaying 14.3 oz. silver and 5.84% copper, yielding 1,062,379 lb. of copper 130,323 oz. silver, as compared with 59,694 lb. copper and 133 oz. silver in 1919, from 773 tons of ore. Shipments from Oct. 1, 1920, to April 18, 1921, amounted to 11,108 tons of ore, averaging 4.38% copper and 5.88 oz. silver, having a net smelter value of \$95,233. Except for one shipment of silver ore, no production was made, April to Oct. 1.

The company has made courageous efforts to make a mine and it is hoped that the new development work undertaken will open up the reserves of sulphide ore which have been sought for so long, for it is upon finding

these that final success depends. Present management deserves credit for the manner in which it keeps the stockholders informed regarding mine developments.

Shipments of copper ores ceased in April, 1921, when the International and other smelters closed down but were resumed on Dec. 10. Development continued during this interval, but on a limited scale, and largely with the view of uncovering silver ore.

SUPERIOR & GLOBE COPPER CO.

ARIZONA

Idle for several years. **Office:** 3 Calumet State Bank, Calumet, Mich.

Officers: John Daniell, pres.; Fred Smith, v. p.; Chas. Chynoweth, sec.; Joseph W. Selden, treas., and Norman W. Haire, directors.

Inc. Dec., 1908, in Arizona. Cap. \$3,000,000; \$10 par; issued \$2,450,000, in 15,000 shares of full paid stock and 230,000 shares of stock \$1 paid. Property is fully paid for; lands were bought for \$75,000 cash and 15,000 shares of full paid stock. Listed on Boston Curb. First National Bank, Calumet, registrar. Annual meeting, third Monday in November.

Property: 13 claims, 250 acres, in Globe district, Gila county, include the Magnet group of 12 claims, adjoining the Mineral Farm group of the Globe Mining Co., and 1 fractional claim, of several acres.

Development: by 680' vertical shaft in the hanging of the Yuma fault, on Copper Trust No. 2 claim, about $\frac{3}{4}$ mile from the Superior and Boston mine. The shaft cuts a 5' vein carrying iron with copper stains and has about 1,100' of workings on the 650' level, the N. crosscut 522' long showing 2 veins. The Yuma vein, cut at 235' from the shaft, has 320' of drifting, with an 85' winze and a 17' crosscut to the vein from the bottom of the winze. The vein shows merely iron and manganese, with copper stains and small silver contents. In the N. crosscut, 487' from the shaft, a second vein was cut showing a width of 20' and a 38' drift thereon showed material similar to that in the other vein, neither carrying commercial values. The S. crosscut on the 650' level was driven 233' in hard diabase, developing nothing of value.

Diamond drilling was begun in June, 1910, a 350' horizontal and a 957' vertical hole being bored from the bottom of the shaft. The work was continued until early 1912, but developed nothing of importance. One shipment of 47 tons was made in 1917, containing 25.7% manganese.

Equipment: includes a 100 h. p. gasoline plant having a 60 h. p. hoist good for 1,000' and a 3-drill gasoline air compressor. There are 5 buildings including carpenter shop, engine house, office and dwelling.

SUPERIOR ARIZONA COPPER CO.

ARIZONA

Fully described in Vol. XIV. Property and assets acquired in Oct., 1920, by the Magma Copper Co., which see.

SUPERIOR-BONANZA MINING CO.

ARIZONA

Mail returned from former address: care J. T. Muller, pres., Superior, Arizona

Inc. in Arizona. Cap. \$500,000; 50c par; 485,000 issued.

Property: 6 claims, 110 acres, $\frac{1}{2}$ mile N. of the Magma Copper Co., Pioneer district, Pinal county, said to show a fissure vein in diabase, dipping 72° N., with E. W. course. Ore contains gold, silver and lead.

Development: by shaft to 52'. A prospect of no particular merit.

SUPERIOR RAY COPPER CO.

ARIZONA

Mail returned from former address: care A. L. Emberson Co., 112 N. Central Ave., Phoenix, Arizona.

Inc. in Arizona. Cap. \$1,500,000; \$1 par; 700,000 issued.

Property: 11 claims in Pioneer district, Pinal county, 30 miles from Florence, and 1 mile from Superior. Examined by John Armstrong, in Dec. 1916, who considers that the ground is well within the famous east and west faulting system upon which the great mines of this section have been opened. Apparently no work of consequence has been done and claims are a pure gamble.

SUPERIOR SAFFORD COPPER CO.**ARIZONA**

Inc. in Dec., 1916, by A. M. Bernstein, W. D. Wiley and B. W. Fauble, all of Miami. Cap. \$2,000,000; shares \$1 par.

Property: in Pioneer district, Pinal county, near Magma Extension property. Shaft sinking said to have revealed 8 to 12% copper ore.

Company also had 23 claims, 9 miles W. of Safford, Graham county.

SUPERSTITION CONSOLIDATED MINING CO.**ARIZONA**

Officers: J. P. Bickell, pres. Standard Bank Bldg., Toronto, Canada. Louis Ford, v. p.; A. W. Scott, sec.-treas.-gen. mgr.

Inc. Jan. 7, 1915, in Arizona. Cap. \$2,000,000; shares \$1 par; outstanding, \$1,500,000. Security Transfer & Registrar Co., New York, transfer office and registrar. Listed on New York Curb as a prospect. Liabilities in Feb., 1915, a 2-year 6% note of \$10,000, dated Jan. 20, 1915, redeemed January, 1917.

Property: 7 claims, Arizona King group and 2 adjoining claims in the Pioneer district, Pinal county, 60 miles E. of Phoenix and 7 miles from a railroad. Said to show schist and intrusive porphyry with a vein outcropping for 3,000', from 5' to 40' in width; strike N. W., dip 65° E. The ore is gold; claimed to assay from \$3 to \$48 per ton, with a very little copper present.

Development: by shafts, 500' and 300' deep, with several hundred feet of workings.

Equipment: 50-ton flotation mill, hoist and compressor.

Is considered a meritorious prospect. Idle since 1918.

SWANSEA CONS. GOLD & COPPER MINING CO.**ARIZONA**

Reorganization of the Clara Cons. Gold & Copper Mining Co.

W. J. Palethorpe, sec., 627 I. W. Hellman Bldg., Los Angeles; O. M. Souden, trustee, c/o U. S. Nat'l Bank, Los Angeles, Calif. Leased to Judge W. J. Thomas of Los Angeles, early in 1915; operated, 1916, by the Thomas Estate. Inc. 1912. Cap. \$4,000,000; par \$1.

In May 1917, Swansea Lease, Inc., which see, secured a 10-year lease on the mine, calling for a 1,000' shaft, 50% royalty on ore, to be not under \$5,000,000 in 10 years.

In May, 1917, company was discharged from bankruptcy, and had \$30,000 on hand. There is still a bonded debt of \$1,000,000. Company has \$3,000,000 shares outstanding.

Property: reported as 132 claims, 3,300 acres, about 10 miles from Planet, includes the Signal mine, erroneously called the Clara, and the Moro and Clara groups, at Swansea, Yuma county.

Geology: the Signal ore body is a replacement deposit formed in a limestone bed 15 to 100' thick, associated with overlying shales and amphibolitic schist and resting on granite gneiss, all of pre-Cambrian age. The outcrop is an irregular replacement, 30' wide, of copper-stained hematite, dipping 52° N. This orebody extends 150' downward in the mine, is 20 to 30' wide, 90' long, and contains boulders of unreplaced limestone. The orebody is encased in soft chloritic schist derived from amphibolite and appears to rest on a strong fault plane that separates the granite gneiss from the sedimentary series. Two parallel, smaller, but similar orebodies occur in the hanging wall of the deposit. The ore consists of soft, red hematite with manganese-oxide and chlorite, holding grains and nodules of chalcocopyrite and pyrite. The ore as a whole averages perhaps 2.5% copper, though 4% ore is obtained for smelting by rough sorting. See U. S. G. S. Bull. 451, pp. 59-67.

Development: by 2 main shafts with extensive underground workings along the main fault or lode, and by stopes on 3 orebodies. The mine has 4 vertical and 2 inclined shafts. No. 1 shaft, 400' deep, vertical, has a 15 h. p. gasoline hoist, raising ore with a bucket. No. 2 shaft, 325' deep, is an incline, and has a 50 h. p. Western gasoline hoist, operating a 2-ton skip. No. 3 shaft, also inclined, is 200' deep. No. 4 shaft, the largest and deepest,

2 compartment's. is 600' deep, with a hoist. No. 5 shaft, 373' deep, has a 75 h. p. steam hoist, and No. 6 shaft, 250' deep, has a 25 h. p. steam hoist.

The main or footwall orebody is 30x600' and has (in 1920) been opened on the 600' level by the new (No. 7) shaft.

Equipment: the power plant has two 250 h. p. boilers, a 300 k. w. d. c. motor, and a 150 k. w. belt driven motor operating pumps at the Bill Williams Fork river, supplying water to the mine and works through 3" and 6" pipe-lines. A reverberatory furnace was partly completed when the mine closed down in 1913. The smelter has a water-jacket blast-furnace of 750 tons rated daily capacity, a 15,000 cu. ft. air compressor, and a blower direct-connected to a compound engine. Buildings include a machine-shop, sawmill and other structures. Slags are handled by a Jeffrey electric locomotive. The smelter building is of structural steel. The converter department has 2 stands and 9 shells, rotated electrically, with a 40-ton electric crane, having 2 auxiliary hoists, and a silica mill, with electric motor, for linings.

The mines and works are connected with the Santa Fé, Prescott & Phoenix Railway by a 21-mile line, known as the Arizona & Swansea Railroad, operated, but not owned (controlled by George Mitchell of Los Angeles) by the company.

Mine has been an extensive producer since 1909. See **Swansea Lease, Inc.**, for recent production, etc.

The company is an example of enthusiasm run wild, coupled with reckless stock selling and the foolish construction of surface works before the development of enough ore to keep them busy.

SWANSEA LEASE, INC.

ARIZONA

Mine address: E. S. Smith, supt., Swansea, Ariz.

Office: 523 Pacific Electric Bldg., Los Angeles, Calif.

Officers: G. M. Colvocoresses, pres.; F. R. Corwin, v. p.; O. F. Jansen, sec.-treas.

Cap. \$500,000; \$1 par; 375,000 shares owned by Cons. Arizona Smelter Co., which in 1920 also took over all obligations except current.

In May, 1917, company obtained a 10-year lease on property of **Swansea Cons. G. & C. Mining Co.**, Swansea, Ariz., and in 1918 erected a 200-ton concentrator, and sank a 500' working shaft. In 1919, a flotation section was added and capacity of mill was increased to 300 tons. Both mill and mine equipment are the property of leasing company. Operations in 1920 were conducted between 500 and 600' levels through the new (No. 7) shaft.

A small amount of shipping ore is extracted, but largest part of production is in form of concentrate averaging 0.45 oz. silver and 23% copper, all shipped to Cons. Arizona smelter at Humboldt. Heads average 3.9% copper and recovery is 97%. Considerable production is reported for 1919, and beginning with Feb. 1, 1920, it was 5,000-7,500 tons per month until Dec. 24, 1920, when the Cons. Arizona S. Co. went into hands of receiver. See **Swansea Cons. G. & C. Mng. Co.**

SWASTIKA DEVELOPMENT CO.

ARIZONA

Property: in the Bradshaw mountains, Yavapai county, sold in May, 1919, to the **Swastika Silver & Copper Co.**, which see.

SWASTIKA SILVER AND COPPER CO.

ARIZONA

Mine address: F. W. Giroux, mgr., Mayer, Ariz. Freight and express office: Peck's Siding, Ariz.

Officers: L. M. Frantz, pres.; Wm. Brown, care Red Camel Coal Co., Fort Braul, W. Va., 1st v. p.; Namon Jackson, v. p. Pres. First Natl. Bank, Logan, W. Va.; F. W. Giroux, gen. mgr.-asst. treas.; John Faulkner, sec.-treas.

Inc. May 9, 1919, in Ariz. **Cap.** \$1,000,000; \$1 par. Company is not successor of Swastika Dev. Co., which is still alive though it sold its property to the Swastika S. & C. Co.

Property: the old Black Warrior, Silver Prince, Isis, and Hard-scrabble claims, near Crown King, Peck district, Yavapai county. During 1915-1919 the property produced about \$100,000. From 1910 to 1915 the Swastika Dev. Co. shipped ore with a value of \$116,000. From 1874 to 1910 the Black Warrior and Silver Prince are said to have produced about half a million dollars.

Development: by 4 shafts, 70', 225', 250' and 447' in depth with several thousand feet of drifting. Company estimates ore reserves of 100,000 tons milling ore, assaying 12 to 16 oz. silver per ton. High-grade ore occurs in pockets. The Prince vein has three known ore-shoots. On the property are five veins, only two of which have been worked to any extent.

Equipment: includes 12 h. p. gasoline hoist, one 9 h. p. and one 6 h. p. gas engine. Swastika camp has accommodations for 30 men. Management has a 50-ton Dorr process continuous decantation cyanide plant about half completed, July, 1921. Shipped ore intermittently to the Humboldt smelter during 1920.

SWISSHELM GOLD-SILVER CO.

ARIZONA

Address: 32 South Stone Ave., or P. O. Box 188, Tucson, Ariz., or Robt. Randell, supt., Webb, Cochise Co., Arizona.

Officers: F. J. Heney, pres.; Ben Heney, v. p.-gen. mgr.; G. H. Smalley, sec.; Byrd Brooks, treas.

Inc. 1907, in Arizona. **Cap.** \$300,000, 50c par; 300,000 shares escrowed; 300,000 in treasury.

Property: over 313 acres in the Swisshelm range, Cochise county, 12 miles by road to railroad, 30 miles N. of Douglas; said to have a contact metamorphic deposit between limestone and andesite, with gold-silver-lead ore.

Development: by 300' incline shaft, 250 and 300' tunnels, with total workings of 1,750'. Reported to have 5,000 tons of ore blocked out, averaging \$25 per ton.

Management states that lead content of ore has hindered satisfactory smelter contracts, but in 1918 \$6,265 was realized from ore sales. Gross earnings are given as \$9,247. A new smelting contract was arranged in Nov. 1919, whereby the C. & A. works at Douglas will take the ore provided it contains over 70% silica. As the El Paso smelter had too much silicious ore, it penalized the excess silica. A saving of \$1.50 per ton on freight will be made by shipping to Douglas. First shipment of 50 tons made January, 1920.

Property has been examined by W. R. Ramsdell and others.

TABLE MOUNTAIN COPPER CO.

ARIZONA

Near Mammoth, Ariz. Was controlled by Arimex Consolidated Copper Co., now defunct; a Thomas W. Lawson promotion. Fully described, Vol. XI., Copper Handbook.

TANK PASS CONSOLIDATED MINING CO.

ARIZONA

Idle. Address: A. Tennyson Pryor, pres.-gen. mgr., Rockwood, Mich. Ward Smith, v. p.

Inc. Nov., 1909. **Cap.** \$3,000,000; \$10 par. Company controls the Alvin Development Co. through stock ownership, and took over the property of the Cobralla Copper Co., March, 1910.

Property: the Ultimatum or Cobralla group, adjoins the Alvin, near Tank Pass in the Harcuvar mountains, Ellsworth district, Yuma county, about 10 miles from Wenden. The mine carries about 4,500' of the strike of various fractures in a contact zone following granite intrusive in quartzite, amphibolite and limestone, the ores carrying bornite and chalcopyrite, and estimated to average 3 to 5% copper, 5 to 6 oz. silver and \$1 to \$8 gold per ton, with occasional paystreaks and masses of high-grade ore.

Development: by the 150' Carbonate Hill shaft and a 200' tunnel.

Equipment: includes gasoline hoist. Is a prospect of merit.

TEJON MINING CO.**ARIZONA**

Address at last account: L. I. Thiers, supt., Gleeson, Cochise Co., Ariz.

Inc. in Arizona. **Cap.** \$1,000,000; shares \$1 par.

Property: 8 patented claims, 150 acres, at Gleeson, in the Turquoise or Courtland district, adjoining the Copper Belle mine of the Leonard Copper Co. shows heavy bedded limestone dipping steeply eastward into the mountain ridge and cut by intrusive bodies of monzonite and later quartz porphyry. Ore occurs as a contact deposit. Average assays reported as 5% copper, 6 oz. silver, 0.07 oz. gold per ton.

Development: by the 500' Tejon shaft, and by several old tunnels with extensive drifts and stopes in oxidized ore.

Equipment: modern and complete, includes electric and steam power, compressor, etc. Railway is close at hand. Property appears meritorious and management good. Reported closed down, February, 1919.

TELLURIDE & CHLORIDE LEASING M. & M. CO.**ARIZONA**

Property: the Schenectady mine, 3 claims and a millsite, in Chloride district, Mohave county, only 585' north of Tennessee mine, has 5' fissure vein, crossed by Genevieve vein.

Development: by a 400' shaft, with good silver ore reported at 225'.

Production: totaled \$10,000 to end of 1916. Idle and company probably defunct.

TELLURIDE CHIEF MINING CO.**ARIZONA**

Described in Vol. XIII. Property acquired by **Standard Minerals Co.**, which see.

TELLURIDE M., M. & DEV. CO.**ARIZONA**

Office: Oatman, Ariz.

Officers: J. L. McIver, pres.; Geo. G. M. Mackay, v. p.; Byron Campbell, sec.-treas., with W. Matthie and J. B. Dowd, directors.

Inc. 1915, in Ariz. **Cap.** \$220,000; increased May, 1919, to \$300,000; shares 20c par; treasury shares, May 1, 1917, 175,516.

Property: 14 claims, 177 acres, at Oatman, Mohave county.

Development: by 580' shaft with crosscutting and drifting, said to show gold ore of milling grade.

Equipment: includes 40 h. p. engine, double-friction hoist, compressors, mine buildings, etc.

Mine examined in Jan., 1917, by Etienne A. Ritter, who suggested diamond-drilling, and considers that the property is well situated, also that some important bodies of commercial ore should be uncovered. Exploration work under way since 1919.

TENNESSEE MINE**ARIZONA**

Chloride, Ariz. See **Schuykill Mining Co.**

TETER-STONE AZURITE MINING CO.**ARIZONA**

Dr. D. W. Teter, pres.

Property: 3 miles south of Dragoon, Cochise county, has a 4 to 10' contact deposit, between limestone and granite, showing outcrops of azurite and malachite, with some sulphide ore in a tunnel. Operations suspended, 1913, owing to a heavy inflow of water. No later information.

TEXAS-ARIZONA COPPER CO.**ARIZONA**

Address: First Nat'l Bank Bldg., Houston, Texas. M. M. Carpenter, supt., Tucson, Ariz.

Officers: T. H. Bass, pres.; J. H. Kirby, v. p.; J. M. Baird, sec.-treas.; with J. G. Bass and M. M. Carpenter, directors.

Inc. 1917, in Arizona. **Cap.** \$1,000,000; shares \$1 par.

Property: 38 claims, 700 acres, in Pima county, 10 miles N. E. of Tucson, said to show copper ore in schist and gneiss.

Management states that \$25,000 was spent in 1918 in diamond and churn-drilling, and a 2-compartment shaft sunk to depth of 120'. Plan deepening shaft and additional development work.

Production: 1,000 tons in 1907, and 3,518 tons in 1917.

TEXAS-ARIZONA MINING CO. ARIZONA

Operated by J. H. Smith & Co., lessees, Dragoon, Ariz.

Property: near Dragoon, Cochise county, developed by 350' shaft and drifts. A strike of high-grade lead-silver ore was reported in 1920. Developing.

THREE R MINE ARIZONA

Formerly operated by Three R Mining & Milling Co.

Acquired in Oct., 1919, by the **Patagonia-Superior Copper Co.**, a subsidiary of the Magma Copper Co.

THUMB BUTTE CONS. MINES CO. ARIZONA

Address: C. P. Crawford, mgr., Prescott, Ariz.

Property: the old Anderson silver group of claims, in Thumb Butte district, Yavapai county, 8 miles W. of Prescott.

Development: to depth of 125' by 2 shafts with total workings of 500'. Ore contains silver, lead, copper and gold.

THUMB BUTTE GOLD MINING CO. ARIZONA

C. B. Manville, pres.; Johns Manville Co., Madison Ave. and 41st St., New York; Robt. Malcolm, mgr., Kingman, Ariz.

Property: 40 claims, 800 acres, near Union Pass, San Francisco district, Mohave county.

Development: by 540' double-compartment shaft, and tunnels. Company reported to have spent \$200,000 to March, 1921, on development and to plan the expenditure of \$1,500,000 on a model townsite, including 500 houses.

Equipment: includes 320 cu. ft. compressor, 30 h. p. engine and pumping plant.

THUMB BUTTE MINING CO. ARIZONA

Address: care Henry Johnson, Kingman, Ariz.

Property: in the Union Pass section, San Francisco district, Mohave county, developed by two-compartment shaft and equipped with necessary machinery.

TIGER GOLD MINING CO. ARIZONA

Formerly owned the **Oro Belle & Gray Eagle** mine, Crown King, Ariz., which see.

TILLIE STARBUCK MINES CO. ARIZONA

Address: A. J. Pickrell, Prescott, Ariz.

Officers: A. J. Pickrell, pres. and treas.; Alan Gardner, v. p.; G. H. Stack, sec.; also directors.

Inc. July 17, 1916, in Arizona. **Cap.** \$250,000; \$1 par; 125,000 issued. Authorized (Sept., 1921) to sell 14,808 shares at \$1.50 each.

Property: 12 claims, 242 acres, on Slate creek, Hassayampa district, Yavapai county, 15 miles S. of Prescott, has a quartz fissure vein in porphyry and schist, dipping nearly vertical with N.-S. course. Three shoots, up to 100' long and 3-14' in width, have been proven to depth of 800', with ore reported to assay \$5 to \$8 per ton in gold and silver.

Development: by tunnels, 2,000, 800, 150 and 600' long. Workings total 4,000' to depth of 800'. Raises have been driven between tunnels. Management estimates 100,000 tons of ore blocked out above the 800' level, averaging \$5 silver, \$10 gold, ½% zinc and ½% lead. This ore mills well.

Plan erection of 50-ton mill and flotation plant. Is a decidedly meritorious proposition being slowly financed by a few people, and developed under safe and sane supervision.

TIMES MINING CO. ARIZONA

Presumably dead. Described in Vol. XIII.

TIPPERARY MINING CO. ARIZONA

Address: Oatman, Ariz.

Property: the McKesson mines, 6 miles W. of Wallapai Station, Mohave county, reported held by the **Kingman Silver-Gold Mines Co.**, in 1920.

TIP TOP CONS. MINING CO.

Defunct. Described in Vol. XIV. Succeeded by **Arizona Tip Top Mines Co.**, which see.

TIP TOP COPPER CO.

ARIZONA
Office: Commonwealth Bldg., Philadelphia, Pa. Mine office: Helvetia, Pima county, Ariz.

Officers: Geo. A. Aman, pres.; S. Charles Pratt, v. p. and gen. mgr., at last accounts.

Inc. 1902. in Arizona. Cap. \$1,150,000; shares \$1 par.

Property: the Little Helvetia mine, 24 claims, 400 acres, including the Tip Top and Copper Duke claims, also a 100-acre mill site, about 2 miles from Helvetia, shows 3 veins, averaging 14' width. These veins have extensive bodies of soft black sulphide ore in altered clayey limestone and porphyry, reported to give average assays of 5% copper and 1 oz. silver per ton, with a trace of gold.

Development: mainly by tunnel with about 4,000' of workings.

Equipment: includes gasoline power. Was bonded 1907, to Guggenheim interests, for \$250,000, with cash payment of \$75,000, but both parties to bargain were dissatisfied, and property reverted to owners.

Idle many years.

TOMBOY MINES

Address: Bruce Hobbs, sec., 29 Otis St., Boston, Mass.

Idle. Described in Vol. XIII.

TOMBSTONE CO-OPERATIVE MINING CO.

ARIZONA
Address: J. L. Melgren & Son, Tombstone, Ariz. J. W. Storkman, mill supt.

Property: a 120-ton concentrating mill and cyanide plant, at Tombstone, Cochise county, treating custom ore.

TOMBSTONE SILVER FIELDS CO.

ARIZONA
F. W. Clark, pres. Frank Cavanaugh, supt.

Inc. 1920, in Delaware. Cap. \$1,500,000; in 250,000 8% cumulative, convertible pfd. shares and 1,250,000 common shares; \$1 par.

Property: included a bond on the Melgren group of 55 claims, also the Merrimac and Old Guard groups, in the Tombstone district, Cochise county.

No work has been done since the initial payment was made and the ground has probably reverted to the original owners.

TOM REED APEX MINING CO.

ARIZONA
Probably dead. See Vol. XIV.

TOM REED GOLD MINES CO.

ARIZONA
Mine office: C. R. Waters, supt., Oatman, Ariz. Office: 604 Chamber of Commerce Bldg., Pasadena, Calif.

Officers: S. S. Wold, pres.; Chas. Mushrush, v. p.-asst. treas.; W. J. Lawrence, sec.; J. W. Roach, treas.; E. S. Harwood, asst. sec.; with O. Keck and C. N. Post, directors. W. B. Phelps, gen. supt.; W. A. Linfesty, mill supt.; J. C. McBride, res. agt.

Inc. Dec. 17, 1906, in Arizona. Cap. \$1,000,000; \$1 par; outstanding, 909,555. No bond issues, mortgages or indebtedness. Listed on Los Angeles Stock Exchange.

For year ending April 1, 1921, gross earnings were \$710,515, and other income was \$28,202. Contra, mining, milling and transportation expense was \$498,284; mine overhead, \$39,887; administration, etc., \$65,435; total expense, \$603,606. Net income was \$135,111, which after depreciation and depletion left \$31,278 deficit, carried to surplus, as compared with a gain of \$17,922 for 1920. Current assets were \$108,926, and liabilities, \$68,049, with additional commitments of \$10,831; surplus was \$1,733,758.

Company's investments include stock interest in Crown City Gold Mines Co., Gold Reef Cons. Mines Co. and Clipper Mtn. Gold Mines Co., the latter two in California.

Dividends: aggregate over \$2,900,000. The first dividend of 6% was paid in 1908, and a second dividend of 3% was paid in 1910. Since then dividends averaged 4½% per month for five years. In 1916, 10½% per share was paid. Dividends were resumed in 1918, at rate of 2% per month and reduced in 1920 and 1921. In fiscal year 1920-1921, 15% was paid, with last on March 20, 1921.

History: the mine was discovered in 1900, 20 years after the discovery of the Gold Roads mine nearby. Early development proved unsuccessful and in 1904 the mine was sold for \$75,000, one-tenth cash. The purchasers failed to meet payments and the property passed to the Title Insurance & Trust Co. of Los Angeles, representing creditors, for \$45,000. The present company was formed and deeper developments undertaken. The Ben Harrison shaft was then 150' deep and the Tom Reed 90'. The first shoot of commercial ore was encountered on the 150' level.

Property: 29 claims, 12 patented, in three district groups, 431 acres, in the San Francisco district, Mohave county. Also owns water rights and mill sites in Cottonwood Canyon.

Geology: the claims cover the outcrop of the big Tom Reed lode, one of the typical quartz-adularia veins of the district, which has been re-opened and crushed by strike faulting with enrichment of the primary ore. The ore-shoots persist to the deepest level developed (1,400'), with no change in size or value. Ore is gold-bearing; for 5 years prior to 1921, average value of ore mined and treated was \$8.75.

In April, 1919, suit was begun against the United Eastern company concerning orebodies in the Big Jim claim, owned by the latter. Due to the fault system revealed in Tom Reed, confusion has arisen as to the dislocation of the Big Jim orebody and its obscured northwestern prolongation. The case is complex. Final argument was heard in Nov., 1920, and in March, 1921, the decision rendered was adverse to Tom Reed; an appeal has been taken.

Development: by Aztec, Red Cloud (725') and other shafts, to a total depth of 1,400', with total workings of about 6 miles. New work totaled 5,315' in 1920-1921.

At 400' depth in the Aztec claim there was opened 1,000' of milling ore, but results on 500' level were disappointing, although late in 1919 some high-grade ore had been opened showing good width. Further work in 1920 on 400' level uncovered 2 new orebodies with little promise above but unexplored below. Work on 700' level has begun. Reported in June, 1919, that a 6' vein of \$15 ore had been opened on 400' level of the Bald Eagle claim. The vein was cut at 600' in 1920, but larger part of ore came from the Grey Eagle orebodies.

Ore reserves: April 1, 1919, estimated to be 65,800 tons. With the vein exposed on one side only and ore occurring in small faulted blocks, reserves for 1921 are not given.

Equipment: working shaft has a 150 h. p. electric hoist. Power is supplied by the Desert Light & Power Co., Kingman. There are 3 compressors with capacity of 4,000 cu. ft.

The mill, re-built in 1917, of 300 tons capacity, has ball-mills, classifiers and counter-current decantation system of cyanidation. Mine has machine-shops, supply store, hospital, recreation hall, etc. Present equipment cost more than \$300,000.

Production: from April 1, 1908 to Jan. 1, 1920, totaled \$8,186,074, and to the end of 1920, about \$9,100,000.

For year ending March 31, 1918, 81,114 tons ore treated, average assay \$7.595; tails averaged \$0.446. Mining and milling costs were \$5.25 per ton, including all overhead, taxes and depreciation. During the year ending March 31, 1919, there were treated 88,525 tons of ore, average value, \$9.05 per ton; tails averaged \$0.37. Mining and milling costs were \$4.63 per ton, of which \$2.03 was for milling and \$2.60 for mining. Total costs were \$5.87 per ton. Production was 36,524 oz. gold, and 17,229 oz. silver. In

1919-20, the output was 89,557 tons of ore averaging \$7.94 and tails \$0.34 per ton. Total cost was \$6.68. In 1920-21, 93,970 tons averaging \$7.81 per ton were treated; tails averaged \$0.25. Mining cost was \$3.41 and milling, \$1.85, with a total of \$6.72. Net bullion production was \$705,657 in year ended March 31, 1921, as against \$675,403 in previous year.

Property is a good one, and equipment complete. During the past several years there have been many changes in the Tom Reed management, the last being in Sept., 1917. The new mill is working well and has been profitably treating lower-grade ore, but, despite many economies, the margin has become close.

TOM REED, JR., MINING CO.

ARIZONA

Probably dead. Described in Vol. XIII.

TORTILLITA COPPER CO.

ARIZONA

Office: care Cameron, Michel & Co., 8 W. 40th St., New York. **Western office:** care Hon. J. B. Wright, 32 N. Stone Ave., Tucson, Ariz.

Officers: Wm. P. Michel, chairman; Robinson V. Thompson, pres.; Thos. Rowland, v. p.; Leon N. Salmon, sec.; J. W. Edward Michel, treas., with Geo. P. Jeffrey, directors.

Inc. March, 1912, in Arizona. **Cap.** \$1,000,000; \$1 par; 600,000 issued. Registrar & Transfer Co., Jersey City, N. J., transfer agent. Annual meeting in January, at the Tucson office.

Property: 37 claims, 750 acres, about 15 miles N. E. of Redrock, Pinal county, includes the Cloudburst and Yankee Girl mines, purchased under foreclosure in May, 1912. Property is an old-time silver producer.

Development: by "Yankee Girl" 2-compartment shaft, 500' deep.

Equipment: includes an oil-driven air compressor, drills and a gasoline hoist.

Whether the property has a large ore deposit or not has not yet been proven. Idle for several years.

The Tortillita was promoted by Cameron, Michel & Co., a company that refuses to publish reports or furnish information, except to prospective "investors."

TOWNE MINING CO.

ARIZONA

Officers at last account : S S. Jones, pres.; T. J. Murphv, v. p.; J. E. Shank, sec.-treas; with Dan Murphy and J. M. Francis, directors.

Property: the Towne mine, 1½ miles S. of Chloride, Mohave county, developed by 225' vertical shaft.

Production: totaled \$1,125,000 to 1916, mostly silver ore. Smelter returns show carloads of selected ore assaying 7 oz. gold and 600 oz. silver per ton.

Idle.

TRENCH CONSOLIDATED MINES CO.

ARIZONA

Property: the Farrel mine, near Patagonia and Harshaw, Santa Cruz county. Was acquired in 1913 by Chas. W. Clark. Double compartment shaft sunk 600', reported to have opened good grade ore on the 500' level.

Holdings changed hands in 1920.

TROY ARIZONA COPPER CO.

ARIZONA

Address: A. K. Sloan, sec.-treas., 15 Maiden Lane, New York.

Mine office: Kelvin, Pinal county, Ariz.

Officers: John F. Galvin, pres.; Calvin Page, v. p.; Brackley Shaw and Henry Rudolph, directors. John C. Devine, mgr.

Cap. \$3,000,000; \$10 par. Company is a reconstruction of the old Troy Copper Co., succeeded by Troy-Manhattan C. Co., which in turn was succeeded by the Troy Consolidated Mining Co., fully described in Vol. IX, Copper Handbook. Operations of all these "Troy" companies proved disappointing.

Property: 85 claims, 1,600 acres, in Pinal county, 3½ miles N. E. of Erman, on the Arizona Eastern R. R., known as Troy, Climax and Man-

hattan groups. The Troy group said to have 12 and Manhattan group 6 veins.

Development: reported to aggregate over 5 miles, including several shafts, deepest 500', and tunnels. Company's engineer stated that while a large tonnage of ore is not blocked out, yet with a moderate amount of work several hundred thousand tons could readily be made available. Examined and reported on by L. Von Rosenberg, but inspection proved the work very superficial and conclusions, in our opinion, unwarranted.

Present management considered good and property promising. Presumably idle.

TUCKAHOE MINING CO.

ARIZONA

Mine address: E. J. Carter, mgr., Chloride, Arizona.

Treasurer's Office: 185 Devonshire St., Boston Mass.

Officers: Fred J. Bein, pres.; A. M. McDuffee, v. p.; Geo. E. Mills, sec.; Chas. Matlack, treas., with E. J. Carter, directors.

Inc. in Ariz. Cap. \$1,000,000; \$1 par; 500,000 shares issued. Authorized \$250,000 five-year 7% convertible debenture bonds; none issued. Commonwealth Trust Co., Boston, registrar; Beacon Trust Co., Boston, transfer agent.

Property: 5 claims, 1 patented, 90 acres in Wallapai district, 1 mile from Chloride. Ore occurs in a fissure vein in porphyritic granite, carrying gold and silver, with some lead and zinc. The main orebody, opened to depth of 550', is reported to be 2-7' wide and 410' in length, assaying 26-40 oz. silver and 0.20 oz gold, with an average value of \$30 per ton. Reserves estimated at 33,000 tons of \$32 ore.

Development: by 600' shaft with levels at 150, 250, 350, and 550', and a total of 3,000' of workings.

Equipment: includes 30 h. p. gas hoist, engine and pump, electric power, compressor, air-drills, and necessary buildings. Management plans additional development on the 550' level and erection of a 50-ton mill combining gravity and flotation concentration.

Production: to date about 2,300 tons valued at \$175,000.

TUCSON ARIZONA COPPER CO.

ARIZONA

Address: John F. Cowan, D. F. Walker Bldg., Salt Lake City, Utah.

Officers: John F. Cowan, pres.; E. A. Culbertson, v. p.; B. G. Hite, sec.-treas., with S. H. Douglas, W. H. King and L. A. Cummings, directors.

Inc. Nov. 28, 1916, in Arizona. Cap. \$1,000,000; \$1 par; 724,493 issued.

Property: 23 claims, in Pima county, 6 miles from Tucson, shows contacts and fissures in limestone and andesite. Orebody is said to be from 4 to 30' wide, dips 45 to 75°, and has an E.-W. course. Shoot is 400' long, 6 to 10' thick, and reported to assay 6% copper, 3 oz. silver and \$1 gold per ton.

Development: by 135' shaft and 500' of workings.

Equipment: 25 h. p. gasoline hoist and 250 cu. ft. compressor.

Company is reported to have acquired a new property in Plumas county, California, and to contemplate a reorganization.

TUCSON CONSOLIDATED COPPER CO.

ARIZONA

Dead. Fully described in Volume XIV. See Old Pueblo M. & M. Co.

TUNGSTEN REEF MINES CO.

ARIZONA

Officers: A. J. Clark, pres.-treas., H. W. Hellman Bldg., Los Angeles Calif., L. E. Porter, v. p.-sec.; G. D. Kislinsky, supt.

Property: group of claims in Huachuca Mountains, Cochise county, 40 miles S. W. of Bisbee, and 16 miles S. of Hereford, formerly owned by Exposed Reef Tungsten Co. Ore occurs in quartz vein carrying a high percentage of tungsten with some gold.

Equipment: 100-ton mill, making a recovery of 10% WO₃ per ton of ore (1918).

Idle since the signing of the Armistice.

TURKEY SILVER MINING CO.**ARIZONA****Address:** E. G. Weaver, Prescott, Ariz. Inc. 1920, in Arizona.**Property:** the Cutter, Iron Dike and Pavo mines in the Black Canyon district, Yavapai county, said to contain gold-silver bearing ore, Machinery being installed and development work reported under way, March, 1921.**TUSCUMBIA MINING & MILLING CO.****ARIZONA**

Dissolved. Described in Vol. XIV.

TWIN BUTTES MINING & SMELTING CO.**ARIZONA****Office:** 77 Michigan St., Milwaukee, Wis. **Mine office:** Twin Buttes, Pima county, Ariz.**Officers:** W. A. Barber, pres.; Julius O. Frank and J. H. Tweedy, Jr., v. p.'s, John Mets, sec.; Stephen Hoff, treas., with Ralph M. Friend, G. P. Mayer, Fred Wilmanns, R. E. Hackett and Henry Nunnemacher, directors.Inc. Sept. 8, 1903, in Arizona. **Cap.** \$2,000,000; increased, 1905, from \$1,000,000 to \$1,250,000, and again increased, January, 1910, to \$3,000,000; shares \$1 par; 2,000,000 shares outstanding. Capital reduced to \$1,880,000 in July, 1918. Controls the Twin Buttes Railroad Co. Wisconsin Trust Co., transfer agent and registrar. Annual meeting, third Monday in February.**Property:** the Glance mine, operated under bond and lease on a royalty basis by the Glance Mining Co. The Morgan mine is idle. The Twin Buttes Co., also owns many other claims, partly patented, in the Twin Buttes district, in the foothills of the Sierrita Mountains, 27 miles south of Tucson. Lands carry fissure veins in limestone and contact deposits having a limestone foot and granite-porphry hanging wall.

The Twin Buttes Railway, 10 miles in length, running from Twin Buttes to the S. P. (Nogales line), has 1 locomotive and 3 flat cars.

See **Glance Mining Co.** The Queen mine has been sold to the Midland Copper Co.**TWO PEAKS MINING CO.****ARIZONA****Address:** Turner, Arizona.**Officers:** W. G. Gilmore, pres.; J. C. Akard, v. p.; E. P. A. Larrieu, sec.-treas., with J. S. Trowbridge and T. D. M. Larrieu, directors.Inc. Jan. 4, 1916, in Arizona. **Cap.** \$2,500,000, \$2.50 par; 432,054 issued.**Property:** 45 claims, 1,012 acres, at S. end of Whetstone Mts., Cochise county, said to show a contact with a mineralized shear-zone striking S. 48° W., through the overlying monzonite porphyry, below which is limestone. Ore occurs as lenses in sheeting planes and through the porphyry mass, and according to company carries 3.16% copper, 0.034 oz. gold and 2 oz. silver per ton in shear zone. Minerals are chalcopyrite in shear zone, and bornite and chalcopyrite in contact deposit. Carload in 1916 averaged 4.03% copper.**Development:** by shafts 36, 55, 60, and 100' deep, and by 270 to 280' tunnels. Workings to depth of 150'; total, 1,500'. No recent information.**TYRO MINES CO.****ARIZONA****Address:** c/o I. M. George, Kingman, Arizona.**Property:** in Union Pass or San Francisco district, Mohave county, developed by 300' shaft, exposing an orebody 30' wide of milling grade.**UNION BASIN MINING CO.****ARIZONA**Plant was burned down in 1917; insurance collected; funds invested. Company in process of dissolution. Described in Vol. XIII. Property sold for \$35,000 to C. B. Bell, who organized the **Highland Mining Co.****UNION METALS CORPORATION****ARIZONA****Address:** Frank F. Peard, pres.-gen. mgr., Bradbury Bldg., Los Angeles, Calif. Security Transfer & Registrar Co., New York, transfer agent.**Property:** Fredonia and Fredonia No. 2 claims, N. of Kingman, in the Wallapai district, Mohave county, formerly owned by the Golconda Consolidated, said to have developed a strong lead-zinc vein carrying gold and silver.

The Union Metals Corp. is in process of consolidation with the United Tungsten-Copper Mines and Kaibab Sm. Co., the new corporation to be the Kaibab Cons. M. Co.

UNION PASS MINING CO.**ARIZONA**

Address: c/o A. G. Cushman, Kingman, Ariz. Thos Kilker, supt.

Property: 120 acres, in one block, in Union Pass section of the San Francisco district, Mohave county; and also fractions in same district adjoining Gold Chain.

UNITED AMERICAN MINING CO.**ARIZONA**

Address: Oatman Ariz. **Mine address:** A. L. Nielson, supt., Oatman, Arizona.

Officers: W. K. Ridenour, pres.-treas.-gen. mgr.; John F. Withers, v. p.; J. A. George, sec., with R. H. Carr, E. A. Shaw and C. W. Herndon, of Kingman, directors.

Inc. April 7, 1919, in Ariz. **Cap.** \$375,000; par 25c.; 300,000 shares in treasury. Annual meeting 1st Tuesday in March. Company authorized, October, 1921, to sell 223,925 shares at 20c. each.

Property: the Rebel and Kicker patented claims, 40 acres, said to contain east extensions of the Tom Reed veins. Also the Helen mine adjoining the Moss mine, an old and rich producer.

Development: prosecuted continuously since 1920, includes 700' shaft, with winze to 925' level, and 4,200' of workings. Drifts show vein to be 10 to 30' wide with pay streak, 2-4' wide, and with length of 225' to 250', averaging \$20 per ton, on 850' level.

Equipment: electric hoist, Sullivan compressor, etc.

Reserves: perhaps 5,000 tons, including 18" of \$50 ore, but no accurate estimate made. Arrangement being made (1922) to treat ore in Tom Reed mill.

Stock sold at 20c. in Nov., 1921 by E. A. Shaw, fiscal agent, Kingman. Property belonged to and was operated by the Amalgamated Copper Co. in the eighties. The Helen claim is undeveloped.

UNITED ARIZONA COPPER MINING & SM. CO.**ARIZONA**

Office: 123 Liberty St., New York. **Mine address:** A. Syverson, supt., Mayer, Arizona.

Officers: C. H. Dunlap, pres., Phoenix, Ariz.; Frank O. Longcor, v. p.-gen. mgr.; Claudius A. Hand, sec.-treas.; with Geo. M. Buckingham, Warren P. Eaton, Percy W. Brough, and Geo. Davidson, all of New York City, Lucien Little of West Orange, N. J. and R. C. Baker of Phoenix, Arizona., directors.

Inc. March, 1916, in Arizona. **Cap.** \$2,000,000; \$1 par; 1,500,000 issued. Listed on New York Curb. Security Transfer & Registrar Co., 66 Broadway, N. Y., transfer agent.

Property: 22 claims, 440 acres, on Copper creek, Yavapai county, 26½ miles E. of Mayer, by a good road and 16 miles E. of Horseshoe ranch on Agua Fria river. The group is in a belt of sheared granite 1½ miles long, showing quartz veins containing masses and bands of copper ore; these quartz veins grade into wider zones of sheared and schistose granite, characterized by uraltite and chlorite. Surface showings are attractive and recent work, at a depth of 980' disclosed high grade bornite-chalcopryrite ore. During 1920-21 about 3,500' of diamond drilling, which was done on the tract, proved the continuity of the veins, and the downward continuance of mineralization, though the cores do not show high grade ore like that cut by the shaft. The Arizona Copper Queen Co. owns the group to the north, the Rosalie Copper Co., the group to the south, with the Brooklyn mine beyond.

Development: by 1,020' shaft with levels at 150', 300', 400', 600', 800', 900 and 1,000'.

Equipment: includes 25 h. p. Foss gasoline hoist, also 3,000 cu. ft. compressor and 60 gallon pump. Examined by G. W. Miller and A. G. Marsh.

Austin G. Marsh, acting cons. engr. of the company, estimates that water level is 200' below the bottom of the shaft, now 1,020' deep and that "the fact that ore has been discovered at the present depth, the high grade of this ore and the occurrence in a fissure vein is very promising indicating continuation to great depths as well as widespread occurrence throughout the extensive quartz vein system".

UNITED ARIZONA EXTENSION MINING CORP. ARIZONA

Merged April 1, 1921 with **United Arizona C. M. & S. Co.**, which see.

UNITED EASTERN MINING CO. ARIZONA

Office: Oatman, Arizona.

Officers: Philip Wiseman, pres.; Geo. W. Long and C. H. Palmer, Jr., v. ps.; R. I. Rogers, treas., with S. W. Mudd, J. L. McIver, W. K. Ridenour, Geo. D. Nordenholt, D. C. Jackling, J. E. Fishburn, and R. C. Nowland, directors. Wallace Keith, sec. and purchasing agent; Roy W. Moore, gen-supt.; Earle M. Bagley, mill supt.

Inc. Nov. 22, 1913, in Ariz. Cap. \$1,500,000; \$1 par; outstanding 1,363,000. Equitable Trust Co., of New York and Security Trust & Savings Bank of Los Angeles, transfer agts.; Central-Union Trust Co., New York and Security Trust & Savings Bank, Los Angeles, registrars. There are over 2,100 shareholders. Listed on Los Angeles Stock Exchange and on New York and Boston curbs. Annual meeting first Tuesday in March.

Year	Total revenue	*Operat. charge	Arizona Taxes	Profit
1920.....	\$2,192,634	\$998,231	\$96,308	\$1,098,096
1919.....	1,997,189	932,934	97,613	966,642

Cost per ton

*Does not include Federal taxes.

For first 10 months of 1921, profit was \$916,185, after deducting operating charges, but not depreciation, income taxes, and the like.

Dividends: initial in July, 1917, and 30¢ per share for that year; 62¢ in 1918; 66c. in 1919; 72c. in 1920; 60c. in 1921; 15c., Jan. 28, 1922. Distributions are made quarterly. Total, \$4,157,150.

Property 17 claims, 224 acres, patented, at Oatman, Mohave county, adjoining the Tom Reed mine on the N., and covering the N. W. extension of Tom Reed vein; 21 miles S. W. of Kingman, the nearest rail point.

In April, 1917, the Big Jim mine, 1 mile from the producing section of the United Eastern was purchased for 160,000 United Eastern shares, or over \$800,000.

In April, 1919, the Tom Reed Gold Mines Co. started suit against the United Eastern concerning orebodies in the Big Jim claim. The dispute arose through confusion due to the fault system revealed in the Tom Reed mine, whereby the Big Jim orebody has been dislocated and its N. W. prolongation obscured. Final arguments were heard on Nov. 15, 1920; in March following, decision was rendered in favor of defendant. Plaintiff has appealed.

Geology: deposit consists of a vein, irregularly banded with quartz, in andesite. Geology of the district is complex, composed of andesite flows with rhyolite intrusions, and has been studied by many engineers. Veins outcrop either as prominent silicified ribs or as shallow depressions in the andesites, all showing more or less brecciated rock fragments cemented by calcite or quartz. Ore occurs as a series of lenses pinching vertically and horizontally within the vein-filling. Gold is seldom found near the surface in commercial quantities. The gold is extremely fine, making fine grinding necessary. None of the mines are wet.

Development: by the main or No. 2 shaft, 1,343' deep, and several miles of openings. The original orebody on Tom Reed Extension claim will have been exhausted above the 665' level in about 6 months. Mill ore has been coming from the 665', 815' and 965' levels. On the 815' level there is a shoot 920' long and 7' wide. A limited amount of work is being performed at the Big Jim mine.

New work in 1919 covered 4,850', including 350' at the Big Jim; in 1920, total was 3,162'. During 1920, 3,150' of diamond-drilling was done on the 8th and 10th levels to quickly determine possibilities at greater depth; results were not encouraging.

Ore reserves: on Jan. 1, 1921 were 222,086 tons with gross value of \$4,100,738, assuring a 3 year mill supply; this is a reduction from 1919 of 47,000 tons and about \$2,000,000 in value.

Equipment: includes double-drum 150 h. p. electric hoist, two 150 h. p. compressors of 888 cu. ft. each, 200-ton coarse ore bin, No. 6 gyratory crusher driven by 50 h. p. motor, 400-ton mill ore bin, 2 No. 64½ Marcy mills driven by 50 h. p. motors, Dorr classifiers, three 5 x 6' Ball pebble mills driven by 75 h. p. motors, Callow tanks, 6 Dorr 40 x 12' thickeners, 7 Dorr 24 x 14' agitators, 16 diaphragm pumps, Krogh centrifugal pumps, Merrill classifying and zinc dust precipitating presses, refinery and the necessary cyaniding accessories, with a daily capacity of 325 tons. The whole surface equipment including water system, houses, roads, etc., cost over \$260,000.

The United Eastern mine and mill are described by Otto Wartenweiler in the November, 1917, Bull. of the A. I. M. E.; and the mill operations during 1917 and 1918, by W. O. North, in Bull. 152 of the A. I. M. & M. E., Aug., 1919.

Production: in 1921 was 88,043 tons ore milled yielding \$1,775,772 at a cost of \$703,162, or an operating income of \$11,539 per ton, or total of \$1,015,953.

Year	Ton milled	Ore value per ton	Rec. %	Gold oz.	Silver oz.	Min.	Mill	Total cost
1921.....	88,043	\$20.69	96.78	\$11,509
1920.....	102,926	21.76	96.80	100,886	75,526	5.19	2.02	9.15
1919.....	97,325	20.87	96.99	91,263	55,973	5.09	2.02	9.21
1918.....	92,339	23.16	96.95	97,827	52,485	4.73	2.22	8.50
1917.....	84,548	22.42	96.41	85,918	43,989	4.18	2.16	7.28

Reserves have not kept step with production, and the drilling campaign of 1920 did not show commercial values in the undeveloped ground of the main vein. The future of this mine apparently therefore depends on developments in the Big Jim mine, and on a reduction of mining costs, through cheaper wages and economies elsewhere, so as to prolong the life of the mine by making the formerly worthless lower grade material, a source of profit. The management is conservative and very efficient.

UNITED GLOBE MINES

See Old Dominion Co.

ARIZONA

UNITED JEROME COPPER CO.

Probably dead.

ARIZONA

One of the companies that employed full-page advertisements during the boom at Jerome, trying to sell shares. Cannot locate promoters and letters sent to company are returned by postoffice.

UNITED MAGMA MINES CO.**ARIZONA**

Out of existence, and Harry Lefkovits (name changed in Sept., 1918, to Lefko), with his first aide, R. V. Stuart, were finally convicted in Dec., 1919 of using the mails to defraud the public. A swindle from beginning to end. See Vol. XIII.

UNITED MINES COMPANY OF ARIZONA**ARIZONA**

Address: care L. M. Hart, 120 Broadway, New York City.

Officers at last account: George Christie, v. p.; S. H. Stewart, treas.; E. A. Goodrich, sec., with H. E. Woods and A. G. Halm, directors.

Inc. May, 1916, in Arizona. **Cap.** \$1,750,000; \$1 par; 900,000 in treasury. On Dec. 10, 1919, at public auction, 1,000 shares were sold at \$75 the lot. Stock stricken from listing on New York Curb, December, 1920.

Property: 30 claims, 600 acres near Bouse, Yuma county, including former holdings of Little Butte Cons. Mines Co., the Arizona Pride and Bullion groups.

Mine shut down 1916, as funds for development were nearly exhausted before reaching the point where engineers expected to find the orebody.

Development: by a 700' incline shaft with 1,000' of levels at depths of 75, 120, 210 and 310'. Water was encountered at 200', but the lowest limit of oxidation has not yet been reached. The 120' level shows ore bunches for 600' along the drift. The 210' level shows mainly leached vein matter with occasional bunches of copper ore, but the leached material is said to average \$7 per ton for 200' along the drift. Similar conditions obtain at 300'.

The **Arizona Pride Group** claims cover part of the granite area in which gold-bearing quartz veins occur. Development includes 50' and 60' shafts, both showing ore.

The **Bullion Group** covers a sedimentary area, cut by intrusions of diorite and andesite, with veins following the intrusive contacts. A 205' shaft on one vein has not reached water level, the filling being leached.

Production: under former owners the Little Butte mine shipments produced 73,400 lb. copper, the ore averaging \$7.60 per ton gold, 9.4% copper, 20% iron and 32.4% silica.

In April, 1917, property was examined by Henry C. Carr, who considered the gold-bearing vein of secondary consideration without a treatment plant. Copper ore will probably be found in commercial quantities at greater depth—predicted at 750'.

The property has attractive possibilities which are said to warrant carefully planned development.

UNITED NORTH MINES CO.**ARIZONA**

Mail returned from former address, 434 I. W. Hellman Bldg., Los Angeles.

Officers: C. T. Howland, pres.; W. H. Thomas, sec. and treas.

Inc. 1915, in Ariz. **Cap.** \$100,000; par 10c.; in treasury, 500,000.

Property: the Lion, Kennedy Fraction, and Poorman claims, 40 acres, in the San Francisco district, Mohave county, between United Eastern and Gold Road mines, N. of west end of Fessenden claims.

Equipment: 25 h. p. gasoline hoist, compressors, etc. Probably idle.

UNITED STATES CONTINENTAL MINES CO.**ARIZONA**

Address: Room 916, 30 Broad St., New York. An I. K. Farrington & Co. promotion.

Officers: I. K. Farrington, pres.; O. O. Abbe, v. p.; R. B. Cross, treas.

Cap. \$1,000,000; \$1 par, changed to \$5 par; 200,000 shares issued. Stock listed on N. Y. Curb. High, 10½; low .06 in 1921 (July). Stock offered at 45c. per share, October, 1921. Registrar and Transfer Co., New York, registrar and transfer agent.

Company controls the **Arizona Victory Mng. Co.** and **Consolidated Homestead Mines, Inc.**, of Arizona, and the **Honduras American Syn.** of Honduras, which are separately described. A merger of the U. S. Continental and Honduras American is under way on a basis of 20 shares of United States Continental for 1 Honduras American. The promoters are extensively advertising the U. S. Continental and the subsidiary companies, advising stockholders "to look at their company as their opportunity to engage in mining on an actual, fortune making mine basis".

In November, 1921, it was officially reported that nine-tenths of Honduras American shares have been exchanged, or were about to be.

As yet none of the properties are near the producing stage, nor are they developed or equipped.

UNITED STATES PLATINUM CO.

ARIZONA

A "war-baby," born in 1918, presumably died the same year. See Philadelphia North American, for August 22, 1918.

Officers at last account: Ralph H. Cameron, pres, 1006 Land Title Bldg., Philadelphia, Pa. H. N. Williams, sec.-treas.

Property: in the Grand Canyon of Arizona. The U. S. Geological Survey in a Press Bulletin, issued in Jan., 1919, says:

"From time to time the supposed presence of platinum ore in the Grand Canyon has received new advertisement, and recently stock in a company organized to exploit the alleged deposits was offered for sale in an alluring prospectus wherein were published assays of the so-called ore that showed as much as 2.4 oz. of platinum to the ton. . . . The supposed platinum bearing deposits are beds of green and red ferruginous sandstone that constitute a subordinate part of the geologic formation known as the Bright Angel shale, of Cambrian age."

In 1911, F. L. Ransome of the U. S. Geological Survey, and, in 1915, H. G. Ferguson, of the Survey, examined claims near Indian Garden that were being held as platinum-bearing ground. In 1918, Mr. Ransome again examined the supposed platinum deposits. The Press Bulletin says, "As a result of these investigations it may be safely stated that the supposed platinum deposits in the Grand Canyon do not contain platinum—certainly not enough to be of any value."

The ground was also examined by John M. Boutwell, who stated that he made a geologic study and took 275 samples. As the result of careful duplicate and triplicate assays, special chemical work, and duplicate concentration tests, "platinum ore has not been found in the ground examined in form and grade of commercial value."

In a suit brought by the United States against Cameron et al, the Supreme Court, in August, 1920, affirmed judgment of the lower courts, enjoining the defendants from occupying or using the property Cameron claimed as a lode mining claim, located by him in 1902, on the southern rim of the Grand Canyon at the head of the Bright Angel Trail.

UNITED STATES VANADIUM DEVELOPMENT CO.

ARIZONA

Address: 306 Goodrich Bldg., Phoenix, Ariz. **Mine office:** Kelvin, Ariz.

Officers: E. P. Palmer, pres.; H. B. Holloway, v. p.; A. L. Flagg, sec; W. J. Horspool, treas., with B. E. Marks, directors.

Inc. Dec. 31, 1915, in Arizona. **Cap.** \$1,500,000; \$1 par; issued 1,350,000 shares.

Property: 40 claims, 800 acres, in Pinal county, 3 miles E. of Kelvin. Development by 250' and 400' tunnels said to have opened considerable ore, averaging 1.3% vanadium, 1% molybdenum and \$3 gold and silver Since May, 1920, only a small force is working on the property.

UNITED VERDE CONSOLIDATED CO.

ARIZONA

Presumably out of existence. See Volume XIV.

UNITED VERDE COPPER CO.

ARIZONA

Office: 20 Exchange Place, New York. **Mine Office:** Jerome, Yavapai county, Ariz. **Smelter office:** Clarkdale, Ariz.

Officers: Wm. A. Clark, pres.; Jas. A. Macdonald, v. p.; J. H. Anderson, sec.; H. H. St. Clair, treas.; Chas. W. Clark, gen. mgr.; officers are the directors; Robt. E. Tally, asst. gen. mgr.; H. DeWitt Smith, supt. of mines; Dave Hopkins, purch. agent.

Inc. 1883, in New York and reorganized Sept. 2, 1899, West Virginia. Again reorganized in Delaware, May 9, 1917. **Cap.** 300,000 shares of no par value fully issued and fully paid. Is practically a close corporation, having 20 shareholders, and is controlled, through stock ownership, by W. A. Clark. Five hundred shares were sold at auction, March 1910, for \$70 per share.

Gross sales of copper, silver and gold were \$5,368,672 in 1909, \$5,605,488 in 1910, \$4,736,834 in 1911, \$5,899,457 in 1912, \$6,171,116 in 1913, \$5,186,999 in 1914, \$9,519,419 in 1915, \$17,185,881 in 1916, \$15,276,954 in 1917, \$19,275,567 in 1918; \$6,563,427 in 1919; \$10,823,856 in 1920.

In Feb., 1921 company took a 5% interest, \$2,000,000 total amount, in the Copper Export Association's \$40,000,000 8% note issue.

Dividends: were begun, 1892, by old company on the basis of 25c per share monthly. Recent dividends have been: \$2,005,000 in 1905, \$2,700,000 in 1906, \$2,700,000 in 1907, \$2,025,000 in 1908, \$2,700,000 in 1909, \$2,700,000 in 1910, \$2,250,000 in 1911, \$1,800,000 in 1912, \$1,575,000 in 1913, \$1,125,000 in 1914, \$1,800,000 in 1915, \$4,050,000 in 1916, \$5,175,000 in 1917, \$5,550,000 in 1918, \$1,800,000 in 1919, \$1,800,000 in 1920, \$450,000 in March, 1921.

Property: 45 patented claims, 659 acres, with sundry adjoining property, including the North Venture and South Venture claims, which have produced a little high-grade ore, in the Verde district, Yavapai county at Jerome.

As a result of a compromise of a suit, Chas. W. Clark as trustee holds 5,181,173 shares of the Hull Copper Co.

Geology: the property shows an area of metamorphosed volcanic flows overlain by clearly bedded sedimentaries. These beds were greatly sheared and folded and then intruded by acidic porphyry. The later intrusion of a diorite was followed by ore-deposition along the concave margin of this diorite.

The ore-bodies are steep dipping lenses, varying in section from a few feet in width and length up to 200' wide by 500' long. The oxidized zone above 160' level carries auriferous and argentiferous copper ores. Secondary enrichment is of little importance. The primary zone carries pyrite and chalcopyrite, with a little bornite and sphalerite. All ore is smelted direct without concentration; its average copper content is approximately 5.25%.

Development: to the depth of 2,500'. Production is chiefly from the 1500' and lower levels, and is in large part obtained by horizontal cut-and-fill methods. The oxidized zone is being mined by mill-holes and shrinkage is used where the ground will permit. Square-set stopes are required where the rock is shattered.

No. 5 ore-shaft has been concreted to the 2,500' level and No. 6 supply-shaft to the 1,950' level; and there are two other working shafts, Nos. 3 and 4. Level intervals are 150'.

The ore is easily oxidizable owing to its high sulphur tenor, and is therefore liable to spontaneous combustion, while, owing to the more or less shattered condition of the orebody, it is difficult to prevent entirely the access of air, very little of which will keep a sulphur fire burning incessantly. The fire on the 400' level has been burning since 1897, and the mine is on fire in various places, from No. 9 level to surface, fire in stopes not worked being walled off by cement bulkheads. Mining until early in 1917 has been in progress for several years in the fire zone under the Plenum sys em, introduced by J. J. Shaw. By this method, air under pressure is blown against the face of the stopes by electric fans. The large volume of cold air has a cooling effect on the burning ore, reducing temperatures, and extinguishing the fire in the immediate vicinity of the working face, at the same time driving back

the deadly fumes into the shattered rock mass and permitting extraction of the ore. The fire, while dangerous and annoying, does not destroy the copper, all of which will be recovered eventually, by mining or leaching.

In order to reach the burning sulphide stopes, steam shovels began 1919-20 to remove 14,000,000 cu. yd. of overburden which will permit the mining down to the 500' level of some 5,000,000 tons of ore said to carry 4% copper. This has necessitated the abandonment of certain old workings and the replacing of a part of the old surface plant by new.

The mine has one of the most perfect systems of mechanical ventilation known to copper mining. It was developed through the necessity of fire control, and cooling off of the heated parts of the mine, together with a plentiful supply of fresh air to the working faces.

For the convenience of smelter operation, ores as mined are divided into 4 classes. All underground work is planned to maintain a daily output of 3,000 tons, with a possible increase to 4,500 tons; this necessitates 25,000' of workings and a vertical development of 100' per year.

Equipment: includes a new compressed air plant of 3 units of electrically driven 2-stage compressors of 1,500, 3,000, and 6,800 cu. ft. capacity respectively, driven by 300 h. p., 600 h. p. and 1,250 h. p. motors respectively.

The No. 5 shaft has a mechanical double-drum hoist with electrical equipment, speed of 1,000' per-minute, good for 3,000' depth; skips of 7-ton capacity, operated in balance, are used. This installation is on the 1,000' level, which is the collar of No. 5 shaft. No. 6 shaft has a single drum and reel hoist, driven by a 350 h. p. induction motor and liquid control. The service cage is 7'x12', double decked, and operates in balance with a counterweight running by flat cable over the hoist reel. The main drum runs the service cage for men and supplies, and 1¼" cable is supplied for 2,500' depth. This hoist station is also underground, the collar of the shaft being at the 500' level.

Underground haulage equipment includes seven 4-ton, nineteen 6-ton, two 10-ton, and three 25-ton trolley-type, and four 3½-ton storage battery locomotives.

The new surface plant includes a change house for 1,500 men, and a full complement of shops, heating plant, warehouse, etc. These are equipped with the most modern equipment obtainable. The buildings are of modern fireproof construction, well lighted and ventilated.

Crushing plant, is located at Hopewell, at mouth of the 1,000' tunnel, and consists in brief of a No. 9 gyratory crusher, four sets of 54"x24" Anaconda rolls, 2 Symons 48" vertical fine reduction crushers and storage bins for 15,000 tons. This plant has proven unsatisfactory, and will be replaced by a new plant at Clarkdale.

Smelter: the new 3,000-ton smelter designed by Repath and McGregor has been operating since June, 1915. Additions and improvements have since been made, bringing its capacity up to 5,000 tons per day; it consists of a crushing and sampling plant, calcining plant, blast-furnace, converter and reverberatory departments, powdered-coal plant, and a power house, together with coke and ore-storage yards and bins with a total capacity of 26,000 tons. Buildings are built of steel and concrete.

The crushing and sampling plant has a 30x18" jaw-crusher, driven by a 50 h. p. motor; product passes up an incline belt conveyor, capacity 2,400 tons daily, to sampling mill. This mill has three 20x10" Blake crushers, 3 sets of crushing rolls, 54x24", 36x12" and 24x12"; two 4x14" Gates trommels and 4 Snyder samplers with final sample of 1 to 250. Crusher product goes over conveyor belts to storage bins for fines or to the calcining plant.

No. 1 calcining plant has twelve 21½' Wedge furnaces, total capacity, 1,150 tons; the 6 hearths, 5 roasting and 1 drying, are brick-lined. The plant is built so that it can be enlarged when required. Cooling blast is furnished by 1 or 2 No. 6 Sirocco 3-oz. blowers each having a capacity of 25,000 cu. ft. of free air per minute, driven by a 30 h. p. motor. Fumes pass to the dust chamber building, sides of brick and steel, roof of brick, and then to the

400' stack. Calcines, as well as dust, are drawn into 15-ton cars, hauled by 10-ton electric locomotives. No. 2 calcining plant, recently completed, has 12 brick-lined 22½' Wedge roasters, each with 7 hearths; total daily capacity, 1,400 tons. The collecting flue connects with dust chamber of No. 1 plant, and exit gases of both plants are mixed before going to Cottrell smoke-treating plant, began summer of 1920. This plant will treat 1,200,000 cu. f. of gases per minute in pipe and straight-line treaters, treated gases being taken off by a 420'x30' stock.

The reverberatory plant has three 19'x100' furnaces, and three 25'x100' furnaces, added 1919-20. Four of these furnaces, including the 3. last built burn powdered coal; although oil-firing equipment is ready for use at any time. Calcines and fetting ores are fed to these furnaces. Slag is skimmed off into Treadwell motor-tilted pots, drawn by 18-ton electric locomotives, of which there are three.

The powdered coal plant, completed in 1919, prepares coal for reverberatory use; it consists of a 14,000-ton storage bunker, (12,000 tons under water), crusher, dryer plant, disintegrators, pulverizing plant, and low pressure blowing plant. Screw conveyors convey the coal to the furnace burners; 15 oz. pressure-air blows the dust into the furnaces. The capacity of this plant is 600 tons per day pulverized to 200 mesh. This plant is described by J. B. Johnson in the "Eng. and Mng. Jour." for Aug. 21, 1920.

The blast-furnace plant has four 48x320" furnaces. Feed consists of rich oxidized and sulphide ores, with some calcite. Gases go to a second dust chamber, similar to the other, but with steel plate sides, before going to the 400' stack. Ore and flux for the furnaces is brought by 4 to 6 ton side-discharge cars.

The converter plant has seven stands with eight 12' shells of the Great Falls type. Converters are basic, lined with Harbison-Walker magnesite. Feed consists of mattes from reverberatories and blast-furnaces, together with silica converter ore fed raw. Tilting is done by 50 h. p. direct-current motors. Copper is poured into two copper casting machines, each operated by a 20 h. p. direct-current motor. Slag is drawn into Treadwell pots and charged hot into the reverberatories.

Three blowing engines supply converter air, 1 vertical and 2 horizontal, with capacities of 20,000, 24,000 and 20,000 cu ft., respectively; air is made at 16 lb. pressure. Air for blast-furnaces is supplied by 6 Roots blowers at 32 to 40 oz. pressure, with a total capacity of 230,000 cu. ft. per minute. Four blowers are motor driven, 1 by a steam and 1 by a Diesel engine.

The power plant will generate only part of the electric current used, remainder being purchased from the Arizona Power Co.. Current is received at 44,000 volts and stepped down to 2,200 volts. Waste heat from the reverberatories is utilized for 12 Stirling M boilers, 713 h. p. each, 2 to each furnace. Two similar boilers, using fuel oil are held in reserve. The electric generating system consists of 3 units of 500, 1,500 and 2,000 k. w. capacity, respectively; the first is connected to a Parsons turbine, and generates at 440 volts and is for emergency in case of accident to the transformers; the other two units generate 2,300 volts, 60 cycle, 3 phase current. The 230 volt direct current for cranes, railway motors, etc., is supplied by two 200 k. w. motor-generator sets synchronous motor driven; also by a 400 k. w. induction motor-driven D. C. generator, owned by the Arizona Power Company. The total transformer capacity is 1,750 k. w. from 2,200 to 440 volts.

Water is supplied by gravity from springs about 3 miles from smelter; an auxiliary pumping plant on the Verde river below the smelter is used in case of water shortage.

The cooling system of the furnaces, compressors, and the condensing system of the steam units are taken care of by a central cooling plant and pumping station. There are 3 condensers, and 5 centrifugal pumps, driven by motors.

Compressed air is supplied by a Corliss cross compound steam driven compressor of 2,500 cu. ft. capacity, compressed to 100 lb. pressure; also by a 2-stage electric driven compressor of 2,470 cu. ft. capacity.

L. A. Parsons describes the smelter and new surface plant in the "Mng. & Sci. Press" for Oct. 16, 1920 and June 25, 1921, respectively.

A standard-gauge railway, built 1912, by the Atchison, Topeka & Santa Fe R. R. Co., connects the new smelter at Clarkdale with its main line at Drake. The standard-gauge Verde Tunnel & Smelter R. R. owned by stockholders of United Verde C. Co., connects Clarkdale with Jerome; it handles all traffic to and from Jerome since the narrow-gauge United Verde and Pacific Ry. was dismantled early in 1920.

Recent Production:

Year	Lbs. Copper	Oz. Silver	Oz. Gold
1917.....	71,753,111	1,222,607	29,497
1918.....	77,560,204	1,298,414	29,145
1919.....	42,927,666	665,328	16,838
1920.....	64,952,270	906,055	18,760

Approximately 8,200,000 tons was extracted up to 1918, 40% of which was produced in the last 5 years.

In early years the United Verde made copper for 5¢ or less a pound, if one deducts gold and silver values from the cost. The reported cost per pound of finished copper, after deducting gold and silver values, was 9.17¢ per lb. in 1904; 9.27¢ per lb. in 1905; 8.69¢ in 1906, and 10.54¢ in 1907. Under average circumstances the cost may be figured as 9 to 10¢ per lb.

UNITED VERDE EXTENSION MINING CO.

ARIZONA

Office: 233 Broadway, New York. Mine office; Jerome Arizona. Smelter: Clemenceau, Ariz.

Officers: James S. Douglas, pres.; George E. Tener, v. p.; Louis E. Whicher, v. p.; Chas. P. Sands, sec.-treas.; with Paul Armitage, R. M. Raymond, George Kingdon, gen. mgr.; Archibald Douglas and Andrew J. Pickrell, directors. E. E. Campbell, gen. supt.; G. W. Prince, smelter supt.

Inc. 1902, in Maine, as a reconstruction of the United Verde Extension Gold Silver & Copper Mng. Co. Cap. \$3,000,000; shares \$10 par. Reorganized in Delaware, cap. \$4,000,000; shares \$10 par. and again reorganized 1912, and cap. reduced to \$750,000; shares \$5¢ par; issued \$525,000. In this reorganization, approximately 360,000 shares were set aside for exchange, on a share for share basis for old shares outstanding; about 40,000 shares were issued in liquidation of debts; 150,000 shares were issued to Jas. S. Douglas for services; 50,000 shares were sold to Mr. Douglas for \$25,000 cash; 400,000 shares were optioned to Mr. Douglas and his associates with the right to purchase all or a part of this block at par value at any time prior to June 15, 1915, and 500,000 shares were reserved for treasury purposes. Federal Trust Co., Boston, registrar; State Street Trust Co., Boston, transfer agt. Shares are listed on the Boston Curb, traded on New York Curb. Annual meeting, 3rd Tuesday in February.

Comparative Balance Sheet shows, for years ended Dec. 31:

Report for 1921 showed: gross income, \$2,043,519; other income, \$275,740; total income, \$2,319,259; expenses, taxes, etc., \$2,282,262; deple. & deprec., \$1,565,538; deficit, \$1,528,541; dividends, \$1,050,000; loss, \$2,578,541.

Company has taken a \$1,080,000 interest in the \$40,000,000 8% gold note issue of the Copper Export Association, disposing of 10,800,000 lb. of copper in return. On Nov. 1, 1921, metal on hand had been reduced to \$9,796,000 lb.

Dividends: \$1 in 1916; \$2.85 in 1917; \$4.50 in 1918; \$2.25 in 1919; \$2.00 in 1920; \$1.00 in 1921; 25¢ on Feb. 1, 1922. The total is \$13.85, equal to \$14,542,500.

Property: 1,200 acres, known as the Little Daisy group, a two-thirds interest in the adjoining Florencia claim, and an option on 19 claims, 300 acres adjacent to the company's property on the S. and S.-E.; \$130,000 was paid for this tract.

In November, 1919, the 8 patented claims, 160 acres, of the West United Verde Copper Co. were acquired. Several small deposits have been opened, the deepest workings being 1,200'. The price was \$250,000, and some West United shareholders tried to secure an injunction against the sale, considering the price too low. Also, in same year, company purchased the Vulcan group. In May, 1921, reported that option had been taken on 628,078 shares of Jerome Verde Dev. Co. (q. v.) for \$464,039, and that U. V. X. would manage development of Jerome Verde property. In November, it was stated that deeds of conveyance had been filed, calling for a \$420,000 payment.

History: original development was by an 800' vertical shaft, the Edith on the Little Daisy claim, about 1,700' from the main shaft of the United Verde mine, with collar 450' lower. This shaft, after passing through 50' of iron stains, encountered copper carbonates, continuing for depth of about 150'. Succeeded by conglomerate, and from a depth of 425' to 578' passed through schist carrying copper sulphides and manganese. These old workings total about 5,000' but develop only a little ore of about 2% copper, 1 oz. silver and \$3 gold, on the 800' level. A 130' winze below this level was bottomed in decomposed schist, showing considerable copper.

The early exploration work of the company was unsuccessful, and an option was taken in 1913 on the Jerome Verde group, but development was disappointing and option was relinquished in 1915. Then, in the company's own ground a large body of very rich chalcocite ore was encountered on the 1,200' level, Dec., 1914. This orebody was developed and worked during 1915, and the shaft was sunk to the 1,400' level; in Feb., 1916, a drift on this level cut the downward extension of the bonanza orebody found above.

The ore thus far developed lies on the northerly downthrown side of a big fault, with a drop of 650' or thereabouts, as shown by the limestone strata on each side of it.

Development: when fully opened, the orebody covered an area of 60,000 sq. ft. on the 1,400', and raises proved its extension to the 1,300' level. In 1920, indications were that body would be about $\frac{1}{3}$ less in area on the 1,500' and still somewhat smaller on the 1,600' level. Average copper content of ore on 1,500' is 5.9%.

The new 3-compartment Audrey shaft has been sunk to the 1,700' level and concreted; this permits of drifting on the 1,500', 1,600' and 1,700' levels. There are 2 other shafts, the Little Daisy, used only for ventilation, and the Edith, used for supplies; in addition there are 2 raises to surface, one used for ventilation, the other for waste. In 1919, the Audrey and Edith shafts were connected by crosscuts on 1,500, 1,600 and 1,700' levels; and in 1919-20, the Edith shaft was being sunk to the lowest level. At end of 1919, the 12,395' standard gauge track haulage-tunnel with 332' of connections, was completed; this connects with the mine on the 1,300' level, enabling all ore to be shipped direct from the mine to the smelter and eliminating the use of the aerial tram. Overhead square-set stoping is used for very heavy ground, about 50%, and the Mitchell stoping method wherever weight of ground will permit, about 50%. In 1918 new work amounted to 10,919'; in 1919, 5,578'; in 1920, 7,534'; in 1921, 2,838'.

Oxidized ore was encountered 60' above 1,300' level, and, though no considerable quantity of ore is expected above this point, a notable tonnage of oxidized siliceous ore was partially developed in 1920.

Ore Reserves: in 1919 were 571,400 tons above the 1,400' level, averaging 15% copper, 3 oz. silver and 50¢ gold; in 1920, 1,148,000 tons above the 1,000 level, averaging 11.81% copper, 2.22 oz. silver and 46¢ gold; in 1921, 1,102,000 tons above the 1,500' level, averaging 11.75% copper, 2.22oz. silver and 46¢ gold.

Smelter: designed by A. G. McGregor and staff, Warren, Ariz., and described by F. E. Nichols in "E. & M. J." of Oct. 19, 1918. Started operating in July, 1918. The plant includes one 48"x26'-8" blast-furnace, two 25"x120' reverberatories; six 21' 6" 6-hearth Wedge roasters, and three 12' converters of the Great Falls type. Mine ore goes to steel receiving bins, 1,500 tons capacity, and by belt conveyors to crushing and sampling plant; from here the coarse material goes to the coarse bedding 5,300-ton bin, the fine material to the fine bedding 5,000-ton bin. The coarse ore goes by conveyor to the blast furnace building to bins to charge cars. Blast furnace has a daily capacity of 600 tons of ore. Slag is handled by 225 cu. ft. electrically tilted cars, drawn by 24-ton electric locomotives. The fines go by belt conveyor to the roasting plant, after calcining they are taken in 15-ton cars to the reverberatories, each with a daily capacity of 500 to 600 tons. Reverberatories are coal-dust fired, the first time this has been tried in Arizona. The coal-crushing and pulverizing equipment consists of a 24" Jeffrey single-roll crusher, a Fuller-Lehigh indirect fired rotating drier, and a battery of four 42" F-L ball pulverizing mills. The converting plant has a 40-ton electric traveling crane.

Reverberatory waste heat is used in generating steam in 3 Stirling waste-heat boilers, 713 rated h. p. each; in addition there are 2 Stirling direct-fired boilers, 439 rated h. p. each, fired with pulverized coal.

The power plant contains three 2,200-volt turbo-generators; two 200 k. w. motor-generator sets for direct current for the plant; two units, each consisting of a Roots 400 cu. ft. blower, direct connected to a tandem compound engine, for blast furnace air; two 18,000 cu. ft. blowing engines for the converter air. A new 4,500 cu. ft. compressor was installed in 1919. Water is obtained from wells on the site at 100' depth. Ore trains consist of 25-ton electric locomotive and 30-ton cars.

Danger from fire has been minimized—the Edith shaft has a spraving system, the Audrey shaft has been concreted, and the Little Daisy shaft is naturally wet. The Mitchell stoping method leaves barriers of waste which

will serve as fire-breaks in that part of the Bonanza orebody where this system is used. A suction fan, capacity 40,000 cu. ft. per minute, is located at the top of the Little Daisy shaft, and another, capacity 135,000 cu. ft. per minute, will be placed at the top of the air-raise. With this equipment and the completion of the necessary underground work the mine will be one of the best ventilated in the southwest.

Production:

Year	Ore tons	Copper %	Gold oz.	Silver oz.	Cost per ton of ore	*Net cost per lb., cents	Selling price per lb., cents
1921 (4 mos.)	53,643	13.46

1916.....			36,402,972	2,570	128,467		

*Does not include depreciation, depletion or taxes.

Reported that company has acquired mining rights to 200 acres of coal lands near Gallup, N. Mexico.

Copper on hand Dec. 31, 1921 amounted to 6,955,942 lb.

The company is one of the lowest cost copper producers in the United States. Although the grade of ore now being smelted is lower, large profits should continue with the operation of its own smelter.

Except for development work, operations were suspended in May, 1921, to await better copper prices.

UNITED VERDE JR., CO.**ARIZONA**

Property, the Ballard group, reverted to owners. See United Verde Cons. Co., in Volume XIV.

UNITED WESTERN MINING CO.**ARIZONA**

Address. Oatman, Ariz.

Officers: W. K. Ridenour, pres. and treas.; H. E. Woods, v. p., with J. A. George and R. H. Carr, directors.

Inc. in Arizona. **Cap.** \$1,000,000; shares \$1 par; in treasury, 600,000. Listed on San Francisco and Los Angeles stock exchanges. Was listed as a prospect on New York Curb, but was stricken from the list in Aug., 1918. Permission to sell stock was given September, 1921.

Property: 4 claims, 65 acres, one mile S. W. of Oatman, Mohave County, crossed by main road connecting Gold Road and Oatman, and adjoining property of the United Eastern Company along what appears to be a continuation of the main ore zone of that property. Also owns the Oofly Goofy group and water rights 4 miles N. W. of Oatman, total, 125 acres. Ore is free-milling gold, containing little silver. Pay ore occurs in shoots of undetermined extension. Development shows strong vein on the upper levels but below milling grade. On 505' level the vein is large, wet, and reported to show milling value.

Development: comprises a shaft 500' deep with crosscuts at 200' and 500'. At the latter depth a heavy flow of water from the vein stopped work, 1916.

Equipment: includes 50 h. p. hoist, compressor, buildings, etc.

Property a good prospect, but drifting alone can determine its value.

UNIVERSAL MINES CO.**ARIZONA**

Amalgamated October, 1920, with Dripping Springs Copper Co., and described under new title, **Dripping Springs Mines Corp.**, which see.

UTAH-ARIZONA GOLD & COPPER MINING CO.**ARIZONA**

Mail returned from former address: 626 Dooly Bldg., Salt Lake City, Utah.

Officers: Heber S. Cutler, pres.; J. F. Shelley, v. p.-gen. mgr., Shelley, Idaho; John W. Geiger, sec.-treas.: with W. J. Burton, Geo. F. Shelley and M. Thomas, directors.

Inc. Nov. 11, 1907, in Arizona. **Cap.** \$1,000,000; \$1 par.: issued 961,023. Annual meeting, second Tuesday in September.

Property: 60 claims, about 1,200 acres, and a 20-acre mill site, in the Weaver district, Mohave county, 18 miles N. W. of Chloride, the nearest rail point. Claims show quartz veins traversing granite and mica-schist, carrying gold-copper ore. Property includes the Golden Gate mine, developed by two incline shafts of 125' and 135', on parallel veins, and several short tunnels, with total of about 2,000' of workings.

Equipment: includes a 5-stamp mill. Idle since 1914.

VAN DYKE COPPER CO.**ARIZONA**

Address: E. R. Rice, mgr., Miami, Ariz.

Officers: C. W. Van Dyke, pres.; with H. A. Smith, v. p.; C. B. Loomis, sec.; Wm. E. Brooks, treas., with L. D. Van Dyke and W. E. Loomis, all of Miami, directors.

Inc. Aug. 1916, in Arizona. **Cap.** \$5,000,000; 50c. par.

Property: 1687 acres, 417 patented, in Globe district, Gila county, adjoins Miami and Inspiration on S. E.

Development: by 1,692' shaft with main lateral workings on the 1,215' and 1,550' levels.

Equipment: includes 3-churn-drilling outfits, 25 h. p. hoist, and 10 by 10 air-compressor.

VEKOL MINES CO.**ARIZONA**

Address: care E. B. Holt, Phoenix, Ariz.

Incorporators: F. M. Pool, Geo. W. Elias and E. B. Holt, all of Phoenix. P. P. Daggs, owner, Claremont, Calif.

Inc. 1918, in Arizona.

Property: the old Vekol silver mine, in the Casa Grande district, Pinal county, under lease and option. Is reputed to have been a big shipper of hand sorted ore, averaging 300 oz. silver per ton, for 15 years after discovery in 1879. Beginning with 1884, 32 oz. silver ore was treated in a 10-stamp pan-amalgamation mill. Old workings, consisting of 4 inclines on the strike, aggregate 40,000', developing a block 400' x 2,600' with a 200' back. Ore containing hornsilver and argentite, occurs in replacement deposits in dolomitic limestone.

Treatment process has been determined and company proposes to erect a 100-ton plant. Ore reserves estimated to be 70,000 tons, averaging 20 oz. Lessees are now operating on a small scale.

VENTURE HILL MINING CO., THE**ARIZONA**

Address: C. H. Riebelong, sec.-treas., Prescott, Ariz. **Mine address:** C. T. Jolly, pres., Jerome, Ariz. Ed. Kiehl, v. p.

Inc. 1900, in Arizona. **Cap.** 3,000,000 shares; \$1 par. In Sept., 1917, \$25,000 was borrowed, for development, on 10% notes, secured by mortgage.

Property: 6 patented claims, 110 acres, 2 miles S. of Jerome, Yavapai county, near the Verde Combination and others. Examined by W. H. Weed in 1916. Was regarded as a good prospect.

Mine sold under foreclosure proceedings Nov. 18, 1920, to Edw. Shumate of Prescott and Boaz Duncan of Los Angeles, and has not yet been redeemed by company. Fully described Vol. XIV.

VERDE APEX COPPER MINING CO.**ARIZONA****Address:** J. H. Robinson, sec., Prescott, Ariz.**Cap.** \$3,000,000; **shares** \$1 par; 750,000 in treasury; 450,000 issued; 1,800,000 in pool.

Property: 8 claims, 85 acres, in central part of the Verde district, Yavapai county, one mile from Jerome, and some distance S. of the open cut of the United Verde mine. The claims are well located. As underground work is limited, the prospective value of the ground is largely a matter of geologic deduction and estimate, based on finding both oxide and sulphide ores in the tunnels, and with full knowledge of the 3 producers in the district.

Development: three veins are exposed in tunnels. The Black Horse is 6' wide, carrying good ore; the Socrates is narrow, but has promise, and No. 3 vein in the upper tunnel shows oxide ore of commercial value. With the Venture Hill Mining Co., a joint shaft was sunk on the boundary of the two properties to depth of 330'.

Was a promising venture. Company is in financial difficulties, creditors having brought suit in January, 1921, for \$24,000. In September, property was acquired by C. M. Raible, of Jerome, through a sheriff's deed, on a judgement of \$28,909.

VERDE CENTRAL MINES, INC.**ARIZONA****Address:** C. T. Joslin, sec., Prescott, Ariz. E. L. Bartholomew, supt.**Officers:** W. F. Staunton, pres.; C. T. Joslin, sec.--treas., with J. A. Hope, C. C. Miller, Jr., and L. Spence, directors.**Inc.** Aug. 16, 1916, in Arizona. **Cap.** \$2,500,000; \$1 par; 500,000 issued.

Property: 20 patented claims, 308 acres, at Jerome, Yavapai county, in the center of the Verde district. Claims considered well located, and merit development of the known veins and prospecting along shear planes and beneath the limestone cap. Contains extension of the Venture vein, of claims owned by U. V. Extension.

Development: by a 650' shaft. On the 600' level a crosscut run early 1922 exposed ore assaying 10-15% copper and 5-6 oz. silver per ton. Deeper development to 1,000' depth is to be done by shaft and hoisting plant on 600' level. There are also 4 tunnels. Exploration work financed by C. & A. Co.

Property promising and management able.

VERDE COMBINATION COPPER CO.**ARIZONA****Address:** David Morgan, v. p.-mgr., Box O, Jerome, Ariz.**Officers:** J. L. Dyer, pres.; L. J. Gilchrist, sec.; Jas. F. Primm, treas.; with J. M. Layman, J. S. Eberman and W. N. Richards, directors. W. B. Kennedy, asst. sec. asst. treas.

Inc. in Arizona. **Cap.** \$1,000,000; 50c. par; 1,600,000 issued. Union Bank & Trust Co., El Paso, Texas, transfer agent. Annual meeting in December. 1,000 shares sold for \$82 the lot in New York on Dec. 8, 1920.

Property: 33 claims, 550 acres, 15 patented, in Verde District, Yavapai county. Company's engineers consider it is on the main fissure of the district, and superficially to possess all the favorable attributes for ore deposition.

Development: principally at the north end of the property, by a 1,300' shaft, which connects with extensive workings in the Mescal tunnel. This tunnel shows the great Verde fault, the master, and post mineral, fault that traverses the Jerome district for 20 miles; also discloses 2' of 5% copper ore in a fissure vein, on which but little development save a raise has been done; also two promising contacts between diorite with stringers of copper. The old workings at the south end of the tract include 640' and 500' shafts, showing diorite with stringers of copper; and a 75' tunnel opening a 3' quartz vein.

Diamond drill exploratory work under way at last account.

VERDE GRANDE COPPER CO.**ARIZONA**

Reorganized in July, 1917, as the **Jerome Grande Copper Co.**, which sec. Described in Vol. XII.

VERDE HUB COPPER CO.**ARIZONA**

Address: S. Morthland, 715 Millikin Bldg., Decatur, Ill. W. S. Owens, supt., Jerome, Arizona.

Officers: Wm. C. Field, pres.; F. P. Wells, v. p.; E. Linxweiler, treas.; Samuel Morthland, sec.; with S. F. Lowry, C. C. McFann and N. M. Gillies, directors.

Inc. Nov., 1916. **Cap.** \$1,000,000; 50c. par. A reorganization of the Decatur Copper M. Co.

Property: the Decatur, 1 mile S. of Jerome, Yavapai county.

Development: by 284' shaft, Diamond drilling, in charge of Samuel Morthland, was started in Sept., 1917, but later was stopped on account of the war; drilling done is said to have been encouraging and it is planned to resume this work.

VERDE INSPIRATION MINING CO.**ARIZONA**

Officers: E. H. Meek, pres. mgr., Prescott, Ariz.; A. L. Hammond, sec.; with M. Lynch, J. H. James and S. S. Allen, directors.

Inc. Jan., 1917, in Arizona. **Cap.** \$1,000,000; \$1 par; 125,000 shares went to owners and promoters, 125,000 for outstanding obligations, with 750,000 in treasury and offered to the public.

Company was organized to take over the Hillside Mining Co., 9 claims, 170 acres, 1½ miles from Cherry, Yavapai county, and 12 miles S. of Jerome, said to show gold ore \$7 to \$17 per ton with 20,000 tons ore blocked out.

Development: by several shafts to depth of 400'. Equipped with a 20-stamp mill, pumps, assav office and other necessary buildings. A cyanide plant was being installed at last account.

VERDE MINES & MILLING CO.**ARIZONA**

W. F. Burns, pres.-mgr., Prescott, Ariz.

Property: Monarch group in the Verde district, Yavapai county, 7 miles S. of Jerome, developed to depth of 218' and said to carry free milling ore averaging \$20 per ton in gold and silver. Reported that 40,000 tons of ore are available.

Equipment: includes a 10-stamp mill and cyanide plant connected to 3 tunnels by gravity tram.

The mill was to be enlarged to 50-ton daily capacity and the shaft sunk to 600' (1921).

VERDE MONSTER COPPER CO.**ARIZONA**

Officers: T. F. Shea, pres., Jerome, Ariz.; C. M. Pedley, v. p.; and A. M. McLellan, sec.-treas.

Inc. in Arizona. **Cap.** \$2,000,000; shares 25c par.

Property: 600 acres, in Yavapai county, 8 miles N. of Jerome. Ore containing 4% copper was reported near the surface. Not operating.

VERDE QUEEN COPPER CO.**ARIZONA**

Reported in Smythe's *Obsolete American Securities*, Vol. XI, 1911, "New Jersey charter void 1906, for non-payment of taxes."

At a stockholders' meeting held in Jersey City, N. J., May 6, 1916, dissolution of the company was approved. It was decided to make a distribution of part of its assets, consisting of 1,000,000 shares of Jerome Verde Copper Co.'s stock; holders of Verde Queens stock to receive in part liquidation 200 shares Jerome Verde stock for each share of Verde Queen stock.

Property of the company was taken over in 1906 by the **Jerome Verde Copper Co.**

VERDE QUEEN MINING CO.**ARIZONA**

Address: Pantano, Pima Co., Ariz. P. M. Hilton, supt.

Property: in central part of Empire district, about 12 miles from Pantano, and 15 miles W. of Benson. Shows silver-lead and copper ores, developed by a 280' two-compartment shaft. Shipments of lead ore made to the El Paso smelter in 1919.

Equipment: includes gasoline hoist.

VERDE SQUAW COPPER MINING CO.

ARIZONA

Address: T. H. Gray, sec., Box 682, Jerome, Ariz.

Officers: J. B. MacDonald, pres.; D. W. Barter, v. p.; T. H. Gray, sec. and gen. mgr.; C. F. Benjamin, treas.; with C. C. and G. Reid, directors.

Inc. Jan. 8, 1917, in Arizona. **Cap.** \$1,500,000; \$1 par; 915,000 issued. Annual meeting, second Monday in January.

Property: 15 claims, 275 acres, in Verde Valley, 4½ miles S. of Camp Verde, 25 miles S. E. of Jerome, Yavapai county. Examined in 1917 by William Winkelman.

Development: prospected for 17 years by D. W. Barter, and 3 to 40% ore has been exposed in numerous places. The Barter tunnel now in 1,000' is said to have cut a 30' vein at depth of 500'; this vein is reported to have some bornite and also 8' of lower grade sulphide assaying 1% to 7% copper. A 2-compartment shaft has been sunk on the Boulder claim, a 40 h. p. hoist and a compressor added. Underground work here totals 270'.

Is a meritorious mining venture. Inactive.

VICEROY MINING CO.

ARIZONA

Office: Janesville, Wis. Mine near Patagonia, Santa Cruz county, Ariz.

Officers: Frank H. Baack, pres.; M. G. Jeffris, v. p.; M. O. Mouat, sec-treas., Janesville, Wis.

Inc. Oct., 1912. **Cap.** \$1,000,000; \$1 par; issued, 600,000.

Property: 8 claims, 164 acres, in the Tyndall district, 20 miles N. N. W. of Patagonia, shows a number of fissure veins, traversing porphyry or following contacts between diorite and porphyry and dipping 45°. The vein is said to range from 6 to 75' in width. Ores are principally silver-bearing, but show occasional bornite and a little lead ore above the water level, reported to carry from 16 to 199 oz. silver per ton.

Development: by shafts of 40' and 100' with about 400' of tunnel workings in leached ore.

Idle owing to lack of funds.

VICTOR & BELLE CROWN MINING CO.

ARIZONA

Address: Wenden, Yuma Co., Arizona.

Officers: J. E. Matteson, pres.; F. C. Piper, v. p.; J. H. Matteson, sec-treas.; Geo. M. White, mgr., at last accounts.

Property: 10 claims, 180 acres, in the Harcuvar Mtns., Yuma county, 8 miles N. of Salome, the nearest rail point, said to show a vein of 5 to 7' width, with a 30 to 36" paystreak, giving assays of 15 to 20% copper and \$15 to \$20 gold per ton.

Development: includes shafts of 80', 35' and 450', and tunnels of 755' 165' and 230', aggregating about 1,200' of workings. A tunnel was planned to intersect the veins at 600' depth.

Shipping in 1919.

VICTOR COPPER CO.

ARIZONA

Reorganized as New York Verde Copper Co., which see.

VINDICATOR MINING CO.

ARIZONA

Address: care Otis E. Young, Phoenix, Ariz.

Property: located in Cunningham Pass district, Yuma county, said to show copper-gold ore. Developed by shaft.

VIVIAN MINING CO.

ARIZONA

Idle. **Office:** 415 Bradbury Bldg., Los Angeles, Calif. **Mine office:** Oatman, Ariz.

Officers: E. M. Ross, pres.; G. A. Hancock, v. p.-gen. mgr.; A. Reuter, sec.; with E. P. Thom, C. Leonhardt, and R. Deving, directors. Farmers' & Merchants' National Bank, treas.

Inc. 1905, in Cal. **Cap.** \$500,000; \$1 par; assessable; all outstanding. Annual meeting, first Saturday in July.

Property: 11 claims, 183 acres, 2½ miles W. of Oatman, Mohave county.

Development: 450' shaft; workings, 5,400'.

Equipment: two 40 h. p. oil engines, steam compressor, 8 h. p. hoist, electric light plant, buildings, etc.

VULCAN CONSOLIDATED MINING CO.

ARIZONA

Address: W. R. Ramsdell, 30 S. Stone Ave., Tucson, Ariz.

Officers: W. R. Ramsdell, pres.; C. E. Walker, v. p.; J. S. Kelso, sec.-treas.

Inc. March 16, 1916, in Arizona. **Cap.** \$100,000; \$1 par.

Property: 9 claims, 4 patented, 20 miles S. of Tucson, Pima county. Examined by F. R. Weekes.

Development: 175' vertical shaft and 560' incline shaft. Flow of water was struck and mine shut down early in 1918 on account of caving of lower part of incline shaft. Company planned sinking new shaft, pumping out mine and mining the 6 to 7% ore, large bodies of which are said to have been undergoing development when water was struck.

Equipment: 15 and 25 h. p. hoists, and 50 h. p. compressor.

Production:

	Lb.	Oz.	Net Smelter	%	Oz.
	Copper	Silver	Returns	Copper	Silver
1917.....	476,690	4,718	\$84,238	7.52	1.55
1916.....	716,458	6,614	128,753	6.43	1.17

VULTURE MINES CO.

ARIZONA

Officers: at last account: Robt. Mackay, pres.; F. W. Rockwell, v. p.; R. T. Sewall, sec., Boston; A. McLean, treas., with F. M. Kimbark, E. I. Marvell, and J. B. Sullivan, Jr., directors; Spencer Hutchinson, cons. engr.

Cap. 600,000 shares; par \$5; all issued. No bonded indebtedness. 35 Congress St., Boston, Mass., transfer office. R. T. Sewall, registrar. Annual meeting, June 1.

Property: 31 claims, 11 patented, 618 acres, 15 miles S. W. of Wickensburg, Maricopa county. The Vulture mine is one of the oldest and at one time was one of the best gold producers in Arizona.

Geology: quartz vein in schist contains gold, with some galena and pyrite, dips 37° and strikes N. 85° E. Pay ore occurs in shoots, the main orebody being 35' by 300'.

Development: of mine is by back stoping and waste filling through two inclined shafts 765' and 595' deep. Greatest depth of workings, 1,239'; linear extent, 25,000'.

Production: treated in 1912 was 19,689 tons; in 1913, 33,174; in 1914, 36,348; in 1915, 29,968 tons. Idle several years and equipment sold in 1921.

WALDRON MINING CO.

ARIZONA

Mail returned from former office: 535 Chamber of Commerce Bldg., Pasadena, Cal. **Mine address:** Venture Camp, Kingman, Mohave county, Ariz. Geo. H. Hill, mgr.; W. Van Doren, sec.

A reorganization, 1918, of the Arizona Venture Corp'n, which owned 5 groups, 12 claims, about 240 acres, near the Old Diamond Joe mine, developed by tunnel, and by 600' shaft.

Equipment: includes hoist, air compressor, electric power plant and a mill. Probably defunct.

WALLAPAI CHIEF MINING CO.

ARIZONA

Address: S. C. Hall, 648 S. Olive St., Los Angeles, Cal., or Kingman, Arizona.

Officers: C. F. Eyton, pres.; J. W. Squires, v. p.; S. C. Hall, sec.-treas.; with H. T. Rudisill and E. A. Gord, directors.

Inc. April, 1916, in Arizona. **Cap.** \$2,000,000; \$1 par; 1,000,000 outstanding.

Property: 5 claims in Maynard district, Mohave county, near Kingman. Presumably idle.

WALNUT CREEK MINING & MILLING CO. ARIZONA

Address: 1371 E. 17th St., Los Angeles, Calif., or Kingman, Mohave Co., Ariz., Jack Zwinge, supt.

Officers: Frank Sohn, pres.; Chas. E. Kent, sec.

Inc. 1909, in Calif. **Cap.** \$1,000,000; \$1 par; 525,675 shares issued.

Property: 9 miles S. of Kingman, developed by a tunnel 800' long, said to have crosscut 20' of vein material showing some copper ore. A shaft being sunk to 360' depth at last account.

WANDERING JEW MINE ARIZONA

Comprises a group of four claims in the Tyndall district on the W. slope of Santa Rita mountains, near Alto, Santa Cruz county, owned by M. & L. Lulley and R. R. Richardson.

Development: to 100' depth by 2 shafts, 300' apart, drifts and crosscuts aggregating about 2,000' of workings. Country rock is gray diorite. Vein varies from 6" to 4' in width and contains argentiferous galena. About half the deposit is said to be shipping ore, the rest, concentrating grade. Ore is galena from the surface down, but in places, contains a little copper carbonate and chalcopyrite. Property has a 75-ton flotation mill.

WARDWELL & OSBORNE COPPER MINES CO. ARIZONA

Dead. Property lost by failure to do assessment work, and subsequently relocated and now held by **Mammon Copper Co.**, which see. Described in Vol. XII.

WAR EAGLE & GLADIATOR GROUP ARIZONA

Leased to **Philadelphia Mining Co.**, which see.

WAR HORSE COPPER MINING CO. ARIZONA

Mail returned from former address: % Bacher & Stelsel, 412 Mills Bldg., El Paso, Texas.

Cap. \$1,000,000; shares \$1 par.

Property: 15 claims in the Tombstone district, Cochise county, 23 miles N. W. of Bisbee.

Development: 508' shaft and other openings. At 265' there was said to be 5½' of ore assaying 8% copper, 16 oz. silver and \$1 gold per ton. At 400' the vein was reported to be 27' wide and believed to run through 6 claims, a distance of 9,000'.

No recent returns and company probably out of business.

WARREN REALTY & DEVELOPMENT CO. ARIZONA

Property sold in 1917 to Phelps, Dodge & Co., and company liquidated. For description, see Vol. XII.

WARRIOR COPPER CO. ARIZONA

Office: Brown Bldg., Philadelphia, Pa. **Mine office:** Globe, Gila Co., Arizona.

Officers: Spencer D. Wright, pres.; Philip Godley, v. p.; Geo. H. Buchanan, treas.; D. H. Paris, sec., with Ernest L. Tustin, H. B. Hopper, J. K. Kane, W. W. Doughten, T. A. Blythe, C. Gallagher, G. B. Walker and Thos. D. Martindale, directors.

Inc. March 10, 1905, in Delaware, as successor of Black Warrior Copper Co., Amalgamated, which had come to grief. **Cap.** \$1,225,000; in \$375,000 cumulative 7% preferred stock, par \$5, and \$850,000 common stock, par \$10.

Property: the Lost Gulch group, near the Inspiration mine, about 550 acres. Globe district, Gila county, now being explored by diamond drilling.

The claims show a highly altered monzonite-porphry covering the larger part of the area, with extensive outcrops of dacite and limestone and smaller ones of diabase, general geological conditions being much the same as at the Black Warrior.

The Montgomery group was sold in the early part of 1920 to the Inspiration Cons. Copper Co.

- WASHINGTON-ARIZONA COPPER CO.** ARIZONA
E. D. Reese, mgr, at last account.
Property: the George Washington claims in Mineral Park district, Mohave county, said to have a large tonnage of copper-silver ore.
Development: by 3 tunnels and a shaft to a depth of several hundred feet. **Equipment:** includes a 300-ton mill, using the Fields flotation process. Shipping in 1919.
- WAYNE DEVELOPMENT CO.** ARIZONA
Long inactive and company probably defunct. Fully described in Vol. XIV.
- WESTERN ARIZONA COPPER CO.** ARIZONA
Mail returned, 1918, from former address, Miami, Ariz. Presumably dead. See Vol. XIV.
- WESTERN COPPER CO.** ARIZONA
Address: W. W. Lawhon, pres., Hotel Commercial Block, Phoenix, Arizona.
Property: the old Patton property, in Yavapai county, 4 miles from Mayer, adjoins the Copper Queen holdings on the N. Company never was active and mine is closed down.
- WESTERN MINES CORPORATION** ARIZONA
Address: Frank A. Keith, pres., 1202 Hollingsworth Bldg., Los Angeles Calif.
Inc. 1920 to take over holdings of the Arizona Rex Mining Co. and the Arizona Midway Co., at Oatman.
- WESTERN ORE CONCENTRATION CO.** ARIZONA
F. E. Steffy, gen. mgr., Chloride, Ariz, at last account. Company operated a 250-ton custom plant including a 9x15" Blake crusher, two 14x30" Reliance rolls, Marcy ball mill, Hancock jig, 10 Wilfley tables and K. & K. flotation unit. Probably defunct.
- WEST GOLD ROAD MINING CO.** ARIZONA
Fully described in Vol. XIV.
- WEST UNITED VERDE COPPER CO.** ARIZONA
Property: including that absorbed from Jerome-Victor Extension Copper Co., taken over by **United Verde Extension Mng. Co.** in 1919. Fully described in Volume XIV.
- WHITCOMB MINING & MILLING CO.** ARIZONA
Office: 154 W. Randolph St., Chicago, Ill. **Mine office:** Tucson, Ariz.
Officers: H. Whitcomb, pres.-gen. mgr.; J. F. Johantgen, v. p.; I. A. Snow, treas.; A. McCallum, sec., with J. C. Freeman, directors.
Inc. March, 1914, in Arizona. **Cap.** \$100,000; increased to \$200,000; shares \$1 par; all issued. No bonded indebtedness.
Property: 3 claims in the Pima district, 20 miles from Tucson. The increase of capitalization was for the purpose of acquiring 6 additional claims known as the Prosperity group.
Development: by inclined shaft about 500' deep and stopes on 3 levels. Ore is a silver-lead-bearing quartz of milling grade.
Equipment: includes a concentrating mill.
- WHITE HILLS MINING CO.** ARIZONA
Address: Chas. D. Wagner, sec., Kingman, Ariz.
Officers: John H. Ware, pres.; Anson H. Smith, v. p.; Kent Keller, gen. mgr.
Offered 100,000 shares treasury stock at \$1 per share, June, 1921.
Property: 47 patented claims, in White Hills district, N. of Chloride, Mohave county, operated 1892-96 by White Hills Mng. Co. and later by White Hills M. & M. Co., and credited with a past production of over 6,000,000 oz. silver.
The old workings have been unwatered and main shaft is to be deepened. Lessees are reported mining highgrade silver ore.

WHITE METAL MINING CO.**.. ARIZONA****Address:** J. C. Devine, mgr., Kelvin, Ariz.**Officers:** John C. Devine, pres.; T. H. Crowe, v. p.; C. T. Carpenter, sec.; J. L. Gust, treas., with Chas. H. Barney, directors.**Inc.** 1917, in Ariz. **Cap.** \$7,500,000; \$5 par; \$5,384,600 outstanding. Commonwealth Trust Co., Boston, transfer agent; State St. Trust Co., Boston, registrar.**Property:** consists of 15 claims, 1 patented, 300 acres, on the S. side of the Pinal range, Gila county, south of Globe. Ore occurs in veins, said to average 20 oz. silver, with gold and lead. Reserves estimated at 100,000 tons.**Development:** by 480' shaft, and tunnels, 580' and 600' long, with 3,000' of total workings.**Equipment:** includes 50-ton mill with flotation unit, 40 h. p. hoist, 2 compressors and pump.**WHITE-VICTOR COPPER MINING CO.****ARIZONA**

Out of business. See Vol. XIV.

WICKENBURG COPPER M. & R. CO.**ARIZONA**

Idle many years. See Vol. XIV for description.

WILD HORSE MINE**ARIZONA**

Owned by Wm. D. & H. J. Gray, Patagonia, Ariz.

Property: adjoins the Three R mine, about 7 miles from Patagonia, Santa Cruz county. Ore contains silver, copper, and gold.**WILLIE ROSE COPPER MINING CO.****ARIZONA**

Mail returned from former address, J. W. Sterling, mgr., Bowie, Ariz.

Property: the Willie Rose mine, near Triangle Springs, 13 miles S. of San Simon, Cochise county, was operated under 10-year lease from 1914. Developed by 188' shaft said to be bottomed in a 12' vein carrying slightly argentiferous chalcocite, of about 2% copper tenor. Ore occurs in lime-porphry contact, veins running E.-W., showing copper glance at slight depth. Made several shipments of \$12 per ton ore to the El Paso smelter.**Equipment:** includes hoist, oil engine, compressor and air-drills. Presumably defunct.**WINCHESTER GOLD MINING CO.****ARIZONA****Officers:** L. E. Hesla, pres.-treas., Prescott, Ariz.; A. W. Bark, v. p.; C. F. Paul, sec., with C. J. Dalken and O. H. Hesla, directors.**Inc.** July, 1915, in Arizona. **Cap.** \$1,500,000; \$1 par; 535,000 outstanding. Annual meeting, first Monday in July.**Property:** 6 claims and 2 fractions, 140 acres, in Mohave county, 2 miles W. of Oatman. Company does not reply to requests for information.**WOLF ARIZONA COPPER CO.****ARIZONA****Officers:** Carl H. Wolf, pres.; H. C. Wolf, sec., and W. J. Woestendick, treas. Above are directors.**Inc.** in Delaware. **Cap.** \$1,000,000; shares \$1 par.**Property:** lease and bond on 7 claims, 6 patented, 85 acres, in Big Bug district, Yavapai county, includes the McCabe and Gladstone mines. Examined by O. Longacre and W. C. Thomas. Claims said to show a vein in quartz diorite, dipping 75° and pitching E.-W. Ore-shoots are from 10' to 5' wide. Ore carries zinc, lead, gold, silver and copper; first class averaging \$35 and second class \$15 per ton.**Development:** by 800 and 1,100' incline shafts, workings, totaling about 5 miles. Reserves blocked out are given as 4,000 tons first class and 40,000 tons second class ore.**Equipment:** includes steam hoist, compressor, pumps, 10-stamp mill and 100-ton Callow flotation plant.

Company is said to have a dump containing 20,000 tons of \$6 tailing available for treatment.

WOLF CREEK MINING CO.**ARIZONA**

Officers: Jas. F. Keating, pres.; A. J. McEwen, v. p.; H. W. Armstrong sec.; John Rodden, treas., all of Clarkdale, Ariz.

Inc. 1919 in Arizona. **Cap.** \$500,000; par \$1.

Property: 7 claims, 140 acres, in Yavapai county, 8 miles W. of Mayer, said to show gold-silver-copper ore.

Development: by 300' tunnel. Property is a prospect.

WOLVERINE & ARIZONA MINING CO.**ARIZONA**

Office: Calumet, Mich. Marc Bailey, mine supt., Bisbee, Ariz.

Officers: John Daniell, pres.; Paul P. Roehm, v. p.; Edw. Ulseth, 2nd v. p.; Chas. Chynoweth, sec.-treas., with Jos. Bosch, W. H. Brophy, W. Frank James and Fred C. Smith, directors.

Inc. March, 1905, in Arizona, as successor of Wolverine & Arizona Development Co. **Cap.** \$3,000,000; \$15 par; issued 97,156 shares subject to assessment, and 21,792 shares of fullpaid stock. Levied 25-cent assessments March 19, 1906; Sept. 17, 1906; June 17, 1907; Nov. 18, 1907. State Savings Bank Bldg., Laurium, Mich., registrar; secretary of company, transfer agent. Annual meeting in April.

Report for year ending Dec. 31, 1920, shows: receipts, \$18,330; expenditures, \$40,699; cash on hand, \$119,082.

Dividends: 10cts. per share, in Dec. 1914; 25 cts. per share, in Dec., 1915; 25cts. in 1918.

Property: 9 claims, 152 acres, known as the Cairo, Memphis, Kentucky Georgia, Louisiana, Chicago, Warren, George and Broken Promise, in the Warren district, Cochise county. The Georgia claim lies 600' from lands of the Calumet & Arizona, and is about 3,000' from the Irish Mag shaft of that company, and from the Spray and Holbrook shafts of the Copper Queen. The Uncle Sam and White Tail Deer claims of the Copper Queen are adjacent to the Wolverine & Arizona.

Development: claims lie along the high limestone ridge W. of Bisbee, extending westward to the open valley, and the first development was begun on the farthestmost side of the group. The Broken Promise shaft, 700' deep, with 3 compartments, cut mineralized limestone showing considerable iron but no ore in commercial quantity. A drift on the 500' level running 850' toward the Pittsburg & Duluth group (Cal. & Ariz.) cut leached ore and ledge matter, carrying traces of copper. Drifts running in other directions showed leached ore, but not in encouraging quantities, and work in this area was suspended. 1909.

Exploratory work on the western claims proving disappointing, the easternmost claims were prospected in 1906 by diamond drill and a hole 410' deep passed into 50' of 4 to 10% oxidized copper ore near the Shattuck mine. This orebody being inaccessible from the Broken Promise shaft, the use of the Higgins tunnel was acquired and the ore opened up from the Bisbee side of the mountain. The tunnel was extended 310' to the Wolverine boundary and then southerly to intersect the orebody on the Wolverine ground. Orebody proved to be a replacement deposit of rich oxidized ore, lying within the limits of the Warren claim, about 2,700' from the tunnel portal. After working out the oxidized ore down to the Shattuck boundary, exploration upward was begun and a fine body of sulphide ore was developed in the footwall limestone above the oxidized zone. This was exhausted in 1918.

A tunnel to explore the Shattuck fault, which crosses the property, has been driven. In year ending Sept. 30, 1918, work on Broken Promise claim amounted to 1,769', including sinking of No. 2 shaft to 4th level, a depth of 386'. Ore from this claim came from an orebody on southeast end line of claim; developments here look promising.

During 1920, the shaft (No. 1) on Broken Promise was reopened to the 500' level and drifts explored. No new orebodies were discovered, but

several thousand tons of high grade ore are in reserve at No. 2 shaft. New work amounted to 1,354'.

The mine has been a small but steady shipper of high-grade ore to the Douglas smelter, this ore paying all working expenses and building up a small surplus. It formerly averaged about 10%, but the sulphide ore is of lower grade. The mine has about 6,000' of workings and its ore-bodies connect downward with great stopes in the Shattuck mine, the deposit being the top of one of the ore-shoots of that property. The mine is connected underground with the Uncle Sam mine of the Copper Queen, as well as with the workings of the Shattuck mine.

Equipment: includes a 250 h. p. steam plant, 2 single-drum hoists and a 6-drill air compressor, all at the Broken Promise shaft and all unused for several years.

Production: 2,524 tons, netting \$37,962 in 1910; 984 tons, netting \$11,-873 in 1911; 762 tons, netting \$12,861 in 1912. The output for fiscal year ending Sept. 30, 1915, yielded \$130,370, or \$17.13 per ton. In 1915-16 the output was 1,193 tons, averaging \$23.96 per ton, equal to \$28,588, and in 1917-18, 10,597 tons, yielding \$162,004. In 1920, 837 tons of 9% copper ore were shipped.

A geological report made by J. B. Tenney late in 1920 concludes that possibilities of finding new ore are good. The property is excellently handled.

WOODBURY COPPER CO.

ARIZONA

Probably dead. See Vol. XIII and XIV.

WORLD'S FAIR EXTENSION MINING CO.

ARIZONA

Inc. 1920, in Arizona.

Property: 8 claims, near Patagonia, in Santa Cruz county, between the World's Fair and Flux mines, said to contain lead-silver-copper bearing ore. No record of operations obtainable.

WORLD'S FAIR MINE

ARIZONA

Patagonia, Santa Cruz county, Arizona.

Owned by Frank & Josephine Powers, operated under lease by **Bachman-Merritt Metals Co.**, which see.

A suit is pending against the owners for delinquent taxes.

WRIGLEY EXPLORATION CO.

ARIZONA

Company liquidated. Described in Vol. XIII.

YABA COPPER CO.

ARIZONA

Address: A. J. Carroll, v. p., Prescott, Arizona.

Officers: John Erickson, pres.; J. B. Dudley, sec.-treas., with F. S. Olsen, Edw. Hannvig, A. J. Carroll, Ed. F. Bowers and M. Carroll, directors.

Inc. 1919, in Arizona.

Property: Carroll group, Yavapai county, near Prescott, slightly developed and equipped with hoist and compressor.

YAVAPAI CONS. GOLD-SILVER-COPPER CO.

ARIZONA

Office: Prescott, Ariz. **Mine Office:** Crown King, Ariz.

Officers: T. G. Norris, pres.; A. W. Edwards, v. p.; G. D. Morris, sec.-treas.; L. B. Mulhearn, asst. sec.-treas.

Property: 18 claims, partly patented including the Old Reliable mine, 3 miles from Crown King; the Wildflower and Tiger groups in Pine Grove district; and the Crown King mines; all in the Bradshaw Mtns., Yavapai county. The last named group, 18 claims, bought from B. A. Turner, receiver of the old corporation, for \$75,000, half cash and half in shares, has been a considerable producer, mainly of gold.

Property was operated from 1916-19 by Bradshaw Reduction Co., described in Vol. XIV.

Development: by several thousand feet of old workings on a contact vein, between porphyry and syenite, carrying slightly auriferous and highly argentiferous copper ores.

Equipment, includes steam power, compressors, 10-stamp mill and 200-ton concentrator.

YOUNG MINES CO., LTD.**ARIZONA****Office:** 413 Fleming Bldg., Phoenix, Ariz.**Officers:** Geo. U. Young, pres.-gen. mgr.; H. Clay Parker, sec., with A. W. Sevringhaus, E. A. Sevringhaus, E. C. Moore, directors. H. A. Sevringhaus, fiscal agent. Willis Laurence, supt.**Inc.** 1910, in Arizona. **Cap.** \$1,500,000; \$1 par; outstanding, 20,000. Annual meeting in May.**Property:** 80 claims, about 1600 acres, 20 miles E. of Mesa, Maricopa county, contains a large disseminated low-grade orebody, said to carry sufficient free milling gold for mining on a large scale by steam shovel or caving.**Development:** includes 3 shafts, 150', 800' and 445' deep and about 10,000' of laterals.**Equipment:** includes 100 h. p. hoist, pump, small compressor, buildings for accommodation of 100 men.

The president reported that: "Property may be worked on a 350-ton basis on high-grade ore on a 6 to 8-year supply now developed in addition to 20 years' operation on 1,000 tons per day basis according to engineers' estimates on hand." What was done about it is not known.

Y. P. MINING CO.**ARIZONA****Address:** Noble H. Getchell, mgr., Battle Mountain, Nevada.**Dividends:** paid under former management said to amount to \$15,000.**Property:** The Cash mine of 12 claims (7 patented), 240 acres, in Has-sayampa district, Yavapai county, 12 miles S. of Prescott, shows 13 parallel veins, one of which, the Conglomerate, is reported to be 2 to 5' wide, the ore at the surface assaying 7 to \$22 in gold per ton. Only one vein was worked by former management and is said to have yielded \$500,000. Examined by Leonard D. Siver.**Development:** to depth of 750'. One estimate gives "a reasonable \$734,000 worth of ore in sight" with silver at 60¢.**Equipment:** includes hoist, compressor, electric-light plant and 30-ton mill employing Wilfley tables and Monell slimer.Property under lease and bond (51%) of stock to the **Betty O'Neal Mines** (q. v.) operating property of that name in Lander county, Nev.**YUCCA-ARIZONA COPPER CO.****ARIZONA**

Property sold by court order several years ago and company dead. Described in Vol. XIII.

YUCCA TUNGSTEN MINING CO.**ARIZONA**

Subsidiary of York Metal & Alloys Co. of York, Pa.

Address: Harvey Klotsch, mgr., Yucca, Mohave Co., Ariz.**Property:** 26 claims, 17 miles N. E. of Yucca, on the Santa Fe Railway, in Cedar Valley district, shows a 5' vein of ore, carrying 5% tungstic acid and 1% to 3% copper.**Development** comprises a 250' shaft and 1,300' of drift tunnels, 200' apart vertically. **Equipment:** includes a 50-ton mill with two flotation units. Shipping in 1918 and 1919; shipments in 1919 included copper ore.**YUMA CONSOLIDATED MINING CO.****ARIZONA**

Described in Vol. XIV. Property sold to King Placer Co., in 1916.

YUMA MINE**ARIZONA**

Owned by Mrs. W. H. Barnes, Tucson, Ariz.

Property: in Pima county, 14 miles N. W. of Tucson. Mine is described in Bull. 111, U. S. Bureau of Mines, 1916. The molybdenum occurs as wulfenite in an acid eruptive rock so highly altered that it is difficult to classify. The wulfenite is associated with cerussite, or well-crystallized vanadinite, or both. The average mine ore assays 5% molybdenum, \$2.50 gold and 5% lead.**YUMA WARRIOR MINING CO.****ARIZONA****Office:** 41 Bank of Arizona Bldg., Prescott, Ariz.

Officers: H. W. Stevens, pres.; E. J. F. Horne, v. p.; C. T. Joslin, sec-treas., with W. A. Drake, R. W. Hunt, O. W. Johnson and H. K. Chapin, directors. John B. Martin, supt.

Inc. in Arizona. Cap. \$3,500,000; \$1 par; about one-half is outstanding.

Property: 365 acres in the Ellsworth district, 6½ miles from Salome, Yuma county, known as the Harqua Hala-Bonanza and Golden Eagle groups, formerly owned by Harqua Hala. Originally located in 1888, the mine is reported to have yielded gold worth \$4,000,000 above the 200' level. Examined by L. W. Getchell.

Geology: ore shoots occur in shear-zones in schists with intercalated limestone, extending down into the basal granite. Basic dikes are found and many veinlets of quartz and calcite occur. Geology is described in U. S. G. S. Bull. 451, 1911, p. 106.

Development: by incline shaft to 365' vertical depth.

Equipment: complete mining plant, ¾ mile aerial tram from Golden Eagle mine to Bonanza, 40-stamp mill, shops, and buildings.

Production: is irregular; since Feb., 1917, the mill yielded gold worth \$25,000.

No recent news, and mine presumably idle.

ZONIA COPPER CO.

ARIZONA

Secretary's office: 25 Broadway, New York City. P. G. Spilsbury, mgr., P. O. Box 1123, Phoenix, Ariz. J. K. Hooper, supt., Kirkland, Ariz.

Officers: L. D. Ricketts, pres.; W. D. Thornton, v. p.; J. W. Allen, sec-treas., with C. F. Kelley and J. D. Ryan, directors. W. S. Harper, asst. sec-asst. treas.

Inc. January 3, 1921, in Delaware. Cap. \$1,000,000; \$10 par.

Property: options on 75 claims, 37 patented, including the Zonia and McMahon groups, at Zonia, in Walnut Grove district, Yavapai county, 12 miles S. E. of Kirkland. Prospecting with two shafts. Both groups were shippers in 1919.

Reported, October, 1921, that dispute with Kirkland Arizona has arisen as to title to portion of the mineral holdings.

ARKANSAS

The zinc-lead region of northern Arkansas is in Boone, Baxter, Marion, Newton and Searcy counties. Carbonate and silicate ores are the principal products, though drilling has exposed sphalerite, but galena has not yet been found in large quantities. Open-cut mining is the general rule. Ore-dressing follows Joplin, Missouri, practice.*

Production statistics are given by the State Bureau of Mines. Most of the mines were idle during 1918, though several new mills were erected in Boone and Marion counties. Yearly production, in short tons, is as follows.

Year	Zinc concentrates				Lead concentrates	
	Sphalerite	Value	Carbonates	Value	Tons	Value
1919....	24	141	56
1918....	310	\$16,430	2,156	\$68,333	155	\$13,954
1917....	916	57,824	17,053	650,585	474	47,593
1916....	1,670	112,726	16,609	940,224	339	28,097
1915....	606	41,341	7,925	408,079	79	4,961
1914....	743	19,406	1,143	25,187	52	2,408
1913....	594	16,916	680	15,050	23	1,179

The output of the State for 1917 and 1918 is as follows:

	1917	1918	Concentrates:	1917	1918
Crude ore, tons....	203,600	37,000	Sphalerite, per cent....	58.40	59.00
Zinc, per cent.....	3.70	2.86	Carbonates, per cent....	40.50	40.60
Lead, per cent.....	0.19	0.32	Galena, per cent.....	80.50	77.40

*The field was described in the "Engineering and Mining Journal" of August 26, 1911, by Otto Ruhl, and on February 16, 1918, by Tom Shiras.

The total value in 1919 was \$8,340.

The manganese region is tributary to Batesville.

The mines are arranged alphabetically.

The total production of manganese ore from 1849-1918 inclusive was 75,985 tons. Very little manganese ore has since been mined.

AMERICAN BAUXITE CO.

ARKANSAS

Office: 1111 Harrison Bldg., Philadelphia, Pa. **Mine address.** Bauxite, Saline county, Ark. J. T. Fuller, supt.

Operated as a close corporation.

Property: the largest producer of bauxite (hydrated oxide of alumina) in the State. The output is sold mostly to the Aluminum Ore Co. of East St. Louis. Employees number from 600-1,000, varying with demand for product. The bauxite occurs as blanket formation in clay and is mined by open-cut methods. The ore, which is of high grade, is crushed to 2" size and dried, ready for market. Shipments amount to 10 cars of dried bauxite per day. The mine is described by Tom Shiras in the "Eng. & Mng. Journal" of June 21, 1919.

AMERICAN STAR ANTIMONY CORPORATION

ARKANSAS

Office and mine: Gilham, Ark.

Officers: Gordon Battele, pres.; Huntington Natl. Bank Bldg., Columbus, O. F. M. Fenton, v. p.-sec.-treas., with Harry S. Miller and G. B. Fenton, directors.

Inc. Dec. 10, 1916, in Missouri. **Cap.** \$24,000; \$100 par; all issued. Conqueror Trust Co., Joplin, Mo., registrar and transfer agent. Annual meeting, second Monday in December.

Property: 3 groups, 440 acres, near Gilham, Sevier county, and a smelter in the town of Sevier. **Ore:** stibnite occurs in fissure veins, 6" to 3' wide, said to give average assays of 30% antimony, 33% sulphur, 6% silica, 3% iron, and 24% alumina.

Development: by 3 shafts, deepest 175'.

Equipment: includes 3 compressors, hoist and steam power. Management reported ore reserves of 2,000 tons in 1917. Developing.

ARKANSAS MINING & MERCANTILE CO.

ARKANSAS

Address: F. A. Handlen, mgr., Fort Smith, Ark.

Property: zinc-lead mine on boundary between Boone and Marion counties. A 200-ton mill was to be built at last account.

ARKANSAS ZINC CO.

ARKANSAS

Con Medley, mgr., Rush, Ark.

Property: the Beulah mine, near Rush, operated during 1920, and a 100-ton mill erected.

ARKANSAS ZINC & SMELTING CORP.

ARKANSAS

Subsidiary of American Metal Co. (q. v.) property acquired by purchase in 1920. See Vol. XIV for description of Arkansas company.

Works address. Van Buren, Ark.

Operates a 3,200 retort zinc smelter.

ATHLETIC MINING & SMELTING CO.

ARKANSAS

See same title in Missouri.

B. & A. MINING CO.

ARKANSAS

(Boston & Arkansas Mng. Co.)

Address: J. W. Hammond, Okmulgee, Okla. C. L. Larson, mgr.; E. W. Ellis, supt. Okmulgee, Okla.

Directors: J. W. Hammond, O. F. Dickenson, F. P. Snider, Charles Popkin, W. W. Jenkins, Robt. M. Isham, Wm. Foley, I. H. Cox, Richard Bottle, Milo Brown and N. Lambertson.

Property: the old Davis mine, 15 miles N. of de Queen and 6 miles N. W. of Gilham. Sevier county. Claims were acquired in 1918, and \$250,000 has been spent on development and machinery. The ore-zone is up to 6' wide, and carries sphalerite, chalcopryrite and galena. The first named min-

eral follows the footwall, while the others are disseminated. A 250' shaft has been sunk. Mill employs rolls, jigs, and tables.

Company has recently acquired a lease on 2,600 acres of coal land in Okmulgee county, Okla.

BIG HURRICANE MINE

ARKANSAS

Address: J. C. Shepherd, Pindall, Searcy county, Ark.

Property: 480 acres, near Pindall, on the M. & N. A. R. R. The mine is in an ore-bearing fault running N. 82° W. Carbonates have been the principal output, but sphalerite has been found under them.

Development: by large open-cut 60' deep, exposing a thin ore-bearing vein included in the fault. Ore is removed by cars drawn up an incline track.

Equipment: 3 mills of 125, 200 and 100-ton capacity, respectively. In No. 1, ore is crushed to 1/2" mesh, and jigged. Tailing passes to No. 2, where a Hardinge mill grinds it to 1 1/2 mm. size, concentration being on tables. No. 3 has 4 tables, which handle pulp from No. 2 mill without finer grinding. Losses of metallic zinc were reduced by the three plants from 5% to 3% and later to 1 1/2%.

Reported that of 340 tons of zinc carbonate concentrate shipped from the county, the larger part came from the Hurricane.

BOO-GRA-LOO MINING CO. (THE)

ARKANSAS

Address: Pawhuska, Okla.

Officers: W. E. Graham, pres.-mgr.; H. M. Loomer, sec.; R. B. Boone, treas., also directors.

Inc. Jan. 26, 1918, in Oklahoma. **Cap.** \$10,000; \$1 par; all issued. Annual meeting, January 25.

Property: lease on 390 acres of patented land, a Zinc, Boone county, Ark. Ore body is a chamber deposit of calamine in-limestone.

Development: by 300' tunnel. **Equipment:** includes a 50-ton mill, using concentrators. No production reported.

BOSTON & ARKANSAS MNG. CO.

ARKANSAS

See B. & A. Mng. Co.

CENTRAL STATES LEAD & ZINC CO.

ARKANSAS

Property: the Monkey Hill zinc mine in Marion county. A 100-ton mill was erected in 1918.

CHARLEY BOY MINING CO.

ARKANSAS

Officers: A. K. Richards, pres.; W. T. Hines, v. p.; Chas. Gilstrap, sec.-treas.

Company had a lease on land in the Zinc district, Boone county.

CONFEDERATE MINE

ARKANSAS

A zinc-lead mine in Newton county, said to have been worked in 1860. A 300-ton mill, the largest in the State, was erected late in 1917. Water is brought 9,300' in a 6" pipe-line. Concentrates consist of 66% zinc carbonate and 33% lead.

CONSOLIDATED ZINC MINES CO.

ARKANSAS

Property: the Howard, Churchill, and Wallace zinc mines. A 400-ton mill was to be built at last report.

CONTINENTAL ZINC CO.

ARKANSAS

Liquidated. See Vol. XIV.

CUSHMAN MANGANESE CO.

ARKANSAS

Address: Walter H. Denison, Cushman, Ark.

DIXIE GIRL MINING CO.

ARKANSAS

Offices: 600 Wheat Bldg., Fort Worth, Texas; and Buffalo, Ark.

Officers: O. H. Halev, pres.; J. W. Halev, v. p.; H. Lederman, sec.-treas., with A. C. Barnhart and J. H. Hand, directors. L. E. Myles, mgr.; C. T. Jobes, cons. eng.

Inc. 1917, in Arkansas. **Cap.** \$300,000; \$1 par; 50,000 issued.

Property: 160 acres of patented land 5 miles S. W. of Buffalo, and 5 miles N. E. of Rush.

Development: by tunnels and open-cuts. Ore is zinc carbonate, said to average 40% zinc. New machinery was installed in 1918.

Property reported under lease to R. P. Templin of Alton, Ill.

DIXIE QUEEN MINING CO. ARKANSAS

Property: the Can Spring mine, on Warner creek, near Buffalo, Marion county.

EDITH MINING CO. ARKANSAS

Address: Charles Le Vasseur, Rush, Ark.

Property: acquired in Jan., 1919, by J. de Costa and associates of Kansas City, Mo. Ore is a carbonate of zinc, and is hauled to Yellville.

EUREKA MANGANESE & MINING CO. ARKANSAS

Listed in Volume XIV. Company consolidated 1921 with Southern Hill Manganese Co., as **United States Manganese Co.**, which see.

EVERTON MINING & DEVELOPMENT CO. ARKANSAS

Address: Everton, Ark.

Property: manganese deposit in Pugh Hollow, Lafferty Creek district, Boone county. Ore said to carry from 25 to 29% Mn. Concentration raises this grade to above 34%.

FORT SMITH SPELTER CO. ARKANSAS

Address: C. W. Martin, pres., Fort Smith, Ark.

Works: zinc smelter with 2,560 retorts at Fort Smith and rolling mills for sheet zinc at Greencastle, Indiana. Ore is purchased from mines in Arkansas and the Tri-State region.

Through the sale, July, 1919, of his interests in the American Zinc Products Co., D. W. Kerr, former president, transferred control of the above works to the Valley Iron Co. of Youngstown, Ohio. New York office: 50 Church St., with M. L. Filley as Eastern sales manager.

FOX DEN MINING CO. ARKANSAS

Property: the Dry Bone zinc mine and mill, near Buffalo.

GLOBE BAUXITE CO. ARKANSAS

Operates a bauxite deposit in Little Rock district, Arkansas.

GLORIA MINING CO. ARKANSAS

Office: Zinc, Ark. Geo. C. Miller, mgr.-supt. Not incorporated. Reported gross earnings, 1918, \$30,000, costs, \$20,000.

Dividends: \$10,000.

Property: 31 acres, 1 mile N. of Zinc, carries a blanket deposit of zinc ore in limestone, worked by 560' tunnel.

Equipment: oil engine, 600' tramway, 50-ton concentrator, consisting of jigs and tables. Concentrate shipped in 1918 averaged 44% zinc and valued at \$30,000.

HARRISON MINING & MILLING CO. ARKANSAS

Lease sold to **Krueger-Mills Mining Co.**, which see.

INDEPENDENCE MINING CO. ARKANSAS

Address: E. C. McComb, mgr., Batesville, Ark. Walter H. Denison, sales agent, Cushman, Ark.

Company operates the Polk-Southard mine and washing plant near Cushman.

KRUEGER-MILLS MINING CO. ARKANSAS

Address: W. O. Krueger, Harrison, or E. H. Mills, Springfield, Mo.

Property: lease acquired from Harrison M. & M. Co., Harrison, Ark. Zinc ore was developed, and a 75-ton mill operated in 1918, but was burned down in that year.

LIBERTY LEAD & ZINC CO. ARKANSAS

Address: Yellville, Ark.

Officers: C. G. Rogers, pres.; G. W. Caldwell, v. p.; R. R. Stone, sec.-treas.

Inc. June 17, 1917, in Arizona. Cap. \$100,000; \$1 par.

Gross earnings in 1918 were \$2,000, and expenses, \$3,000.

Property: 220 acres in Marion county, 3 miles S. E. of Yellville, contains a blanket deposit in flint rock and sand. Ore carries zinc only. Development by 200' tunnel.

Equipment: geared hoist, 850 cu. ft. compressor, 75 h. p. oil engine, and 150-ton mill, including 2 jigs.

Production: in 1917, 100 tons of ore; in 1918, 50 tons of concentrate.

MAGNOLIA LEAD & ZINC CO. ARKANSAS

Address: G. C. Millar, Zinc, Ark.

Property: 4,000 acres in Marion county, contains chamber deposits of zinc carbonate in limestone and flint.

Development: by 200' tunnel, to depth of 200'.

Equipment: steam power, 600 cu. ft. compressor, 300' tramway, with 150-ton mill employing jigs.

The ore assays 12% and the concentrate 42% zinc. The finished product costs \$15 per ton.

MATTIE MAY MINING CO. ARKANSAS

Property: at Rush, Ark.

A 100-ton mill to concentrate the developed zinc carbonate ore was completed in 1919.

McCURRY MINING & MILLING CO. ARKANSAS

Address: W. A. McCurry, Zinc, Ark.

Property: the Coker Hollow and Rhodes-Manchester; the Haulk at Dodd City; and the Keyes Gap and Canton mines, near Ponca City. The former shows zinc silicate, the latter blende and galena. At Zinc the company has a 100-ton custom mill.

MORNING STAR MINING CO. ARKANSAS

Address: J. W. McDaniel, Rush, Marion Co., Ark.

Company was reorganized in 1920 to acquire the Capps, Carney, Morning Star, Philadelphia and Red Cloud mines in the Rush district of Northern Arkansas. The Morning Star mine was a small producer in 1919.

NATIONAL MANGANESE CO. ARKANSAS

Address: Anderson, Ark.

Officers: C. A. Enoche, pres.; J. L. Elliott, v. p.

Inc. 1918. Cap. \$100,000.

Property: 230 acres of manganese bearing ground, 4 miles from Penters Bluff, the nearest shipping point. A washing plant is to be installed.

NORTHERN MINNESOTA ORE CO. ARKANSAS

See same title in Minnesota.

NORTH STAR MINING CO. ARKANSAS

Address: F. C. Hevwood, Yellville, Ark.

Property: the North Star and Lone Star mines in northern Arkansas, drilled in spring of 1918; the two mines were consolidated; a mill was erected with aerial tram, and in April, 1919, the daily output was 5 tons of high-grade zinc carbonate.

OKLAHOMA-KANSAS MINING CO. ARKANSAS

Address: Ross Blake, mgr., Batesville, Ark.

Officers: O. M. Bilharz, pres.; W. H. Gartung, sec.-treas.

Property: 585 acres in Independence county. Containing manganese ore in clay, which is worked by a steam-shovel. A 300-ton mill makes a 50% manganese product.

ONWATTA MINING CO. ARKANSAS

Address: C. G. Rogers, supt., Yellville, Ark.

Officers: C. G. Rogers, pres.; G. W. Caldwell, v. p.; R. R. Stone, sec.-treas.

Property: 40 acres in Marion county, 9 miles N. of Yellville, shows lead ore with calamine, smithsonite and some cadmium, occurring in fissures or fault breccias in limestone. The zinc ore averages better than 60% metal.

Development: by 150 and 300' tunnels. Workings total 1,000', blocking out 2,000 tons of ore.

Equipment: 35 h. p. oil engine, 140 cu. ft. compressor, and 50-ton mill, employing jigs.

Production: 1,000 tons of ore up to 1918.

OZARK MINING & MILLING CO. ARKANSAS

Address: A. O. Potoroff, lessee, Batesville, Ark.

Property: near Batesville, equipped with 100-ton mill and steam shovel. One of the large producers in the region.

REPUBLIC MINING & MANUFACTURING CO. ARKANSAS

Company operates a bauxite deposit east of Little Rock, Arkansas.

SHEPHERD MINING CO., J. C. ARKANSAS

Address: Shepherd & Wilson, Batesville, Ark.

Property: a zinc mine in Rush district, Marion county and holdings in Searcy county.

SILVER KING LEAD & ZINC CO. ARKANSAS

Address: Yellville, Ark.

Property: Sure Pop No. 2 mine, on Water creek, Marion county. Ore is a zinc carbonate. Reopened in 1921.

SILVER KING MINING CO. ARKANSAS

Address: J. W. Kelly, Hot Springs, Ark.

Inc. 1921. Cap. \$50,000.

Property: includes the Waterloo, Elnora, Silver City and Minnesota mines, about 1,300 acres, near the old camp of Silver, Montgomery county, 30 miles W. of Hot Springs. Ore occurs in veins in quartz and calcite as galena, sphalerite and tetrahedrite.

Development: by 185' shaft that has been unwatered and is to be sunk to 500' depth. Necessary machinery was reported installed May, 1921, and work under way.

SOUTHERN HILL MANGANESE CO. ARKANSAS

Consolidated 1921 with Eureka Manganese & Mng. Co., as United States Manganese Co., which see.

TEMPLE MINING CO. ARKANSAS

Address: A. Ludlow, supt., Buffalo, Ark.

A mill was reported producing zinc carbonate concentrate at last account.

UNITED STATES MANGANESE CO. ARKANSAS

Address: Cushman Ark.

Officers: Dr. Roe, pres.; Dr. McFatrigh, v. p.; W. H. Beatty, sec.-mgr. Walter H. Dennison, sales agent, Cushman Ark.

Inc. 1921. Cap. \$250,000. Is a consolidation of the Eureka Manganese & Mng. Co. and the Southern Hill Manganese Co.

Property: includes Eureka mine and mill near Cushman, the Southern Hill mine and 543 acres formerly owned by the Gregory estate.

YELLOW ROSE MINING CO. ARKANSAS

Address: Rush Ark.

Cap. \$3,000,000

Property: the Yellow Rose, White Eagle and Big Find zinc mines in the Rush district Marion county; said to be one of the best properties in northern Arkansas, with an output of 1,820,000 lb. of ore in 1917.

Development: by shaft and tunnel. Equipped with 200-ton mill.

CALIFORNIA

As the mining districts of the State are widely scattered along the Sierra Nevada, the mining companies and mines are described alphabetically, instead of by districts or counties.

The gold output of California still constitutes the most important and valuable metallic product of the State. The increase shown in the production was entirely due to better results in gold and silver mining operations, the

baser metals all showing big declines. Gold production for 1921 was \$15,744,910, compared with \$14,311,043 in 1920.

Year	Copper	Lead	Quicksilver, Flasks	Silver,	Zinc, lb.
1921.....	11,681,705	770,298	2,400	3,514,276	842,000
1920.....	12,626,272	4,813,510	10,278	1,706,327	1,165,509
1919.....	23,584,698	4,139,562	15,200	1,349,508	1,384,192
1918.....	47,793,046	13,464,869	22,621	1,427,861	5,565,561
1917.....	48,534,611	21,651,352	24,382	1,462,955	11,854,804

ABBOTT QUICKSILVER CO.**CALIFORNIA**

It had a lease on property of Alpha Quicksilver Co., which see.

AETNA QUICKSILVER MINE**CALIFORNIA**

Address: Lawley Bros., owners, Calistoga, Calif; E. de Golia mgr., and E. B. Frost, supt., Aetna Springs, Lake Co., Calif.

Property: 9 miles N. E. of Calistoga, and 18 miles from St. Helena, the shipping point. Cinnabar was first found there in 1854, and total production of quicksilver is over 46,000 flasks. Most of the ore is in serpentine, only a little in sandstone.

Development: by 9 tunnels (No. 7 being 7,226' long and No. 9, 3,557'), attaining a depth of 900', and the 800' Star shaft. The last work reported was at a glory-hole on the Phoenix claim.

Equipment: storage bins, grizzly, one 60-ton Scott fine-ore furnace using fuel condensers, oil engines, and suitable buildings. No recent production figures.

AFTERTHOUGHT COPPER CO.**CALIFORNIA**

Office: 1321 Pierce Bldg., St. Louis, Mo. **Mine Office:** Ingot, Shasta county, Calif.

Officers: Geo. L. Porter, pres.; J. Taylor Stratton, v. p.; C. A. Crowl, sec.-treas., with S. F. Lumm, C. Cambern, C. P. Keller, F. P. Maid and John T. Milliken, directors. A. H. Heller, gen. supt.; Robt. Milliken, mine supt.

Inc. Jan. 1909, in Arizona. **Cap.** \$16,000,000, \$10 par; 1,544,898 shares issued. Is successor of Great Western Gold Co. A 20-year 1st, mtg. 6% gold coupon bond issue of \$800,000 authorized; \$350,000 issued, Sept., 1917.

Property: 19 patented claims, 380 acres, with mill and smelter sites and timber lands giving total holdings of 1,760 acres. Lands include the Afterthought, Liberty, Last Chance, Section 15 and Bull groups, mines more or less developed being Afterthought, Copper Hill and Copper Grand. Lands are on the east side belt, which extends from Ingot DeLamar, and is entirely distinct from the copper belt on the west side of the Sacramento river. Lands show porphyry, slates and shales, carrying contact deposits containing sulphide ores, there being 5 known ore-bodies, of which 2 are under development, one being reported by company to be 160'x500'x35' in size.

Company also has 160 acres located 12 miles N. of Redding, in the Flat Creek district, adjoining Mountain Copper Co. property.

Development: The Afterthought mine in the Furnaceville district, 20 miles E. of Redding, has a main shaft 900' deep, with 7 tunnels, main tunnel being about 2,500' long, with a total of 10,000' of workings. The 700' level shows an entirely new ore-body, averaging 4½% copper, 3% zinc, 6 oz. silver, and 60¢ gold per ton. This was also cut on 9th level. Sampling of the mine and assays of 12,000 tons of ore milled during one year, show the ore to average 3.6% copper, 18% zinc, 6 oz. silver and 60¢ gold per ton. Ore of mine characterized by extremely fine sulphides, chalcovrite and sphalerite with barite and pyrite.

Equipment: includes blast-furnaces, electric power, a 115 h. p. steam plant at the mine, with 20 h. p. and 30 h. p. hoists and a 5-drill air-compressor, also a flotation plant that is treating 300 tons daily. To separate the zinc from copper, the flotation product is put in a Wedge type furnace, lightly roasted at 400 to 500° heat, and retreated in flotation cells.

A 14-mile standard-gauge railway, known as the California, Shasta & Eastern Railway, connects Anderson, on the Southern Pacific Railway with Bella Vista. The ore is hauled 12 miles by truck from the mine to Bella Vista.

The smelter: 1 mile north of Cow creek and 1½ miles north of the mine, is connected therewith by a 30" tramline. The smelter, blown in March 24, 1905 has water-jacket blast furnaces of 42"-96", rated at 75 tons, and 42" x 150", rated at 250 tons daily capacity. A new 300-ton reverberatory furnace, 19' x 60' went into operation in July, 1919. Employs 100 men when running full time.

The reverberatory furnace smelted 15,000 to 20,000 tons, up to Aug. 1921 when suit was brought against the company for infringement of patent, in using side feeding, but the verdict was for only \$1.

The company has done considerable experimenting with its complex ore, which has been very difficult to treat satisfactorily. The Horwood process will apparently solve the difficulty. This is described on page 151, Min. & Sci. Press of August 2, 1919. See also same journal April 24, 1920, and May 29, 1920.

A 300-ton differential oil flotation plant was erected 1919. Ore is crushed to 2" diameter, ground to 48-mesh, then subjected to flotation, which produces a collective concentrate and a final tailing. The concentrate is thickened, filtered, dried and roasted lightly. After cooling, it is again subjected to flotation producing a froth called zinc concentrate, and a tailing, that is copper-iron concentrate. Ratio of concentration is about 2 to 1, giving 150 tons of collective concentrate daily; this concentrate when treated gives 60 tons copper concentrate to 90 tons zinc concentrate. Janyer flotation machines are used.

Operations were indefinitely suspended, February, 1920.

ALCADE GOLD MINES CO.

CALIFORNIA

Address: 57 Post St., San Francisco, Calif. Lloyd Root, supt., Grass Valley, Calif.

Officers: E. E. Drake, pres.; L. A. Bailey, sec., 149 New Montgomery St., San Francisco. W. S. Tevis of San Francisco, acquired a large interest, June, 1921.

Inc. 1918, in Calif. **Cap.** \$500,000.

Property: the Alcade gold mine, formerly the Kenosha, with 12 claims, 200 acres, 4 miles S. W. of Grass Valley, Nevada county, located in 1867.

Geology: the main vein, in amphibolite, is 18 to 24" wide, the quartz averaging 6". Ore is free milling, carrying coarse gold and up to 3% sulphides.

Development: by shallow shafts up to the year 1875; to depth of 180' in 1900; and below 450' late in 1919. Extensions in 1920 included shaft sinking and 1,400' of drifts. The rich orebody uncovered on the 400' level was opened by winzes.

The old Taylor or Kenosha shaft is to be sunk to 1,000'.

Equipment: steam boilers, pump, hoist, 6-drill compressor machine-drills, 20-stamp mill, purchased from Golden Gate Explor. Co., electric power, and suitable buildings.

Production: estimated to be \$500,000. The mill was treating ore late in 1920.

ALLEGHANY MINING CO.

CALIFORNIA

Address: R. M. Searls, 375 City Hall, San Francisco.

Inc. 1919. **Cap.** \$500,000.

Has an option on and is working the Tightner mine at Alleghany, Sierra county; see **Tightner Mines Co.** in this volume. Company also holds bond on the Gold Canyon Group, below Moores Flat, in Nevada county, which it unwatered and worked in 1920.

ALLISON MINING CO.**CALIFORNIA**

Address: Melones, Calaveras county, Cal.

Inc. 1917, by A. W. Copps and John T. Murphy, at San Francisco, and Frank B. Pattee of Oakdale.

Property: quartz claims on Carson creek, adjoins the Jones, on both sides and ends and is W. of the Melones mines. Vein shows orebodies of \$5 quartz and some high grade ore.

Two 5' Huntington mills were to be installed at last account.

ALLISON RANCH MINE**CALIFORNIA**

Owned by **Grass Valley Cons. G. M. Co.**, which see.

ALPHA QUICKSILVER COMPANY**CALIFORNIA**

Mail returned from former address: Wilbur Springs, Colusa county, Cal.

Officers: R. A. Bogges, pres.; E. R. Dodge, sec.; W. H. Rablin, treas. Directors: R. A. Bogges, E. R. Dodge, T. K. Stewart, W. E. Pruett.

Inc. March 21, 1917, in Nevada. **Cap.** \$250,000—7% pfd. and \$500,000 common; \$5 par; all issued.

Property: 555 acres, near Wilbur Springs, Colusa county. Leased to Abbott Quicksilver Co.

Development: 250' shaft and 4,000' workings. Ore is said to contain 15 lbs. mercury per ton and to occur in a 15' serpentine vein in shale; course N. W.-S. E., dip 22° from perpendicular. Ore at bottom of mine said to be good. New shaft is 115' deep.

Equipment: 50 h. p. steam hoist, compressor, 2,000' tramway, concentrator and a 50-ton furnace.

Production: total to date said to be 30,000 flasks. From 1900 to 1904 reported to have netted \$7,000 per month. Closed by litigation from 1904 to 1916.

ALTA COMBINATION CO.**CALIFORNIA**

Address: H. L. Ostrander, mgr., 1200 Main St., Grass Valley, Calif. **Inc.** 1920, in Calif. **Cap.** \$500,000.

Property: Alta-Combination placer, at Grass Valley, Nevada county, developed by 1,000' adit.

Equipment: includes compressor, power plant, saw-mill and shops.

ALTOONA QUICKSILVER MNG. CO.**CALIFORNIA**

Address: Chas. Allenberg, sec., 333 Kearney St., San Francisco. J. Frowenfeld, pres.

Inc. 1875, in Calif. **Cap.** \$10,000; 10c. par.

Property: 3 claims in Trinity county, 15 miles N. E. of Carrville and 16 miles N. W. of Castella. Four veins, of which 3 unite on 600' level, occur in a serpentine-porphry contact, forming a mineralized zone 4 to 50' wide and 400' long.

Development: by 450' shaft with a 150' winze reaching the 600' level.

Equipment: includes a reduction plant.

First acquired by company in 1875, property has produced about 29,000 flasks of quicksilver. Is operated by lessees, a small production being reported for 1919.

AMADOR MINES CO.**CALIFORNIA**

Owners: J. W. Bullock, Seattle Wash., and W. B. Hubbard, Amador City, Amador county, Calif.

Property: formerly operated under name of Original Amador Cons. Mines Co., 6 claims, covering 4,400' on the lode at Amador City, is said to show a system of parallel veins, from 12' to 50' wide, with diabase hanging and Mariposa slate foot-wall.

Development: by 1,238' incline shaft, 16,742' of crosscuts and drifts, and 27,465' of raises.

Equipment: includes compressor driven by 100 h. p. motor, hoist, and 250-ton amalgamation-concentration mill, with cyanide plant of 250-ton monthly capacity.

Was operating in 1919, but pumping only in 1920.

AMERICAN EAGLE CONSOLIDATED MINES CO. CALIFORNIA

Address: c/o Pierce, Critchlow & Barrette, Hibernian Bldg., Los Angeles, California.

Inc. 1919, in Del. **Cap.** \$2,500,000.

AMERICAN GOLD DREDGING CO. CALIFORNIA

Was, or is, in some way connected with the **Oro Water, Light & Power Co.**

Address: 418 Sharon Bldg., San Francisco. R. K. Estep, supt., Redding, Calif.; C. G. Leeson, mgr., Oroville, Calif.

Officers: Luther J. Holton, pres.; R. L. Van der Naillen, v. p.-gen. mgr.; R. C. Maclachlan, sec.

Inc. March 13, 1916, in Calif. **Cap.** \$900,000; par \$25; 36,000 issued. Dividends to date, 30c. per share each on Feb. 1, and May 1, 1920. Annual meeting 3rd Monday in January.

Property: Reid Ferry farm of 800 acres on Sacramento river, across the river from Redding, Shasta county, and placer holdings in Calaveras, Amador, Butte, and San Joaquin counties. On the Mokelumne river between Amador and Calaveras counties, the gravel carries about 10c. gold per yard, and annual production for 2 boats has been \$200,000. Considerable platinum and iridium are recovered.

The dredges have buckets from 5 to 9 cu. ft., and some handle 225,000 yd. per month.

In 1920, 5 dredges were at work on 4 different areas, for part or all of year.

In 1921, company secured a 19-year exploitation concession from the Mexican government to extensive placer fields near Sinaloa, Mexico, on the Yaqui, Fuerte, Mayo and Sinaloa rivers.

AMERICAN MINING CO. CALIFORNIA

Idle Address: Redding, Shasta county, Cal.

Inc. and was controlled by Jas. Sallee.

In 1914 the company started to work the old American mine in the French Gulch district, consisting of 11 claims. Development work of the old mine includes 4 tunnels from 50' to 1,400' in length, and one stope 125' long and 240' in height. When mine shut down under former management ore is said to have assayed \$20 in gold per ton. It occurs in a fissure vein, strike N. 70° W., dip S. 75° E., slate walls. Pay-shoot is 2' wide. A 10-stamp mill is on the property.

ANDY FITZ MINING & MILLING CO. CALIFORNIA

Address: First Savings Bank Bldg., San Francisco, Calif. H. R. Verre, pres.; P. J. Walton, sec.

Inc. 1908, in Calif. **Cap.** \$500,000; par \$1.

Property: the Fruitvale mine in the Forest district, Sierra county, near Downieville.

ANGELS CAMP DEEP MINING CO. CALIFORNIA

Address John C. Benson, pres., 744 Call Bldg., San Francisco, or Angels Camp, Calaveras Co., Calif.

Inc. 1916, in Nevada. **Cap.** \$1,500,000; \$1 par; 1,081,000 shares issued.

Property: the Angels Camp Deep mine. The shaft is 500' deep with levels at 200 and 500'. A high grade ledge, assaying up to \$600 per ton, was reported opened on these two levels, in 1921.

Equipment: includes 20-stamp mill, 100-h. p. hoist, air-compressor and other equipment. During 1920, company was developing only. Crushing of \$4.86 ore was started March 31, 1921.

ANITA COPPER CO.

Address: 933 Central Ave., Los Angeles, Calif.

Officers: W. T. Bill, pres.; F. E. Sanford, sec.

Inc. 1910. **Cap.** \$1,000,000; \$1 par.

CALIFORNIA**ANITA GOLD MINING CO.**

Address: 409 Montgomery St., San Francisco, Calif.

CALIFORNIA**ARBUCKLE MINING CO.**

See **Pacific Coast Gold Mines Corp.**

CALIFORNIA**ARBUCKLE MINING CO.**

Address: Frank Green, Ono, Shasta county, Cal.

CALIFORNIA

Property: the Bell Cow gold mine on Arbuttle Mountain, near Redding. Estimated reserves were 50,000 tons in October, 1919, some of which assayed from \$10 to \$15 per ton.

Equipment: steam power, 10-stamp mill, 4½-mile road, and buildings.

ARCTIC MINING & POWER CO.**CALIFORNIA**

Address: J. T. Price, pres., 538 Consolidated Realty Bldg., Los Angeles.

Inc. 1910. in Calif. **Cap.** \$1,000,000; \$1 par.

Property: 228 acres, 7 miles N. E. of Washington, Nevada county, said to contain 8 parallel veins, 5' wide, in granite. Quartz ore contains free gold and some sulphides.

Development: by 60' shaft and 3 tunnels, a total of about 1,000' of work.

Equipment: hydro-electric plant, constructed in 1914, compressor, and buildings.

Idle at last report.

ARGONAUT CONS. MINING CO.**CALIFORNIA**

Office: 224 West 57th St., New York. Controls Argonaut Mining Co., and is itself controlled by the **White Knob Copper & Development Co.**, owning a majority of its capital stock.

Officers: John T. Smith, pres.; A. H. Carlisle, v. p.; Arthur Kennedy, sec.-treas.; with F. A. Gaynor, and W. W. Cohen, directors.

Inc. Jan. 5, 1907, in Maine. **Cap.** \$2,000,000; par \$5; 371,000 shares issued, of which 240,000 are owned by White Knob Copper & Development Co. Annual meeting, first Tuesday after June 1. Security Transfer & Registrar Co., tran. agt. and registrar, New York.

Dividends: 30c. in 1914; 40c. in 1915; 40c. in 1916; 25c. in 1917; 20c. in 1918; 5c. in 1919; 15c. in 1920.

ARGONAUT MINING CO.**CALIFORNIA**

Address: 1404 Humboldt Sav. Bank Bldg., San Francisco. **Mine Office:** Jackson, Amador Co., Calif.

Officers: Jos. B. Smith, sec., with John Raggio, John T. Smith, E. A. Stent and Ambrose Gherini, directors. V. S. Garbarini, gen. mgr.; B. Sanguinetti, mine foreman; H. Leam, mill foreman.

Inc. in 1893. **Cap.** \$1,000,000, shares \$5 par; all issued. Is the operating company of the Argonaut Cons. Mng. Co., control of which is held by the White Knob Copper & Dev. Co.

Property: one mile north of Jackson, on the Mother Lode, adjoins the Kennedy Extension Mng. Co. on the south.

Geology: ore is a soft shattered white gold quartz in a regular and continuous vein 8' to 12' wide, with strike N. 10° W. Vein outcrops in a meta-diabase; above the 290' level it passes into the Mariposa slates, where, apparently the fissure was originally opened by a thrust fault with a throw of 120'. One wall is a soft black slate, the other is slate or a greenstone schist. Two oreshoots have been developed; the north shoot 325' long, the south shoot 600' long, each with average width of 10'. On the 1,240' level there is a split in the vein, a branch running off into the schist hanging wall. Ore yields in the mill about \$5.50 in free gold and \$1.50 in concentrates.

Development: by 4,850' shaft, sunk at an angle of 60°, with levels at 150' intervals. At 290' level shaft cuts the vein in diabase, from the 1,460' level to present depth it is in the slate hanging-wall. Present work is being

done on the four lower levels. Ground is very heavy and the square-set mining method is used. Nearly half the force employed underground are timbermen. Ore is hoisted, in 4-ton skips, by a 500 h. p. double-drum electric hoist, automatically dumped into storage bins, then fed to a 10 by 16" Knight crusher and trammed in 2½-ton cars to the mill. This mine and the Kennedy were flooded in 1920, to extinguish the fire that ravaged both mines. The mine was pumped out and production resumed October, 1920.

Mill: sixty 1,000-lb. stamps, dropping 96 times per minute, with 7" drop, and crushing 5 tons per stamp per day through 20-mesh wire screen. From the amalgamating plates pulp flows to 36 Frue vanners, tailing goes to hydraulic classifiers, overflow being concentrated on 20' Darrow rotary concentrators. A 90% extraction is made by amalgamation and concentration. Company employs 225 men.

Production: figures are not available, but the mine was the 11th on the list of American gold producers in 1918, and the 4th in California.

This mine has the highest average grade ore and is one of the best gold mines along the Mother Lode of California, and normally pays good dividends.

ARGUS STERLING MINING CO.

CALIFORNIA

Address: 502 Security Bldg., Los Angeles.

Officers: A. C. Taylor, pres.; J. O. Butler, sec.

Inc. 1916, in Arizona. **Cap.** \$100,000; par 10c.; all issued.

Property: 120 acres, at Darwin, Inyo county, Calif. Ore contains silver, lead, gold and copper. **Development:** 1,000' of tunnels, etc.

Shipped lead-silver ore in 1920.

ARPS COPPER COMPANY

CALIFORNIA

Company out of business. See Volume XIV.

Property: Arps and Reno groups were deeded back to the original owners, and subsequently optioned to D. C. Jackling in connection with the Bully Hill development scheme.

ARROWHEAD RICO MINING CO.

CALIFORNIA

Address: E. R. White, sec., Tonopah, Nevada.

Directors: E. E. Northup, pres.-mgr.; Sol Kamp, v. p.; E. B. White, Frank Abbott, and S. A. McDonald.

Property: 9 claims acquired from A. Farrington of Big Pine, Calif., in the Ubehebe district, Inyo county, 48 miles from Bonnie Claire on the T. & T. R. R. High grade copper and lead ores, with gold and silver values, occur in veins in limestone. Assay returns from car-load lots have shown 18 to 36% copper from copper ores, and 63% lead, with 25 oz. silver, from lead ores.

Development: by tunnels, one being driven 500' to open ore at a depth of 300'.

Equipment: oil engines, compressor and hoist, etc., erected 1920. Shipments are hauled to Bonnie Claire at a cost of \$15 per ton, thence by rail to Utah smelters at \$12 per ton. A little silver ore was produced in 1920.

ASSETS REALIZING MINES CORPORATION

CALIFORNIA

Address: Stock Exchange Bldg., Los Angeles, Cal. (Is a subsidiary of the Dupont Copper Co. of Nevada, which holds a 51% interest.)

Officers: J. V. Priest, pres.-gen. mgr.; J. A. Brown, v. p.; F. W. Andrews, sec.-treas., with M. Brines and R. F. Howard, directors. C. L. Logue, supt.

Inc. 1914, in Calif. **Cap.** \$1,000,000; \$1 par; 999,883 issued.

Annual meeting, June 23.

General balance sheet, September 16, 1919, covering period since incorporation, shows: Net original purchase values mining properties, \$596,252; total expenses applicable to development, \$207,087, which includes development and equipment, \$164,187; administrative and miscellaneous expenses, \$42,900. Current assets and contracts in course of collection, \$24,537; treasury stock, \$177.

Liabilities: paid in capital, \$576,994; notes payable, \$3,025, and an item, capital surplus, \$269,410.

Property: The Arica group of 28 claims, 560 acres, in the Ironwood district, Riverside county. **Ore:** gold-silver, in six veins between dolomite hanging and chlorite schist foot-walls: ore is found in porphyry intrusions between these walls.

Development: by 2 shafts, one 930' deep, with 9 levels from the 80' to 900'. The 138' level said to be opened for 270' in ore assaying \$10 to \$30 per ton in gold. The second shaft, 330' deep, has levels at 165', 230', and 330' depths, and ore is said to average \$20 per ton.

Equipment: 150-ton plant, equipped with crusher and rolls, Hardinge mill, Dorr classifiers, thickeners, and agitators, air-compressor, pumps, assay office, boarding house and 10 buildings.

Ore reserves: reported, 50,000 tons ready for stoping.

Company said to own 51% of the stock of the Rito Seco Gold Mines, Colorado, and 60% of the Mammoth Gold, Silver and Platinum Mines, Colombia, South America.

ATASCADERO COPPER CO.

CALIFORNIA

Address: B. G. Lewis, 1113 Hobart Bldg., San Francisco. Alfred Hanford, supt.

Inc. 1919. **Cap.** \$150,000.

Property: 12 claims, 360 acres, 160 acres patented, on Greenhorn Mt., in French Gulch district, Shasta county, includes the Greenhorn mine, 3 miles west of Tower House, acquired from the Greenhorn Mountain Copper Co. Said to show gold-silver-copper sulphide ore, occurring as a fissure in porphyry. Vein strikes N. 61° W., dips 40°, assays said to average 4.5% copper per ton.

Development: by over 3,000' of tunnels. Greatest depth of workings is 480'. Management claims 250,000 tons of 3% ore blocked out.

Equipment: sufficient for development by tunneling, but is to include a treatment plant which will use a process devised at Oakland, Calif.

Final payment of \$50,000 on mine made, 1921.

ATOLIA MINING CO.

CALIFORNIA

Address: 1404 Humboldt Sav. Bank Bldg., San Francisco. **Mine office:** at Atolia San Bernardino county, Cal.

Officers: E. C. Voorheis, pres.; E. A. Stent, sec.; Chas. S. Taylor, supt.; B. C. Clark, cons. engr.

Inc. 1906, in California. **Cap.** \$100,000; \$1 par; all issued.

Dividends: \$180,000 in 1915; \$2,705,000 in 1916; \$1,300,000 in 1917; total \$5,264,500 to Sept., 1918.

Property: a number of claims at Atolia on the Randsburg branch of the A. T. & Sante Fe R. R. are being worked for tungsten ores. The ore occurs as scheelite in both placer deposits and fissure veins. The Atolia is the largest tungsten mine in the world. Also owns Saint Anthony Mines Co., Nevada.

Development: by 1,100' shaft with electric hoist and full equipment.

Equipment: 100-ton concentrator, equipped with Huntingtons, Deister roughers and tables, Dorr classifier and Callow cones.

Production: shipments of concentrate in 1917 were 1,938 tons, returning \$2,155,505; the mill treated 21,913 tons of 6.187% ore, recovery 79%. Costs were \$12.65 per ton. In 1918 output was 1,200 tons of concentrate.

Mine and mill closed down in April, 1919, until the tungsten market improves or a protective duty is enacted.

AVAWATZ CONSOLIDATED MINES

CALIFORNIA

Address: 510 W. 6th St. Los Angeles, Calif.

Officers: A. B. Carpenter, pres.; S. E. Meserve, sec.

Inc. May, 1919, in Calif. **Cap.** \$1,000,000; par \$1; 682,000 issued.

Annual meeting May 1st.

Property: the old Crown mine 206 acres, 124 patented, in the Silver Lake district, San Bernardino county, 11 miles from rail.

A brecciated zone carries argentiferous galena. Considerable work has been done and at present there is some rich ore exposed. Development was re-started in July, 1919, and a hoist, air-compressor, and other machinery erected.

Production: 300 tons silver-lead ore.

BAGDAD-CHASE GOLD MINING CO. CALIFORNIA

Address: J. N. Beckley, treas., Rochester, N. Y. Is a holding company owning all the stock of the Soulsby Consolidated Gold Mining Co., at Soulsbyville, and a substantial stock interest in the Pacific Mines Corporation at Camp Rochester.

BALAKLALA CENTRAL MG. & SMELTING CO. CALIFORNIA

Address: S. A. Holman, mgr. Coram, Shasta county, Cal. Inactive. **Inc.** in Wyoming. **Cap.** \$5,000,000; shares \$5 par; one-third of issue owned by Balaklala Consolidated Copper Co., the remainder by the Mammoth Copper Mining Co.

Owens 3 claims surrounded on all sides by Balaklala Consolidated Copper Co.'s holdings.

BALAKLALA CONSOLIDATED COPPER CO. CALIFORNIA

Office: 111 Broadway, New York. **Works office:** Coram, Shasta county, Calif.

Officers: Thomas W. Lawson, pres.; Wm. A. Kerr, v. p.-treas.-gen. mgr., Mackay, Ida., with H. W. Hoops, J. A. Young, and E. M. Buchanan, directors.

Inc. Feb. 24, 1906, in Nevada. **Cap** \$10,000,000; reduced to \$1,000,000, in 1917; shares \$25 par; all owned by First National Copper Co. Bond issue of \$1,500,000 has been retired. Annual meeting last Thursday in October.

Is a reorganization of the Balaklala Mining Co., control of which was sold simultaneously to two parties, making a snarl requiring reconstruction to untangle. Is controlled, through ownership of entire stock issue, by the First National Copper Co. Windsor Trust Co., New York, and Federal Trust Co., Boston, transfer agents; Trust Company of America, New York, and First National Bank, Boston, registrars.

Profit and loss account June 30, 1919 to Dec. 31, 1919., (latest available); Net ore sales \$590,707; Cost of operations \$412,355; Other income \$13,396; Dividends \$180,000; Surplus for period \$11,748.

Property: 72 claims, patented, 1,149 acres, also 800 acres of miscellaneous lands, including a smelter site, the townsite of Coram and right-of-way for tram line.

The mines are at Kimberly, 3 miles from Coram on the Southern Pacific R. R., covering 3,040' along the main mineral zone. The Clouds Rest and Gooseberry claims in the Flat Creek district were purchased in Dec., 1920.

Country rock is rhyolite, ore occurring in lenticular masses as replacement of country rock, in flat bodies, with slight dip to north, and greatest extension east and west, with a series of north and south step faults, causing displacement from a few feet to more than 100'. The main ore-bodies are developed for lengths of 900' and 1,100'. Ore is cupriferous pyrite, copper values being mainly in chalcopyrite, with a little chalcocite and covellite, all carrying gold and silver values, estimated by management to average about 2.65% copper, 0.9 oz. silver and 50 to 60c. gold per ton. The large ore body developing about 1,000,000 tons, gives a typical analysis of 2.7% copper, 0.95 oz. silver, 0.03 oz. gold, 21.4% silica, 31.5% iron, 4.3% lime, 3.4% alumina, 2.2% zinc and 35.2% sulphur.

Developed by a large glory hole, and by tunnels, with upraises, providing for open-cast mining, giving cheap extraction. There are about 20 tunnels, including the Weil tunnel, nearly 6,000' long.

Ore reserves: said to be about 3,000,000 tons of 2.83% copper ore with 1.32 oz. silver and 60c. gold per ton, a year's supply (100,000 tons) being ready for stoping.

Equipment: includes a steam plant installation of about 1,000 h. p. and electric power. Machinery includes a number of hoists, 5 compound air compressors and about 40 rock drills. Buildings include an office, store, school, hospital, sawmill and about 75 dwellings. The Coram property, townsite, smelter, etc, were sold to the Shasta Zinc & Copper Co., and moved to Winthrop.

See Vol. XIV for description.

Although the smelter is about 14 miles from the nearest cultivated lands, the Shasta County Farmers' Protective Association obtained an injunction shutting down the company smelter, in 1911. This led to the installation of the Cottrell electrolytic flue dust precipitator, which took out the dust, but not the acid fumes, and hence was not successful. The Young process used at Campo Seco (Penn Mining Co.) and the Hall process were also unsuccessful. The Heslewood method in 1915 was the last one to be tried out, but was not satisfactory.

The smelting record is given in Vol. XI. the Copper Handbook.

Production: June 30, 1918 to May 15, 1919; amounted to 82,271 tons of ore, the net recovered values being 2.81% copper and \$1.54 gold and silver, or a total of \$178,352; copper being sold at 19.59c. per pound. For year 1917-1918, mine produced 82,876 tons ore, assaying 2.29% copper, \$1.57 in gold and silver, which compares with the previous years' production of 76,559 tons, netting \$174,656. Shipments made to the Mammoth Smelter. All operations suspended in May, 1919.

BALAKLALA COPPER CO.

CALIFORNIA

Reorganized as **First National Copper Co. q. v.**

BALD MOUNTAIN MINING CO.

CALIFORNIA

Address: Mark N. Alling, Downieville, Calif.

Property: 441 acres, in the Forest district, 13 miles S. of Downieville, Sierra county. The mine covers two ancient gravel channels, lying on slate and schist and covered by lava. Several quartz veins were found in the mine, one carrying free gold.

Development: by 1,800' bedrock tunnel and raises into the gravel. From 1872 to 1887 the gold output was \$3,100,000, and net profit \$1,300,000. Shafts have been sunk to open the N. extension of the Bald Mountain channel.

BANK MINING & PROMOTING CO.

CALIFORNIA

Address: 816 Prudential Bldg., Buffalo, N. Y.

Officers: W. H. Barnhart, pres.; Geo. R. Reed, sec.

Inc. 1900, in Arizona. Cap. \$300,000; par 20c.

Property: a gold mine near Allegheny, Sierra county, Calif.

BANNER CONSOLIDATED MINES, INC.

CALIFORNIA

Address: H. B. Walmsley, 200 Fifth Ave., New York City. **Mine address:** John M. Nicol, mgr., Grass Valley, Calif.

Officers: W. J. Webster, pres.; Theo. Roosevelt Pell, v. p.; H. B. Walmsley, v. p.-sec.; John M. Nicol, v. p.; Leland Lyon, treas.; with W. H. Finley, Ernest Du Pont, Parmeley W. Herrick, John Errikson and A. De Wint Foote, directors.

Inc. 1921, in Delaware. Cap. \$2,250,000; par \$1. Transfer agent: Empire Trust Co., New York; registrar, New York Trust Co. The company is a consolidation of the Central Cons. Mines, Inc. and the Norambagua Cons. Inc. Shares were exchanged on basis of 2 old for 1 of new company. Controls the Cuje Gold Mines in Nicaragua, C. A.

Property: the Grass Valley tract of 1967 acres, in Nevada county, consists of the Banner, North Banner and Central mines, in the East or Banner belt of the district, and the Norambagua and Perrin and Gluyas mines in the Wolf Creek section, adjacent to the well known Empire mine.

The Banner tract of 1,000 acres, covers $2\frac{1}{4}$ miles of the vein system, with four developed orebodies and 12 promising, but slightly developed outcrops. The Norambagua-Perrin tract 937 acres is traversed by several known orebodies and includes the junction of two.

Development: by 4 adits and 4 shafts, with 12,000' of workings, the deepest 800' on the incline. At the Norambagua the deepest workings are 1,300' with little ore mined below the 500' level. Ore said to run \$10 to \$30 per ton, but company expects to treat 300 tons daily of \$8 ore, at cost of \$4.50 per ton for all expenses.

Equipment: 200-ton mill remodelled and 100-ton flotation plant installed late in 1921.

Reserves: company's manager reports 55,000 tons between the 800 and 3,000' levels, in the Central mine, of a net value of \$247,000 with \$180,000 more in probable ore. No figures are given for the North Banner reserves, but the 11 veins are estimated to contain 1,000,000 tons above the 3,000' level. At the Norambagua and Perrin mines, reserves are estimated at \$400,000.

Production: of all the mines now owned is \$1,605,000.

The Cuje property covers 450 acres, contains 3 large veins, said to average \$10-\$12 per ton, with total yield to date of \$200,000.

Company has good properties, high class directorate and gives promise of becoming a long lived and profitable enterprise.

BANNER MOUNTAIN SILVER MINING CO. CALIFORNIA

Address: H. L. Meyer, First Natl. Bank Bldg., Fresno, Calif.

Inc. 1920, in Calif. Cap. \$100,000.

BARBAROSSA MINING CO. CALIFORNIA

Company probably defunct. See Vol. XIV.

BEAR VALLEY MINING CO. CALIFORNIA

Address: F. H. Turner, Emigrant Gap, Calif.

Property: the Zebright mine, 27 miles from Nevada City and 5 miles from Emigrant Gap, Nevada county, contains a 20' vein in slate. The ore assays up to \$3 per ton.

Development: by tunnels, the main being 900' long. The principal ore shoot has been stoped on its dip for 400'.

Equipment: water-power, under 470' head, hoist from lower tunnel to mill, jaw-crusher, 10 stamps, 4' ball-mill, 5-drill compressor, etc.

BELGIUM-BOHEMIAN MINING CO. CALIFORNIA

A Belgian company, that in 1914, owned the Highland mine, Liberty district, 11 miles S. E. of Etna Mills in the Klamath Reserve.

Property: 100 acres in Siskiyou county.

Ore: carries free-milling gold in shoots 130' long and 2' wide; strike N. 40° E., dip 30° S. E. Footwall is a diorite schist and hanging-wall is quartz porphyry.

Development: by tunnels with several thousand feet of workings; main tunnel 600' long. All work has been done near apex of mountain so that only a shallow depth has been obtained. Supplies are packed in over a 3-mile trail.

Equipment: includes a 10-stamp mill, run by gasoline. Mine is credited with a production of \$350,000. No recent returns.

BELLEVUE MINING CO. CALIFORNIA

Address: R. H. Kingdon, La Porte, Calif. Sir James and Sir Henry Bell, London, England, in control.

Property: 2,000 acres, $4\frac{1}{2}$ miles from La Porte, and 54 miles from Oroville, in Plumas county, at 4,784' elevation, covers 3 miles of gravel channel, on slate bedrock overlain by andesite. The gravel is 150' deep, with pay gravel 120' wide and 4' deep, including 6" of bedrock. Faulting is common.

Development: by 5,400' bedrock tunnel, 8 by 8' in clear. About 4,000' of exploration was done in gravel, including 1,900' of breasting. Costs were

\$4 to \$10 per cu. yd.

BELMONT SHAWMUT MINING CO.

CALIFORNIA

Subsidiary of Tonopah Belmont Development Co. of Nevada, which owns 750,000 of the 1,000,000 shares, and spent \$743,850 on property up to the end of 1920. Property was acquired in February, 1917.

Offices: 500 Bullitt Bldg., Philadelphia; Hobart Bldg., San Francisco, and Shawmut, Cal.

Officers: C. A. Heller, pres.; W. M. Potts, v. p.; S. D. Sinkler, v. p.; C. B. Taylor, general counsel; with H. C. Brougher, M. B. Cutter, J. C. Fraley, R. G. Park and T. W. Synnott, directors. R. G. Wilson, sec.-treas. G. H. Garrey, cons. geologist.

Operating Staff: Frederick Bradshaw, gen. mgr.; O. McCraney, supt.; B. E. Rowe, mine supt.; Carl Wark, mill supt.

Inc. in Delaware. **Cap.** \$1,000,000; \$1 par.

In 1918, the revenue from gold was \$128,500; new construction, development, etc., cost \$161,042. During 1919 there was an operating loss of \$111,904, plus \$27,276 for improvements, etc. Operations were suspended, August, 1920, owing to high cost and scarcity of labor, but resumed in September, 1921.

Property: the Eagle Shawmut mine in Tuolumne county; it is the southernmost property of any of present importance on the Mother Lode.

Geology: an 18' fissure vein between amphibolite schist and slate carries quartz with free gold and 7% of sulphides.

Development: during 15 years' operation a depth of 2,300' was attained. The main entrance is now through a long crosscut adit, which meets the shaft at 1,800' from the portal. The main ore-shoot is continuous from surface to lowest level. On No. 16 level this shoot consists of a series of closely-joined or overlapping lenses of sulphide ore, 490' long, 10' wide, worth \$7.50 gold per ton. In 1917-1918, the main shaft was sunk from 1,834 to 2,243', measured from the adit, which is 2,800' long. In 1918, new openings totaled 2,133', 85% being below level No. 16. In 1919, the footage was 2,425; and 1,000' in 1920. Total workings are over 9 miles. On No. 18, the deepest level, the sulphide shoot is 400' long, and is of better grade than above. **Ore reserves:** are estimated at 429,098 tons. The cost of mining in 1919 was \$1.97 per ton.

Equipment: water and electric power, 400-h. p. hoist on the adit level, pumps, underground crushing station just above adit level, Sirocco fan of 30,000 cu. ft. capacity, 2,800-ton storage-bin, 70 stamps averaging 1,100 lb. each, Butchart tables, Dorr classifier, tube-mill, Jones-Belmont flotation cells, and 25-ton cyanide plant, capable of treating 400 tons daily.

Production: up to 1917 the total was \$4,500,000. During the broken period of 1918, there was treated 29,336 tons of ore, averaging 0.237 oz. gold per ton. The 3,229 tons of concentrate assayed 1.987 oz., a total of 6,418 oz. The recovery was 92.18%.

This mine, operated under the present efficient management and with normal conditions, should add materially to the gold output of California, and prove profitable to the stockholders.

BENDIGO MINES CO.

CALIFORNIA

Address: Vidal, Riverside county, Cal. Lester Scott, supt., at last accounts.

Property: company purchased in Jan., 1915, the Morgan and Bradley group of claims, 7 miles from Vidal. The ore is copper-gold and returns from shipment of several cars are said to be \$50 per ton.

Development: by a 150 incline shaft, with a 60' vertical winze from lower level which is claimed to have opened up a 3' vein of ore. \$75,000 said to have been taken from the small block of ground opened by the shaft. There is also a large deposit of gypsum on the property. No recent information.

BEN FRANKLIN CONSOLIDATED GOLD MNG. CO. CALIFORNIA
Idle. M. S. White, mgr., Grass Valley, Calif.

BEVERIDGE CONSOLIDATED MINES CO. CALIFORNIA
Officers: Albert J. Padian, pres.; Sydney R. Brough, sec., 518 S. Van Ness Ave., Los Angeles, Calif. **Inc.** in Arizona.

Property: 5 claims in Beveridge canyon, Inyo county, adjoins the old Keynote mine on the S.

Development: by 180' tunnel at an elevation of 7,500' on the War Eagle vein claimed to be 3' wide and to give assays of \$45 per ton. The orebody has a N. 70° E. course and dips slightly S.

No recent returns.

BIG BURSAR MINING CO. CALIFORNIA

Address: 58 Sutter St., San Francisco.

Officers: H. H. Young, v. p.; G. Gunzendorfer, sec.

Inc. 1918, in Calif. **Cap.** \$1,000,000; par \$1; issued 250,000 shares.

Property: 60 patented acres, in Ophir district, Placer county.

BIG CLIFF MINING CO. CALIFORNIA

Idle. Does not reply to letters. See Vol. XII. Mine in Salmon River district, 18 miles from Etna Mills, Siskiyou county.

BIG FIFTY MINE CALIFORNIA

Probably out of business, as it does not pay to mine antimony in America. Letters returned unclaimed in April, 1920. See Vol. XIV.

BIRCHVILLE MINING CO. CALIFORNIA

Idle. **Address:** 607 First National Bank Bldg., San Francisco.

Property: a group of patented claims, covering 320 acres, 1 mile S. E. of Graniteville, Nevada county.

BISHOP CREEK GOLD MINE CALIFORNIA

Now owned by the Wilshire Cons. Mining Co., which see.

BLACK BEAR MINING CO. CALIFORNIA

Address: F. A. Gowing, Piedmont, Calif.

Property: the Black Bear mine, at Black Bear, Siskiyou county, and near Yreka, is being rehabilitated and the old tunnels retimbered, etc. A little ore was extracted in 1920.

BLACK CANYON QUARTZ MINING CO. OF CAL. CALIFORNIA

Address: 481 Mills Bldg., San Francisco, Calif.

Officers: E. C. Kavanaugh, pres.; S. M. Aitken, sec.

Inc. 1907, in Calif. **Cap.** \$10,000; par \$100.

Property: 4 claims, containing gold ore, in Canada Hill district, Placer county, 40 miles E. of Colfax on the S. P. R. R. Developed by tunnels, shafts, etc.

BLACK HAWK MINE CALIFORNIA

Owned by D. A. Blue, Randsburg, Calif.

Property: 7 claims, in the Stringer district, near Randsburg, Kerna county. **Ore:** quartz in 6" vein, assaying \$20 per ton. Mill test of 50 tons of gravel from placer claims said to have assayed \$6 gold and 3 oz. of 60% tungsten per yd. **Developed** by 125' shaft. **Equipped** with 5-stamp mill and water power.

BLACK HAWK TUNGSTEN MINING CORP. CALIFORNIA

Office: Atolia, California.

Officers: J. F. Dodson, pres., 107½ Sixth St., Box 982, San Pedro, Calif.; P. M. Gaffev, v. p.; A. G. Sepulveda, treas.; R. H. Beaton, sec., with C. E. Fulton, J. P. Trefl, W. M. Phelps, F. D. Foote and Peter Lux, directors.

Inc. 1917, in California. **Cap.** \$200,000; \$1 par; issued 176,209. Claimed in November, 1918, to have \$10,000 in cash and no debts. Stock is listed on Los Angeles Stock Exchange.

Property: 16 claims, 200 acres, 2 claims patented, adjoins property of Atolia Mining Co., San Bernardino county. \$200,000 is said to have been spent in exploration, development and equipment.

Development: by 500' shaft with 2,000' of workings. Equipped with electric hoist and compressor. **Production:** 50 tons.

BLACK OAK MINES & MILL CO.

CALIFORNIA

Office: First National Bank Bldg., San Francisco **Mine office:** Soulsbyville, Tuolumne county, Calif. **Officers:** Chas. E. Knox, pres.-gen. mgr., Tonopah, Nev.; C. W. Hopkins, sec.; R. C. Knox, supt.; F. N. Watts, mill supt.

Inc. 1913, in South Dakota. **Cap.** \$1,000,000; \$1 par; 823,009 issued. Annual meeting in April.

Property: several claims 1 mile west of Soulsbyville. Tuolumne county.

Geology: ore is quartz, containing pyrrhotite, sphalerite, marcasite, and galena, in a vein in granodiorite. Vein has strike of N. 15° E., with dip 60° to 70° W., varying in width from 1' to 25', and has several branches coming in from the hanging-wall side. The ore occurs in lenses at the intersections of diorite dike crossings and also near faults. Diorite dikes have a strike of N. 55° E., vertical dip, and 1 to 2' in width.

Development: by a 70° incline shaft sunk in the foot-wall and levels at intervals of 100'. Lowest workings are on the 1,800' level. Two ore-shoots have been developed, one north of the shaft, 500' long, average width 4', the other south of the shaft, 300' long and average width of 20'. Ore milled averages \$20 per ton. Diamond-drilling disclosed some ore on 700' level, and new work in 1916 showed 4' of high grade ore on 1,800' level.

Equipment: 100 h. p. single-drum electric hoist, air-compressor, and pumps also a mill consisting of 20-1,250lb stamps crushing 3.5 tons per stamp per day through 10-mesh screens. Ore is crushed in 1.85% cyanide solution. Remainder of equipment includes a Dorr classifier, a 5x18' tube mill, treatment tanks, and filter. Lime is added to batteries and agitators, and 24 lb. lead oxide to the tube mill and agitators. Mill makes an extraction of 96%, consuming 1.5lb cyanide, and 3lb lime per ton of ore. Costs per ton are: Development, \$1.63; mining, \$2.22; treatment, \$1.59; general and misc., \$0.56; material in mill, \$0.96; labor in mill, \$0.62; total, \$7.59. Employs 85 men. See Mineralogist's Report, Mines & Min. Res. of Tuolumne county, p. 138.

Production: to 1921, \$1,564,000. Company, like several others, operating along the Mother Lode, is very secretive about operations, but in January, 1920, the 18th level had opened 30" of rich ore on which mill tests were to be made; and at the end of 1920, 42" of rich ore had been opened for 40' on the 19th level.

BLUE LEDGE MINE

CALIFORNIA

Office: 82 Beaver St., New York City. Mine near Hutton, Siskiyou county, Calif. Property is held by the Mexican S. & R. Company, a subsidiary of the Compania Metalurgica Mexicana. J. A. Hilbert, mgr.

Property: 27 claims, patented, about 440 acres, in the Elliott district on Upper Applegate river, 4 miles south of the Oregon line, also a large smelter site at Seattle Bar. Property located 1889, but only slightly developed until 1909. Company has spent over \$700,000 in work since that time.

Geology: the vein, with strike of N. 10° S., and almost vertical dip, slightly inclined west, traceable some 3,000' by prominent outcrops of 50 to 250' width, lies between a footwall of gray to black, slightly micaceous schist, and a hanging wall of soft white mica-schist, the wall not always being clearly defined, and with mineralization extending into the hanging-wall. Orebodies are lenticular deposits, with clay gouge, said, by several authorities, to be in huge laminations in the schist formation, but ore apparently is persistent to depth. Ore is mainly chalcopyrite, associated with a little sphalerite and occasional native copper, average value being 6% copper and \$5 gold per ton.

Development: 9 tunnels, with upwards of 2 miles of workings and nearly 7,000' of diamond-drilling

Vein averages 5' in width and the mine workings block out 110,000 tons of 6% ore with 70,000 tons more probable. Main working tunnel is connected with others, by raises to surface 500' above. A winze opens a 600' drift on ore 300' below the main tunnel. The mineralized wall-rock carries commercial value and contains lenses of high-grade ore, but above estimate refers to the quartz vein only.

Equipment: includes a hydro-electric power plant, taking water from Elliott creek under a head of about 150' at pressure of 85 lb. Buildings include an office, assay office, boarding house, dwelling and sawmill. The company has improved the townsite with waterworks, sewers and a school house, and has built a good road between Hutton and Yreka. A 40-mile railway to connect with the Southern Pacific at Medford, Ore., has been projected.

Regular shipments to the Tacoma smelter were made in 1919 and in 1920, until October when it was closed down. Construction of a new \$50,000 electric power plant postponed.

BLUE LIGHT SILVER MINES CO.

CALIFORNIA

Address: W. W. Harritt, supt., Silverado Mines, Santiago Canyon, Orange Co., Calif.

Agents: Carnahan & Clark, 501 Inv. Bldg., Los Angeles, Calif.

Inc. 1920. **Cap.** \$1,000,000.

Property: the Silverado mine, Santa Rosa district, known for 150 years. Base silver ore occurs in vein, 3' to 8' wide, between andesite and porphyry.

Development: 2,500' of crosscuts and 1,000' tunnel, with 1,500' back, blocking out several thousand tons of \$12 ore.

Equipment: 50-ton mill with K. & K. flotation, 300' Clayton compressor, 100-h. p. engine, 1,300' gravity tram, etc.

Was producing in 1920.

BLUE MONSTER MINES CO.

CALIFORNIA

Address: J. E. Nelson, mgr., 828 Story Bldg., Los Angeles, Calif.

Officers: Jas. H. Blagge, pres.; Chas. A. Cole, v. p.; J. E. Nelson, sec.; treas., with M. M. Miles and Wm. E. Whittington, directors.

Inc. in Arizona. **Cap.** \$150,000; 10c. par; 850,000 shares outstanding.

Property: 14 claims, 280 acres in Big Pine district, Inyo county. **Geology:** contact deposit containing silver-lead values in galena and carbonate ore, occurring in shoots between granite and limestone. On another claim, 18' ledge of red quartz contains \$12 per ton in gold and silver.

Development: by tunnels, 200' and 400' long, with a back of 150'. Gold ledge is opened by 100' tunnel and 20' winze. Has a 25-ton concentrator.

Production: 750 tons of ore returning about \$100,000. Property operated by leasers, 1921.

BLUE MOUNTAIN MINING CO.

CALIFORNIA

Office: 431 Security Bldg., Los Angeles, Cal.

Officers: Chas. K. Barnes, pres., mgr., White River, Cal.; H. H. Koons, v. p.; R. B. Chapman, sec.; J. F. Kent, treas.; with S. E. Yount, directors.

Inc. 1910, in California. **Cap.** \$30,000; \$1 par; assessable, 29,038 issued.

Annual meeting in July.

Gross earnings, 1916, \$37,539; operating expenses, \$15,233. Dividends paid to date, \$14,519.

Property: 9 claims, 170 acres, 5 miles N. of Woody, in the White River district, Kern county, Calif. **Ore:** is quartz, carrying gold and silver, occurring in shoots in a fissure vein in granite. Ore shoot said to be 2' wide and over 800' long, carries 2% iron and some lead and zinc. Average assay \$13.60.

Development: by 450' incline shaft with 4,000' of workings. Company claims ore reserves of 20,000 tons with 5,000 blocked out.

Equipment: includes gas hoist, compressor, pump, etc., and a 5-stamp mill to be enlarged to 20-stamps.

Was operated under bond and lease in 1919, but apparently idle during 1920.

BOBS FARM MINING CO.**CALIFORNIA**

No data for several years. Mail returned undelivered. See Vol. XIV.

BOREALIS CONSOLIDATED MINES CO.**CALIFORNIA**

Address: E. P. Stephenson, Freeman Hotel, Auburn, Calif. Controlled by J. C. Winters of New York.

Property: 69 acres, including the Eureka and Hathaway mines, in Ophir district, 4 miles W. of Auburn, Placer county, Calif. Two gold veins, 2' and 3' wide, occur in granodiorite. The Eureka ore is said to average \$10 per ton.

Development: by 280' shaft, 837' tunnel and 4,500' of drifts. Company estimated reserves of the Eureka mine to be 17,000 tons of \$12 ore in 1915.

Equipment: hoist, compressor, 2 roller quartz mills, tables, etc.

Concentrates were being sent to smelter in 1915. The Hathaway was unwounded early in 1917. No later information.

BRANDY CITY MINES CO.**CALIFORNIA**

Address: Chas. Allenberg, c/o E. L. Goldstein Co., owners, 333 Kearney St., San Francisco.

Property: 1,000 acres of placer locations, covering 2½ miles of gravel deposits, at Brandy City, 30 miles N. of Nevada City, Sierra county. From 1883 to 1890, mine was worked on a large scale; it was then idle for 17 years until reopened in 1907. The gravel is 200' deep and up to 800' wide, with 40' of lava capping.

Equipment: consists of a hydraulic plant capable of handling 2,000 cu. yd. daily.

BROOKLYN MINING CO.**CALIFORNIA**

Address: Box 2, Highland, Calif. Listed in Vol. XIII.

BROWN BEAR MINING CO.**CALIFORNIA**

Address: Redding, Shasta Co., or Deadwood, Trinity Co., Cal. Thos. McDonald, pres.; B. McDonald, supt.

Property: 586 acres of mineral land, 200 patented, and 671 acres of timber land, includes the Brown Bear mine, on north side of Deadwood Gulch at Deadwood, discovered in 1875, and worked ever since. The property is a consolidation of several mines and as a whole has been the largest producer in the Weaverville Quadrangle and most famous mine in Trinity county. It is credited with a production of \$7,000,000 to \$10,000,000.

Geology: 2 main veins, the Monte Cristo and the Last Chance 200' apart, lie in slate, but cut soda granite porphyry. Veins are parallel, and strike N. 80° E. The Monte Cristo dips steeply to the north; the Last Chance dips south 60° to 80°. Width is not over 2', more commonly about 6', but stopes have been mined to a width of 22'. Ore-shoots are several hundred feet in length; those of the Last Chance vein pitch at a flat angle to the East. Quartz contains pyrite, galena, sphalerite and arsenopyrite. Pyrite being the most common, rich ore is usually found, where galena and sphalerite are present. The ore runs between \$20 and \$50.

Development: 7 crosscut tunnels ranging in length from 100 to 2,400', the lowest being 1,080' below the outcrop. Workings total several miles.

Equipment: includes a 10-stamp mill, 2 Wilfley tables and water power obtained from Deadwood Creek through a 3-mile ditch.

Lessees have been working the mine.

BRUNSWICK CONSOLIDATED GOLD MINING CO. CALIFORNIA

Offices: 519 California St., San Francisco; Grass Valley, Nevada Co., Cal.; 74 Cortland St., New York.

Officers: P. C. Oscanyan, pres.; R. Chester Turner, v. p.-gen., mgr; J. C. Nilon, sec.-treas., with J. A. Beckwith, and C. H. Mallen, supt., directors, P. J. Burke, asst. sec.-asst. treas.

Inc: Jan. 11, 1890. **Cap.** \$500,000; \$1 par; 395,287 shares issued. P. J. Burke, 74 Cortland St., New York, transfer agent; Metropolitan Trust Co., New York, registrar. Listed on San Francisco Exchange.

Dividends: in 1906, 3c.; in 1913, 6c.; in 1914, 24c.; in 1915, 18c. per share; none since. Total dividends to date, 51c. or \$203,314, total assessments, \$1.22 per share.

Property: 27 acres, 2 miles E. of Grass Valley, has gold quartz veins in schist. Also, 320 acres of ranch land.

Development: by incline shaft to 1,100' level, and by 1,347' vertical shaft. Underground work in 1917 totaled 1,896' against 2,185' in 1916. **Ore reserves:** were estimated at 10,000 tons Jan. 24, 1918.

Equipment: includes electric power, hoist, compressor, crusher, 20 stamps, tables, and suitable buildings.

Production:

	Tons	Costs Per Ton			Value Ore %		Bullion Prod.	
		Mng.	Flg.	Total	p. t.	Ext.	Oz. Au.	Oz. Ag.
1917.....	30,805	\$4.32	\$0.91	\$6.26	6.55	90.5		
1916.....	34,091	3.87	0.83	5.90	6.44	89.5	7,998	1,856
1915.....	22,004	4.97	0.84	8.59	11.11	90.8	9,486	2,069
1914.....	16,237	6.05	.93	10.22	93.9	12,992	2,622

Mine was closed in June, 1918, on account of abnormal conditions.

BUCHINO MINING CO.

CALIFORNIA

Address: 709 Balboa Bldg., San Francisco, Calif.

Officers: J. H. Dockweiler, pres.; C. A. Clinton, v. p.; Harold E. Haven, sec.; Val Franz, treas.

Inc. 1908, in Calif. **Cap.** \$250,000; \$1 par.

Property: a gold mine in Monterey county, Calif. Idle, 1919.

BUCKEYE MINING CO. OF CALIFORNIA

CALIFORNIA

Office: E. S. Suffern, pres., 135 Broadway, New York.

Mine closed on account of market conditions. See Volume XIV.

Negotiating for new properties, 1921.

BULLION HILL MINING CO.

CALIFORNIA

Address: W. O. Crosby, or W. J. England, Washington mine, near Angels Camp, Calif.

Property: the Washington mine, near French Gulch, Shasta county. New owners remodelled 5-stamp mill in 1921, and planned deepening work of \$400,000.

Mine, operated 1920-21 by G. E. C. Rousseau, has a reported production below the 180', or bottom level.

BULLY CAVE CO.

CALIFORNIA

Address: c/o Hatch & Clute, 524 Fifth Ave., New York. Mine at Winthrop, Shasta Co., Cal.

Officers: E. S. Hatch, pres.; Vincent P. Donihee, v. p.; Frank M. Clute, treas. also, directors; Frank F. Gearns, sec.; E. J. McLaggan, supt. **Cap.** \$5,000.

Property: the Phoenix group, a large low-grade mine. Claims show two mineralized shear zones 40 to 300' wide, with clay gouge walls and "ore channels" of high-grade, 1½' to 6' wide. The ore carries iron pyrite with chalcopyrite and zinc sulphide.

Development: by Hawkeye tunnel, 1,050' with 74 and 150' drifts; Ydalpom II tunnel, 1,115' and 3 drifts; North Star tunnel, 1,050' and 2 drifts; Recorder 1,600' drift and winze; Recorder II, 400' tunnel; Ydalpom I, 150' tunnel.

Equipment: includes all necessary machinery, houses, etc. Company also owns a gold mine at Cave Creek, Maricopa county, Ariz.

Nothing new is known of either property.

BULLY HILL COPPER MINING & SMELTING CO. CALIFORNIA

Fully described in Volume XIV. Property acquired by Bully Hill Mines, Inc. and transferred in 1920 to Shasta Zinc & Copper Co., q. v.

BULLY HILL MINES INC.

CALIFORNIA

Succeeded by Shasta Zinc & Copper Co., which see.

BUNKER HILL CONS. MINING CO.**CALIFORNIA**

Office: Humboldt Sav. Bank Bldg., San Francisco. **Mine office:** Amador City, Amador county, Cal.

Directors: N. W. Hyler, O. D. Rohlfs, H. A. McQueen, T. G. Negrich, and John Endey. Robt. Christensen, supt.

Inc. 1907. **Cap.** \$200,000; \$1 par. The mine has paid dividends for several years; in first half of 1915 six monthly dividends were paid, totaling \$30,000. Assessments were levied in 1920. Shares sold up to 78c., with normal of 20c. in stock flurry, April, 1921.

Property: the Bunker Hill mine, 3 claims on the Mother Lode, 1½ miles N. of Amador City.

Geology: gold ore occurs in the Bunker Hill vein, which strikes N. 25° W., dip 58° E., with average width of 6'. From surface to 200' level the vein occurs on the contact between Mariposa slate on the west and metadiabase on the east; from the 200' to the 1,400' level the vein is in slate; from the 1,500' to the 2,400' level the vein has a greenstone footwall and slate hanging-wall. Ore occurs in the form of lenses, the schist being cut by numerous stringers of quartz; the rock is highly impregnated with pyrite, as high as 4 to 5%. The gray orebody has been developed on the 1,400', 1,500', 1,750' and 1,950' levels. Three oreshoots have been developed on the property; the north and south shoots on the Bunker Hill vein have an average length of 500', average width of 6', while the gray orebody is 600' long, average width of 15'.

Development: by double-compartment 2,800' shaft, sunk on an incline of 58°. On the 2,400' level the distance from the shaft to the Bunker Hill vein is 280'. In 1920 a 500' winze was sunk at a point 1,040' N. of the shaft, but the ore developed averaged only \$3 per ton. A raise opened ore early in 1920.

Equipment: includes a double-drum hoist, driven by a 300-h. p. motor, compressor, driven by 100-h. p. motor, pumps, a 40-stamp mill and a cyanide plant. Ore is hoisted in 2½-ton skips, and is crushed by a Knight crusher, before being trammed 550' to the mill. Stamps, weighing 1,150 lbs. each, drop 6½", 96 drops per min., crush 5 tons per stamp daily through No. 4 punched screen. Pulp flows over double-compartment amalgamating plates to 24 6' Frue vanners; tailings from the vanners go to the cyanide plant, owned by lessees, where sands are treated in eight 100-ton leaching vats, treatment taking 8 days. Concentrates are first agitated with lime in Pachuca tanks, 50 lbs. lime for 11 tons ore, then agitated 8 hours with strong cyanide solution; treatment lasting 3 to 4 days.

Mill tailing runs 99c. per ton; a 45% extraction is made. Tailing is treated on a royalty basis by W. E. Darrow, V. R. Fitzsimmons and others of Sutter Creek. The Bunker Hill company normally employed 155 men. See U. S. G. S. Folio 63.

In the first six months of 1915, 42,087 tons of ore were mined and milled, producing \$151,591, an average value of \$3.60 per ton; aggregate total expenses, \$109,792. No profit has been made for several years as costs have been over \$4 per ton.

On November 5, 1920 dissatisfied shareholders met at the mine to discuss the situation and elected the new board of directors, but the old one refused to relinquish the property. Operations in 1920 were much curtailed.

CACTUS CONSOLIDATED MINING CO.**CALIFORNIA**

Probably dead. No information for years. See Volume XIV.

CALAVADA COPPER CO.**CALIFORNIA**

See Calavada Copper Co., Nevada.

CALAVERAS CONSOLIDATED SYNDICATE**CALIFORNIA**

Absorbed by Carson Hill Gold Mines, Inc., which see.

CALAVERAS COPPER CO.**CALIFORNIA**

Office: 94 Ames Bldg., Boston, Mass. **Mine address:** S. M. Levy, mgr., Box 18, Copperopolis, Calaveras Co., Cal.

Officers: Chas. M. Hayden, pres.; Herbert Goff, sec.-treas.; with Oliver Ames, F. Lothrop Ames, Samuel Carr, Gilmer Clapp, J. E. Manter, John S. Ames, and Ross F. Roberston, directors.

Inc. Aug. 31, 1909, in Del. Cap. reduced 1910 from \$5,000,000 to \$2,500,000 common shares; \$5 par; issued \$1,868,750; \$300,000 preferred shares \$5 par, none issued.

Bonds: (first mortgage, 6%) principal amount \$450,000; interest accrued to Dec. 31, 1915, \$147,510; under refinancing plan adopted January, 1916, this indebtedness was extended so as to fall due in nine equal installments, beginning Jan. 1, 1920, viz., \$50,000 of principal and \$16,390 of said accrued interest each year; each of said payments bearing interest at 6% from Jan. 1, 1916. Under the same plan \$99,000 face value of debenture notes were issued, payable at the rate of \$5,000 per month, beginning March 1, 1918. Of these notes \$55,000 have already been paid. All the bonds are held by the Ames Estate of Boston, which formerly owned the property. State Street Trust Co., of Boston, registrar; Federal Trust Co., Boston, transfer agent. Stock is listed on the Boston Curb. Annual meeting, 2nd Monday in February.

Property: 2,833 acres at Campo Seco, including the Union, Keystone and Empire mines, and also including ranch and water power lands, bought Aug. 31, 1909, of Union Copper Mining Co., 16 miles from Milton, the nearest rail point on the Southern Pacific. Mines opened 1861, were worked intermittently until 1907.

Geology: ore consists of fairly massive chalcopyrite in a gangue of dense slate, the ore running 1.6 to 2.5% copper. The rock is a schistose basic igneous rock whose general strike is N. 30° W. The dip is 65° northeasterly. This is traversed by a shear zone about 125' wide. The claims cover approximately 19,000' along the strike of this shear zone, in which the ore occurs as lenticular bodies.

Development: the strike of the vein is proven for about 8,000' The principal development is at the Union and Keystone mines.

Equipment: includes a 400 to 500-ton concentrator, smelter with blast and reverberatory furnaces and electric power; a 1,000-h. p. steam plant at the Union mine, with 3 hoists, 15-drill and 5-drill air compressors The company owns about 60 buildings, including office buildings, boarding houses, bunk houses, 3 ware-houses, machine shop, smithy, 3 barns, and about 40 dwellings.

The 600-ton mill equipped with three ball-mills is operating with oil flotation, and is connected with the mines by a 4,000' electric tram.

Smelter: fully described by E. H. Robie, E. & M. Journal, June 11, 1920, has 2 McDougall calciners, a 200-ton blast-furnace and a 150-ton reverberatory furnace. The converter has 2 Allis-Chalmers stands. Smelter fuel was petroleum and coke.

In 1920, the blast furnace and concentrator were in commission until Dec. 15.; ore production ceased on Sept. 30, when fire destroyed the mine plant of the Union shaft. Development continues.

CALAVERAS MINING & MILLING CO. CALIFORNIA

Address: Mitchell Mill, Calaveras county, Calif.

Property: Black Wonder mine, at Mitchell Mill, reopened in 1919 and equipped with air compressor, jaw crusher, Gibson mill, small concentrator hoist, boiler and pump.

In 1920, was mainly developing but made a small output.

CALIFORNIA CARIBOO GOLD DREDGING CO. CALIFORNIA

Address: Daly & Daly, 1st. Natl. Bank Bldg., Long Beach, Calif.

Inc. 1920. Cap. \$1,000,000.

CALIFORNIA CHROME CO. CALIFORNIA

Office address: J. B. Hubbard, v. p.-mgr.; Kohl Bldg., San Francisco.

Officers: E. F. Price, pres. (30 E. 42nd St., New York); Geo. H. Lindsay, asst. sec.

Inc. 1915. Cap. \$100,000.

Property: 14 claims in Glenn county and the Little Castle Creek (Brown) mine on the Shasta-Siskiyou county line, shows lenses of chromite. The latter is one of the most important chromite deposits discovered in the U. S. In 1918, company also operated in Del Norte county, California, and in Josephine county, Oregon. Not operating 1920-21.

CALIFORNIA EAGLE BIRD MINING CO

CALIFORNIA

H. S. Mourning, pres.-mgr., at last account.

Property: 3 patented claims and 2 locations, 120 acres, and 160 acres of timber land, 6 miles E. of Washington, Nevada county.

Development: by 850' incline, 950' adit, with levels driven up to 800' S. and 300' N.

Equipment: water-power, 10 stamp mill, etc. The surface plant was burned in 1914, and new machinery was erected late in 1915. Idle several years.

CALIFORNIA ERIE CO.

CALIFORNIA

Address: E. L. S. Wrampelmeier, pres.-mgr., 90 Nineteenth St., Wheeling, W. Va.

Property: 13 claims and 6 millsites, 320 acres, in the Gaston district, 3 miles S. of Graniteville, Nevada county, contains 2 parallel veins in slate. The Erie main ore shoot is 400' long and 12' wide; the Dublin Bay shoots, 70' and 100', and 12 to 15' wide. Ore above 200' level averages \$8 per ton.

Development: by 2,000' adit, with a total of 14,000' of workings.

Equipment: water-power, 2 compressors of 650 cu. ft. total capacity, shops; twenty 1,300-lb. stamps, tables, buildings, etc.

Production: \$500,000 to 1915. Costs in that year were \$5 per ton. Presumably idle.

CALIFORNIA EXPLORATION CO., LTD.

CALIFORNIA

Address: F. A. Crew, sec., 20 Copthall Ave., London, E. C., England, or 1022 Crocker Bldg., San Francisco, Calif.

Inc. Dec., 1911. Cap. £120,000; 10s. par; 231,617 shares issued.

Financial statement for fiscal year ending Sept. 20, 1920 shows an operating profit of £2,519; cash, £9,093; accounts receivable, £552; accounts payable, £302; investments, £109,461. **Dividends:** 5% in 1916; 10% in 1917, 1918 and 1919.

Company is a holding corporation owning 127,000 shares of Plymouth Cons. Gold Mines, Ltd., of Calif., also an interest in Tolgus Mines, Ltd., and Tehidy Minerals, Ltd. of Cornwall. In 1913, the holdings of the Northern Ontario Exploration Co., Ltd. were acquired and stock exchanged on a basis of 3 Calif. Ex. for 2 Northern Ontario shares. The Plymouth mine was reopened in 1911 and transferred to the Plymouth Cons. Gold Mines, Ltd. in 1914.

CALIFORNIA GOLD & COPPER CO.

CALIFORNIA

Last Address: Mart. Rourke, agent, Malad City, Idaho.

Property: the California mine, 6 claims, in the Spenceville district of Nevada county. A 4' vein in diorite, shows bornite and chalcopryrite; the ore is said to average 6% copper, with some gold and silver.

Development: by the 1,000' California tunnel, also short tunnels and shafts in the Jackson and Sixteen to One.

CALIFORNIA GOLD MINING & DEV. CO.

CALIFORNIA

Probably dead. **Last address:** 147 Prospect Ave., San Francisco. O. A. Ellis, sec. See Vol. XIV.

CALIF. & MASS. COPPER MINES CO.

CALIFORNIA

Inactive. Described Vol. VIII. Property at Red Bluff, Tehama county, Cal., is leased for 99 years to Chicago Copper Refining Co., which see.

CALIFORNIA MINING CO.

CALIFORNIA

Controlled by King C. Gillette, Beverly Hills, Calif.

Property: in Rough & Ready district, near Grass Valley, Nevada county.

CALIFORNIA PLACER MINES CO.**CALIFORNIA**

Out of business. Company had a lease up to 1920 on the You Bet M. Co.'s property, in Nevada county.

CALIFORNIA RAND SILVER, INC.**CALIFORNIA**

Formerly the Rand Divide Mining Co.

Address: Bin 14, Bakersfield, Calif.

Officers: Alfred Carrell, pres.; Dwight L. Clarke, sec.; J. W. Jameson, gen. mgr., Randsburg, Calif. J. M. Fox, supt.

Inc. Aug., 1919, in California. Cap. \$1,280,000; \$1 par; all issued.

Dividends: for 2 years to Sept. 1. 1921, total \$992,000; No. 20 was \$25,000, leaving a surplus of \$314,000.

Property: 200 acres, in process of patent, includes the Kelly silver mine, 1½ miles from Randsburg, San Bernardino county. Ore occurs in an 18' shoot, which widens to 15', averaging 150 oz. silver and considerable gold per ton. Parts of the claims are leased on royalty. The ninth level shows shipping ore for 342'.

Development: by incline, 730' deep. Lateral work at end of 1920, totaled 7,000' of which 4,500' was driven in that year. A new vertical shaft was down 395', September, 1921. Reserves valued at \$2,000,000. A 100-ton flotation plant is under construction.

Production: 3,648 tons in August, 1921, of which 1,465 tons went to the Selby smelter.

Mine is a bonanza property.

CALIFORNIA SYNDICATE, THE**CALIFORNIA**

Dead. Was a successor to Golden Gate Exploration Co., and was itself succeeded, apparently within a month, by the Montacali Mines Syndicate, which see.

Reported that California Syndicate was capitalized for 150,000 shares of no par value, 35,000 fully paid to be distributed among Golden Gate stockholders and 65,000 to be underwritten at \$4.50 each.

CALIFORNIA TREADWELL GOLD MINING CO.**CALIFORNIA**

Company disbanded. See Vol. XIV.

CALIFORNIA TUNGSTEN MINING CO.**CALIFORNIA**

Address: R. C. Cortner, 670 Pacific Electric Bldg., Los Angeles, Calif. Inc. 1920, in California. Cap. \$100,000.

CALUMET & CALIFORNIA MINING CO.**CALIFORNIA**

Dead. See Mines Handbook. Vol. XIII. for description.

CANYON MINES CORPORATION**CALIFORNIA**

Address: F. B. Keever, Sutter Hotel, San Francisco, Calif.

CARSON HILL GOLD MINES, INC.**CALIFORNIA**

Succeeded by Carson Hill Gold Mining Co., which see.

CARSON HILL GOLD MINING CO.**CALIFORNIA**

General office: 614 Crocker Bldg., San Francisco, Calif. Boston office: 55 Congress St. Mine office: A. D. Stevenot, supt., Melones, Calif.

Officers: W. J. Loring, pres.-gen. mgr.; H. L. Smith, v. p.; with Edw. A. Clark, Wm. H. Coolidge and Wm. A. Ogg, directors, F. W. Batchelder, sec.-treas.; M. A. Donovan, asst. sec.-asst. treas.

Inc. Feb. 7, 1919, in Maine. Cap. \$250,000; \$1 par; issued 199,999.71 for \$699,999 capital stock of its subsidiary, the Carson Hill Gold Mines, Inc. Of the unissued stock, \$18,000 is reserved for conversion of company's gold notes. Bankers Trust Co., New York, and First Natl. Bank of Boston, transfer agents; Chase National Bank, New York, and National Shawmut Bank, Boston, registrars. Listed on Boston and New York stock exchanges.

Gold Notes: \$309,600, four year 7% gold notes outstanding, due Oct. 15, 1923, being an unredeemed balance of \$450,000 issue. Convertible into stock at \$25 per share.

Net operative earnings for year ended Dec. 31, 1920, from Morgan mine were, \$558,447; sundry income, \$2,402; total earnings, \$560,850; less development of Calaveras and Adelaide mines, \$47,507, and less deprecia-

tion, taxes, interest, underwriting, etc., \$248,202; reducing net profit to \$265,541.

Balance sheet for 1920 shows assets: property, \$2,767,986; sinking fund, \$2,177; current, \$145,238; deferred charges, \$19,580. Liabilities include current, \$176,175; deferred payments, \$22,500; reserves, \$532,614; special surplus, \$625,661; earned surplus, \$568,416.

For first 8 months in 1921, mine earnings were \$229,481 and net, \$120,024. Current liabilities over assets were, \$16,181.

Property: the Calaveras and Morgan mines, 500 acres in Carson Hill district, Calaveras county. In 1921 company acquired a lease on the Melones mine.

Development: by 10,000' of underground workings. On 1,600' level ore is 8' to 35' wide and stoped for 375'. Ore developed and probable, Dec. 31, 1919, 215,233 tons high grade, and 445,733 total. Reserves increased 1920. Stopping 1921 on new 1,650' level yielded 500 tons daily of \$9 to \$14 ore. The main orebody has been followed to the 1,750' level.

Officially reported, September, 1921, that actual and probable ore reserves are 1,100,000 tons, averaging \$7 per ton.

Equipment: 30-stamp mill with concentrator and cyanide plant, and full mining equipment.

Production: 111,662 tons mined and milled in 1920, yielding \$1,120,030, or \$10.03 per ton; a recovery equal to 90.13%.

Is a splendid and well managed property.

CARSON QUICKSILVER CO.

CALIFORNIA

Office: 4061 Dupont Bldg., Wilmington, Del. **Mine address:** Ellard W. Carson, mgr., Cambria, Calif. C. D. Richardson, supt., Klau, Calif.

Officers: G. B. Street, pres.; C. V. Ferriday, v. p.; C. Underwood, sec-treas., with F. S. MacGregor, directors; all of Wilmington, Del.

Inc. Jan., 1920, in Del. Cap. \$200,000; \$10 par. Annual meeting, Jan. 11th.

Property: the Klau mine, 7 claims, 5 patented, 102 acres at Klau, San Luis Obispo county, shows fissure veins of quicksilver ore.

Development: 3,239' of workings in 3 tunnels, longest 1,000' with a 280' back.

Equipment: 20 h. p. gasoline engine and 50-ton Scott furnace. Output, 15,000 flasks to end of 1919. Development only done in 1920; shut down in November, awaiting better market for quicksilver.

CENTRAL CONSOLIDATED MINES CO.

CALIFORNIA

Merged 1921 with Norambagua Mines, Inc., to form **Banner Cons. Mines Co.**, which see.

Address: 1004 First Natl. Bank Bldg., San Francisco. W. J. Webster, pres., c/o Atlas Powder Co., Wilmington, Del.; D. C. Norcross, sec., Newell Bldg., San Francisco, Calif.

J. M. Nicol, gen. mgr.; Paul W. Smith, supt., Grass Valley, Nevada Co., Cal.

Inc. in Calif. Cap. \$300,000; 20c. par; 150,000 shares issued.

CENTRAL EUREKA MINING CO.

CALIFORNIA

Offices: 519 California St., San Francisco, and Sutter Creek, Amador county, Cal.

Officers: W. P. Henry, pres.; I. N. Rosecranz, v. p.; J. Stadtfeld, sec-treas., with G. W. Ebner, F. L. Wolfe, and H. G. Dodds, directors. Albion S. Howe, supt.; H. Warrington, asst. supt.

Inc. in California. Cap. 400,000 assessable shares. A total of 38 assessments called to July, 1919, when one of 3 cents was levied. Annual meeting fourth Tuesday in April.

Bullion and concentrate account for year ended April 28, 1921, was \$424,068; balance in treasury \$15,962. Dividends \$94,227. Cash surplus on that date was \$118,218.

Dividends: \$926,323 from 1901 to 1908; 2c per share in Feb., 1915, and No. 67, of 3c., on Dec. 16, 1919; 32 cents equal to \$125,000 in 1920. The total is 77 dividends to end of 1920 or \$1,063,728. The monthly rate is 3 cents, or 17% on the 1921 price of \$1.35 per share.

Property: at Sutter Creek, Amador county, adjoining the South Eureka on the north shows 3 parallel veins which have been developed. The veins are in the form of stringers, with strike N. 20° W., dip 55° to 70° E., and an average width of 6'. The east vein is 20' from the west vein, while the hanging-wall vein is 200' east of the west vein. East and west veins have slate walls; hanging-wall vein has a slate footwall and greenstone hanging-wall. Two series of ore-shoots have been developed, the north shoots being 60', the south shoots 200' long.

Development: by 4194' 3-compartment shaft, sunk on 57° incline. Shaft cuts the hanging-wall vein on the 500' level and is sunk on the hanging-wall side to the 1,900' level, at which point it is deflected to the west and passes into a slate formation. Below 3,425' the shaft is in greenstone. In May, 1918, there was not enough ore blocked out to supply 20 stamps for two weeks. Added to this, the company had to keep water down as the South Eureka had stopped work. Sinking was continued, and by August, 1919, the shaft was 3,720' deep. A winze below 3,500' opened good ore, while a good shoot was developed at 3,700' and reserves are now sufficient to keep the full plant in operation. On the 3,900' level the ore shoot was 330' long, 4½ wide, assaying from \$11.40 to \$28 per ton. The 2,700 and 3,600' levels also show good ore. Development during 1921, totaled 2,073'.

Equipment: a new transformer house, hoist building and new machinery installed 1921. The Mill has 40 stamps, vanners, and is complete in every way and running to capacity, Nov. 1921.

Production: for 1921, 37,856 tons of \$11.004 ore net extraction; 34,705 tons of \$13.15 ore during year ended April 1, 1920; total to that date was about \$3,733,000.

CENTRAL SOUTH YUBA COPPER MINE CALIFORNIA

Described in Vol. XIV. Property sold in 1915 to Queen Regent Merger Mines Co., which see.

CERISE GOLD MINING CO. CALIFORNIA

Office: Wilbur Springs, Colusa county, Calif.; Chas. L. Austin, gen. mgr. and supt.

Property: in Sulphur Creek, Colusa county, Calif. Company organized to carry on a general mining and milling business.

The 100-ton gold mill was burned down Sept., 1917.

CERRO GORDO MINES CO. CALIFORNIA

Mine address: Keeler, Inyo county, Calif.

Office: Room 222, Bank of San Jose Bldg., San Jose, Calif.

Officers: F. J. Hambly, pres.; J. E. Richards, v. p.; A. L. Dornberg, sec.-treas.; F. C. Ross, asst. treas.; with W. A. M. Van Bokkelen, directors. G. C. Warren, Jr., asst. sec.

Inc. July 16, 1914, in Arizona. **Cap.** \$1,000,000; \$1 par; all issued. 10,500 shares sold for \$110 the lot at public auction in New York on Dec. 16, 1920. Guaranty Trust Co., New York, registrar and transfer agent.

Income for 1920 was \$9,741 and expenses, \$32,978, or \$53,508, including depreciation and depletion, with total deficit of \$263,706. This compares with income for 1919 of \$19,070, operations, \$71,139, plus \$34,745 for depreciation and depletion, a total of \$86,814. The previous deficit was \$123,383, making \$210,198 at end of 1919. Net current assests totaled \$82,000. Revenue in 1918 was \$183,489, and in 1917, \$487,177.

Dividends: 2½c. in 1916; 22½c. in 1917; 7½c. in 1918; none since.

Property: the Cerro Gordo mines, 46 claims, 8 miles from Keeler, including the Union mine on Cerro Gordo hill and a water power on Lone Pine creek, Inyo county, formerly belonged to the Four Metals Sm. & Mng. Co.

The Union mine is an antigua worked by Mexicans in early days and opened to a depth of 1,200'. The principal ores produced are silver-lead, mostly carbonates, but with some lead sulphide; also zinc carbonate. The zinc ore occurs from the surface to the 900' level, and the silver-lead ore from the surface to the 1,150' level. Ores also contain gold and copper values. See U. S. G. S. Bull. 540, pp. 97-105.

Development: by the 900' Belshaw shaft, with a winze to the 1,150' level, and tunnels. The Troeger tunnel is now in over 6,000' and cuts the vein system 1,200' below the workings of the Union mine. Underground workings are said to aggregate 20 miles. New work in 1918 amounted to 4,603'; orebody was cut off by a fault above the 900' level and 500' of exploration has thus far failed to find it. In 1919, 1,400' of work was accomplished.

Equipment: includes a 75-ton mill with table and flotation plant; 100 h. p. electric hoist; compressor, capacity 1,200 cu. ft. free air per min., driven by a 150-h. p. constant speed motor. The former steam plant is intact and consists of 70-h. p. steam hoist, 350 cu. ft. compressor and 130-h. p. boiler. Electric power, voltage 400, is obtained from the Southern Sierras Power Co.

Production: Ore produced in 1916 reported as 1,497 tons lead-silver ore, net value, \$44,723 per ton; 11,265 of zinc ore, \$23,759; 27 tons of copper ore, \$17,722 per ton, and 9,431 tons slag valued at \$40,383. Net cost of all ore mined was given as \$11.08, giving a net profit of \$17.64 per ton. In 1917, production was 6,088 tons lead-silver ore, net value \$45,665 per ton; 5,417 tons of zinc ore, \$20,384; 14,034 tons of slag, net value \$7,558 per ton. Net cost of all ore mined was \$15.026. Production in 1918 was 619 tons zinc ore, 24.3 to 40.1% zinc; 2,166 tons lead-silver ore, 23.1 oz. silver, 21.4% lead; 9,389 tons slag, 2.9 oz. silver, 12.3% lead. In 1919 the output was 357 tons of \$26.21 lead-silver ore, 167 tons of \$12.45 zinc ore, and 159 tons of \$3.92 slag, a total of \$12,061. In 1920, production was 171 tons of silver-lead ore and 66 tons from lessees operations.

The mine was closed down in April, 1920.

CHEMUNG MINING CO.

CALIFORNIA

Succeeded Kibble-Cooke Leasing (or Mining) Co., 1920.

Address: Alex McRae, Reno National Bank, Reno, Nevada. Tom McNamara, supt.

Has a lease on mine of Masonic Mines Association, at Masonic, Mono county, Calif., near Nevada line.

This mine has the largest production of the county for 1920. Erection of a mill is planned.

CHICAGO COPPER REFINING CO.

CALIFORNIA

Dead. See Vol. XIII of this work for description of company.

CHIPPS CREEK MINING CO.

CALIFORNIA

Address: Letson Balliet, Tonopah, Nev.

This is a private unincorporated company, driving a 1,300' tunnel in order to drain and work an ancient river channel about 6 miles S. of Belden, Plumas county, consisting of 500 acres. In May, 1920, it was said that the pay streak had been found, yielding \$8 gold per cu. yd.

CHRISTINA COPPER CO.

CALIFORNIA

Address: F. C. Fox, supt., Placerville, Cal.

Owens Seven Bells mine, an old copper producer.

CITY OF SIX MINING CO.

CALIFORNIA

G. W. Henderson, pres.; A. E. Hodgkinson, sec.

Inc. in Calif. Cap. \$75,000; \$1 par; all issued.

Property: at Downieville, Sierra county, Calif. **Development:** by shaft and 1,300' tunnel.

CLIO VINDICATOR MINES, INC.

CALIFORNIA

Address: Herman Houter, mgr., 244 Plymouth Bldg., Minneapolis, Minn. George L. Holmes, actg. mgr., Jacksonville, Calif.

Officers: J. P. Broman, pres.; H. Houter, v. p.; Geo. I. Gorham, sec.-treas.

Inc. in Maine. Cap. \$1,000,000; par \$1; 400,000 issued. **Income 1920** from ore sales, \$1,200. **Expenses,** \$40,000.

Property: 6 claims, 2 patented, 65 acres, on Mother Lode at Jacksonville, Tuolumne county, shows gold ore with molybdenum and nickel, averaging \$6 per ton.

Development: by 600' incline and tunnel. Ore mined by glory hole and shrinkage stoping. Reserves said to be 250,000 tons.

Equipment: 10-stamp mill, 75-h. p. compressor, electric power, etc. Plan new shaft and 250-ton mill, 1921-22.

Operated throughout 1920.

CLIPPER MOUNTAIN GOLD MINING CO. CALIFORNIA

Office: 600-1 Hellman Bldg., Los Angeles, Cal.

Officers: B. J. Doak, pres.; E. Petersen, sec.; preceding with A. H. Hayes, C. J. Gardner and J. C. Meadows, directors.

Inc. Sept. 12, 1916, in California. Cap. \$100,000; 10c. par; 625,646 shares outstanding.

Property: 4 claims, 80 acres, in Clipper Mtns., near Danby, San Bernardino county. A 50' dike is said to traverse the property. In 1918, a two-compartment shaft had been sunk to the 300' level and crosscutting started, but no further information is available.

Equipment: includes 32 h. p. engine, hoist, compressor, pump, etc.

Property reopened 1920 by the Gold Reef Cons. Mng. Co., financed by Tom Reed Mining Co. of Arizona.

COAST RANGE DIVIDE MNG. CO. CALIFORNIA

Address: P. O. Box 184, Coyote, Calif.

Officers: Henry Peters, pres.; Frank Anderson, sec.

Inc. 1919, in Calif. Cap. \$500,000; \$1 par.

Property: a 5-year lease on 1,000 acres near Coyote, Santa Clara county. Developing at last account.

COCOPAH COPPER CO. CALIFORNIA

Idle. No recent information.

Address: 1117 Trust & Savings Bldg., Los Angeles, Calif. See Vol.

XIII.

COFFEE CREEK GOLD MINING CO. CALIFORNIA

Address: C. T. Kerr, mgr., Redding, Calif.

Officers. C. T. Kerr, pres.-treas.; W. A. Crank, v. p.; L. J. Kennedy, sec.

Inc. June 2, 1921, in Calif. Cap. \$600,000; \$1 par.

Property: the Golden Jubilee mine, 14 claims, in Coffee Creek district, Trinity county, with a 4' fissure vein in granite, that carries gold tellurides, the ore averaging \$16.25 per ton.

Development: by 5,000' tunnel with back of 800' and overhead stopes.

Equipment: includes a 75-ton amalgamation and cyanide mill.

COGGINS MINE CALIFORNIA

Address: Arthur L. Coggins, Dunsmuir, Ore.

Property: in Siskiyou county, Calif., near the California Chrome mine, 3 miles S. W. of Dunsmuir, shows massive and disseminated chromite deposits in peridotite developed by open cuts; shipments carry 40% chromic acid. Workings connected with railroad by aerial tram. Was producing in 1920.

COLMA COPPER CO. CALIFORNIA

Address: Redding, Shasta Co., Calif.

Company started development work March, 1920, to extend the tunnel of the Uncle Sam mine to 5,000' in length, 600' below the orebodies of the Mammoth mine, Kennett district, Shasta county. This will take over two years work and will crosscut the veins of four claims.

COLUMBIA CHANNEL MINING CO. CALIFORNIA

Address: W. E. Sharon, pres., Palace Hotel, San Francisco. J. M. Harper, mgr.

Property: over 1,000 acres of patented ground, covering 5 miles of ancient channel, 7 miles E. of Forest City, Sierra county. The gravel lies on slate and porphyry, and has a lava capping. It is 4 to 5' deep and 600' wide.

Development: by 3,500' tunnel and 1,500' of workings.

COLUMBIA CONSOLIDATED MINES CO. CALIFORNIA

Office: 485 California St., San Francisco, Calif.

Inc. 1915, in Calif. Cap. \$50,000; \$5 par.

Property: 4 patented claims, 80 acres, 2½ miles E. of Washington, Nevada county. There are 4 veins in slate and quartzite, from 5 to 20' wide. The quartz carries up to \$6 gold per ton and 1% pyrite.

Development: by 3 tunnels, 200 to 300' long.

Equipment: ditches, Pelton water-wheels, compressor, aerial tram, and 20-stamp mill.

Work was suspended in August, 1918, on account of abnormal conditions. Property owned by company in Patterson district, Mono county, sold in 1916 to Nevada Progressive Gold Mng. Co., Inc.

COLUMBIA HILL GOLD MINING CO. CALIFORNIA

Office: 342 Mills Bldg., San Francisco, Calif.

Officers: W. G. Morrow, pres., J. A. Kelly, sec.

Inc. 1895, in Calif. Cap. \$20,000; par \$1; all issued.

Property: 64 acres, patented, in Grizzly Hill district, Nevada county, 21 miles N. of Nevada City.

COLUMBIA MINES CO. CALIFORNIA

Mine at Angels Camp, Calaveras county, Cal.

Officers. J. S. Rear, pres.; N. N. Merriman, v. p.; A. Caminetti, treas.; preceding with W. C. Tupper, W. P. Smith, F. M. Woods and J. G. Ferraris directors.

Inc. Jan., 1915, in California. Cap. \$750,000; \$1 par; all issued; no bonds

Property: 2 claims showing low-grade gold ore. Shaft reported to be down 250' with some drifting. Has 100-ton stamp mill. Stock was stricken from listing on New York Curb in June 1918.

Inactive.

COLUMBUS CONSOLIDATED GOLD MINING CO. CALIFORNIA

Address: 5930 Genoa St., Oakland, Calif.

Officers: D. J. Doyle, pres.; Carlo Dondero, sec.

Inc. 1898, in Calif. Cap. \$300,000; \$1 par.

Property: at Coulterville, Mariposa county.

COLUMBUS MINING CO. CALIFORNIA

Address: 216 Pine St., San Francisco, Calif.

Officers: J. Goldman, v. p.; S. G. O. King, sec.

Inc. 1912, in Calif. Cap. \$300,000; par \$1; issued 195,000 shares.

Property: 20 patented acres, near Tuolumne.

Development: by shafts and drifts.

CONFIDENCE GOLD MINES CORP'N. CALIFORNIA

Address: 604 Mission St., San Francisco, or Sonora, Tuolumne County, California.

Directors: W. B. Hunting. New York; E. S. Bolen and W. A. Stratta of Richmond, Va.; Edmund Juessen, mgr.

Inc. 1917, in Virginia. Cap. \$600,000; shares \$10 par; 1,000 preferred shares and 5,000 common. Listed on San Francisco Stock Exchange.

Property: Confidence group of claims and mill site, 12 miles E. of Sonora, opened by 33° shaft to depth of 1,100' with good ore opened on 800' level. Mine idle for 10 years past, has produced \$5,000,000 gold.

Equipment: new hoist and air compressor installed 1917, and in 1918 a small cyanide plant was added.

CONFIDENCE SILVER MINING CO. CALIFORNIA

Address: 342 Mills Bldg., San Francisco.

Officers: Jas. Newlands, Jr., pres.; W. G. Morrow, sec.

Inc. 1919, in Calif. Cap. \$74,880; par \$3; all issued.

CONSOLIDATED AMADOR MINING CO. CALIFORNIA

Company dissolved. See Old Eureka Mining Co.

CONSOLIDATED MINES CO. CALIFORNIA

Offices: 710 I. W. Hellman Bldg., Los Angeles, and Randsburg, Kern county, Cal. Seth J. Tyler, supt.

Officers: W. H. Hevren, pres.; S. H. Ellis, sec.

Inc. 1902, in Calif. Cap. \$200,000; 10¢ par; all issued. Stock listed on Los Angeles Exchange.

Property: 60 patented acres, in Kern county, Calif., near Randsburg, shows a vein containing gold and tungsten ore, developed by 350' and 500' shafts.

Equipment: includes 5-stamp mill, pumps, compressor and air-drills.

Idle several years.

CONSOLIDATED ST. GOTHARD GOLD MINING CO. CALIFORNIA

Mine leased to Delhi Mines Co., which see.

CONSOLIDATED WILSHIRE MINING CO. CALIFORNIA

Reorganized in May, 1920, as the Wilshire Consolidated Mining Co., which see.

CONSTELLATION MINING CO. CALIFORNIA

Address: C. V. Manner, sec., 530 Forty-First St., Oakland, Calif. J. F. Leahy, pres.

Inc. 1905, in Calif. Cap. \$100,000; \$1 par; assessable; all issued.

Property: 5 patented claims in Campo Seco district, Calaveras county, shows a contact fissure vein with 56° dip in schist. The orebody is 2' to 30' wide and 250' long. It carries chalcopryite and averages 6% copper.

Development: by 2 shafts to depth of 400', and 1,500' of workings.

Equipped with steam power. Idle, 1920.

CONTACT MINING & MILLING CO. CALIFORNIA

Probably defunct. See Vol. XIV.

CONTINENTAL MINES DEVELOPMENT CO. CALIFORNIA

No recent information. A holding concern only. See Vol. XIV.

COPPER GIRL MINING CO. CALIFORNIA

Address: 948 Market St., San Francisco, Calif.

Inc. 1918. Cap. \$50,000. Inactive.

COPPER KING MINING CO. CALIFORNIA

Mine office: Academy, Fresno county, Calif.

Officers: B. N. Garrett, pres.; Houston Bank & Trust Co., Houston, Tex., J. R. Sims, v. p.; H. C. Bocchio, sec.; C. A. Lewis, treas.; D. C. Demorest, eng.; Wm. Stewart, trustee, at last accounts.

Joint stock association. Cap. 100,000 shares; \$10 par; 50,000 shares issued. Stock was offered at \$7.50 in newspaper advertisements in 1917.

Property: 11 claims, 220 acres, 10 claims owned in fee and one under lease and option to purchase. 5 miles northeast of Letcher and 16 miles to shipping point at Clovis.

Geology: The vein runs N. E.-S. W. and is a belt 100' wide of mineralized schist and metadiabase containing lenses of iron and copper ore. Granodiorite bounds the belt to the east and diorite to the west.

Development: by 3 shafts, one working and two for ventilation, sunk on the dip of the vein. Main shaft has been sunk to the 8th level about 800' and has about 3,000' of drifts. In 1920, a 300' tunnel was driven, and good ore reported opened.

History: owned originally by the Copper King, Ltd., a London company, of which W. H. Daily was gen. mgr. Company is said to have spent \$1,250,000 on mine, palatial residences, and surface equipment, and to have produced 4,159,672 lb. of copper. Company went into hands of receiver in 1903. In 1907 property was sold for \$44,000 to the Hart Mining Co., produced

an amount equal to the purchase price but was forced to close because of the low price of copper at that time. The property was idle thereafter till operated by the present company.

Production: to 1917, was reported to be 50,000 tons of 8% copper ore.

COPPER MOUNTAIN CONS. MINING CO. CALIFORNIA

Supposedly dead. Former mine near Redding, Shasta Co., Cal. See Vol. XII, 1916.

COPPER MOUNTAIN MINING CO. CALIFORNIA

Presumably succeeds Titantic Copper Mtn. Mng. Co., of doubtful merit and fully described in Vol. XIV.

Address: Soledad, Calif.

Officers: Henry F. Melville, pres.; P. H. Smith, v. p.-treas.; W. D. McPhie, sec., with Anton Aaroe, Hans N. Aaroe, Chas. F. Turner and Leopold Cantor, directors.

Cap. \$1,000,000; \$1 par; stock sold in London.

Property: about 20 claims, 500 acres, 10 miles from Soledad, San Benito county, showing an outcrop of copper carbonate ore, claimed to assay 3½-10% copper, with some gold and silver; also tunnel site, mill site and water right location. Claims reported surveyed for patent in 1921 and management plans tunnel work.

The secretary writes that company has "an excellent undeveloped prospect, with a fine future with proper plant and development work. The amount of money this property would turn-out in dividends, dollars and cents, would depend upon the magnitude of plant and operations, everything is possible with good orebodies."

CORNUCOPIA COPPER MINING CO. CALIFORNIA

Care of Fred W. McConnell, atty., Healdsburg, Calif.

Inc. 1918, in Calif. **Cap.** \$1,000,000. Inactive.

No information obtainable.

CORONA MINING & MILLING CO. CALIFORNIA

Office: 770 E. 4th St., Salt Lake City, Utah.

Officers: F. A. Headlund, pres.; J. S. Ryan, v. p.; J. A. Stanley, sec.; W. G. Romney, treas.; with Thos. W. Bell, J. P. Moss, J. H. Hurd, directors. Thos. W. Bell, supt.; C. E. Merwin, Spokane, Wash., and Moscow, Utah, fiscal agent.

Inc. 1915, in Arizona. **Cap.** \$3,000,000; \$1 par; issued \$1,600,000. Farmers & Stockgrowers Bank, Salt Lake City, registrar. Annual meeting in June.

Property: the Confidence or Mormon Gold mine, 12 claims, 2 patented, 240 acres, in Funeral Range, Death Valley, Inyo county, 12 miles from Shoshone, a station on the Tonopah & Tidewater R. R. The mine was worked in wide.

early days by a small syndicate of Mormons.

Ore: free milling gold and a little silver in fissure vein in granite; said to assay \$20 per ton. Outcrop of vein said to be 1,200' long and from 4' to 70'

Development: tunnels and several shafts, deepest 140'. Management claimed 117,000 tons of \$20 ore. No recent information available.

COWBOY MINE CALIFORNIA

See Old Cowboy Mining Co.

CROESUS GOLD MINING & MILLING CO. CALIFORNIA

Address: 665 Fifth Ave., New York. **Mine address:** Walter B. Pearson, Alleghany, Calif.

Officers: Grant B. Schley, pres., 665 Fifth Ave., New York; C. G. Raynor, v. p.; W. J. Walworth, sec.-treas.; E. Richter, asst. sec.-asst. treas.

Property: 8 quartz claims and 1 millsite, including the old Plumbago mine, 2½ miles S. E. of Alleghany, Sierra county.

Geology: ore is gold quartz in veins in amphibolite schist, between 2 bands of serpentine.

Development: by 200' crosscut tunnel and 3,800' of drifting on the vein. A winze has been sunk 800' below the tunnel at a point 2,300' in, and levels driven from the winze.

Equipment: water power, generators, 2 compressors, hoist, machine-shop, buildings, 15 stamps, 4 vanners, etc.

The mine was closed late in 1918.

CULVER BAER MINING CO.

CALIFORNIA

Address: Cloverdale, Sonoma Co., Calif.

Officers: C. E. Humbert, pres.; G. E. Brush, v. p.; E. A. Menihan, sec-treas., with H. H. Moke and W. W. Furber, directors, all of Cloverdale.

Inc. 1900, in Calif. **Cap.** \$100,000; \$1 par; \$59,761 issued; assessable. **Annual meeting:** March.

Property: 2,200 acres, near the geysers of Sonoma county, 20 miles from Cloverdale, carries quicksilver ore. No operations since 1918.

CURTZ CONSOLIDATED MINES CO.

CALIFORNIA

Dead. Described in Vol. XII. Property now owned by E. Farrell and others of San Francisco.

CURTZ MINE

CALIFORNIA

Address: E. Farrell, Markleeville, Alpine county, Calif., or San Francisco.

Property: 20 claims in Alpine county, 10 miles E. of Markleeville, worked several years ago by Curtz Consolidated Mines Co. Claims are said to show a porphyry deposit of copper ore and have been opened to a depth of 350'. Reopened in 1920.

See "Mines of Alpine County", Calif. Bureau of Mines, 1917, p. 10.

DAGGETT REDUCTION & MILLING CO.

CALIFORNIA

Address: F. A. Shorey, supt., Daggett, San Bernardino Co., Calif.

Company erected a cyanide plant in 1917 to treat 200,000 tons of tailings from 2 old mills, 2 miles S. E. of Calico, San Bernardino county. The average assay of 150,000 tons is 3.6 oz. silver and 60¢ gold per ton, with 0.5 lb. mercury in the form of amalgam. Recovery is 78% of the silver, 30% of the gold, and 15% of the quicksilver. Costs are 68¢ per ton, treating 75 tons in 2 shifts of 8 hours. Built with limited capital, this venture paid for itself in 6 months.

Several thousand tons of silver-bearing tailing were treated in 1920.

See E. & M. Journal, June 5, 1920.

DAIRY FARM MINING CO.

CALIFORNIA

In which the Am. Sm. Sec. Co. hold a majority interest.

Property operated by Van Trent Mining Co., was practically worked out in 1917. See Vol. XII of this work; also Mines of Placer County, Calif. Mng. Bureau, 1917, p. 59.

DARWIN LEAD & SILVER MINES DEVELOP. CO.

CALIFORNIA

Described in Volume XIV. Reorganized in 1920 as the Darwin Silver Co., which see.

DARWIN SILVER CO.

CALIFORNIA

Office: Room 705, 208 S. La Salle St., Chicago.

Mine address: A. G. Kirby, mgr., Darwin, Inyo Co., Calif.

Officers: E. W. Wagner, pres.; Geo. J. Sayer, v. p.; R. H. Livingston, sec.-treas., with C. N. Snyder, Jos P. Griffin and Paul M. Herzog, directors.

Inc. in 1920, in Delaware, as a reorganization of the Darwin Lead & Silver Mines Development Co. **Cap.** \$2,000,000; \$1 par; 1,125,000 issued; assessable. 500,000 shares held for converting \$500,000 first mortgage, 7%, convertible gold bonds.

Property: 4 groups, 924 acres, 13,500' on ore zone, including the Columbia, Defiance, Independence, Lane, Liberty, Lucky Jim, and Promontory mines, 1½ to 2 miles N. E. of Darwin. The veins are in limestone and ore carries lead carbonate and galena.

Development: in the Lane—by 750 and 725' shafts, with over 2,000' of drifts; in the Lucky Jim—by 820' shaft and extensive workings; in the Promontory—by 320' incline. In Oct., 1920, it was said that 50 men were at work in the Lucky Jim mine.

Ore reserves: estimated to be 390,269 tons worth \$7,780,460 gross, and \$2,735,494 net. This valuation was based on lead at 8 cents and silver at \$1. Examined by Sidney Ball, F. R. Weeks, R. W. Hunt & Co. and others.

Equipment: a 50-ton pilot mill to be followed by 300-ton mill, also suitable buildings. Probably \$1,000,000 spent 1919-20.

Production: about \$500,000 from the Lane and \$1,500,000 from the Lucky Jim. In 1920, some lead-silver-copper ore was produced. Closed down, August, 1921.

DAVIS CONSOLIDATED MINING CO.

CALIFORNIA

Owned by Reeves A. Davis, Happy Camp, Calif.

Property: 200 acres of patented land along the Klamath river, Siskiyou county, formerly known as the Van Brunt, and just S. W. of Happy Camp. Work has been continuous since 1870. The bedrock is schist, and the gravel is up to 100' deep.

Equipment: includes complete water system for hydraulicking, Indian and Grider creeks supplying over 5,000 inches of water. Three monitors are operated, receiving water from a 32" pipe. Employs 16 men.

Production: no figures are available.

DEADWOOD GOLD MINING CO.

CALIFORNIA

Idle. **Address:** John T. Morgan, pres., or W. F. Du Bois, sec., Nevada City, Calif.

Inc. 1877, in Calif. Cap. \$50,000; par \$1; issued 10,218.

Property: 95 patented acres, 2 miles E. of Nevada City. Ore occurs in a vein up to 18" wide, carrying pyrite, galena, sphalerite and arsenopyrite.

Development: by incline shaft and 400' of drifts.

DEFENDER MINE

CALIFORNIA

F. B. Joyce, owner, Volcano, Amador county, Cal. Mine office: Defender, via Volcano, Amador county, Cal.

Property: 3 claims, 5 miles S. E. of Volcano.

Ore: is free milling by fine grinding, carries gold and some silver (parting value), with chalcopryite, in a vein in granodiorite. The lode has a strike of N. 15° W., dip 85° W., and an average width of 3' 6".

Development: 360' shaft, with 1,500' workings. At 130' south of shaft on 200' level the vein is cut by a diorite dike 22' thick; other smaller diorite dikes cut the main shoot and seem to be associated with the ore occurrence.

Equipment: includes steam hoist, compressor and a 10-stamp mill.

Production: to date said to be 12,000 tons, yielding \$140,000.

No recent news.

DELHI MINES CO.

CALIFORNIA

Address: Box 5021, Reno, Nevada.

Officers: A. A. Codd, pres.-gen. mgr.; G. V. Ward, sec.-treas.; H. B. Skewes, supt.

Inc. May, 1917, in Nevada. Cap. \$3,000,000; shares \$1 par. Is a successor of an old and successful company of similar name that has been inactive for many years.

Dividends: forty-five of 10c each and two of 25c each were paid by the old company.

Property: 11 claims, 5 patented, about 160 acres, in Columbia Hill district, 19 miles N. of Nevada city and Grass Valley, Nevada county. Claims contain two known vein systems, the Delhi and St. Gothard, the Delhi vein being the only one worked extensively. The vein is in slate. Ore is free milling gold, with 1% pyrite.

Mines are credited with production of \$1,514,435 from 1890 to 1914. Company is also operating the Cons. St. Gothard Co's mine.

Development: by 4 tunnels, about 200' apart, No. 4, the lowest, being 1,700' long; also by 400' vertical shaft. Vein at this depth said to be 3' to 8' wide and 360' long. Flow of water was 350 gal. per min. in 1914, when work was stopped.

Equipment: surface tramway connecting tunnels, pumps, one 900 and one 1,600 cu. ft. compressor, twenty 1,000 lb. stamps, concentrators, ditches for water, power and buildings.

In August, 1920, company completed a 900' tunnel, eliminating a 2-mile ditch and $\frac{1}{2}$ mile flume and completed an hydro-electric plant in 1921.

DEL NORTE MINING CO. CALIFORNIA

Idle. Office: 728 Montgomery St., San Francisco, Calif.

Officers: Wm. Pierce Johnston, pres.; Frank J. Hurley, sec.

Inc. 1869, in Calif. **Cap.** \$6,000; \$10 par. **Property:** at Happy Camp, Siskiyou Co., Calif.

DELTA CONSOLIDATED GOLD MINES CO. (THE) CALIFORNIA

Office: Redding, Shasta County, Calif. Mine on Dog Creek, near Delta, Calif.

Officers: L. C. Smith, pres.; D. W. R. Dunton, sec., A. C. Halter mgr. **Inc.** Sept. 3, 1903, in So. Dakota. **Cap.** \$1,000,000; shares \$1 par; all outstanding; assessable.

Property: the Pioneer group of 11 patented claims, 115 acres, and 80 acres timber land, on Dog creek, 6 miles west of Delta, shows quartz veins in andesite, the ores containing gold, silver, and a little copper. Ore snoots average 2' in width, with length of 300' and are said to average \$22 per ton.

Development: by tunnels with 3,500' of workings. Management claims to have 20,000 tons ore blocked out. Idle since 1915, but intends building a 50-ton stamp mill and cyanide plant.

Company has built a narrow-gauge railway connecting with the Southern Pacific tracks at Delta.

DEMAREST GOLD MINING CO. CALIFORNIA

Address: D. C. Demarest, pres.; or L. Monte Verda, sec., Angels Camp, Calaveras county, Calif.

Inc. 1898, in Calif. **Cap.** \$150,000; \$1 par; 124,000 issued.

Property: 340 patented acres, containing gold veins, developed by inclined shaft and levels. Equipped with mill.

DIADEM MINING CO. CALIFORNIA

Address: J. M. Harper, owner, Forest, Calif., but letters returned.

Property: 6 unpatented claims at Forest City, Sierra county adjoins Tightner property on north, shows gold in a quartz vein in much altered amphibolite schist.

Development: by 1,200' tunnel and 200' shaft with 125' of drifts. Company claims \$60,000 worth of ore blocked out and that shaft will be sunk to 500' level. At present the property is a prospect. Only assessment work being done.

Reported reopened under new management Feb., 1921, and electric hoist, pump, etc., installed.

DIANA DEVELOPMENT CO. CALIFORNIA

Property: in the Benton district of Mono county. In December, 1920, Company reported driving a large tunnel into Blind Springs hill to cut several veins. The old mines of this part are said to have yielded millions in gold. Old dumps are to be milled also.

DINERO MINING CO. CALIFORNIA

Address: J. H. Hunt, 112 Market St., San Francisco.

Inc. 1915, in California, by A. T. Hathaway, W. J. Connors, and S. Montague. **Cap.** \$2,000,000. 3,000 shares sold at auction in New York on Dec. 8, 1920, for a few dollars the lot.

Property: the Washington mine and Yuba Consolidated group of 17 claims (8 patented), mill site, water-rights, and timber land, about 800 acres, 5 miles E. of Washington, Nevada county. The Washington is said to have 15 veins. The Yuba group has yielded about \$2,000,000 to former owners. The formation is granodiorite and slate.

Development: by 640' Washington shaft, to be sunk to 1000' depth, and at the Yuba, by 1,600' tunnel and 960' shaft, at 600' from the portal, with levels at each 100'.

Equipment: hoist, pumps, and 30-stamp mill at the Washington; water-power, pump, 4-drill compressor, sawmill, and 30 stamps at the Yuba.

Work was resumed in 1915, but no further information is available.

DOUBLE O MINING CO.

CALIFORNIA

Address: 1037 Monadnock Bldg., San Francisco, Calif.

Officers: O. O. Emmons, pres.; W. L. Dunn, v. p.; M. S. Emmons, sec.-treas., with R. E. Pierce, directors.

Cap. \$150,000; par 10c.; 408,965 shares in treasury, May, 1921.

Property: 1,635 acres of placer ground, in Deadwood district. Placer county, 7 miles by trail from Michigan Bluff P. O. and 43 miles from Colfax. Company owns about 5,000' on each of 3 channels, with valuable timber.

Hudson Sons Co., 109 Russ Bldg., San Francisco, sponsors stock on San Francisco Exchange.

DUNCAN-ADAMS MINES

CALIFORNIA

Address: 430 Ochsner Bldg., Sacramento, Calif.

Officers: Chas. Duncan, pres.; J. J. Duggan, sec.

Inc. 1920, in Calif. **Cap.** \$250,000; 25c. par; 554,000 shares issued.

Property: about 600 patented acres in El Dorado county, said to contain gold and silver.

DUTCH CONSOLIDATED GOLD MINING CO.

CALIFORNIA

Address: J. F. Thompson, pres.; Chas. H. Segerstrom, sec.-mgr., Green & Jackson Sts., Sonora, Calif.

Inc. 1909, in Calif. **Cap.** \$10,000; par \$1.

Property: 70 acres in Tuolumne county, 2 miles S. of Jamestown, showing a N. S. quartz vein in slate.

Development: by 1,800' incline shaft with levels at each 100' down to 1,200' level.

Equipment: hoist, pump, compressor and 40-stamp mill.

DUTCH-SWEENEY MINING CO.

CALIFORNIA

Office: 1018 Crocker Bldg., San Francisco, Calif.

Mine at Quartz, Tuolumne Co., Calif.

Company practically ceased operations, Dec., 1917, and property now operated by the Pacific Coast Gold Mines Corp., which see.

EAGLE BIRD QUARTZ MINING CO.

CALIFORNIA

See California Eagle Bird Mining Co.

EAGLE COPPER CO.

CALIFORNIA

Taylorville, Plumas county, Cal. Owns groups of claims covering low-grade pyrite deposits with limited development. Company built small smelter, 1912. Idle and probably out of business.

EAGLE SHAWMUT MINING CO.

CALIFORNIA

Address: 1024 Merchants Exchange Bldg., San Francisco, Calif. Controlled by Belmont-Shawmut Mng. Co., at last report.

EARLY MINING CO.

CALIFORNIA

Address: Geo. H. Hook, sup., or W. H. Washburn, mill supt., Jerseydale, Mariposa county, Cal.

Property: a gold mine in southern section of auriferous belt of state. Ore medium grade and somewhat refractory. Mine unwatered 1917, after 1½ years litigation, and new oreshoot found at a vein intersection on 200' level.

The property has been under a working bond to J. H. Robertson of San Francisco, at a price of \$22,500. Mill has 50-h. p. gas engine, 10 stamps etc. Mine was small producer in 1919 and 1920.

EASTERN MINING CO.

CALIFORNIA

Operations ceased on account of low price of chrome ore. See Volume XIV.

ELDORADO EXPLORATION CO. CALIFORNIA

T. J. Flynn, mgr.; Burr Evans, cons. engr., Placerville, Cal.

Property: the Teddy Bear claims on the Mother Lode, about 8 miles south of Placerville, Eldorado county, is said to show 2 veins. Some \$60 ore reported found in 150' adit, at 160' depth, 1917.

Installed electric power in 1921, and a 10-stamp mill is operating on dump ore.

ELKO GOLD M. CO. CALIFORNIA

Address: Alonzo D. Hitchcock, Title Insurance Bldg., Los Angeles, Calif.

Inc. 1921, in Calif. Cap. \$50,000.

EL ORO DREDGING CO. CALIFORNIA

Address: 818 Mills Bldg., San Francisco, Calif.

Officers: W. S. Noyes, pres.; B. S. Noyes, sec.

Inc. 1902, in Ariz. Cap. \$600,000; par \$4; all issued.

Operates 2 dredges at Oroville, Butte county, and Yuba City, Sutter county. Ground near Yreka, Siskiyou county, exhausted in 1920, but 300 acres near Chico, Butte county, were being dredged in 1921. Operations at Oroville recovered 16.5c. per cu. yd., compared with the engineers estimate of 47c.; and recovered 15.44c. at Yuba, compared with the estimate of 15c. per cu. yd. The Oroville ground was cemented.

EL PORTAL MINING CO. CALIFORNIA

354 Pine St., San Francisco, Calif. No information.

EMPIRE MINES & INVESTMENT CO. CALIFORNIA

Address: J. W. Ward, sec., 375 Sutter St., San Francisco.

Mine address: F. W. Nobs, supt., Penn mine, Grass Valley, Calif. W. B. Bourne, pres.; G. W. Starr, mng. director.

A close corporation, controlled by the Bourne family. Dividends total several million dollars, the present annual profit being estimated unofficially at over \$500,000.

Property: the Empire, Pennsylvania, Cassidy Hill, and Crown Point mines, a total of over 600 acres, 1¼ miles S. E. of Grass Valley, Nevada county. The two last mentioned mines were purchased since 1915. The Pennsylvania was acquired for about \$500,000 in 1912. The Empire is the largest deep-mine gold producer in the State, and was seventh in the list of all gold properties in America during 1918. The mine was opened in 1850, and has never ceased operating since. G. W. Starr has been manager for 28 years.

Geology: the Empire vein outcrops in diabase-porphry, continues in this formation to a depth of 1,700', where it enters granodiorite. The average dip to 3,000' is 30°, and from 2,800' to 4,200' the average is 55°. The vein is from 18 to 24" wide. Ore is quartz, carrying both fine and coarse gold, up to 3% auriferous pyrite, and a little galena. It averages \$13 per ton. Payshoots are irregular; between the 1,500 and 2,100' levels little ore was found, so considerable advance exploration is necessary. All indications point to the vein persisting to great depth.

In the Pennsylvania the vein outcrops in granodiorite for 1,000' N. of the shaft, but not S. of it. In the upper levels the dip is 20°; in the lower 40°. The average width is from 12 to 18", with a maximum of 48". The Cassidy vein on the surface crosses the contact of diabase and granodiorite, and has been developed to a depth of 400' by shaft sunk at 32°. It is equipped with a 200 cu. ft. compressor, 150 cu. ft. compressor, 15 h. p. hoist, all motor driven, and suitable accessories.

The Crown Point vein lies in an altered serpentized diabase porphyrite near its contact with slate. A 620' incline was sunk and 2,500' of development done. The vein is from a few inches to 48" wide, carries coarse free gold and up to 3% sulphide.

Development: by the Empire 4,800' incline shaft and winze below bottom level. The workings are extensive, covering fully 40 miles. About

1,300' of new work is done each year. The lower levels are 400' apart. Most of the recent work is below 3,000', N. of the shaft. In July, 1920, extensive work was being done at 4,500'. One level is said to be 5,300' long. The main shaft is to be sunk to 7,500'. Rich ore was said to have been opened in Dec., 1920.

The Pennsylvania incline is 2,600' deep, but mine is reached through drifts at 3,400 and 4,600' from the Empire mine. Reliable authority states that this mine will rival the Empire or North Star mines in importance. At 3,400' the vein is of average width and high grade.

Equipment: includes water-power, 500 h. p. electric hoist at the Empire, capable of lifting 4 tons of ore from a depth of 7,500', 50-h. p. electric hoist at the Pennsylvania, mine pumps, 4 compressors, crushing stations at the shaft head-frames, machine, blacksmith, and carpenter shops, electric tramway, 80-stamp mill, tables, and cyanide plant, treating 12,000 tons a month from both mines. An extraction of 97% is reported.

Production: from 1850 to 1863, the total was \$1,056,234 from 28,100 tons of ore, excluding concentrates; from 1865 to 1878, a total of \$1,911,081, also exclusive of concentrates; from 1878 to 1898, about \$4,000,000; from 1898 to 1915, about \$11,000,000; and from 1915 to end of 1920, about \$6,000,000, making a grand total of at least \$24,000,000. The 80-stamp mill can crush 80,000 tons per annum.

EMPIRE MINING & MILLING CO.

CALIFORNIA

Address: 23½ Yakima, Wash. **Mine office:** Yreka, Siskiyou county, Cal.

Officers and directors: L. F. Brams, pres.; John S. Miller, v. p.; H. H. Dean, treas.; with J. C. Steinson and John H. Corbett, directors. G. S. Staley, sec.; J. C. Hubbert, supt., Yreka, Cal.

Inc. 1916, in Washington. **Cap.** \$750,000; \$1 par; increased from \$500,000, Jan. 31, 1921. Annual meeting first Tuesday in January. Expenses in 1920 were \$13,459.

Property: 25 claims, 2 miles from Yreka, also 2 patented claims, 7 miles from Yreka. Main group shows a gold vein in diorite, the ore running from \$2 to \$15 in gold per ton.

Development: totals 8,800' of tunnels, the longest 2,300'. Also 1,050' shaft work and 7,500' open-cut, deepest shaft, 600'. Company claims to have 50,000 tons of ore blocked out.

Equipment: electric hoist, small compressor, and a 5-stamp pilot mill.

EMPIRE WEST MINES CO.

CALIFORNIA

Address: J. W. Ward, sec, 375 Sutter St., San Francisco. E. L. Eyre, pres.

Inc. 1903, in Calif. Closely allied with the Empire Mines & Investment Co.

Property: the Omaha Consolidated, merged with the Menlo Mining Co. in 1896, in Grass Valley district, Nevada county, shows 3 main veins of quartz, carrying free gold and up to 4% sulphides. The Omaha vein outcrops in granodiorite, but enters diabase above No. 10 level.

Development: by 1,575' shaft in the Omaha, 1,000' shaft in the Homeward Bound. Workings totaled 10,555' from 1899 to 1906.

Production: estimated to total \$3,500,000 since 1857.

ENCINITAS COPPER CO.

CALIFORNIA

Letters returned 1921 from former **office:** 715 Timken Bldg., San Diego, Calif., and from mine address, Encinitas, San Diego county, Cal.

Property: 8 miles east of Encinitas shows a vein in diabase and porphyry, said to carry 4% copper, 5 oz. silver and \$4 gold.

Tests have shown the ore amenable to flotation and a 50-ton plant was to be installed 1917, but nothing more has been reported.

ENGELS COPPER MINING CO.

CALIFORNIA

Office: 393 Mills Bldg., San Francisco. **Mine office:** Engelmine, Plumas county, California.

Officers: Henry Engels, pres.; F. Klamp, v. p.; E. E. Paxton, treas. gen. mgr., with Richard Spreckles, I. J. Truman, Jr., J. F. Humburg, O. G. Traphagen, G. T. Cameron and C. Hedemann, directors. L. A. Bell, sec.

Operating staff: R. A. Kinzie, sup. eng.; W. R. Lindsay, supt.; J. J. Barrett, foreman at Engels mine; W. E. Kyle, foreman at Superior mine; W. J. Nelson, mill foreman.

Inc. 1901, in California. Cap. \$2,000,000; \$1 par. Increased August 5, 1919, to \$5,000,000; 2,194,757 issued. Stock listed on Honolulu Exchange.

Financial Statement, years ending Dec. 31:

Year	Assets.			Current	Deferred Charges	Sundry	Total
